Investment Company with Variable Capital ("SICAV")  
with multiple sub-funds governed by Luxembourg law

Undertaking for Collective Investment in Transferable Securities ("UCITS")

Audited Annual Report  
as at 31 December 2023

R.C.S. Luxembourg B 27.128

Subscriptions may only be made on the basis of this prospectus ("the Prospectus") including the fact sheets for each of the sub-funds and on the basis of the key investor information ("Key Information"). The Prospectus may only be distributed if accompanied by the latest annual report and the latest semi-annual report if the latter is more recent than the annual report.

Only the French version of the present Annual Report has been reviewed by the auditors. Consequently, the auditor's report only refers to the French version of the Annual Report; other versions result from a conscientious translation made under the responsibility of the Board of Directors. In case of differences between the French version and the translation, the French version should be retained.

## ADDITIONAL INFORMATION FOR INVESTORS IN THE FEDERAL REPUBLIC OF GERMANY

### **Facilities:**

MARCARD, STEIN & CO AG  
Ballindamm 36 D-20095 Hamburg

The following documents and information can be inspected at the Facilities and obtained in paper form free of charge:

- The SICAV's sales prospectus
- The SICAV's key investor information
- The SICAV's articles of association
- The SICAV's annual and semi-annual report
- The issue, redemption and conversion prices
- Any notices to investor

No distribution notice has been filed in Germany for the below sub-funds pursuant to section 310 of the Investment Code; because of this, shares of these sub-funds may not be distributed publicly to investors falling within the scope of the German Investment Code:

- DPAM L Bonds EMU Inv. Grade Gov. Index
- DPAM L Bonds EUR Selection
- DPAM L Convertible Europe
- DPAM L Convertible World Sustainable

## General information of the Fund

---

DPAM L (the "SICAV") was incorporated on 23 December 1987 as an Investment Company with Variable Capital (SICAV) with multiple Sub-Funds, governed by Luxembourg Law for an unlimited period. At the date of the report, the SICAV is subject to the law of 10 August 1915 and its amended laws related to commercial companies, to the Part I of the law of 17 December 2010 ("the Law of 2010") related to Undertakings for Collective Investment and to the Council Directive 2009/65/EC as amended.

The publications are made in "Recueil Electronique des Sociétés et Associations (RESA)" and accessible on the site "Registre de Commerce et des Sociétés de Luxembourg".

The Articles of Incorporation of the SICAV were published in the "Mémorial, Recueil des Sociétés et Associations" on 17 February 1988, and the Articles of Incorporation, amended for the last time by the Extraordinary General Meeting of Shareholders of 2 January 2017 were published in the "Registre Electronique des Sociétés et Associations".

The SICAV has appointed DEGROOF PETERCAM ASSET SERVICES S.A. as management company to perform globally all the collective portfolio management functions referred to in Appendix II to the Law of 2010, namely the management of the portfolio and the administration and sale of the shares in the SICAV.

As at 31 December 2022, the following Sub-Funds are active:

- DPAM L BONDS EUR QUALITY SUSTAINABLE in EUR
- DPAM L BONDS UNIVERSALIS UNCONSTRAINED in EUR
- DPAM L BONDS HIGHER YIELD in EUR

## General information of the Fund

---

The DPAM L CONVERTIBLE EUROPE and DPAM L CONVERTIBLE WORLD SUSTAINABLE sub-funds were liquidated on 3 February 2023.

The DPAM L BONDS EUR SELECTION sub-fund was liquidated on 29 September 2023.

The following share classes may be issued for the sub-funds currently offered for subscription:

Class A shares: distribution shares offered to the public.

Class A CHF shares: distribution shares which differ from class A shares in that they are denominated in Swiss francs.

Class A CHF Hedged shares: distribution shares which differ from class A CHF shares in that the exchange risk against the Swiss franc is hedged.

Class A EUR Hedged shares: distribution shares which differ from class A shares in that the exchange risk against the euro is hedged.

Class A USD shares: distribution shares which differ from A class shares in that they are denominated in US dollars.

Class B shares: capitalisation shares offered to the public.

Class B CHF shares: capitalisation shares which differ from class B shares in that they are denominated in Swiss francs.

Class B CHF Hedged shares: capitalisation shares which differ from class B CHF shares in that the exchange risk against the Swiss franc is hedged.

Class B EUR Hedged shares: capitalisation shares which differ from class B shares in that the exchange risk against the euro is hedged.

Class B LC shares: capitalisation shares which differ from class B shares by the fact that (i) they are reserved for investors affected, directly or indirectly, by one or more current "Services Agreement Life Cycle" contracts with Degroef Petercam Asset Management, (ii) and that they have a different management fee.

Class B USD shares: capitalisation shares which differ from B class shares in that they are denominated in US dollars.

Class B USD Hedged shares: capitalisation shares which differ from class B USD shares in that the exchange risk against the US dollar is hedged.

Class B BIS USD Hedged shares: capitalisation shares which differ from class B USD shares in that the subscription currency of the share class is hedged against the reference currency of the relevant sub-fund. However, the extent of hedging may fluctuate slightly around the full hedging level.

Class E shares: distribution shares which differ from class A shares in that they are reserved for institutional investors within the meaning of Article 174 (2) of the Law of 2010.

one or more companies belonging to Degroof Petercam Group, (ii) to the account(s) to which these discretionary management mandates apply, and in that (iii) they have a different management fee.

Class J EUR Hedged shares: capitalisation shares which differ from class J shares in that the exchange risk against the euro is hedged.

Class J USD shares: capitalisation shares which differ from class J shares in that they are denominated in US dollars.

Class L shares: capitalisation shares which differ from class B shares by the fact they have (i) a minimum initial subscription, (ii) a different maximum marketing fee and (iii) a management fee that may be different.

Class L EUR Hedged shares: capitalisation shares which differ from class L shares in that the exchange risk against the euro is hedged.

Class L USD shares: capitalisation shares which differ from class L shares in that they are denominated in US dollars.

Class M shares: distribution shares which differ from class A shares due to the fact that they (i) are reserved for investors currently holding one or more discretionary management mandates with one or more Degroof Petercam Group companies, and that (ii) they are reserved for the account(s) to which these discretionary management mandates apply, and (iii) they are reserved for all-in mandates and due to the fact that (iv) they have a different management fee. In this context, "all-in" includes at least the management fees and custody fees charged to the account(s) to which these "all-in" discretionary management mandates apply.

Class M EUR Hedged shares: distribution shares which differ from class M shares in that the exchange risk against the euro is hedged.

Class M USD shares: distribution shares which differ from M class shares in that they are denominated in US dollars.

Class N shares: capitalisation shares which differ from class B shares due to the fact that they (i) are reserved for investors currently holding one or more discretionary management mandates with one or more Degroof Petercam Group companies, and that (ii) they are reserved for the account(s) to which these discretionary management mandates apply, and (iii) they are reserved for all-in mandates and due to the fact that (iv) they have a different management fee. In this context, "all-in" includes at least the management fees and custody fees charged to the account(s) to which these "all-in" discretionary management mandates apply.

Class N EUR Hedged shares: capitalisation shares which differ from class N shares in that the exchange risk against the euro is hedged.

Class N USD shares: capitalisation shares which differ from class N shares in that they are denominated in US dollars.

Class P shares: capitalisation shares which differ from class F shares by the absence of (i) a management fee and (ii) a minimum initial subscription amount and in that they are (i) they are reserved for investors currently holding one or more discretionary management mandates with Degroof Petercam Asset Management and (ii) they are reserved for the account(s) to which these discretionary management mandates apply.

## General information of the Fund

---

Class P EUR Hedged shares: capitalisation shares which differ from class P shares in that the exchange risk against the euro is hedged.

Class V shares: distribution shares which differ from class A shares in that (i) at the discretion of the Management Company they may be offered to distributors and platforms in the United Kingdom, Switzerland and European Union Member States, except to Banque Degroof Petercam Belgique and Banque Degroof Petercam Luxembourg, (ii) that they may be offered by distributors and platforms which have separate remuneration agreements with their clients that are not subject to any rebate, and (iii) there is no rebate on the management fee.

Class V CHF shares: distribution shares which differ from class V shares in that they are denominated in Swiss francs.

Class V CHF Hedged shares: distribution shares which differ from class V CHF shares in that the exchange risk against the Swiss franc is hedged.

Class V EUR Hedged shares: distribution shares which differ from class V shares in that the exchange risk against the euro is hedged.

Class V USD shares: distribution shares which differ from V class shares in that they are denominated in US dollars.

Class V BIS USD Hedged shares: distribution shares which differ from class V USD shares in that the subscription currency of the share class is hedged against the reference currency of the relevant sub-fund. However, the extent of hedging may fluctuate slightly around the full hedging level.

Class W shares: capitalisation shares which differ from class B shares in that

- (i) at the discretion of the Management Company they may be offered to distributors and platforms in the United Kingdom, Switzerland and European Union Member States, except to Banque Degroof Petercam Belgique and Banque Degroof Petercam Luxembourg,
- (ii) (ii) that they may be offered by distributors and platforms which have separate remuneration agreements with their clients that are not subject to any rebate, and
- (iii) (iii) there is no rebate on the management fee.

Class W CHF shares: capitalisation shares which differ from class W shares in that they are denominated in Swiss francs.

Class W CHF Hedged shares: capitalisation shares which differ from class W CHF shares in that the exchange risk against the Swiss franc is hedged.

Class W EUR Hedged shares: capitalisation shares which differ from class W shares in that the exchange risk against the euro is hedged.

Class W USD shares: capitalisation shares which differ from class W shares in that they are denominated in US dollars.

Class W BIS USD Hedged shares: capitalisation shares which differ from class W USD shares in that the subscription currency of the share class is hedged against the reference currency of the relevant sub-fund. However, the extent of hedging may fluctuate slightly around the full hedging level.

# DPAM L

## General information of the Fund

---

Class Z shares: capitalisation shares which differ from class F shares in that they are reserved

- (i) for investors initially subscribing the minimum amount of EUR 25,000,000 and in that
- (ii) (ii) they have a different management fee, it being understood that shareholders investing in this class may not request the redemption of their shares so as to reduce their level of investment to below the minimum initial subscription amount.

Dividends payable on any distribution class may, at the request of the shareholder, be paid in cash or in the form of new shares of the respective class.

The Net Asset Value of each Sub-Fund is calculated each bank business day in Luxembourg ("Valuation Day") that corresponds to a net asset value which will be dated that Valuation Day but calculated on the bank business day following that Valuation Day.

With regard to the valuation day of DPAM L EQUITIES EMERGING MARKETS ESG LEADERS INDEX and only since 1 June 2022, if a market (including Shenzhen or Shanghai Hong Kong Stock Connect) representing 10% or more of the size of the Sub-fund is closed, the Valuation Day will be the following Business Day. The same applies when several markets representing together 10% or more of the size of the Sub-Fund are closed.

The Net Asset Value, issue price and redemption price (of each Sub-Fund) are available each business day at the registered office of the SICAV, and in Switzerland, available each business day in Geneva at the representative office BANQUE DEGROOF PETERCAM (SWITZERLAND) S.A., Geneva (for the relevant Sub-Funds).

The SICAV publishes, at the end of each year, an annual report audited by the Auditor and, at the end of each half year, an unaudited semi-annual report. These financial reports contain separate financial statements for each Sub-Fund. The consolidation currency is the Euro.

The following documents are available to the public at the Registered Office of the SICAV or from the <http://funds.degroofpetercam.com> :

- the articles of association of the SICAV ;
- the prospectus of the SICAV (including the fact sheets for the SICAV's sub-funds) ;
- the Key Information (for each sub-fund and each class of shares) ;
- the financial reports of the SICAV.

A copy of the agreement entered into with the Manager of the SICAV manager can be consulted free of charge at the registered office of the SICAV.

# DPAM L

## Manager's Report

---

In 2023, global equities posted a positive performance of 16.2% in euro terms (excluding dividends). By region and in terms of the common currency (euro), US equities outperformed other regions, ending the year up 21%. Emerging equities ended the year at the back of the pack, posting a return of just 3.6% due to the negative performance of Chinese equities. European equities were up 12.7%, in line with Japanese equities (+13.3%). After a difficult year for tech stocks in 2022, the Nasdaq composite came out a winner in 2023 (+43% in dollars). The Dow Jones hit a new all-time high, while the S&P 500 ended the year 56 basis points off its record close in January 2022. The trend for the S&P 500 was generally bullish, although shares retreated in the third quarter (and bottomed out at the end of October) before recovering at the end of the year. The significant gains made by a number of technology mega-caps (referred to as the “Magnificent Seven”) played a major part in the overall performance of the index, and market tightness remained a persistent concern for much of the year. A major theme among technology stocks was optimism regarding artificial intelligence. Yields on 10-year US Treasury bonds ended the year below 4%, broadly unchanged from the end of 2022. The banking crisis pushed yields down in March, then they rose until October in line with the Fed’s mantra of “higher for longer” before finally falling sharply at the end of the year. All eurozone bond segments were in the black after a negative 2022. The dollar posted a year-on-year decline for the first time since 2020.

### United States of America

Over the past year, investors have been counting on the Fed to reverse its monetary policy stance in response to better inflation figures, while US consumer spending and corporate profits have remained resilient. In a nutshell, fears of a hard landing have given way to a broader economic consensus of a soft landing or no landing at all. US monetary policy was at the heart of the 2023 story. Throughout the summer of 2023, the Fed continued to sound its “higher for longer” mantra and the market debated where the ceiling might be. The Fed’s December 2023 meeting (including its median projection of a 75 basis point rate cut in 2024) marked the inflection point in US monetary policy and triggered a rise in equities and a fall in Treasury yields that continued through to the end of the year. A key element in the Fed’s decision was the ongoing progress in pushing inflation down towards the 2% target. While inflation peaked at 8.9% year-on-year in June 2022, this figure fell to 6.4% in December 2022 and 3.1% in November 2023. Core inflation eased to 4.0% year-on-year in the November report.

### Eurozone

The eurozone economy was broadly flat over the year. The German economy was disappointing compared with the rest of the eurozone. Manufacturing confidence indicators remained below the 50 mark (which separates expansion from contraction) throughout the year. Activity in the services sector, resilient until the summer, began to lose momentum towards the end of the year. The labour market has proved resilient despite the absence of economic growth. The unemployment rate remained at a historically low level. Inflation continued to trend downwards throughout the year. Core inflation finally reached an inflection point in April and then settled at 3.6% in November, while headline inflation fell to just 2.4% at the end of the year. The European Central Bank continued to raise its key rates during the year, although at a slower pace than in the second half of 2022. The deposit rate stood at 4% in September. The ECB subsequently left this rate unchanged for the rest of the year.

### Japan

Economic growth in Japan was relatively robust in the first part of the year, then turned negative in the third quarter (quarter-on-quarter change). Economic growth nevertheless stood at 1.6% year-on-year in the third quarter of 2023. The yen depreciated sharply against the euro and the dollar in 2023. The yield on 10-year

# DPAM L

## Manager's Report

---

government bonds rose from 0.41% to 0.59% over the period as a result of the Bank of Japan's greater flexibility in setting the 10-year rate, which reached 0.95% at the beginning of November. The yen depreciated sharply over the period.

### Emerging markets

The Chinese government moved to lift Covid restrictions in December, prompting a rebound in economic activity in the first quarter of 2023. Economic growth was already slowing in the second quarter of 2023, and then business confidence indicators showed that activity rebounded slightly at the end of the third quarter thanks to the various support measures taken by the Chinese government. The Chinese property sector struggled during the year on the back of a decline in new construction and the debt problem faced by actors in the sector. In other emerging countries, at the end of the period, the downturn in manufacturing continued in emerging Europe, while the sector returned to growth in Latin America. Some central banks began a cycle of rate cuts in response to the slowdown in inflation. This was the case for Brazil, Poland and the Czech Republic.

### DPAM L BONDS EUR QUALITY SUSTAINABLE

Policy followed during the year:

The net asset value of the capitalization shares (B share) gained 8.45% during the year 2023.

Financial markets experienced a strong year with both equity and fixed income markets recovering much of the lost ground in 2022. This turnaround was underpinned by unexpectedly robust growth, despite forecasters anticipating a mid-2023 recession. In the US, Real GDP (QoQ) growth exceeding 5% in Q3 was exceptional and overshadowed weaknesses in Europe, while the China re-opening trade failed to fully materialise.

Fiscal policy remained supportive over the course of the year, despite another year with increased polarisation and last-minute deals on debt ceilings and government shutdowns. Geopolitical tensions flared up with the military conflict in the Middle East and US-China relations as main sources of market concern. Oil failed to profit from conflict and OPEC+ supply cuts while gold shined within the commodity complex. The concept of "immaculate disinflation" was the main reason behind the exceptional performance of financial markets in the final two months of the year. The Fed's endorsement of "future rate cuts" after a "higher for longer" narrative was the cherry on the 2023 cake.

Interest rate markets experienced a very volatile 2023 but ended the year only slightly higher than they started. German 10y rates even declined in 2023 despite the ECB raising interest rates to a record 4%. The mid-year sell-off was driven by continued hawkish central bank expectations, growth resilience despite inflation peaking, a US credit downgrade and worries about the willingness and ability of markets to absorb an ever-increasing US deficit. An intraday high of 5% in US 10y rates mid-October marked the beginning of a rotation, as the Fed started to endorse so-called insurance cuts to ensure a soft economic landing. This pivot in central bank rhetoric and a cyclical downturn in labour markets - validating the immaculate disinflation story - spurred on one of the most potent bursts of looser financial conditions. EUR Investment Grade ("IG") markets also had a strong 2023, with the best total returns since 2014. The bulk of these 2023 gains were mainly generated during the final stretch of the year, as markets anticipated close to 150 basis points of ECB easing in 2024. Real estate led the performance, with financials outperforming non-financials despite US banking pressures. Going down in credit quality was a good call, as HY outperformed IG and BBBs outperformed as on a duration-adjusted basis.

# DPAM L

## Manager's Report

---

We have started the year with an UW duration stance that has been transformed into a high conviction OW duration during the summer. EUR duration have been increased due to attractive real rates and prospects of a slowing economy. After the strong rally in Nov-Dec we have reduced this OW. Swap spreads have rallied in tandem with rates. Our preference for BBB EUR IG was a good choice. Within our sector allocation in EUR IG markets, we have benefitted from keeping and increasing our exposure to real estate bonds (constructed around logistics and retail). that have witnessed a horrific 2022. Our strong conviction on Irish, Spanish, and Italian banks was the main driver behind a very strong selection effect in this segment. We also had an overweight in the subordinated space, with overweight in lower tier2 banks, on the limited issuance expectations and their cheapness vs Senior Non Preferred, and overweight in non-financials hybrids.

Credit selection in hybrid capital has been a contributor, in both subordinated debt; non-financial and financial. Selection to names like Netflix or VGP (logistics real estate) have been positive.

Future policy:

We believe that a long duration bias remains warranted but need to adopt a more tactical approach given the uncertainty around the political events that are plentiful in 2024. Inflation will continue to decline, providing another boost to this positioning. Our preference for credit market exposure remains intact in EUR given attractive valuations and strong balance sheets across the board. Resilient earnings coupled with returning capital flows into the asset class on the back of appealing spread valuations should continue to provide a tailwind for credit returns in 2024. Current credit break-even spreads still provide high buffer against further weakness. Fundamentals remain solid and while surely margins and earnings will decrease over the next quarters, we are entering this downturn in a position of strength.

We still advocate that corporate bonds with strong balance sheets can go through this period of turbulence. Selectivity and credit selection are key here since that the recovery is likely to be uneven across and within sectors. Our internal credit analysis is essential and will remain the cornerstone of the investment process so that the fund can best withstand episodes of strong volatility.

### **DPAM L BONDS UNIVERSALIS UNCONSTRAINED**

Policy followed during the year:

Since 1985, DPAM L Bonds Universalis Unconstrained has been a global fixed income total return portfolio built on the dynamic management of risk factors across currencies, interest rates and credit spreads. Its unconstrained nature is reflected in the flexibility with which we identify and select investments in liquid bond sectors around the world. This flexibility allows us to build a high-quality, well-diversified conviction fund that grows capital when value is present, but seeks to preserve capital when visibility is low and uncertain. Overall, the required investment horizon is between 3 and 5 years. Our rigorous risk management uses Value-at-Risk (VaR) measures to control realised volatility.

The primary objective of the fund is to protect and/or grow capital, depending on the overall confidence level of the managers. Uncertain investment conditions are reflected in low VaR consumption. As the outlook for bonds improves, the portfolio increases conviction levels and VaR consumption. The fund seeks a robust profile through optimal diversification, including into resilient investments that grow capital under stress.

## Manager's Report

---

The F-share class returned 5.97% in EUR terms in 2023. Both the reduction in interest rates and the spread tightening on both government and corporate bonds contributed positively. The appreciation of EUR against USD and JPY detracted some of the gains.

Rates increased dramatically over the first 10 months of 2023 as central banks decided to hike aggressively to fight inflation. Economies and especially the labor market, seemed to be resilient. In the second half of the year, economic data deteriorated especially in Europe with weak PMIs and a normalizing labor market. Nevertheless, European rates kept rising due to the high correlation with the strong US economy.

Q4 was a turnaround. The first main trigger was the marginal miss in US October CPI. Markets started to price in 100bps of policy rate cuts in 2024, with easing starting as soon as April for the ECB and May for the Fed. Then, the dovish tone from Powell at the December meeting was another trigger. The ECB decided to discontinue reinvestments for the PEPP portfolio at the end of 2024.

In EM, more countries joined the cutting cycle.

China's outlook was revised to negative from stable, reflecting the stress in the real estate market and the financial stimulus provided in the financial system.

The BoJ announced that it could stop the yield curve control policy in the near future.

As yields reached attractive levels, the portfolio duration increased from 5.3 to 6 years. However, we reduced exposure to longer-dated maturities (30 years) and increased exposure to 5-10 year maturities. We see the intermediate part of the curve outperforming the longer end.

In terms of currencies, we exited South Africa and Japan and entered Brazil and Poland. We increased in GBP and decreased in Australian and New Zealand dollar.

Our corporate exposure increased from 41% to 49% as the carry potential is interesting. We were also very active in new issue participation.

### Future policy:

Money supply and velocity are falling. Inflation may temporarily drop below target. However, financial conditions have loosened. Central banks may err on the conservative side and delay cuts if the economy remains resilient for few more quarters. Job openings have been falling sharply, and wage growth is easing, but the number of unemployed workers remains low and stable.

Short term interest rates will move lower. Long term ones may seesaw again due to the high uncertainty and data dependency.

The primary force is volatility.

Our portfolio structure remains defensive: limited exposure to high beta (subordinated or HY bonds), high exposure to high quality government bonds.

At the same time, we will dynamically change interest rate, credit and FX risk based on market opportunities.

### DPAM L BONDS HIGHER YIELD

Policy followed during the year:

After a negative return in 2022 and widespread market volatility, 2023 saw a return to favor for high-yield bonds and a tightening of credit spreads. Expectations of the end of the central bank tightening cycle and

# DPAM L

## Manager's Report

---

the presence of lower inflationary pressures (particularly in the last quarter of the year) led to a reduction in market rates, which was positive for bond valuations. In addition, the publication of satisfactory corporate results and a significant drop in energy prices in Europe led to a general tightening of credit spreads, which also accelerated the market rally.

Throughout the year, the portfolio maintained a USD exposure. This weighed on performance following the dollar's depreciation in 2023. Default rates remained low in both the US and European HY markets.

The fund (B share) recorded a positive return of 9.86% over the year.

The fund does not have a sustainable objective, but favors the promotion of I/O characteristics, but does not make sustainable investments.

### Future policy:

For 2024, we believe that the improving inflation outlook should push both the Fed and the ECB towards a phase of monetary easing, which should initially provide positive support for market valuations. Thereafter, the direction of the credit market will depend on the extent of the expected economic slowdown in the US and Europe.

## DPAM L BONDS GOVERNMENT SUSTAINABLE HEDGED

DPAM L Bonds Government Sustainable Hedged aims to capitalise on the performance of developed markets government rates, based on a sustainable approach, through the construction of a balanced portfolio of debt securities issued by OECD governments and other related issuers. The investment is typically done in local currencies and any non-euro exposure is hedged in euro using FX forwards. The fund applies an SRI overlay via a best-in-class approach which ranks OECD member countries based on their efforts in terms of sustainability. Countries are ranked in a proprietary model, aligned with the United Nations sustainable development goals. Effectively the fund invests only in the top half best ranked countries.

The DPAM L Bonds Government Sustainable Hedged returned 4.93% (F share class) in 2023.

Interest rates were very volatile in 2023. The year was mainly characterised by three interrelated events: a mini banking crisis, a curve inversion and a curve steepening. The mini banking crisis, initially caused interest rates to fall. However, as the initial panic subsided and the situation appeared less serious, the focus shifted back to persistent inflation and steady growth, causing rates to rise. When inflation surprised to the downside in the last quarter of 2023. The bear steepening was replaced by a bull steepening.

Inflation remained elevated throughout 2023 and growth remained resilient. This led to central banks continuing to raise policy rates even after the mini banking crisis. In the final months of 2023, inflation decelerated further. To position for such an environment, we adjusted the portfolio by:

- Having a lower duration than the reference universe at the start of the year, and we reduced it further in April and May, but we started to increase our duration at the end of June and in the last quarter of 2023, when the 10-year US Treasury bond touched 5%. We ended the year with a duration of 7.18 years.
- Starting to enter into curve steepeners as the year progressed and we started to see some weakness in terms of economic data. This was mainly done via futures in Germany, as the United States is not

# DPAM L

## Manager's Report

---

eligible, but we also implemented curve steepening in the US and other markets by buying bonds at the short and medium end of the curve.

- Having a smaller allocation to Japan. In the first few quarters of the year, our lower exposure to Japan detracted from performance as rates continued to sell off, but this changed in the last quarter of the year as rates rallied aggressively.

The above helped the fund to achieve positive performance in 2023.

During 2023, we continued to invest in supranationals and agencies, as we believed that the spread was attractive and at the same time increased the rating of our fund and at the same time added some performance to the fund.

An important change in 2023 was that the fund was also able to invest in two new peripheral countries (Spain and Portugal). As we believed that Spanish spreads did not reflect their fundamentals (especially at the long end of the curve), we started to gradually add longer Spanish bonds to the fund. Another good source of performance in 2023 was our large allocation to Slovenia and our small duration allocation to Germany, as spreads on riskier assets tightened.

The fund has received some inflows during 2023 and closed the year with assets under management above 1.8 billion. For 2024, we see central banks cutting more than what is priced in and at the same time curve steepeners are expected to deliver positive performance in 2024.

### DPAM L EQUITIES CONVICTION RESEARCH

Policy followed during the year:

At the end of December 2023, the net asset value of DPAM L Equities Europe Conviction Research (Share B) was EUR 1524.59 and generates a yield of 8,76%.

The strategy of the conviction research fund is to invest in companies in which the analyst team has a strong conviction while keeping a concentrated portfolio and a coverage neutral exposure.

The yearly relative performance ended up in negative territories in a still of challenging macro context with many companies digesting post-pandemic and inflation effects. Consumer staples and consumer discretionary and to a lesser extent, IT had positive returns. Beiersdorf had a strong year. Beiersdorf has demonstrated a successful turnaround of the company as it focused on its winning categories and strategically de-emphasized losing categories. In consumer discretionary, Ferrari continued to post strong results reflected in both solid demand and profitability thanks to its strong model momentum. Amadeus had positive returns driven by a travel sector holding up longer than anticipated. Also, Adidas contributed positively thanks to a successful turnaround. In IT, ASMI drove positive returns supported by a resilient equipment spending environment in semiconductor outside of memory and by the progress towards the next node migration at their logic customers. SAP also drove positive returns thanks to its good execution regarding its multi-year business plan of transitioning its customer base to the cloud version of its software and therefore driving an acceleration in growth. In industrials, Schneider and Atlas Copco contributed positively to returns. Schneider has successfully repositioned its products and services around 3 megatrends: i) Electrification, ii) Digitization, and ii) Automation, which are the key drivers to decarbonize. Financials stocks in the funds experienced a much more difficult 2023. Beazley underperformed insurers after a strong 2022. The company had to shift gears away from the cyber to property market as the war in Ukraine triggered

# DPAM L

## Manager's Report

---

a change in contracts and cooled down the cyber security market. ALD had to lower its financial targets due to unexpected setbacks during the acquisition of Lease Plan, resulting in a sharp fall in the share price. In Materials Croda suffered from the normalization in the inventory cycle within the food, protein, health and beauty. Healthcare had a negative contribution as destocking in bioprocessing has been the main topic with weaker than expected production related demand from some customers and as time and magnitude of destocking came up bigger than anticipated.

During 2023, some positions were changed. In consumer discretionary, we opted for a switch from luxury to sporting goods given the two segments were at opposite part of the demand cycle. We added a position in Adidas and sold our position in Burberry. Adidas' improving brand heat and efforts with retailers have driven an improvement in trends from negative to positive through the year as well as in sales. In energy, we sold Equinor. In financials, we sold Worldline following its announcement of a much lower cash conversion than expected for 2024 as well as more challenging conditions in its German merchant acquiring business (shift in spending pattern) as well as in its online activity (end of relationship with some high-risk merchants). We sold ALD after lowering the financial targets. We added a position in BNP and Unicredit given better balance sheets and capitalization than peers. KBC was significantly reduced. As such YTD KBC saw its capital return program hampered by one-off elements, while the benefit to NII from higher interest rates was slower because of its replication book. In industrials, we exited Nibe. We have switched Kerry Group in Fielmann as we expect Fielmann business trends to improve from here given we believe that the company has been very well managed in the last 3 years.

Notable additions during 2023: BNP, Unicredit, Adidas, Pirelli, Fielmann, Roche Holding

Notable dis-investments in 2023: Nibe, ALD, Interpump, Stellantis, Lonza, Worldline, Kerry Group, Burberry, Novartis

### Future policy:

While European growth indicators currently indicate stability without signs of deterioration, they remain subdued. The overall positive impact of decreasing interest rates and energy prices is noteworthy. Despite the disruptive effects of the ongoing monetary tightening cycle across various market segments, it has concurrently expanded the range of stock-picking opportunities. Nevertheless, the significance of refinancing risks persists, and lower-quality companies are anticipated to face heightened challenges, despite a decline in rates from their peak.

Our fund managers central expectation continues to be an orderly economic slowdown. The evolving political agenda, with a shift towards the local level, is expected to provide more insights into the region's medium-term potential growth rate. Discussions with companies across sectors reveal advanced stages of destocking, while those aligned with structural trends express optimism about their future.

Given this backdrop, the manager maintains an investment approach with a medium to longer time horizon. The focus is on European companies with robust business models, steering clear of areas undergoing disruption.

# DPAM L

## Manager's Report

---

### **DPAM L BONDS EUR HIGH YIELD SHORT TERM**

Policy followed during the year:

After a negative return in 2022 and widespread market volatility, 2023 saw a return to favor for high-yield bonds and a tightening of credit spreads. Expectations of the end of the central bank tightening cycle and the presence of lower inflationary pressures (particularly in the last quarter of the year) led to a reduction in market rates, which was positive for bond valuations. In addition, the publication of satisfactory corporate results and a significant drop in energy prices in Europe led to a general tightening of credit spreads, which also accelerated the market rally.

The fund's strategy was defensive throughout the year. Most of the portfolio is exposed to the "BB" rating category.

The fund (B share) recorded a positive return of 7.27% over the year.

The fund does not have a sustainable objective, but favors the promotion of I/O characteristics, but does not make sustainable investments.

Future policy:

For 2024, we believe that the improving inflation outlook should push both the Fed and the ECB towards a phase of monetary easing, which should initially provide positive support for market valuations. Thereafter, the direction of the credit market will depend on the extent of the expected economic slowdown in the US and Europe.

### **DPAM L PATRIMONIAL FUND**

Policy followed during the year:

The Net Asset Value of the DPAM L – Patrimonial (B-share) was EUR 129.12 on 31 December 2023. The share price advanced +6.61% during the calendar year.

At the start of 2023, investors expected a year with near-flattish Western GDP growth, with an economy held back by the combined burden of tight monetary inflation and still high inflation. The most optimistic growth expectations were for emerging markets, helped by China ending its harsh 0-Covid policy. This re-opening of China's economy was also expected to indirectly stimulate Europe's economy, just like the fading energy crisis did. Europe was thus exiting a time of pessimism, visible in the low valuation of its equities. As a result, we started the year with a constructive stance on European equities.

Concerning the overall equity weight, the fund started the year with an average equity exposure, having recently added to it. We believed that the weak economic outlook had been sufficiently long anticipated and thus priced in. Throughout the year, the fund's equity exposure remained constructive, at an average or somewhat above-average level. Equity style-wise, we decided in February to increase the diversification towards value stocks, notably via banks BNP Paribas and KBC. HK Exchange & Clearing on the other hand was sold, because of its sensitivity towards Chinese government policy. The latter proved a good decision. Chinese stocks disappointed versus initial expectations in 2023. Investors' loss of confidence in China's

# DPAM L

## Manager's Report

---

economic policy, geopolitical risks and continued real estate sector woes, were the culprits for the lackluster performance of Chinese equities.

Another arbitrage -this time in the Technology sector, - also proved fruitful: Japanese Hoya was sold to buy US semi-conductor company AMD. This completed the fund's semi-conductors positioning that was also comprised of ASML, TSM and Infineon. Among others with these four stocks, the fund profited, from what turned out to be the bullish theme of 2023: Exposure towards growth in Artificial Intelligence. Next to semi-conductors, also fund positions such as Microsoft, Alphabet and Amazon profited from this trend. The theme was so strong that it contributed to US equities, -and in particular US technology stocks, - to be top performers in 2023. -Linked to the emergence of AI as an investment theme, we reduced the tactical value exposure in May.

We now turn our attention to the fund's fixed income positioning: At the start of the year, the fund was cautiously positioned, especially relative to sovereign bonds. 2022 had just passed, which was a year with historically significant negative bond returns. Throughout 2023, monetary policy expectations remained a significant source of market volatility. With inflation continuing its path towards normalization and yields reaching attractive levels in our view, we gradually increased the portfolio's fixed income exposure over the course of the year. Examples of sovereign bonds that were added to, are German and Spanish nominal bonds, as well as German, French and US inflation-linked bonds. -While for most of 2023, it looked like developed market sovereign bonds would not generate much return, a strong Q4 eventually changed that. Within emerging market bonds, we sold a Peruvian bond to initiate a position in a Brazilian local currency sovereign bond, -a conviction of our emerging market debt team. Brazil has a large and diversified economy with a credible Central Bank. Its politics create volatility, but its minister of economy, is seen as a stabilizing factor.

Contrary to our cautious stance on sovereign bonds at the start of 2023, we were more constructive on corporate bonds. Our positions in EUR high yield bonds for instance did not disappoint. The market segment showed a steady positive performance, with only a modest volatility. During the year, we also added credit exposure, by buying bonds issued by KfW, Bank of Ireland and Prologis. Due to the combined purchases of sovereign and corporate bonds, the year was ended with an above-average fixed income exposure, laying the foundation to reap a stream of attractive fixed income returns for the years to come.

Finally, a word on the fund's gold position. Usually, bond and gold prices tend to move in opposite directions, but this was not the case in 2023. The continued war in Ukraine and later in the year, in the Gaza-strip, pushed gold prices higher. Increasing with ca. 7.5% in EUR terms, gold delivered once again as a hedge against geopolitical risks, -despite being held back by a weakening US dollar.

### Future policy:

The year 2024 was started with a surprisingly resilient US economy and an EU economy that is flirting with recession. Inflation normalization has come a long way and Western Central Banks are expected to reverse their monetary policy later this year. In the East, China continues to underwhelm, but Japanese dynamics have been strong lately, notably in terms of earnings forecast revisions and stock market performance. In this context, the portfolio maintains an average exposure towards global equities, and an above-average exposure towards bonds. We believe that in the next few years, we can continue to reap the benefits from holding bonds.

Going forward, both the fundamental and the technical market environment will continue to steer the fund's asset allocation. The convictions of internal experts on different asset classes are considered, to come to a founded and diversified asset allocation and security selection.

# DPAM L

## Manager's Report

---

### DPAM L BONDS EMERGING MARKETS SUSTAINABLE

Policy followed during the year:

DPAM L Bonds Emerging Markets Sustainable aims to capitalize on the robust long-term growth of emerging markets, based on a sustainable investment approach, through the construction of a balanced portfolio of debt securities issued by governments and supranational entities, mostly in local currency. The fund aims to deliver risk-adjusted returns above the local currency emerging market sovereign debt universe. The fund applies an SRI overlay and excludes 'not free' or 'authoritarian' countries via confirmation from two separate external sources. Second, a best-in-class approach ranks emerging countries based on their efforts in terms of sustainability. Countries are ranked in a proprietary model on five sustainability dimensions, aligned with the United Nations sustainable development goals.

The DPAM L Bonds Emerging Markets Sustainable fund returned 13.62% (F-share class) in EUR terms in 2023 and 3.94% annualized return since the launch date of the fund (18/03/2013).

Our outlook for 2023 was very positive. Emerging markets central banks have reacted timely to rising inflation and much quicker than developed markets. We expected inflation to peak and monetary policy reversal to start in H3 2023 in many emerging countries, especially in Latin America. With real rate buffers back at historical high levels, currencies should be well protected. In combination with historical high 8.25% carry, we expected a 10%+ return for 2023.

At portfolio level, this was translated:

- Increase in duration from 4.60 in Q3 2022 to 5.70 at the beginning of 2023 and expectation of steeper curves in H2 2023;
- High exposure to Latin American countries given very high nominal and real yields and prospects of policy reversal;
- Low exposure to Asia given low nominal yields and the difficult situation in China;
- Neutral exposure to Central Europe given still very negative real rates and potential impact of Ukraine;
- Still very selective positioning in Sub Sahara Africa on potential downgrades and restructurings;

Our positive Latin America call has worked well contributing 7.55% to the return of the fund for an average weight of 36.4%. Colombia, Mexico and Brazil contributed most. Carry contributed for 50% of the total Latin American return, the other half is equally split between gains from FX appreciation and duration gains.

Asia which represents on average 27.3% of the portfolio, contributed for only 1% to the total return of the fund. This is explained by the much lower carry and the impact of China on Asian currencies. On average our FX exposure to Asia had a negative contribution of around 1%. From a relative perspective however, our country selection has played an important role in terms of relative performance. Our high exposure to Indonesia, our diversification into India, and our quasi absence from low yielders like Thailand and South Korea has worked extremely well.

Our 17.3% exposure to Central Europe, generated 3.7% return. We kept a relative low weight but compensated this via higher duration. This has worked well, especially in Poland. From a relative perspective our low position in Hungary has not worked well.

The Sub Sahara Africa region was challenging, contributing 0.95% to the total return of the fund. Carry was positive 1.95% but currencies underperformed (-1.30%) and duration gains have been limited to 0.30%. Still,

# DPAM L

## Manager's Report

---

from a relative perspective we did very well. Our South Africa approach for instance worked well: low in exposure at the start of the year and adding exposure at the right moment during the year.

For duration management purposes we had exposure to rate futures. We covered our initial short in European rate futures at a good moment. With US 10-year rates between 4.75% and 5.00%, we increased duration via US futures. This duration management added 0.40% to the overall portfolio return.

Both from an absolute and relative angle, the fund had an exceptional performance in 2023. Assets under management increased by 28% (from 2.470 to 3.162 billion EUR) or 692 million EUR, of which 360 million is net new money.

### Future policy:

We believe 2024 will be a repeat of 2023. We remain positive on all drivers of return: high carry, stable currencies and potential for duration gains when developed markets central banks will cut rates. Valuations are still attractive and investor positioning is low. Our regional exposures will remain broadly unchanged with highest exposure to Latin America. We expect some opportunities in Asia as deflation is spreading across the region.

## DPAM L BONDS EUR CORPORATE HIGH YIELD

### Policy followed during the year:

After a negative return in 2022 and widespread market volatility, 2023 saw a return to favor for high-yield bonds and a tightening of credit spreads. Expectations of the end of the central bank tightening cycle and the presence of lower inflationary pressures (particularly in the last quarter of the year) led to a reduction in market rates, which was positive for bond valuations. In addition, the release of satisfactory corporate results and a significant drop in energy prices in Europe led to a general tightening of credit spreads, which also accelerated the market rally.

The fund's strategy was cautious in the early part of the year, before taking on more credit risk in the second half, given the attractive valuation levels and improving global inflation outlook.

The fund (B share) overperformed its benchmark (Bloomberg Barclays Euro HY, 3% Issuer constraint, ex. financials) by 0.26%.

The fund does not have a sustainable objective but promotes I/O characteristics, but does not make sustainable investments.

### Future policy:

For 2024, we believe that the improving inflation outlook should push both the Fed and the ECB towards a phase of monetary easing, which should initially provide positive support for market valuations. Thereafter, the direction of the credit market will depend on the extent of the expected economic slowdown in the US and Europe.

# DPAM L

## Manager's Report

---

### DPAM L GLOBAL TARGET INCOME

Policy followed during the year:

At the end of 2023, the fund has EUR 38,579,187.97 assets under management.

The DPAM L Global Target Income was launched in December 2014. The strategy of the fund is based on a quantitative approach that aims at a maximum diversification and the payment of a quarterly dividend of minimum 4% per annum. To achieve these goals, the fund invests in a variety of asset classes. An optimized mix between interest rate sensitivity, global equity allocation, currencies and high yield bonds leads to a strongly diversified portfolio.

Over the year, the fund's duration exposure saw a significant increase, starting at a near-record low of 2.4 years and progressively rising. Early in the year, it grew to over 3 years due to lower-than-expected inflation and anticipations of a halt in monetary tightening, reaching 3.6 years by March. After a brief dip in April, the duration peaked at 3.5 years by June. In the third quarter, it began at 4 years and escalated to 5 years by the quarter's end, influenced by decreasing bond volatility and expectations of normalizing interest rates. The upward trajectory continued in the fourth quarter, hitting a yearly high of 5.3 years by the end of November. In terms of equity-bond allocation, the fund commenced the year with an equity exposure of around 35%. However, by the end of Q1, this figure was reduced by approximately 10%, bringing it to about 25%. This adjustment was a result of our diversification algorithm's shift towards bonds, a move driven by the diminishing volatility and elevated yields in the bond market. In the third quarter, we further scaled back our equity exposure to roughly 20% by divesting from Japanese equities and listed real estate. Later in the year, equity exposure was slightly increased again.

### Performance in 2023

In 2023, the retail share of DPAM L Global Target Income rebounded impressively from a challenging 2022, achieving a return of 7.39% (Share B).

Equity investments played a crucial role in enhancing overall performance, contributing a significant 2.5% to the returns. This impressive result was largely attributed to the strong performance of Japanese equities and European dividend stocks, both registering double-digit annual returns, alongside the notable contribution of 1.1% from listed real estate stocks. In the realm of fixed income, a diverse mix of assets including nominal and inflation-linked government bonds, high-yield bonds, emerging market local debt, and a bond future overlay also showed positive momentum as the year concluded. Emerging market debt stood out in particular, delivering a substantial 2% to the portfolio. Additionally, high-yield and government bonds contributed positively, with 1.5% and 1.4% respectively. However, the portfolio's performance was slightly dampened by the bond futures overlay, which introduced a negative impact of 0.8%, primarily due to the short bond positions held within the portfolio.

### Future policy:

The strategy for 2024 will depend on the evolution of the volatilities and correlations between the underlying funds. In the current market environment, the volatilities and correlations are heavily influenced by the evolution of inflation and central bank interest rate policy. Presently, inflation is exhibiting a downward trajectory and is aligning closely with the targets set by central banks. These central banks have indicated a likelihood of reducing interest rates in 2024. The fund's increased duration exposure is strategically

# DPAM L

## Manager's Report

---

positioned to capitalize on the anticipated decrease in yields in 2024. This proactive approach aligns with market expectations and positions us well to benefit from the evolving interest rate environment.

### **DPAM L BALANCED CONSERVATIVE SUSTAINABLE**

Policy followed during the year:

On December 29, 2023, the net asset value of the DPAM L Balanced Conservative Sustainable fund (class F) stood at 30,612.29 euros, up +9.54% in 2023. The positive result was recorded mainly in the fourth quarter and is due to the strong performance of equities in the portfolio after a difficult 2022. Bond recovery and selection also helped.

2023 began with an immediate turnaround compared to 2022. Investors who were still running away from risk at the end of 2022 bought stocks and bonds in the first week of the year. European equities came out on top, as valuations looked attractive, the European economy revealed more and more positive surprises, and markets hoped for a strong economic impulse from China's post-Covid reopening. We decided to increase our equity weighting, targeting European equities, some 2022 losers, small caps and real estate.

Central banks continued to tighten their monetary policies in the first half of the year, and solid job market figures in the US pushed back hopes of an interest rate peak. This generated value in the rates market, and we decided to gradually expand the fund's defensive duration position to take advantage of it. We maintained this position throughout the year.

The positive momentum of the equity markets was reversed on March 10, when regulators shut down Silicon Valley Bank. Liquidity problems also affected Credit Suisse, which was hastily absorbed by UBS to avoid a run on the banks. We have decided to reduce our exposure to European banks and cyclical equities, and to shift part of our exposure to defensive and quality equities. We continue to extend the duration of the fund.

Sentiment improved over the summer, when the US surprised with favorable GDP figures. This American exceptionalism, combined with steadily falling inflation, helped to make the scenario of a soft landing for the US economy more credible. In Europe, the economic situation remained mixed. During the summer months, central banks maintained their wait-and-see stance. As a result, fixed-income markets priced in the "higher rates for longer" scenario, leading to a correction in both bond and equity markets between August and October. Given the prevailing gloom, we decided to take some profits on our equities. In the run-up to the third-quarter earnings announcement, we reduced our positions in cyclical stocks and added to our defensive holdings. We continued to add to our real estate positions, given the extraordinary discount to intrinsic values.

As interest rates rose in the third quarter, we continued to increase the fund's interest-rate sensitivity. After October's sharp correction, we decided to add to equities again in November, on the back of attractive valuations, persistent disinflation, moderate central bank statements, falling interest rates and investor wariness.

Future policy:

Leading indicators continue to point to a slowdown in the global economy in 2024. The US economy is holding up well so far, with solid third-quarter GDP and resilient PMIs. Labour markets remain tight but are beginning to moderate. The Fed can be expected to start cutting its key rate in 2024, but the timing and

# DPAM L

## Manager's Report

---

extent of the cuts remain difficult to predict. European economic activity remains moderate, and the risk of recession has yet to be ruled out. The trend towards disinflation continues, but base effects could well create headwinds from the second quarter of 2024 onwards. We remain cautiously optimistic on equities in the short term, but volatility will certainly rise again in 2024, whether as a result of a faster economic slowdown or a change in inflation dynamics. In fixed-rate markets, the focus is now on rate cuts, and the economic climate should remain buoyant for government bonds. Corporate bonds offer significant yield growth and attractive absolute return potential, while corporate fundamentals remain solid.

### **DPAM L BONDS CLIMATE TRENDS SUSTAINABLE**

Policy followed during the year:

At December 31, 2023, the net asset value of the DPAM L Bonds Climate Trends Sustainable fund (B share) stood at 92.73 EUR, representing an increase of +11.23% in 2023.

Financial markets experienced a strong year with both equity and fixed income markets recovering much of the lost ground in 2022. This turnaround was underpinned by unexpectedly robust growth, despite forecasters anticipating a mid-2023 recession. In the US, Real GDP (QoQ) growth exceeding 5% in Q3 was exceptional and overshadowed weaknesses in Europe, while the China re-opening trade failed to fully materialise.

Fiscal policy remained supportive over the course of the year, despite another year with increased polarisation and last-minute deals on debt ceilings and government shutdowns. Geopolitical tensions flared up with the military conflict in the Middle East and US-China relations as main sources of market concern. Oil failed to profit from conflict and OPEC+ supply cuts while gold shined within the commodity complex. The concept of “immaculate disinflation” was the main reason behind the exceptional performance of financial markets in the final two months of the year. The Fed’s endorsement of “future rate cuts” after a “higher for longer” narrative was the cherry on the 2023 cake.

Interest rate markets experienced a very volatile 2023 but ended the year only slightly higher than they started. German 10y rates even declined in 2023 despite the ECB raising interest rates to a record 4%. The mid-year sell-off was driven by continued hawkish central bank expectations, growth resilience despite inflation peaking, a US credit downgrade and worries about the willingness and ability of markets to absorb an ever-increasing US deficit. An intraday high of 5% in US 10y rates mid-October marked the beginning of a rotation, as the Fed started to endorse so-called insurance cuts to ensure a soft economic landing. This pivot in central bank rhetoric and a cyclical downturn in labour markets - validating the immaculate disinflation story - spurred on one of the most potent bursts of looser financial conditions. EUR IG markets also had a strong 2023, with the best total returns since 2014. The bulk of these 2023 gains were mainly generated during the final stretch of the year, as markets anticipated close to 150 basis points of ECB easing in 2024. Real estate led the performance, with financials outperforming non-financials despite US banking pressures. Going down in credit quality was a good call, as HY outperformed IG and BBBs outperformed As on a duration-adjusted basis.

Global equity bourses were spooked in March by banking and real estate stress in response to one of the fastest tightening cycles in decades to combat inflation. After the failure of SVB, substantial liquidity injections by the Fed prevented further havoc. In Europe, a government-backed take-over of Credit Suisse by UBS marked a trough in equity markets. No one could have predicted that the launch of GPT-4 by OpenAI

# DPAM L

## Manager's Report

---

would mark the start of a magnificent rally. Correlations between equity markets and interest rates markets were remarkably high throughout the second half of 2023.

FX markets showed meaningful swings over the course of the year in tandem with interest rates and risk sentiment, but EUR/USD was broadly flat over the entire year. CHF was the main performer due to its safe-haven status but unlike the USD, it did not experience domestic political instability. Despite the ending of its Yield Curve Control (YCC) policy, the BoJ failed to bolster the JPY, which fell nearly to 10% over 2023. Emerging markets showed strong performances in Latin-America due to high real interest rates, with Argentina as a notable exception.

We have started the year with an UW duration stance that has been transformed into a high conviction OW duration during the summer. Both EUR and US duration have been increased due to attractive real rates and prospects of a slowing economy. After the strong rally in Nov-Dec we have meaningfully trimmed this OW. Swap spreads have rallied in tandem with rates. Our preference for BBB EUR IG was a good choice. Within our sector allocation in EUR IG markets, we have benefitted from keeping and increasing our exposure to real estate bonds that have witnessed a horrific 2022. We have significantly reduced our HY exposure throughout the year. Our strong conviction on Irish, Spanish, and Italian banks was the main driver behind a very strong selection effect in this segment.

### Future policy:

We believe that a long duration bias remains warranted but need to adopt a more tactical approach given the uncertainty around the political events that are plentiful in 2024. Inflation will continue to decline, providing another boost to this positioning. Our preference for credit market exposure remains intact in EUR given attractive valuations and strong balance sheets across the board. We have low conviction in the USD to behave as a safe-haven currency during any potential downturn but expect a good run for emerging markets where central banks have the room to adjust policy and technical factors such as FDI and portfolio inflows could bolster returns going forward. We keep a strong focus on the climate agenda and net zero plans by both companies and governments.

### DPAM L BONDS GOVERNMENT SUSTAINABLE

DPAM L Bonds Government Sustainable aims to capitalise on the performance of developed markets government rates, based on a sustainable approach, through the construction of a balanced portfolio of debt securities issued by OECD governments and other related issuers. The investment is typically done in local currencies. The fund applies an SRI overlay via a best-in-class approach which ranks OECD member countries based on their efforts in terms of sustainability. Countries are ranked in a proprietary model aligned with the United Nations sustainable development goals. Effectively the fund invests only in the top half best ranked countries.

The DPAM L Bonds Government Sustainable returned 4.11% (F-share class) in 2023.

Interest rates were very volatile in 2023. The year was mainly characterised by three interrelated events: a mini banking crisis, a curve inversion and a curve steepening. The mini banking crisis initially caused interest rates to fall. However, as the initial panic subsided and the situation appeared less serious, the focus shifted back to persistent inflation and steady growth, causing rates to rise. When inflation surprised to the downside in the last quarter of 2023. The bear steepening was replaced by a bull steepening.

# DPAM L

## Manager's Report

---

Inflation remained elevated throughout 2023 and growth remained resilient. This led to central banks continuing to raise policy rates even after the mini banking crisis. In the final months of 2023 inflation decelerated further. To position for such an environment, we adjusted the portfolio by:

- Having a lower duration than the reference universe at the start of the year, and we reduced it further in April and May, but we started to increase our duration at the end of June and in the last quarter of 2023, when the 10-year US Treasury bond touched 5%. We ended the year with a duration of 7.18 years.
- Starting to enter into curve steepeners as the year progressed and we started to see some weakness in terms of economic data. This was mainly done via futures in Germany, as the United States is not eligible, but we also implemented curve steepening in USD and other markets by buying bonds at the short and medium end of the curve.
- Having a small allocation to Japan. In the first few quarters of the year, our lower exposure to Japan detracted from performance as rates continued to sell off, but this changed in the last quarter of the year as rates rallied aggressively.

The above helped the fund to achieve positive performance in 2023.

During 2023, we continued to invest in supranationals and agencies, as we believed that the spread was attractive and at the same time increased the rating of our fund and at the same time added some performance to the fund.

An important change in 2023 was that the fund was also able to invest in two new peripheral countries (Spain and Portugal). As we believed that Spanish spreads did not reflect their fundamentals (especially at the long end of the curve), we started to gradually add longer Spanish bonds to the portfolio. Another good source of performance in 2023 was our large allocation to Slovenia and our smaller duration allocation to Germany, as spreads on riskier assets tightened.

The fund has received some outflows during 2023 and closed the year around 80 million of assets under management. For 2024, we see central banks cutting more than what is priced in and at the same time curve steepeners are expected to deliver positive performance in 2024.

### **DPAM L EQUITIES EMERGING MARKETS ESG LEADERS INDEX**

Policy followed during the year:

At December 31, 2023, the net asset value of the DPAM L Equities Emerging Markets ESG Leaders Index fund (B share) stood at 80.50 EUR, representing an increase of +1,35% in 2023.

The sub-fund's benchmark is the MSCI EM ESG Leaders Net DTR index.

At year-end, the index comprised 487 positions. The index value can be consulted on the MSCI website, [www.msci.com](http://www.msci.com), under "MSCI Index Performance". The composition of its indices can be consulted on the MSCI website, [www.msci.com/constituents](http://www.msci.com/constituents).

The sub-fund is a tracker-type fund whose objective is to replicate the performance of the cap-weighted MSCI Emerging Markets ESG Leaders Net Dividends Reinvested index in Euros. MSCI's ESG Leaders methodology is a combination of sector exclusion and best-in-class selection.

At year-end, the investment universe comprised 24 countries: Brazil, Chile, China, Colombia, Czech Republic, Egypt, Greece, Hungary, India, Indonesia, Kuwait, Malaysia, Mexico, Philippines, Poland, Qatar, Saudi Arabia, South Africa, South Korea, Taiwan, Thailand, Turkey and United Arab Emirates.

# DPAM L

## Manager's Report

---

Over the course of the year, the sub-fund closely tracked the movement of the index.

### Future policy:

The investment policy based on geographic and sector indexation will be maintained. The benchmark index remains unchanged.

### DPAM L BONDS EUR SHORT TERM

### Policy followed during the year:

The net asset value of the capitalization B shares gained 3.73% over the year 2023.

Interest rate markets experienced a very volatile 2023 but ended the year only slightly higher than they started. German 10y rates even declined in 2023 despite the ECB raising interest rates to a record 4%. The mid-year sell-off was driven by continued hawkish central bank expectations, growth resilience despite inflation peaking, a US credit downgrade and worries about the willingness and ability of markets to absorb an ever-increasing US deficit. An intraday high of 5% in US 10y rates mid-October marked the beginning of a rotation, as the Fed started to endorse so-called insurance cuts to ensure a soft economic landing. This pivot in central bank rhetoric and a cyclical downturn in labour markets - validating the immaculate disinflation story - spurred on one of the most potent bursts of looser financial conditions. EUR IG markets also had a strong 2023, with the best total returns since 2014. The bulk of these 2023 gains were mainly generated during the final stretch of the year, as markets anticipated close to 150 basis points of ECB easing in 2024. Real estate led the performance, with financials outperforming non-financials despite US banking pressures. Going down in credit quality was a good call, as HY outperformed IG and BBBs outperformed as on a duration-adjusted basis.

We were able to protect the portfolio via a reduced interest rate risk profile, Average duration stayed between 1.5 and 1.8 on a portfolio level.

During the year we didn't have new issues that meet the conditions of the fund. We gave extra attention to diversification in terms of countries, sectors and ratings.

### Future policy:

Our preference for credit market exposure remains intact in EUR given attractive valuations and strong balance sheets across the board. Resilient earnings coupled with returning capital flows into the asset class on the back of appealing spread valuations should continue to provide a tailwind for credit returns in 2024. Current credit break-even spreads still provide high buffer against further weakness. Fundamentals remain solid and while surely margins and earnings will decrease over the next quarters, we are entering this downturn in a position of strength.

We still advocate that corporate bonds with strong balance sheets can go through this period of turbulence. Selectivity and credit selection are key here since that the recovery is likely to be uneven across and within sectors. Our internal credit analysis is essential and will remain the cornerstone of the investment process so that the fund can best withstand episodes of strong volatility.

## Manager's Report

---

### DPAM L BONDS EMU INVESTMENT GRADE GOVERNMENT INDEX

Policy followed during the year:

At December 31, 2023, the net asset value of the DPAM L Bonds EMU Investment Grade Government Index fund (B share) stood at 117.15 EUR, representing an increase of +6.52% in 2023.

Since the second quarter of 2023, we started observing certain red flags in economic data in Europe. From a positive standpoint, China exited its Covid lockdowns, energy prices dropped to almost pre-war levels, and inflation in general also started decreasing.

But still a specific part of the European economy was not rebounding. The manufacturing sector continued deteriorating although all stars were aligned for it to boom. This weakness in manufacturing was mainly driven by weak domestic demand. This first, logically, during the higher inflation regime since the Covid crisis. However, it even continued deteriorating going into the second quarter of the year. Up until then international demand for European goods was still positive, but over the summer, this also started dropping.

It is of course perfectly possible to have the European economy experiencing a manufacturing trough as long as the services sector makes up for this. This was the case, but August brought a new next red flag. Typically, the summer months are peak tourism season and hence we observe an extremely strong services sector. But in August, even the services sector fell into contractionary territory as indicated by PMI data. At that moment it becomes even more important to thoroughly monitor incoming data as a period of weak activity typically leads to a softening of the labor market. And this lays to biggest risk for the European economy. Once real economic activity consistently falls, the demand for labor will also fall. Consequently, a vicious circle of decreasing activity and increasing unemployment will start appearing. However, over September and October, interest rates continued decreasing.

But it has not only been soft data that has consistently deteriorated over the last quarters. When we look at hard economic data, the deterioration is also very clear and broad-based. When looking at bankruptcy data, real retail sales, European import and export data, labor market revisions, etc., they all point towards the possibility that this vicious circle has already started, and Europe is already in a recession. When taking a longer time frame, the only times these data were in this type of a downward trend, was when we were already in a recession. This time could be different, but it typically never is.

Conform with the investment policy, the compartment has as objective to replicate the JP Morgan EMU Investment Grade Government Bonds Index as close as possible in order to realize a performance that is comparable with that of the index. The daily operations to assure this consist out of maintaining the characteristics of the compartment (geographical allocation, duration, curve positioning) with the characteristics of the respective index.

Future policy:

In the end it is very easy to confirm the assertion whether Europe is in a recession and that's by looking at the definition of what a recession is. A recession constitutes two successive quarters of negative real GDP growth. When we assess this definition for all countries that are part of the European Union, already more than 25% is in recession! And if we look at those countries that experienced negative real GDP growth in the third quarter of the year, more than half of European countries experienced negative real GDP! Off course this does not mean that they will also fall in recession, but it is difficult to see a change in momentum given underlying activity data has forcefully continued deteriorating over the past months. To change this type of

# DPAM L

## Manager's Report

---

momentum there are not many solutions. One of them requires the ECB to start actively cutting interest rates. Unfortunately, it is clear that the ECB is not ready for this and is risking a severe policy mistake.

### DPAM L EQUITIES EUROPE BEHAVIORAL VALUE

Policy followed during the year:

At December 31, 2023, the net asset value of the DPAM L Equities Europe Behavioral Value fund (B share) stood at 54.62 EUR, representing an increase of +12.11% in 2023.

This year was much less favorable to value style than the previous one. The year was quite volatile as bond yields rose in the first half of the year on stickier inflation and rather hawkish central banks narrative. Though, markets finished the year on a very positive footing as inflation has finally peaked for the earnest and bond yields fell materially.

Over the year, value style matched the performance of the overall market. Defensive sectors underperformed (health care, staples, and utilities) while cyclicals shined. Information technology benefited from the AI frenzy while energy suffered from very weak oil price despite middle east geopolitical tensions. The style also suffered after the first quarter as AI and GLP1 frenzies provided very strong tailwind for technology and growth stocks in health care as well. The style also suffered from the falling bond yields as inflation has been steadily going down and the Fed has been slowly hinting for rate pivot in 2024. However, the last quarter of the year was favorable again to the value style as strong markets lifted performances of the lagging stocks.

This year, the valuation metrics used to screen the universe and select stock has been complemented by incorporating an estimation of intangibles into the book value of companies. We also noted material inflows into the fund within the first quarter of the year.

Over the course of 2023, the fund maintained a small overweight in the cheaply valued sectors like financials and energy so as into quality defensive like health care and utilities while also keeping an underweight in the more cyclically exposed such as consumer discretionary, information technologies, industrials, or materials. Exposure to real estate has been reinforced from mid-November as bond yields have been peaking amid expectation of Central Banks rate cut next year.

The overweight in health care and financials, and the underweight in technologies have been detracting performance over the year while stock selection in staples, consumer discretionary, financials, utilities helped the most. The selection in the industrials was the most detrimental, together with materials, and health care.

In the industrials, picks like CNH Industrials, Siemens Energy, or Valmet hurt the most while not being exposed to Rolls-Royce (+229%) or Schneider cost dearly. Siemens Energy lost dearly after unexpected heavy profit warning from its Spanish renewable energy entity. The stock has been sold since then. The fund also suffered from Teleperformance which were hit by bad governance news flows. In the materials, missing AirLiquide and investing into AngloAmerican was costly. Finally, missing GLP1 thematic and NovoNordisk in particular cost dearly but the stock cannot fit any cheap valuation definition.

On the positive side and in the staples, the fund benefited the most from the strong recovery of ABFoods and Danone and from avoiding tobacco stocks all together. Norwegian salmon producers recovered as government amended its resource taxation project. In the discretionary, British homebuilders Barratt

# DPAM L

## Manager's Report

---

Development, small appliance producer SeB, and jewelry maker Pandora were the most beneficial. The latter has been sold. Finally, in financials, UBS strongly recovered after taking over Credit Suisse and 3I Group gained more 62.5% while in portfolio. We took profit on both. In utilities, Centrica delivered the most while staying away from Orsted helped. We took profit on Centrica too.

### Future policy:

The value style should benefit from cheap relative valuation as well as relatively better earnings growth and momentum currently. We will continue to implement the behavioral value systematic strategy by replacing relatively more expensive stocks within sectors by cheaper ones, avoiding value trapped, more financially challenged stocks, as well as highly controversial companies in terms of ESG, paying even closer attention to the balance sheet quality and leverage elements as economic growth weakened. The fund should keep a diversified sector allocation and start the year with slight overweight in energy, utilities, and real estate as well as health care in the defensives. The year will also start with an underweight in more cyclically exposed sectors like consumer discretionary, industrials, materials, and the technologies while financials will be kept neutral.

### DPAM L BONDS CORPORATE EUR

#### Policy followed during the year:

The net asset value of the capitalization shares (B share) gained 7.79% during the year 2023.

Financial markets experienced a strong year with both equity and fixed income markets recovering much of the lost ground in 2022. This turnaround was underpinned by unexpectedly robust growth, despite forecasters anticipating a mid-2023 recession. In the US, Real GDP (QoQ) growth exceeding 5% in Q3 was exceptional and overshadowed weaknesses in Europe, while the China re-opening trade failed to fully materialise.

Fiscal policy remained supportive over the course of the year, despite another year with increased polarisation and last-minute deals on debt ceilings and government shutdowns. Geopolitical tensions flared up with the military conflict in the Middle East and US-China relations as main sources of market concern. Oil failed to profit from conflict and OPEC+ supply cuts while gold shined within the commodity complex. The concept of “immaculate disinflation” was the main reason behind the exceptional performance of financial markets in the final two months of the year. The Fed’s endorsement of “future rate cuts” after a “higher for longer” narrative was the cherry on the 2023 cake.

Interest rate markets experienced a very volatile 2023 but ended the year only slightly higher than they started. German 10y rates even declined in 2023 despite the ECB raising interest rates to a record 4%. The mid-year sell-off was driven by continued hawkish central bank expectations, growth resilience despite inflation peaking, a US credit downgrade and worries about the willingness and ability of markets to absorb an ever-increasing US deficit. An intraday high of 5% in US 10y rates mid-October marked the beginning of a rotation, as the Fed started to endorse so-called insurance cuts to ensure a soft economic landing. This pivot in central bank rhetoric and a cyclical downturn in labour markets - validating the immaculate disinflation story - spurred on one of the most potent bursts of looser financial conditions. EUR IG markets also had a strong 2023, with the best total returns since 2014. The bulk of these 2023 gains were mainly generated during the final stretch of the year, as markets anticipated close to 150 basis points of ECB easing in 2024. Real estate led the performance, with financials outperforming non-financials despite US banking pressures.

# DPAM L

## Manager's Report

---

Going down in credit quality was a good call, as HY outperformed IG and BBBs outperformed as on a duration-adjusted basis.

We have started the year with an UW duration stance that has been transformed into a high conviction OW duration during the summer. EUR duration have been increased due to attractive real rates and prospects of a slowing economy. After the strong rally in Nov-Dec we have reduced this OW. Swap spreads have rallied in tandem with rates. Our preference for BBB EUR IG was a good choice. Within our sector allocation in EUR IG markets, we have benefitted from keeping and increasing our exposure to real estate bonds (constructed around logistics and retail). that have witnessed a horrific 2022. Our strong conviction on Irish, Spanish, and Italian banks was the main driver behind a very strong selection effect in this segment.

Credit selection in hybrid capital has been a contributor, in both subordinated debt; non-financial and financial. Selection to names like Netflix or have been positive.

### Future policy:

We believe that a long duration bias remains warranted but need to adopt a more tactical approach given the uncertainty around the political events that are plentiful in 2024. Inflation will continue to decline, providing another boost to this positioning. Our preference for credit market exposure remains intact in EUR given attractive valuations and strong balance sheets across the board. Resilient earnings coupled with returning capital flows into the asset class on the back of appealing spread valuations should continue to provide a tailwind for credit returns in 2024. Current credit break-even spreads still provide high buffer against further weakness. Fundamentals remain solid and while surely margins and earnings will decrease over the next quarters, we are entering this downturn in a position of strength.

We still advocate that corporate bonds with strong balance sheets can go through this period of turbulence. Selectivity and credit selection are key here since that the recovery is likely to be uneven across and within sectors. Our internal credit analysis is essential and will remain the cornerstone of the investment process so that the fund can best withstand episodes of strong volatility.

## DPAM L EQUITIES EMERGING MSCI INDEX

Policy followed during the year:

The net asset value of the capitalization shares (B share) gained 5.02% during the year 2023.

The sub-fund's benchmark is the MSCI Emerging Markets Net DTR Index.

At year-end, the index comprised 1,440 positions. The index value can be consulted on the MSCI website, [www.msci.com](http://www.msci.com), under "MSCI Index Performance". MSCI requires a license from its clients to access the composition of its indices.

The sub-fund is a tracker-type fund whose objective is to replicate the performance of the cap-weighted MSCI Emerging Markets Net Dividends Reinvested Index in Euros.

At year-end, the investment universe comprised 24 countries: Brazil, Chile, China, Colombia, Czech Republic, Egypt, Greece, Hungary, India, Indonesia, Kuwait, Malaysia, Mexico, Peru, Philippines, Poland, Qatar, South Africa, Saudi Arabia, South Korea, Taiwan, Thailand, Turkey and the United Arab Emirates.

More than 400 "A-Shares" listed in Shanghai or Shenzhen have joined the index since 2018.

Over the course of the year, the sub-fund closely tracked the movement of the index.

Future policy:

The investment policy based on geographic and sector indexation will be maintained.

### DPAM L BONDS EUR INFLATION-LINKED

Policy followed during the year:

The net asset value of the capitalization shares (B share) gained 5.60% during the year 2023.

Since the second quarter of 2023, we started observing certain red flags in economic data in Europe. From a positive standpoint, China exited its Covid lockdowns, energy prices dropped to almost pre-war levels, and inflation in general also started decreasing.

But still a specific part of the European economy was not rebounding. The manufacturing sector continued deteriorating although all stars were aligned for it to boom. This weakness in manufacturing was mainly driven by weak domestic demand. This first, logically, during the higher inflation regime since the Covid crisis. However, it even continued deteriorating going into the second quarter of the year. Up until then international demand for European goods was still positive, but over the summer, this also started dropping.

Consequently, over the summer we decided to fully remove our underweight duration stance to a neutral level when the German 10Y Bund reached 2.5% and more importantly its real rate counterpart moved to 0.20%.

It is off course perfectly possible to have the European economy experiencing a manufacturing trough as long as the services sector makes up for this. This was the case, but August brought a new next red flag. Typically, the summer months are peak tourism season and hence we observe an extremely strong services sector. But in August, even the services sector fell into contractionary territory as indicated by PMI data. At that moment it becomes even more important to thoroughly monitor incoming data as a period of weak activity typically leads to a softening of the labor market. And their lays to biggest risk for the European economy. Once real economic activity consistently falls, the demand for labor will also fall. Consequently, a vicious circle of decreasing activity and increasing unemployment will start appearing. Consequently, we started building up a long duration stance as we believed the next market moves would be an interest rate rally. However, over September and October, interest rates continued decreasing. As this was not in line with the opposite movement of economic data, we continued adding duration up until the Bund reached 3% and its real rate counterpart 0.6%. By November, we reached an overweight of more than 1 year in the strategy.

But it has not only been soft data that has consistently deteriorated over the last quarters. When we look at hard economic data, the deterioration is also very clear and broad-based. When looking at bankruptcy data, real retail sales, European import and export data, labor market revisions, etc., they all point towards the possibility that this vicious circle has already started, and Europe is already in a recession. When taking a

# DPAM L

## Manager's Report

---

longer time frame, the only times these data were in this type of a downward trend, was when we were already in a recession. This time could be different, but it typically never is.

We believe an overweight stance on peripheral countries is still appropriate as since the Covid crisis they undertook significant fundamental changes. However, we have started building up an underweight stance on Italy. First as a hedge against the duration overweight, but now also as an outright short. This as typically a recession goes together with higher risk aversion, which is typically reflected through Italian spreads. During the summer we also started expected a strong decrease in inflation numbers over the coming months, especially driven by energy base effects. Consequently, we decided to build up a position in nominal bonds as we believed they would outperform inflation-linked bonds. This position was built up to an allocation above 5% in duration terms.

### Future policy:

In the end it is very easy to confirm the assertion whether Europe is in a recession and that's by looking at the definition of what a recession is. A recession constitutes two successive quarters of negative real GDP growth. When we assess this definition for all countries that are part of the European Union, already more than 25% is in recession! And if we look at those countries that experienced negative real GDP growth in the third quarter of the year, more than half of European countries experienced negative real GDP! Off course this does not mean that they will also fall in recession, but it is difficult to see a change in momentum given underlying activity data has forcefully continued deteriorating over the past months. To change this type of momentum there are not many solutions. One of them requires the ECB to start actively cutting interest rates. Unfortunately, it is clear that the ECB is not ready for this and is risking a severe policy mistake.

We believe a long duration bias remains very appropriate as once the ECB realizes we moved to the next phase of the economic cycle, they will move to the next phase of their monetary policy cycle. This also means that a curve steepening bias should play out very well as first the anticipation of cuts followed by actual decreases in the policy rate will affect the shorter end of yield curves much more than the longer end.

## DPAM L EQUITIES WORLD SRI MSCI INDEX

Policy followed during the year:

The net asset value of the capitalization shares (B share) gained 20.19% during the year 2023.

The sub-fund's benchmark is the MSCI WORLD AC SRI Net DTR index.

At year-end, the index comprised 612 positions. The index value can be consulted on the MSCI website, [www.msci.com](http://www.msci.com), under "MSCI Index Performance". The composition of its indices can be consulted on the MSCI website, [www.msci.com/constituents](http://www.msci.com/constituents).

The sub-fund is a tracker-type fund whose objective is to replicate the performance of the cap-weighted MSCI WORLD AC SRI Net Dividends Reinvested index in Euros. The SRI methodology developed by MSCI is a combination of sector exclusion and best-in-class selection.

At year-end, the index comprised securities from 42 developed and emerging countries.

Over the course of the year, the sub-fund closely followed the movements of the index.

The investment policy based on geographic and sector indexation will be maintained.

### DPAM L BONDS GOVERNMENT GLOBAL

DPAM L Bonds Government Global aims to capitalise on the performance of government bond markets. The strategy is benchmarked against the Bloomberg Global Developed Treasury GDP Weighted Total Return Index. The investment is typically done in local currencies, but the strategy is also available through hedged share classes which hedge the non-euro exposure into euro via FX forwards.

DPAM L Bonds Government Global returned 2.06% in 2023 (F share class) versus a benchmark return of 2.08%. The hedged strategy returned 4.17% compared to a hedged benchmark return of 3.78%.

Interest rates fluctuated significantly in 2023. The year was mainly characterised by three interrelated events: a mini banking crisis, a curve inversion, and a curve steepening. The mini banking crisis, initially caused interest rates to fall. However, as the initial panic subsided and the situation appeared less serious, the focus shifted back to persistent inflation and steady growth, causing rates to rise. When inflation surprised to the downside in the last quarter of 2023. The bear steepening was replaced by a bull steepening.

Inflation remained elevated throughout 2023 and growth also remained resilient. This led to central banks continuing to raise policy rates even after the mini banking crisis. In the final months of 2023 inflation decelerated further. To position for such an environment, we adjusted the portfolio by:

- Having a lower duration across the first, second and third quarter of the year, yet as time passed, and rates moved higher we started to add gradually duration. On the last quarter of 2023 and when the 10Y US treasury bond touched the 5% we started to add duration. We ended the year with an OW of duration of around 0.26 years.
- We started the year with a curve flattener trade, as central banks were still hiking rates. However, we started to enter into curve steepeners as the year progressed and we started to see some weakness in terms of economic data. We decreased somehow our position in inflation linked bonds more or less unchanged as the cost of inflation protection is still low.
- Increasing our duration exposure and market value to Romania, Chile, Mexico, and Indonesia, as spreads were wide, and we expected some compression during 2023 as growth remained resilient. These countries performed very well during 2023.

We started the year with a neutral position in the peripheral countries (small underweight in Portugal, underweight in Italy and overweight in Spain). However, during the year we started to increase our allocation to the periphery via Spain (ending the year with a more important overweight) as we felt that spreads were too wide and did not reflect the country's good fundamentals, especially at the long end of the curve.

In 2023, we remained underweight Japan, mainly due to the uncertainty surrounding the yield curve control framework. As interest rates rose in Japan, we reduced the underweight, . As the curve had become very steep, we added to the long end of the curve while remaining underweight the short and medium part of the curve. This actually had a negative impact on our performance as the curve continue steepen.

# DPAM L

## Manager's Report

---

The euro had a very strong year in terms of performance. However, this performance was very volatile, particularly against the dollar. The unhedged exposure underperformed the hedged strategy by 200 basis points in 2023, mainly due to the positions in the US dollar, Australian dollar and Japanese yen.

The fund experienced some outflows during 2023 and closed the year with assets under management around 250 million. For 2024, we see central banks cutting more than what is priced in and at the same time curve steepeners are expected to deliver positive performance in 2024.

### **DPAM L BONDS EMERGING MARKETS CORPORATE SUSTAINABLE**

Policy followed during the year:

After a 2022 marked by a sharp slowdown in the Chinese economy and widespread market volatility, 2023 saw a return to favour for corporate bonds, including those of emerging countries, and a tightening of credit spreads. Expectations of the end of the central bank tightening cycle and the presence of lower inflationary pressures (particularly in the last quarter of the year) led to a reduction in market rates, which was positive for bond valuations. In addition, the release of satisfactory corporate results and the relative stabilization of the Chinese real estate market and emerging economies led to a general tightening of credit spreads, which also accelerated the market rally at the end of the year.

The fund's strategy was cautious throughout the early part of the year, maintaining a high level of cash in the fund.

The fund (F-share) has recorded a return of 1.9% since its inception on January 18, 2023.

Future policy:

For 2024, we believe that the improving inflation outlook should push both the Fed and the ECB towards a phase of monetary easing, which should initially provide positive support for market valuations. Thereafter, the direction of the credit market will depend on the extent of the expected economic slowdown in the USA and Europe, and their influence on emerging economies.

### **DPAM L BONDS EMERGING MARKETS HARD CURRENCY SUSTAINABLE**

DPAM L Bonds Emerging Markets Hard Currency Sustainable was launched on 15 December.2022. The fund aims to capitalize on the robust long-term growth of emerging markets, based on a sustainable investment approach, through the construction of a balanced portfolio of debt securities issued by governments and state-owned enterprises (with exception of mining, oil& gas) denominated in hard currency (USD, EUR, GBP, JPY, CHF) and with a credit rating above B- (S&P and Fitch) or at least B3 (Moody's) or equivalent by another rating agency. The fund aims to deliver risk-adjusted returns above the hard currency emerging market sovereign debt universe. The fund applies an SRI overlay and excludes 'not free' or 'authoritarian' countries via confirmation from two separate external sources. Second, a best-in-class approach ranks emerging countries based on their efforts in terms of sustainability. Countries are ranked in a proprietary model on five sustainability dimensions, aligned with the United Nations sustainable development goals. The fund uses the same ESG ranking as the local currency emerging market sustainable fund.

# DPAM L

## Manager's Report

---

The DPAM L Bonds Emerging Markets Hard Currency Sustainable fund returned +8.46% (F-share class) in EUR terms in 2023. The fund generated some positive net new cash (around 500,000 Euros), the rest of the increase in AUMs came from market effect. The AUMs at the end of December are at 16.3 million Euros.

The fund has benefitted from its allocation (around 25% of the portfolio) to bonds in Euro as the currency has done well against the US Dollar while the sovereign hard currency debt universe is heavily skewed towards USD-denominated bonds. In terms of stock picking, the fund has benefitted from its allocation to the Bahamas, South Africa, Colombia, Mongolia, Romania, Dominican Republic, Papua New Guinea, and Serbia, all those were top convictions. The main detractors were Chile, Panama, Poland, and Armenia which were held notably for compliance with investment guidelines of having a minimum of 40% of the AUMs invested in the first quartile of Degroof Petercam Asset Management's ("DPAM") proprietary sustainability rankings.

The performance has been positive, in line with our expectations at the start of the year. Returns of fixed income assets have fared better in general in 2023 despite some elevated volatility levels in US Treasuries. 10y us yields spiked at 5% level in October, a level we had not seen since 2007. Despite this backdrop, the Emerging Market Debt asset class in hard currency has performed well, due to an elevated carry and a rally in US Treasuries in the last two months of the year. In this context, our strategy has been to keep a relatively low sensitivity to interest rates and a diversified credit risk allocation. The relative performance has been notably good, especially if we consider the fact the fund cannot invest in countries with credit ratings below B-, which is the part of the asset class which has performed the best.

We keep a positive stance for the asset class. Credit spreads are not especially cheap but in line with averages over the past decade. Yields are elevated and provide a boost to expected returns. We believe the global duration backdrop in a context of expected soft landing in the US is supportive for fixed income and for high beta assets like sovereign credit. We don't see the likely increase in bond supply to be a big drag on the performance because cash levels are high amongst investment funds and there has been a scarcity of supply over the past 2 years. In addition, there is a potential for inflows into the asset class once the volatility in core rates stabilizes, which is likely to happen as central banks from developed markets should embark on a rate-cutting cycle.

### **DPAM L BONDS EUR CORPORATE 2026**

Policy followed during the year:

The DPAM Bonds Corporate EUR 2026 invests in bonds of companies that have an investment grade. The bonds are exclusively denominated in EUR.

In the active management of the sub fund, the manager selects securities, with the potential for an advantageous return in relation to the risk incurred based on criteria that are both financial and related to sustainable development (such as, for example, respect for the environment or social equity or respect for corporate governance principle). No Benchmark index. The sub-fund is actively managed, which means that the portfolio manager does not aim to replicate the performance of an index. Interest rate sensitivity gradually diminishes as the maturity date approaches.

The Investment Process is mainly based on a bottom-up approach. Our credit research team adopts a fundamental and value approach to credit management. Our resources are geared towards identifying fundamentally sound credits, while avoiding low or deteriorating ones. The Fund invests in a diversified portfolio of Corporate bonds rated between AAA and BB (explicit or implicit), with a maximum weight of 10% of its assets under management in high yield rated bonds.

# DPAM L

## Manager's Report

---

We invested in some issuers which saw their credit metrics improve and also their rating being upgraded from high yield to investment grade, but also within investment grade (examples of those are Spie, Nokia, Ford, Elis, TVO, among others.)

At December 31, 2023, net assets amounted to 162,915,327.49 euros. The net asset value, capitalizing share (B Share), amounted to EUR 103.40.

### Future policy:

Our positive stance towards credit still stands with conviction. Our preference for credit market exposure remains intact in EUR given attractive valuations and strong balance sheets across the board.

Luxembourg, 13 February 2024

Limerick, 2024

### **DPAM L**

Glass Lewis Europe Limited: Report on the analysis and execution of the voting of securities held in the DPAM L SICAV.

The SICAV's Board of Directors has mandated its management company DPAM to organize the exercise of voting rights attached to the shares held in the SICAV's portfolio and to vote, in its own name and for its own account, at the general meetings of the companies in which the SICAV is a shareholder to the extent and in accordance with DPAM's Voting Policy ([https://res.cloudinary.com/degroof-petercam-asset-management/image/upload/v1614006838/DPAM\\_policy\\_voting.pdf](https://res.cloudinary.com/degroof-petercam-asset-management/image/upload/v1614006838/DPAM_policy_voting.pdf)).

To this end, as part of the mandate granted to Glass Lewis Europe Limited by DPAM, Glass Lewis Europe Limited has implemented a voting analysis and exercise service to assist DPAM in fulfilling its fiduciary responsibilities towards the SICAV.

An analysis of the resolutions flagging up points that were not in line with the Corporate Governance principles adopted by the SICAV, taking into account DPAM's Voting Policy, pointed out the anomalies and, thanks to our vote execution service, enabled DPAM's managers to take the measures they deemed necessary.

This analysis, recorded in a document available on our service, is based on the recognized standards and principles of each financial center concerned, as well as on the Corporate Governance structure expected of each issuer.

DPAM, thus mandated by the SICAV, has approved the majority of resolutions proposed at the various shareholders' meetings. A resolution is not approved if it is considered to run counter to the long-term interests of the shareholders, and therefore of the SICAV. This is the case when the Board of Directors of the issuing company attempts to set up capital defense structures, or when the interests of the issuing company do not appear to coincide with those of the shareholder.

Glass Lewis Europe Limited has opened a file relating to each of the General Meetings at which DPAM, thus mandated by the SICAV, exercised its voting rights on behalf of the SICAV during 2023.

Below are the statistics relating to voting rights exercised in 2023:

	Mgmt Proposals	SHP Proposals	Total Proposals
For	58	0	58
Against	1	0	1
Abstain	0	0	0
1 Year	0	0	0

<b>Totals</b>	<b>59</b>	<b>0</b>	<b>59</b>

	Mgmt Proposals	SHP Proposals	Total Proposals
With Management	58	0	58
Against Management	1	0	1
N/A	0	0	0
Mixed	0	0	0
Take No Action	0	0	0
Unvoted	0	0	0
<b>Totals</b>	<b>59</b>	<b>0</b>	<b>59</b>

N/A - this refers to any proposal for which no recommendation from the issuing company's officers has been provided and which therefore could not be listed as FOR or AGAINST the officers.

No action - The term "No action" refers to any meeting that has intentionally not been voted on, whether automatically placed in this state by the system due to previous DPAM instructions (for example, any ballots marked for share blocking), or manually placed in this state by an individual. This means that no voting instructions have been sent by the system.

Mixed - refers to cases where different voting decisions have been selected for different accounts/bulletins on the same agenda item at the same meeting.

1y - For the Frequency of Advisory Vote on Executive Compensation proposal, this item can appear on the voting card with the option to choose, 1 YEAR, 2 YEARS or 3 YEARS, rather than the usual FOR, AGAINST, ABSTAIN.

2y - For the Frequency of Advisory Vote on Executive Compensation proposal, this item can appear on the voting card with the option of choosing 1 AN, 2 ANS or 3 ANS, rather than the usual POUR, CONTRE, ABSTAIN ('FOR, AGAINST, ABSTAIN').

3y - For the proposal Frequency of Advisory Vote on Executive Compensation, this item can appear on the voting card with the option of choosing 1 YEAR, 2 YEARS or 3 YEARS, rather than the usual FOR, AGAINST, ABSTAIN.

Vice President of Operations

## **Audit report**

To the Shareholders of  
**DPAM L**

---

### **Our opinion**

In our opinion, the accompanying financial statements give a true and fair view of the financial position of DPAM L and of each of its sub-funds (the “Fund”) as at 31 December 2023, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

#### *What we have audited*

The Fund’s financial statements comprise:

- the combined statement of net assets for the Fund and the statement of net assets for each of the sub-funds as at 31 December 2023;
- the combined statement of operations and changes in net assets for the Fund and the statement of operations and changes in net assets for each of the sub-funds for the year then ended;
- the schedule of investments as at 31 December 2023; and
- the notes to the financial statements, which include a summary of significant accounting policies.

---

### **Basis for opinion**

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the “Commission de Surveillance du Secteur Financier” (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the “Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements” section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Ethics Standards Board for Accountants’ Code of Ethics for Professional Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

---

### **Other information**

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

---

**Responsibilities of the Board of Directors of the Fund for the financial statements**

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

---

**Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements**

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;
- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or situations cause the Fund or its sub-funds

(with the exception of DPAM L CONVERTIBLE WORLD SUSTAINABLE, DPAM L CONVERTIBLE EUROPE, DPAM L BONDS EUR SELECTION, and DPAM L BONDS GOVERNMENT SUSTAINABLE which are the subject of a decision or intention to liquidation) to cease operations;

- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

## Notes to the financial statements as at 31 December 2023

---

### NOTE 1 - ACCOUNTING PRINCIPLES AND METHODS

The SICAV's financial statements are prepared on a going concern basis in accordance with Luxembourg legal and regulatory requirements relating to Undertakings for Collective Investment, on the basis of official net asset values calculated at year-end.

#### a) Securities portfolio valuation and derivatives

1) The value of cash on hand or on deposit, bills and notes payable on sight and accounts receivable, prepaid expenses, dividends and interest declared or matured and not yet received shall be the nominal value of such assets, except where it is unlikely that such value can be received; in the latter case, the value shall be determined by deducting such amount as the SICAV considers appropriate to reflect the real value of such assets.

2) The value of all transferable securities, money market instruments and derivative financial instruments which are listed on an exchange or traded on any other regulated market, which operates on a regular basis, is recognised and open to the public shall be determined according to their last available price.

3) In cases where investments of the SICAV are listed on a stock exchange or traded on another regulated market, which operates on a regular basis, is recognised and open to the public and traded by market makers outside the stock exchange on which the investments are listed or the market on which they are traded, the Board of Directors may determine the principal market for the investments in question, which will then be valued at the last price available on that market.

4) The value of derivative instruments (futures and options) that are traded or listed on a stock exchange or organized market is determined on the basis of their last known settlement price on December 31, 2023 on the stock exchange or organized market on which the said instruments are traded, it being understood that if one of the aforementioned derivative instruments cannot be settled on the day taken into account to determine the applicable values, the value of this derivative instrument or these derivative instruments will be determined in a prudent and reasonable manner by the Board of Directors.

5) The market value of forward exchange contracts is based on the forward exchange rate of the underlying currency on the valuation day.

6) Derivative financial instruments that are not listed on an official stock exchange or traded on any other regulated market, which operates on a regular basis and is recognised and open to the public, will be valued in accordance with market practice, as further described in the Prospectus.

7) The value of the representative securities of any open-ended Collective Investment Scheme shall be determined according to the last official Net Asset Value per unit or according to the last estimated Net Asset Value if the latter is more recent than the official Net Asset Value, provided that the SICAV is satisfied that the valuation method used for this estimate is consistent with that used to calculate the official Net Asset Value.

8) To the extent that:

- the transferable securities, money market instruments and/or derivative financial instruments in the portfolio on the Valuation Day are not listed or traded on a stock exchange or other regulated market that operates regularly, is recognised and open to the public or,
- for transferable securities, time deposits, money market instruments, derivative financial instruments and/or securities representing Collective Investment Schemes listed and traded on an exchange or other market but for which the price determined in accordance with paragraphs 1) and 2) is not, in the opinion of the Board of Directors, representative of the real value of such transferable securities, time deposits, money market instruments, derivative financial instruments and/or securities representing Collective Investment Schemes the Board of Directors assesses the value with prudence and good faith.

# DPAM L

## Notes to the financial statements as at 31 December 2023

---

### b) Net realised gain or loss on investments

The net gains or loss realised on sales of securities are calculated based on the average cost of the securities sold.

The amounts of net realised gains or loss attributable to changes in exchange rates are recognised in "Net realised exchange gains or losses" at the time of the sale.

### c) Acquisition cost of the securities in the portfolio

For securities denominated in currencies other than the sub-fund's currency, the acquisition cost is calculated on the basis of the exchange rate in force on the day of purchase.

### d) Change in the net unrealised gain and loss

The change in the net unrealised gain or loss on investments at the end of the financial year is included in "Statement of operations and changes in net assets".

### e) Income, expenditure and related provisions

Interests on bonds and investments are recorded on a daily basis. Dividends are recorded on an ex-date basis. Interests and income are accounted net of non-recoverable withholding taxes.

When the SICAV incurs expenses relating to a particular Sub-Fund, these are allocated to that Sub-Fund. Expenses not attributable to a particular Sub-Fund are allocated among the various Sub-Funds on a pro rata basis of the net asset value of each Sub-Fund.

### f) Start-up costs

Formation expenses and reorganisation fees are amortized on a straight-line basis over a period of five years.

If a sub-fund is launched after the launch date of the SICAV, the formation expenses relating to the launch of the new sub-fund will be charged to that sub-fund alone and may be amortised over a maximum period of five years from the date of launch of that sub-fund.

### g) Change in the securities portfolio

The table of changes in the sub-funds' securities portfolio is available free of charge at the SICAV's registered office.

### h) Conversion of foreign currencies

The SICAV's accounts are kept in euro. Bank deposits, other net assets and the stock market value of securities in the portfolio in currencies other than the euro are converted into euro at the exchange rate valid on the closing date.

Revenue and expenditure in currencies other than the euro are translated into euros at the exchange rate in force on the date of payment.

### i) Combined financial statements

The combined financial statements of the SICAV are drawn up in EUR and are equal to the sum of the corresponding headings in the financial statements of each sub-fund.

# DPAM L

## Notes to the financial statements as at 31 December 2023

---

### j) Crossed Investments

Cross-investments between the Sub-Funds of the SICAV have not been subtracted from the combined statement of net assets. As at 31 December 2023, the total amount of cross-investments is EUR 30,879,471.36 and therefore the combined net assets without cross-investments is EUR 12,445,116,213.28.

### k) Purchases and sales of the securities in the portfolio

The details of the sales and purchases of securities in the portfolio can be obtained from the head office of the SICAV.

### l) Interest receivable on bonds

The unrealized gain/loss on future contracts including the margin calls are disclosed in the Statement of Net Asset.

The realized gain/loss on future contracts and the change in net unrealized appreciation/depreciation are disclosed in the Statement of Operation and Changes in Net Assets.

## NOTE 2 - EXCHANGE RATE

1 EUR =	0.92970 CHF
1 EUR =	1.10465 USD

## NOTE 3 - TAXES AND EXPENSES PAYABLE

Performance fee	518.10	EUR
Management fee	9,378,226.46	EUR
Depositary fees	765,719.70	EUR
Subscription tax	529,869.56	EUR
Miscellaneous fees	3,113,903.55	EUR
Total	13,788,237.37	EUR

## NOTE 4 - SUBSCRIPTION, REDEMPTION AND CONVERSION FEES

Shares in all sub-funds are issued at a subscription price consisting of the net asset value of a share plus an entry fee representing a certain percentage of the net asset value of a share, as described below:

These entry fees may be refunded in whole or in part to authorized intermediaries.

No commission is charged on redemptions or conversions to another sub-fund.

### *Commissions for classes that hedge exchange risk*

Each class hedging currency risk may incur additional costs for this currency hedging policy. Therefore, the Management Company and/or the delegated manager may receive from each relevant share class an additional fee as set out below:

Share class	Commission Maximum % per month
A CHF Hedged, A EUR Hedged, B CHF Hedged, B EUR Hedged, B USD Hedged, E CHF Hedged, E EUR Hedged, F CHF Hedged, F EUR Hedged, I EUR Hedged, J EUR Hedged, L EUR Hedged, M EUR Hedged, N EUR Hedged, P EUR Hedged, V CHF Hedged, V EUR Hedged, W CHF Hedged, W EUR Hedged	0.010
B BIS USD Hedged, F BIS USD Hedged, V BIS USD Hedged, W BIS USD Hedged	0.005

### PERFORMANCE FEES

For the following sub-funds: DPAM L Bonds EUR Short Term, DPAM L Equities Conviction Research and DPAM L Patrimonial Fund, the Manager is entitled to receive, out of the net assets of the relevant Share Class of the relevant Sub-fund, a performance fee (the "Performance Fee") calculated by comparing the performance of the Net Asset Value per Share (the "NAV") to that of the Benchmark (as defined below) over the same period of time, as well as to a High Water Mark ("HWM").

The performance reference period ("Performance Reference Period" or "PRP") is the period over which performance is measured and lasts 5 years on a rolling basis. At the end of this period, the compensation mechanism for past underperformance (or negative performance) can be reset.

The Performance Fee is calculated and accrued for each Share Class within a Sub-fund on each Valuation Day.

The Performance Fee is measured over a calculation period (hereinafter the "Calculation Period") corresponding to one financial year of the Fund.

The applicable Performance Fee rate is set at

DPAM L EUR Short Term	<b>20%</b> for all classes and the benchmark index used to calculate the Performance Fee is the 20% €STR composite (ticker: OISESTR Index) + 80% IBOX Euro Corporate 1-3 years (ticker: QW5C Index) (the " <b>Benchmark</b> ").
DPAM L Equities Conviction Research	<b>20%</b> for all classes and the benchmark index used to calculate the Performance Fee is the MSCI Europe Net Total Return denominated in EUR (ticker: MSDEE15N) (the " <b>Benchmark</b> ").
DPAM L Patrimonial Fund	<b>10%</b> for all classes and the benchmark index used to calculate the Performance Fee is the Euribor 3M (ticker: EUR003M) (the " <b>Benchmark</b> ").

# DPAM L

## Notes to the financial statements as at 31 December 2023

---

For each Calculation Period and for the purpose of calculating the Performance Fee, each year shall commence on the last Business Day of each Fund's financial year and end on the last Business Day of the following Fund's financial year. For any Share Class launched during a Calculation Period, the first Calculation Period will last at least 12 months and will end on the last Business Day of the following financial year of the Fund.

In case of underperformance, the Calculation Period lasts for a maximum of 5 financial years applied on a rolling basis.

Only at the end of a five-year overall underperforming PRP can losses be partially compensated, on a rolling annual basis, by cancelling the first year of performance of the current PRP for the Class. Within the PRP in question, losses in the first year can be offset by gains in subsequent years in that PRP.

For example, if the last crystallisation of performance fees took place on 31/12/2021, the PRP starts on 31/12/2021 and will end on 31/12/2026. On 01/01/2027, losses not compensated during the first year of the previous PRP (i.e. between 31/12/2021 and 31/12/2022) will no longer be taken into account, and a new PRP will start on 31/12/2022 and end on 31/12/2027.

When a Performance Fee is crystallised at the end of a Calculation Period, a new PRP starts. If a Performance Fee is crystallised on 31/12/2026, a new PRP will start on 31/12/2026 and end on 31/12/2031.

Each time a Calculation Period begins, the NAV and Benchmark to be taken into account for the calculation of the Performance in respect of that Calculation Period shall be based on the NAV and Benchmark of the last Business Day of the Fund's previous financial year.

The first year of the Calculation Period will begin (i):

- the last Business Day of the Fund's financial year, or
- on the launch date of each Share Class launched after the last Business Day of the Fund's financial year.

The Performance Fee is calculated on the basis of the outperformance of the NAV compared to the benchmark. It is calculated after deducting all expenses and fees (excluding any Performance Fee accrued but not yet paid) and including subscriptions (subject to the following), redemptions and dividend distributions during the relevant Calculation Period.

Notwithstanding the above, the Performance Fee is only payable if the performance of the NAV exceeds that of the Benchmark during the PRP. In this case, in order to determine the Performance Fee, the performance fee rate is applied to the difference between:

- (i) the last NAV per share calculated at the end of a Calculation Period, and
- (ii) the higher of the following two values:
  - o (ii.a) the previous NAV on which a Performance Fee has been crystallised as at the last Business Day of the Fund's financial year of the current PRP OR the initial NAV if no Performance Fee has ever been paid (only under the 1st PRP) (the "**HWM**"), or
  - o (ii.b) that same NAV but adjusted by the change in the Benchmark Index over the same Calculation Period.

The Performance Fee is accrued and calculated on each Valuation Day. Unless otherwise stated above and subject to the provisions of the paragraph below, the accrued performance fee is payable annually in arrears at the end of the Calculation Period.

The outperformance of the NAV compared to the Benchmark Index is determined by the difference between the performance of the relevant NAV and the Benchmark Index over the same period. The NAV performance

# DPAM L

## Notes to the financial statements as at 31 December 2023

---

is the change in the NAV between the relevant Valuation Day and the NAV at the end of the previous Calculation Period (which will be reduced by dividends paid to shareholders). The performance of the Benchmark Index is the change in the Benchmark Index over the same period as the NAV performance Calculation Period.

The Investment Manager will receive the Performance Fee at the end of the Calculation Period provided that the performance of the NAV of the relevant Share Class exceeds that of the Benchmark. The crystallisation frequency is annual and occurs on the last Business Day of the Fund's financial year.

In the event of a subscription, the calculation of the Performance Fee shall be adjusted in order to prevent the subscription from having an impact on the accrued amount of the Performance Fee. For the purpose of making this adjustment, the performance of the NAV against the Benchmark on the applicable Valuation Day on the subscription date shall not be taken into account in the calculation of the Performance Fee.

The amount of this adjustment is based on the product of the number of shares subscribed to and the difference between:

- the NAV of the last Business Day of the previous Calculation Period adjusted by the performance of the Benchmark over the same period, and
- the NAV of the Valuation Day applicable to the subscription.

This accrued adjustment amount is used in the calculation of the Performance Fee until the end of the relevant period and adjusted for subsequent redemptions during the period.

The Performance Fee Benchmark will be calculated in the currency of the Share Class for all Share Classes (regardless of the currency in which the relevant Share Class is denominated, and regardless of whether the relevant Share Class is hedged).

If a Shareholder redeems Shares prior to the end of a Calculation Period, any accrued but unpaid Performance Fee in respect of such redeemed Shares **will be definitively accrued and paid to the Investment Manager after the end of the Calculation Period.**

**In the event of a change in the Performance Fee Benchmark at any time during a Calculation Period**, such change will be reflected and taken into account in the calculation of the Performance Fee by ensuring continuity in the calculation by linking the previous performance between the Benchmark and the new Benchmark.

### **Substantial changes and termination of a Benchmark**

If the Performance Fee Benchmark is substantially changed or ceases to be provided, the Management Company, with the assistance of the Investment Manager, will take appropriate action in accordance with its procedure established under REGULATION (EU) 2016/1011 of 8 June 2016 on indices used as benchmarks for financial instruments and contracts or to measure the performance of investment funds. Any new Benchmark chosen to replace the existing Benchmark which is no longer provided or which has undergone substantial changes shall be an appropriate alternative.

**If a Share Class is closed before the end of a Calculation Period** (e.g. in the event of full redemption, merger, liquidation, transfer), **the Performance Fee** for that Calculation Period **shall be calculated and, if applicable, paid on such closing date** as if it marked the end of the relevant Calculation Period.

# DPAM L

## Notes to the financial statements as at 31 December 2023

If the Delegated Management Agreement with the Investment Manager entitled to a Performance Fee is terminated prior to the end of a Calculation Period, the Performance Fee for that Calculation Period will be calculated and, where applicable, paid on that termination date as if it were the end of the relevant Calculation Period.

**Example (based on a Performance Fee ("PF") rate of 10%) and an initial NAV of 100 at the beginning of the first year:**

Year	NAV before PF	Performance amount Annual NAV	Performance amount Annual index	Annual outperformance	Benchmark index ("Index"):				Performance vs HWM	Final net outperformance	PF	PF payment for the Year	NAV after PF	HWM
					Amount to be carried forward	Adjustment of compensated loss in A-5	Amount to be made up after compensation	Net outperformance vs Index						
1	110.0	10.00	5.00	5.00				5.00	10.00	5.00	1.00	YES	109.00	100.00
2	101.0	-8.00	1.00	-9.00	0.00		0.00	-9.00	-8.00	-9.00	0.00	NO	101.00	109.00

4	106.0	1.00	2.00	-1.00	-4.00		-4.00	-5.00	-3.00	-5.00	0.00	NO	106.00	109.00
5	105.0	-1.00	-3.00	2.00	-5.00		-5.00	-3.00	-4.00	-4.00	0.00	NO	105.00	109.00
6	103.0	-2.00	-1.00	-1.00	-3.00		-3.00	-4.00	-6.00	-6.00	0.00	NO	103.00	109.00
7	108.0	5.00	2.00	3.00	-4.00	2.00	-2.00	1.00	2.00	1.00	0.20	YES	107.80	106.00
8	108.8	1.00	-4.00	5.00	0.00		0.00	5.00	1.00	1.00	0.20	YES	108.60	107.80
9	106.6	-2.00	-3.00	1.00	0.00		0.00	1.00	-2.00	-2.00	0.00	NO	106.60	108.60

**Year 1:** The amount of the annual performance (10) of the NAV per share before PF is higher than the amount of the annual performance of the Index (5). In addition, the NAV before PF (110) is higher than the High Water Mark ("HWM" (100)) by an amount equal to 10. The excess performance of 5 generates a PF equal to EUR 1. The next HWM is set at 109.

**Year 2:** The NAV per share decreases by -8, while the annual performance of the Index is 1. This generates an underperformance of -9 for the year. The net outperformance since the end of year 1 is -9. In addition, the NAV before PF (101) is lower than the HWM (109). No performance fee is calculated.

**Year 3:** The NAV per share increases by 4, while the annual performance of the Index is -1. This generates an outperformance of 5 for the year. The net outperformance since the end of year 1 is -4. In addition, the NAV before PF (105) is lower than the HWM (109). No performance fee is calculated.

**Year 4:** The NAV per share increases by 1, while the annual performance of the Index is 2. This generates an underperformance of -1 for the year. The net outperformance since the end of year 1 is -5. In addition, the NAV before PF (106) is lower than the HWM (109). No performance fee is calculated.

**Year 5:** The NAV per share decreases by -1, while the annual performance of the Index is -3. This generates an outperformance of 2 for the year. The net outperformance since the end of year 1 is -3. In addition, the NAV before PF (105) is lower than the HWM (109). No performance fee is calculated.

**Year 6:** The NAV per share decreases by -2, while the annual performance of the Index is -1. This generates an underperformance of -1 for the year. The net outperformance since the end of year 1 is -4. In addition, the NAV before PF (103) is lower than the HWM (109). No performance fee is calculated.

As the NAV has underperformed the Index for 5 consecutive years, the losses in year 2 of -9, corrected by the subsequent gains in year 3 (5) and year 5 (2), for a total of -2, are no longer to be taken into account when calculating performance from the beginning of year 7. In parallel, the HWM is adjusted, the losses in year 2 of -8, adjusted by the subsequent gains in year 3 (4) and year 4 (1), for a total of -3, are no longer to be taken into account in the performance calculation from the beginning of year 7. The next HWM is 106.

**Year 7:** The NAV per share increases by 5, while the annual performance of the Index is 2. This generates an outperformance of 3 for the year and offsets the remaining losses from the previous year of -2. The net outperformance is 1. In addition, the NAV before PF (108) is higher than the newly adjusted HWM (106) by an amount equal to 2. The final outperformance is 1 and generates a performance fee of 0.20. The next HWM is set at 107.80.

# DPAM L

## Notes to the financial statements as at 31 December 2023

**Year 8:** The NAV per share increases by 1, while the annual performance of the Index is -4. This generates an outperformance of 5 compared to the Index. However, the NAV per share exceeds the HWM by only 1. Therefore, the PF is calculated on the performance against the HWM and corresponds to 0.20. The next HWM is set at 108.60.

**Year 9:** the NAV per share decreases by -2, while the annual performance amount of the Index is -3, generating an outperformance of 1. However, the NAV per share before PF (106.60) is below the HWM of 108.60. No performance fee is calculated.

Sub-Fund	ISIN	Share class	Amount of performance fees 2023 (EUR)	NAV 31/12/23	NVA Impact 31/12/23
DPAM L PATRIMONIAL FUND	LU0966595638	W	518.10	119,311.23	0.43%

No performance fees were charged in 2023 for the DPAM L Bonds EUR Short Term and DPAM L Equities Conviction Research sub-funds.

### NOTE 6 - DEPOSITARY FEES

As compensation for its depositary services for the SICAV, the Depositary shall receive an annual flat-rate fee of at a minimum rate of 0.025% p.a. (+ VAT if applicable), chargeable to each Sub-Fund, excluding trading fees and corresponding charges.

This fee is payable on a quarterly basis and calculated based on average net assets in each of the Sub-Funds during the quarter under review.

### NOTE 7 - SUBSCRIPTION TAX

The SICAV is governed by Luxembourg law.

Pursuant to the legislation and regulations in force, the SICAV is subject to an annual subscription tax ("taxe d'abonnement") of 0.05% which is payable quarterly and calculated on the basis of the net assets of each Sub-Fund on the last day of each quarter.

However, for the relevant Sub-Funds, a reduced rate of 0.01% is applied to classes of shares reserved for institutional investors.

Pursuant to Article 175(a) of the law of 17 December 2010, the net assets invested in Undertakings for Collective Investment already subject to the "taxe d'abonnement" are exempt from this tax.

### NOTE 8 - BELGIAN ANNUAL TAX

A subscription tax is payable annually by foreign funds distributed in Belgium and the taxable base is the net amounts invested in Belgium. The rate of this tax is 0.0925%.

The Fund is obliged to pay this tax by 31 March each year.

For many years, the Fund has applied to the Belgian tax authorities for recovery of the tax in order to preserve the Fund's rights, and therefore the interest of the shareholders, to benefit from a refund of the Belgian tax levied. A potential tax refund depends on the end of the legal proceedings and trials which are still ongoing.

# DPAM L

## Notes to the financial statements as at 31 December 2023

### NOTE 9 - ADMINISTRATION AND DOMICILIATION FEES

In return for its services as central agent and domiciliary agent for the SICAV, the Management Company will receive, at the expense of each sub-fund of the SICAV, an annual fee at a maximum rate of 0.045% p.a. (+ VAT if applicable).

Compensation is payable on a quarterly basis and calculated based on average net assets in each of the sub-funds during the quarter under review.

The Management Company will also receive an annual flat-rate fee of EUR 2,000 (+ VAT if applicable) per active share class in the Sub-Fund concerned chargeable to each SICAV sub-fund, distributed among all the active share classes of the Sub-Fund concerned in proportion to the assets of each share class concerned.

### NOTE 10 - TRANSACTIONS WITH RELATED PARTS

Certain sub-fund of the SICAV proceeded during the period to purchases/sales of securities with related parts, acting as counterparty or as intermediary in the transactions.

According to the article 46. (3) Of the law modified of December 2010 an UCITS which invests an important part of its assets in others UCITS and/or other OPC has to indicate in its annual report the maximal percentage of the management fees supported both at the level of the UCITS as in that of UCITS and/or other OPC in which it invests. No sub-fund is expected to hold significant positions in funds.

There is no performance fee on target funds.

### NOTE 11 - TRANSACTION FEES

In order to achieve its investment objective, a Fund will incur transactions costs in relation to trading activity on its portfolio. Disclosed in the table below are separately identifiable transactions costs incurred by each sub-fund for the year ended. These include commission costs, settlement fees and broker fees. Not all transaction costs are separately identifiable. For fixed income investments, forward currency contracts and other derivative contracts, transaction costs are included in the purchase and sales price of the investment. Whilst not separately identifiable these transaction costs are captured within the performance of each sub-fund. Market impact costs are not separately identifiable and are therefore also not disclose in the below table.

Sub-Fund	Currency	Transaction fees

### NOTE 12 - OTHER INCOME

Other income mainly comprises management fee retrocessions applied by the target funds in which the sub-fund invests.

### NOTE 13 - TRANSACTIONS FEES

Miscellaneous Fees mainly comprise audit fees, publication fees, translations fees, directors' fees, bank commissions, preparation of reports for the CSSF (SAQ), etc...

### NOTE 14 - "SWING PRICING"

Swing pricing is a mechanism that allows the various sub-funds of the SICAV to settle the transaction fees arising from the subscriptions and redemptions of entering and exiting investors. With swing pricing, existing investors should, in principle, no longer indirectly incur the transaction fees, which will now be directly integrated into calculation of the NAV and borne by the entering and exiting investors.

The mechanism is applied at sub-fund level to all share classes and is not intended to address the specific requirements of individual investors.

The sub-funds apply partial swing pricing, which means that the NAV will be adjusted only when a given threshold value is reached. The Board of Directors determines a threshold value as the trigger event for net subscriptions and redemptions. This threshold value is defined per sub-fund and expressed as a percentage of the total net assets of the sub-fund in question.

In swing pricing, the NAV is adjusted to reflect the net transaction fees on each NAV calculation if this threshold value is exceeded.

# DPAM L

## Notes to the financial statements as at 31 December 2023

---

The direction of the swing depends on the net flow of capital applicable to a NAV. In the case of a net inflow of capital, the swing factor linked to subscriptions of shares in the sub-fund will be added to the NAV. For net redemptions, the swing factor linked to redemptions of shares in the sub-fund in question will be deducted from the NAV. In both cases, all entering/exiting investors on a given date will have the same NAV applied.

The swing factors with which the NAV is adjusted are calculated on the basis of external brokerage charges, taxes and duties and estimated variances between the buy and sell prices of the transactions that the sub-fund carries out following share subscriptions and redemptions.

A performance fee, if any, will be applied on the basis of the non-swing NAV.

The swing factor value will be determined by the Board of Directors and may vary from one sub-fund to the next without, however, exceeding 3% of the unadjusted NAV.

For the current financial year, swing pricing was applied to the net asset values of

DPAM L Bonds EUR Selection

DPAM L Bonds EUR Inflation Linked

DPAM L Bonds Higher Yield

DPAM L Bonds EUR Corporate High Yield

DPAM L Bonds Government Sustainable

DPAM L Bonds EUR Corporate 2026

No swing factor was applied to the net asset values at the end of this financial year for all the SICAV's Sub-Funds.

### NOTE 15 - INDEX TRACKING

#### Emerging ESG Leaders Index

The performance of the DPAM L Equities Emerging ESG Leaders Index sub-fund was 1.69% (class F) and 1.35% (class B) for the period 1 January 2023 to 31 December 2023.

For the same period, the benchmark MSCI Emerging ESG Leaders index net total return in euros rose by 2.26%. This difference is explained by the sub-fund's TER.

#### Emerging MSCI Index

The performance of the DPAM L Equities Emerging MSCI Index sub-fund was 5.40% (class F) and 5.02% (class B) for the period 1 January 2023 to 31 December 2023.

For the same period, the benchmark MSCI Emerging index net total return in euros rose by 6.11%. This difference is explained by the sub-fund's TER.

#### World SRI MSCI Index

The performance of the DPAM L Equities WORLD SRI MSCI sub-fund was 20.74% (class F) and 20.20% (class B) over the period from 1 January 2023 to 31 December 2023.

Over the same period, the benchmark MSCI ACWI SRI index net total return in euros rose by 21.32%. This difference is explained by the sub-fund's TER.

#### US SRI MSCI Index

The performance of the DPAM L Equities US SRI MSCI sub-fund was 27.73% (class F) and 27.26% (class B) over the period from 1 January 2023 to 31 December 2023.

For the same period, the benchmark MSCI USA SRI index net total return in euros rose by 28.29%. This difference is explained by the sub-fund's TER.

# DPAM L

## Notes to the financial statements as at 31 December 2023

### EMU SRI MSCI Index

The performance of the DPAM L Equities EMU SRI MSCI sub-fund was 18.87% (class B) and 16.95% (class A) over the period from 1 January 2023 to 31 December 2023.

For the same period, the benchmark MSCI EMU SRI index net total return in euros rose by 19.70%. This difference is explained by the sub-fund's TER.

### NOTE 16 - DIVIDENDS

The General shareholders' meeting of 12 April 2023 approved the payment of a dividend for the exercise 2022. Shares were quoted ex-dividend since 22 May 2023. The payment was made on 26 May 2023.

## Notes to the financial statements as at 31 December 2023

---

### NOTE 19 - EVENTS DURING THE YEAR

The DPAM L BONDS EMERGING MARKETS CORPORATE SUSTAINABLE sub-fund was launched on 18 January 2023.

The Board of Directors has decided to liquidate the DPAM L CONVERTIBLE EUROPE (Cash amount remaining as at 31 December 2023: EUR 17.98) and DPAM L CONVERTIBLE WORLD SUSTAINABLE (Cash amount remaining as at 31 December 2023: EUR 18,802.82) sub-funds at the net asset value dated 3 February 2023 (calculated on 6 February 2023).

The Board of Directors has decided to liquidate the DPAM L BONDS EUR SELECTION (Cash amount remaining as at 31 December 2023: EUR 12,664.73) sub-fund at the net asset value dated 29 September 2023.

#### Impact of the Russian invasion in Ukraine.

The war launched by Russia on Ukraine in February 2022 continues with no prospect of a rapid resolution. The two nations in conflict are forced to seek military support from other countries, which poses a heightened geopolitical risk with the creation of blocs between those who support the aggressor or the aggressed. A flare-up of the conflict cannot be ruled out either.

Investors must continue to take into account the negative economic consequences of a stalemate in this war when making investment choices.

Although energy prices have fallen since the start of the conflict, the European economy remains fragile due to its overdependence on oil and gas. Further rises in commodity prices cannot therefore be ruled out, with the attendant risk of further pressure on inflation and interest rates.

Central banks raised interest rates sharply in 2023 to combat the risk of inflation. While monetary tightening is all but complete, investors must continue to assess the risk that rates may not be cut as quickly as the markets had hoped, should a resurgence of inflation occur. This would clearly be a risk for financial markets as a whole.

Russia has isolated itself from Western economies. The negative effects of economic sanctions on Russia are not being felt as expected by Western economies. In fact, Russian oil exports have been redirected towards China and India, which are taking advantage of the situation to obtain oil at reduced prices.

It is virtually impossible for Russia to regain its former position in equity or bond indices in the coming year. This war will leave its mark for a long time to come, but it remains impossible to predict a short- or medium-term scenario. The informed investor will take all these uncertainties into account when considering his investments.

Due to the current market situation and the halt in trading, in agreement with the Management Company, the Board of Directors has decided to value the Russian shares at 0.00001 for prudential purposes.

This decision took effect on 9 March 2022, at the time of the NAV calculation, until accurate information is available to assess the residual value of these shares.

## Notes to the financial statements as at 31 December 2023

---

### NOTE 20 - SUBSEQUENT EVENT(S) TO THE YEAR

Mr Frank Van Eylen has been co-opted as a member of the Board of Directors to replace Mrs France Colas, who has resigned, and has been appointed Chairman of the Board of Directors of the SICAV with effect from January 15, 2024.

The DPAM L BONDS GOVERNMENT SUSTAINABLE sub-fund (absorbed sub-fund) has been merged into the DPAM L BONDS GOVERNMENT SUSTAINABLE HEDGED sub-fund (absorbing sub-fund) on January 31, 2024 at an exchange ratio of 1:1.

This merger is motivated by a rationalization of the SICAV's sub-funds and the range offered to investors.

In addition, it will enable investors to switch within the same sub-fund from a hedged strategy to an unhedged strategy (or vice versa) without the Investment Manager having to buy and sell portfolio securities in both sub-funds. In a structure merged with "standard" and "hedged" share classes, conversion from a non-hedged share class to a hedged share class (or vice versa) will entail only an adjustment of the forward exchange contracts of the hedged share classes, thereby reducing transaction costs.

# DPAM L

## Additional information (unaudited) as at 31 December 2023

---

### OVERALL RISK ASSESSMENT

Each sub-fund of the SICAV must ensure that its overall exposure to financial derivative instruments does not exceed its total net assets.

Overall exposure is a measurement designed to limit the leverage generated for each subfund by using derivatives. The method used to calculate overall exposure for each Sub-Fund of the SICAV is the 'commitment method'. The commitment method entails converting positions on derivatives into equivalent positions on underlying assets and then aggregating the market value of these equivalent positions.

### Remuneration policies Degroof Petercam Asset Services

#### 1) General

Degroof Petercam Asset Services S.A. ("DPAS") has implemented a Remuneration Policy that is designed as not to encourage taking excessive risks. In that context, it integrates in its performance management system, risk criteria specific to the activities of the business units concerned. DPAS has implemented a series of safeguards that refrain staff from taking undue risk compared to the activity profile.

The governance structure of the Remuneration Policy ("the Policy") aims at preventing internal conflicts of interest. The Policy is formulated by the Remuneration Policy and approved by the Management Board. The Policy follows a defined process establishing the principles, the approval, the communication, the implementation, the review and the update of the Policy involving the Management Board, Human Resources, Internal Audit and other control functions.

Performance is assessed at Group and DPAS level. Individual staff assessments are based on a weighting of financial and non-financial targets linked to the specific job scope and role. As such, the principle of individual performance assessment is based on an assessment of objectives reached as well as an appreciation of the employee's long-term value creation. Furthermore, the performance reflects an assessment of business and interpersonal skills and is linked to the achievement of the individual. The criteria applied to establish fixed remuneration are job complexity, level of responsibility, performance and local market conditions.

#### 2) Methodology

DPAS is dual-licenced as a chapter 15 Management Company under the law of 17 December 2010 relating to Undertakings for Collective Investment in Transferable Securities, and as an AIFM under law of 12 July 2013 on Alternative Investment Fund Managers.

In line with those regulations, the responsibilities of DPAS in its two roles are very similar. DPAS considers a fair assumption to state that its staff is remunerated similarly for tasks related to Undertakings for Collective Investment in Transferable Securities ("UCITS") and Alternative Investment Funds ("AIF").

As a consequence, the remuneration, as previously mentioned, is the ratio between the assets under management ("AUM") of all the UCITS under the responsibility of DPAS and the total AUM plus the Assets Under Administration ("AUA"). On the basis of the AUM and ASA calculated on 31 December 2023, this ratio amounts to 55.90%.

As of 31 December 2023, DPAS is Management Company for a total AuM of 27.915 billion EUR for the UCITS.

# DPAM L

In order to assess the proportion of the remuneration of the management company's staff attributable to all the UCITS managed, the above-mentioned ratio must be applied to the annual remuneration of the staff concerned.

In order to assess the proportion of the remuneration of the management company's staff attributable to this UCITS only, the ratio resulting from the ratio between the AUM of this UCITS and the total AUM of all UCITS must be applied to the annual remuneration of the staff concerned.

## 3) Allocated remuneration by category of staff

The table below represents the allocation of total remuneration of the employees of the Management Company based on the AuM of all UCITS, by category of staff:

Type of staff	Number of beneficiaries (*)	Total remuneration (in EUR)	Fixed remuneration paid (in EUR)	Variable remuneration paid (in EUR)
Senior Management (**)	4	710,190	558,185	152,004
Identified staff (***)	2	207,399	177,720	29,679
Other staff	129	5,514,500	5,101,123	413,377
	<b>135</b>	<b>6,432,089</b>	<b>5,837,028</b>	<b>595,060</b>

(\*) No proportionality applied

(\*\*) Management Board

(\*\*\*) Identified staff not already reported in Senior Management

All figures refer to the 2023 calendar year.

## 4) Carried Interest paid by the UCITS

No employee of the Management Company receives Carried Interest paid by any UCITS.

## Directors' remuneration

The remuneration of the Directors for the current financial year amounts to a total of EUR 52,800.

## Transparency of securities financing transactions and reuse:

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365 (hereinafter the "Regulation"), the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual and semi-annual reports.

The portfolio does not contain any assets on loan as of the date of this report.

## Periodic information (unaudited) for the financial products referred to in Article 8(1), (2) and (2a) of Regulation (EU) 2019/2088 and the first paragraph of Article 6 of Regulation (EU) 2020/852

### Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

#### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes		<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No	
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: ____%</b>	<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <b>61.13%</b> of sustainable investments	<input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with a social objective	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make sustainable investments</b>
<input type="checkbox"/> It made <b>sustainable investments with a social objective: ____%</b>			

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices and best efforts.

During the Reference Period, derivative products, if any, used for the purpose of achieving the investment objectives of the sub-fund were not used for the purpose of promoting environmental and/or social characteristics.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

#### ● How did the sustainability indicators perform?

During the Reference Period, the Sub-fund achieved the following sustainability indicators:

- For investments in equities or corporate bonds:
  - The Sub-fund has not been exposed to companies considered to be non-compliant with Global Standards;

b. the Sub-fund had no exposure to issuers involved in controversial activities according to the definitions and thresholds stipulated by the Manager's Controversial Activities Policy (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>) (Controversial Activities Policy);

c. the Sub-fund has no exposure to companies facing ESG controversies of maximum severity on environmental or social issues;

d. the Sub-fund has a greenhouse gas emissions intensity of the investee companies of the Sub-fund below the average greenhouse gas emissions intensity of the investment universe prior to the application of the ESG and sustainable investment selection methodology: 1077.74 tCO<sub>2</sub>e/\$ mn revenues (funds) versus 1014.64 tCO<sub>2</sub>e/\$ mn revenues (benchmark) (at 31/12/2023).

e. the Sub-fund has a better ESG profile than that of its investment universe, prior to the application of the ESG and sustainable investment selection methodology, distinguishing between companies and governments: 61.40 (funds) versus 59.55 (benchmark) (31/12/2023).

2. For investments in sovereign bonds:

a. the Sub-fund has not been exposed to issuers that do not meet minimum democratic requirements.

b. the Sub-fund invested in sovereign bonds taking into account the analysis and rating of the country's sustainability profile using the proprietary model defined by the Manager through its country sustainability advisory board:

#### ● ...and compared to previous periods?

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
E/S characteristics	96.49%	99.52%
Sustainable Investment	58.15%	61.13%
Other Environmental Investments	36.22%	43.68%
Social	51.69%	14.67%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure
Sustainability indicator d.	Sub-fund: 703.43 Benchmark: 944.72	Sub-fund: 1077.74 Benchmark: 1014.64
Sustainability indicator e.	Sub-fund: 60.29 Benchmark: 57.95	Sub-fund: 61.40 Benchmark: 59.55

#### ● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

For the Reference Period, the Sub-fund sought to include sustainable investments, i.e. investments aimed at:

- 1) The most advanced issuers in terms of sustainability and commitment to environmental, social and governance risks, as measured by:
  - a better ESG profile than that of its investment universe, prior to the application of the ESG and sustainable investment selection methodology, over a rolling three-year period, distinguishing between companies and governments.
  - a greenhouse gas emissions intensity of the portfolio below the average greenhouse gas emissions intensity of the investment universe prior to the application of the ESG and sustainable investment selection methodology, over a rolling three-year period;

- a better weighted average ESG profile than its reference universe (composite index) prior to the application of the sustainable investment selection methodology, over a rolling three-year period;
- 2) Issuers whose main activity is the development of products and services that contribute to the achievement of the 17 environmental or social Sustainable Development Goals (“SDGs”), as defined by the United Nations (UN) (e.g. health products and services, education-related services, water saving and access solutions, energy efficiency solutions, digitalisation-enabling services, sustainable mobility services, etc.) via:
  - a minimum of 20% of companies aligned with the EU Taxonomy or making a net positive contribution\* to all sustainable development goals (SDGs).

It also sought to help companies make progress in their contribution to sustainable development and ESG issues, by engaging in regular dialogue and sharing with them specific areas for improvement that are monitored over time.

Among these environmental sustainability objectives, the Sub-fund pursued objectives that contribute to climate change mitigation and adaptation, as set out in Article 9 of Regulation (EU) 2020/852 of 18 June 2020 on the establishment of a framework to promote sustainable investment (“the EU Taxonomy”).

For the Reference Period, the Sub-fund had 61.13% sustainable investments. These sustainable investments have contributed to the Sub-fund’s partial sustainable investment objective in the following ways:

- 2.78% of the Sub-fund’s portfolio contributed to the achievement of the environmental objectives defined by the EU Taxonomy (climate change mitigation and adaptation);
- 43.68% of the Sub-fund's portfolio contributed to the achievement of environmental objectives not aligned with the EU Taxonomy.
- 14.67% of the Sub-fund's portfolio contributed to the achievement of social objectives.
- 54.37% of the Sub-fund’s portfolio was invested in companies making a net positive contribution to the SDGs (including impact bonds).

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Manager ensures that the Sub-fund’s sustainable investments during the Reference Period do not materially undermine an environmentally or socially sustainable investment objective by:

Corporate issuer level:

- Consideration of the principal adverse impacts on the mandatory sustainability factors (hereinafter “PAIs”) listed in Table 1 of Annex 1 of the Delegated Regulation (EU) 2022/1288 which allows for the reduction of the adverse impacts of the investment, including:
  - o by incorporating several elements to avoid and/or reduce its exposure to activities or behaviours that could affect another environmental or social objective (such as the Global Standards compliance filter and the exclusion of ESG controversies of maximum severity or activities most harmful to other environmental and/or social objectives);
  - o via an engagement process with investee companies, in accordance with its Engagement Policy, which can be accessed at <https://www.dpaminvestments.com/documents/engagement-policy-enBE> (Engagement Policy). The commitments made by the Manager are also the subject of an annual report available at [https://res.cloudinary.com/degroof-petercam-asset-management/image/upload/v1614006835/DPAM-report\\_engagement\\_activity.pdf](https://res.cloudinary.com/degroof-petercam-asset-management/image/upload/v1614006835/DPAM-report_engagement_activity.pdf)).
- An impact calculation methodology which takes into account the positive and negative contribution of the company’s products and services to the SDGs in order to optimise the net positive (resulting) contribution.

Government issuer level:

Consideration of the principal adverse impacts on the mandatory sustainability factors (hereinafter “PAIs”) listed in Table 1 of Annex 1 “Indicators for investments in sovereign or supranational issuers” of the Delegated Regulation (EU) 2022/1288 which allows for the reduction of the negative impacts of the investment, including:

- Via a sustainability model based on environmental, social and governance factors such as carbon intensity or human rights that impact the score and quintile of an OECD member country in the sustainability ranking.

Over the Reference Period, the Sub-fund has accordingly incorporated the principal adverse effects as described below in the relevant section.

- Moreover, the Sub-fund has been attentive to the positive and negative contributions of investments to all 17 Sustainable Development Goals and has met its target of having at least 20% of the Sub-fund's assets invested in accordance with the EU Taxonomy or with a net positive contribution to the 17 SDGs or in impact bonds.

Overall portfolio level:

- A rule of a minimum 20% of assets invested in equities of bonds of companies aligned with the EU Taxonomy or in net positive contribution on all 17 SDGs. During the Reference Period, a minimum 54.37% of assets aligned with the EU Taxonomy or making a net positive contribution to all 17 SDGs.

#### ● *How were the indicators for adverse impacts on sustainability factors taken into account?*

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to the Manager's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated into the entire research and investment process.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

##### 1) Firstly, with regard to environmental PAIs:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAIs related to greenhouse gas emissions and energy performance, including through the Manager's research in the context of the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD).

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with the Global Standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with the Manager's Controversial Activities Policy (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>) (Controversial Activities Policy)). The exclusion of companies involved in thermal coal production, for example, allows for better coverage of indicators such as biodiversity and greenhouse gas emissions.

d) The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

e) similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

##### 2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with the Manager's Controversial Activities Policy) (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy)). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) similarly, social indicators have been included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

The Manager's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at <https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> (Sustainable and Responsible Investments Policy) and <https://www.dpaminvestments.com/documents/tcfd-report-enBE> (TCFD Report).

For investments in sovereign bonds:

The Sub-fund benefits from the analysis and research of the proprietary country sustainability model developed by the Investment Manager:

- 1) The first PAI relates to environmental issues and focuses on the greenhouse gas emission intensity of the investee countries. The indicator is an integral component of the country sustainability model that the Manager developed for its sovereign bond strategies. Consequently, it is included in the country's sustainability score and can influence it positively or negatively depending on its level and development compared to other issuer countries.
- 2) The second PAI relates to social issues and focuses on issues of social breaches. The Manager's country sustainability model monitors a number of indicators on this issue, such as respect for civil liberties and political rights, respect for human rights and the level of violence within the country, commitment to key labour law conventions, the issue of equal opportunities and distribution of wealth, etc. These different indicators are included in the country's sustainability score and may influence it positively or negatively depending on its level and evolution compared to other emitting countries.

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

For investments in shares or corporate bonds, the first stage of the Sub-fund's investment is based on a normative screening, which includes compliance with Global Standards based on human rights, labour rights and the prevention of corruption. These include the OECD Guidelines for Multinational Enterprises and the UN Guidelines on Business and Human Rights. Companies that do not meet these criteria are excluded from the eligible investment universe. The Sub-fund has therefore not been invested during the Reference Period in any company that is deemed not to comply with these principles.

For investments in sovereign bonds: The principles defended by the above references are mainly related to the respect of human and labour rights. Our country sustainability model monitors a number of indicators on these issues, such as respect for civil liberties and political rights, respect for human rights and the level of violence within the country, commitment to key labour law conventions, the issue of equal opportunities, etc. These different indicators are included in the country's sustainability score and can influence it positively or negatively depending on its level and evolution compared to other emitting countries.

*The EU Taxonomy sets out a "does not significantly harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "does not significantly harm" principle only applies to the underlying investments of the financial product that consider the European Union's criteria regarding environmentally sustainable economic activities.

*The underlying investments of the remainder of this financial product do not consider the European Union's criteria regarding environmentally sustainable economic activities.*

## How did this financial product consider principal adverse impacts on sustainability factors?

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to the Manager's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated throughout the research and investment process from its inception.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAIs:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAIs related to greenhouse gas emissions and energy performance, including through the Manager's research in the context of the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD).

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with the Global Standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with the Manager's Controversial Activities Policy (available at

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy)). The exclusion of companies involved in thermal coal production, for example, allows for better coverage of indicators such as biodiversity and greenhouse gas emissions. The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

d) similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

2) Second, the social PAIs were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with the Manager's Controversial Activities Policy (available at

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy)). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) Similarly, social indicators are included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

The Manager's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at

<https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> (Sustainable and Responsible Investments Policy) and

<https://www.dpaminvestments.com/documents/tcf-report-enBE> (TCFD Report).

For investments in sovereign bonds: Yes, the Sub-fund takes into account the environmental and social PAIs listed in Table 1 of Annex I of the Delegated Regulation (EU) 2022/1288. The first PAI relates to environmental issues and focuses on the greenhouse gas emission intensity of the investee countries. The indicator is an integral component of the country sustainability model that the Manager developed for its sovereign bond strategies. Consequently, it is included in the country's sustainability score and can influence it positively or negatively depending on its level and development compared to other issuer countries. This has an impact on its best-in-class ranking.

The second PAI relates to social issues and focuses on issues of social breaches. Our country sustainability model monitors a number of indicators on this issue, such as respect for civil liberties and political rights, respect for human rights and the level of violence within the country, commitment to key labour law conventions, the issue of equal opportunities and distribution of wealth, etc. These different indicators are included in the country's sustainability score and can influence it positively or negatively depending on its level and evolution compared to other emitting countries. This has an impact on its best-in-class ranking.

## What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31/12/2023

Largest investments	Sector	% of assets	Country

## What was the proportion of sustainability-related investments?

### Asset allocation

describes the share of investments in specific assets.

### ● What was the asset allocation?

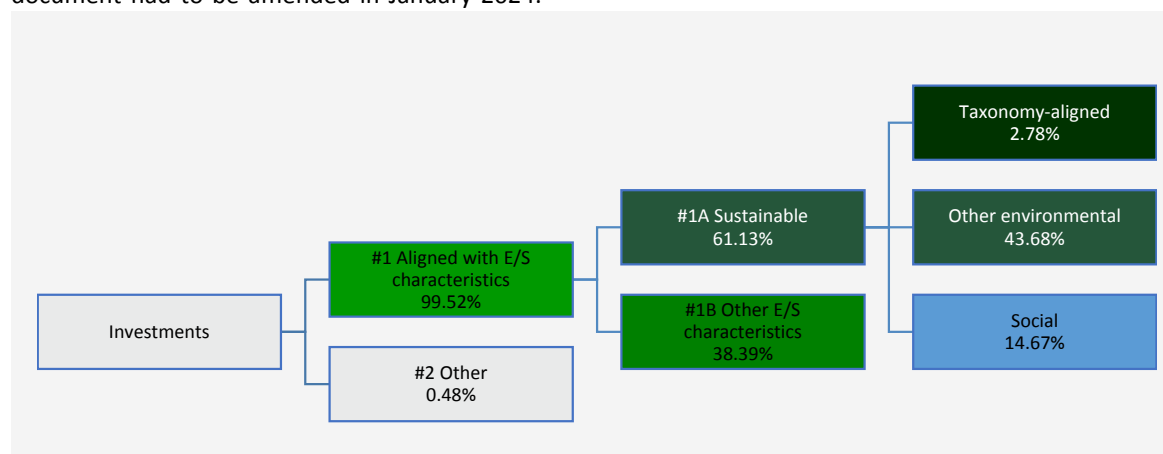

During the Reference Period, by applying the investment strategy, the Sub-fund invested 99.52% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as “#1 Aligned with E/S characteristics”).

The Sub-fund invested at least 61.13% of its assets in sustainable investments with environmental or social objectives (in the table referred to as “#1A Sustainable”).

The percentage of the portfolio invested in sustainable investments that meet an environmental and/or social objective (#1A Sustainable) is calculated using the cascade methodology described in the prospectus (section “What are the sustainable investment objectives that the financial product intends to partially achieve and how does the sustainable investment contribute to these objectives?”), which excludes double counting at the cascade level: an investment qualifying as sustainable at the level of a first element of the cascade is not then taken into account at the level of subsequent elements of the cascade.

In contrast, the percentages of the two sub-categories of sustainable investments (#1A Sustainable) in the portfolio invested in environmental investments other than those aligned with the taxonomy and social investments may involve some double counting. All portfolio companies are analysed against both (i) the environmental SDGs (and therefore may fall into the sub-category “other environmental investments” even if they are also considered to be aligned with the taxonomy and/or as a social sustainable investment) and (ii) the social SDGs (and therefore may fall into the sub-category “social investments” even if they are also considered to be aligned with the taxonomy and/or as an other environmental investment).

Following clarification from the ESAs on 17 November 2022 on the application of Regulation (EU) 2019/2088 that double counting should be avoided between an investment that has an environmental and social objective. Following this change in methodology, the pre-contractual document had to be amended in January 2024.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives;
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Sector	Sub-sector	% assets
Public administration	Public administration and defence; compulsory social security	28.97
Financial and insurance activities	Financial service activities, except insurance and pension funding	17.59
Manufacturing	Manufacture of computer, electronic and optical products	4.89
Information and communication	Publishing activities	4.26
Manufacturing	Manufacture of basic pharmaceutical products and pharmaceutical preparations	3.52
Information and communication	Telecommunications	3.21
Manufacturing	Manufacture of machinery and equipment n.e.c.	3.13
Financial and insurance activities	Insurance, reinsurance and pension funding, except compulsory social security	3.07
Financial and insurance activities	Activities auxiliary to financial services and insurance activities	2.66
Manufacturing	Manufacture of chemicals and chemical products	2.63
Real estate activities	Real estate activities	2.34
Manufacturing	Manufacture of electrical equipment	2.12
Manufacturing	Other manufacturing	1.96
Wholesale and retail trade; repair of motor vehicles and motorcycles	Wholesale trade, except of motor vehicles and motorcycles	1.90
Electricity, gas, steam and air conditioning supply	Electricity, gas, steam and air conditioning supply	1.88
Activities of extraterritorial organisations and bodies	Activities of extraterritorial organisations and bodies	1.77
Administrative and support service activities	Office administrative, office support and other business support activities	1.41
Manufacturing	Manufacture of wearing apparel	1.36
Information and communication	Computer programming, consultancy and related activities	1.27
Wholesale and retail trade; repair of motor vehicles and motorcycles	Retail trade, except of motor vehicles and motorcycles	1.14
Manufacturing	Manufacture of beverages	0.96
Accommodation and food service activities	Food and beverage service activities	0.92

Sector	Sub-sector	% assets
Manufacturing	Manufacture of paper and paper products	0.91
Information and communication	Information service activities	0.83
Manufacturing	Manufacture of motor vehicles, trailers and semi-trailers	0.77
Manufacturing	Manufacture of leather and related products	0.72

Professional, scientific and technical activities	Scientific research and development	0.24
Transportation and storage	Warehousing and support activities for transportation	0.22
Manufacturing	Manufacture of food products	0.22
Manufacturing	Manufacture of basic metals	0.20
Manufacturing	Manufacture of coke and refined petroleum products	0.19
Manufacturing	Manufacture of fabricated metal products, except machinery and equipment	0.18
Manufacturing	Manufacture of wood and of products of wood and cork, straw and plaiting	0.18
Information and communication	Motion picture, video and sound production and distribution	0.17
Construction	Civil engineering	0.13
Liquid assets	Liquid assets	0.48

### **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Sustainable investments that are aligned with the EU Taxonomy (referred to in the table as "EU Taxonomy aligned") consist of investments in companies whose economic activities substantially contribute to the environmental objectives of climate change mitigation and/or adaptation as defined by the EU Taxonomy in accordance with the eligibility and technical selection criteria ("EU Taxonomy Technical Selection Criteria").

The Manager's methodology for assessing the EU Taxonomy alignment of investee companies is based on data provided either by the investee companies or by third-party providers. The latter use a mixed approach:

- Firstly, a direct mapping between the business activities in their own sectoral classification system and the economic activities covered by the Technical Selection Criteria of the EU Taxonomy.
- Secondly, any business activity that could not be directly mapped is examined through a bottom-up assessment of its alignment with the EU Taxonomy's Technical Selection Criteria.
- Any economic activity remaining after the first and second steps is considered not to be aligned with the EU Taxonomy.

In principle, the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy is assessed by means of turnover (based on performance data provided by third-party suppliers).

Where information on the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy cannot be readily obtained from information published by the invested issuers, the Manager shall rely on equivalent information obtained by third-party providers from the invested issuers.

Applying this methodology, over the Reference Period, the Sub-fund is aligned for 2.78% with the first two objectives of the Taxonomy (environmental objectives of climate change mitigation and/or adaptation), exceeding its commitment of a minimum target of 0.1%.

The compliance of these investments with the requirements set out in Article 3 of the EU Taxonomy is not subject to a guarantee provided by one or more auditors or a review by one or more auditors or a review by one or more third parties.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents 67.8% of total investments.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 3.498%

Enabling activities: 2.161%

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reference period	EU Taxonomy-aligned investments
1 January 2022 - 31 December 2022	5.80%
1 January 2023 - 31 December 2023	2.78%

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Based on the approach described below, the Sub-fund invested 43.68% of its portfolio in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

During the Reference Period, only two of the six environmental objectives defined by the EU Taxonomy were covered by the regulatory framework of the EU Taxonomy Technical Selection Criteria that determine alignment with the EU Taxonomy (adaptation and climate change mitigation). However, during the Reference Period, DPAM made sustainable investments that contribute to environmental objectives that were not covered by these EU Taxonomy Technical Selection Criteria relating to the first two environmental objectives of the EU Taxonomy, in particular key environmental objectives such as the sustainable use and protection of water and marine resources, the prevention and control of pollution and the protection and restoration of biodiversity and ecosystems.

To this end, the Manager has adopted and defined a specific framework for identifying the environmental objectives of these sustainable investments and assessing their contribution to these objectives. This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to environmental objectives.

Are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of socially sustainable investments?**

Based on the approach described below, the Sub-fund invested 14.67% of its portfolio in sustainable investments with a social objective over the Reference Period. A European Taxonomy for social sustainability goals has yet to be developed. In the meantime, the Manager wishes to continue to make sustainable investments that contribute to the achievement of key social goals such as zero hunger, quality education and peace, justice and strong institutions. To this end, the Manager has adopted and defined a specific framework for identifying the social objectives of these sustainable investments and assessing their contribution to these objectives. This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to social objectives. The Manager will review and reassess this framework when the EU Taxonomy Technical Selection Criteria have been implemented for the social objectives under the EU Taxonomy.

### **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets
- Derivative instruments
- Collective investment schemes
- issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for the purposes of achieving its investment objectives, portfolio diversification, liquidity management and/or risk hedging, the Sub-fund was exposed to 0.48% in liquid assets. There are no minimum environmental or social guarantees on this allocation.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e.:

For investments in equities or corporate bonds:

On a quarterly basis, a normative screening has been established based on compliance with Global Standards.

Subsequently, companies meeting the thresholds as defined in the activities excluded by the Manager's controversial activities policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

Finally, on a semi-annual basis, the resulting universe was subject to a "best-in-class" ranking in order to retain only the best ESG profiles of companies on a list of securities eligible for management.

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector. In addition, this qualitative analysis also includes consideration of the sustainability theme and the issuer's total contribution to the UN Sustainable Development Goals.

For investments in sovereign bonds:

Normative screening was carried out on a semi-annual basis, based on the minimum democratic requirements that countries must meet, and countries were ranked on the basis of their sustainability profile defined by the Manager's proprietary model; the last quintile was excluded from investment. Accordingly, the countries eligible for the issuance of sovereign bonds have been defined for the universe eligible for management.

### **How did this financial product perform compared with the reference benchmark?**

Not applicable

#### **● How does the reference benchmark differ from a broad market index?**

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**  
Not applicable
- **How did this financial product perform compared with the reference benchmark?**

## Periodic information for financial products referred to in Article 9(1 to 4a) of Regulation (EU) 2019/2088 and in the first paragraph of Article 5 of Regulation (EU) 2020/852

**Product name:**  
DPAM L BONDS CLIMATE TRENDS SUSTAINABLE

**Legal entity identifier:**  
549300VQ9Q8F1NPR1D70

### Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

#### Did this financial product have a sustainable investment objective?

<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <b>Yes</b>		<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <b>No</b>	
<input checked="" type="checkbox"/>	It made sustainable <b>investments with an environmental objective</b> : 92.33%	<input type="checkbox"/>	It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
<input checked="" type="checkbox"/>	in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/>	in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/>	It made sustainable <b>investments with a social objective</b> : 2.56%	<input type="checkbox"/>	with a social objective
		<input type="checkbox"/>	It promoted E/S characteristics, but <b>did not make sustainable investments</b>

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### To what extent was the sustainable investment objective of this financial product met?

During the Reference Period (01/01/2023-31/12/2023) (hereinafter the "Reference Period"), the aim of the Sub-fund was to achieve environmental objectives in order to generate a positive impact on the climate and to contribute to the transition to a low carbon economy. Through the majority of its investments, the Sub-Fund aims to have a positive impact in environmental terms, particularly in the areas of energy efficiency, mobility and electrification, eco-society, regenerative economy, alternative and renewable energy, land use, agriculture and water and the decarbonisation of manufacturing processes. The objectives are in line with the objectives of the Taxonomy (climate change mitigation and adaptation). The positive impact on the climate and the contribution to the transition to a low-carbon economy are assessed in two ways: first, by the impact projects financed by the impact bonds in which the Sub-fund invests and, in addition, by the contribution of the turnover of the invested companies to the UN Sustainable Development Goals and to the environmental impact themes mentioned above. This narrows the investment universe: the portfolio concentrates on green and equivalent bonds and net positive companies (as defined in the prospectus), i.e. (1) whose core business is the development of products and services that contribute to the achievement of sustainable development goals (SDG) and (2) the most advanced in terms of sustainability and ESG risk engagement.

During the Reference Period, the Sub-fund has not designated a benchmark to achieve its sustainable investment objective within the meaning of Article 9 of Regulation 2019/2088.

Derivative financial products, if any, used for the purpose of achieving the investment objectives of the Sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

#### ● How did the sustainability indicators perform?

During the Reference Period, the Sub-fund achieved the following sustainability indicators:

- a minimum of 80% of recognised impact issues (green bonds or equivalents) or issuers meeting environmental or social Sustainable Development Goals (SDGs) i.e.:

- companies aligned with one of the first two objectives of the EU taxonomy (climate change mitigation and adaptation);
- companies aiming to make a net positive contribution to environmental sustainability objectives;
- companies aiming to make a net positive contribution to social sustainability objectives.

In addition, in order to enhance the contribution to the financing of the 17 sustainable objectives defined by the United Nations (UN) as a whole and the principle of not causing significant harm to an environmental (under the EU Taxonomy or not) and/or social investment objective, the Sub-fund also achieved over the reference period:

- a minimum of 50% of issuers making a positive net contribution to all the SDGs (min. 50% of the Sub-fund's AUM (assets under management) are invested in recognised sustainable bonds (green bonds or equivalent) or issuers that individually make a positive contribution to all 17 SDGs on a net contribution basis);
- a positive net contribution at the level of the overall portfolio to the SDGs, i.e. the impact result based on a weighted average over all invested issuers at the level of the overall portfolio and in terms of net contribution to all 17 SDGs is positive.
- the Sub-fund focused on impact instruments such as green and sustainable emissions. The portfolio was 78.91% exposed to this type of instrument at the end of the reference period.

The other sustainability indicators used to measure the attainment of the Sub-fund's sustainability objective correspond to the binding investment restrictions in terms of exposure of the investee companies to certain controversial activities and behaviours, thus, over the reporting period, the Sub-fund achieved the following indicators:

- a. the Sub-fund had no exposure to issuers considered to be non-compliant with Global Standards;
- b. the Sub-fund had no exposure to issuers involved in controversial activities according to the definitions and thresholds stipulated by the Manager's Controversial Activities Policy (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy));
- c. the Sub-fund had no exposure to issuers facing ESG controversies of maximum severity;
- d. as at 31 December 2023, the Sub-fund's exposure to, adherence to, and validation of the Science Based Targets initiative (SBTi) was higher than its benchmark 96.16% (fund) vs 64.80% (benchmark).
- e. the Sub-fund had a higher weighted average ESG profile than its benchmark index, before the application of the ESG and sustainable investment selection methodology over a period of 3 years: 62.09 (funds) versus 60.21 (benchmark) (at 31/12/2023).

For the Reference Period, the Sub-fund had 94.89% sustainable investments. These sustainable investments have contributed to the Sub-fund's partial sustainable investment objective in the following ways:

- 9.87% of the Sub-fund's portfolio contributed to the achievement of the environmental objectives defined by the EU Taxonomy (climate change mitigation and adaptation);
- 82.46% of the Sub-fund's portfolio contributed to the achievement of environmental objectives not aligned with the EU Taxonomy.
- 2.56% of the Sub-fund's portfolio contributed to the achievement of social objectives.
- 94.49% of the Sub-fund's portfolio was invested in companies making a net positive contribution to the SDGs (including impact bonds).

#### ● ...and compared to previous periods?

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
<b>Sustainable Investment</b>	95.90%	94.89%
<b>Environmental Investments</b>	30.63%	92.33%
<b>Social Investments</b>	42.63%	2.56%
<b>Other Environmental Investments</b>	18.00%	82.46%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure
Sustainability indicator d.	Sub-fund: 94.5 Benchmark: 66.80	Sub-fund: 96.16 Benchmark: 64.80
Sustainability indicator e.	Sub-fund: 59.50 Benchmark: 58.59	Sub-fund: 62.09 Benchmark: 60.21

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Manager ensured that the Sub-fund's sustainable investments during the Reference Period did not materially undermine an environmentally or socially sustainable investment objective by:

Issuer level:

- Consideration of the principal adverse impacts on the mandatory sustainability factors (hereinafter "PAIs") listed in Table 1 of Annex 1 of the Delegated Regulation (EU) 2022/1288 which allows for the reduction of the adverse impacts of the investment, including:

o by incorporating several elements to avoid and/or reduce its exposure to activities or behaviours that could affect another environmental or social objective (such as the Global Standards compliance filter and the exclusion of ESG controversies of maximum severity or activities most harmful to other environmental and/or social objectives);

o via an engagement process with investee companies, in accordance with its Engagement Policy, which can be accessed at <https://www.dpaminvestments.com/documents/engagement-policy-enBE> (Engagement Policy). The commitments made by the Manager are also the subject of an annual report available at [https://res.cloudinary.com/degroof-petercam-asset-management/image/upload/v1614006835/DPAM\\_report\\_engagement\\_activity.pdf](https://res.cloudinary.com/degroof-petercam-asset-management/image/upload/v1614006835/DPAM_report_engagement_activity.pdf).

- An impact calculation methodology which takes into account the positive and negative contribution of the company's products and services to the Sustainable Development Goals (SDGs) in order to optimise the net positive (resulting) contribution.

Overall portfolio level:

- A rule of a minimum of 50% of assets aligned with the EU Taxonomy or invested in impact bonds or in net positive contribution on all 17 SDGs. During the Reference Period, a minimum 94.49% of assets aligned with the EU Taxonomy or making a net positive contribution to all 17 SDGs.
- a positive net contribution at the level of the overall portfolio to the SDGs, i.e. the impact result based on a weighted average over all invested issuers at the level of the overall portfolio and in terms of net contribution to all 17 SDGs is positive, taking into account investments in impact bonds and aligned with the taxonomy.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

During the Reference Period, the Sub-fund has taken into consideration all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288 that are applicable to investments in sovereign or supranational issuers.

The PAIs are intrinsically linked to the Manager's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated throughout the research and investment process from its inception.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAIs:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAIs related to greenhouse gas emissions and energy performance, including through the Manager's research in the context of the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD).

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with the Global Standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with the Manager's Controversial Activities Policy (available at

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy)). The exclusion of companies involved in thermal coal production, for example, allows for better coverage of indicators such as biodiversity and greenhouse gas emissions.

The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

e) similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with the Manager's Controversial Activities Policy (available at

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy)). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) Similarly, social indicators are included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

The Manager's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at

<https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> (Sustainable and Responsible Investments Policy) and

<https://www.dpaminvestments.com/documents/tcf-report-enBE> (TCFD Report).

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The first stage of the Sub-fund's investment is based on a normative screening, which includes compliance with Global Standards based on human rights, labour rights and the prevention of corruption. These include the OECD Guidelines for Multinational Enterprises and the UN Guidelines on Business and Human Rights. Companies that do not meet these criteria are excluded from the eligible investment universe.

The Sub-fund has therefore not been invested during the Reference Period in any company that is deemed not to comply with these principles.

## How did this financial product consider principal adverse impacts on sustainability factors?

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to the Manager's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated throughout the research and investment process from its inception.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAIs:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAIs related to greenhouse gas emissions and energy performance, including through the Manager's research in the context of the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD).

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with the Global Standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with the Manager's Controversial Activities Policy (available at

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy). The exclusion of companies involved in thermal coal production, for example, allows for better coverage of indicators such as biodiversity and greenhouse gas emissions.

The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

d) similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with the Manager's Controversial Activities Policy (available at

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) Similarly, social indicators are included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

The Manager's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at

<https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> (Sustainable and Responsible Investments Policy) and

<https://www.dpaminvestments.com/documents/tcf-report-enBE> (TCFD Report).

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
1% SPAIN JUL42 30.07.2042	Public administration	1.78	Spain

GTC AURORA LUXE 2.2500 21-26 23/06A	Financial and insurance activities	0.87	Poland

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### What was the asset allocation?

In the Reference Period, the Sub-fund invested at least 94.89% of its assets in sustainable investments with environmental or social objectives. These sustainable investments (in the table below referred to as “#1 Sustainable”) are:

recognised impact emissions (green bonds or equivalent)

- companies aligned with one of the first two objectives of the EU taxonomy (climate change mitigation and adaptation);
- companies aiming to make a net positive contribution to the United Nations (UN) Sustainable Development Goals (“SDGs”), which are environmental in nature;
- companies aiming to make a net positive contribution to the social SDGs.

The percentage of the portfolio invested in sustainable investments that meet an environmental and/or social objective (#1A Sustainable) is calculated using the cascade methodology described in the prospectus (section “Environmental, social and governance (ESG) considerations – Sustainability transparency”), which excludes double counting at the cascade level: an investment qualifying as sustainable at the level of a first element of the cascade is not then taken into account at the level of subsequent elements of the cascade.

In contrast, the percentages of the two sub-categories of sustainable investments (#1A Sustainable) in the portfolio invested in environmental investments other than those aligned with the taxonomy and social investments may involve some double counting. All portfolio companies are analysed against both (i) the environmental SDGs (and therefore may fall into the sub-category “other environmental investments” even if they are also considered to be aligned with the taxonomy and/or as a social sustainable investment) and (ii) the social SDGs (and therefore may fall into the sub-category “social investments” even if they are also considered to be aligned with the taxonomy and/or as an other environmental investment).

Following clarification from the ESAs on 17 November 2022 on the application of Regulation (EU) 2019/2088 that double counting should be avoided between an investment that has an environmental and social objective. Following this change in methodology, the pre-contractual document had to be amended in January 2024.

#### ● In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Financial and insurance activities	Financial service activities, except insurance and pension funding	37.24
Real estate activities	Real estate activities	13.28
Electricity, gas, steam and air conditioning supply	Electricity, gas, steam and air conditioning supply	8.83
Activities of extraterritorial organisations and bodies	Activities of extraterritorial organisations and bodies	5.91
Public administration	Public administration and defence; compulsory social security	5.34
Financial and insurance activities	Insurance, reinsurance and pension funding, except compulsory social security	4.61
Financial and insurance activities	Activities auxiliary to financial services and insurance activities	3.18
Water supply; sewerage; waste management and remediation activities	Waste collection, treatment and disposal activities; materials recovery	2.88
Information and communication	Telecommunications	1.14
Manufacturing	Manufacture of motor vehicles, trailers and semi-trailers	1.07
Water supply; sewerage; waste management and remediation activities	Water collection, treatment and supply	0.93
Manufacturing	Manufacture of computer, electronic and optical products	0.88

Sector	Sub-sector	% assets
Manufacturing	Manufacture of chemicals and chemical products	0.87
Wholesale and retail trade; repair of motor vehicles and motorcycles	Retail trade, except of motor vehicles and motorcycles	0.87
Manufacturing	Other manufacturing	0.85
Professional, scientific and technical activities	Legal and accounting activities	0.75
Manufacturing	Manufacture of paper and paper products	0.74
Professional, scientific and technical activities	Scientific research and development	0.69
Manufacturing	Manufacture of electrical equipment	0.59
Manufacturing	Manufacture of fabricated metal products, except machinery and equipment	0.56
Transportation and storage	Land transport and transport via pipelines	0.50
Manufacturing	Manufacture of textiles	0.42
Manufacturing	Manufacture of other non-metallic mineral products	0.39
Construction	Civil engineering	0.37
Other service activities	Other personal service activities	0.34
Information and communication	Computer programming, consultancy and related activities	0.29
Wholesale and retail trade; repair of motor vehicles and motorcycles	Wholesale trade, except of motor vehicles and motorcycles	0.28
Agriculture, forestry and fishing	Fishing and aquaculture	0.20
Transportation and storage	Postal and courier activities	0.18
Manufacturing	Manufacture of food products	0.18
Derivatives	Derivatives	1.05
Liquid assets	Liquid assets	4.56

### **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The Manager's methodology for assessing the EU Taxonomy alignment of investee companies is based on data provided either by the investee companies or by third-party providers. The latter use a mixed approach:

- Firstly, a direct mapping between the business activities in their own sectoral classification system and the economic activities covered by the Technical Selection Criteria of the EU Taxonomy.
- Secondly, any business activity that could not be directly mapped is examined through a bottom-up assessment of its alignment with the EU Taxonomy's Technical Selection Criteria.
- Any economic activity remaining after the first and second steps is considered not to be aligned with the EU Taxonomy.

In principle, the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy is assessed by means of turnover (based on performance data provided by third-party suppliers).

Where information on the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy cannot be readily obtained from information published by the invested issuers, the Manager shall rely on equivalent information obtained by third-party providers from the invested issuers.

Applying this methodology, over the Reference Period, the Sub-fund is aligned for 9.87% with the first two objectives of the Taxonomy (environmental objectives of climate change mitigation and/or adaptation).

The compliance of these investments with the requirements set out in Article 3 of the EU Taxonomy is not subject to a guarantee provided by one or more auditors or a review by one or more auditors or a review by one or more third parties.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- ☐ Yes:
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 4.733%

Enabling activities: n/a

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are economic activities for which low-carbon

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

Reference period	EU Taxonomy-aligned investments
1 January 2022 - 31 December 2022	12.63%
1 January 2023 - 31 December 2023	9.87%

**What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

Based on the approach described below, the Sub-fund invested 82.46% of its portfolio in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy over the Reference Period.

During the Reference Period, only two of the six environmental objectives defined by the EU Taxonomy were covered by the regulatory framework of the EU Taxonomy Technical Selection Criteria that determine alignment with the EU Taxonomy (adaptation and climate change mitigation). However, during the Reference Period, DPAM made sustainable investments that contribute to environmental objectives that were not covered by these EU Taxonomy Technical Selection Criteria relating to the first two environmental objectives of the EU Taxonomy, in particular key environmental objectives such as the sustainable use and protection of water and marine resources, the prevention and control of pollution and the protection and restoration of biodiversity and ecosystems.

To this end, the Manager has adopted and defined a specific framework for identifying the environmental objectives of these sustainable investments and assessing their contribution to these objectives. This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to environmental objectives.

**What was the share of socially sustainable investments?**

Based on the approach described below, the Sub-fund invested 2.56% of its portfolio in sustainable investments with a social objective over the Reference Period. A European Taxonomy for social sustainability goals has yet to be developed.

In the meantime, the Manager wishes to continue to make sustainable investments that contribute to the achievement of key social goals such as zero hunger, quality education and peace, justice and strong institutions.

To this end, the Manager has adopted and defined a specific framework for identifying the social objectives of these sustainable investments and assessing their contribution to these objectives. This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to social objectives.

The Manager will review and reassess this framework when the EU Taxonomy Technical Selection Criteria have been implemented for the social objectives under the EU Taxonomy.

**What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?**

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

Are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social objectives.
- issuers covered by ESG research are considered not to have environmental and/or social objectives.

Over the Reference Period, in order to diversify the portfolio, the Sub-fund was exposed to 5.11% of issuers considered not to have environmental and/or social objectives. Over the Reference Period, for liquidity management and/or risk hedging purposes, the Sub-fund was exposed to 4.56% in liquid assets and 1.05% in derivatives. There are no minimum environmental or social guarantees on this allocation.

## **What actions have been taken to attain the sustainable investment objective during the reference period?**

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e:

On a quarterly basis, a normative screening has been established based on compliance with Global Standards. Companies must comply with the founding principles of the Global Compact (human rights, labour law, protection of the environment, fight against corruption and environmental protection) and the UN Guiding Principles, ILO instruments, the OECD Guidelines for Multinational Enterprises and the underlying conventions and treaties. The Manager used specific ESG research from non-financial rating agencies to determine whether or not a company is in compliance with these standards.

Subsequently, companies meeting the thresholds as defined in the activities excluded by the Manager's controversial activities policy were excluded. The policy of excluding controversial activities defined by the Manager (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy) covers several sectors and economic activities that are subject to debate as to whether or not they are ethical and sustainable. For each of these sectors and economic activities, the exclusion policy for controversial activities defines the exclusion criteria and thresholds. Companies involved in these controversial sectors and activities and meeting the exclusion criteria set out in the policy were excluded from the investment portfolio.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

Then, on a semi-annual basis, the resulting universe was subject to a "best-in-class" ranking in order to retain only the best ESG profiles of companies on a list of securities eligible for management. The last decile (10%) of the lowest scores in the ranking were removed from the eligible list by sector.

The Manager ensured that the products and/or services of the company contribute – as a proportion of its revenue – to the achievement of the 17 environmental or social Sustainable Development Goals (SDGs) defined by the United Nations (UN) such as health products and services, education services, water saving and access solutions, energy efficiency solutions, digitalisation services, sustainable mobility services, etc.

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector. In addition, this qualitative analysis also includes consideration of the sustainability theme and the issuer's total contribution to the UN Sustainable Development Goals.

In addition, in order to integrate the proprietary investment universe that unifies issuers committed to addressing climate change, the three investment categories (impact bonds, climate challengers and climate enablers) were subject to a specific qualitative climate assessment:

- To assess the effectiveness of "Environmentally sustainable financing instruments", the Manager has created a proprietary qualitative scorecard that is applied before an investment is made. This scoreboard is based on best practices and market standards, and specifically analyses UoP obligations. In addition, a qualitative assessment ensures that the issuance of environmentally sustainable financing instruments is an integral part of the issuer's business strategy.
- Climate challengers: An assessment model was developed to evaluate the company's efforts based on the four pillars of the Taskforce on Climate-related Financial Disclosures (TCFD): governance, strategy, risk management, measures and targets. Only companies that demonstrated that they have a state-of-the-art integrated strategy in place to address the transition risks of their sector were invested in their ordinary bonds.

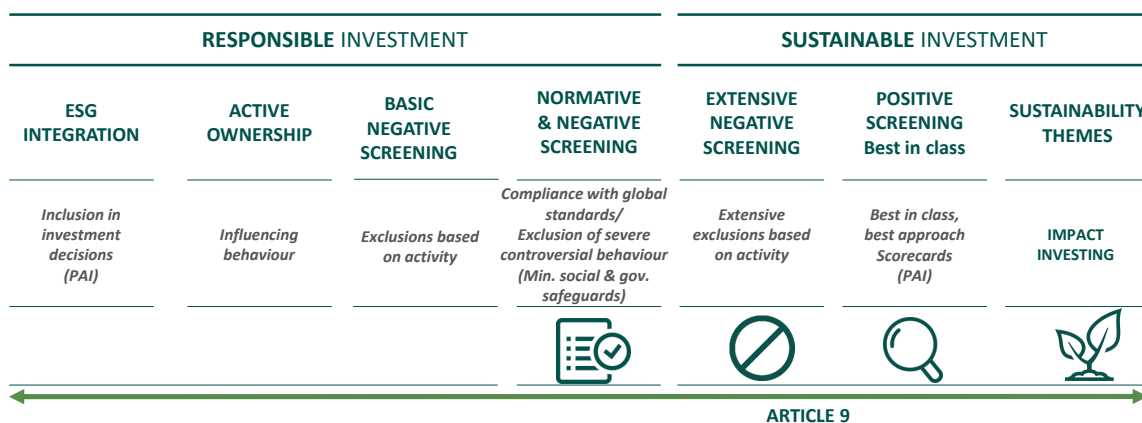

- Climate enablers: For climate enablers, issuers' business activities must be clearly documented and show a clear strategic focus on climate-friendly products or services that are in line with one of the sustainable environmental themes/objectives pursued by the portfolio and that account for a significant share of the issuers' revenues.

Finally, the sustainable objective was measured by ensuring that:

- the net contribution at the level of the whole portfolio to the 17 SDGs is positive and
- a minimum of 50% of assets under management has been invested in companies making a net positive contribution to the 17 SDGs:

The stages of the investment process are outlined below:

## How did this financial product perform compared to the reference sustainable benchmark?

Not applicable

- How did the reference benchmark differ from a broad market index?

Not applicable

- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

Not applicable

- How did this financial product perform compared with the reference benchmark?

Not applicable

- How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

## Periodic information for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:**  
DPAM L BONDS CORPORATE EUR

**Legal entity identifier:**  
391200XI1RVDDS6W3F18

### Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

#### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b>	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: ____%</b> <div style="margin-left: 40px;"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy                 </div> <div style="margin-left: 40px;"> <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy                 </div> <input type="checkbox"/> It made <b>sustainable investments with a social objective: ____%</b>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments <div style="margin-left: 40px;"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy                 </div> <div style="margin-left: 40px;"> <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy                 </div> <div style="margin-left: 40px;"> <input type="checkbox"/> with a social objective                 </div> <input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make sustainable investments</b>

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices and best efforts.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

Derivative financial products, if any, used for the purpose of achieving the investment objectives of the Sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

#### ● How did the sustainability indicators perform?

During the Reference Period, the Sub-fund achieved the following sustainability indicators:

For direct investments (in corporate bonds):

- a) The sub-fund has not been exposed to companies considered to be below Global Standards;
- b) the Sub-fund has not been exposed to companies involved in controversial activities according to the definitions and thresholds stipulated by DPAM's Controversial Activities Policy (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>);

c) The sub-fund has not been exposed to companies facing extremely serious ESG controversies around environmental or social issues.

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
E/S characteristics	96.78%	98.00%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Not applicable

*The EU Taxonomy sets out a "does not significantly harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "does not significantly harm" principle only applies to the underlying investments of the financial product that consider the European Union's criteria regarding environmentally sustainable economic activities.

*The underlying investments of the remainder of this financial product do not consider the European Union's criteria regarding environmentally sustainable economic activities.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

• For investments in corporate bonds:

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and antibribery matters.

The PAIs are intrinsically linked to the Manager's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

This commitment is incorporated throughout the research and investment process from its inception. In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAIs:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD) Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not meet global standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity are thus excluded from the portfolio in advance.

The exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (available at

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy). The exclusion of companies involved in thermal coal production, for example, allows for better coverage of indicators such as biodiversity and greenhouse gas emissions.

The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises are de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (available at

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy). In this way, companies involved in controversial armaments are directly excluded from the investment universe.

In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

## What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31/12/2023

Largest investments	Sector	% of assets	Country

## What was the proportion of sustainability-related investments?

**Asset allocation**  
describes the share of investments in specific assets.

### What was the asset allocation?

By applying the investment strategy described above, the Sub-fund invests 98.00% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S characteristics").

DPAM's exclusion policy explains how DPAM acts in accordance with the principles of the United Nations Global Compact (UNGC) and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and draws on these international treaties to assess corporate behaviour. DPAM constantly reviews its investments to detect any breaches of these principles. Any involvement in a controversy will result in a negative score for the company, which means that it is not a sustainable investment. During the year under review, one position was sold.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Financial and insurance activities	Financial service activities, except insurance and pension funding	48.47
Electricity, gas, steam and air conditioning supply	Electricity, gas, steam and air conditioning supply	7.70
Financial and insurance activities	Activities auxiliary to financial services and insurance activities	5.46
Manufacturing	Manufacture of chemicals and chemical products	3.27
Real estate activities	Real estate activities	2.91
Manufacturing	Manufacture of computer, electronic and optical products	2.91

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☐ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents 100% of total investments.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **What was the share of investments made in transitional and enabling activities?**  
Not applicable

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**  
Not applicable

- **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**  
Not applicable

Are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of socially sustainable investments?**  
Not applicable

- **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets (excluding treasury bonds)
- Derivative instruments
- Collective investment schemes
- issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for the purposes of achieving its investment objectives, portfolio diversification, liquidity management and/or risk hedging, the Sub-fund was exposed to 2% in liquid assets. There are no minimum environmental or social guarantees on this allocation.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e.:

- For direct line investments (corporate bonds):

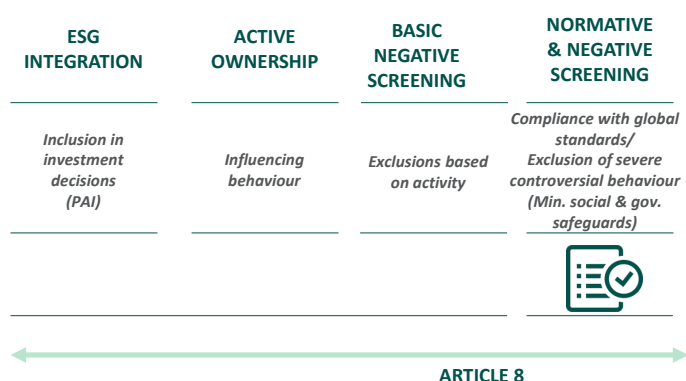

On a quarterly basis, a normative screening has been established based on compliance with global standards.

Secondly, companies meeting the thresholds as defined in the activities excluded by the responsible investment policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector.

The stages of the investment process are outlined below:

## How did this financial product perform compared with the reference benchmark?

Not applicable

- How does the reference benchmark differ from a broad market index?

Not applicable

- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

- How did this financial product perform compared with the reference benchmark?

Not applicable

- How did this financial product perform compared with the broad market index?

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Periodic information for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

### Product name:

DPAM L BONDS EMERGING MARKETS  
CORPORATE SUSTAINABLE

### Legal entity identifier:

391200COF3CF04HUJL98

### Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

#### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes		<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No	
<input type="checkbox"/>	It made <b>sustainable investments with an environmental objective</b> : ____%	<input checked="" type="checkbox"/>	It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <b>66.38%</b> of sustainable investments
<input type="checkbox"/>	in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/>	with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/>	in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/>	with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/>	It made <b>sustainable investments with a social objective</b> : ____%	<input checked="" type="checkbox"/>	with a social objective
<input type="checkbox"/>		<input type="checkbox"/>	It promoted E/S characteristics, but <b>did not make sustainable investments</b>

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices and best efforts.

During the Reference Period, derivative products, if any, used for the purpose of achieving the investment objectives of the sub-fund were not used for the purpose of promoting environmental and/or social characteristics.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

#### ● How did the sustainability indicators perform?

During the Reference Period, the Sub-fund achieved the following sustainability indicators:

For investments in equities or corporate bonds:

- a) the Sub-fund has not been exposed to companies considered to be non-compliant with Global Standards;

b) the Sub-fund had no exposure to issuers involved in controversial activities according to the definitions and thresholds stipulated by the Manager's Controversial Activities Policy (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy));

c) the Sub-fund has no exposure to companies facing ESG controversies of maximum severity on environmental or social issues;

d) the Sub-fund had a higher than benchmark exposure (excluding liquidity) to companies aligned with the Science Based Targets initiative (SBTi) or equivalent; the aim being to phase in a minimum of 25% exposure by 2026.

e) the Sub-fund had an ESG profile superior to that of the emerging market bond universe, before the application of the sustainable investment selection methodology, over a rolling three-year period.

Thus, over the Reference Period, the Sub-fund achieved:

- At 31 December 2023, the Sub-fund's exposure to companies aligned with the Science Based Targets initiative (SBTi) or equivalent. 48.83%
- the Sub-fund had a higher weighted average ESG profile than the emerging market bond universe, before the application of the sustainable investment selection methodology, over a rolling three-year period: 54.20 (funds) versus 32.45 (benchmark) (31/12/2023).

It should be noted that the Manager's Controversial Activities Policy is intended to describe and explain the Manager's choices in terms of exclusions and restrictions on investments in corporate or state activities or behaviour deemed unethical and/or irresponsible and/or unsustainable. It is available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy).

The Science-Based Targets (SBT) initiative is a partnership between CDP, the UN Global Compact, the World Resources Institute (WRI) and the World Wide Fund for Nature (WWF). The SBT initiative:

- 1) identifies and promotes best practice emissions reduction and net zero targets in alignment with climate science;
- 2) provides technical assistance and expert resources to companies that set science-based targets in alignment with the latest climate science,
- 3) assembles a team of experts to provide companies with independent assessment and validation of targets.

Issuers/companies were called on to join the initiative and define a clear programme on their emission reduction strategy and net zero targets aligned with the Paris Agreement.

#### ● ...and compared to previous periods?

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023

Sustainability indicator c.	N/A	No exposure
Sustainability indicator d.	N/A	Sub-fund: 48.83
Sustainability indicator e.	N/A	Sub-fund: 54.20 Benchmark: 32.45

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

For the Reference Period, the Sub-fund would aim to have at least 50% sustainable investments i.e. investments aimed at:

- companies aligned with one of the first two objectives of the EU taxonomy (climate change mitigation and adaptation);
- companies aiming to make a net positive contribution to the United Nations (UN) Sustainable Development Goals ("SDGs"), which are environmental in nature;
- companies aiming to make a net positive contribution to the social SDGs.

In addition, at the level of the overall portfolio, a minimum of 20% of companies aligned with the EU Taxonomy making a net positive contribution to all SDGs.

For the Reference Period, the Sub-fund had 66.38% sustainable investments. These sustainable investments have contributed to the Sub-fund's partial sustainable investment objective in the following ways:

- 2.75% of the Sub-fund's portfolio contributed to the achievement of the environmental objectives defined by the EU Taxonomy (climate change mitigation and adaptation).
- 49.04% of the Sub-fund's portfolio contributed to the achievement of environmental objectives not aligned with the EU Taxonomy.
- 14.59% of the Sub-fund's portfolio contributed to the achievement of social objectives.
- 56.41% of the Sub-fund's portfolio was invested in companies making a net positive contribution to the SDGs (including impact bonds).

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Manager ensured that the Sub-fund's sustainable investments during the Reference Period did not materially undermine an environmentally or socially sustainable investment objective by:

Issuer level:

- Consideration of the principal adverse impacts on the mandatory sustainability factors (hereinafter "PAIs") listed in Table 1 of Annex 1 of the Delegated Regulation (EU) 2022/1288 which allows for the reduction of the adverse impacts of the investment, including:
  - o by incorporating several elements to avoid and/or reduce its exposure to activities or behaviours that could affect another environmental or social objective (such as the Global Standards compliance filter and the exclusion of ESG controversies of maximum severity or activities most harmful to other environmental and/or social objectives).
  - o via an engagement process with investee companies, in accordance with its Engagement Policy, which can be accessed at <https://www.dpaminvestments.com/documents/engagement-policy-enBE> (Engagement Policy). The commitments made by the Manager are also the subject of an annual report available at [https://res.cloudinary.com/degroof-petercam-asset-management/image/upload/v1614006835/DPAM\\_report\\_engagement\\_activity.pdf](https://res.cloudinary.com/degroof-petercam-asset-management/image/upload/v1614006835/DPAM_report_engagement_activity.pdf).
- An impact calculation methodology which takes into account the positive and negative contribution of the company's products and services to the Sustainable Development Goals (SDGs) in order to optimise the net positive (resulting) contribution.

Overall portfolio level:

- A rule of minimum 20% of assets aligned with the EU Taxonomy or in net positive contribution on all 17 SDGs. During the Reference Period, a minimum 56.41% of assets aligned with the EU Taxonomy or making a net positive contribution to all 17 SDGs.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to the Manager's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated into the entire research and investment process.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAIs:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAIs related to greenhouse gas emissions and energy performance, including through the Manager's research in the context of the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD).

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with the Global Standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with the Manager's Controversial Activities Policy (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activity)). The exclusion of companies involved in thermal coal production, for example, means that issues such as biodiversity and greenhouse gas emissions can be better taken into account.

The filtering and analysis of the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

d) similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the United Nations Global Compact, the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, or the ILO Declaration on Fundamental Principles and Rights at Work have de facto been excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with the Manager's Controversial Activities Policy (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activity)). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) similarly, social indicators have been included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

The Manager's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at <https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> (Sustainable and Responsible Investments Policy) and <https://www.dpaminvestments.com/documents/tcfd-report-enBE> (TCFD Report).

- *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The first stage of the Sub-fund's investment is based on a normative screening, which includes compliance with Global Standards based on human rights, labour rights and the prevention of corruption. These include the OECD Guidelines for Multinational Enterprises and the UN Guidelines on Business and Human Rights. Companies

that do not meet these criteria are excluded from the eligible investment universe.

The Sub-fund has therefore not been invested during the Reference Period in any company that is deemed not to comply with these principles.

*The EU Taxonomy sets out a "does not significantly harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "does not significantly harm" principle only applies to the underlying investments of the financial product that consider the European Union's criteria regarding environmentally sustainable economic activities.

*The underlying investments of the remainder of this financial product do not consider the European Union's criteria regarding environmentally sustainable economic activities.*

## How did this financial product consider principal adverse impacts on sustainability factors?

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to the Manager's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated throughout the research and investment process from its inception.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAIs:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAIs related to greenhouse gas emissions and energy performance, including through the Manager's research in the context of the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD).

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with the Global Standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with the Manager's Controversial Activities Policy (available at

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy). The exclusion of companies involved in thermal coal production, for example, means that issues such as biodiversity and greenhouse gas emissions can be better taken into account. The filtering and analysis of the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

d) similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the principles of the Global Compact or the OECD Guidelines for Multinational Enterprises have de facto been excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with the Manager's Controversial Activities Policy (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy)). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) Similarly, social indicators are included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

The Manager's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at

<https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> (Sustainable and Responsible Investments Policy) and

<https://www.dpaminvestments.com/documents/tcfd-report-enBE> (TCFD Report).

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
TML HOLDINGS PTE4,35 21-090626	Manufacturing	3.99	India
NEMAK SAB 2,25 21-200728	Manufacturing	3.07	Mexico
CEMEX SA DE CV 5.450% 19-NOV-2029	Manufacturing	3.07	Mexico
LENOVO GROUP 6,536 22-270732	Manufacturing	3.05	China
AMERICA MOVIL SA DE CV 3.625% 22-APR-2029	Information and communication	2.94	Mexico
SUZANO AUSTRIA 2,50 21-150928	Other service activities	2.74	Brazil
CHINA CONSTRUCT BANK HK 1.250% 04-AUG-2025	Financial and insurance activities	2.64	China
TSMC GLOBAL 1,25 21-230426	Manufacturing	2.29	Taiwan
KIMBERLY-CLARK DE MEXICO 2.431% 01-JUL-2031	Manufacturing	2.15	Mexico
KOREA HOUSING 4,625 23-240228	Financial and insurance activities	1.88	South Korea
BANCO SANTANDER SA 5.375% 17-APR-2025	Financial and insurance activities	1.87	Mexico
IND & COMM BANK CHINA/ HK 2.898% 16-SEP-2024	Financial and insurance activities	1.86	China
ENTEL CHILE SA 4.750% 01-AUG-2026	Information and communication	1.85	Chile

Largest investments	Sector	% of assets	Country
SIGMA FINANCE NL 4.875% 27-MAR-2028	Financial and insurance activities	1.84	Mexico
GOODMAN HK FINANCE 4,375 14-190624	Financial and insurance activities	1.84	Hong Kong

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

During the Reference Period, by applying the investment strategy, the Sub-fund invested 90.49% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as “#1 Aligned with E/S characteristics”).

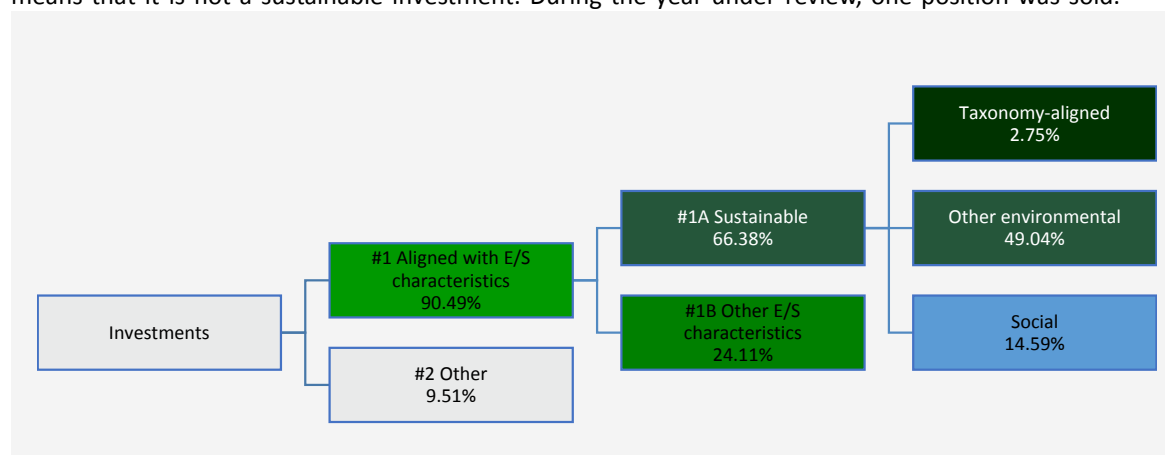

The Sub-fund invested at least 66.38% of its assets in sustainable investments with environmental or social objectives (in the table referred to as “#1A Sustainable”).

The percentage of the portfolio invested in sustainable investments that meet an environmental and/or social objective (#1A Sustainable) is calculated using the cascade methodology described in the prospectus (section “What are the sustainable investment objectives that the financial product intends to partially achieve and how does the sustainable investment contribute to these objectives?”), which excludes double counting at the cascade level: an investment qualifying as sustainable at the level of a first element of the cascade is not then taken into account at the level of subsequent elements of the cascade.

In contrast, the percentages of the two sub-categories of sustainable investments (#1A Sustainable) in the portfolio invested in environmental investments other than those aligned with the taxonomy and social investments may involve some double counting. All portfolio companies are analysed against both (i) the environmental SDGs (and therefore may fall into the sub-category “other environmental investments” even if they are also considered to be aligned with the taxonomy and/or as a social sustainable investment) and (ii) the social SDGs (and therefore may fall into the sub-category “social investments” even if they are also considered to be aligned with the taxonomy and/or as an other environmental investment).

Following clarification from the ESAs on 17 November 2022 on the application of Regulation (EU) 2019/2088 that double counting should be avoided between an investment that has an environmental and social objective. Following this change in methodology, the pre-contractual document had to be amended in January 2024.

DPAM's exclusion policy explains how DPAM acts in accordance with the principles of the United Nations Global Compact (UNGC) and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and draws on these international treaties to assess corporate behaviour. DPAM constantly reviews its investments to detect any breaches of these principles. Any involvement in a controversy will result in a negative score for the company, which means that it is not a sustainable investment. During the year under review, one position was sold.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives;
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

## ● In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Financial and insurance activities	Financial service activities, except insurance and pension funding	29.58
Information and communication	Telecommunications	9.19
Manufacturing	Manufacture of motor vehicles, trailers and semi-trailers	7.06
Manufacturing	Manufacture of computer, electronic and optical products	6.43
Manufacturing	Manufacture of food products	4.99
Manufacturing	Manufacture of other non-metallic mineral products	4.66
Electricity, gas, steam and air conditioning supply	Electricity, gas, steam and air conditioning supply	3.55
Manufacturing	Manufacture of paper and paper products	3.42
Transportation and storage	Warehousing and support activities for transportation	2.76
Activities of extraterritorial organisations and bodies	Activities of extraterritorial organisations and bodies	2.75
Other service activities	Activities of extraterritorial organisations and bodies	2.74
Financial and insurance activities	Activities auxiliary to financial services and insurance activities	2.64
Manufacturing	Manufacture of beverages	1.74
Manufacturing	Manufacture of basic metals	1.59
Wholesale and retail trade; repair of motor vehicles and motorcycles	Retail trade, except of motor vehicles and motorcycles	1.56
Manufacturing	Manufacture of electrical equipment	1.54
Manufacturing	Manufacture of coke and refined petroleum products	1.54
Financial and insurance activities	Insurance, reinsurance and pension funding, except compulsory social security	1.53
Mining and quarrying	Extraction of hard coal and lignite	1.23
Liquid assets	Liquid assets	9.51

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Sustainable investments that are aligned with the EU Taxonomy (referred to in the table as "EU Taxonomy aligned") consist of investments in companies whose economic activities substantially contribute to the environmental objectives of climate change mitigation and/or adaptation as defined by the EU Taxonomy in accordance with the eligibility and technical selection criteria ("EU Taxonomy Technical Selection Criteria").

The Manager's methodology for assessing the EU Taxonomy alignment of investee companies is based on data provided either by the investee companies or by third-party providers. The latter use a mixed approach:

- Firstly, a direct mapping between the business activities in their own sectoral classification system and the economic activities covered by the Technical Selection Criteria of the EU Taxonomy.
- Secondly, any business activity that could not be directly mapped is examined through a bottom-up assessment of its alignment with the EU Taxonomy's Technical Selection Criteria.
- Any economic activity remaining after the first and second steps is considered not to be aligned with the EU Taxonomy.

In principle, the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy is assessed by means of turnover (based on performance data provided by third-party suppliers).

Where information on the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy cannot be readily obtained from information published by the invested issuers, the Manager shall rely on equivalent information obtained by third-party providers from the invested issuers.

Applying this methodology, over the Reference Period, the Sub-fund is aligned for 2.75% with the first two objectives of the Taxonomy (environmental objectives of climate change mitigation and/or adaptation), exceeding its commitment of a minimum target of 2%.

The compliance of these investments with the requirements set out in Article 3 of the EU Taxonomy is not subject to a guarantee provided by one or more auditors or a review by one or more auditors or a review by one or more third parties.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

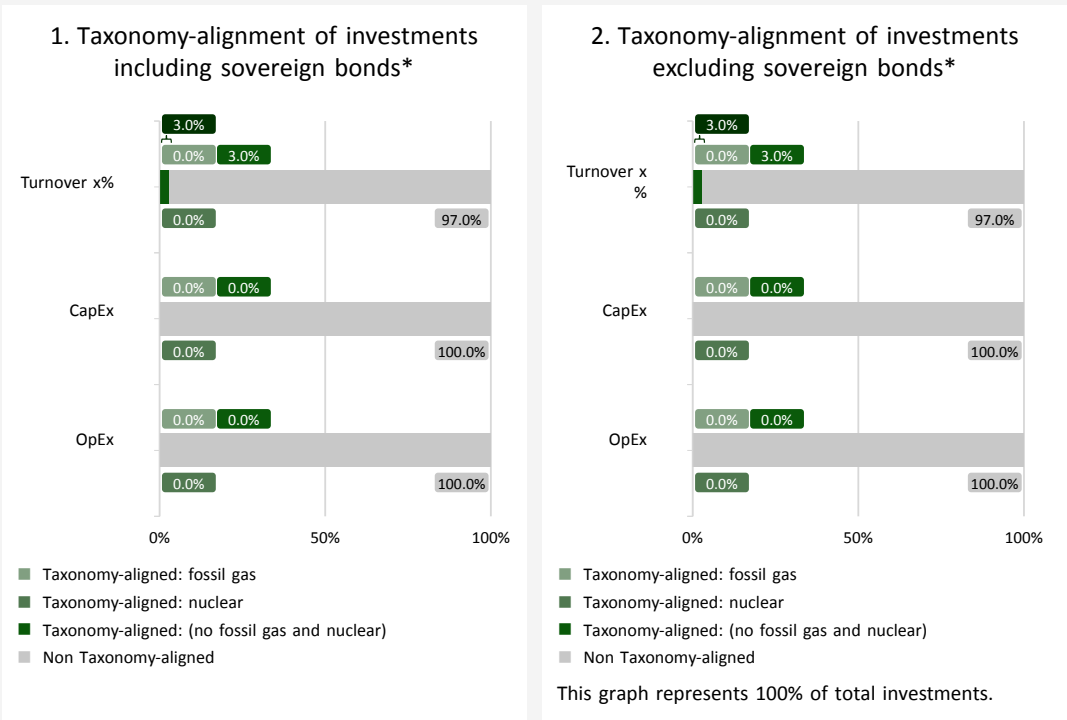

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● What was the share of investments made in transitional and enabling activities?

Transitional activities: 13.009%

Enabling activities: 1.047%

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Reference period	EU Taxonomy-aligned investments
1 January 2022 - 31 December 2022	N/A
1 January 2023 - 31 December 2023	2.75%

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Based on the approach described below, the Sub-fund invested 49.04% of its portfolio in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

During the Reference Period, only two of the six environmental objectives defined by the EU Taxonomy were covered by the regulatory framework of the EU Taxonomy Technical Selection Criteria that determine alignment with the EU Taxonomy (adaptation and climate change mitigation). However, during the Reference Period, DPAM made sustainable investments that contribute to environmental objectives that were not covered by these EU Taxonomy Technical Selection Criteria relating to the first two environmental objectives of the EU Taxonomy, in particular key environmental objectives such as the sustainable use and protection of water and marine resources, the prevention and control of pollution and the protection and restoration of biodiversity and ecosystems.

To this end, the Manager has adopted and defined a specific framework for identifying the environmental objectives of these sustainable investments and assessing their contribution to these objectives. This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to environmental objectives.

## What was the share of socially sustainable investments?

Based on the approach described below, the Sub-fund invested 14.59% of its portfolio in sustainable investments with a social objective over the Reference Period. A European Taxonomy for social sustainability goals has yet to be developed. In the meantime, the Manager wishes to continue to make sustainable investments that contribute to the achievement of key social goals such as zero hunger, quality education and peace, justice and strong institutions.

To this end, the Manager has adopted and defined a specific framework for identifying the social objectives of these sustainable investments and assessing their contribution to these objectives. This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to social objectives.

The Manager will review and reassess this framework when the EU Taxonomy Technical Selection Criteria have been implemented for the social objectives under the EU Taxonomy.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets
- Derivative instruments
- Collective investment schemes
- issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for the purposes of achieving its investment objectives, portfolio diversification, liquidity management and/or risk hedging, the Sub-fund was exposed to 9.51% in liquid assets. There are no minimum environmental or social guarantees on this allocation.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e.:

On a quarterly basis, a normative screening has been established based on compliance with Global Standards.

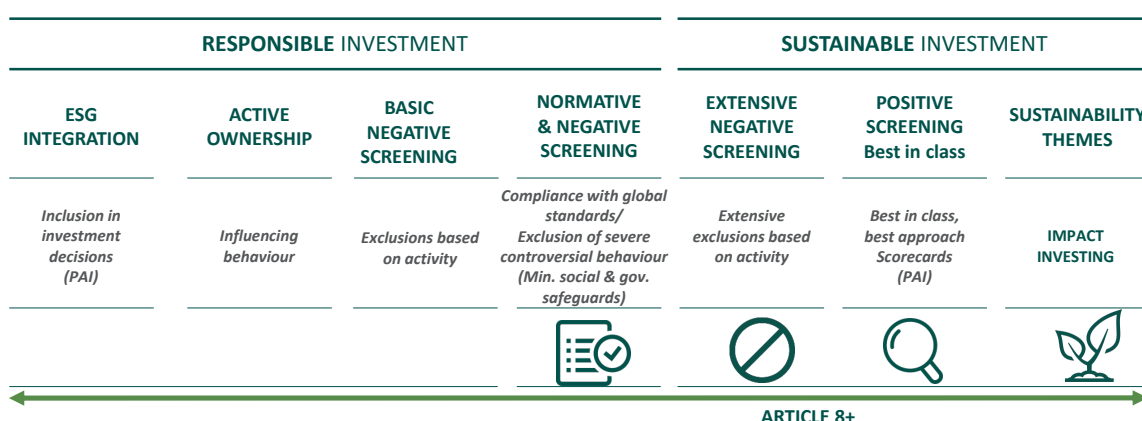

Subsequently, companies meeting the thresholds as defined in the activities excluded by DPAM's controversial activities policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

Subsequently, on a semi-annual basis, the resulting universe was subject to a "best-in-class" ranking in order to retain only the best ESG profiles of companies on a list of securities eligible for management (25% of the lowest scores were removed from the eligible list by sector).

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector. In addition, this qualitative analysis also includes consideration of the sustainability theme and the issuer's total contribution to the UN Sustainable Development Goals.

The stages of the investment process are outlined below:

## How did this financial product perform compared with the reference benchmark?

Not applicable

- How does the reference benchmark differ from a broad market index?

Not applicable

- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

- How did this financial product perform compared with the reference benchmark?

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform compared with the broad market index?**

Not applicable

## Periodic information for financial products referred to in Article 9(1 to 4a) of Regulation (EU) 2019/2088 and in the first paragraph of Article 5 of Regulation (EU) 2020/852

**Product name:**  
DPAM L BONDS EMERGING MARKETS HARD

### Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<input checked="" type="checkbox"/> <input checked="" type="radio"/> Yes	<input type="checkbox"/> <input type="radio"/> No
<input checked="" type="checkbox"/> It made sustainable <b>investments with an environmental objective</b> : 39.94%  <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy  <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments  <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made sustainable <b>investments with a social objective</b> : 54.29%	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make sustainable investments</b>

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### To what extent was the sustainable investment objective of this financial product met?

During the Reference Period (01/01/2023-31/12/2023) (hereinafter the "Reference Period"), the Sub-fund invested in countries that are committed to respecting fundamental rights (human rights, labour rights, democratic rights, etc.), protecting their environmental capital and promoting the well-being of their present and future generations. By combining a rigorous selection of countries with a formal and systematic engagement policy and prioritising recognised impact bonds (green bonds and equivalents), the Sub-fund invested in the most committed or best performing countries in terms of sustainable development.

The objective of sustainable development was pursued via:

- rigorous ESG screening, based on a proprietary sustainability model of states aligned with the Sustainable Development Goals
- promoting best practices and best efforts by defining eligibility rules based on ESG ratings;
- formal and systematic engagement with issuers.
- investment in impact securities (green bonds and similar).

During the Reference Period, the Sub-fund has not designated a benchmark to achieve its sustainable investment objective within the meaning of Article 9 of Regulation 2019/2088.

Derivative financial products, if any, used for the purpose of achieving the investment objectives of the Sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

### ● How did the sustainability indicators perform?

During the Reference Period, the Sub-fund achieved the following sustainability indicators:

- The Sub-fund invested a minimum of 40% of its assets in countries ranked in the top quartile according to the proprietary country sustainability model;
- The Sub-fund invested a maximum of 10% of its assets in countries ranked in the last quartile according to the proprietary country sustainability model;
- The Sub-fund engaged in a dialogue with the invested issuers according to the approach described in its Engagement Policy.

Thus, over the Reference Period, the Sub-fund achieved:

- The Sub-fund was not exposed to countries which do not comply with a minimum democratic requirement in line with the Investment Manager's Controversial Activity Policy (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>);
- the Sub-fund had no exposure to issuers involved in controversial activities according to the definitions and thresholds stipulated by the Manager's controversial activities policy (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>) (Controversial Activities Policy);
- the Sub-fund had no exposure to issuers facing ESG controversies of maximum severity;
- achieve a weighted average democratic score above the weighted average democratic score of the reference universe (consisting of emerging and developing countries as defined by the IMF): 74.51 (funds) versus 31.41 (benchmark) (31/12/2023).
- a greenhouse gas emission intensity of the investee countries that is higher than the greenhouse gas emission intensity of its reference universe (consisting of emerging and developing countries as defined by the IMF) as defined by regulatory technical standards: 1081.97 tCO<sub>2</sub>e/\$GDP bn (fund) versus 1005.49 tCO<sub>2</sub>e/\*GDP bn (reference universe) (31/12/2023).

For the Reference Period, the Sub-fund had 94.24% sustainable investments. These sustainable investments have contributed to the Sub-fund's partial sustainable investment objective in the following ways:

- 0% of the Sub-fund's portfolio contributed to the achievement of the environmental objectives defined by the EU Taxonomy (climate change mitigation and adaptation).
- 39.94% of the Sub-fund's portfolio contributed to the achievement of environmental objectives not aligned with the EU Taxonomy.
- 54.29% of the Sub-fund's portfolio contributed to the achievement of social objectives.

#### ● ...and compared to previous periods?

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
<b>Sustainable Investment</b>	82.64%	94.24%
<b>Environmental Investments</b>	56.80%	39.94%

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Manager ensured that the Sub-fund's sustainable investments during the Reference Period did not materially undermine an environmentally or socially sustainable investment objective by:

- excluding issuers that do not meet a democratic minimum.
- sustainability analysis of countries to identify those that show the greatest commitment to sustainable development on governance, environmental and social issues but also those that show a willingness to make progress on these issues; the resulting country rankings form the basis of the investment rules i.e. min. 40% of assets in countries ranked in the top quartile and max. 10% in countries ranked in the bottom quartile.
- an engagement process with investee countries, in accordance with its Engagement Policy, available at <https://www.dpaminvestments.com/documents/engagement-policy-enBE> (Engagement Policy). The commitments made by DPAM are also the subject of an annual report available at [https://res.cloudinary.com/degroof-petercam-asset-management/image/upload/v1614006835/DPAM\\_report\\_engagement\\_activity.pdf](https://res.cloudinary.com/degroof-petercam-asset-management/image/upload/v1614006835/DPAM_report_engagement_activity.pdf).

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

During the Reference Period, the Sub-fund has taken into consideration all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288 that are applicable to investments in sovereign or supranational issuers.

The PAIs are intrinsically linked to the Manager's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated throughout the research and investment process from its inception.

The first PAI relates to environmental issues and focuses on the greenhouse gas emission intensity of the investee countries. The indicator is an integral component of the country sustainability model that the Manager developed for its sovereign bond strategies. Consequently, it is included in the country's sustainability score and can influence it positively or negatively depending on its level and development compared to other issuer countries.

The second PAI relates to social issues and focuses on issues of social breaches. Our country sustainability model monitors a number of indicators on this issue, such as respect for civil liberties and political rights, respect for human rights and the level of violence within the country, commitment to key labour law conventions, the issue of equal opportunities and distribution of wealth, etc. These different indicators are included in the country's sustainability score and can influence it positively or negatively depending on its level and evolution compared to other emitting countries.

● **Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?**

Not applicable to sovereign bonds

**How did this financial product consider principal adverse impacts on sustainability factors?**

During the Reference Period, the Sub-fund has taken into consideration all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288 that are applicable to investments in sovereign or supranational issuers.

The PAIs are intrinsically linked to the Manager's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated throughout the research and investment process from its inception.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The first PAI relates to environmental issues and focuses on the greenhouse gas emission intensity of the investee countries. The indicator is an integral component of the country sustainability model that the Manager developed for its sovereign bond strategies. Consequently, it is included in the country's sustainability score and can influence it positively or negatively depending on its level and development compared to other issuer countries.

The second PAI relates to social issues and focuses on issues of social breaches. Our country sustainability model monitors a number of indicators on this issue, such as respect for civil liberties and political rights, respect for human rights and the level of violence within the country, commitment to key labour law conventions, the issue of equal opportunities and distribution of wealth, etc. These different indicators are included in the country's sustainability score and can influence it positively or negatively depending on its level and evolution compared to other emitting countries.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
5 1/4 REP NAMIBIA OCT25 29.10.2025	Public administration	8.84	Namibia
4.125% CHILE JUL34 05.07.2034	Public administration	6.37	Chile
SOUTH AFRICA (REPUBLIC OF) 5.750% 30-SEP-2049	Public administration	5.42	South Africa
PNG GOVT INTL BOND 8.375% 04-OCT-2028	Public administration	5.34	Papua New Guinea
COLOMBIE 8,00 22-200433	Public administration	4.91	Colombia
REPUBLIC OF POLAND 5,75 22-161132	Public administration	4.82	Poland
COLOMBIA 8,75 23-141153	Public administration	4.50	Colombia
BRAZIL REPUBLIC 6,00 20-201033	Public administration	4.48	Brazil
TEMASEK FINANCIAL 1,625 21-020831	Financial and insurance activities	3.45	Singapore

## What was the proportion of sustainability-related investments?

### ● What was the asset allocation?

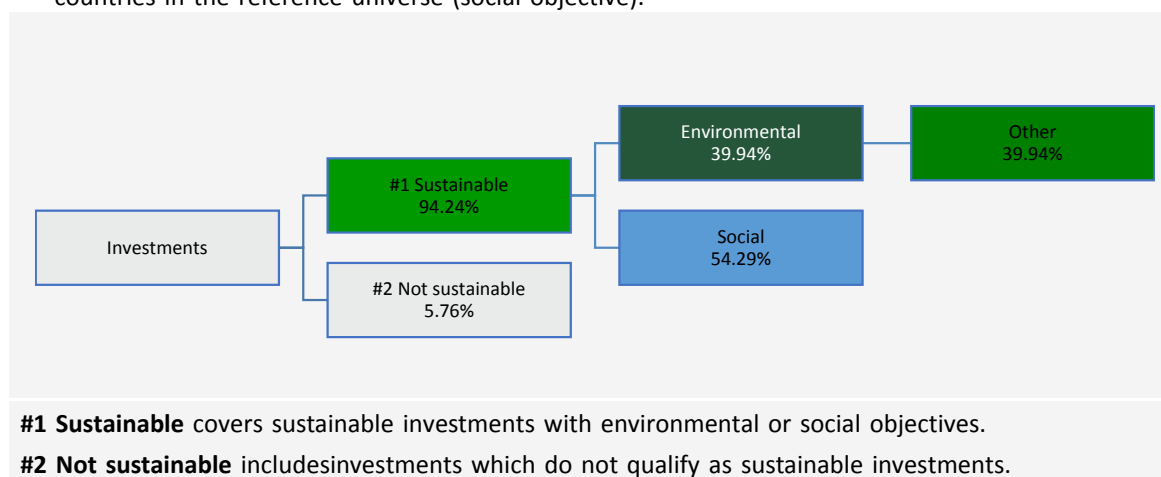

In the Reference Period, the Sub-fund invested at least 94.24% of its assets in sustainable investments with environmental or social objectives. These sustainable investments (in the table below referred to as “#1 Sustainable”):

**Asset allocation** describes the share of investments in specific assets.

- which are aimed at countries that are committed to respecting fundamental rights (human rights, labour rights, democratic rights, etc.), protecting their environmental capital and promoting the well-being of their present and future generations;
- that have an environmental objective not aligned with the European Taxonomy, due to their more advanced positioning on energy efficiency, climate change, biodiversity and emissions or
- which have a social objective, due to their more advanced positioning on issues related to wealth distribution, population and welfare, health care, education and innovation.

The percentage of the portfolio invested in sustainable investments that meet an environmental and/or social objective (#1A Sustainable) is calculated using the following cascade methodology:

- impact instruments such as green and sustainable emissions;
- bonds issued by a government whose environmental score is in the top three quartiles of the benchmark universe (environmental objective);
- bonds issued by a government whose social score is in the top three quartiles of the ranking of countries in the reference universe (social objective).

#### ● In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Public administration	Public administration and defence; compulsory social security	82.52
Financial and insurance activities	Financial service activities, except insurance and pension funding	7.95
Information and communication	Telecommunications	2.27
Derivatives	Derivatives	-0.06
Liquid assets	Liquid assets	7.32

#### ● To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

To date, the EU Taxonomy does not provide a methodology for determining the alignment of sovereign bonds with the EU Taxonomy. These bonds are therefore not covered by the EU Taxonomy or its eligibility and technical selection criteria.

#### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

☐ Yes:

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- ☐ In fossil gas
- ☐ In nuclear energy
- ☐ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

● What was the share of investments made in transitional and enabling activities?  
Not applicable

● How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?  
Not applicable

### What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

Based on the approach described below, the Sub-fund invested 39.94% of its portfolio in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy over the Reference Period.

The proprietary sustainability model is based on environmental, social and governmental aspects. In the environmental aspect, the proprietary model takes into account energy efficiency, climate change, biodiversity and country emissions. Investing in the highest ranked countries in this aspect therefore means that the Sub-fund has an environmental objective. The scores of the Environment component of the EM Manager model make it possible to rank the member states in descending order. Countries in the bottom quartile of the ranking (rounding up the number of eligible countries) do not have an environmental target. Further information on methodology and data resources is available in the information on this Sub-fund via

<https://www.funds.dpaminvestments.com/funds.html> (in particular in the sections "Methodologies" and "Data Sources and Data Processing").

### What was the share of socially sustainable investments?

Based on the approach described below, the Sub-fund invested 54.29% of its portfolio in sustainable investments with a social objective over the Reference Period.

The proprietary sustainability model is based on environmental, social and governmental aspects. In the social aspect, the proprietary model of sustainability of countries takes into account both current generations (wealth distribution, population, health care) and future generations (education and innovation). Investing in the highest ranked countries in this aspect therefore means that the Sub-fund has a social objective. Similarly, the scores for the social component (i.e. present and future generations of the proprietary model) allow the member states to be ranked in descending order. Countries in the bottom quartile of the ranking do not have a social target. Further information on methodology and data resources is available in the information on this Sub-fund via <https://www.funds.dpaminvestments.com/funds.html> (in particular in the sections "Methodologies" and "Data Sources and Data Processing").

### What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social objectives.
- issuers covered by ESG research are considered not to have environmental and/or social objectives.

Over the Reference Period, in order to diversify the portfolio, the Sub-fund was exposed to 5.76% of issuers considered not to have environmental and/or social objectives.

Over the Reference Period, for liquidity management and/or risk hedging purposes, the Sub-fund was exposed to 7.32% in liquid assets and -0.06% in derivatives. There are no minimum environmental or social guarantees on this allocation.

### What actions have been taken to attain the sustainable investment objective during the reference period?

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e:

On a half-yearly basis, a normative screening has been established on the basis of compliance with democratic minimums by excluding countries that do not meet a democratic minimum as defined by the Manager's controversial activity policy (available at

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activity Policy).

On a semi-annual basis, the eligible universe was subject to a best-in-class ranking based on the country sustainability model so as to invest a minimum of 40% of assets under management in top quartile countries and a maximum of 10% of assets under management in bottom quartile countries.

## How did this financial product perform compared to the reference sustainable benchmark?

Not applicable

- **How did the reference benchmark differ from a broad market index?**

Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

Not applicable

- **How did this financial product perform compared with the reference benchmark?**

Not applicable

- **How did this financial product perform compared with the broad market index?**

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

**Legal entity identifier:**  
549300SSFJ1T43004173

### Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/> Yes	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> No
<input checked="" type="checkbox"/> It made sustainable <b>investments with an environmental objective</b> : 45.19%  <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy  <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  <input checked="" type="checkbox"/> It made sustainable <b>investments with a social objective</b> : 50.93%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments  <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> with a social objective  <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make sustainable investments</b>

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### To what extent was the sustainable investment objective of this financial product met?

During the Reference Period (01/01/2023-31/12/2023) (hereinafter the "Reference Period"), the Sub-fund invested in countries that are committed to respecting fundamental rights (human rights, labour rights, democratic rights, etc.), protecting their environmental capital and promoting the well-being of their present and future generations. By combining a rigorous selection of countries with a formal and systematic engagement policy and prioritising recognised impact bonds (green bonds and equivalents), the Sub-fund invested in the most committed or best performing countries in terms of sustainable development.

The objective of sustainable development was pursued via:

- rigorous ESG screening, based on a proprietary sustainability model of states aligned with the Sustainable Development Goals
- promoting best practices and best efforts by defining eligibility rules based on ESG ratings;
- formal and systematic engagement with issuers and investment in impact securities (green bonds and similar).

During the Reference Period, the Sub-fund has not designated a benchmark to achieve its sustainable investment objective within the meaning of Article 9 of Regulation 2019/2088.

Derivative financial products, if any, used for the purpose of achieving the investment objectives of the Sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

### ● How did the sustainability indicators perform?

During the Reference Period, the Sub-fund achieved the following sustainability indicators:

- The Sub-fund invested a minimum of 40% of its assets in countries ranked in the top quartile according to the proprietary country sustainability model;

- The Sub-fund invested a maximum of 10% of its assets in countries ranked in the last quartile according to the proprietary country sustainability model;
- The Sub-fund engaged in a dialogue with the invested issuers according to the approach described in its Engagement Policy (available at <https://www.dpaminvestments.com/documents/engagement-policy-enBE> (Engagement policy).

Thus, over the Reference Period, the Sub-fund achieved:

- The Sub-fund was not exposed to countries which do not comply with a minimum democratic requirement in line with the Investment Manager's Controversial Activity Policy (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>);
- the Sub-fund had no exposure to issuers involved in controversial activities according to the definitions and thresholds stipulated by the Manager's Controversial Activities Policy (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy);
- the Sub-fund had no exposure to issuers facing ESG controversies of maximum severity;
- The Sub-Fund has demonstrated a weighted average democratic score above the weighted average democratic score of the reference universe (consisting of emerging and developing countries as defined by the International Monetary Fund) and 70.53 (funds) versus 31.41 (benchmark) (31/12/2023).
- The Sub-Fund has demonstrated a greenhouse gas emission intensity of the investee countries that is higher than the greenhouse gas emission intensity of its reference universe (consisting of emerging and developing countries as defined by the International Monetary Fund) as defined by regulatory technical standards. 1131.29 tCO<sub>2</sub>e/\$GDP bn (fund) versus 1005.49 tCO<sub>2</sub>e/\$GDP bn (reference universe) (31/12/2023).

For the Reference Period, the Sub-fund had 96.12% sustainable investments. These sustainable investments have contributed to the Sub-fund's partial sustainable investment objective in the following ways:

- 0% of the Sub-fund's portfolio contributed to the achievement of the environmental objectives defined by the EU Taxonomy (climate change mitigation and adaptation).
- 45.19% of the Sub-fund's portfolio contributed to the achievement of environmental objectives not aligned with the EU Taxonomy.
- 50.93% of the Sub-fund's portfolio contributed to the achievement of social objectives.

#### ● ...and compared to previous periods?

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
<b>Sustainable Investment</b>	85.86%	96.12%
<b>Environmental Investments</b>	63.86%	45.19%
<b>Social Investments</b>	71.65%	50.93%
<b>Other Environmental Investments</b>	63.86%	45.19%

Reference period	2022	2023
<b>Sustainability indicator a.</b>	No exposure	No exposure
<b>Sustainability indicator b.</b>	No exposure	No exposure
<b>Sustainability indicator c.</b>	No exposure	No exposure
<b>Sustainability indicator d.</b>	Sub-fund: 63.40 Benchmark: 32.20	Sub-fund: 70.53 Benchmark: 31.41
<b>Sustainability indicator e.</b>	Sub-fund: 1714.00 Benchmark: 6466.00	Sub-fund: 1131.29 Benchmark: 1005.49

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Manager ensured that the Sub-fund's sustainable investments during the Reference Period did not materially undermine an environmentally or socially sustainable investment objective by:

- excluding issuers that do not meet minimum democratic requirements.
- sustainability analysis of countries to identify those that show the greatest commitment to sustainable development on governance, environmental and social issues but also those that show a willingness to make progress on these issues; the resulting country rankings form the basis of the investment rules i.e. minimum of 40% of assets in countries ranked in the top quartile and maximum of 10% in countries ranked in the bottom quartile.
- an engagement process with investee countries, in accordance with its Engagement Policy, available at <https://www.dpaminvestments.com/documents/engagement-policy-enBE> (Engagement Policy). The commitments made by DPAM are also the subject of an annual report available at [https://res.cloudinary.com/degroof-petercam-asset-management/image/upload/v1614006835/DPAM\\_report\\_engagement\\_activity.pdf](https://res.cloudinary.com/degroof-petercam-asset-management/image/upload/v1614006835/DPAM_report_engagement_activity.pdf).

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

During the Reference Period, the Sub-fund has taken into consideration all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288 that are applicable to investments in sovereign or supranational issuers.

The PAIs are intrinsically linked to the Manager's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated throughout the research and investment process from its inception.

The first PAI relates to environmental issues and focuses on the greenhouse gas emission intensity of the investee countries. The indicator is an integral component of the country sustainability model that the Manager developed for its sovereign bond strategies. Consequently, it is included in the country's sustainability score and can influence it positively or negatively depending on its level and development compared to other issuer countries.

The second PAI relates to social issues and focuses on issues of social breaches. Our country sustainability model monitors a number of indicators on this issue, such as respect for civil liberties and political rights, respect for human rights and the level of violence within the country, commitment to key labour law conventions, the issue of equal opportunities and distribution of wealth, etc. These different indicators are included in the country's sustainability score and can influence it positively or negatively depending on its level and evolution compared to other emitting countries.

● **Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?**

Not applicable to sovereign bonds.

**How did this financial product consider principal adverse impacts on sustainability factors?**

During the Reference Period, the Sub-fund has taken into consideration all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288 that are applicable to investments in sovereign or supranational issuers.

The PAIs are intrinsically linked to the Manager's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated throughout the research and investment process from its inception.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The first PAI relates to environmental issues and focuses on the greenhouse gas emission intensity of the investee countries. The indicator is an integral component of the country sustainability model that the Manager developed for its sovereign bond strategies. Consequently, it is included in the country's sustainability score and can influence it positively or negatively depending on its level and development compared to other issuer countries.

The second PAI relates to social issues and focuses on issues of social breaches. Our country sustainability model monitors a number of indicators on this issue, such as respect for civil liberties and political rights, respect for human rights and the level of violence within the country, commitment to key labour law conventions, the issue of equal opportunities and distribution of wealth, etc. These different indicators are included in the country's sustainability score and can influence it positively or negatively depending on its level and evolution compared to other emitting countries.

## What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31/12/2023

Largest investments	Sector	% of assets	Country

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

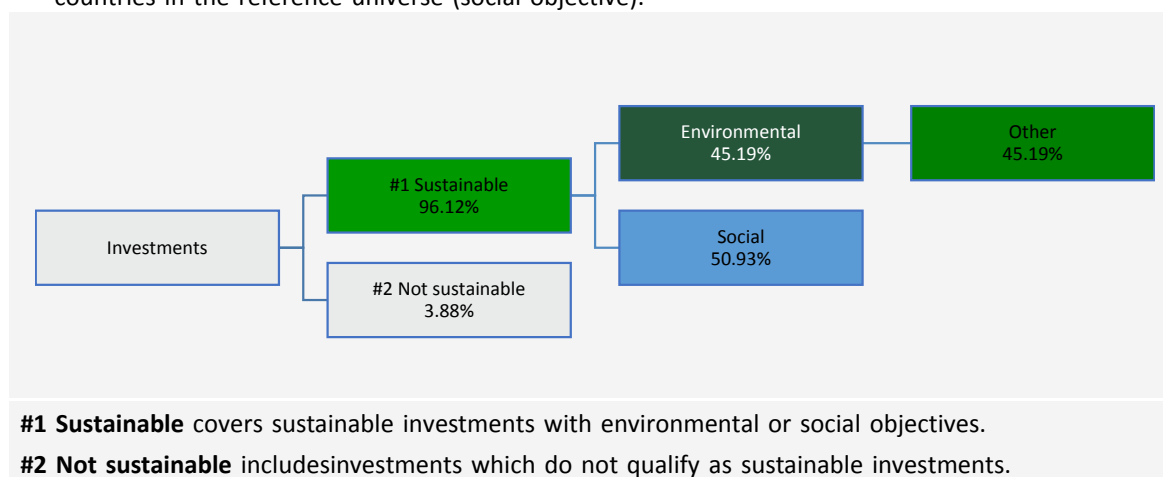

In the Reference Period, the Sub-fund invested at least 96.12% of its assets in sustainable investments with environmental or social objectives. These sustainable investments (in the table below referred to as “#1 Sustainable”):

Asset allocation describes the share of investments in specific assets.

- which are aimed at countries that are committed to respecting fundamental rights (human rights, labour rights, democratic rights, etc.), protecting their environmental capital and promoting the well-being of their present and future generations;
- that have an environmental objective not aligned with the European Taxonomy, due to their more advanced positioning on energy efficiency, climate change, biodiversity and emissions or
- which have a social objective, due to their more advanced positioning on issues related to wealth distribution, population and welfare, health care, education and innovation.

The percentage of the portfolio invested in sustainable investments that meet an environmental and/or social objective (#1A Sustainable) is calculated using the following cascade methodology:

- impact instruments such as green and sustainable emissions;
- bonds issued by a government whose environmental score is in the top three quartiles of the benchmark universe (environmental objective);
- bonds issued by a government whose social score is in the top three quartiles of the ranking of countries in the reference universe (social objective).

#### ● In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Public administration	Public administration and defence; compulsory social security	92.52
Activities of extraterritorial organisations and bodies	Activities of extraterritorial organisations and bodies	3.80
Financial and insurance activities	Financial service activities, except insurance and pension funding	0.65
Derivatives	Derivatives	0.03
Liquid assets	Liquid assets	2.99

#### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

To date, the EU Taxonomy does not provide a methodology for determining the alignment of sovereign bonds with the EU Taxonomy. These bonds are therefore not covered by the EU Taxonomy or its eligibility and technical selection criteria.

#### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

☐ Yes:

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions

and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- ☐ In fossil gas
- ☐ In nuclear energy
- ☐ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

● What was the share of investments made in transitional and enabling activities?  
Not applicable

● How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?  
Not applicable

### What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

Based on the approach described below, the Sub-fund invested 45.19% of its portfolio in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy over the Reference Period.

The proprietary sustainability model is based on environmental, social and governmental aspects. In the environmental aspect, the proprietary model takes into account energy efficiency, climate change, biodiversity and country emissions. Investing in the highest ranked countries in this aspect therefore means that the Sub-fund has an environmental objective. The scores of the Environment component of the EM Manager model make it possible to rank the member states in descending order. Countries in the bottom quartile of the ranking (rounding up the number of eligible countries) do not have an environmental target. Further information on methodology and data resources is available in the information on this Sub-fund via

<https://www.funds.dpaminvestments.com/funds.html> (in particular in the sections "Methodologies" and "Data Sources and Data Processing").

### What was the share of socially sustainable investments?

Based on the approach described below, the Sub-fund invested 50.93% of its portfolio in sustainable investments with a social objective over the Reference Period.

The proprietary sustainability model is based on environmental, social and governmental aspects. In the social aspect, the proprietary model of sustainability of countries takes into account both current generations (wealth distribution, population, health care) and future generations (education and innovation). Investing in the highest ranked countries in this aspect therefore means that the Sub-fund has a social objective. Similarly, the scores for the social component (i.e. present and future generations of the proprietary model) allow the member states to be ranked in descending order. Countries in the bottom quartile of the ranking do not have a social target. Further information on methodology and data resources is available in the information on this Sub-fund via <https://www.funds.dpaminvestments.com/funds.html> (in particular in the sections "Methodologies" and "Data Sources and Data Processing").

### What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social objectives.
- issuers covered by ESG research are considered not to have environmental and/or social objectives.

Over the Reference Period, in order to diversify the portfolio, the Sub-fund was exposed to 3.88% of issuers considered not to have environmental and/or social objectives.

Over the Reference Period, for liquidity management and/or risk hedging purposes, the Sub-fund was exposed to 2.99% in liquid assets and 0.03% in derivatives. There are no minimum environmental or social guarantees on this allocation.

### What actions have been taken to attain the sustainable investment objective during the reference period?

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e:

On a half-yearly basis, a normative screening has been established on the basis of compliance with democratic minimums by excluding countries that do not meet a democratic minimum as defined by the Manager's controversial activity policy (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activity Policy)).

On a semi-annual basis, the eligible universe was subject to a best-in-class ranking based on the country sustainability model so as to invest a minimum of 40% of assets under management in top quartile countries and a maximum of 10% of assets under management in bottom quartile countries.

## How did this financial product perform compared to the reference sustainable benchmark?

### Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

#### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b>	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: ____%</b>  <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments  <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made <b>sustainable investments with a social objective: ____%</b>	<input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make sustainable investments</b>

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

#### To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices and best efforts.

During the Reference Period, derivative products, if any, used for the purpose of achieving the investment objectives of the sub-fund were not used for the purpose of promoting environmental and/or social characteristics.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

#### ● How did the sustainability indicators perform?

Over the Reference Period, the sub-fund achieved the following sustainability indicators:

At the level of direct line investments (corporate bonds):

- a) the Sub-fund was not exposed to companies considered to be below Global Standards during the reporting period;

- b) the Sub-fund was not exposed to companies involved in excluded controversial activities as defined by the Manager's Controversial Activities Policy (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>) (Controversial Activities Policy);
- c) the Sub-fund has not been exposed to companies facing extremely serious controversies around environmental or social issues.

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
E/S characteristics	97.20%	99.51%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Not applicable

*The EU Taxonomy sets out a "does not significantly harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "does not significantly harm" principle only applies to the underlying investments of the financial product that consider the European Union's criteria regarding environmentally sustainable economic activities.

*The underlying investments of the remainder of this financial product do not consider the European Union's criteria regarding environmentally sustainable economic activities.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

- For investments in corporate bonds:

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to the Manager's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social

and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

This commitment is incorporated throughout the research and investment process from its inception. In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund’s construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

- 1) Firstly, with regard to environmental PAIs:
  - a) they have been analyzed and monitored at the level of the invested issuers, particularly with regard to PAI related to greenhouse gas emissions and energy performance, notably through the Manager’s research in the framework of the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD). Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute the most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.
  - b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not meet global standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity are thus excluded from the portfolio in advance.

The exclusion filter for companies involved in controversial activities (in accordance with DPAM’s Controversial Activities Policy (available at

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy). The exclusion of companies involved in thermal coal production, for example, allows for better coverage of indicators such as biodiversity and greenhouse gas emissions. The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company’s operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

- 2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

- a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises are de facto excluded from the investment universe.

- b) the exclusion filter for companies involved in controversial activities (in accordance with the Manager’s Controversial Activities Policy available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy). In this way, companies involved in controversial armaments are directly excluded from the investment universe.

In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

### What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31/12/2023

## What was the proportion of sustainability-related investments?

**Asset allocation**  
describes the share of investments in specific assets.

### What was the asset allocation?

By applying the investment strategy described above, the Sub-fund invests 99.51% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S characteristics").

### In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Financial and insurance activities	Financial service activities, except insurance and pension funding	46.93

Sector	Sub-sector	% assets
Electricity, gas, steam and air conditioning supply	Electricity, gas, steam and air conditioning supply	7.81
Real estate activities	Real estate activities	6.60
Financial and insurance activities	Activities auxiliary to financial services and insurance activities	5.05
Information and communication	Telecommunications	4.54
Transportation and storage	Postal and courier activities	3.38
Manufacturing	Manufacture of fabricated metal products, except machinery and equipment	2.69
Administrative and support service activities	Rental and leasing activities	2.63
Manufacturing	Manufacture of food products	2.34
Manufacturing	Manufacture of other transport equipment	1.67
Manufacturing	Other manufacturing	1.54
Manufacturing	Manufacture of computer, electronic and optical products	1.53
Manufacturing	Manufacture of basic pharmaceutical products and pharmaceutical preparations	1.33
Manufacturing	Manufacture of chemicals and chemical products	1.28
Manufacturing	Manufacture of wearing apparel	1.26
Other service activities	Other personal service activities	1.22
Administrative and support service activities	Services to buildings and landscape activities	1.16
Transportation and storage	Land transport and transport via pipelines	1.07
Administrative and support service activities	Travel agency, tour operator reservation service and related activities	0.95
Manufacturing	Manufacture of beverages	0.81
Manufacturing	Manufacture of other non-metallic mineral products	0.79
Professional, scientific and technical activities	Architectural and engineering activities; technical testing and analysis	0.73
Manufacturing	Manufacture of rubber and plastic products	0.67
Wholesale and retail trade; repair of motor vehicles and motorcycles	Wholesale trade, except of motor vehicles and motorcycles	0.61
Accommodation and food service activities	Food and beverage service activities	0.49
Manufacturing	Manufacture of textiles	0.44
Liquid assets	Liquid assets	0.49

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Not applicable

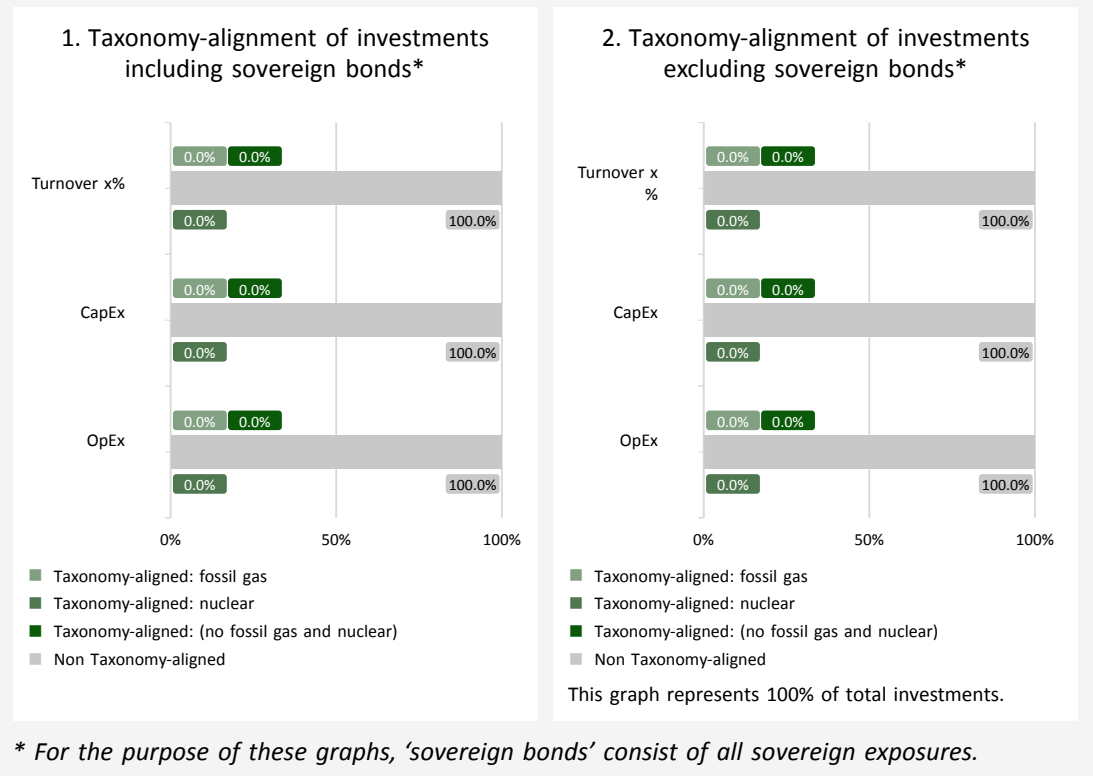

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**
- ☐ Yes:
- ☐ In fossil gas ☐ In nuclear energy
- ☐ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **What was the share of investments made in transitional and enabling activities?**
- Not applicable

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

- What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable

Are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- What was the share of socially sustainable investments?**

Not applicable

- What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets (excluding treasury bonds)
- Derivative instruments
- Collective investment schemes
- issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for the purposes of achieving its investment objectives, portfolio diversification, liquidity management and/or risk hedging, the Sub-fund was exposed to 0.49% in liquid assets. There are no minimum environmental or social guarantees on this allocation.

- What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e.:

- For direct line investments (corporate bonds):

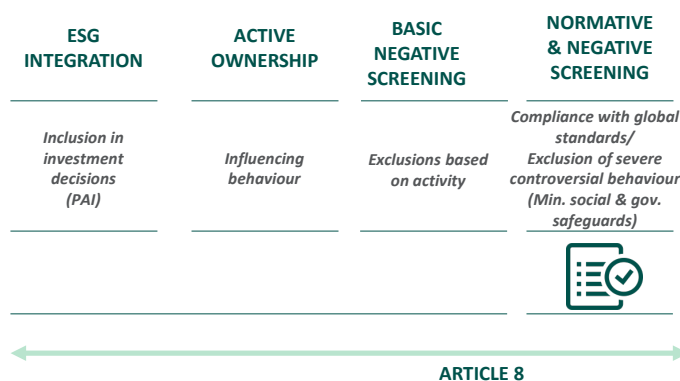

On a quarterly basis, a normative screening has been established based on compliance with global standards.

Secondly, companies meeting the thresholds as defined in the activities excluded by the responsible investment policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector.

The stages of the investment process are outlined below:

**How did this financial product perform compared with the reference benchmark?**

Not applicable

- **How does the reference benchmark differ from a broad market index?**

Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

- **How did this financial product perform compared with the reference benchmark?**

Not applicable

- **How did this financial product perform compared with the broad market index?**

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Periodic information for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices and best efforts.

During the Reference Period, derivative products, if any, used for the purpose of achieving the investment objectives of the sub-fund were not used for the purpose of promoting environmental and/or social characteristics.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

#### ● How did the sustainability indicators perform?

Over the Reference Period, the sub-fund achieved the following sustainability indicators:

At the level of direct line investments (corporate bonds):

- a) the Sub-fund was not exposed to companies considered to be below Global Standards during the reporting period;

b) the Sub-fund was not exposed to companies involved in excluded controversial activities as defined by the Manager's Controversial Activities Policy (available at [www.dpamfunds.com](http://www.dpamfunds.com) (Controversial Activities Policy);

c) the Sub-fund has not been exposed to companies facing extremely serious controversies around environmental or social issues.

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
E/S characteristics	97.27%	93.38%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Not applicable

*The EU Taxonomy sets out a "does not significantly harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "does not significantly harm" principle only applies to the underlying investments of the financial product that consider the European Union's criteria regarding environmentally sustainable economic activities.

*The underlying investments of the remainder of this financial product do not consider the European Union's criteria regarding environmentally sustainable economic activities.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

• For investments in corporate bonds:

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to the Manager's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters,

This commitment is incorporated throughout the research and investment process from its inception. In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

- 1) Firstly, with regard to environmental PAIs:
- a) they have been analyzed and monitored at the level of the invested issuers, particularly with regard to PAI related to greenhouse gas emissions and energy performance, notably through the Manager's research in the framework of the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD). Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute the most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.
  - b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not meet global standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity are thus excluded from the portfolio in advance.

The exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (available at

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy). The exclusion of companies involved in thermal coal production, for example, allows for better coverage of indicators such as biodiversity and greenhouse gas emissions. The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

- 2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:
- a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises are de facto excluded from the investment universe.
  - b) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy). In this way, companies involved in controversial armaments are directly excluded from the investment universe.

In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

The issue of board gender diversity is addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

By applying the investment strategy described above, the Sub-fund invests 93.38% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S characteristics").

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Financial and insurance activities	Financial service activities, except insurance and pension funding	33.27
Information and communication	Telecommunications	12.48
Manufacturing	Manufacture of motor vehicles, trailers and semi-trailers	5.23
Wholesale and retail trade; repair of motor vehicles and motorcycles	Retail trade, except of motor vehicles and motorcycles	3.88
Manufacturing	Manufacture of basic pharmaceutical products and pharmaceutical preparations	3.83
Administrative and support service activities	Rental and leasing activities	3.52
Administrative and support service activities	Security and investigation activities	3.42
Water supply; sewerage; waste management and remediation activities	Waste collection, treatment and disposal activities; materials recovery	1.97
Accommodation and food service activities	Accommodation	1.95
Electricity, gas, steam and air conditioning supply	Electricity, gas, steam and air conditioning supply	1.95
Manufacturing	Manufacture of textiles	1.86
Water supply; sewerage; waste management and remediation activities	Water collection, treatment and supply	1.76
Administrative and support service activities	Travel agency, tour operator reservation service and related activities	1.68
Information and communication	Information service activities	1.52
Information and communication	Programming and broadcasting activities	1.43
Manufacturing	Manufacture of computer, electronic and optical products	1.39
Manufacturing	Manufacture of food products	1.37
Manufacturing	Manufacture of rubber and plastic products	1.29
Financial and insurance activities	Activities auxiliary to financial services and insurance activities	1.29
Manufacturing	Manufacture of chemicals and chemical products	1.27

HUMAN HEALTH AND SOCIAL WORK ACTIVITIES	Human health activities	0.08
Liquid assets	Liquid assets	6.62

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

#### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☐ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

● What was the share of investments made in transitional and enabling activities?

Not applicable

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

Are sustainable investments with an environmental objective that **do not take into account the criteria** for

**What was the share of socially sustainable investments?**

Not applicable

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets (excluding treasury bonds)
- Derivative instruments
- Collective investment schemes
- issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for the purposes of achieving its investment objectives, portfolio diversification, liquidity management and/or risk hedging, the Sub-fund was exposed to 6.62% in liquid assets. There are no minimum environmental or social guarantees on this allocation.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e.:

- For direct line investments (corporate bonds):

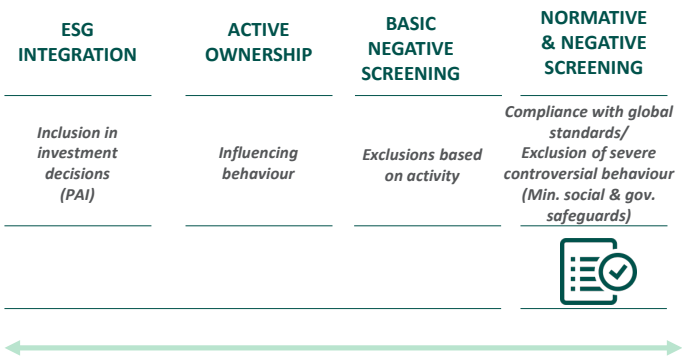

On a quarterly basis, a normative screening has been established based on compliance with global standards.

Secondly, companies meeting the thresholds as defined in the activities excluded by the responsible investment policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector.

The stages of the investment process are outlined below:

## How did this financial product perform compared with the reference benchmark?

Not applicable

- **How does the reference benchmark differ from a broad market index?**

Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

- **How did this financial product perform compared with the reference benchmark?**

Not applicable

- **How did this financial product perform compared with the broad market index?**

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Periodic information for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:**  
DPAM L BONDS EUR HIGH YIELD SHORT TERM

**Legal entity identifier:**  
549300U2IHEFSZPGWH97

### Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

#### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b>	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: ____%</b> <div style="margin-left: 40px;"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy                 </div> <div style="margin-left: 40px;"> <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy                 </div> <input type="checkbox"/> It made <b>sustainable investments with a social objective: ____%</b>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments <div style="margin-left: 40px;"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy                 </div> <div style="margin-left: 40px;"> <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy                 </div> <div style="margin-left: 40px;"> <input type="checkbox"/> with a social objective                 </div> <input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make sustainable investments</b>

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

#### To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices and best efforts.

During the Reference Period, derivative products, if any, used for the purpose of achieving the investment objectives of the sub-fund were not used for the purpose of promoting environmental and/or social characteristics.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

#### ● How did the sustainability indicators perform?

Over the Reference Period, the sub-fund achieved the following sustainability indicators:

1. At the level of direct line investments (corporate bonds):

a) the Sub-fund was not exposed to companies considered to be below Global Standards during the reporting period;

b) the Sub-fund was not exposed to companies involved in excluded controversial activities as defined by the Manager's Controversial Activities Policy (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>) (Controversial Activities Policy);

c) the Sub-fund has not been exposed to companies facing extremely serious controversies around environmental or social issues.

2. At the level of direct line investments (sovereign bonds):

The Sub-fund has not been exposed to issuers that do not meet minimum democratic requirements.

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
E/S characteristics	96.16%	98.87%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Not applicable

*The EU Taxonomy sets out a "does not significantly harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "does not significantly harm" principle only applies to the underlying investments of the financial product that consider the European Union's criteria regarding environmentally sustainable economic activities.

*The underlying investments of the remainder of this financial product do not consider the European Union's criteria regarding environmentally sustainable economic activities.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

• For investments in corporate bonds:

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

**Principal adverse impacts** are the most significant negative impacts of investment

decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The PAIs are intrinsically linked to the Manager’s commitment to reduce the negative impact of the Sub-fund’s investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth.

This commitment is incorporated throughout the research and investment process from its inception. In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund’s construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

- 1) Firstly, with regard to environmental PAIs:
  - a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAIs related to greenhouse gas emissions and energy performance, including through the Manager’s research in the context of the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD). Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.
  - b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not meet global standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity are thus excluded from the portfolio in advance.

The exclusion filter for companies involved in controversial activities (in accordance with DPAM’s Controversial Activities Policy (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy)). The exclusion of companies involved in thermal coal production, for example, allows for better coverage of indicators such as biodiversity and greenhouse gas emissions.

The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company’s operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

- 2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:
  - a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises are de facto excluded from the investment universe.
  - b) the exclusion filter for companies involved in controversial activities (in accordance with the Manager’s Controversial Activities Policy available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy)). In this way, companies involved in controversial armaments are directly excluded from the investment universe.
  - c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

What were the top investments of this financial product?

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☐ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents 100% of total investments.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Not applicable

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**  
Not applicable

- What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**  
Not applicable

Are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- What was the share of socially sustainable investments?**  
Not applicable

- What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**  
Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:
  - Liquid assets (excluding treasury bonds)
  - Derivative instruments
  - Collective investment schemes
  - issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.The Sub-fund may invest or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.  
Over the Reference Period, for the purposes of achieving its investment objectives, portfolio diversification, liquidity management and/or risk hedging, the Sub-fund was exposed to 1.13% in liquid assets. There are no minimum environmental or social guarantees on this allocation.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e.:

- For direct line investments (corporate bonds):

On a quarterly basis, a normative screening has been established based on compliance with global standards.

Secondly, companies meeting the thresholds as defined in the activities excluded by the responsible investment policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

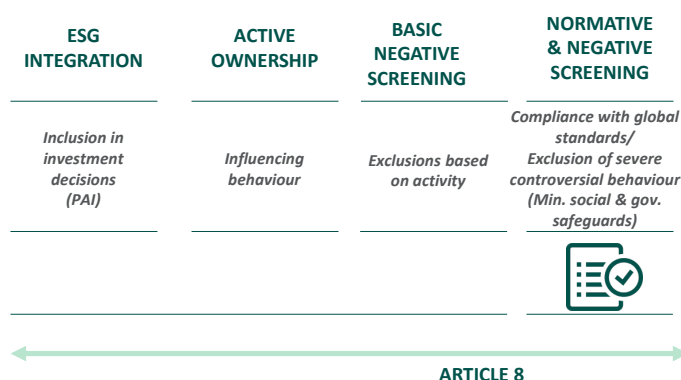

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector.

- For investments in sovereign bonds:

The sub-fund did not invest in countries considered not to meet minimum democratic requirements. To determine whether a country does not meet this minimum requirement the Manager applied a methodology that is based primarily on the classifications of the International NGO Freedom House (“not free”) and The Economist Intelligence Unit (“authoritarian regime”).

The list of countries was reviewed on a semi-annual basis and provided to management via the management systems so that it could not give transaction orders on papers issued by these excluded countries.

The stages of the investment process are outlined below:

## How did this financial product perform compared with the reference benchmark?

Not applicable

- How does the reference benchmark differ from a broad market index?

Not applicable

- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

- How did this financial product perform compared with the reference benchmark?

Not applicable

- How did this financial product perform compared with the broad market index?

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Periodic information for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:**  
DPAM L BONDS EUR INFLATION LINKED

**Legal entity identifier:**  
391200BNS4QDFDHVPP76

### Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

#### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b>	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: ____%</b> <div style="margin-left: 40px;"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy                 </div> <div style="margin-left: 40px;"> <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy                 </div> <input type="checkbox"/> It made <b>sustainable investments with a social objective: ____%</b>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments <div style="margin-left: 40px;"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy                 </div> <div style="margin-left: 40px;"> <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy                 </div> <div style="margin-left: 40px;"> <input type="checkbox"/> with a social objective                 </div> <input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make sustainable investments</b>

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- excluding countries that do not respect a minimum of democratic requirements.
- systematically applying a policy for impact bonds (such as green and social bonds).

Derivative products, if any, used for the purpose of achieving the investment objectives of the Sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

#### ● How did the sustainability indicators perform?

Over the Reference Period, the sub-fund achieved the following sustainability indicators:

- a) The sub-fund has not been exposed to issuers that do not meet minimum democratic requirements.
- b) The percentage of impact bonds ("Green, Social & Sustainability bonds") in the portfolio was higher than the benchmark. Over the Reference Period, the percentage of impact bonds ("Green, Social & Sustainability bonds") in the portfolio was 3.87% while the benchmark was 1.22%.

#### ● ...and compared to previous periods?

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
E/S characteristics	99.74%	99.72%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Impact bonds	Sub-fund: 2.70% Benchmark: 0.82%	Sub-fund: 3.87% Benchmark: 1.22%

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

- *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Not applicable

*The EU Taxonomy sets out a "does not significantly harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "does not significantly harm" principle only applies to the underlying investments of the financial product that consider the European Union's criteria regarding environmentally sustainable economic activities.

*The underlying investments of the remainder of this financial product do not consider the European Union's criteria regarding environmentally sustainable economic activities.*

## How did this financial product consider principal adverse impacts on sustainability factors?

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

During the Reference Period, the sub-fund has taken into consideration all the principal adverse impacts on sustainability factors (hereinafter "PAI") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288 that are applicable to investments in sovereign or supranational issuers.

The PAIs are intrinsically linked to the Manager's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated into the entire research and investment process.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

- The first PAI relates to environmental issues and focuses on the greenhouse gas emission intensity of the investee countries. The indicator is an integral component of the country sustainability model that the Manager developed for its sovereign bond strategies. Consequently, it is included in the country's sustainability score and can influence it positively or negatively depending on its level and development compared to other issuer countries.

- The second PAI relates to social issues and focuses on issues of social breaches. The country's sustainability model observes several indicators on this issue, such as respect for civil liberties and political rights, respect for human rights and the level of violence within the country, commitment to major labour conventions, the issue of equal opportunity and distribution of wealth, etc. These different indicators are included in the country's sustainability score and can influence it positively or negatively depending on its level and evolution compared to other issuing countries.

During the Reference Period, a dialogue was initiated on the results of the sustainability scores with some countries according to the Manager's engagement policy via the link

<https://www.dpaminvestments.com/documents/engagement-policy-enBE> (Engagement policy).

Details of the dialogues with countries and companies will be published in an annual report in the first quarter of 2023 on the DPAM website (<https://www.funds.dpaminvestments.com/funds.html>).

The manager's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at

<https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE>

(Sustainable and Responsible Investments Policy) and

<https://www.dpaminvestments.com/documents/tcfd-report-enBE> (TCFD Report).

## What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31/12/2023

## What was the proportion of sustainability-related investments?

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

By applying the investment strategy described above, the Sub-fund invests 99.72% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S characteristics").

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

### In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Public administration	Public administration and defence; compulsory social security	99.72
Derivatives	Derivatives	-0,01
Liquid assets	Liquid assets	0.29

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

#### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☐ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

● What was the share of investments made in transitional and enabling activities?

Not applicable

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

Are sustainable investments with an environmental objective that **do not take into account the criteria** for

**What was the share of socially sustainable investments?**

Not applicable

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets (excluding treasury bonds)
- Derivative instruments
- Collective investment schemes
- issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for the purposes of achieving its investment objectives, portfolio diversification, liquidity management and/or risk hedging, the Sub-fund was exposed to 0.29% in liquid assets and -0.01% in derivatives. There are no minimum environmental or social guarantees on this allocation.

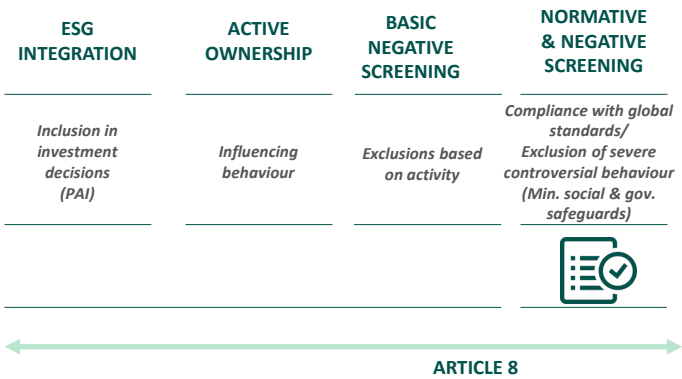

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e.:

The sub-fund did not invest in countries considered not to meet minimum democratic requirements.

To determine whether a country does not meet this minimum requirement the Manager applied a methodology that is based primarily on the classifications of the International NGO Freedom House ("not free") and The Economist Intelligence Unit ("authoritarian regime"). The list of countries was reviewed on a semi-annual basis and provided to management via the management systems so that it could not give transaction orders on papers issued by these excluded countries.

The stages of the investment process are outlined below:

## How did this financial product perform compared with the reference benchmark?

Not applicable

- **How does the reference benchmark differ from a broad market index?**

Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

- **How did this financial product perform compared with the reference benchmark?**

Not applicable

- **How did this financial product perform compared with the broad market index?**

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Periodic information for financial products referred to in Article 9(1 to 4a) of Regulation (EU) 2019/2088 and in the first paragraph of Article 5 of Regulation (EU) 2020/852

**Product name:**  
DPAM L BONDS EUR QUALITY SUSTAINABLE

**Legal entity identifier:**  
5493000Q6B37KU22O573

### Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

#### Did this financial product have a sustainable investment objective?

<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <b>Yes</b>		<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <b>No</b>	
<input checked="" type="checkbox"/>	It made sustainable investments with an <b>environmental objective: 73.80%</b>	<input type="checkbox"/>	It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
<input checked="" type="checkbox"/>	in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/>	in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/>	It made sustainable investments with a <b>social objective: 12.15%</b>	<input type="checkbox"/>	with a social objective
		<input type="checkbox"/>	It promoted E/S characteristics, but <b>did not make sustainable investments</b>

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### To what extent was the sustainable investment objective of this financial product met?

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund aimed to invest in companies that contribute through their products and services to the 17 Sustainable Development Goals (SDGs) defined by the United Nations, and to advance companies on their contribution to sustainable development and environmental, social and governance (ESG) issues. The investment universe is narrowed: the portfolio focuses on companies with a net positive contribution (as defined in the prospectus), i.e. (1) whose core business is the development of products and services that contribute to the achievement of sustainable development goals (SDG) and (2) the most advanced in terms of sustainability and ESG risk engagement. Some of the environmental objectives pursued by the Sub-fund contribute to climate change mitigation and adaptation as defined by Regulation (EU) 2019/2088.

During the Reference Period, the Sub-fund has not designated a benchmark to achieve its sustainable investment objective within the meaning of Article 9 of Regulation 2019/2088.

Derivative financial products, if any, used for the purpose of achieving the investment objectives of the Sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

#### ● How did the sustainability indicators perform?

During the Reference Period, the Sub-fund achieved the following sustainability indicators:

- the Sub-fund has not been exposed to issuers considered to be non-compliant with Global Standards;
- the Sub-fund had no exposure to issuers involved in controversial activities according to the definitions and thresholds stipulated by the Manager's controversial activities policy (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>) (Controversial Activities Policy);
- the Sub-fund had no exposure to issuers facing ESG controversies of maximum severity;

d. the Sub-fund had a higher than benchmark exposure (excluding liquidity) to companies aligned with the Science Based Targets initiative (SBTi) or equivalent. 77.88 (funds) versus 64.49 (benchmark) (31/12/2023).

e. the Sub-fund has a better ESG profile than that of its investment universe, prior to the application of the ESG and sustainable investment selection methodology over a period of 3 years: 62.38 (funds) versus 59.91 (benchmark) (31/12/2023).

For the Reference Period, the Sub-fund sought to have at least 80% sustainable investments i.e. investments aimed at:

- companies aligned with one of the first two objectives of the EU taxonomy (climate change mitigation and adaptation);
- companies aiming to make a net positive contribution to the United Nations (UN) Sustainable Development Goals ("SDGs"), which are environmental in nature;
- companies aiming to make a net positive contribution to the social SDGs.

In addition, at the level of the overall portfolio, a minimum of 50% of companies aligned with the EU Taxonomy or in net positive contribution on all the SDGs and a portfolio in net positive contribution on all 17 SDGs.

For the Reference Period, the Sub-fund had 85.95% sustainable investments. These sustainable investments have contributed to the Sub-fund's partial sustainable investment objective in the following ways:

- 6.35% of the Sub-fund's portfolio contributed to the achievement of the environmental objectives defined by the EU Taxonomy (climate change mitigation and adaptation);
- 67.45% of the Sub-fund's portfolio contributed to the achievement of environmental objectives not aligned with the EU Taxonomy.
- 12.15% of the Sub-fund's portfolio contributed to the achievement of social objectives.
- 78.27% of the Sub-fund's portfolio was invested in companies making a net positive contribution to the SDGs (including impact bonds).

#### ● ...and compared to previous periods?

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
<b>Sustainable Investment</b>	97.89%	85.95%
<b>Environmental Investments</b>	51.67%	73.8%
<b>Social Investments</b>	68.08%	12.15%
<b>Other Environmental Investments</b>	46.31%	67.45%

Reference period	2022	2023
<b>Sustainability indicator a.</b>	No exposure	No exposure
<b>Sustainability indicator b.</b>	No exposure	No exposure
<b>Sustainability indicator c.</b>	No exposure	No exposure
<b>Sustainability indicator d.</b>	Sub-fund: 62.91 Benchmark: 62.36	Sub-fund: 77.88 Benchmark: 64.49
<b>Sustainability indicator e.</b>	Sub-fund: 59.20 Benchmark: 58.50	Sub-fund: 62.38 Benchmark: 59.91

#### ● How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Manager ensured that the Sub-fund's sustainable investments during the Reference Period did not materially undermine an environmentally or socially sustainable investment objective by:

Issuer level:

- Consideration of the principal adverse impacts on the mandatory sustainability factors (hereinafter "PAIs") listed in Table 1 of Annex 1 of the Delegated Regulation (EU) 2022/1288 which allows for the reduction of the adverse impacts of the investment, including:
  - o by incorporating several elements to avoid and/or reduce its exposure to activities or behaviours that could affect another environmental or social objective (such as the Global Standards compliance filter and the exclusion of ESG controversies of maximum severity or activities most harmful to other environmental and/or social objectives);
  - o via an engagement process with investee companies, in accordance with its Engagement Policy, which can be accessed at <https://www.dpaminvestments.com/documents/engagement-policy-enBE> (Engagement Policy). The commitments made by the Manager are also the subject of an annual report available at [https://res.cloudinary.com/degroof-petercam-asset-management/image/upload/v1614006835/DPAM-report\\_engagement\\_activity.pdf](https://res.cloudinary.com/degroof-petercam-asset-management/image/upload/v1614006835/DPAM-report_engagement_activity.pdf).
- An impact calculation methodology which takes into account the positive and negative contribution of the company's products and services to the Sustainable Development Goals (SDGs) in order to optimise the net positive (resulting) contribution.

Overall portfolio level:

- A rule of minimum 50% of assets aligned with the EU Taxonomy or in net positive contribution on all 17 SDGs. During the Reference Period, a minimum 78.27% of assets aligned with the EU Taxonomy or making a net positive contribution to all 17 SDGs.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

During the Reference Period, the Sub-fund has taken into consideration all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288 that are applicable to investments in sovereign or supranational issuers.

The PAIs are intrinsically linked to the Manager's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated throughout the research and investment process from its inception.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAIs:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAIs related to greenhouse gas emissions and energy performance, including through the Manager's research in the context of the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD).

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with the Global Standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with the Manager's Controversial Activities Policy (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy)). The exclusion of companies involved in thermal coal production, for example, allows for better coverage of indicators such as biodiversity and greenhouse gas emissions.

The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

d) similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with the Manager's Controversial Activities Policy (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy)). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) Similarly, social indicators are included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

The Manager's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at <https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> (Sustainable and Responsible Investments Policy) and <https://www.dpaminvestments.com/documents/tcf-report-enBE> (TCFD Report).

- *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The first stage of the Sub-fund's investment is based on a normative screening, which includes compliance with Global Standards based on human rights, labour rights and the prevention of corruption. These include the OECD Guidelines for Multinational Enterprises and the UN Guidelines on Business and Human Rights. Companies

that do not meet these criteria are excluded from the eligible investment universe.

The Sub-fund has therefore not been invested during the Reference Period in any company that is deemed not to comply with these principles.

## How did this financial product consider principal adverse impacts on sustainability factors?

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to the Manager's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated throughout the research and investment process from its inception.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAIs:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAIs related to greenhouse gas emissions and energy performance, including through the Manager's research in the context of the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD).

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with the Global Standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with the Manager's Controversial Activities Policy (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy)). The exclusion of companies involved in thermal coal production, for example, allows for better coverage of indicators such as biodiversity and greenhouse gas emissions.

The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

d) similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with the Manager's Controversial Activities Policy (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy)). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) Similarly, social indicators are included in the analysis of the ESG profile of companies and impact their best-in-class ranking.

The Manager's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at

<https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> (Sustainable and Responsible Investments Policy) and <https://www.dpaminvestments.com/documents/tcf-report-enBE> (TCFD Report).

## What was the proportion of sustainability-related investments?

### ● What was the asset allocation?

In the Reference Period, the Sub-fund invested at least 85.95% of its assets in sustainable investments with environmental or social objectives. These sustainable investments (in the table below referred to as “#1 Sustainable”) are:

- companies aligned with one of the first two objectives of the EU taxonomy (climate change mitigation and adaptation);
- companies aiming to make a net positive contribution to the United Nations (UN) Sustainable Development Goals (“SDGs”), which are environmental in nature;
- companies aiming to make a net positive contribution to the social SDGs.

The percentage of the portfolio invested in sustainable investments that meet an environmental and/or social objective (#1A Sustainable) is calculated using the cascade methodology described in the prospectus (section “Environmental, social and governance (ESG) considerations – Sustainability transparency”), which excludes double counting at the cascade level: an investment qualifying as sustainable at the level of a first element of the cascade is not then taken into account at the level of subsequent elements of the cascade.

In contrast, the percentages of the two sub-categories of sustainable investments (#1A Sustainable) in the portfolio invested in environmental investments other than those aligned with the taxonomy and social investments may involve some double counting. All portfolio companies are analysed against both (i) the environmental SDGs (and therefore may fall into the sub-category “other environmental investments” even if they are also considered to be aligned with the taxonomy and/or as a social sustainable investment) and (ii) the social SDGs (and therefore may fall into the sub-category “social investments” even if they are also considered to be aligned with the taxonomy and/or as an other environmental investment).

Following clarification from the ESAs on 17 November 2022 on the application of Regulation (EU) 2019/2088 that double counting should be avoided between an investment that has an environmental and social objective. Following this change in methodology, the pre-contractual document had to be amended in January 2024.

**Asset allocation**  
describes the share of  
investments in specific  
assets.

● **In which economic sectors were the investments made?**

Sector	Sub-sector	% assets
Financial and insurance activities	Financial service activities, except insurance and pension funding	43.92
Electricity, gas, steam and air conditioning supply	Electricity, gas, steam and air conditioning supply	9.85
Real estate activities	Real estate activities	6.25

### **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The Manager's methodology for assessing the EU Taxonomy alignment of investee companies is based on data provided either by the investee companies or by third-party providers. The latter use a mixed approach:

- Firstly, a direct mapping between the business activities in their own sectoral classification system and the economic activities covered by the Technical Selection Criteria of the EU Taxonomy.
- Secondly, any business activity that could not be directly mapped is examined through a bottom-up assessment of its alignment with the EU Taxonomy's Technical Selection Criteria.
- Any economic activity remaining after the first and second steps is considered not to be aligned with the EU Taxonomy.

In principle, the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy is assessed by means of turnover (based on performance data provided by third-party suppliers).

Where information on the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy cannot be readily obtained from information published by the invested issuers, the Manager shall rely on equivalent information obtained by third-party providers from the invested issuers.

Applying this methodology, over the Reference Period, the Sub-fund is aligned for 6.35% with the first two objectives of the Taxonomy (environmental objectives of climate change mitigation and/or adaptation).

The compliance of these investments with the requirements set out in Article 3 of the EU Taxonomy is not subject to a guarantee provided by one or more auditors or a review by one or more auditors or a review by one or more third parties.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

☒ Yes:

☐ In fossil gas ☒ In nuclear energy

☐ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

● What was the share of investments made in transitional and enabling activities?

Transitional activities: 5.079%  
Enabling activities: n/a

● How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

Reference period	EU Taxonomy-aligned investments
1 January 2022 - 31 December 2022	5.36%
1 January 2023 - 31 December 2023	6.35%

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

Based on the approach described below, the Sub-fund invested 67.45% of its portfolio in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy over the Reference Period.

During the Reference Period, only two of the six environmental objectives defined by the EU Taxonomy were covered by the regulatory framework of the EU Taxonomy Technical Selection Criteria that determine alignment with the EU Taxonomy (adaptation and climate change mitigation). However, during the Reference Period, DPAM made sustainable investments that contribute to environmental objectives that were not covered by these EU Taxonomy Technical Selection Criteria relating to the first two environmental objectives of the EU Taxonomy, in particular key environmental objectives such as the sustainable use and protection of water and marine resources, the prevention and control of pollution and the protection and restoration of biodiversity and ecosystems.

To this end, the Manager has adopted and defined a specific framework for identifying the environmental objectives of these sustainable investments and assessing their contribution to these objectives. This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to environmental objectives.

What was the share of socially sustainable investments?

Based on the approach described below, the Sub-fund invested 12.15% of its portfolio in sustainable investments with a social objective over the Reference Period. A European Taxonomy for social sustainability goals has yet to be developed.

In the meantime, the Manager wishes to continue to make sustainable investments that contribute to the achievement of key social goals such as zero hunger, quality education and peace, justice and strong institutions.

To this end, the Manager has adopted and defined a specific framework for identifying the social objectives of these sustainable investments and assessing their contribution to these objectives. This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to social objectives.

Are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The Manager will review and reassess this framework when the EU Taxonomy Technical Selection Criteria have been implemented for the social objectives under the EU Taxonomy.

### **What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?**

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social objectives.
- issuers covered by ESG research are considered not to have environmental and/or social objectives.

Over the Reference Period, in order to diversify the portfolio, the Sub-fund was exposed to 14.05% of issuers considered not to have environmental and/or social objectives. Over the Reference Period, for liquidity management and/or risk hedging purposes, the Sub-fund was exposed to 2.45% in liquid assets and 0.09% in derivatives. There are no minimum environmental or social guarantees on this allocation.

### **What actions have been taken to attain the sustainable investment objective during the reference period?**

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e:

On a quarterly basis, a normative screening has been established based on compliance with Global Standards. Companies must comply with the founding principles of the Global Compact (human rights, labour law, protection of the environment, fight against corruption and environmental protection) and the UN Guiding Principles, ILO instruments, the OECD Guidelines for Multinational Enterprises and the underlying conventions and treaties. The Manager used specific ESG research from non-financial rating agencies to determine whether or not a company is in compliance with these standards.

Subsequently, companies meeting the thresholds as defined in the activities excluded by the Manager's controversial activities policy were excluded. The policy of excluding controversial activities defined by the Manager (available at <https://www.funds.dpaminvestments.comwww.dpamfunds.com> (Controversial Activities Policy) covers several sectors and economic activities that are subject to debate as to whether or not they are ethical and sustainable. For each of these sectors and economic activities, the exclusion policy for controversial activities defines the exclusion criteria and thresholds. Companies involved in these controversial sectors and activities and meeting the exclusion criteria set out in the policy were excluded from the investment portfolio.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

Then, on a semi-annual basis, the resulting universe was subject to a "best-in-class" ranking in order to retain only the best ESG profiles of companies on a list of securities eligible for management. The last decile (10%) of the lowest scores in the ranking were removed from the eligible list by sector.

The Manager ensured that the products and/or services of the company contribute – as a proportion of its revenue – to the achievement of the 17 environmental or social Sustainable Development Goals (SDGs) defined by the United Nations (UN) such as health products and services, education services, water saving and access solutions, energy efficiency solutions, digitalisation services, sustainable mobility services, etc.

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector. In addition, this qualitative analysis also includes consideration of the sustainability theme and the issuer's total contribution to the UN Sustainable Development Goals.

Finally, the sustainable objective was measured by ensuring that:

- the net contribution at the level of the whole portfolio to the 17 SDGs is positive and
- a minimum of 50% of assets under management has been invested in companies making a net positive contribution to the 17 SDGs:

The stages of the investment process are outlined below:

RESPONSIBLE INVESTMENT				SUSTAINABLE INVESTMENT		
ESG INTEGRATION	ACTIVE OWNERSHIP	BASIC NEGATIVE SCREENING	NORMATIVE & NEGATIVE SCREENING	EXTENSIVE NEGATIVE SCREENING	POSITIVE SCREENING Best in class	SUSTAINABILITY THEMES
<i>Inclusion in investment decisions (PAI)</i>	<i>Influencing behaviour</i>	<i>Exclusions based on activity</i>	<i>Compliance with global standards/ Exclusion of severe controversial behaviour (Min. social &amp; gov. safeguards)</i>	<i>Extensive exclusions based on activity</i>	<i>Best in class, best approach Scorecards (PAI)</i>	<b>IMPACT INVESTING</b>

### Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

#### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b>	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: ____%</b> <div style="margin-left: 40px;"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy                 </div> <div style="margin-left: 40px;"> <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy                 </div> <input type="checkbox"/> It made <b>sustainable investments with a social objective: ____%</b>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments <div style="margin-left: 40px;"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy                 </div> <div style="margin-left: 40px;"> <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy                 </div> <div style="margin-left: 40px;"> <input type="checkbox"/> with a social objective                 </div> <input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make sustainable investments</b>

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

#### To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices and best efforts.

During the Reference Period, derivative products, if any, used for the purpose of achieving the investment objectives of the sub-fund were not used for the purpose of promoting environmental and/or social characteristics.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

#### ● How did the sustainability indicators perform?

Over the Reference Period, the sub-fund achieved the following sustainability indicators:

At the level of direct line investments (corporate bonds):

- a) the Sub-fund was not exposed to companies considered to be below Global Standards during the reporting period;

b) the Sub-fund was not exposed to companies involved in excluded controversial activities as defined by the Manager's Controversial Activities Policy (available at [www.dpamfunds.com](http://www.dpamfunds.com) (Controversial Activities Policy);

c) the Sub-fund has not been exposed to companies facing extremely serious controversies around environmental or social issues.

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
E/S characteristics	99.05%	99.60%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Not applicable

*The EU Taxonomy sets out a "does not significantly harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "does not significantly harm" principle only applies to the underlying investments of the financial product that consider the European Union's criteria regarding environmentally sustainable economic activities.

*The underlying investments of the remainder of this financial product do not consider the European Union's criteria regarding environmentally sustainable economic activities.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

• For investments in corporate bonds:

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters,

This commitment is incorporated throughout the research and investment process from its inception. In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund’s construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

- 1) Firstly, with regard to environmental PAIs:
  - a) they have been analyzed and monitored at the level of the invested issuers, particularly with regard to PAI related to greenhouse gas emissions and energy performance, notably through DPAM research in the framework of the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD). Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute the most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.
  - b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not meet global standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity are thus excluded from the portfolio in advance.

The exclusion filter for companies involved in controversial activities (in accordance with DPAM’s Controversial Activities Policy (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy)). The exclusion of companies involved in thermal coal production, for example, allows for better coverage of indicators such as biodiversity and greenhouse gas emissions.

in addition, the filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company’s operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

- 2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:
  - a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises are de facto excluded from the investment universe.
  - b) the exclusion filter for companies involved in controversial activities (in accordance with DPAM’s Controversial Activities Policy (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy)). In this way, companies involved in controversial armaments are directly excluded from the investment universe.

In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

What were the top investments of this financial product?

Largest investments	Sector	% of assets	Country

Liquid assets	Liquid assets	0.40

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

#### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☐ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

● What was the share of investments made in transitional and enabling activities?

Not applicable

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

Are sustainable investments with an environmental objective that **do not take into account the criteria** for

**What was the share of socially sustainable investments?**

Not applicable

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets (excluding treasury bonds)
- Derivative instruments
- Collective investment schemes
- issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for the purposes of achieving its investment objectives, portfolio diversification, liquidity management and/or risk hedging, the Sub-fund was exposed to 0.4% in liquid assets. There are no minimum environmental or social guarantees on this allocation.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e.:

- For direct line investments (corporate bonds):

On a quarterly basis, a normative screening has been established based on compliance with global standards.

Secondly, companies meeting the thresholds as defined in the activities excluded by the responsible investment policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

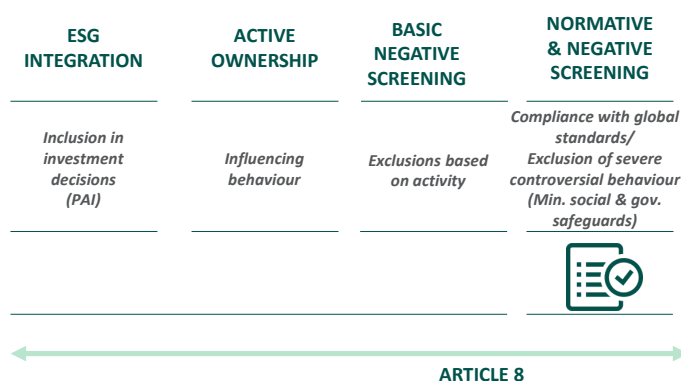

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector.

- For investments in sovereign bonds:

The sub-fund did not invest in countries considered not to meet minimum democratic requirements. To determine whether a country does not meet this minimum requirement the Manager applied a methodology that is based primarily on the classifications of the International NGO Freedom House ("not free") and The Economist Intelligence Unit ("authoritarian regime").

The list of countries was reviewed on a semi-annual basis and provided to management via the management systems so that it could not give transaction orders on papers issued by these excluded countries.

The stages of the investment process are outlined below:

## How did this financial product perform compared with the reference benchmark?

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

#### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b>	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: ____%</b> <div style="margin-left: 40px;"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy                 </div> <div style="margin-left: 40px;"> <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy                 </div> <input type="checkbox"/> It made <b>sustainable investments with a social objective: ____%</b>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments <div style="margin-left: 40px;"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy                 </div> <div style="margin-left: 40px;"> <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy                 </div> <div style="margin-left: 40px;"> <input type="checkbox"/> with a social objective                 </div> <input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make sustainable investments</b>

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- excluding countries that do not respect a minimum of democratic requirements.
- systematically applying a policy for impact bonds (such as green and social bonds).

Derivative products, if any, used for the purpose of achieving the investment objectives of the Sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

#### ● How did the sustainability indicators perform?

Over the Reference Period, the sub-fund achieved the following sustainability indicators:

- a) The sub-fund has not been exposed to issuers that do not meet minimum democratic requirements.
- b) The percentage of impact bonds ("Green, Social & Sustainability bonds") in the portfolio was higher than the benchmark. Over the Reference Period, the percentage of impact bonds ("Green, Social & Sustainability bonds") in the portfolio was 9.57% while the benchmark was 1.09%.

#### ● ...and compared to previous periods?

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
E/S characteristics	96.84%	99.08%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Impact bonds	Sub-fund: 7.37% Benchmark: 0.78%	Sub-fund: 9.57% Benchmark: 1.09%

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

- *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Not applicable

*The EU Taxonomy sets out a "does not significantly harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "does not significantly harm" principle only applies to the underlying investments of the financial product that consider the European Union's criteria regarding environmentally sustainable economic activities.

*The underlying investments of the remainder of this financial product do not consider the European Union's criteria regarding environmentally sustainable economic activities.*

## How did this financial product consider principal adverse impacts on sustainability factors?

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

During the Reference Period, the sub-fund has taken into consideration all the principal adverse impacts on sustainability factors (hereinafter "PAI") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288 that are applicable to investments in sovereign or supranational issuers.

The PAIs are intrinsically linked to the Manager's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated into the entire research and investment process.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

- The first PAI relates to environmental issues and focuses on the greenhouse gas emission intensity of the investee countries. The indicator is an integral component of the country sustainability model that the Manager developed for its sovereign bond strategies. Consequently, it is included in the country's sustainability score and can influence it positively or negatively depending on its level and development compared to other issuer countries.

- The second PAI relates to social issues and focuses on issues of social breaches. The country's sustainability model observes several indicators on this issue, such as respect for civil liberties and political rights, respect for human rights and the level of violence within the country, commitment to major labour conventions, the issue of equal opportunity and distribution of wealth, etc. These different indicators are included in the country's sustainability score and can influence it positively or negatively depending on its level and evolution compared to other issuing countries.

During the Reference Period, a dialogue was initiated on the results of the sustainability scores with some countries according to the Manager's engagement policy via the link

<https://www.dpaminvestments.com/documents/engagement-policy-enBE> (Engagement policy).

Details of the dialogues with countries and companies will be published in an annual report in the first quarter of 2023 on the DPAM website (<https://www.funds.dpaminvestments.com/funds.html>).

The manager's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at

<https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE>

(Sustainable and Responsible Investments Policy) and

<https://www.dpaminvestments.com/documents/tcfd-report-enBE> (TCFD Report).

## What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
USA T NOTES B 2.25 17-27 15/02S	Public administration	7.06	United States of America

## What was the proportion of sustainability-related investments?

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### ● What was the asset allocation?

By applying the investment strategy described above, the Sub-fund invests 99.08% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S characteristics").

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

### ● In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Public administration	Public administration and defence; compulsory social security	94.66
Financial and insurance activities	Financial service activities, except insurance and pension funding	2.64
Activities of extraterritorial organisations and bodies	Activities of extraterritorial organisations and bodies	1.78
Derivatives	Derivatives	0.10
Liquid assets	Liquid assets	0.82

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

#### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☐ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● What was the share of investments made in transitional and enabling activities?

Not applicable

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable

Are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of socially sustainable investments?**

Not applicable

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets (excluding treasury bonds)
- Derivative instruments
- Collective investment schemes
- issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for the purposes of achieving its investment objectives, portfolio diversification, liquidity management and/or risk hedging, the Sub-fund was exposed to 0.82% in liquid assets and 0.1% in derivatives. There are no minimum environmental or social guarantees on this allocation.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e.:

The sub-fund did not invest in countries considered not to meet minimum democratic requirements.

To determine whether a country does not meet this minimum requirement the Manager applied a methodology that is based primarily on the classifications of the International NGO Freedom House ("not free") and The Economist Intelligence Unit ("authoritarian regime"). The list of countries was reviewed on a semi-annual basis and provided to management via the management systems so that it could not give transaction orders on papers issued by these excluded countries.

The stages of the investment process are outlined below:

## How did this financial product perform compared with the reference benchmark?

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- How does the reference benchmark differ from a broad market index?

Not applicable

- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

- How did this financial product perform compared with the reference benchmark?

Not applicable

- How did this financial product perform compared with the broad market index?

Not applicable

## Periodic information for financial products referred to in Article 9(1 to 4a) of Regulation (EU) 2019/2088 and in the first paragraph of Article 5 of Regulation (EU) 2020/852

**Product name:**  
DPAM L BONDS GOVERNMENT SUSTAINABLE

**Legal entity identifier:**  
2221003119PQOZ1LDV58

### Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> <b>Yes</b>	<input type="radio"/> <input type="radio"/> <input type="checkbox"/> <b>No</b>
<input checked="" type="checkbox"/> It made sustainable <b>investments with an environmental objective</b> : 63.38%  <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy  <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments  <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made sustainable <b>investments with a social objective</b> : 36.62%	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make sustainable investments</b>

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### To what extent was the sustainable investment objective of this financial product met?

During the Reference Period (01/01/2023-31/12/2023) (hereinafter the "Reference Period"), the Sub-fund invested in countries that are committed to respecting fundamental rights (human rights, labour rights, democratic rights, etc.), protecting their environmental capital and promoting the well-being of their present and future generations. By combining a rigorous selection of countries with a formal and systematic engagement policy and prioritising recognised impact bonds (green bonds and equivalents), the Sub-fund invested in the most committed or best performing countries in terms of sustainable development.

The objective of sustainable development was pursued via:

- rigorous ESG screening, based on a proprietary sustainability model of states aligned with the Sustainable Development Goals
- promoting best practices and best efforts by defining eligibility rules based on ESG ratings;
- formal and systematic engagement with issuers and investment in impact securities (green bonds and similar).

During the Reference Period, the Sub-fund has not designated a benchmark to achieve its sustainable investment objective within the meaning of Article 9 of Regulation 2019/2088.

Derivative financial products, if any, used for the purpose of achieving the investment objectives of the Sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

### ● How did the sustainability indicators perform?

During the Reference Period, the Sub-fund achieved the following sustainability indicators:

- The Sub-fund invested only in the top 50% of OECD countries ranked according to the proprietary country sustainability model;

- The Sub-fund engaged in a dialogue with the invested issuers according to the approach described in its Engagement Policy (available at <https://www.dpaminvestments.com/documents/engagement-policy-enBE> (Engagement policy);
- the Sub-fund focused on impact instruments such as green and sustainable emissions. The portfolio was 24.41% exposed to this type of instrument at the end of the reference period.

Thus, over the Reference Period, the Sub-fund achieved:

- The Sub-fund was not exposed to countries which do not comply with a minimum democratic requirement in line with the Investment Manager's Controversial Activity Policy (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>);
- the Sub-fund had no exposure to issuers involved in controversial activities according to the definitions and thresholds stipulated by the Manager's controversial activities policy (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy);
- the Sub-fund had no exposure to issuers facing ESG controversies of maximum severity;
- the Sub-fund had a weighted average democratic score above the weighted average democratic score of the reference universe (consisting of OECD member countries): 94.93 (funds) versus 87.17 (benchmark) (31/12/2023).
- the Sub-fund had a greenhouse gas emission intensity of the investee countries lower than the greenhouse gas emission intensity of its reference universe (member states of the OECD) as defined by regulatory technical standards: 351.82 tCO<sub>2</sub>e/\$GDP bn (fund) versus 401.95 tCO<sub>2</sub>e/\$GDP bn (reference universe) (31/12/2023).

For the Reference Period, the Sub-fund had 100.00% sustainable investments. These sustainable investments have contributed to the Sub-fund's sustainable investment objective in the following ways:

- 0% of the Sub-fund's portfolio contributed to the achievement of the environmental objectives defined by the EU Taxonomy (climate change mitigation and adaptation).
- 63.38% of the Sub-fund's portfolio contributed to the achievement of environmental objectives not aligned with the EU Taxonomy.
- 36.62% of the Sub-fund's portfolio contributed to the achievement of social objectives.

#### ● ...and compared to previous periods?

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
<b>Sustainable Investment</b>	94.08%	100%
<b>Environmental Investments</b>	66.69%	63.38%
<b>Social Investments</b>	78.04%	36.62%
<b>Other Environmental Investments</b>	66.69%	63.38%

Reference period	2022	2023
<b>Sustainability indicator a.</b>	No exposure	No exposure
<b>Sustainability indicator b.</b>	No exposure	No exposure
<b>Sustainability indicator c.</b>	No exposure	No exposure
<b>Sustainability indicator d.</b>	Sub-fund: 95.00 Benchmark: 87.00	Sub-fund: 94.93 Benchmark: 87.17
<b>Sustainability indicator e.</b>	Sub-fund: 407.40	Sub-fund: 351.82 Benchmark: 401.95

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Manager ensured that the Sub-fund's sustainable investments during the Reference Period did not materially undermine an environmentally or socially sustainable investment objective by:

- excluding issuers that do not meet minimum democratic requirements as defined by the Manager's controversial activities policy.
- sustainability analysis of countries to identify those that show the greatest commitment to sustainable development on governance, environmental and social issues but also those that show a willingness to make progress on these issues; the resulting country rankings form the basis of the investment rules i.e. invest assets only in the top 50% of ranked countries.
- consideration of the principal adverse impacts on the mandatory sustainability factors (hereinafter "PAIs") listed in Table 1 of Annex 1 of the Delegated Regulation (EU) 2022/1288 which allows for the reduction of the negative impacts of the investment
- an engagement process with investee countries, in accordance with its Engagement Policy, available at <https://www.dpaminvestments.com/documents/engagement-policy-enBE> (Engagement Policy). The commitments made by DPAM are also the subject of an annual report available at ([https://res.cloudinary.com/degroof-petercam-asset-management/image/upload/v1614006835/DPAM\\_report\\_engagement\\_activity.pdf](https://res.cloudinary.com/degroof-petercam-asset-management/image/upload/v1614006835/DPAM_report_engagement_activity.pdf)).

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

During the Reference Period, the Sub-fund has taken into consideration all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288 that are applicable to investments in sovereign or supranational issuers.

The PAIs are intrinsically linked to the Manager's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated into the entire

research and investment process.

The first PAI relates to environmental issues and focuses on the greenhouse gas emission intensity of the investee countries. The indicator is an integral component of the country sustainability model that the Manager developed for its sovereign bond strategies. Consequently, it is included in the country's sustainability score and can influence it positively or negatively depending on its level and development compared to other issuer countries.

The second PAI relates to social issues and focuses on issues of social breaches. Our country sustainability model monitors a number of indicators on this issue, such as respect for civil liberties and political rights, respect for human rights and the level of violence within the country, commitment to key labour law conventions, the issue of equal opportunities and distribution of wealth, etc. These different indicators are included in the country's sustainability score and can influence it positively or negatively depending on its level and evolution compared to other emitting countries.

● **Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?**

Not applicable to sovereign bonds.

**How did this financial product consider principal adverse impacts on sustainability factors?**

During the Reference Period, the Sub-fund has taken into consideration all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288 that are applicable to investments in sovereign or supranational issuers.

The PAIs are intrinsically linked to the Manager's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated throughout the research and investment process from its inception.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters,

respect for human rights, anti-corruption and anti-bribery matters.

The first PAI relates to environmental issues and focuses on the greenhouse gas emission intensity of the investee countries. The indicator is an integral component of the country sustainability model that the Manager developed for its sovereign bond strategies. Consequently, it is included in the country's sustainability score and can influence it positively or negatively depending on its level and development compared to other issuer countries.

The second PAI relates to social issues and focuses on issues of social breaches. Our country sustainability model monitors a number of indicators on this issue, such as respect for civil liberties and political rights, respect for human rights and the level of violence within the country, commitment to key labour law conventions, the issue of equal opportunities and distribution of wealth, etc. These different indicators are included in the country's sustainability score and can influence it positively or negatively depending on its level and evolution compared to other emitting countries.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31/12/2023

Largest investments	Sector	% of assets	Country

What was the proportion of sustainability-related investments?

What was the asset allocation?

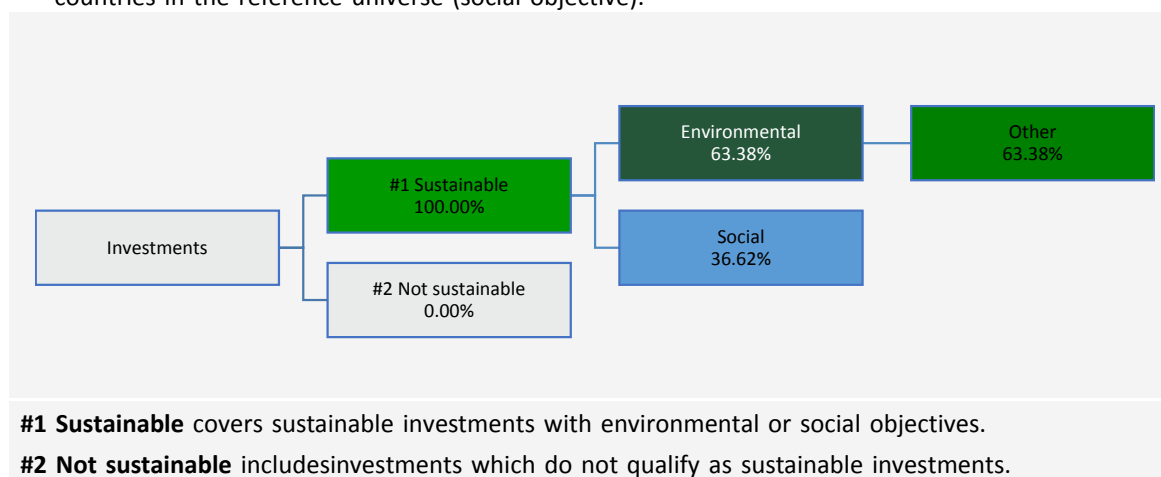

Asset allocation describes the share of investments in specific assets.

In the Reference Period, the Sub-fund invested at least 100% of its assets in sustainable investments with environmental or social objectives. These sustainable investments (in the table below referred to as “#1 Sustainable”):

- which are aimed at countries that are committed to respecting fundamental rights (human rights, labour rights, democratic rights, etc.), protecting their environmental capital and promoting the well-being of their present and future generations:
- that have an environmental objective not aligned with the European Taxonomy, due to their more advanced positioning on energy efficiency, climate change, biodiversity and emissions or
- which have a social objective, due to their more advanced positioning on issues related to wealth distribution, population and welfare, health care, education and innovation.

The percentage of the portfolio invested in sustainable investments that meet an environmental and/or social objective (#1A Sustainable) is calculated using the following cascade methodology:

- impact instruments such as green and sustainable emissions
- bonds issued by a government whose environmental score is in the top three quartiles of the benchmark universe (environmental objective)
- bonds issued by a government whose social score is in the top three quartiles of the ranking of countries in the reference universe (social objective).

#### ● In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Public administration	Public administration and defence; compulsory social security	85.35
Activities of extraterritorial organisations and bodies	Activities of extraterritorial organisations and bodies	8.27
Financial and insurance activities	Financial service activities, except insurance and pension funding	4.76
Derivatives	Derivatives	0.28
Liquid assets	Liquid assets	1.33

#### ● To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

To date, the EU Taxonomy does not provide a methodology for determining the alignment of sovereign bonds with the EU Taxonomy. These bonds are therefore not covered by the EU Taxonomy or its eligibility and technical selection criteria.

#### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

☐ Yes:

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions

and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- ☐ In fossil gas
- ☐ In nuclear energy
- ☐ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

● What was the share of investments made in transitional and enabling activities?  
Not applicable

● How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?  
Not applicable

### What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

Based on the approach described below, the Sub-fund invested 63.38% of its portfolio in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy over the Reference Period.

The Manager's proprietary sustainability model is based on environmental, social and governmental aspects. In the environmental aspect, the proprietary model takes into account energy efficiency, climate change, biodiversity and country emissions. Investing in the highest ranked countries in this aspect therefore means that the Sub-fund has an environmental objective. The scores of the Environment component of the OECD Manager model make it possible to rank the member states in descending order. Countries in the bottom quartile of the ranking (rounding up the number of eligible countries) do not have an environmental target. Further information on methodology and data resources is available in the information on this Sub-fund via [www.dpamfunds.com](http://www.dpamfunds.com) (in particular in the sections "Methodologies" and "Data Sources and Data Processing").

### What was the share of socially sustainable investments?

Based on the approach described below, the Sub-fund invested 36.62% of its portfolio in sustainable investments with a social objective over the Reference Period.

The proprietary sustainability model is based on environmental, social and governmental aspects. In the social aspect, the proprietary model of sustainability of countries takes into account both current generations (wealth distribution, population, health care) and future generations (education and innovation). Investing in the highest ranked countries in this aspect therefore means that the Sub-fund has a social objective. Similarly, the scores for the social component (i.e. present and future generations of the proprietary model) allow the member states to be ranked in descending order. Countries in the bottom quartile of the ranking do not have a social target. Further information on methodology and data resources is available in the information on this Sub-fund via <https://www.funds.dpaminvestments.com/funds.html> (in particular in the sections "Methodologies" and "Data Sources and Data Processing").

### What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social objectives.
- issuers covered by ESG research are considered not to have environmental and/or social objectives.

Over the Reference Period, in order to diversify the portfolio, the Sub-fund was exposed to 0% of issuers considered not to have environmental and/or social objectives.

Over the Reference Period, for liquidity management and/or risk hedging purposes, the Sub-fund was exposed to 1.33% in liquid assets and 0.28% in derivatives. There are no minimum environmental or social guarantees on this allocation.

### What actions have been taken to attain the sustainable investment objective during the reference period?

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e:

On a semi-annual basis, a normative screening has been established on the basis of compliance with democratic minimums as defined by the Manager's controversial activities policy (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activity Policy)).

On a semi-annual basis, the eligible universe was subject to a best-in-class ranking based on the country sustainability model so as to invest only in the top 50% of OECD countries ranked according to the proprietary country sustainability model.

## How did this financial product perform compared to the reference sustainable benchmark?

Not applicable

### Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<input checked="" type="checkbox"/> <input checked="" type="radio"/> Yes	<input type="checkbox"/> <input type="radio"/> No
<input checked="" type="checkbox"/> It made sustainable <b>investments with an environmental objective</b> : 62.39%  <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy  <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments  <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made sustainable <b>investments with a social objective</b> : 37.61%	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make sustainable investments</b>

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### To what extent was the sustainable investment objective of this financial product met?

During the Reference Period (01/01/2023-31/12/2023) (hereinafter the "Reference Period"), the Sub-fund invested in countries that are committed to respecting fundamental rights (human rights, labour rights, democratic rights, etc.), protecting their environmental capital and promoting the well-being of their present and future generations. By combining a rigorous selection of countries with a formal and systematic engagement policy and prioritising recognised impact bonds (green bonds and equivalents), the Sub-fund invested in the most committed or best performing countries in terms of sustainable development.

The objective of sustainable development was pursued via:

- rigorous ESG screening, based on a proprietary sustainability model of states aligned with the Sustainable Development Goals
- promoting best practices and best efforts by defining eligibility rules based on ESG ratings;
- formal and systematic engagement with issuers and investment in impact securities (green bonds and similar).

During the Reference Period, the Sub-fund has not designated a benchmark to achieve its sustainable investment objective within the meaning of Article 9 of Regulation 2019/2088.

Derivative financial products, if any, used for the purpose of achieving the investment objectives of the Sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

### ● How did the sustainability indicators perform?

During the Reference Period, the Sub-fund achieved the following sustainability indicators:

- The Sub-fund invested only in the top 50% of OECD countries ranked according to the proprietary country sustainability model;

- The Sub-fund engaged in a dialogue with the invested issuers according to the approach described in its Engagement Policy (available at <https://www.dpaminvestments.com/documents/engagement-policy-enBE> (Engagement policy);
- the Sub-fund focused on impact instruments such as green and sustainable emissions. The portfolio was 22.11% exposed to this type of instrument at the end of the reference period.

Thus, over the Reference Period, the Sub-fund achieved:

- The Sub-fund was not exposed to countries which do not comply with a minimum democratic requirement in line with the Investment Manager's Controversial Activity Policy (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>);
- the Sub-fund had no exposure to issuers involved in controversial activities according to the definitions and thresholds stipulated by the Manager's controversial activities policy (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy);
- the Sub-fund had no exposure to issuers facing ESG controversies of maximum severity;
- the Sub-fund had a weighted average democratic score above the weighted average democratic score of the reference universe (consisting of OECD member countries): 94.67 (funds) versus 87.17 (benchmark) (31/12/2023).
- the Sub-fund had a greenhouse gas emission intensity of the investee countries lower than the greenhouse gas emission intensity of its reference universe (consisting of member states of the OECD) as defined by regulatory technical standards: 350.63 tCO<sub>2</sub>e/\$GDP bn (fund) versus 401.95 tCO<sub>2</sub>e/\$GDP bn (reference universe) (31/12/2023).

For the Reference Period, the Sub-fund had 100.00% sustainable investments. These sustainable investments have contributed to the Sub-fund's sustainable investment objective in the following ways:

- 0% of the Sub-fund's portfolio contributed to the achievement of the environmental objectives defined by the EU Taxonomy (climate change mitigation and adaptation).
- 62.39% of the Sub-fund's portfolio contributed to the achievement of environmental objectives not aligned with the EU Taxonomy.
- 37.61% of the Sub-fund's portfolio contributed to the achievement of social objectives.

#### ● ...and compared to previous periods?

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
<b>Sustainable Investment</b>	94.11%	100.00%
<b>Environmental Investments</b>	66.20%	62.39%
<b>Social Investments</b>	78.29%	37.61%
<b>Other Environmental Investments</b>	66.20%	62.39%

Reference period	2022	2023
<b>Sustainability indicator a.</b>	No exposure	No exposure
<b>Sustainability indicator b.</b>	No exposure	No exposure
<b>Sustainability indicator c.</b>	No exposure	No exposure
<b>Sustainability indicator d.</b>	Sub-fund: 95.00 Benchmark: 87.00	Sub-fund: 94.67 Benchmark: 87.17
<b>Sustainability indicator e.</b>	Sub-fund: 384.15 Benchmark: n/a	Sub-fund: 350.63 Benchmark: 401.95

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Manager ensured that the Sub-fund's sustainable investments during the Reference Period did not materially undermine an environmentally or socially sustainable investment objective by:

- excluding issuers that do not meet a democratic minimum.
- sustainability analysis of countries to identify those that show the greatest commitment to sustainable development on governance, environmental and social issues but also those that show a willingness to make progress on these issues; the resulting country rankings form the basis of the investment rules i.e. only in the top 50% of OECD countries according to the proprietary country sustainability model the consideration of the principal adverse impacts on the mandatory sustainability factors (hereinafter "PAIs") listed in Table 1 of Annex 1 of the Delegated Regulation (EU) 2022/1288 which allows for the reduction of the adverse impacts of the investment.
- an engagement process with investee countries, in accordance with its Engagement Policy, available at <https://www.dpaminvestments.com/documents/engagement-policy-enBE> (Engagement Policy). The commitments made by DPAM are also the subject of an annual report available at ([https://res.cloudinary.com/degroof-petercam-asset-management/image/upload/v1614006835/DPAM\\_report\\_engagement\\_activity.pdf](https://res.cloudinary.com/degroof-petercam-asset-management/image/upload/v1614006835/DPAM_report_engagement_activity.pdf)).

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

During the Reference Period, the Sub-fund has taken into consideration all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288 that are applicable to investments in sovereign or supranational issuers.

The PAIs are intrinsically linked to the Manager's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated into the entire research and investment process.

The first PAI relates to environmental issues and focuses on the greenhouse gas emission intensity of the investee countries. The indicator is an integral component of the country sustainability model that the Manager developed for its sovereign bond strategies. Consequently, it is included in the country's sustainability score and can influence it positively or negatively depending on its level and development compared to other issuer countries.

The second PAI relates to social issues and focuses on issues of social breaches. Our country sustainability model monitors a number of indicators on this issue, such as respect for civil liberties and political rights, respect for human rights and the level of violence within the country, commitment to key labour law conventions, the issue of equal opportunities and distribution of wealth, etc. These different indicators are included in the country's sustainability score and can influence it positively or negatively depending on its level and evolution compared to other emitting countries.

● **Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?**

Not applicable for investments in sovereigns.

**How did this financial product consider principal adverse impacts on sustainability factors?**

During the Reference Period, the Sub-fund has taken into consideration all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288 that are applicable to investments in sovereign or supranational issuers.

The PAIs are intrinsically linked to the Manager's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated throughout the research and investment process from its inception.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters,

respect for human rights, anti-corruption and anti-bribery matters.

The first PAI relates to environmental issues and focuses on the greenhouse gas emission intensity of the investee countries. The indicator is an integral component of the country sustainability model that the Manager developed for its sovereign bond strategies. Consequently, it is included in the country's sustainability score and can influence it positively or negatively depending on its level and development compared to other issuer countries.

The second PAI relates to social issues and focuses on issues of social breaches. Our country sustainability model monitors a number of indicators on this issue, such as respect for civil liberties and political rights, respect for human rights and the level of violence within the country, commitment to key labour law conventions, the issue of equal opportunities and distribution of wealth, etc. These different indicators are included in the country's sustainability score and can influence it positively or negatively depending on its level and evolution compared to other emitting countries.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
GOVERNMENT OF AUSTRIA 2.0% 15-JUL-2026	Public administration	2.73	Austria

## What was the proportion of sustainability-related investments?

**Asset allocation**  
describes the share of  
investments in specific  
assets.

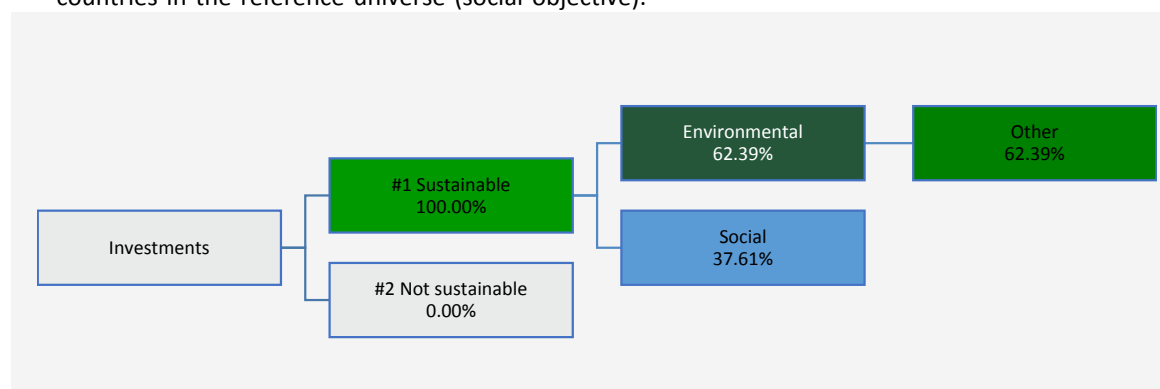

### What was the asset allocation?

In the Reference Period, the Sub-fund invested at least 100% of its assets in sustainable investments with environmental or social objectives. These sustainable investments (in the table below referred to as “#1 Sustainable”):

- which are aimed at countries that are committed to respecting fundamental rights (human rights, labour rights, democratic rights, etc.), protecting their environmental capital and promoting the well-being of their present and future generations:
- that have an environmental objective not aligned with the European Taxonomy, due to their more advanced positioning on energy efficiency, climate change, biodiversity and emissions or
- which have a social objective, due to their more advanced positioning on issues related to wealth distribution, population and welfare, health care, education and innovation.

The percentage of the portfolio invested in sustainable investments that meet an environmental and/or social objective (#1A Sustainable) is calculated using the following cascade methodology:

- impact instruments such as green and sustainable emissions
- bonds issued by a government whose environmental score is in the top three quartiles of the benchmark universe (environmental objective)
- bonds issued by a government whose social score is in the top three quartiles of the ranking of countries in the reference universe (social objective).

**#1 Sustainable** covers sustainable investments with environmental or social objectives.

**#2 Not sustainable** includes investments which do not qualify as sustainable investments.

### In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Public administration	Public administration and defence; compulsory social security	85.69
Activities of extraterritorial organisations and bodies	Activities of extraterritorial organisations and bodies	10.08
Financial and insurance activities	Financial service activities, except insurance and pension funding	3.68
Derivatives	Derivatives	0.05
Liquid assets	Liquid assets	0.49

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

To date, the EU Taxonomy does not provide a methodology for determining the alignment of sovereign bonds with the EU Taxonomy. These bonds are therefore not covered by the EU Taxonomy or its eligibility and technical selection criteria.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- ☐ Yes:
- ☐ In fossil gas ☐ In nuclear energy
- ☐ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

### What was the share of investments made in transitional and enabling activities?

Not applicable

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are economic activities for which low-carbon

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

- **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**  
Not applicable

**What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

Based on the approach described below, the Sub-fund invested 62.39% of its portfolio in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy over the Reference Period.

The proprietary sustainability model is based on environmental, social and governmental aspects. In the environmental aspect, the proprietary model takes into account energy efficiency, climate change, biodiversity and country emissions. Investing in the highest ranked countries in this aspect therefore means that the Sub-fund has an environmental objective. The scores of the Environment component of the Manager model make it possible to rank the member states in descending order. Countries in the bottom quartile of the ranking (rounding up the number of eligible countries) do not have an environmental target. Further information on methodology and data resources is available in the information on this Sub-fund via

<https://www.funds.dpaminvestments.com/funds.html> (in particular in the sections "Methodologies" and "Data Sources and Data Processing").

Are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of socially sustainable investments?**

Based on the approach described below, the Sub-fund invested 37.61% of its portfolio in sustainable investments with a social objective over the Reference Period.

The proprietary sustainability model is based on environmental, social and governmental aspects. In the social aspect, the proprietary model of sustainability of countries takes into account both current generations (wealth distribution, population, health care) and future generations (education and innovation). Investing in the highest ranked countries in this aspect therefore means that the Sub-fund has a social objective. Similarly, the scores for the social component (i.e. present and future generations of the proprietary model) allow the member states to be ranked in descending order. Countries in the bottom quartile of the ranking do not have a social target. Further information on methodology and data resources is available in the information on this Sub-fund via <https://www.funds.dpaminvestments.com/funds.html> (in particular in the sections "Methodologies" and "Data Sources and Data Processing").

**What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?**

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social objectives.
- issuers covered by ESG research are considered not to have environmental and/or social objectives.

Over the Reference Period, in order to diversify the portfolio, the Sub-fund was exposed to 0% of issuers considered not to have environmental and/or social objectives.

Over the Reference Period, for liquidity management and/or risk hedging purposes, the Sub-fund was exposed to 0.49% in liquid assets and 0.054% in derivatives. There are no minimum environmental or social guarantees on this allocation.

## What actions have been taken to attain the sustainable investment objective during the reference period?

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e:

On a semi-annual basis, a normative screening has been established on the basis of compliance with democratic minimums by excluding countries that are not free according to Freedom House and authoritarian according to the democracy index published by the Economist Intelligence Unit.

On a semi-annual basis, the eligible universe was subject to a best-in-class ranking based on the country sustainability model so as to invest only in the top 50% of OECD countries ranked according to the proprietary country sustainability model.

## How did this financial product perform compared to the reference sustainable benchmark?

Not applicable

### ● How did the reference benchmark differ from a broad market index?

Not applicable

### ● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

### Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

#### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b>	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: ____%</b> <div style="margin-left: 40px;"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy                 </div> <div style="margin-left: 40px;"> <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy                 </div> <input type="checkbox"/> It made <b>sustainable investments with a social objective: ____%</b>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments <div style="margin-left: 40px;"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy                 </div> <div style="margin-left: 40px;"> <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy                 </div> <div style="margin-left: 40px;"> <input type="checkbox"/> with a social objective                 </div> <input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make sustainable investments</b>

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

#### To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices and best efforts.

During the Reference Period, derivative products, if any, used for the purpose of achieving the investment objectives of the sub-fund were not used for the purpose of promoting environmental and/or social characteristics.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

#### ● How did the sustainability indicators perform?

Over the Reference Period, the sub-fund achieved the following sustainability indicators:

At the level of direct line investments (corporate bonds):

- a) the Sub-fund was not exposed to companies considered to be below Global Standards during the reporting period;

b) the Sub-fund was not exposed to companies involved in excluded controversial activities as defined by the Manager's Controversial Activities Policy (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy);

c) the Sub-fund has not been exposed to companies facing extremely serious controversies around environmental or social issues.

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
E/S characteristics	91.29%	97.20%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Not applicable

*The EU Taxonomy sets out a "does not significantly harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "does not significantly harm" principle only applies to the underlying investments of the financial product that consider the European Union's criteria regarding environmentally sustainable economic activities.

*The underlying investments of the remainder of this financial product do not consider the European Union's criteria regarding environmentally sustainable economic activities.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

- For investments in corporate bonds:

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to the Manager DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social

and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

This commitment is incorporated throughout the research and investment process from its inception. In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund’s construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

- 1) Firstly, with regard to environmental PAIs:
- a) they have been analyzed and monitored at the level of the invested issuers, particularly with regard to PAI related to greenhouse gas emissions and energy performance, notably through the Manager’s research in the framework of the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD). Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute the most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.
  - b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not meet global standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity are thus excluded from the portfolio in advance.

The exclusion filter for companies involved in controversial activities (in accordance with DPAM’s Controversial Activities Policy (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy)). The exclusion of companies involved in thermal coal production, for example, allows for better coverage of indicators such as biodiversity and greenhouse gas emissions.

In addition, the filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company’s operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

- 2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:
- a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises are de facto excluded from the investment universe.
  - b) the exclusion filter for companies involved in controversial activities (in accordance with the Manager’s Controversial Activities Policy available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy)). In this way, companies involved in controversial armaments are directly excluded from the investment universe.
  - c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

What were the top investments of this financial product?

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

By applying the investment strategy described above, the Sub-fund invests 97.20% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S characteristics").

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Financial and insurance activities	Financial service activities, except insurance and pension funding	37.18
Public administration	Public administration and defence; compulsory social security	17.98
Information and communication	Telecommunications	5.13
Manufacturing	Manufacture of basic pharmaceutical products and pharmaceutical preparations	3.95
Manufacturing	Manufacture of chemicals and chemical products	3.13

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☐ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents 100% of total investments.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### ● What was the share of investments made in transitional and enabling activities?

Not applicable

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

greenhouse gas emission levels corresponding to the best performance.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

- What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable

Are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- What was the share of socially sustainable investments?**

Not applicable

- What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets (excluding treasury bonds)
- Derivative instruments
- Collective investment schemes
- issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for the purposes of achieving its investment objectives, portfolio diversification, liquidity management and/or risk hedging, the Sub-fund was exposed to 2.84% in liquid assets and -0.04% in derivatives. There are no minimum environmental or social guarantees on this allocation.

- What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e.:

- For direct line investments (corporate bonds):

On a quarterly basis, a normative screening has been established based on compliance with global standards.

Secondly, companies meeting the thresholds as defined in the activities excluded by the responsible investment policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

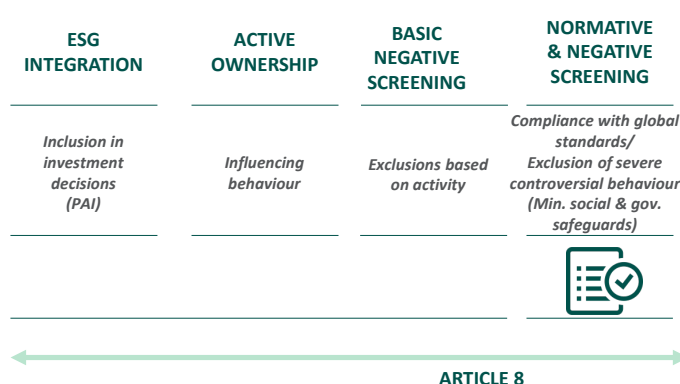

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector.

- For investments in sovereign bonds:

The sub-fund did not invest in countries considered not to meet minimum democratic requirements. To determine whether a country does not meet this minimum requirement the Manager applied a methodology that is based primarily on the classifications of the International NGO Freedom House (“not free”) and The Economist Intelligence Unit (“authoritarian regime”).

The list of countries was reviewed on a semi-annual basis and provided to management via the management systems so that it could not give transaction orders on papers issued by these excluded countries.

The stages of the investment process are outlined below:

## How did this financial product perform compared with the reference benchmark?

Not applicable

- How does the reference benchmark differ from a broad market index?

Not applicable

- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

- How did this financial product perform compared with the reference benchmark?

Not applicable

- How did this financial product perform compared with the broad market index?

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Periodic information for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:**  
DPAM L BONDS UNIVERSALIS UNCONSTRAINED

**Legal entity identifier:**  
5493006302LKO5WVEH19

### Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

#### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b>	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: ____%</b>  <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments  <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made <b>sustainable investments with a social objective: ____%</b>	<input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make sustainable investments</b>

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

#### To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices and best efforts.

During the Reference Period, derivative products, if any, used for the purpose of achieving the investment objectives of the sub-fund were not used for the purpose of promoting environmental and/or social characteristics.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

#### ● How did the sustainability indicators perform?

Over the Reference Period, the sub-fund achieved the following sustainability indicators:

1. At the level of direct line investments (corporate bonds):

a) the Sub-fund was not exposed to companies considered to be below Global Standards during the reporting period;

b) the Sub-fund was not exposed to companies involved in excluded controversial activities as defined by the Manager's Controversial Activities Policy (available at [www.dpamfunds.com](http://www.dpamfunds.com) (Controversial Activities Policy);

c) the Sub-fund has not been exposed to companies facing extremely serious controversies around environmental or social issues.

2. At the level of direct line investments (sovereign bonds):

The Sub-fund has not been exposed to issuers that do not meet minimum democratic requirements.

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
E/S characteristics	97.64%	99.76%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Not applicable

*The EU Taxonomy sets out a "does not significantly harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "does not significantly harm" principle only applies to the underlying investments of the financial product that consider the European Union's criteria regarding environmentally sustainable economic activities.

*The underlying investments of the remainder of this financial product do not consider the European Union's criteria regarding environmentally sustainable economic activities.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

• For investments in corporate bonds:

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors

relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The PAIs are intrinsically linked to the Manager’s commitment to reduce the negative impact of the Sub-fund’s investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth.

This commitment is incorporated throughout the research and investment process from its inception. In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund’s construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

- 1) Firstly, with regard to environmental PAIs:
  - a) they have been analyzed and monitored at the level of the invested issuers, particularly with regard to PAI related to greenhouse gas emissions and energy performance, notably through the Manager’s research in the framework of the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD). Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute the most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.
  - b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not meet global standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity are thus excluded from the portfolio in advance.

The exclusion filter for companies involved in controversial activities (in accordance with DPAM’s Controversial Activities Policy (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy)). The exclusion of companies involved in thermal coal production, for example, allows for better coverage of indicators such as biodiversity and greenhouse gas emissions.

In addition, the filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company’s operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

- 2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:
  - a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises are de facto excluded from the investment universe.
  - b) the exclusion filter for companies involved in controversial activities (in accordance with the Manager’s Controversial Activities Policy available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy)). In this way, companies involved in controversial armaments are directly excluded from the investment universe.
  - c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

- For investments in sovereign bonds:

During the Reference Period, the Sub-fund took into consideration the environmental and social PAI listed in table 1 of appendix I of the Delegated Regulation (EU) 2022/1288.

The first PAI relates to environmental issues and focuses on the greenhouse gas emission intensity of the investee countries. The indicator is an integral component of the country sustainability model that the Manager developed for its sovereign bond strategies. Consequently, it is included in the country’s sustainability score and can influence it positively or negatively depending on its level and development compared to other issuer countries.

The second PAI relates to social issues and focuses on issues of social breaches. Our country sustainability model monitors a number of indicators on this issue, such as respect for civil liberties and political rights, respect for human rights and the level of violence within the country, commitment to key labour law conventions, the issue of equal opportunities and distribution of wealth, etc. These different indicators are included in the country’s sustainability score and may influence it positively or negatively depending on its level and evolution compared to other emitting countries.

During the Reference Period, a dialogue was initiated on the results of the sustainability scores with some countries according to DPAM's engagement policy via the link

<https://www.dpaminvestments.com/documents/engagement-policy-enBE> (Engagement policy).

Over the Reference Period, the management teams conducted 37 dialogues with the various participants in sovereign debt issues. These dialogues allowed us to verify with the stakeholders the points of attention of the governmental policies, notably in environmental and/or social matters.

Details of the dialogues with countries and companies will be published in an annual report in the first quarter of 2023 on the Manager's website (<https://www.funds.dpaminvestments.com/funds.html>).

The Manager's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at

<https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE>

(Sustainable and Responsible Investments Policy) and

<https://www.dpaminvestments.com/documents/tcfd-report-enBE> (TCFD Report).

## What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31/12/2023

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

By applying the investment strategy described above, the Sub-fund invests 99.76% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S characteristics").

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

### In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Public administration	Public administration and defence; compulsory social security	48.96
Financial and insurance activities	Financial service activities, except insurance and pension funding	24.55
Electricity, gas, steam and air conditioning supply	Electricity, gas, steam and air conditioning supply	5.22
Financial and insurance activities	Activities auxiliary to financial services and insurance activities	3.73
Information and communication	Telecommunications	3.30
Real estate activities	Real estate activities	1.73
Manufacturing	Manufacture of computer, electronic and optical products	1.67
Activities of extraterritorial organisations and bodies	Activities of extraterritorial organisations and bodies	1.54
Mining and quarrying	Extraction of crude petroleum and natural gas	1.15
Wholesale and retail trade; repair of motor vehicles and motorcycles	Retail trade, except of motor vehicles and motorcycles	1.00
Information and communication	Publishing activities	0.91
Transportation and storage	Land transport and transport via pipelines	0.76
Manufacturing	Manufacture of motor vehicles, trailers and semi-trailers	0.57

Sector	Sub-sector	% assets
Financial and insurance activities	Insurance, reinsurance and pension funding, except compulsory social security	0.54
Administrative and support service activities	Office administrative, office support and other business support activities	0.50

Manufacturing	Manufacture of coke and refined petroleum products	0.14
Information and communication	Computer programming, consultancy and related activities	0.11
Manufacturing	Manufacture of electrical equipment	0.10
Derivatives	Derivatives	0.05
Liquid assets	Liquid assets	0.19

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

#### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☐ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

● What was the share of investments made in transitional and enabling activities?

Not applicable

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

Are sustainable investments with an environmental objective that **do not take into account the criteria** for

**What was the share of socially sustainable investments?**

Not applicable

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets (excluding treasury bonds)
- Derivative instruments
- Collective investment schemes
- issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for the purposes of achieving its investment objectives, portfolio diversification, liquidity management and/or risk hedging, the Sub-fund was exposed to 0.19% in liquid assets and 0.05% in derivatives. There are no minimum environmental or social guarantees on this allocation.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e.:

- For direct line investments (corporate bonds):

On a quarterly basis, a normative screening has been established based on compliance with global standards.

Secondly, companies meeting the thresholds as defined in the activities excluded by the responsible investment policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

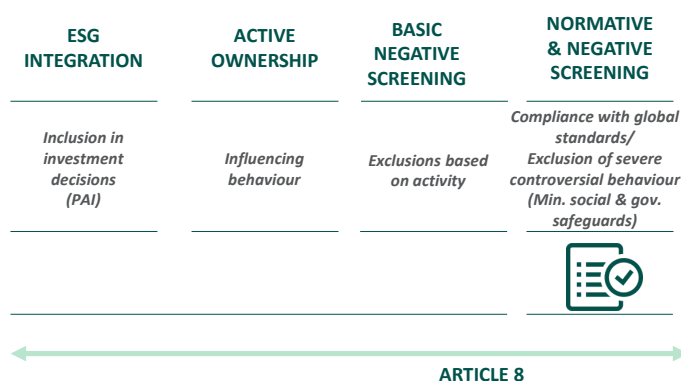

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector.

- For investments in sovereign bonds:

The sub-fund did not invest in countries considered not to meet minimum democratic requirements. To determine whether a country does not meet this minimum requirement the Manager applied a methodology that is based primarily on the classifications of the International NGO Freedom House ("not free") and The Economist Intelligence Unit ("authoritarian regime").

The list of countries was reviewed on a semi-annual basis and provided to management via the management systems so that it could not give transaction orders on papers issued by these excluded countries.

The stages of the investment process are outlined below:

## How did this financial product perform compared with the reference benchmark?

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

- **How did this financial product perform compared with the reference benchmark?**

Not applicable

**Legal entity identifier:**  
549300K2SC8V3VLQR059

### Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

#### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b>	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: ____%</b> <div style="margin-left: 40px;"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy                 </div> <div style="margin-left: 40px;"> <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy                 </div> <input type="checkbox"/> It made <b>sustainable investments with a social objective: ____%</b>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments <div style="margin-left: 40px;"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy                 </div> <div style="margin-left: 40px;"> <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy                 </div> <div style="margin-left: 40px;"> <input type="checkbox"/> with a social objective                 </div> <input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make sustainable investments</b>

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices and best efforts.

During the Reference Period, derivative products, if any, used for the purpose of achieving the investment objectives of the sub-fund were not used for the purpose of promoting environmental and/or social characteristics.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

#### ● How did the sustainability indicators perform?

Over the Reference Period, the sub-fund achieved the following sustainability indicators:

- a) the Sub-fund was not exposed to companies considered to be below Global Standards during the reporting period;
- b) the Sub-fund was not exposed to companies involved in excluded controversial activities as defined by the Manager's Controversial Activities Policy;

c) the Sub-fund has not been exposed to companies facing extremely serious controversies around environmental or social issues.

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
E/S characteristics	97.55%	97.82%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Not applicable

*The EU Taxonomy sets out a "does not significantly harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "does not significantly harm" principle only applies to the underlying investments of the financial product that consider the European Union's criteria regarding environmentally sustainable economic activities.

*The underlying investments of the remainder of this financial product do not consider the European Union's criteria regarding environmentally sustainable economic activities.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth.

This commitment is incorporated throughout the research and investment process from its inception. In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAIs:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD). Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not meet global standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity are thus excluded from the portfolio in advance.

The exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (available at

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy)). The exclusion of companies involved in thermal coal production, for example, allows for better coverage of indicators such as biodiversity and greenhouse gas emissions. The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises are de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (available at

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy)). In this way, companies involved in controversial armaments are directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

• DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at

<https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> (Sustainable and Responsible Investments Policy) and

<https://www.dpaminvestments.com/documents/tcf-report-enBE> (TCFD Report).

## What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
TOTAL ENERGIES	Mining and quarrying	5.75	France
ATLAS COPCO A	Manufacturing	4.32	Sweden
ASTRAZENECA	Manufacturing	4.16	United Kingdom
ROCHE HOLDING	Manufacturing	4.08	Switzerland
UCB	Manufacturing	4.02	Belgium
SCHNEIDER ELECTRIC	Manufacturing	3.90	France
EPIROC -A-	Manufacturing	3.88	Sweden
IBERDROLA SA	Electricity, gas, steam and air conditioning supply	3.74	Spain
ORKLA ASA	Manufacturing	3.54	Norway
AIR LIQUIDE (PORT)	Manufacturing	3.38	France
NESTLE (NOM)	Manufacturing	3.31	Switzerland

Largest investments	Sector	% of assets	Country
BEIERSDORF	Manufacturing	3.29	Germany
LONDON STOCK EXCHANGE GROUP PLC	Information and communication	3.24	United Kingdom
SODEXO	Accommodation and food service activities	3.23	France
DSV	Transportation and storage	3.17	Denmark

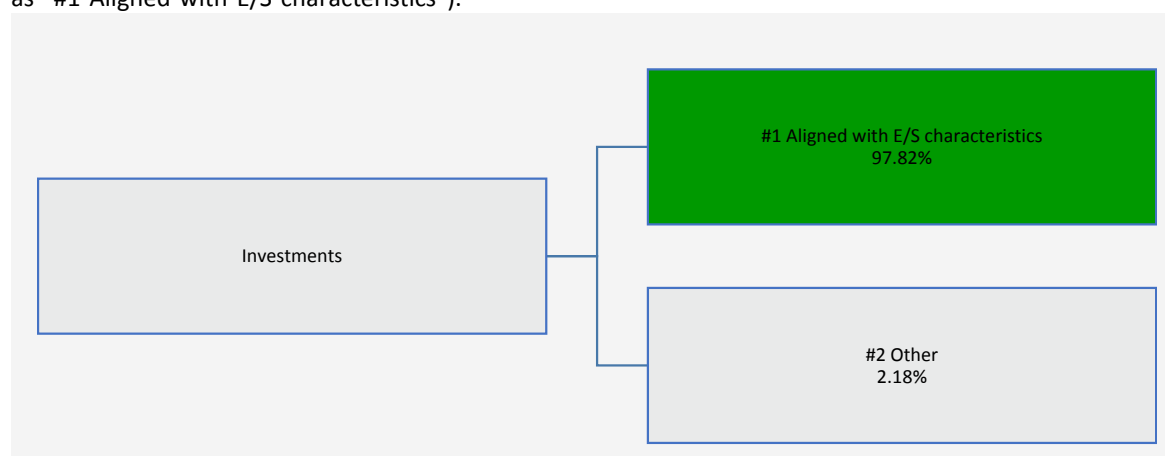

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### What was the asset allocation?

By applying the investment strategy described above, the Sub-fund invests 97.82% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S characteristics").

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

### In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Manufacturing	Manufacture of basic pharmaceutical products and pharmaceutical preparations	12.26
Financial and insurance activities	Financial service activities, except insurance and pension funding	11.77
Manufacturing	Manufacture of machinery and equipment n.e.c.	10.88
Manufacturing	Manufacture of chemicals and chemical products	7.69
Manufacturing	Manufacture of food products	6.85
Mining and quarrying	Extraction of crude petroleum and natural gas	5.75
Manufacturing	Manufacture of electrical equipment	3.90
Electricity, gas, steam and air conditioning supply	Electricity, gas, steam and air conditioning supply	3.74
Information and communication	Information service activities	3.24

Sector	Sub-sector	% assets
Accommodation and food service activities	Food and beverage service activities	3.23
Transportation and storage	Warehousing and support activities for transportation	3.17
Manufacturing	Manufacture of computer, electronic and optical products	3.14
Financial and insurance activities	Insurance, reinsurance and pension funding, except compulsory social security	3.04
Manufacturing	Other manufacturing	3.02
Manufacturing	Manufacture of leather and related products	2.93
Information and communication	Telecommunications	2.92
Information and communication	Computer programming, consultancy and related activities	2.86
Information and communication	Publishing activities	2.64
Manufacturing	Manufacture of rubber and plastic products	2.49
Manufacturing	Manufacture of motor vehicles, trailers and semi-trailers	2.31
Liquid assets	Liquid assets	2.18

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

#### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☐ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

● What was the share of investments made in transitional and enabling activities?

Not applicable

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

Are sustainable investments with an environmental objective that **do not take into account the criteria** for

What was the share of socially sustainable investments?

Not applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets
- Derivative instruments
- UCIs that do not promote environmental or social characteristics and/or do not have a sustainable investment objective under Regulation 2019/2088
- UCIs that are not subject to Regulation 2019/2088
- issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for the purposes of achieving its investment objectives, portfolio diversification, liquidity management and/or risk hedging, the Sub-fund was exposed to 2.18% in liquid assets. There are no minimum environmental or social guarantees on this allocation.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e.:

On a quarterly basis, a normative screening has been established based on compliance with global standards.

Secondly, companies meeting the thresholds as defined in the activities excluded by the responsible investment policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector.

The stages of the investment process are outlined below:

ESG INTEGRATION	ACTIVE OWNERSHIP	BASIC NEGATIVE SCREENING	NORMATIVE & NEGATIVE SCREENING
Inclusion in investment decisions (PAI)	Influencing behaviour	Exclusions based on activity	Compliance with global standards/ Exclusion of severe controversial behaviour (Min. social & gov. safeguards)

## How did this financial product perform compared with the reference benchmark?

Not applicable

- **How does the reference benchmark differ from a broad market index?**

Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

- **How did this financial product perform compared with the reference benchmark?**

Not applicable

- **How did this financial product perform compared with the broad market index?**

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Periodic information for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

### Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

#### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ____%  <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ____%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments  <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> with a social objective  <input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make sustainable investments</b>

#### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund was passively managed and aimed to physically replicate the MSCI EMERGING ESG LEADERS ("the Index").

The Index provides exposure to emerging market large and mid-cap companies with high ESG performance relative to their peers in the same sector ("Best-in-Class" 50%).

The Sub-fund aimed to improve the environmental and social characteristics compared to the starting universe, the parent MSCI Emerging Markets ("Parent Index").

In addition, the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments;
- promoting environmental, social and governance (ESG) best practices and best efforts.

#### ● How did the sustainability indicators perform?

During the Reference Period, the sustainability indicators used to measure the attainment of all of the environmental and social characteristics promoted by the Sub-fund corresponded to the binding investment restrictions of the Index it aims to replicate (some of the indicators are compared to the Parent Index):

- a) the Sub-fund had zero exposure to companies deemed to be non-compliant with the UN Global Compact and international standards (as defined for example in the UN Declaration on Human Rights, or the ILO Declaration on Fundamental Principles and Rights at Work);
- b) the Sub-fund had zero exposure to companies involved in controversial economic activities, based on the exposure limits imposed by the index construction methodology including any companies owning reserves (proven or probable) of fossil fuels, any companies involved in non-conventional oil and gas extraction, thermal coal extraction and coal-fired power generation; and
- c) the Sub-fund had zero exposure to companies involved in severe ESG controversies;

The methodologies for constructing the indices can be found on the MSCI website: <https://www.msci.com/index-methodology> ("MSCI ESG Leaders Indexes Methodology").

Further information, including methodologies for calculating ESG scores and controversy levels, can be found on the MSCI website: <https://www.msci.com/>.

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
E/S characteristics	99.54%	99.62%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Not applicable

*The EU Taxonomy sets out a "does not significantly harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "does not significantly harm" principle only applies to the underlying investments of the financial product that consider the European Union's criteria regarding environmentally sustainable economic activities.

*The underlying investments of the remainder of this financial product do not consider the European Union's criteria regarding environmentally sustainable economic activities.*

## How did this financial product consider principal adverse impacts on sustainability factors?

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

In concrete terms, the PAIs were integrated into the different stages of the construction of the Index which the Sub-fund replicated passively:

1) Firstly, with regard to environmental PAIs:

a) the Global Standards compliance filter includes a filter on environmental protection.

b) the filtering of companies involved in economic sectors and activities that are subject to debate as to their ethical and sustainable character (e.g.: nuclear energy production, tobacco, thermal coal, non-conventional oil and gas).

c) the filter on ESG score and level of controversy as defined by MSCI also includes controversies related to environmental issues, such as the environmental impact of company operations (emissions, waste, energy use, biodiversity and water consumption), the environmental impact on the supply chain and the impact of products and services (carbon and environmental impact).

2) Secondly, with regard to social PAIs:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. In addition, the filter for companies involved in the selection of key ESG controversies includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

b) the exclusion filter for companies involved in controversial activities (inter alia: exclusion of companies involved in non-conventional armaments);

c) the exclusion filter for companies involved in major ESG controversies on social issues.

d) the best-in-class classification, which is based on an analysis of the ESG profile based in particular on the social PAIs.

The approach and processes are described in more detail in the documents available at <https://www.msci.com/>.

The methodologies for constructing the indices can be found at <https://www.msci.com/index-methodology> ("MSCI ESG Leaders Indexes Methodology").

## What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING	Manufacturing	12.77	Taiwan

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

#### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☐ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● What was the share of investments made in transitional and enabling activities?

Not applicable

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

Are sustainable investments with an environmental objective that **do not take into account the criteria** for

**What was the share of socially sustainable investments?**

Not applicable

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

Binding ESG screenings carried out in accordance with the investment strategy described above have been applied to the entire sub-fund, excluding the:

- Liquid assets
- Derivative instruments
- issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for the purposes of achieving its investment objectives, portfolio diversification, liquidity management and/or risk hedging, the Sub-fund was exposed to 0.38% in liquid assets. There are no minimum environmental or social guarantees on this allocation.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

During the reference period, the Replicated Index was constructed in particular by applying a combination of securities-based exclusions and a Best-in-Class selection process to companies in the Parent Index:

a) The exclusion process focused on:

- Companies that do not have an MSCI ESG rating of 'BB' or above. Companies must maintain an MSCI ESG rating of 'BB' or above to remain in the index.
- Companies that are not in compliance with Global Standards and prevention of corruption
- Companies involved in economic sectors and activities that are subject to debate as to whether or not they are ethical and sustainable (e.g. alcohol, gambling, nuclear energy production, tobacco etc.)
- Companies involved in severe ESG controversies: securities must have a score (according to the MSCI ESG Research methodology) of at least 3 to be eligible for inclusion.

b) The MSCI Best-in-Class selection process was applied to the remaining eligible securities in the selection universe:

The Index targets sector weights consistent with those of the Parent Index to limit the systematic risk introduced by the ESG selection process. The methodology aims to include the securities of companies with the highest ESG ratings making up 50% of the market capitalisation of the Parent Index.

Additional information on this index and its composition can be found at [www.msci.com/](http://www.msci.com/). The weight of stocks included in the index will depend on their market capitalisation adjusted for free float.

In addition to the investment restrictions related to Index replication, the Sub-fund adopted the following constraints:

On a quarterly basis, a normative screening has been established based on compliance with the United Nations Global Compact principles: The Sub-fund does not invest in companies that do not comply with the 10 principles of the United Nations Global Compact and for which the ESG controversies outlook is neutral or negative.

Secondly, companies meeting the thresholds as defined in the activities excluded by the responsible investment policy were excluded. On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

## How did this financial product perform compared with the reference benchmark?

During the reference period, the Sub-fund's sustainability indicators were therefore aligned and performed in line with those of the Index.

### ● How does the reference benchmark differ from a broad market index?

During the reference period, the Sub-fund consisted of full physical replication of the Index.

The MSCI ESG Leaders indices target sector weights that mirror the relative sector weights of the MSCI Standard indices (Parent Indices) in order to limit the systematic risk introduced by the ESG selection process.

The Replicated Index was constructed by applying a process combining exclusions (Global Standards compliance filter, involvement in severe controversies, controversial activities) and a best-in-class selection of companies from the Parent Index. In order to be included and maintained in the MSCI ESG Leaders indices, companies had to have an MSCI ESG rating of "BB" or above. The methodologies for constructing the indices can be found on the MSCI website:

<https://www.msci.com/index-methodology> ("MSCI ESG Leaders Indexes Methodology").

### ● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

During the reference period, the Sub-fund's sustainability indicators were therefore aligned and performed in line with those of the Index.

### ● How did this financial product perform compared with the reference benchmark?

	<i>Sub-fund</i>	<i>Index - MSCI EM ESG Leaders</i>
<i>Exposure to companies deemed to be non-compliant with the United Nations Global Compact and international standards (percentage weighting)</i>	0	0
<i>Exposure to companies involved in controversial economic activities (percentage weighting)</i>	0	0
<i>Exposure to companies involved in severe ESG controversies (percentage weighting)</i>	0	0

### ● How did this financial product perform compared with the broad market index?

	<i>Sub-fund</i>	<i>Parent Index- MSCI EM</i>
<i>Exposure to companies deemed to be non-compliant with the United Nations Global Compact and international standards (percentage weighting)</i>	0	1.2
<i>Exposure to companies involved in controversial economic activities (percentage weighting)</i>	0	0.5
<i>Exposure to companies involved in severe ESG controversies (percentage weighting)</i>	0	1.2

## Periodic information for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:**  
DPAM L EQUITIES EMU SRI MSCI INDEX

**Legal entity identifier:**  
391200SGB2MDX2L3YO19

### Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

#### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b>		<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b>	
<input type="checkbox"/>	It made <b>sustainable investments with an environmental objective: ____%</b>	<input checked="" type="checkbox"/>	It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <b>91.48%</b> of sustainable investments
<input type="checkbox"/>	<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/>	<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/>	It made <b>sustainable investments with a social objective: ____%</b>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/>		<input type="checkbox"/>	It promoted E/S characteristics, but <b>did not make sustainable investments</b>

#### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund was passively managed and aimed to physically replicate the MSCI EMU SRI ("the Index").

The Index provides exposure to European large and mid-cap companies with high ESG performance relative to their peers in the same sector ("Best-in-Class" 25%).

The Sub-fund aimed to improve the environmental and social characteristics compared to the starting universe, the parent MSCI EMU Index ("Parent Index").

In addition, the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices and best efforts.

During the Reference Period, derivative products, if any, used for the purpose of achieving the investment objectives of the sub-fund were not used for the purpose of promoting environmental and/or social characteristics.

#### ● How did the sustainability indicators perform?

During the Reference Period, the sustainability indicators used to measure the attainment of all of the environmental and social characteristics promoted by the Sub-fund corresponded to the binding investment restrictions of the Index it aims to replicate (some of the indicators are compared to the Parent Index):

- a. the Sub-fund had zero exposure to companies deemed to be non-compliant with the UN Global Compact and international standards (as defined for example in the UN Declaration on Human Rights, or the ILO Declaration on Fundamental Principles and Rights at Work);
- b. the Sub-fund had zero exposure to companies involved in controversial economic activities, based on the exposure limits imposed by the index construction methodology including any companies owning reserves (proven or probable) of fossil fuels, any companies involved in non-conventional oil and gas extraction, thermal coal extraction and coal-fired power generation;
- c. Zero exposure to companies involved in severe ESG controversies;
- d. a portfolio average greenhouse gas emissions intensity below the average greenhouse gas emissions intensity of the Parent Index universe: 670.12 tCO<sub>2</sub>e/\$ mn revenues (funds) versus 1198.62 tCO<sub>2</sub>e/\$ mn revenues (benchmark) (at 31/12/2023).
- e. an average ESG Score (MSCI rating) above the average ESG score of the Parent Index universe: 9.15 (funds) versus 7.83 (benchmark) (31/12/2023).

The methodologies used to construct the indices are available at the MSCI website: <https://www.msci.com/index-methodology> ("MSCI SRI Indexes Methodology").

Further information, including methodologies for calculating ESG scores and controversy levels, can be found on the MSCI website: <https://www.msci.com/>.

#### ● ...and compared to previous periods?

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
<b>E/S characteristics</b>	100.02%	99.83%
<b>Sustainable Investment</b>	90.21%	91.48%
<b>Other Environmental Investments</b>	53.21%	54.33%
<b>Social</b>	89.83%	35.15%

<b>Sustainability indicator a.</b>	No exposure	No exposure
<b>Sustainability indicator b.</b>	No exposure	No exposure
<b>Sustainability indicator c.</b>	No exposure	No exposure
<b>Sustainability indicator d.</b>	Sub-fund: 712.98 Benchmark: 998.11	Sub-fund: 670.12 Benchmark: 1198.62
<b>Sustainability indicator e.</b>	Sub-fund: 9.04 Benchmark: 7.84	Sub-fund: 9.15 Benchmark: 7.83

#### ● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the Reference Period, the objective of the sustainable investments that the Sub-fund partially intended to achieve was to invest in companies that contribute through their products and services to the 17 Sustainable Development Goals ("SDGs") defined by the United Nations (UN): the contribution to the Sustainable Development Goals (SDGs) was implicitly taken into account in the determination of the ESG scores. As a result, the Sub-fund sought to achieve an average ESG score/rating for the portfolio that was superior to that of the Parent Index.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

By construction of the Replicated Index, the Sub-fund's strategy incorporated several elements to avoid and/or reduce its exposure to activities or behaviours that could affect another environmental or social objective (such as the exclusion of ESG controversies of maximum severity or activities most detrimental to other environmental and/or social objectives (e.g. thermal coal, ownership of fossil fuel reserves, tobacco, arms, etc.).

In particular, the Sub-fund did not invest in companies involved in the most severe controversies and which may indicate a breach of the OECD Guidelines for Multinational Enterprises and/or the principles of the UN Global Compact or involvement in the most serious negative impacts.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

In concrete terms, the PAIs were integrated into the different stages of the construction of the Index which the Sub-fund replicated passively:

1) Firstly, with regard to environmental PAIs:

a) the Global Standards compliance filter includes a filter on environmental protection.

b) the filtering of companies involved in economic sectors and activities that are subject to debate as to their ethical and sustainable character (e.g.: nuclear energy production, tobacco, thermal coal, non-conventional oil and gas).

c) the filter on ESG score and level of controversy as defined by MSCI also includes controversies related to environmental issues, such as the environmental impact of company operations (emissions, waste, energy use, biodiversity and water consumption), the environmental impact on the supply chain and the impact of products and services (carbon and environmental impact).

2) Secondly, with regard to social PAIs:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. In addition, the filter for companies involved in the selection of key ESG controversies includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

b) the exclusion filter for companies involved in controversial activities (inter alia: exclusion of companies involved in non-conventional armaments);

c) the exclusion filter for companies involved in major ESG controversies on social issues.

d) the best-in-class classification, which is based on an analysis of the ESG profile based in particular on the social PAIs.

The approach and processes are described in more detail in the documents available at <https://www.msci.com/> ("MSCI SRI Indexes Methodology").

The methodologies used to construct the indices are available at: <https://www.msci.com/index-methodology> ("MSCI SRI Indexes Methodology").

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The evaluation framework used to rate and exclude issuers from the Index is designed to be consistent with international standards represented by the United Nations Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work and the UN Global Compact. These include the OECD Guidelines for Multinational Enterprises and the UN Guidelines on Business and Human Rights. Companies that do not meet these criteria are excluded from the eligible investment universe. The Sub-fund has therefore not been invested during the Reference Period in any company that is deemed not to comply with these principles.

*The EU Taxonomy sets out a "does not significantly harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "does not significantly harm" principle only applies to the underlying investments of the financial product that consider the European Union's criteria regarding environmentally sustainable economic activities.

*The underlying investments of the remainder of this financial product do not consider the European Union's criteria regarding environmentally sustainable economic activities.*

## How did this financial product consider principal adverse impacts on sustainability factors?

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

In concrete terms, the PAIs were integrated into the different stages of the construction of the Index which the Sub-fund replicated passively:

1) Firstly, with regard to environmental PAIs:

a) the Global Standards compliance filter includes a filter on environmental protection.

b) the filtering of companies involved in economic sectors and activities that are subject to debate as to their ethical and sustainable character (e.g.: nuclear energy production, tobacco, thermal coal, non-conventional oil and gas).

c) the filter on ESG score and level of controversy as defined by MSCI also includes controversies related to environmental issues, such as the environmental impact of company operations (emissions, waste, energy use, biodiversity and water consumption), the environmental impact on the supply chain and the impact of products and services (carbon and environmental impact).

2) Secondly, with regard to social PAIs:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. In addition, the filter for companies involved in the selection of key ESG controversies includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

b) the exclusion filter for companies involved in controversial activities (inter alia: exclusion of companies involved in non-conventional armaments);

c) the exclusion filter for companies involved in major ESG controversies on social issues.

d) the best-in-class classification, which is based on an analysis of the ESG profile based in particular on the social PAIs.

The approach and processes are described in more detail in the documents available at <https://www.msci.com/> ("MSCI SRI Indexes Methodology").

The methodologies used to construct the indices are available at: <https://www.msci.com/index-methodology> ("MSCI SRI Indexes Methodology").

## What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
ASML HOLDING	Manufacturing	20.67	Netherlands
L'OREAL SA	Manufacturing	8.15	France
SCHNEIDER ELECTRIC	Manufacturing	7.43	France
HERMES INTERNATIONAL	Manufacturing	4.56	France
AXA S.A.	Financial and insurance activities	4.00	France

Largest investments	Sector	% of assets	Country
MUENCHENER RUECK (NOM)	Financial and insurance activities	3.82	Germany
DEUTSCHE POST (NOM)	Transportation and storage	3.32	Germany
PROSUS NV	Transportation and storage	2.95	Netherlands
DANONE	Manufacturing	2.85	France
DEUTSCHE BOERSE AG	Financial and insurance activities	2.65	Germany
WOLTERS KLUWER NV	Information and communication	2.41	Netherlands
STMICROELECTRONICS	Manufacturing	2.30	France
DASSAULT SYSTEMES	Information and communication	2.24	France
ADIDAS NOM	Manufacturing	2.23	Germany
AMADEUS IT GROUP SA	Information and communication	2.21	Spain

## What was the proportion of sustainability-related investments?

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### ● What was the asset allocation?

During the Reference Period, by applying the investment strategy, the Sub-fund invested 99.83% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as “#1 Aligned with E/S characteristics”).

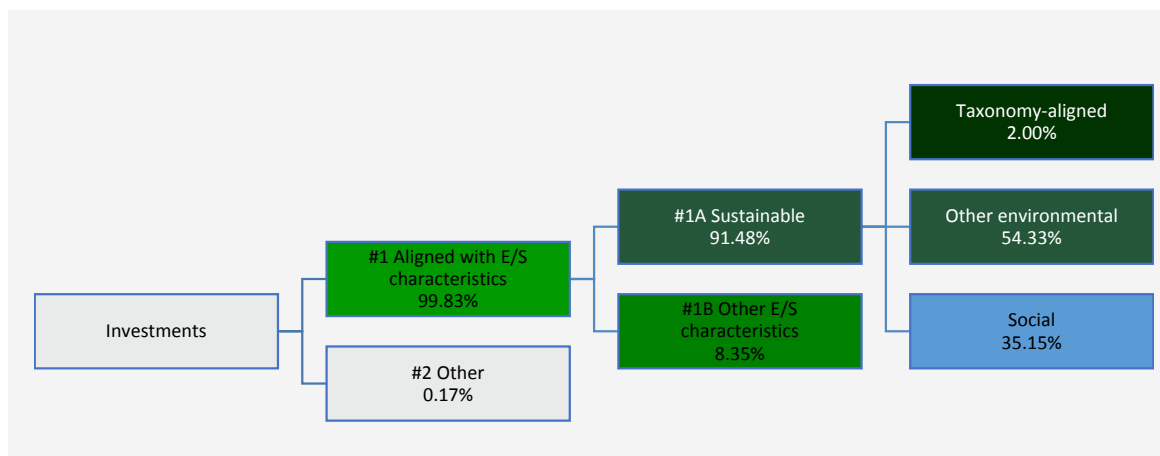

The Sub-fund invested at least 91.48% of its assets in sustainable investments with environmental or social objectives (in the table referred to as “#1A Sustainable”).

The percentage of the portfolio invested in sustainable investments that meet an environmental and/or social objective (#1A Sustainable) is calculated using the cascade methodology described in the prospectus (section “What are the sustainable investment objectives that the financial product intends to partially achieve and how does the sustainable investment contribute to these objectives?”), which excludes double counting at the cascade level: an investment qualifying as sustainable at the level of a first element of the cascade is not then taken into account at the level of subsequent elements of the cascade.

In contrast, the percentages of the two sub-categories of sustainable investments (#1A Sustainable) in the portfolio invested in environmental investments other than those aligned with the taxonomy and social investments may involve some double counting. All portfolio companies are analysed against both (i) the environmental SDGs (and therefore may fall into the sub-category “other environmental investments” even if they are also considered to be aligned with the taxonomy and/or as a social sustainable investment) and (ii) the social SDGs (and therefore may fall into the sub-category “social investments” even if they are also considered to be aligned with the taxonomy and/or as an other environmental investment).

Following clarification from the ESAs on 17 November 2022 on the application of Regulation (EU) 2019/2088 that double counting should be avoided between an investment that has an environmental and social objective. Following this change in methodology, the pre-contractual document had to be amended in January 2024.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives;
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### ● In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Manufacturing	Manufacture of computer, electronic and optical products	24.22
Manufacturing	Manufacture of chemicals and chemical products	10.55
Financial and insurance activities	Insurance, reinsurance and pension funding, except compulsory social security	9.27
Manufacturing	Manufacture of electrical equipment	7.43
Transportation and storage	Postal and courier activities	6.27
Manufacturing	Manufacture of textiles	4.56
Manufacturing	Manufacture of food products	3.79
Financial and insurance activities	Financial service activities, except insurance and pension funding	3.65
Manufacturing	Manufacture of basic pharmaceutical products and pharmaceutical preparations	2.99
Financial and insurance activities	Activities auxiliary to financial services and insurance activities	2.65
Manufacturing	Manufacture of leather and related products	2.63
Information and communication	Information service activities	2.41
Information and communication	Publishing activities	2.24
Information and communication	Computer programming, consultancy and related activities	2.21
Real estate activities	Real estate activities	2.01
Manufacturing	Manufacture of paper and paper products	1.91
Manufacturing	Manufacture of rubber and plastic products	1.64
Other service activities	Other personal service activities	1.60

Sector	Sub-sector	% assets
Manufacturing	Manufacture of machinery and equipment n.e.c.	1.37
Electricity, gas, steam and air conditioning supply	Electricity, gas, steam and air conditioning supply	1.25
Construction	Civil engineering	1.08
Manufacturing	Manufacture of coke and refined petroleum products	1.02
Manufacturing	Manufacture of wearing apparel	0.87
Wholesale and retail trade; repair of motor vehicles and motorcycles	Retail trade, except of motor vehicles and motorcycles	0.73
Information and communication	Telecommunications	0.46
Water supply; sewerage; waste management and remediation activities	Waste collection, treatment and disposal activities; materials recovery	0.40
Transportation and storage	Warehousing and support activities for transportation	0.32
Wholesale and retail trade; repair of motor vehicles and motorcycles	Wholesale trade, except of motor vehicles and motorcycles	0.30
Liquid assets	Liquid assets	0.17

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

- Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?
  - ☐ Yes:
    - ☐ In fossil gas ☐ In nuclear energy
  - ☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● What was the share of investments made in transitional and enabling activities?

Transitional activities: 4.699%

Enabling activities: 1.183%

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Reference period	EU Taxonomy-aligned investments
1 January 2022 - 31 December 2022	2.00%
1 January 2023 - 31 December 2023	2.00%

### **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Based on the approach described below, the Sub-fund invested 54.33% of its portfolio in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

The Index replicated by the Sub-fund did not seek to align its investments with the EU Taxonomy. However, the Index's process of combining stock exclusion and best-in-class selection allowed the Sub-fund to commit a minimum of its assets to investments that contribute to environmental objectives but are not aligned with the EU Taxonomy.

During the Reference Period, only two of the six environmental objectives defined by the EU Taxonomy were covered by the regulatory framework of the EU Taxonomy Technical Selection Criteria that determine alignment with the EU Taxonomy (adaptation and climate change mitigation). However, during the Reference Period, DPAM made sustainable investments that contribute to environmental objectives that were not covered by these EU Taxonomy Technical Selection Criteria relating to the first two environmental objectives of the EU Taxonomy, in particular key environmental objectives such as the sustainable use and protection of water and marine resources, the prevention and control of pollution and the protection and restoration of biodiversity and ecosystems.

To this end, the Manager has adopted and defined a specific framework for identifying the environmental objectives of these sustainable investments and assessing their contribution to these objectives. This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to environmental objectives.

Further information on methodology and data resources is available in the information on this Sub-fund via <https://www.funds.dpaminvestments.com/funds.html> (in particular in the sections "Methodologies" and "Data Sources and Data Processing").

### **What was the share of socially sustainable investments?**

Based on the approach described below, the Sub-fund invested 35.15% of its portfolio in sustainable investments with a social objective over the Reference Period.

The Replicated Index's process of combining stock exclusion and best-in-class selection allowed the Sub-fund to commit a minimum of its assets to investments that contribute to social objectives but are not aligned with the EU Taxonomy.

A European Taxonomy for social sustainability goals has yet to be developed. In the meantime, the Manager wishes to continue to make sustainable investments that contribute to the achievement of key social goals such as zero hunger, quality education and peace, justice and strong institutions.

To this end, the Manager has adopted and defined a specific framework for identifying the social objectives of these sustainable investments and assessing their contribution to these objectives. This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to social objectives. The Manager will review and reassess this framework when the EU Taxonomy Technical Selection Criteria have been implemented for the social objectives under the EU Taxonomy.

Further information on methodology and data resources is available in the information on this Sub-fund via <https://www.funds.dpaminvestments.com/funds.html> (in particular in the sections "Methodologies" and "Data Sources and Data Processing").

### **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

Are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- Liquid assets
- Derivative instruments
- Collective investment schemes
- issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for the purposes of achieving its investment objectives, portfolio diversification, liquidity management and/or risk hedging, the Sub-fund was exposed to 0.17% in liquid assets. There are no minimum environmental or social guarantees on this allocation.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

During the reference period, the Replicated Index was constructed in particular by applying a combination of securities-based exclusions and a Best-in-Class selection process to companies in the Parent Index:

a) The exclusion process focused on:

- companies that do not have an MSCI ESG rating of 'A' or above. Companies must maintain an MSCI ESG rating of 'BB' or above to remain in the index.
- Companies that are not in compliance with Global Standards and prevention of corruption
- Companies involved in economic sectors and activities that are subject to debate as to whether or not they are ethical and sustainable (e.g. alcohol, gambling, nuclear energy production, tobacco etc.)
- Companies involved in severe ESG controversies: securities must have a score (according to the MSCI ESG Research methodology) of at least 4 to be eligible for inclusion.

b) The MSCI Best-in-Class selection process was applied to the remaining eligible securities in the selection universe:

The Index targets sector weights consistent with those of the Parent Index to limit the systematic risk introduced by the ESG selection process. The methodology aims to include the securities of companies with the highest ESG ratings making up 25% of the market capitalisation of the Parent Index. Companies in the MSCI SRI Global Indices must maintain an MSCI ESG rating of 'BB' or above and a Controversy Score of '1' or above to remain in the index.

Additional information on this index and its composition can be found at [www.msci.com/](http://www.msci.com/). The weight of stocks included in the index will depend on their market capitalisation adjusted for free float.

### **How did this financial product perform compared with the reference benchmark?**

During the reference period, the Sub-fund's sustainability indicators were therefore aligned and performed in line with those of the Index.

#### **How does the reference benchmark differ from a broad market index?**

During the reference period, the Sub-fund consisted of full physical replication of the Index (MSCI EMU SRI).

The MSCI SRI indices target sector weights that mirror the relative sector weights of the underlying MSCI Standard indices (Parent Indices) in order to limit the systematic risk introduced by the ESG selection process.

The Replicated Index was constructed by applying a process combining exclusions (Global Standards compliance filter, involvement in severe controversies, controversial activities) and a best-in-class selection of companies in the Parent Index (MSCI EMU).

The methodologies used to construct the indices are available at the MSCI website: <https://www.msci.com/index-methodology> ("MSCI SRI Indexes Methodology").

**Reference benchmarks**  
are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

During the reference period, the Sub-fund's sustainability indicators were therefore aligned and performed in line with those of the Index.

- **How did this financial product perform compared with the reference benchmark?**

	<i>Sub-fund</i>	<i>Index - MSCI EMU SRI</i>
<i>Exposure to companies deemed to be non-compliant with the United Nations Global Compact and international standards (percentage weighting)</i>	0	0

## Periodic information for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:**  
DPAM L EQUITIES EUROPE BEHAVIORAL VALUE

**Legal entity identifier:**  
391200ZNRBAEERN4FH35

### Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

#### Did this financial product have a sustainable investment objective?

<p>●● <input type="checkbox"/> <b>Yes</b></p> <p><input type="checkbox"/> It made <b>sustainable investments with an environmental objective: ____%</b></p> <p style="margin-left: 40px;"><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 40px;"><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made <b>sustainable investments with a social objective: ____%</b></p>	<p>●○ <input checked="" type="checkbox"/> <b>No</b></p> <p><input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments</p> <p style="margin-left: 40px;"><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 40px;"><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 40px;"><input type="checkbox"/> with a social objective</p> <p><input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make sustainable investments</b></p>
--	--

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices.

Derivative products, if any, used for the purpose of achieving the investment objectives of the Sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

#### ● How did the sustainability indicators perform?

Over the Reference Period, the sub-fund achieved the following sustainability indicators:

- a) the Sub-fund was not exposed to companies considered to be below Global Standards during the reporting period;
- b) the Sub-fund was not exposed to companies involved in excluded controversial activities as defined by the Sub-fund Manager's Controversial Activities Policy;
- c) the Sub-fund has not been exposed to companies facing extremely serious controversies around environmental or social issues.

● ...and compared to previous periods?

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
E/S characteristics	99.62%	99.58%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable

● How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

● Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not applicable

*The EU Taxonomy sets out a "does not significantly harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "does not significantly harm" principle only applies to the underlying investments of the financial product that consider the European Union's criteria regarding environmentally sustainable economic activities.

*The underlying investments of the remainder of this financial product do not consider the European Union's criteria regarding environmentally sustainable economic activities.*

## How did this financial product consider principal adverse impacts on sustainability factors?

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to the Manager's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth.

This commitment is incorporated throughout the research and investment process from its inception. In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAIs:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAIs related to greenhouse gas emissions and energy performance, including through the Manager's research in the context of the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD). Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not meet global standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity are thus excluded from the portfolio in advance.

The exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (available at

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy). The exclusion of companies involved in thermal coal production, for example, allows for better coverage of indicators such as biodiversity and greenhouse gas emissions.

In addition, the filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises are de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (in accordance with the Manager's Controversial Activities Policy available at

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy). In this way, companies involved in controversial armaments are directly excluded from the investment universe.

In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

The Manager's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at

<https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> (Sustainable and Responsible Investments Policy) and

<https://www.dpaminvestments.com/documents/tcfd-report-enBE> (TCFD Report).

## What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
TOTAL ENERGIES	Mining and quarrying	3.79	France
ROCHE HOLDING	Manufacturing	2.59	Switzerland
ENI (ORD)	Manufacturing	2.52	Italy
NOVARTIS (NOM)	Manufacturing	2.25	Switzerland
SAP AG	Information and communication	2.06	Germany
HSBC HOLDINGS	Financial and insurance activities	1.95	United Kingdom
SIEMENS (NOM)	Manufacturing	1.95	Germany
ASTRAZENECA	Manufacturing	1.76	United Kingdom
ATLAS COPCO AB CLASS B	Manufacturing	1.65	Sweden
UCB	Manufacturing	1.62	Belgium

Largest investments	Sector	% of assets	Country
INFINEON TECHNOLOGIES (NOM	Manufacturing	1.55	Germany
SANOFI	Manufacturing	1.47	France
DANONE	Manufacturing	1.44	France
CARLSBERG B	Manufacturing	1.40	Denmark
STMICROELECTRONICS	Manufacturing	1.39	France

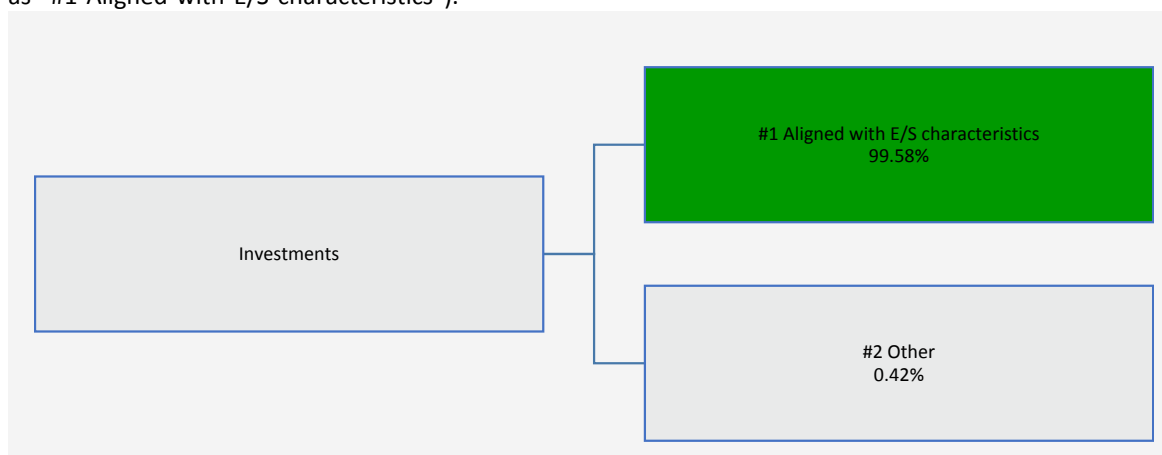

## What was the proportion of sustainability-related investments?

**Asset allocation**  
describes the share of investments in specific assets.

### What was the asset allocation?

By applying the investment strategy described above, the Sub-fund invests 99.58% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S characteristics").

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

### In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Manufacturing	Manufacture of basic pharmaceutical products and pharmaceutical preparations	14.82
Financial and insurance activities	Financial service activities, except insurance and pension funding	10.42
Financial and insurance activities	Insurance, reinsurance and pension funding, except compulsory social security	7.02
Electricity, gas, steam and air conditioning supply	Electricity, gas, steam and air conditioning supply	6.73
Manufacturing	Manufacture of machinery and equipment n.e.c.	5.72
Manufacturing	Manufacture of food products	5.22
Manufacturing	Manufacture of motor vehicles, trailers and semi-trailers	4.41
Manufacturing	Manufacture of computer, electronic and optical products	3.98

<b>Sector</b>	<b>Sub-sector</b>	<b>% assets</b>
Mining and quarrying	Extraction of crude petroleum and natural gas	3.79
Manufacturing	Manufacture of chemicals and chemical products	2.64
Manufacturing	Manufacture of coke and refined petroleum products	2.52
Information and communication	Telecommunications	2.22
Information and communication	Publishing activities	2.06
Manufacturing	Manufacture of fabricated metal products, except machinery and equipment	2.01
Manufacturing	Manufacture of electrical equipment	1.94
Wholesale and retail trade; repair of motor vehicles and motorcycles	Wholesale trade, except of motor vehicles and motorcycles	1.78
Manufacturing	Manufacture of other transport equipment	1.70
Manufacturing	Manufacture of other non-metallic mineral products	1.63
Manufacturing	Manufacture of basic metals	1.48
Manufacturing	Manufacture of beverages	1.40
Accommodation and food service activities	Accommodation	1.37
Real estate activities	Real estate activities	1.34
Construction	Construction of buildings	1.20
Mining and quarrying	Mining of metal ores	1.17
Information and communication	Computer programming, consultancy and related activities	1.16
Wholesale and retail trade; repair of motor vehicles and motorcycles	Retail trade, except of motor vehicles and motorcycles	1.12
Professional, scientific and technical activities	Scientific research and development	1.04
Manufacturing	Manufacture of paper and paper products	0.92
Financial and insurance activities	Activities auxiliary to financial services and insurance activities	0.88
Information and communication	Motion picture, video and sound production and distribution	0.87
Administrative and support service activities	Office administrative, office support and other business support activities	0.76
Wholesale and retail trade; repair of motor vehicles and motorcycles	Wholesale and retail trade and repair of motor vehicles and motorcycles	0.73
Manufacturing	Manufacture of wearing apparel	0.69
Transportation and storage	Air transport	0.66
Construction	Civil engineering	0.65
Other service activities	Other personal service activities	0.58
Transportation and storage	Postal and courier activities	0.55
Agriculture, forestry and fishing	Fishing and aquaculture	0.42
Liquid assets	Liquid assets	0.42

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☐ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents 100% of total investments.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### ● What was the share of investments made in transitional and enabling activities?

Not applicable

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

greenhouse gas emission levels corresponding to the best performance.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable

Are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of socially sustainable investments?**

Not applicable

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets
- Derivative instruments
- issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for the purposes of achieving its investment objectives, portfolio diversification, liquidity management and/or risk hedging, the Sub-fund was exposed to 0.42% in liquid assets. There are no minimum environmental or social guarantees on this allocation.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e.:

On a quarterly basis, a normative screening has been established based on compliance with global standards.

Secondly, companies meeting the thresholds as defined in the activities excluded by the responsible investment policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector.

The stages of the investment process are outlined below:

## How did this financial product perform compared with the reference benchmark?

Not applicable

- How does the reference benchmark differ from a broad market index?

Not applicable

- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

- How did this financial product perform compared with the reference benchmark?

Not applicable

- How did this financial product perform compared with the broad market index?

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Periodic information for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:**  
DPAM L EQUITIES US SRI MSCI INDEX

**Legal entity identifier:**  
391200057ZJ9CUYKNG59

### Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

#### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b>		<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b>	
<input type="checkbox"/>	It made <b>sustainable investments with an environmental objective: ____%</b>	<input checked="" type="checkbox"/>	It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <b>85.17%</b> of sustainable investments
<input type="checkbox"/>	<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/>	<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/>	It made <b>sustainable investments with a social objective: ____%</b>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/>		<input type="checkbox"/>	It promoted E/S characteristics, but <b>did not make sustainable investments</b>

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

#### To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund was passively managed and aimed to physically replicate the MSCI USA SRI ("the Index").

The Index provides exposure to US large and mid-cap companies with high ESG performance relative to their peers in the same sector ("Best-in-Class" 25%).

The Sub-fund aimed to improve the environmental and social characteristics compared to the starting universe, the parent MSCI USA Index ("Parent Index").

In addition, the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices and best efforts.

During the Reference Period, derivative products, if any, used for the purpose of achieving the investment objectives of the sub-fund were not used for the purpose of promoting environmental and/or social characteristics.

#### ● How did the sustainability indicators perform?

During the Reference Period, the sustainability indicators used to measure the attainment of all of the environmental and social characteristics promoted by the Sub-fund corresponded to the binding investment restrictions of the Index it aims to replicate (some of the indicators are compared to the Parent Index):

- a. the Sub-fund had zero exposure to companies deemed to be non-compliant with the UN Global Compact and international standards (as defined for example in the UN Declaration on Human Rights, or the ILO Declaration on Fundamental Principles and Rights at Work);
- b. the Sub-fund had zero exposure to companies involved in controversial economic activities, based on the exposure limits imposed by the index construction methodology including any companies owning reserves (proven or probable) of fossil fuels, any companies involved in non-conventional oil and gas extraction, thermal coal extraction and coal-fired power generation;
- c. Zero exposure to companies involved in severe ESG controversies;
- d. a portfolio average greenhouse gas emissions intensity below the average greenhouse gas emissions intensity of the Parent Index universe: 991.37 tCO<sub>2</sub>e/\$ mn revenues (funds) versus 1165.01 tCO<sub>2</sub>e/\$ mn revenues (benchmark) (31/12/2023).
- e. an average ESG Score (MSCI rating) above the average ESG score of the Parent Index universe: 8.18 (funds) versus 6.63 (benchmark) (31/12/2023).

The methodologies used to construct the indices are available at the MSCI website: <https://www.msci.com/index-methodology> ("MSCI SRI Indexes Methodology").

Further information, including methodologies for calculating ESG scores and controversy levels, can be found on the MSCI website: <https://www.msci.com/>.

#### ● ...and compared to previous periods?

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
<b>E/S characteristics</b>	99.86%	99.85%
<b>Sustainable Investment</b>	86.7%	85.17%
<b>Other Environmental Investments</b>	67.7%	71.22%
<b>Social</b>	77.94%	12.25%

Reference period	2022	2023
<b>Sustainability indicator a.</b>	No exposure	No exposure
<b>Sustainability indicator b.</b>	No exposure	No exposure
<b>Sustainability indicator c.</b>	No exposure	No exposure
<b>Sustainability indicator d.</b>	Sub-fund: 926.86 Benchmark: 985.62	Sub-fund: 991.37 Benchmark: 1165.01
<b>Sustainability indicator e.</b>	Sub-fund: 8.32 Benchmark: 6.65	Sub-fund: 8.18 Benchmark: 6.63

#### ● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the Reference Period, the objective of the sustainable investments that the Sub-fund partially intended to achieve was to invest in companies that contribute through their products and services to the 17 Sustainable Development Goals ("SDGs") defined by the United Nations (UN): the contribution to the Sustainable Development Goals (SDGs) was implicitly taken into account in the determination of the ESG scores. As a result, the Sub-fund sought to achieve an average ESG score/rating for the portfolio that was superior to that of the Parent Index.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

By construction of the Replicated Index, the Sub-fund's strategy incorporated several elements to avoid and/or reduce its exposure to activities or behaviours that could affect another environmental or social objective (such as the exclusion of ESG controversies of maximum severity or activities most detrimental to other environmental and/or social objectives (e.g. thermal coal, ownership of fossil fuel reserves, tobacco, arms, etc.).

In particular, the Sub-fund did not invest in companies involved in the most severe controversies and which may indicate a breach of the OECD Guidelines for Multinational Enterprises and/or the principles of the UN Global Compact or involvement in the most serious negative impacts.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

In concrete terms, the PAIs were integrated into the different stages of the construction of the Index which the Sub-fund replicated passively:

1) Firstly, with regard to environmental PAIs:

- a) the Global Standards compliance filter includes a filter on environmental protection.
- b) the filtering of companies involved in economic sectors and activities that are subject to debate as to their ethical and sustainable character (e.g.: nuclear energy production, tobacco, thermal coal, non-conventional oil and gas).
- c) the filter on ESG score and level of controversy as defined by MSCI also includes controversies related to environmental issues, such as the environmental impact of company operations (emissions, waste, energy use, biodiversity and water consumption), the environmental impact on the supply chain and the impact of products and services (carbon and environmental impact).

2) Secondly, with regard to social PAIs:

- a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. In addition, the filter for companies involved in the selection of key ESG controversies includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.
- b) the exclusion filter for companies involved in controversial activities (inter alia: exclusion of companies involved in non-conventional armaments);
- c) the exclusion filter for companies involved in major ESG controversies on social issues.
- d) the best-in-class classification, which is based on an analysis of the ESG profile based in particular on the social PAIs.

The approach and processes are described in more detail in the documents available at <https://www.msci.com/>.

The methodologies used to construct the indices are available at: <https://www.msci.com/index-methodology> ("MSCI SRI Indexes Methodology").

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The evaluation framework used to rate and exclude issuers from the Index is designed to be consistent with international standards represented by the United Nations Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work and the UN Global Compact. These include the OECD Guidelines for Multinational Enterprises and the UN Guidelines on Business and Human Rights. Companies that do not meet these criteria are excluded from the eligible investment universe. The Sub-fund has therefore not been invested during the Reference Period in any company that is deemed not to comply with these principles.

*The EU Taxonomy sets out a "does not significantly harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "does not significantly harm" principle only applies to the underlying investments of the financial product that consider the European Union's criteria regarding environmentally sustainable economic activities.

*The underlying investments of the remainder of this financial product do not consider the European Union's criteria regarding environmentally sustainable economic activities.*

## How did this financial product consider principal adverse impacts on sustainability factors?

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

In concrete terms, the PAIs were integrated into the different stages of the construction of the Index which the Sub-fund replicated passively:

1) Firstly, with regard to environmental PAIs:

a) the Global Standards compliance filter includes a filter on environmental protection.

b) the filtering of companies involved in economic sectors and activities that are subject to debate as to their ethical and sustainable character (e.g.: nuclear energy production, tobacco, thermal coal, non-conventional oil and gas).

c) the filter on ESG score and level of controversy as defined by MSCI also includes controversies related to environmental issues, such as the environmental impact of company operations (emissions, waste, energy use, biodiversity and water consumption), the environmental impact on the supply chain and the impact of products and services (carbon and environmental impact).

2) Secondly, with regard to social PAIs:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. In addition, the filter for companies involved in the selection of key ESG controversies includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

b) the exclusion filter for companies involved in controversial activities (inter alia: exclusion of companies involved in non-conventional armaments);

c) the exclusion filter for companies involved in major ESG controversies on social issues.

d) the best-in-class classification, which is based on an analysis of the ESG profile based in particular on the social PAIs.

The approach and processes are described in more detail in the documents available at <https://www.msci.com/>.

The methodologies used to construct the indices are available at: <https://www.msci.com/index-methodology> ("MSCI SRI Indexes Methodology").

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
MICROSOFT	Information and communication	24.24	United States of America
TESLA MOTORS INC.	Manufacturing	6.49	United States of America

AMGEN INC.	Manufacturing	1.40	United States of America
S&P GLOBAL INC.	Administrative and support service activities	1.30	United States of America
LOWE'S COMPANIES INC.	Wholesale and retail trade; repair of motor vehicles and motorcycles	1.17	United States of America

## What was the proportion of sustainability-related investments?

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### ● What was the asset allocation?

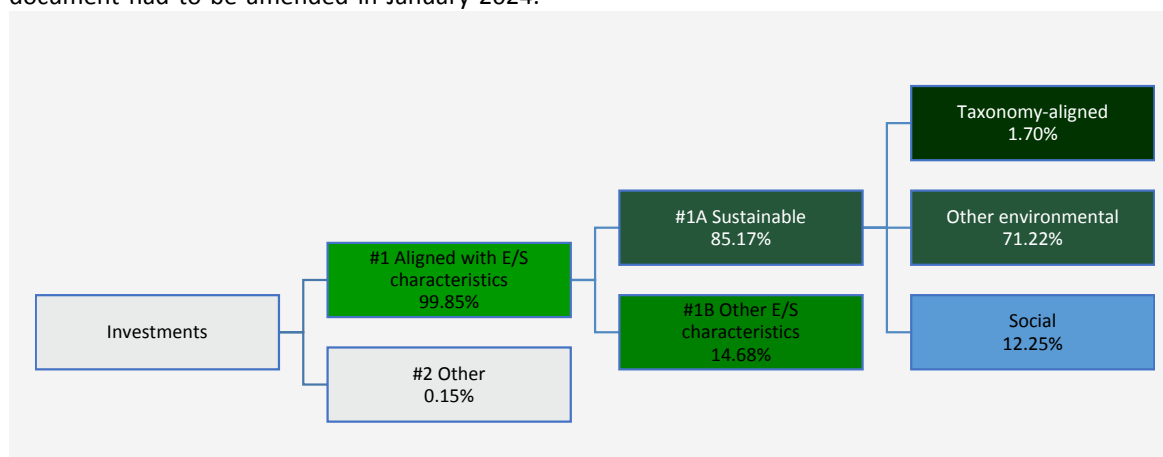

During the Reference Period, by applying the investment strategy, the Sub-fund invested 99.85% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as “#1 Aligned with E/S characteristics”).

The Sub-fund invested at least 85.17% of its assets in sustainable investments with environmental or social objectives (in the table referred to as “#1A Sustainable”).

The percentage of the portfolio invested in sustainable investments that meet an environmental and/or social objective (#1A Sustainable) is calculated using the cascade methodology described in the prospectus (section “What are the sustainable investment objectives that the financial product intends to partially achieve and how does the sustainable investment contribute to these objectives?”), which excludes double counting at the cascade level: an investment qualifying as sustainable at the level of a first element of the cascade is not then taken into account at the level of subsequent elements of the cascade.

In contrast, the percentages of the two sub-categories of sustainable investments (#1A Sustainable) in the portfolio invested in environmental investments other than those aligned with the taxonomy and social investments may involve some double counting. All portfolio companies are analysed against both (i) the environmental SDGs (and therefore may fall into the sub-category “other environmental investments” even if they are also considered to be aligned with the taxonomy and/or as a social sustainable investment) and (ii) the social SDGs (and therefore may fall into the sub-category “social investments” even if they are also considered to be aligned with the taxonomy and/or as an other environmental investment).

Following clarification from the ESAs on 17 November 2022 on the application of Regulation (EU) 2019/2088 that double counting should be avoided between an investment that has an environmental and social objective. Following this change in methodology, the pre-contractual document had to be amended in January 2024.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives;
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### ● In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Information and communication	Publishing activities	30.61
Manufacturing	Manufacture of motor vehicles, trailers and semi-trailers	7.57
Manufacturing	Manufacture of computer, electronic and optical products	5.30
Financial and insurance activities	Activities auxiliary to financial services and insurance activities	4.87
Wholesale and retail trade; repair of motor vehicles and motorcycles	Retail trade, except of motor vehicles and motorcycles	4.86
Manufacturing	Manufacture of beverages	4.33
Manufacturing	Manufacture of basic pharmaceutical products and pharmaceutical preparations	4.23
Financial and insurance activities	Insurance, reinsurance and pension funding, except compulsory social security	4.21
Manufacturing	Manufacture of machinery and equipment n.e.c.	3.55
Financial and insurance activities	Financial service activities, except insurance and pension funding	3.47
Manufacturing	Manufacture of chemicals and chemical products	3.13
Real estate activities	Real estate activities	2.56
Electricity, gas, steam and air conditioning supply	Electricity, gas, steam and air conditioning supply	2.46
Manufacturing	Other manufacturing	2.12

<b>Sector</b>	<b>Sub-sector</b>	<b>% assets</b>
Administrative and support service activities	Office administrative, office support and other business support activities	1.89
Information and communication	Motion picture, video and sound production and distribution	1.50
Information and communication	Telecommunications	1.48
Wholesale and retail trade; repair of motor vehicles and motorcycles	Wholesale trade, except of motor vehicles and motorcycles	1.28
Administrative and support service activities	Travel agency, tour operator reservation service and related activities	1.15
Manufacturing	Manufacture of food products	1.14
Information and communication	Information service activities	1.03
Manufacturing	Manufacture of coke and refined petroleum products	0.97
HUMAN HEALTH AND SOCIAL WORK ACTIVITIES	Human health activities	0.85
Mining and quarrying	Mining support service activities	0.62
Transportation and storage	Land transport and transport via pipelines	0.59
Accommodation and food service activities	Accommodation	0.51
Manufacturing	Manufacture of fabricated metal products, except machinery and equipment	0.44
Mining and quarrying	Mining of metal ores	0.43
Administrative and support service activities	Rental and leasing activities	0.36
Water supply; sewerage; waste management and remediation activities	Water collection, treatment and supply	0.33
Construction	Specialised construction activities	0.30
Transportation and storage	Warehousing and support activities for transportation	0.27
Manufacturing	Manufacture of paper and paper products	0.25
Manufacturing	Manufacture of leather and related products	0.16
Agriculture, forestry and fishing	Crop and animal production, hunting and related service activities	0.15
Professional, scientific and technical activities	Architectural and engineering activities; technical testing and analysis	0.12
Wholesale and retail trade; repair of motor vehicles and motorcycles	Wholesale and retail trade and repair of motor vehicles and motorcycles	0.12
Manufacturing	Manufacture of other non-metallic mineral products	0.12

Information and communication	Programming and broadcasting activities	0.10
Manufacturing	Manufacture of furniture	0.09
Manufacturing	Manufacture of textiles	0.08
Administrative and support service activities	Employment activities	0.08

Sector	Sub-sector	% assets
Manufacturing	Manufacture of wearing apparel	0.06
Derivatives	Derivatives	0.00
Liquid assets	Liquid assets	0.15

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents 100% of total investments.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Enabling activities directly enable other activities to make a

### What was the share of investments made in transitional and enabling activities?

Transitional activities: 13.574%

Enabling activities: n/a

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reference period	EU Taxonomy-aligned investments
1 January 2022 - 31 December 2022	1.56%
1 January 2023 - 31 December 2023	1.70%

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Based on the approach described below, the Sub-fund invested 71.22% of its portfolio in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

The Index replicated by the Sub-fund did not seek to align its investments with the EU Taxonomy. However, the Index's process of combining stock exclusion and best-in-class selection allowed the Sub-fund to commit a minimum of its assets to investments that contribute to environmental objectives but are not aligned with the EU Taxonomy.

During the Reference Period, only two of the six environmental objectives defined by the EU Taxonomy were covered by the regulatory framework of the EU Taxonomy Technical Selection Criteria that determine alignment with the EU Taxonomy (adaptation and climate change mitigation). However, during the Reference Period, DPAM made sustainable investments that contribute to environmental objectives that were not covered by these EU Taxonomy Technical Selection Criteria relating to the first two environmental objectives of the EU Taxonomy, in particular key environmental objectives such as the sustainable use and protection of water and marine resources, the prevention and control of pollution and the protection and restoration of biodiversity and ecosystems.

To this end, the Manager has adopted and defined a specific framework for identifying the environmental objectives of these sustainable investments and assessing their contribution to these objectives. This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to environmental objectives.

Further information on methodology and data resources is available in the information on this Sub-fund via <https://www.funds.dpaminvestments.com/funds.html> (in particular in the sections "Methodologies" and "Data Sources and Data Processing").

Are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of socially sustainable investments?**

Based on the approach described below, the Sub-fund invested 12.25% of its portfolio in sustainable investments with a social objective over the Reference Period.

The Replicated Index's process of combining stock exclusion and best-in-class selection allowed the Sub-fund to commit a minimum of its assets to investments that contribute to social objectives but are not aligned with the EU Taxonomy.

A European Taxonomy for social sustainability goals has yet to be developed. In the meantime, the Manager wishes to continue to make sustainable investments that contribute to the achievement of key social goals such as zero hunger, quality education and peace, justice and strong institutions.

To this end, the Manager has adopted and defined a specific framework for identifying the social objectives of these sustainable investments and assessing their contribution to these objectives. This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to social objectives. The Manager will review and reassess this framework when the EU Taxonomy Technical Selection Criteria have been implemented for the social objectives under the EU Taxonomy.

Further information on methodology and data resources is available in the information on this Sub-fund via <https://www.funds.dpaminvestments.com/funds.html> (in particular in the sections "Methodologies" and "Data Sources and Data Processing").

### **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets
- Derivative instruments
- Collective investment schemes
- issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for the purposes of achieving its investment objectives, portfolio diversification, liquidity management and/or risk hedging, the Sub-fund was exposed to 0.15% in liquid assets. There are no minimum environmental or social guarantees on this allocation.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

During the reference period, the Replicated Index was constructed in particular by applying a combination of securities-based exclusions and a Best-in-Class selection process to companies in the Parent Index:

a) The exclusion process focused on:

- companies that do not have an MSCI ESG rating of 'A' or above. Companies must maintain an MSCI ESG rating of 'BB' or above to remain in the index.
- Companies that are not in compliance with Global Standards and prevention of corruption
- Companies involved in economic sectors and activities that are subject to debate as to whether or not they are ethical and sustainable (e.g. alcohol, gambling, nuclear energy production, tobacco etc.)
- Companies involved in severe ESG controversies: securities must have a score (according to the MSCI ESG Research methodology) of at least 4 to be eligible for inclusion.

b) The MSCI Best-in-Class selection process was applied to the remaining eligible securities in the selection universe:

The Index targets sector weights consistent with those of the Parent Index to limit the systematic risk introduced by the ESG selection process. The methodology aims to include the securities of companies with the highest ESG ratings making up 25% of the market capitalisation of the Parent Index. Companies in the MSCI SRI Global Indices must maintain an MSCI ESG rating of 'BB' or above and a Controversy Score of '1' or above to remain in the index.

Additional information on this index and its composition can be found at [www.msci.com/](http://www.msci.com/). The weight of stocks included in the index will depend on their market capitalisation adjusted for free float.

## How did this financial product perform compared with the reference benchmark?

During the reference period, the Sub-fund's sustainability indicators were therefore aligned and performed in line with those of the Index.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### ● How does the reference benchmark differ from a broad market index?

During the reference period, the Sub-fund consisted of full physical replication of the Index (MSCI USA SRI).

The MSCI SRI indices target sector weights that mirror the relative sector weights of the underlying MSCI Standard indices (Parent Indices) in order to limit the systematic risk introduced by the ESG selection process.

The Replicated Index was constructed by applying a process combining exclusions (Global Standards compliance filter, involvement in severe controversies, controversial activities) and a best-in-class selection of companies in the Parent Index (MSCI USA).

The methodologies used to construct the indices are available at the MSCI website: <https://www.msci.com/index-methodology> ("MSCI SRI Indexes Methodology").

### ● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

During the reference period, the Sub-fund's sustainability indicators were therefore aligned and performed in line with those of the Index.

### ● How did this financial product perform compared with the reference benchmark?

	<i>Sub-fund</i>	<i>Index - MSCI USA SRI</i>
<i>Exposure to companies deemed to be non-compliant with the United Nations Global Compact and international standards (percentage weighting)</i>	0	0
<i>Exposure to companies involved in controversial economic activities (percentage weighting)</i>	0	0
<i>Exposure to companies involved in severe ESG controversies (percentage weighting)</i>	0	0

### ● How did this financial product perform compared with the broad market index?

	<i>Sub-fund</i>	<i>Parent Index- MSCI USA</i>
<i>Exposure to companies deemed to be non-compliant with the United Nations Global Compact and international standards (percentage weighting)</i>	0	0
<i>Exposure to companies involved in controversial economic activities (percentage weighting)</i>	0	1
<i>Exposure to companies involved in severe ESG controversies (percentage weighting)</i>	0	0

## Periodic information for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:**  
DPAM L EQUITIES WORLD SRI MSCI INDEX

**Legal entity identifier:**  
391200EXH21COY8WU366

### Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

#### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b>		<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b>	
<input type="checkbox"/>	It made <b>sustainable investments with an environmental objective: ____%</b>	<input checked="" type="checkbox"/>	It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <b>86.58%</b> of sustainable investments
<input type="checkbox"/>	<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/>	<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/>	It made <b>sustainable investments with a social objective: ____%</b>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/>		<input type="checkbox"/>	It promoted E/S characteristics, but <b>did not make sustainable investments</b>

#### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund was passively managed and aimed to physically replicate the MSCI ACWI SRI ("the Index").

The Index provides exposure to global large and mid-cap companies with high ESG performance relative to their peers in the same sector ("Best-in-Class" 25%).

The Sub-fund aimed to improve the environmental and social characteristics compared to the starting universe, the parent MSCI ACWI Index ("Parent Index").

In addition, the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices and best efforts.

During the Reference Period, derivative products, if any, used for the purpose of achieving the investment objectives of the sub-fund were not used for the purpose of promoting environmental and/or social characteristics.

#### ● How did the sustainability indicators perform?

During the Reference Period, the sustainability indicators used to measure the attainment of all of the environmental and social characteristics promoted by the Sub-fund corresponded to the binding investment restrictions of the Index it aims to replicate (some of the indicators are compared to the Parent Index):

- a. the Sub-fund had zero exposure to companies deemed to be non-compliant with the UN Global Compact and international standards (as defined for example in the UN Declaration on Human Rights, or the ILO Declaration on Fundamental Principles and Rights at Work);
- b. the Sub-fund had zero exposure to companies involved in controversial economic activities, based on the exposure limits imposed by the index construction methodology including any companies owning reserves (proven or probable) of fossil fuels, any companies involved in non-conventional oil and gas extraction, thermal coal extraction and coal-fired power generation;
- c. Zero exposure to companies involved in severe ESG controversies;
- d. a portfolio average greenhouse gas emissions intensity below the average greenhouse gas emissions intensity of the Parent Index universe: 885.52 tCO<sub>2</sub>e/\$ mn revenues (funds) versus 1228.13 tCO<sub>2</sub>e/\$ mn revenues (benchmark) (31/12/2023).
- e. an average ESG Score (MSCI rating) above the average ESG score of the Parent Index universe: 8.38 (funds) versus 6.81 (benchmark) (31/12/2023).

The methodologies used to construct the indices are available at the MSCI website: <https://www.msci.com/index-methodology> ("MSCI SRI Indexes Methodology").

Further information, including methodologies for calculating ESG scores and controversy levels, can be found on the MSCI website: <https://www.msci.com/>.

#### ● ...and compared to previous periods?

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
<b>E/S characteristics</b>	99.77%	99.49%
<b>Sustainable Investment</b>	86.73%	86.58%
<b>Other Environmental Investments</b>	65.71%	68.18%
<b>Social</b>	80.70%	15.93%

Reference period	2022	2023
<b>Sustainability indicator a.</b>	No exposure	No exposure
<b>Sustainability indicator b.</b>	No exposure	No exposure
<b>Sustainability indicator c.</b>	No exposure	No exposure
<b>Sustainability indicator d.</b>	Sub-fund: 872.27 Benchmark: 1178.04	Sub-fund: 885.52 Benchmark: 1228.13
<b>Sustainability indicator e.</b>	Sub-fund: 8.34 Benchmark: 6.78	Sub-fund: 8.38 Benchmark: 6.81

#### ● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the Reference Period, the objective of the sustainable investments that the Sub-fund partially intended to achieve was to invest in companies that contribute through their products and services to the 17 Sustainable Development Goals ("SDGs") defined by the United Nations (UN): the contribution to the Sustainable Development Goals (SDGs) was implicitly taken into account in the determination of the ESG scores. As a result, the Sub-fund sought to achieve an average ESG score/rating for the portfolio that was superior to that of the Parent Index.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

By construction of the Replicated Index, the Sub-fund's strategy incorporated several elements to avoid and/or reduce its exposure to activities or behaviours that could affect another environmental or social objective (such as the exclusion of ESG controversies of maximum severity or activities most detrimental to other environmental and/or social objectives (e.g. thermal coal, ownership of fossil fuel reserves, tobacco, arms, etc.).

In particular, the Sub-fund did not invest in companies involved in the most severe controversies and which may indicate a breach of the OECD Guidelines for Multinational Enterprises and/or the principles of the UN Global Compact or involvement in the most serious negative impacts.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

In concrete terms, the PAIs were integrated into the different stages of the construction of the Index which the Sub-fund replicated passively:

1) Firstly, with regard to environmental PAIs:

- a) the Global Standards compliance filter includes a filter on environmental protection.
- b) the filtering of companies involved in economic sectors and activities that are subject to debate as to their ethical and sustainable character (e.g.: nuclear energy production, tobacco, thermal coal, non-conventional oil and gas).
- c) the filter on ESG score and level of controversy as defined by MSCI also includes controversies related to environmental issues, such as the environmental impact of company operations (emissions, waste, energy use, biodiversity and water consumption), the environmental impact on the supply chain and the impact of products and services (carbon and environmental impact).

2) Secondly, with regard to social PAIs:

- a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. In addition, the filter for companies involved in the selection of key ESG controversies includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.
- b) the exclusion filter for companies involved in controversial activities (inter alia: exclusion of companies involved in non-conventional armaments);
- c) the exclusion filter for companies involved in major ESG controversies on social issues.
- d) the best-in-class classification, which is based on an analysis of the ESG profile based in particular on the social PAIs.

The approach and processes are described in more detail in the documents available at <https://www.msci.com/>.

The methodologies used to construct the indices are available at: <https://www.msci.com/index-methodology> ("MSCI SRI Indexes Methodology").

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The evaluation framework used to rate and exclude issuers from the Index is designed to be consistent with international standards represented by the United Nations Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work and the UN Global Compact. These include the OECD Guidelines for Multinational Enterprises and the UN Guidelines on Business and Human Rights. Companies that do not meet these criteria are excluded from the eligible investment universe. The Sub-fund has therefore not been invested during the Reference Period in any company that is deemed not to comply with these principles.

*The EU Taxonomy sets out a "does not significantly harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "does not significantly harm" principle only applies to the underlying investments of the financial product that consider the European Union's criteria regarding environmentally sustainable economic activities.

*The underlying investments of the remainder of this financial product do not consider the European Union's criteria regarding environmentally sustainable economic activities.*

## How did this financial product consider principal adverse impacts on sustainability factors?

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

In concrete terms, the PAIs were integrated into the different stages of the construction of the Index which the Sub-fund replicated passively:

1) Firstly, with regard to environmental PAIs:

a) the Global Standards compliance filter includes a filter on environmental protection.

b) the filtering of companies involved in economic sectors and activities that are subject to debate as to their ethical and sustainable character (e.g.: nuclear energy production, tobacco, thermal coal, non-conventional oil and gas).

c) the filter on ESG score and level of controversy as defined by MSCI also includes controversies related to environmental issues, such as the environmental impact of company operations (emissions, waste, energy use, biodiversity and water consumption), the environmental impact on the supply chain and the impact of products and services (carbon and environmental impact).

2) Secondly, with regard to social PAIs:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. In addition, the filter for companies involved in the selection of key ESG controversies includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

b) the exclusion filter for companies involved in controversial activities (inter alia: exclusion of companies involved in non-conventional armaments);

c) the exclusion filter for companies involved in major ESG controversies on social issues.

d) the best-in-class classification, which is based on an analysis of the ESG profile based in particular on the social PAIs.

The approach and processes are described in more detail in the documents available at <https://www.msci.com/>.

The methodologies used to construct the indices are available at: <https://www.msci.com/index-methodology> ("MSCI SRI Indexes Methodology").

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
MICROSOFT	Information and communication	14.89	United States of America
TESLA MOTORS INC.	Manufacturing	3.98	United States of America
TAIWAN SEMICONDUCTOR MANUFACTURING	Manufacturing	2.68	Taiwan

Largest investments	Sector	% of assets	Country
HOME DEPOT	Wholesale and retail trade; repair of motor vehicles and motorcycles	1.95	United States of America
NOVO NORDISK B	Manufacturing	1.92	Denmark
ASML HOLDING	Manufacturing	1.72	Netherlands
ADOBE SYSTEMS INCORPORATED	Information and communication	1.52	United States of America
COCA-COLA CO	Manufacturing	1.37	United States of America
PEPSICO	Manufacturing	1.32	United States of America
LINDE PLC	Manufacturing	1.14	United States of America
INTUIT INC.	Information and communication	0.98	United States of America
WALT DISNEY	Information and communication	0.95	United States of America
VERIZON COMMUNICATIONS	Information and communication	0.91	United States of America
DANAHER CORPORATION	Manufacturing	0.91	United States of America
TEXAS INSTRUMENTS	Manufacturing	0.86	United States of America

## What was the proportion of sustainability-related investments?

### ● What was the asset allocation?

During the Reference Period, by applying the investment strategy, the Sub-fund invested 99.49% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as “#1 Aligned with E/S characteristics”).

The Sub-fund invested at least 86.58% of its assets in sustainable investments with environmental or social objectives (in the table referred to as “#1A Sustainable”).

The percentage of the portfolio invested in sustainable investments that meet an environmental and/or social objective (#1A Sustainable) is calculated using the cascade methodology described in the prospectus (section “What are the sustainable investment objectives that the financial product intends to partially achieve and how does the sustainable investment contribute to these objectives?”), which excludes double counting at the cascade level: an investment qualifying as sustainable at the level of a first element of the cascade is not then taken into account at the level of subsequent elements of the cascade.

In contrast, the percentages of the two sub-categories of sustainable investments (#1A Sustainable) in the portfolio invested in environmental investments other than those aligned with the taxonomy and social investments may involve some double counting. All portfolio companies are analysed against both (i) the environmental SDGs (and therefore may fall into the sub-category “other environmental investments” even if they are also considered to be aligned with the taxonomy and/or as a social sustainable investment) and (ii) the social SDGs (and therefore may fall into the sub-category “social investments” even if they are also considered to be aligned with the taxonomy and/or as an other environmental investment).

Following clarification from the ESAs on 17 November 2022 on the application of Regulation (EU) 2019/2088 that double counting should be avoided between an investment that has an environmental and social objective. Following this change in methodology, the pre-contractual document had to be amended in January 2024.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives;
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### ● In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Information and communication	Publishing activities	19.56
Manufacturing	Manufacture of computer, electronic and optical products	9.50
Financial and insurance activities	Financial service activities, except insurance and pension funding	6.36
Financial and insurance activities	Insurance, reinsurance and pension funding, except compulsory social security	5.91
Manufacturing	Manufacture of basic pharmaceutical products and pharmaceutical preparations	5.48

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● What was the share of investments made in transitional and enabling activities?

Transitional activities: 10.632%

Enabling activities: 0.324%

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Reference period	EU Taxonomy-aligned investments
1 January 2022 - 31 December 2022	2.07%
1 January 2023 - 31 December 2023	2.47%

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Based on the approach described below, the Sub-fund invested 68.18% of its portfolio in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

The Index replicated by the Sub-fund did not seek to align its investments with the EU Taxonomy. However, the Index's process of combining stock exclusion and best-in-class selection allowed the Sub-fund to commit a minimum of its assets to investments that contribute to environmental objectives but are not aligned with the EU Taxonomy.

During the Reference Period, only two of the six environmental objectives defined by the EU Taxonomy were covered by the regulatory framework of the EU Taxonomy Technical Selection Criteria that determine alignment with the EU Taxonomy (adaptation and climate change mitigation). However, during the Reference Period, DPAM made sustainable investments that contribute to environmental objectives that were not covered by these EU Taxonomy Technical Selection Criteria relating to the first two environmental objectives of the EU Taxonomy, in particular key environmental objectives such as the sustainable use and protection of water and marine resources, the prevention and control of pollution and the protection and restoration of biodiversity and ecosystems.

To this end, the Manager has adopted and defined a specific framework for identifying the environmental objectives of these sustainable investments and assessing their contribution to these objectives. This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to environmental objectives.

Further information on methodology and data resources is available in the information on this Sub-fund via <https://www.funds.dpaminvestments.com/funds.html> (in particular in the sections "Methodologies" and "Data Sources and Data Processing").

## What was the share of socially sustainable investments?

Based on the approach described below, the Sub-fund invested 15.93% of its portfolio in sustainable investments with a social objective over the Reference Period.

The Replicated Index's process of combining stock exclusion and best-in-class selection allowed the Sub-fund to commit a minimum of its assets to investments that contribute to social objectives but are not aligned with the EU Taxonomy.

A European Taxonomy for social sustainability goals has yet to be developed. In the meantime, the Manager wishes to continue to make sustainable investments that contribute to the achievement of key social goals such as zero hunger, quality education and peace, justice and strong institutions.

To this end, the Manager has adopted and defined a specific framework for identifying the social objectives of these sustainable investments and assessing their contribution to these objectives. This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to social objectives. The Manager will review and reassess this framework when the EU Taxonomy Technical Selection Criteria have been implemented for the social objectives under the EU Taxonomy.

Further information on methodology and data resources is available in the information on this Sub-fund via <https://www.funds.dpaminvestments.com/funds.html> (in particular in the sections "Methodologies" and "Data Sources and Data Processing").

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

Are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- Liquid assets
- Derivative instruments
- Collective investment schemes
- issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for the purposes of achieving its investment objectives, portfolio diversification, liquidity management and/or risk hedging, the Sub-fund was exposed to 0.51% in liquid assets. There are no minimum environmental or social guarantees on this allocation.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the Replicated Index was constructed in particular by applying a combination of securities-based exclusions and a Best-in-Class selection process to companies in the Parent Index:

a) The exclusion process focused on:

- companies that do not have an MSCI ESG rating of 'A' or above. Companies must maintain an MSCI ESG rating of 'BB' or above to remain in the index.
- Companies that are not in compliance with Global Standards and prevention of corruption
- Companies involved in economic sectors and activities that are subject to debate as to whether or not they are ethical and sustainable (e.g. alcohol, gambling, nuclear energy production, tobacco etc.)
- Companies involved in severe ESG controversies: securities must have a score (according to the MSCI ESG Research methodology) of at least 4 to be eligible for inclusion.

b) The MSCI Best-in-Class selection process was applied to the remaining eligible securities in the selection universe:

The Index targets sector weights consistent with those of the Parent Index to limit the systematic risk introduced by the ESG selection process. The methodology aims to include the securities of companies with the highest ESG ratings making up 25% of the market capitalisation of the Parent Index. Companies in the MSCI SRI Global Indices must maintain an MSCI ESG rating of 'BB' or above and a Controversy Score of '1' or above to remain in the index.

Additional information on this index and its composition can be found at [www.msci.com/](http://www.msci.com/). The weight of stocks included in the index will depend on their market capitalisation adjusted for free float.

## How did this financial product perform compared with the reference benchmark?

During the reference period, the Sub-fund's sustainability indicators were therefore aligned and performed in line with those of the Index.

### ● How does the reference benchmark differ from a broad market index?

During the reference period, the Sub-fund consisted of full physical replication of the Index (MSCI ACWI SRI).

The MSCI SRI indices target sector weights that mirror the relative sector weights of the underlying MSCI Standard indices (Parent Indices) in order to limit the systematic risk introduced by the ESG selection process.

The Replicated Index was constructed by applying a process combining exclusions (Global Standards compliance filter, involvement in severe controversies, controversial activities) and a best-in-class selection of companies in the Parent Index (MSCI ACWI).

The methodologies used to construct the indices are available at the MSCI website: <https://www.msci.com/index-methodology> ("MSCI SRI Indexes Methodology").

**Reference benchmarks**  
are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

During the reference period, the Sub-fund's sustainability indicators were therefore aligned and performed in line with those of the Index.

- **How did this financial product perform compared with the reference benchmark?**

	<i>Sub-fund</i>	<i>Index - MSCI WORLD SRI</i>
<i>Exposure to companies deemed to be non-compliant with the United Nations Global Compact and international standards (percentage weighting)</i>	0	0
<i>Exposure to companies involved in controversial economic activities (percentage weighting)</i>	0	0
<i>Exposure to companies involved in severe ESG controversies (percentage weighting)</i>	0	0

- **How did this financial product perform compared with the broad market index?**

	<i>Sub-fund</i>	<i>Parent Index - MSCI WORLD</i>
<i>Exposure to companies deemed to be non-compliant with the United Nations Global Compact and international standards (percentage weighting)</i>	0	0.5
<i>Exposure to companies involved in controversial economic activities (percentage weighting)</i>	0	0.7
<i>Exposure to companies involved in severe ESG controversies (percentage weighting)</i>	0	0.6

## Periodic information for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:**  
DPAM L GLOBAL TARGET INCOME

**Legal entity identifier:**  
5493008AXEU35YCKQQ13

### Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

#### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b>		<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b>	
<input type="checkbox"/>	It made <b>sustainable investments with an environmental objective</b> : ____%	<input type="checkbox"/>	It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments
<input type="checkbox"/>	<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/>	<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/>	It made <b>sustainable investments with a social objective</b> : ____%	<input checked="" type="checkbox"/>	It promoted E/S characteristics, but <b>did not make sustainable investments</b>

#### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices and best efforts.

During the Reference Period, derivative products, if any, used for the purpose of achieving the investment objectives of the sub-fund were not used for the purpose of promoting environmental and/or social characteristics.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

#### ● How did the sustainability indicators perform?

Over the Reference Period, the Sub-fund achieved the following sustainability indicators:

- At the level of direct line investments (shares or corporate bonds):
  - the Sub-fund was not exposed to companies considered to be below Global Standards during the reporting period;
  - the Sub-fund was not exposed to companies involved in excluded controversial activities as defined by the Manager's Controversial Activities Policy;

c) the Sub-fund has not been exposed to companies facing extremely serious controversies around environmental or social issues.

2. For investments in UCIs:

The sub-fund has invested in sub-funds that promote, among other things, environmental or social characteristics within the meaning of Regulation 2019/2088 and/or sub-funds of UCIs that have a sustainable investment objective within the meaning of Regulation 2019/2088.

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
E/S characteristics	87.14%	93.11%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Not applicable

*The EU Taxonomy sets out a "does not significantly harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "does not significantly harm" principle only applies to the underlying investments of the financial product that consider the European Union's criteria regarding environmentally sustainable economic activities.

*The underlying investments of the remainder of this financial product do not consider the European Union's criteria regarding environmentally sustainable economic activities.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

- For investments in shares or corporate bonds:

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social

The PAIs are intrinsically linked to the Manager’s commitment to reduce the negative impact of the Sub-fund’s investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth.

This commitment is incorporated throughout the research and investment process from its inception. In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund’s construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

- 1) Firstly, with regard to environmental PAIs:
  - a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD) Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.
  - b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not meet global standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity are thus excluded from the portfolio in advance.

The exclusion filter for companies involved in controversial activities (in accordance with DPAM’s Controversial Activities Policy (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy)). The exclusion of companies involved in thermal coal production, for example, allows for better coverage of indicators such as biodiversity and greenhouse gas emissions. The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company’s operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

- 2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:
  - a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises are de facto excluded from the investment universe.
  - b) the exclusion filter for companies involved in controversial activities (in accordance with DPAM’s Controversial Activities Policy (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy)). In this way, companies involved in controversial armaments are directly excluded from the investment universe.

In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

- For investments in UCIs:

Yes, the sub-fund has taken into account, over the Reference Period, the PAI only to the extent and according to the consideration of the PAI by the underlying UCI.

As mentioned above, the Sub-fund’s ESG investments may include investments in UCIs which are classified as financial products that promote, inter alia, environmental and/or social characteristics within the meaning of Regulation 2019/2088 and/or have a sustainable investment objective within the meaning of Regulation 2019/2088.

As a result of their classification, these UCIs could possibly take into account certain PAI on sustainability factors listed in table 1 of appendix I of the Delegated Regulation (EU) 2022/1288.

The Manager’s approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at <https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> (Sustainable and Responsible Investments Policy) and <https://www.dpaminvestments.com/documents/tcfd-report-enBE> (TCFD Report)

## What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
DPAM L BONDS EUR HIGH YIELD SHORT TERM - P	Financial and insurance activities	19.12	Luxembourg
DPAM L BONDS EMERGING MARKETS SUSTAINABLE - P	Financial and insurance activities	18.75	Luxembourg
DPAM L BONDS GOVERNMENT GLOBAL - P	Financial and insurance activities	18.59	Luxembourg
DPAM B REAL ESTATE EUROPE DIVIDEND SUSTAINABLE - P	Financial and insurance activities	7.98	Belgium

DPAM B EQUITIES EUROPE SMALL CAPS SUSTAINABLE - P	Financial and insurance activities	0.09	Belgium
DPAM B BONDS GLOBAL ILB - P EUR HEDGED	Financial and insurance activities	0.09	Belgium

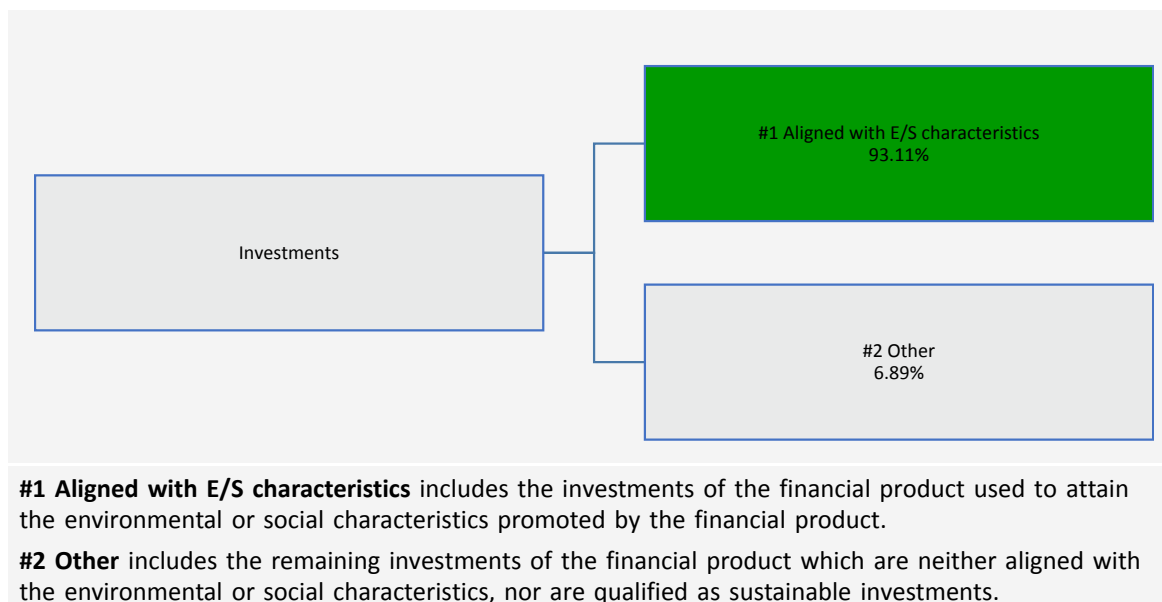

## What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

### What was the asset allocation?

By applying the investment strategy described above, the Sub-fund invested 93.11% of its assets in securities that satisfy the environmental and social characteristics it promotes (in the table referred to as “#1 Aligned with E/S characteristics”), including in UCIs which promote, inter alia, environmental or social characteristics within the meaning of Article 8 of Regulation 2019/2088 or have a sustainable investment objective within the meaning of Article 9 of Regulation 2019/2088.

● **In which economic sectors were the investments made?**

Sector	Sub-sector	% assets
Financial and insurance activities	Financial service activities, except insurance and pension funding	93.11
Derivatives	Derivatives	0.62
Liquid assets	Liquid assets	6.27

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Not applicable

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☐ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

● What was the share of investments made in transitional and enabling activities?

Not applicable

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

Are sustainable investments with an environmental objective that **do not take into account the criteria** for

**What was the share of socially sustainable investments?**

Not applicable

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets
- Derivative instruments
- Collective investment schemes
- issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for the purposes of achieving its investment objectives, portfolio diversification, liquidity management and/or risk hedging, the Sub-fund was exposed to 6.27% in liquid assets and 0.62% in derivatives. There are no minimum environmental or social guarantees on this allocation.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e.:

- For direct investments (shares or corporate bonds):

On a quarterly basis, a normative screening has been established based on compliance with global standards.

Secondly, companies meeting the thresholds as defined in the activities excluded by the responsible investment policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector.

- For investments in UCIs:

Among its ESG investments, the sub-fund has invested in UCIs that are classified as UCIs that promote, among other things, environmental and/or social characteristics as defined in Regulation 2019/2088 and/or have a sustainable investment objective as defined in Regulation 2019/2088.

In its selection of these UCIs for the sub-fund, DPAM has therefore taken into account the integration of environmental, social and/or governance criteria by the third party manager in the management of these UCIs. The investment strategy and methodology for selecting ESG and/or sustainable investments by third-party managers may vary from UCI to UCI.

The list of collective investment schemes in which the Sub-fund may invest is updated on a regular basis by DPAM and on an ad hoc basis in the event of deterioration. At least once a year, DPAM conducts an analysis of the underlying collective investment schemes to verify the extent to which their selection methodology is aligned with the environmental and/or social characteristics that the Sub-fund aims to promote.

In addition, DPAM is in regular dialogue with the managers of these funds. If a UCI no longer has the above-mentioned classification (Article 8 or Article 9 according to Regulation 2019/2088) according to the information declared in the Sub-fund's prospectus, DPAM will sell the investment in the UCI concerned in the interest of the Sub-fund's shareholders within six months if such sale is necessary in order to comply, at the overall level of the Sub-fund, with the promoted environmental and social characteristics.

## How did this financial product perform compared with the reference benchmark?

Not applicable

### ● How does the reference benchmark differ from a broad market index?

### Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

#### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b>	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: ____%</b> <div style="margin-left: 40px;"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy                 </div> <div style="margin-left: 40px;"> <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy                 </div> <input type="checkbox"/> It made <b>sustainable investments with a social objective: ____%</b>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments <div style="margin-left: 40px;"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy                 </div> <div style="margin-left: 40px;"> <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy                 </div> <div style="margin-left: 40px;"> <input type="checkbox"/> with a social objective                 </div> <input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make sustainable investments</b>

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices and best efforts.
- excluding countries that do not respect a minimum of democratic requirements.

During the Reference Period, derivative products, if any, used for the purpose of achieving the investment objectives of the sub-fund were not used for the purpose of promoting environmental and/or social characteristics.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

#### ● How did the sustainability indicators perform?

Over the Reference Period, the Sub-fund achieved the following sustainability indicators:

1. At the level of direct line investments (equities or corporate bonds):
  - a) the Sub-fund was not exposed to companies considered to be below Global Standards during the reporting period;

b) the Sub-fund was not exposed to companies involved in excluded controversial activities as defined by the Sub-fund Manager's Controversial Activities Policy;

c) the Sub-fund has not been exposed to companies facing extremely serious controversies around environmental or social issues.

2. At the level of direct line investments (sovereign bonds):

The Sub-fund has not been exposed to issuers that do not meet minimum democratic requirements.

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
E/S characteristics	92.65%	95.66%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Not applicable

*The EU Taxonomy sets out a "does not significantly harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "does not significantly harm" principle only applies to the underlying investments of the financial product that consider the European Union's criteria regarding environmentally sustainable economic activities.

*The underlying investments of the remainder of this financial product do not consider the European Union's criteria regarding environmentally sustainable economic activities.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

- For investments in shares or corporate bonds:

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to

The PAIs are intrinsically linked to the Manager’s commitment to reduce the negative impact of the Sub-fund’s investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth.

This commitment is incorporated throughout the research and investment process from its inception. In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund’s construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

- 1) Firstly, with regard to environmental PAIs:
  - a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAIs related to greenhouse gas emissions and energy performance, including through the Manager’s research in the context of the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD). Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.
  - b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not meet global standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity are thus excluded from the portfolio in advance.

The exclusion filter for companies involved in controversial activities (in accordance with DPAM’s Controversial Activities Policy (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy)). The exclusion of companies involved in thermal coal production, for example, allows for better coverage of indicators such as biodiversity and greenhouse gas emissions. The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company’s operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

- 2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:
  - a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises are de facto excluded from the investment universe.
  - b) the exclusion filter for companies involved in controversial activities (in accordance with DPAM’s Controversial Activities Policy (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE> (Controversial Activities Policy)). In this way, companies involved in controversial armaments are directly excluded from the investment universe.

In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

- For investments in sovereign bonds:

During the Reference Period, the Sub-fund took into consideration the environmental and social PAI listed in table 1 of appendix I of the Delegated Regulation (EU) 2022/1288.

The first PAI relates to environmental issues and focuses on the greenhouse gas emission intensity of the investee countries. The indicator is an integral component of the country sustainability model that the Manager developed for its sovereign bond strategies. Consequently, it is included in the country’s sustainability score and can influence it positively or negatively depending on its level and development compared to other issuer countries.

The second PAI relates to social issues and focuses on issues of social breaches. Our country sustainability model monitors a number of indicators on this issue, such as respect for civil liberties and political rights, respect for human rights and the level of violence within the country, commitment to key labour law conventions, the issue of equal opportunities and distribution of wealth, etc. These different indicators are included in the country’s sustainability score and may influence it positively or negatively depending on its level and evolution compared to other emitting countries.

During the Reference Period, a dialogue was initiated on the results of the sustainability scores with some countries according to the manager's engagement policy via the link

<https://www.dpaminvestments.com/documents/engagement-policy-enBE> (Engagement policy).

Over the Reference Period, the management teams conducted 37 dialogues with the various participants in sovereign debt issues. These dialogues allowed us to verify with the stakeholders the points of attention of the governmental policies, notably in environmental and/or social matters.

Details of the dialogues with countries and companies will be published in an annual report in the first quarter of 2023 on the Manager's website (<https://www.funds.dpaminvestments.com/funds.html>).

The Manager's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at

<https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE>

(Sustainable and Responsible Investments Policy) and

<https://www.dpaminvestments.com/documents/tcf-report-enBE> (TCFD Report).

## What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
2 1/4 OAT MAY24 25.05.2024	Public administration	5.37	France
DPAM L BONDS EUR CORPORATE HIGH YIELD - P	Financial and insurance activities	3.78	Luxembourg
WISDOM ETFS PHYSICAL GOLD USD	Financial and insurance activities	2.99	United Kingdom
CANADA (GOVERNMENT OF) 2.25% 01/06/2029	Public administration	2.60	Canada
1/8 US TREAS JAN30 15.01.2030	Public administration	2.30	United States of America
US TREASURY NOTES 2.25% 15/08/2027	Public administration	2.02	United States of America
1/8 UK TREAS INFL MAR24 22.03.2024	Public administration	1.90	United Kingdom

2 7/8 SIEMENS FIN MAR28 10.03.2028	Financial and insurance activities	1.55	Germany

## What was the proportion of sustainability-related investments?

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### What was the asset allocation?

By applying the investment strategy described above, the Sub-fund invests 95.66% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S characteristics").

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

### In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Public administration	Public administration and defence; compulsory social security	38.61
Financial and insurance activities	Financial service activities, except insurance and pension funding	25.34
Manufacturing	Manufacture of computer, electronic and optical products	7.16
Manufacturing	Manufacture of basic pharmaceutical products and pharmaceutical preparations	2.99
Information and communication	Telecommunications	2.12
Electricity, gas, steam and air conditioning supply	Electricity, gas, steam and air conditioning supply	2.11
Financial and insurance activities	Activities auxiliary to financial services and insurance activities	1.82
Manufacturing	Manufacture of machinery and equipment n.e.c.	1.68
Manufacturing	Manufacture of motor vehicles, trailers and semi-trailers	1.58
Financial and insurance activities	Insurance, reinsurance and pension funding, except compulsory social security	1.52
Information and communication	Programming and broadcasting activities	1.41
Wholesale and retail trade; repair of motor vehicles and motorcycles	Retail trade, except of motor vehicles and motorcycles	1.30

Sector	Sub-sector	% assets
Information and communication	Computer programming, consultancy and related activities	1.23
Real estate activities	Real estate activities	1.08
Manufacturing	Manufacture of chemicals and chemical products	1.07
Manufacturing	Manufacture of food products	0.76
Other service activities	Other personal service activities	0.69
Manufacturing	Manufacture of fabricated metal products, except machinery and equipment	0.67
Information and communication	Publishing activities	0.58
Administrative and support service activities	Office administrative, office support and other business support activities	0.58
Administrative and support service activities	Travel agency, tour operator reservation service and related activities	0.56
Manufacturing	Other manufacturing	0.55
Transportation and storage	Land transport and transport via pipelines	0.52
Information and communication	Information service activities	0.52
Wholesale and retail trade; repair of motor vehicles and motorcycles	Wholesale trade, except of motor vehicles and motorcycles	0.51
Manufacturing	Manufacture of wood and of products of wood and cork, straw and plaiting	0.50
Activities of extraterritorial organisations and bodies	Activities of extraterritorial organisations and bodies	0.48
Manufacturing	Manufacture of electrical equipment	0.37
Manufacturing	Manufacture of basic metals	0.32
Derivatives	Derivatives	0.33
Liquid assets	Liquid assets	1.02

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

#### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☐ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

● What was the share of investments made in transitional and enabling activities?

Not applicable

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

Are sustainable investments with an environmental objective that **do not take into account the criteria** for

**What was the share of socially sustainable investments?**

Not applicable

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets
- Derivative instruments
- Collective investment schemes
- issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for the purposes of achieving its investment objectives, portfolio diversification, liquidity management and/or risk hedging, the Sub-fund was exposed to 1.02% in liquid assets, 0.33% in derivatives and 2.99% in undertakings for collective investment. There are no minimum environmental or social guarantees on this allocation.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e.:

- For direct investments (shares or corporate bonds):

On a quarterly basis, a normative screening has been established based on compliance with Global Standards.

Secondly, companies meeting the thresholds as defined in the activities excluded by the responsible investment policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector.

- For investments in sovereign bonds:

The sub-fund did not invest in countries considered not to meet minimum democratic requirements. To determine whether a country does not meet this minimum requirement the Manager applied a methodology that is based primarily on the classifications of the International NGO Freedom House ("not free") and The Economist Intelligence Unit ("authoritarian regime").

The list of countries was reviewed on a semi-annual basis and provided to management via the management systems so that it could not give transaction orders on papers issued by these excluded countries.

The stages of the investment process are outlined below:

## How did this financial product perform compared with the reference benchmark?

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

- **How did this financial product perform compared with the reference benchmark?**

Not applicable

- **How did this financial product perform compared with the broad market index?**

### STATUTORY AUDITOR'S REPORT TO THE GENERAL SHAREHOLDERS' MEETING OF DPAM B SA (PUBLIC INVESTMENT COMPANY WITH VARIABLE CAPITAL UNDER BELGIAN LAW) ON THE ANNUAL ACCOUNTS FOR THE YEAR ENDED 31 DECEMBER 2023

We present to you our statutory auditor's report in the context of our statutory audit of the annual accounts of DPAM B SA (Public Investment Company with variable capital under Belgian law) (the "Company"). This report includes our report on the annual accounts, as well as the other legal and regulatory requirements. This forms part of an integrated whole and is indivisible.

We have been appointed as statutory auditor by the general meeting d.d. 17 March 2021, following the proposal formulated by the board of directors. Our mandate will expire on the date of the general meeting which will deliberate on the annual accounts for the year ended 31 December 2023. We have performed the statutory audit of the Company's annual accounts for 6 consecutive years.

#### Report on the annual accounts

##### Unqualified opinion

We have performed the statutory audit of the Company's annual accounts, which comprise the balance sheet as at 31 December 2023, and the profit and loss account for the year then ended, and the notes to the annual accounts, with a globalised statement of total net assets of EUR 14.445.439.500,39 and of which the globalised result statement shows a profits for the financial year of EUR 2.019.699.960,17. An overview of the total net assets and the result of the financial year per sub-fund is provided in the table below:

Compartiment	Devise	Actif Net	Resultat
DPAM B Bonds EUR	EUR	1.017.531.742,21	72.445.287,44

In our opinion, the annual accounts give a true and fair view of the Company's net equity and financial position as at 31 December 2023, and of its results for the year then ended, in accordance with the financial-reporting framework applicable to Collective Investment Funds in Belgium (and in particular the Royal Decree of 10 November 2006).

#### **Basis for unqualified opinion**

We conducted our audit in accordance with International Standards on Auditing (ISAs) as applicable in Belgium. Furthermore, we have applied the International Standards on Auditing as approved by the IAASB which are applicable to the year-end and which are not yet approved at the national level. Our responsibilities under those standards are further described in the "Statutory Auditor's responsibilities for the audit of the annual accounts" section of our report. We have fulfilled our ethical responsibilities in accordance with the ethical requirements that are relevant to our audit of the annual accounts in Belgium, including the requirements related to independence.

We have obtained from the board of directors and Company officials the explanations and information necessary for performing our audit.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### **Responsibilities of the board of directors for the preparation of the annual accounts**

The board of directors is responsible for the preparation of annual accounts that give a true and fair view in accordance with the financial-reporting framework applicable in Belgium, and for such internal control as the board of directors determines is necessary to enable the preparation of annual accounts that are free from material misstatement, whether due to fraud or error.

## **FREE TRANSLATION**

In preparing the annual accounts, the board of directors is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the board of directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

### **Statutory auditor's responsibilities for the audit of the annual accounts**

Our objectives are to obtain reasonable assurance about whether the annual accounts as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these annual accounts.

In performing our audit, we comply with the legal, regulatory and normative framework applicable to the audit of the annual accounts in Belgium. A statutory audit does not provide any assurance as to the Company's future viability nor as to the efficiency or effectiveness of the board of directors' current or future business management. Our responsibilities in respect of the use of the going concern basis of accounting by the board of directors are described below.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the annual accounts, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control;
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the board of directors;
- Conclude on the appropriateness of the board of directors use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our statutory auditor's report to the related disclosures in the annual accounts or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our statutory auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern;
- Evaluate the overall presentation, structure and content of the annual accounts, including the disclosures, and whether the annual accounts represent the underlying transactions and events in a manner that achieves fair presentation.

## **FREE TRANSLATION**

We communicate with the board of directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

### **Other legal and regulatory requirements**

#### **Responsibilities of the board of directors**

The board of directors is responsible for the preparation and the content of the directors' report, as well as for the compliance with the legal and regulatory requirements regarding bookkeeping, with the Companies' and Associations' Code and the Company's articles of association.

#### **Statutory auditor's responsibilities**

In the context of our engagement and in accordance with the Belgian standard which is complementary to the International Standards on Auditing (ISAs) as applicable in Belgium, our responsibility is to verify, in all material respects, the directors' report, as well as compliance with the articles of association and of certain requirements of the Companies' and Associations' Code and to report on these matters.

#### **Aspects related to the directors' report**

In our opinion, after having performed specific procedures in relation to the directors' report, the directors' report is consistent with the annual accounts for the year under audit, and is prepared in accordance with the articles 3:5 and 3:6 of the Companies' and Associations' Code.

In the context of our audit of the annual accounts, we are also responsible for considering, in particular based on the knowledge acquired resulting from the audit, whether the directors' report is materially misstated or contains information which is inadequately disclosed or otherwise misleading. In light of the procedures we have performed, there are no material misstatements we have to report to you.

#### **Statements related to independence**

- Our registered audit firm and our network did not provide services which are incompatible with the statutory audit of the annual accounts and our registered audit firm remained independent of the Company in the course of our mandate;
- The fees for additional services which are compatible with the statutory audit of the annual accounts referred to in article 3:65 of the Companies' and Associations' Code are correctly disclosed and itemized in the notes to the annual accounts.

## **FREE TRANSLATION**

### **Other statements**

- Without prejudice to formal aspects of minor importance, the accounting records were maintained in accordance with the legal and regulatory requirements applicable in Belgium;
- The appropriation of results proposed to the general meeting complies with the legal provisions and the provisions of the articles of association;
- There are no transactions undertaken or decisions taken in breach of the Company's articles of association or the Companies' and Associations' Code that we have to report to you.

Diegem, 8 March 2024

The statutory auditor  
PwC Reviseurs d'Entreprises SRL / PwC Bedrijfsrevisoren BV  
represented by

Brieuc Lefrancq\*  
Réviseur d'Entreprises / Bedrijfsrevisor

\*Acting on behalf of Brieuc Lefrancq BV/SRL

# **DPAM B**

*Limited Company*

**Description of the share classes**

**Class A:** distribution shares offered to the public.

**Class A USD:** distribution shares which differ from shares of class A due to the fact that they are denominated in United States dollars.

**Class A EUR HEDGED:** distribution shares which differ from class A shares in that the exchange risk against the euro is hedged. The Manager must take measures to systematically hedge the exchange risk in relation to the sub-fund's reference currency within a tolerance threshold defined in the information on the sub-fund.

*Investors are advised that implementing an exchange risk hedging policy may result in additional costs as mentioned in the information on the sub-fund.*

**Class V:** distribution shares which differ from class A shares due to the fact that (i) at the discretion of the management company they may be offered to distributors and platforms in the United Kingdom, Switzerland and European Union Member States, excluding Banque Degroof Petercam Belgium and Banque Degroof Petercam Luxembourg, (ii) they may be offered by distributors and platforms that have entered into separate remuneration agreements with their customers that are not subject to any rebate, and (iii) they are not subject to a rebate on management fees.

**Class V EUR HEDGED:** distribution shares which differ from Class V shares due to the fact that the exchange risk against the euro is hedged. The manager must take measures to systematically hedge the exchange risk in relation to the sub-fund's reference currency within a tolerance threshold defined in the information on the sub-fund.

*Investors are advised that implementing an exchange risk hedging policy may result in additional costs as mentioned in the information on the sub-fund.*

**Class E:** distribution shares which differ from class A shares in that (i) they are reserved for eligible investors acting on their own account, (ii) they have a minimum initial subscription amount, (iii) a different management fee and (iv) a different annual tax.

**Class E USD:** distribution shares which differ from shares of class E due to the fact that they are denominated in United States dollars.

**Class E EUR HEDGED:** distribution shares which differ from Class E shares due to the fact that the exchange risk against the euro is hedged. The manager must take measures to systematically hedge the exchange risk in relation to the sub-fund's reference currency within a tolerance threshold defined in the information on the sub-fund.

*Investors are advised that implementing an exchange risk hedging policy may result in additional costs as mentioned in the information on the sub-fund.*

**Class M:** distribution shares which differ from class A shares due to the fact that (i) they are reserved to investors having one or more current discretionary management mandates with one or more companies belonging to Degroof Petercam Group, (ii) they are reserved to the account(s) to which these discretionary management mandates apply, (iii) they are reserved for all-in mandates and in that (iv) they have a different management fee.

In this context, "all in" includes at least the management fees and custody fees charged on the account (s) to which these "all in" discretionary management mandates apply.

**Class M USD:** distribution shares which differ from shares of class M due to the fact that they are denominated in United States dollars.

**Class M EUR HEDGED:** distribution shares which differ from class M shares due to the fact that the exchange risk against the euro is hedged. The manager must take measures to systematically hedge the exchange risk in relation to the sub-fund's reference currency within a tolerance threshold defined in the information on the sub-fund.

*Investors are advised that implementing an exchange risk hedging policy may result in additional costs as mentioned in the information on the sub-fund.*

**Class B:** capitalisation shares offered to the public.

**Class B LC:** capitalisation shares which differ from class B shares due to the fact that (i) they are reserved for investors affected, directly or indirectly, by one or more current “Services Agreement Life Cycle” contracts with Degroof Petercam Asset Management, and (ii) that they have a different management fee.

**Class B USD:** capitalisation shares which differ from shares of class B due to the fact that they are denominated in United States dollars.

**Class B EUR HEDGED:** capitalisation shares which differ from class B shares due to the fact that the exchange risk against the euro is hedged. The manager must take measures to systematically hedge the exchange risk in relation to the sub-fund's reference currency within a tolerance threshold defined in the information on the sub-fund.

*Investors are advised that implementing an exchange risk hedging policy may result in additional costs as mentioned in the information on the sub-fund.*

**Class L:** capitalisation shares which differ from shares of class B due to the fact that (i) they have a minimum initial subscription, and (ii) a management fee that may be different.

**Class L USD:** capitalisation shares which differ from shares of class L due to the fact that they are denominated in United States dollars.

**Class W:** capitalisation shares offered to the public which differ from class B shares due to the fact that (i) at the discretion of the management company they may be offered to distributors and platforms in the United Kingdom, Switzerland and European Union Member States, excluding Banque Degroof Petercam Belgium and Banque Degroof Petercam Luxembourg, (ii) they may be offered by distributors and platforms that have entered into separate remuneration agreements with their customers that are not subject to any rebate, and (iii) they are not subject to a rebate on management fees.

**Class W USD:** capitalisation shares which differ from class W shares due to the fact that (i) they are denominated in US dollars.

**Class W EUR HEDGED:** capitalisation shares which differ from class W shares in that the exchange risk against the euro is hedged. The manager must take measures to systematically hedge the exchange risk in relation to the sub-fund's reference currency within a tolerance threshold defined in the information on the sub-fund.

*Investors are advised that implementing an exchange risk hedging policy may result in additional costs as mentioned in the information on the sub-fund.*

**Class F:** capitalisation shares which differ from class B shares due to the fact that (i) they are reserved for eligible investors<sup>1</sup> dealing on behalf of their own name, (ii) they have a minimum initial subscription amount, (iii) a different management fee and (iv) a different annual tax.

**Class F LC:** capitalisation shares which differ from class F shares due to the fact that (i) they are reserved for investors affected, directly or indirectly, by one or more current “Services Agreement Life Cycle” contracts with Degroof Petercam Asset Management, (ii) they have no minimum initial subscription amount and (iii) that they have a different management fee.

**Class F USD:** capitalisation shares which differ from shares of class F due to the fact they are denominated in United States dollars.

**Class F EUR HEDGED:** capitalisation shares which differ from class F shares due to the fact that the exchange risk against the euro is hedged. The manager must take measures to systematically hedge the exchange risk in relation to the sub-fund's reference currency within a tolerance threshold defined in the information on the sub-fund.

*Investors are advised that implementing an exchange risk hedging policy may result in additional costs as mentioned in the information on the sub-fund.*

**Class F USD HEDGED:** capitalisation shares which differ from class F USD shares due to the fact that the exchange risk against the US dollar is hedged. The manager must take measures to systematically hedge the exchange risk in relation to the sub-fund's reference currency within a tolerance threshold defined in the information on the sub-fund.

*Investors are advised that implementing an exchange risk hedging policy may result in additional costs as mentioned in the information on the sub-fund.*

**Class F CHF HEDGED:** capitalisation shares which differ from class F CHF shares due to the fact that the exchange risk against the Swiss franc is hedged. The manager must take measures to systematically hedge the exchange risk in relation to the sub-fund's reference currency within a tolerance threshold defined in the information on the sub-fund.

*Investors are advised that implementing an exchange risk hedging policy may result in additional costs as mentioned in the information on the sub-fund.*

**Class J:** capitalisation shares which differ from shares of class F due to the fact that they are reserved for (i) investors for which there are currently one or more discretionary management mandates with one or several companies of the Degroof Petercam group, and (ii) accounts to which these discretionary management mandates apply, due to the fact that (iii) they have no minimum initial subscription amount and (iv) they have a different management fee.

**Class J EUR HEDGED:** capitalisation shares which differ from class J shares due to the fact that the exchange risk against the euro is hedged. The manager must take measures to systematically hedge the exchange risk in relation to the sub-fund's reference currency within a tolerance threshold defined in the information on the sub-fund.

*Investors are advised that implementing an exchange risk hedging policy may result in additional costs as mentioned in the information on the sub-fund.*

**Class N:** capitalisation shares which differ from shares of class B due to the fact that they are reserved for (i) investors for which there are currently one or more discretionary management mandates with one or several companies of the Degroof Petercam group, and (ii) accounts to which these discretionary management mandates apply, (iii) in that they are reserved for all-in mandates and due to the fact that (iv) they have a different management fee.

In this context, "all in" includes at least the management fees and custody fees charged on the account (s) to which these "all in" discretionary management mandates apply.

**Class N USD:** capitalisation shares which differ from shares of class N due to the fact they are denominated in United States dollars.

**Class N EUR HEDGED:** capitalisation shares which differ from class N shares due to the fact that the exchange risk against the euro is hedged. The manager must take measures to systematically hedge the exchange risk in relation to the sub-fund's reference currency within a tolerance threshold defined in the information on the sub-fund.

*Investors are advised that implementing an exchange risk hedging policy may result in additional costs as mentioned in the information on the sub-fund.*

**Class P:** capitalisation shares which differ from class F shares by the absence of (i) a management fee and (ii) capitalisation shares which differ from class F shares by the fact that (i) they have no management fee (ii) no minimum initial subscription amount and (iii) due to the fact that they are reserved for investors that have one of more discretionary mandates with Degroof Petercam Asset Management and (iv) they are reserved for the accounts where this discretionary mandates are applicable.

**Class P EUR HEDGED:** capitalisation shares which differ from class P shares due to the fact that the exchange risk against the euro is hedged. The manager must take measures to systematically hedge the exchange risk in relation to the sub-fund's reference currency within a tolerance threshold defined in the information on the sub-fund.

*Investors are advised that implementing an exchange risk hedging policy may result in additional costs as mentioned in the information on the sub-fund.*

**Class Z:** capitalisation shares which differ from class F shares due to the fact that (i) they are reserved for investors where the minimum initial subscription amount is EUR 25,000,000 and (ii) they are subject to a different management fee and (iii) a different annual tax, it being understood that shareholders investing in this class may not request the partial redemption of their shares so as to reduce their level of investment to below the minimum initial subscription amount.

\* "eligible investors" are investors, within the meaning of Article 5 of the Law of 3 August 2012, namely the corporate customers referred to in Appendix A of the Royal Decree of 3 June 2007 on the rules transposing the Directive on markets in financial instruments (MiFID), as well as eligible counterparties within the meaning of Article 3, §1 of the above-mentioned Royal Decree of 3 June 2007 and legal entities which are not considered corporate investors and which have asked to be entered in the FSMA register of eligible investors. Natural persons, as well as legal entities that are not part of the eligible investors defined above, do not have access to these share classes, even if subscriptions are made within the framework of a discretionary management mandate concluded with an eligible investor.

* Institutional only															

The consolidated balance sheet covers all the existing sub-funds, regardless of whether they are distributed in the following countries:

- Germany
- Austria
- Chili
- Spain
- France
- Italy
- Luxembourg
- The Netherlands
- United Kingdom
- Switzerland
- Finland
- Sweden
- Portugal
- Singapore (only for institutional investors)

## 1.2.MANAGEMENT REPORT

---

### 1.2.1. Information for shareholders

#### Generalities

##### Information to shareholders

DPAM B is an undertaking for collective investment, hereinafter the SICAV.

Since 1st January 2023 :

- the "Key Investor Information Documents" (KIID) have been replaced by "Key Information Documents" (KID) for all share classes of the sub-funds in the SICAV;
- the methodology for calculating the risk level of a sub-fund has been modified. The synthetic risk indicator (SRI) calculated in accordance with the provisions of the Delegated Regulation (EU) 2017/653 and available, in its most recent version, in the KIDs, has replaced the synthetic risk and rendering indicator (SRRI);
- the methodology for the calculation of fees (formerly ongoing charges) has been modified. The latest version is available in the PRIIPs KID.

The ordinary general meeting of shareholders of 15 March 2023 approved, among other things, the annual accounts closed on 31 December 2022 and the distribution of a dividend to the holders of distribution shares of certain sub-funds of the SICAV as mentioned in the notice published on March 17 March 2023.

De Board of Directors of 28 February 2023 decided to modify the investment policy of the DPAM B Equities DRAGONS Sustainable sub-fund.

In the below mentioned sub-funds which promote environmental and social characteristics within the meaning of article 8 of SFDR 2019/2088 and invest (partially) in sustainable investments, some of the sustainability indicators have been reformulated in the prospectus in the "Investment strategy" sub-section of the "Environmental, social and governance (ESG) considerations - Sustainability transparency" section and in the appendices on pre-contractual disclosure (the SFDR appendix), in the section entitled "What Sustainability Indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?":

DPAM B Equities Europe Small Caps Sustainable, DPAM B Equities Newgems Sustainable, DPAM B Equities DRAGONS Sustainable, DPAM B Equities Euroland Sustainable, DPAM B Bonds EUR Corporate Sustainable, DPAM B Equities US Dividend Sustainable, DPAM B Equities Europe Sustainable, DPAM B Equities Sustainable Food Trends, DPAM B Equities World Sustainable, DPAM B Real Estate Europe Dividend Sustainable, DPAM B Real Estate Europe Sustainable, DPAM B Real Estate Emu Dividend Sustainable and DPAM B Real Estate Emu Sustainable.

These changes came into effect on 15 May 2023.

The extraordinary meeting of 20 June 2023 decided the closing of the liquidation of the DPAM B Global Diversified World sub-fund.

The Board of Directors of 21 June 2023 decided to reverse split the SICAV's Class "P" shares in some SICAV's sub-funds.

The DPAM B Corporate Bonds EUR 2023 sub-fund has been dissolved automatically upon expiry of its term on 30 June 2023.

The DPAM B Equities Japan ESG Leaders Index sub-fund was launched on 21 August 2023.

The Board of Directors decided on 15 November 2023 :

1/ to update, with effect from 1 January 2024, the prospectus and pre-contractual disclosures SFDR (PCD) of the SICAV's art. 8+ SFDR sub-funds to take account of the addition of the next 4 environmental objectives, i.e. :

- sustainable use and protection of water and marine resources,
- the transition to a circular economy,
- pollution prevention and control, and
- protection and restoration of biodiversity and ecosystems;

2/ to amend the " Environmental, social and governance (ESG) aspects - sustainability transparency" section of the prospectus and SFDR pre-contractual disclosures (PCD) of the DPAM B Equities Sustainable Food Trends sub-fund in order to provide clarifications.

Some sub-funds promoting environmental and/or social (E/S) characteristics and partly presenting sustainable investments (although not having sustainable investment as their objective) mention in the pre-contractual information for financial products referred to in Article 8 of Regulation (EU) 2019/2088 annexed to the prospectus, a minimum proportion of sustainable investments with a social objective.

Following the clarifications provided by the ESAs on 17 November 2022 on the application of Regulation (EU) 2019/2088 that double counting should be avoided when an activity can contribute to more than one environmental and social objective, the methodology for calculating the minimum commitment for the social sustainable investment objective has been reviewed and the minimum commitment for this objective has been revised downwards in the prospectus dated 15 May 2023. The methodology for calculating the minimum commitment for this objective excludes, for the entire Reference Period, double accounting. As a result of the review of the calculation methodology, the minimum commitment to the social sustainable investment objective mentioned in the prospectus in force from 1er January to 14 May 2023 may not have been met. This overachievement will be mentioned in the specific section dedicated to the sub-fund in the annual report under " Notes to the Financial statements and other informations/Investment restrictions and overruns".

### **Fee sharing agreements**

Management fee retrocession agreements may exist, on the one hand, between the SICAV (or, where applicable, the distributor) and the investment portfolio manager, and, on the other hand, between the SICAV and other distributors (indicated, where applicable, in the prospectus) and third parties, such as shareholders of the SICAV. These agreements are in no way exclusive. They do not affect the manager's ability to carry out his duties freely in the interests of the Fund's shareholders. The management fee is allocated according to market conditions.

The information concerning the remuneration retroceded by the manager is taken up at the level of each sub-fund concerned under point "Charges".

### **Aberdeen and Fokus Bank**

As the result of the Aberdeen and Fokus Bank rulings by the European Union Court of Justice concerning discrimination in the tax laws of certain EU Member States towards foreign UCIs, DPAM B has taken steps, with the help of the management company and external consultants, to reclaim the supplementary withholding tax paid and not recovered in some countries members of the EU. The costs will be charged immediately to the current financial year.

The SICAV did not make any redemptions during 2023.

### **Class action**

During 2023, the SICAV made redemptions in respect of a « Class Action » for 11,567.9 USD.

**Information required under Article 3:6 §1 of the Company and Association Code****Risk factors**

In view of the status of DPAM B as a société d'investissement au capital variable (SICAV, or open-ended investment company), its development and results are influenced by various risk factors, including two over which the Board of Directors has little or no control:

- subscription and redemption applications,
- direct and indirect risks inherent in financial markets.

The risk factors, which are also described in the prospectus, can be broken down as follows:

Type of risk	DPAM B Bonds EUR Short Term 1 Y	DPAM B Bonds EUR	DPAM B Equities Europe Small Caps Sustainable	DPAM B Equities Euroland	DPAM B Real Estate Europe Sustainable
<b>Capital risk:</b> Risk to capital, including the risks of erosion following redemptions of units and distributions in excess of returns	High	High	High	High	High
<b>Inflation risk:</b> Risk to which the value of the assets of the portfolio is exposed due to inflation	High	High	/	/	/
<b>Market risk:</b> Risk of a decline in the market for a given asset class that may affect the price and value of the assets in the portfolio	Low	Low	High	High	High
<b>Credit risk:</b> Risk of default of an issuer or counterparty	Low	Medium	/	/	/
<b>Settlement risk:</b> Risk that the settlement of a transaction does not take place as expected in a given transfer system, due to a payment/delivery default by a counterparty, or a payment/delivery not conforming to the original conditions	/	/	/	/	/
<b>Liquidity risk:</b> Risk that a position cannot be closed at an appropriate time at a reasonable price	Medium	Low	High	Low	High
<b>Exchange risk:</b> Risk of the value of the investment being affected by changes in exchange rates	/	/	Medium	/	Medium
<b>Concentration risk:</b> Risk linked to a high concentration of investments in a given class of assets or on a given market	Medium	Medium	Medium	High	High
<b>Performance risk:</b> Risk to performance, including variability of the levels of risk depending on the stock-picking strategy of each sub-fund and/or UCI, and the existence or absence of third-party guarantees or restrictions on these guarantees	/	/	/	/	/
<b>Risks relating to derivative products</b>	Low	Medium	Low	Low	Low
<b>Sustainability risk:</b> Risk of the probability of occurrence of an environmental, social or governance event that could lead to an actual or potential material loss in the value of the sub-fund as a result of that event	Medium	Medium	Low	Medium	Low
<b>Hedging risk :</b> (only applicable for hedged share classes)	/	/	/	Low	/

#### Other information

No significant event has occurred since the closing date of the financial year and no circumstance is likely to have a significant influence on the development of the SICAV with the exception of those mentioned under the heading «Events after the reporting period».

All circumstances likely to have a significant influence on the SICAV are set out in this annual report.

The SICAV has not carried out any research and development activities.

The SICAV employs no staff and has no branches.

This report includes all the information that must be included in accordance with the Companies and Associations Code.

### Remuneration and mission of the auditor

The auditor's fees in respect of its auditor mandate amount 3,990.00 EUR (excl. VAT) per year and per sub fund.

In addition to its role as statutory auditor, PwC Société de Réviseurs agréés carried out a special assignment for DPAM B for an amount of EUR 5,730.00 for the dissolution of the DPAM B Corporate Bonds EUR 2023 sub-fund.

### Comments on the balance sheet

The balance sheet total, which is identical to equity, amounted to 14,445,439,500.39 EUR, of which 14,205,107,900.02 EUR in transferable securities, money market instruments, UCIs and financial derivative instruments.

For the year 2023, the result amounted to 2,019,699,960.17 EUR, the retaining earnings amounted to 1,493,274,110.77 EUR and the income equalisation amounted to -86,979,706.95 EUR.

### Appropriation of profits

The profit for the year to be appropriated amounted to 3,552,381,210.41 EUR.

The Board of Directors will propose to the general meeting of shareholders that this profit be appropriated as follows:

- ◆ a distribution of 31,899,695.55 EUR to the following distribution shares:

#### Remuneration policy of DPAM

##### - Total amount of remuneration for the financial year:

	Total paid by the Management Company and the Fund to its staff	Number of beneficiaries	Other amount paid directly by the UCI	Performance commissions
--	--	-------------------------	---------------------------------------	-------------------------

Fixed remuneration	18,767,958 €	202	/	/
Variable remuneration	5,195,373 €	170	/	/

- **Aggregate amount of remuneration**

Identified staff	12,092,012.77 €
Portfolio Managers	4,542,917.97 €

- **Description of how compensation and benefits were calculated**

This information is available in the Compensation Policy prepared by Degroof Petercam Asset Management. The Remuneration Policy is available at <https://dpaminvestments.com/documents/remuneration-policy-enBE>.

- **Results of assessments in the annual review by the management company of the general principles of the remuneration policy and their implementation**

The annual review of the compensation policy has led to the adoption of a new Remuneration Policy.

- **Significant change to the remuneration policy adopted**

The remuneration policy approved by the Board of Directors of the Management Company on February 14, 2017 has been modified in 2023. Details of the Remuneration Policy and the composition of the Remuneration Committee, are available at <https://www.dpaminvestments.com/documents/remuneration-policy-enBE>.

**Regulation EU 2015/2365 of the European Parliament and the Council of 25 November 2015: transparency of securities financing transactions and of reuse (hereinafter the Regulation)**

In accordance with Article 13 and Section A of the Annex to the Regulation, the SICAV must inform investors of the use it makes of securities financing transactions and total return swaps in its annual and half-yearly reports.

This information is included in each sub-fund concerned by the requirements of the Regulation under the heading "Notes to the financial statements and other information".

**Use of liquidity management tools**

The Directors decided, pursuant to the Royal Decree of 15 October 2018 regarding the liquidity tools, to introduce the possibility of using the following liquidity tools:

**I. SWING PRICING**

1. List of sub-funds that may use swing pricing:

All of the SICAV's sub-funds may use swing pricing.

2. Description of the objective, operation and methodology of swing pricing:

Objective:

The objective is to reduce performance dilution due to net inputs or outputs. The performance of the SICAV may be eroded by frequent transactions due to large inflows or outflows and the SICAV may suffer from (in)direct trading costs involved in capital movements. Swing pricing offers investors already invested in the SICAV the possibility of not having to bear the transaction costs or the cost of illiquidity in the underlying financial markets generated by the entry or exit of investors.

With swing pricing, existing investors should, in principle, no longer indirectly incur the transaction fees, which will now be directly integrated into the calculation of the net asset value (NAV) and borne by the entering and exiting investors.

Swing pricing protects long-term investors, as an investor can only be affected by swing pricing on the day of subscription/redemption.

Methodology and operation:

The swing pricing method adopted is based on the following principles:

- It is a partial swing, which implies that a certain threshold must be crossed before the NAV is adjusted;
- It is a symmetrical swing, which is activated for both subscriptions and redemptions;
- The use of swing pricing is systematic, without favoring one or more categories of investors.

The swing threshold is the value determined as a trigger event for net subscriptions and redemptions. This threshold value is expressed as a percentage of the total net assets of the sub-fund in question.

The swing threshold is always applied.

Swing factor: the direction of the swing depends on the net flow of capital applicable to a NAV.

In the case of a net inflow of capital, the swing factor linked to subscriptions of shares in the sub-fund will be added to the NAV. For net redemptions, the swing factor linked to redemptions of shares in the sub-fund in question will be deducted from the NAV. In both cases, all entering/exiting investors on a given date will have the same NAV applied.

3. Maximum swing factor:

The maximum swing factor set to a maximum of 5% of the unadjusted NAV.

The threshold and swing factor will be published on the website [www.funds.dpaminvestments.com/funds.html](http://www.funds.dpaminvestments.com/funds.html) in the "Fees" section.

4. Use of the swing pricing during the period:

The Board of Directors of the SICAV has decided to fix, as from the NAV dated 29 September 2023, calculated on 2 October 2023 and until further notice, the thresholds and swing factors detailed in the table below :

Sub-fund	Threshold	Swing factors	
		Net subscriptions	Net redemptions
DPAM B Bonds EUR	3%	0.0075%	0.0075%
DPAM B Bonds EUR IG	3%	0.0075%	0.0075%

The Board of Directors of the SICAV has decided to fix, as from the NAV dated 2 October 2023, calculated on 3 October 2023 and until further notice, the thresholds and swing factors detailed in the table below :

Sub-fund	Threshold	Swing factors	
		Net subscriptions	Net redemptions
	% % net assets		

DPAM B Bonds EUR	3%	0.13%	0.13%
DPAM B Bonds EUR IG	3%	0.12%	0.12%

The table below indicates, by sub-fund, the number of times and the dates when the swing pricing has been applied during the period covered by this report and the impact of this application for the purpose of calculating during the period covered by this report:

Trade date	Sub-fund	Swing threshold	Swing factor	Subscriptions/redemptions	Net amount	Impact on the performance
24/01/2023	DPAM B Bonds EUR Short Term 1 Y	3.00%	0.060%	-4.02%	-5,413,553.93	-3,248.13

## II. ANTI-DILUTION LEVY

### 1. List of sub-funds that may use the anti-dilution levy:

All of the SICAV's sub-funds may use "the anti-dilution levy".

### 2. Description of the objective, operation and methodology of the anti-dilution levy:

#### Objective:

The objective of this mechanism is to transfer the negative impact on the NAV of a sub-fund of the SICAV to the investors who generated this impact.

#### Methodology and operation:

If redemptions / subscriptions exceed a threshold, the SICAV may decide to impose an additional cost on incoming or outgoing investors, which will benefit the SICAV. Higher exit fees may be charged for large net outflows, and higher entry fees may be charged for large net inflows.

The anti-dilution levy will only be applied after an explicit decision of the Board of Directors of the SICAV. There is no automatic application of this mechanism. The Board of Director's decision relates both to the level of the threshold and the additional costs and whether or not to apply the mechanism if the threshold is exceeded.

It should be noted that these two mechanisms, swing pricing and the anti-dilution levy, cannot be applied to the same NAV.

### 3. Use of the anti-dilution levy during the period:

During the period covered by this report, no sub-fund of the SICAV used anti-dilution levy.

## III. REDEMPTION GATES

### 1. Description of the objective, operation and methodology

This mechanism allows the SICAV to partially suspend the execution of requests for the redemption and/or repayment of units ("redemption gates") when the negative change in the balance of the liabilities of the company or sub-fund for a given day exceeds, for the day in question, a percentage (or threshold) determined by the Board of Directors.

The threshold above which this mechanism may be applied is set at 5% for all sub-funds.

The NAV calculation itself is not suspended as orders are partially executed.

Only the part of the requests for redemptions which exceeds the threshold is affected by this partial suspension. It must be applied proportionally to all requests for individual redemptions submitted by the closing date concerned.

The portion of the redemption requests not executed following this partial suspension will be postponed automatically to the next closing date, except in the event of revocation by the shareholder or if this mechanism is reapplied.

The partial suspension is always provisional.

This suspension will be carried out in accordance with the provisions of Article 198/1 of the Royal Decree of 2012.

In the event of a partial suspension of the execution of redemption and/or repayment requests, a notice to shareholders will be published on the website [www.funds.dpaminvestments.com/funds.html](http://www.funds.dpaminvestments.com/funds.html) in the “News” section

## 2. Use of the redemption gates during the period

During the period covered by this report, no sub-fund of the SICAV used the redemption gates.

### 1.2.2. Overview of the markets

In 2023, global equities posted a positive performance of 16.2% in euro terms (excluding dividends). By region and in terms of the common currency (euro), US equities outperformed other regions, ending the year up 21%. Emerging equities ended the year at the back of the pack, posting a return of just 3.6% due to the negative performance of Chinese equities. European equities were up 12.7%, in line with Japanese equities (+13.3%). After a difficult year for tech stocks in 2022, the Nasdaq composite came out a winner in 2023 (+43% in dollars). The Dow Jones hit a new all-time high, while the S&P 500 ended the year 56 basis points off its record close in January 2022. The trend for the S&P 500 was generally bullish, although shares retreated in the third quarter (and bottomed out at the end of October) before recovering at the end of the year. The significant gains made by a number of technology mega-caps (referred to as the “Magnificent Seven”) played a major part in the overall performance of the index, and market tightness remained a persistent concern for much of the year. A major theme among technology stocks was optimism regarding artificial intelligence. Yields on 10-year US Treasury bonds ended the year below 4%, broadly unchanged from the end of 2022. The banking crisis pushed yields down in March, then they rose until October in line with the Fed’s mantra of “higher for longer” before finally falling sharply at the end of the year. All eurozone bond segments were in the black after a negative 2022. The dollar posted a year-on-year decline for the first time since 2020.

#### ***United States of America***

Over the past year, investors have been counting on the Fed to reverse its monetary policy stance in response to better inflation figures, while US consumer spending and corporate profits have remained resilient. In a nutshell, fears of a hard landing have given way to a broader economic consensus of a soft landing or no landing at all. US monetary policy was at the heart of the 2023 story. Throughout the summer of 2023, the Fed continued to sound its “higher for longer” mantra and the market debated where the ceiling might be. The Fed’s December 2023 meeting (including its median projection of a 75 basis point rate cut in 2024) marked the inflection point in US monetary policy and triggered a rise in equities and a fall in Treasury yields that continued through to the end of the year. A key element in the Fed’s decision was the ongoing progress in pushing inflation down towards the 2% target. While inflation peaked at 8.9% year-on-year in June 2022, this figure fell to 6.4% in December 2022 and 3.1% in November 2023. Core inflation eased to 4.0% year-on-year in the November report.

#### ***Eurozone***

The eurozone economy was broadly flat over the year. The German economy was disappointing compared with the rest of the eurozone. Manufacturing confidence indicators remained below the 50 mark (which separates expansion from contraction) throughout the year. Activity in the services sector, resilient until the summer, began to lose momentum towards the end of the year. The labour market has proved resilient despite the absence of economic growth. The unemployment rate remained at a historically low level. Inflation continued to trend downwards throughout the year. Core inflation finally reached an inflection point in April and then settled at 3.6% in November, while headline inflation fell to just 2.4% at the end of the year. The European Central Bank continued to raise its key rates during the year, although at a slower pace than in the second half of 2022. The deposit rate stood at 4% in September. The ECB subsequently left this rate unchanged for the rest of the year.

### ***Japan***

Economic growth in Japan was relatively robust in the first part of the year, then turned negative in the third quarter (quarter-on-quarter change). Economic growth nevertheless stood at 1.6% year-on-year in the third quarter of 2023. The yen depreciated sharply against the euro and the dollar in 2023. The yield on 10-year government bonds rose from 0.41% to 0.59% over the period as a result of the Bank of Japan's greater flexibility in setting the 10-year rate, which reached 0.95% at the beginning of November. The yen depreciated sharply over the period.

### ***Emerging markets***

The Chinese government moved to lift Covid restrictions in December, prompting a rebound in economic activity in the first quarter of 2023. Economic growth was already slowing in the second quarter of 2023, and then business confidence indicators showed that activity rebounded slightly at the end of the third quarter thanks to the various support measures taken by the Chinese government. The Chinese property sector struggled during the year on the back of a decline in new construction and the debt problem faced by actors in the sector. In other emerging countries, at the end of the period, the downturn in manufacturing continued in emerging Europe, while the sector returned to growth in Latin America. Some central banks began a cycle of rate cuts in response to the slowdown in inflation. This was the case for Brazil, Poland and the Czech Republic.

## **1.3.AUDITOR'S REPORT**

---

## 1.4. IVOX GLASS LEWIS' S REPORT ON THE EXERCISE OF VOTING RIGHTS

---

**DEGROOF PETERCAM ASSET MANAGEMENT S.A.**  
rue Guimard 18 B - 1040 - Brussels - Belgium

Limerick, 2024

### **DPAM B**

Glass Lewis Europe Limited: Vote analysis and execution report for the securities contained in the SICAV DPAM B.

The Board of Directors of the SICAV has mandated DPAM, its management company, to organize the exercise of the voting rights attached to the shares held in the SICAV's portfolio and to vote, in its own name and on its own behalf, at the general meetings of the companies in which the SICAV is a shareholder to the extent of and in accordance with DPAM's Voting Policy (<https://dpaminvestments.com/documents/dpam-voting-policy-enBE> (Voting Policy)).

To this end, under the mandate granted to Glass Lewis Europe Limited by DPAM, Glass Lewis Europe Limited has implemented a vote analysis and execution service to assist DPAM in discharging its fiduciary responsibilities towards the SICAV.

An analysis of the resolutions demonstrating non-compliance with the SICAV's Corporate Governance principles, taking into account DPAM's Voting Policy, reports anomalies and, thanks to our voting execution service, has enabled the managers of DPAM to take the measures they deemed necessary.

This analysis, which is set out in a document available on our service, is based on the recognized standards and principles of each financial center concerned and on the corporate governance structure expected of each issuer.

DPAM, as mandated by the SICAV, approved the majority of the resolutions that were proposed at the various meetings. A resolution is not voted for if it is considered to be against the long-term interests of the shareholders and therefore of the SICAV. This is the case when the Board of Directors of the issuing company tries to set up capital defense structures or when the interests of the issuing company do not seem to coincide with those of the shareholder.

Glass Lewis Europe Limited has opened a file relating to each of the General Meetings at which DPAM, as mandated by the SICAV, exercised its voting rights on behalf of the SICAV during 2023.

Please see below for statistical information on voting rights exercised in 2023:

Management Proposals – Votes versus Management

Shareholder Proposals – Votes versus Management

**N/A** - Any proposal for which no recommendation from the issuer's officers has been provided and which therefore could not be listed as FOR or AGAINST the officers.

**No action** - The term "No action" refers to any meeting that has intentionally not been voted on, whether automatically assigned this status by the system due to previous DPAM instructions (e.g. any ballot marked for share blocking), or manually assigned this status by an individual. This means that no voting instructions have been sent by the system.

**Mixed** - Refers to cases where different voting decisions have been selected for different accounts/ballots on the same agenda item in the same meeting.

**1y** - For the proposal Frequency of Advisory Vote on Executive Compensation, this item can appear on the voting card with the option to choose 1 YEAR, 2 YEARS or 3 YEARS, rather than the usual FOR, AGAINST, ABSTAIN.

**2y** - For the proposal Frequency of Advisory Vote on Executive Compensation, this item can appear on the voting card with the option to choose 1 YEAR, 2 YEARS or 3 YEARS, rather than the usual FOR, AGAINST, ABSTAIN.

**3y** - For the proposal Frequency of Advisory Vote on Executive Compensation, this item can appear on the voting card with the option to choose 1 YEAR, 2 YEARS or 3 YEARS, rather than the usual FOR, AGAINST, ABSTAIN.

## 1.7.SUMMARY OF BOOKING AND VALUATION RULES

---

### 1.7.1. Summary of rules

The valuation of the Company's assets, subdivided by sub-fund, is determined as follows:

- a. for securities admitted to official listing or traded on another organised market: at the last known stock exchange or market price, unless this price is not representative.
  - b. for securities for which the last price is not representative and for securities not admitted to an official stock exchange or another organised market, the valuation is based on the probable realisable value estimated prudently and in good faith.
  - c. for liquid assets: at their nominal value plus accrued interest.
  - d. unmatured receivables will be valued pro rata temporis on the basis of their exact amount if known or, failing this, on the basis of their estimated amount.
  - e. values expressed in a currency other than that of the sub-fund concerned will be converted into the currency of the sub-fund on the basis of the last known exchange rates.
  - f. the notional amounts of forward contracts are included in off-balance sheet items under "III. Notional amounts of forward contracts". Futures contracts are recorded in off-balance sheet items on the basis of the following calculation: number of contracts multiplied by the price on the acquisition date multiplied by the lotsize; to be converted into the sub-fund's currency on the basis of the last known exchange rates if the futures contracts are expressed in a currency other than that of the sub-fund. Futures contracts are valued each time the net asset value is calculated on the basis of the last known market price, unless this price is not representative. Differences resulting from changes in the value of forward contracts are charged to the income statement as a reduction in value or unrealised gain, under the sub-heading "ii. Forward contracts" of the relevant sub-items of "I. Impairment losses and gains - F. Derivative financial instruments", or in sub-item "I. Write-downs, losses and gains - H. Foreign exchange positions and transactions. - a. Derivative financial instruments - ii. Forward contracts" if the underlying asset is a foreign currency.
  - g. option contracts are valued at the time of each net asset value calculation on the basis of the last known market price, unless this price is not representative. Differences arising from changes in the value of contract premiums are charged to the income statement as a write-down or unrealised gain in sub-item "i. Option contracts" of the relevant sub-items of "I. Impairment losses and gains - F. Derivative financial instruments" or in sub-item "I. Write-downs, losses and gains - H. Foreign exchange positions and transactions - a. Derivative financial instruments - i. Option contracts" if the underlying asset is a foreign currency. When option contracts are exercised, the premiums are added to or deducted from the purchase or sale price of the underlying assets. Option contracts are recorded in off-balance sheet items under "II. Underlying values of option contracts and warrants" on the basis of the following calculation: number of contracts multiplied by the strike price multiplied by the quantity of underlying;
  - h. notional amounts of swap contracts are included in off-balance sheet items under "IV. Notional amounts of swap contracts". Swap contracts are valued at the time of each net asset value calculation on the basis of the last known market price, unless this price is not representative. Differences resulting from changes in the value of swap contracts are charged to the income statement as a reduction in value or unrealised gain, under sub-item "iii. Swap contracts" of the relevant sub-items of "I. Impairment losses and gains - F. Derivative financial instruments" or in sub-item "I. Write-downs, losses and gains - H. Foreign exchange positions and transactions - a. Derivative financial instruments - iii. Swap contracts" if the underlying security relates to currencies.
  - i. the underlying UCIs are valued at the time of each net asset value calculation on the basis of the last known prices, unless these prices are not representative.
- To obtain the net assets, the valuation thus obtained is reduced by the Company's commitments.

## 2. INFORMATION ABOUT THE SUBFUND DPAM B BONDS EUR SHORT TERM 1 Y

### **2.1. MANAGEMENT REPORT**

---

#### **2.1.1. Launch date of the sub-fund and subscription price of the shares**

Date of initial subscription: 6 August 1992.

Initial subscription price: EUR 123.98.

#### **2.1.2. Stock exchange listing**

The sub-fund's shares are not listed on the stock market.

#### **2.1.3. Aim and main outlines of the investment policy**

##### **Objective**

The objective of this sub-fund is to offer shareholders exposure to the bond market.

The portfolio of the sub-fund consists essentially of instruments issued by Investment grade\* or Prime\* issuers, as rated by a ratings agency such as Standard & Poor's, Moody's or Fitch. These issuers may be public authorities, companies or private issuers.

The portfolio is invested principally in bonds, treasury certificates and other debt securities or equivalent securities denominated in EUR.

The initial or residual maturity of the instruments making up the portfolio will not exceed twelve months.

This is an actively managed sub-fund.

No benchmarks are used in the management of the sub-fund. Quantitative information from a broader market may be used for risk management and evaluation by the manager.

The sub-fund's shareholders do not benefit from any capital protection or guarantee.

\* Investment Grade: is an interpretation in terms of financial risk of the quality of the bond's issuer. The rating agencies each use their own scale to assess the notion of risk. Investment grade ratings are between AAA and BBB- on the Standard & Poor's and Fitch scale and between Aaa and Baa3 on the Moody's scale.

\*Prime: is a short-term rating that assesses the issuer's ability to meet its obligations within one year. Prime ratings are between A-1+ and A-3 on the Standard & Poor's scale, between F1+ and F3 on the Fitch scale and between P-1 and P-3 on the Moody's scale.

##### **Investment policy**

The sub-fund invests a maximum of 10% of its assets in undertakings for collective investment.

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts, deposits or securities and in the form of undertakings for collective investment.

As a result of an exemption granted by the Autorité des Services et Marchés Financiers, the sub-fund may invest up to 100% of its assets in the various issues of transferable securities and money market instruments issued or guaranteed by a Member State of the European Economic Area which has adopted the euro as its currency (listed

below), and by its regional public bodies. These undertakings for collective investment must hold transferable securities and money market instruments belonging to at least six different issues, and transferable securities and money market instruments belonging to a single issue must not exceed 30% of the total value of their assets.

(\*) Belgium, Germany, Finland, France, Greece, Luxembourg, Ireland, Italy, Netherlands, Austria, Portugal, Spain, Slovenia, Cyprus, Malta, Slovakia, Estonia.

The sub-fund may invest in units of another UCITS or another fund managed directly or indirectly by DPAM or by a company with which DPAM is linked by common management or control or by a direct or indirect holding of more than 10% of the capital or votes. No issue or redemption fees for target funds or management fees may be charged to the assets of the SICAV to the extent of such investments.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

#### **2.1.4. Index and benchmark**

No benchmark is used in the management of the sub-fund.

#### **2.1.5. Policy followed during the year**

The Euribor rose rapidly during the the year, from 2.17 to 3.90.

These higher interest rates and the uncertainties on the financial markets make short-term bonds attractive.

As a result, short-term bonds have again a very attractive yield. In view of persistent volatility, investors bought more short-term bonds.

For our portfolio we often went in search of a good mix of sectors. The majority of positions are financials, particularly bank bonds. These are predominantly high rated (A-). In the remaining sectors we constantly opted for good diversification, a good mix of ratings and geographical spread.

#### **2.1.6. Future policy**

- Search for bonds with a final maturity date of between 5 and 12 months.
- Corporate bonds, financials and government bonds within investment grade bonds in euros.
- Good diversification to be maintained in terms of countries, sectors and ratings.

#### **2.1.7. Synthetic risk indicator**

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 2.

## 2.5.GEOGRAPHIC ALLOCATION OF INVESTMENTS

By country	% Portfolio
FRANCE	25.11%
UNITED STATES OF AMERICA	20.27%
NETHERLANDS	14.22%
SPAIN	10.44%
UNITED KINGDOM	7.26%
JAPAN	6.22%
ITALY	4.93%
MEXICO	4.55%
LUXEMBOURG (GRAND DUCHY)	3.50%
DENMARK	2.10%
GERMANY (FEDERAL REPUBLIC)	1.40%
<b>Total</b>	<b>100.00%</b>

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

## 2.6.ECONOMIC ALLOCATION OF INVESTMENTS

---

By sector	% Portfolio
BANKS	31.31%
FINANCIAL SERVICES - HOLDINGS	26.89%
TELECOMMUNICATIONS	11.81%
PHARMACOLOGY & PERSONAL CARE	8.72%
TOBACCO & SPIRITS	8.40%
ENERGY SOURCES	6.01%
ROAD VEHICLES	4.13%
CHEMICAL PRODUCTS	1.05%
REAL ESTATE	0.98%
AIRLIFT	0.70%
<b>TOTAL</b>	<b>100.00%</b>

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

## 2.7.CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	134,466,285.60	97,949,414.50	232,415,700.10
Sales	56,891,677.00	60,239,341.00	117,131,018.00
<b>Total 1</b>	<b>191,357,962.60</b>	<b>158,188,755.50</b>	<b>349,546,718.10</b>
Subscriptions	81,865,989.27	86,042,816.96	167,908,806.23
Redemptions	89,735,208.13	82,528,944.31	172,264,152.44
<b>Total 2</b>	<b>171,601,197.40</b>	<b>168,571,761.27</b>	<b>340,172,958.67</b>
Reference average of the total net asset	135,260,947.93	152,154,466.51	143,777,132.64
<b>Rotation Percentage</b>	<b>14.61%</b>	<b>-6.82%</b>	<b>6.52%</b>

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

On the date of publication of this report, the net asset value per share is published on the following websites: <https://www.funds.dpaminvestments.com/funds.html> and [www.beama.be](http://www.beama.be). This information is also available at the counters of the financial services department.

## 2.9.PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.21%

**Fee sharing**

As at 31 December 2023, 33.81% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

## **2.11. NOTES TO THE FINANCIAL STATEMENTS AND OTHER INFORMATION**

---

### **2.11.1. Valuation of financial instruments**

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

### **2.11.2. Transparency in sustainability**

#### **Environmental or social characteristics**

In accordance with Article 50 of Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022, as amended, information related to environmental or social characteristics promoted by this sub-fund is reflected in the periodic disclosures as defined in Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) and attached to this report. This periodic information has not been audited by the auditor.

#### **Statement on the Taxonomy Regulation**

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on establishing a framework for the promotion of sustainable investments and amending Regulation (EU) 2019/2088 (the "Taxonomy Regulation") introduced the concept of "no serious impairment" under which investments in accordance with the Taxonomy Regulation must not seriously impair the objectives of the Taxonomy Regulation and must comply with specific European Union criteria. The "no serious impairment" principle applies only to the underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remainder of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

### **2.11.3. Transparency of the securities financing transactions and of reuse**

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

## Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:**  
DPAM B BONDS EUR SHORT TERM 1 Y

**Legal entity identifier:**  
5493002N4BG7R3QYH249

### Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

#### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b>	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: ____%</b> <div style="margin-left: 40px;"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy </div> <div style="margin-left: 40px;"> <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy </div> <input type="checkbox"/> It made <b>sustainable investments with a social objective: ____%</b>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments <div style="margin-left: 40px;"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy </div> <div style="margin-left: 40px;"> <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy </div> <div style="margin-left: 40px;"> <input type="checkbox"/> with a social objective </div> <input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make sustainable investments</b>

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices.
- excluding countries that do not respect a minimum of democratic requirements.

Derivative products, if any, used for the purpose of achieving the investment objectives of the Sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

#### ● How did the sustainability indicators perform?

Over the Reference Period, the sub-fund achieved the following sustainability indicators:

- 1) For direct investments (in corporate bonds):
  - a) The sub-fund has not been exposed to companies considered to be below Global Standards;

b) The Sub-fund has not been exposed to companies involved in excluded controversial activities according to the definitions and thresholds stipulated by DPAM's Controversial Activities Policy (accessible via the link

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>);

c) The sub-fund has not been exposed to companies facing extremely serious ESG controversies around environmental or social issues;

2) For direct investments (in sovereign bonds):

The Sub-fund has not been exposed to issuers that do not meet minimum democratic requirements.

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
E/S characteristics	97.7%	98.59%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Not applicable

*The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

*The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors

For direct investments (in corporate bonds):

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated throughout the research and investment process from its inception.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

- 1) Firstly, with regard to environmental PAI:
  - a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD) Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.
  - b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with the Global Standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.
  - c) The exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>) has excluded companies involved in thermal coal production for example, and thus has allowed for a better coverage of indicators such as biodiversity and greenhouse gas emissions.
  - d) In addition, the filtering and analysis on the basis of the main ESG controversies in which companies may be involved also included controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity and water consumption), the environmental impact on the supply chain and the impact of products and services (carbon and environmental impact).
- 2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:
  - a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.
  - b) the exclusion filter for companies involved in controversial activities in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>) has been applied. In this way, companies involved in controversial armaments were directly excluded from the investment universe.
  - c) in addition, the filtering and analysis on the basis of the main ESG controversies in which companies may be involved also included controversies related to social issues, namely society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.
  - d) The issue of board gender diversity has been addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

For direct investments (in sovereign bonds):

Yes, the sub-fund has taken into consideration, over the Reference Period, the environmental and social PAI listed in table 1 of appendix I of the Delegated Regulation (EU) 2022/1288.

The first PAI relates to environmental issues and focuses on the greenhouse gas emission intensity of the investee countries. The indicator is an integral component of the country sustainability model that DPAM developed for its sovereign bond strategies. It is therefore included in the country's sustainability score and may influence it positively or negatively depending on its level and evolution in relation to other issuing countries. The results of the country sustainability scores are optionally discussed with the countries concerned according to DPAM's engagement policy, which is available at <https://www.dpaminvestments.com/documents/engagement-policy-enBE>.

The second PAI relates to social issues and focuses on issues of social breaches. The country's sustainability model observes several indicators on this issue, such as respect for civil liberties and political rights, respect for human rights and the level of violence within the country, commitment to major labour conventions, the issue of equal opportunity and distribution of wealth, etc. These different indicators are included in the country's sustainability score and can influence it positively or negatively depending on its level and evolution compared to other issuing countries.

During the Reference Period, a dialogue was initiated on the results of the sustainability scores with some countries according to DPAM's engagement policy via the link

<https://www.dpaminvestments.com/documents/engagement-policy-enBE>.

Over the Reference Period, the management teams conducted a certain number of dialogues with the various participants in sovereign debt issues. These dialogues allowed us to verify with the stakeholders the points of attention of the governmental policies, notably in environmental and/or social matters.

Details of the dialogues with countries and companies will be published in an annual report in the first quarter of 2024 on the DPAM website (<https://www.funds.dpaminvestments.com/funds.html>).

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the Reference Period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
1 3/4 INTL FLAVORS MAR24 14.03.2024	Manufacturing	4.51	United States of America
1 1/2 AMERICA MOV MAR24 10.03.2024	Information and communication	4.50	Mexico
3/4 BMW APR24 REGS 15.04.2024	Financial and insurance activities	4.45	Germany
4 5/8 EDF SEP24 11.09.2024	Electricity, gas, steam and air conditioning supply	4.20	France
1 3/4 MORGAN STAN MAR24 11.03.2024	Financial and insurance activities	4.17	United States of America
1% IBERDROLA MAR24 07.03.2024	Financial and insurance activities	4.14	Spain
1 3/8 GOLDMAN SACHS MAY24 15.05.2024	Financial and insurance activities	4.12	United States of America
0.4% BAXTER INTL MAY24 15.05.2024	Manufacturing	4.08	United States of America
1% BRITISH TELE JUN24 23.06.2024	Financial and insurance activities	3.68	United Kingdom

1 1/8 EDP FIN FEB24 12.02.2024	Financial and insurance activities	3.46	Portugal
1 3/8 JOHN DEERE APR24 02.04.2024	Financial and insurance activities	3.45	United States of America
VODAFONE GROUP PLC 0.5% 30/01/2024	Information and communication	3.45	United Kingdom
ALD SA 0.00 21-230224	Administrative and support service activities	3.42	France
MIZUHO FINANCIAL GROUP INC 0.956% 16-OCT-2024	Financial and insurance activities	3.37	Japan

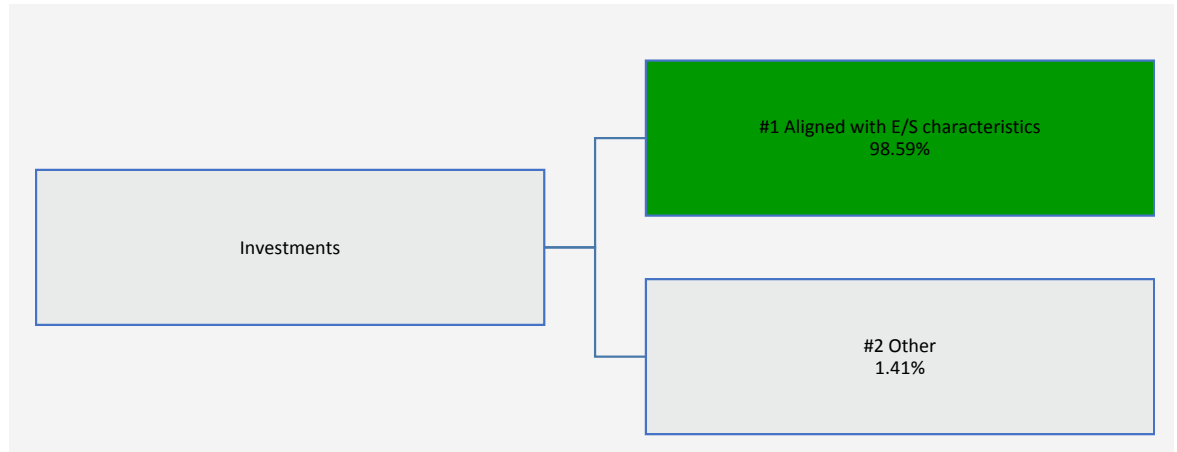

## What was the proportion of sustainability-related investments?

### ● What was the asset allocation?

Through the application of the investment strategy described above, the Sub-fund has invested 98.59% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S Characteristics").

Any failure to comply with the asset allocation stipulated in the prospectus at any time during the Reference Period will be mentioned in the specific section of the annual report dedicated to the Sub-fund.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

### ● In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Financial and insurance activities	Financial service activities, except insurance and pension funding	49.96
Manufacturing	Manufacture of beverages	8.33
Financial and insurance activities	Activities auxiliary to financial services and insurance activities	8.29
Information and communication	Telecommunications	7.94
Administrative and support service activities	Rental and leasing activities	7.75
Electricity, gas, steam and air conditioning supply	Electricity, gas, steam and air conditioning supply	5.99
Manufacturing	Manufacture of food products	4.51
Manufacturing	Other manufacturing	4.08
Manufacturing	Manufacture of chemicals and chemical products	1.04
Transportation and storage	Land transport and transport via pipelines	0.71
Liquid assets	Liquid assets	1.41

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☐ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or lowcarbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies.
- capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents 100% of total investments.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### ● What was the share of investments made in transitional and enabling activities?

Not applicable

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which lowcarbon alternatives are not yet available and among others have

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

greenhouse gas emission levels corresponding to the best performance.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of socially sustainable investments?**

Not applicable

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets (excluding treasury bonds)
- Derivative instruments
- Collective investment schemes
- Issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets in order to achieve its investment objectives, to diversify its portfolio, to manage liquidity and to hedge its risks.

Over the Reference Period, for liquidity management purposes, the Sub-fund was exposed to 1.41% in liquid assets. There are no minimum environmental or social guarantees on these investments.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

**For direct investments (in shares or corporate bonds):**

On a quarterly basis, a normative screening has been established based on compliance with Global Standards.

Secondly, companies meeting the thresholds as defined in the activities excluded by the responsible investment policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector.

**For direct investments (in sovereign bonds):**

The sub-fund did not invest in countries considered not to meet minimum democratic requirements. To determine whether a country does not meet this minimum requirement the Manager applied a methodology that is based primarily on the classifications of the International NGO Freedom House (“not free”) and The Economist Intelligence Unit (“authoritarian regime”). The list of countries was reviewed on a semi-annual basis and provided to management via the management systems so that it could not give transaction orders on papers issued by these excluded countries.

The stages of the investment process are outlined below:

**How did this financial product perform compared with the reference benchmark?**

Not applicable

- **How does the reference benchmark differ from a broad market index?**

Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

- **How did this financial product perform compared with the reference benchmark?**

Not applicable

- **How did this financial product perform compared with the broad market index?**

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### 3. INFORMATION ABOUT THE SUBFUND DPAM B BONDS EUR

#### 3.1.MANAGEMENT REPORT

---

##### 3.1.1. Launch date of the sub-fund and subscription price of the shares

Date of initial subscription: 04/10/1996.

Initial subscription price: EUR 123.98.

On 26/10/2004, the capitalization and distribution shares were divided by four.

On 30/12/2004, this sub-fund absorbed the sub-fund Belginvest Bonds within the framework of merger by acquisition of the investment company Belginvest S.A. by DPAM B S.A. (formerly DPAM INVEST B S.A.).

##### 3.1.2. Stock exchange listing

The sub-fund's shares are not listed on the stock market.

##### 3.1.3. Aim and main outlines of the investment policy

###### Objective

The objective of this sub-fund is to offer shareholders exposure to the bond market.

The portfolio of the sub-fund consists essentially of short-, medium- and long-term instruments such as bonds and other debt securities or equivalent securities denominated in EUR, at fixed or floating rates, offering periodic or capitalised income and issued or guaranteed by Member States of the European Union.

The portfolio may also comprise government bonds (fixed-rate and variable-rate) issued by government agencies and by local authorities, government bonds denominated in a currency other than the country's local currency, and supranational agencies.

There is no rating requirement on the instruments making up the portfolio or their issuers.

The sub-fund's shareholders do not benefit from any capital protection or guarantee.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

###### Investment policy

The sub-fund invests a maximum of 10% of its assets in open-ended undertakings for collective investment.

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts, deposits or securities and in the form of undertakings for collective investment.

As a result of an exemption granted by the Autorité des Services et Marchés Financiers, the sub-fund may invest up to 100% of its assets in the various issues of transferable securities and money market instruments issued or guaranteed by a Member State of the European Economic Area which has adopted the euro as its currency (listed below (\*)) and by its regional public bodies.

These undertakings for collective investment must hold transferable securities and money market instruments belonging to at least six different issues, and transferable securities and money market instruments belonging to a single issue must not exceed 30% of the total value of their assets.

(\*) Belgium, Germany, Finland, France, Greece, Luxembourg, Ireland, Italy, Netherlands, Austria, Portugal, Spain, Slovenia, Cyprus, Malta, Slovakia, Estonia.

The sub-fund may invest in units of another UCITS or another fund managed directly or indirectly by DPAM or by a company with which DPAM is linked by common management or control or by a direct or indirect holding of more than 10% of the capital or votes. No issue or redemption fees for target funds or management fees may be charged to the assets of the SICAV to the extent of such investments.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

### **3.1.4. Index and benchmark**

The sub-fund uses the following index as its benchmark: JPM EMU Government Bond Total Return.

This index is a bond index representing bonds issued by the governments of European countries where the euro is the official currency. The performance is calculated by reinvesting the coupons paid by the debt securities included in the index.

J.P. Morgan Securities PLC is listed in the register held by ESMA (European Securities and Markets Authority).

The benchmark is used to compare performance. The selection and weighting of the assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark.

The benchmark is not aligned with the promotion of the environmental and social characteristics of the sub-fund. Please refer to the "Investment Strategy" section above for an explanation of how the sub-fund promotes environmental and social characteristics.

The composition and value of the benchmark can be found at <https://www.funds.dpaminvestments.com/funds.html>.

### **3.1.5. Policy followed during the year**

Since the second quarter of 2023, we started observing certain red flags in economic data in Europe. From a positive standpoint, China exited its Covid lockdowns, energy prices dropped to almost pre-war levels, and inflation in general also started decreasing.

But still a specific part of the European economy was not rebounding. The manufacturing sector continued deteriorating although all stars were aligned for it to boom. This weakness in manufacturing was mainly driven by weak domestic demand. This first, logically, during the higher inflation regime since the Covid crisis. However, it even continued deteriorating going into the second quarter of the year. Up until then international demand for European goods was still positive, but over the summer, this also started dropping. Consequently, over the summer we decided to fully remove our underweight duration stance to a neutral level when the German 10Y Bund reached 2.5%.

It is of course perfectly possible to have the European economy experiencing a manufacturing trough as long as the services sector makes up for this. This was the case, but August brought a new next red flag. Typically, the summer months are peak tourism season and hence we observe an extremely strong services sector. But in August, even the services sector fell into contractionary territory as indicated by PMI data. At that moment it becomes even more important to thoroughly monitor incoming data as a period of weak activity typically leads to a softening of the labor market. And that lays to biggest risk for the European economy. Once real economic activity consistently falls, the demand for labor will also fall. Consequently, a vicious circle of decreasing activity and increasing unemployment will start appearing. Consequently, we started building up a long duration stance as we believed the next market moves would be an interest rate rally. However, over September and October, interest rates continued decreasing. As this was not in line with the opposite movement of economic data, we continued adding duration up until the Bund reached 3%. By November, we reached an overweight of almost 1 year in the strategy.

But it has not only been soft data that has consistently deteriorated over the last quarters. When we look at hard economic data, the deterioration is also very clear and broad-based. When looking at bankruptcy data, real retail sales, European import and export data, labor market revisions, etc., they all point towards the possibility that this vicious circle has already started, and Europe is already in a recession. When taking a longer time frame, the only times these data were in this type of a downward trend, was when we were already in a recession. This time could be different, but it typically never is.

As typically a recession goes together with risk aversion, we decided to take significant profit on our allocation to Romania as this country typically underperforms in a rally. We believe an overweight stance on peripheral countries is still appropriate as since the Covid crisis they undertook significant fundamental changes. However, we have started building up an underweight stance on Italy. First as a hedge against the duration overweight, but now also as an outright short.

### **3.1.6. Future policy**

In the end it is very easy to confirm the assertion whether Europe is in a recession and that's by looking at the definition of what a recession is. A recession constitutes two successive quarters of negative real GDP growth. When we assess this definition for all countries that are part of the European Union, already more than 25% is in recession! And if we look at those countries that experienced negative real GDP growth in the third quarter of the year, more than half of European countries experienced negative real GDP! Off course this does not mean that they will also fall in recession, but it is difficult to see a change in momentum given underlying activity data has forcefully continued deteriorating over the past months. To change this type of momentum there are not many solutions. One of them requires the ECB to start actively cutting interest rates. Unfortunately, it is clear that the ECB is not ready for this and is risking a severe policy mistake.

We believe a long duration bias remains very appropriate as once the ECB realizes we moved to the next phase of the economic cycle, they will move to the next phase of their monetary policy cycle. This also means that a curve steepening bias should play out very well as first the anticipation of cuts followed by actual decreases in the policy rate will affect the shorter end of yield curves much more than the longer end.

### **3.1.7. Synthetic risk indicator**

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 3.

### 3.5.GEOGRAPHIC ALLOCATION OF INVESTMENTS

By country	% Portfolio
SPAIN	20.62%
ITALY	18.44%
FRANCE	11.43%
GERMANY (FEDERAL REPUBLIC)	8.98%
AUSTRIA	8.05%
FINLAND	4.25%
LUXEMBOURG (GRAND DUCHY)	4.19%
IRELAND	3.58%
BELGIUM	3.47%
NETHERLANDS	3.22%
CROATIA (REPUBLIC)	3.16%
PORTUGAL	2.74%
SLOVAKIA (SLOVAK REPUBLIC)	2.60%
ROMANIA	2.02%
SLOVENIA (REPUBLIC)	1.99%
SERBIA (REPUBLIC)	0.86%
GREECE	0.40%
<b>Total</b>	<b>100.00%</b>

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

### 3.6.ECONOMIC ALLOCATION OF INVESTMENTS

By sector	% Portfolio
STATES	87.56%
BANKS	4.71%
EUROPEAN ORGANIZATIONS	3.98%
PROVINCE	3.05%
COMMERCIAL & PUBLIC SERVICES	0.62%
ROAD VEHICLES	0.08%
<b>TOTAL</b>	<b>100.00%</b>

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

### 3.7.CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	269,671,381.40	294,814,402.34	564,485,783.74
Sales	76,670,560.59	42,864,807.53	119,535,368.12
<b>Total 1</b>	<b>346,341,941.99</b>	<b>337,679,209.87</b>	<b>684,021,151.86</b>
Subscriptions	215,479,889.01	289,852,699.38	505,332,588.39
Redemptions	44,910,858.93	41,657,365.28	86,568,224.21
<b>Total 2</b>	<b>260,390,747.94</b>	<b>331,510,064.66</b>	<b>591,900,812.60</b>
Reference average of the total net asset	608,684,771.30	870,642,568.00	740,740,208.54
<b>Rotation Percentage</b>	<b>14.12%</b>	<b>0.71%</b>	<b>12.44%</b>

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

On the date of publication of this report, the net asset value per share is published on the following websites: <https://www.funds.dpaminvestments.com/funds.html> and [www.beama.be](http://www.beama.be). This information is also available at the counters of the financial services department.

### 3.10. PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 31 December 2023:

#### Class B

##### Annual return:

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used to compare performance.

##### Table of historical benchmark performance (actuarial returns):

The sub-fund uses the following index as its benchmark: JPM EMU Government Bond Total Return.

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year		
					Year	Value
JPM EMU Government Bond Total Return	7.00 % (in EUR)	-5.39 % (in EUR)	-0.97 % (in EUR)	1.41 % (in EUR)	04/10/1996	3.78 % (in EUR)

**Class A**

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year		
					Year	Value
Class A	8.33 % (in EUR)	-4.73 % (in EUR)	-0.50 % (in EUR)	1.52 % (in EUR)	04/10/1996	3.50 % (in EUR)

**Class B**

Table showing historical performance (actuarial returns):

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.25%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.07%

## Fee sharing

As at 31 December 2023, 6.40% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

## 3.12. NOTES TO THE FINANCIAL STATEMENTS AND OTHER INFORMATION

---

### 3.12.1. Gross dividends paid in the financial year

2019	class A 0.61 EUR
	class E 0.82 EUR
	class V 0.76 EUR
	class M 0.75 EUR
2021	class A 0.75 EUR
	class E 0.83 EUR
	class V 0.76 EUR
	class M 0.79 EUR
2022	class A 0.11 EUR
	class E 0.24 EUR
	class M 0.19 EUR
	class V 0.22 EUR

### 3.12.2. Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

### 3.12.3. Transparency in sustainability

#### Environmental or social characteristics

In accordance with Article 50 of Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022, as amended, information related to environmental or social characteristics promoted by this sub-fund is reflected in the periodic disclosures as defined in Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) and attached to this report. This periodic information has not been audited by the auditor.

#### Statement on the Taxonomy Regulation

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on establishing a framework for the promotion of sustainable investments and amending Regulation (EU) 2019/2088 (the "Taxonomy Regulation") introduced the concept of "no serious impairment" under which investments in accordance with the Taxonomy Regulation must not seriously impair the objectives of the Taxonomy Regulation and must comply with specific European Union criteria. The "no serious impairment" principle applies only to the underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remainder of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

**3.12.4. Transparency of the securities financing transactions and of reuse**

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

## Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:**  
DPAM B BONDS EUR

**Legal entity identifier:**  
54930016ZBIQKT011F81

### Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

#### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b>	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: ____%</b> <div style="margin-left: 40px;"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy </div> <div style="margin-left: 40px;"> <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy </div> <input type="checkbox"/> It made <b>sustainable investments with a social objective: ____%</b>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments <div style="margin-left: 40px;"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy </div> <div style="margin-left: 40px;"> <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy </div> <div style="margin-left: 40px;"> <input type="checkbox"/> with a social objective </div> <input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make sustainable investments</b>

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

#### To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices.
- by systematically applying a policy for impact bonds (such as green and social bonds).
- excluding countries that do not respect a minimum of democratic requirements.

Derivative products, if any, used for the purpose of achieving the investment objectives of the Sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

#### ● How did the sustainability indicators perform?

Over the Reference Period, the sub-fund achieved the following sustainability indicators:

- For investments in corporate bonds:
  - a. The Sub-fund has not been exposed to companies considered to be below Global Standards;

b. The Sub-fund has not been exposed to companies involved in controversial activities according to the definitions and thresholds stipulated by DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>);

c. The sub-fund has not been exposed to companies facing extremely serious ESG controversies around environmental or social issues;

- For investments in sovereign bonds:

a. The sub-fund has not been exposed to issuers that do not meet minimum democratic requirements.

b. The percentage of impact bonds ("Green, Social & Sustainability bonds") in the portfolio was higher than the benchmark. Over the Reference Period, the percentage of impact bonds ("Green, Social & Sustainability bonds") in the portfolio was 7.35% while the benchmark was 2.52%.

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
E/S characteristics	94.81%	98.77%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure
Impact bonds	Sub-fund: 6.04% Benchmark: 0.68%	Sub-fund: 7.35% Benchmark: 2.52%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Not applicable

*The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### • For investments in corporate bonds:

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated into the entire research and investment process.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

#### 1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD) Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not meet global standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity are thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account.

d) In addition, the filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

#### 2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises are de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). In this way, companies involved in controversial armaments are directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of gender diversity on the board of directors is addressed primarily through shareholder responsibility by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

### • For investments in sovereign bonds:

During the Reference Period, the Sub-fund took into consideration the environmental and social PAI listed in table 1 of appendix I of the Delegated Regulation (EU) 2022/1288.

The first PAI relates to environmental issues and focuses on the greenhouse gas emission intensity of the investee countries. The indicator is an integral component of the country sustainability model that DPAM developed for its sovereign bond strategies. Consequently, it is included in the country's sustainability score and can influence it positively or negatively depending on its level and development compared to other issuer countries.

The second PAI relates to social issues and focuses on issues of social breaches. The country's sustainability model observes several indicators on this issue, such as respect for civil liberties and political rights, respect for human rights and the level of violence within the country, commitment to major labour conventions, the issue of equal opportunity and distribution of wealth, etc. These different indicators are included in the country's sustainability score and can influence it positively or negatively depending on its level and evolution compared to other issuing countries.

During the Reference Period, the management teams have engaged in a dialogue on the results of the sustainability scores with certain countries according to DPAM's engagement policy via the link <https://www.dpaminvestments.com/documents/engagement-policy-enBE>.

Over the Reference Period, the management teams conducted a certain number of dialogues with the various participants in sovereign debt issues. These dialogues allowed us to verify with the stakeholders the points of attention of the governmental policies, notably in environmental and/or social matters.

Details of the dialogues with countries and companies will be published in an annual report in the first quarter of 2024 on the DPAM website (<https://www.funds.dpaminvestments.com/funds.html>).

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at <https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et <https://www.dpaminvestments.com/documents/tcfd-report-enBE>.

## What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the Reference Period which is: 31/12/2023

Largest investments	Sector	% of assets	Country

## What was the proportion of sustainability-related investments?

**Asset allocation**  
describes the share of  
investments in specific  
assets.

### ● What was the asset allocation?

Through the application of the investment strategy described above, the Sub-fund has invested 98.77% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S Characteristics").

Any failure to comply with the asset allocation stipulated in the prospectus at any time during the Reference Period will be mentioned in the specific section of the annual report dedicated to the Sub-fund.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

### ● In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Public administration	Public administration and defence; compulsory social security	89.99
Financial and insurance activities	Financial service activities, except insurance and pension funding	4.80
Extraterritorial activities	Activities of extraterritorial organisations and bodies	3.91
Construction	Civil engineering	0.08
Derivatives	Derivatives	0.14
Liquid assets	Liquid assets	1.09

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

☐ No

lowarbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies.
- capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which lowarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● What was the share of investments made in transitional and enabling activities?

Not applicable

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments?

Not applicable

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets
- Derivative instruments
- Collective investment schemes
- Issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets in order to achieve its investment objectives, to diversify its portfolio, to manage liquidity and to hedge its risks.

Over the Reference Period, for the purposes of achieving its investment objectives, portfolio diversification, liquidity management and/or risk hedging, the Sub-fund was exposed to 1.09% in liquid assets and 0.14% in derivatives. There are no minimum environmental or social guarantees on this allocation.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

#### For investments in shares or corporate bonds:

On a quarterly basis, a normative screening has been established based on compliance with Global Standards.

Secondly, companies meeting the thresholds as defined in the activities excluded by the responsible investment policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

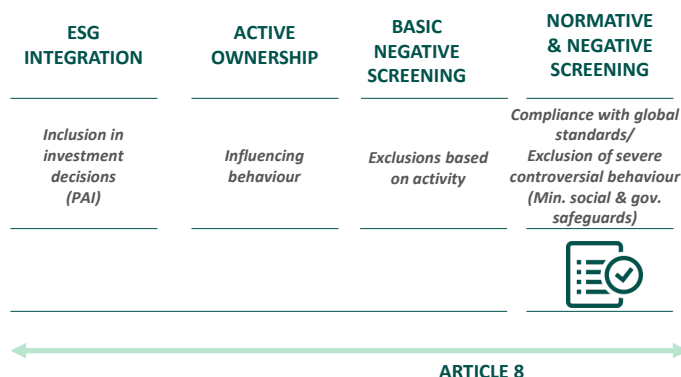

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector.

#### For investments in sovereign bonds:

The Sub-fund did not invest in countries considered not to meet minimum democratic requirements. To determine whether a country does not meet this minimum requirement the Manager applied a methodology that is based primarily on the classifications of the International NGO Freedom House ("not

free”) and The Economist Intelligence Unit (“authoritarian regime”). The list of countries was reviewed on a semi-annual basis and provided to management via the management systems so that it could not give transaction orders on papers issued by these excluded countries.

The stages of the investment process are outlined below:

## How did this financial product perform compared with the reference benchmark?

Not applicable

- How does the reference benchmark differ from a broad market index?

Not applicable

- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

- How did this financial product perform compared with the reference benchmark?

Not applicable

- How did this financial product perform compared with the broad market index?

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## 4. INFORMATION ABOUT THE SUBFUND DPAM B EQUITIES EUROPE SMALL CAPS SUSTAINABLE

### 4.1. MANAGEMENT REPORT

---

#### 4.1.1. Launch date of the sub-fund and subscription price of the shares

Date of initial subscription: 07/12/1997.

Initial subscription price: EUR 123.98.

On 16/12/2001 the shares were divided into three.

The sub-fund received all the assets of the DPAM CAPITAL B Equities Belgium sub-fund through a merger by absorption which took effect on 26 February 2021.

#### 4.1.2. Stock exchange listing

The sub-fund's shares are not listed on the stock market.

#### 4.1.3. Aim and main outlines of the investment policy

##### Objective

The objective of this sub-fund is investment in shares of European companies with a small market capitalisation (1) at European level, selected on the basis of compliance with environmental, social and governance (ESG) criteria, and any securities giving entitlement to the capital of these companies.

The following are considered to be equivalent companies: companies' resident in non-European countries that have a significant proportion of their assets, activities and profit or decision-making centres in Europe and which meet the criteria stated above. The investment policy favours the selection of companies based on their specific qualities, with no particular rules as to geographic or sectoral distribution.

The sub-fund uses a rigorous ESG methodology and strict exclusions in order not to undermine other environmental and social objectives and to ensure the required good governance practices.

(1) The sub-fund invests mainly in European companies representing a small market capitalization, i.e. companies whose market capitalization does not exceed the largest market capitalization among the companies making up the MSCI Europe Small Cap Net Return index at the time of the initial investment

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts, deposits or securities. The sub-fund invests a maximum of 10% of its assets in open-ended undertakings for collective investment.

No formal guarantee has been given either to the sub-fund or to its investors.

##### Investment policy

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

#### **4.1.4. Index and benchmark**

The sub-fund uses the following index as a benchmark: MSCI Europe Small Cap Net Return.

This index is representative of the small-cap equity market in developed countries (as defined by MSCI and mainly based on the country of incorporation and the country of primary listing of its securities) in Europe.

The performance of this index is calculated by reinvesting net dividends (Net Return).

MSCI Limited is registered with ESMA (European Securities and Markets Authority).

The benchmark is used to compare performance and to determine the maximum authorized market capitalization of the underlying securities (see "Objectives of the sub-fund" above). The selection and weighting of assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark. The benchmark is not aligned with the promotion of the environmental and social characteristics of the fund. Please refer to the investment strategy above for an explanation of how the sub-fund promotes environmental and social characteristics.

The possible composition and the value of the benchmark can be found on the website <https://www.funds.dpaminvestments.com/funds.html>.

#### **4.1.5. Policy followed during the year**

The DPAM B Equities Europe small caps fund invests in high quality, sustainable undervalued small cap companies with a minimum investment horizon of 3 to 5 years. In 2023 inflation cooled down throughout the year, while the fear of energy shortages and dislocations in supply chains seemed overdone. The overall economy and profits held up better than feared. Small caps underperformed as an asset class in Europe on fears of an economic slowdown, a different sector composition (lower exposure to financials, higher exposure to value & economically sensitive names, no/less exposure to luxury names,...) but rebounded strongly in the last 2 months of the year (closing the gap with large caps from 10% underperformance to just a bit over 2%). The anticipation of central bank pivots next year and the expectation of a soft landing led to a powerful rally in risk assets. While the fund still outperforms its BM nicely on a 3 yr basis (after 2 strong years), the fund underperformed its benchmark in 2023. Some of our names suffered from destocking and lower demand post over ordering and excessive demand in the post covid era. Recticel (lower activity levels in insulation and a negotiated reduction in the sales price of a business they sold), Alfen (lower activity levels in EV chargers after a stellar 2022), Azelis (destocking and lower demand in the more cyclical part of the specialty chemical portfolio) and Corbion (volumes getting impacted from price increases), Bakkafrost (restructuring in their Scottish activities taking longer than expected) and CVS (the CMA in the UK opened an investigation into the vet sector) were a few of the names that contributed negatively. Positive contributors were our semi-equipment names (Besi, Inficon & VAT (anticipation of the through in semi-equipment order intake, while enjoying AI driven tailwinds)), SOL (undiscovered Italian producer of industrial and medical gases that enjoyed a bullish initiation report of a broker), Van Lanschot (recovery in net interest margin, strong excess capital generation).

#### **4.1.6. Future policy**

The fund focuses on attractively valued sustainable quality stocks. For us, these are companies with a strong market position, a sustainable competitive advantage that are active in attractive market segments. They have excellent management teams focused on sustainable value creation, make efficient use of their (mainly) internally generated cash flow in value creative projects and score well on our sustainability criteria. The fund pursues a bottom-up buy and hold approach. We reduce the huge universe by means of quantitative and qualitative filters and select a limited number of attractively valued sustainable quality stocks. Interviews with management and company visits are an important aspect of the analysis, as are the insights of our buy-side analysts. The geographical and sector allocation are the result of bottom-up stock picking but must conform to certain limits. Over the course of 2023 we bought on weakness new positions that comply with our "quality at a reasonable price" and ESG criteria like Diploma (high value added distributor of technical products) that benefited from a lot of earnings upgrades since and enjoyed from takeover bids on 2 portfolio companies (Applus and Abcam). We benefited from some weakness in high quality companies like Diploma (high value added distributor of technical products), CTS Eventim (nr 1 ticketing company in Continental Europe), VAT (highly specialized valves for vacuum chambers for semiconductors,,), Bytes (UK distributor

of software) and Fortnox (leading SaaS accounting software player in Sweden with plenty of upselling potential. We sold the positions in companies that didn't meet our quality criteria anymore (like Loomis, Keywords Studios, RWS and Integrafin) because of disruption, changing market dynamics,...

For 2024, we are maintaining our focus on quality sustainable names while remaining disciplined on valuation and staying away from value traps i.e., disrupted industries (retail, traditional media) and highly geared companies. The European small cap segment remains an attractive asset class. Studies have shown that in the longer-term small caps perform better than the universe of larger cap stocks. In particular the high-quality sustainable companies on which we focus in this fund perform strikingly better in the longer term. Small caps in Europe have become very cheap compared to the large cap universe. A(n) (earnings) recession in the first part of 2024 could still impact the universe negatively, but given leading indicators are already low to historical standards, inflation seems under control, a soft landing has become the base case scenario and both relative and absolute valuations are attractive, 2024 could be an interesting year to revisit the asset.

#### **4.1.7. Synthetic risk indicator**

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 4.

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

#### 4.7.CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	72,624,110.43	10,869,264.96	83,493,375.39
Sales	43,270,386.02	67,166,855.21	110,437,241.23
<b>Total 1</b>	<b>115,894,496.45</b>	<b>78,036,120.17</b>	<b>193,930,616.62</b>
Subscriptions	74,207,775.45	17,414,767.56	91,622,543.01
Redemptions	52,599,671.75	73,174,437.77	125,774,109.52
<b>Total 2</b>	<b>126,807,447.20</b>	<b>90,589,205.33</b>	<b>217,396,652.53</b>
Reference average of the total net asset	372,035,396.26	308,157,066.93	339,833,717.91
<b>Rotation Percentage</b>	<b>-2.93%</b>	<b>-4.07%</b>	<b>-6.91%</b>

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

On the date of publication of this report, the net asset value per share is published on the following websites: <https://www.funds.dpaminvestments.com/funds.html> and [www.beama.be](http://www.beama.be). This information is also available at the counters of the financial services department.

## 4.9.PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 31 December 2023:

### Class B

Annual return:

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used to compare performance.

	Average cumulated returns				Since	
	1 year	3 years	5 years	10 years	Year	Value
MSCI Europe Small Cap Net Return	12.74 % (in EUR)	2.66 % (in EUR)	8.26 % (in EUR)	7.05 % (in EUR)	07/12/1997	6.54 % (in EUR)

Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.23%

#### **Fee sharing**

As at 31 December 2023, 33.35% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

## **4.11. NOTES TO THE FINANCIAL STATEMENTS AND OTHER INFORMATION**

### **4.11.1. Gross dividends paid in the financial year**

2019	class A 1.27 EUR class V 2.95 EUR class M 2.76 EUR
2021	class A 1.89 EUR class V 3.29 EUR class M 2.92 EUR
2022	class A 4.70 EUR class V 4.94 EUR class M 4.78 EUR

### **4.11.2. Valuation of financial instruments**

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

### **4.11.3. Investment restrictions and overruns**

Following clarifications by the ESA of 17th of November 2022 on the application of regulation (UE) 2019/2088, double counting should be avoided between an investment which has an environmental and social objective. Following this change of methodology, between NAV dates 02/01/2023 and 15/05/2023, a breach was noticed in the DPAM B Equities Europe Small Caps Sustainable fund. Indeed, the fund takes the commitment to be invested at least 50% in assets with a social objective. As of 02/01/2023, the fund was at 38.94%. The breach closed after an adaptation of the fund's prospectus.

#### **4.11.4. Transparency in sustainability**

##### **Environmental or social characteristics**

In accordance with Article 50 of Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022, as amended, information related to environmental or social characteristics promoted by this sub-fund is reflected in the periodic disclosures as defined in Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) and attached to this report. This periodic information has not been audited by the auditor.

##### **Statement on the Taxonomy Regulation**

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on establishing a framework for the promotion of sustainable investments and amending Regulation (EU) 2019/2088 (the "Taxonomy Regulation") introduced the concept of "no serious impairment" under which investments in accordance with the Taxonomy Regulation must not seriously impair the objectives of the Taxonomy Regulation and must comply with specific European Union criteria. The "no serious impairment" principle applies only to the underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remainder of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

#### **4.11.5. Transparency of the securities financing transactions and of reuse**

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

## Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

### Product name:

DPAM B EQUITIES EUROPE SMALL CAPS  
SUSTAINABLE

### Legal entity identifier:

549300IE87MW44R5QF87

### Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

#### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes		<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No	
<input type="checkbox"/>	It made <b>sustainable investments with an environmental objective</b> : ____%	<input checked="" type="checkbox"/>	It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <b>76.72%</b> of sustainable investments
<input type="checkbox"/>	in economic activities that qualify as environmentally sustainable under the EU	<input checked="" type="checkbox"/>	with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/>	in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/>	with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/>	It made <b>sustainable investments with a social objective</b> : ____%	<input checked="" type="checkbox"/>	with a social objective
<input type="checkbox"/>		<input type="checkbox"/>	It promoted E/S characteristics, but <b>did not make sustainable investments</b>

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices and best efforts.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

Derivative financial products, if any, used for the purpose of achieving the investment objectives of the Sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

#### ● How did the sustainability indicators perform?

During the Reference Period, the Sub-fund achieved the following sustainability indicators:

- The Sub-fund has not been exposed to companies considered to be non-compliant with Global Standards;
- The Sub-fund has not been exposed to companies involved in controversial activities according to the definitions and thresholds stipulated by DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>);

- c. The Sub-fund has no exposure to companies facing ESG controversies of maximum severity;
- d. The Sub-fund has no exposure to issuers whose ESG score resulting from the manager's proprietary "scorecard ESG" rating model is below two out of five;
- e. The average weighted greenhouse gas (GHG) emissions intensity of the Sub-fund was below the average weighted greenhouse gas (GHG) emissions intensity of the benchmark: 1052.74 tCO<sub>2</sub>e/M revenue compared to 1352.46 tCO<sub>2</sub>e/mn revenue (as at 31/12/2023).

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Period	2022	2023
<b>E/S characteristics</b>	98.15%	99.16%
<b>Sustainable Investment</b>	78.05%	76.72%
<b>Other Environmental Investments</b>	37.59%	49.14%
<b>Social</b>	73.63%	26.53%

Reference period	2022	2023
<b>Sustainability indicator a.</b>	No exposure	No exposure
<b>Sustainability indicator b.</b>	No exposure	No exposure
<b>Sustainability indicator c.</b>	No exposure	No exposure
<b>Sustainability indicator d.</b>	No exposure	No exposure
<b>Sustainability indicator e.</b>	Sub-fund: 673.57 Benchmark: 1152.98	Sub-fund: 1052.74 Benchmark: 1352.46

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

For the Reference Period, the Sub-fund aimed to have at least 50% sustainable investments i.e. investments aimed at:

- companies aligned with one of the first two objectives of the EU taxonomy (climate change mitigation and adaptation);
- companies aiming to make a net positive contribution to the United Nations (UN) Sustainable Development Goals ("SDGs"), which are environmental in nature;
- companies aiming to make a net positive contribution to the social SDGs;
- at the level of the overall portfolio, a minimum of 20% of companies making a net positive contribution to all SDGs.

For the Reference Period, the Sub-fund had 76.72% sustainable investments. These sustainable investments have contributed to the Sub-fund's partial sustainable investment objective in the following ways:

- 1.04% of the Sub-fund's portfolio contributed to the achievement of the environmental objectives defined by the EU Taxonomy (climate change mitigation and adaptation);
- 49.14% of the Sub-fund's portfolio contributed to the achievement of environmental objectives not aligned with the EU Taxonomy;
- 26.53% of the Sub-fund's portfolio contributed to the achievement of social objectives.
- 70.65% of the Sub-fund's portfolio was invested in companies making a net positive contribution to the SDGs (including impact bonds).

\* The net positive contribution is the difference between the positive and negative impact contributions and is calculated at the level of the invested company and the overall portfolio. Based on the SDGs framework, the net positive contribution takes into account on the one hand (1) the extent to which the invested company's products and services contribute to the achievement of the SDGs and on the other hand (2) the adverse impacts of their activities along the value chain.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

DPAM ensures that the Sub-fund's sustainable investments during the Reference Period do not materially undermine an environmentally or socially sustainable investment objective by:

Issuer level:

- Consideration of the principal adverse impacts on the mandatory sustainability factors (hereinafter "PAIs") listed in Table 1 of Annex 1 of the Delegated Regulation (EU) 2022/1288 which allows for the reduction of the adverse impacts of the investment, including:
  - o by incorporating several elements to avoid and/or reduce its exposure to activities or behaviours that could affect another environmental or social objective (such as the Global Standards compliance filter and the exclusion of ESG controversies of maximum severity or activities most harmful to other environmental and/or social objectives);
  - o via an engagement process with investee companies, in accordance with its Engagement Policy, which can be accessed at <https://www.dpaminvestments.com/documents/engagement-policy-enBE>. The commitments made by DPAM are also the subject of an annual report available at [https://res.cloudinary.com/degroof-petercam-asset-management/image/upload/v1614006835/DPAM-report\\_engagement\\_activity.pdf](https://res.cloudinary.com/degroof-petercam-asset-management/image/upload/v1614006835/DPAM-report_engagement_activity.pdf).
- An impact calculation methodology which takes into account the positive and negative contribution of the company's products and services to the SDGs in order to optimise the net positive (resulting) contribution.

Overall portfolio level:

- A rule of minimum 20% of assets aligned with the EU Taxonomy or in net positive contribution on all 17 SDGs. During the Reference Period, a minimum 70.65% of assets aligned with the EU Taxonomy or making a net positive contribution to all 17 SDGs.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated into the entire research and investment process.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with the Global Standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account.

d) The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

e) Similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their scorecard.

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with DPAM's Controversial Activities Policy) (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity is addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

e) Similarly, social indicators have been included in the analysis of the ESG profile of companies and impact their scorecard.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at <https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et <https://www.dpaminvestments.com/documents/tcfd-report-enBE>.

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The first stage of the Sub-fund's investment is based on a normative screening, which includes compliance with Global Standards based on human rights, labour rights and the prevention of corruption. These include the OECD Guidelines for Multinational Enterprises and the UN Guidelines on Business and Human Rights. Companies that do not meet these criteria are excluded from the eligible investment universe. The Sub-fund has therefore not been invested during the Reference Period in any company that is deemed not to comply with these principles.

*The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

*The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated throughout the research and investment process from its inception.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with the Global Standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account. The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

d) Similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their scorecard.

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with DPAM's Controversial Activities Policy) (available at

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity is addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

e) Similarly, social indicators are included in the analysis of the ESG profile of companies and impact their scorecard.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at

<https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et <https://www.dpaminvestments.com/documents/tcfd-report-enBE>.

## What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the Reference Period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
D'IETEREN SA	Wholesale and retail trade; repair of motor vehicles and motorcycles	3.72	Belgium
DIPLOMA PLC	Wholesale and retail trade; repair of motor vehicles and motorcycles	3.56	United Kingdom
SPIE SA	Professional, scientific and technical activities	3.39	France
ARCADIS NV	Professional, scientific and technical activities	3.10	Netherlands
IMCD N.V.	Wholesale and retail trade; repair of motor vehicles and motorcycles	3.10	Netherlands
REPLY SPA	Professional, scientific and technical activities	3.07	Italy
SHURGARD SELF STORAGE	Real estate activities	2.63	Belgium
GAMES WORKSHOP GROUP PLC	Manufacturing	2.54	United Kingdom
AZELIS GROUP	Wholesale and retail trade; repair of motor vehicles and motorcycles	2.53	Belgium
IPSOS SA	Professional, scientific and technical activities	2.46	France
ROYAL UNIBREW	Manufacturing	2.42	Denmark
VAN LANSCHOT	Financial and insurance activities	2.38	Netherlands
CTS EVENTIM	Information and communication	2.30	Germany
KINEPOLIS GROUP	Information and communication	2.26	Belgium
BYTES TECHNOLOGY GROUP PLC	Information and communication	2.18	United Kingdom

## What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

### What was the asset allocation?

During the Reference Period, by applying the investment strategy, the Sub-fund invested a minimum of 99.16% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S characteristics").

The Sub-fund invested at least 76.72% of its assets in sustainable investments with environmental or social objectives (in the table referred to as "#1A Sustainable").

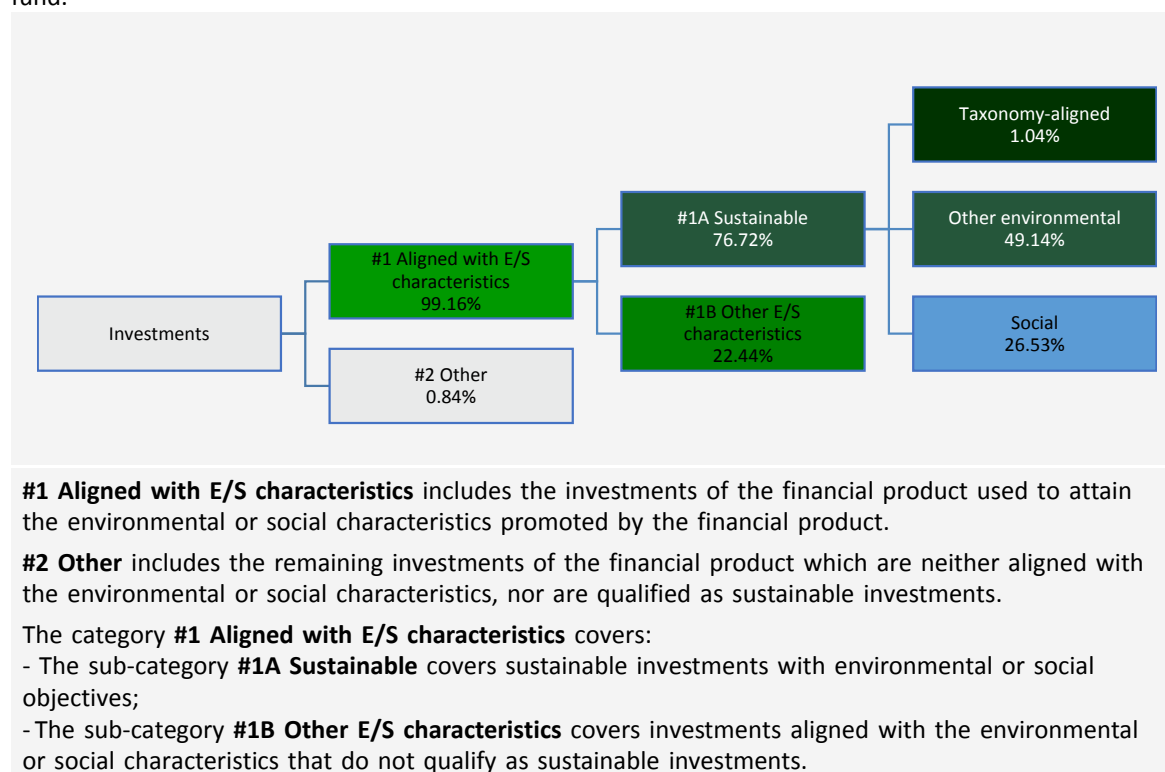

The percentage of the portfolio invested in sustainable investments that meet an environmental and/or social objective (#1A Sustainable) is calculated using the cascade methodology described in the prospectus (section "What are the sustainable investment objectives that the financial product intends to partially achieve and how does the sustainable investment contribute to these objectives?"), which excludes double counting at the cascade level: an investment qualifying as sustainable at the level of a first element of the cascade is not then taken into account at the level of subsequent elements of the cascade.

In contrast, the percentages of the two sub-categories of sustainable investments (#1A Sustainable) in the portfolio invested in environmental investments other than those aligned with the taxonomy and social investments as indicated in the prospectus from 1 January 2023 to 14 May 2023 may involve some double counting. All portfolio companies were analysed against both (i) the environmental SDGs (and therefore may fall into the sub-category "other environmental investments" even if they were also considered to be aligned with the taxonomy and/or as a social sustainable investment) and (ii) the social SDGs (and therefore may fall into the sub-category "social investments" even if they were also considered to be aligned with the taxonomy and/or as an other environmental investment).

Following clarification from the ESAs on 17 November 2022 on the application of Regulation (EU) 2019/2088 that double counting should be avoided where an activity may contribute to more than one environmental and social objective, the methodology for calculating the minimum commitment for the social sustainable investment objective has been revised and the minimum commitment for this objective was revised downwards in the prospectus dated 15 May 2023. The figures reported below exclude double counting for the Reference Period. In the event that the minimum commitment to the social sustainable investment objective mentioned in the prospectus in force from 1 January to 14 May 2023 is not achieved, this will be disclosed in the specific section of the annual report dedicated to the Sub-fund under "Notes to the Financial Statements and Other Information/ Investment Restrictions and Breaches".

Any failure to comply with the asset allocation stipulated in the prospectus at any time during the Reference Period will be mentioned in the specific section of the annual report dedicated to the Sub-fund.

#### ● In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Wholesale and retail trade; repair of motor vehicles and motorcycles	Wholesale trade, except of motor vehicles and motorcycles	10.61
Manufacturing	Manufacture of computer, electronic and optical products	6.60
Professional, scientific and technical activities	Architectural and engineering activities; technical testing and analysis	6.49
Real estate activities	Real estate activities	5.45

<b>Sector</b>	<b>Sub-sector</b>	<b>% assets</b>
Financial and insurance activities	Activities auxiliary to financial services and insurance activities	4.91
Manufacturing	Manufacture of food products	4.83
Information and communication	Motion picture, video and sound production and distribution	4.56
Manufacturing	Manufacture of electrical equipment	4.52
Manufacturing	Manufacture of machinery and equipment n.e.c.	4.25
Manufacturing	Manufacture of chemicals and chemical products	4.05
Manufacturing	Manufacture of paper and paper products	3.74
Wholesale and retail trade; repair of motor vehicles and motorcycles	Wholesale and retail trade and repair of motor vehicles and motorcycles	3.72
Information and communication	Computer programming, consultancy and related activities	3.40
Professional, scientific and technical activities	Other professional, scientific and technical activities	3.07
Construction	Civil engineering	2.74
Manufacturing	Other manufacturing	2.54
Professional, scientific and technical activities	Scientific research and development	2.46
Manufacturing	Manufacture of beverages	2.42
Financial and insurance activities	Insurance, reinsurance and pension funding, except compulsory social security	2.04
Agriculture, forestry and fishing	Fishing and aquaculture	1.96
Arts, entertainment and recreation	Sports activities and amusement and recreation activities	1.89
Manufacturing	Manufacture of rubber and plastic products	1.71
Manufacturing	Manufacture of motor vehicles, trailers and semi-trailers	1.59
Professional, scientific and technical activities	Veterinary activities	1.43
Information and communication	Publishing activities	1.26
Manufacturing	Manufacture of fabricated metal products, except machinery and equipment	1.21
Administrative and support service activities	Office administrative, office support and other business support activities	1.09
Water supply; sewerage; waste management and remediation activities	Waste collection, treatment and disposal activities; materials recovery	1.00
Financial and insurance activities	Financial service activities, except insurance and pension funding	0.99
Wholesale and retail trade; repair of motor vehicles and motorcycles	Retail trade, except of motor vehicles and motorcycles	0.96
Manufacturing	Manufacture of wood and of products of wood and cork, straw and plaiting	0.89
Administrative and support service activities	Services to buildings and landscape activities	0.78

Sector	Sub-sector	% assets
Liquid assets	Liquid assets	0.84

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Sustainable investments that are aligned with the EU Taxonomy (referred to in the table as "EU Taxonomy aligned") consist of investments in companies whose economic activities substantially contribute to the environmental objectives of climate change mitigation and/or adaptation as defined by the EU Taxonomy in accordance with the eligibility and technical selection criteria ("EU Taxonomy Technical Selection Criteria").

DPAM's methodology for assessing the EU Taxonomy alignment of investee companies is based on data provided either by the investee companies or by third party providers. The latter use a mixed approach:

- Firstly, a direct mapping between the business activities in their own sectoral classification system and the economic activities covered by the Technical Selection Criteria of the EU Taxonomy.
- Secondly, any business activity that could not be directly mapped is examined through a bottom-up assessment of its alignment with the EU Taxonomy's Technical Selection Criteria.
- Any economic activity remaining after the first and second steps is considered not to be aligned with the EU Taxonomy.

In principle, the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy is assessed by means of turnover (based on performance data provided by third-party suppliers).

Where information on the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy cannot be readily obtained from information published by the invested issuers, DPAM shall rely on equivalent information obtained by third-party providers from the invested issuers.

Applying this methodology, over the Reference Period, the Sub-fund is aligned for 1.04% with the first two objectives of the Taxonomy (environmental objectives of climate change mitigation and/or adaptation).

The compliance of these investments with the requirements set out in Article 3 of the EU Taxonomy is not subject to a guarantee provided by one or more auditors or a review by one or more auditors or a review by one or more third parties.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- ☒ Yes:
- ☐ In fossil gas ☒ In nuclear energy
- ☐ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or lowcarbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● What was the share of investments made in transitional and enabling activities?

Not applicable

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Reference period	EU Taxonomy-aligned investments
1 January 2022 - 31 December 2022	2.05%
1 January 2023 - 31 December 2023	1.04%

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Based on the approach described below, the Sub-fund invested 49.14% of its portfolio in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy over the Reference Period.

During the Reference Period, only two of the six environmental objectives defined by the EU Taxonomy were covered by the regulatory framework of the EU Taxonomy Technical Selection Criteria that determine alignment with the EU Taxonomy (adaptation and climate change mitigation). However, during the Reference Period, DPAM made sustainable investments that contribute to environmental objectives that were not covered by these EU Taxonomy Technical Selection Criteria relating to the first two environmental objectives of the EU Taxonomy, in particular key environmental objectives such as the sustainable use and protection of water and marine resources, the prevention and control of pollution and the protection and restoration of biodiversity and ecosystems.

To this end, DPAM has adopted and defined a specific framework for identifying the environmental objectives of these sustainable investments and assessing their contribution to these objectives.

This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to environmental objectives.

## What was the share of socially sustainable investments?

Based on the approach described below, the Sub-fund invested 26.53% of its portfolio in sustainable investments with a social objective over the Reference Period. A European Taxonomy for social sustainability goals has yet to be developed. In the meantime, DPAM wishes to continue to make sustainable investments that contribute to the achievement of key social goals such as zero hunger, quality education and peace, justice and strong institutions.

To this end, DPAM has adopted and defined a specific framework for identifying the social objectives of these sustainable investments and assessing their contribution to these objectives. This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to social objectives.

DPAM will review and reassess this framework when the EU Taxonomy Technical Selection Criteria have been implemented for the social objectives under the EU Taxonomy.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets
- Derivative instruments
- Collective investment schemes
- Issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for liquidity management purposes, the Sub-fund was exposed to 0.84% in liquid assets. There are no minimum environmental or social guarantees on this allocation.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e.:

On a quarterly basis, a normative screening has been established based on compliance with Global Standards.

Subsequently, companies meeting the thresholds as defined in the activities excluded by DPAM's controversial activities policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

DPAM supplemented the various ESG exclusion filters using ESG risk and opportunities scorecards for each issuer in the portfolio. The scorecards were updated on an annual basis or ad hoc if an event should require a revision of the issuer's scorecard.

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector. In addition, this qualitative analysis also includes consideration of the sustainability theme and the issuer's total contribution to the UN Sustainable Development Goals. The stages of the investment process are outlined below:

## How did this financial product perform compared with the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**  
Not applicable
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**  
Not applicable
- **How did this financial product perform compared with the reference benchmark?**  
Not applicable

- **How did this financial product perform compared with the broad market index?**

Not applicable

## 5. INFORMATION ABOUT THE SUBFUND DPAM B EQUITIES EUROLAND

### 5.1. MANAGEMENT REPORT

#### 5.1.1. Launch date of the sub-fund and subscription price of the shares

Date of initial subscription: 19/04/1998.

Initial subscription price: EUR 123.98.

On 16/12/2001, the shares of the sub-fund were divided by two.

#### 5.1.2. Stock exchange listing

The sub-fund's shares are not listed on the stock market.

#### 5.1.3. Aim and main outlines of the investment policy

##### Objective

The principal objective of this sub-fund is investment in shares of companies having their registered office in one of the Member States of the European Union which has the euro as its national currency, and any securities giving entitlement to the capital of these companies. The following are considered to be equivalent companies: other companies that have a significant proportion of their assets, activities and profit or decision-making centres in the aforementioned countries.

More specifically, at least two-thirds of the sub-fund's investments are invested in stocks of companies which have their registered office or which carry out their primary economic activity in one of the European Union Member States which use the Euro as their national currency and any securities giving entitlement to the capital of these companies.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

The sub-fund may hold cash on an ancillary or temporary basis in the form of current accounts, deposits or securities. The sub-fund invests up to 10% of its assets in open-ended collective investment schemes. No formal guarantee has been given either to the sub-fund or to its investors.

##### Investment policy

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR Regulation 2019/2088.

#### 5.1.4. Index and benchmark

The sub-fund uses the following index as a benchmark: MSCI EMU Net Return.

This index is representative of the large and mid-cap equity market in developed countries (as defined by MSCI and mainly based on the country of incorporation and the country of primary listing of its securities) in the EMU zone.

The performance of this index is calculated by reinvesting net dividends (Net Return).

The benchmark is used to compare performance.

The selection and weighting of assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark.

The benchmark is not aligned with the promotion of the environmental and social characteristics of the fund. Please refer to the investment strategy above for an explanation of how the sub-fund promotes environmental and social characteristics.

The possible composition and the value of the benchmark can be found on the website <https://www.funds.dpaminvestments.com/funds.html.com>.

#### **5.1.5. Policy followed during the year**

The sub-fund managed to close 2023 in profit, and this despite a challenging first half of the year. It was mainly cyclical sectors that contributed positively to returns last year. All the sector contributed positively to the performance except for healthcare which lagged. IT, consumer discretionary and Industrials performed particularly well.

Within IT, this can mainly be explained by the strong performance of semiconductor stocks BESI, ASMI and SAP. Despite revenues not yet ameliorating, the advanced packaging businesses sequentially improved order intakes toward the end of the year. BESI in particular saw higher orders for computing, hybrid bonding and photonics applications, partially offset by reduced demand for automotive and industrial applications.

In consumer discretionary, Ferrari continued to post strong results reflected in both solid demand and profitability thanks to its strong model momentum. Stellantis, the other strong contributor, also saw solid orders intake demand last year. In industrials, Schneider, Kingspan and Safran were the main responsible for positive returns. Schneider has successfully repositioned its products and services around 3 megatrends: i) Electrification, ii) Digitization, and iii) Automation, which are the key drivers to decarbonize. Kingspan also benefitted from sustainability trends while in the geopolitical context of last year supported stronger sales than anticipated in Propulsion, Equipment and Interiors. Commercial aftermarket KPI have also been particularly solid. In consumer staples, Beiersdorf drove strong returns as it has demonstrated a successful turnaround following a focus on its winning categories.

Healthcare had a negative contribution as destocking in bioprocessing has been the main topic with weaker than expected production related demand from some customers and as time and magnitude of destocking came up bigger than anticipated.

During 2023, some positions were changed. New holdings in Publicis, Adidas, Unicredit, AB Inbev were added. We like Publicis singular exposure to media and tech and its US leadership in the consumer experience category thanks to its huge data integration strategy. Adidas' improving brand heat and efforts with retailers have driven an improvement in trends from negative to positive through the year as well as in sales. We initiated a position in Unicredit due to good earnings momentum and improved profitability. We also entered a position in AB Inbev as we believe the company has reached an inflection point with lower debt levels, better categories and potential for improved free cash flow generation through margin upside.

Notable additions during 2023: xxx ASR, Getlink, Prysmian, Reply, DSM, EDP.

Notable dis-investments in 2023: Neste, Sampo, Adyen, Teleperformance, Infineon, CRH, UPM, Hera.

#### **5.1.6. Future policy**

European growth indicators, although not showing signs of deterioration, remain subdued. The overall decrease in interest rates and energy prices is viewed positively. Despite the disruptive impact of the monetary tightening cycle in various market segments, it has also opened up a broader range of stock picking opportunities. However, the importance of refinancing risks persists. Even with rates experiencing a decline from their peak, lower-quality companies are expected to face a more challenging financial landscape.

Our primary expectation remains an orderly economic slowdown. As the political agenda shifts towards the local level, we anticipate gaining more insights into the region's medium-term potential growth rate. Conversations with companies across sectors reveal advanced stages of destocking, while those aligned with structural trends express optimism about their future.

Given this backdrop, the manager maintains an investment approach with a medium to longer time horizon. The focus is on Eurozone companies with robust business models, steering clear of areas undergoing disruption.

#### **5.1.7. Synthetic risk indicator**

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 4.

## 5.5.GEOGRAPHIC ALLOCATION OF INVESTMENTS

---

By country	% Portfolio
FRANCE	33.43%
NETHERLANDS	20.52%
GERMANY (FEDERAL REPUBLIC)	18.07%
ITALY	12.18%
SPAIN	5.92%
BELGIUM	4.83%
PORTUGAL	2.39%
IRELAND	1.51%
SWITZERLAND	1.15%
<b>Total</b>	<b>100.00%</b>

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

## 5.6.ECONOMIC ALLOCATION OF INVESTMENTS

By sector	% Portfolio
BANKS	9.43%
ELECTRIC & ELECTRONIC COMPONENTS	9.41%
IT & INTERNET	9.01%
PHARMACOLOGY & PERSONAL CARE	8.89%
TEXTILE & GARMENTS	8.31%
ELECTRIC & ELECTRONIC MATERIALS	6.52%
TELECOMMUNICATIONS	6.04%
CHEMICAL PRODUCTS	5.17%
INSURANCE COMPANIES	4.78%
ENERGY SOURCES	4.77%
FINANCIAL SERVICES - HOLDINGS	4.31%
OIL & DERIVED	3.65%
ROAD VEHICLES	3.48%
TYRES & RUBBER	2.58%
MISCELLANEOUS CONSUMER GOODS	2.48%
MECHANICAL CONSTRUCTION	2.01%
OTHER SERVICES	1.94%
TOBACCO & SPIRITS	1.76%
PUBLISHING & BROADCASTING	1.46%
BUILDING MATERIALS	1.39%
AEROSPACE INDUSTRY & DEFENCE	1.15%
ROAD & RAILWAY TRANSPORTS	1.03%
REAL ESTATE	0.31%
FOOD & CLEANING MATERIALS	0.12%
<b>TOTAL</b>	<b>100.00%</b>

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

## 5.7.CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	101,809,862.04	101,340,762.93	203,150,624.97
Sales	157,723,225.35	383,665,789.33	541,389,014.68
<b>Total 1</b>	<b>259,533,087.39</b>	<b>485,006,552.26</b>	<b>744,539,639.65</b>
Subscriptions	50,467,293.15	71,814,578.34	122,281,871.49
Redemptions	113,630,478.25	368,001,308.66	481,631,786.91
<b>Total 2</b>	<b>164,097,771.40</b>	<b>439,815,887.00</b>	<b>603,913,658.40</b>
Reference average of the total net asset	928,496,059.52	781,047,265.24	854,165,708.43
<b>Rotation Percentage</b>	<b>10.28%</b>	<b>5.79%</b>	<b>16.46%</b>

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

## 5.8.VALUE OF COMMITMENTS RELATING TO POSITIONS IN FINANCIAL DERIVATIVES

---

### Commitments on forward exchanges

Couterparty	In EUR	Valuation of Forward Exchanges

On the date of publication of this report, the net asset value per share is published on the following websites: <https://www.funds.dpaminvestments.com/funds.html> and [www.beama.be](http://www.beama.be). This information is also available at the counters of the financial services department.

## 5.10. PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B share is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 31 December 2023:

### Class B

Annual return:

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used to compare performance.

### Table of historical benchmark performance (actuarial returns):

The sub-fund uses the following index as its benchmark: MSCI EMU Net Return.

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
MSCI EMU Net Return	18.78 % (in EUR)	8.30 % (in EUR)	9.54 % (in EUR)	6.36 % (in EUR)	18/04/1998	4.17 % (in EUR)

**Class A**

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class A	19.31 % (in EUR)	6.78 % (in EUR)	10.99 % (in EUR)	7.24 % (in EUR)		
					18/04/1998	6.03 % (in EUR)

**Class B**

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class B	19.38 % (in EUR)	6.83 % (in EUR)	11.03 % (in EUR)	7.26 % (in EUR)		
					18/04/1998	6.06 % (in EUR)

**Class E**

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class E	20.39 % (in EUR)	7.71 % (in EUR)				
					21/02/2020	6.31 % (in EUR)

**Class F**

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class F	20.39 % (in EUR)	7.71 % (in EUR)	11.94 % (in EUR)	8.14 % (in EUR)		
					08/12/2008	9.85 % (in EUR)

**Class F CHF H**

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class F CHF H	17.80 % (in EUR)	6.62 % (in EUR)				
					16/03/2020	16.68 % (in EUR)

**Class F USD H**

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class F USD H	22.81 % (in EUR)	9.86 % (in EUR)			16/03/2020	19.88 % (in EUR)

**Class M**

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class M	20.26 % (in EUR)	7.61 % (in EUR)	11.83 % (in EUR)		28/12/2017	7.29 % (in EUR)

**Class N**

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class N	20.27 % (in EUR)	7.62 % (in EUR)	11.85 % (in EUR)		28/12/2017	7.30 % (in EUR)

**Class P**

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class P	21.32 % (in EUR)	8.55 % (in EUR)	12.81 % (in EUR)	8.96 % (in EUR)	17/09/2013	9.45 % (in EUR)

**Class V**

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class V	20.39 % (in EUR)	7.71 % (in EUR)	11.92 % (in EUR)	8.08 % (in EUR)	14/08/2013	8.61 % (in EUR)

**Class W**

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
Class W	20.39 % (in EUR)	7.71 % (in EUR)	11.90 % (in EUR)	8.08 % (in EUR)	14/08/2013	8.62 % (in EUR)

## 5.11. CHARGES

### Recurring costs

#### - Class A - BE0058181786 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	1.83%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.14%

#### - Class B - BE0058182792 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	1.77%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.14%

#### - Class E - BE0948485199 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.92%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.14%

#### - Class F - BE0948484184 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.92%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.14%

#### - Class F CHF HEDGED - BE6315786192 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	1.04%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.14%

#### - Class F USD HEDGED - BE6315787208 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	1.04%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.14%

**- Class J - BE6299439651 :**

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.53%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.14%

**- Class L - BE0948984332 :**

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	2.64%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.14%

**- Class M - BE6299440667 :**

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	1.04%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.14%

**- Class N - BE6299441673 :**

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	1.02%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.14%

**- Class P - BE6254411455 :**

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.12%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.14%

**- Class V - BE6246056327 :**

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.92%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.14%

- Class W - BE6246057333 :

Management fees and other administrative and operating expenses	These are the costs of managing the sub-fund's portfolio, including the costs of the sub-fund's service provider and operations. This estimate is based on actual costs over the past year.	0.92%
Transaction costs	These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.	0.14%

### Fee sharing

As at 31 December 2023, 24.78% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

## 5.12. NOTES TO THE FINANCIAL STATEMENTS AND OTHER INFORMATION

### 5.12.1. Gross dividends paid in the financial year

2019	class A 1.67 EUR
	class V 2.99 EUR
	class M 2.92 EUR
2020	class A 1.33 EUR
	class E 1.45 EUR
	class V 1.58 EUR
	class M 1.34 EUR
2021	class A 2.62 EUR
	class E 2.91 EUR
	class V 2.93 EUR
	class M 2.66 EUR
2022	class A 4.16 EUR
	class E 4.31 EUR
	class V 4.33 EUR
	class M 4.26 EUR

### 5.12.2. Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

### 5.12.3. Investment restrictions and overruns

Between NAV Dates 10/10/2023 and 11/10/2023 a prospectus technical breach was open in the DPAM B Equities Euroland sub-fund. Indeed, due to a very large redemption (EUR 183 million or over 28% of the assets of the fund) the weight invested in that meet the environmental and social characteristics it promotes totaled 75.70% which was below the 80% minimum limit of the fund's TNA. The breach was caused by a 1-day delay between the sell transactions and the deposit of the redemption amount. The breach was resolved by the 1-day delay in cash outflow booking.

#### **5.12.4. Transparency in sustainability**

##### **Environmental or social characteristics**

In accordance with Article 50 of Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022, as amended, information related to environmental or social characteristics promoted by this sub-fund is reflected in the periodic disclosures as defined in Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) and attached to this report. This periodic information has not been audited by the auditor.

##### **Statement on the Taxonomy Regulation**

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on establishing a framework for the promotion of sustainable investments and amending Regulation (EU) 2019/2088 (the "Taxonomy Regulation") introduced the concept of "no serious impairment" under which investments in accordance with the Taxonomy Regulation must not seriously impair the objectives of the Taxonomy Regulation and must comply with specific European Union criteria. The "no serious impairment" principle applies only to the underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remainder of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

#### **5.12.5. Transparency of the securities financing transactions and of reuse**

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

## Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:**  
DPAM B EQUITIES EUROLAND

**Legal entity identifier:**  
549300EB0Y9CML3ZK066

### Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

#### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b>	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: ____%</b> <div style="margin-left: 40px;"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy </div> <div style="margin-left: 40px;"> <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy </div> <input type="checkbox"/> It made <b>sustainable investments with a social objective: ____%</b>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments <div style="margin-left: 40px;"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy </div> <div style="margin-left: 40px;"> <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy </div> <div style="margin-left: 40px;"> <input type="checkbox"/> with a social objective </div> <input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make sustainable investments</b>

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices.

Derivative products, if any, used for the purpose of achieving the investment objectives of the Sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

#### ● How did the sustainability indicators perform?

Over the Reference Period, the sub-fund achieved the following sustainability indicators:

a) The sub-fund has not been exposed to companies considered to be non-compliant with Global Standards;

b) The Sub-fund has not been exposed to companies involved in excluded controversial activities according to the definitions and thresholds stipulated by DPAM's Controversial Activities Policy (accessible via the link

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>);

c) The sub-fund has not been exposed to companies facing extremely serious ESG controversies around environmental or social issues.

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Reference period	2022	2023
E/S characteristics	97.39%	98.35%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Not applicable

*The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAI are intrinsically linked to DPAM's commitment to reduce the negative impact of the sub-fund's investments by avoiding activities or behaviours that may significantly undermine sustainable and inclusive growth.

This commitment is incorporated throughout the research and investment process from its inception.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD). Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not meet global standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity are thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account.

d) In addition, the filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises are de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>).

In this way, companies involved in controversial armaments are directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity is addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at

<https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et <https://www.dpaminvestments.com/documents/tcf-report-enBE>.

## What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the Reference Period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
ASML HOLDING	Manufacturing	6.04	Netherlands
SCHNEIDER ELECTRIC	Manufacturing	5.80	France
SAP AG	Information and communication	4.73	Germany
AIR LIQUIDE (PORT)	Manufacturing	4.51	France
BNP PARIBAS	Financial and insurance activities	4.49	France
LVMH	Manufacturing	4.20	France
BEIERSDORF	Manufacturing	3.94	Germany

Largest investments	Sector	% of assets	Country
TOTAL ENERGIES	Mining and quarrying	3.57	France
FERRARI NV	Manufacturing	3.41	Italy
ADIDAS NOM	Manufacturing	2.64	Germany
PIRELLI & C S.P.A.	Manufacturing	2.53	Italy
STELLANTIS	Manufacturing	2.43	Italy
ESSILOR	Manufacturing	2.36	France
EDP ENERGIAS DE PORTUGAL	Electricity, gas, steam and air conditioning supply	2.34	Portugal
IBERDROLA SA	Electricity, gas, steam and air conditioning supply	2.34	Spain

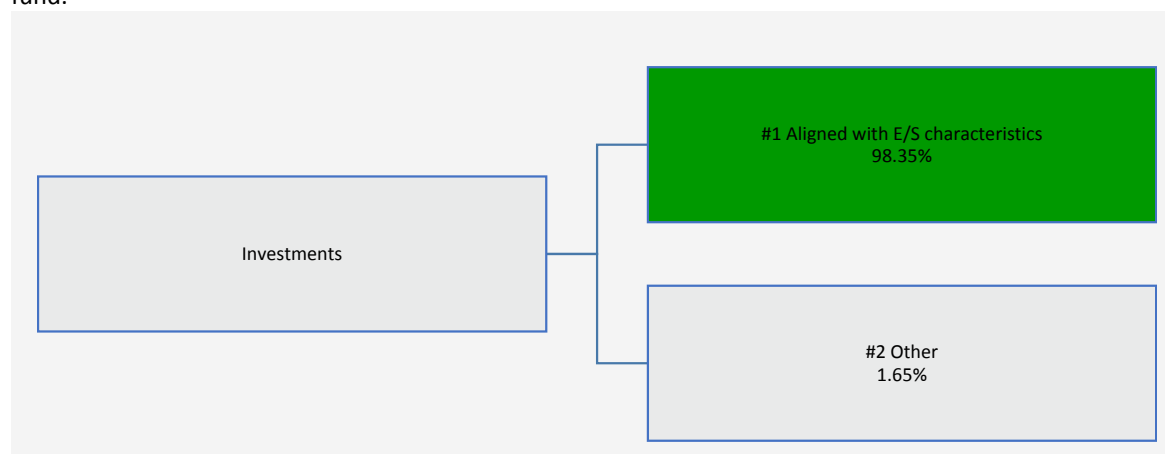

## What was the proportion of sustainability-related investments?

**Asset allocation**  
describes the share of investments in specific assets.

### ● What was the asset allocation?

Through the application of the investment strategy described above, the Sub-fund has invested 98.35% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S Characteristics").

Any failure to comply with the asset allocation stipulated in the prospectus at any time during the Reference Period will be mentioned in the specific section of the annual report dedicated to the Sub-fund.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

### ● In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Financial and insurance activities	Financial service activities, except insurance and pension funding	8.97
Manufacturing	Manufacture of chemicals and chemical products	8.44
Manufacturing	Manufacture of electrical equipment	6.80
Information and communication	Publishing activities	6.08

<b>Sector</b>	<b>Sub-sector</b>	<b>% assets</b>
Manufacturing	Manufacture of computer, electronic and optical products	6.04
Manufacturing	Manufacture of motor vehicles, trailers and semi-trailers	5.84
Manufacturing	Manufacture of machinery and equipment n.e.c.	5.61
Manufacturing	Manufacture of wearing apparel	5.50
Financial and insurance activities	Insurance, reinsurance and pension funding, except compulsory social security	4.69
Electricity, gas, steam and air conditioning supply	Electricity, gas, steam and air conditioning supply	4.68
Wholesale and retail trade; repair of motor vehicles and motorcycles	Wholesale trade, except of motor vehicles and motorcycles	4.08
Mining and quarrying	Extraction of crude petroleum and natural gas	3.57
Manufacturing	Manufacture of other transport equipment	3.17
Information and communication	Telecommunications	2.88
Manufacturing	Other manufacturing	2.83
Manufacturing	Manufacture of leather and related products	2.64
Manufacturing	Manufacture of rubber and plastic products	2.53
Financial and insurance activities	Activities auxiliary to financial services and insurance activities	2.33
Manufacturing	Manufacture of basic pharmaceutical products and pharmaceutical preparations	1.92
Manufacturing	Manufacture of beverages	1.72
Information and communication	Computer programming, consultancy and related activities	1.68
Manufacturing	Manufacture of wood and of products of wood and cork, straw and plaiting	1.36
Professional, scientific and technical activities	Advertising and market research	1.15
Accommodation and food service activities	Food and beverage service activities	1.03
Transportation and storage	Land transport and transport via pipelines	1.01
Professional, scientific and technical activities	Other professional, scientific and technical activities	0.59
Professional, scientific and technical activities	Architectural and engineering activities; technical testing and analysis	0.47
Real estate activities	Real estate activities	0.30
Other service activities	Other personal service activities	0.28
Manufacturing	Manufacture of food products	0.12
Derivatives	Derivatives	-0.34
Liquid assets	Liquid assets	1.99

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Not applicable

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or lowcarbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies.
- capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**
- ☐ Yes:
- ☐ In fossil gas ☐ In nuclear energy
- ☐ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **What was the share of investments made in transitional and enabling activities?**
- Not applicable

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable

- What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- What was the share of socially sustainable investments?**

Not applicable

- What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets
- Derivative instruments
- Collective investment schemes
- Issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets in order to achieve its investment objectives, to diversify its portfolio, to manage liquidity and to hedge its risks.

Over the Reference Period, for the purposes of achieving its investment objectives, portfolio diversification, liquidity management and/or risk hedging, the Sub-fund was exposed to 1.99% in liquid assets and -0.34% in derivatives. There are no minimum environmental or social guarantees on this allocation.

- What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e.:

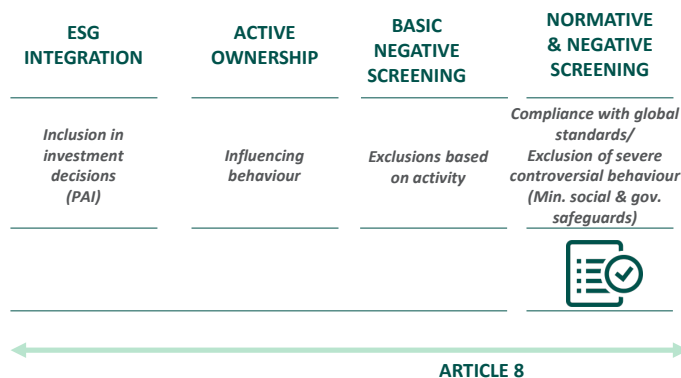

On a quarterly basis, a normative screening has been established based on compliance with Global Standards.

Secondly, companies meeting the thresholds as defined in the activities excluded by the responsible investment policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector.

The stages of the investment process are outlined below:

**How did this financial product perform compared with the reference benchmark?**

Not applicable

● **How does the reference benchmark differ from a broad market index?**

Not applicable

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

● **How did this financial product perform compared with the reference benchmark?**

Not applicable

● **How did this financial product perform compared with the broad market index?**

Not applicable

**Reference benchmarks**  
are indexes to measure  
whether the financial  
product attains the  
environmental or social  
characteristics that they  
promote.

## **6. INFORMATION ABOUT THE SUBFUND DPAM B REAL ESTATE EUROPE SUSTAINABLE**

### **6.1. MANAGEMENT REPORT**

---

#### **6.1.1. Launch date of the sub-fund and subscription price of the shares**

Date of initial subscription: 27/12/1999.

Initial subscription price: EUR 100.

#### **6.1.2. Stock exchange listing**

The sub-fund's shares are not listed on the stock market.

#### **6.1.3. Aim and main outlines of the investment policy**

##### **Objective**

The objective of this sub-fund is to offer shareholders the highest possible long-term return through a balanced management policy, by investing its assets in securities representative of the real estate sector, in its broad sense, in Europe. These securities include but are not limited to shares of REITs, real estate certificates, shares of real estate companies and companies active in real estate promotion and development, shares in real estate debt investment funds etc. These companies are selected on the basis of compliance with environmental, social and governance (ESG) criteria.

More precisely, the sub-fund invests at least two-thirds of its assets in securities representative of the real estate sector issued by companies having their registered office or carrying out their primary economic activity in Europe.

The sub-fund uses a rigorous ESG methodology and strict exclusions in order not to undermine other environmental and social objectives and to ensure the required good governance practices.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts or deposits, as well as units in undertakings for collective investment. The sub-fund invests a maximum of 10% of its assets in open-ended undertakings for collective investment.

No formal guarantee has been given either to the sub-fund or to its investors.

##### **Investment policy**

The sub-fund may invest in units of another UCITS or another fund managed directly or indirectly by DPAM or by a company with which DPAM is linked by common management or control or by a direct or indirect holding of more than 10% of the capital or votes. No issue or redemption fees for target funds or management fees may be debited from the SICAV's assets where such investments have been made.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR Regulation 2019/2088.

#### **6.1.4. Index and benchmark**

The sub-fund uses the following index as a benchmark: GPR Europe UK 25% Capped Net Return.

This index is representative of real estate companies listed in developed Europe. The GPR Europe UK 25% Capped Net Return is a tailor-made index for DPAM calculated by Global Property Research. In this index, the weight of the United Kingdom is capped at 25%.

Performance is calculated by reinvesting net dividends (Net Return).

Global Property Research is listed in the register held by ESMA (European Securities and Markets Authority).

The benchmark is used to compare the performance.

The selection and weighting of assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark.

The benchmark is not aligned with the promotion of the environmental and social characteristics of the sub-fund. Please refer to the investment strategy above for an explanation of how the sub-fund promotes environmental and social characteristics.

The possible composition and the value of the benchmark can be found on the website <https://www.funds.dpaminvestments.com/funds.html>.

#### **6.1.5. Policy followed during the year**

The year 2023 was characterized by a high volatility in interest rates expectations where macroeconomic elements played a massive important role influencing the fund's strategy. The year started positively with financial markets expecting a rapid decline in interest rates and falling inflation. After two months the narrative completely changed to higher for longer interest rates and further hiking by central banks. At the end of the year inflation data coming in softer than anticipated spurred the markets in a general view of central bank pivot to lower interest rates going forward.

Meanwhile on the real estate market, property values continued their decline, only been partly cushioned by increasing rent levels. Property companies therefore kept their strategy of deleveraging, through asset disposals, dividend cuts or equity injections. None of these actions are popular, albeit necessary. The lowly yielding and/or the highly levered companies were and are the most vulnerable and volatile companies in this landscape. Typically, they were the most affected when markets were in a risk-off mode during periods of increasing rates. But the year-end saw a rally in these companies bringing the total return of the European listed real estate sector close to +17%

In this macroeconomic context, the fund continued stayed disciplined in keeping overweight positions in lower levered companies. On a sector basis, it increased its exposure to the residential sector especially in the second half on valuation grounds but also to the retail subsector over the year, predominantly by increasing the weight in URW. The fund also increased its exposure to student accommodation. On the other hand, the fund reduced its exposure to logistics, following a takeover bid on a significant position in Interinvest and also slightly reduced exposure to offices.

#### **6.1.6. Future policy**

For 2024, we expect a continuation of a volatile environment. More visibility on interest rates should allow the investment market to increase volumes of transaction, setting clearance prices that will allow valuers to better assess the true value of assets. The fund will remain defensive as it is positioned most of the time.

Our strategy going forward will depend on the prospects for the companies in this volatile environment. We will continue to maintain a balanced portfolio. On the hand, we opt for companies that have strong balance sheets, strong prospects, and good visibility. These companies come at a price, but we appreciate their stability. On the other hand, we also opt for companies that are challenged but for which we believe that the management should be able to regain better earnings and visibility going forward. These companies trade at a sizeable discount, and therefore offer upside to the share price. One subsector to which we could increase our exposure again is logistics. We remain prudent on offices and constructive on retail.

The investment themes for 2024 are:

- Companies with strong balance sheets that hold quality assets, at the expense of companies with too much leverage;
- Companies evolving in a subsector where there is a supply shortage and thus higher rents rather than in a subsector where there is oversupply and thus lower rent growth;
- Companies with a strong ESG profile;
- Focus on total return, i.e., a combination of sustainable dividends and capital appreciation stemming from rental growth;
- Focus on long leases and quality tenants that enjoy competitive advantages in order to strengthen the cash flows;
- In a highly volatile environment, benefit from excessive market moves (rebuild positions in excessively penalized strong companies and vice versa)
- Companies clearly undervalued compared to industry peers.

#### **6.1.7. Synthetic risk indicator**

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 5.

## 6.5.GEOGRAPHIC ALLOCATION OF INVESTMENTS

By country	% Portfolio
UNITED KINGDOM	23.81%
FRANCE	20.20%
GERMANY (FEDERAL REPUBLIC)	15.66%
BELGIUM	13.74%
SWEDEN	9.03%
SWITZERLAND	7.70%
NETHERLANDS	2.90%
SPAIN	2.85%
GUERNSEY	1.89%
LUXEMBOURG (GRAND DUCHY)	1.29%
AUSTRIA	0.49%
JERSEY	0.44%
<b>Total</b>	<b>100.00%</b>

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

## 6.6.ECONOMIC ALLOCATION OF INVESTMENTS

---

By sector	% Portfolio
REAL ESTATE	94.36%
FINANCIAL SERVICES - HOLDINGS	3.21%
OTHER SERVICES	2.43%
<b>TOTAL</b>	<b>100.00%</b>

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

## 6.7.CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	36,096,086.05	50,850,481.44	86,946,567.49
Sales	36,705,773.41	30,122,020.72	66,827,794.13
<b>Total 1</b>	<b>72,801,859.46</b>	<b>80,972,502.16</b>	<b>153,774,361.62</b>
Subscriptions	20,733,186.17	43,979,950.46	64,713,136.63
Redemptions	31,664,775.64	21,183,062.91	52,847,838.55
<b>Total 2</b>	<b>52,397,961.81</b>	<b>65,163,013.37</b>	<b>117,560,975.18</b>
Reference average of the total net asset	360,536,371.49	374,728,998.63	367,691,010.92
<b>Rotation Percentage</b>	<b>5.66%</b>	<b>4.22%</b>	<b>9.85%</b>

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

On the date of publication of this report, the net asset value per share is published on the following websites: <https://www.funds.dpaminvestments.com/funds.html> and [www.beama.be](http://www.beama.be). This information is also available at the counters of the financial services department.

## 6.9.PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 31 December 2023:

### Class B

Annual return:

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used to compare performance.

### Table of historical benchmark performance (actuarial returns):

The sub-fund uses the following index as its benchmark: GPR Europe UK 25% Capped.

**DPAM B**  
**REAL ESTATE EUROPE SUSTAINABLE**

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year		
					Year	Value
GPR Europe UK 25% Capped	17.96 % (in EUR)	-3.86 % (in EUR)	-0.24 % (in EUR)	3.78 % (in EUR)	27/12/1999	5.68 % (in EUR)

**Class A**

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since

#### Fee sharing

As at 31 December 2023, 46.71% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

## 6.11. NOTES TO THE FINANCIAL STATEMENTS AND OTHER INFORMATION

### 6.11.1. Gross dividends paid in the financial year

2019	class A 5.00 EUR class E 9.18 EUR class V 8.55 EUR class M 8.03 EUR
2020	class E 2.20 EUR (Interim dividends)
2021	class A 7.02 EUR class E 8.11 EUR class V 7.63 EUR class M 7.09 EUR
2022	class A 2.93 EUR class E 6.09 EUR class V 5.76 EUR class M 5.38 EUR

### 6.11.2. Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

### 6.11.3. Transparency in sustainability

#### Environmental or social characteristics

In accordance with Article 50 of Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022, as amended, information related to environmental or social characteristics promoted by this sub-fund is reflected in the periodic disclosures as defined in Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) and attached to this report. This periodic information has not been audited by the auditor.

**Statement on the Taxonomy Regulation**

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on establishing a framework for the promotion of sustainable investments and amending Regulation (EU) 2019/2088 (the "Taxonomy Regulation") introduced the concept of "no serious impairment" under which investments in accordance with the Taxonomy Regulation must not seriously impair the objectives of the Taxonomy Regulation and must comply with specific European Union criteria. The "no serious impairment" principle applies only to the underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remainder of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

**6.11.4. Transparency of the securities financing transactions and of reuse**

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

## Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:**  
DPAM B REAL ESTATE EUROPE SUSTAINABLE

**Legal entity identifier:**  
549300W7GDEIEIZPVP86

### Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

#### Did this financial product have a sustainable investment objective?

<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/> Yes		<input checked="" type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> No	
<input type="checkbox"/>	It made <b>sustainable investments with an environmental objective: ____%</b>	<input checked="" type="checkbox"/>	It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <b>97.61%</b> of sustainable investments
	<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU	<input checked="" type="checkbox"/>	with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
	<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/>	with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/>	It made <b>sustainable investments with a social objective: ____%</b>	<input checked="" type="checkbox"/>	with a social objective
		<input type="checkbox"/>	It promoted E/S characteristics, but <b>did not make sustainable investments</b>

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
- promoting environmental, social and governance (ESG) best practices and best efforts.

The Sub-fund has not designated any benchmark to achieve the environmental and social characteristics it promotes within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability reporting in the financial services sector (the "SFDR 2019/2088").

Derivative financial products, if any, used for the purpose of achieving the investment objectives of the Sub-fund have not been used for the purpose of promoting environmental and/or social characteristics.

#### ● How did the sustainability indicators perform?

During the Reference Period, the Sub-fund achieved the following sustainability indicators:

- The Sub-fund has not been exposed to companies considered to be non-compliant with Global Standards;
- The Sub-fund has not been exposed to companies involved in controversial activities according to the definitions and thresholds stipulated by DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>);
- The Sub-fund has no exposure to companies facing ESG controversies of maximum severity;

d. The Sub-fund has no exposure to issuers whose ESG score resulting from the manager's proprietary "scorecard ESG" rating model is below two out of five;

e. As at 31 December 2022, the proportion of issuers with Science Based Targets initiative (SBTi) or equivalent in the Sub-fund's portfolio was 58.99% (by weight of portfolio assets). The target is to reach at least 50% by 2026.

● **...and compared to previous periods?**

None of the sustainability indicators has been subject to a guarantee provided by an auditor or a review by a third party.

Period	2022	2023
E/S characteristics	98.27%	98.46%
Sustainable Investment	94.35%	97.61%
Other Environmental Investments	2.91%	7.46%
Social	41.38%	27.43%

Reference period	2022	2023
Sustainability indicator a.	No exposure	No exposure
Sustainability indicator b.	No exposure	No exposure
Sustainability indicator c.	No exposure	No exposure
Sustainability indicator d.	No exposure	No exposure
Sustainability indicator e.	Sub-fund: 55.29	Sub-fund: 58.99

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

For the Reference Period, the Sub-fund aimed to have at least 50% sustainable investments i.e. investments aimed at:

- companies aligned with one of the first two objectives of the EU taxonomy (climate change mitigation and adaptation);
- companies aiming to make a net positive contribution to the United Nations (UN) Sustainable Development Goals ("SDGs"), which are environmental in nature;
- companies aiming to make a net positive contribution to the social SDGs;
- at the level of the overall portfolio, a minimum of 20% of companies making a net positive contribution to all SDGs.

For the Reference Period, the Sub-fund had 97.61% sustainable investments. These sustainable investments have contributed to the Sub-fund's partial sustainable investment objective in the following ways:

- 15.2% of the Sub-fund's portfolio contributed to the achievement of the environmental objectives defined by the EU Taxonomy (climate change mitigation and adaptation)
- 7.46% of the Sub-fund's portfolio contributed to the achievement of environmental objectives not aligned with the EU Taxonomy;
- 27.43% of the Sub-fund's portfolio contributed to the achievement of social objectives.
- 97.61% of the Sub-fund's portfolio was invested in companies making a net positive contribution to the SDGs (including impact bonds).

\* The net positive contribution is the difference between the positive and negative impact contributions and is calculated at the level of the invested company and the overall portfolio. Based on the SDGs framework, the net positive contribution takes into account on the one hand (1) the extent to which the invested company's products and services contribute to the achievement of the SDGs and on the other hand (2) the adverse impacts of their activities along the value chain.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

DPAM ensures that the Sub-fund's sustainable investments during the Reference Period do not materially undermine an environmentally or socially sustainable investment objective by:

Issuer level:

- Consideration of the principal adverse impacts on the mandatory sustainability factors (hereinafter "PAIs") listed in Table 1 of Annex 1 of the Delegated Regulation (EU) 2022/1288 which allows for the reduction of the adverse impacts of the investment, including:
  - o by incorporating several elements to avoid and/or reduce its exposure to activities or behaviours that could affect another environmental or social objective (such as the Global Standards compliance filter and the exclusion of ESG controversies of maximum severity or activities most harmful to other environmental and/or social objectives);
  - o via an engagement process with investee companies, in accordance with its Engagement Policy, which can be accessed at <https://www.dpaminvestments.com/documents/engagement-policy-enBE>. The commitments made by DPAM are also the subject of an annual report available at [https://res.cloudinary.com/degroof-petercam-asset-management/image/upload/v1614006835/DPAM-report\\_engagement\\_activity.pdf](https://res.cloudinary.com/degroof-petercam-asset-management/image/upload/v1614006835/DPAM-report_engagement_activity.pdf).
- An impact calculation methodology which takes into account the positive and negative contribution of the company's products and services to the SDGs in order to optimise the net positive (resulting) contribution.

Overall portfolio level:

- A rule of minimum 20% of assets aligned with the EU Taxonomy or in net positive contribution on all 17 SDGs. During the Reference Period, a minimum 97.61% of assets aligned with the EU Taxonomy or making a net positive contribution to all 17 SDGs.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated into the entire research and investment process.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with global standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account.

d) The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

e) Similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their scorecard.

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with DPAM's Controversial Activities Policy) (available at <https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity is addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

e) Similarly, social indicators have been included in the analysis of the ESG profile of companies and impact their scorecard.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at

<https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et <https://www.dpaminvestments.com/documents/tcfd-report-enBE>.

● *Were the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The first stage of the Sub-fund's investment is based on a normative screening, which includes compliance with Global Standards based on human rights, labour rights and the prevention of corruption. These include the OECD Guidelines for Multinational Enterprises and the UN Guidelines on Business and Human Rights. Companies that do not meet these criteria are excluded from the eligible investment universe. The Sub-fund has therefore not been invested during the Reference Period in any company that is deemed not to comply with these principles.

*The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

*The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

During the Reference Period, the Sub-fund considered all the principal adverse impacts on sustainability factors (hereinafter "PAIs") listed in Table 1 of Appendix I of the Delegated Regulation (EU) 2022/1288.

The PAIs are intrinsically linked to DPAM's commitment to reduce the negative impact of the Sub-fund's investments by avoiding activities or behaviours that may significantly hinder sustainable and inclusive growth. This commitment is incorporated throughout the research and investment process from its inception.

In concrete terms, the PAIs have been integrated into the various stages of the Sub-fund's construction upstream via exclusions and the resulting eligible universe (i), and throughout the investment process via fundamental analysis, monitoring of controversies and ongoing dialogue with the companies invested in (ii):

1) Firstly, with regard to environmental PAI:

a) they have been analysed and monitored at the level of the invested issuers, particularly with respect to PAI related to greenhouse gas emissions and energy performance, including through DPAM's searches under the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

Thus, indicators related to greenhouse gas emissions and water have been integrated into the analysis of the five companies that contribute most to the carbon intensity of the portfolio. This analysis is used by research and management to validate their investment decisions.

b) after that, the Global Standards compliance filter includes a filter on environmental protection. Companies that do not comply with global standards for significant environmental protection breaches related to pollution (emissions), water, waste and biodiversity were thus excluded from the portfolio in advance.

c) the exclusion filter for companies involved in controversial activities (in accordance with DPAM's Controversial Activities Policy (accessible via the link

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). The exclusion of companies involved in thermal coal production, for example, provides a better guarantee that indicators such as biodiversity and greenhouse gas emissions are taken into account. The filtering and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to environmental issues such as the environmental impact of the company's operations (emissions, waste, energy use, biodiversity, and water consumption), the environmental impact of the supply chain, and the impact of products and services (carbon and environmental impact).

d) Similarly, environmental indicators have been included in the analysis of the ESG profile of companies and impact their scorecard.

2) Second, the social PAI were systematically analysed according to the stages of the research and investment process:

a) the Global Standards compliance filter is structured around human rights, labour rights and the prevention of corruption. Thus, companies in breach of the Global Compact principles and the OECD Guidelines for Multinational Enterprises have been de facto excluded from the investment universe.

b) the exclusion filter for companies involved in controversial activities (definitions and thresholds in accordance with DPAM's Controversial Activities Policy) (available at

<https://www.dpaminvestments.com/documents/controversial-activity-policy-enBE>). In this way, companies involved in controversial armaments were directly excluded from the investment universe.

c) In addition, the screening and analysis based on the main ESG controversies in which companies may be involved also includes controversies related to social issues, i.e. society and community, customer and employee, and controversies related to governance issues such as business ethics, including corruption and bribery.

d) The issue of board gender diversity is addressed primarily through shareholder responsibility, by voting against or engaging in dialogue with companies that do not meet a minimum of 30% gender diversity on their boards. The results of the dialogues and votes over the Reference Period are available in the voting report and the engagement report at <https://www.funds.dpaminvestments.com/funds.html>.

e) Similarly, social indicators are included in the analysis of the ESG profile of companies and impact their scorecard.

DPAM's approach and processes are further described in its Sustainable and Responsible Investments Policy and in the TCFD report, which are available at

<https://www.dpaminvestments.com/documents/sustainable-and-responsible-investments-policies-enBE> et <https://www.dpaminvestments.com/documents/tcfd-report-enBE>.

## What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the Reference Period which is: 31/12/2023

Largest investments	Sector	% of assets	Country
VONOVIA	Real estate activities	8.90	Germany
UNIBAIL-RODAMCO	Real estate activities	6.66	France
SEGRO (REIT)	Real estate activities	4.41	United Kingdom
LEG IMMOBILIEN	Real estate activities	4.08	Germany
PSP SWISS PROPERTY (NOM)	Real estate activities	3.91	Switzerland
CASTELLUM	Real estate activities	3.79	Sweden
SWISS PRIME SITE	Real estate activities	3.67	Switzerland
GECINA	Real estate activities	3.41	France
LAND SECURITIES GROUP PLC	Real estate activities	3.32	United Kingdom
WAREHOUSES DE PAUW	Real estate activities	3.19	Belgium
KLEPIERRE	Real estate activities	3.12	France
AEDIFICA	Real estate activities	2.64	Belgium
TAG TEGERNSEE IMMOBILIER	Real estate activities	2.43	Germany
MERLIN PROPERTIES SOCIMI SA	Real estate activities	2.39	Spain
BRITISH LAND	Real estate activities	2.35	United Kingdom

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### What was the asset allocation?

During the Reference Period, by applying the investment strategy, the Sub-fund invested a minimum of 98.46% of its assets in securities that meet the environmental and social characteristics it promotes (in the table referred to as "#1 Aligned with E/S characteristics").

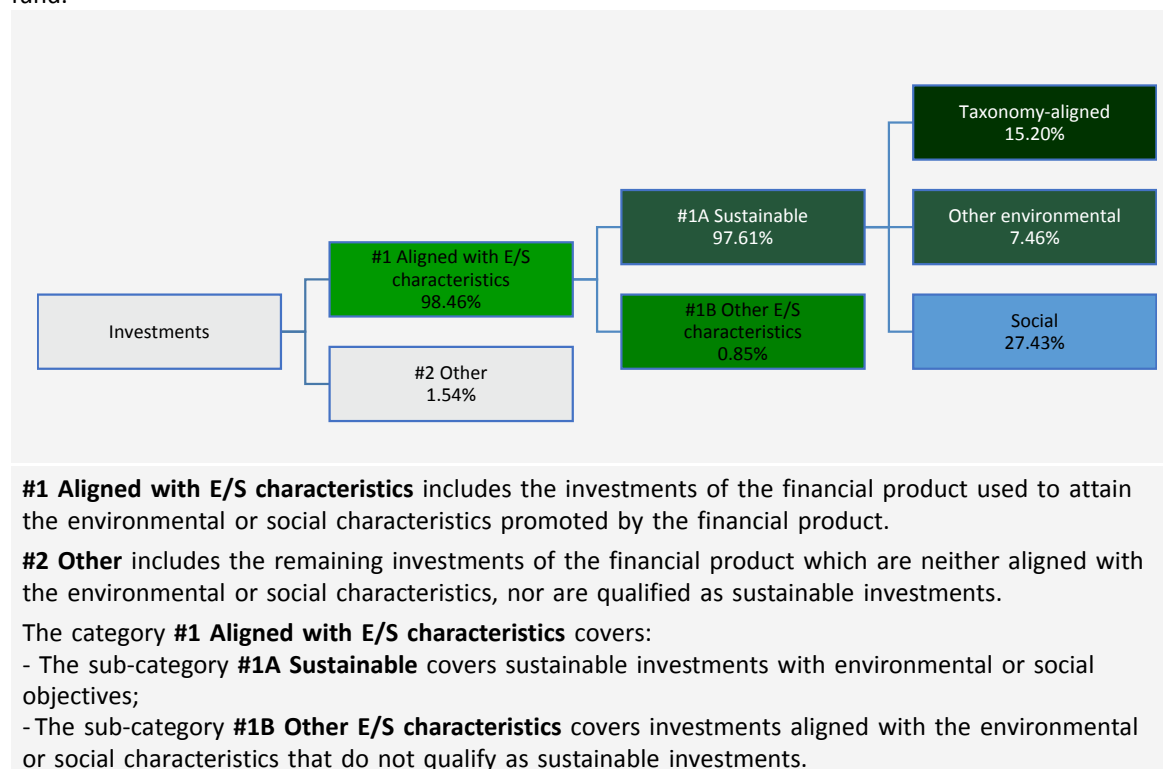

The Sub-fund invested at least 97.61% of its assets in sustainable investments with environmental or social objectives (in the table referred to as "#1A Sustainable").

The percentage of the portfolio invested in sustainable investments that meet an environmental and/or social objective (#1A Sustainable) is calculated using the cascade methodology described in the prospectus (section "What are the sustainable investment objectives that the financial product intends to partially achieve and how does the sustainable investment contribute to these objectives?"), which excludes double counting at the cascade level: an investment qualifying as sustainable at the level of a first element of the cascade is not then taken into account at the level of subsequent elements of the cascade.

In contrast, the percentages of the two sub-categories of sustainable investments (#1A Sustainable) in the portfolio invested in environmental investments other than those aligned with the taxonomy and social investments as indicated in the prospectus from 1 January 2023 to 14 May 2023 may involve some double counting. All portfolio companies were analysed against both (i) the environmental SDGs (and therefore may fall into the sub-category "other environmental investments" even if they were also considered to be aligned with the taxonomy and/or as a social sustainable investment) and (ii) the social SDGs (and therefore may fall into the sub-category "social investments" even if they were also considered to be aligned with the taxonomy and/or as an other environmental investment).

Following clarification from the ESAs on 17 November 2022 on the application of Regulation (EU) 2019/2088 that double counting should be avoided where an activity may contribute to more than one environmental and social objective, the methodology for calculating the minimum commitment for the social sustainable investment objective has been revised and the minimum commitment for this objective was revised downwards in the prospectus dated 15 May 2023. The figures reported below exclude double counting for the Reference Period. In the event that the minimum commitment to the social sustainable investment objective mentioned in the prospectus in force from 1 January to 14 May 2023 is not achieved, this will be disclosed in the specific section of the annual report dedicated to the Sub-fund under "Notes to the Financial Statements and Other Information/ Investment Restrictions and Breaches".

Any failure to comply with the asset allocation stipulated in the prospectus at any time during the Reference Period will be mentioned in the specific section of the annual report dedicated to the Sub-fund.

#### ● In which economic sectors were the investments made?

Sector	Sub-sector	% assets
Real estate activities	Real estate activities	98.46
Liquid assets	Liquid assets	1.54

#### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Sustainable investments that are aligned with the EU Taxonomy (referred to in the table as "EU Taxonomy aligned") consist of investments in companies whose economic activities substantially contribute to the environmental objectives of climate change mitigation and/or adaptation as defined by the EU Taxonomy in accordance with the eligibility and technical selection criteria ("EU Taxonomy Technical Selection Criteria").

DPAM's methodology for assessing the EU Taxonomy alignment of investee companies is based on data provided either by the investee companies or by third party providers. The latter use a mixed approach:

- Firstly, a direct mapping between the business activities in their own sectoral classification system and the economic activities covered by the Technical Selection Criteria of the EU Taxonomy.
- Secondly, any business activity that could not be directly mapped is examined through a bottom-up assessment of its alignment with the EU Taxonomy's Technical Selection Criteria.
- Any economic activity remaining after the first and second steps is considered not to be aligned with the EU Taxonomy.

In principle, the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy is assessed by means of turnover (based on performance data provided by third-party suppliers).

Where information on the extent to which investments are investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy cannot be readily obtained from information published by the invested issuers, DPAM shall rely on equivalent information obtained by third-party providers from the invested issuers.

Applying this methodology, over the Reference Period, the Sub-fund is aligned for 15.20% with the first two objectives of the Taxonomy (environmental objectives of climate change mitigation and/or adaptation).

The compliance of these investments with the requirements set out in Article 3 of the EU Taxonomy is not subject to a guarantee provided by one or more auditors or a review by one or more auditors or a review by one or more third parties.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or lowcarbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● What was the share of investments made in transitional and enabling activities?

Not applicable

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Reference period	EU Taxonomy-aligned investments
1 January 2022 - 31 December 2022	15.26%
1 January 2023 - 31 December 2023	15.20%

### **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

This Sub-fund does not seek to make sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. As at 31/12/2023, however, 7.46% is indicated in the section "What was the asset allocation".

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### **What was the share of socially sustainable investments?**

Based on the approach described below, the Sub-fund invested 27.43% of its portfolio in sustainable investments with a social objective over the Reference Period. A European Taxonomy for social sustainability goals has yet to be developed. In the meantime, DPAM wishes to continue to make sustainable investments that contribute to the achievement of key social goals such as zero hunger, quality education and peace, justice and strong institutions.

To this end, DPAM has adopted and defined a specific framework for identifying the social objectives of these sustainable investments and assessing their contribution to these objectives. This framework uses data from investee companies and third-party suppliers and assesses the negative and positive contribution of (potential) investee companies, as a percentage of their turnover, to the UN Sustainable Development Goals (SDGs) that can be attributed to social objectives.

DPAM will review and reassess this framework when the EU Taxonomy Technical Selection Criteria have been implemented for the social objectives under the EU Taxonomy.

### **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

Binding ESG screenings carried out in accordance with the investment strategy described above are applied to the whole Sub-fund, excluding:

- Liquid assets
- Derivative instruments
- Collective investment schemes
- Issuers that do not report sufficient information or are insufficiently covered by ESG research to judge their environmental and/or social characteristics.

The Sub-fund may invest or hold these types of assets for the purpose of achieving investment objectives, portfolio diversification, liquidity management and risk hedging.

Over the Reference Period, for liquidity management purposes, the Sub-fund was exposed to 1.54% in liquid assets. There are no minimum environmental or social guarantees on this allocation.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Over the Reference Period, the Sub-fund followed the actions and investment steps as described in its methodology, i.e.:

On a quarterly basis, a normative screening has been established based on compliance with Global Standards.

Subsequently, companies meeting the thresholds as defined in the activities excluded by DPAM's controversial activities policy were excluded.

On a quarterly basis, the controversy exposure of the companies in the investment universe was analysed to screen out the most severe controversies on environmental, social and governance issues.

DPAM supplemented the various ESG exclusion filters using ESG risk and opportunities scorecards for each issuer in the portfolio. The scorecards were updated on an annual basis or ad hoc if an event should require a revision of the issuer's scorecard.

From this defined eligible universe, the research and management teams have applied their expertise to select the securities in the portfolio on the basis of an in-depth fundamental analysis, which also includes a thorough analysis of the various environmental, social and governance criteria relevant to the business sector. In addition, this qualitative analysis also includes consideration of the sustainability theme and the issuer's total contribution to the UN Sustainable Development Goals.

The stages of the investment process are outlined below:

## How did this financial product perform compared with the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**  
Not applicable
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**  
Not applicable
- **How did this financial product perform compared with the reference benchmark?**  
Not applicable
- **How did this financial product perform compared with the broad market index?**

## **7. INFORMATION ABOUT THE SUBFUND DPAM B EQUITIES WORLD SUSTAINABLE**

### **7.1. MANAGEMENT REPORT**

---

#### **7.1.1. Launch date of the sub-fund and subscription price of the shares**

Date of initial subscription: 14/12/2001.

Initial subscription price: EUR 24.79.

F.N.I.C. initial value as at 25/02/1993. On 16/12/2001, the sub-fund received in contribution all the active and passive situation of the investment company F.N.I.C, in a report/ratio of one share F.N.I.C against three shares of DPAM INVEST B EQUITIES WORLD SUSTAINABLE in each class of shares.

The sub-fund has received the entire assets of the DPAM INVEST B Equities World Dividend sub-fund through a merger by absorption that took effect on 26 February 2021.

#### **7.1.2. Stock exchange listing**

The sub-fund's shares are not listed on the stock market.

#### **7.1.3. Aim and main outlines of the investment policy**

##### **Objective**

The objective of this sub-fund is to offer investors exposure to equities and/or equity-equivalent securities, issued by companies without any geographical restrictions, and to all securities giving entitlement to the capital of these companies, selected on the basis of a strict methodology in terms of compliance with environmental, social and governance (ESG) criteria.

The sub-fund uses a rigorous ESG methodology and strict exclusions in order not to undermine other environmental and social objectives and to ensure the required good governance practices.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

No formal guarantee has been given either to the sub-fund or to its investors.

##### **Investment policy**

The sub-fund invests mainly in equities and/or equity-equivalent securities issued by companies, without any geographical restrictions, and in all securities giving entitlement to the capital of these companies.

Stock-picking is based on economic and financial analyses and on a rigorous methodology of exclusions, integration of ESG factors, active shareholding and engagement with companies.

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts, deposits or securities and in the form of undertakings for collective investment. The sub-fund invests a maximum of 10% of its assets in open-ended undertakings for collective investment.

The sub-fund may invest in units of another UCITS or another fund managed directly or indirectly by DPAM or by a company with which DPAM is linked by common management or control or by a direct or indirect holding of more than 10% of the capital or votes. No issue or redemption fees for target funds or management fees may be debited from the SICAV's assets where such investments have been made.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

#### **7.1.4. Index and benchmark**

The sub-fund uses the following index as a benchmark: MSCI AC World Net Return.

This index is representative of the large and mid-cap equity markets of 23 developed countries and 26 emerging countries (as defined by MSCI and mainly according to the country of incorporation and the country of primary listing of its securities) around the world.

The performance of this index is calculated by reinvesting net dividends (Net Return).

MSCI Limited is registered with the European Securities and Markets Authority (ESMA).

The benchmark is used to compare performances.

The selection and weighting of assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark.

The benchmark is not aligned with the sub-fund's sustainable investment objective. Please refer to the investment strategy above for an explanation of how the sub-fund's sustainable investment objective is achieved.

The possible composition and the value of the benchmark can be found on the website <https://www.funds.dpaminvestments.com/funds.html>.

#### **7.1.5. Policy followed during the year**

At the end of December 2023, the net asset value of DPAM B Equities World Sustainable (F share) amounted to 362.46 EUR. This represents a 22.02% increase since the beginning of the year.

When we exited 2022, we were of the conviction the 2022 valuation reset had run its course. We saw our portfolio as somewhat fairly valued in the light of where interest rates were and considering some more increases to come. From that level, we were of the opinion earnings growth would be the driver of stock price performance looking forward.

However, the first few weeks of the year were marked by lower interest rates pushing higher the higher growth stocks. For some companies, valuation had run ahead of fundamentals. We sold ServiceNow, Align Technologies and reduced the likes of Intuit, Ansys, Autodesk. On the other hand, defensive stocks, which were quite expensive over H2 2022, came back to relatively attractive valuations. We took the opportunity to buy a stake in Procter & Gamble.

Over the first half of 2023, we also decreased our exposure to more cyclical businesses like Transunion or Infineon and reduced industrials like Trane Technologies and Kingspan while increasing the more defensive companies, as the macro-economic and geopolitical context remained blur and tense.

From a sector standpoint, two technological advancements have dominated the spotlight. Generative AI made a grand entrance late last year with the debut of ChatGPT, swiftly becoming integral to many of our professional lives. Later, GLP-1 drugs, initially developed for diabetes management, delivered impressive clinical trial results, demonstrating significant weight loss and improvements in comorbidities like heart disease and sleep apnea. These innovations are not just milestones for humanity; they have also generated hundreds of billions in market value for investors. Among the big winners: Nvidia, AMD (which we owned opportunistically in 2023 from March to Augustus), Microsoft, Alphabet, Novo Nordisk and more broadly the majority of our software and semiconductors companies.

Over the summer, some signs of peak interest rates were emerging. We took a position in some very high quality, higher growth companies like Idexx Laboratories, MSCI and Synopsys. In October, conviction in that changing

environment grew, leading to some opportunities. We bought ServiceNow, and increased the likes of Microsoft, Adobe, Salesforce, ASM International, S&P Global, L'Oréal and Intuitive Surgical as valuations were screening attractive in such context.

The exposure to the biopharma development and production value chain remains a significant component of the fund. These companies have greatly benefited from Covid vaccine production and low-interest funding for biotech firms. However, that cycle has ended. With a sharp decline in Covid vaccine production, a dip in biotech funding and a difficult Chinese market, the industry is undergoing a recalibration. Despite underperforming this year, we are beginning to see stabilization in orders, but visibility remains low. We are confident in these companies' strong barriers to entry, recurring revenue streams, and the need for innovation in the pharmaceutical industry, which should lead to renewed growth. However, we reduced tactically our exposure waiting for some more visibility. We also sold Agilent, due to its significant exposure to China.

Up until the end of October, the performance was mainly driven by earnings growth. As expected, valuation has been less of a factor over that period. However, since November, it became very tangible interest rates were peaking as inflation slowed down and central banks became more dovish. Thus, valuations expanded. In the last couple of months, both higher earnings growth and valuation expansion contributed to the performance, with higher growth stocks faring better.

All over the year, we aim at improving our portfolio by buying very high-quality companies at reasonable valuations with strong ESG credentials. As such, we also took a position in Epiroc, Idex Corp, Moody's, Atlas Copco, SAP, Linde, Automatic Data Processing and Booking on top of the above-mentioned names. We sold CME Group, UMG, Autodesk, Ansys, Kerry, Teleperformance and Paypal.

#### **7.1.6. Future policy**

DPAM B Equities World Sustainable will continue its strategy of investing in high quality large cap companies with strong ESG credentials. These businesses stand to benefit from a variety of long-term growth trends, including personalized and affordable healthcare, digital transformation, energy efficiency, electrical vehicles, responsible consumption, the rising middle class and financial inclusion. Our investment philosophy is grounded in the conviction that sustainable profitable growth drives stock prices over the long-term. Our high-quality approach is differentiated because of a rigorous ESG process and portfolio diversification. This results in a resilient portfolio that aims to perform well in different economic environments.

#### **7.1.7. Synthetic risk indicator**

The synthetic risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 4.

## 7.5.GEOGRAPHIC ALLOCATION OF INVESTMENTS

By country	% Portfolio
UNITED STATES OF AMERICA	65.31%
IRELAND	7.28%
SWITZERLAND	7.02%
FRANCE	4.67%
NETHERLANDS	4.13%
SWEDEN	3.54%
TAIWAN	2.11%
DENMARK	2.09%
INDIA	1.79%
GERMANY (FEDERAL REPUBLIC)	1.10%
INDONESIA	0.96%
<b>Total</b>	<b>100.00%</b>

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

## 7.6.ECONOMIC ALLOCATION OF INVESTMENTS

By sector	% Portfolio
IT & INTERNET	24.23%
PHARMACOLOGY & PERSONAL CARE	15.18%
ELECTRIC & ELECTRONIC COMPONENTS	11.14%
MECHANICAL CONSTRUCTION	8.85%
FINANCIAL SERVICES - HOLDINGS	6.94%
BANKS	6.80%
MISCELLANEOUS CONSUMER GOODS	4.99%
TEXTILE & GARMENTS	3.67%
BUILDING MATERIALS	3.49%
FOOD & CLEANING MATERIALS	3.11%
PUBLISHING & BROADCASTING	2.64%
CHEMICAL PRODUCTS	2.46%
HEALTH CARE & SERVICES	2.30%
BIOTECHNOLOGY	2.22%
INSURANCE COMPANIES	1.98%
<b>TOTAL</b>	<b>100.00%</b>

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

## 7.7.CHANGES IN THE COMPOSITION OF THE ASSETS IN EUR

	1st semester	2nd semester	Total
Purchases	409,540,887.83	526,641,037.00	936,181,924.83
Sales	571,095,102.35	548,791,373.34	1,119,886,475.69
<b>Total 1</b>	<b>980,635,990.18</b>	<b>1,075,432,410.34</b>	<b>2,056,068,400.52</b>
Subscriptions	182,845,432.90	125,223,703.26	308,069,136.16
Redemptions	341,531,116.94	160,265,077.34	501,796,194.28
<b>Total 2</b>	<b>524,376,549.84</b>	<b>285,488,780.60</b>	<b>809,865,330.44</b>
Reference average of the total net asset	1,811,209,951.07	1,857,472,419.41	1,834,531,304.98
<b>Rotation Percentage</b>	<b>25.19%</b>	<b>42.53%</b>	<b>67.93%</b>

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A. with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

On the date of publication of this report, the net asset value per share is published on the following websites: <https://www.funds.dpaminvestments.com/funds.html> and [www.beama.be](http://www.beama.be). This information is also available at the counters of the financial services department.

## 7.9.PERFORMANCES

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Returns are determined at the end of the financial year.

The annual return is defined as the absolute return earned over a year.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B share is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the <https://www.funds.dpaminvestments.com/funds.html> website ("Overview" tab).

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 31 December 2023:

### Class B

#### Annual return:

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used to compare performance.

#### Table of historical benchmark performance (actuarial returns):

The sub-fund uses the following index as its benchmark: MSCI AC World Net Return.

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year	Year	Value
MSCI AC World Net Return	18.07 % (in EUR)	9.42 % (in EUR)	12.49 % (in EUR)	10.52 % (in EUR)	25/02/1993	0.00 % (in EUR)

**Class A**

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year		
					Year	Value
Class A	20.94 % (in EUR)	4.59 % (in EUR)	12.44 % (in EUR)	9.88 % (in EUR)	25/02/1993	6.84 % (in EUR)

**Class B**

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year		
					Year	Value
Class B	21.01 % (in EUR)	4.65 % (in EUR)	12.49 % (in EUR)	9.91 % (in EUR)	25/02/1993	7.16 % (in EUR)

**Class B USD**

Table showing historical performance (actuarial returns):

	Average cumulated returns				Since

**Fee sharing**

As at 31 December 2023, 33.24% of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroef Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroef Petercam or one of its subsidiaries are distributors in the same way as external distributors.

## 7.11. NOTES TO THE FINANCIAL STATEMENTS AND OTHER INFORMATION

### 7.11.1. Gross dividends paid in the financial year

2019	class A 0.48 EUR
	class V 1.81 EUR
	class M 1.77 EUR
2020	class 1.14 EUR
	class V 1.15 EUR
	class M 1.39 EUR
2021	class A 4.54 EUR

	class V 4.57 EUR
	class M 4.60 EUR
	class E 4.60 EUR
2022	class A 3.40 EUR
	class V 3.40 EUR
	class M 3.40 EUR
	class E 3.40 EUR

#### **7.11.2. Valuation of financial instruments**

Bonds and other debt securities as well as money market instruments were valued in the portfolio at the average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid prices and average prices varied significantly during the period, both over time and depending on the nature of the security.

#### **7.11.3. Transparency in sustainability**

##### **Environmental or social characteristics**

In accordance with Article 50 of Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022, as amended, information related to environmental or social characteristics promoted by this sub-fund is reflected in the periodic disclosures as defined in Regulation (EU) 2019/2088 of 27 November 2019 (SFDR) and attached to this report. This periodic information has not been audited by the auditor.

##### **Statement on the Taxonomy Regulation**

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on establishing a framework for the promotion of sustainable investments and amending Regulation (EU) 2019/2088 (the "Taxonomy Regulation") introduced the concept of "no serious impairment" under which investments in accordance with the Taxonomy Regulation must not seriously impair the objectives of the Taxonomy Regulation and must comply with specific European Union criteria. The "no serious impairment" principle applies only to the underlying investments of the financial product that take into account the EU criteria for environmentally sustainable economic activities. The underlying investments of the remainder of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

#### **7.11.4. Transparency of the securities financing transactions and of reuse**

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

## Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:**  
DPAM B EQUITIES WORLD SUSTAINABLE

**Legal entity identifier:**  
549300KYQ8QOYI13OU03

### Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: ____%</b> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <b>96.86%</b> of sustainable investments <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul>
<input type="checkbox"/> It made <b>sustainable investments with a social objective: ____%</b>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make sustainable investments</b>

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

During the Reference Period from 01/01/2023 to 31/12/2023 (hereinafter the "Reference Period"), the Sub-fund promoted environmental and social characteristics through a rigorous methodology aimed at:

- defending fundamental rights (human rights, labour rights, anti-corruption and environmental protection);
- not funding controversial activities and behaviours that could affect the long-term reputation of the investments.
