AXA IM EQUITY TRUST

Statement of Manager's Responsibilities

AXA Investment Managers Paris ("Manager"), as Manager of AXA IM Equity Trust (formerly known as AXA Rosenberg Equity Alpha Trust) (the "Trust"), is responsible for preparing the Annual Report and the financial statements in accordance with applicable Irish law and the requirements of Financial Reporting Standards ("FRS") 102 issued by the Financial Reporting Council (FRC) and promulgated by the Institute of Chartered Accountants in Ireland (Generally Accepted Accounting Practice in Ireland).

In preparing these financial statements, the Manager is required to:

- Select suitable accounting policies and apply them consistently;
- Make judgements and estimates that are reasonable and prudent;
- Prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Trust and/or its Funds will continue in operation; and
- State whether the financial statements have been prepared in accordance with the applicable accounting standards, identify those standards, and note the effect and reasons for any material departure from those standards.

The Manager is responsible for keeping proper accounting records which disclose with reasonable accuracy at any time the financial position of the Trust and to enable it to ensure that the financial statements are prepared in accordance with accounting standards generally accepted in Ireland and comply with the provisions of the Trust Deed and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) and the Central Bank of Ireland's (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulation 2019 (collectively the "UCITS Regulations").

The Manager has appointed State Street Fund Services (Ireland) Limited (the "Administrator") for the purpose of maintaining proper accounting records. Accordingly, the accounting records are kept at State Street Fund Services (Ireland) Limited, 78 Sir John Rogerson's Quay, Dublin 2, Ireland. Under the UCITS Regulations, the Manager is also responsible for safeguarding the assets of the Trust. In this regard it has entrusted the assets of the Trust to State Street Custodial Services (Ireland) Limited (the "Trustee") for safekeeping in accordance with the Trust Deed. The Manager is also responsible with respect to its duties under the UCITS Regulations to take reasonable steps for the prevention and detection of fraud and other irregularities.

The Manager is responsible for the maintenance and integrity of the corporate and financial information included on the AXA Investment Managers UK Limited's ("Investment Manager") website. Legislation in the Republic of Ireland governing the preparation and dissemination of the financial statements may differ from legislation in other jurisdictions.

Transactions with Connected Persons

In accordance with Regulation 43 of the UCITS Regulations "Restrictions of transactions with connected persons" states that "A responsible person shall ensure that any transaction between a UCITS and a connected person is conducted a) at arm's length, and b) in the best interest of the unit-holders of the UCITS". Such transactions must be in the best interests of the Trust's unitholders.

Unitholders should refer to the Prospectus which identifies in the Conflicts of Interest section, many of the transactions with connected persons and the general nature of the contractual arrangements with the principal connected persons but it is not exhaustive of all transactions with connected persons.

As required under UCITS Regulation 81.4, the Board of Directors of the Manager, as responsible persons, are satisfied that there are arrangements in place, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 43(1) are applied to all transactions with a connected person; and all transactions with connected persons that were entered into during the period to which the report relates, complied with the obligations that are prescribed by Regulation 43(1).

The Board of Directors is not aware of any transactions with connected persons during the year ended March 31, 2023, other than those disclosed in these financial statements.

Note 12 to the financial statements details related party transactions in the period as required by the financial reporting standards. However, unitholders should understand that not all "connected persons" are related parties as such latter expression is defined by those financial reporting standards. Details of fees paid to related parties and certain connected persons are set out in Notes 5 and 12 to the financial statements.

The following transactions are transactions with connected persons:

(i) Foreign exchange transactions with State Street Bank and Trust Company;
(ii) Stock lending activity with AXA Investment Managers GS Limited as agent for the Manager and
(iii) Belgian paying agent fees paid to AXA Bank Europe SA.

AXA IM EQUITY TRUST

Trustee's Report to the Unitholders of AXA IM Equity Trust

Report of the Trustee to the Unitholders of AXA IM Equity Trust
We have enquired into the conduct of the Manager in respect of AXA IM Equity Trust for the year ended March 31, 2023, in our capacity as Trustee to the Trust.

This report including the opinion has been prepared for and solely for the unitholders in the Trust, in accordance with Regulation 34, (1), (3) and (4) in Part 5 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended, (the "UCITS Regulations"), and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Trustee
Our duties and responsibilities are outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations. One of those duties is to enquire into the conduct of the Manager in each annual accounting period and report thereon to the unitholders.

Our report shall state whether, in our opinion, the Trust has been managed in that period in accordance with the provisions of the Trust's Trust Deed and the UCITS Regulations. It is the overall responsibility of the Manager to comply with these provisions. If the Manager has not so complied, we as Trustee must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Trustee Opinion
The Trustee conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations and to ensure that, in all material respects, the Trust has been managed (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of the Trust Deed and the appropriate regulations and (ii) otherwise in accordance with the Trust's constitutional documentation and the appropriate regulations.

Opinion
In our opinion, the Trust has been managed during the year, in all material respects:

(i) in accordance with the limitations imposed on the investment and borrowing powers of the Manager and the Trustee by the Trust Deed, by the UCITS Regulations and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019, (the "Central Bank UCITS Regulations"); and

(ii) otherwise in accordance with the provisions of the Trust Deed, the UCITS Regulations and the Central Bank UCITS Regulations.

Independent auditors' report to the unitholders of the Funds of AXA IM Equity Trust

Report on the audit of the financial statements

Opinion

In our opinion, AXA IM Equity Trust's financial statements:

- give a true and fair view of the Funds' assets, liabilities and financial position as at 31 March 2023 and of their results for the year then ended;
- have been properly prepared in accordance with Generally Accepted Accounting Practice in Ireland (accounting standards issued by the Financial Reporting Council of the UK, including Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" and Irish law); and
- have been properly prepared in accordance with the requirements of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended).

We have audited the financial statements, included within the Annual Report and Audited Financial Statements, which comprise:

- the Statement of Financial Position as at 31 March 2023;
- the Statement of Comprehensive Income for the year then ended;
- the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Units for the year then ended;
- the Schedules of Investments for the Funds as at 31 March 2023; and
- the notes to the financial statements for each of the Funds, which include a description of the significant accounting policies.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) ("ISAs (Ireland)") and applicable law.

Our responsibilities under ISAs (Ireland) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the Trust in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, which includes IAASA's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Emphasis of matter - financial statements prepared on a basis other than going concern

In forming our opinion on the financial statements, which is not modified, we draw attention to note 2 to the financial statements which describes the reasons why the financial statements of AXA Rosenberg Pan-European Equity Alpha Fund have been prepared on a basis other than going concern.

Conclusions relating to going concern

With the exception of AXA Rosenberg Pan-European Equity Alpha Fund where a basis of accounting other than going concern has been adopted as set out in the Emphasis of matter - financial statements prepared on a basis other than going concern above, based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Funds' ability to continue as a going concern for a period of at least twelve months from the date on which the financial statements are authorised for issue.

With the exception of AXA Rosenberg Pan-European Equity Alpha Fund where a basis of accounting other than going concern has been adopted as set out in the Emphasis of matter - financial statements prepared on a basis other than going concern above, in auditing the financial statements, we have concluded that the manager's use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the Funds' ability to continue as a going concern.

Our responsibilities and the responsibilities of the manager with respect to going concern are described in the relevant sections of this report.

Reporting on other information

The other information comprises all of the information in the Annual Report and Audited Financial Statements other than the financial statements and our auditors' report thereon. The manager is responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon. In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

Responsibilities for the financial statements and the audit

Responsibilities of the manager for the financial statements

As explained more fully in the Statement of Manager's Responsibilities set out on page 2, the manager is responsible for the preparation of the financial statements in accordance with the applicable framework giving a true and fair view.

The manager is also responsible for such internal control as the manager determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the manager is responsible for assessing the Funds' ability to continue as going concerns, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the manager intends to cease operations, or has no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Our audit testing might include testing complete populations of certain transactions and balances, possibly using data auditing techniques. However, it typically involves selecting a limited number of items for testing, rather than testing complete populations. We will often seek to target particular items for testing based on their size or risk characteristics. In other cases, we will use audit sampling to enable us to draw a conclusion about the population from which the sample is selected.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA website at:

https://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8f-a98202dc9c3a/Description_of_auditors_responsibilities_for_audit.pdf.

This description forms part of our auditors' report.

Use of this report

This report, including the opinion, has been prepared for and only for the unitholders of each of the Funds as a body in accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) and for no other purpose. We do not, in giving this opinion, accept or assume

responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

AXA IM EQUITY TRUST

Investment Manager's Report (unaudited)

Summary

Investment Manager's Report for each Fund ("Fund" or "Funds") is disclosed on pages 7 to 30.

Funds' Outlook

Equity markets face continued challenges shaped by the war in Ukraine, rising commodity prices, supply chain issues, and rampant inflation in a context of slower economic growth. Central banks are continuing their fight against inflation despite declining economic data. Striking the right balance between controlling inflation and not slowing the economy is a tricky balancing act and one that markets are currently struggling to grapple with. This environment may continue to drive more market volatility. Furthermore, given the tough macro conditions consensus earnings forecasts look optimistic, against this backdrop we believe that companies with a strong track record of earnings delivery are likely to be rewarded.

AXA IM ALL COUNTRY ASIA PACIFIC EX-JAPAN SMALL CAP EQUITY QI

Investment Manager's Report (unaudited)
As at March 31, 2023

Small cap equities in Asia recorded losses during the review period as rising interest rates generally turned investors away from risk assets. There was significant divergence in the performance of individual markets, however, and a strong market reversal of sentiment at the start of 2023. Initially in the period under review, commodity reliant markets such as Australia and Indonesia held up better as they benefited from rising commodity prices. This trend reversed as we moved into the new year and markets focussed on growth and technology, benefiting stocks in countries such as Taiwan and South Korea. China, which had implemented stringent and prolonged sanitary restrictions due to COVID-19, rebounded strongly early in 2023 after finally relaxing all restrictions. This provided a boost to Asian markets generally on expectations that this re-opening would bolster economic growth across the region.

In this context, the Fund outperformed its benchmark return net of fees and expenses for share class A. Exposures to factors and industries provided a positive backdrop, and country exposures helped too. The Fund's tilt towards attractively valued and high-quality companies was generally well rewarded, while the selection of companies with low volatility also proved a favourable feature given market turmoil.

Stock selection proved more challenging, however. Positive contributions came from overweight exposure to several Indian banks such as Union Bank of India, Indian Bank and Bank of India, but performance was hurt by holding Brilliance China Automotive Holdings, which distributes BMW vehicles in China. Shares in the company were suspended during the period and slumped when trading resumed as its subsidiary revealed a loss of 4.1bn Yuan as a result of providing loan guarantees. Elsewhere, not owning Ecopro also detracted from relative returns. The Korean EV battery producer rose in excess of 600% strongly in 2023 as dominant Chinese peers face more scrutiny from the US.

Performance Summary

Performance summary – Class A Units	Fiscal year 2022/2023	3 Years Annualised	5 Years Annualised	Inception Date
AXA IM All Country Asia Pacific Ex-Japan Small Cap Equity QI (USD)	-10.24%	21.06%	2.75%	30-Sep-99
MSCI AC Asia Pacific Ex-Japan Small Cap	-12.75%	20.19%	2.60%	
Alpha	2.51%	0.87%	0.15%	

Performance calculations are net of fees, based on the reinvestment of dividends.

The benchmark, when there is one could be calculated on the basis of net or gross dividend. Please refer to the Prospectus for more information.

Data Source: Benchmark prices are obtained from the relevant benchmark provider. Net Asset Value ("NAV") is calculated by the Administrator of the Trust.

The historical performance is not an indicator of the current or future performance. Commissions and costs incurred when issuing and redeeming of units are not taken into account.

Total Expense Ratios ("TER")

Unit Class	ISIN	%
A USD	IE0008367009	1.13
A EUR	IE00BD008N99	1.13
A EUR Hedged	IE00BD008P14	1.15
B USD	IE0004334029	1.83
B EUR	IE0031069499	1.83
E EUR	IE0034277479	2.58

Methodology

The TER is calculated on an ex-post basis (i.e. based on the actual costs charged), by reference to the fiscal year.

The TER is equal to the ratio of the total operating costs to the average NAV. Total operating costs are expenses deducted from the assets for the relevant fiscal period. The average NAV is calculated using the NAV as at each valuation point.

Ongoing Charges

Unit Class	ISIN	%
A USD	IE0008367009	1.14
A EUR	IE00BD008N99	1.14
A EUR Hedged	IE00BD008P14	1.17
B USD	IE0004334029	1.84
B EUR	IE0031069499	1.85
E EUR	IE0034277479	2.60

Methodology

The ongoing charges figure ("OCF") is based on expenses for the twelve month year ending March 31, 2023. This figure may vary from year to year. As per the UCITS Directive, it includes stock lending fees and excludes portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertakings.

AXA IM EUROBLOC EQUITY

Investment Manager's Report (unaudited)
As at March 31, 2023

Eurobloc equities finally delivered positive returns over 1 year despite a tough first 6 months. Markets were initially screwed by higher than expected inflation given the disruption on energy market with the conflict in Ukraine and on production chains given persistent COVID-19 restrictions in China. From October onward, the conviction that we were approaching the tipping point on restrictive monetary policy and the sudden reopening in China have improved the economic outlook allowing a sharp recovery in equity markets. After a drop of -14.50% from March to September, markets rebounded by 26.49% to close the year on a decent 8.14% increase also supported by strong earnings growth.

Over the period, rising interest rates pressured long duration sectors (healthcare, real Estate, Technology) compressing valuation multiples, while value sectors (Auto, Energy, financials) were the main beneficiaries. Only exception were the luxury names which continued to benefit from a kind of revenge buying after the pandemic. Against this backdrop, the fund slightly underperformed mainly over the last 6 months, penalized by a c. 2-3% cash bucket which was created to exploit potential market weaknesses on the back of macroeconomic slowdown. A new investment objective and investment policy became effective on 23rd September 2022, with management of the Fund moving to AXA IM's judgemental equity team.

Performance Summary

Performance summary – Class A Units	Fiscal year 2022/2023	3 Years Annualised	5 Years Annualised	Inception Date
AXA IM Eurobloc Equity (EUR)	6.33%	16.95%	4.21%	30-Sep-99
MSCI EMU	8.14%	16.61%	5.97%	
Alpha	-1.81%	0.34%	-1.76%	

Performance calculations are net of fees, based on the reinvestment of dividends.

The benchmark, when there is one could be calculated on the basis of net or gross dividend. Please refer to the Prospectus for more information.

Data Source: Benchmark prices are obtained from the relevant benchmark provider. NAVs are calculated by the Administrator of the Trust.

The historical performance is not an indicator of the current or future performance. Commissions and costs incurred when issuing and redeeming of units are not taken into account.

AXA IM GLOBAL EMERGING MARKETS EQUITY QI

Investment Manager's Report (unaudited)
As at March 31, 2023

In aggregate, global emerging markets fell heavily over the review period as rising interest rates generally took their toll on performance by increasing the financing cost of their foreign denominated debt. There was significant divergence in the performance of individual markets, however, and a strong market rotation at the start of 2023. Initially in the period under review, commodity reliant markets such as Brazil or Indonesia held up better benefitting from rising commodity prices, while those markets focussed on technology and growth such as South Korea and Taiwan lagged. These trends reversed as we moved into the new year. China, which had implemented stringent and prolonged sanitary restrictions due to COVID-19, rebounded strongly early in 2023 after finally relaxing all restrictions. This provided a boost to Asian emerging markets on expectations that this re-opening would bolster economic growth.

In this context, the Fund lagged its benchmark return net of fees and expenses for share class A. While exposure to factors and countries provided a positive backdrop, stock selection proved particularly challenging.

The Fund's tilt towards attractively valued and high-quality companies was generally well rewarded, while the selection of companies with low residual volatility also proved a favourable feature given the market turmoil. Similarly, below benchmark exposure in European emerging markets proved beneficial considering the proximity of these market to the war in Ukraine.

Stock selection though proved most challenging across many areas. The largest detractor came from Wipro Ltd as the Indian information and technology stock warned that IT services revenues were likely to drop on slowing client spending. An overweight position in Internet Commerce JD.com also features among the largest detractors having suffered from weaker demand in the context of the prolonged Chinese lockdown and regulatory crackdown implemented by Beijing affecting the sector.

Performance Summary

AXA IM GLOBAL EQUITY QI

Investment Manager's Report (unaudited)
As at March 31, 2023

Global equity markets were in thrall to central banks over the past year as widespread inflation saw banks raise interest rates at the fastest pace for decades. High global commodity prices, particularly energy and food, drove this, as did the continued lockdown of China's economy. For much of 2022, investors sought safety in earnings, shunning stocks with high valuations and focussing on value and low volatility companies. This trend reverted sharply in the first quarter of 2023 as China lifted restrictions on its economy and inflationary pressures started to ease. A strong rotation into risk assets pushed markets up, mitigating some of the losses investors experienced in 2022.

Against this turbulent backdrop the Fund outperformed its benchmark over the year, with the fundamental risk factor profile particularly well rewarded. The Fund's tilt towards stocks trading at attractive valuation levels and a focus on profitable companies with strong balance sheets contributed positively over the year accordingly. Active industry exposures were unrewarded in aggregate, and underweighting aerospace and defence firms was detrimental in the context of the ongoing war in Ukraine. Offsetting this was the positive contribution coming from an underweight allocation to real estate companies. Returns from technology stocks were mixed, and with a strong rebound in demand for semiconductors in 2023 the overweight holding of Lattice Semiconductor was rewarded, but our models were less positive toward rival NVIDIA, and the underweight holding here was one of the largest detractors at stock level. The top contributor overall was an overweight holding of healthcare company Merck, with strong earnings growth boosting its share price over the year.

AXA IM GLOBAL SMALL CAP EQUITY QI

Investment Manager's Report (unaudited)
As at March 31, 2023

Global smaller companies delivered negative absolute returns over the period under review. Markets were particularly weak initially as war in Ukraine, ballooning inflation and slower economic growth took their toll on sentiment before staging a strong recovery towards the end of the period as risk appetite improved on expectations that inflation may have peaked.

In this context, the Fund delivered strongly positive active returns with exposures to risk factors and industries contributing strongly. Stock selection was also well rewarded. The Fund's tilt towards attractively valued high-quality companies was generally well rewarded, while the selection of companies with low residual volatility also proved a favourable feature given market turmoil.

At sector level, the Fund benefited strongly from its underweight exposure to US regional banks which delivered weak earnings for investors. This exposure proved most profitable in March 2023 following the bankruptcy of Silicone Valley Bank which soured the mood throughout the whole of the banking sector. Underweight exposure in the real estate sector was also beneficial as rate sensitive sector suffered given the sharp rise in interest rates. Stock selection provided the Fund with a further positive contribution most noticeably within the technology sector. A position in communication equipment firm Belden Inc held above benchmark delivered handsome returns having delivered earnings well above expectations throughout the period. A position in semiconductor Lattice Semiconductors was also well rewarded as demand for semiconductors rebounded.

AXA IM JAPAN EQUITY

Investment Manager's Report (unaudited)
As at March 31, 2023

This has been a difficult year for the fund. The market has been weak and the fund succumbed to profit taking across a number of core holdings. The result is that performance lagged the benchmark by a significant margin. We would agree with the consensus that rising inflation has impacted stocks that trade at premium valuations. Given the underlying growth style in the fund, it is somewhat expected that our positions suffered a derating. What was less predictable was the extreme volatility and extent of that selling pressure across many growth names. Markets globally are increasingly correlated with comments coming from Federal Reserve Chairman Jerome Powell, and the relief rally in the latter stages of the period coincided with the view that the US rate tightening cycle may be ending. Given that inflation remains elevated, we think it somewhat premature to predict a return to ultra loose monetary policy in the US, even if rate increases see a pause. However, the long-term ethos of the fund remains to focus on smaller cap companies with strong growth outlooks. This has not changed under the changing macro-economic landscape.

Japan like everywhere has been impacted by the Ukraine conflict. Relatively speaking, Japan is less exposed to Russian energy imports than Europe. Only 14% of their coal supply is from the region, which equates to 3% of total energy needs in Japan. What is clear though is that cost push inflation is beginning to bite in Japan just like elsewhere. Consumer Confidence has remained resilient, in part as the Japanese Government has pledged to subsidise gasoline prices, and with the rebound following COVID-19.

We made a new acquisition in Japanese electronic parts and battery maker TDK. TDK is a major player in batteries for portable electronics but is now rapidly expanding into other battery markets. Batteries for e bikes, e scooters, energy storage systems and also solid-state battery development are going to be a new leg for the top line. They are also a leading player in passive components with particular strength in components for autos. Here they see the shift to EVs tripling demand for their mainstay market in ceramic capacitors.

Lastly, we have switched into the global number two maker of mining and construction equipment, Komatsu. This is a way to increase the weighting to the buoyant commodity space which is not well represented in the holdings. Komatsu has a dominant position in mining equipment in Asia and Australasia. They have been more exposed to both thermal and coking coal but we are encouraged that recently there is a clear shift towards more environmentally friendly minerals: This is symbolic of the global move into electric vehicles. It is also good news for profitability at Komatsu as the super sized dump trucks for open cast copper mining are very high margin products . The growth in copper related demand should more than offset the fall in coal facing equipment according to management. This is good news for profits and also attracts us from an ESG perspective. It is also apparent that the last peak in the mining cycle was approximately a decade ago. As the normal replacement cycle for mining equipment is about ten years, there should be a supportive level of demand from customers wanting to upgrade aging fleets. The funding was made by top slicing some good performers in the large cap names, and also exiting JFE steel. JFE has been a reasonable performer, but we are concerned that the demand situation in China is uncertain.

The outlook has become somewhat clearer as the new Governor of the Bank of Japan has been approved by parliament. Ueda san has replaced long time incumbent Kuroda in April. We do not expect that he will make any near term changes to policy, but given the ongoing increase in inflationary pressures in Japan, we assume that he will need to make some moves towards the second half of this year. What is clear is that Japanese corporates are finally raising wages for workers in Japan. The size of increases seems to be close to 10% in the case of larger companies, which will surely add more incentive for Governor Ueda to change monetary policy at some point.

What is also striking is a clear shift in corporate awareness of share prices. In late January this year, the Tokyo Stock Exchange issued a directive "encouraging" companies trading below book value to announce measures to get their share prices higher. People didn't pay too much attention to it initially, but several key announcements have been made subsequently which are worth highlighting: I met Citizen Watch on a recent trip to Japan, which has a global leading watch making and micro machine tool business. They have an over capitalised balance sheet, like many Japanese stocks. In February, shortly after the TSE directive hit the tape, they announced an impressively large share buyback, wrong footing the market. The shares have surged higher, and having met management, I suspect that this will be a sign of things to come at Citizen, and other companies.

It is clear from this trip that something has changed in the mindset of many companies. Activist investors have been growing in importance for a number of years. Both foreign giants like Elliot and Third Point have been vocal and evident for a while, but so too domestic players like Murakami and Effisimo. Dai Nippon Printing, a company with $3 billion of cross shareholdings on it's balance sheet, announced plans to sell down their stock holdings and spend some of the proceeds on a $2 billion buyback. Elliot own 5% of the stock and have been a catalyst for this. What's clear is that there is pressure coming from a number of areas for corporate Japan to change. It's good timing for Japanese retail investors too. New, larger NISAs, or tax free savings plans are launching soon out there. With the market yielding close to 3% and trading at 1.1X Book, it is an interesting time in Japan.

Warren Buffet has so far put $20 billion to work in Japan's largest 5 trading companies. He began that trade several years ago, and is well in the money already. He's always early to invest, but the rest of us are not too late. He was back in Japan again in March, on the watch for more candidates for the Berkshire Hathaway portfolio. A new investment objective and investment policy became effective on 23rd September 2022, with management of the Fund moving to AXA IM's judgemental equity team.

AXA IM JAPAN SMALL CAP EQUITY

Investment Manager's Report (unaudited)
As at March 31, 2023

The portfolio was restructured in the 4th quarter of 2022 following the management team changeover. The new portfolio is more concentrated (invested in a smaller number of stocks), and focused on long-term growth businesses. Currently, in Japan, significant changes are happening in various aspects of society. Corporations are more aware of ESG, notably environmental issues and human resources. More productive operation and work / life balance have been discussed for over a decade but COVID-19 finally triggered meaningful changes. Against this backdrop, in many different sectors, digital transformation is under way, which will improve the efficiency of Corporate Japan, and this, in turn, also create numerous innovative businesses. In Japan there are more than 4000 stocks listed with many of them poorly covered by analysts. As a result, there are a number of promising businesses left under-valued. The major strength of the new management team of the portfolio is the ability to communicate directly with Japanese companies. This, we believe, provides an advantage to discover investment opportunities. In the meantime, investment performance of the portfolio against the benchmark has been tough. This was due to the prolonged adverse market environment against growth stocks, particularly in the small cap segment. Looking forward, however, our view is positive. In Japan, wages, which have been flat for three decades, are now finally rising. This will likely change people's deflationary mindset. Many corporations, including smaller ones, are providing more investor relations activities for global investors as well as domestic individuals. In Japan, more than 50% of total 2000 trillion yen (appx.€13 trillion) financial asset owned by individuals is sitting in bank deposits, which are yielding a virtually zero return. This is now likely to change due to the government's effort to encourage the shift from deposit to investment, such as an introduction of an improved NISA, a Japanese version of ISA. A new investment objective and investment policy became effective on 23rd September 2022, with management of the Fund moving to AXA IM's judgemental equity team.

Performance Summary

Performance summary – Class A Units	Fiscal year 2022/2023	3 Years Annualised	5 Years Annualised	Inception Date
AXA IM Japan Small Cap Equity (JPY)	-1.33%	7.82%	-1.62%	30-Sep-99
MSCI Japan Small Cap	8.09%	13.74%	3.36%	
Alpha	-9.42%	-5.92%	-4.98%	

Performance calculations are net of fees, based on the reinvestment of dividends.

The benchmark, when there is one could be calculated on the basis of net or gross dividend. Please refer to the Prospectus for more information.

Data Source: Benchmark prices are obtained from the relevant benchmark provider. NAVs are calculated by the Administrator of the Trust.

The historical performance is not an indicator of the current or future performance. Commissions and costs incurred when issuing and redeeming of units are not taken into account.

TER

Unit Class	ISIN	%
A JPY	IE0008366696	0.96
A EUR	IE00BD007T86	0.97
A EUR Hedged	IE00BD008K68	0.99

AXA IM PACIFIC EX-JAPAN EQUITY QI

Investment Manager's Report (unaudited)
As at March 31, 2023

Markets in the Pacific region recorded losses during the review period as rising interest rates generally took their toll on performance by increasing the financing cost of their foreign denominated debt. There was significant divergence in the performance of individual markets, however, and a strong market rotation at the start of 2023. Initially in the period under review, commodity reliant markets such as Australia held up better, and benefitting from rising commodity prices. This trend reversed as we moved into the new year. China, which had implemented stringent and prolonged sanitary restrictions due to COVID-19, rebounded strongly early in 2023 after finally relaxing all restrictions. This provided a boost to Asian markets on expectations that this re-opening would bolster economic growth with Hong Kong and Singapore benefiting the most.

In this context, the Fund lagged its benchmark return net of fees and expenses for share class A. While exposure to factors and countries provided a positive backdrop, stock selection proved particularly challenging.

The Fund's tilt towards attractively valued and high-quality companies was generally well rewarded, while the selection of companies with low volatility also proved a favourable feature given market turmoil.

Stock selection proved challenging across several areas. The largest detractor came from Brilliance China Automotive Holdings, which distributes BMW vehicles in China. Shares in the company were suspended during the period and slumped when trading resumed as its subsidiary revealed a loss of 4.1bn Yuan as a result of providing loan guarantees. Elsewhere a position in the meat packaging business WH Group detracted as its share price fell following the settlement of price fixing lawsuit at one of its US subsidiary companies.

AXA IM US ENHANCED INDEX EQUITY QI

Investment Manager's Report (unaudited)
As at March 31, 2023

US equity markets were in thrall to central banks over the past year as widespread inflation saw banks raise interest rates at the fastest pace for decades. High global commodity prices, particularly energy and food, drove this, as did the continued lockdown of China's economy. For much of 2022, investors sought safety in earnings, shunning stocks with high valuations and focussing on value and low volatility companies. This trend reverted sharply in the first quarter of 2023 as China lifted restrictions on its economy and inflationary pressures started to ease. A strong rotation into risk assets pushed markets up, mitigating some of the losses investors experienced in 2022.

Against this turbulent backdrop the Fund performed in line with its benchmark over the year, with is fundamental risk factor profile particularly well rewarded. The Fund's tilt towards stocks trading at attractive valuation levels and a focus on profitable companies with strong balance sheets contributed positively over the year accordingly. Active industry exposures were unrewarded in aggregate, and underweighting aerospace and defence firms was detrimental in the context of the ongoing war in Ukraine. Offsetting this was the positive contribution coming from an underweight allocation to real estate companies. Given the high price of oil over the period, not holding ExxonMobil detracted from relative returns. One of the top contributors was an underweight allocation to retailer Amazon, whose shares fell as consumers cut back on discretionary expenditure.

AXA IM US EQUITY QI

Investment Manager's Report (unaudited)
As at March 31, 2023

US equity markets were in thrall to central banks over the past year as widespread inflation saw banks raise interest rates at the fastest pace for decades. High global commodity prices, particularly energy and food, drove this, as did the continued lockdown of China's economy. For much of 2022, investors sought safety in earnings, shunning stocks with high valuations and focussing on value and low volatility companies. This trend reverted sharply in the first quarter of 2023 as China lifted restrictions on its economy and inflationary pressures started to ease. A strong rotation into risk assets pushed markets up, mitigating some of the losses investors experienced in 2022.

Against this turbulent backdrop the Fund outperformed its benchmark over the year, with the fundamental risk factor profile particularly well rewarded. The Fund's tilt towards stocks trading at attractive valuation levels and a focus on profitable companies with strong balance sheets contributed positively over the year accordingly. Active industry exposures were unrewarded in aggregate, and underweighting aerospace and defence firms was detrimental in the context of the ongoing war in Ukraine. Offsetting this was the positive contribution coming from an underweight allocation to real estate companies. Returns from technology stocks were mixed, and with a strong rebound in demand for semiconductors in 2023 the underweight holding of NVIDIA was one of the largest detractors at stock level. One of the top contributors was an underweight allocation to retailer Amazon, whose shares fell as consumers cut back on discretionary expenditure.

Performance Summary

Performance summary – Class A Units	Fiscal year 2022/2023	3 Years Annualised	5 Years Annualised	Inception Date
AXA IM US Equity QI (USD)	-7.86%	17.86%	8.40%	30-Sep-99
S&P 500	-8.20%	18.03%	10.58%	
Alpha	0.34%	-0.17%	-2.18%	

Performance calculations are net of fees, based on the reinvestment of dividends.

The benchmark, when there is one could be calculated on the basis of net or gross dividend. Please refer to the Prospectus for more information.

Data Source: Benchmark prices are obtained from the relevant benchmark provider. NAVs are calculated by the Administrator of the Trust.

The historical performance is not an indicator of the current or future performance. Commissions and costs incurred when issuing and redeeming of units are not taken into account.

TER

Unit Class	ISIN	%
A USD	IE0008365516	0.79
A EUR	IE0006SS2B07	0.78
A EUR Hedged	IE00B02YQP67	0.82
B USD	IE0004345025	1.43
B EUR	IE0031069275	1.44
B EUR Hedged	IE00B02YQR81	1.46
E EUR Hedged	IE00B02YQS98	2.20
M USD	IE00B24J4T37	0.09

Methodology

The TER is calculated on an ex-post basis (i.e. based on the actual costs charged), by reference to the fiscal year.

The TER is equal to the ratio of the total operating costs to the average NAV. Total operating costs are expenses deducted from the assets for the relevant fiscal period. The average NAV is calculated using the NAV as at each valuation point.

Ongoing Charges

Unit Class	ISIN	%
A USD	IE0008365516	0.79
A EUR	IE0006SS2B07	0.79
A EUR Hedged	IE00B02YQP67	0.82
B USD	IE0004345025	1.44

B EUR Hedged	IE00B02YQR81	1.47
E EUR Hedged	IE00B02YQS98	2.22
M USD	IE00B24J4T37	0.09

Methodology

The OCF is based on expenses for the twelve month year ending March 31, 2023. This figure may vary from year to year. As per the UCITS Directive, it includes stock lending fees and excludes portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertakings.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended March 31, 2023

1. Organisation

AXA IM Equity Trust (formerly known as AXA Rosenberg Equity Alpha Trust) (the "Trust") was created on September 17, 1999 as an open-ended umbrella structure Unit Trust with segregated liability between its sub-funds ("Fund" or "Funds") under a Deed of Trust and is authorised by the Central Bank of Ireland (the "Central Bank") as an Undertaking for Collective Investment in Transferable Securities ("UCITS"). The Trust may be divided into different Funds with one or more class of unit. Creation of any new Fund or class of unit will require the prior approval of the Central Bank.

The following Funds were trading during the year ended March 31, 2023:

AXA IM All Country Asia Pacific Ex-Japan Small Cap Equity QI[1]

2. Significant Accounting Policies

Basis of Preparation

These annual audited Financial Statements have been prepared in accordance with Financial Reporting Standard 102 ("FRS 102") and Irish statute comprising the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) and the Central Bank's (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings For Collective Investment In Transferable Securities) Regulations 2019 (collectively the "UCITS Regulations").

The financial statements have been prepared on a going concern basis, except for AXA Rosenberg Pan-European Equity Alpha Fund which the Board of Directors of the Manager resolved to liquidate. The last dealing day was on November 16, 2022.

A provision of EUR25,000 associated with the liquidation of AXA Rosenberg Pan-European Equity Alpha Fund has been provided for.

The Trust has continued to avail of the exemption available to open-ended investment funds ("IF") under FRS 102 and is not presenting Cash Flow Statement.

Critical Accounting Estimates and Assumptions

Management makes fair value estimation and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results.

The principal accounting policies and estimation techniques applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated in the following text.

Accounting Period

The accounting period end is March 31 each year. These financial statements cover the twelve month period to March 31, 2023.

Historical Cost Convention

The financial statements have been prepared under the historical cost convention as modified by the revaluation of financial assets and financial liabilities (including derivative financial instruments) at fair value through profit or loss.

Financial Instruments

(i) Classification

The Trust classifies its investments in equity securities as financial assets or financial liabilities at fair value through profit or loss. These financial assets and financial liabilities are designated by the Board of Directors of the Manager at fair value through profit or loss at inception. Derivatives (forwards) are classified as held for trading. Financial assets and financial liabilities designated at fair value through profit or loss at inception are those that are managed and their performance evaluated on a fair value basis in accordance with the Trust's documented investment strategy. The Trust's policy is for the Investment Manager and the Directors of the Manager to evaluate the information about these financial assets or financial liabilities on a fair value basis together with other related financial information.

(ii) Recognition/Derecognition

The Trust recognises financial assets and financial liabilities on the date it becomes a party to the contractual provisions of the instrument. A regular purchase of financial assets is recognised using trade date accounting. From this date any gains and losses arising from changes in fair value of the financial assets or financial liabilities are recorded.

Financial instruments are derecognised when the rights to receive cash flows from the investments have expired or the Trust has transferred substantially all risks and rewards of ownership.

(iii) Measurement

Financial assets and financial liabilities at fair value through profit and loss are measured initially at fair value (transaction price). Subsequent to initial recognition, all financial assets and financial liabilities are classified at fair value through profit or loss.

For the year ended March 31, 2023

2. Significant Accounting Policies (continued)

Financial Instruments (continued)

(iii) Measurement (continued)
Gains and losses arising from changes in the fair value of the financial assets or financial liabilities at fair value through profit or loss category are presented in the Statement of Comprehensive Income in the period in which they arise. Dividend income from financial assets at fair value through profit or loss is recognised in the Statement of Comprehensive Income within dividend income when the Trust's right to receive payments is established.

(iv) Fair Value Estimation
Financial Instruments Traded in Active Markets
The fair value of financial instruments traded in active markets (such as publicly traded derivatives and trading securities) is based on quoted market prices at the Statement of Financial Position date. The quoted market price used for financial assets held by the Trust is the closing mid-market price.

IF
Investments in IF are valued at the unaudited fair value for the units obtained from the administrator of the IF. The change in the NAV of these units is recognised within net (loss)/gain on investments and foreign currency in the Statement of Comprehensive Income (calculated by reference to the unaudited NAV on the valuation date as calculated by the administrator of the IF).

Financial Instruments that are not Quoted or Listed
The Funds may, from time to time, hold financial instruments that are not quoted, listed or normally dealt in on a regulated market such as over-the-counter derivatives. Fair values of such instruments are determined by using valuation techniques estimated by a competent person, firm or association making a market in such investments (approved for the purpose by State Street Custodial Services (Ireland) Limited (the "Trustee")).

(v) Forward Foreign Currency Exchange Contracts
A forward foreign currency exchange contract is a commitment between a Fund and a counterparty to make or take delivery of a fixed amount of a specified foreign currency at a predetermined future date at a specific price. At each valuation, the difference between the contract price and the current forward rate for contracts of the same maturity is used to calculate the unrealised gain or loss of the Fund's forward currency exchange contracts. The counterparty for forward foreign currency exchange contracts is State Street Bank and Trust Company.

Foreign Exchange Translation

(a) Functional and Presentation Currency
The functional and presentation currency of each Fund is the base currency of each Fund which is determined by the Manager and will be described in the relevant Fund details in the Prospectus. Items included in the Funds' financial statements are measured using the currency of the primary economic environment in which it operates (the "functional currency"). The functional currency, which is either United States Dollar ("USD"), Euro ("EUR") or Japanese Yen ("JPY"), is shown in the Statement of Financial Position for each of the Funds.

(b) Transactions and Balances
Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the Statement of Comprehensive Income.

Proceeds from subscriptions and amounts paid on redemption of redeemable participating preference units are translated at the exchange rates at the date of the actual trade.

Cash at Bank and Bank Overdraft

Cash at bank and bank overdrafts, which include cash in hand and overdraft facilities, are held with State Street Bank and Trust Company. The cash balances used for collection of subscriptions, payment of redemptions and dividends for the Trust that were redesignated, and are deemed assets of the Trust are held with Bank of America Merrill Lynch.

Transaction Costs

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the Fund had not acquired, issued or disposed of the financial instrument. When a financial asset or financial liability is recognised initially, a Fund shall measure it at its fair value through profit or loss plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Transaction costs on forwards cannot be practically or reliably gathered as they are embedded in the transaction and cannot be separately verified or disclosed. Transaction costs on the purchase and sale of equity investments are included in net gain on investments and foreign currency in the Statement of Comprehensive Income.

Custody transaction costs include transaction costs paid to the sub-custodian and are included in the Statement of Comprehensive Income. Purchases and sales transaction costs include identifiable brokerage charges, commissions, transaction related taxes and other market charges.

Redeemable Participating Units

The NAV per unit of each Fund is determined by dividing the NAV of the relevant class of units in the relevant Fund by the total number of units outstanding in the relevant class of units of the relevant Fund in issue.

Redeemable participating units are redeemable at the unitholders option and are classified as financial liabilities. The redeemable participating units can be put back to the Trust at any time for cash equal to a proportionate unit of the Trust's NAV. The redeemable participating units are carried at the redemption amount that is payable at the Statement of Financial Position date if the unitholder exercises the right to put the units back to the Trust.

For the year ended March 31, 2023

2. Significant Accounting Policies (continued)

Redeemable Participating Units (continued)

Redeemable participating units are issued and redeemed at the holder's option at prices based on the Trust's NAV per unit at the time of issue or redemption.

The unitholders are entitled to payment of the proportionate unit value based on the Trust's NAV per unit on the redemption date and with the exception of accumulating units, they are entitled to dividends. The movement in net assets from operations attributable to holders of redeemable participating units, issue and redemption of redeemable units during the year are shown on the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Units.

Dilution and Swing Pricing

In certain circumstances, and at the Manager's discretion, the Manager applies a dilution adjustment in the calculation of the subscription and redemption price, a policy known as "swing pricing". The level of a dilution adjustment for each Fund is calculated using an estimate for duties and charges and spreads that may accrue to the Fund when buying or selling investments to satisfy net purchases or redemptions of units. The need to make a dilution adjustment for a Fund will depend on the volume of purchases or redemptions of units in the Fund on any given dealing day. There was no swing pricing applied by any Fund as at the financial year ended March 31, 2023 (March 31, 2022: AXA IM US Equity QI applied swing pricing). Swung and unswung NAV per Unit are disclosed on page 30.

Income and Expenses

Dividend income arising from investments is credited to the Statement of Comprehensive Income on an ex-dividend basis. Interest income is accrued on an effective yield basis. Dividend income is shown gross of any non-recoverable withholding taxes, which are disclosed separately in the Statement of Comprehensive Income and net of any tax credits.

Securities lending income is received net of fees and is recognised in the Statement of Comprehensive Income. Income receivable on securities lending activities is accounted for on an accruals basis.

Other income is recognised in the Statement of Comprehensive Income and is accounted for on an accruals basis.

Administration fees, Management fees, Trustee fees and other expenses, as applicable, are accounted for on an accruals basis.

Taxation

The Funds currently incur withholding taxes imposed by certain countries on dividends and other investment income and capital gains taxes. Such income or gains are recorded gross of the taxes in the Statement of Comprehensive Income. Withholding taxes and capital gains taxes are shown as separate items in the Statement of Comprehensive Income.

3. Management

The Manager of the Trust is AXA Investment Managers Paris. Under the Trust Deed, the Manager is entitled to fees, details of which are contained in Note 5.

The Manager has delegated the performance of the investment management functions of the Trust to the Investment Manager, who in turn has outsourced some of these functions to the Sub-Investment Managers, details of which are contained in Note 5 to the financial statements.

For the year ended March 31, 2023

5. Fees and Expenses

Management Fees

The Manager has entered into a Trust Deed with the Trustee. Under this Trust Deed, the Manager is entitled to a fee expressed as a percentage of the daily NAV of each respective unit class for the period where the relevant unit class was active during the year, which is calculated daily and payable monthly in arrears. The Manager will be responsible for discharging, from this fee, all fees of the Investment Manager (who will in turn, discharge from its fees, the fees of any sub-investment managers). The out of pocket expenses of the Manager, Investment Manager and Sub-Investment Managers will be borne by the Trust.

For the year ended March 31, 2023

5. Fees and Expenses (continued)

Administration Fees
State Street Fund Services (Ireland) Limited, the Administrator, shall be entitled to a fee calculated as a percentage per annum of the NAV of each Fund paid out of the assets of the applicable Fund. This annual fee is calculated based upon each Fund's daily average net assets and payable monthly in arrears in an amount of 0.03% for those Funds with less than USD100 million of average net assets. For those Funds with over USD100 million of average net assets, the rate is 0.0365% on the first USD200 million of average net assets, 0.02% on the next USD300 million of average net assets and 0.01% of average net assets above USD500 million.

The Administrator shall also be entitled to receive a transfer agency fee of USD10 for each automated, or USD25 for each manual, transfer agency transaction including each subscription, redemption, transfer, conversion and distribution.

The Administrator shall also be entitled to be reimbursed for all properly vouched reasonable expenses incurred by the Administrator on behalf of the Trust.

The Administrator fee will not be more than 0.25% of average net assets per annum.

Trustee and Custody Fees
The Trustee shall be entitled to fees calculated as a percentage per annum of the NAV of each Fund payable out of the assets of each Fund based on the average NAV of each Fund of 0.01% of average net assets per annum, which is calculated daily and payable monthly in arrears.

The Trustee shall be entitled to be reimbursed for all agreed sub-custodian fees, expenses and transaction charges (which will be charged at normal commercial rates), together with reasonable and properly vouched out-of-pocket expenses incurred by the Trustee in the performance of its duties under the Trust Deed out of the assets of each Fund.

Transaction Costs
For the years ended March 31, 2023 and March 31, 2022 each Fund incurred transactions costs, as defined in Note 2 to the financial statements as follows:

Fund	Currency	Transaction Costs for the year ended March 31, 2023	Transaction Costs for the year ended March 31, 2022
AXA IM All Country Asia Pacific Ex-Japan Small Cap Equity QI	USD	364,232	702,735
AXA IM Eurobloc Equity	EUR	271,601	259,526
AXA IM Global Emerging Markets Equity QI	USD	253,640	325,334
AXA IM Global Equity QI	USD	630,950	512,118
AXA IM Global Small Cap Equity QI	USD	57,306	277,441
AXA IM Japan Equity	JPY	17,672,362	16,176,929
AXA IM Japan Small Cap Equity	JPY	9,608,416	6,950,257
AXA IM Pacific Ex-Japan Equity QI	USD	221,275	298,434
AXA Rosenberg Pan-European Equity Alpha Fund*	EUR	59,981	159,564
AXA IM US Enhanced Index Equity QI	USD	569,257	523,227
AXA IM US Equity QI	USD	434,244	366,600

*AXA Rosenberg Pan-European Equity Alpha Fund terminated on November 16, 2022.

Distribution Fees
The Manager has appointed the Investment Manager as Master Distributor for the Trust. The Distributor is entitled to a distribution fee in respect of all the active classes of units (except for class E), which will be payable by the Manager out of its own assets. The fee payable in respect of class E units shall be payable out of the assets attributable to the class E units of the relevant Fund only. This distribution fee is calculated daily and paid monthly in arrears, at an annual rate of up to a maximum of 0.75% per annum on the relevant Units and calculated on the average daily NAV of the relevant units.

6. Distributions

The Directors of the Manager are empowered to declare dividends on any class of units in respect of any Fund. Generally, it is intended that the classes of units shall be accumulating classes and, therefore, it is not intended to distribute dividends to unitholders in these classes. In the absence of such a declaration, the net revenue from these classes will be accumulated and reinvested on behalf of unitholders.

For the year ended March 31, 2023

6. Distributions (continued)

However, the Directors may create classes of units that are distributing units. In respect of these units, the Directors have resolved that distributions should be paid out of the interest and dividends earned by the relevant Funds, which are attributable to the relevant distributing unit class. These dividends will be declared and paid as set out in the relevant Funds' details (in the Trust's Prospectus) which will also set out the relevant distribution dates and payment frequencies. Any distribution or other monies payable in respect of any unit (excluding any fees) will be paid by CHAPS, SWIFT, telegraphic or federal wire transfer to the bank account of the relevant unitholder as indicated on the Application Form for the units or as otherwise advised or agreed between the Manager and the unitholder.

7. Soft Commissions and Directed Brokerage Services

During the year ended March 31, 2023 and the year ended March 31, 2022 the Trust did not enter into any soft commission or directed brokerage services arrangements.

8. Securities Lending

The Trust may employ techniques and instruments relating to transferable securities for efficient portfolio management purposes including security lending arrangements.

The Funds may utilise stock lending agreements. In such a transaction, the Funds may temporarily transfer their securities to a borrower, with agreement by the borrower to return equivalent securities to the Funds. In entering into such a transaction a Fund will be endeavouring to increase the returns of its portfolio of securities by receiving a fee for lending its securities to the borrower, while retaining the securities potential for capital appreciation.

The Manager on behalf of the Funds has appointed AXA Investment Managers GS Ltd to act as its agent for the purpose of lending securities to brokers, dealers and other financial institutions. The agent earns a fee equal to 20% of the security lending income earned on the transaction.

Securities lending income is received net of fees as shown in the Statement of Comprehensive Income for each Fund. Securities lending income receivable is accounted for on an accruals basis and shown in the Statement of Financial Position.

Collateral received can take the form of cash and highly-rated government debt. The collateral is maintained for the Funds at a minimum margin of 105% of the value of the security on loan and marked to market daily. There was no cash collateral received as at March 31, 2023 and March 31, 2022.

As of March 31, 2023 the value of outstanding securities on loan, the value of collateral received and the % of collateral of value of securities on loan recorded by the Funds were as follows:

Fund	Currency	Value of Outstanding Securities on Loan	Value of Collateral	% of Collateral of Value of Securities on Loan
AXA IM Eurobloc Equity	EUR	3,817,970	4,040,299	106
AXA IM Global Equity QI	USD	24,878,915	26,612,166	107
AXA IM Japan Equity	JPY	2,280,733,030	2,400,073,128	105
AXA IM US Enhanced Index Equity QI	USD	28,275,570	30,921,611	109
AXA IM US Equity QI	USD	18,751,094	20,500,599	109

Details of exposure by counterparty is disclosed in Note 13 to the financial statements.

For the year ended March 31, 2023

8. Securities Lending (continued)

As of March 31, 2022 the value of outstanding securities on loan, the value of collateral received and the % of collateral of value of securities on loan recorded by the Funds were as follows:

Fund	Currency	Value of Outstanding Securities on Loan	Value of Collateral	% of Collateral of Value of Securities on Loan
AXA IM Eurobloc Equity	EUR	11,674,101	12,380,889	106
AXA IM Global Equity QI	USD	67,651,184	72,181,651	107
AXA IM Japan Equity	JPY	3,328,507,209	3,585,279,826	108

10. Taxation

Under current law and practice the Trust qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis, it is not chargeable to Irish tax on its income or gains.

For the year ended March 31, 2023

10. Taxation (continued)

However, Irish tax may arise on the happening of a "chargeable event". A chargeable event includes any distribution payments to unitholders, any encashment, redemption, cancellation or transfer of units and the holding of units at the end of each eight year period beginning with the acquisition of such units. No Irish tax will arise on the Trust in respect of chargeable events in respect of:

(a) a unitholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Trust or the Trust has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and

(b) certain exempted Irish tax resident unitholders who have provided the Trust with the necessary signed statutory declarations.

Dividends, interest and capital gains (if any) received on investments made by the Trust may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Trust or its unitholders.

11. Accessibility to Information

Month-end portfolio listings can be made available to unitholders 30 days after that date, in line with the Investment Manager's disclosure policy.

12. Transactions with Related Parties

In accordance with FRS 102 the following note summarises the related parties and related party transactions during the year ended March 31, 2023 and the year ended March 31, 2022.

Executive Directors noted in the directory are also considered a related party.

Transactions with Parties who have significant influence
The Manager has entered into a Trust Deed with the Trustee. Under this Trust Deed, the Manager is entitled to a fee expressed as a percentage of the daily NAV of each respective class, which is calculated daily and payable monthly in arrears. The Manager will be responsible for discharging, from this fee, all fees of the Investment Manager (who will in turn, discharge from its fees, the fees of any Sub-Investment Managers). The Manager earned USD22,977,545 (March 31, 2022: USD6,755,744) for the year ended March 31, 2023, of which USD2,030,662 (March 31, 2022: USD4,292,706) was payable at year-end. The former Manager, AXA Rosenberg Management Ireland Limited, earned USD22,195,206 for the period from April, 1 2021 to December 31, 2021. Please refer to Note 5 to the financial statements for additional information.

Transactions with Securities Lending Agent
Please refer to Note 8 to the financial statements for details of balances at year end with the securities lending agent, AXA Investment Managers GS Limited. Please refer to the Statement of Comprehensive Income for details on the securities lending income balances and to the Statement of Financial Position for details on the securities lending receivable balances.

Transactions with Other Related Parties
Unitholdings held by related entities of the Manager at March 31, 2023 are listed below.

For the year ended March 31, 2023

12. Transactions with Related Parties (continued)

Transactions with Other Related Parties (continued)

Transactions with related entities of the Manager during the year ended March 31, 2023 are disclosed in below table:

Fund	Currency	Opening balance	% of Ownership	Subscriptions*	Redemptions*	Closing Balance	% of Ownership	Year end receivable/ (payable) for capital transactions
AXA IM All Country Asia Pacific Ex-Japan Small Cap Equity QI	USD	53,343,642	41.44	1,736,531	(1,243,239)	48,309,514	44.69	-

There was no investments in investment funds that are also managed by AXA during year ended March 31, 2022.

For the year ended March 31, 2023

13. Financial Risk Management Process

Oversight and Implementation

The Trust's risk management process has been delegated by the Manager to the Investment Manager in its capacity as Investment Manager and whose duties are overseen by the Board of Directors of the Manager and the Trustee. The Manager of the Trust operates a 100% delegated model. There have been no significant changes to the risk policies and procedures during the year.

The Investment Manager measures risk in terms of standard deviation of active return and manages that risk through careful stock selection and diversification of the portfolio. While the returns the Investment Manager produces for the Investment Manager's clients are targeted to be superior to the returns of their respective benchmarks over time, the total risk of the Investment Manager's portfolios is targeted to generally approximate that of the Funds' benchmarks.

The active risk the Investment Manager explicitly takes is driven by the Investment Manager's bottom-up stock selection process. The Investment Manager's process allows for the decomposition of total risk into proprietary risk factors, industry risk and stock specific risk. Overall, the Investment Manager manages risk primarily through diversification. Portfolios hold a large number of stocks and in all cases, the Investment Manager trades off expected return with expected risk in an effort to maximise the information ratio of the strategy.

The Investment Manager's portfolios are constructed to represent the return to risk trade-off as identified by the Investment Manager's investment models within the strategy's investment guide lines and other applicable constraints.

The Funds are required to adhere to the investment and borrowing restrictions laid down by UCITS Regulations.

Investment Risk

The Funds are exposed to market risk, credit risk and liquidity risk arising from the instruments and markets in which they invest. The Investment Manager's portfolio optimisation aims to identify a diversified combination of holdings which, in its estimation aims at maximising return under pre-defined risk limits and exposures to certain risk factors.

Investment Risk is limited by the investment and borrowing restrictions. The investment objective and policy of each Fund contains specific investment parameters and these are set out in detail in the Prospectus. Among other restrictions, the Funds are restricted to holding a maximum of 10% of the total NAV of the Fund in any one particular transferable security.

Day-to-day investment issues are notified to the Compliance and Risk functions of the Investment Manager as Investment Manager, reported on a monthly basis and reviewed by the Board of Directors of the Manager on a quarterly basis. In partnership with the Board of Directors of the Manager, the Trustee is responsible for independent restriction monitoring and other responsibilities relating to the oversight of the administration of the Funds. The Trustee carries out an independent review on a monthly basis of the investment, borrowing and efficient portfolio management restrictions according to the UCITS Regulations.

Global Exposure

The commitment approach is used to calculate global exposure for all Funds. This approach converts any Fund's derivative financial position into an equivalent position of the underlying asset based on the market value of the underlying asset. The unrealised appreciation/(depreciation) value of any derivatives held is disclosed in Note 13 (d) to the financial statements.

(a) Market Risk

This is the risk that the fair value of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: market price risk, currency risk and interest rate risk.

(i) Market Price Risk

Market price risk is the risk that the fair value of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk and currency risk), whether those changes are caused by factors specific to individual financial instruments or its issuer, or other factors affecting similar financial instruments traded in the market.

The Funds invest primarily in securities traded in equity markets. The investment of the Funds is subject to market fluctuations and there can be no assurance that investments will appreciate in value, therefore presenting a risk of loss of capital. Due to the nature of each Fund's investment objectives, their key component of market risk is market price risk. Each Fund's investment objective is provided in the Funds' Prospectus.

The table below sets out the realised beta for the Funds as at March 31, 2023 and March 31, 2022 and the monetary impact on the NAV of each Fund should the market (using the Fund's benchmark for illustrative purposes) have moved upwards by 5% assuming all other variables remain constant. Beta is a measure of the Fund's securities volatility in relation to the market or index. Conversely, the Investment Manager assumes the NAV for each Fund would have been impacted by the same monetary amount should the market have moved downwards by 5%.

Fund (base currency)	Benchmark	Beta as at March 31, 2023	Monetary Impact on NAV as at March 31, 2023	Beta as at March 31, 2022	Monetary Impact on NAV as at March 31, 2022
AXA IM All Country Asia Pacific Ex-Japan Small Cap Equity QI (USD)	MSCI AC Asia Pacific Ex-Japan Small Cap	0.920	4,972,561	0.889	5,721,826

*AXA Rosenberg Pan-European Equity Alpha Fund terminated on November 16, 2022.

Some limitations of sensitivity analysis are:

- the methodology is based on historical data and cannot take account of the fact that, future market price movements, correlations between markets and levels of market liquidity in conditions of market stress, may bear no relation to historical patterns;
- the market price risk information is a relative estimate of risk rather than a precise and accurate number;
- the market price information represents a hypothetical outcome and is not intended to be predictive; and
- future market conditions could vary significantly from those experienced in the past.

The Investment Manager manages other price risk through building highly diversified investment portfolios, in accordance with UCITS Regulations and each Fund's investment objectives.

For each Fund, the Investment Manager regularly monitors the following main deliverables amongst others:

- significant stock level contributors to active risk;
- significant factor level contributors to active risk (e.g. common risk factor, industry or country exposures);
- exposure to market news and macro events;
- performance of Investment Manager's proprietary stock selection models.

The Investment Manager reviews overall market price risk on a monthly basis, with issues being reported to the Board of Directors of the Manager as required and at least on a quarterly basis.

(ii) Currency Risk

Currency risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. This risk arises on financial instruments that are denominated in a currency other than the functional currency in which they are measured.

Each Fund may hold assets denominated in currencies other than the functional currency.

For the year ended March 31, 2023

13. Financial Risk Management Process (continued)

(a) Market Risk (continued)

(ii) Currency Risk (continued)

The currency exposures of the Funds as at March 31, 2023 and March 31, 2022 are as follows:

None of the Funds enter into forward foreign currency exchange contracts at a portfolio level. The below Funds enter into forward foreign exchange contracts on behalf of the investors in Hedged classes, as a way of managing foreign exchange risk at a class level and with no further impact to the financial instruments held. These forward foreign currency exchange contracts as at March 31, 2023 are detailed in the Schedule of Investments and Note 13 (d) to the financial statements. The counterparty for forward foreign currency exchange contracts is State Street Bank and Trust Company. The long term credit rating of the State Street Bank and Trust Company, as at March 31, 2023 is AA- per Standard & Poor's (2022: AA-).

Currency position is monitored by the Investment Manager on a daily basis and reviewed on a monthly basis.

Given the limited use of Foreign Direct Investments, the methodology chosen is the commitment approach to calculate global exposure. The risk limits of unit classes subject to currency hedging have a target hedge ratio of 100% with a tolerance of +/-4%.

(iii) Interest rate risk

Interest rate risk is defined as the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market interest rates.

The financial assets and financial liabilities of the Funds with exception of cash at bank balances are not exposed to interest rate risk. The Funds' exposure to interest rate risk on cash at bank balances held as at the year end March 31, 2023 or March 31, 2022 is not considered to be significant.

(b) Credit Risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. This includes counterparty risk and issuer risk.

Counterparties are selected by various bodies across the AXA Investment Manager Group after a thorough analysis. Monitoring by Risk Management is done periodically and includes among others a review of the exposure level by counterparty, agencies ratings and credit default spreads. Any issue is immediately escalated to the relevant team and/or committee.

The Funds are exposed to counterparty risk on parties with whom they trade and may also bear the risk of settlement default. The Funds minimise concentration of counterparty risks by undertaking transactions with counterparties on recognised and reputable exchanges and by trading only a small percentage of each Fund's portfolio at any time with any one approved broker. All transactions in listed securities are affected within a clearinghouse framework. Therefore, the risk of default is considered small, as delivery of securities sold are only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker.

For the year ended March 31, 2023

13. Financial Risk Management Process (continued)

(b) Credit Risk (continued)

In terms of forward foreign currency exchange contracts for hedging purposes at class level, counterparty risk is minimised by undertaking transactions with State Street Bank and Trust Company. A daily quotation of the value of forward foreign currency exchange contracts is reported to the Investment Manager. The Trustee monitors forwards foreign currency exchange contracts and counterparty risk on a monthly basis.

Those Funds engaging in securities lending arrangements are also open to counterparty risk. To minimise such risk, collateral is held, in excess of the value of the securities on loans. In order to further reduce the risk of collateral default, the Board of Directors of the Manager has decided to receive collateral in the form of cash and highly-rated government debt. There was no cash collateral held by the Funds for year end March 31, 2023 and year end March 31, 2022. In accordance with the UCITS Regulations, collateral accepted for securities lending transactions must be transferred to the Trustee of the Funds and must be immediately available to the Funds, without recourse to the counterparty, in the event of a default by that entity. While it is intended that the value of the collateral received will exceed the value of securities loaned at all times, in the event of a sudden upward market movement, there is a risk that the value of the collateral may fall below the value of the securities transferred. There is also the risk that while cash is recovered in event of default the actual stock cannot be repurchased.

Collateral is marked to market daily and as such, it is reported to the Trustee and Investment Manager on a daily basis. Details of collateral and amount of securities on loan are provided in Note 8 to the financial statements.

The tables below identify the counterparty names and percentage of collateral exposures as at March 31, 2023 and March 31, 2022.

13. Financial Risk Management Process (continued)

(b) Credit Risk (continued)

Overall counterparty risk exposure is monitored by the Investment Manager on a daily basis, reviewed by Risk Management on a monthly basis and reviewed by the Board of Directors of the Manager on a quarterly basis.

Custody Risk
Substantially all of the assets and cash of the Funds are held within the custodial network of the Trustee. Bankruptcy or insolvency of the Trustee or of its parent company State Street Corporation may cause the Funds' rights with respect to their investments held by the Trustee to be delayed or limited.

The long term credit rating of the parent company of the Trustee, State Street Corporation, as at March 31, 2023 is A per Standard & Poor's (2022: A).

The maximum exposure to this risk at March 31, 2023 is the total value of investments disclosed in Note 13 (d) to the financial statements. The Funds engage in securities lending as detailed in Note 8 to the financial statements. The risk associated with this is managed through receipt of collateral in excess of 105% of the value of the securities on loan.

In accordance with the requirements of the Trust Deed and the UCITS Regulations the Funds' securities are held in fiduciary or custodial capacity, segregated from State Street's assets with ownership remaining with the customers. Cash, unlike securities is fungible and cannot be registered in the name of, or identified as beneficially owned by a client, nor can it practically be held in physical segregation. The Trustee will ensure that any agents it appoints to assist in safekeeping the assets of the Funds will segregate the assets of the Funds. Thus in the event of insolvency or bankruptcy of the Trustee, the Funds' assets are segregated and protected subject to local sub-custodian arrangements and this further reduces counterparty risk. The Funds will, however, be exposed to the risk of the Trustee or certain sub-depositories used by the Trustee, in relation to the Funds' cash held by the Trustee. In event of the insolvency or bankruptcy of the Trustee, the Funds will be treated as a general creditor of the Trustee in relation to cash holdings of the Funds.

The Funds' investments may be registered in the name of a sub-custodian where, due to the nature of the law or market practice of jurisdictions, it is common market practice, not feasible to do otherwise, or a more efficient manner of holding such Investments.

In certain circumstances a default of a sub-custodian will result in a loss of the assets custodied with this sub-custodian.

(c) Liquidity Risk

Liquidity risk is the risk that a fund may have difficulty raising the cash necessary to meet redemptions or liabilities. Each Fund is exposed to daily cash redemptions of redeemable units. Each Fund therefore invests the majority of its assets in investments that are traded in an active market and can be readily disposed of; it invests only a limited proportion of its assets in investments not actively traded on a stock exchange.

Each Fund's listed securities are considered readily realisable, as they are listed on a regulated stock exchange (as defined in the investment objectives in the Funds' Prospectus). The Funds have the ability to borrow in the short term to ensure settlement. Each Fund may borrow money from a bank up to a limit of 10% of the NAV of the Fund and provided that this borrowing is on a temporary basis.

In some cases the Investment Manager may make use of access products or exchange traded funds (ETFs) to allow exposure to selected markets whilst maintaining sufficient liquidity. In addition, the provisions in the Funds' Prospectus gives discretion to the Directors to defer settlement of a redemption of significant size to facilitate an orderly disposition of securities as is in the interests of the remaining unitholders. In summary, if total redemption trades received on any dealing day for any of the Funds exceed 10% of the total number of units outstanding in that Fund, then the Directors of the Manager has discretion to defer to the next dealing day any redemption request, so that the total number of units being redeemed do not exceed 10% of total number of units issued.

Liquidity positions are monitored by the Investment Manager on an ongoing basis, reviewed by Risk Management on a monthly basis and reviewed by the Board of Directors of the Manager on a quarterly basis.

The Funds' financial liabilities due for payment within one month relate in most part, to security purchases awaiting settlement, redemptions of redeemable participating units, payment of expenses, bank overdraft interest and the NAV attributable to unitholders. Details of these amounts where relevant, can be found in the Statement of Financial Position for each Fund. There are no financial liabilities that fall due over 1 month at March 31, 2023 or March 31, 2022. Please refer to the Schedule of Investments for gross settlement amounts on open foreign currency exchange contracts.

(d) Fair Value Estimation

The Trust is required to classify financial assets and financial liabilities using a three-level fair value hierarchy for the inputs used in valuation techniques to measure fair value.

The Funds classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The daily implementation of the fair value policy is delegated to the Administrator by the Manager. The fair value hierarchy has the following levels:

- Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).
- Level 3 - Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

For the year ended March 31, 2023

13. Financial Risk Management Process (continued)

(d) Fair Value Estimation (continued)

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' requires significant judgement by the Manager. The Manager considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

As at March 31, 2023, all of the Funds' holdings are classified as Level 1 except for the following Funds:

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within Level 2. For the Trust these are over-the-counter derivatives.

Investments classified within Level 3 have significant unobservable inputs. Level 3 instruments may include suspended or unlisted equities, private equity and IFs. As observable prices are not available for these securities, the Investment Manager has used valuation techniques to derive the fair value. The Investment Manager also considers original transaction price, recent transactions in the same or similar instruments and completed third-party transactions in comparable instruments. It adjusts the model as deemed necessary.

The Level 3 investments were fair valued in accordance with procedures established by and under the supervision of the Board of Directors of the Manager and reviewed by the Administrator in conjunction with the Depository. Please see details of these investments in the tables on the previous pages. In addition, there are investments held on certain Funds fair valued to a Nil value, as disclosed in the Schedule of Investments, which are classified as Level 3 at 31 March, 2023 and 31 March, 2022.

(e) Other risks

Other material risks relating to the Trust are disclosed in the Trust's Prospectus.

14. Significant Events and Material Changes to Prospectus During the Year

Ukraine/Russia:
The Russian invasion of Ukraine launched on 24 February 2022 has been negative for the global economy primarily as a result of the disruption it has caused in the supply of energy and other commodities. Inflation had already arisen as a concern following supply issues related to COVID and energy price hikes resulting from the conflict have worsened the situation. This, and the continuing geopolitical uncertainties raised by the war have led to high levels of market volatility. Bond yields have risen in anticipation of interest rate hikes, credit spreads have increased and there have been pronounced swings in equity prices as investors digest how the unpredictable news flow affects company earnings and countries' projected growth rates, which is likely to continue as the crisis evolves. Investment commentary may become quickly outdated by ongoing events. The Management of the Fund will continue to monitor events and take appropriate action where needed.

The updated Prospectus was issued on September 23, 2022. The main updates are as follows:

- the Trust and Fund names changes,
- the change in stock selection process for AXA IM Eurobloc Equity, AXA IM Japan Equity and AXA IM Japan Small Cap Equity;
- the change in the delegation of portfolio management activity for AXA IM Eurobloc Equity.

Effective September 23, 2022, AXA Rosenberg Equity Alpha Trust changed its name to AXA IM Equity Trust.

AXA Rosenberg Pan-European Equity Alpha Fund terminated on November 16, 2022.

For the year ended March 31, 2023

14. Significant Events and Material Changes to Prospectus During the Year (continued)

The updated Prospectus was issued on December 1, 2022. The main update is the inclusion of the SFDR annexes.

Effective September 23, 2022, the following Funds changed their names:

Former Fund name	New Fund name

European Union Taxation of Savings Income Directive
The investment policy of the Funds in the Prospectus state that the Funds are intended to be "fully invested" in equities. Any potential direct or indirect investment in interest bearing securities (see Schedule of Investments) remain below the 15% and 25% thresholds stipulated by the Directive.

Remuneration Policy (unaudited)

For the year ended March 31, 2023

According to regulatory requirements on remuneration disclosure applicable to asset management companies, this disclosure provides an overview of the approach on remuneration taken by AXA Investment Managers (hereafter "AXA IM"). Further information on the composition of the Remuneration Committee and driving principles of the Remuneration Policy is available on AXA IM website: www.axa-im.com/remuneration A copy of this information is available upon request free of charge.

Governance - AXA IM's Remuneration Policy, which is reviewed and approved by the AXA IM Remuneration Committee every year, sets out the principles relating to remuneration within all entities of AXA IM and takes into account AXA IM's business strategy, objectives, and risk tolerance, as well as the long-term interests of AXA IM's shareholders, clients and employees. The AXA IM Remuneration Committee, in line with the remuneration policies and procedures set and validated at AXA Group level, ensures consistency and fair application of the Remuneration Policy within AXA IM, as well as compliance with applicable regulations.

The central and independent review that the effective implementation of the AXA IM's Remuneration Policy complies with the procedures and policies adopted by AXA IM Group level, is performed by the AXA IM Internal Audit Department, who present each year its conclusions to the AXA IM Remuneration Committee to enable it to perform its diligences.

These conclusions did not mention any particular comments regarding the compliance of the effective implementation of the AXA IM's Remuneration Policy.

The result of the annual exam by the AXA IM Remuneration Committee is presented to the Board of Directors of AXA Investment Managers Paris (hereafter "AXA IM PARIS") along with the amendments implemented into the AXA IM's Remuneration Policy.

These changes mainly concern the updating of the global principles of the remuneration policy in the context of (i) the reinforcement of the principle of equity and gender equality, (ii) the consideration of ESG criteria in the context of deferred variable remuneration, (iii) proposals on the treatment of co-investments and carried interest and (iv) specific adjustments to certain entities of the AXA IM Group in accordance with specific regulatory requirements.

Quantitative information - Data provided below are those of AXA Investment Managers covering all subsidiaries of the AXA IM Group and types of portfolios as at December 31, 2022 after application on remuneration data of the Trust's weighted Asset Under Management allocation key.

Total amount of remuneration paid and / or awarded to staff for the year ended December 31, 2022 [1]

Sustainable Finance Disclosure Regulation and Taxonomy Regulation Disclosure (unaudited)

This appendix includes disclosures as required by SFDR and taxonomy regulations disclosure.

SFDR Article 8:

SFDR Level 1 : ESG integrated eg. applying Sectorial & normative exclusion policies

Beyond AXA IM's climate and biodiversity strategies, the fund has implemented a specific responsible investing framework.

The fund uses an approach that embeds sustainability risks assessments derived from the integration of ESG (Environment, Social and Governance) criteria within its research and investment processes. The fund has implemented a framework to integrate sustainability risks in investment decisions based on sustainability factors. It relies notably on those policies that applied bindingly on a continuous basis:

(i) sectorial exclusion policies covering controversial weapons, soft commodities, climate risks, and ecosystem protection & deforestation. In 2021, AXA IM extended this policy to cover investments incorporating significant land use controversies and responsible for biodiversity loss in relation to soy, cattle and timber.

(ii) ESG standards (covering normative exclusions with the tobacco sector, white phosphorus weapons producers, companies in violation of international norms and standards, severe controversies and low ESG quality based on ESG scoring) were upgraded in 2021 with more demanding rules on human rights violations and on compliance to international norms and standards.

ESG scoring methodology has been revamped in 2021 towards a single-provider ESG scoring model which is coupled with an overlay of AXA IM's own qualitative analysis. Entitled Q^2, this new and enhanced qualitative and quantitative approach offers increased coverage as well as fine-tuned fundamental analysis.

The most up to date version of our policies can be found on our website at the following link: https://www.axa-im.com/our-policies

The "do no significant harm" principle according to SFDR regulation that aims to ensure limiting adverse impact on sustainability factors, is considered through exclusion policies of the most material ESG risks. Stewardship policies are an additional risk mitigation on Principal Adverse Impacts through direct dialogue with companies on sustainability and governance issues.

Furthermore, through our engagement activities, we have used our influence as investors to encourage companies to mitigate environmental and social risks relevant to their sectors. Voting at general meetings has been an important element of our dialogue with investee companies in order to foster sustainably long-term value of the companies in which we invest.

The implementation of responsible investment's frameworks had the following results:

Latest engagement and voting reports are available at the fund center website: https://funds.axa-im.com/

A reporting on main ESG indicators measured for the fund is available at the at the fund center website: https://funds.axa-im.com/

EU Taxonomy:
The European Union (EU) regulation designed to harmonise the classification of sustainable economic activities came into force from 1 January 2022. Known as the 'EU Taxonomy' it covers multiple themes related to environmental sustainability. Climate mitigation and climate adaptation are the first two objectives covered, with another four (water, pollution, biodiversity, and circular economy) expected to be included from 2023.

We'd like to inform you that the investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited)

Product Name: AXA IM All Country Asia Pacific Ex-Japan Small Cap Equity QI (The "Financial Product")

Entity LEI: 213800SZ58OTSMCA9T31

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ YES	☒ NO
☐ It made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 11.49% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon intensity
- Water Intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the

How did the sustainability indicators perform?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

financial product are attained.

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

Sustainability KPI Name	Value	Benchmark	Coverage
Carbon_intensity	333.89 CO2 tons per millions $ revenue for corporate and in CO2 Kg per PPP $ of GDP for sovereign	524.65 CO2 tons per millions $ revenue for corporate and in CO2 Kg per PPP $ of GDP for sovereign	0.98 %
water intensity	6658.12 Thousands of cubic meters for corporates	32486.55 Thousands of cubic meters for corporates	0.98 %

... And compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

1.**UN Sustainable Development Goals alignment (SDG)**of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2.**Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°c world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below –5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

How were the indicators for adverse impacts on sustainability factors taken into account?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.
Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.
Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.
Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.
AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to 'significant contributing impact ' to – 10 corresponding to 'significant obstructing impact'), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.
Environment:

Relevant AXA IM policies	PAI indicator	Units	Measurement
Climate Risk policy Ecosystem Protection & Deforestation policy	PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023)	Metric tonnes	N/A
	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M$)	N/A
	PAI 3: GHG intensity of investee companies	Metric tonnes per eur million revenue	N/A
Climate Risk policy	PAI 4: Exposure to Companies active in the fossil fuel sector	% of investments	N/A
Climate Risk policy (engagement only)	PAI 5 : Share of non-renewable energy consumption and production	% of total energy sources	N/A
Climate risk policy (considering an expected correlation between GHG emissions and energy consumption)[1]	PAI 6: Energy consumption intensity per high impact climate sector	GWh per million EUR of revenue of investee companies, per high impact climate sector	N/A
Ecosystem Protection & Deforestation policy	PAI 7: Activities negatively affecting biodiversity sensitive areas	% of investments	N/A
SDG no significantly negative score	PAI 8: Emissions to water	Tonnes per million EUR invested, expressed as a weighted average	N/A

[1] The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively. Not all high impact climate sectors are targeted by the exclusion policy for the time being.

SDG no significantly negative score	PAI 9: Hazardous waste and radioactive waste ratio	Tonnes per million EUR invested, expressed as a weighted average	N/A

Social and Governance:

Relevant AXA IM policies	PAI indicator	Units	Measurement
ESG standards policy: violation of international norms and standards	PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises	% of investments	N/A
ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) [2]	PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises	% of investments	N/A
SDG no significantly negative score	PAI 12: Unadjusted gender pay gap	Average unadjusted gender pay gap of investee companies	N/A
Voting and Engagement policy with systematic voting criteria linked with board gender diversity	PAI 13: Board gender diversity	Expressed as a percentage of all board members.	N/A
Controversial weapons policy	PAI 14: Exposure to controversial weapons	% of investments	N/A

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

[2] The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investment must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

Relevant AXA IM policies	PAI indicator	Units	Measurement
Climate Risk policy	PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)	Metric tonnes	N/A
Ecosystem protection & Deforestation policy			
Climate Risk policy	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M$)	N/A
Ecosystem protection & Deforestation policy			
Climate Risk policy	PAI 3: GHG intensity of investee companies	Metric tonnes per eur million revenue	N/A
Ecosystem protection & Deforestation policy			
Climate Risk policy	PAI 4: Exposure to companies active in the fossil fuel sector	% of investments	N/A
Climate Risk policy (engagement only)	PAI 5: Share of non-renewable energy consumption and production	% of total energy sources	N/A
Ecosystem protection & Deforestation policy	PAI 7: activities negatively affecting biodiversity sensitive area	% of investments	N/A
ESG standard policy / violation of international norms and standards	PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises	% of investments	N/A
Voting and Engagement policy with systematic voting criteria linked with board gender diversity	PAI 13: Board Gender diversity	Expressed as a percentage of all board members	N/A
Controversial weapons policy	PAI 14: Exposure to controversial weapons	% of investments	N/A

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2023-03-30

Top investments	Sector	Proportion	Country
WISTRON CORP XTAI TWD	Manufacture of computer, electronic and optical products	1.77%	TW
CARSALES.COM LTD XASX AUD	Web portals	1.46%	AU
JB HI-FI LTD XASX AUD	Retail sale of audio and video equipment in specialised stores	1.29%	AU
BENDIGO AND ADELAIDE BANK XASX AUD	Other monetary intermediation	1.29%	AU
OLAM GROUP LTD XSES SGD	Crop and animal production, hunting and related service activities	1.28%	SG
QUBE HOLDINGS LTD XASX AUD	Other transportation support activities	1.26%	AU
SIMPLO TECHNOLOGY CO LTD ROCO TWD	Manufacture of electronic components	1.26%	TW
METCASH LTD XASX AUD	Wholesale of beverages	1.23%	AU
ALLIANCE GLOBAL GROUP INC XPHS PHP	Renting and operating of own or leased real estate	1.22%	PH
CJ CORP XKRX KRW	Other transportation support activities	1.2%	KR
EAGERS AUTOMOTIVE LTD XASX AUD	Wholesale and retail trade and repair of motor vehicles and motorcycles	1.14%	AU
SUPER RETAIL GROUP LTD XASX AUD	Retail trade of motor vehicle parts and accessories	1.14%	AU
YOUNGONE CORP/NEW XKRX KRW	Manufacture of wearing apparel	1.11%	KR
YUE YUEN INDUSTRIAL HLDG XHKG HKD	Manufacture of wearing apparel	1.1%	HK
PEGATRON CORP XTAI TWD	Manufacture of computer, electronic and optical products	1.09%	TW

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

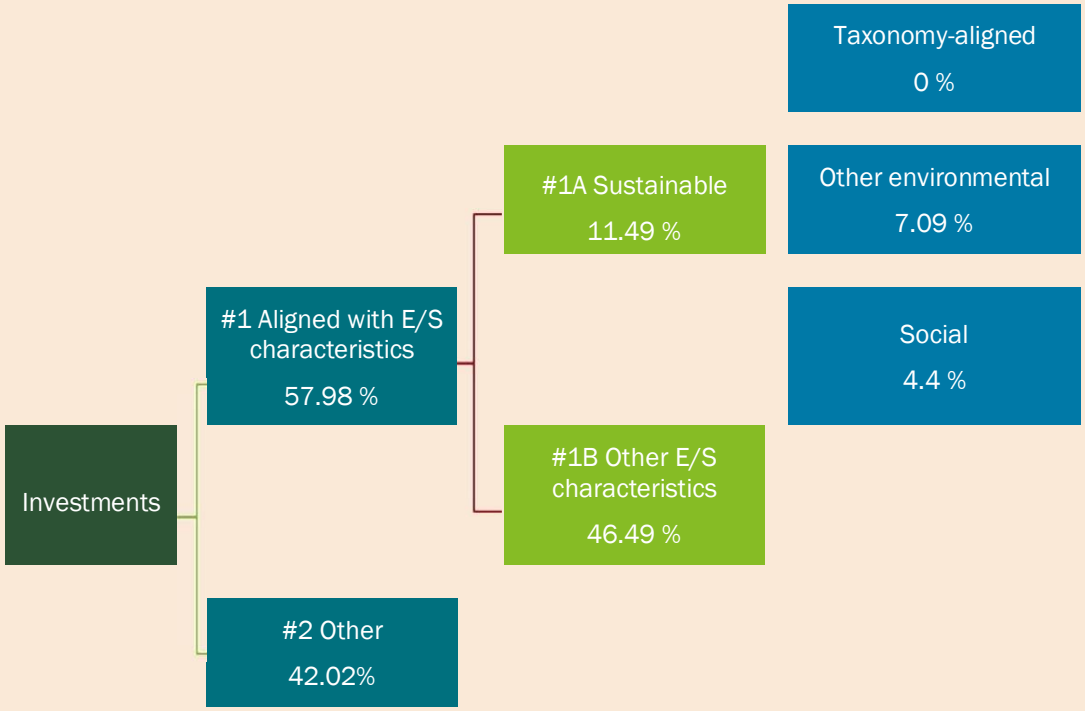
The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

In which economic sectors were the investments made?

Financial product's investments were made in the economic sectors detailed below:

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Top sector	Proportion
Other monetary intermediation	8.1%
Renting and operating of own or leased real estate	5.9%
Manufacture of electronic components	5.83%
Manufacture of computer, electronic and optical products	4.13%
Other transportation support activities	3.19%
Manufacture of basic pharmaceutical products	3.01%
Other software publishing	2.8%
Life insurance	2.53%
Manufacture of wearing apparel	2.42%
Wholesale trade, except of motor vehicles and motorcycles	2.26%
Construction of residential and non-residential buildings	2.22%
Manufacture of beer	1.99%
Architectural and engineering activities, technical testing and analysis	1.93%
Publishing of computer games	1.91%
Mining of other non-ferrous metal ores	1.76%
Manufacture of computers and peripheral equipment	1.68%
Manufacture of other special-purpose machinery n.e.c.	1.64%
Manufacture of fertilisers and nitrogen compounds	1.58%
Manufacture of footwear	1.47%
Web portals	1.46%
Retail sale of audio and video equipment in specialised stores	1.29%
Crop and animal production, hunting and related service activities	1.28%
Wholesale of beverages	1.23%
Manufacture of sports goods	1.22%
Distribution of gaseous fuels through mains	1.21%
Financial leasing	1.19%
Retail trade, except of motor vehicles and motorcycles	1.16%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Wholesale and retail trade and repair of motor vehicles and motorcycles	1.14%
Sea and coastal freight water transport	1.14%
Retail trade of motor vehicle parts and accessories	1.14%
Manufacture of chemicals and chemical products	1.06%
Manufacture of refined petroleum products	1.04%
Activities of insurance agents and brokers	1.01%
Manufacture of motor vehicles	1.01%
Manufacture of other inorganic basic chemicals	0.97%
Manufacture of jewellery and related articles	0.96%
Other credit granting	0.88%
Manufacture of consumer electronics	0.87%
Manufacture of other organic basic chemicals	0.87%
Mining of iron ores	0.85%
Manufacture of other chemical products n.e.c.	0.8%
Wholesale of clothing and footwear	0.8%
Civil engineering	0.78%
Manufacture of other rubber products	0.72%
Manufacture of tubes, pipes, hollow profiles and related fittings, of steel	0.7%
Manufacture of motorcycles	0.7%
Construction of utility projects for electricity and telecommunications	0.69%
Manufacture of pesticides and other agrochemical products	0.68%
Manufacture of electric motors, generators and transformers	0.68%
Manufacture of soft drinks, production of mineral waters and other bottled waters	0.62%
Wired telecommunications activities	0.61%
Mining of chemical and fertiliser minerals	0.6%
Wholesale of metals and metal ores	0.6%
Non-life insurance	0.59%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Manufacture of irradiation, electromedical and electrotherapeutic equipment	0.59%
Engineering activities and related technical consultancy	0.56%
Activities of holding companies	0.5%
Manufacture of communication equipment	0.45%
Manufacture of medical and dental instruments and supplies	0.42%
Security and commodity contracts brokerage	0.38%
Manufacture of cocoa, chocolate and sugar confectionery	0.36%
Processing of tea and coffee	0.35%
Manufacture of corrugated paper and paperboard and of containers of paper and paperboard	0.35%
Hospital activities	0.34%
Forging, pressing, stamping and roll-forming of metal, powder metallurgy	0.32%
Support activities for other mining and quarrying	0.29%
Residential care activities	0.29%
Computer consultancy activities	0.28%
Manufacture of electrical equipment	0.27%
Freight air transport	0.27%
Production of electricity	0.25%
Manufacture of machinery and equipment n.e.c.	0.24%
Sale of cars and light motor vehicles	0.21%
Manufacture of motor vehicles, trailers and semi-trailers	0.21%
Manufacture of plastic packing goods	0.21%
Satellite telecommunications activities	0.19%
Manufacture of other parts and accessories for motor vehicles	0.19%
Agents involved in the sale of food, beverages and tobacco	0.19%
Manufacture of textiles	0.19%
Trade of electricity	0.19%
Casting of iron	0.18%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Manufacture of paper and paperboard	0.17%
Wholesale of other household goods	0.16%
Retail sale of clothing in specialised stores	0.16%
Research and experimental development on biotechnology	0.16%
Computer programming, consultancy and related activities	0.15%
Manufacture of cement	0.14%
Television programming and broadcasting activities	0.14%
Packaging activities	0.14%
Manufacture of batteries and accumulators	0.13%
Manufacture of electrical and electronic equipment for motor vehicles	0.13%
Processing and preserving of fish, crustaceans and molluscs	0.12%
Other retail sale of new goods in specialised stores	0.11%
Publishing of newspapers	0.11%
Travel agency activities	0.1%
Manufacture of metal structures and parts of structures	0.09%
Preparation and spinning of textile fibres	0.09%
Extraction of crude petroleum and natural gas	0.08%
Retail sale of watches and jewellery in specialised stores	0.07%
Manufacture of other wearing apparel and accessories	0.07%
Temporary employment agency activities	0.06%
Other activities auxiliary to financial services, except insurance and pension funding	0.06%
Manufacture of household and sanitary goods and of toilet requisites	0.06%
Wholesale of mining, construction and civil engineering machinery	0.05%
Manufacture of other fabricated metal products n.e.c.	0.05%
Real estate agencies	0.05%
Management of real estate on a fee or contract basis	0.05%
Manufacture of machinery for mining, quarrying and construction	0.05%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Other processing and preserving of fruit and vegetables	0.04%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[3]*?*

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

☐ Yes

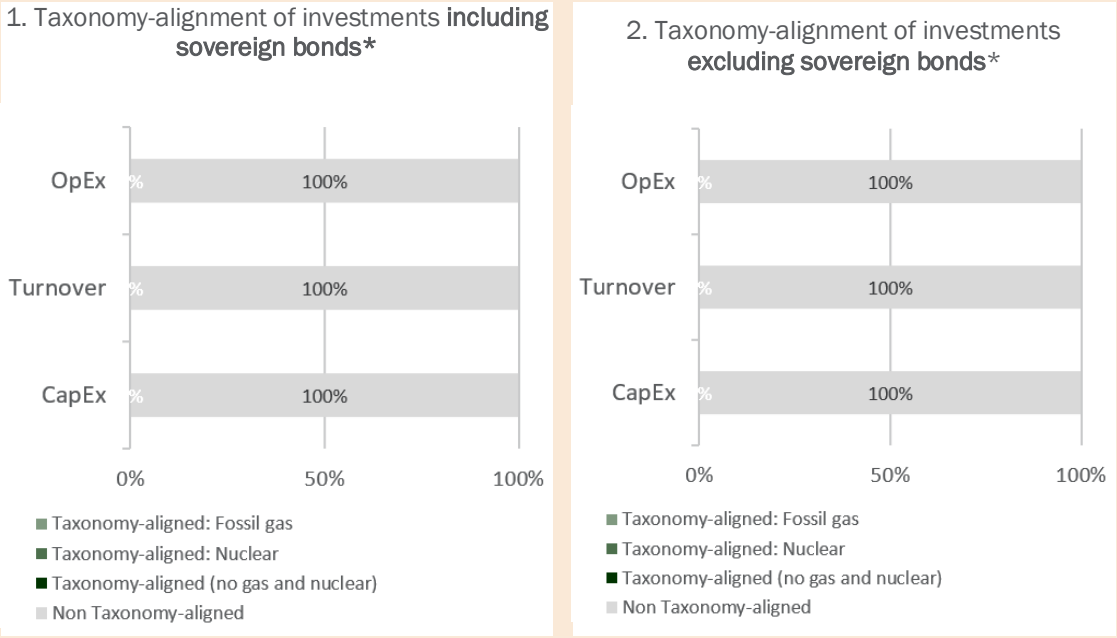
☐ In fossil gas ☐ In nuclear energy

☒ No

[3] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*



** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 7.09% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 4.4% of sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining "Other" investments represented 42.02% of the Financial Product's Net Asset Value.

The "other" assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/orSocial criteria described in this appendix. Such assets may be equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all "other" assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Artic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: https://www.axa-im.com/our-policies-and-reports

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Product Name: AXA IM Eurobloc Equity (The "Financial Product")

Entity LEI: 213800EID8L1ORZQXT77

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ YES	☒ NO
☐ It made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 86.03% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

The Financial Product has outperformed its ESG Score compared to during the reference period.

Sustainability KPI Name	Value	Benchmark	Coverage
Carbon_intensity	156.06 CO2 tons per millions $ revenue for corporate and in CO2 Kg per PPP $ of GDP for sovereign	180.06 CO2 tons per millions $ revenue for corporate and in CO2 Kg per PPP $ of GDP for sovereign	0.99 %

... And compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

1.**UN Sustainable Development Goals alignment (SDG)**of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2.**Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°c world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below –5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

How were the indicators for adverse impacts on sustainability factors taken into account?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.
Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.
Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.
Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.
AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to 'significant contributing impact ' to – 10 corresponding to 'significant obstructing impact'), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.
Environment:

Relevant AXA IM policies	PAI indicator	Units	Measurement
Climate Risk policy Ecosystem Protection & Deforestation policy	PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023)	Metric tonnes	N/A
	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M$)	N/A
	PAI 3: GHG intensity of investee companies	Metric tonnes per eur million revenue	N/A
Climate Risk policy	PAI 4: Exposure to Companies active in the fossil fuel sector	% of investments	N/A
Climate Risk policy (engagement only)	PAI 5 : Share of non-renewable energy consumption and production	% of total energy sources	N/A
Climate risk policy (considering an expected correlation between GHG emissions and energy consumption)[4]	PAI 6: Energy consumption intensity per high impact climate sector	GWh per million EUR of revenue of investee companies, per high impact climate sector	N/A
Ecosystem Protection & Deforestation policy	PAI 7: Activities negatively affecting biodiversity sensitive areas	% of investments	N/A
SDG no significantly negative score	PAI 8: Emissions to water	Tonnes per million EUR invested, expressed as a weighted average	N/A

[4] The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively. Not all high impact climate sectors are targeted by the exclusion policy for the time being.

SDG no significantly negative score	PAI 9: Hazardous waste and radioactive waste ratio	Tonnes per million EUR invested, expressed as a weighted average	N/A

Social and Governance:

Relevant AXA IM policies	PAI indicator	Units	Measurement
ESG standards policy: violation of international norms and standards	PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises	% of investments	N/A
ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) [5]	PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises	% of investments	N/A
SDG no significantly negative score	PAI 12: Unadjusted gender pay gap	Average unadjusted gender pay gap of investee companies	N/A
Voting and Engagement policy with systematic voting criteria linked with board gender diversity	PAI 13: Board gender diversity	Expressed as a percentage of all board members.	N/A
Controversial weapons policy	PAI 14: Exposure to controversial weapons	% of investments	N/A

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

[5] The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investment must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

Relevant AXA IM policies	PAI indicator	Units	Measurement
Climate Risk policy	PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)	Metric tonnes	N/A
Ecosystem protection & Deforestation policy			
Climate Risk policy	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M$)	N/A
Ecosystem protection & Deforestation policy			
Climate Risk policy	PAI 3: GHG intensity of investee companies	Metric tonnes per eur million revenue	N/A
Ecosystem protection & Deforestation policy			
Climate Risk policy	PAI 4: Exposure to companies active in the fossil fuel sector	% of investments	N/A
Climate Risk policy (engagement only)	PAI 5: Share of non-renewable energy consumption and production	% of total energy sources	N/A
Ecosystem protection & Deforestation policy	PAI 7: activities negatively affecting biodiversity sensitive area	% of investments	N/A
ESG standard policy / violation of international norms and standards	PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises	% of investments	N/A

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Voting and Engagement policy with systematic voting criteria linked with board gender diversity	PAI 13: Board Gender diversity	Expressed as a percentage of all board members	N/A
Controversial weapons policy	PAI 14: Exposure to controversial weapons	% of investments	N/A

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2023-03-30

Top investments	Sector	Proportion	Country
ASML HOLDING NV XAMS EUR	Manufacture of other special-purpose machinery n.e.c.	7.02%	NL
LVMH MOET HENNESSY LOUIS VUI XPAR EUR	Manufacture of luggage, handbags and the like, saddlery and harness	5.14%	FR
SCHNEIDER ELECTRIC SE XPAR EUR	Manufacture of electric motors, generators and transformers	4.42%	FR
IBERDROLA SA XMAD EUR	Production of electricity	4.05%	ES
PUBLICIS GROUPE XPAR EUR	Advertising agencies	3.9%	FR
AIR LIQUIDE SA XPAR EUR	Manufacture of industrial gases	3.51%	FR
INTESA SANPAOLO MTAA EUR	Other monetary intermediation	3.5%	IT
BNP PARIBAS XPAR EUR	Other monetary intermediation	3.45%	FR
FINECOBANK SPA MTAA EUR	Other monetary intermediation	3.09%	IT
INDUSTRIA DE DISENO TEXTIL XMAD EUR	Retail sale of clothing in specialised stores	3%	ES
ALLIANZ SE-REG XETR EUR	Non-life insurance	2.96%	DE

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

DEUTSCHE TELEKOM AG-REG XETR EUR	Wireless telecommunications activities	2.92%	DE
Portfolio 2628 EUR SET SSI	Other monetary intermediation	2.81%	0
STELLANTIS NV XPAR EUR	Manufacture of motor vehicles	2.72%	NL
L'OREAL XPAR EUR	Manufacture of perfumes and toilet preparations	2.67%	FR

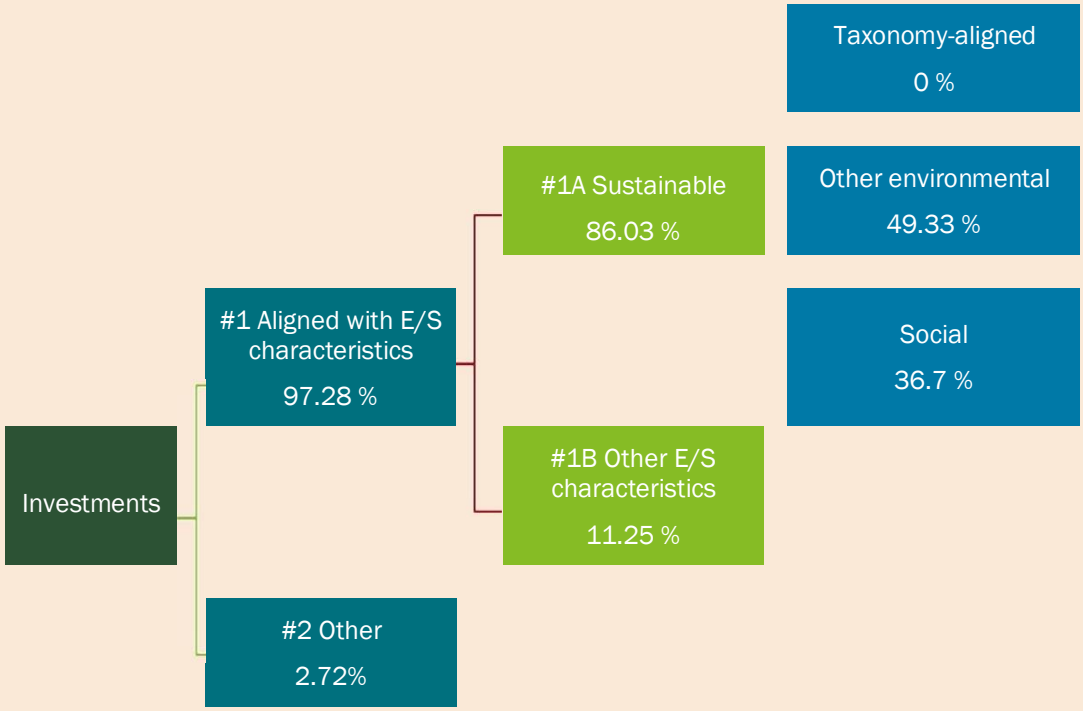
The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

In which economic sectors were the investments made?

Financial product's investments were made in the economic sectors detailed below:

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Top sector	Proportion
Other monetary intermediation	15.95%
Manufacture of other special-purpose machinery n.e.c.	8.69%
Manufacture of luggage, handbags and the like, saddlery and harness	5.14%
Production of electricity	4.95%
Manufacture of electric motors, generators and transformers	4.42%
Advertising agencies	3.9%
Manufacture of industrial gases	3.51%
Retail sale of clothing in specialised stores	3%
Non-life insurance	2.96%
Wireless telecommunications activities	2.92%
Manufacture of motor vehicles	2.72%
Manufacture of perfumes and toilet preparations	2.67%
Construction of utility projects for electricity and telecommunications	2.43%
Manufacture of basic pharmaceutical products	2.35%
Manufacture of machinery and equipment n.e.c.	2.28%
Civil engineering	2.25%
Other activities auxiliary to financial services, except insurance and pension funding	1.97%
Manufacture of electrical equipment	1.88%
Other software publishing	1.87%
Manufacture of beer	1.85%
Manufacture of medical and dental instruments and supplies	1.78%
Manufacture of refined petroleum products	1.74%
Water collection, treatment and supply	1.74%
Manufacture of chemicals and chemical products	1.55%
Architectural and engineering activities, technical testing and analysis	1.43%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Research and experimental development on biotechnology	1.41%
Transmission of electricity	1.32%
Other postal and courier activities	1.29%
Accounting, bookkeeping and auditing activities, tax consultancy	1.14%
Computer programming activities	1.14%
Manufacture of pharmaceutical preparations	1%
Data processing, hosting and related activities	0.99%
Manufacture of other chemical products n.e.c.	0.97%
Manufacture of other food products n.e.c.	0.97%
Other food service activities	0.86%
Trusts, funds and similar financial entities	0.77%
Manufacture of electric domestic appliances	0.76%
Manufacture of other parts and accessories for motor vehicles	0.74%
Manufacture of paper and paperboard	0.7%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

- *Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[6]?*

[6] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

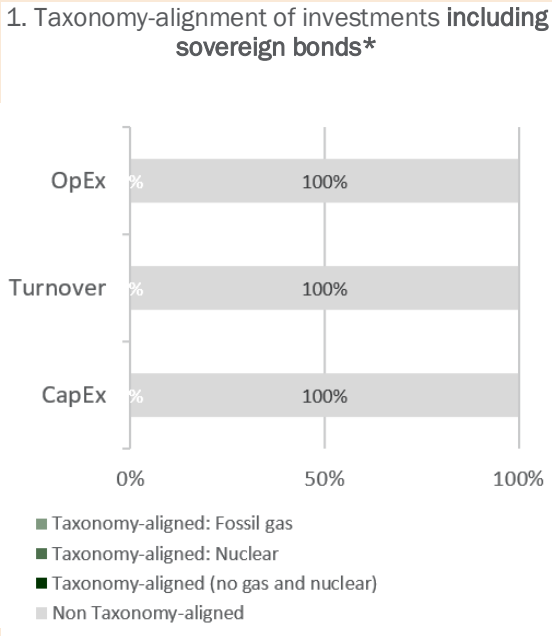
☐ Yes

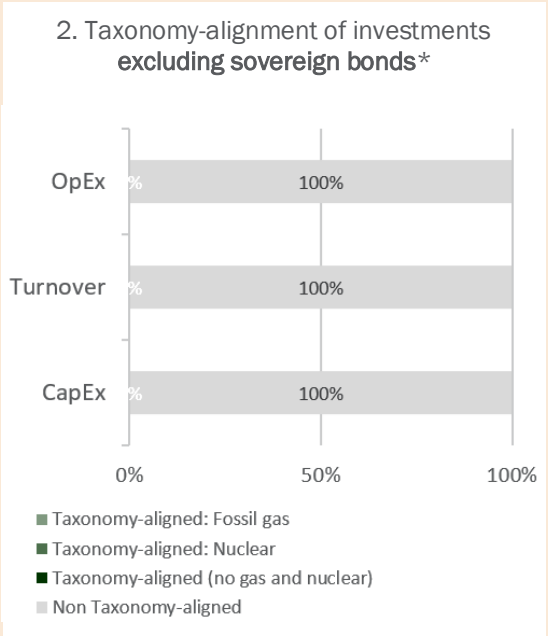
☐ In fossil gas ☐ In nuclear energy

☒ No

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 49.33% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 36.7% of sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining "Other" investments represented 2.72% of the Financial Product's Net Asset Value.

The "other" assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/orSocial criteria described in this appendix. Such assets may be equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all "other" assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Artic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: https://www.axa-im.com/our-policies-and-reports

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Product Name: AXA IM Global Emerging Markets Equity QI (The "Financial Product") **Entity LEI:** 213800TFOH1NO4ZNUK75

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ YES	☒ NO
☐ It made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 30.94% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon intensity
- Water Intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

How did the sustainability indicators perform?

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

Sustainability KPI Name	Value	Benchmark	Coverage
Carbon_intensity	166.6 CO2 tons per millions $ revenue for corporate and in CO2 Kg per PPP $ of GDP for sovereign	399.6 CO2 tons per millions $ revenue for corporate and in CO2 Kg per PPP $ of GDP for sovereign	1 %
water intensity	3775.86 Thousands of cubic meters for corporates	12200.06 Thousands of cubic meters for corporates	1 %

... And compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

1.**UN Sustainable Development Goals alignment (SDG)**of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2.**Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°c world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below –5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

has been qualitatively overridden.

- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

How were the indicators for adverse impacts on sustainability factors taken into account?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR. Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring. Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.
Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.
AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to 'significant contributing impact ' to – 10 corresponding to 'significant obstructing impact'), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.
Environment:

Relevant AXA IM policies	PAI indicator	Units	Measurement
Climate Risk policy Ecosystem Protection & Deforestation policy	PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023)	Metric tonnes	N/A
	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M$)	N/A
	PAI 3: GHG intensity of investee companies	Metric tonnes per eur million revenue	N/A
Climate Risk policy	PAI 4: Exposure to Companies active in the fossil fuel sector	% of investments	N/A
Climate Risk policy (engagement only)	PAI 5 : Share of non-renewable energy consumption and production	% of total energy sources	N/A
Climate risk policy (considering an expected correlation between GHG emissions and energy consumption)[7]	PAI 6: Energy consumption intensity per high impact climate sector	GWh per million EUR of revenue of investee companies, per high impact climate sector	N/A
Ecosystem Protection & Deforestation policy	PAI 7: Activities negatively affecting biodiversity sensitive areas	% of investments	N/A
SDG no significantly negative score	PAI 8: Emissions to water	Tonnes per million EUR invested, expressed as	N/A

[7] The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively. Not all high impact climate sectors are targeted by the exclusion policy for the time being.

		a weighted average	
SDG no significantly negative score	PAI 9: Hazardous waste and radioactive waste ratio	Tonnes per million EUR invested, expressed as a weighted average	N/A

Social and Governance:

Relevant AXA IM policies	PAI indicator	Units	Measurement
ESG standards policy: violation of international norms and standards	PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises	% of investments	N/A
ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) [8]	PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises	% of investments	N/A
SDG no significantly negative score	PAI 12: Unadjusted gender pay gap	Average unadjusted gender pay gap of investee companies	N/A
Voting and Engagement policy with systematic voting criteria linked with board gender diversity	PAI 13: Board gender diversity	Expressed as a percentage of all board members.	N/A
Controversial weapons policy	PAI 14: Exposure to controversial weapons	% of investments	N/A

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

[8] The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investment must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

Relevant AXA IM policies	PAI indicator	Units	Measurement
Climate Risk policy	PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)	Metric tonnes	N/A
Ecosystem protection & Deforestation policy			
Climate Risk policy	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M$)	N/A
Ecosystem protection & Deforestation policy			
Climate Risk policy	PAI 3: GHG intensity of investee companies	Metric tonnes per eur million revenue	N/A
Ecosystem protection & Deforestation policy			
Climate Risk policy	PAI 4: Exposure to companies active in the fossil fuel sector	% of investments	N/A
Climate Risk policy (engagement only)	PAI 5: Share of non-renewable energy consumption and production	% of total energy sources	N/A
Ecosystem protection & Deforestation policy	PAI 7: activities negatively affecting biodiversity sensitive area	% of investments	N/A

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

ESG standard policy / violation of international norms and standards	PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises	% of investments	N/A
Voting and Engagement policy with systematic voting criteria linked with board gender diversity	PAI 13: Board Gender diversity	Expressed as a percentage of all board members	N/A
Controversial weapons policy	PAI 14: Exposure to controversial weapons	% of investments	N/A

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2023-03-30

Top investments	Sector	Proportion	Country
TAIWAN SEMICONDUCTOR MANUFAC XTAI TWD	Manufacture of other special-purpose machinery n.e.c.	7.09%	TW
ALIBABA GROUP HOLDING-SP ADR XNYS USD	Retail sale via mail order houses or via Internet	4.25%	CN
INVESCO MSCI SAUDI ARABIA	Trusts, funds and similar financial entities	3.92%	IE
SAMSUNG ELECTRONICS CO LTD XKRX KRW	Manufacture of communication equipment	3.35%	KR
CHINA CONSTRUCTION BANK-H XHKG HKD	Other monetary intermediation	1.84%	CN
INFOSYS LTD XNSE INR	Computer programming, consultancy and related activities	1.8%	IN
MEITUAN-CLASS B XHKG HKD	Web portals	1.76%	CN
HON HAI PRECISION INDUSTRY XTAI TWD	Manufacture of computer, electronic and optical products	1.65%	TW
PETROBRAS - PETROLEO BRAS-PR BVMF BRL	Manufacture of refined petroleum products	1.64%	BR

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

NETEASE INC-ADR XNGS USD	Publishing of computer games	1.56%	CN
BANK OF CHINA LTD-H XHKG HKD	Other monetary intermediation	1.51%	CN
TATA CONSULTANCY SVCS LTD XNSE INR	Computer programming, consultancy and related activities	1.48%	IN
HYUNDAI MOTOR CO XKRX KRW	Manufacture of motor vehicles	1.3%	KR
CHINA MERCHANTS BANK-H XHKG HKD	Other monetary intermediation	1.26%	CN
PDD HOLDINGS INC XNGS USD	Retail sale via mail order houses or via Internet	1.21%	CN

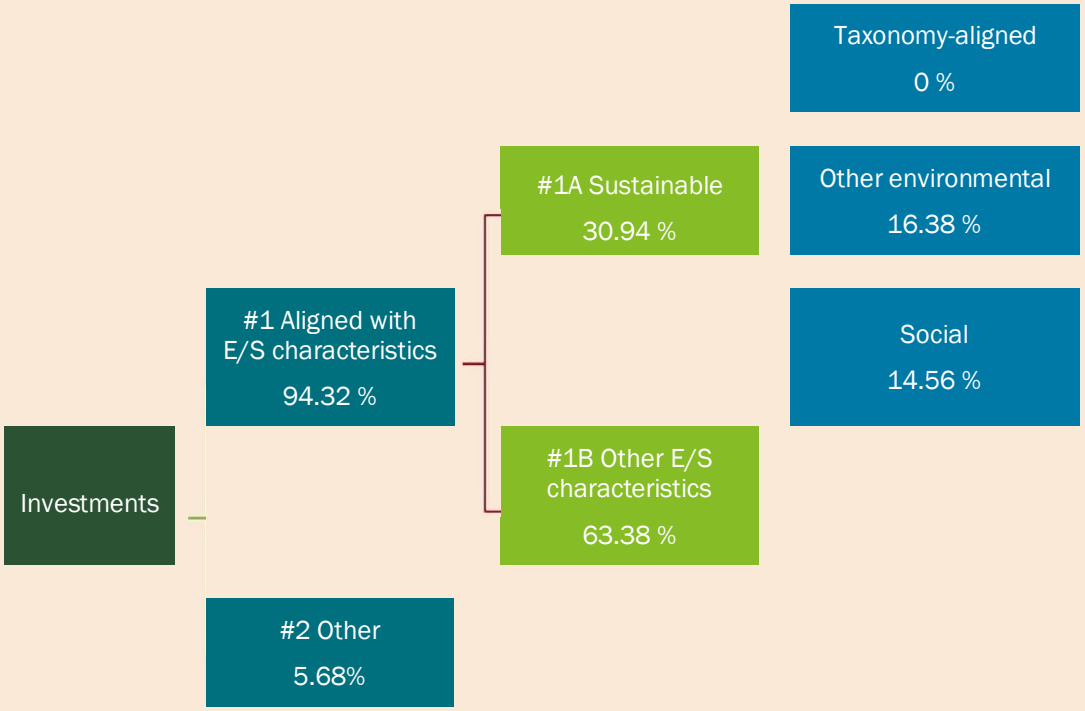
The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period.
Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

In which economic sectors were the investments made?

Financial product's investments were made in the economic sectors detailed below:

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Top sector	Proportion
Other monetary intermediation	20.66%
Manufacture of other special-purpose machinery n.e.c.	9.28%
Retail sale via mail order houses or via Internet	7.17%
Computer programming, consultancy and related activities	5.2%
Web portals	3.93%
Manufacture of motor vehicles	3.93%
Trusts, funds and similar financial entities	3.92%
Manufacture of refined petroleum products	3.83%
Manufacture of communication equipment	3.35%
Publishing of computer games	2.55%
Manufacture of computer, electronic and optical products	2.45%
Manufacture of electronic components	2.26%
Non-life insurance	2.23%
Manufacture of soft drinks, production of mineral waters and other bottled waters	1.9%
Other human health activities	1.53%
Wholesale of pharmaceutical goods	1.48%
Renting and operating of own or leased real estate	1.48%
Passenger air transport	1.33%
Manufacture of food products	1.18%
Distribution of gaseous fuels through mains	1.18%
Construction of residential and non-residential buildings	1.16%
Manufacture of basic pharmaceutical products	1.07%
Mining of other non-ferrous metal ores	0.88%
Wireless telecommunications activities	0.88%
Life insurance	0.81%
Retail trade, except of motor vehicles and motorcycles	0.67%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Research and experimental development on biotechnology	0.64%
Transmission of electricity	0.61%
Manufacture of medical and dental instruments and supplies	0.61%
Manufacture of motorcycles	0.61%
Manufacture of other organic basic chemicals	0.59%
Security and commodity contracts brokerage	0.57%
Computer consultancy activities	0.52%
Agents involved in the sale of food, beverages and tobacco	0.52%
Manufacture of other electrical equipment	0.42%
Manufacture of electric domestic appliances	0.41%
Sea and coastal freight water transport	0.4%
Fund management activities	0.39%
Electricity, gas, steam and air conditioning supply	0.38%
Hotels and similar accommodation	0.35%
Copper production	0.34%
Other business support service activities n.e.c.	0.32%
Manufacture of cement	0.3%
Manufacture of consumer electronics	0.29%
Manufacture of pharmaceutical preparations	0.28%
Manufacture of computers and peripheral equipment	0.25%
Manufacture of rubber tyres and tubes, retreading and rebuilding of rubber tyres	0.24%
Wholesale of metals and metal ores	0.24%
Manufacture of machinery for mining, quarrying and construction	0.23%
Manufacture of explosives	0.21%
Other activities auxiliary to financial services, except insurance and pension funding	0.21%
Mining of iron ores	0.2%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

blank sector	0.2%
Manufacture of other rubber products	0.19%
Activities of insurance agents and brokers	0.18%
Support activities for petroleum and natural gas extraction	0.18%
Construction of utility projects for electricity and telecommunications	0.18%
Motion picture, video and television programme production activities	0.16%
Other credit granting	0.16%
Other software publishing	0.16%
Other transportation support activities	0.14%
Production of electricity	0.14%
Manufacture of jewellery and related articles	0.14%
Manufacture of beer	0.14%
Manufacture of machinery and equipment n.e.c.	0.14%
Manufacture of footwear	0.13%
Retail sale of clothing in specialised stores	0.13%
Wholesale trade, except of motor vehicles and motorcycles	0.12%
Retail sale of games and toys in specialised stores	0.12%
Financial leasing	0.12%
Sale of cars and light motor vehicles	0.12%
Manufacture of builders ware of plastic	0.11%
Manufacture of bearings, gears, gearing and driving elements	0.11%
Manufacture of other chemical products n.e.c.	0.1%
Manufacture of chemicals and chemical products	0.09%
Manufacture of tubes, pipes, hollow profiles and related fittings, of steel	0.09%
Hospital activities	0.09%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Manufacture of household and sanitary goods and of toilet requisites	0.07%
Advertising agencies	0.05%
Other retail sale of new goods in specialised stores	0.01%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[9]?

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

☐ Yes

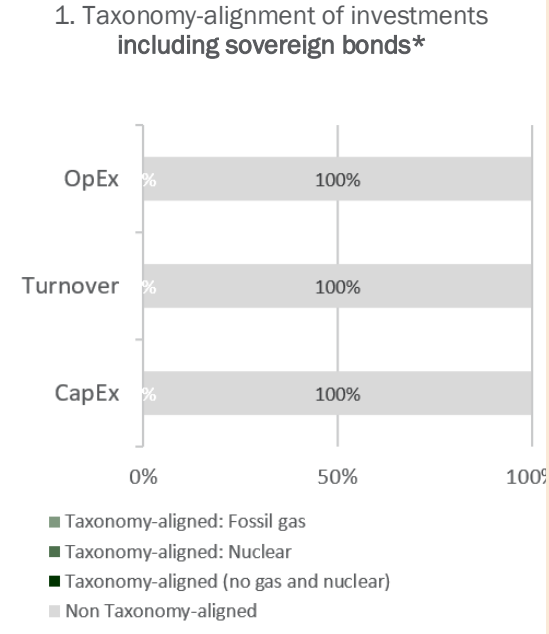
☐ In fossil gas ☐ In nuclear energy

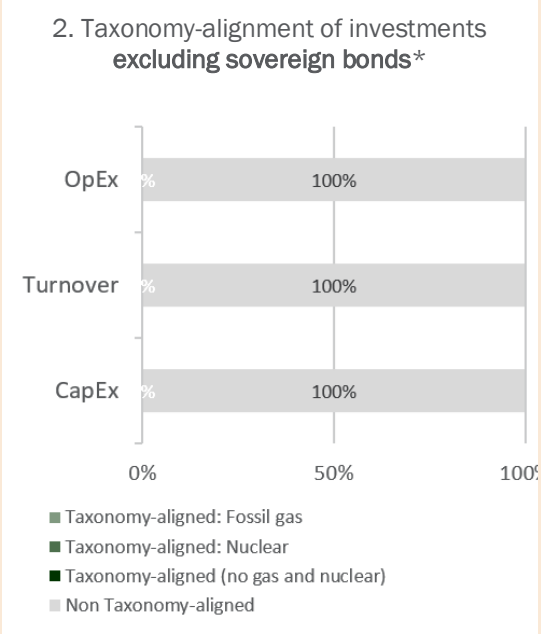
☒ No

[9] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 16.38% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 14.56% of sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining "Other" investments represented 5.68% of the Financial Product's Net Asset Value.

The "other" assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/orSocial criteria described in this appendix. Such assets may be equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all "other" assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Artic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: https://www.axa-im.com/our-policies-and-reports

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Product Name: AXA IM Global Equity QI (The "Financial Product")

Entity LEI: 213800DTKFJLOJGCQU20

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ YES	☒ NO
☐ It made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 58.58% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon intensity
- Water Intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the

How did the sustainability indicators perform?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

financial product are attained.

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

Sustainability KPI Name	Value	Benchmark	Coverage
Carbon_intensity	132.58 CO2 tons per millions $ revenue for corporate and in CO2 Kg per PPP $ of GDP for sovereign	188.03 CO2 tons per millions $ revenue for corporate and in CO2 Kg per PPP $ of GDP for sovereign	1 %
water intensity	1758.03 Thousands of cubic meters for corporates	7008.71 Thousands of cubic meters for corporates	1 %

... And compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

1.**UN Sustainable Development Goals alignment (SDG)**of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2.**Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°c world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below –5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

How were the indicators for adverse impacts on sustainability factors taken into account?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.
Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.
Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.
Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.
AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to 'significant contributing impact ' to – 10 corresponding to 'significant obstructing impact'), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.
Environment:

Relevant AXA IM policies	PAI indicator	Units	Measurement
Climate Risk policy Ecosystem Protection & Deforestation policy	PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023)	Metric tonnes	N/A
	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M$)	N/A
	PAI 3: GHG intensity of investee companies	Metric tonnes per eur million revenue	N/A
Climate Risk policy	PAI 4: Exposure to Companies active in the fossil fuel sector	% of investments	N/A
Climate Risk policy (engagement only)	PAI 5 : Share of non-renewable energy consumption and production	% of total energy sources	N/A
Climate risk policy (considering an expected correlation between GHG emissions and energy consumption)[10]	PAI 6: Energy consumption intensity per high impact climate sector	GWh per million EUR of revenue of investee companies, per high impact climate sector	N/A
Ecosystem Protection & Deforestation policy	PAI 7: Activities negatively affecting biodiversity sensitive areas	% of investments	N/A
SDG no significantly negative score	PAI 8: Emissions to water	Tonnes per million EUR invested, expressed as a weighted average	N/A

[10] The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively. Not all high impact climate sectors are targeted by the exclusion policy for the time being.

SDG no significantly negative score	PAI 9: Hazardous waste and radioactive waste ratio	Tonnes per million EUR invested, expressed as a weighted average	N/A

Social and Governance:

Relevant AXA IM policies	PAI indicator	Units	Measurement
ESG standards policy: violation of international norms and standards	PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises	% of investments	N/A
ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) [11]	PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises	% of investments	N/A
SDG no significantly negative score	PAI 12: Unadjusted gender pay gap	Average unadjusted gender pay gap of investee companies	N/A
Voting and Engagement policy with systematic voting criteria linked with board gender diversity	PAI 13: Board gender diversity	Expressed as a percentage of all board members.	N/A
Controversial weapons policy	PAI 14: Exposure to controversial weapons	% of investments	N/A

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

[11] The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investment must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

Relevant AXA IM policies	PAI indicator	Units	Measurement
Climate Risk policy	PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)	Metric tonnes	N/A
Ecosystem protection & Deforestation policy			
Climate Risk policy	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M$)	N/A
Ecosystem protection & Deforestation policy			
Climate Risk policy	PAI 3: GHG intensity of investee companies	Metric tonnes per eur million revenue	N/A
Ecosystem protection & Deforestation policy			
Climate Risk policy	PAI 4: Exposure to companies active in the fossil fuel sector	% of investments	N/A
Climate Risk policy (engagement only)	PAI 5: Share of non-renewable energy consumption and production	% of total energy sources	N/A
Ecosystem protection & Deforestation policy	PAI 7: activities negatively affecting biodiversity sensitive area	% of investments	N/A
ESG standard policy / violation of international norms and standards	PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises	% of investments	N/A
Voting and Engagement policy with systematic voting criteria linked with board gender diversity	PAI 13: Board Gender diversity	Expressed as a percentage of all board members	N/A
Controversial weapons policy	PAI 14: Exposure to controversial weapons	% of investments	N/A

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2023-03-30

Top investments	Sector	Proportion	Country
APPLE INC XNGS USD	Manufacture of communication equipment	4.56%	US
MICROSOFT CORP XNGS USD	Other software publishing	3.3%	US
ALPHABET INC-CL A XNGS USD	Web portals	1.78%	US
UNITEDHEALTH GROUP INC XNYS USD	Non-life insurance	1.58%	US
VISA INC-CLASS A SHARES XNYS USD	Other activities auxiliary to financial services, except insurance and pension funding	1.44%	US
MERCK & CO. INC. XNYS USD	Manufacture of basic pharmaceutical products	1.38%	US
TESLA INC XNGS USD	Manufacture of motor vehicles	1.36%	US
AMAZON.COM INC XNGS USD	Retail sale via mail order houses or via Internet	1.34%	US
NOVARTIS AG-REG XSWX CHF	Manufacture of basic pharmaceutical products	1.18%	CH
ADOBE INC XNGS USD	Other software publishing	1.17%	US
BP PLC XLON GBP	Manufacture of refined petroleum products	1.15%	GB
L'OREAL XPAR EUR	Manufacture of perfumes and toilet preparations	1.11%	FR
NVIDIA CORP XNGS USD	Manufacture of electronic components	1.11%	US
CISCO SYSTEMS INC XNGS USD	Manufacture of communication equipment	1.09%	US
HSBC HOLDINGS PLC XLON GBP	Other monetary intermediation	1.08%	GB

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

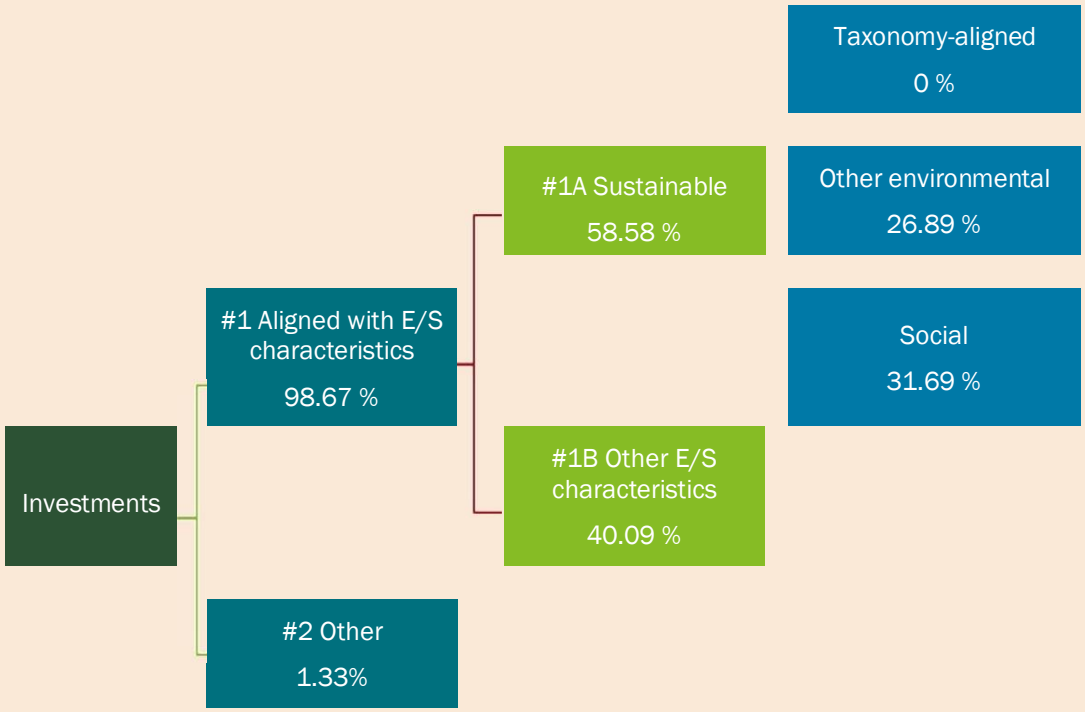
The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

In which economic sectors were the investments made?

Financial product's investments were made in the economic sectors detailed below:

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Top sector	Proportion
Other software publishing	9.14%
Manufacture of basic pharmaceutical products	6.43%
Other monetary intermediation	6.19%
Manufacture of motor vehicles	6.17%
Manufacture of communication equipment	5.97%
Non-life insurance	5.02%
Manufacture of refined petroleum products	4.66%
Other activities auxiliary to financial services, except insurance and pension funding	3.57%
Retail trade, except of motor vehicles and motorcycles	3.46%
Web portals	2.97%
Manufacture of electronic components	2.72%
Life insurance	2.23%
Research and experimental development on biotechnology	2.17%
Manufacture of other special-purpose machinery n.e.c.	1.71%
Retail sale via mail order houses or via Internet	1.65%
Wireless telecommunications activities	1.39%
Computer programming, consultancy and related activities	1.26%
Other postal and courier activities	1.2%
Construction of residential and non-residential buildings	1.17%
Wholesale trade, except of motor vehicles and motorcycles	1.16%
Other credit granting	1.14%
Manufacture of tubes, pipes, hollow profiles and related fittings, of steel	1.13%
Manufacture of perfumes and toilet preparations	1.11%
Manufacture of electrical equipment	1.04%
Manufacture of agricultural and forestry machinery	1.02%
Wired telecommunications activities	0.97%
Manufacture of computers and peripheral equipment	0.95%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Manufacture of machinery for mining, quarrying and construction	0.92%
Manufacture of irradiation, electromedical and electrotherapeutic equipment	0.87%
Reinsurance	0.87%
Wholesale of pharmaceutical goods	0.87%
Retail sale of clothing in specialised stores	0.85%
Retail sale of automotive fuel in specialised stores	0.84%
Other transportation support activities	0.82%
Other information service activities n.e.c.	0.82%
Manufacture of chemicals and chemical products	0.81%
Manufacture of electric motors, generators and transformers	0.81%
Wholesale of metals and metal ores	0.74%
Manufacture of soft drinks, production of mineral waters and other bottled waters	0.71%
Mining of iron ores	0.7%
Manufacture of bearings, gears, gearing and driving elements	0.66%
Sea and coastal freight water transport	0.56%

Manufacture of motorcycles	0.31%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Activities of holding companies	0.27%
Retail sale of cosmetic and toilet articles in specialised stores	0.27%
Manufacture of instruments and appliances for measuring, testing and navigation	0.27%
Manufacture of bodies (coachwork) for motor vehicles, manufacture of trailers and semi-trailers	0.25%
Manufacture of prepared meals and dishes	0.25%
Manufacture of medical and dental instruments and supplies	0.24%
Manufacture of other organic basic chemicals	0.24%
Gambling and betting activities	0.24%
Manufacture of wearing apparel	0.23%
Business and other management consultancy activities	0.23%
Retail sale of watches and jewellery in specialised stores	0.23%
Manufacture of jewellery and related articles	0.22%
Manufacture of machinery and equipment n.e.c.	0.22%
Hotels and similar accommodation	0.21%
Wholesale of beverages	0.21%
Passenger air transport	0.21%
Distribution of gaseous fuels through mains	0.2%
Operation of dairies and cheese making	0.19%
Real estate activities	0.17%
Manufacture of household and sanitary goods and of toilet requisites	0.15%
Fund management activities	0.14%
Manufacture of consumer electronics	0.13%
Manufacture of machinery for paper and paperboard production	0.12%
Manufacture of computer, electronic and optical products	0.12%
Support activities for petroleum and natural gas extraction	0.12%
Operation of sports facilities	0.12%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Manufacture of other parts and accessories for motor vehicles	0.11%
Copper production	0.11%
Activities of employment placement agencies	0.07%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[12]*?*

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

☐ Yes

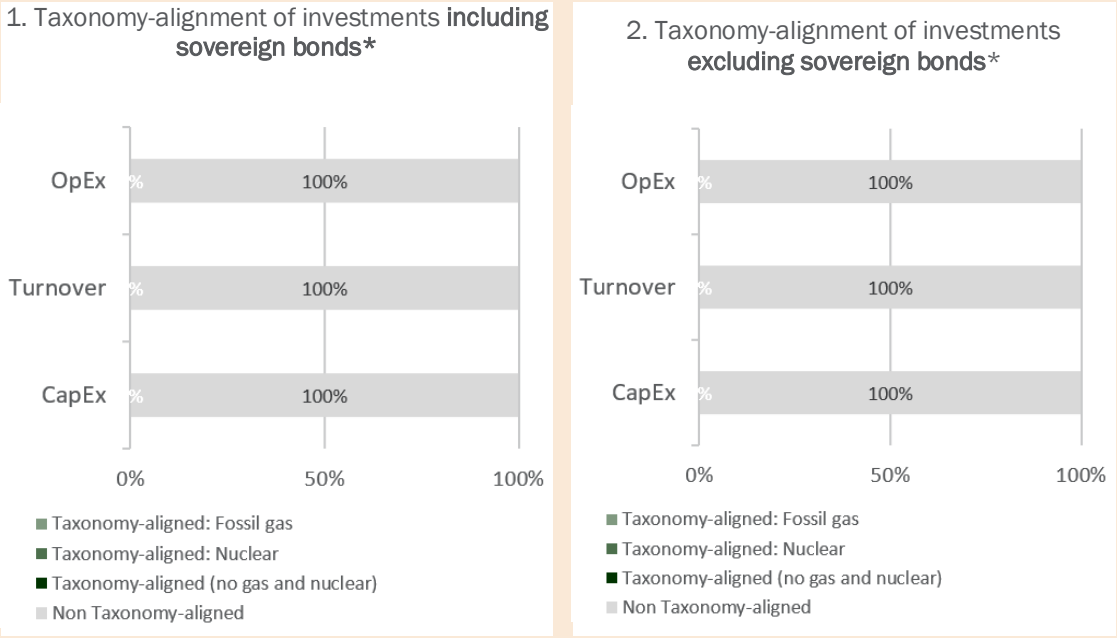
☐ In fossil gas ☐ In nuclear energy

☒ No

[12] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*



** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 26.89% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 31.69% of sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining "Other" investments represented 1.33% of the Financial Product's Net Asset Value.

The "other" assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/orSocial criteria described in this appendix. Such assets may be equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all "other" assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Artic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: https://www.axa-im.com/our-policies-and-reports

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Product Name: AXA IM Global Small Cap Equity QI (The "Financial Product")

Entity LEI: 2138005OB6LSRNHZ9E68

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ YES	☒ NO
☐ It made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 31.44% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon intensity
- Water Intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

How did the sustainability indicators perform?

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

Sustainability KPI Name	Value	Benchmark	Coverage
Carbon_intensity	170.86 CO2 tons per millions $ revenue for corporate and in CO2 Kg per PPP $ of GDP for sovereign	225.49 CO2 tons per millions $ revenue for corporate and in CO2 Kg per PPP $ of GDP for sovereign	1 %
water intensity	7030.48 Thousands of cubic meters for corporates	12724.04 Thousands of cubic meters for corporates	1 %

... And compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

1.**UN Sustainable Development Goals alignment (SDG)**of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2.**Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°c world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below –5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

has been qualitatively overridden.

- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

How were the indicators for adverse impacts on sustainability factors taken into account?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR. Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring. Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.
Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.
AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to 'significant contributing impact ' to – 10 corresponding to 'significant obstructing impact'), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.
Environment:

Relevant AXA IM policies	PAI indicator	Units	Measurement
Climate Risk policy Ecosystem Protection & Deforestation policy	PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023)	Metric tonnes	N/A
	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M$)	N/A
	PAI 3: GHG intensity of investee companies	Metric tonnes per eur million revenue	N/A
Climate Risk policy	PAI 4: Exposure to Companies active in the fossil fuel sector	% of investments	N/A
Climate Risk policy (engagement only)	PAI 5 : Share of non-renewable energy consumption and production	% of total energy sources	N/A
Climate risk policy (considering an expected correlation between GHG emissions and energy consumption)[13]	PAI 6: Energy consumption intensity per high impact climate sector	GWh per million EUR of revenue of investee companies, per high impact climate sector	N/A
Ecosystem Protection & Deforestation policy	PAI 7: Activities negatively affecting biodiversity sensitive areas	% of investments	N/A
SDG no significantly negative score	PAI 8: Emissions to water	Tonnes per million EUR invested, expressed as	N/A

[13] The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively. Not all high impact climate sectors are targeted by the exclusion policy for the time being.

		a weighted average	
SDG no significantly negative score	PAI 9: Hazardous waste and radioactive waste ratio	Tonnes per million EUR invested, expressed as a weighted average	N/A

Social and Governance:

Relevant AXA IM policies	PAI indicator	Units	Measurement
ESG standards policy: violation of international norms and standards	PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises	% of investments	N/A
ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) [14]	PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises	% of investments	N/A
SDG no significantly negative score	PAI 12: Unadjusted gender pay gap	Average unadjusted gender pay gap of investee companies	N/A
Voting and Engagement policy with systematic voting criteria linked with board gender diversity	PAI 13: Board gender diversity	Expressed as a percentage of all board members.	N/A
Controversial weapons policy	PAI 14: Exposure to controversial weapons	% of investments	N/A

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

[14] The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investment must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

Relevant AXA IM policies	PAI indicator	Units	Measurement
Climate Risk policy	PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)	Metric tonnes	N/A
Ecosystem protection & Deforestation policy			
Climate Risk policy	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M$)	N/A
Ecosystem protection & Deforestation policy			
Climate Risk policy	PAI 3: GHG intensity of investee companies	Metric tonnes per eur million revenue	N/A
Ecosystem protection & Deforestation policy			
Climate Risk policy	PAI 4: Exposure to companies active in the fossil fuel sector	% of investments	N/A
Climate Risk policy (engagement only)	PAI 5: Share of non-renewable energy consumption and production	% of total energy sources	N/A
Ecosystem protection & Deforestation policy	PAI 7: activities negatively affecting biodiversity sensitive area	% of investments	N/A

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

ESG standard policy / violation of international norms and standards	PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises	% of investments	N/A
Voting and Engagement policy with systematic voting criteria linked with board gender diversity	PAI 13: Board Gender diversity	Expressed as a percentage of all board members	N/A
Controversial weapons policy	PAI 14: Exposure to controversial weapons	% of investments	N/A

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2023-03-30

Top investments	Sector	Proportion	Country
DECKERS OUTDOOR CORP XNYS USD	Manufacture of wearing apparel	1.05%	US
JABIL INC XNYS USD	Manufacture of computer, electronic and optical products	0.94%	US
LATTICE SEMICONDUCTOR CORP XNGS USD	Manufacture of electronic components	0.93%	US
AGCO CORP XNYS USD	Manufacture of agricultural and forestry machinery	0.88%	US
MANHATTAN ASSOCIATES INC XNGS USD	Other software publishing	0.82%	US
FLEX LTD XNGS USD	Manufacture of computer, electronic and optical products	0.81%	US
CENTRICA PLC XLON GBP	Electricity, gas, steam and air conditioning supply	0.77%	GB
EMCOR GROUP INC XNYS USD	Construction of residential and non-residential buildings	0.72%	US

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

CASEY'S GENERAL STORES INC XNGS USD	Retail trade, except of motor vehicles and motorcycles	0.71%	US
REGAL REXNORD CORP XNYS USD	Manufacture of electric motors, generators and transformers	0.62%	US
VF CORP XNYS USD	Manufacture of wearing apparel	0.61%	US
TIMKEN CO XNYS USD	Manufacture of bearings, gears, gearing and driving elements	0.6%	US
MURPHY USA INC XNYS USD	Retail sale of automotive fuel in specialised stores	0.6%	US
CIRRUS LOGIC INC XNGS USD	Manufacture of electronic components	0.59%	US
MARRIOTT VACATIONS WORLD XNYS USD	Hotels and similar accommodation	0.59%	US

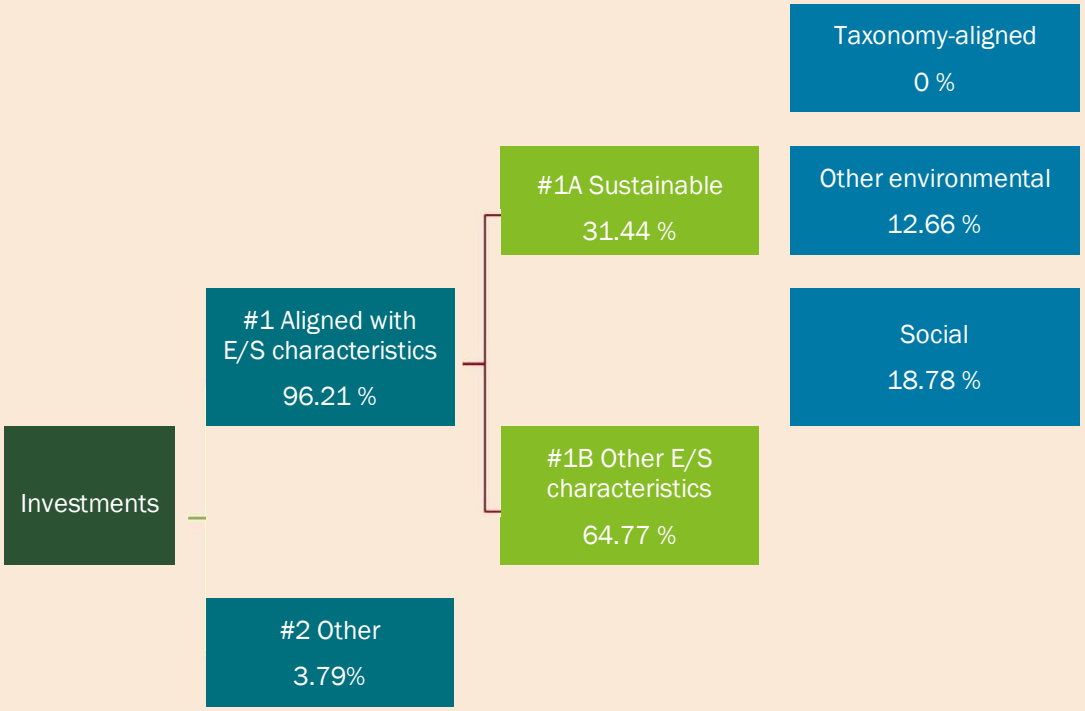
The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period.
Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

In which economic sectors were the investments made?

Financial product's investments were made in the economic sectors detailed below:

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Top sector	Proportion
Other monetary intermediation	6.11%
Other software publishing	5.61%
Renting and operating of own or leased real estate	4.89%
Manufacture of electronic components	3.36%
Construction of residential and non-residential buildings	2.69%
Manufacture of wearing apparel	2.39%
Retail trade, except of motor vehicles and motorcycles	2.33%
Manufacture of tubes, pipes, hollow profiles and related fittings, of steel	2.14%
Manufacture of computer, electronic and optical products	2.14%
Computer programming, consultancy and related activities	2.05%
Manufacture of agricultural and forestry machinery	1.77%
Other human health activities	1.62%
Manufacture of basic pharmaceutical products	1.5%
Manufacture of instruments and appliances for measuring, testing and navigation	1.49%
Support activities for petroleum and natural gas extraction	1.42%
Hotels and similar accommodation	1.41%
Business and other management consultancy activities	1.4%
Manufacture of electrical equipment	1.38%
Manufacture of other parts and accessories for motor vehicles	1.34%
Restaurants and mobile food service activities	1.31%
Research and experimental development on biotechnology	1.31%
Manufacture of electric lighting equipment	1.13%
Manufacture of irradiation, electromedical and electrotherapeutic equipment	1.11%
Retail sale of automotive fuel in specialised stores	1.09%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Non-life insurance	1.01%
Retail sale of clothing in specialised stores	0.96%
Manufacture of other chemical products n.e.c.	0.92%
Manufacture of other special-purpose machinery n.e.c.	0.91%
Crop and animal production, hunting and related service activities	0.89%
Manufacture of fertilisers and nitrogen compounds	0.89%
Manufacture of lifting and handling equipment	0.87%
Extraction of crude petroleum and natural gas	0.83%
Wholesale of pharmaceutical goods	0.8%
Mining of other non-ferrous metal ores	0.79%
Web portals	0.78%
Sale of cars and light motor vehicles	0.78%
Manufacture of medical and dental instruments and supplies	0.78%
Electricity, gas, steam and air conditioning supply	0.77%
Computer programming activities	0.76%
Other activities auxiliary to financial services, except insurance and pension funding	0.72%
Other information technology and computer service activities	0.71%
Other transportation support activities	0.7%
Fund management activities	0.69%
Activities of holding companies	0.68%
Real estate activities	0.66%
Retail sale of furniture, lighting equipment and other household articles in specialised stores	0.66%
Retail sale of sporting equipment in specialised stores	0.66%
Manufacture of other pumps and compressors	0.65%
Retail sale of audio and video equipment in specialised stores	0.63%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Manufacture of electric motors, generators and transformers	0.62%
Satellite telecommunications activities	0.6%
Manufacture of bearings, gears, gearing and driving elements	0.6%
Manufacture of other non-metallic mineral products	0.59%
Other professional, scientific and technical activities n.e.c.	0.55%
Manufacture of communication equipment	0.55%
Manufacture of ovens, furnaces and furnace burners	0.53%
Manufacture of perfumes and toilet preparations	0.52%
Other business support service activities n.e.c.	0.52%
Manufacture of other organic basic chemicals	0.51%
Retail sale of hardware, paints and glass in specialised stores	0.51%
Residential nursing care activities	0.5%
Manufacture of machinery for mining, quarrying and construction	0.5%
Private security activities	0.5%
Activities of employment placement agencies	0.49%
Motion picture projection activities	0.48%
Reinsurance	0.47%
Logging	0.47%
Wholesale of mining, construction and civil engineering machinery	0.46%
Copper production	0.45%
Other credit granting	0.45%
Construction of utility projects for electricity and telecommunications	0.42%
Manufacture of batteries and accumulators	0.4%
Distribution of electricity	0.39%
Wired telecommunications activities	0.39%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Manufacture of wire products, chain and springs	0.37%
Production of electricity	0.37%
Manufacture of computers and peripheral equipment	0.36%
Extraction of crude petroleum	0.36%
Manufacture of soft drinks, production of mineral waters and other bottled waters	0.36%
Wholesale of beverages	0.35%
Transport via pipeline	0.34%
Manufacture of pharmaceutical preparations	0.33%
Manufacture of doors and windows of metal	0.33%
Computer consultancy activities	0.32%
Manufacture of bread, manufacture of fresh pastry goods and cakes	0.31%
Retail sale via mail order houses or via Internet	0.3%
Trusts, funds and similar financial entities	0.29%
Gambling and betting activities	0.28%
Manufacture of refined petroleum products	0.27%
Manufacture of motor vehicles	0.26%
Technical testing and analysis	0.26%
Manufacture of fluid power equipment	0.26%
Freight transport by road	0.26%
Wholesale of other intermediate products	0.24%
Manufacture of air and spacecraft and related machinery	0.24%
Retail sale of newspapers and stationery in specialised stores	0.24%
Security systems service activities	0.24%
Manufacture of food products	0.23%
Wholesale of computers, computer peripheral equipment and software	0.22%
Manufacture of corrugated paper and paperboard and of containers of paper and paperboard	0.22%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Manufacture of paints, varnishes and similar coatings, printing ink and mastics	0.22%
Retail sale of watches and jewellery in specialised stores	0.21%
Manufacture of office and shop furniture	0.21%
Manufacture of pesticides and other agrochemical products	0.2%
Retail trade of motor vehicle parts and accessories	0.2%
Wholesale trade, except of motor vehicles and motorcycles	0.19%
Manufacture of bodies (coachwork) for motor vehicles, manufacture of trailers and semi-trailers	0.19%
Manufacture of motor vehicles, trailers and semi-trailers	0.19%
Civil engineering	0.19%
Manufacture of condiments and seasonings	0.18%
Architectural and engineering activities, technical testing and analysis	0.18%
Manufacture of veneer sheets and wood-based panels	0.18%
Financial leasing	0.18%
Manufacture of cement	0.17%
Other information service activities n.e.c.	0.17%
Agents involved in the sale of a variety of goods	0.16%
Manufacture of other builders' carpentry and joinery	0.16%
Combined facilities support activities	0.16%
Activities of insurance agents and brokers	0.16%
Retail sale of footwear and leather goods in specialised stores	0.16%
Extraction of natural gas	0.15%
Manufacture of sports goods	0.15%
Manufacture of paper and paperboard	0.15%
Collection of non-hazardous waste	0.15%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Wholesale of agricultural machinery, equipment and supplies	0.15%
Management of real estate on a fee or contract basis	0.15%
Sea and coastal freight water transport	0.14%
Temporary employment agency activities	0.14%
Physical well-being activities	0.14%
Operation of dairies and cheese making	0.14%
Manufacture of metal forming machinery	0.13%
Education	0.13%
Hospital activities	0.12%
Wholesale of metals and metal ores	0.12%
Book publishing	0.12%
Manufacture of footwear	0.12%
Life insurance	0.11%
Manufacture of other general-purpose machinery n.e.c.	0.11%
Sawmilling and planing of wood	0.11%
Manufacture of explosives	0.11%
Construction of roads and motorways	0.1%
Wireless telecommunications activities	0.1%
Growing of cereals (except rice), leguminous crops and oil seeds	0.1%
Treatment and disposal of hazardous waste	0.1%
Wholesale of furniture, carpets and lighting equipment	0.1%
Support activities for other mining and quarrying	0.1%
Passenger air transport	0.09%
Advertising agencies	0.09%
Manufacture of other inorganic basic chemicals	0.09%
Building of ships and floating structures	0.08%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[15]*?*

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

☐ Yes

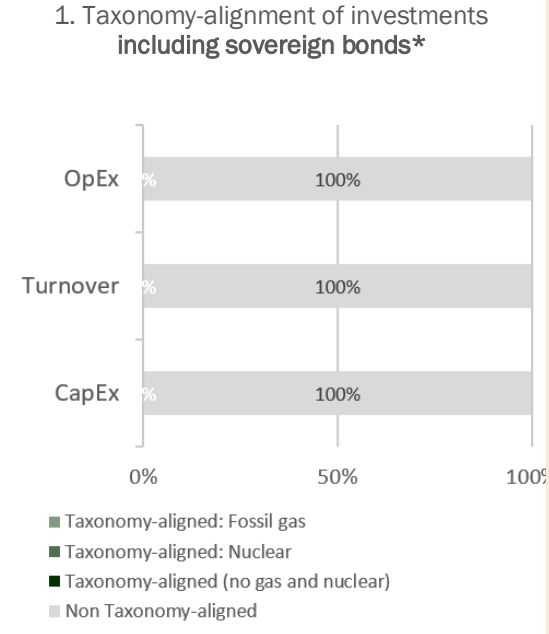
☐ In fossil gas ☐ In nuclear energy

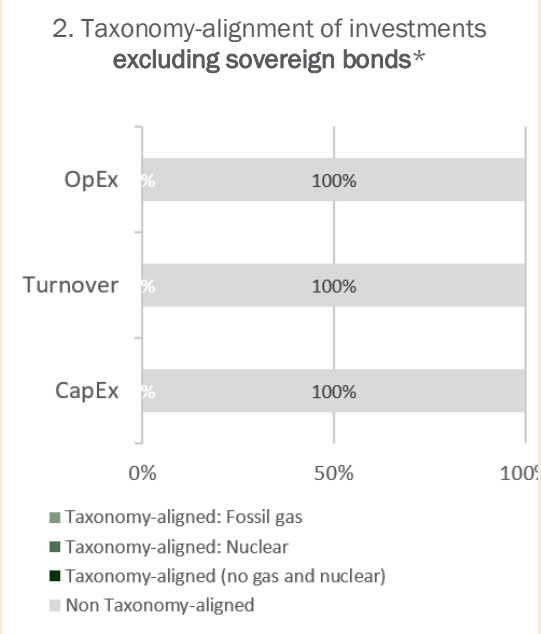
☒ No

[15] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 12.66% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 18.78% of sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining "Other" investments represented 3.79% of the Financial Product's Net Asset Value.

The "other" assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/orSocial criteria described in this appendix. Such assets may be equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all "other" assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Artic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: https://www.axa-im.com/our-policies-and-reports

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Product Name: AXA IM Japan Equity (The "Financial Product")

Entity LEI: 213800W1TW7UE2C1YR70

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ YES	☒ NO
☐ It made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 41.05% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon intensity
- Water Intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the

How did the sustainability indicators perform?

financial product are attained.

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

Sustainability KPI Name	Value	Benchmark	Coverage
Carbon_intensity	187.95 CO2 tons per millions $ revenue for corporate and in CO2 Kg per PPP $ of GDP for sovereign	162.45 CO2 tons per millions $ revenue for corporate and in CO2 Kg per PPP $ of GDP for sovereign	1 %
water intensity	12316.88 Thousands of cubic meters for corporates	6466.6 Thousands of cubic meters for corporates	1 %

... And compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

1.**UN Sustainable Development Goals alignment (SDG)**of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2.**Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°c world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below –5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

in SFDR precontractual annex).

How were the indicators for adverse impacts on sustainability factors taken into account?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.
Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.
Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.
Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.
AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to 'significant contributing impact ' to – 10 corresponding to 'significant obstructing impact'), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.
Environment:

Relevant AXA IM policies	PAI indicator	Units	Measurement
Climate Risk policy Ecosystem Protection & Deforestation policy	PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023)	Metric tonnes	N/A
	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M$)	N/A
	PAI 3: GHG intensity of investee companies	Metric tonnes per eur million revenue	N/A
Climate Risk policy	PAI 4: Exposure to Companies active in the fossil fuel sector	% of investments	N/A
Climate Risk policy (engagement only)	PAI 5 : Share of non-renewable energy consumption and production	% of total energy sources	N/A
Climate risk policy (considering an expected correlation between GHG emissions and energy consumption)[16]	PAI 6: Energy consumption intensity per high impact climate sector	GWh per million EUR of revenue of investee companies, per high impact climate sector	N/A
Ecosystem Protection & Deforestation policy	PAI 7: Activities negatively affecting biodiversity sensitive areas	% of investments	N/A
SDG no significantly negative score	PAI 8: Emissions to water	Tonnes per million EUR invested, expressed as a weighted average	N/A

[16] The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively. Not all high impact climate sectors are targeted by the exclusion policy for the time being.

SDG no significantly negative score	PAI 9: Hazardous waste and radioactive waste ratio	Tonnes per million EUR invested, expressed as a weighted average	N/A

Social and Governance:

Relevant AXA IM policies	PAI indicator	Units	Measurement
ESG standards policy: violation of international norms and standards	PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises	% of investments	N/A
ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) [17]	PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises	% of investments	N/A
SDG no significantly negative score	PAI 12: Unadjusted gender pay gap	Average unadjusted gender pay gap of investee companies	N/A
Voting and Engagement policy with systematic voting criteria linked with board gender diversity	PAI 13: Board gender diversity	Expressed as a percentage of all board members.	N/A
Controversial weapons policy	PAI 14: Exposure to controversial weapons	% of investments	N/A

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

[17] The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investment must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

Relevant AXA IM policies	PAI indicator	Units	Measurement
Climate Risk policy	PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)	Metric tonnes	N/A
Ecosystem protection & Deforestation policy			
Climate Risk policy	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M$)	N/A
Ecosystem protection & Deforestation policy			
Climate Risk policy	PAI 3: GHG intensity of investee companies	Metric tonnes per eur million revenue	N/A
Ecosystem protection & Deforestation policy			
Climate Risk policy	PAI 4: Exposure to companies active in the fossil fuel sector	% of investments	N/A
Climate Risk policy (engagement only)	PAI 5: Share of non-renewable energy consumption and production	% of total energy sources	N/A
Ecosystem protection & Deforestation policy	PAI 7: activities negatively affecting biodiversity sensitive area	% of investments	N/A
ESG standard policy / violation of international norms and standards	PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises	% of investments	N/A

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Voting and Engagement policy with systematic voting criteria linked with board gender diversity	PAI 13: Board Gender diversity	Expressed as a percentage of all board members	N/A
Controversial weapons policy	PAI 14: Exposure to controversial weapons	% of investments	N/A

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2023-03-30

Top investments	Sector	Proportion	Country
TOYOTA MOTOR CORP XTKS JPY	Manufacture of motor vehicles	3.89%	JP
Portfolio 2630 JPY SET SSI	Other monetary intermediation	3.01%	0
SONY GROUP CORP XTKS JPY	Manufacture of consumer electronics	3.01%	JP
OMRON CORP XTKS JPY	Manufacture of other special-purpose machinery n.e.c.	2.97%	JP
SYSMEX CORP XTKS JPY	Manufacture of instruments and appliances for measuring, testing and navigation	2.57%	JP
FUJITSU LIMITED XTKS JPY	Computer programming, consultancy and related activities	2.52%	JP
MITSUBISHI UFJ FINANCIAL GRO XTKS JPY	Other monetary intermediation	2.5%	JP
NINTENDO CO LTD XTKS JPY	Manufacture of consumer electronics	2.39%	JP
IBIDEN CO LTD XTKS JPY	Manufacture of electronic components	2.33%	JP
FUJIFILM HOLDINGS CORP XTKS JPY	Manufacture of computers and peripheral equipment	2.26%	JP

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

KOMATSU LTD XTKS JPY	Manufacture of machinery for mining, quarrying and construction	2.22%	JP
KEYENCE CORP XTKS JPY	Manufacture of other special-purpose machinery n.e.c.	2.15%	JP
FANUC CORP XTKS JPY	Manufacture of other special-purpose machinery n.e.c.	2.13%	JP
SOMPO HOLDINGS INC XTKS JPY	Non-life insurance	2.07%	JP
RECRUIT HOLDINGS CO LTD XTKS JPY	Activities of employment placement agencies	2.07%	JP

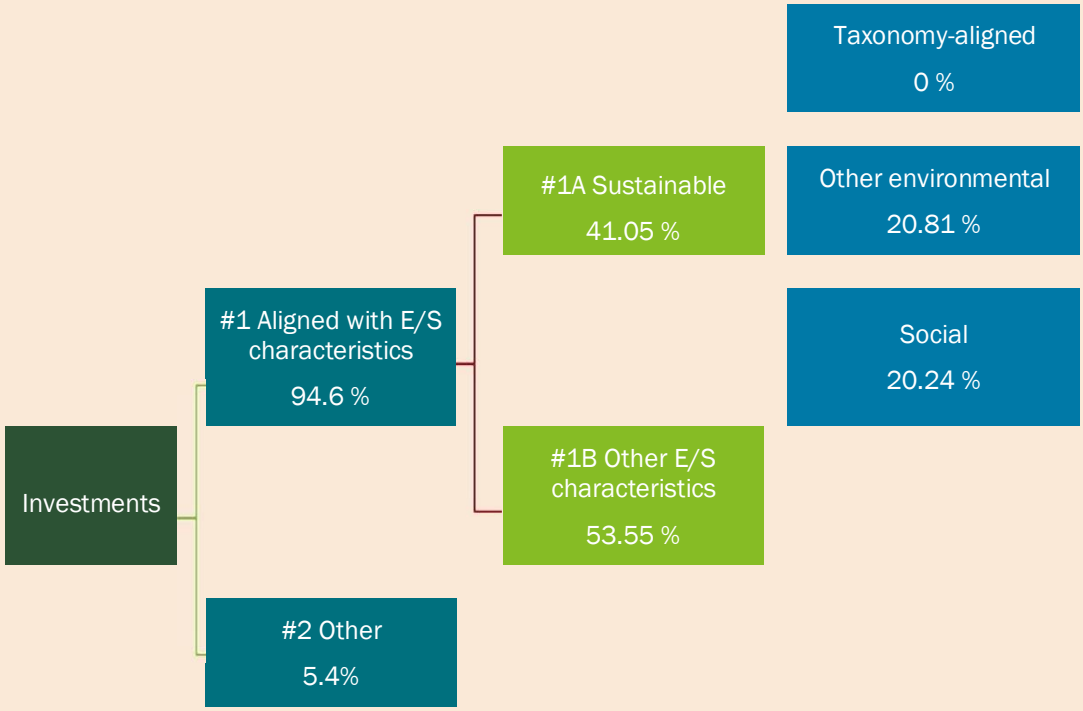
The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

In which economic sectors were the investments made?

Financial product's investments were made in the economic sectors detailed below:

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Top sector	Proportion
Manufacture of other special-purpose machinery n.e.c.	11.08%
Manufacture of consumer electronics	6.48%
Other monetary intermediation	5.58%
Manufacture of electrical equipment	5.22%
Computer programming, consultancy and related activities	4.39%
Non-life insurance	4.06%
Manufacture of motor vehicles	3.89%
Manufacture of electronic components	3.39%
Wholesale of metals and metal ores	3.36%
Manufacture of instruments and appliances for measuring, testing and navigation	3.28%
Manufacture of motor vehicles, trailers and semi-trailers	2.99%
Other transportation support activities	2.94%
Manufacture of basic pharmaceutical products	2.61%
Manufacture of other chemical products n.e.c.	2.37%
Manufacture of computers and peripheral equipment	2.26%
Manufacture of machinery for mining, quarrying and construction	2.22%
Activities of employment placement agencies	2.07%
Manufacture of electric motors, generators and transformers	1.76%
Manufacture of machinery and equipment n.e.c.	1.51%
Manufacture of flat glass	1.5%
Manufacture of household and sanitary goods and of toilet requisites	1.47%
Advertising agencies	1.32%
Research and experimental development on biotechnology	1.3%
Other human health activities	1.26%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Manufacture of ovens, furnaces and furnace burners	1.21%
Renting and operating of own or leased real estate	1.2%
Financial leasing	1.17%
Support activities to performing arts	1.15%
Manufacture of plastic plates, sheets, tubes and profiles	1.15%
Private security activities	1.13%
Manufacture of other organic basic chemicals	1.11%
Security and commodity contracts brokerage	1.08%
Computer consultancy activities	1.06%
Wholesale of hardware, plumbing and heating equipment and supplies	1.05%
Construction of utility projects for electricity and telecommunications	1.03%
Other software publishing	1.02%
Distribution of gaseous fuels through mains	1.01%
Retail sale of hardware, paints and glass in specialised stores	1%
Production of electricity	0.97%
Computer facilities management activities	0.9%
Manufacture of textiles	0.89%
Other information service activities n.e.c.	0.87%
Manufacture of musical instruments	0.86%
Manufacture of electrical and electronic equipment for motor vehicles	0.68%
Book publishing	0.66%
Sea and coastal freight water transport	0.31%
Retail sale of audio and video equipment in specialised stores	0.21%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[18]*?*

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

☐ Yes

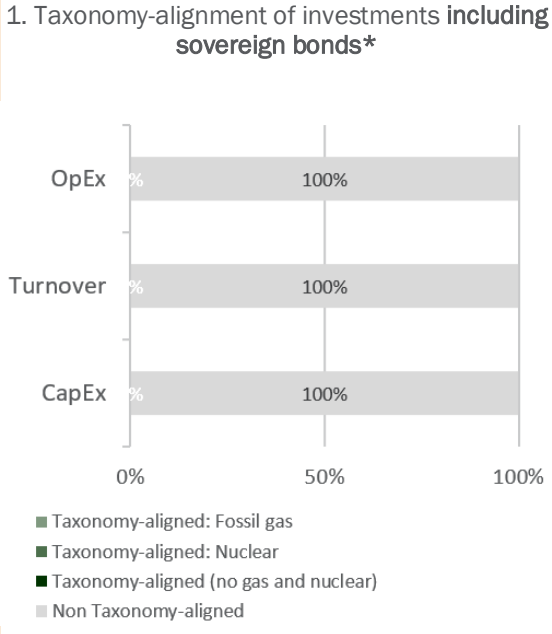
☐ In fossil gas ☐ In nuclear energy

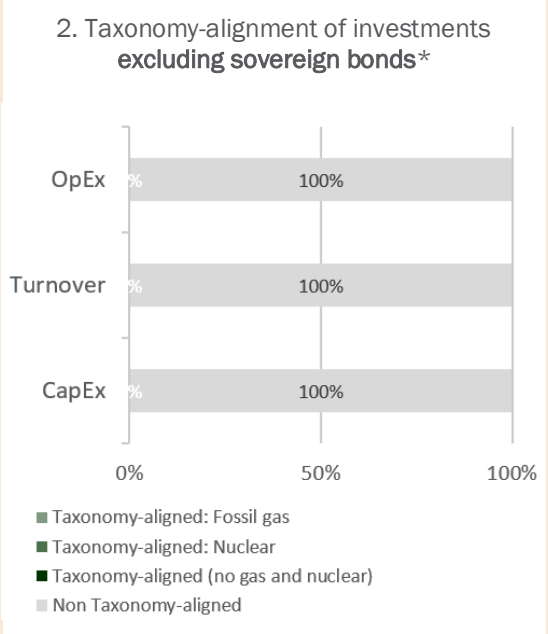
☒ No

[18] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 20.81% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 20.24% of sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining "Other" investments represented 5.4% of the Financial Product's Net Asset Value.

The "other" assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/orSocial criteria described in this appendix. Such assets may be equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all "other" assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Artic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: https://www.axa-im.com/our-policies-and-reports

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Product Name: AXA IM Japan Small Cap Equity (The "Financial Product") **Entity LEI:** 2138004CBMR82UN7BD86

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ YES	☒ NO
☐ It made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 10.82% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon intensity
- Water Intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the

How did the sustainability indicators perform?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

financial product are attained.

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

Sustainability KPI Name	Value	Benchmark	Coverage
Carbon_intensity	130.71 CO2 tons per millions $ revenue for corporate and in CO2 Kg per PPP $ of GDP for sovereign	240.31 CO2 tons per millions $ revenue for corporate and in CO2 Kg per PPP $ of GDP for sovereign	0.98 %
water intensity	1581.99 Thousands of cubic meters for corporates	13536.81 Thousands of cubic meters for corporates	0.98 %

... And compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

1.**UN Sustainable Development Goals alignment (SDG)**of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2.**Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°c world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below –5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

in SFDR precontractual annex).

How were the indicators for adverse impacts on sustainability factors taken into account?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.
Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.
Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.
Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.
AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to 'significant contributing impact ' to – 10 corresponding to 'significant obstructing impact'), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.
Environment:

Relevant AXA IM policies	PAI indicator	Units	Measurement
Climate Risk policy Ecosystem Protection & Deforestation policy	PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023)	Metric tonnes	N/A
	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M$)	N/A
	PAI 3: GHG intensity of investee companies	Metric tonnes per eur million revenue	N/A
Climate Risk policy	PAI 4: Exposure to Companies active in the fossil fuel sector	% of investments	N/A
Climate Risk policy (engagement only)	PAI 5 : Share of non-renewable energy consumption and production	% of total energy sources	N/A
Climate risk policy (considering an expected correlation between GHG emissions and energy consumption)[19]	PAI 6: Energy consumption intensity per high impact climate sector	GWh per million EUR of revenue of investee companies, per high impact climate sector	N/A
Ecosystem Protection & Deforestation policy	PAI 7: Activities negatively affecting biodiversity sensitive areas	% of investments	N/A
SDG no significantly negative score	PAI 8: Emissions to water	Tonnes per million EUR invested, expressed as a weighted average	N/A

[19] The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively. Not all high impact climate sectors are targeted by the exclusion policy for the time being.

SDG no significantly negative score	PAI 9: Hazardous waste and radioactive waste ratio	Tonnes per million EUR invested, expressed as a weighted average	N/A

Social and Governance:

Relevant AXA IM policies	PAI indicator	Units	Measurement
ESG standards policy: violation of international norms and standards	PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises	% of investments	N/A
ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) [20]	PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises	% of investments	N/A
SDG no significantly negative score	PAI 12: Unadjusted gender pay gap	Average unadjusted gender pay gap of investee companies	N/A
Voting and Engagement policy with systematic voting criteria linked with board gender diversity	PAI 13: Board gender diversity	Expressed as a percentage of all board members.	N/A
Controversial weapons policy	PAI 14: Exposure to controversial weapons	% of investments	N/A

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

[20] The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investment must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

Relevant AXA IM policies	PAI indicator	Units	Measurement
Climate Risk policy	PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)	Metric tonnes	N/A
Ecosystem protection & Deforestation policy			
Climate Risk policy	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M$)	N/A
Ecosystem protection & Deforestation policy			
Climate Risk policy	PAI 3: GHG intensity of investee companies	Metric tonnes per eur million revenue	N/A
Ecosystem protection & Deforestation policy			
Climate Risk policy	PAI 4: Exposure to companies active in the fossil fuel sector	% of investments	N/A
Climate Risk policy (engagement only)	PAI 5: Share of non-renewable energy consumption and production	% of total energy sources	N/A
Ecosystem protection & Deforestation policy	PAI 7: activities negatively affecting biodiversity sensitive area	% of investments	N/A
ESG standard policy / violation of international norms and standards	PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises	% of investments	N/A

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Voting and Engagement policy with systematic voting criteria linked with board gender diversity	PAI 13: Board Gender diversity	Expressed as a percentage of all board members	N/A
Controversial weapons policy	PAI 14: Exposure to controversial weapons	% of investments	N/A

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2023-03-30

Top investments	Sector	Proportion	Country
Portfolio 2644 JPY SET SSI	Other monetary intermediation	3.01%	0
KAGA ELECTRONICS CO LTD XTKS JPY	Manufacture of computer, electronic and optical products	2.4%	JP
HORIBA LTD XTKS JPY	Manufacture of instruments and appliances for measuring, testing and navigation	2.35%	JP

NISSHA CO LTD XTKS JPY	Manufacture of electronic components	2.2%	JP
CHANGE INC XTKS JPY	Computer programming activities	2.18%	JP
VECTOR INC XTKS JPY	Support activities to performing arts	2.11%	JP
IRISO ELECTRONICS CO LTD XTKS JPY	Manufacture of electrical equipment	1.97%	JP
SHIN NIPPON BIOMEDICAL LABOR XTKS JPY	Other human health activities	1.94%	JP
IBIDEN CO LTD XTKS JPY	Manufacture of electronic components	1.93%	JP

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

CKD CORP XTKS JPY	Manufacture of other special-purpose machinery n.e.c.	1.89%	JP
KUREHA CORP XTKS JPY	Manufacture of other organic basic chemicals	1.87%	JP
SHIFT INC XTKS JPY	Computer programming, consultancy and related activities	1.8%	JP
EXEO GROUP INC XTKS JPY	Construction of utility projects for electricity and telecommunications	1.79%	JP
OUTSOURCING INC XTKS JPY	Other information technology and computer service activities	1.78%	JP

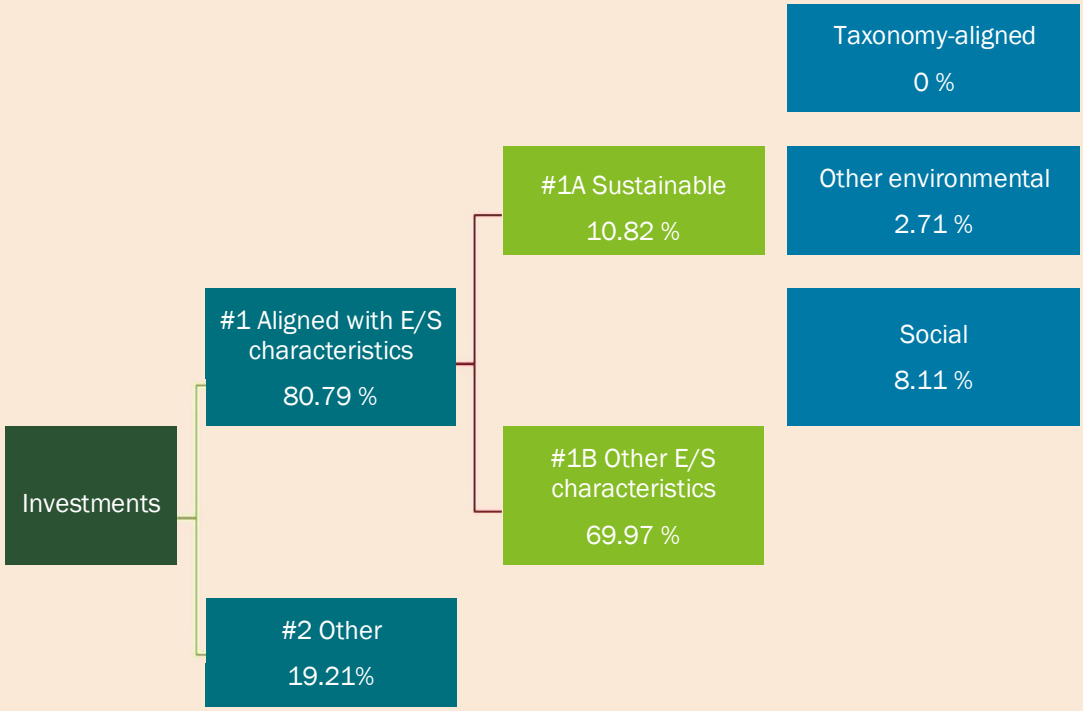
The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

In which economic sectors were the investments made?

Financial product's investments were made in the economic sectors detailed below:

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Top sector	Proportion
Manufacture of electronic components	7.1%
Manufacture of electrical equipment	6.09%
Manufacture of other special-purpose machinery n.e.c.	5.85%
Web portals	5%
Other software publishing	3.94%
Other monetary intermediation	3.85%
Research and experimental development on biotechnology	3.58%
Manufacture of other organic basic chemicals	3.45%
Other human health activities	3.31%
Temporary employment agency activities	2.93%
Construction of residential and non-residential buildings	2.69%
Retail sale via mail order houses or via Internet	2.47%
Manufacture of computer, electronic and optical products	2.4%
Manufacture of instruments and appliances for measuring, testing and navigation	2.35%
Computer programming activities	2.18%
Support activities to performing arts	2.11%
Computer programming, consultancy and related activities	1.8%
Construction of utility projects for electricity and telecommunications	1.79%
Other information technology and computer service activities	1.78%
Manufacture of irradiation, electromedical and electrotherapeutic equipment	1.78%
Other transportation support activities	1.77%
Manufacture of other chemical products n.e.c.	1.77%
Computer facilities management activities	1.74%
Wholesale of hardware, plumbing and heating equipment and supplies	1.72%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Civil engineering	1.68%
Manufacture of textiles	1.67%
Other information service activities n.e.c.	1.66%
Production of abrasive products	1.66%
Other activities auxiliary to financial services, except insurance and pension funding	1.63%
Retail sale of hardware, paints and glass in specialised stores	1.59%
Manufacture of consumer electronics	1.56%
Manufacture of plastic plates, sheets, tubes and profiles	1.51%
Manufacture of household and sanitary goods and of toilet requisites	1.5%
Book publishing	1.46%
Manufacture of medical and dental instruments and supplies	1.44%
Management of real estate on a fee or contract basis	1.44%
Other business support service activities n.e.c.	1.43%
Other credit granting	1.43%
Distribution of gaseous fuels through mains	1.41%
Wholesale of pharmaceutical goods	1.35%
Advertising agencies	1.14%
Investigation activities	0.98%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

- *Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy*[21]*?*

[21] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

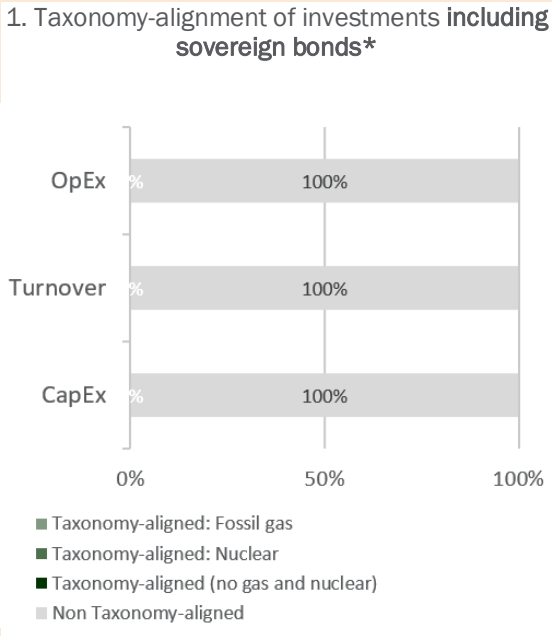
☐ Yes

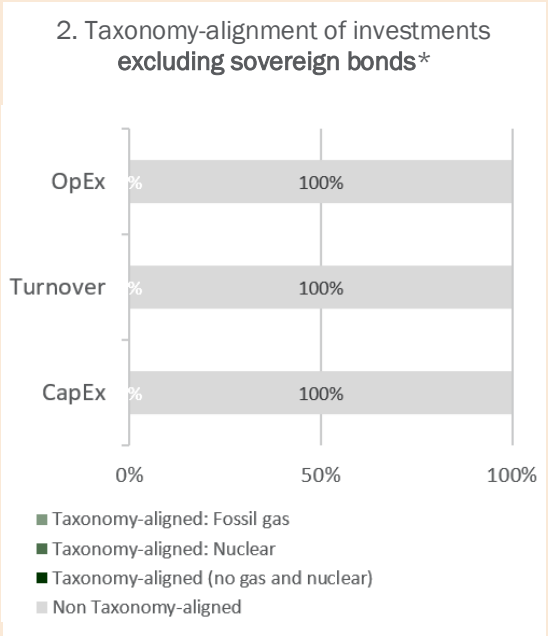
☐ In fossil gas ☐ In nuclear energy

☒ No

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 2.71% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 8.11% of sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining "Other" investments represented 19.21% of the Financial Product's Net Asset Value.

The "other" assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/orSocial criteria described in this appendix. Such assets may be equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all "other" assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Artic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: https://www.axa-im.com/our-policies-and-reports

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Product Name: AXA IM Pacific ex Japan Equity QI **Entity LEI:** 213800ZRPOICP3T5A150
(The "Financial Product")

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ YES	☒ NO
☐ It made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 46.09% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon intensity
- Water Intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

How did the sustainability indicators perform?

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

Sustainability KPI Name	Value	Benchmark	Coverage
Carbon_intensity	171.26 CO2 tons per millions $ revenue for corporate and in CO2 Kg per PPP $ of GDP for sovereign	247.48 CO2 tons per millions $ revenue for corporate and in CO2 Kg per PPP $ of GDP for sovereign	1 %
water intensity	1080.56 Thousands of cubic meters for corporates	4746.65 Thousands of cubic meters for corporates	1 %

... And compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

1.**UN Sustainable Development Goals alignment (SDG)**of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2.**Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°c world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below –5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

has been qualitatively overridden.

- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

How were the indicators for adverse impacts on sustainability factors taken into account?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR. Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring. Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.
Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.
AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to 'significant contributing impact ' to – 10 corresponding to 'significant obstructing impact'), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.
Environment:

Relevant AXA IM policies	PAI indicator	Units	Measurement
Climate Risk policy Ecosystem Protection & Deforestation policy	PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023)	Metric tonnes	N/A
	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M$)	N/A
	PAI 3: GHG intensity of investee companies	Metric tonnes per eur million revenue	N/A
Climate Risk policy	PAI 4: Exposure to Companies active in the fossil fuel sector	% of investments	N/A
Climate Risk policy (engagement only)	PAI 5 : Share of non-renewable energy consumption and production	% of total energy sources	N/A
Climate risk policy (considering an expected correlation between GHG emissions and energy consumption)[22]	PAI 6: Energy consumption intensity per high impact climate sector	GWh per million EUR of revenue of investee companies, per high impact climate sector	N/A
Ecosystem Protection & Deforestation policy	PAI 7: Activities negatively affecting biodiversity sensitive areas	% of investments	N/A
SDG no significantly negative score	PAI 8: Emissions to water	Tonnes per million EUR invested, expressed as	N/A

[22] The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively. Not all high impact climate sectors are targeted by the exclusion policy for the time being.

		a weighted average	
SDG no significantly negative score	PAI 9: Hazardous waste and radioactive waste ratio	Tonnes per million EUR invested, expressed as a weighted average	N/A

Social and Governance:

Relevant AXA IM policies	PAI indicator	Units	Measurement
ESG standards policy: violation of international norms and standards	PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises	% of investments	N/A
ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) [23]	PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises	% of investments	N/A
SDG no significantly negative score	PAI 12: Unadjusted gender pay gap	Average unadjusted gender pay gap of investee companies	N/A
Voting and Engagement policy with systematic voting criteria linked with board gender diversity	PAI 13: Board gender diversity	Expressed as a percentage of all board members.	N/A
Controversial weapons policy	PAI 14: Exposure to controversial weapons	% of investments	N/A

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

[23] The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investment must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

Relevant AXA IM policies	PAI indicator	Units	Measurement
Climate Risk policy	PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)	Metric tonnes	N/A
Ecosystem protection & Deforestation policy			
Climate Risk policy	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M$)	N/A
Ecosystem protection & Deforestation policy			
Climate Risk policy	PAI 3: GHG intensity of investee companies	Metric tonnes per eur million revenue	N/A
Ecosystem protection & Deforestation policy			
Climate Risk policy	PAI 4: Exposure to companies active in the fossil fuel sector	% of investments	N/A
Climate Risk policy (engagement only)	PAI 5: Share of non-renewable energy consumption and production	% of total energy sources	N/A
Ecosystem protection & Deforestation policy	PAI 7: activities negatively affecting biodiversity sensitive area	% of investments	N/A

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

ESG standard policy / violation of international norms and standards	PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises	% of investments	N/A
Voting and Engagement policy with systematic voting criteria linked with board gender diversity	PAI 13: Board Gender diversity	Expressed as a percentage of all board members	N/A
Controversial weapons policy	PAI 14: Exposure to controversial weapons	% of investments	N/A

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2023-03-30

Top investments	Sector	Proportion	Country
BHP GROUP LTD XASX AUD	Mining of iron ores	7.15%	AU
AIA GROUP LTD XHKG HKD	Life insurance	5.79%	HK
COMMONWEALTH BANK OF AUSTRAL XASX AUD	Other monetary intermediation	4.69%	AU
HONG KONG EXCHANGES & CLEAR XHKG HKD	Administration of financial markets	4.13%	HK
DBS GROUP HOLDINGS LTD XSES SGD	Other monetary intermediation	3.93%	SG
ANZ GROUP HOLDINGS LTD XASX AUD	Other monetary intermediation	3.84%	AU
CSL LTD XASX AUD	Research and experimental development on biotechnology	3.82%	AU
MACQUARIE GROUP LTD XASX AUD	Other monetary intermediation	3.77%	AU
WOODSIDE ENERGY GROUP LTD XASX AUD	Extraction of crude petroleum and natural gas	3.43%	AU

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

TRANSURBAN GROUP XASX AUD	Service activities incidental to land transportation	2.93%	AU
FORTESCUE METALS GROUP LTD XASX AUD	Mining of iron ores	2.59%	AU
QBE INSURANCE GROUP LTD XASX AUD	Non-life insurance	2.22%	AU
OVERSEA-CHINESE BANKING CORP XSES SGD	Other monetary intermediation	2.17%	SG
UNITED OVERSEAS BANK LTD XSES SGD	Other monetary intermediation	1.96%	SG
BRAMBLES LTD XASX AUD	Manufacture of other articles of paper and paperboard	1.91%	AU

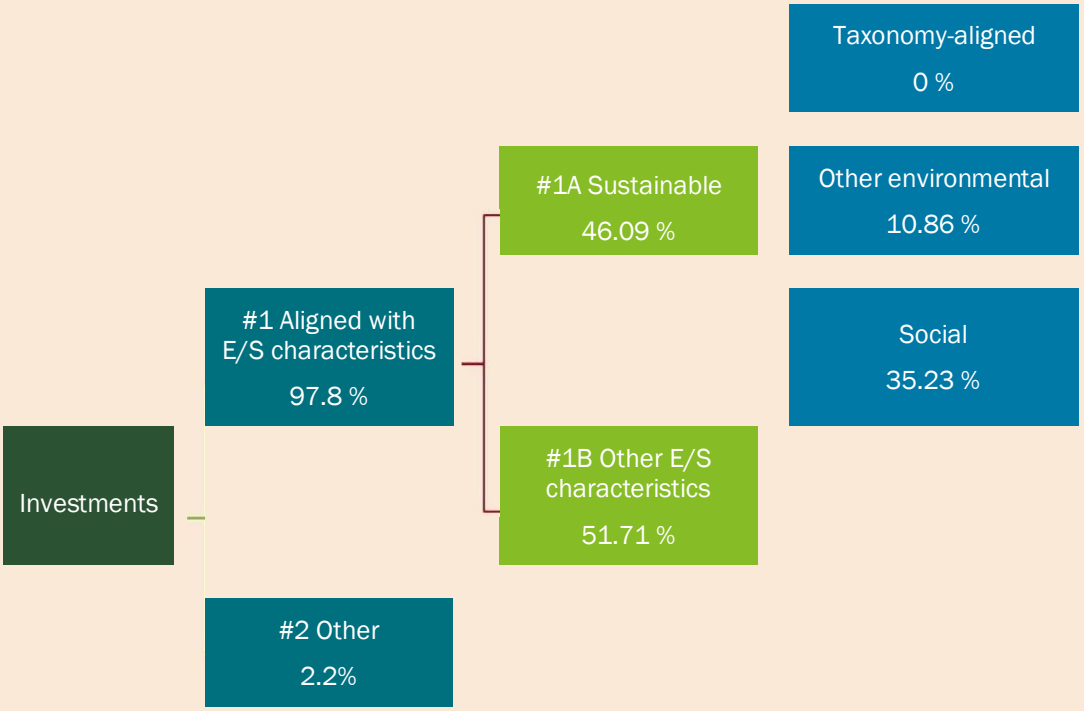
The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period.
Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

In which economic sectors were the investments made?

Financial product's investments were made in the economic sectors detailed below:

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Top sector	Proportion
Other monetary intermediation	26.65%
Mining of iron ores	9.99%
Renting and operating of own or leased real estate	7.63%
Life insurance	6.36%
Administration of financial markets	4.59%
Non-life insurance	3.93%
Research and experimental development on biotechnology	3.82%
Extraction of crude petroleum and natural gas	3.43%
Service activities incidental to land transportation	2.93%
Manufacture of irradiation, electromedical and electrotherapeutic equipment	1.95%
Wholesale of beverages	1.95%
Manufacture of other articles of paper and paperboard	1.91%
Manufacture of medical and dental instruments and supplies	1.82%
Retail sale via mail order houses or via Internet	1.79%
Other activities auxiliary to financial services, except insurance and pension funding	1.71%
Passenger air transport	1.56%
Distribution of gaseous fuels through mains	1.43%
Manufacture of soft drinks, production of mineral waters and other bottled waters	1.36%
Mining of chemical and fertiliser minerals	1.33%
Mining of other non-ferrous metal ores	1.31%
Other transportation support activities	0.92%
Web portals	0.86%
Retail sale of hardware, paints and glass in specialised stores	0.78%
Wholesale of mining, construction and civil engineering machinery	0.78%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Retail trade, except of motor vehicles and motorcycles	0.73%
Retail sale of audio and video equipment in specialised stores	0.66%
Construction of residential and non-residential buildings	0.62%
Wholesale and retail trade and repair of motor vehicles and motorcycles	0.59%
Gambling and betting activities	0.59%
Retail trade of motor vehicle parts and accessories	0.57%
Manufacture of wearing apparel	0.57%
Manufacture of other non-metallic mineral products	0.51%
Manufacture of pesticides and other agrochemical products	0.4%
Manufacture of consumer electronics	0.38%
Support activities for other mining and quarrying	0.35%
Hospital activities	0.31%
Manufacture of beer	0.29%
Wholesale of grain, unmanufactured tobacco, seeds and animal feeds	0.27%
Manufacture of electric motors, generators and transformers	0.27%
Other software publishing	0.24%
Advertising agencies	0.19%
Sea and coastal freight water transport	0.16%
Residential care activities	0.15%
Production of meat and poultry meat products	0.14%
Manufacture of other special-purpose machinery n.e.c.	0.13%
Manufacture of other outerwear	0.12%
Wholesale of clothing and footwear	0.11%
Urban and suburban passenger land transport	0.11%
Wireless telecommunications activities	0.1%
Water collection, treatment and supply	0.09%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Postal activities under universal service obligation	0.09%
Manufacture of footwear	0.09%
Other credit granting	0.08%
Manufacture of other inorganic basic chemicals	0.07%
Manufacture of chemicals and chemical products	0.07%
Retail sale of clothing in specialised stores	0.05%
Manufacture of tubes, pipes, hollow profiles and related fittings, of steel	0.05%
Manufacture of other organic basic chemicals	0.04%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[24]*?*

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

☐ Yes

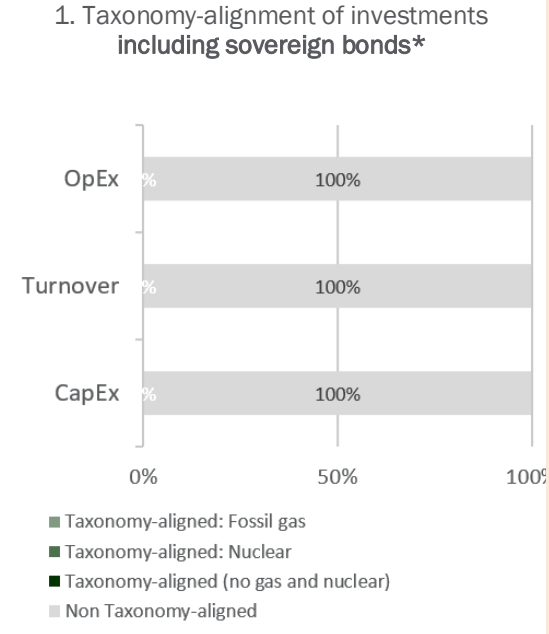
☐ In fossil gas ☐ In nuclear energy

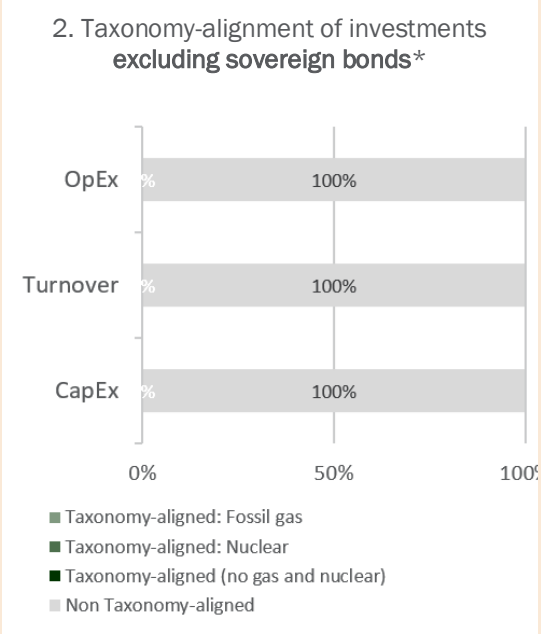
☒ No

[24] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 10.86% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 35.23% of sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining "Other" investments represented 2.2% of the Financial Product's Net Asset Value.

The "other" assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/orSocial criteria described in this appendix. Such assets may be equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all "other" assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Artic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: https://www.axa-im.com/our-policies-and-reports

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Product Name: AXA IM US Enhanced Equity QI (The "Financial Product")

Entity LEI: 2138005TBUBJV5MTZ147

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ YES	☒ NO
☐ It made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 60.43% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon intensity
- Water Intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

How did the sustainability indicators perform?

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

Sustainability KPI Name	Value	Benchmark	Coverage
Carbon_intensity	118.68 CO2 tons per millions $ revenue for corporate and in CO2 Kg per PPP $ of GDP for sovereign	188.87 CO2 tons per millions $ revenue for corporate and in CO2 Kg per PPP $ of GDP for sovereign	0.99 %
water intensity	2451.6 Thousands of cubic meters for corporates	8681.05 Thousands of cubic meters for corporates	0.99 %

... And compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

1.**UN Sustainable Development Goals alignment (SDG)**of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2.**Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°c world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below –5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

has been qualitatively overridden.

- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

How were the indicators for adverse impacts on sustainability factors taken into account?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR. Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring. Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.
Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.
AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to 'significant contributing impact ' to – 10 corresponding to 'significant obstructing impact'), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.
Environment:

Relevant AXA IM policies	PAI indicator	Units	Measurement
Climate Risk policy Ecosystem Protection & Deforestation policy	PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023)	Metric tonnes	N/A
	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M$)	N/A
	PAI 3: GHG intensity of investee companies	Metric tonnes per eur million revenue	N/A
Climate Risk policy	PAI 4: Exposure to Companies active in the fossil fuel sector	% of investments	N/A
Climate Risk policy (engagement only)	PAI 5 : Share of non-renewable energy consumption and production	% of total energy sources	N/A
Climate risk policy (considering an expected correlation between GHG emissions and energy consumption)[25]	PAI 6: Energy consumption intensity per high impact climate sector	GWh per million EUR of revenue of investee companies, per high impact climate sector	N/A
Ecosystem Protection & Deforestation policy	PAI 7: Activities negatively affecting biodiversity sensitive areas	% of investments	N/A
SDG no significantly negative score	PAI 8: Emissions to water	Tonnes per million EUR invested, expressed as	N/A

[25] The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively. Not all high impact climate sectors are targeted by the exclusion policy for the time being.

		a weighted average	
SDG no significantly negative score	PAI 9: Hazardous waste and radioactive waste ratio	Tonnes per million EUR invested, expressed as a weighted average	N/A

Social and Governance:

Relevant AXA IM policies	PAI indicator	Units	Measurement
ESG standards policy: violation of international norms and standards	PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises	% of investments	N/A
ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) [26]	PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises	% of investments	N/A
SDG no significantly negative score	PAI 12: Unadjusted gender pay gap	Average unadjusted gender pay gap of investee companies	N/A
Voting and Engagement policy with systematic voting criteria linked with board gender diversity	PAI 13: Board gender diversity	Expressed as a percentage of all board members.	N/A
Controversial weapons policy	PAI 14: Exposure to controversial weapons	% of investments	N/A

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

[26] The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investment must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

Relevant AXA IM policies	PAI indicator	Units	Measurement
Climate Risk policy	PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)	Metric tonnes	N/A
Ecosystem protection & Deforestation policy			
Climate Risk policy	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M$)	N/A
Ecosystem protection & Deforestation policy			
Climate Risk policy	PAI 3: GHG intensity of investee companies	Metric tonnes per eur million revenue	N/A
Ecosystem protection & Deforestation policy			
Climate Risk policy	PAI 4: Exposure to companies active in the fossil fuel sector	% of investments	N/A
Climate Risk policy (engagement only)	PAI 5: Share of non-renewable energy consumption and production	% of total energy sources	N/A
Ecosystem protection & Deforestation policy	PAI 7: activities negatively affecting biodiversity sensitive area	% of investments	N/A

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

ESG standard policy / violation of international norms and standards	PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises	% of investments	N/A
Voting and Engagement policy with systematic voting criteria linked with board gender diversity	PAI 13: Board Gender diversity	Expressed as a percentage of all board members	N/A
Controversial weapons policy	PAI 14: Exposure to controversial weapons	% of investments	N/A

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2023-03-30

Top investments	Sector	Proportion	Country
APPLE INC XNGS USD	Manufacture of communication equipment	6.95%	US
MICROSOFT CORP XNGS USD	Other software publishing	6.03%	US
ALPHABET INC-CL A XNGS USD	Web portals	3.17%	US
AMAZON.COM INC XNGS USD	Retail sale via mail order houses or via Internet	2.47%	US
NVIDIA CORP XNGS USD	Manufacture of electronic components	2.05%	US
UNITEDHEALTH GROUP INC XNYS USD	Non-life insurance	1.83%	US
TESLA INC XNGS USD	Manufacture of motor vehicles	1.7%	US
VISA INC-CLASS A SHARES XNYS USD	Other activities auxiliary to financial services, except insurance and pension funding	1.51%	US
ADOBE INC XNGS USD	Other software publishing	1.5%	US
CISCO SYSTEMS INC XNGS USD	Manufacture of communication equipment	1.39%	US

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

VERIZON COMMUNICATIONS INC XNYS USD	Wireless telecommunications activities	1.29%	US
BERKSHIRE HATHAWAY INC-CL B XNYS USD	Non-life insurance	1.28%	US
Portfolio 3759 USD SET STT	Other monetary intermediation	1.25%	0
UNITED PARCEL SERVICE-CL B XNYS USD	Other postal and courier activities	1.24%	US
BROADCOM INC XNGS USD	Manufacture of electronic components	1.19%	US

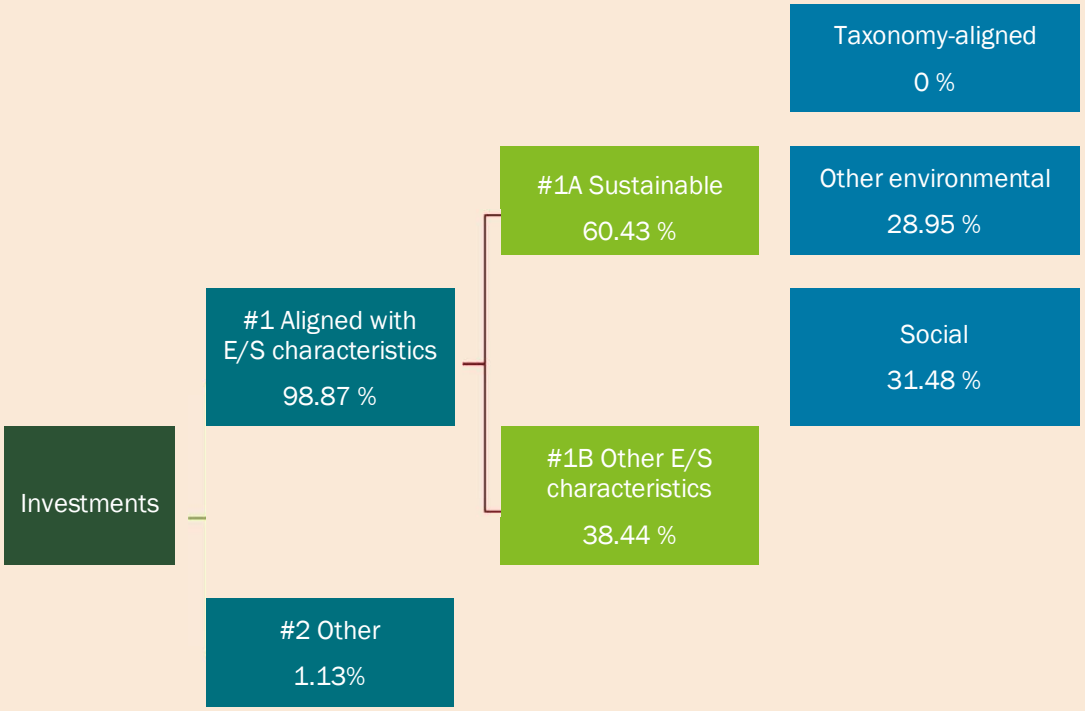
The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period.
Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

In which economic sectors were the investments made?

Financial product's investments were made in the economic sectors detailed below:

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Top sector	Proportion
Other software publishing	11.38%
Manufacture of communication equipment	8.65%
Non-life insurance	6.39%
Manufacture of basic pharmaceutical products	5.35%
Manufacture of electronic components	5.13%
Other monetary intermediation	3.85%
Web portals	3.78%
Other activities auxiliary to financial services, except insurance and pension funding	3.73%
Manufacture of motor vehicles	3.59%
Retail sale via mail order houses or via Internet	2.47%
Manufacture of refined petroleum products	1.95%
Wireless telecommunications activities	1.85%
Retail trade, except of motor vehicles and motorcycles	1.78%
Research and experimental development on biotechnology	1.73%
Manufacture of electrical equipment	1.66%
Manufacture of instruments and appliances for measuring, testing and navigation	1.62%
Manufacture of irradiation, electromedical and electrotherapeutic equipment	1.51%
Wholesale of pharmaceutical goods	1.51%
Other postal and courier activities	1.24%
Computer programming, consultancy and related activities	1.22%
Manufacture of other special-purpose machinery n.e.c.	1.13%
Manufacture of soft drinks, production of mineral waters and other bottled waters	1.13%
Manufacture of medical and dental instruments and supplies	1.07%
Manufacture of household and sanitary goods and of toilet requisites	1.03%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Manufacture of machinery for mining, quarrying and construction	1.02%
Retail sale of hardware, paints and glass in specialised stores	1.01%
Manufacture of agricultural and forestry machinery	1%
Extraction of crude petroleum and natural gas	0.94%
Life insurance	0.93%
Wholesale trade, except of motor vehicles and motorcycles	0.87%
Renting and operating of own or leased real estate	0.8%
Restaurants and mobile food service activities	0.77%
Passenger air transport	0.73%
Other information service activities n.e.c.	0.73%
Manufacture of computers and peripheral equipment	0.69%
Retail trade of motor vehicle parts and accessories	0.69%
Manufacture of pharmaceutical preparations	0.67%
Manufacture of air and spacecraft and related machinery	0.65%
Electricity, gas, steam and air conditioning supply	0.6%
Other credit granting	0.58%
Security and commodity contracts brokerage	0.56%
Sale of cars and light motor vehicles	0.52%
Freight transport by road	0.51%
Freight rail transport	0.5%
Other transportation support activities	0.45%
Satellite telecommunications activities	0.45%
Motion picture, video and television programme production activities	0.44%
Manufacture of industrial gases	0.43%
Manufacture of prepared meals and dishes	0.43%
Manufacture of tubes, pipes, hollow profiles and related fittings, of steel	0.42%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Construction of residential and non-residential buildings	0.42%
Manufacture of food products	0.41%
Retail sale of audio and video equipment in specialised stores	0.41%
Activities of insurance agents and brokers	0.4%
Advertising agencies	0.37%
Manufacture of footwear	0.36%
Administration of financial markets	0.36%
Manufacture of magnetic and optical media	0.36%
Reinsurance	0.36%
Retail sale of cosmetic and toilet articles in specialised stores	0.35%
Manufacture of tools	0.34%

Manufacture of paints, varnishes and similar coatings, printing ink and mastics	0.16%
Copper production	0.14%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Hospital activities	0.13%
Trusts, funds and similar financial entities	0.12%
Manufacture of electric domestic appliances	0.06%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[27]*?*

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

☐ Yes

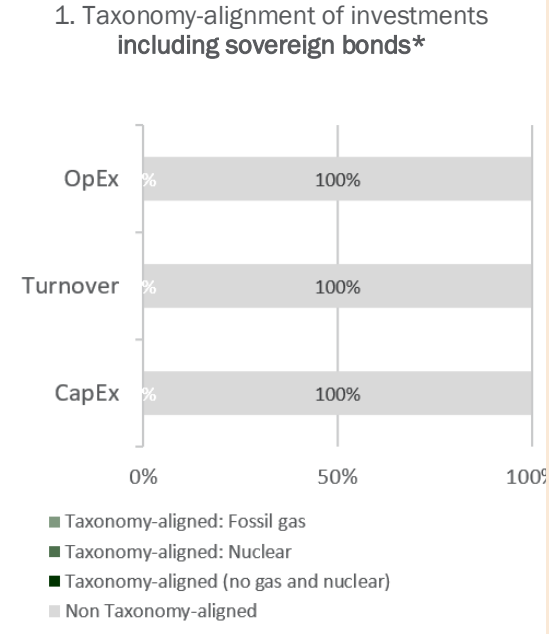
☐ In fossil gas ☐ In nuclear energy

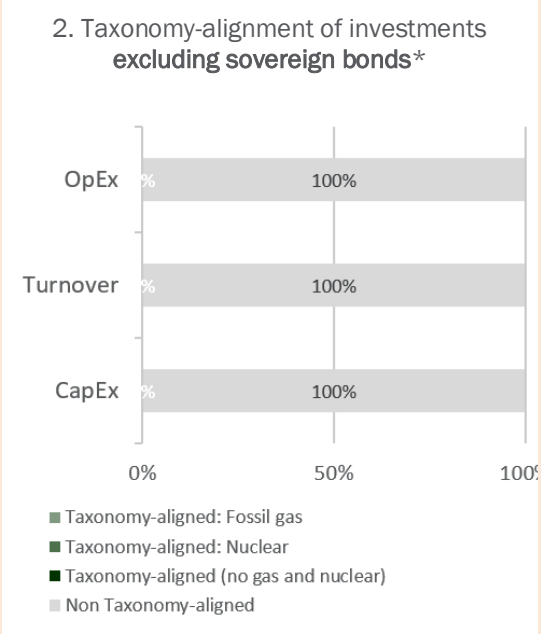
☒ No

[27] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 28.95% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 31.48% of sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining "Other" investments represented 1.13% of the Financial Product's Net Asset Value.

The "other" assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/orSocial criteria described in this appendix. Such assets may be equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all "other" assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Artic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: https://www.axa-im.com/our-policies-and-reports

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Product Name: AXA IM US Equity QI (The "Financial Product")

Entity LEI: 213800C6RZ6JS9AOG834

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ YES	☒ NO
☐ It made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 60.44% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- carbon intensity
- water intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the

How did the sustainability indicators perform?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

financial product are attained.

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to during the reference period.

Sustainability KPI Name	Value	Benchmark	Coverage
Carbon_intensity	112.18 CO2 tons per millions $ revenue for corporate and in CO2 Kg per PPP $ of GDP for sovereign	188.87 CO2 tons per millions $ revenue for corporate and in CO2 Kg per PPP $ of GDP for sovereign	1 %
water intensity	807.47 Thousands of cubic meters for corporates	8681.05 Thousands of cubic meters for corporates	1 %

... And compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

1.**UN Sustainable Development Goals alignment (SDG)**of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2.**Integration of issuers engaged in a solid Transition Pathway** consistently with the European Commission's ambition to help fund the transition to a 1.5°c world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below –5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

in SFDR precontractual annex).

How were the indicators for adverse impacts on sustainability factors taken into account?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.
Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.
Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.
Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.
AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to 'significant contributing impact ' to – 10 corresponding to 'significant obstructing impact'), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.
Environment:

Relevant AXA IM policies	PAI indicator	Units	Measurement
Climate Risk policy Ecosystem Protection & Deforestation policy	PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023)	Metric tonnes	N/A
	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M$)	N/A
	PAI 3: GHG intensity of investee companies	Metric tonnes per eur million revenue	N/A
Climate Risk policy	PAI 4: Exposure to Companies active in the fossil fuel sector	% of investments	N/A
Climate Risk policy (engagement only)	PAI 5 : Share of non-renewable energy consumption and production	% of total energy sources	N/A
Climate risk policy (considering an expected correlation between GHG emissions and energy consumption)[28]	PAI 6: Energy consumption intensity per high impact climate sector	GWh per million EUR of revenue of investee companies, per high impact climate sector	N/A
Ecosystem Protection & Deforestation policy	PAI 7: Activities negatively affecting biodiversity sensitive areas	% of investments	N/A
SDG no significantly negative score	PAI 8: Emissions to water	Tonnes per million EUR invested, expressed as a weighted average	N/A

[28] The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively. Not all high impact climate sectors are targeted by the exclusion policy for the time being.

SDG no significantly negative score	PAI 9: Hazardous waste and radioactive waste ratio	Tonnes per million EUR invested, expressed as a weighted average	N/A

Social and Governance:

Relevant AXA IM policies	PAI indicator	Units	Measurement
ESG standards policy: violation of international norms and standards	PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises	% of investments	N/A
ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) [29]	PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises	% of investments	N/A
SDG no significantly negative score	PAI 12: Unadjusted gender pay gap	Average unadjusted gender pay gap of investee companies	N/A
Voting and Engagement policy with systematic voting criteria linked with board gender diversity	PAI 13: Board gender diversity	Expressed as a percentage of all board members.	N/A
Controversial weapons policy	PAI 14: Exposure to controversial weapons	% of investments	N/A

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

[29] The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investment must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

Relevant AXA IM policies	PAI indicator	Units	Measurement
Climate Risk policy	PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)	Metric tonnes	N/A
Ecosystem protection & Deforestation policy			
Climate Risk policy	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M$)	N/A
Ecosystem protection & Deforestation policy			
Climate Risk policy	PAI 3: GHG intensity of investee companies	Metric tonnes per eur million revenue	N/A
Ecosystem protection & Deforestation policy			
Climate Risk policy	PAI 4: Exposure to companies active in the fossil fuel sector	% of investments	N/A
Climate Risk policy (engagement only)	PAI 5: Share of non-renewable energy consumption and production	% of total energy sources	N/A
Ecosystem protection & Deforestation policy	PAI 7: activities negatively affecting biodiversity sensitive area	% of investments	N/A
ESG standard policy / violation of international norms and standards	PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises	% of investments	N/A

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Voting and Engagement policy with systematic voting criteria linked with board gender diversity	PAI 13: Board Gender diversity	Expressed as a percentage of all board members	N/A
Controversial weapons policy	PAI 14: Exposure to controversial weapons	% of investments	N/A

Please note that, despite our commitment in the precontractual SFDR annex to publish these indicators in our periodic reporting SFDR annex, SFDR Level 2 requirements – such as the integration of PAI indicators in the investment process – only entered into force on 01/01/2023, after this report's reference period. Therefore, PAI indicators will start being disclosed in the periodic reporting SFDR annex relative to the reference period in which SFDR Level 2 requirements entered into application.

What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 2023-03-30

Top investments	Sector	Proportion	Country
APPLE INC XNGS USD	Manufacture of communication equipment	6.9%	US
MICROSOFT CORP XNGS USD	Other software publishing	5.84%	US
ALPHABET INC-CL A XNGS USD	Web portals	2.89%	US
VISA INC-CLASS A SHARES XNYS USD	Other activities auxiliary to financial services, except insurance and pension funding	2.33%	US
AMAZON.COM INC XNGS USD	Retail sale via mail order houses or via Internet	2.29%	US
NVIDIA CORP XNGS USD	Manufacture of electronic components	2.07%	US
CISCO SYSTEMS INC XNGS USD	Manufacture of communication equipment	2.04%	US
ADOBE INC XNGS USD	Other software publishing	1.98%	US
UNITEDHEALTH GROUP INC XNYS USD	Non-life insurance	1.93%	US
COSTCO WHOLESALE CORP XNGS USD	Retail trade, except of motor vehicles and motorcycles	1.92%	US
UNITED PARCEL SERVICE-CL B XNYS USD	Other postal and courier activities	1.87%	US

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

BROADCOM INC XNGS USD	Manufacture of electronic components	1.8%	US
TESLA INC XNGS USD	Manufacture of motor vehicles	1.74%	US
VERIZON COMMUNICATIONS INC XNYS USD	Wireless telecommunications activities	1.74%	US
BANK OF AMERICA CORP XNYS USD	Other monetary intermediation	1.64%	US

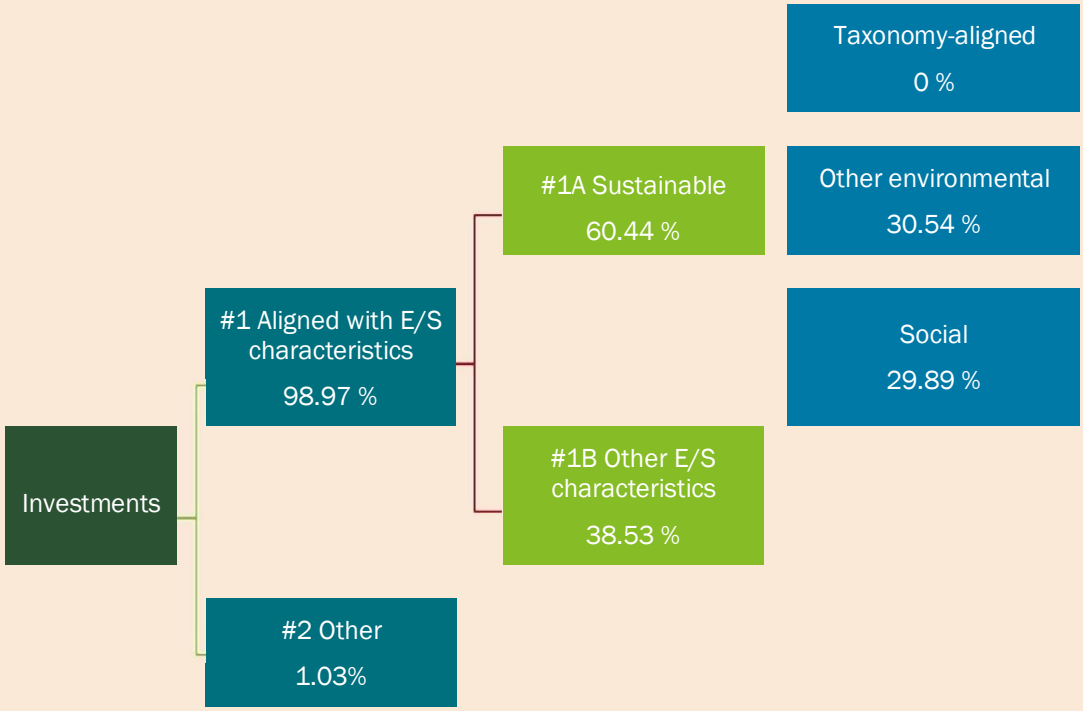
The portfolio proportions of investments hereabove presented were measured on 30/12/2022 and may not be representative of the reference period.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

In which economic sectors were the investments made?

Financial product's investments were made in the economic sectors detailed below:

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Top sector	Proportion
Other software publishing	12.14%
Manufacture of communication equipment	9.47%
Non-life insurance	6.65%
Manufacture of motor vehicles	5.94%
Manufacture of basic pharmaceutical products	5.72%
Web portals	4.82%
Other activities auxiliary to financial services, except insurance and pension funding	4.8%
Manufacture of electronic components	3.87%
Retail trade, except of motor vehicles and motorcycles	3.22%
Wireless telecommunications activities	2.87%
Manufacture of soft drinks, production of mineral waters and other bottled waters	2.71%
Other monetary intermediation	2.68%
Retail sale via mail order houses or via Internet	2.58%
Manufacture of refined petroleum products	2.45%
Wholesale trade, except of motor vehicles and motorcycles	1.91%
Other postal and courier activities	1.87%
Research and experimental development on biotechnology	1.62%
Other credit granting	1.6%
Other information service activities n.e.c.	1.6%
Manufacture of machinery for mining, quarrying and construction	1.53%
Manufacture of agricultural and forestry machinery	1.52%
Manufacture of computers and peripheral equipment	1.42%
Retail sale of automotive fuel in specialised stores	1.36%
Manufacture of electrical equipment	1.3%
Other transportation support activities	1.28%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

Manufacture of instruments and appliances for measuring, testing and navigation	1.28%
Manufacture of tubes, pipes, hollow profiles and related fittings, of steel	1.28%
Freight transport by road	1.11%
Wholesale of pharmaceutical goods	0.95%
Manufacture of household and sanitary goods and of toilet requisites	0.93%
Manufacture of other special-purpose machinery n.e.c.	0.85%
Manufacture of pharmaceutical preparations	0.77%
Construction of residential and non-residential buildings	0.69%
Life insurance	0.62%
Manufacture of ovens, furnaces and furnace burners	0.62%
Manufacture of air and spacecraft and related machinery	0.56%
Passenger air transport	0.52%
Manufacture of prepared meals and dishes	0.48%
Data processing, hosting and related activities	0.41%
Distribution of electricity	0.39%
Computer programming, consultancy and related activities	0.36%
Wholesale of metals and metal ores	0.34%
Manufacture of irradiation, electromedical and electrotherapeutic equipment	0.3%
Renting and operating of own or leased real estate	0.13%
Sale of cars and light motor vehicles	0.13%
Retail sale of audio and video equipment in specialised stores	0.11%
Trusts, funds and similar financial entities	0.11%
Manufacture of plastic packing goods	0.09%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[30]*?*

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

☐ Yes

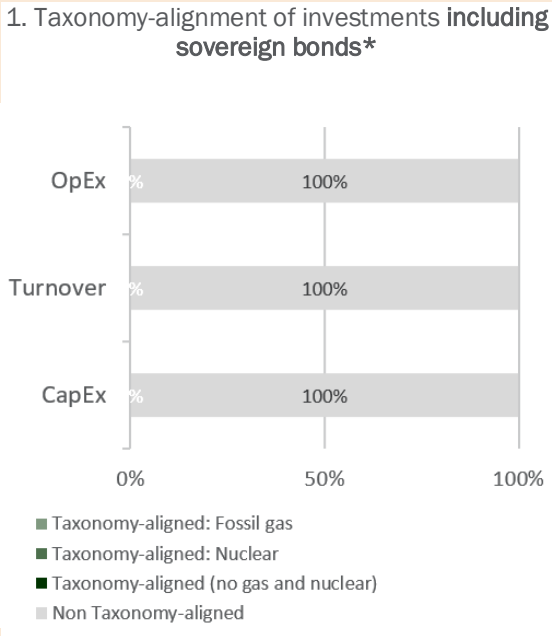
☐ In fossil gas ☐ In nuclear energy

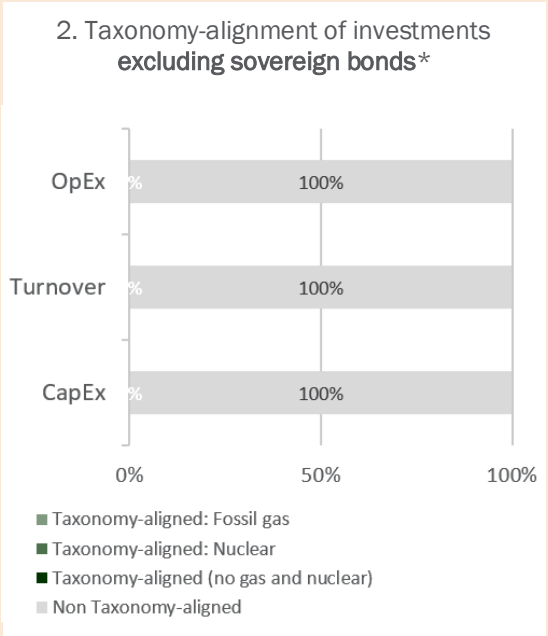
☒ No

[30] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (unaudited) (continued)

environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 30.54% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 29.89% of sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining "Other" investments represented 1.03% of the Financial Product's Net Asset Value.

The "other" assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments being bank deposit, eligible money market instruments and money market funds used for managing the liquidity of the Financial Product, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all "other" assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Artic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: https://www.axa-im.com/our-policies-and-reports

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

AXA World Funds - ACT Factors - Climate Equity Fund
AXA World Funds - Europe ex-UK MicroCap (note 1b)

Directors' Report

Dear Shareholders,

The Board of Directors of the Management Company is pleased to report on the progress of your SICAV for 2023.

2023 Global macro summary

Macroeconomic background

Although inflation peaked in 2022, 2023 started with central banks continuing the process of sharp monetary policy tightening in most jurisdictions as policy makers feared inflation persistence and second-round inflation effects after the price shocks of 2022. Tighter monetary policy added to headwinds to economic activity, although activity varied in different regions depending on idiosyncratic conditions. Inflation rates continued to soften, although remained above central bank target levels in most regions. Central banks reached what appeared to be peaks in the policy rate cycle, with some emerging market central banks beginning to loosen policy. A sharp monetary tightening led to a number of small bank failures in the US in March, but fallout was contained. Global activity continued despite a terrorist attack on Israel and Israel's retaliation on the terrorist group Hamas in Gaza, which increased global uncertainty even as events remained localised into year-end.

In Europe, inflation fell sharply from 9.2% at the end of 2022, to 2.9% at the end of 2023 (preliminary), although core measures of inflation saw less of an improvement, closing 2023 at 3.4% (from 5.2% end-2022). The sharp fall in inflation reflected an improvement in supply conditions, including a re-routing of energy supplies and a fall in global energy prices, and an improvement in global supply-chains as the global economy continued to recover from the pandemic. However, it also reflected a material weakening in economic activity across the region, the economy avoiding technical recession with modest 0.1% per quarter growth in each quarter of the first half of 2023, before contracting again by 0.1% in Q3 2023. Activity diverged somewhat across the currency union with Germany the weakest performer since Q1 2022, in part reflecting the importance of Russian energy supplies to its large industrial complex, and Italy also reflecting its larger industrial composition. Spain was the clear outperformer, in part reflecting less change to energy supply and a greater service sector composition. The ECB continued to raise its key deposit rate to 4.00% in September (from 2.00% end-2022), which is expected to be the peak rate.

The United Kingdoms (UK) saw a more lagged fall in inflation, the headline rate closing 2023 at 3.9% in November 2023 (from 10.5% end-2022), with core inflation falling to 5.1% (from 6.3%), in part reflecting the lagged pass-through of lower global energy prices. The Bank of England (BoE) had been the first major central bank to tighten monetary policy in 2021 and hiked throughout 2022. In 2023, with core inflation still rising in the first half of the year, the BoE continued to raise its bank rate to 5.25% in August (from 3.50% end-2022), level expected to be its peak. The combined impact of surging inflation and a sharp tightening in monetary policy has seen economic activity stagnate in the UK since Q2 2022. In 2023, despite a 0.3% rise in Gross domestic product (GDP) in Q1, activity was flat in Q2 and contracted by 0.1% in Q3, leaving a risk of technical recession by year-end.

By contrast, the United States (US) experienced relatively resilient growth across 2023 even as the Federal Reserve (Fed) continued to tighten policy and inflation eased. The economy expanded a little above trend in H1 2023 (2.2% average annualised pace) before posting a strong, consumer driven surge of 4.8% (annualised) in Q3 2023. Growth was supported by healthy consumer balance sheets, in part still benefiting from previous year's COVID fiscal stimulus, fresh incentives for private investment and structural improvements to the labour supply, including increased participation and immigration. Despite still solid growth, labour market imbalances continued to unwind helping inflation continue to fall to reach 3.1% in November (from 6.5% end-2022), with core prices also falling back to 4.0% from 5.7%. The Fed continued to tighten policy across 2023, although slowing the pace of tightening from H2 2022. It raised the Fed Funds Target range to 5.25-5.50% in July (from 4.25-4.50% end-2022), with official communication stating that Fed members consider rates "at or near" their peak.

Directors' Report

2023 Global macro summary (continued)

In Asia, China dominated concerns. A surprisingly abrupt end to the “Zero Covid” policy at the end of 2022 contributed to a strong 2.3% expansion of the economy in Q1 2023 as the economy “reopened”. However, with households emerging from the pandemic with weaker balance sheets than Western counterparts and with related, ongoing difficulties in the important housing sector, activity was unable to sustain this sharp growth, posting a weak 0.5% in Q2, before picking up again in Q3 to 1.3%. Government intervention increased in August with some easing in monetary policy, but a more substantive increase in fiscal support, including an unusual mid-year adjustment to the central government deficit target. This looks to have supported annual growth in China to the government’s target of “around 5%”. Japan also benefited from a belated easing of COVID restrictions and a rebound in tourism. The Japanese economy expanded by 1.2% and 0.9% in the first two quarters of 2023, before contracting by 0.7% in Q3. Inflation ended 2022 at 4.0% and peaked at 4.3% in January 2023 – its highest rate in 42 years. Inflation retreated to 2.8% in November. The Bank of Japan (BoJ) had set in place a number of adjustments to its yield curve control (YCC) policy across 2023, effectively ending it and allowing longer-term rates to rise, but there was still no change to its negative policy rate with the overnight call rate remaining at -0.1%.

Financial Markets

Bond yields rose for most of the year as central bank rate expectations rose over the first half of the year to be supplanted by concerns of policy remaining higher for longer – a sentiment which peaked over the summer before expectations of central bank rate cuts saw bonds rally and yields fall sharply to year-end. Over the same period equity markets performance was resilient in the face of rising yield expectations, spurred by solid corporate earnings, and then also rallied as yields fell sharply towards year-end. Credit markets were broadly stable over most of the year, with the exception around the banking turmoil in H1, before spreads tightened into year-end. Volatility measures illustrated the divergence across asset classes, falling across the course of the year for equities, but remaining elevated for bonds.

The MSCI AC World index rallied by 20.1% across the course of 2023, recovering the losses from the previous year. In broad terms, this was reflected in most large indices. The US S&P 500 index saw an even stronger 24.2% rise over the course of the year, although much of the S&P performance was concentrated in mega tech firms. By comparison, the Euro Stoxx 50 index underperformed the S&P, up 19.2% across the course of the year. This reflected divergent performances across other European bourses, with the German Dax and Spanish IBEX 35 indices rising a similar 20.3% and 22.8% on the year, an outperforming Italian MIB index, up 28.0% and an underperforming French CAC 40, up only 16.5%. By contrast, UK equities significantly underperformed, the FTSE 100 up just 3.8% and FTSE 250 up 4.4% - weak even allowing for sterling’s strengthening. The Japanese TOPIX index gained the most with a 25.1% rise over the course of 2023. However, China’s Shanghai Composite posted a drop of 11.4% as concerns about the economy and government intervention continued to weigh (single-country indices excluding dividends).

Directors' Report

2023 Global macro summary (continued)

US bond market developments captured global attention in 2023, although in the first half of the year, 10-year US Treasuries (UST) yields were broadly steady between 3.50-3.75%, with yields falling sharply around the time of the bank failures in March. Yields rose sharply over the summer to reach 5% at their peak in October, only to fall back sharply into year-end, dropping below 4% to close the year at 3.87% - just 3bps higher than their 2022 close. In Europe, bond volatility was higher in the first few months of the year as markets focused on the European Central Bank (ECB) outlook. After the US bank failures (and Credit Suisse rescue) European yields fell back sharply. They subsequently gradually rose from this point with the German 10-year bund yield reaching a peak in October close to 3.00% and not far from its 2.75% March highs, before falling back in line with global yields and closing the year at 2.03%, 56bps lower than end-2022. Yields closed even lower in France (-63bps), Italy (-107bps) and Spain (-71bps). The UK 10-year gilt yield followed a similar pattern to close the year at 3.60% (down 7bps from end-2022). However, in Japan yields were impacted sharply by changes to the BoJ's yield curve control adjustments that started at the back end of 2022. Yields jumped to below 0.50% from 0.25% after the late-2022 tweak to BoJ policy and again in July after further adjustment. This paved the way for a rise in yields close to 1% at the start of November – an 11-year high – before yields followed the international pattern and reversed sharply to year-end closing the year at 0.62%, still 21bps higher than the close to 2022.

Credit markets had already recovered from a material repricing by the end of 2022. Across 2023, with the exception of the period around the bank problems in March, which saw credit spreads widen, spreads were broadly stable over the year and drifted narrower to year-end. In the US, investment grade (IG) corporate debt closed the year with spreads at 104bps – its lowest since January 2022 and down 25bps from end-2022. US high yield (USHY) was also down 30bps to close at 334bps – a similar low to IG. The picture was similar in Europe, IG debt down 19bps on the year, the spread at 135bps, the lowest since April 2022 and USHY debt closed 2023 at 395bps, down 20bps on the year and the tightest since February 2022.

Having risen sharply to a 20-year high against a basket of currencies in 2022, the US dollar reversed these gains over 2023 as first overseas central bank hikes and subsequently Federal Reserve expected rate cuts undermined its strength. This translated into a 3.5% gain across 2023 for the euro, which closed the year at $1.105 and a 6.0% gain for sterling that closed at $1.275 (the euro fell by 2.3% against the pound over the year). Yet dollar weakness was not ubiquitous: with the BoJ continuing to resist tighter monetary policy the growing interest rate differential weighed on the Japanese currency and the yen fell by 7.0% against the dollar over the year. The dollar also posted a 2.9% gain against the Chinese yuan, where concerns about economic weakness and further policy easing weighed on the currency, which closed the year at RMB 7.10.

Main SICAV's events during the year ending 31 December 2023

We inform you that the assets under management of the SICAV amount to EUR 33,227,246,527 as at 31 December 2023.

I. SFDR Level II disclosures

The Commission Delegated Regulation (EU) 2022/1288 ("SFDR Level II"), setting out the regulatory technical standards (RTS) to be used by financial market participants and financial products when disclosing sustainability-related information under the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (the "SFDR") was adopted and published on 25 July 2022 in the Official Journal of the EU.

In order to comply by 1 January 2023 with SFDR Level II, pre-contractual templates detailing the content of the disclosures required under the SFDR, including any taxonomy-related information, were included in the Prospectus for each of the SICAV's sub-funds that are caught by articles 8 and 9 of the SFDR ("SFDR Article 8 Products" and "SFDR Article 9 Products").

Directors' Report

Main SICAV's events during the year ending 31 December 2023 (continued)

"Sustainable Investments and promotion of ESG characteristics" section was amended in the introductive part of the Prospectus, in light of market evolution and changes in internal policies and approaches and SFDR disclosures were amended in the sub-funds' supplements of the prospectus.

SFDR recategorization

In the context of the enforcement of SFDR Level II and other regulatory positions released since SFDR level I, it has been decided to update the classification of certain sub-funds, to article 8 according to SFDR, which applies to products promoting environmental and/or social characteristics, and not as an article 9, which applies to products having a sustainable investment objective.

II. Restructuring and replacement of the Management Company

AXA Investment Managers decided to proceed with the restructuring of AXA Funds Management ("AFM"), its Luxembourg subsidiary and former management company of the SICAV, into a Luxembourg branch of AXA Investment Managers Paris ("AXA IM Paris"), another of its subsidiaries.

The contemplated restructuring was essentially effected via the merger into AXA IM Paris of AFM (the "Merger") and the creation of a Luxembourg branch to lodge the Luxembourg employees of AXA IM Paris.

The Merger was effective on 28 February 2023.

III. Creation and launch of one sub-fund

AXA World Funds – ACT People and Planet Emerging Markets Bonds. This new sub-fund was launched on 1 August 2023.

- the objective of the Sub-Fund is to seek both income and growth of its investors' investment, in USD, and a sustainable investment objective, from an actively managed emerging markets bond portfolio, to advance the United Nations Sustainable Development Goals (SDGs) by investing into debt securities issued by companies whose business models and/or operational practices are aligned with targets defined by one or more SDGs and/or are green, social or sustainability bonds.

- the Sub-Fund is actively managed in reference to the index composed of 45% J.P. Morgan Emerging Markets Bond Index Global Diversified Investment Grade + 5% J.P. Morgan Emerging Markets Bond Index Global Diversified BB + 45% J.P. Morgan Corporate Emerging Markets Bond Index Broad Diversified High Grade + 5% J.P. Morgan Corporate Emerging Markets Bond Index Broad Diversified BB in order to capture opportunities in emerging markets debt.

IV. Change of Investment managers of certain Sub-Funds

The investment management activities of AXA Investment Managers Asia Ltd (Hong-Kong SAR) ("AXA IM HK"), acting either as delegated investment manager or sub-investment manager of certain Sub-Funds, have been transferred to other entities within the AXA Group, with effect as of 7 July 2023.

As a consequence of this transfer of activities, the investment management agreement between the Management Company and AXA IM HK has been terminated and AXA IM HK has been replaced in its functions as investment manager or as applicable, sub-investment manager, of the Sub-Funds listed below by AXA Investment Managers UK Limited as new investment managers or sub-investment managers, as applicable.

- Asian High Yield Bonds; and

- Asian Short Duration Bonds.

Directors' Report

Main SICAV's events during the year ending 31 December 2023 (continued)

AXA IM HK doesn't act anymore as sub-investment manager of the following Sub-Funds:

- ACT Green Bonds;
- Global Emerging Markets Bonds;
- Global Strategic Bonds; and
- ACT Emerging Markets Short Duration Bonds Low Carbon.

The prospectus' supplements of the above-mentioned Sub-Funds were updated accordingly.

V. Renaming of sub-funds

On 1 January 2023:

From "AXA World Funds - Framlington Digital Economy" to "AXA World Funds – Digital Economy";

From "AXA World Funds - Framlington Europe Real Estate Securities" to "AXA World Funds – Europe Real Estate";

From "AXA World Funds – Framlington Global Real Estate Securities" to "AXA World Funds – Global Real Estate";

From "AXA World Funds – Framlington Longevity Economy" to "AXA World Funds – Longevity Economy";

From "AXA World Funds – Framlington Robotech" to "AXA World Funds – Robotech";

From "AXA World Funds – Framlington Europe MicroCap" to "AXA World Funds – Europe Microcap";

From "AXA World Funds – Framlington Europe Ex-UK Microcap" to "AXA World Funds – Europe Ex-UK Microcap"

From "AXA World Funds – Framlington Euro Selection" to "AXA World Funds – Euro Selection";

From "AXA World Funds – Framlington Europe Opportunities" to "AXA World Funds – Europe Opportunities";

From "AXA World Funds – Framlington Europe Small Cap" to "AXA World Funds – Europe Small Cap";

From "AXA World Funds – Framlington Evolving Trends" to "AXA World Funds – Evolving Trends";

From "AXA World Funds – Global Factors – Sustainable Equity" to "AXA World Funds – Sustainable Equity QI";

From "AXA World Funds – China Sustainable Growth" to "AXA World Funds – China Responsible Growth".

On 16 June 2023:

From "AXA World Funds – Global Sustainable Aggregate" to "AXA World Funds – Global Responsible Aggregate";

On 7 July 2023:

From "AXA World Funds – Framlington Emerging Markets" to "AXA World Funds – Emerging Markets Responsible Equity QI";

From "AXA World Funds – Euro Inflation Plus" to "AXA World Funds – Inflation Plus".

On 30 October 2023:

From "AXA World Funds – ACT People and Planet Emerging Markets Bonds" to "AXA World Funds - ACT Emerging Markets Bonds";

From "AXA World Funds – ACT Eurozone Impact" to "AXA World Funds – ACT Eurozone Equity";

From "AXA World Funds – Europe Opportunities" to "AXA World Funds – ACT Europe Equity";

From "AXA World Funds – Framlington American Growth" to "AXA World Funds – US Responsible Growth".

Directors' Report

Main SICAV's events during the year ending 31 December 2023 (continued)

VI. Liquidation of sub-funds

AXA World Funds - Dynamic Optimal Income has been liquidated on 22 March 2023

AXA World Funds - Chorus Multi Strategy has been liquidated on 19 May 2023

AXA World Funds - Chorus Equity Market Neutral has been liquidated on 19 May 2023

AXA World Funds - China Sustainable Short Duration Bonds has been liquidated on 13 June 2023

AXA World Funds – China Responsible Growth has been liquidated on 27 June 2023

VII. Merger of a sub-fund

AXA World Funds – Europe MicroCap sub-fund merged into the sub-fund AXA World Funds – Europe ex-UK MicroCap on 10 November 2023.

VIII. General Manager

Mr. Fabien Lequeue resigned as General Manager of the SICAV with effect from 31 May 2023. In accordance with the provisions of Article 17 of the articles of incorporation, it was decided not to appoint a new General Manager.

IX. Composition of the Board of Directors

We remind you that Mrs. Anne-Laure Beneteau resigned as Director of the SICAV on 9 June 2023 and Mr. Matthias Gardin has been co-opted, the same day, as Director of the SICAV, subject to the approval of the Luxembourg Regulatory Authority (the "CSSF"). The CSSF gave its approval on 11 July 2023.

Consequently, your Board of Directors is composed, as at 31 December 2023 as follows:

Geoffroy Reiss, Chairman

Martin Burke

Matthias Gardin

Jean-Louis Laforge

Matthieu Tonneau

The Board of Directors

4 April 2024

Note: the figures stated in this report are historical and not necessarily indicative of future performance.

Audit report

To the Shareholders of
AXA World Funds

Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of AXA World Funds (the "Fund") and of each of its sub-funds as at 31 December 2023, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund's financial statements comprise:

- the statement of net assets as at 31 December 2023;
- the statement of operations and changes in net assets for the year then ended;
- the schedule of investments and other net assets as at 31 December 2023; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements" section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;

- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;

- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;

- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern;

- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Notes to the Financial Statements as at 31 December 2023

Note 1: General

a) SICAV's details

AXA World Funds (the "SICAV") is a Luxembourg domiciled SICAV with multiple Sub-Funds organised as a "Société d'Investissement à Capital Variable" under the law of 10 August 1915 of the Grand Duchy of Luxembourg, as amended, (the "1915 law"). The SICAV is qualified under Part I of the law of 17 December 2010 (the "Law") on undertakings for collective investment for transferable securities ("UCITS"), as amended. The VAT number is LU 216 82 319.

The Board of Directors of the SICAV has confirmed its adherence to the ALFI's Code of conduct and to the standards of corporate governance described in this code.

The Management Company of the SICAV is AXA Investment Managers Paris, a public limited liability company (société anonyme à conseil d'administration), having its registered office at Tour Majunga la Défense 9 – 6 place de la pyramide 92800 Puteaux France, registered under the Nanterre Register of Trade and Companies under number 353 534 506, with a share capital of EUR 1,654,406, approved as a portfolio management company by the French Financial Markets Authority (Autorité des Marchés Financiers) under number GP92008 and licensed as an alternative investment fund manager.

b) 2023 SICAV's Summary

During the year ending 31 December 2023, the following events occurred:

- AXA Investment Managers has decided to proceed with the restructuring of AXA Funds Management S.A. ("AFM"), its Luxembourg subsidiary and the current management company of the Fund, into a Luxembourg branch of AXA Investment Managers Paris ("AXA IM Paris"), another of its subsidiaries.

  The contemplated restructuring has essentially been effected via the merger of AFM into AXA IM Paris (the "Merger") and the creation of a Luxembourg branch from where the Luxembourg employees of AXA IM Paris would continue to operate. The Merger has been effective on 28 February 2023.
- **AXA World Funds – Framlington Global Real Estate Securities** has been renamed **AXA World Funds – Global Real Estate** on 1 January 2023.
- **AXA World Funds – China Sustainable Growth** has been renamed **AXA World Funds – China Responsible Growth** on 1 January 2023.

- LU2020604042: Class "ZI" - Capitalisation in EUR

AXA World Funds – Next Generation
- LU1719066281: Class "UF" - Capitalisation in EUR Hedged

The share classes presented below correspond to the different type of classes currently available in the SICAV.

Class "A" Shares
Class "A" shares (including A FXO) are for all investors.

Class "AX" Shares
Class "AX" shares are only offered to AXA Group.

Notes to the Financial Statements as at 31 December 2023

Note 1: General (continued)

d) Share Classes List (continued)

Class "BE" Shares
BE share classes are only available through distributors based in Italy that entered into specific distribution arrangements with the Management Company subject to a Contingent Deferred Sales Charge ("CDSC"). Only available through distributors that entered into specific distribution arrangements with the Management Company subject to a Contingent Deferred Sales Charge ("CDSC").

Class "BL" Shares
BL share classes are for all investors. Only available through distributors that entered into specific distribution arrangements with the Management Company subject to a Contingent Deferred Sales Charge ("CDSC").

Class "BR" Shares
BR share classes are only offered to funds domiciled in Brazil.

Class "BX" Shares
BX share classes of the Sub-Funds AXA World Funds - Global Optimal Income and AXA World Funds - Euro Bonds are dedicated to AXA Luxembourg Fund's shareholders following the merger effective on 12 December 2014.

Class "E" Shares
Class "E" shares are for all investors.
On top of the annual management fee, an annual distribution fee is charged to E shares accordingly depending on the concerned Sub-Fund (from 0.25% up to 1.00% of the Net Asset Value of class E shares). Shareholders cannot convert Class "E" Shares into another share class in the same or a different Sub-Fund without the prior approval of the SICAV.

Class "F" Shares
Class "F" shares are only offered (i) through financial intermediaries which according to either regulatory requirements or separate fee arrangements with their clients, are not allowed to keep trail commissions, and/or (ii) to Institutional investors investing on their own behalf.

Class "G" Shares
Class "G" Shares are for all investors. Class "G" Shares are only available through (i) certain distributors who have separate fee arrangements with their clients and (ii) to other investors at the Management Company's discretion.
Class "G" Shares will be closed to subscriptions the day after the threshold of 100,000,000 in the share class currency is reached or exceeded. However, the SICAV reserves the right to close such "G" Share Class to subscriptions before the threshold of 100,000,000 in the share class currency is reached.
By exception, the threshold in all the Class "G" Shares currencies of AXA World Funds – US Enhanced High Yield Bonds is set at 150,000,000.

Class "I" Shares
The Directors reserve the right to issue Class "I" shares (including I FXO) at their sole discretion. Class "I" shares are only offered to Institutional investors investing directly or indirectly on their own behalf and/or financial intermediaries providing discretionary portfolio management service.

Notes to the Financial Statements as at 31 December 2023

Note 1: General (continued)

d) Share Classes List (continued)

Class "J" Shares
The Directors reserve the right to issue Class "J" shares at their sole discretion. Class "J" shares are only offered to Institutional investors who are resident in Japan.

Class "L" Shares
Class "L" Shares are only offered through financial intermediaries in the United Kingdom which according to either regulatory requirements or separate fee arrangements with their clients, are not allowed to keep trail commissions.

Class "M" Shares
Class "M" shares are only offered with the prior approval of the Board and (i) held by AXA Investment Managers or its subsidiaries for use in institutional mandates or investment management agreements for a dedicated fund contracted with the AXA Group or (ii) held by Institutional Investors investing directly or indirectly on their own behalf and/or to financial intermediaries providing discretionary portfolio management service.

Class "N" Shares
Offered only to distributors based in the Americas (South and North America regions, including the United States).

Class "SP" Shares
Class "SP" shares are only offered to the employees' savings funds managed by the AXA Group.

Class "T" Shares
Class "T" shares are only offered to Taiwan distributors and to Taiwan investors.

Class "U" Shares
Class "U" shares are only offered to distributors based in the Americas (South and North America regions, including the United States).

Class "UA" Shares
Offered only through larger financial intermediaries belonging to a financial group with a predominance of its business in the US and which are expressly prior authorized by the Management Company.

Class "UF" Shares
Class "UF" shares are offered only through larger financial intermediaries belonging to a financial group with a predominance of its business in the US and which (i) are expressly prior authorized by the Management Company and (ii) according to either regulatory requirements or separate fee arrangements with their clients, are not allowed to keep trail commissions.

Notes to the Financial Statements as at 31 December 2023

Note 1: General (continued)

d) Share Classes List (continued)

Class "UI" Shares
Class "UI" shares are offered only to larger institutional investors investing directly or indirectly on their own behalf and/or as part of providing discretionary portfolio management services, where such investor belongs to a financial group with a predominance of its business in the US and which are expressly prior authorized by the Management Company.

Class "X" Shares
Class "X" shares are for larger Institutional Investors investing directly or indirectly on their own behalf and/or financial intermediaries providing discretionary portfolio management service and with a high amount of minimum initial subscription.

Class "ZD" Shares
Only offered through digital platforms which are large startups providing financial services to their clients via a mobile application and which are expressly authorized by the Management Company.

Class "ZF" Shares
Class "ZF" shares are only offered through larger financial intermediaries which (i) are expressly prior authorized by the Management Company and (ii) according to either regulatory requirements or separate fee arrangements with their clients, are not allowed to keep trail commissions.

Class "ZI" Shares
Class "ZI" shares are for larger Institutional Investors investing directly or indirectly on their own behalf and/or financial intermediaries providing discretionary portfolio management service.

Capitalisation and Distribution Shares
Share classes can be further divided into Capitalisation Shares and Distribution Shares. These shares differ by their distribution policies, the first by accumulating income, and the other by distributing dividends. The assets of these two categories are gathered together.

Notes to the Financial Statements as at 31 December 2023

Note 1: General (continued)

d) Share Classes List (continued)

Redex (Reduction of Duration Exposure) Classes of Shares
The underlying investment objective of the redex share classes is, as for the other share classes of the Sub-Funds, to achieve the investment objective of the Sub-Fund, while, only in the case of the relevant share class to mitigate the Fund's exposure to an increase or decrease of interest rates curves. Such an overlay strategy will be managed through the tracking of listed derivatives.

To the extent applicable, the SICAV is allowed, for the purposes of the Redex Classes of Shares to invest in the following financial instruments traded on regulated or OTC markets:

- Listed or OTC futures,

- Repurchase agreements, and

- Securities lending.

Following the opinion of the ESMA 34-43-296 on share classes of UCITS (the "Opinion"), the Directors ruled that the Redex share classes do not comply with the principles set out in the Opinion. In addition they do not intend to convert the Redex share classes in other share classes available. As a consequence, the Directors have further decided to close for subscription from any new investor the Redex share classes as from 31 July 2017 and to close for subscription to any investor, including existing investors, such share classes as from 31 July 2018.

Share classes denominated "Hedged"
Any Sub-Fund can issue any Share Class in currency hedged form, meaning that the hedged version of the Share Class is denominated in a currency that is different from the Sub-Fund's Reference Currency, and is hedged to that currency (with the exception of BR Share Classes that offer currency exposure to the BRL). The currency risk between the Sub-Fund's Net Asset Value and the currency of the hedged Share Class will be hedged at least at 95%. Hedged Share Classes are designated with a "Hedged".

All costs specifically associated with offering each hedged Share Class such as currency hedging and foreign exchange costs will be charged to that Share Class.

If investors invest in a hedged Share Class, they could experience losses from currency exchange fluctuations to the extent that the Share Class' hedging is incomplete, and they will give up any potential gains from currency exchange fluctuations to the extent that hedging is effective.

e) Seed Money from AXA Group

Shares of a Sub-Fund may be held either by a French fund in which AXA Investment Managers is a majority shareholder (hereinafter the "AXA IM Fund") or by companies which are part of the AXA group of companies or by investment funds which are managed by investment management companies in which AXA IM group directly or indirectly holds a shareholding ("AXA IM Group Managed Funds") for the purposes of building a track record or a specific marketing action on the Sub-Fund.

Notes to the Financial Statements as at 31 December 2023

Note 1: General (continued)

e) Seed Money from AXA Group (continued)

AXA IM Fund and/or companies of the AXA IM group and/or AXA IM Group Managed Funds may, at any time, choose to redeem their Shares in the Sub-Fund which may result in a material decrease in the total assets of the Sub-Fund and/or a restructuring of the Sub-Fund including but not limited to restructuring causing the winding up of the Sub-Fund or its merger with another fund. Specific rules have been established by the Management Company with a view to preserve an equal treatment between the Shareholders of the Sub-Fund and will be applied in such case.

The foregoing does not prevent Shares of a Sub-Fund from being held by other investors including external seed investors.

f) Distribution

Distribution Shares may pay a dividend to their holders. In such case, dividends shall be paid out of the investment income gains and/or realised capital gains, or out of any other funds available for distribution. No Sub-Fund will make a dividend payment if the assets of the SICAV are below the minimum capital requirement, or if paying the dividend would cause that situation to occur.

Note 2: Significant Accounting Policies

a) Presentation of the Financial Statements

The Financial statements have been prepared on a going-concern basis of accounting, except for the sub-funds which have been liquidated during the year ended 31 December 2023. As such, the financial statements for these sub-funds have been prepared on a non-going concern basis.

At 31 December 2023, the total of cross Sub-Funds' investments amounts to EUR 203,681,672 and therefore total combined Net Asset Value at the end of the year without cross-investments would amount to EUR 33,023,564,855.

b) Foreign Currency Translation

The accounting records and the financial statements are denominated in the reference currencies of each Sub-Fund.

Transactions in currencies other than that in which the Sub-Fund is denominated are converted into the respective currency of the portfolio based on the exchange rate in effect at the date of the transaction.

Assets and liabilities denominated in other currencies are converted into the respective currency of the Sub-Fund at the last available rate of exchange at each balance sheet date.

Notes to the Financial Statements as at 31 December 2023

Note 2: Significant Accounting Policies (continued)

b) Foreign Currency Translation (continued)

For all AXA World Funds Sub-Funds, the exchange rates applied for the Net Asset Value calculation and to combine all Sub-Funds' Net Asset Value are as follows:

29/12/2023								
1 EUR =	1.61889	AUD	1 EUR =	91.92208	INR	1 EUR =	1.10465	USD
1 EUR =	1.45659	CAD	1 EUR =	155.73358	JPY	1 EUR =	20.20129	ZAR
1 EUR =	0.92973	CHF	1 EUR =	1,422.67891	KRW			
1 EUR =	964.67439	CLP	1 EUR =	18.70670	MXN			
1 EUR =	7.83440	CNY	1 EUR =	11.21850	NOK			
1 EUR =	24.68849	CZK	1 EUR =	1.74469	NZD			
1 EUR =	7.45457	DKK	1 EUR =	4.34376	PLN			
1 EUR =	0.86653	GBP	1 EUR =	11.13250	SEK			
1 EUR =	8.62572	HKD	1 EUR =	1.45714	SGD			
1 EUR =	382.21508	HUF	1 EUR =	37.70447	THB			
1 EUR =	3.97773	ILS	1 EUR =	33.90226	TWD			

c) Combined Figures

The combined Statement of Net Assets and the combined Statement of Operations and Changes in Net Assets are expressed in EUR and are presented for information purposes only.

d) Valuation of Investments

The assets of the SICAV are valued as follows:

Liquid assets are valued at their face value with interest accrued; in the case of short-term instruments (especially discount instruments) with maturities of less than 90 days, the value of the instrument based on the net acquisition cost, is gradually adjusted to the repurchase price thereof while the investment return calculated on the net acquisition cost is kept constant. In the event of material changes in the market conditions, the valuation basis of the investment is adjusted to the new market yields.

Transferable securities which are admitted to an official exchange listing or dealt on another regulated market are valued at the closing price on such market. If the investments are listed or traded on several markets, the closing price at the market, which constitutes the main market for such investments, will be determining.

Transferable securities not admitted to an official listing nor dealt on another regulated market are valued at their last available market price.

Investments for which no price quotation is available or for which the price referred to first and third paragraphs above is not representative of the fair market value, are valued prudently and in good faith by the Board of Directors of the SICAV on the basis of their reasonably foreseeable sales prices.

Those investments are identified distinctly in the Schedule of Investments.

The financial statements are presented on basis of the Net Asset Value calculated on 31 December 2023.

Notes to the Financial Statements as at 31 December 2023

Note 2: Significant Accounting Policies (continued)

e) Acquisition Cost of Investments

The acquisition cost of investments expressed in currencies other than the reference currency of the Sub-Fund is translated into the reference currency of the Sub-Fund on the basis of the exchange rates prevailing on the purchase date.

f) Realised Gains/(Losses) on Sales of Investments

Realised gains/(losses) on sales of investments are determined on the basis of the average cost of the investments sold.

g) Valuation of the Forward Foreign Exchange Contracts

Outstanding forward foreign exchange contracts are valued at the closing date using the forward rates of exchange applicable to the outstanding life of the contract. The Net unrealised appreciation/(depreciation) on forward foreign exchange contracts is included in the Statement of Net Assets.

h) Valuation of Financial Futures and Options

Outstanding futures contracts and exchange traded options contracts are valued at the closing date using the last available market price of the instrument. The Net unrealised appreciation/(depreciation) on open futures contracts is included in the Statement of Net Assets.

i) Valuation of Contracts for Difference

Contracts For Difference ("CFD") are valued on the basis of the difference between the price of their underlying on the valuation date and on the acquisition date. The Net unrealised appreciation/(depreciation) is included in the Statement of Net Assets.

j) Valuation of Swap Agreements

A swap is an agreement that obliges two parties to exchange a series of cash flows at specified intervals based upon or calculated by reference to changes in specified prices or rates for a specified amount of an underlying asset. The payment flows are usually netted against each other, with the difference being paid by one party to the other. Risks may arise as a result of the failure of another party to the swap contract to comply with the terms of the swap contract. The loss incurred by the failure of a counterparty is generally limited to the net payment to be received by the SICAV, and/or the termination value at the end of the contract.

Therefore, the SICAV considers the creditworthiness of each counterparty to a swap contract in evaluating potential credit risk. Additionally, risks may arise from unanticipated movements in interest rates or in the value of the underlying securities or indices.

Notes to the Financial Statements as at 31 December 2023

Note 2: Significant Accounting Policies (continued)

j) Valuation of Swap Agreements (continued)

The SICAV entered into performance swap agreements pursuant to which the SICAV receives or pays interest on a notional amount and receives or pays the performance of the underlying index based on the same notional amount. The interest is accrued and the performance of the index is valued on a daily basis. The net receivable or payable amount is recorded in the Statement of Net Assets under the headings "Net unrealised appreciation on swap contracts" and "Net unrealised depreciation on swap contracts".

The Swap Agreements are valued at fair market value as determined prudently and in good faith by the SICAV. All unrealised appreciation/(depreciation) are included in the Statement of Net Assets.

The different types of Swaps held by the SICAV and their specifics are as follows:

Credit Default Swaps ("CDS") are bilateral financial contracts in which one counterparty (the protection buyer) pays a periodic fee in return for a contingent payment by the protection seller following a credit event of a reference issuer. The protection buyer acquires the right to sell a particular bond or other designated reference obligations issued by the reference issuer for its par value or the right to receive the difference between par value and market price of the said bond or other designated reference obligations (or some other designated reference or strike price) when a credit event occurs.

A Total Return Swap ("TRS") is an agreement to exchange the total performance of a bond or other underlying asset (share, index, etc.) for a benchmark rate plus a spread. The total performance includes the interest coupons, dividends and profits and losses on the underlying asset over the life of the agreement, depending on the type of underlying concerned. The risk in this type of agreement is linked to the fact that the benefit for each counterparty will depend on how the underlying asset performs over time, which is unknown at the time at which the agreement is entered into.

Interest Rate Swaps ("IRS") are swap agreements whereby parties exchange fixed income (sum of the notional amount and the fixed rate) for variable income (sum of the notional amount and the floating rate) and vice versa.

k) Dividend Income

Dividends are accounted for on an ex-dividend date basis, net of any irrecoverable withholding tax.

l) Interest Income

Interest income is recognised on a daily accrual basis, net of any irrecoverable withholding tax (interest on investment portfolio, interest on deposits and interest on call accounts and security lending income). Interest income is disclosed net of any amortization.

Notes to the Financial Statements as at 31 December 2023

Note 2: Significant Accounting Policies (continued)

m) Swing Pricing

If the net subscriptions and redemptions based on the last available Net Asset Value on any Valuation Day exceed a certain threshold of the value of a Sub-Fund or a Share Class on that Valuation Day, as determined and reviewed on a periodic basis by the Management Company, the Net Asset Value may be adjusted respectively upwards or downwards to reflect the dealing and other costs that may be deemed to be incurred in buying or selling assets to satisfy net daily transactions. The Management Company may apply a swing pricing mechanism across any Sub-Fund or Share Class. The extent of the price adjustment will be set by the Management Company and does not exceed 2% of the Net Asset Value.

During the year, the swing pricing mechanism was applied across all Sub-Funds.

n) Capital Gain Tax

Some governments exercise substantial influence over the private economic sector and investments may be affected by political and economic instability. In adverse social and political circumstances, governments have been involved in policies of expropriation, confiscatory taxation, nationalisation, intervention in the securities market and trade settlement and imposition of foreign investment restrictions and exchange controls, and these could be repeated in the future. In addition to withholding taxes on investment income, some markets may impose differential capital gain taxes on foreign investors. The related amounts are accounted as “Other payables” under the Statement of Net Assets.

Note 3: Taxation

The SICAV is a registered investment fund domiciled in Luxembourg and is, as a result, exempt from tax, except for subscription tax (“Taxe d’Abonnement”). Under current legislation and regulation, the SICAV is subject to a subscription tax calculated and payable quarterly on the Net Asset Value of the SICAV at the end of the respective quarter. The SICAV pays a tax rate equal to 0.05% for assets related to the shares reserved for retail investors. This tax is reduced to 0.01% for assets related to the shares reserved for institutional investors and/or for the cash and money market Sub-Funds.

The "Taxe d'abonnement" is waived for that part of the SICAV invested in units of other undertakings for collective investment that have already paid the "Taxe d'abonnement" in accordance with the statutory provisions of the Luxembourg law. This tax is part of the Applied Service Fees in the Financial Statements.

Notes to the Financial Statements as at 31 December 2023

Note 4: Distribution Fees

The distribution fees are calculated as a percentage of the Net Asset Value per share class. As at 31 December 2023, the maximum distribution fees applied are the following:

	Distribution Fees

Note 5: Management Fees

The Management Company is entitled to receive, from the assets of the relevant Sub-Funds, a management fee in an amount to be specifically determined for each Sub-Fund or share class. The annual management fee is calculated as a percentage of the Net Asset Value of each Sub-Fund. The details and the percentage of this fee, per share class, are described in the Full and Simplified Prospectuses and in the table presented hereinafter. This fee is calculated and accrued daily. The Management Company will remunerate the Investment Managers out of the management fee in accordance with the contracts signed with the different parties. The management fees are used in part to pay remuneration (trailer fees) for distribution activities concerning the Fund.

As at 31 December 2023, the rates are the following:

Retrocession on management fee levied on the assets invested in other UCITS or UCIs is calculated and accrued daily and refunded to each share class. This retrocession represents a partial discount or a full refund of the management fees levied by each underlying UCITS or UCIs.

As foreseen in the Prospectus, the Sub-Funds will not invest in underlying UCIs which are themselves submitted to a management fee exceeding 3%.

Notes to the Financial Statements as at 31 December 2023

Note 6: Performance Fees

For the below listed Sub-Funds and share classes, the Management Company is entitled to receive a performance fee in addition to the management fees, based on the Sub-Fund's performance in excess of the benchmark return, calculated as described in the Notes on Sub-Fund's Costs section of the prospectus or in the related Sub-Fund's appendices in the Prospectus dated September 2023.

Notes to the Financial Statements as at 31 December 2023

Note 6: Performance Fees (continued)

As of 31 December 2023, the performance fee rates and the benchmarks are as follows:

Note 7: Redex Fees

The Redex fees are payable to the Investment Manager in charge of the management of the Redex Class and calculated as a percentage of the net assets of the relevant Class.

The maximum annual fee linked to the reduction of the duration exposure of the Redex share classes applied is 0.05%.

Note 8: Withholding Tax Reclaim Income/Withholding Tax Reclaim Fees

The withholding tax reclaim income and fees are linked to the tax-reclaim processes. These income and fees are disclosed for each Sub-Fund in the Statement of Operations and Changes in Net Assets.

Note 9: Applied Service Fee

In order to pay its ordinary operating expenses, the SICAV will pay an Applied Service Fee to the Management Company out of the assets of the relevant Share Class. To seek to protect the Shareholders from fluctuations in these ordinary operating expenses, the yearly total amount of these expenses to be charged to each Share Class by the Management Company (the "Applied Service Fee"), will be at a maximum level of 0.50% of the Net Asset Value in respect of each Share Class (the “Maximum Level”). The level of effective Applied Service Fee might be set out below this Maximum Level with different fixed effective Applied Service Fee rates applicable across Share Classes. The level of the Applied Service Fee per Sub-Fund and per Share Class is defined taking into account different criteria such as, but not limited to, the costs charged to the Share Class and the variation of costs linked to a change of the Net Asset Value in respect of the relevant Share Class that might be due to market effects and/or dealing in shares.

By way of a resolution, the Directors (i) may modify in its sole discretion the level of effective Applied Service Fee and (ii), may amend at any time upon prior notice to relevant Shareholders, the Maximum Level of the Applied Service Fee applicable to all Share Classes.

Notes to the Financial Statements as at 31 December 2023

Note 9: Applied Service Fee (continued)

The Applied Service Fee is fixed in the sense that the Management Company will bear the excess in actual ordinary operating expenses to any such Applied Service Fee charged to the Share Classes. Conversely, the Management Company will be entitled to retain any amount of Applied Service Fee charged to the Share Classes exceeding the actual ordinary operating expenses incurred by the respective Share Classes.

The effective Applied Service Fee is accrued at each calculation of the Net Asset Value and included in the ongoing charges of each Share Class disclosed in the relevant KIID.

In counterparty of the Applied Service Fee received from the SICAV, the Management Company then provides and/or procures, on behalf of the SICAV the following services and bears all expenses (including any reasonable out of pocket expenses) incurred in the day-to-day operations and administration of the Share Classes, including but not limited to:

- Depositary fees except transaction related fees;
- Auditor's fees;
- directors' fees and expenses, and remuneration of officers and employees of the SICAV: any director of the SICAV will be entitled to a fee in remuneration for his services as a director or in his capacity as a member of any committee of the Board;
- the Luxembourg 'Taxe d'abonnement';
- Share Class currency hedging cost;
- the fees of the registrar agent and administrator (including the calculation of the Net Asset Value), any paying agent and of any representatives in jurisdictions where the Shares are qualified for sale, and of all other agents employed on behalf of the SICAV; such remuneration may be based on the net assets of the SICAV or on a transaction basis or may be a fixed sum;
