MULTI UNITS LUXEMBOURG (the "Fund") was incorporated on March 29, 2006 under Luxembourg laws as a *Société d'Investissement à Capital Variable* ("SICAV") for an unlimited period of time. The Fund is governed by the Provisions of Part I of the Luxembourg law of December 17, 2010, as amended relating to Undertakings for Collective Investment. The Articles of Incorporation were deposited with the *Registre du Commerce et des Sociétés* of Luxembourg and have been published in the *Mémorial C, Recueil des Sociétés et Associations* (the "Mémorial") on April 14, 2006. The Articles of Incorporation have been amended for the last time on June 13, 2024 and were published in the Mémorial on July 4, 2024.

The Fund is registered with the *Registre du Commerce et des sociétés* of Luxembourg under number B 115.129. The Fund aims to provide investors with professionally managed Sub-Funds investing in a wide range of transferable securities and money market instruments in order to achieve an optimum return from capital invested while reducing investment risk through diversification.

In addition, the Fund aims to provide investors with professionally managed index Sub-Funds whose objective is to replicate the composition of a certain financial index recognised by the Luxembourg supervisory authority.

As at September 30, 2024, 71 Sub-Funds are available to investors:

The following Sub-Fund is under liquidation :
On September 30, 2024:
• MULTI UNITS LUXEMBOURG - Lyxor MSCI Russia UCITS ETF (process started on February 15, 2023).

Detailed Share Classes active as at September 30, 2024 are listed in the “Statistical information” and description of Shares Classes are disclosed in the latest prospectus.

2 - Significant accounting policies

2.1 Presentation of financial statements

The SICAV’s financial statements are prepared and presented in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements for investment funds. The financial statement is prepared under going concern basis for accounting, except for Lyxor MSCI Russia UCITS ETF (in liquidation) since February 15, 2023 and the subfund Lyxor Core US Equity planned to be liquidated on February 24, 2025. As such, the financial statements were prepared under non-going concern basis of accounting. The application of non-going concern basis of accounting has not led to material adjustments to the sub-fund's net asset value.

2.2 Valuation of investment in securities

2.2.1 Securities listed on a recognised stock exchange or dealt in on any other regulated market that operates regularly, is recognised and is open to the public, are valued at their last available closing prices, or, in the event that there should be several such markets, on the basis of their last available closing prices on the main market for the relevant security.

2.2.2 In the event that the last available closing price does not, in the opinion of the Board of Directors, truly reflect the fair market value of such securities, the value is defined by the Board of Directors based on the reasonably foreseeable sales proceeds determined prudently and in good faith.

2.2.3 Securities not listed or traded on a stock exchange or not dealt in on another regulated market are valued on the basis of the probable sales proceeds determined prudently and in good faith by the Board of Directors.

2.2.4 Securities not listed or traded on a stock exchange or not dealt in on another regulated market are valued at their face value with interest accrued.

2.2.5 In case of short term instruments which have a maturity of less than 90 days, the value of the instrument based on the net acquisition cost, is gradually adjusted to the repurchase price thereof. In the event of the material changes in market conditions, the valuation basis of the investment is adjusted to the new market yields.

2.2.6 Investments in open-ended UCIs are valued on the basis of the last available net asset value of the units or shares of such UCIs.

2.2.7 All other securities and other assets are valued at fair market value as determined in good faith pursuant to procedures established by the Board of Directors.

2.3 Valuation of Futures

The value of financial derivative instruments traded on exchanges or on other Regulated Markets shall be based upon the last available settlement prices of these financial derivative instruments on exchanges and Regulated Markets on which the particular financial derivative instruments are traded by the Fund; provided that if financial derivative instruments could not be liquidated on the day with respect to which net assets are being determined, the basis for determining the value of such financial derivative instruments shall be such value as the Directors may deem fair and reasonable. The financial derivative instruments which are not listed on any official stock exchange or traded on any other organised market will be valued in a reliable and verifiable manner on a daily basis and verified by a competent professional appointed by the Fund.

2.4 Valuation of total return swaps

Swaps linked to indexes or financial instruments are valued at their market value, net present value of future cash flows, based on the applicable index or financial instrument, in accordance with the procedure laid down by the Board of Directors.

2.5 Net realised gains or losses on swaps

Swaps transactions are computed by taking in consideration both the receiving leg which refers to the performance of the underlying index of the contracts and the paying leg which refers to the performance of the securities basket held by the Fund.

2.6 Net realised gains or losses resulting from investments

The realised gains or losses resulting from the sales of investments are calculated on an average cost basis.

2.7 Foreign exchange translation

The accounts of each Sub-Fund are maintained in the reference currency of the Sub-Fund and the financial statements are expressed in that currency.

The acquisition cost of securities expressed in a currency other than the reference currency is translated into the reference currency at the exchange rates prevailing on the date of purchase.

Income and expenses expressed in other currencies than the reference currency are converted at exchange rates ruling at the transaction date.

Assets and liabilities expressed in other currencies than the reference currency are converted at exchange rates ruling at the year end.

The realised or unrealised gains and losses on foreign exchange are recognised in the Statement of Operations and Changes in Net Assets in determining the increase or decrease in net assets.

2.8 Forward foreign exchange contracts

Net change in unrealised profits and losses on forward foreign exchange contracts are valued on the basis of forward exchange rates prevailing at the relevant valuation date and are included in the Statement of Operations and Changes in Net Assets.

Forward foreign exchange contracts are disclosed in the Statement of Net Assets under the item “Net unrealised profit/loss on forward foreign exchange contracts”.

Net change in unrealised profits and losses and net realised gain/loss are recorded in the Statement of Operations and Changes in Net Assets.

2.9 Combined financial statements

The combined Statement of Net Assets and combined Statement of Operations and Changes in Net Assets represent the total of the Statements of Net Assets Assets and Statements of Operations and Changes in Net Assets of the individual Sub-Funds, converted in Euro, based on exchange rates applicable at year end.

2.10 Income

Dividends are credited to income on the date upon which the relevant securities are first listed as ex-dividend. Interest income is accrued on a daily basis.

For the index Sub-Funds which replicate the composition of a financial index, the dividend payments are included in the swap performance.

2.11 Formation expenses

The formation expenses of the Fund are borne by the Management Company.

2.12 Securities lending

In securities lending and borrowing transactions, a lender transfers securities or instruments to a borrower, subject to a commitment that the borrower will return equivalent securities or instruments on a future date or when requested by the lender. The borrower must provide a guarantee, in the form of collateral, that extends throughout the loan period and is at least equal to the global valuation of the securities lent, plus the value of any haircut considered appropriate in light of the collateral quality.

3 - Management fees

A management fee is payable monthly in arrears to the Management Company in compensation for its services. Such fee was payable monthly and is set for the period under review at the following rates of the Net Asset Value (inclusive of VAT):

The Management fees rates applicable at September 30, 2024, are as follows :

4 - Depositary, Administrative, Registrar Agent and other fees

As Administrative, Société Générale Luxembourg is entitled to receive fees and commissions for its services rendered to the Sub-Funds. Such fees are payable by the Management Company out of the Total Fee it receives to cover structural costs.

As Depositary, Société Générale Luxembourg is entitled to receive a fee for its services rendered to the Sub-Fund. Such fee is payable by the Management Company out of the Total Fee it receives from the Fund.

As Registrar and Transfer Agent, Société Générale Luxembourg is entitled to receive fees and commissions for its services rendered to the Sub-Fund. Such fees are payable by the Management Company out of the Total Fee it receives from the Fund.

The Total Fee (administration fees) is a percentage that the Depositary, the Registrar and Transfer Agent and the Administrator are entitled to receive of the assets of the relevant Sub-Fund, which will range, from 0.02 % to 0.10 % of the asset values underlying the relevant Sub-Fund Class, payable quarterly in arrears.

The Administration fees rates applicable at September 30, 2024, are as follows :

5 - Taxation

The amended Law of December 17, 2010 lays down that Sub-Funds of umbrella UCI established under the Law of December 20, 2002 are exempted of the *taxe d'abonnement* if they comply with following conditions stated in the article 175 e):

- whose securities are listed or dealt in on a stock exchange or another market which is regulated, operates regulary and is recognised and open to the public;
- whose exclusive object is to replicate the performance of one or several indices.

Considering that all classes of shares of all Sub-Funds of the Fund described in the Prospectus comply with the conditions required by the article 175 e) of the amended Law of December 17, 2010, the Board of Directors decided, by a Circular Resolution dated December 31, 2010, that all Sub-Funds and their classes of shares are exempted of the *taxe d'abonnement* as from January 1, 2011.

The Fund is not liable to any Luxembourg tax other than a once-and-for-all tax of EUR 1250 that was paid upon incorporation.

Investment income from dividends and interest received by the Fund may be subject to withholding taxes at varying rates. Such withholding taxes are usually not recoverable.

6 - Auditor's Remuneration

The remuneration for all work carried out by the statutory audit firm in respect of the financial year ended 30 September 2024 is as follows:

	EUR
Statutory audit of financial statements	254 410
Separate report in relation to CSSF Circular 21/790	10 868
Merger reports	55 160
Master / Feeder ad-hoc report	7 014
Limited review on interim financial informations	23 035
Total	**350 488**

All amounts presented are rounded to the nearest Euro and exclusive VAT.

7 - Total return swap agreements

The total return swaps entered into by the Sub-Funds are governed by the ISDA Master Agreements (the "Master Agreement") signed by Amundi Asset Management on behalf of the Sub-Funds with Barclays Bank Ireland PLC, BNP Paribas, BOFA Securities Europe SA, JP Morgan AG, Morgan Stanley SE and Société Générale (the "OTC Counterparties").

The terms and conditions of the swap transactions are detailed for each swap transaction in appendices to this Master Agreement.

Under the Master Agreement, the Sub-Fund pays to the OTC Counterparty an amount reflecting the performance of the basket of securities (including income received held by the Sub-Fund), and receives an amount reflecting the performance of an index (see below the index for each Sub-Fund).

The performance difference between the two legs is adjusted by (i) the difference of repo rate between the basket of securities held by the Sub-Fund and the index components, (ii) the difference between the index components dividend level in the index methodology and their market price, and (iii) pricing parameters linked to the index replication.

The market value of those swaps, used only for index replication purpose are booked in the caption "Swap at market value" of the Statement of Net Assets.

Counterparty's countries are listed following the ISO 3166-1 standard.

Lines captioned "basket of securities" in the tables below correspond to the paying leg of the swaps.

As at September 30, 2024, no collateral was received or granted by the collective investment undertaking as part of Total Return Swaps.

As at September 30, 2024 the Company holds the following Total Return Swaps :

MULTI UNITS LUXEMBOURG - Amundi LevDax Daily (2x) leveraged

15- Sustainable Finance Disclosure Regulation

Information on environmental and/or social characteristics and/or sustainable investments is available in the relevant annexes under the (unaudited) Sustainable Finance Disclosure Regulation section.

16- Significant Event

In order to protect the interests of investors in the Fund, the Board of Directors of the Company took the decision to suspend the valuation of the Sub-Fund MULTI UNITS LUXEMBOURG - Lyxor MSCI Russia UCITS ETF, and the issue, redemptions and conversion of shares of the Sub-Fund with effect from March 4, 2022 until further notice. The decision was directly related to the conflict between Russia and Ukraine and the resulting suspension of the Sub-Fund underlying market and discontinuation of the benchmark index of the Sub-Fund. The last official net asset value of the Sub-Fund was EUR 13 633 590.69 as of March 4, 2022.

The management company decided to proceed with the liquidation of the Sub-Fund MULTI UNITS LUXEMBOURG - Lyxor MSCI Russia UCITS ETF as of February 15, 2023.

The financial contract held by the fund was partially terminated against cash payments during the financial year. The composition of the assets of the MULTI UNITS LUXEMBOURG - Lyxor MSCI Russia UCITS ETF as of September 30, 2024 was established on the basis of cash held on custodian account and the financial contracts.

The financial contracts have been valued at zero as a consequence of the inability to close the contracts with the counterparty and given the high uncertainty around the sanction regimes in place affecting the underlying assets of the financial contract

On October 18, 2024, after financial year end, the financial contract was terminated against final cash payment of EUR 367 390.00 .

Liquidation proceeds were paid by the fund on December 18, 2024.

17- Liquidated Sub-Funds

The following Sub-Funds have been liquidated during the year and as at 30 Septemebr 2024 are still holding residual cash at custody level mainly for accrued cost not yet paid:

The absolute VaR approach is used in order to determine the global risk for :

• MULTI UNITS LUXEMBOURG - Amundi US Curve steepening 2-10Y

The lowest, the highest and the average utilisation of the VaR limit calculating during the period from January 1, 2024 to September 30, 2024 are described below :

VaR Model Historical

Market risk calculation Absolute VaR

Interval of time 20 days

Limits 20%

Scenarios Historical, 1 Year

Reliable interval 99%

Overview of VaR	VaR Utilisation Max (VaR 20 Day)	VaR Utilisation Min (VaR 20 Day)	Average level of leverage (sum of notionals)	Average level of leverage (gross delta)	Average level of leverage (net delta)
MULTI UNITS LUXEMBOURG - Lyxor US Curve Steepening 2-10 Y	4.08%	2.88%	453.75%	453.75%	295.86%

Please note that the above displayed results cover the period running from January 1, 2024, the first day AMUNDI Luxembourg was appointed as the new management company of the Multi Units Luxembourg umbrella, till September 30,2024. Results of Q4 2023 have been already displayed in the Annual Report of 2023, covering January 1, 2023, till December 31, 2023.

The level of leverage using the commitment approach is determined in accordance with CSSF circular 11-512 which is further clarified in ESMA Guidelines 10-788.

REMUNERATION POLICY AND PRACTICES

Amundi Luxembourg S.A. remuneration policy is compliant with the requirements detailed in the European Directive 2014/91/EU that come into force on March 18, 2016, and was transposed into Luxembourg Law of 10 May 2016. The remuneration policy is based on Amundi group remuneration framework, and it is reviewed annually and approved by the Board of Amundi Luxembourg. The policy is subject to independent review by the internal Compliance function. In main evolutions of the 2023 remuneration policy was linked to "Amundi Ambition 2025" and ESG criteria and Sustainability Risk. Qualitative and quantitative criteria for Investment Management and Sales and Marketing has been added. There were no further material changes to the remuneration policy adopted for previous years. The policy applicable for 2023 was approved by Amundi Luxembourg Board on October 05, 2023. Amundi group Remuneration Committee reviews on an annual basis the group remuneration policy. The 2023 review took place on February 02, 2023.

The remuneration policy and practices objectives are consistent with and promote sound and effective risk management, aligning remuneration with long-term performance and risks in order to avoid conflicts of interest. Fixed remuneration components are linked to the roles covered, the professional services rendered and the scope of responsibilities, reflecting the level of academic qualification, market pay levels, experience and skills required for each position, as well as the level of excellence demonstrated. Variable remuneration is designed to promote a sustainable long-term development of the Management Company and a solid and effective risk management system.

Variable remuneration awards consider the performance of the employee, her/his business unit and Amundi group as a whole, and it is based on both financial and non-financial criteria.

Amundi Luxembourg S.A. and Amundi group have defined all identified staff having authority or influence on the funds Amundi manages, and who consequently are likely to have an impact on the performance or the risk profile of the funds.

AMOUNTS OF REMUNERATION AWARDED

Amundi Luxembourg S.A., the Management Company acts as of December 31, 2023 as Management Company or AIFM for several umbrella and standalone UCITS and AIFs.

The total remuneration expressed in Euro paid by Amundi Luxembourg S.A. to its staff during the calendar year 2023 is as follows:

	Nr. of beneficiaries	Fixed remuneration	Variable remuneration	Total
Staff	110	8,737,726.50	1,545,780.42	10,283,506.92
Out of which				
- Identified staff	9	1,419,514.99	516,082.67	1,935,597,66
- All other staff	101	7,318,211.51	1,029,697.75	8,347,909.26

Multi Units Luxembourg represented as of December 31, 2023 around 22% and as of September 30, 2024 around 23% of the Total Net Assets under Management of Amundi Luxembourg S.A.. The total remuneration figures shown above refer to activities in respect of all funds managed.

Amundi Luxembourg S.A. and Amundi group employees who are appointed to the Board of Directors of the Management Company and/or of the Funds waive the right to any remuneration in respect of all funds managed.

No employee of the Management Company receives any amount, including carried interest and performance fees, paid directly by the UCITS or AIFs managed.

REMUNERATION OF DELEGATES

As of 30 September 2024:

- Amundi Asset Management managed EUR 1,187.08 billion AuM, out of which EUR 66.68 billion represented by the sub-funds in the umbrella (respectively 5.62% of the total assets managed by the Investment Manager and 94.32% of the total umbrella's AuM). The pro-rata portion of the identified staff total remuneration attributable to the management of the sub-funds was EUR 2,054,425, out of which EUR 992,872 in fixed remuneration and EUR 1,061,553 in variable one. The pro-rata portion of staff total remuneration attributable to the management of the sub-funds was EUR 11,653,771, out of which EUR 8,168,477 in fixed remuneration and EUR 3,485,294 in variable one. Amundi Asset Management had a total of 100 identified staff out of a total of 1,923 staff in 2023.

- Amundi Japan managed EUR 37.85 billion AuM, out of which EUR 4.02 billion represented by the sub-funds in the umbrella (respectively 10.62% of the total assets managed by the Investment Manager and 5.68% of the total umbrella's AuM). The pro-rata portion of the identified staff total remuneration attributable to the management of the sub-funds was EUR 436,647, out of which EUR 269,630 in fixed remuneration and EUR 167,017 in variable one. The pro-rata portion of staff total remuneration attributable to the management of the sub-funds was EUR 1,985,780, out of which EUR 1,523,999 in fixed remuneration and EUR 461,781 in variable one. Amundi Japan had a total of 15 identified staff out of a total of 191 staff in 2023.

Please note that the staff remuneration figures refer to the calendar year 2023.

French "Plan d'Epargne en Actions" ("PEA")

Plan d'Epargne en Actions (PEA) is a savings plan dedicated to French tax resident individuals in order to promote the investment in european equities (companies established in European Union, Iceland, Liechtenstein or Norway, and subject to corporate income tax).
To be eligible for PEA the sub-fund must invest on a permanent basis at least 75% of their assets in PEA eligible securities.
During the period between October 1, 2023 and September 30, 2024 the following sub-funds invested constantly at least 75% of their total net assets in PEA eligible securities.

As of September 30, 2024 the percent of the assets invested in PEA eligible securities was:

Sub-Funds	Ratios
MULTI UNITS LUXEMBOURG - Amundi DAX III	96.03%
MULTI UNITS LUXEMBOURG - Amundi LevDax Daily (2x) leveraged	91.30%
MULTI UNITS LUXEMBOURG - Amundi MSCI USA Daily (-1x) Inverse	90.14%

DISCLOSURE REGULATION

On 18 December 2019, the European Council and European Parliament announced that they had reached a political agreement on the Disclosure Regulation, thereby seeking to establish a pan-European framework to facilitate Sustainable Investment. The Disclosure Regulation provides for a harmonized approach in respect of sustainability-related disclosures to investors within the European Economic Area's financial services sector.

For the purposes of the Disclosure Regulation, the Management Company meets the criteria of a "financial market participant", whilst each Sub-Fund qualifies as a "financial product". For further details on how a Sub-Fund complies with the requirements of the Disclosure Regulation please refer to the supplement for that Sub-Fund. Please also refer to the section on 'Sustainable Investment' in the Prospectus of the Fund and the Amundi Responsible Investment Policy available on www.amundi.com.

As required by Art.11 of the Disclosure Regulation the Fund makes the following statements: Under the Amundi Responsible Investment Policy, Amundi has developed its own ESG rating approach. The Amundi ESG rating aims to measure the ESG performance of an issuer, i.e. its ability to anticipate and manage Sustainability Risks and opportunities inherent to its industry and individual circumstances. By using the Amundi ESG ratings, portfolio managers are taking into account Sustainability Risks in their investment decisions. Amundi applies targeted exclusion policies to all Amundi's active investing strategies by excluding companies in contradiction with the Responsible Investment Policy, such as those which do not respect international conventions, internationally recognized frameworks or national regulations.

Article 9 Sub-Funds

These Sub-Funds have a sustainable objective and is therefore classified as article 9 under SFDR (Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector).

Therefore, as required by Article 58 of COMMISSION DELEGATED REGULATION (EU) 2022/1288, detailed information on the environmental or social characteristics promoted by the financial product is available in an annex to this report.

This annex contains information about:

- Attainment of the sustainable investment objective of the financial product;
- Top investments, asset allocation & proportion of investments in different economic sectors and sub-sectors;
- Information on sustainable investments.

List of Art. 9 Sub-Funds as of 30 September 2024

MULTI UNITS LUXEMBOURG - Amundi Euro Government Green Bond

Article 8 Sub-Funds (required Art.11.1)

The Sub-Funds listed below are classified pursuant to article 8 of the Disclosure Regulation and aim to promote environmental and/or social characteristics. In addition to applying Amundi's Responsible Investment Policy, these Article 8 Sub-Funds aim to promote such characteristics through investments resulting in an ESG score of their portfolios greater than of their respective benchmark or investment universe. The ESG portfolio score is the AUM-weighted average of the issuers' ESG score based on Amundi ESG scoring model.

During the financial period under reporting, the Investment Manager continuously promoted environmental and/or social characteristics through the application of the above mentioned methodologies.

MULTI UNITS LUXEMBOURG - Amundi MSCI Millennials ESG Screened

Article 6 Sub-Funds

Given the investment focus and the asset classes/sectors they invest in, the investment managers of all other Sub-Funds, not classified pursuant to article 8 or 9 of the Disclosure Regulation did not integrate a consideration of environmentally sustainable economic activities into the investment process for the Sub-Fund. Therefore, it should be noted that the investments underlying the Sub-Fund did not take into account the EU criteria for environmentally sustainable economic activities.

Throughout the financial period, the Sub-Fund considered PAI 14 via the Amundi Minimum Standard and Exclusion Policy related to controversial weapons, excluding issuers in the production, sale, storage or services for and of anti-personnel mines and cluster bombs, prohibited by the Ottawa and Oslo treaties and issuers involved in the production, sale or storage of chemical, biological and depleted uranium weapons, as per Amundi Global Responsible Investment Policy.

List of Art. 6 Sub-Funds as of 30 September 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Amundi Global Aggregate Green Bond

Legal entity identifier: 549300NMTL8UEBWJK406

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [x] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [x] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **92.46%** of sustainable investments
  - [ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [x] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [ ] with a social objective
- [ ] It made a **sustainable investments with a social objective:** _____
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an Index (100% SOLACTIVE GREEN BOND EUR USD IG INDEX) composed of bonds which are considered as “Green Bond” according to the Climate Bonds Initiative.

How did the sustainability indicators perform?

The use of proceeds of the bonds is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product.

More precisely, to be eligible for inclusion in the “Solactive Green Bond EUR USD IG Index” (the “Index"), a bond must be considered as a “Green Bond” by the Climate Bonds Initiative.

The Sub-Fund followed an extra-financial approach significantly engaging that contributes to and has positive impacts on the energy and ecological transition by investing permanently at least

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

90% of the net asset value of the Sub-Fund in Green Bonds comprising the Index. To be eligible in the Index, Green Bonds shall meet the criteria defined by the Climate Bonds Initiative (as mentioned above).

At the end of the period, the portfoio holds 99.35 % of green bonds.

- ***… and compared to previous periods?***

At the end of the previous period the portfolio held 100 % of green bonds

- ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

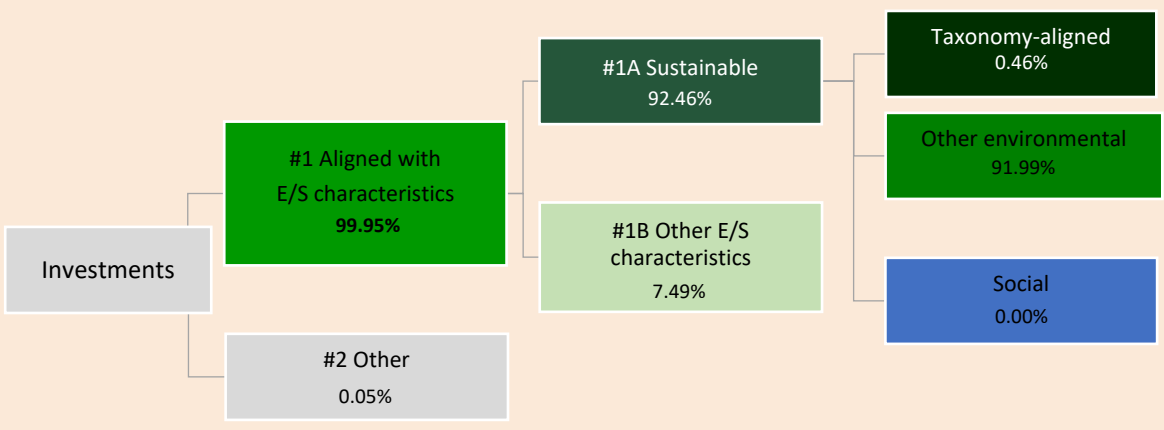
Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.

- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.



What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/10/2023 to 30/09/2024**

Largest Investments	Sector	Sub-Sector	Country	% Assets
LYXOR ETF GREEN BOND (DR) - MASTER	Financials	Mutual Funds	Luxembourg	99.94%

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

Sector	*Sub-Sector*	*% Assets*
Financials	*Mutual Funds*	*99.94%*
Forex	*Forex*	*0.02%*
Cash	*Cash*	*0.04%*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.46% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

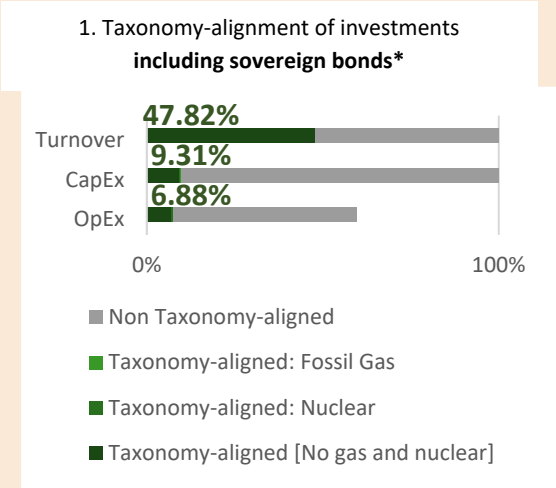
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

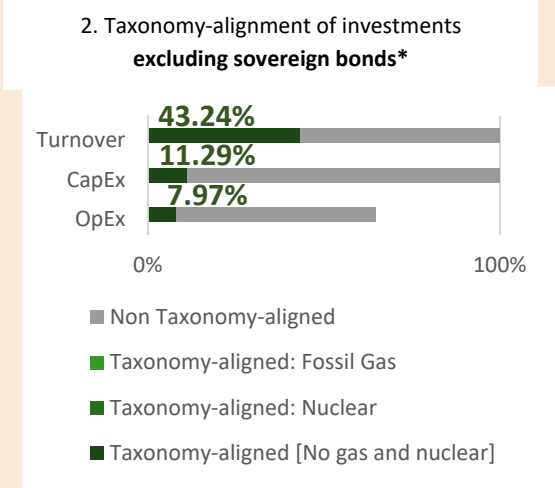
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy



☒ No



Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period: the percentage of investments with Taxonomy alignment was 47.65%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **91.99%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 0.00%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

The "Solactive Green Bond EUR USD IG Index" (the "Index") offers an exposure to the Green Bonds market.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Lyxor MSCI World ESG Leaders Extra (DR) UCITS ETF

Legal entity identifier: 5493000SXC4CP0ET2K74

Environmental and/or social characteristics

This report is based on the sub-fund's portfolio composition as of 2nd February 2024, before it merged into Amundi MSCI World SRI Climate Net Zero Ambition PAB UCITS ETF.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**

☐ It made **sustainable investments with an environmental objective:** _____

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **56.98%** of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective

☐ It made a **sustainable investments with a social objective:** _____

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the **100% MSCI WORLD SELECT ESG RATING & TREND LEADERS**. The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

How did the sustainability indicators perform?

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the MSCI WORLD SELECT ESG RATING & TREND LEADERS is 7.763
- the MSCI ESG score of the MSCI World Index (the “Parent Index”) is 6.9

… and compared to previous periods?

At the end of the previous period the MSCI ESG score of the index was 7.7

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

Sector	*Sub-Sector*	*% Assets*
Information Technology	Software & Services	16.05%
Information Technology	Semiconductors & Semiconductor Equipment	9.51%
Health Care	Pharmaceuticals Biotec & Life Sciences	8.17%
Industrials	Capital Goods	7.07%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.33% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

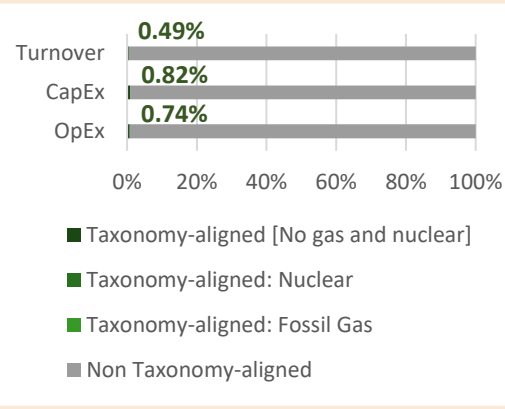
Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

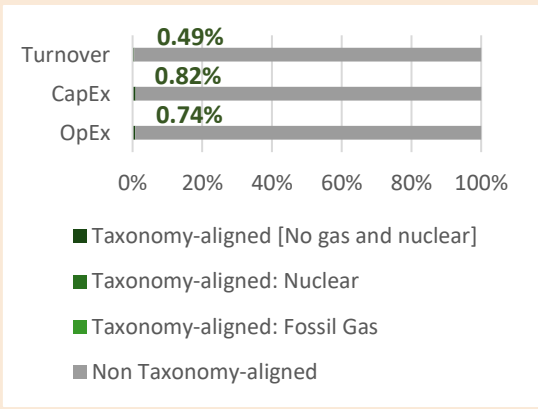
☐ Yes:

☐ In fossil gas ☐ In nuclear energy



☒ No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.



[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

2. Taxonomy-alignment of investments **excluding sovereign bonds***

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 02/02/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.01% and the share of investment in enabling activities was 0.3%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?***

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.35%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was 40.07% at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 16.59%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

The MSCI World Select ESG Rating and Trend Leaders Net Return USD Index (the "Index") is denominated in US Dollars in order to offer an exposure to the performance of large and mid cap stocks, across Developed Markets countries, issued by companies having a robust Environmental, Social and Governance (ESG) ratings.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Amundi EUR Corporate Bond PAB Net Zero Ambition

Legal entity identifier: 5493006LD608VBS18F78

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [x] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [x] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **67.08%** of sustainable investments
  - [ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [x] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [ ] with a social objective
- [ ] It made a **sustainable investments with a social objective:** _____
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index (Bloomberg MSCI Euro Corporate Paris Aligned Green Tilted Index) meeting the minimum standards for EU Paris Aligned Benchmarks (EU PABs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

How did the sustainability indicators perform?

The weighted average greenhouse gas (GHG) emissions is used to measure the attainment of each of the environmental or social characteristics promoted by this financial product. The GHG emissions are divided into Scope 1, Scope 2, and Scope 3 emissions. - Scope 1 emissions: those from sources owned or controlled by the company. - Scope 2 emissions: those caused by the generation of electricity purchased by the company. - Scope 3 emissions: include all other indirect emissions that occur in a company's value chain. More precisely,

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Bloomberg MSCI Euro Corporate Paris Aligned Green Tilted Index ("The Index") intends to be representative of the Euro denominated investment grade corporate bond market while meeting and exceeding the minimum standards of the EU PAB. The index uses an optimization approach that aims to minimize the active total risk with respect to the Parent Index under constraints.

- At the end of the period, the weighted average greenhouse gas (GHG) emissions of the index Bloomberg MSCI EUR Corporate Paris Aligned Green Tilted Index are 12,017,623.
- At the end of the period, the weighted average greenhouse gas (GHG) emissions of the parent index Bloomberg Euro Corporate Bond Index are 53,144,218.

… and compared to previous periods?

At the end of the previous period, the weighted average greenhouse gas (GHG) intensity (the "WACI") of the index was 155.5

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social

standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

  The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

  The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

  Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

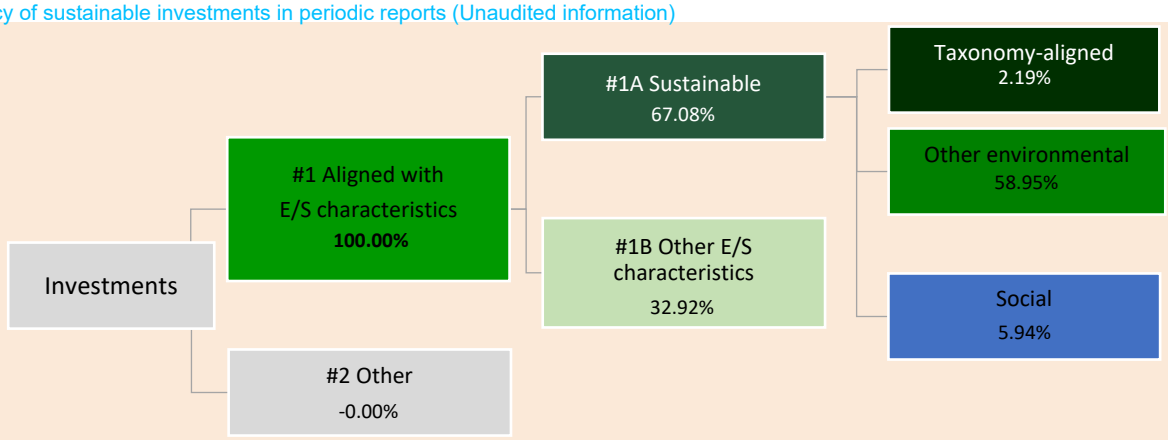
The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.



What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/10/2023 to 30/09/2024**

Largest Investments	Sector	Sub-Sector	Country	% Assets
AMUNDI EUR CORPORATE PAB - MASTER FUND	Financials	Mutual Funds	Luxembourg	100.00%

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- ***In which economic sectors were the investments made ?***

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [x] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [x] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **65.51%** of sustainable investments
  - [ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [x] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [ ] with a social objective
- [ ] It made a **sustainable investments with a social objective:** _____
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the 100% BLOOMBERG MSCI EUR CORPORATE LIQUID EX FINANCIAL SRI SUSTAINABLE INDEX.The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

How did the sustainability indicators perform?

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the Bloomberg MSCI EUR Corporate Liquid ex Financial SRI Sustainable Index is 7.378
- the MSCI ESG score of the Bloomberg Euro AGG Corporate Excl Financials Total Return Index is 7.04

… and compared to previous periods?

At the end of the previous period the MSCI ESG score of the index was 7.34.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

  The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

  The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

  Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

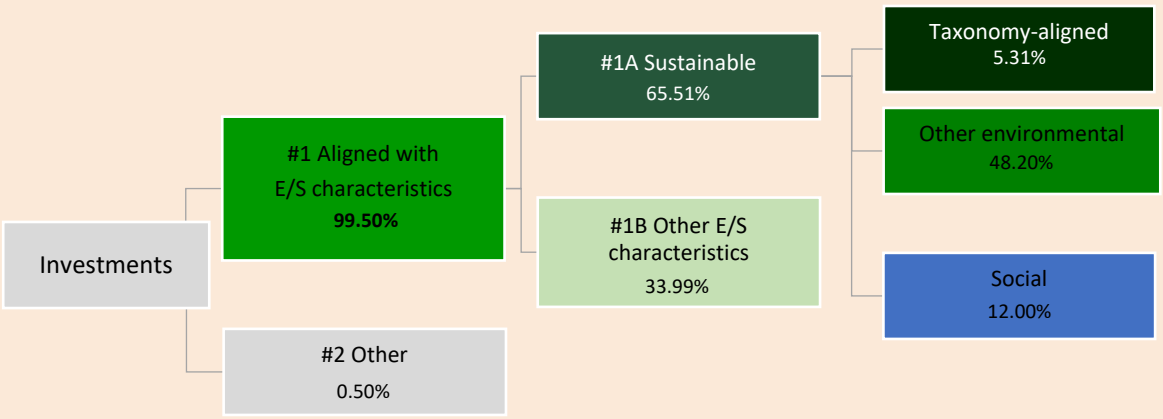
Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/10/2023 to 30/09/2024**

Largest Investments	Sector	Sub-Sector	Country	% Assets
MSFT 3.125% 12/28	Corporates	Technology	United States	0.31%
IBM 0.65% 02/32	Corporates	Technology	United States	0.25%
IBM 0.3% 02/28	Corporates	Technology	United States	0.23%
FDX 1.625% 11/01/27	Corporates	Transportation	United States	0.23%
BMW 1.5% 02/29 EMTN	Corporates	Consumer Discretionary	Netherlands	0.21%
FRANCE TEL 8 1/8% 33	Corporates	Communications	France	0.21%
AAPL 2% 09/27	Corporates	Technology	United States	0.17%
ENFP 5.375% 06/42	Corporates	Capital Goods	France	0.17%
BKNG 4.75% 11/34	Corporates	Consumer Discretionary	United States	0.17%
VZ 4.75% 10/34	Corporates	Communications	United States	0.17%
MDLZ 0.25% 09/29 REGS	Corporates	Consumer Staples	Netherlands	0.17%
FREGR 5.125% 10/30 EMTN	Corporates	Consumer Staples	Germany	0.17%
FCCSER 5.25% 10/29	Corporates	Capital Goods	Spain	0.16%
CARR 4.5% 11/32	Corporates	Capital Goods	United States	0.16%
RCFFP 5.75% 11/31 EMTN	Corporates	Technology	France	0.16%

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

Sector	Sub-Sector	% Assets
Corporates	*Consumer Staples*	*25.01%*
Corporates	*Communications*	*16.25%*
Corporates	*Consumer Discretionary*	*16.12%*
Corporates	*Capital Goods*	*10.77%*
Corporates	*Transportation*	*8.22%*
Corporates	*Technology*	*7.56%*
Corporates	*Basic Industry*	*6.45%*

Corporates	*Electric*	*5.11%*
Corporates	*Natural Gas*	*2.58%*
Corporates	*Other Utilities*	*1.29%*
Corporates	*Other Industrials*	*0.44%*
Corporates	*Energy*	*0.15%*
Cash	*Cash*	*0.04%*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 5.31% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

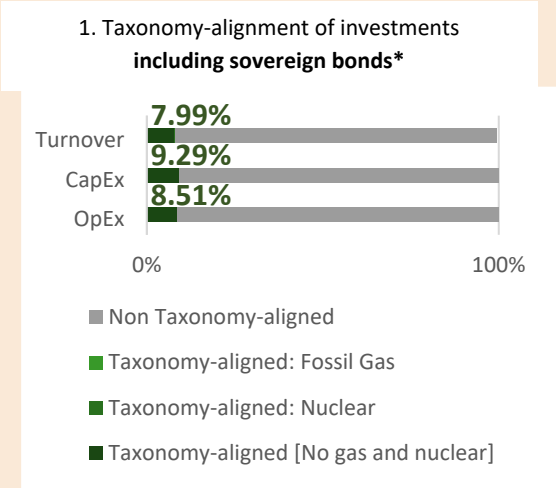
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

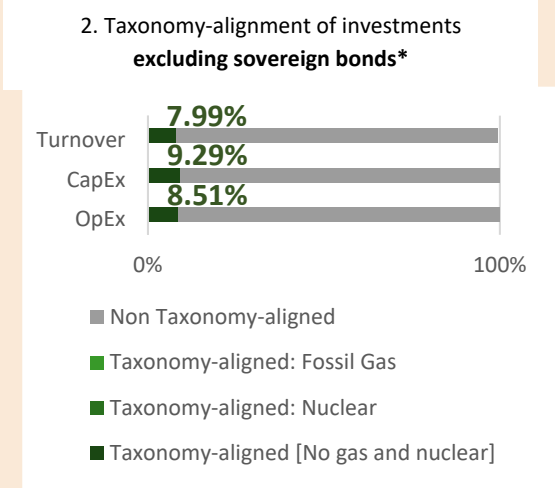
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy



☒ No



Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies
-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.28% and the share of investment in enabling activities was 3.87%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 3.10%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **48.20%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 12.00%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

The index is representative of the performance of EUR denominated, investment grade corporate bonds issued by European and non-European corporates, with maturities of at least 1 year. The index only includes issuers with an MSCI ESG Rating of BBB or higher, and negatively screens issuers involved in certain values-based business involvement criteria, including activities related to controversial military weapons, and those with a "red" MSCI ESG Controversy Score.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Transparency of sustainable investments in periodic reports (Unaudited information)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Amundi MSCI China ESG Leaders Extra

Legal entity identifier: 549300E7C8KZ5P6BZI39

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [x] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [x] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 21.08% of sustainable investments
  - [ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [x] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [x] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the 100% MSCI CHINA SELECT ESG RATING TREND LEADERS. The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant

risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the MSCI China Select ESG Rating and Trend Leaders Net Total Return Index is 5.983
- the MSCI ESG score of the MSCI China Index is 4.924

… and compared to previous periods?

At the end of the previous period the MSCI ESG score of the index was 6.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account,

in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

  The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
  The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:
  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

  Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

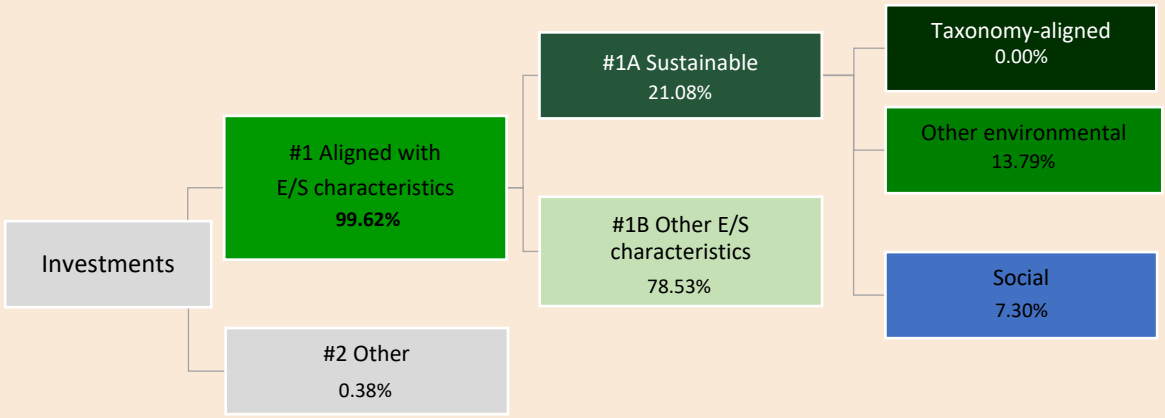
Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/10/2023 to 30/09/2024**

Largest Investments	Sector	Sub-Sector	Country	% Assets
ALIBABA GROUP HOLDING LTD	Consumer Discretionary	Consumer Discretionary Distribution & Retail	Cayman Islands	16.81%
TENCENT HOLDINGS LTD	Communication Services	Media & Entertainment	Cayman Islands	14.74%
CHINA CONSTRUCT BANK	Financials	Banks	China	7.02%
IND & COMM BK OF CHINA-H	Financials	Banks	China	4.00%

NEW ORIENTAL EDUCATION & TEC	Consumer Discretionary	Consumer Services	Cayman Islands	1.15%
CHINA RES LAND LTD	Real Estate	Real Estate Management & Development	Cayman Islands	1.14%

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

Sector	*Sub-Sector*	*% Assets*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

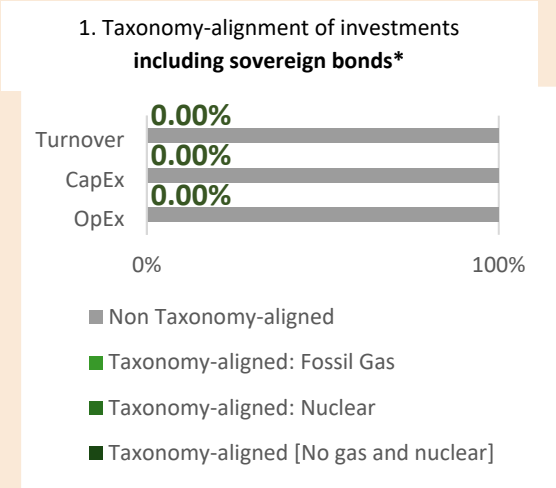
The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.00% in sustainable investments aligned with the EU Taxonomy.

- ***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?***

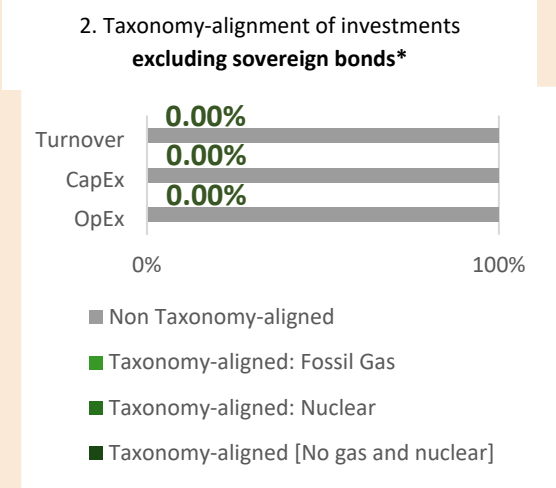
☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No



Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.



[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period: the percentage of investments with Taxonomy alignment was 0.00%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **13.79%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 7.30%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

The MSCI China Select ESG Rating and Trend Leaders Net Total Return Index (the "Index") is denominated in US Dollars, and representative of the performance of large and mid cap stocks, across the Chinese economy, issued by companies with robust Environmental, Social and Governance (ESG) ratings.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Amundi MSCI Semiconductors ESG Screened

Legal entity identifier: 549300PEVY81KWEMRO55

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [x] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [x] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **72.08%** of sustainable investments
  - [ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [x] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [ ] with a social objective
- [ ] It made a **sustainable investments with a social objective:** _____
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the 100% MSCI ACWI SEMICONDUCTORS & SEMICONDUCTOR EQUIPMENT ESG FILTERED INDEX. The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

How did the sustainability indicators perform?

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:
- the MSCI ESG score of the MSCI ACWI Semiconductors & Semiconductor Equipment ESG Filtered Net Total Return Index is 8.844
- the MSCI ESG score of the MSCI ACWI Semiconductors and Semiconductor Equipment Index (the “Parent Index”) is 8.4

… and compared to previous periods?

At the end of the previous period the MSCI ESG score of the index was 8.4

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests

detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

  The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
  The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:
  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

  Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

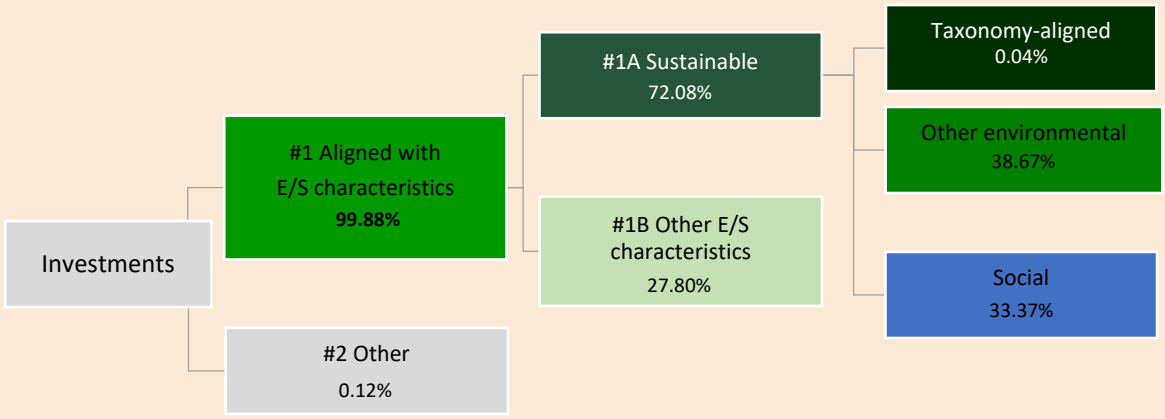
Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/10/2023 to 30/09/2024**

Largest Investments	Sector	Sub-Sector	Country	% Assets
NVIDIA CORP	Information Technology	Semiconductors & Semiconductor Equipment	United States	31.37%
BROADCOM INC	Information Technology	Semiconductors & Semiconductor Equipment	United States	12.84%
TAIWAN SEMICONDUCTOR MANUFAC	Information Technology	Semiconductors & Semiconductor Equipment	Taiwan	12.60%
ASML HOLDING NV	Information Technology	Semiconductors & Semiconductor Equipment	Netherlands	5.62%
ADVANCED MICRO DEVICES	Information Technology	Semiconductors & Semiconductor Equipment	United States	4.48%
QUALCOMM INC	Information Technology	Semiconductors & Semiconductor Equipment	United States	3.21%
TEXAS INSTRUMENTS	Information Technology	Semiconductors & Semiconductor Equipment	United States	3.18%
APPLIED MATERIALS INC	Information Technology	Semiconductors & Semiconductor Equipment	United States	2.84%
MICRON TECHNOLOGY INC	Information Technology	Semiconductors & Semiconductor Equipment	United States	1.94%

ANALOG DEVICES INC	Information Technology	Semiconductors & Semiconductor Equipment	United States	1.93%

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

Sector	*Sub-Sector*	*% Assets*
Information Technology	*Semiconductors & Semiconductor Equipment*	*99.90%*
Forex	*Forex*	*0.01%*
Others	*Others*	*0.00%*
Cash	*Cash*	*0.09%*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

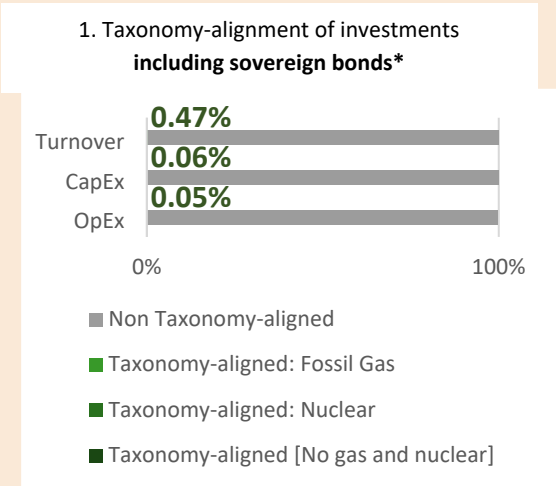
The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.04% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

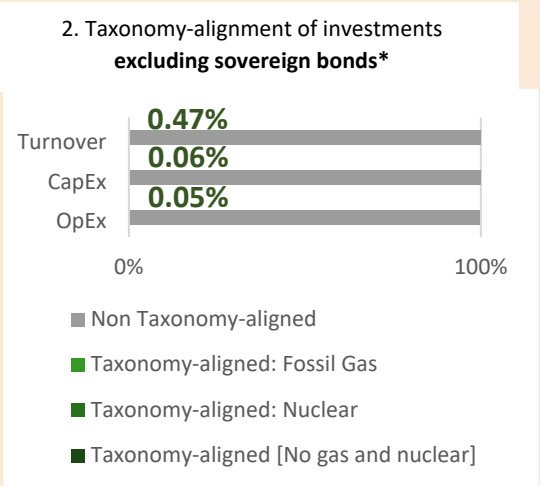
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy



☒ No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.04%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.07%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **38.67%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 33.37%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

How does the reference benchmark differ from a broad market index ?

The MSCI ACWI Semiconductors & Semiconductor Equipment ESG Filtered Net Total Return Index (the "Index") is denominated in US Dollars and representative of a select set of companies from the MSCI ACWI Semiconductors and Semiconductor Equipment Index (the "Parent Index") that excludes companies which are Environmental, Social and Governance (ESG) laggards relative to the Parent Index.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Amundi MSCI Europe ESG Leaders

Legal entity identifier: 5493003TSM6WSACG3290

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
☐	☒

☐ It made **sustainable investments with an environmental objective:** _____

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **85.37%** of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective

☐ It made a **sustainable investments with a social objective:** _____

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the 100% MSCI EUROPE ESG LEADERS. The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

How did the sustainability indicators perform?

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the MSCI EUROPE ESG LEADERS SELECT 5% ISSUER CAPPED is 8.609
- the MSCI ESG score of the MSCI Europe Index is 7.879

… and compared to previous periods?

At the end of the previous period the MSCI ESG score of the index was 8.6

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account,

in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

  The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
  The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:
  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

  Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

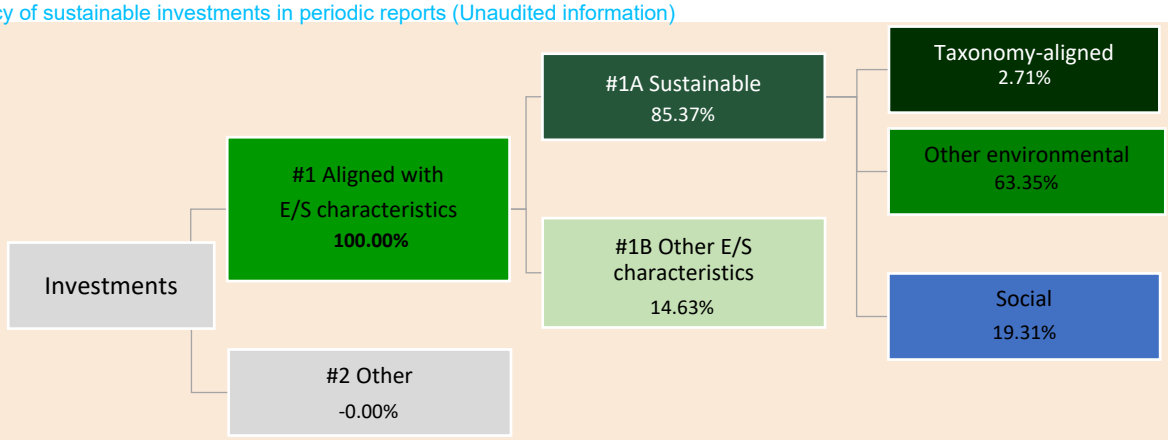
The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.



What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/10/2023 to 30/09/2024**

Largest Investments	Sector	Sub-Sector	Country	% Assets
AM ETF MSCI EUROPE ESG LEADERS-MASTER	Financials	Mutual Funds	Luxembourg	100.00%

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

Sector	*Sub-Sector*	*% Assets*
Financials	*Mutual Funds*	*100.00%*
Forex	*Forex*	*-0.03%*
Cash	*Cash*	*0.02%*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 2.71% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

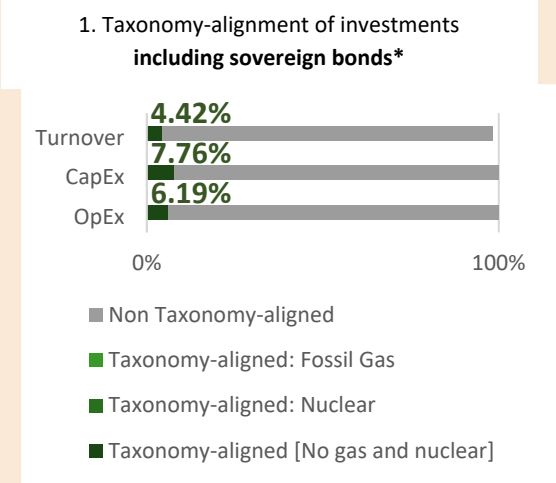
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

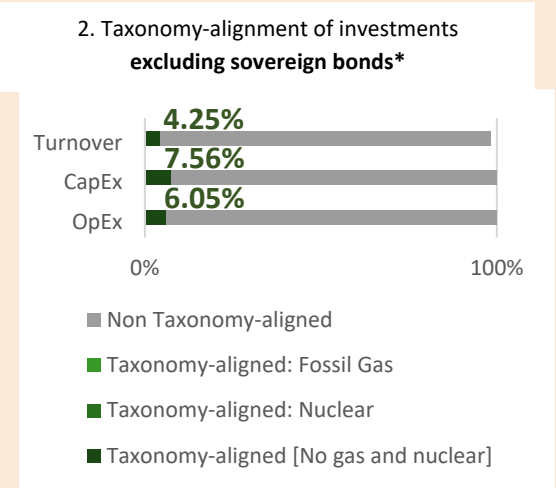
Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy



☒ No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.06% and the share of investment in enabling activities was 3.48%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period: the percentage of investments with Taxonomy alignment was 1.84%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **63.35%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 19.31%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

The MSCI Europe ESG Leaders Net Total Return Index (the "Index") is denominated in Euros in order to offer an exposure to the performance of large and mid cap stocks, across developed European countries, issued by companies having a high Environmental, Social and Governance (ESG) ratings.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Amundi Global Aggregate Green Bond 1-10Y

Legal entity identifier: 549300AN4QVQ0SPP1Y68

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] **Yes**
- [x] **No**

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [x] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **92.15%** of sustainable investments
  - [ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [x] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [ ] with a social objective
- [ ] It made a **sustainable investments with a social objective:** _____
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an Index (Bloomberg MSCI Global Green Bond 1-10 Year Index) composed of bonds which are considered as “Green Bond” according to the MSCI ESG research.

How did the sustainability indicators perform?

The use of proceeds of the bonds is used to measure the attainment of each of the environmental and .or social characteristic promoted by this financial product.

More precisely, to be eligible for inclusion in the “Bloomberg MSCI Global Green Bond 1-10 Year Index” (the “Index"), a bond must be deemed eligible as a “Green Bond” by MSCI ESG Research (as detailed hereafter). MSCI ESG Research provides in-depth research, ratings and analysis of the environmental, social and governance-related business practices of thousands of companies worldwide. It consists of an integrated suite of tools and products to efficiently manage research,

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

analysis and compliance tasks across the spectrum of ESG factors. An independent research-driven methodology is used to evaluate
green bonds to ensure they adhere to established Green Bond principles and are classified by their environmental use of proceeds. MSCI ESG Research has developed and implemented the following set of criteria to defined Green Bonds which are eligible to the index. Green bonds are fixed income securities in which the proceeds will be exclusively and formally applied to projects or activities that promote climate or other environmental sustainability purposes through their use of proceeds.

The Sub-Fund followed an extra-financial approach significantly engaging that contributes to and has positive impacts on the energy and ecological transition by investing permanently at least 90% of the net asset value of the Sub-Fund in Green Bonds comprising the Index. To be eligible in the Index, Green Bonds shall meet the criteria defined by MSCI ESG Research (as mentioned above).

At the end of the period, the portfoio holds 98.33 % of green bonds.

- ***… and compared to previous periods?***

At the end of the previous period the portfolio held 98.67 % of green bonds

- ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests

detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

  The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
  The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:
  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

  Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

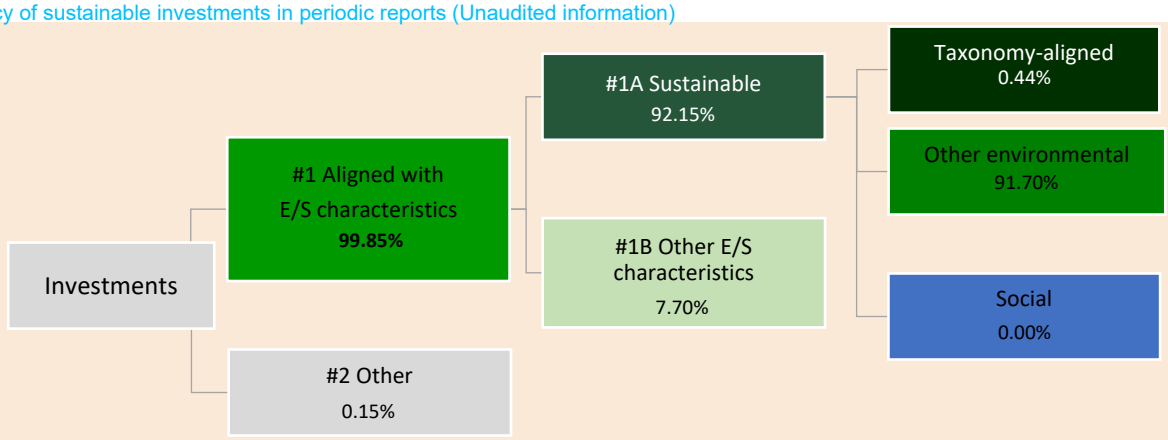
The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.



What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/10/2023 to 30/09/2024**

Largest Investments	Sector	Sub-Sector	Country	% Assets
LX GL GREEN BD 1-10Y DR ETF-MASTER	Financials	Mutual Funds	Luxembourg	99.85%

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

Sector	*Sub-Sector*	*% Assets*
Financials	*Mutual Funds*	*99.85%*
Forex	*Forex*	*-0.14%*
Cash	*Cash*	*0.29%*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.44% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

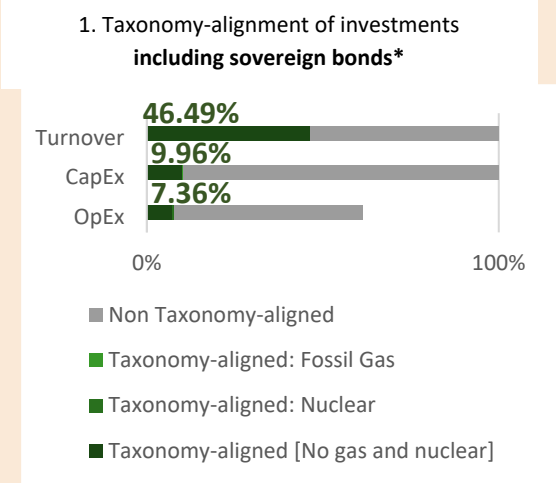
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

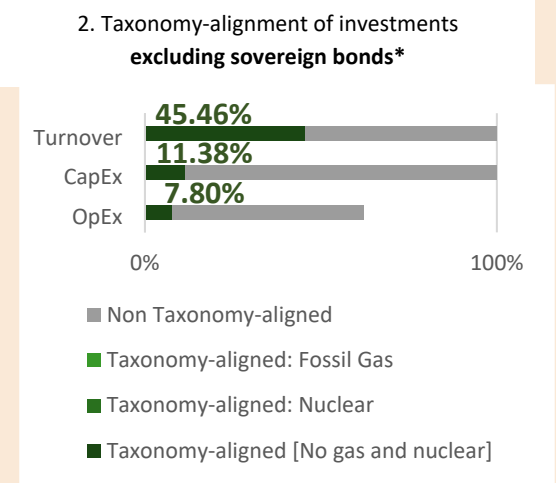
Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy



☒ No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period: the percentage of investments with Taxonomy alignment was 43.94%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **91.70%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 0.00%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

The "Bloomberg MSCI Global Green Bond 1-10 Year Index" (the "Index") offers an exposure to the Green Bonds market issued by investment grade entities and denominated in multiple currencies .

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Transparency of sustainable investments in periodic reports (Unaudited information)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Lyxor MSCI Europe ESG Climate Transition CTB (DR) UCITS ETF

Legal entity identifier: 5493005U8VB8WI2D3X04

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

This report is based on the sub-fund's portfolio composition as of 1st March 2024, before the liquidation process started.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**

☐ It made **sustainable investments with an environmental objective:** _____

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made a **sustainable investments with a social objective:** _____

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **81.65%** of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index (**100% MSCI EUROPE ESG CLIMATE TRANSITION (EU CTB) SELECT**) meeting the minimum standards for EU Climate Transition Benchmarks (EU CTBs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

During the financial year, the product continuously promoted environmental characteristics by aiming to reduce its carbon intensity by aligning its carbon footprint intensity to that of its Benchmark 100% MSCI EUROPE ESG CLIMATE TRANSITION (EU CTB) SELECT.

Sustainability indicators measure how the environmental or social characteristics

- ***How did the sustainability indicators perform?***

The weighted average greenhouse gas (GHG) intensity (the "WACI") is used to measure the attainment of each of the environmental or social characteristics promoted by this financial

promoted by the financial product are attained.

product. The WACI is the weighted average of the Index components' greenhouse gas (GHG) emissions (expressed in tCO2) divided by the enterprise value including cash. The GHG emissions are divided into Scope 1, Scope 2, and Scope 3 emissions. -Scope 1 emissions: those from sources owned or controlled by the company. -Scope 2 emissions: those caused by the generation of electricity purchased by the company. -Scope 3 emissions: include all other indirect emissions that occur in a company's value chain.

The sustainability indicator used is the weighted average greenhouse gas (GHG) intensity (the "WACI") of the ESG reference benchmark that is measured against the weighted average greenhouse gas (GHG) intensity (the "WACI") score of the Parent index.

At the end of the period:

- the weighted average greenhouse gas (GHG) intensity (the “WACI”) of the MSCI EUROPE ESG CLIMATE TRANSITION (EU CTB) SELECT is 243
- the weighted average greenhouse gas (GHG) intensity (the “WACI”) of the MSCI Europe Index (the "Parent Index") is 570

… and compared to previous periods?

At the end of the previous period, the weighted average greenhouse gas (GHG) intensity (the “WACI”) of the index was 193.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee

and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

  The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
  The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:
  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

  Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

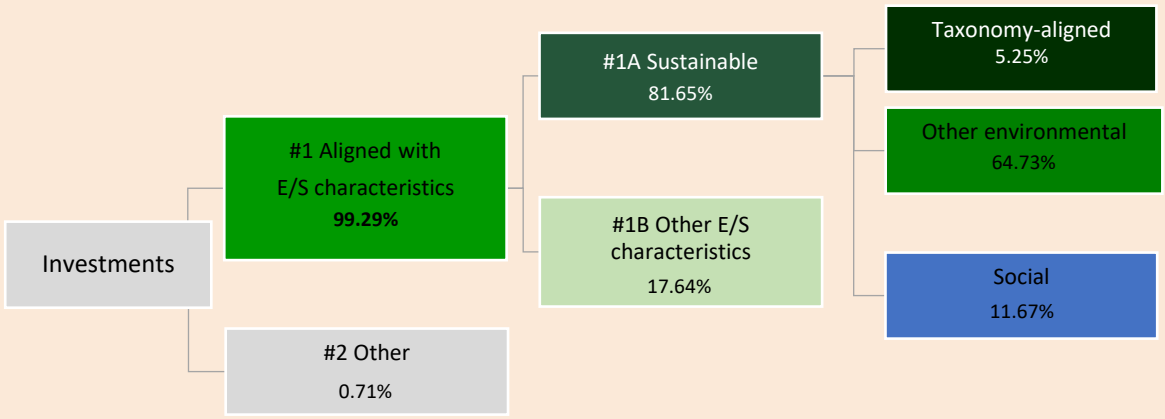
Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/01/2024 to 01/03/2024**

Largest Investments	Sector	Sub-Sector	Country	% Assets
ASML HOLDING NV	Information Technology	Semiconductors & Semiconductor Equipment	NETHERLANDS	5.13%

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

Sector	*Sub-Sector*	*% Assets*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 5.25% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

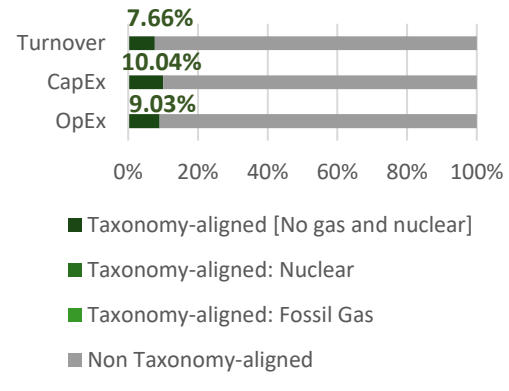
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

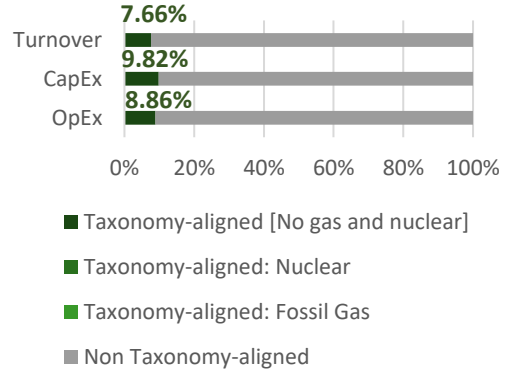
☐ Yes:

☐ In fossil gas ☐ In nuclear energy



☒ No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.



[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

2. Taxonomy-alignment of investments **excluding sovereign bonds***

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 01/03/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.09% and the share of investment in enabling activities was 6.23%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?***

At the end of the previous period, the percentage of investments with Taxonomy alignment was 6.02%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was 64.73% at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 11.67%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

The MSCI Europe ESG Climate Transition (EU CTB) Select Net Total Return Index (the "Index") is denominated in Euros and representative of the performance of an investment strategy constructed from the MSCI Europe Index (the "Parent Index") and designed to exceed the minimum standards of the EU Climate Transition Benchmarks (the "EU CTB") required under delegated acts supplementing Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011 (the "Benchmark Regulation")

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

- The weighted average greenhouse gas (GHG) intensity (the “WACI”) of the index is 243
- The weighted average carbon footprint intensity of the portfolio is 88.46
- The weighted average carbon footprint intensity of the Benchmark is 88.75

- ***How did this financial product perform compared with the reference benchmark ?***

The investment objective of the Sub-Fund is to track both the upward and downward evolution of the Index, while minimising the difference between the return of the Sub-Fund and the return of the Index.

- The weighted average greenhouse gas (GHG) intensity (the “WACI”) of the index is 243
- The weighted average carbon footprint intensity of the portfolio is 88.46
- The weighted average carbon footprint intensity of the Benchmark is 88.75

- ***How did this financial product perform compared with the broad market index ?***

The MSCI Europe ESG Climate Transition (EU CTB) Select Net Total Return Index (the “Index”) is denominated in Euros and representative of the performance of an investment strategy constructed from the MSCI Europe Index (the "Parent Index") and designed to exceed the minimum standards of the EU Climate Transition Benchmarks (the “EU CTB”) required under delegated acts supplementing Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011 (the “Benchmark Regulation”)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Amundi S&P Eurozone PAB Net Zero Ambition

Legal entity identifier: 549300S2QFMA0J61VE20

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [x] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [x] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **82.87%** of sustainable investments
  - [ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [x] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [ ] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index (S&P Eurozone LargeMidCap Net Zero 2050 Paris-Aligned ESG Net Total Return Index) meeting the minimum standards for EU Paris Aligned Benchmarks (EU PABs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The weighted average greenhouse gas (GHG) intensity (the "WACI") is used to measure the attainment of each of the environmental or social characteristics promoted by this financial product. The WACI is the weighted average of the Index components' greenhouse gas (GHG) emissions (expressed in tCO2) divided by the enterprise value including cash.
The GHG emissions are divided into Scope 1, Scope 2, and Scope 3 emissions.
- Scope 1 emissions: those from sources owned or controlled by the company.
- Scope 2 emissions: those caused by the generation of electricity purchased by the company.

- Scope 3 emissions: include all other indirect emissions that occur in a company's value chain.

The sustainability indicator used is the weighted average greenhouse gas (GHG) intensity (the "WACI") of the ESG reference benchmark that is measured against the weighted average greenhouse gas (GHG) intensity (the "WACI") score of the Parent index.

At the end of the period:
- the weighted average greenhouse gas (GHG) intensity (the "WACI") of the S&P Eurozone LargeMidCap Net Zero 2050 Paris-Aligned ESG Net Total Return Index is 228.20
- the weighted average greenhouse gas (GHG) intensity (the "WACI") of the S&P Eurozone LargeMidCap Index (the "Parent Index") is 789.81

… and compared to previous periods?

At the end of the previous period the weighted average greenhouse gas (GHG) intensity (the "WACI") of the index was 245.38

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account,

in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

  The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
  The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:
  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

  Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

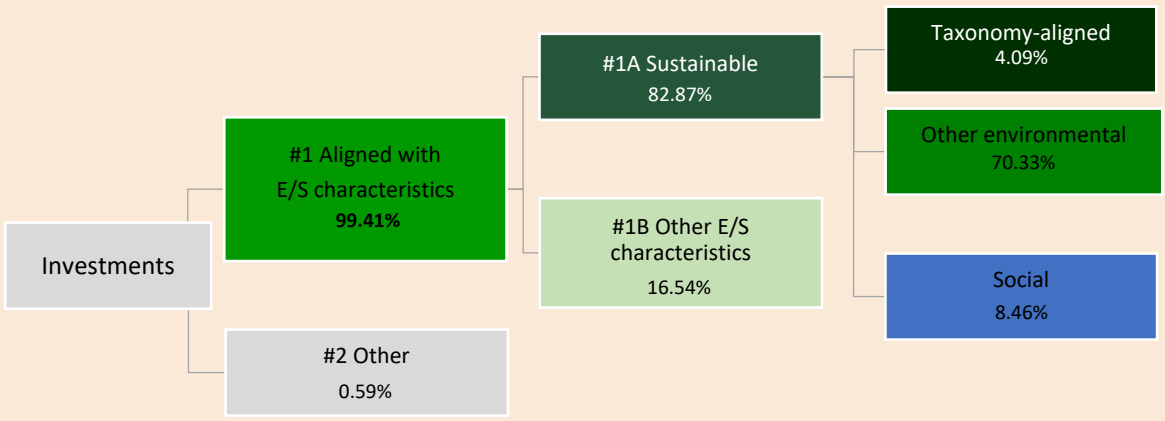
Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/10/2023 to 30/09/2024**

Largest Investments	Sector	Sub-Sector	Country	% Assets
ASML HOLDING NV	Information Technology	Semiconductors & Semiconductor Equipment	Netherlands	6.74%
SAP SE / XETRA	Information Technology	Software & Services	Germany	4.98%
SCHNEIDER ELECT SE	Industrials	Capital goods	France	4.46%
SANOFI - PARIS	Health Care	Pharmaceuticals Biotech & Life Sciences	France	3.91%
HERMES INTERNATIONAL	Consumer Discretionary	Consumer Durables & Apparel	France	3.77%

DEUTSCHE BOERSE AG	Financials	Financial Services	Germany	2.01%

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 4.09% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

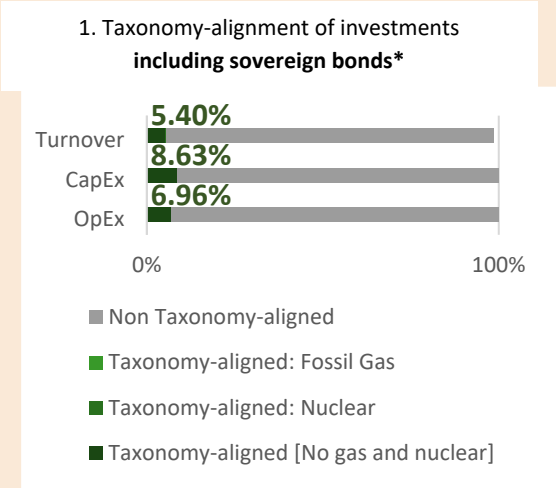
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

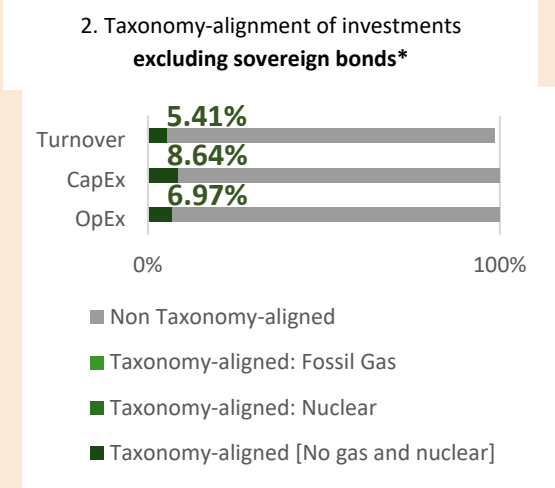
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy



☒ No



Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.03% and the share of investment in enabling activities was 4.11%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period: the percentage of investments with Taxonomy alignment was 3.34%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **70.33%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 8.46%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

The S&P Eurozone LargeMidCap Net Zero 2050 Paris-Aligned ESG Net Total Return Index (the "Index"), denominated in Euros, and representative of the performance of eligible equity securities from the S&P Eurozone LargeMidCap Index (the "Parent Index") selected and weighted to be collectively compatible with a 1.5°C global warming climate scenario.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Transparency of sustainable investments in periodic reports (Unaudited information)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Lyxor Net Zero 2050 S&P Europe Climate PAB (DR) UCITS ETF

Legal entity identifier: 549300ZEQXL0Z5VWDJ60

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

This report is based on the sub-fund's portfolio composition as of 8th February 2024, before it merged into Amundi MSCI Europe Climate Transition CTB.

Did this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

☐ It made **sustainable investments with an environmental objective:** _____

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **73.68%** of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective

☐ It made a **sustainable investments with a social objective:** _____

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index (**100% S&P EUROPE LARGEMIDCAP NET ZERO 2050 PARIS-ALIGNED ESG INDEX**) meeting the minimum standards for EU Paris Aligned Benchmarks (EU PABs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011

During the financial year, the product continuously promoted environmental characteristics by aiming to reduce its carbon intensity by aligning its carbon footprint intensity to that of its Benchmark 100% S&P EUROPE LARGEMIDCAP NET ZERO 2050 PARIS-ALIGNED ESG INDEX.

Sustainability indicators measure how the environmental or social characteristics

- ***How did the sustainability indicators perform?***

The weighted average greenhouse gas (GHG) intensity (the "WACI") is used to measure the attainment of each of the environmental or social characteristics promoted by this financial

promoted by the financial product are attained.

product. The WACI is the weighted average of the Index components' greenhouse gas (GHG) emissions (expressed in tCO2) divided by the enterprise value including cash. The GHG emissions are divided into Scope 1, Scope 2, and Scope 3 emissions.

-Scope 1 emissions: those from sources owned or controlled by the company.

-Scope 2 emissions: those caused by the generation of electricity purchased by the company.

-Scope 3 emissions: include all other indirect emissions that occur in a company's value chain.

The sustainability indicator used is the weighted average greenhouse gas (GHG) intensity (the "WACI") of the ESG reference benchmark that is measured against the weighted average greenhouse gas (GHG) intensity (the "WACI") score of the Parent index.

At the end of the period:

- the weighted average greenhouse gas (GHG) intensity (the “WACI”) of the S&P EUROPE LARGEMIDCAP NET ZERO 2050 PARIS-ALIGNED ESG INDEX is 253.08
- the weighted average greenhouse gas (GHG) intensity (the “WACI”) of the S&P Europe LargeMidCap Index (the “Parent Index”) is 846.66

… and compared to previous periods?

At the end of the previous period, the weighted average greenhouse gas (GHG) intensity (the “WACI”) of the index was 257.71

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

  The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
  The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:
  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

  Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of

this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

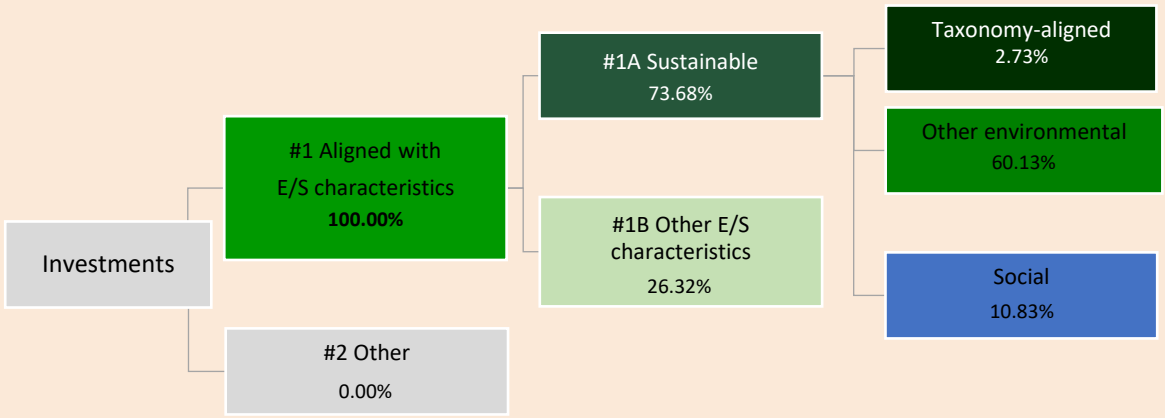
Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/01/2024 to 08/02/2024**

Largest Investments	Sector	Sub-Sector	Country	% Assets
ASML HOLDING NV	Information Technology	Semiconductors & Semiconductor Equipment	NETHERLANDS	4.36%
ASTRAZENECA GBP	Health Care	Pharmaceuticals Biotec & Life Sciences	UNITED KINGDOM	3.40%
NOVO NORDISK A/S-B	Health Care	Pharmaceuticals Biotec & Life Sciences	DENMARK	3.37%

ALLIANZ SE-REG	Financials	Insurance	GERMANY	1.45%

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

Sector	*Sub-Sector*	*% Assets*

Health Care	Pharmaceuticals Biotec & Life Sciences	16.39%
Financials	Banks	10.72%
Industrials	Capital Goods	10.54%
Consumer Staples	Household & Personal Products	6.43%
Information Technology	Semiconductors & Semiconductor Equipment	5.10%
Financials	Financial Services	4.54%
Consumer Staples	Food, Beverage & Tobacco	4.35%
Consumer Discretionary	Consumer Durables & Apparel	4.00%
Financials	Insurance	3.92%
Information Technology	Software & Services	3.83%
Industrials	Commercial & Professional Services	3.43%

Utilities	Water Utilities	0.19%
Energy	Energy Equipment & Services	0.09%
Information Technology	Technology Hardware & Equipment	0.06%
Materials	Construction Materials	0.04%

Materials	Containers & Packaging	0.02%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 2.73% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

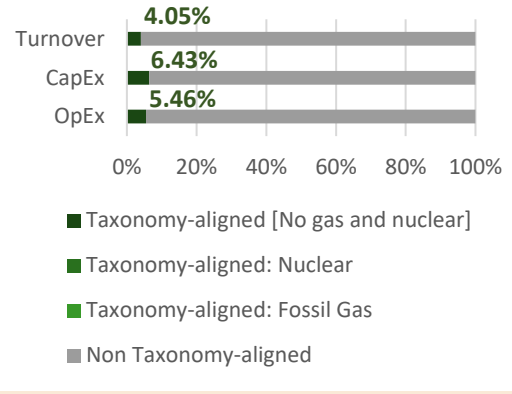
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

☐ Yes:

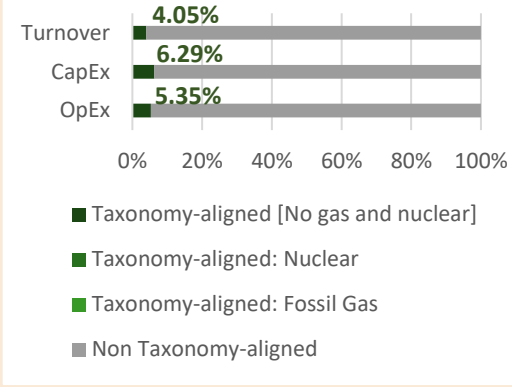
☐ In fossil gas ☐ In nuclear energy

☒ No



Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

2. Taxonomy-alignment of investments **excluding sovereign bonds***

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 08/02/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.03% and the share of investment in enabling activities was 3.17%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 2.81%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was 60.13% at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 10.83%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

The S&P Europe LargeMidCap Net Zero 2050 Paris-Aligned ESG Net Total Return Index (the "Index"), denominated in Euros, and representative of the performance of eligible equity securities from the S&P Europe LargeMidCap Index (the "Parent Index") selected and weighted to be collectively compatible with a 1.5°C global warming climate scenario.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

- The weighted average greenhouse gas (GHG) intensity (the "WACI") of the index is 253.08
- The weighted average carbon footprint intensity of the portfolio is 84.25
- The weighted average carbon footprint intensity of the Benchmark is 104.65

- ***How did this financial product perform compared with the reference benchmark ?***

The investment objective of the Sub-Fund is to track both the upward and downward evolution of the Index, while minimising the difference between the return of the Sub-Fund and the return of the Index.

- The weighted average greenhouse gas (GHG) intensity (the "WACI") of the index is 253.08
- The weighted average carbon footprint intensity of the portfolio is 84.25
- The weighted average carbon footprint intensity of the Benchmark is 104.65

- ***How did this financial product perform compared with the broad market index ?***

The S&P Europe LargeMidCap Net Zero 2050 Paris-Aligned ESG Net Total Return Index (the "Index"), denominated in Euros, and representative of the performance of eligible equity securities from the S&P Europe LargeMidCap Index (the "Parent Index") selected and weighted to be collectively compatible with a 1.5°C global warming climate scenario.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5 first paragraph, of Regulation (EU) 2020/852

Product name: Amundi Euro Government Green Bond

Legal entity identifier: 549300JJ88530HI0FM17

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Did this financial product have a sustainable investment objective?

- [X] **Yes**
- [ ] **No**

- [X] It made **sustainable investments with an environmental objective:** 99.99%
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [ ] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____ of sustainable investments
  - [ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [ ] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met ?

The Sub Fund continuously met its sustainable investment objective through among others replicating an Index (100% SOLACTIVE EURO GOVERNMENT GREEN BOND INDEX) composed of bonds which are considered as “Green Bond” according to the Climate Bonds Initiative.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainabilty indicator used to measure the attainment of the sustainable investment objective of this financial product is the percentage of bonds considered as “Green Bond” by the Climate Bond Initiative in the Index composition.

At the end of the period the portfolio holds 100 % of green bonds.

… and compared to previous periods?

At the end of the previous period the portfolio held 100 % of green bonds

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

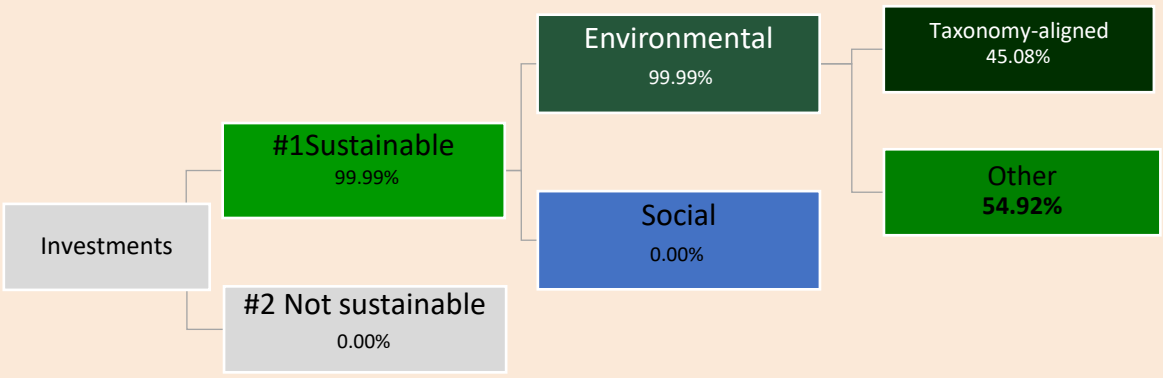
- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.



What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/10/2023 to 30/09/2024**

Largest Investments	Sector	Sub-Sector	Country	% Assets

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Sustainable covers sustainable investments with environmental or social objectives
#2 Not sustainable includes investments which do not qualify as sustainable investments.

In which economic sectors were the investments made ?

Sector	*Sub-Sector*	*% Assets*
Treasuries	*Treasuries*	*99.99%*
Cash	*Cash*	*0.01%*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund has an environmental sustainable investment objective. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 45.08% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

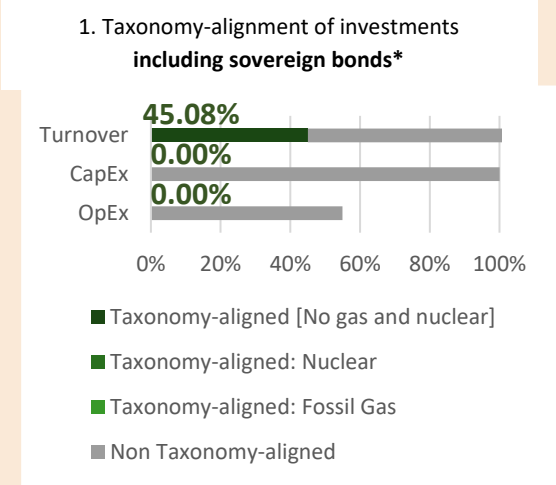
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

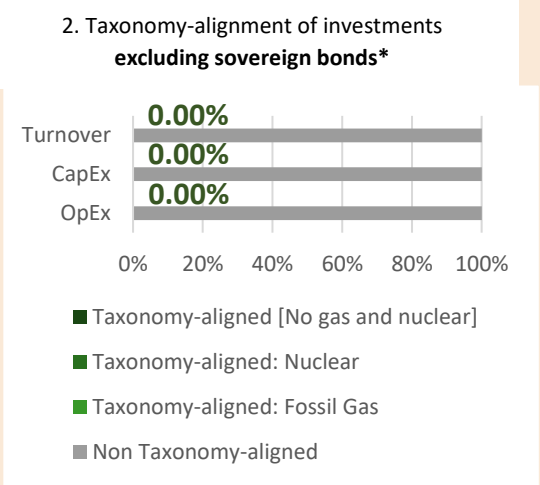
Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy



☒ No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period: the percentage of investments with Taxonomy alignment was 45.52%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **54.92%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 0.00%.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

What actions have been taken to attain the sustainable investment objective during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

The Index is representative of the performance of investment grade rated Green Bonds issued by European countries and denominated in EUR. Green Bonds are issued in order to fund projects that have positive environmental outcomes.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Amundi Corporate Green Bond

Legal entity identifier: 549300DGW633M4IHL895

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] **Yes**
- [x] **No**

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [x] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **85.13%** of sustainable investments
  - [ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [x] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [ ] with a social objective
- [ ] It made a **sustainable investments with a social objective:** _____
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an Index (100% SOLACTIVE EUR USD IG CORPORATE GREEN BOND TR INDEX) composed of bonds which are considered as “Green Bond” according to the Climate Bonds Initiative.

How did the sustainability indicators perform?

The use of proceeds of the bonds is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product.

More precisely, to be eligible for inclusion in the Solactive EUR USD IG Corporate Green Bond TR Index” (the “Index"), a bond must be considered as a “Green Bond” by the Climate Bonds Initiative.
The Sub-Fund followed an extra-financial approach significantly engaging that contributes to and

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

has positive impacts on the energy and ecological transition by investing permanently at least 90% of the net asset value of the Sub-Fund in Green Bonds comprising the Index.

At the end of the period, the portfoio holds 99.42 % of green bonds.

- ***… and compared to previous periods?***

At the end of the previous period the portfolio held 99.57 % of green bonds

- ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

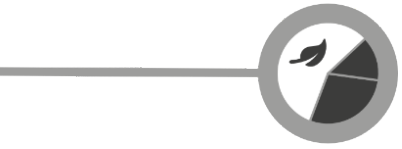
Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

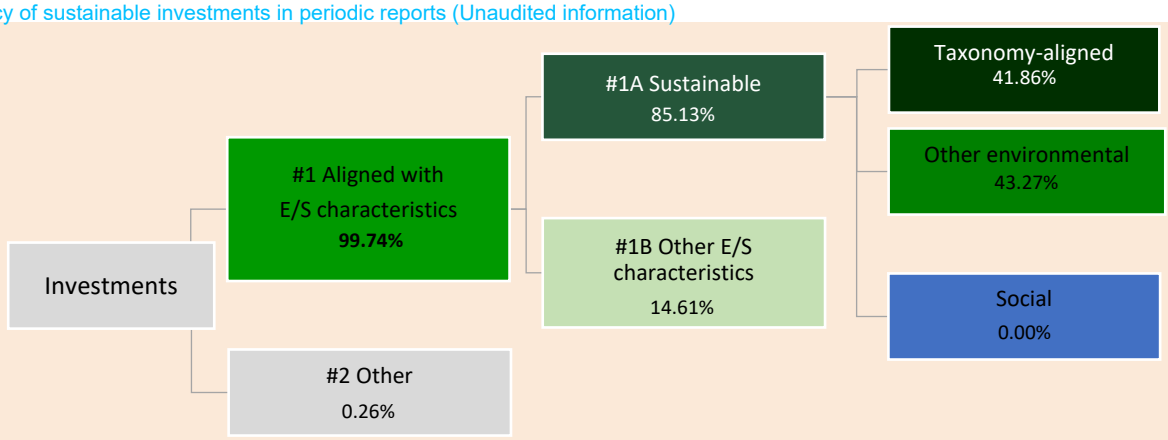
- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates

the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.



- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/10/2023 to 30/09/2024**

Largest Investments	Sector	Sub-Sector	Country	% Assets
CABKSM VAR 11/30 EMTN	Corporates	Banking	Spain	0.86%

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- ***In which economic sectors were the investments made ?***

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 41.86% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

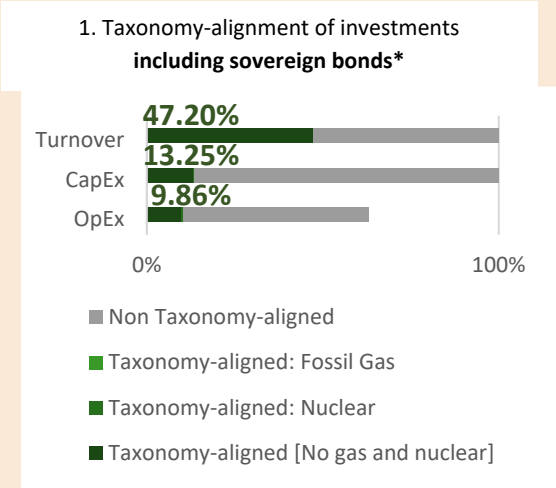
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

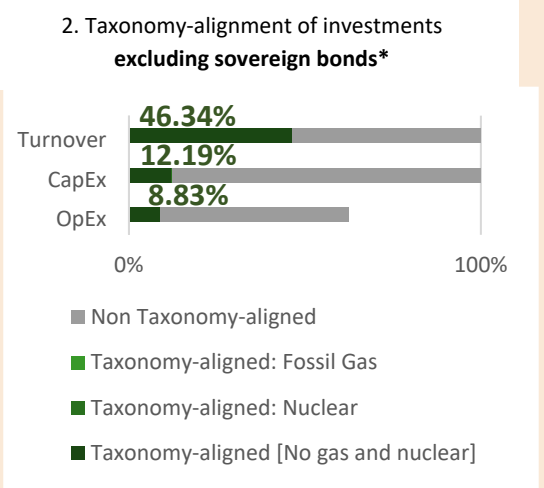
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy



☒ No



Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies
-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period: the percentage of investments with Taxonomy alignment was 42.89%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **43.27%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 0.00%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

The "Solactive EUR USD IG Corporate Green Bond TR Index" (the "Index") offers an exposure to investment grade rated Green Bonds denominated in EUR and USD issued by companies.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Amundi STOXX Europe 600 Energy ESG Screened

Legal entity identifier: 213800BXD1FUAIZFLG25

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] **Yes**
- [x] **No**

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [ ] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____ of sustainable investments
  - [ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [ ] with a social objective
- [x] It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promoted environmental and/or social characteristics through among others, replicating an Index (STOXX Europe 600 Energy ESG+ Index) “integrating an environmental, social and governance ("ESG") negative screening approach.

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, the weight of the Parent Index constituents were tilted based on an environmental, social and governance (“ESG”) rating.

How did the sustainability indicators perform?

The Sustainalytics ESG Risk Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. The Sustainalytics ESG Risk Ratings (the "ESG score") measures a company's exposure to industry-specific material ESG risks and how well a company is managing those risks. Exposure refers to the extent to which

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

a company is exposed to different material ESG issues.

More precisely, the STOXX Europe 600 Energy ESG+ Index is constructed from the securites from the STOXX Europe 600 belonging to the ICB Energy Industry (the "Eligible Universe").

- At the end of the period, the Sustainalytics ESG Risk Rating of the index STOXX Europe 600 Energy ESG+ Index is 78.16.
- At the end of the period, the Sustainalytics ESG Risk Rating of the parent index STOXX Europe 600 is 75.18.

- ***… and compared to previous periods?***

This is the first SFDR periodic report produced for this sub-fund.

- ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

This product did not commit to make sustainable investments during the period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

This product did not commit to make sustainable investments during the period.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

  This product did not commit to make sustainable investments during the period.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  This product did not commit to make sustainable investments during the period.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

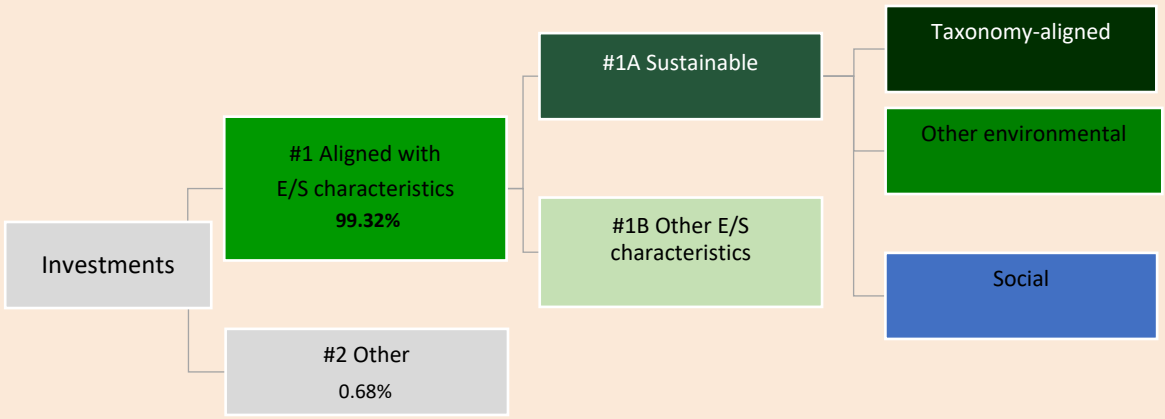
Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/10/2023 to 30/09/2024**

Largest Investments	Sector	Sub-Sector	Country	% Assets
BP PLC	Energy	Oil, Gas & Consumable Fuels	United Kingdom	28.74%
SIEMENS ENERGY AG	Industrials	Capital goods	Germany	12.52%

GALP ENERGIA -B	Energy	Oil, Gas & Consumable Fuels	Portugal	4.17%
TENARIS SA	Energy	Energy Equipment & Services	Luxembourg	3.63%

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

Sector	Sub-Sector	% Assets
Energy	*Oil, Gas & Consumable Fuels*	*58.13%*
Industrials	*Capital goods*	*23.97%*
Energy	*Energy Equipment & Services*	*9.99%*
Utilities	*Gas Utilities*	*7.23%*
Others	*Others*	*0.00%*
Forex	*Forex*	*-0.00%*
Cash	*Cash*	*0.68%*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

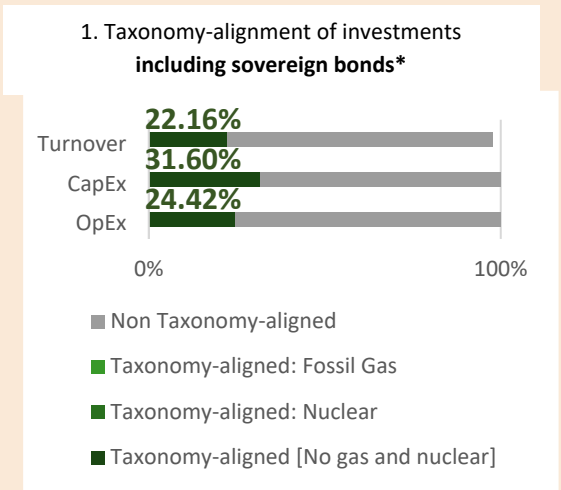
The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 12.88% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

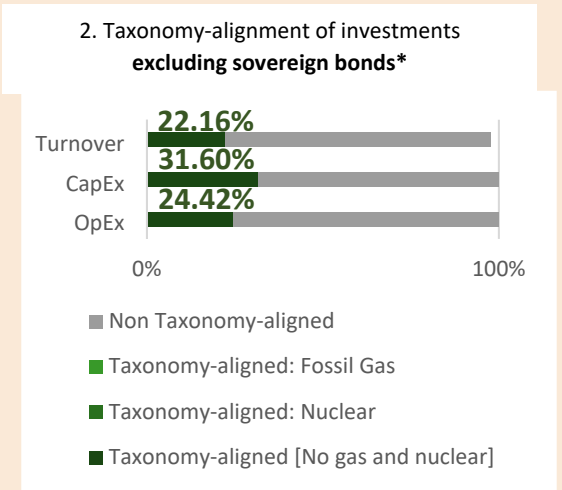
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy



☒ No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 3.94% and the share of investment in enabling activities was 16.18%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?***

This is the first SFDR periodic report produced for this sub-fund.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

This product did not commit to have environmental sustainable investments over the period.

What was the share of socially sustainable investments ?

This product did not commit to have social sustainable investments over the period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

The Index is an equity index that tracks the performance of the companies of the STOXX Europe 600 (which represents the 600 leading securities of European developed countries) belonging to the Energy Industry as determined by the ICB after a set of compliance, involvement and ESG performance screens are applied.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Amundi Global Gender Equality

Legal entity identifier: 213800EGF3QX5VPK3Z27

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] **Yes**
- [x] **No**

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [x] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **60.49%** of sustainable investments
  - [ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [x] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [ ] with a social objective
- [ ] It made a **sustainable investments with a social objective:** _____
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promoted environmental and/or social characteristics through among others, replicating the Index (Solactive Equileap Global Gender Equality Index), integrating an environmental, social and governance ("ESG") rating.

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

How did the sustainability indicators perform?

The Equileap Gender Diversity Score is used to measure the attainment of each of the environmental or social characteristics promoted by this financial product. The Equileap Gender Diversity Score (the "Equileap Score") is calculated based on criteria which are grouped in

Sustainability indicators measure how the environmental or social characteristics promoted by the

financial product are attained.

categories such as gender balance in leadership and workforce; equal compensation and worklife balance; policies promoting gender equality; commitment to transparency and accountability.

The sustainability indicator used is the Equileap Gender Diversity Score of the ESG reference benchmark that is measured against the weighted Gender Scores of the Parent Index.

At the end of the period:
- the Equileap Gender Diversity Score of the Solactive Equileap Global Gender Equality Index is 68.13
- the Equileap Gender Diversity Score of the Solactive GBS Developed Markets Large & Mid Cap Index (the "Parent Index") is 55.22

… and compared to previous periods?

This is the first SFDR periodic report produced for this sub-fund.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account,

in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

  The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
  The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:
  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

  Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

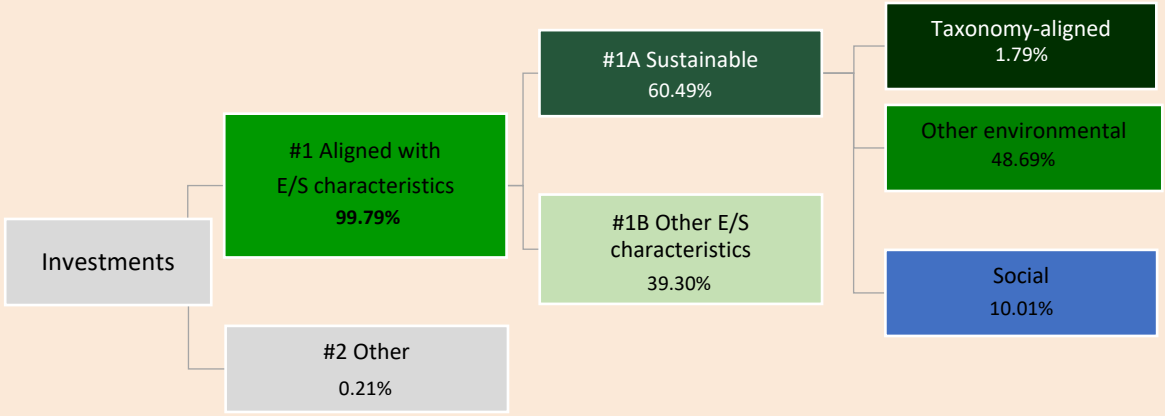
Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/10/2023 to 30/09/2024**

Largest Investments	Sector	Sub-Sector	Country	% Assets
WALGREENS BOOTS ALLIANCE INC	Consumer Staples	Consumer Staples Distribution & Retail	United States	0.70%

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 1.79% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

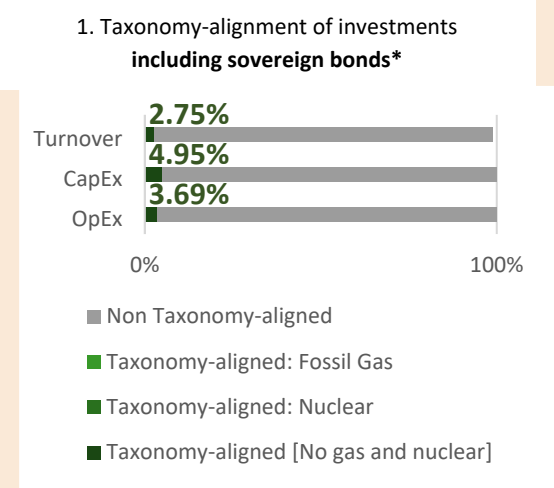
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

☐ Yes:

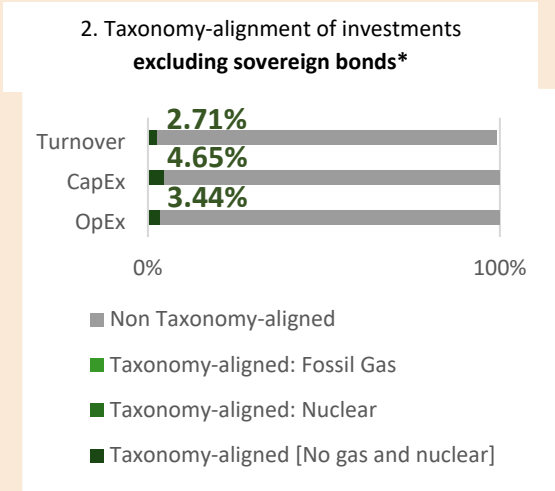
☐ In fossil gas ☐ In nuclear energy

☒ No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.



[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full



greenhouse gas emission levels corresponding to the best performance.

criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What was the share of investments in transitional and enabling activities ?***

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 1.55%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?***

This is the first SFDR periodic report produced for this sub-fund.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **48.69%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 10.01%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

Solactive Equileap Global Gender Equality Index is an equity index that provides exposure to the leading companies in the fields of gender equality where components meet ESG requirements.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Transparency of sustainable investments in periodic reports (Unaudited information)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI MSCI DIGITAL ECONOMY ESG SCREENED

Legal entity identifier: 213800T5UFKM1F6WPD72

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** _____	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **35.36%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made a **sustainable investments with a social objective:** _____	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promoted environmental and/or social characteristics through, among others, replicating the Index (MSCI ACWI IMI Digital Economy & Metaverse ESG Filtered) integrating an environmental, social and governance ("ESG") rating.

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or

promoted by the financial product are attained.

social characteristic promoted by this financial product.

MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company.
The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the MSCI ACWI IMI Digital Economy & Metaverse ESG Filtered Index is 7.084

- the MSCI ESG score of the MSCI ACWI Investable Market Index (IMI) is 6.7

… and compared to previous periods?

This is the first SFDR periodic report produced for this sub-fund.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee

matters, respect for human rights, anti-corruption and anti-bribery matters.

companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

  The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
  The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:
  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

  Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

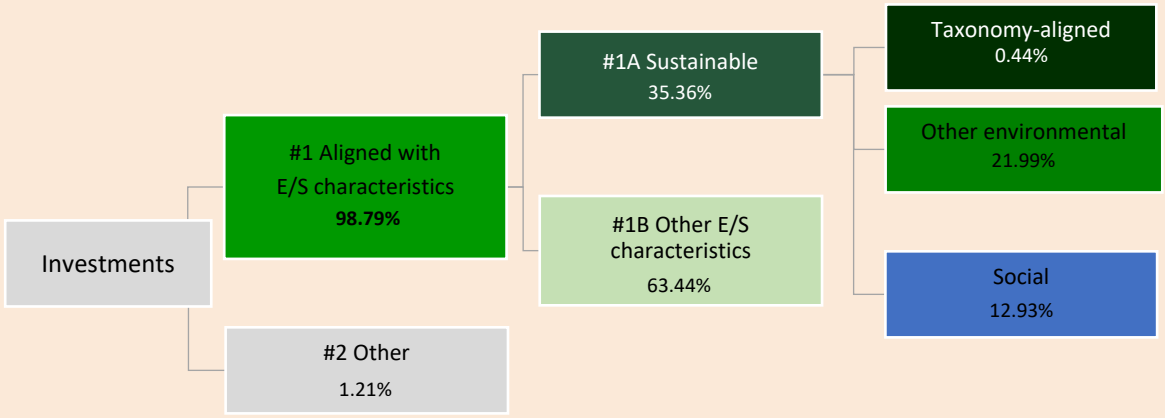
Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/10/2023 to 30/09/2024**

Largest Investments	Sector	Sub-Sector	Country	% Assets
ORACLE CORP	Information Technology	Software & Services	United States	3.36%

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

Sector	*Sub-Sector*	*% Assets*
Information Technology	*Software & Services*	*27.04%*

Consumer Discretionary	*Consumer Discretionary Distribution & Retail*	*14.57%*
Financials	*Financial Services*	*14.01%*

Consumer Staples	*Consumer Staples Distribution & Retail*	*0.01%*
Others	*Others*	*0.00%*
Cash	*Cash*	*1.21%*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.44% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

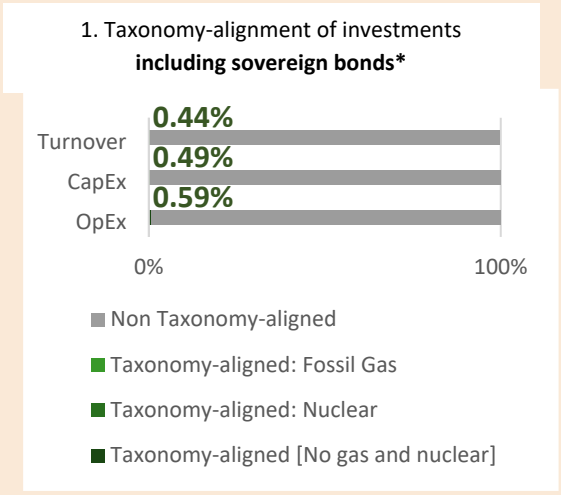
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

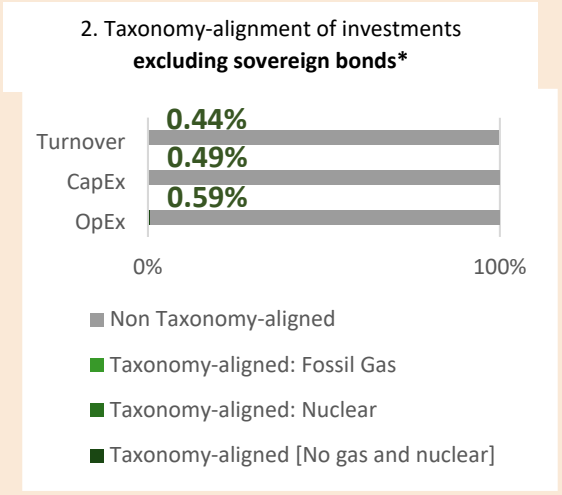
Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy



☒ No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.44%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

This is the first SFDR periodic report produced for this sub-fund.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **21.99%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 12.93%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

The Index aims to represent the performance of companies that are expected to derive significant revenues from the digital economy value chain including the metaverse ecosystem and to exclude companies which are Environmental, Social and Governance ("ESG") laggards relative to the theme universe.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Transparency of sustainable investments in periodic reports (Unaudited information)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI MSCI DISRUPTIVE TECHNOLOGY ESG SCREENED

Legal entity identifier: 2138007XHBINA7L93Q09

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] **Yes**
- [x] **No**

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [x] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **45.43%** of sustainable investments
  - [ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [x] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [ ] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promoted environmental and/or social characteristics through among others, replicating the Index (MSCI ACWI IMI Disruptive Technology ESG Filtered) integrating an environmental, social and governance ("ESG") rating.

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

Sustainability indicators measure how the environmental or social characteristics promoted by the

How did the sustainability indicators perform?

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry

financial product are attained.

material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the MSCI ACWI IMI Disruptive Technology ESG Filtered Index is 7.472
- the MSCI ESG score of the MSCI ACWI Investable Market Index (IMI) is 6.7

… and compared to previous periods?

This is the first SFDR periodic report produced for this sub-fund.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests

detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

  The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
  The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:
  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

  Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

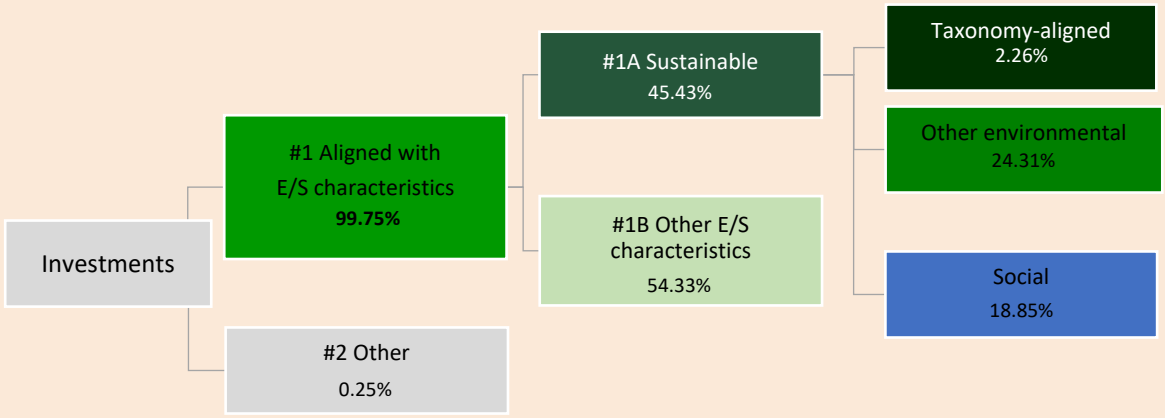
Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/10/2023 to 30/09/2024**

Largest Investments	Sector	Sub-Sector	Country	% Assets
ORACLE CORP	Information Technology	Software & Services	United States	3.12%
INTL BUSINESS MACHINES CORP	Information Technology	Software & Services	United States	2.90%

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

Sector	*Sub-Sector*	*% Assets*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 2.26% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

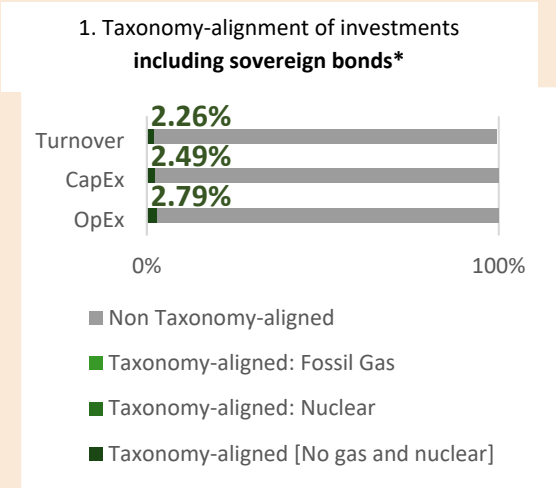
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

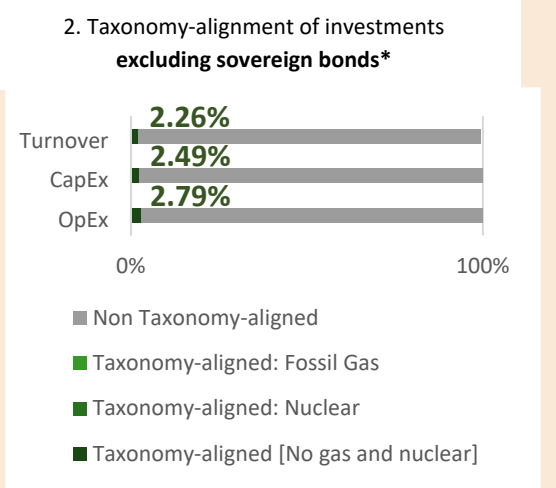
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy



☒ No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 1.96%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

This is the first SFDR periodic report produced for this sub-fund.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **24.31%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 18.85%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

The Index aims to represent the performance of companies aligned to themes commonly associated with or described as disruptive technology and to exclude companies which are Environmental, Social and Governance ("ESG") laggards relative to the theme universe.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI MSCI FUTURE MOBILITY ESG SCREENED

Legal entity identifier: 2138009XSCOQRL54WY80

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 73.11% of sustainable investments
  - [ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [ ] with a social objective
- [ ] It made a **sustainable investments with a social objective:** _____
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promoted environmental and/or social characteristics through among others, replicating the Index (MSCI ACWI IMI Future Mobility ESG Filtered Index) integrating an environmental, social and governance ("ESG") rating.

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry

financial product are attained.

material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the MSCI ACWI IMI Future Mobility ESG Filtered Index is 7.125
- the MSCI ESG score of the MSCI ACWI Investable Market Index (IMI) is 6.7

… and compared to previous periods?

This is the first SFDR periodic report produced for this sub-fund.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

  The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

  The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

  Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

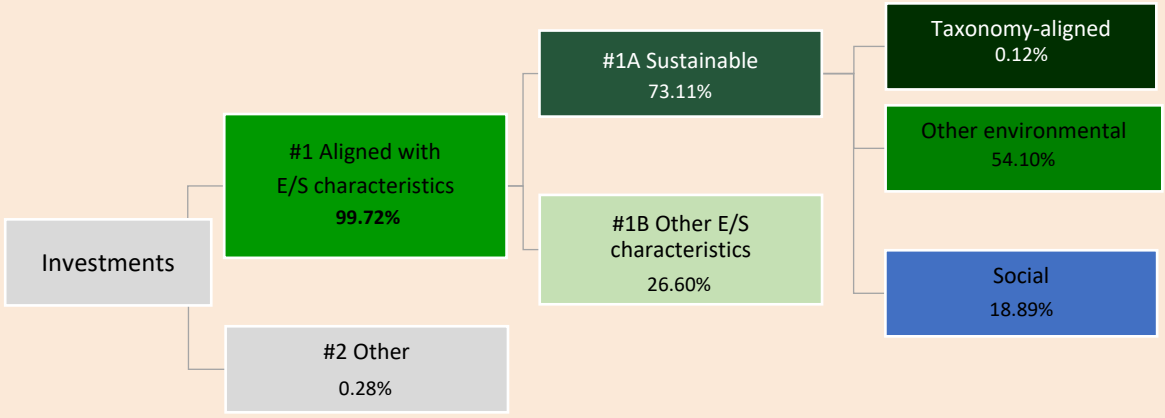
Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/10/2023 to 30/09/2024**

Largest Investments	Sector	Sub-Sector	Country	% Assets
NVIDIA CORP	Information Technology	Semiconductors & Semiconductor Equipment	United States	16.43%
HITACHI LTD	Industrials	Capital goods	Japan	16.29%
UBER TECHNOLOGIES INC	Industrials	Transportation	United States	15.16%
TESLA INC	Consumer Discretionary	Automobiles & Components	United States	12.79%
DENSO CORP	Consumer Discretionary	Automobiles & Components	Japan	3.52%
LI AUTO INC-CLASS A	Consumer Discretionary	Automobiles & Components	Cayman Islands	2.29%
SAMSUNG SDI CO LTD	Information Technology	Technology Hardware & Equipment	Korea	2.12%

XPENG INC -	Consumer	Automobiles &	Cayman Islands	1.12%

CLASS A SHARES	Discretionary	Components		
BORGWARNER INC	Consumer Discretionary	Automobiles & Components	United States	1.11%

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

Sector	*Sub-Sector*	*% Assets*
Consumer Discretionary	*Automobiles & Components*	*30.04%*
Industrials	*Capital goods*	*23.27%*
Industrials	*Transportation*	*17.53%*
Information Technology	*Semiconductors & Semiconductor Equipment*	*17.17%*

Information Technology	*Technology Hardware & Equipment*	*4.49%*
Materials	*Chemicals*	*3.22%*
Materials	*Metals & Mining*	*1.89%*
Industrials	*Commercial & Professional Services*	*1.10%*
Consumer Discretionary	*Consumer Durables & Apparel*	*0.40%*
Consumer Staples	*Household & Personal Products*	*0.29%*
Consumer Discretionary	*Consumer Discretionary Distribution & Retail*	*0.22%*
Energy	*Oil, Gas & Consumable Fuels*	*0.11%*
Others	*Others*	*0.00%*
Cash	*Cash*	*0.27%*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.12% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

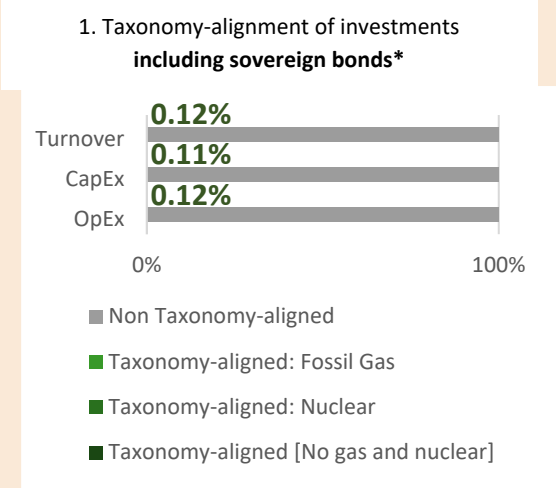
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

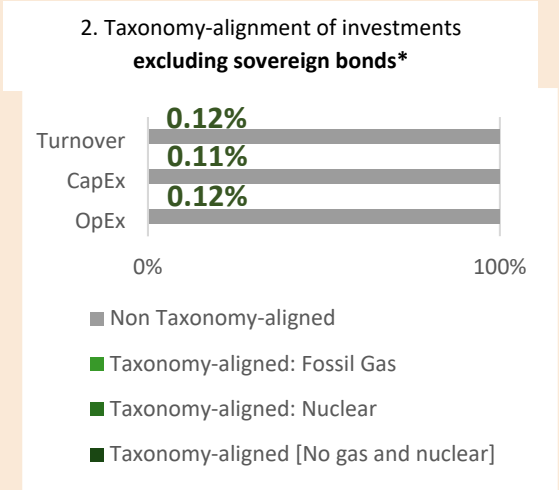
☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No



low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.



Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.12%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

This is the first SFDR periodic report produced for this sub-fund.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **54.10%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 18.89%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

The Index aims to represent the performance of companies that are expected to derive significant revenues from energy storage technologies, autonomous vehicles, shared mobility and new transportation methods and to exclude companies which are Environmental, Social and Governance ("ESG") laggards relative to the theme universe.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Amundi MSCI Millennials ESG Screened

Legal entity identifier: 213800YM4X4Y6L955761

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [x] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [x] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **43.37%** of sustainable investments
  - [ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [x] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [ ] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promoted environmental and/or social characteristics through among others, replicating the Index (MSCI ACWI IMI Millennials ESG Filtered Index), integrating an environmental, social and governance ("ESG") rating.

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

Sustainability indicators measure how the environmental or social characteristics promoted by the

How did the sustainability indicators perform?

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry

financial product are attained.

material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the MSCI ACWI IMI Millennials ESG Filtered Net Total Return Index is 7.205
- the MSCI ESG score of the MSCI ACWI Investable Market Index (IMI) is 6.7

… and compared to previous periods?

This is the first SFDR periodic report produced for this sub-fund.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests

detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

  The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
  The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:
  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

  Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

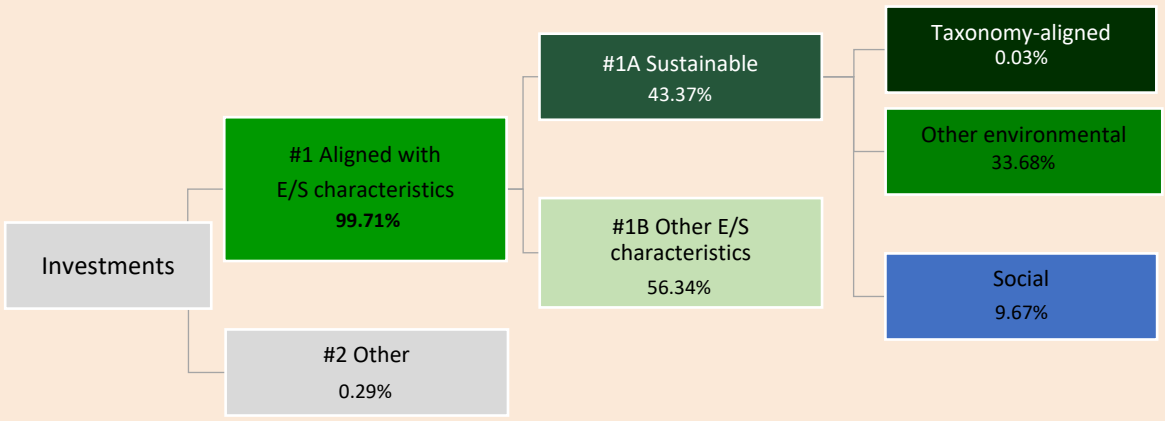
Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/10/2023 to 30/09/2024**

Largest Investments	Sector	Sub-Sector	Country	% Assets
NVIDIA CORP	Information Technology	Semiconductors & Semiconductor Equipment	United States	1.97%
WALMART INC	Consumer Staples	Consumer Staples Distribution & Retail	United States	1.90%
PAYPAL HOLDINGS INC	Financials	Financial Services	United States	1.89%
APPLE INC	Information Technology	Technology Hardware & Equipment	United States	1.87%
GIVAUDAN-REG	Materials	Chemicals	Switzerland	1.85%
UNILEVER PLC (GBP)	Consumer Staples	Household & Personal Products	United Kingdom	1.85%
TENCENT HOLDINGS LTD	Communication Services	Media & Entertainment	Cayman Islands	1.81%
COCA-COLA CO/THE	Consumer Staples	Food, Beverage & Tobacco	United States	1.78%
PROSUS NV	Consumer Discretionary	Consumer Discretionary Distribution & Retail	Netherlands	1.78%

		Distribution & Retail		
MERCADOLIBRE	Consumer Discretionary	Consumer Discretionary Distribution & Retail	United States	1.76%
XIAOMI CORP	Information Technology	Technology Hardware & Equipment	Cayman Islands	1.72%
BOOKING HOLDINGS INC	Consumer Discretionary	Consumer Services	United States	1.71%
DANONE	Consumer Staples	Food, Beverage & Tobacco	France	1.70%
COLGATE-PALMOLIVE CO	Consumer Staples	Household & Personal Products	United States	1.69%

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

Sector	*Sub-Sector*	*% Assets*

Consumer Staples	*Food, Beverage & Tobacco*	*16.94%*
Consumer Discretionary	*Consumer Discretionary Distribution & Retail*	*13.90%*
Communication Services	*Media & Entertainment*	*12.14%*

Others	*Others*	*0.00%*
Cash	*Cash*	*0.28%*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.03% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

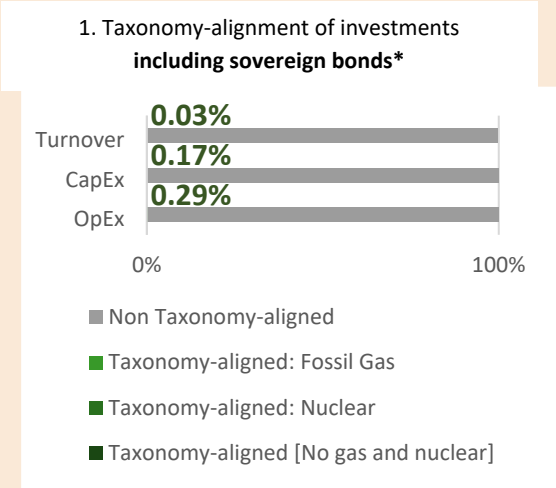
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

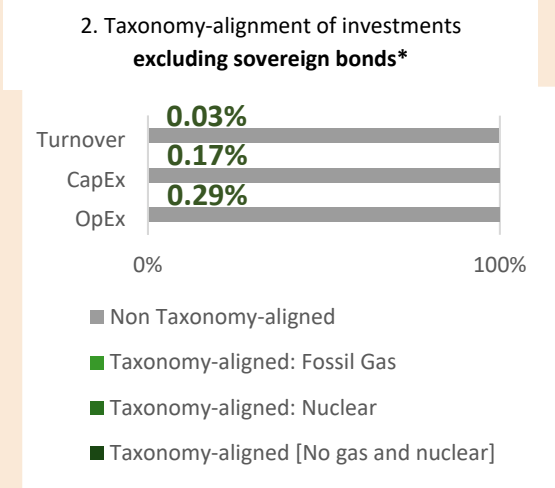
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy



☒ No



Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.02%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

This is the first SFDR periodic report produced for this sub-fund.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **33.68%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 9.67%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

The Index objective is to measure the performance of companies that are expected to derive significant revenues from industries that target the preferences of the “millennial” generation and to exclude companies which are Environmental, Social and Governance (“ESG”) laggards relative to the theme universe as further described in this Annex 1 - ESG Related Disclosures to the Sub-Fund’s Prospectus.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Commento macroeconomico*

Considerazioni generali

Nel 2023 l'attività economica mondiale ha subito un complessivo rallentamento rispetto all'anno precedente: a fronte di una sostanziale stabilità delle economie emergenti, la decelerazione della crescita si è concentrata nelle economie dei paesi avanzati ed in particolare in Europa. Le ultime stime per il 2023 puntano infatti ad un tasso di crescita del PIL globale al 3,1 per cento dal 3,5 per cento dell'anno precedente, per effetto di una crescita più modesta registrata nei paesi avanzati precisamente dal precedente 2,6 per cento all'1,5 stimato per quest'anno, con la riconferma del 4,1 per cento del 2022 nell'ambito dei paesi emergenti.
Il rallentamento dell'espansione economica ha caratterizzato soprattutto l'Europa, con il persistente anche se più moderato impatto dell'inflazione su consumi e investimenti, gli effetti delle politiche monetarie restrittive ed il rientro dei volumi d'interscambio commerciale globale. Quest'ultimo ha continuato a risentire della debole attività economica del settore manifatturiero mentre negli ultimi mesi dell'anno anche il settore dei servizi è risultato meno resiliente rispetto alla prima parte del 2023. In questo contesto, tra le aree avanzate, l'economia statunitense ha fornito i segnali di maggiore tenuta, soprattutto grazie agli effetti ritardati della politica fiscale espansiva e alla forza del mercato del lavoro nonostante il significativo inasprimento della politica monetaria da parte della Federal Reserve.
L'inflazione globale, dal canto suo, è risultata in discesa dal 7,9% del 2022 al 5,4% stimato per il 2023, con un trend al ribasso che ha accomunato aree sviluppate ed economie emergenti. L'inflazione complessiva nelle aree avanzate è attesa in media intorno al 4,7% per cento nel 2023, in rientro dal 7,5% per cento dello scorso anno. Dal canto loro, le aree emergenti puntano ad un'inflazione intorno al 5,8% per cento, in calo rispetto all'8,2% per cento del 2022.
Sul versante delle politiche monetarie, per il tramite di nuovi rialzi dei tassi decisi dalla Federal Reserve, dalla Banca d'Inghilterra e dalla BCE è proseguita la stretta delle principali banche centrali: tale stretta si è concentrata nella prima parte dell'anno e con un ritmo in rallentamento rispetto a quello tenuto nel 2022. La decelerazione nell'intensità dei rialzi ha rappresentato il preludio all'attuale fase di stabilità, con gli ultimi aumenti decisi tra luglio e settembre e l'assenza di ulteriori inasprimenti da parte delle tre banche centrali nel trimestre finale dell'anno. Tra le aree economiche sviluppate, continua a fare eccezione la banca centrale giapponese, che si è astenuta dal rivedere i tassi, sebbene abbia dato il via ad una fase di normalizzazione della politica di controllo dei rendimenti a lungo termine.

Area Euro

La crescita del PIL in termini reali nell'area dell'euro si è progressivamente indebolita nel terzo trimestre, dopo una sostanziale stabilità nel primo trimestre ed il successivo leggero aumento dello 0,2 per cento nel secondo. Nel terzo trimestre si è registrato un contributo modesto della domanda interna in presenza di un forte impatto negativo dell'interscambio netto con l'estero. I dati più recenti per il quarto trimestre, inoltre, indicano il probabile protrarsi della debolezza della crescita anche negli ultimi mesi dell'anno. Il mercato del lavoro continua a mostrare capacità di tenuta, nonostante gli indicatori più recenti forniscano segnali di moderazione mentre sul versante dei consumi delle famiglie così come degli investimenti delle imprese le attese puntano ad un ulteriore indebolimento. Anche le stime per gli investimenti nell'edilizia residenziale indicano una probabile contrazione, in un contesto di debolezza della domanda e di condizioni di finanziamento restrittive. Infine, i volumi delle esportazioni dell'area dell'euro dovrebbero crescere a un ritmo modesto nel quarto trimestre, a causa dell'indebolimento dell'interscambio mondiale.
Dal canto suo, il calo dell'inflazione si è accentuato nella seconda parte dell'anno, risultando più sensibile rispetto a gran parte delle attese negli ultimi mesi del 2023: inoltre, tra i principali paesi è stata ancora una volta la Germania a far registrare un sensibile calo che ha portato l'inflazione tedesca al 3,7 per cento di dicembre, dal 4,3 per cento di settembre e dal 6,1 per cento ad agosto. Guardando all'area euro nel suo complesso l'inflazione è scesa al 2,9 per cento a dicembre, in calo da livelli intorno al 6 per cento di metà anno e rispetto al picco a due cifre registrato nell'ultima parte del 2022. Le ultime rilevazioni preliminari per

il mese di dicembre mostrano che nell'ultimo mese dell'anno i prezzi sono cresciuti dello 0,6 per cento in Italia, del 3,1 per cento in Spagna e del 3,7 per cento in Francia. A guidare al ribasso l'inflazione sono stati soprattutto quei settori che tanto avevano contribuito alla precedente crescita, come l'energia e l'alimentare. Tuttavia, negli ultimi mesi il rientro è stato più diffuso e più rapido anche nel settore dei servizi oltre che in quello manifatturiero.
Le stime di crescita per l'area euro puntano ad un modesto 0,5 per l'anno in corso, da un 3,3 per cento del 2022, pertanto in sensibile rallentamento rispetto al forte rimbalzo post-pandemico messo a segno nei due anni precedenti. A guidare il rientro della crescita tra i principali paesi è la Germania, il cui PIL è stimato in calo a -0,1 per cento per l'intero 2023 dal +1,8 per cento del 2022, con Francia e Italia rispettivamente in rientro da 2,5 per cento e 2,7 per cento a 0,8 per cento e 0,7 per cento. L'economia spagnola, pur anch'essa in moderazione dovrebbe chiudere il 2023 con una crescita maggiore degli altri principali paesi, a 2,3 per cento dal 5,8 per cento. Le stime per l'inflazione media nell'anno, grazie al calo più accentuato degli ultimi mesi, sono in sensibile rientro dall'8,4 per cento del 2022 al 5,5 per cento. Le attuali previsioni puntano inoltre ad un ulteriore rientro dell'inflazione al 2,4 per cento nel 2024.
Dal canto suo, la BCE ha proseguito il rapido ciclo di rialzi dei tassi iniziato l'anno precedente, con un movimento complessivo a partire dal primo rialzo deciso a luglio 2022 giunto a ben 450 punti base complessivi in poco più di dodici mesi. Nelle due riunioni del primo trimestre del 2023 il ritmo è rimasto intenso e pari a mezzo punto percentuale, mentre nelle successive quattro riunioni la banca centrale ha rallentato la misura dei rialzi a 25 punti base. Dopo l'ultimo rialzo annunciato a settembre la BCE si è astenuta dall'approvare nuove strette monetarie, comunicando il raggiungimento di livelli dei tassi ritenuti sufficientemente elevati allo scopo di conseguire l'obiettivo del rientro dell'inflazione a target di medio periodo. Al contempo, la BCE ha proseguito nella riduzione del proprio bilancio, non solo per il tramite delle scadenze delle operazioni di rifinanziamento con le banche (TLTRO), ma anche per effetto del mancato reinvestimento dei titoli in scadenza nel portafoglio APP, prima parziale e poi a pieno regime da luglio a dicembre. Nell'ultima riunione dell'anno la banca centrale ha altresì annunciato una modesta riduzione del portafoglio del programma pandemico PEPP per la seconda parte del prossimo anno.

USA
Negli Stati Uniti l'espansione dell'attività economica è proseguita a ritmo sostenuto nella prima metà del 2023 mostrando altresì una notevole resilienza nei mesi successivi, con una conseguente revisione al rialzo delle stime di crescita del PIL per l'intero 2023, attualmente attesa al 2,4 per cento rispetto al 2,1 per cento dell'anno precedente. Nella prima metà dell'anno i consumi delle famiglie sono stati sostenuti dal ricorso ai risparmi accumulati in precedenza nonché dalla forza del mercato del lavoro; tale sostegno, tuttavia, diverrà più limitato in futuro, sia per effetto del già avvenuto ricorso ai risparmi, sia in relazione alla moderazione nella crescita dell'occupazione e dei salari. Negli ultimi mesi, infatti, le condizioni del mercato del lavoro hanno mostrato un maggiore equilibrio tra domanda e offerta anche nel settore dei servizi, con una attenuazione della crescita alla luce del minore effetto di sostegno della politica fiscale e del probabile impatto ritardato della stretta sui tassi. Sul versante dell'inflazione prosegue il trend di moderazione come confermato dagli ultimi dati mensili sia dei prezzi al consumo che di quelli alla produzione. L'inflazione complessiva sta infatti puntando ad una crescita media nell'anno di poco superiore al 4 per cento da livelli quasi doppi del 2022. Come nelle altre principali aree avanzate, inoltre, il trend di rientro dell'inflazione è atteso in proseguimento nel 2024, puntando in media non lontano dal 2,6 per cento annuo.
Dal canto suo, la Federal Reserve ha proseguito il ciclo di rialzi iniziato lo scorso anno, rallentando il ritmo degli inasprimenti da mezzo punto ad un quarto di punto percentuale, con quattro rialzi complessivi nel 2023, l'ultimo dei quali deciso a luglio. Nelle successive riunioni, pur mostrandosi ancora disposta a decidere ulteriori eventuali inasprimenti monetari, la banca centrale ha mantenuto i tassi stabili, grazie al rientro dell'inflazione e alla moderazione dei fattori alla base dell'aumento dei prezzi, segnalando altresì di aver raggiunto livelli ritenuti coerenti con l'atteso ritorno dell'inflazione ai target di medio periodo. Nella riunione di fine anno, inoltre, la Fed ha aperto ad un giro di boa nel ciclo dei tassi nel 2024.

UK

La crescita dell'economia del Regno Unito appare debole nel 2023, puntando ad una sensibile decelerazione dal 4,1 per cento di aumento complessivo del PIL in termini reali nel 2022 allo 0,5 per cento, con stime di espansione modesta anche per il 2024. Al contempo, i progressi nel rientro dell'inflazione sono risultati più evidenti negli ultimi mesi: l'inflazione è infatti attesa in calo al 5,5 per cento dai livelli molto alti del 2022 pari a 8,5 per cento, i livelli più elevati registrati tra le aree avanzate. Le rilevazioni del PIL degli ultimi mesi hanno confermato modeste variazioni sia per effetto della debolezza dei consumi che del ristagno degli investimenti. Il mercato del lavoro appare ancora solido, ma mostra segnali di moderazione nella crescita dei salari mentre l'inflazione in rientro sostiene i redditi in termini reali. Nel complesso, è quindi attesa una stagnazione del PIL nella seconda metà dell'anno. Sul versante della politica monetaria la Banca d'Inghilterra ha proseguito con la stretta, riaccelerandone il ritmo a mezzo punto percentuale nella riunione di giugno, rispetto al quarto di punto delle riunioni precedenti nonché decidendo un nuovo rialzo di 25 punti base ad agosto. Facendo seguito ai dati successivi che hanno invece mostrato un rientro più rapido del previsto dell'inflazione e una più debole performance dell'economia rispetto alle stime, la banca centrale si è astenuta da nuovi rialzi, mantenendo i tassi stabili nella rimanente parte dell'anno. La comunicazione della banca centrale mostra soddisfazione per i trend recenti che vedono segnali di moderazione nell'aumento dei salari nominali ed un significativo rientro dell'impatto dei prezzi dei beni alimentari ed energetici e dei loro effetti secondari sull'economia. Tuttavia la banca centrale astenendosi dal voler indicare alcun rientro dal livello attuale dei tassi nell'immediato futuro, ha tenuto a precisare che la guardia rimane alta sui rischi d'inflazione.

Giappone

La crescita economica nipponica dovrebbe evidenziare una moderazione nel quarto trimestre, considerando i recenti indicatori di fiducia delle imprese che segnalano una certa perdita di slancio nel settore dei servizi, e la persistente debolezza dell'attività nel comparto manifatturiero. I dati economici, infatti, indicano che la divergenza tra i due settori si sta riducendo, come sta del resto accadendo nelle altre aree economiche sviluppate. Inoltre, a fronte di una modesta ripresa della domanda interna rispetto ai deboli andamenti osservati nel trimestre precedente, la ripresa delle esportazioni sembra aver recentemente subito una battuta d'arresto. Complessivamente, gli indicatori dell'inflazione continuano a segnalare una solida dinamica di fondo dei prezzi che riflette anche una robusta crescita salariale.

Per l'economia nipponica, le stime attuali puntano ad una crescita del PIL intorno all'1,8 per cento nel 2023, in parziale ripresa rispetto all'1 per cento messo a segno l'anno precedente. Nel 2023 anche l'inflazione dovrebbe segnare un aumento dal 2,5 per cento al 3,2 per cento, in controtendenza rispetto alle altre principali aree sviluppate e a buona parte dei paesi emergenti.

Nel corso del 2023, inoltre, la Banca Centrale del Giappone ha continuato a differenziarsi fortemente dalle banche centrali degli altri principali paesi avanzati in termini di politica monetaria, mantenendo in essere un'azione accomodante attraverso l'allentamento quantitativo e tassi invariati. Tuttavia anche la Banca del Giappone si è progressivamente mossa verso una normalizzazione dei rendimenti a lungo termine, riducendo il controllo sul livello raggiunto dalla curva dei rendimenti, un passo che pare preludere in prospettiva ad una politica meno accomodante.

Emergenti

Nei Paesi emergenti, la dinamica macroeconomica complessiva appare resiliente rispetto alle aree sviluppate, soprattutto dove le misure di sostegno pubblico appaiono più consistenti e nei paesi in cui la politica monetaria risulta meno restrittiva. Come anticipato, la crescita dei paesi emergenti dovrebbe confermarsi complessivamente in linea con quella dello scorso anno, sebbene con differenze nella dinamica tra i differenti paesi e le aree. A trainare la crescita sono stati ancora una volta soprattutto i paesi asiatici e tra questi l'economia cinese. Da quest'ultima ci si attende un recupero del 5,2 per cento nel 2023, dal più contenuto livello del 3 per cento messo a segno l'anno precedente. Dopo la forte decelerazione dell'attività economica nel secondo trimestre, dovuta al brusco calo nel settore immobiliare, il rallentamento dell'economia cinese sembra attenuarsi: gli indicatori più recenti dell'attività economica cinese mostrano infatti segni di stabilizzazione, con un recente recupero delle vendite al dettaglio e la stabilizzazione dell'espansione della produzione industriale. Pertanto, se da un lato la contrazione degli investimenti

immobiliari si è intensificata nel terzo trimestre, dall'altro l'attività al di fuori di tale settore si è confermata positiva. Al contempo, l'economia è parzialmente sostenuta da interventi pubblici mirati principalmente a beneficiare l'attività nel settore dell'edilizia residenziale. Venendo ai principali numeri di crescita attesa per il 2023, l'India appare resiliente, solo in moderato rallentamento dal 7,2 per cento al 6,5 per cento e se i tassi di crescita appaiono più contenuti in America Latina, Brasile ed il Messico dovrebbero mettere a segno rispettivamente un 3 per cento ed un 3,4 per cento. Il quadro sull'inflazione vede un rientro generalizzato e significativo della crescita dei prezzi. Tra i paesi asiatici, in Cina l'inflazione è attesa in rallentamento a 0,4 per cento dall'1,9 del 2022, in India al 5,8 per cento dal 6,6 ed in Indonesia al 3,7 per cento dal 4,2. Anche nei paesi latino americani il calo dell'inflazione appare rilevante, soprattutto in Brasile ma anche in Messico e la moderazione della crescita dei prezzi è un trend diffuso anche negli altri principali paesi emergenti.

Mercati

I **mercati azionari globali** hanno chiuso l'anno con rialzi diffusi, anche se con un andamento non lineare nel corso dell'anno. Dopo un avvio positivo, in scia alle attese per gli effetti positivi della riapertura della Cina e di un ridimensionamento della politica restrittiva della Fed, i listini globali hanno risentito delle turbolenze del sistema bancario regionale negli Stati Uniti e della dinamica al rialzo dell'inflazione nel periodo febbraio-marzo per poi recuperare in scia a dati societari resilienti. Nei mesi estivi il forte rialzo dei tassi di rendimento ha penalizzato i corsi azionari, con la debolezza che si è trascinata fino ad ottobre. Successivamente, l'assunzione di un atteggiamento *dovish* da parte della FED ha favorito il sentiment di risk-on nelle diverse aree, confermando l'influenza della banca centrale statunitense sui mercati. Il 2023 si è così chiuso con un rialzo del MSCI World prossimo al 20% in Eur grazie alle attese per una inversione decisa della politica della Fed che si sono rafforzate in chiusura di anno con conseguente calo dei rendimenti. La dispersione a livello settoriale è stata ampia, con un gap tra settore migliore (tecnologia) e peggiore (servizi di pubblica utilità) di circa il 50% e con poco più del 30% delle azioni che ha sovraperformato l'indice generale.
Anche i **mercati obbligazionari** hanno chiuso l'anno con dinamiche positive, con andamenti volatili tra i diversi periodi. Il primo semestre si è chiuso con i rendimenti dei titoli di Stato al rialzo sui segmenti a breve e medio termine delle curve, conseguenza della revisione verso l'alto delle attese sulle azioni delle principali banche centrali indotte sia dalle dichiarazioni "*hawkish*" dei banchieri centrali che dagli esiti delle diverse riunioni di politica monetaria. I rendimenti a lungo termine sono stati invece frenati nella dinamica dalle persistenti incertezze sull'evoluzione della crescita globale e dal ridimensionamento delle pressioni inflative per effetto del calo dei prezzi energetici. Sullo stesso periodo, i dati macro confortanti hanno fornito sostegno al mercato obbligazionario societario, soprattutto al segmento high yield (HY), più sensibile all'evoluzione del ciclo economico; resiliente il debito emergente, in scia soprattutto al differenziale di crescita paesi Emergenti-paesi sviluppati (EM-DM) a favore dei primi.

I mesi estivi sono stati invece caratterizzati da un generalizzato incremento dei tassi di rendimento governativi. Le curve dei rendimenti core (USA e Germania) hanno evidenziato un movimento verso l'alto, soprattutto della parte a medio-lungo termine. Alla base del movimento di irripidimento va riportato l'impegno delle banche centrali a mantenere i tassi di riferimento su livelli elevati a lungo, con ciò determinando un effetto trascinamento sulla parte a lunga della curva; la parte a breve termine è stata invece limitata nei movimenti dalla consapevolezza degli investitori che il ciclo di rialzi fosse prossimo alla conclusione sia in Usa che in area Euro. Ad alimentare il movimento anche la decisione della BoJ di fine luglio di allentare la strategia di controllo della curva dei rendimenti (*Yield Curve Control - YCC)* con il tasso a 10 giapponese che è salito a poco meno dello 0,65% (massimo da inizio 2014). L'obbligazionario societario ha evidenziato un andamento positivo, soprattutto per le emissioni con profilo di rischio più alto che hanno beneficiato del ridimensionamento delle preoccupazioni sulla crescita grazie alla resilienza dell'economia Usa che si pensava potesse attutire il colpo della ripresa cinese inferiore alle attese sulla dinamica dell'economia globale. Nel periodo estivo, i titoli dei paesi emergenti in valuta forte hanno beneficiato del ridimensionamento dello spread che tuttavia non ha totalmente compensato il rialzo dei rendimenti USA; di supporto il rafforzamento di USD.

L'ultima parte dell'anno ha visto una completa inversione di tendenza dei mercati obbligazionari in scia all'irrompere di un nuovo scenario per le politiche monetarie. Dopo che a ottobre è proseguito il rialzo dei rendimenti, a novembre la conferma della pausa della Fed e i toni meno aggressivi di Powell nella conferenza stampa hanno favorito una inversione a U sui tassi. La discesa dei rendimenti è stata amplificata a dicembre dal meeting della Fed che, ancora in stand-by, ha messo nelle sue previsioni ben 3 tagli dei tassi nel 2024. Anche i governativi europei si sono mossi in scia a quelli USA, sebbene la BCE, pur mantenendo i tassi stabili, abbia escluso di aver iniziato a parlare di tagli dei tassi, dato il focus sull'inflazione, pur in presenza di un'economia europea debole. Il credito, oltre ad aver beneficiato del calo dei rendimenti, ha visto anche un restringimento degli spread, specie nel segmento HY. Il cambio di rotta della FED si è riflesso positivamente sul debito Emergente in valuta forte, sensibile alla politica monetaria USA.

In rialzo i mercati azionari, soprattutto quelli dei paesi sviluppati.

I mercati azionari globali hanno archiviato l'anno con performance positive. L'indice MSCI World Net Total Return Index ha segnato un +19,6% in Euro.

Nel dettaglio, a livello regionale, negli USA l'avvio d'anno è stato particolarmente positivo, grazie a fattori tecnici (chiusura di posizioni corte da parte di alcuni investitori sui settori ciclici) e alla narrativa sullo scenario economico più benigna rispetto alla stagflazione (attese di inflazione in calo, rialzi dei tassi ufficiali prossimi al capolinea e tagli previsti da fine anno da parte della Fed, e infine un rallentamento economico inferiore alle attese precedenti, conseguenza anche della riapertura della Cina). Da febbraio in poi il mercato azionario USA ha invece evidenziato una dinamica negativa, pur in presenza di dati di crescita confortanti, in scia soprattutto alla revisione delle aspettative degli investitori sulle azioni della Fed, con spinta al rialzo delle previsioni sul tasso terminale. Il movimento al ribasso degli indici è stato successivamente rafforzato dalla crisi di SVB scoppiata nella prima metà di marzo, con penalizzazione soprattutto del settore bancario. La debolezza si è estesa fino alla prima parte di maggio, complici sia le vicende di First Republic Bank, altra banca regionale USA finita nell'occhio del ciclone, che le preoccupazioni sull'inflazione alimentate dalla decisione dell'OPEC+ di ridurre la produzione di petrolio. Successivamente, il mercato ha trovato un valido supporto nei buoni dati sul mercato del lavoro e nelle aspettative via via più consolidate di una pausa da parte della Fed nel ciclo di rialzi a cui si è aggiunto il raggiungimento dell'accordo sul tetto del debito pubblico. Nell'ultima fase del primo semestre l'esito della riunione di politica monetaria della Fed del 14 giugno, prima, e i commenti "*hawkish*" di Powell nel corso dell'audizione al Congresso, poi, hanno tolto smalto al mercato azionario. Si è ridimensionata infatti l'attesa della fine prossima del ciclo di rialzi e di una successiva inversione di orientamento della Fed e si sono materializzate attese di nuovi rialzi del tasso ufficiale.
I mesi estivi sono stati caratterizzati dalla prosecuzione della dinamica negativa per il mercato azionario USA, conseguenza del forte aumento dei rendimenti di mercato e nonostante le sorprese positive sul fronte del ciclo economico e i dati societari resilienti.
Del calo dei rendimenti dell'ultima parte dell'anno hanno beneficato particolarmente gli indici USA, con un vistoso rally che le ha portate sui massimi dell'anno. A guidare il rialzo il tech e i settori ciclici (auto, industriali, risorse di base) che hanno sovraperformato i comparti difensivi (utilities, consumi non ciclici, telecom).
A livello di fattori, il segmento Growth ha evidenziato una sovraperformance rispetto al Value. A livello di capitalizzazione, da segnalare la performance più contenuta delle small e mid cap, monitorate dall'indice Russell 2000, rispetto alla large cap (conseguenza dell'apprezzabile performance delle mega-cap tecnologiche). A livello settoriale, rialzi ampi sono stati realizzati da tecnologici, servizi di comunicazione, consumi ciclici; dinamiche negative da servizi di pubblica utilità ed energetici.
L'indice Nasdaq, dopo aver chiuso il 2022 sui livelli più bassi da settembre 2020, ha messo a segno un importante rialzo, sostenuto nella prima parte del 2023 dal rinnovato interesse degli investitori per il settore tecnologico dopo la pubblicazione di dati societari particolarmente superiori alle attese e nell'ultima parte dell'anno dal calo marcato dei rendimenti che ha permesso all'indice di recuperare la debolezza dei mesi estivi.

Gli indici europei hanno evidenziato in generale rialzi più contenuti rispetto a quelli USA. Nella fase iniziale dell'anno, hanno beneficiato di una revisione al rialzo delle aspettative di crescita, in scia alla riapertura della Cina, importante partner commerciale del Vecchio Continente, di un posizionamento contenuto degli investitori internazionali rispetto alle borse USA e di valutazioni interessanti, archiviando dinamiche migliori rispetto agli indici delle altre aree sviluppate. Nel mese di marzo i mercati europei, già indeboliti dalle vicende del sistema finanziario USA, hanno subito le tensioni generate dagli eventi che hanno coinvolto Credit Suisse. Successivamente, gli indici europei hanno messo a segno un progressivo recupero, pur frenati nell'intensità del rialzo dalla pubblicazione di dati reali e di fiducia deboli.
Nei mesi estivi hanno subito gli effetti dell'incremento generalizzato dei rendimenti, chiudendo in negativo per poi recuperare in chiusura d'anno, beneficiando dei toni cauti utilizzati dalla Fed e da Powell e nonostante un orientamento più cauto della BCE in materia di taglio dei tassi nel corso del 2024 e dati di crescita deboli.

Tra gli altri paesi sviluppati, in rialzo ampio, sia in valuta locale che in euro, il Giappone, supportato dall'orientamento accomodante della BoJ associato alla debolezza dello yen e da buoni dati societari. A ciò va aggiunto la *moral suasion* adottata dal regolatore di mercato a favore di un miglioramento della valorizzazione delle società quotate e al conseguente aumento del rapporto Price/Book Value attraverso un miglior impiego delle risorse e un aumento dei buyback. In rialzo in valuta locale e in Euro l'Australia: il paese ha beneficiato della resilienza dell'economia globale, essendo molto sensibile alla dinamica del ciclo economico globale via esportazioni verso il resto del mondo.
L'area Emergente in aggregato ha chiuso l'anno in rialzo sia in USD che in Euro. A livello di aree, più contenuto il rialzo dell'Asia, frenata dalla Cina. Gli indici cinesi, sostenuti a inizio anno da indiscrezioni circa l'introduzione di ulteriori misure di sostegno per ridimensionare il problema di liquidità di alcune società immobiliari e da allentamenti delle restrizioni Covid anche per gli stranieri, hanno via via risentito delle rinnovate tensioni commerciali con gli USA sul settore tecnologico, dei rischi geopolitici legati a Taiwan nonché della pubblicazione di dati coerenti con una ripresa inferiore alle attese, in scia alla persistente debolezza del segmento immobiliare. Nell'area, più resiliente il mercato indiano, in rialzo sia in USD che in Euro, sostenuto da buone prospettive di crescita. Migliore la performance dell'America Latina, effetto dal recupero del Brasile (sostenuto dalla proposta di un piano di spesa pubblica migliore delle aspettative). Nel segmento EEMEA, in evidenza la Turchia che, indebolita nei primi mesi dell'anno dall'incertezza politica in avvicinamento alle presidenziali di maggio, ha successivamente messo a segno un recupero: l'indice in valuta locale ha chiuso l'anno con un rialzo a due cifre ma la performance in euro è risultata negativa per effetto del forte deprezzamento della valuta. In recupero il Sud Africa nell'ultima parte dell'anno, dopo la debolezza della prima metà per l'aggravarsi della crisi energetica, con blackout continui.
Tra gli altri mercati, in rialzo sull'anno Taiwan e Corea, sia in valuta locale che in Euro, in scia al generalizzato recupero del settore tecnologico.
Performance dei principali indici mondiali del semestre (in Euro, al 29 dicembre): MSCI World +19,6%, MSCI Usa +22,2%, MSCI Euro +15,8%, MSCI Emerging Markets +6,1%.

In calo i rendimenti governativi su tutte le scadenze; positivo il segmento corporate, in scia anche al ridimensionamento dei differenziali soprattutto sul segmento HY.

I rendimenti dei titoli di Stato core hanno evidenziato cali generalizzati sulle scadenze a breve e medio termine, guidati nel movimento dai toni via via più accomodanti utilizzati dalle principali banche centrali, soprattutto dalla Fed. Anche i rendimenti sul tratto a lungo termine delle principali curve hanno evidenziato movimenti al ribasso, in reazione soprattutto a dati di inflazione generale in calo e aspettative di rallentamento. Sul mercato obbligazionario societario, performance positive soprattutto per il segmento HY, grazie al restringimento più ampio dei differenziali.
A livello di aree, in Usa la prima metà dell'anno è stata caratterizzata da un movimento al rialzo dei rendimenti ha interessato in particolar modo le scadenze a breve termine, con conseguente appiattimento della curva. Il tasso a 2 anni, sul livello di 4,43% a fine 2022, si è portato a ridosso del 5% - livello più alto dal 2007 – nei primi mesi dell'anno, in scia alla revisione al rialzo del tasso terminale della Fed previsto dal mercato. L'indicatore ha successivamente lasciato sul terreno circa 100 pb nelle fasi di maggiore tensione generate dal fallimento di SVB; le preoccupazioni degli investitori sulla stabilità del sistema finanziario USA hanno portato

alla revisione al ribasso delle attese sulle mosse della FED, con il mercato che ha iniziato a scontare un tasso terminale più basso e tagli nella parte finale del 2023. Dopo una fase interlocutoria, a partire dalla seconda metà di maggio dati confortanti sulla crescita e commenti «*hawkish*» da parte di esponenti della Fed hanno spinto il mercato ad attribuire una probabilità piuttosto elevata ad un ulteriore rialzo del tasso ufficiale entro luglio, prima escluso, e a contenere le aspettative sui tagli dei tassi entro l'avvio del 2024. La conferenza stampa di Powell, dopo la riunione di politica monetaria del 14 giugno conclusasi con un nulla di fatto e accompagnata alla revisione al rialzo dei cosiddetti «*dots*» (il livello mediano dei tassi sui fed funds proiettato dai banchieri centrali per fine 2023 è passato da 5,125% di marzo a 5,625%), ha accelerato il movimento al rialzo della parte a breve della curva, spingendo il mercato a scontare un rialzo quasi certo a luglio, un eventuale nuovo rialzo a settembre e nessun taglio entro la fine del 2023. Il tasso a 2 anni ha quindi chiuso il primo semestre sul livello di 4,90%. ll tasso a dieci anni, a 3,9% a fine 2022, è sceso sotto il 3,4% nel mese di gennaio, portandosi sui livelli più bassi da settembre 2022, in scia a dati di inflazione più deboli delle attese, e poi ancora nel mese di marzo, in scia alla crisi di SVB, per poi avviare una risalita verso 3,84% di fine giugno, in risposta anche a dati di crescita via via migliori.
Nei mesi estivi la curva USA ha evidenziato un movimento verso l'alto soprattutto della parte a medio-lungo termine. Alla base del movimento di irripidimento va riportato l'impegno della Fed a mantenere i tassi di riferimento su livelli elevati a lungo, con ciò determinando un effetto trascinamento sulla parte a lunga della curva; la parte a breve termine è stata invece limitata nei movimenti dalla consapevolezza degli investitori che il ciclo di rialzi fosse prossimo alla conclusione.
Gli ultimi mesi dell'anno sono stati caratterizzati da una completa inversione di tendenza dei mercati obbligazionari in scia all'irrompere di un nuovo scenario per le politiche monetarie. Dopo che a ottobre è proseguito il rialzo dei rendimenti, specie a lungo termine, con il tasso a dieci anni che si è portato in area 5%, conseguenza di dati macro USA resilienti e timori per un aumento delle emissioni governative a fronte di un incremento del deficit pubblico, a novembre l'annuncio del Tesoro USA di stime sul deficit del 4T 2023 inferiori alle attese, ma soprattutto la conferma della pausa del FOMC nel meeting di novembre e i toni meno aggressivi di Powell nella conferenza stampa hanno favorito una inversione a U sui tassi. La discesa dei rendimenti è stata poi amplificata a dicembre dal meeting della Fed che, ancora in stand-by, ha messo nelle sue previsioni ben 3 tagli dei tassi nel 2024 in un contesto di inflazione in calo e economia che segnala qualche rallentamento. Il tasso a dieci anni ha chiuso l'anno al 3,88% e il tasso a due anni al 4,25%.
L'anno è stato caratterizzato anche dal venir meno delle pressioni inflative, con l'inflation swap 5yr5yr forward rimasto sostanzialmente ancorato al livello del 2,6%.

I titoli obbligazionari societari USD sono stati sostenuti dal ridimensionamento degli spread. I titoli societari investment grade (IG) hanno evidenziato un rialzo del rendimento da 5,49% di fine 2022 a 5,59% di fine giugno, per poi scendere al 5,14% di fine dicembre (-35 pb), con lo spread che è sceso da 138 pb di fine 2022 a 104 di fine 2023 (-34 pb). Sulle emissioni HY, il rendimento medio è sceso da 8,96% a 7,65% (-131 pb), con spread in restringimento da 479 a 334 (-145 pb).

Anche la curva governativa tedesca ha evidenziato un movimento di appiattimento nel primo semestre. Il tasso a 2 anni, a 2,76% a fine 2022, ha evidenziato un movimento al rialzo fino al 3,34% di inizio marzo (livello più alto dal 2008) in scia a dati di inflazione e indici PMI nazionali superiori alle attese e alla rivalutazione verso l'alto delle attese sul tasso terminale della BCE, portato fino in area 4%. Successivamente, la crisi di fiducia generata dal fallimento di SVB in USA, e rafforzata dalle turbolenze di Credit Suisse in Europa, ha indotto un repentino cambio di direzione al mercato con tassi in calo e una impennata della volatilità su livelli visti nel 2007-2008. Il tasso 2 anni tedesco si è portato via via in area 3%, con movimenti infra-giornalieri molto ampi. Spinto al 3% ad aprile, per le tensioni generate sul mercato obbligazionario soprattutto europeo dal forte dato sull'inflazione UK, è poi sceso fino al 2,7% a maggio in risposta alla pubblicazione di dati di inflazione preliminari dei paesi dell'area Euro confortanti. La parte a breve della curva tedesca ha evidenziato maggiori tensioni rispetto alla parte a lunga nella parte finale di giugno, con rialzo del 2 anni al 3,20% in scia alle dichiarazioni "*hawkish*" di importanti esponenti della BCE in avvicinamento alla riunione di politica monetaria del 15 giugno e poi all'esito della stessa. Il mercato era stato indotto a scontare tassi di politica monetaria più alti e per un periodo più lungo, con rialzi da parte della BCE sia nella riunione di luglio che in

quella di settembre. Il tasso a 10 anni tedesco che si è via via portato dal livello del 2,6% - il più alto dal 2011 - di fine 2022 al 2,4% di fine giugno, dopo essere sceso fino al 2,3% in corrispondenza della crisi di Credit Suisse e risalito al 2,5% a maggio. A frenare il movimento al rialzo dei tassi a lunga nel primo semestre sono intervenuti i deboli dati reali e di fiducia. Nei mesi estivi i titoli governativi europei si sono mossi in scia a quelli USA, con movimenti più ampi sulla parte a lungo termine, espressione dell'allineamento del mercato a quanto affermato da tempo dalla BCE, ovvero che i tassi sarebbero rimasti fermi a lungo per portare l'inflazione ai rispettivi target. Il tasso a dieci tedesco si è così portato al 2,8% e il tasso a due anni è rimasto ancorato al livello del 3,2% circa.
Gli ultimi mesi dell'anno sono stati caratterizzati da una inversione di tendenza, come sul mercato USA. Ciò in scia alle aperture della Fed verso tagli del tasso ufficiale e nonostante Lagarde abbia assunto un atteggiamento più cauto rispetto a Powell nell'ultima riunione dell'anno, dichiarando che non c'è stata discussione sul taglio dei tassi ed enfatizzando le preoccupazioni sul rialzo dei salari in un contesto di calo della produttività, il tutto per ridimensionare le aspettative del mercato sui tagli già nel Q1 2024. Il tasso a dieci anni tedesco ha chiuso l'anno al 2%, il due anni al 2,4%.

Sul fronte inflazione, l'inflation swap 5yr5yr forward, indicatore delle aspettative di inflazione nell'Eurozona monitorato dalla BCE, è sceso in misura contenuta (da 2,36% di fine 2022 a 2,27% di fine dicembre).

I movimenti dei rendimenti dei titoli di Stato italiani hanno seguito la stessa direzione ma hanno evidenziato una intensità maggiore sulle scadenze a lungo termine, con il rendimento a 2 anni passato da 3,31% a 2,99% e con il tasso a dieci anni passato da 4,72% a 3,70%. Lo spread BTP-Bund, a 214 pb a fine 2022, si è ridotto a 168 a fine anno, beneficiando del progresso dei fondamentali, della domanda stabile e delle conferme/miglioramenti delle valutazioni di credito da parte delle agenzie di rating (S&P ha confermato BBB con Outlook Stabile; Moody's ha conferma Baa3 con una revisione dell'Outlook da Negativo a Stabile).

Con riferimento al debito societario europeo, il rendimento medio dei titoli IG è passato da 4,17% a 3,52% (-66 pb), mentre lo spread ha evidenziato un calo da 163 pb a 134 pb (-29 pb). I rendimenti delle emissioni societarie europee a più basso merito di credito (HY) sono passati da 7,62% a 6,29% (-133 pb), con lo spread in calo da 494 pb a 395 pb (-99 pb). Il rendimento dei finanziari, al 4,33% a fine 2022, si è collocato al 3,71% a fine 2023 , con il differenziale passato da 178 pb a 147 pb.

L'anno è stato caratterizzato da performance positive per il debito Emergente (indice JPM EMBI Global Diversified +11% in Usd, +7,5% in Euro), supportato dal differenziale di crescita EM-DM a favore dei primi. Il rendimento medio è passato da 8,56% di fine 2022 a 7,85%. Il differenziale di rendimento rispetto ai Treasury Usa è sceso da 452 pb a 384 pb. A livello di rating, forza maggiore degli HY rispetto agli IG (15,42% vs 7,08% in USD). Le emissioni in valuta locale hanno evidenziato un rialzo del 12,70% in USD, in scia ad attese di politiche monetarie meno rigide rispetto alla Fed. Le emissioni corporate in valuta forte hanno evidenziato un rialzo del 9,08% in USD; anche in questo segmento le emissioni HY (11,17%) hanno sovraperformato quelle IG (7,57%).

Dollaro USA in rafforzamento verso Euro

Il dollaro ha evidenziato un deprezzamento generalizzato, in risposta alle attese via via crescenti di una Fed meno rigida sulla politica monetaria. Le quotazioni del dollaro contro Euro sono passate da 1,07 di fine 2022 a 1,10.

Prospettive Globali

Riteniamo che molte delle aspettative per il 2024 siano già state scontate dai mercati. Anche noi prevediamo che le banche centrali avvieranno un ciclo espansivo, ma a partire da maggio/giugno e per ragioni legate al rallentamento dell'economia, non solo dell'inflazione. Riguardo alla crescita, l'allentamento del mercato del lavoro, che può minare in prospettiva la fiducia dei consumatori, rafforza la nostra attesa di una lieve recessione in USA nel primo semestre; a ciò si aggiungano il rallentamento della Cina, che impatterà l'Europa (l'area Emergente dovrebbe però rimanere resiliente), e il minor spazio fiscale in USA ed Europa. Pertanto, rimaniamo cauti sugli asset rischiosi. Confermiamo prudenza sui mercati azionari USA ed europei, neutralità sul Giappone (quadro domestico in progresso) e positiva selettività sui paesi emergenti. Siamo costruttivi sui tassi USA e leggermente positivi in Europa, data la debole crescita economica, sebbene il forte calo dei rendimenti richieda un approccio flessibile; view positiva sui BTP, non essendovi rischi nell'immediato sul rating italiano. Credito: preferenza per il segmento di maggior qualità sia in USA che in Europa, cautela invece sull'HY. Il debito emergente rimane supportato da solidi fondamentali e politiche monetarie attese accomodanti. Rischi: quadro macro e utili, geopolitici.

Considerazioni Generali Fondi Amundi

Forma e contenuto della Relazione di Gestione

La Relazione di Gestione di ciascun Fondo è redatta secondo le disposizioni previste dal provvedimento emanato da Banca d'Italia il 19 gennaio 2015 e successivi aggiornamenti ed è composta da una situazione patrimoniale, una sezione reddituale e da una nota integrativa; essa è accompagnata da una relazione degli amministratori volta a dare indicazioni sia sulla politica di investimento seguita nella gestione del patrimonio, sia sulle prospettive di investimento in relazione all'evoluzione dei mercati nei settori di interesse per il Fondo. Sono altresì dettagliati principi contabili, criteri contabili e di valutazione.

Tutti gli importi indicati nella Relazione di Gestione sono espressi in unità di Euro, salvo ove diversamente specificato.

Principi contabili e criteri di valutazione

La Relazione di gestione del Fondo è stata predisposta nel presupposto della continuità gestionale, avendo come riferimento un orizzonte temporale di almeno 12 mesi.

Anche con riferimento ai fondi fusi o che saranno oggetto di fusione nel corso dell'esercizio 2024, nella redazione della relazione di gestione sono stati applicati i criteri di funzionamento in considerazione del fatto che tali fondi continueranno la loro operatività fino alla data di efficacia della fusione. L'obiettivo di ciascuna fusione è quello di accrescere l'efficienza del servizio di gestione attraverso la razionalizzazione della gamma dei prodotti gestiti.

Nella redazione della Relazione di Gestione di ciascun Fondo sono stati applicati i principi contabili di generale accettazione per i fondi comuni di investimento ed i criteri di valutazione previsti dal provvedimento emanato da Banca d'Italia il 19 gennaio 2015 e successive modifiche.

Tali principi sono coerenti con quelli utilizzati nel corso dell'esercizio per la predisposizione dei prospetti di calcolo giornalieri della quota.

Gli schemi ed il contenuto delle singole tabella sono stati redatti nel rispetto delle disposizioni in materia emanate dalla Banca d'Italia.

a) Registrazione delle operazioni

- Le negoziazioni su titoli e sulle altre attività finanziarie sono contabilizzate nei portafogli dei singoli fondi sulla base della data di conclusione dei relativi contratti anche se non ancora regolati.
- Le commissioni di acquisto e vendita sono comprese nei prezzi di acquisto o dedotte dai prezzi di vendita dei titoli in conformità agli usi di borsa.
- I movimenti della liquidità a pronti trovano corrispettivo in movimenti di pari importo delle corrispondenti voci "pronti contro termine attivi e operazioni assimilate" o "pronti contro termine passivi e operazioni assimilate". La differenza tra i prezzi a pronti e quelli a termine viene distribuita, proporzionalmente al tempo trascorso, lungo tutta la durata del contratto, come interessi.
- Nel caso di sottoscrizione di titoli di nuova emissione la contabilizzazione nel portafoglio ha luogo al momento in cui l'attribuzione dei titoli è certa ovvero, in ogni altro caso, nei termini previsti dal programma di offerta o dagli usi e consuetudini di borsa.
- Le opzioni acquistate / emesse sono computate tra le attività / passività al loro valore corrente.
- I differenziali su operazioni futures vengono registrati secondo il principio della competenza, sulla base della variazione giornaliera tra i prezzi di chiusura del mercato di contrattazione ed i costi dei contratti stipulati e/o i prezzi del giorno precedente.
- Gli interessi attivi e passivi e gli altri proventi ed oneri di natura operativa sono conteggiati secondo il principio della competenza temporale anche mediante rilevazioni di appositi ratei attivi e passivi.
- Gli interessi attivi sui conti correnti bancari sono rilevati al lordo della relativa ritenuta fiscale.
- I dividendi vengono contabilizzati nel momento in cui sono deliberati (data stacco) o, in mancanza di tale comunicazione certa, al momento dell'incasso.
- Gli utili e le perdite realizzati su cambi, vendite di divisa a termine e negoziazioni di titoli in divisa estera sono originati dalla differenza tra il cambio storico di conversione dei debiti, dei crediti, dei

contratti in divisa, dei conti valutari e dei titoli in divisa, e il cambio rilevato alla chiusura delle rispettive posizioni.

- Gli utili e le perdite da realizzi risultano dalla differenza tra i costi medi ponderati di carico ed i valori realizzati dalle vendite. I costi ponderati di carico rappresentano i valori dei titoli alla fine dell'esercizio precedente, modificati dai costi medi di acquisto del periodo.
- Le plusvalenze e le minusvalenze su titoli sono originate dalla differenza tra il costo medio ponderato ed i valori determinati secondo i criteri indicati in precedenza, ossia prezzi di mercato o valutazioni applicati alla data della relazione di gestione dei singoli fondi.
- Le differenze di cambio derivanti dalla conversione delle voci espresse in valuta estera sono contabilizzate in voci separate nella relazione tenendo distinte quelle realizzate da quelle di valutazione.

Sempre nella sezione riguardante il risultato della gestione cambi sono state registrate le componenti reddituali delle operazioni di copertura dal rischio di cambio.

La rilevazione delle sottoscrizioni e dei rimborsi delle quote viene effettuata a norma del regolamento dei singoli fondi secondo il principio della competenza temporale.

b) Criteri di valutazione

Per la determinazione dei valori da applicare al portafoglio dei singoli fondi si osservano i seguenti criteri:

- i prezzi unitari utilizzati sono quelli del giorno di borsa aperta al quale si riferisce il valore della quota;
- per gli strumenti finanziari quotati, il prezzo è l'ultimo prezzo disponibile del giorno della o delle borse indicate nel regolamento. Nel caso di strumenti finanziari quotati presso più borse, si applica il prezzo della borsa più significativa in relazione alle quantità trattate;
- per gli strumenti finanziari ammessi alla negoziazione sui mercati regolamentati indicati dall'Organo di Vigilanza il prezzo è quello risultante dall'ultimo listino ufficiale disponibile, valutandone la significatività, per i valori trattati su più mercati, tenendo conto delle quantità ivi negoziate;
- per gli strumenti finanziari quotati o ammessi alla negoziazione sui mercati regolamentati indicati dall'Organo di Vigilanza, qualora sul mercato di negoziazione risultino contenuti gli scambi ed esistano elementi di scarsa liquidità, la valutazione tiene conto del presumibile valore di realizzo determinato sulla base delle informazioni reperibili sui circuiti internazionali di riferimento oggettivamente considerate dai responsabili organi della società. La società ha stabilito nell'apposito documento inerente i criteri di valutazione degli strumenti finanziari in portafoglio che si considerano "illiquidi" gli strumenti per i quali non sia possibile reperire con continuità un prezzo aggiornato dagli info provider o che presentino prezzi significativamente discordanti fra le valutazioni dei contributori messi a disposizione dalle fonti informative specializzate o la cui valorizzazione sia rimasta invariata per un congruo numero di giorni consecutivi;
- per gli strumenti finanziari e le altre attività finanziarie non quotate, la valutazione esprime il presumibile valore di realizzo sul mercato, individuato su un'ampia base di elementi di informazione, oggettivamente considerati dagli organi responsabili della Società di Gestione, concernenti la peculiarità del titolo, la situazione patrimoniale e reddituale dell'emittente e la situazione del mercato con particolare riferimento all'andamento dei tassi;
- per gli strumenti finanziari individualmente sospesi dal listino la valutazione è effettuata sulla base dei criteri previsti per quelli non quotati;
- le poste denominate in valuta diverse da quelle di denominazione del Fondo sono convertite in quest'ultima valuta sulla base di tassi di cambio correnti alla data di riferimento della valutazione, accertati su mercati di rilevanza e significatività internazionale. Le operazioni a termine in valuta sono convertite al tasso di cambio a termine corrente per scadenze corrispondenti a quelle delle operazioni oggetto di valutazione;
- i contratti futures sono valutati sulla base delle quotazioni di chiusura dei rispettivi mercati, rilevate nel giorno di borsa aperta al quale si riferisce il valore della quota;
- le opzioni e i warrant trattati in mercati regolamentati sono valutati al prezzo di chiusura del giorno rilevato nel mercato di trattazione; nel caso di contratti trattati su più mercati, al prezzo più significativo, anche in relazione alle quantità trattate su diverse piazze;
- le opzioni e i warrant non trattati in mercati regolamentati sono valutati al valore corrente espresso dalla formula indicata dall'Organo di Vigilanza;

- per i titoli strutturati la valutazione viene effettuata procedendo alla valutazione distinta di tutte le componenti elementari. Per titoli strutturati si intendono, come indicato dalla vigente normativa, quei titoli il cui rimborso e/o la cui remunerazione dipendano in tutto o in parte dal valore di determinati titoli o altre attività, dall'andamento dei tassi di interesse, valute, indici o altri parametri o dal verificarsi di determinati eventi o condizioni, anche secondo meccanismi che equivalgono all'assunzione di posizioni in strumenti finanziari derivati.

Soggetti che procedono al collocamento

Il collocamento delle quote dei Fondi avviene, oltre che presso la sede legale di Amundi, per il tramite dei soggetti collocatori – elencati nell'Allegato Parte I del Prospetto – i quali operano anche mediante tecniche di comunicazione a distanza (canale internet).

Comunicazioni agli investitori istituzionali[1]

Ai sensi della normativa vigente[2] i gestori degli attivi sono tenuti a comunicare con frequenza annuale agli investitori istituzionali con cui hanno concluso gli accordi su base individuale o collettiva[3]:

a) le relazioni sui principali rischi a medio e lungo termine associati agli investimenti, sulla composizione del portafoglio, sulla sua rotazione e sui relativi costi;

b) le relazioni sul ricorso ai consulenti in materia di voto ai fini delle attività di impegno e, ove applicabile, sulla loro politica di concessione di titoli in prestito nonché il modo in cui quest'ultima viene implementata al fine di perseguire le loro attività di impegno, in particolare in occasione delle assemblee generali delle società partecipate e informazioni in merito all'eventuale insorgenza di conflitti di interessi in connessione con le attività di impegno e le misure adottate dai gestori di attivi per gestirli;

c) informazioni in merito all'eventuale adozione, e alle relative modalità, di decisioni di investimento sulla base di una valutazione dei risultati a medio e lungo termine delle società partecipate, compresi i risultati non finanziari.

In particolare, le informazioni di cui alla lettera ***a)*** figurano nel presente documento - cfr. Nota Integrativa Parte A/Esposizione al rischio del Fondo; Parte B/Sezione II – Le attività; Parte D/Altre informazioni/Tasso di movimentazione del portafoglio del Fondo (c.d. turnover) e Parte C/Risultato economico dell'esercizio, Sezione IV.1/Costi sostenuti nel periodo.

Per quanto riguarda le informazioni di cui alla lettera:

b) si rinvia al documento *Amundi Voting Policy* «Appendice - Implementazione della Voting Policy» sezioni: «1 Centralizzazione della funzione» e «3 Metodo attuale per esercitare il diritto di voto»; «5 Policy sul prestito titoli»; «6 Conflitti di interesse». Il documento è la versione in italiano del documento del Gruppo è pubblicato sul sito web della SGR, alla pagina https://www.amundi.it/Footer/Informazioni-societarie;

c) uno dei pilastri fondamentali che caratterizza lo stile di gestione attivo di Amundi è la selezione bottom-up dei singoli emittenti tramite ricerca fondamentale interna sulle loro prospettive di medio e lungo termine. La valutazione degli *investment case* è infatti operata da team di analisti finanziari e non, ed è formulata in modo autonomo rispetto al team di gestione. Inoltre, le azioni valutate positivamente per l'acquisto sono oggetto di frequenti aggiornamenti di ricerca; i riscontri degli incontri con le società, così come le altre azioni di engagement da parte del team di ricerca, sono accuratamente tracciati e documentati.

Si rinvia anche ai documenti denominati «Engagement Report» e «Voting report from words to actions», pubblicati sul sito web di Gruppo al link https://about.amundi.com/Footer/Legal-documentation.

[1] Cfr. TUF, articolo 124-quater - «"investitore istituzionale": 1) un'impresa di assicurazione o di riassicurazione come definite alle lettere u) e cc) del comma 1 dell'articolo 1 del decreto legislativo 7 settembre 2005, n. 209, incluse le sedi secondarie in Italia di imprese aventi sede legale in uno Stato terzo, autorizzate ad esercitare attività di assicurazione o di riassicurazione nei rami vita ai sensi dell'articolo 2, commi 1 e 2, del medesimo decreto; 2) i fondi pensione con almeno cento aderenti, che risultino iscritti all'albo tenuto dalla COVIP e che rientrino tra quelli di cui agli articoli 4, comma 1, e 12 del decreto legislativo 5 dicembre 2005, n. 252, ovvero tra quelli dell'articolo 20 del medesimo decreto aventi personalità giuridica.»

[2] La delibera Consob n. 21623 del 22 dicembre 2020 ha introdotto un nuovo Capo II-ter (trasparenza dei gestori di attivi e dei consulenti in materia di voto) nell'ambito della Parte III (Emittenti), Titolo IV (Diritti di voto) del Regolamento Emittenti (delibera del 14 maggio 1999, n. 11971, e successive modificazioni), in linea con le disposizioni del TUF introdotte dal decreto legislativo n. 49 del 10 giugno 2019.

[3] Cfr. TUF, articolo 124-septies.

Rapporti con società del Gruppo

Amundi SGR S.p.A. è controllata al 100% da Amundi Asset Management SAS, a sua volta controllata da Crédit Agricole SA. All'interno della nota integrativa sono dettagliate le attività e passività nei confronti di altre società del Gruppo della SGR detenute dal fondo alla data di questa relazione.

Si evidenzia che la SGR, pur riservandosi il diritto di impartire istruzioni per ciascuno degli ordini e/o delle decisioni di investimento relative ai portafogli gestiti, al fine di conseguire maggiore efficienza nei processi produttivi e di avvalersi di specifiche competenze professionali, ha esternalizzato a Amundi Intermédiation SA, appartenente al gruppo del gestore, le attività riguardanti la trasmissione e/o l'esecuzione di ordini aventi ad oggetto gli strumenti finanziari (esclusi OICR) di taluni portafogli della gestione su base collettiva.

L'investimento in azioni o obbligazioni (esclusi gli OICR) considerati in conflitto di interesse non è rilevante rispetto ai portafogli gestiti ed è in ogni caso in linea con quanto previsto dalla normativa vigente e dai regolamenti degli OICR medesimi. Gli investimenti in OICR considerati in conflitto di interesse sono conformi a quanto previsto dalla vigente normativa e dai Regolamenti degli OICR medesimi.

Eventi nel periodo

Si rimanda a quanto indicato successivamente, in relazione a ciascun fondo, nel paragrafo denominato "**Eventi che hanno interessato il fondo**".

L'attuale protrarsi del conflitto tra Ucraina e Russia e lo scoppio del recente conflitto Israelo-Palestinese, costituiscono fattori di instabilità macroeconomica soprattutto a causa dell'effetto combinato di sanzioni commerciali, interruzioni delle catene di approvvigionamento e ripercussioni sui mercati finanziari e sulla fiducia in essi. La SGR, sulla base delle evidenze attualmente disponibili e degli scenari configurabili, monitora gli impatti correnti e potenziali che tali fattori di instabilità possono avere anche solo indirettamente sull'attività economica, sulla situazione finanziaria e sui risultati economici dei Fondi, oltre che sulla capacità dei Fondi di continuare ad operare come entità in funzionamento. Ad oggi, non si può escludere che l'eventuale perdurare dei conflitti possa determinare, anche indirettamente, impatti patrimoniali ed economico-finanziari negativi per i Fondi.

Regolamento SFDR e relativa informativa

Il Regolamento SDFR (ossia, il Regolamento (UE) 2019/2088 del Parlamento europeo e del Consiglio del 27 novembre 2019 relativo all'informativa sulla sostenibilità nel settore dei servizi finanziari) stabilisce un quadro paneuropeo volto ad agevolare l'Investimento Sostenibile.
Il Regolamento SFDR instaura un approccio armonizzato riguardo agli obblighi di trasparenza verso gli investitori in materia di sostenibilità nel settore dei servizi finanziari dello Spazio Economico Europeo.
Il Regolamento Tassonomia (ossia, il Regolamento (UE) 2020/852 del Parlamento Europeo e del Consiglio del 18 giugno 2020 relativo all'istituzione di un quadro che favorisce gli investimenti sostenibili e recante modifica del Regolamento (UE) 2019/2088) stabilisce i criteri per determinare se un'attività economica possa essere considerata sostenibile da un punto di vista ambientale.
Ai fini del Regolamento SFDR, la SGR soddisfa i criteri per definirsi un "partecipante ai mercati finanziari" mentre ciascun Fondo si qualifica come "prodotto finanziario".
Ai sensi dell'articolo 11 del Regolamento SFDR, Amundi è tenuta a comunicare quanto segue: conformemente alla propria Politica sugli Investimenti Responsabili, Amundi ha definito il proprio approccio alla valutazione degli aspetti ESG (c.d. "rating ESG"). Tale approccio mira a misurare le prestazioni in termini di sostenibilità di un emittente, quale, ad esempio, la sua capacità di prevedere e gestire i Rischi di Sostenibilità e le opportunità connesse alle proprie caratteristiche specifiche e al proprio settore industriale di appartenenza.
Utilizzando il rating ESG, i gestori degli investimenti, tengono in considerazione i Rischi di Sostenibilità nelle loro decisioni di investimento.
Amundi applica politiche di esclusione mirate con riferimento agli emittenti che non rispettano la Politica sugli Investimenti Responsabili del Gruppo Amundi, quali gli emittenti che violano le convenzioni internazionali, le norme riconosciute dalla comunità internazionale o la legislazione nazionale.
Per ulteriori informazioni sul rispetto, da parte di ciascun Fondo, dei requisiti previsti dal Regolamento SDFR e dal Regolamento Tassonomia si prega di consultare l'allegato alla presente relazione, nonché la Dichiarazione SFDR di Amundi SGR (*Amundi Sustainable Finance Disclosure Statement*) e la Politica sugli Investimenti Responsabili, consultabili all'indirizzo www.amundi.it

Fondi art. 8 SFDR
Tutti i Fondi oggetto del presente documento sono classificati ai sensi dell'articolo 8 del Regolamento SFDR e mirano a promuove caratteristiche ambientali, sociali e all'investimento in imprese che seguono prassi di

buona governance come specificato nell'allegato alla presente relazione. Questi Fondi ex articolo 8 cercano di ridurre i Rischi di Sostenibilità attraverso una politica di esclusione mirata, l'integrazione di punteggi ESG nel processo di investimento e un approccio fondato sulla stewardship.
Conformemente a quanto previsto dall'Articolo 50, paragrafo 2, del REGOLAMENTO DELEGATO DELLA COMMISSIONE EUROPEA 2022/1288, le informazioni sulle caratteristiche ambientali o sociali promosse dal prodotto finanziario sono disponibili in allegato alla presente relazione.

AMUNDI OBBLIGAZIONARIO BREVE TERMINE

Relazione degli Amministratori della Società di Gestione

Eventi che hanno interessato il fondo

Il Consiglio di Amministrazione della Amundi SGR S.p.A., riunitosi in data **26 gennaio 2023**, sulla base della relazione di gestione del Fondo al **30 dicembre 2022** e ai sensi di quanto previsto dal regolamento di gestione, ha deliberato di distribuire per ciascuna delle quote di **Amundi Obbligazionario Breve Termine Classe D** in circolazione alla data del **26 gennaio 2023**, un ammontare unitario pro-quota pari a Euro **0,0072**. Tale importo è posto in pagamento dal **01 febbraio 2023**. Il valore della quota al **27 gennaio 2023** tiene conto dello stacco della cedola stessa.

Nel corso dell'esercizio non sono stati rilevati errori nella valorizzazione delle quote.

Politica d'investimento

Il fondo ha evidenziato le seguenti performance:

Classe **C**: nel periodo 30 dicembre 2022 – 29 dicembre 2023 performance pari a 2,94% rispetto ad una variazione di 4,36% del benchmark;
Classe **D**: nel periodo 30 dicembre 2022 – 29 dicembre 2023 performance pari a 2,94% rispetto ad una variazione di 4,36% del benchmark.

Le performance del fondo e del relativo benchmark sono calcolate al lordo dell'effetto fiscale.

Il portafoglio ha registrato una performance assoluta positiva, realizzata nella seconda parte dell'anno (negativa nel primo semestre), inferiore al benchmark. Il differenziale negativo rispetto al benchmark è stato generato nel primo semestre. In particolare nel primo semestre, principale contributo negativo è giunto dalla gestione della duration americana (posizione lunga sul 5 anni Usa e posizionamento di steepening sul tratto 5-30 anni e 2-30 anni, volto ad anticipare un irripidimento della curva dei rendimenti); negativa la gestione dinamica della duration europea (in particolare nel primo trimestre il posizionamento corto sul Bund); sul credito ha impattato nel rpimo semestre negativamente la selezione titoli (e.g. subordinati bancari a febbraio); in perdita, inotre, le protezioni sul credito europeo ed americano. Tali apporti negativi sono stati parzialmente compensati dalla posizione lunga di duration sui tassi tedeschi a 5 e 10 anni e dal lungo sul credito (e.g. subordinati AT1), incrementati entrambi a metà ottobre, fino a metà dicembre. Positivo durante l'anno, sia in termini assoluti che relativi, il posizionamento sull'Italia (in guadagno il lungo di inizio anno, negativo il posizionamneto di sottopeso di fine anno, più che compensato però dal posizionamento sulla curva dei rendimenti).

Operatività

Nel primo semestre 2023, il fondo è risultato mediamente in sovrapppeso di duration sull'Italia e sulle obbligazioni corporate (al cui interno la preferenza è stata per obbligazioni di emittenti societari italiani con rating investment grade oltre che per emissioni subordinate e ibride, con date di richiamo ravvicinate, emesse da solidi emittenti finanziari ed industriali); il rischio tasso (duration) ed il rischio di credito (spread duration) sono stati gestiti dinamicamente per adattarne il profilo di rischio all'evolversi dell'andamento dei mercati finanziari. Ad inizio trimestre, è stato ridotto il sottopeso di duration (riducendo le posizioni corte sui tassi tedeschi). Duration complessiva del portafoglio a fine gennaio pari a 1,3 anni (1,5 anni il benchmark). Confermato il sovrappeso sulle scadenze 3-5 anni e 5-7 anni, mantenendo una posizione corta sulle scadenze lunghe (valutazioni ritenute non più interessanti). Credito: sovrappeso in termini di spread duration; incrementata, inoltre, a gennaio l'esposizione ai finanziari. Valute: posizionamento corto sul dollaro Usa. Nel mese di febbraio sono state chiuse le strutture opzionali corte sul bund ed è stata implementata una posizione lunga sul 5 anni tedesco; acquistati inoltre BTP ad 1 e a 10 anni. In tal modo la duration è stata posizionata in sovrappeso rispetto al benchmark a 2,4 anni (1,7 anni il benchmark). Confermato il sovrappeso sulle scadenze 3-5 anni e 5-7 anni, mantenendo una posizione corta sulle scadenze lunghe (valutazioni ritenute non più interessanti). Credito: sovrappeso in termini di spread duration; incrementata, inoltre, a febbraio l'esposizione ai subordinati bancari T2. Valute: posizionamento corto sul dollaro Usa. A fine primo trimestre è stata effettuata un presa di profitto sul 5 anni tedesco, incrementando marginalmente il 5 anni americano; in lieve riduzione anche la posizione lunga di duration sull'Italia, riducendo il BTP mag-24, incrementando la componente a tasso variabile (CCT). In tal modo la duration complessiva del portafoglio è stata ridotta a 1,8 anni (in lieve

sovrappeso vs benchmark, pari a 1,7 anni). Confermato il posizionamento di steepening sulla curva americana, implementato sul 5-30 anni. Credito: sovrappeso in termini di spread duration; mantenuta l'esposizione ai subordinati bancari. Valute: posizionamento corto sul dollaro Usa vs Yen. Ad inizio secondo trimestre duration stabile a 1,8 anni. In Usa mantenuto il lungo sul tasso 5 anni e rafforzato il posizionamento di steepening della curva, sul tratto 5-30 anni. In Europa aperta tatticamente posizione lunga sul Bund a 10 anni, per sfruttare la volatilità. Confermata la posizione corta sul tasso giapponese a 10 anni (BoJ attesa diventare meno accomodante) e il sovrappeso sull'Italia, sulla parte breve della curva. Credito: sovrappeso in termini di spread duration; mantenuta l'esposizione ai subordinati bancari, ma acquistata tatticamente protezione su tale segmento (via CDS iTraxx Sub Financials). Valute: chiuso lungo yen e Euro vs USD, aperto lungo USD vs Euro (macro hedge se la FED mantenesse un approccio restrittivo). A maggio incrementato il sovrappeso di duration (2,2 anni vs 1,7 anni del bencmark). Incrementata l'esposizione all'Italia (anche tramite CCT) e al credito (acquistando nuove emissioni sul mercato primario, con scadenze brevi e medie); mantenuta l'esposizione ai subordinati bancari. Valute: posizione lunga USD vs Euro, incrementata nel mese poi ridotta a fine maggio. Assetto sostanzialmente stabile a giugno.

Nel secondo semestre 2023, inizialmente il portafoglio è stato mantenuto in sovrappeso sul rischio Italia, in particolare sulla parte più a breve (scadenze 12 mesi) rispetto al 3 anni, dal momento che la curva dei rendimenti era inclinata negativamente (il tre anni rendeva meno della scadenza 1 anno). Data inoltre la preferenza per i CCT (per aumentare il rendimento/rischio di credito del portafoglio), che hanno una duration molto bassa pari a 0,5 anni, per controbilanciare il sovrappeso sulle scadenze brevi, è stato implementato un sovrappeso prima sul 5 anni, poi sul 7 anni italiano (quando anche il 5 anni è divenuto meno interessante). Dinamicamente e tatticamente sono state inoltre inserite posizioni lunghe sul 10 e sul 30 anni, per un maggior rendimento e per gestire tatticamente la duration. Nel mese di settembre, tuttavia, data la maggior volatilità sui mercati obbligazionari, sono state chiuse le posizioni su 7,10 e 30 anni italiano ed è stato ricomprato il 3 anni, per implementare un assetto più in linea con il benchmark; in tal modo la duration è stata prima mantenuta in linea con il benchmark, successivamente è stata posizionata in sottopeso attraverso una posizione corta sul 10 anni italiano. A seguito di queste modifiche, inoltre, il fondo è stato portato in sottopeso sull'Italia, posizionamento mantenuto fino a fine anno. Nel quarto trimestre, al diminuire della volatilità sui mercati obbligazionari, è stato implementato un assetto simile a quello di inizio semestre, ricomprando CCT con scadenze 2028, 2031 le cui valutazioni erano diventate più interessanti e nuovamente compensando la minor duration di queste emissioni (0,5 anni) con un posizionamento lungo prima sul 5 anni, poi sul 7 anni. A fine ottobre, stanti le dichiarazioni di politica monetaria più accomodanti in Europa e Usa, è stato diminuita l'esposizione alla scadenza 2 anni incrementando ancora i CCT (incluse le scadenze 2025 e 2026), ed è stato incrementato il BTP a 7 anni. Mantenuto il posizionamento corto, invece, sul 10 anni. La duration è stata pertanto mantenuta stabile e sempre in sottopeso rispetto al benchmark. Questo posizionamento di curva ha contribuito positivamente in termini di performance, andando più che controbilanciare l'apporto negativo derivante dal sottopeso sull'Italia.

Tassi europei: gestione dinamica della duration durante il semestre. A partire da metà ottobre, è stata implementata una posizione lunga sul 5 e sul 10 anni tedesco, fino a metà dicembre. Tale posizionamento è risultato particolarmente premiante, dato l'orientamento della politica monetaria americana ed europea in senso ben più accomodante che ha innescato una discesa dei tassi di interesse. Per quanto riguarda invece il posizionamento sulla curva dei rendimenti europea, durante il semestre è stato mantenuto un posizionamento di steepening sul 2-10 anni tedesco.

Sempre a partire da metà ottobre il team di gestione ha incrementato anche il rischio di credito, in particolare sulle scadenze 2-5 anni e sui subordinati bancari AT1 con prima data di richiamo dei bond nel 2024-2025. Anche questa strategia è risultata premiante. Il rischio di credito è stato inltre gestito dinamicamente, attraverso coperture mediante l'indice Itraxx. A titolo semplificativo, a fine dicembre dato il rally del credito, sono state inserite coperture sul credito per consolidare la performance ottenuta sul credito fino a fine anno, strategia che ha contribuito leggermente negativamente, dato il proseguire del rally dei risk asset.

Prospettive

Riteniamo che molte delle aspettative per il 2024 siano già state scontate dai mercati. Anche noi prevediamo che le banche centrali avvieranno un ciclo espansivo, ma a partire da maggio/giugno e per ragioni legate al rallentamento dell'economia, non solo dell'inflazione. Riguardo alla crescita, l'allentamento del mercato del lavoro, che può minare in prospettiva la fiducia dei consumatori, rafforza la nostra attesa di una lieve recessione in USA nel primo semestre; a ciò si aggiungano il rallentamento della Cina, che impatterà l'Europa (l'area Emergente dovrebbe però rimanere resiliente), e il minor spazio fiscale in USA ed Europa. Pertanto, rimaniamo cauti sugli asset rischiosi. Confermiamo prudenza sui mercati azionari USA ed europei, neutralità sul Giappone (quadro domestico in progresso) e positiva selettività sui paesi emergenti. Siamo costruttivi sui tassi USA e leggermente positivi in Europa, data la debole crescita economica, sebbene il forte calo dei rendimenti richieda un approccio flessibile; view positiva sui BTP, non essendovi rischi nell'immediato sul

rating italiano. Credito: preferenza per il segmento di maggior qualità sia in USA che in Europa, cautela invece sull'HY. Il debito emergente rimane supportato da solidi fondamentali e politiche monetarie attese accomodanti. Rischi: quadro macro e utili, geopolitici.

La gestione del portafoglio nel primo semestre del 2024 terrà pertanto in considerazione queste indicazioni di scenario e verrà dinamicamente modificata sulla base delle evoluzioni dei mercati finanziari.

Eventi successivi al 29 dicembre 2023

In data 25 gennaio 2024 il Consiglio di Amministrazione della SGR ha deliberato in merito alla fusione del Fondo **Amundi Meta Globale 2024,** Fondo **Amundi Meta 03/2024,** Fondo **Amundi Meta 05/2024,** Fondo **Amundi Meta Bond Breve Termine,** che verranno conseguentemente incorporati nel Fondo **Amundi Obbligazionario Breve Termine** nel corso dei prossimi mesi.

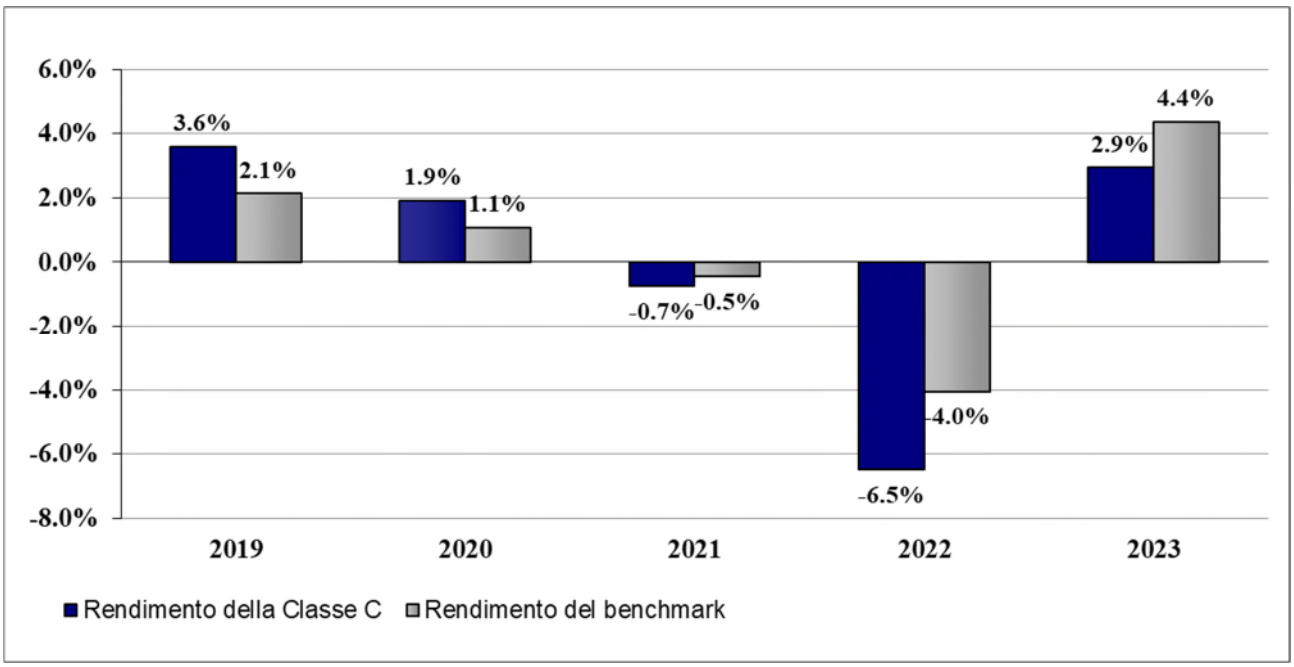
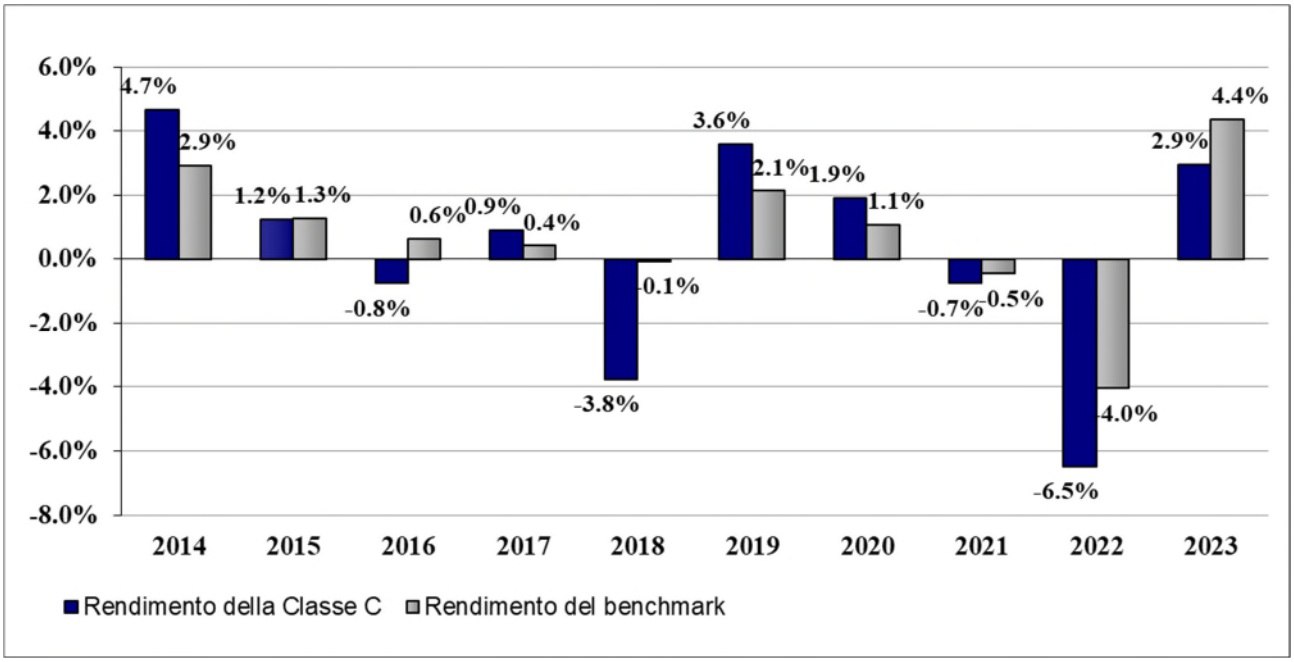
NOTA INTEGRATIVA

Parte A – Andamento del valore della quota



Valori minimi e massimi della quota durante l'esercizio - Classe C



Andamento del valore della quota durante l'esercizio	
Valore minimo al 07/03/2023	7,987
Valore massimo al 22/12/2023	8,296

Nel corso dell'esercizio non sono stati rilevati errori nella valorizzazione delle quote.

Rendimento annuo del Fondo e del benchmark (ove applicabile) nel corso degli ultimi 5-10 anni solari

Esposizione al rischio del Fondo (Classe C)

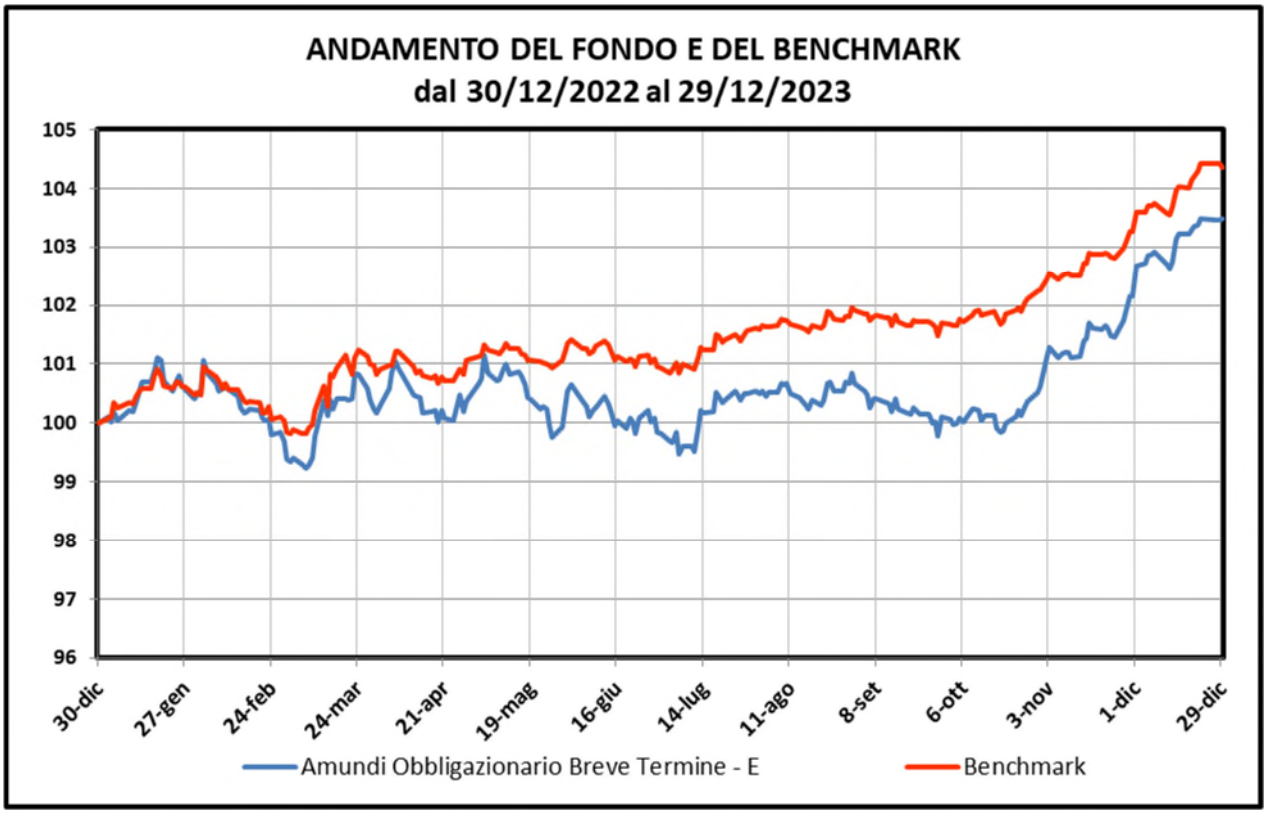
I dati di rendimento del Fondo non includono i costi di sottoscrizione (né gli eventuali costi di rimborso) a carico dell'investitore.

I principali rischi legati agli investimenti sono classificabili come rischio di mercato, rischio di credito, e rischio di liquidità. Il rischio di mercato è costituito dalla potenziale riduzione nel valore dei singoli titoli, eventualmente denominati in diverse valute. Il rischio di credito è determinato dal peggioramento del merito di credito degli emittenti dei titoli detenuti dal Fondo. Il rischio di liquidità è infine definito come il rischio che il Fondo investa in strumenti finanziari che possono risultare di difficile vendita, a seguito del verificarsi di determinate condizioni di mercato, con effetti negativi sul prezzo di realizzo.

Il monitoraggio di tali rischi viene effettuato su base continuativa dal gestore attraverso la costante verifica dell'effettivo posizionamento del fondo rispetto al profilo rischio-rendimento desiderato. La misura e il controllo dei rischi in oggetto viene inoltre effettuata con frequenza giornaliera mediante l'utilizzo di modelli matematico-statistici utilizzati autonomamente dalla struttura di Risk Management. I risultati di tali valutazioni sono regolarmente portati all'attenzione degli organi amministrativi della SGR.

Il Tracking Error (scarto quadratico medio annualizzato della differenza tra i rendimenti settimanali del fondo e i corrispondenti rendimenti del benchmark) nel periodo che va dal 30 dicembre 2022 (ultima quota del Fondo nell'esercizio 2022) al 29 dicembre 2023 (ultima quota del Fondo nell'esercizio) è stato pari a **1,45%**.

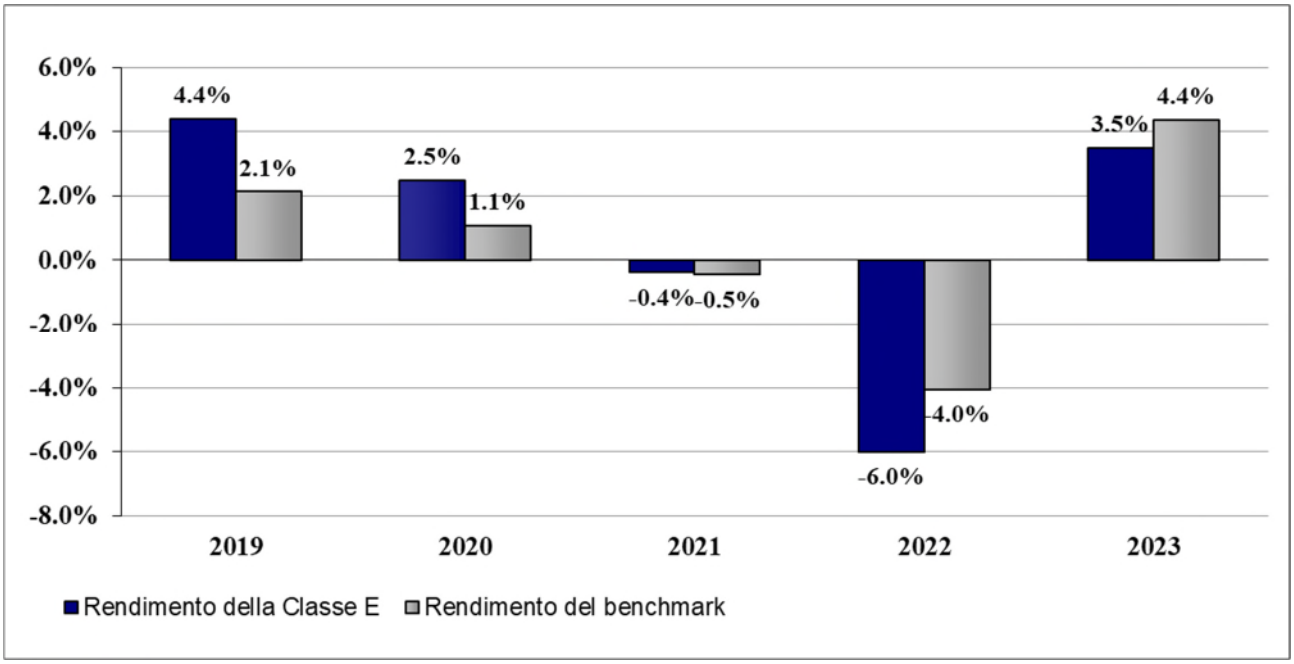
Per lo stesso arco temporale, la volatilità (calcolata sui rendimenti settimanali netti del Fondo ed annualizzata) è stata pari a **2,92%**, superiore al valore di **1,79%** realizzato dal benchmark.



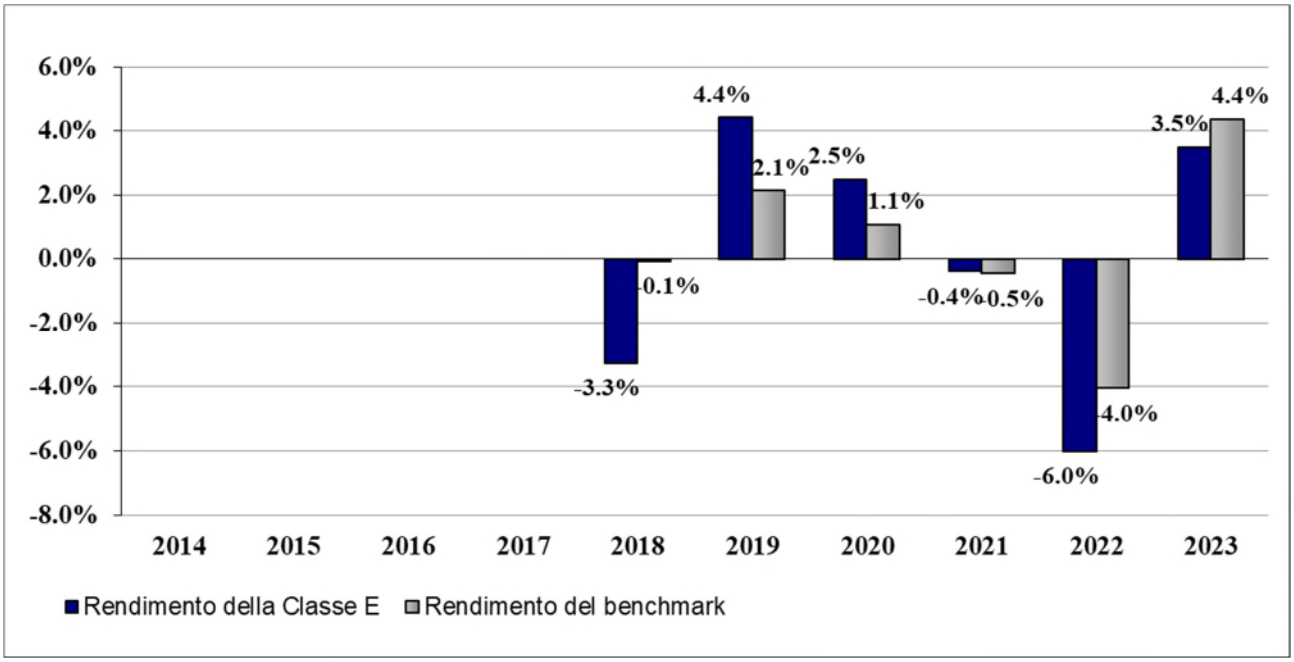
Il minimo rendimento mensile realizzato nell'esercizio, determinato considerando tutti gli intervalli di 20 giorni lavorativi consecutivi è stato pari a **-1,73%**.

Il VaR 95% mensile (che esprime in termini percentuali la massima perdita a cui è esposto il fondo su un orizzonte temporale di un mese e al livello di confidenza del 95%) determinato a posteriori sulla base dei rendimenti realizzati dal Fondo, considerando tutti gli intervalli di 20 rendimenti giornalieri consecutivi dell'esercizio ed escludendo il 5% dei peggiori risultati, è stato pari a **-0,84%**.

La medesima misura calcolata ipotizzando la normalità della distribuzione dei rendimenti settimanali del Fondo è pari a **-1,39%**.



Valori minimi e massimi della quota durante l'esercizio - Classe E



Andamento del valore della quota durante l'esercizio	
Valore minimo al 07/03/2023	4,866
Valore massimo al 22/12/2023 e al 29/12/2023	5,075

Nel corso dell'esercizio non sono stati rilevati errori nella valorizzazione delle quote.

Rendimento annuo del Fondo e del benchmark (ove applicabile) nel corso degli ultimi 5-10 anni solari

Esposizione al rischio del Fondo (Classe E)

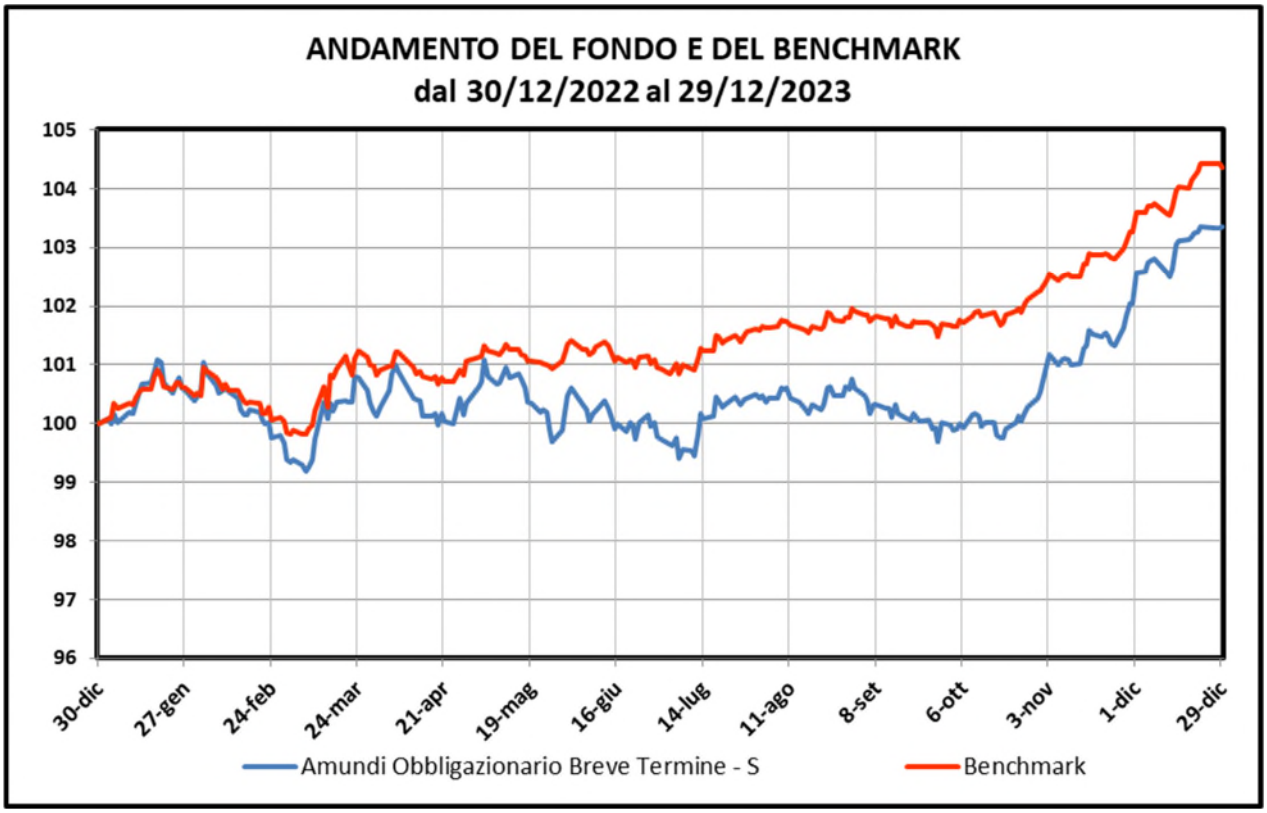
I dati di rendimento del Fondo non includono i costi di sottoscrizione (né gli eventuali costi di rimborso) a carico dell'investitore.

I principali rischi legati agli investimenti sono classificabili come rischio di mercato, rischio di credito, e rischio di liquidità. Il rischio di mercato è costituito dalla potenziale riduzione nel valore dei singoli titoli, eventualmente denominati in diverse valute. Il rischio di credito è determinato dal peggioramento del merito di credito degli emittenti dei titoli detenuti dal Fondo. Il rischio di liquidità è infine definito come il rischio che il Fondo investa in strumenti finanziari che possono risultare di difficile vendita, a seguito del verificarsi di determinate condizioni di mercato, con effetti negativi sul prezzo di realizzo.

Il monitoraggio di tali rischi viene effettuato su base continuativa dal gestore attraverso la costante verifica dell'effettivo posizionamento del fondo rispetto al profilo rischio-rendimento desiderato. La misura e il controllo dei rischi in oggetto viene inoltre effettuata con frequenza giornaliera mediante l'utilizzo di modelli matematico-statistici utilizzati autonomamente dalla struttura di Risk Management. I risultati di tali valutazioni sono regolarmente portati all'attenzione degli organi amministrativi della SGR.

Il Tracking Error (scarto quadratico medio annualizzato della differenza tra i rendimenti settimanali del fondo e i corrispondenti rendimenti del benchmark) nel periodo che va dal 30 dicembre 2022 (ultima quota del Fondo nell'esercizio 2022) al 29 dicembre 2023 (ultima quota del Fondo nell'esercizio) è stato pari a **1,45%**.

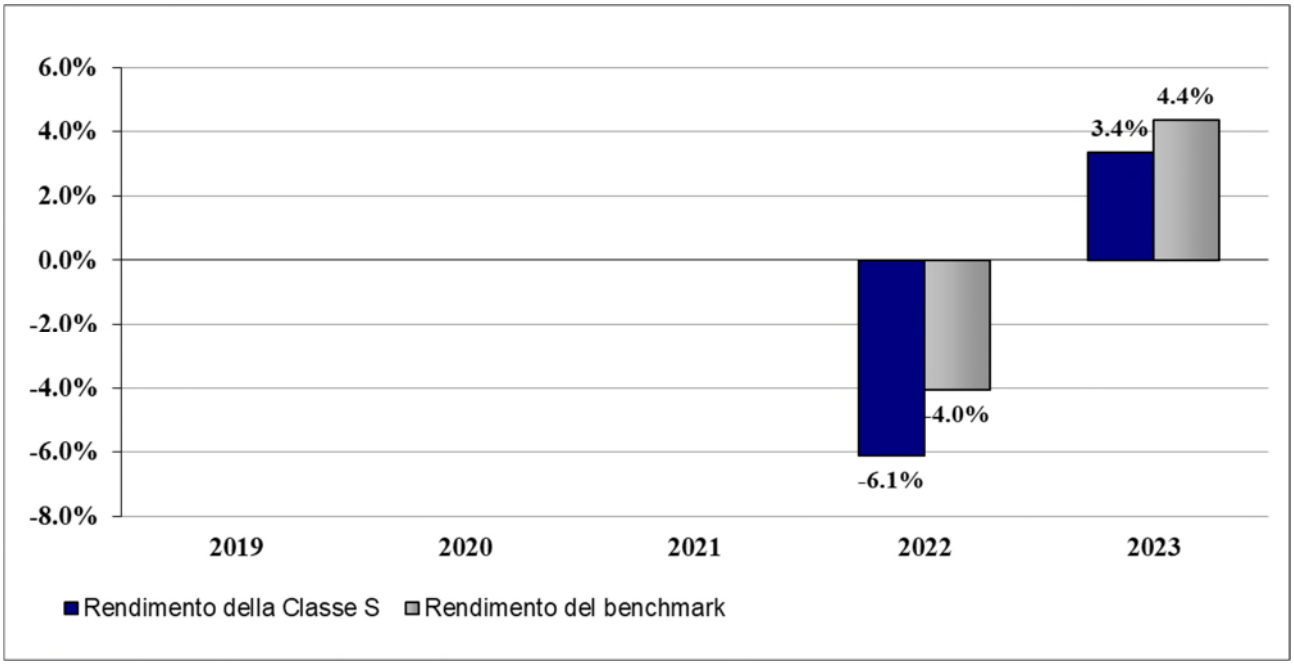
Per lo stesso arco temporale, la volatilità (calcolata sui rendimenti settimanali netti del Fondo ed annualizzata) è stata pari a **2,93%**, superiore al valore di **1,79%** realizzato dal benchmark.



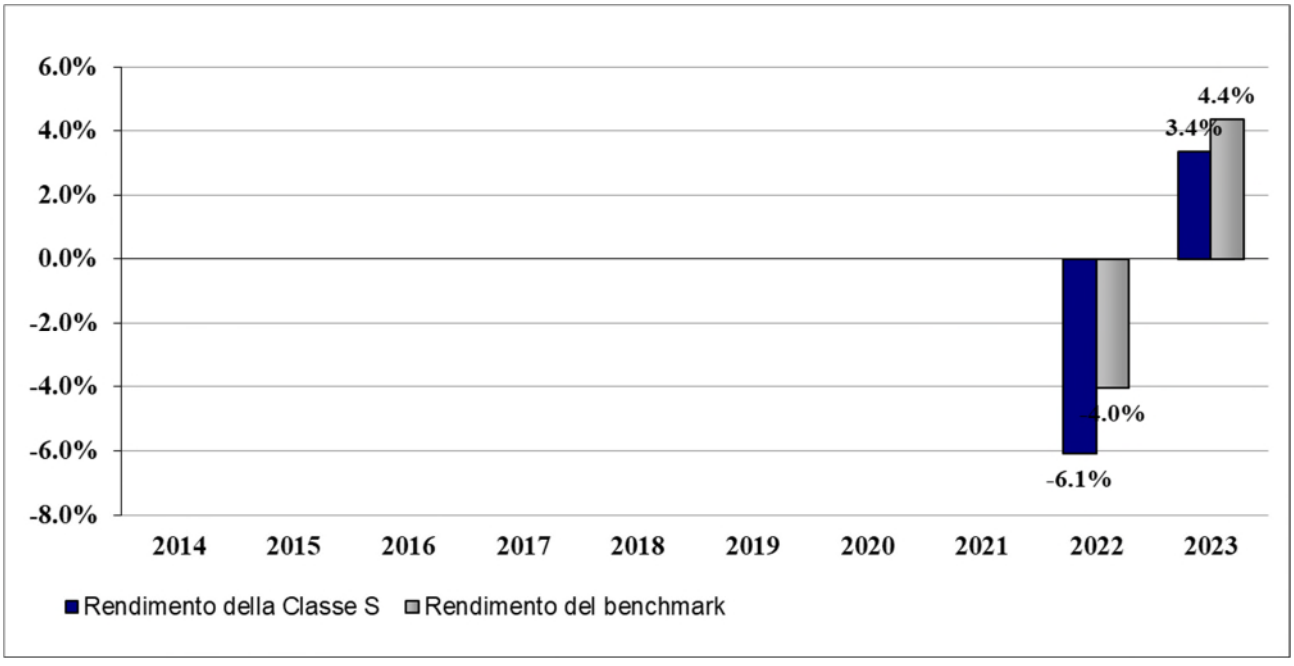
Il minimo rendimento mensile realizzato nell'esercizio, determinato considerando tutti gli intervalli di 20 giorni lavorativi consecutivi è stato pari a **-1,69%**.

Il VaR 95% mensile (che esprime in termini percentuali la massima perdita a cui è esposto il fondo su un orizzonte temporale di un mese e al livello di confidenza del 95%) determinato a posteriori sulla base dei rendimenti realizzati dal Fondo, considerando tutti gli intervalli di 20 rendimenti giornalieri consecutivi dell'esercizio ed escludendo il 5% dei peggiori risultati, è stato pari a **-0,81%**.

La medesima misura calcolata ipotizzando la normalità della distribuzione dei rendimenti settimanali del Fondo è pari a **-1,39%**.



Valori minimi e massimi della quota durante l'esercizio - Classe S



Andamento del valore della quota durante l'esercizio	
Valore minimo al 07/03/2023	4,631
Valore massimo al 22/12/2023 e al 29/12/2023	4,826

Nel corso dell'esercizio non sono stati rilevati errori nella valorizzazione delle quote.

Rendimento annuo del Fondo e del benchmark (ove applicabile) nel corso degli ultimi 5-10 anni solari

Esposizione al rischio del Fondo (Classe S)

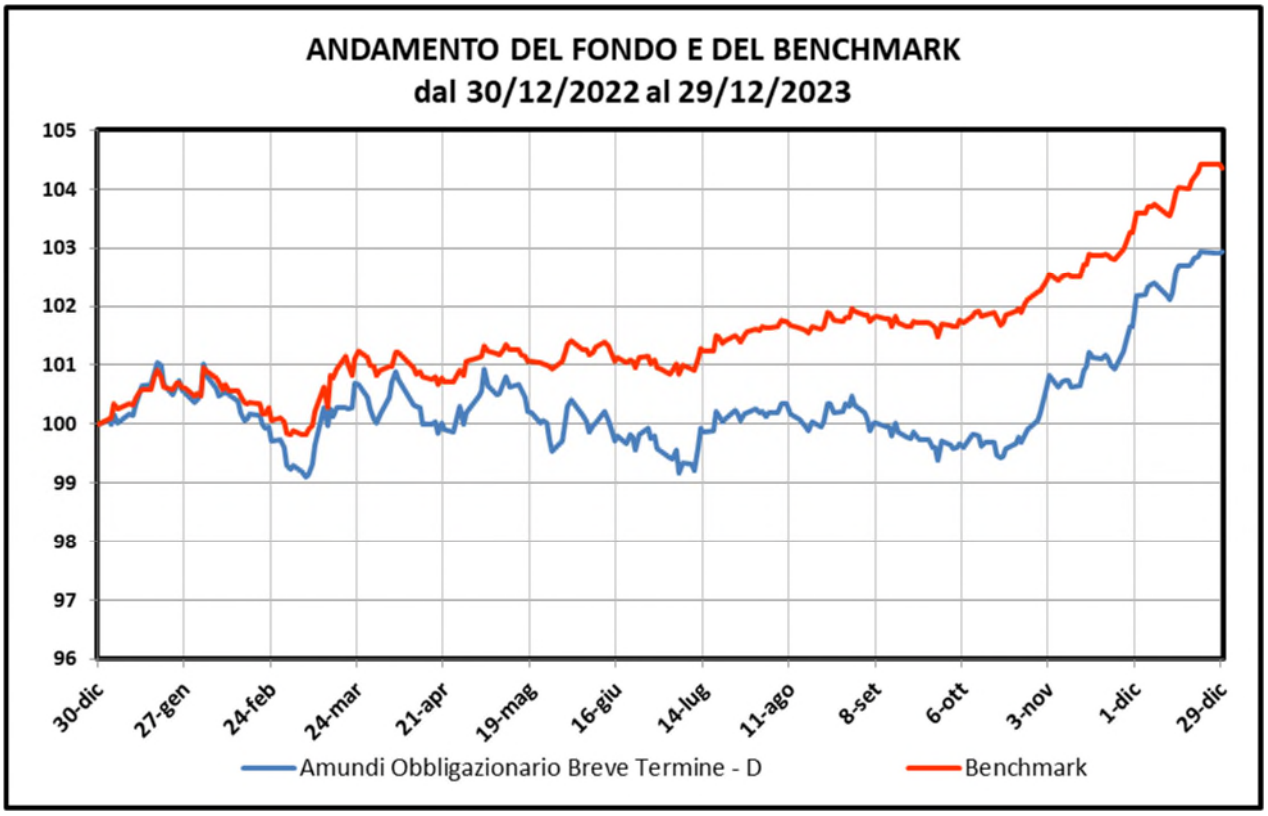
I dati di rendimento del Fondo non includono i costi di sottoscrizione (né gli eventuali costi di rimborso) a carico dell'investitore.

I principali rischi legati agli investimenti sono classificabili come rischio di mercato, rischio di credito, e rischio di liquidità. Il rischio di mercato è costituito dalla potenziale riduzione nel valore dei singoli titoli, eventualmente denominati in diverse valute. Il rischio di credito è determinato dal peggioramento del merito di credito degli emittenti dei titoli detenuti dal Fondo. Il rischio di liquidità è infine definito come il rischio che il Fondo investa in strumenti finanziari che possono risultare di difficile vendita, a seguito del verificarsi di determinate condizioni di mercato, con effetti negativi sul prezzo di realizzo.

Il monitoraggio di tali rischi viene effettuato su base continuativa dal gestore attraverso la costante verifica dell'effettivo posizionamento del fondo rispetto al profilo rischio-rendimento desiderato. La misura e il controllo dei rischi in oggetto viene inoltre effettuata con frequenza giornaliera mediante l'utilizzo di modelli matematico-statistici utilizzati autonomamente dalla struttura di Risk Management. I risultati di tali valutazioni sono regolarmente portati all'attenzione degli organi amministrativi della SGR.

Il Tracking Error (scarto quadratico medio annualizzato della differenza tra i rendimenti settimanali del fondo e i corrispondenti rendimenti del benchmark) nel periodo che va dal 30 dicembre 2022 (ultima quota del Fondo nell'esercizio 2022) al 29 dicembre 2023 (ultima quota del Fondo nell'esercizio) è stato pari a **1,44%**.

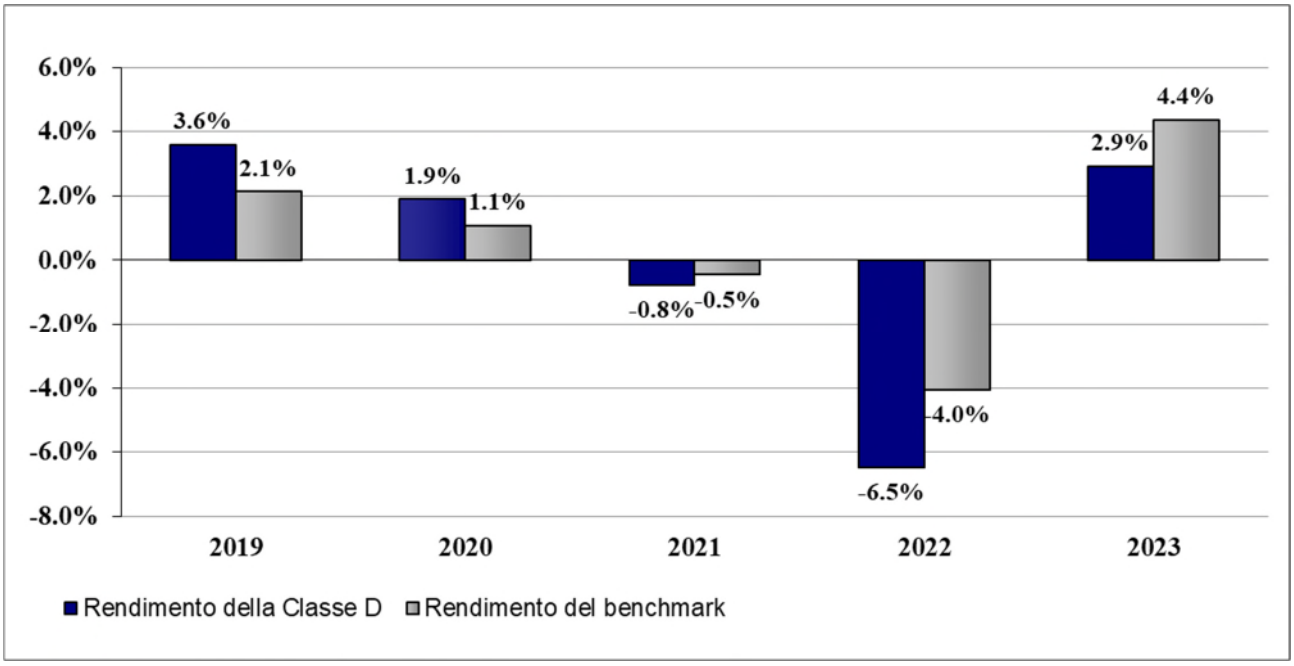
Per lo stesso arco temporale, la volatilità (calcolata sui rendimenti settimanali netti del Fondo ed annualizzata) è stata pari a **2,92%**, superiore al valore di **1,79%** realizzato dal benchmark.



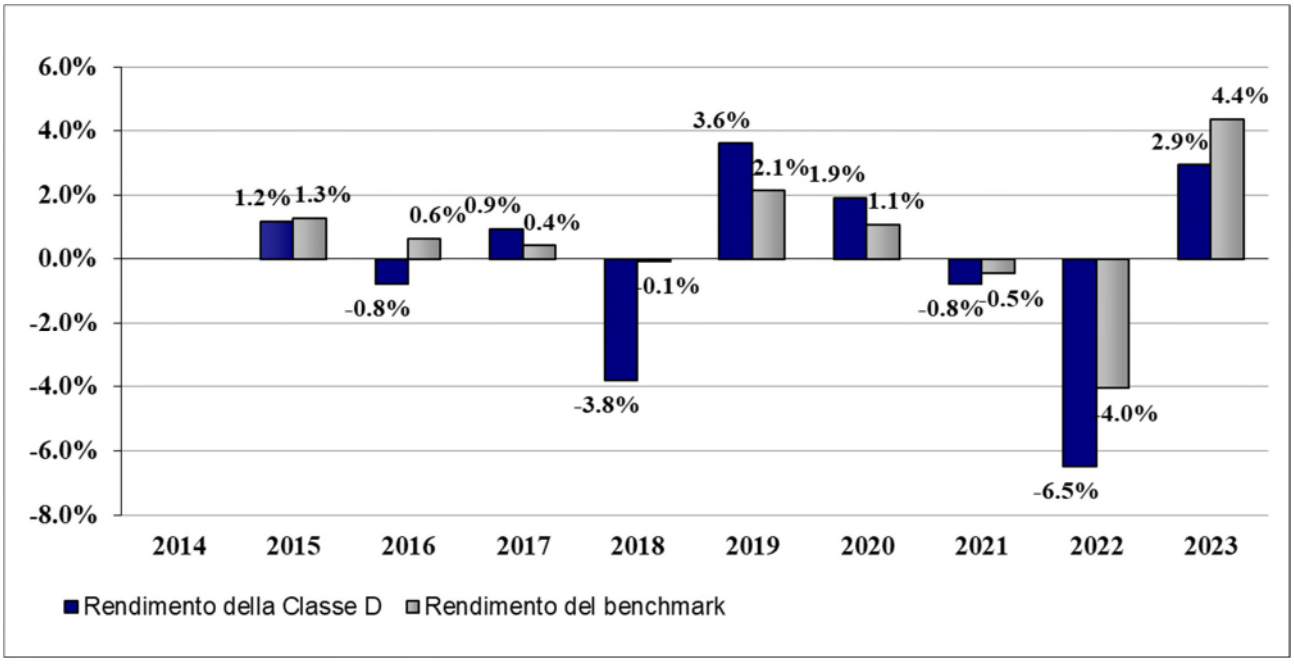
Il minimo rendimento mensile realizzato nell'esercizio, determinato considerando tutti gli intervalli di 20 giorni lavorativi consecutivi è stato pari a **-1,70%**.

Il VaR 95% mensile (che esprime in termini percentuali la massima perdita a cui è esposto il fondo su un orizzonte temporale di un mese e al livello di confidenza del 95%) determinato a posteriori sulla base dei rendimenti realizzati dal Fondo, considerando tutti gli intervalli di 20 rendimenti giornalieri consecutivi dell'esercizio ed escludendo il 5% dei peggiori risultati, è stato pari a **-0,81%**.

La medesima misura calcolata ipotizzando la normalità della distribuzione dei rendimenti settimanali del Fondo è pari a **-1,39%**.



Valori minimi e massimi della quota durante l'esercizio - Classe D



Andamento del valore della quota durante l'esercizio	
Valore minimo al 07/03/2023	4,429
Valore massimo al 22/12/2023 e al 29/12/2023	4,600

Nel corso dell'esercizio non sono stati rilevati errori nella valorizzazione delle quote.

Rendimento annuo del Fondo e del benchmark (ove applicabile) nel corso degli ultimi 5-10 anni solari

Esposizione al rischio del Fondo (Classe D)

I dati di rendimento del Fondo non includono i costi di sottoscrizione (né gli eventuali costi di rimborso) a carico dell'investitore.

I principali rischi legati agli investimenti sono classificabili come rischio di mercato, rischio di credito, e rischio di liquidità. Il rischio di mercato è costituito dalla potenziale riduzione nel valore dei singoli titoli, eventualmente denominati in diverse valute. Il rischio di credito è determinato dal peggioramento del merito di credito degli emittenti dei titoli detenuti dal Fondo. Il rischio di liquidità è infine definito come il rischio che il Fondo investa in strumenti finanziari che possono risultare di difficile vendita, a seguito del verificarsi di determinate condizioni di mercato, con effetti negativi sul prezzo di realizzo.

Il monitoraggio di tali rischi viene effettuato su base continuativa dal gestore attraverso la costante verifica dell'effettivo posizionamento del fondo rispetto al profilo rischio-rendimento desiderato. La misura e il controllo dei rischi in oggetto viene inoltre effettuata con frequenza giornaliera mediante l'utilizzo di modelli matematico-statistici utilizzati autonomamente dalla struttura di Risk Management. I risultati di tali valutazioni sono regolarmente portati all'attenzione degli organi amministrativi della SGR.

Il Tracking Error (scarto quadratico medio annualizzato della differenza tra i rendimenti settimanali del fondo e i corrispondenti rendimenti del benchmark) nel periodo che va dal 30 dicembre 2022 (ultima quota del Fondo nell'esercizio 2022) al 29 dicembre 2023 (ultima quota del Fondo nell'esercizio) è stato pari a **1,45%**.

Per lo stesso arco temporale, la volatilità (calcolata sui rendimenti settimanali netti del Fondo ed annualizzata) è stata pari a **2,93%**, superiore al valore di **1,79%** realizzato dal benchmark.

Il minimo rendimento mensile realizzato nell'esercizio, determinato considerando tutti gli intervalli di 20 giorni lavorativi consecutivi è stato pari a **-1,75%**.

Il VaR 95% mensile (che esprime in termini percentuali la massima perdita a cui è esposto il fondo su un orizzonte temporale di un mese e al livello di confidenza del 95%) determinato a posteriori sulla base dei rendimenti realizzati dal Fondo, considerando tutti gli intervalli di 20 rendimenti giornalieri consecutivi dell'esercizio ed escludendo il 5% dei peggiori risultati, è stato pari a **-0,85%**.

La medesima misura calcolata ipotizzando la normalità della distribuzione dei rendimenti settimanali del Fondo è pari a **-1,39%**.

Others	30.043.294	22.615.375	7.427.919	322
4.Remunerazione complessiva del personale attribuibile all'OICVM	40.808	27.432	13.376	0,33

(*) Le informazioni sopra riportate si riferiscono alle remunerazioni relative al personale di Amundi SGR SpA e non includono quelle relative ai gestori delegati.

La politica di remunerazione e incentivazione di Amundi SGR trae origine da quella formulata dalla capogruppo Amundi S.A., per tutte le entità del Gruppo Amundi ("Group Remuneration Policy").

La Group Remuneration Policy ingloba i principi e gli obblighi contemplati dalle direttive AIFM e UCITS V così come implementati dal regolatore locale, ed è coerente con la strategia aziendale, gli obiettivi, i valori e gli interessi della SGR e dei fondi da essa gestiti, nonché dei partecipanti ai fondi. Essa comprende misure volte a evitare i conflitti d'interesse.

Con riferimento al dato "remunerazione totale, suddivisa nella componente fissa e variabile, corrisposta nell'esercizio dalla SGR al personale", esso è composto, sulla base della posizione individuale di ciascun soggetto, dagli elementi di remunerazione fissa e variabile corrisposte dall'azienda nel periodo di riferimento.

Per "Remunerazione Variabile" si intendono gli importi delle remunerazioni variabili effettivamente corrisposte nell'anno, con esclusione di quelle relative al premio di produttività aziendale.

La componente variabile individuale, che può essere corrisposta sia in forma di bonus sia tramite strumenti finanziari o equivalenti, è l'unica remunerazione attribuita in relazione al contributo effettivo dell'individuo al raggiungimento dei risultati, determinato sulla base di specifici criteri, sia qualitativi sia quantitativi. I bonus di ammontare più elevato sono soggetti a meccanismi di differimento del pagamento e sono corrisposti al ricorrere di specifiche condizioni ("vesting condition"). In particolare le remunerazioni variabili corrisposte su una pluralità di anni vengono considerate nell'anno di effettivo pagamento.

Le informazioni aggiornate di dettaglio sulla politica e prassi di remunerazione e incentivazione del personale, inclusi i criteri e le modalità di calcolo delle remunerazioni e degli altri benefici e i soggetti responsabili per la determinazione delle remunerazioni e per l'assegnazione degli altri benefici, sono disponibili sul sito web della SGR. Una copia cartacea o un diverso supporto durevole contenente tali informazioni saranno forniti gratuitamente agli investitori che ne faranno richiesta.

Informazioni sulle modalità di calcolo della remunerazione:

Per le remunerazioni non attribuibili direttamente al singolo Fondo si è considerato quale parametro di riferimento significativo per la loro attribuzione:

- il totale del valore complessivo netto del fondo sul totale dei valori complessi netti dei fondi istituiti dalla SGR gestiti a Milano, per la "determinazione della retribuzione complessiva, suddivisa nella componente fissa e variabile, del personale coinvolto nella gestione dell'attività dell'OICVM";

- il totale del valore complessivo netto del fondo sul totale dei valori complessivi netti dei fondi istituiti dalla SGR, per definire la "proporzione della remunerazione complessiva del personale attribuibile all' OICVM". Analogo criterio è stato utilizzato per determinare il numero dei beneficiari, in quanto la loro attività non è direttamente attribuibile al singolo fondo.

Inoltre per le remunerazioni non attribuibili direttamente al singolo Fondo si è considerato quale parametro di riferimento significativo per la loro attribuzione il totale del valore complessivo netto del fondo sul totale dei valori complessi netti dei fondi istituiti dalla SGR, per definire la "proporzione della remunerazione complessiva del personale attribuibile al OICVM". Analogo criterio è stato utilizzato per determinare il numero dei beneficiari, in quanto la loro attività non è direttamente attribuibile al singolo fondo.

Relazione degli Amministratori della Società di Gestione

Eventi che hanno interessato il fondo

Il Consiglio di Amministrazione di Amundi SGR S.p.A.(di seguito "***SGR***"), nella riunione del **26 ottobre 2023**, ha approvato la modifica regolamentare di seguito indicata:
- modifiche al fondo **Amundi Dividendo Italia** ridenominato **Amundi Impegno Italia**

Il Consiglio di Amministrazione della SGR, riunitosi in data **26 gennaio 2023**, ha deliberato la fusione per incorporazione nel fondo **Amundi Impegno Italia - Classe B – Classe P** del seguente fondo comune:

- "**Amundi Accumulazione Italia PIR 2023 – Classe C**", con efficacia dal **19 luglio 2023**.
- "**Amundi Accumulazione Italia PIR 2023 – Classe P**", con efficacia dal **19 luglio 2023**.

In data **19/07/2023,** è avvenuta la fusione per incorporazione del fondo **Amundi Accumulazione Italia PIR 2023 – Classe C – Classe P.**
Il patrimonio del fondo incorporato **Classe C** è stato pari a **915.765,89** euro.
Il patrimonio del fondo incorporato **Classe P** è stato pari a **25.468.049,24** euro.

Caceis Bank, Italy Branch, in qualità di Depositario, ha certificato che le attività poste in essere per la fusione dei fondi sono state conformi alla normativa vigente.

Il rapporto di concambio per la fusione della **Classe C** è stato di **0.662036071.**
Il rapporto di concambio per la fusione della **Classe P** è stato di **0.835258422.**

Si rende sempre noto che il Consiglio di Amministrazione della SGR nella medesima data, ha approvato talune modifiche regolamentari volte a:

i) rendere elemento caratterizzante del Fondo l'attività di engagement sulle società in portafoglio (al fine di influenzarne positivamente i comportamenti e le attività anche dal punto di vista ESG), provvedendo di conseguenza a ridenominare il Fondo in "**Amundi Impegno Italia**";

ii) modificare il benchmark e parametro di misurazione della performance , sostituendo l'indice FTSE STAR con l'indice FTSE ITALIA MID CAP più adeguato ad un portafoglio PIR compliant (il nuovo benchmark e parametro di misurazione della performance sarà composto da 75% FTSE MIB e 25% FTSE ITALIA MID CAP);

iii) trasformare le Classi "B", P" e "Q" da classi del tipo a distribuzione dei proventi a classi ad accumulazione dei proventi.

Tali modifiche regolamentari si intendono approvate in via generale ai sensi del vigente Regolamento sulla gestione collettiva del risparmio della Banca d'Italia. Si ricorda che in relazione alle modifiche di cui ai sub ii) e sub iii) assoggettate a sospensione di efficacia ed illustrate in dettaglio nel documento inviato dalla SGR a ciascun partecipante. Tali modifiche saranno efficaci dal **1° gennaio 2024**.

Nel corso dell'esercizio non sono stati rilevati errori nella valorizzazione delle quote.

Politica d'investimento

Il fondo ha evidenziato le seguenti performance:
- Classe **A**: nel periodo 30 dicembre 2022 - 29 dicembre 2023 performance pari a 23,59% rispetto ad una variazione di 22,64% del benchmark
- Classe **P**: nel periodo 30 dicembre 2022 – 29 dicembre 2023 performance pari a 21,8% rispetto ad una variazione di 22,64% del benchmark
- Classe **B**: nel periodo 30 dicembre 2022 – 29 dicembre 2023 performance pari a 21,82% rispetto ad una variazione di 22,64% del benchmark

La performance del fondo e del relativo benchmark sono calcolate al lordo dell'effetto fiscale.

La performance del fondo è stata positiva in termini assoluti, in scia al rialzo sostenuto del mercato azionario italiano che si inserisce in un quadro di rialzi – più contenuti - dei mercati azionari globali. Il ridimensionamento dei timori di un rallentamento marcato, la riduzione dei costi energetici, la resilienza della domanda, il beneficio derivante dall'incremento dei prezzi di vendita deciso dalle aziende nella seconda metà del 2022, un livello di debito in scadenza contenuto che ha ridimensionato nell'immediato l'impatto dell'incremento dei tassi di interesse sui costi di finanziamento sono tutti elementi che hanno fornito supporto ai corsi azionari italiani. A ciò si è aggiunta, nella parte finale dell'anno, la rimodulazione delle attese sulle azioni della BCE, con proiezione di tassi di riferimento in calo nel corso del 2024. A livello di segmento di capitalizzazione, in evidenza le società di grande capitalizzazione che hanno messo a segno i rialzi più sostenuti; le società di piccola e media capitalizzazione hanno risentito delle preoccupazioni per l'aumento prospettico dei costi di finanziamento a fronte dell'aumento dei tassi. A livello settoriale, le dinamiche migliori sono state registrate dai settori consumi discrezionali (soprattutto il segmento auto), semiconduttori, bancario (sostegno dall'aumento dei margini di interesse), servizi di pubblica utilità; le dinamiche più deboli dai settori tecnologia-segmento hardware, beni durevoli, servizi alla persona, consumi di base.

La performance relativa del fondo è stata sostenuta dalla selezione. Nel dettaglio, di supporto soprattutto le scelte nei settori finanziario (nello specifico, il sovrappeso sulle banche vs sottopeso su assicurativi e *asset gatherer,* con le prime che hanno beneficiato dell'aumento del margine di interesse), industriale (nello specifico, il sottopeso sul segmento agricoltura e il sovrappeso sul segmento infrastrutturale) e semiconduttori; negativo invece il contributo delle scelte nel settore consumi discrezionali (nello specifico il sottopeso sui produttori di auto a favore della componentistica; il sovrappeso sui beni durevoli). Marginalmente positiva l'allocazione settoriale: da segnalare il contributo positivo del sovrappeso sui consumi discrezionali.
A livello di segmento di capitalizzazione, premianti le scelte di investimento all'interno del segmento delle società di piccola e media capitalizzazione.

Il portafoglio ha evidenziato su tutto il periodo una esposizione ai titoli azionari di piccola e media capitalizzazione sostanzialmente in linea con il benchmark. A livello di operatività, nella prima parte dell'anno il fondo presentava un posizionamento a favore dei settori più ciclici. Dopo le tensioni sul sistema bancario di piccole e medie dimensioni USA e in risposta alle attese di rallentamento globale più forte di quanto precedentemente previsto, è stato implementato un graduale ribilanciamento settoriale, con riduzione dell'esposizione ai settori più ciclici e a più alto beta (come consumi discrezionali) e ai finanziari (segmento banche) a favore dei settori difensivi. Nella seconda metà dell'anno è stata via via aumentata l'esposizione ai titoli azionari di piccola e media capitalizzazione che dovrebbero essere sostenuti dall'atteso calo dei tassi; a livello settoriale, incrementata l'esposizione al settore energetico, al settore bancario, al settore dei servizi di pubblica utilità, ai consumi di base e ai servizi alle persone; ridotta l'esposizione ai produttori di auto, a vantaggio della componentistica, e ai titoli industriali legati al segmento agricoltura. nel settore dei consumi discrezionali, ridotta l'esposizione ai produttori di auto a vantaggio della componentistica e nel settore industriale ridotta l'esposizione ai titoli industriali legati al segmento agricoltura.

Su tutto il periodo è stato mantenuto il focus su titoli di qualità, supportati da fondamentali e posizionamento competitivo di valore.
In ottica ESG, nella valutazione di ogni scelta di investimento l'analisi ESG si affianca a valutazioni fondamentali, rientrando come elemento standard del processo di investimento.
In chiusura di periodo, sovrappesi medi maggiori su servizi di pubblica utilità, consumi discrezionali e industriali; sottopesi medi maggiori su finanziari, tecnologia ed energetici.

In prospettiva riteniamo che, sebbene i recenti dati economici si siano rivelati solidi a livello globale, sia possibile un rallentamento nei prossimi trimestri. Ciò, unitamente al rallentamento della dinamica dei prezzi al consumo, dovrebbe favorire un orientamento di politica monetaria espansiva e un calo dei tassi. Il ridimensionamento dei tassi e il ritardo in termini di performance accumulato nel 2023 dovrebbero fornire sostegno ai titoli di piccola e media capitalizzazione.
A partire da questo contesto, il portafoglio presenta una maggiore esposizione ai titoli di piccola/media capitalizzazione, un sottopeso su settori che si ritiene possano essere vicini al picco degli utili/margini o più sensibili ad un eventuale rallentamento, e un sovrappeso su settori più difensivi e su titoli con buona visibilità di lungo termine.
La gestione del portafoglio nel corso del 2024 verrà modificata sulla base delle evoluzioni dei mercati finanziari.

Eventi successivi al 29 dicembre 2023

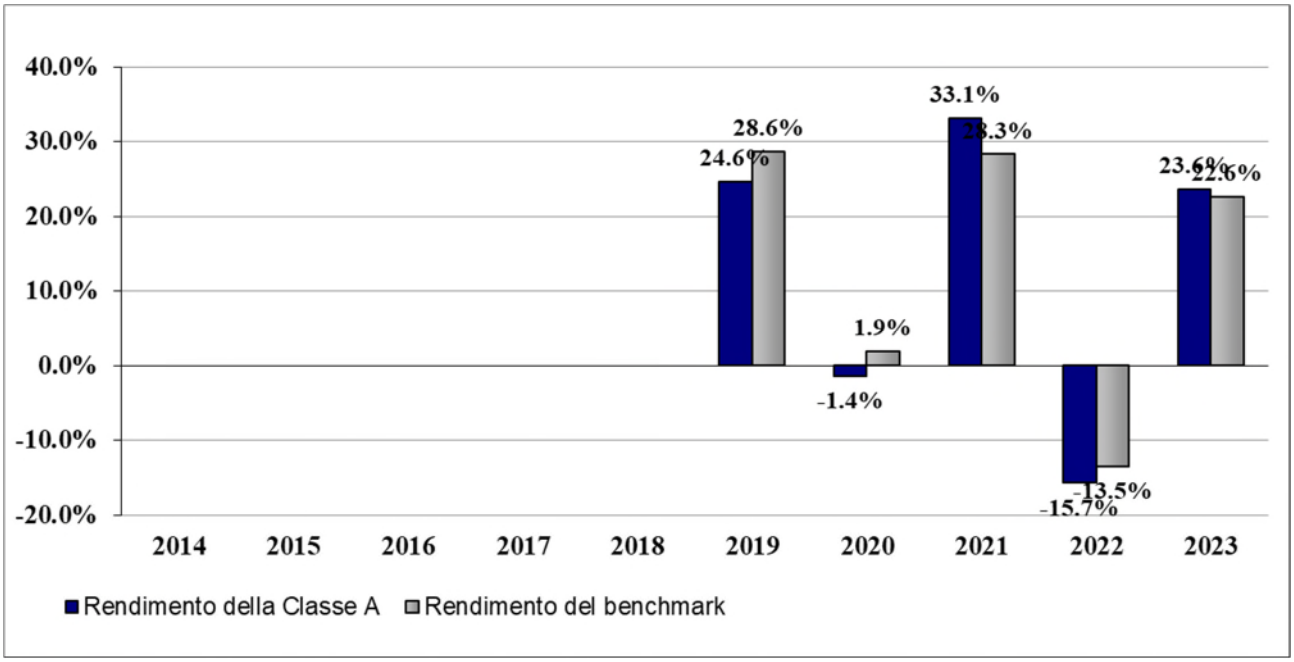
Andamento del valore della quota durante l'esercizio	
Valore minimo al 02/01/2023	5,511
Valore massimo al 27/12/2023	6,741



Nel corso dell'esercizio non sono stati rilevati errori nella valorizzazione delle quote.

.

Rendimento annuo del Fondo e del benchmark (ove applicabile) nel corso degli ultimi 5-10 anni solari

Esposizione al rischio del Fondo (Classe A)

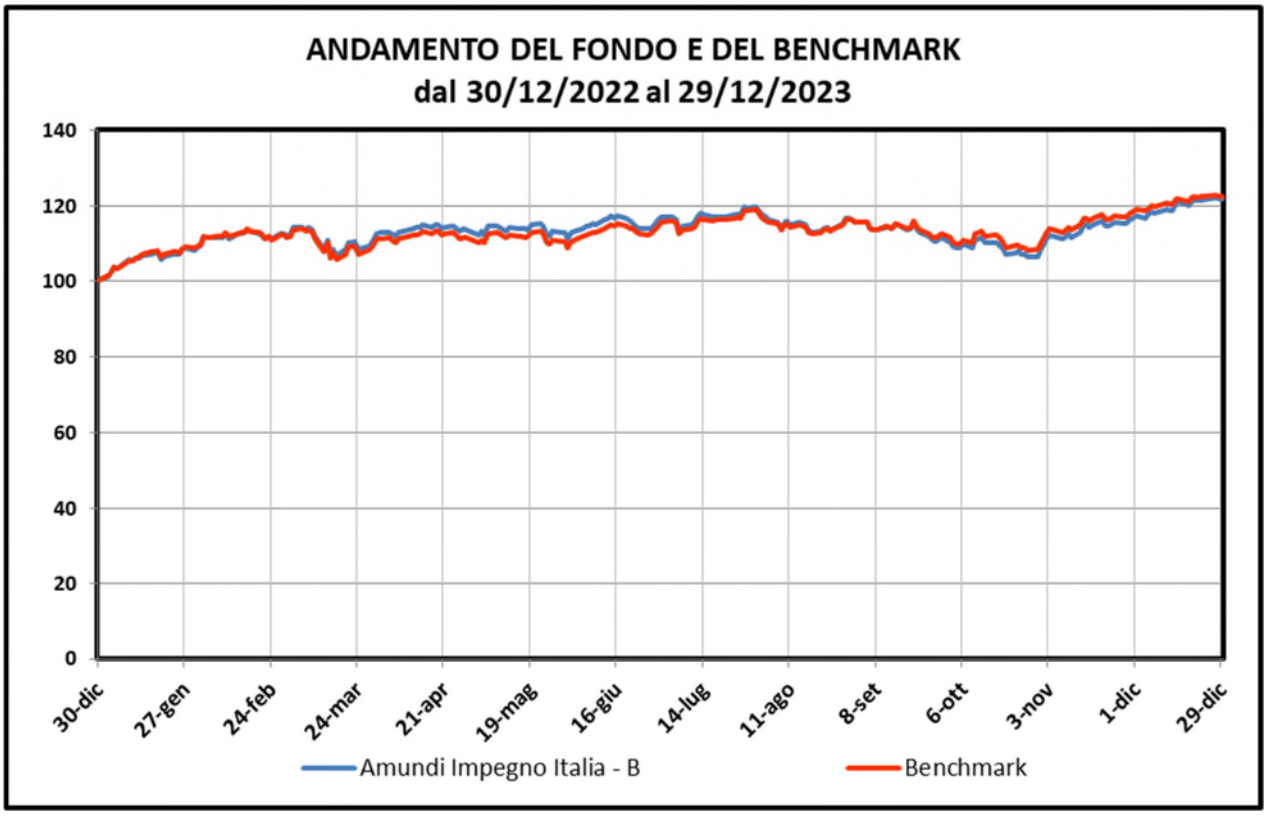
I dati di rendimento del Fondo non includono i costi di sottoscrizione (né gli eventuali costi di rimborso) a carico dell'investitore.

I principali rischi legati agli investimenti sono classificabili come rischio di mercato, rischio di credito, e rischio di liquidità. Il rischio di mercato è costituito dalla potenziale riduzione nel valore dei singoli titoli, eventualmente denominati in diverse valute. Il rischio di credito è determinato dal peggioramento del merito di credito degli emittenti dei titoli detenuti dal Fondo. Il rischio di liquidità è infine definito come il rischio che il Fondo investa in strumenti finanziari che possono risultare di difficile vendita, a seguito del verificarsi di determinate condizioni di mercato, con effetti negativi sul prezzo di realizzo.

Il monitoraggio di tali rischi viene effettuato su base continuativa dal gestore attraverso la costante verifica dell'effettivo posizionamento del fondo rispetto al profilo rischio-rendimento desiderato. La misura e il controllo dei rischi in oggetto viene inoltre effettuata con frequenza giornaliera mediante l'utilizzo di modelli matematico-statistici utilizzati autonomamente dalla struttura di Risk Management. I risultati di tali valutazioni sono regolarmente portati all'attenzione degli organi amministrativi della SGR.

Il Tracking Error (scarto quadratico medio annualizzato della differenza tra i rendimenti settimanali del fondo e i corrispondenti rendimenti del benchmark) nel periodo che va dal 30 dicembre 2022 (ultima quota del Fondo nell'esercizio 2022) al 29 dicembre 2023 (ultima quota del Fondo nell'esercizio) è stato pari a **2,04%**.

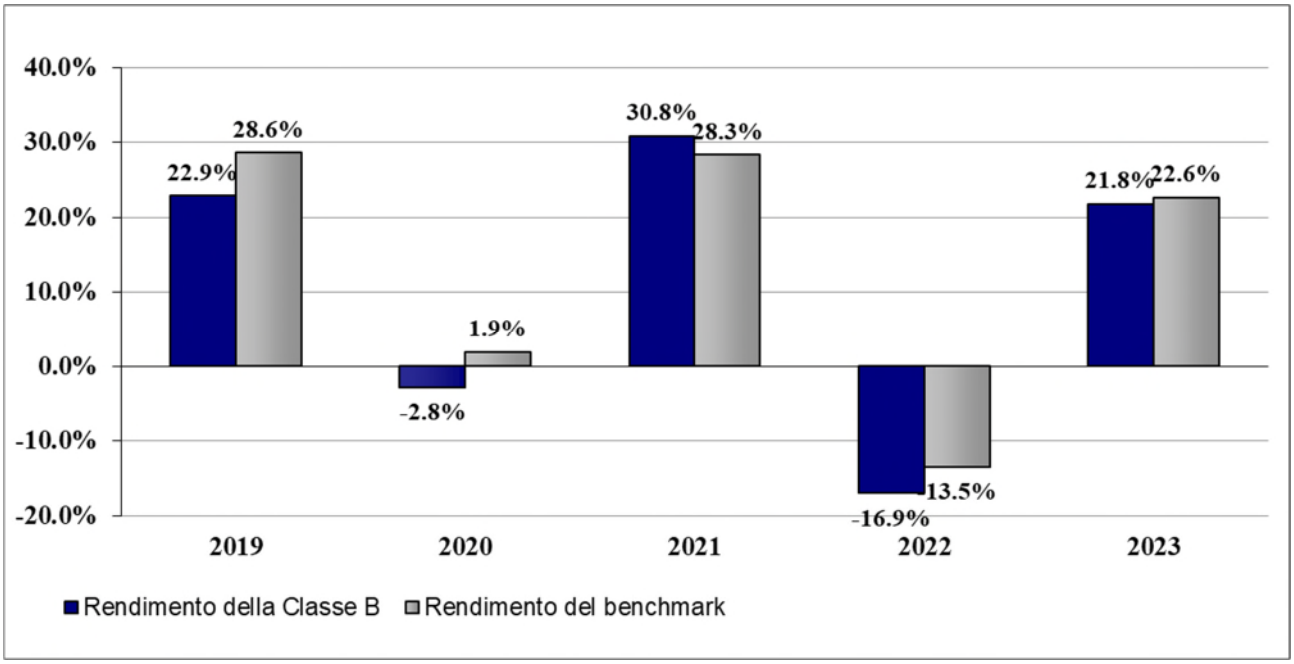
Per lo stesso arco temporale, la volatilità (calcolata sui rendimenti settimanali netti del Fondo ed annualizzata) è stata pari a **14,60%**, superiore al valore di **14,23%** realizzato dal benchmark.



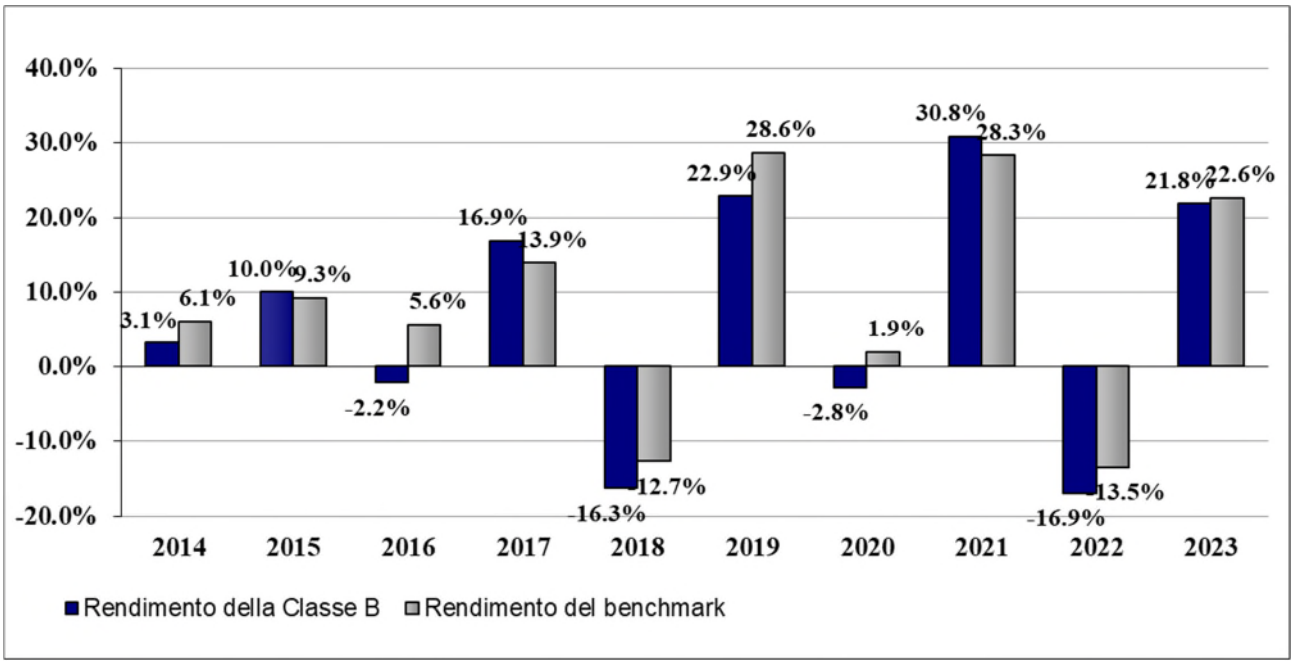
Il minimo rendimento mensile realizzato nell'esercizio, determinato considerando tutti gli intervalli di 20 giorni lavorativi consecutivi è stato pari a **-5,55%.**

Il VaR 95% mensile (che esprime in termini percentuali la massima perdita a cui è esposto il fondo su un orizzonte temporale di un mese e al livello di confidenza del 95%) determinato a posteriori sulla base dei rendimenti realizzati dal Fondo, considerando tutti gli intervalli di 20 rendimenti giornalieri consecutivi dell'esercizio ed escludendo il 5% dei peggiori risultati, è stato pari a **-4,53%**.

La medesima misura calcolata ipotizzando la normalità della distribuzione dei rendimenti settimanali del Fondo è pari a **-6,93%**.



Valori minimi e massimi della quota durante l'esercizio - Classe B



Andamento del valore della quota durante l'esercizio	
Valore minimo al 02/01/2023	7,580
Valore massimo al 27/12/2023	9,142

Nel corso dell'esercizio non sono stati rilevati errori nella valorizzazione delle quote.

Rendimento annuo del Fondo e del benchmark (ove applicabile) nel corso degli ultimi 5-10 anni solari

Esposizione al rischio del Fondo (Classe B)

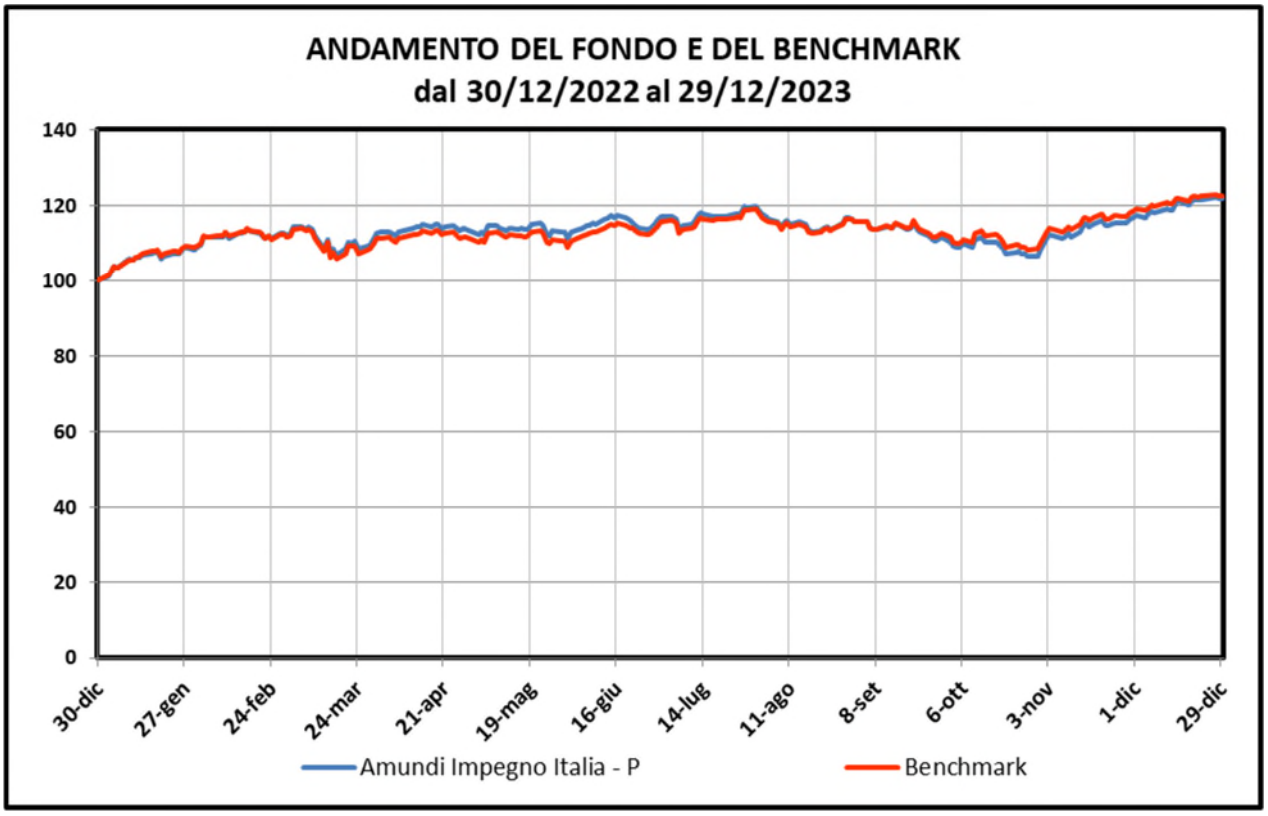
I dati di rendimento del Fondo non includono i costi di sottoscrizione (né gli eventuali costi di rimborso) a carico dell'investitore.

I principali rischi legati agli investimenti sono classificabili come rischio di mercato, rischio di credito, e rischio di liquidità. Il rischio di mercato è costituito dalla potenziale riduzione nel valore dei singoli titoli, eventualmente denominati in diverse valute. Il rischio di credito è determinato dal peggioramento del merito di credito degli emittenti dei titoli detenuti dal Fondo. Il rischio di liquidità è infine definito come il rischio che il Fondo investa in strumenti finanziari che possono risultare di difficile vendita, a seguito del verificarsi di determinate condizioni di mercato, con effetti negativi sul prezzo di realizzo.

Il monitoraggio di tali rischi viene effettuato su base continuativa dal gestore attraverso la costante verifica dell'effettivo posizionamento del fondo rispetto al profilo rischio-rendimento desiderato. La misura e il controllo dei rischi in oggetto viene inoltre effettuata con frequenza giornaliera mediante l'utilizzo di modelli matematico-statistici utilizzati autonomamente dalla struttura di Risk Management. I risultati di tali valutazioni sono regolarmente portati all'attenzione degli organi amministrativi della SGR.

Il Tracking Error (scarto quadratico medio annualizzato della differenza tra i rendimenti settimanali del fondo e i corrispondenti rendimenti del benchmark) nel periodo che va dal 30 dicembre 2022 (ultima quota del Fondo nell'esercizio 2022) al 29 dicembre 2023 (ultima quota del Fondo nell'esercizio) è stato pari a **2,09%**.

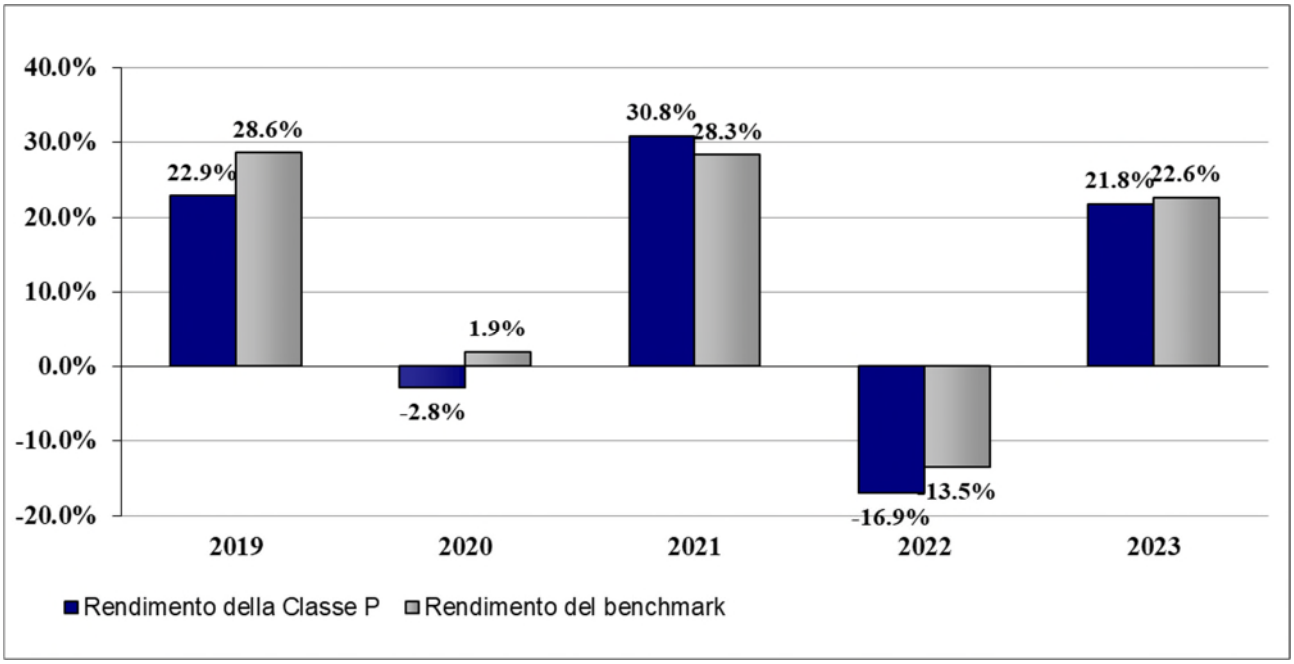
Per lo stesso arco temporale, la volatilità (calcolata sui rendimenti settimanali netti del Fondo ed annualizzata) è stata pari a **14,58%**, superiore al valore di **14,23%** realizzato dal benchmark.



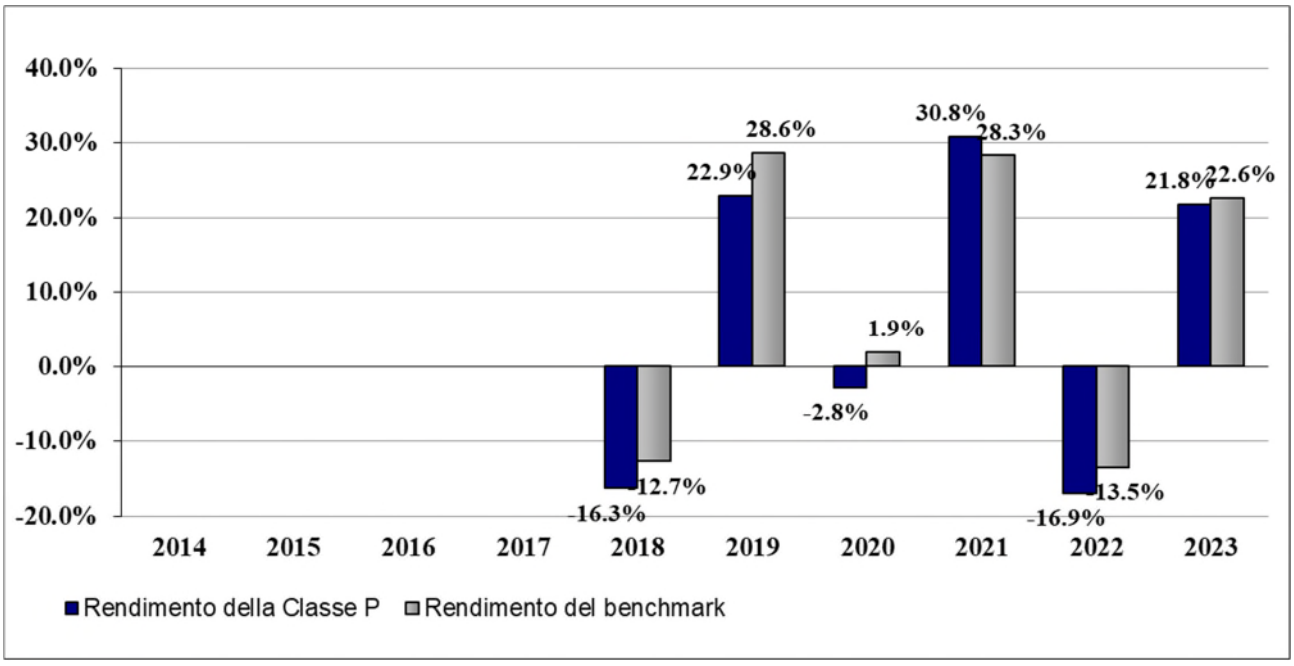
Il minimo rendimento mensile realizzato nell'esercizio, determinato considerando tutti gli intervalli di 20 giorni lavorativi consecutivi è stato pari a **-5,65%**.

Il VaR 95% mensile (che esprime in termini percentuali la massima perdita a cui è esposto il fondo su un orizzonte temporale di un mese e al livello di confidenza del 95%) determinato a posteriori sulla base dei rendimenti realizzati dal Fondo, considerando tutti gli intervalli di 20 rendimenti giornalieri consecutivi dell'esercizio ed escludendo il 5% dei peggiori risultati, è stato pari a **-4,65%**.

La medesima misura calcolata ipotizzando la normalità della distribuzione dei rendimenti settimanali del Fondo è pari a **-6,92%**.



Valori minimi e massimi della quota durante l'esercizio - Classe P



Andamento del valore della quota durante l'esercizio	
Valore minimo al 02/01/2023	6,009
Valore massimo al 27/03/2023	7,246

Nel corso dell'esercizio non sono stati rilevati errori nella valorizzazione delle quote.

Rendimento annuo del Fondo e del benchmark (ove applicabile) nel corso degli ultimi 5-10 anni solari

Esposizione al rischio del Fondo (Classe P)

I dati di rendimento del Fondo non includono i costi di sottoscrizione (né gli eventuali costi di rimborso) a carico dell'investitore.

I principali rischi legati agli investimenti sono classificabili come rischio di mercato, rischio di credito, e rischio di liquidità. Il rischio di mercato è costituito dalla potenziale riduzione nel valore dei singoli titoli, eventualmente denominati in diverse valute. Il rischio di credito è determinato dal peggioramento del merito di credito degli emittenti dei titoli detenuti dal Fondo. Il rischio di liquidità è infine definito come il rischio che il Fondo investa in strumenti finanziari che possono risultare di difficile vendita, a seguito del verificarsi di determinate condizioni di mercato, con effetti negativi sul prezzo di realizzo.

4.Remunerazione complessiva del personale attribuibile all'OICVM	58.003	38.991	19.012	0,47

(*) Le informazioni sopra riportate si riferiscono alle remunerazioni relative al personale di Amundi SGR SpA e non includono quelle relative ai gestori delegati.

La politica di remunerazione e incentivazione di Amundi SGR trae origine da quella formulata dalla capogruppo Amundi S.A., per tutte le entità del Gruppo Amundi ("Group Remuneration Policy").

La Group Remuneration Policy ingloba i principi e gli obblighi contemplati dalle direttive AIFM e UCITS V così come implementati dal regolatore locale, ed è coerente con la strategia aziendale, gli obiettivi, i valori e gli interessi della SGR e dei fondi da essa gestiti, nonché dei partecipanti ai fondi. Essa comprende misure volte a evitare i conflitti d'interesse.

Con riferimento al dato "remunerazione totale, suddivisa nella componente fissa e variabile, corrisposta nell'esercizio dalla SGR al personale", esso è composto, sulla base della posizione individuale di ciascun soggetto, dagli elementi di remunerazione fissa e variabile corrisposte dall'azienda nel periodo di riferimento.

Per "Remunerazione Variabile" si intendono gli importi delle remunerazioni variabili effettivamente corrisposte nell'anno, con esclusione di quelle relative al premio di produttività aziendale.

La componente variabile individuale, che può essere corrisposta sia in forma di bonus sia tramite strumenti finanziari o equivalenti, è l'unica remunerazione attribuita in relazione al contributo effettivo dell'individuo al raggiungimento dei risultati, determinato sulla base di specifici criteri, sia qualitativi sia quantitativi. I bonus di ammontare più elevato sono soggetti a meccanismi di differimento del pagamento e sono corrisposti al ricorrere di specifiche condizioni ("vesting condition"). In particolare le remunerazioni variabili corrisposte su una pluralità di anni vengono considerate nell'anno di effettivo pagamento.

Le informazioni aggiornate di dettaglio sulla politica e prassi di remunerazione e incentivazione del personale, inclusi i criteri e le modalità di calcolo delle remunerazioni e degli altri benefici e i soggetti responsabili per la determinazione delle remunerazioni e per l'assegnazione degli altri benefici, sono disponibili sul sito web della SGR. Una copia cartacea o un diverso supporto durevole contenente tali informazioni saranno forniti gratuitamente agli investitori che ne faranno richiesta.

Informazioni sulle modalità di calcolo della remunerazione:

Per le remunerazioni non attribuibili direttamente al singolo Fondo si è considerato quale parametro di riferimento significativo per la loro attribuzione:

- il totale del valore complessivo netto del fondo sul totale dei valori complessi netti dei fondi istituiti dalla SGR gestiti a Milano, per la "determinazione della retribuzione complessiva, suddivisa nella componente fissa e variabile, del personale coinvolto nella gestione dell'attività dell'OICVM";

- il totale del valore complessivo netto del fondo sul totale dei valori complessivi netti dei fondi istituiti dalla SGR, per definire la "proporzione della remunerazione complessiva del personale attribuibile all' OICVM". Analogo criterio è stato utilizzato per determinare il numero dei beneficiari, in quanto la loro attività non è direttamente attribuibile al singolo fondo.

Inoltre per le remunerazioni non attribuibili direttamente al singolo Fondo si è considerato quale parametro di riferimento significativo per la loro attribuzione il totale del valore complessivo netto del fondo sul totale dei valori complessi netti dei fondi istituiti dalla SGR, per definire la "proporzione della remunerazione complessiva del personale attribuibile al OICVM". Analogo criterio è stato utilizzato per determinare il numero dei beneficiari, in quanto la loro attività non è direttamente attribuibile al singolo fondo.

Parte D – Altre informazioni

2) Informazioni sugli oneri d'intermediazione

	Soggetti non appartenenti al gruppo	*Soggetti appartenenti al gruppo*	*Totale*
Banche italiane	7.838		7.838
SIM	22.579		22.579
Banche e imprese di investimento estere	32.669		32.669
Altre controparti	748		748

Relativamente alle negoziazioni su strumenti finanziari diversi dai titoli azionari e dai derivati, gli oneri corrisposti alle controparti per l'intermediazione sono inclusi nel prezzo di acquisto o dedotti dal prezzo di vendita dello strumento stesso; per queste categorie di strumenti finanziari non è possibile fornire una ripartizione di tali oneri per tipologia di controparte.

5) Turnover

Il tasso di movimentazione del portafoglio del Fondo (c.d. turnover), espresso dal rapporto percentuale tra la somma degli acquisti e delle vendite di strumenti finanziari, al netto delle sottoscrizioni e rimborsi delle quote del Fondo, e il patrimonio netto medio del Fondo, nell'esercizio è stato pari a 27,22.

8) Esercizio del diritto di voto alle Assemblee di società quotate

La società ha adottato una policy per l'esercizio dei diritti di voto inerenti agli strumenti finanziari di pertinenza degli OICR gestiti al fine di assicurare che tali diritti siano esercitati nell'esclusivo interesse dei partecipanti agli OICR, la cui sintesi è disponibile sul sito internet.

Durante il corso dell'esercizio 2023 in linea con quanto indicato nel Protocollo di Autonomia di Assogestioni, il fondo Amundi Impegno Italia è intervenuto in 98 assemblee in 4 mercati.

Nell'ambito dei suddetti interventi, la SGR ha altresi proposto una lista di candidati per la carica di amministratori e sindaci alle assemblee di Moncler Spa, Hera Spa, Assicurazioni Generali Spa, Avio Spa, Safilo Group Spa, Erg Spa, Interpump Spa, Fineco Banca Spa, Fiera Spa, Enav Spa, LU-VE Spa, Brunello Cucinelli Spa, Telecom Italia Spa, Sol Spa, Enel Spa, Eni Spa, Cy4gate Spa, Pirelli & C Spa, Mediobanca Spa.

Trasparenza degli OICR sull'uso delle operazioni di finanziamento tramite titoli e dei Total Return Swap ai sensi del regolamento (UE) 2015/2365 (Regolamento SFT)

L'OICR non presenta posizioni aperte relative ad operazioni di Prestito titoli, Pronti contro Termine, Repurchase transaction e Total Return Swap alla data di riferimento della relazione e non ha fatto ricorso a tali operazioni nel periodo di riferimento della relazione.

AMUNDI PRIMO INVESTIMENTO

Sezione Reddituale 106
Nota Integrativa 109

Relazione degli Amministratori della Società di Gestione

Eventi che hanno interessato il fondo

Il Consiglio di Amministrazione della Amundi SGR S.p.A. (di seguito "***SGR***"), riunitosi in data **26 gennaio 2023**, ha deliberato la fusione per incorporazione nel fondo **Amundi Primo Investimento - Classe B** del seguente fondo comune:

- **"Amundi Obiettivo Selezione Income 2023**", con efficacia dal **12 ottobre 2023**;

In data **12/10/2023,** è avvenuta la fusione per incorporazione del fondo **Amundi Obiettivo Selezione Income 2023**.
Il patrimonio del fondo incorporato è stato pari a **8.240.360,80** euro.
Caceis Bank, Italy Branch, in qualità di Depositario, ha certificato che le attività poste in essere per la fusione dei fondi sono state conformi alla normativa vigente.
Il rapporto di concambio per la fusione è stato di **0.983086502.**

Le fusioni non sono state sottoposte all'approvazione della Banca d'Italia in quanto rientrano nei casi in cui l'approvazione si intende rilasciata in via generale.

Si rende sempre noto che il Consiglio di Amministrazione della SGR, nella medesima data, ha approvato le modifiche regolamentari al fondo "Amundi Primo Investimento" appartenente al Regolamento "Fondi Amundi" con riferimento alla commissione di performance.

L'aggiornamento si è reso necessario al fine di modificare la modalità di calcolo della commissione di performance ed in particolare prevedere che il Rendimento Obiettivo possa essere costituito dal tasso Euro Short Term Rate capitalizzato giornalmente (€STR2) +110 bps di spread su base annua in sostituzione dell'indice Bloomberg Euro Treasury Bill 0-6 maggiorato di uno spread del 0,50% annuo.

Le modifiche di cui sopra, non soggette a sospensiva di efficacia, si ritengono approvate in via generale dalla Banca d'Italia ed entreranno in vigore dal **1° aprile 2023**.

Nel corso dell'esercizio non sono stati rilevati errori nella valorizzazione delle quote.

Politica d'investimento

Il fondo ha evidenziato le seguenti performance:

Classe **A**: nel periodo 30 dicembre 2022 – 29 dicembre 2023 performance pari a -0,02%;
Classe **B**: nel periodo 30 dicembre 2022 – 29 dicembre 2023 performance pari a -0,77%;
Classe **E**: nel periodo 30 dicembre 2022 – 29 dicembre 2023 performance pari a –0,16%.

Le performance del fondo sono calcolate al lordo dell'effetto fiscale.

Data la natura flessibile del fondo, orientata al rendimento assoluto, non è indicato un benchmark rappresentativo della politica di investimento.

Il portafoglio ha registrato nell'anno una performance leggermente negativa. Anno a due volti per il fondo che fino a ottobre ha registrato performance negative, a causa soprattutto delle strategie direzionali lunghe sui tassi, specie non Euro, seguite a distanza da valute (lungo USD e yen) e materie prime, perdite mitigate in parte dalle posizioni lunghe su azioni; deboli, ma in misura minore, le strategie satellite su azioni (basket europei e USA in un contesto di volatilità e dispersione settoriale elevate) e tassi (posizione netta lunga) a fronte di un buon andamento delle strategie a spread.
Da fine ottobre in poi le soluzioni hanno recuperato terreno, riassorbendo le perdite grazie al contributo positivo della duration lunga sui paesi core e alla componente a spread, ma soprattutto grazie all'aumento rapido e

significativo del rischio azionario che ha permesso di partecipare in misura rilevante al rally delle borse. Anche le strategie non direzionali su spread, azioni e tassi e la selezione dei titoli corporate hanno generato valore. Contributo negativo è giunto dalle strategie di protezione, in particoalre sui mercati azionari e, in misura minore, sul credito (soprattutto high yield), mentre hanno contribuito positivamente le protezioni sui tassi.

Operativamente, la gestione del portafoglio è stata caratterizzata da notevole dinamicità per fronteggiare la variabilità dello scenario di riferimento.

Nel primo trimestre del 2023 l'assetto di portafoglio si è confermato bilanciato e con un'impostazione moderatamente costruttiva. Nella prima parte del trimestre, proseguendo nell'attività di accumulo di risk premium già avviata nella parte finale del 2022, sono stati aumentati peso azionario, per sfruttare il possibile rimbalzo in un contesto di basso posizionamento degli investitori, e duration, specie laddove le banche centrali sono più avanti nel ciclo di rialzo dei tassi, mentre sul credito è prevalso un approccio opportunistico che ha portato a incrementare i rischi via primario (offerta record a gennaio con premi di rischio attraenti) per poi prendere profitto a fine mese dopo il rally. A febbraio, in un contesto di incertezza sui mercati l'assetto di portafoglio è stato virato su un profilo più cauto, pur confermando l'impostazione moderatamente risk-on, considerate le attese di tenuta del quadro macro. Nel mese è stata quindi diminuita l'esposizione azionaria; tagliata la posizione lunga di duration in un'ottica di gestione dei rischi, dato il forte riprezzamento verso l'alto delle curve; incrementata l'esposizione ai governativi periferici (Italia) e al credito. Lato valute, il dollaro è stato incrementato in linea con la narrativa secondo cui si è passati ad uno scenario diverso con la Fed che potrebbe continuare a rialzare i tassi e in presenza di un'economia che rimane resiliente. A marzo, dato l'aumento dei rischi causato dalle crisi bancarie in Europa e USA, che potrebbero portare ad un restringimento del credito con impatto negativo sulla crescita economica, è stata nuovamente aumentata la duration intervenendo su tutte le aree dei paesi sviluppati; inoltre sono state rafforzate le posizioni favorevoli all'irripidimento delle curve in Europa e USA. Anche il credito è stato gestito attivamente, via strutture opzionali, e si conferma in generale ben protetto grazie alla elevata convessità che permette un taglio rapido dell'esposizione in caso di spread in tensione, ma anche partecipazione al rialzo in fase risk-on. L'esposizione azionaria è rimasta stabile, pur con gestione dinamica per effetto delle strutture opzionali; l'allocazione geografica ha mantenuto il baricentro su Europa e USA, mentre Giappone e paesi Emergenti mantengono un ruolo più limitato; a livello settoriale, invece, dato l'aumento dei rischi di recessione, è stato ridotto il peso dei comparti ciclici (compagnie aeree, industriali, auto, energia, risorse di base) e sono stati riacquistati i temi difensivi (consumi non ciclici, utilities, farmaceutici) e rafforzati i tecnologici (in Europa). La posizione sul dollaro è stata ridotta in misura importante, considerate le attese di una Fed meno aggressiva. Si conferma l'esposizione all'inflazione e alle materie prime.

Nel secondo trimestre il portafoglio ha confermato un'impostazione cautamente ottimista, ma con una maggiore sensibilità lato difensivo visti i rischi, come la crisi bancaria USA, una eventuale manovra più aggressiva della BCE e dati macro in rallentamento evidente in alcune aree. L'obiettivo è stato quindi di partecipare ad eventuali rialzi dei mercati, ma senza essere troppo compiacenti. È stato confermato un posizionamento lungo sugli asset rischiosi, nella parte bassa dell'esposizione storica, ma ben coperto con strutture di hedging per tagliare ulteriormente i rischi in caso di correzioni. Nei primi due mesi del secondo trimestre il peso azionario è diminuito per effetto opzionale e prese di profitto, dato l'approccio moderatamente cauto e per rientrare sui mercati a prezzi più ragionevoli in caso di storno. A giugno il peso è stato poi aumentato, per finalità tattiche, su livelli comunque inferiori a quelli di inizio trimestre. L'allocazione geografica ha mantenuto nel periodo il baricentro su USA (di supporto il posizionamento, dati macro in miglioramento, volatilità in calo) e Giappone (miglioramento della governance); in diminuzione il posizionamento sull'Europa; rafforzata la cautela su paesi Emergenti (deboli i dati macro cinesi) e area Pacifico. Settori: assetto difensivo, attenuato nel periodo. Il posizionamento di duration è stato incrementato nel trimestre data l'attesa di una Federal Reserve prossima alla fine del ciclo di rialzo dei tassi; è stato mantenuto il posizionamento lungo tassi sulle curve del blocco dollaro, le cui banche centrali sono ben avanti nel ciclo di rialzo dei tassi. In Europa posizione lunga concentrata sul tratto 5-10 anni e preferenza per strategie di irripidimento della curva. Dopo una riduzione effettuata ad aprile per parziali prese di profitto sull'Italia (potenziale rischio da quantitative tightening della BCE) e sul credito Investment Grade (IG), la spread duration è stata incrementata a maggio sul segmento Investment Grade e, in misura inferiore, su quello High Yield (HY); acquistati subordinati finanziari AT1, ibridi non finanziari e partecipato al mercato primario (emissioni subordinate LT2) sfruttando i rendimenti attraenti di tale segmento di mercato che non aveva ancora recuperato del tutto lo shock causato dall'evento di Credit Suisse. A giugno sono state acquistate sul mercato primario nuove emissioni IG, dato l'interessante premio offerto, ed è stata limata l'esposizione al segmento HY. A fine periodo l'allocazione risulta prevalentemente orientata al segmento di maggior qualità. A giugno è stata poi leggermente rafforzata la posizione lungo Italia vs Germania. Lato valute, l'esposizione al dollaro USA è stata gestita dinamicamente nel trimestre verso divise dei paesi sviluppati ed emergenti. Principali posizioni a fine trimestre: lungo dollaro USA, franco svizzero, yen. Azzerato nel periodo il posizionamento marginalmente lungo sulle valute emergenti: posizioni lunghe sulle divise di America Latina, India, Ungheria e Repubblica Ceca e corte sulle

valute asiatiche (Cina, Hong Kong, Indonesia, Taiwan). Si conferma l'esposizione a inflazione e materie prime (metalli preziosi, industriali, petrolio e CRB).

Per affrontare le incertezze dello scenario si mantengono strutture di protezione su azioni e credito, esposizione alle divise rifugio (yen, franco svizzero), elevata liquidità.

Nel terzo trimestre il portafoglio ha mantenuto un assetto cautamente costruttivo, con una posizione lunga sugli asset rischiosi, che rimane però nella fascia bassa dell'esposizione storica, ben bilanciata tra asset class/paesi e gestita attivamente. Per affrontare le incertezze dello scenario si mantengono strutture di protezione, esposizione alle divise rifugio (yen, franco svizzero) ed elevata liquidità.

Azioni: l'esposizione è stata incrementata, pur gestendo attivamente i rischi. A luglio il peso è stato aumentato per sfruttare il momentum positivo generato dalla resilienza dell'economia USA e da una stagione degli utili che non ha deluso; ad agosto il peso è stato ridotto nella prima parte del mese, poi dopo la correzione, re-incrementato in USA e, in misura minore, Giappone. A settembre è stato operato un ulteriore incremento del peso dato il calo delle borse, le basse aspettative sugli utili degli investitori prima della prossime trimestrali e una diffusa bassa esposizione degli hedge fund e degli investitori tradizionali. A livello geografico, è stata confermata la preferenza per gli USA, seguiti da Europa ex-EMU e Giappone, posizione netta prossima allo zero sull'Eurozona data la debolezza del quadro macro, in aumento l'esposizione alla Cina (fondamentali ancora deboli, ma il mercato sta rimbalzando dai minimi e il supporto governativo è ancora modesto). A livello settoriale, il posizionamento corto sui temi difensivi è stato ridotto a fine periodo, prendendo parziale profitto, e sono state assunte posizioni corte su settori ciclici; posizioni lunghe su energetici (in aumento nel periodo), finanziari, servizi di comunicazione

Rischio tassi ancora su livelli elevati, sebbene gestito dinamicamente. A fine luglio è stata ridotta la duration in USA ed Eurozona, per fronteggiare il rialzo dei rendimenti. Ad agosto, poiché il rialzo dei rendimenti è proseguito, la duration è stata nuovamente aumentata via acquisti sulla parte lunga della curva mentre a settembre, stante la dinamica negativa del mercato con i rendimenti a lungo termine ancora in ascesa in scia a banche centrali persistentemente aggressive, la duration è stata riequilibrata con una preferenza per la parte a breve e minore per quella a lungo termine; nel contempo, è stato aumentato il rischio tassi in Europa (tasso a 5 anni) a scapito degli USA (agendo sui tassi a 10 e 30 anni), dato il diverso andamento del ciclo economico. Esposizioni principali a Europa e Usa, seguiti da UK e altri paesi sviluppati; posizione corta sulla curva giapponese (rafforzata a settembre).

La dinamicità della gestione ha interessato anche il rischio credito per sfruttare la volatilità del mercato. A luglio la spread duration (che misura il rischio credito) è stata lievemente ridotta, prendendo parziale profitto sia su singoli nomi investment grade che sui segmenti ad alto beta (HY, subordinati). Ad agosto la spread duration è stata incrementata, sfruttando la debolezza del mercato e l'attività sul mercato primario, riducendo le protezioni sul segmento HY europeo e acquistate nuove emissioni con rendimenti attraenti sia IG che subordinate. A settembre l'esposizione è rimasta stabile; si è partecipato attivamente al mercato primario acquistando nuove emissioni investment grade con premi per il rischio attraenti. Mantenuta nel periodo la posizione leggermente lunga sul debito italiano. Nella strategia di selezione, è proseguita la costruzione in una logica Buy & Hold del paniere di titoli corporate di qualità, con scadenza da 1 a 3 anni. Debito Emergente: incrementata leggermente la posizione lunga sui tassi locali tra luglio e agosto; a settembre si è preso profitto su alcuni nomi investment grade o con rating BB, in scia al restringimento degli spread. Valute: lungo USD in forte aumento, in funzione di hedge e alla luce della resilienza dell'economia domestica; incrementato il lungo franco svizzero e lo yen, portata la sterlina da posizione lunga a netta corta. Nell'area Emergente, posizione netta sostanzialmente nulla, con posizioni lunghe in America Latina (carry interessante) e corte in Asia. Materie prime: in aumento petrolio e metalli industriali, ridotti i metalli preziosi; l'oro rimane la principale posizione.

Nel quarto trimestre l'assetto è stato reso più costruttivo attraverso un rapido e significativo incremento del peso azionario, via strutture opzionali, rafforzate a ottobre sfruttando il calo delle borse e ancora ad inizio novembre sugli indici di Europa ed USA; l'incremento azionario è poi proseguito anche nel mese di dicembre fino a chiudere sui livelli massimi di esposizione dell'anno. L'allocazione è diventata quindi più bilanciata con esposizione rilevante al rischio tassi, sull'idea che il ciclo restrittivo delle banche centrali sia giunto oramai al capolinea, e un rischio azionario riportato sui valori medi storici, stanti gli incoraggianti dati macro che in USA non lasciano prefigurare una recessione a breve e il basso posizionamento degli investitori, mentre il rischio credito è rimasto su livelli moderati ed è stato gestito dinamicamente. A mitigare i rischi: strutture di protezione , esposizione a divise rifugio, elevata liquidità.

Azioni: esposizione in aumento via strutture opzionali. Paesi: preferenza per gli USA (con spostamento di parte dell'esposizione alla tecnologia a favore delle small cap) seguiti dall'Europa, poi dal Giappone mentre si mantiene una limitata esposizione all'area Emergente. Settori: aumentato ancora il tech e rafforzate nuovamente le posizioni corte sui comparti difensivi (i cui fondamentali non stanno migliorando); posizioni lunghe su tech, finanziari, retail, industriali, corte su farmaceutici, alimentari, assicurativi, telecom, energetici (in USA, da precedente lungo).

Tassi: duration ancora su livelli elevati, in diminuzione a fine periodo per parziale presa di profitto dopo il drastico calo dei rendimenti. Posizioni principali in Europa e Usa (in riduzione a dicembre), seguiti da UK e altri paesi sviluppati; rafforzata la posizione corta in Giappone sul tasso decennale (attese di rimozione della politica accomodante da parte della Bank of Japan); in termini di posizionamento di curva, in Europa il posizionamento è equidistribuito con sovraesposizione sulla parte breve-media della curva mentre in USA si prediligono strategie favorevoli all'irripidimento della curva. Nella componente credito, dopo aver accumulato risk premium nei mesi precedenti di relativa debolezza del mercato, sul finire d'anno si è deciso di prendere parziale profitto sia su nomi IG che sulle emissioni ad alto beta (subordinati, HY), dati profondità e velocità del movimento rialzista, posizionamento più bilanciato del mercato e aspettative di nuove emissioni dimensionalmente sul mercato primario ad inizio del nuovo anno molto rilevanti, con l'obiettivo di avere spazio per rientrare in caso di storni. L'allocazione mantiene la preferenza per il segmento di maggior qualità (rendimento attraente, buoni fondamentali) e minore esposizione all'high yield. Rafforzata la posizione lievemente lunga sui BTP. Strategia di selezione: focus su un paniere di titoli corporate di qualità, con scadenza 1-3 anni, da detenere con una logica di Buy&Hold. Paesi Emergenti: posizione lunga sui tassi locali (in prospettiva le curve domestiche dovrebbero stringere maggiormente vs la curva USA). Valute: tagliato significativamente il lungo dollaro, date le attese di FED alla fine del ciclo di rialzo dei tassi; nell'area Emergente, rafforzate le posizioni lunghe sulle divise ad alto carry in America Latina ed Europa, confermate quelle corte in Asia (bassi rendimenti). Materie prime: in aumento l'oro (principale posizione), ridotti petrolio e indice generale.

Allocazione a fine dicembre: obbligazioni 70% circa (componente titoli/ETF); azioni 16,8% (inclusi i derivati), materie prime: 3,9%, liquidità 21,0%. Duration 2,1 anni. Valute: dollaro Usa 10,9%.

Nel corso dell'anno, all'interno dei fondi in cui è investito il portafoglio, ai fini di una più efficiente gestione delle posizioni, sono stati utilizzati strumenti derivati con finalità sia di investimento che di copertura dei rischi di portafoglio. Tra gli strumenti principalmente utilizzati: future e opzioni sui principali indici azionari internazionali; future, opzioni e swap per gestire il rischio tassi sulle principali curve di rendimento internazionali; swaption e CDS per gestire il rischio di credito; forward per gestire il rischio valutario.

A dicembre le pressioni inflazionistiche in calo e la Fed in versione "colomba" hanno sospinto i mercati. Tuttavia, i rischi stanno aumentando poiché molte delle aspettative per il 2024 sono già state scontate. Anche noi riteniamo che le banche centrali avvieranno un ciclo espansivo, ma a partire da maggio/giugno e per ragioni legati al rallentamento dell'economia, non solo dell'inflazione. Quest'ultima è in discesa, ma il dato core rimane da monitorare in USA mentre in Europa la BCE teme gli aumenti salariali. Riguardo alla crescita, l'allentamento del mercato del lavoro, che può minare in prospettiva la fiducia dei consumatori, rafforza la nostra attesa di una lieve recessione in USA nel primo semestre; a ciò si aggiungano il rallentamento della Cina, che impatterà l'Europa (l'area Emergente dovrebbe però rimanere resiliente), e il minor spazio fiscale in USA ed Europa. Pertanto, rimaniamo cauti sui risky asset. Confermiamo prudenza sui mercati azionari USA ed europei, pur consapevoli del potenziale per un rimbalzo tattico alimentato da buyback e fiducia degli investitori, neutralità sul Giappone (quadro domestico in progresso) e positiva selettività sui paesi emergenti. Tassi: view costruttiva in USA, con preferenza per lo steepening della curva, e leggermente positivi in Europa, data la debole crescita economica, sebbene il forte calo dei rendimenti richieda un approccio flessibile; view positiva sui BTP, non essendovi rischi nell'immediato sul rating italiano. Credito: preferenza per il segmento di maggior qualità sia in USA che in Europa, cautela invece sull'HY. Il debito emergente rimane supportato da solidi fondamentali e politiche monetarie attese accomodanti. Rischi: quadro macro e utili, fattori geopolitici.

La gestione del portafoglio nel corso del 2024 terrà in considerazione queste indicazioni di scenario e verrà dinamicamente modificata sulla base dell'evoluzione dei mercati finanziari.

Eventi successivi al 29 dicembre 2023

In data 25 gennaio 2024 il Consiglio di Amministrazione della SGR ha deliberato in merito alla fusione del Fondo **Amundi Obiettivo Selezione Income 2023 DUE** che verrà conseguentemente incorporato in un altro Fondo gestito dalla stessa SGR nel corso dei prossimi mesi.

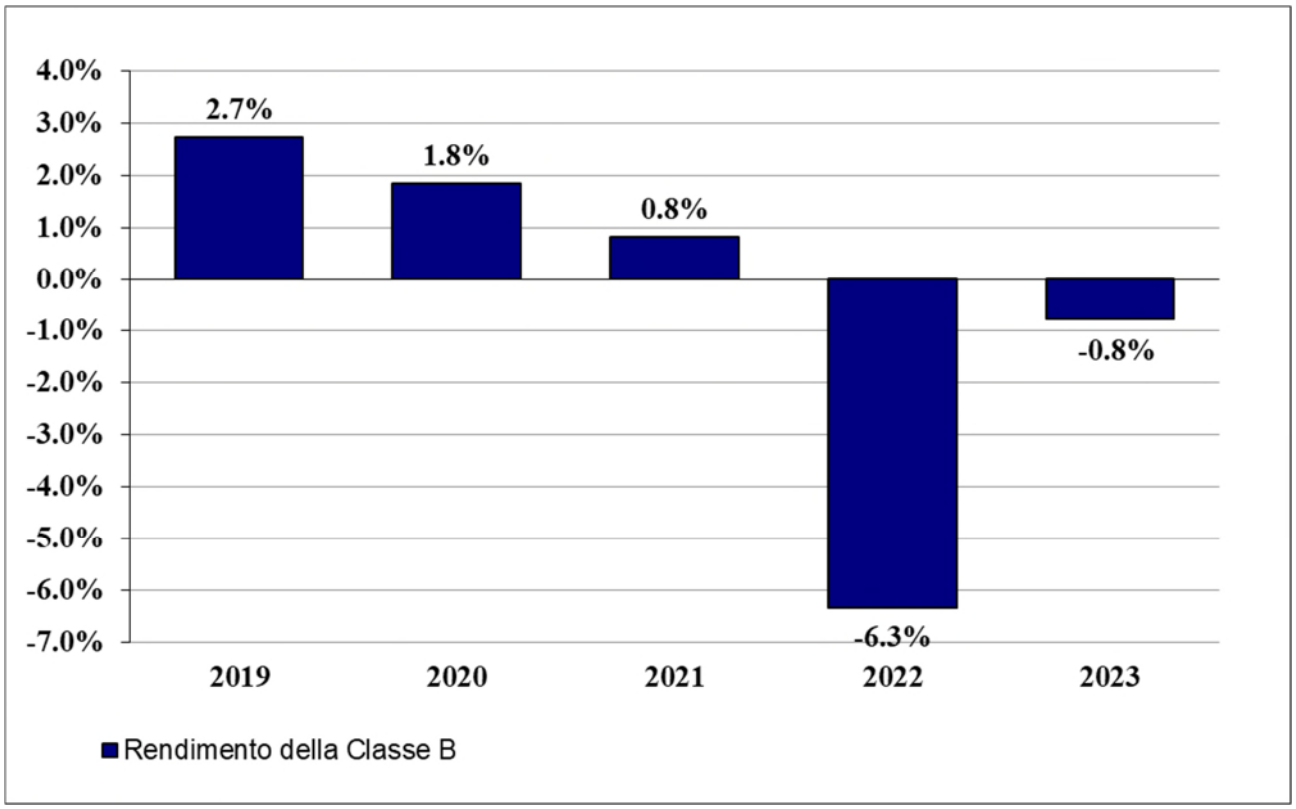
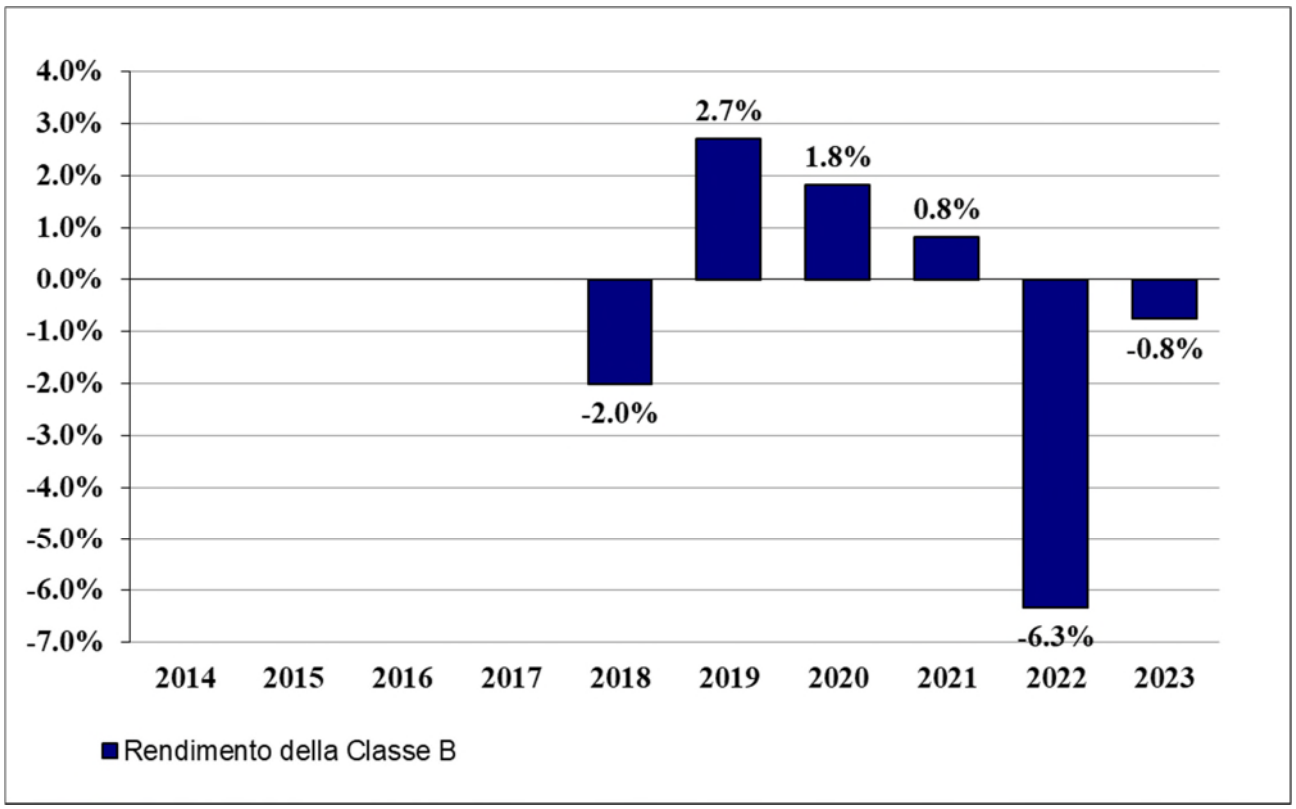
NOTA INTEGRATIVA

Parte A – Andamento del valore della quota



Valori minimi e massimi della quota durante l'esercizio - Classe B



Andamento del valore della quota durante l'esercizio	
Valore minimo al 23/10/2023	4,628
Valore massimo al 26/01/2023 al 27/01/2023 e al 02/02/2023	4,858

Nel corso dell'esercizio non sono stati rilevati errori nella valorizzazione delle quote.

Rendimento annuo del Fondo e del benchmark (ove applicabile) nel corso degli ultimi 5-10 anni solari

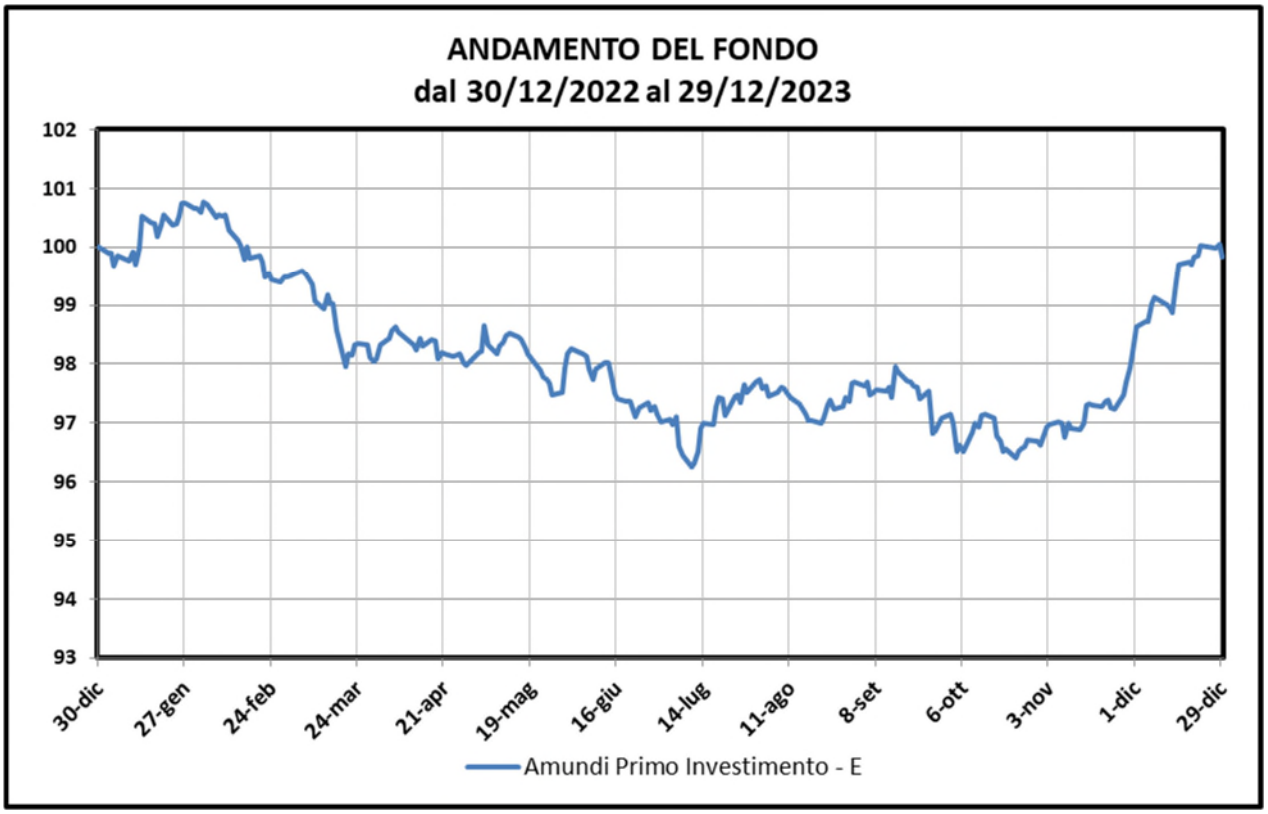
Esposizione al rischio del Fondo (Classe B)

I dati di rendimento del Fondo non includono i costi di sottoscrizione (né gli eventuali costi di rimborso) a carico dell'investitore.

I principali rischi legati agli investimenti sono classificabili come rischio di mercato, rischio di credito, e rischio di liquidità. Il rischio di mercato è costituito dalla potenziale riduzione nel valore dei singoli titoli, eventualmente denominati in diverse valute. Il rischio di credito è determinato dal peggioramento del merito di credito degli emittenti dei titoli detenuti dal Fondo. Il rischio di liquidità è infine definito come il rischio che il Fondo investa in strumenti finanziari che possono risultare di difficile vendita, a seguito del verificarsi di determinate condizioni di mercato, con effetti negativi sul prezzo di realizzo.

Il monitoraggio di tali rischi viene effettuato su base continuativa dal gestore attraverso la costante verifica dell'effettivo posizionamento del fondo rispetto al profilo rischio-rendimento desiderato. La misura e il controllo dei rischi in oggetto viene inoltre effettuata con frequenza giornaliera mediante l'utilizzo di modelli matematico-statistici utilizzati autonomamente dalla struttura di Risk Management. I risultati di tali valutazioni sono regolarmente portati all'attenzione degli organi amministrativi della SGR.

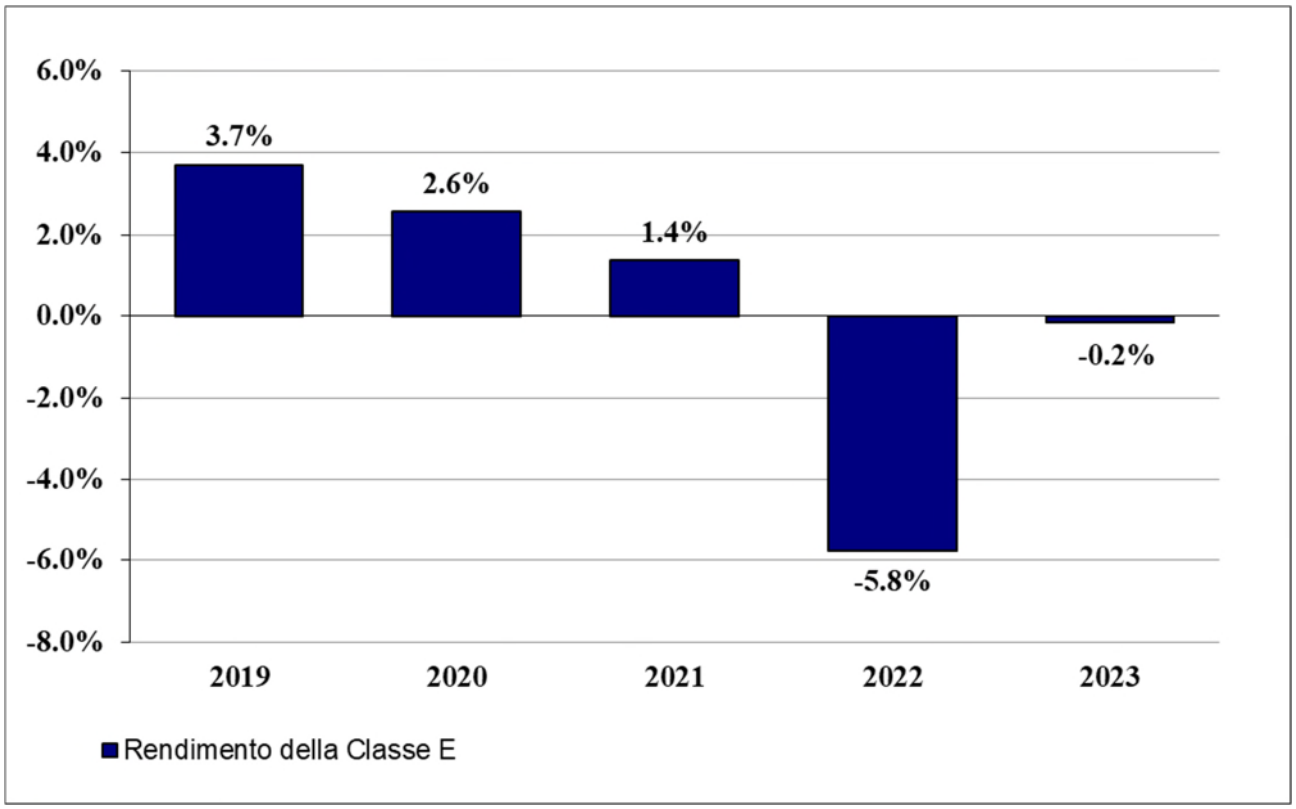
La volatilità (scarto quadratico medio annualizzato dei rendimenti settimanali del fondo) nel periodo che va dal 30 dicembre 2022 (ultima quota del Fondo nell'esercizio 2022) al 29 dicembre 2023 (ultima quota del Fondo nell'esercizio) è stata pari al **3,10%**.



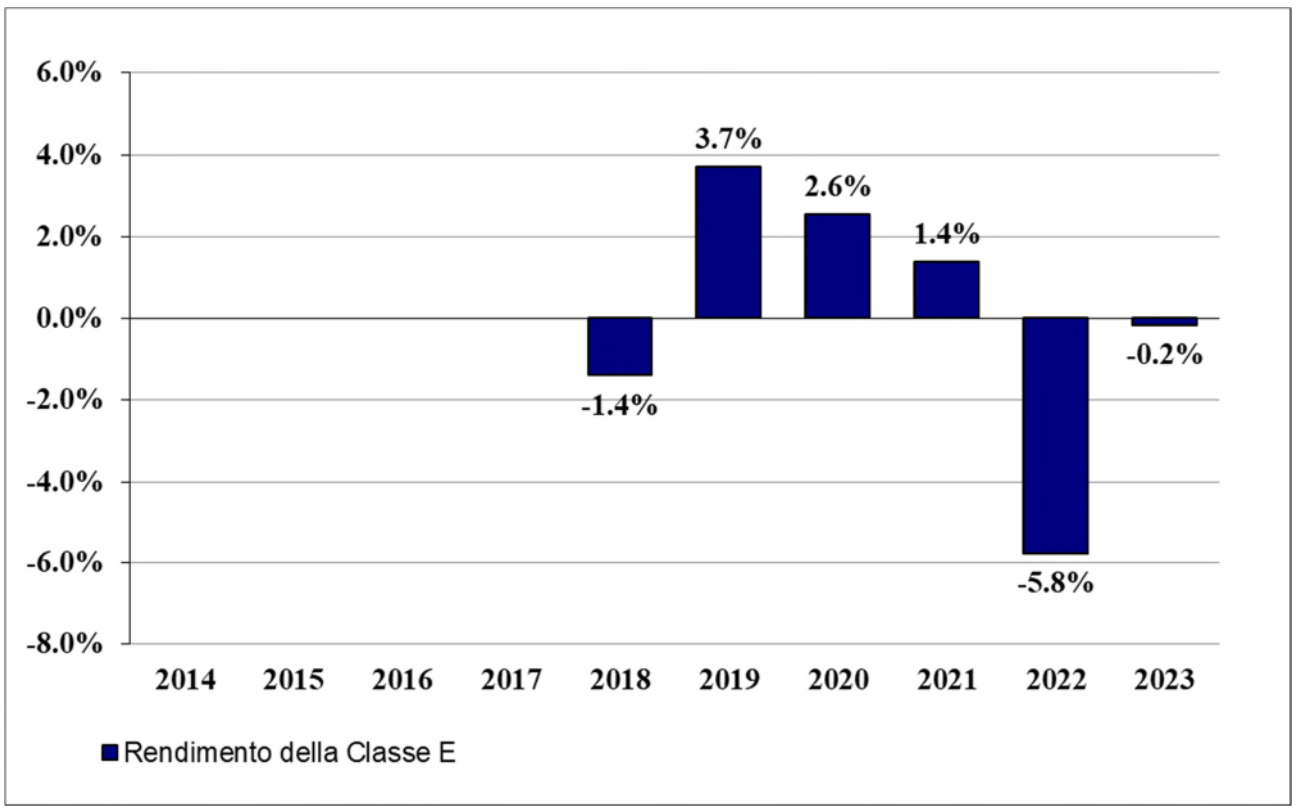
Il minimo rendimento mensile realizzato nell'esercizio, determinato considerando tutti gli intervalli di 20 giorni lavorativi consecutivi è stato pari a **-1,95%**.

Il VaR 95% mensile (che esprime in termini percentuali la massima perdita a cui è esposto il fondo su un orizzonte temporale di un mese e al livello di confidenza del 95%) determinato a posteriori sulla base dei rendimenti realizzati dal Fondo, considerando tutti gli intervalli di 20 rendimenti giornalieri consecutivi dell'esercizio ed escludendo il 5% dei peggiori risultati, è stato pari a **-1,30%**.

La medesima misura calcolata ipotizzando la normalità della distribuzione dei rendimenti settimanali del Fondo è pari a **-1,47%**.



Valori minimi e massimi della quota durante l'esercizio - Classe E



Andamento del valore della quota durante l'esercizio	
Valore minimo al 10/07/2023	4,821
Valore massimo al 02/02/2023	5,047

Nel corso dell'esercizio non sono stati rilevati errori nella valorizzazione delle quote.

Rendimento annuo del Fondo e del benchmark (ove applicabile) nel corso degli ultimi 5-10 anni solari

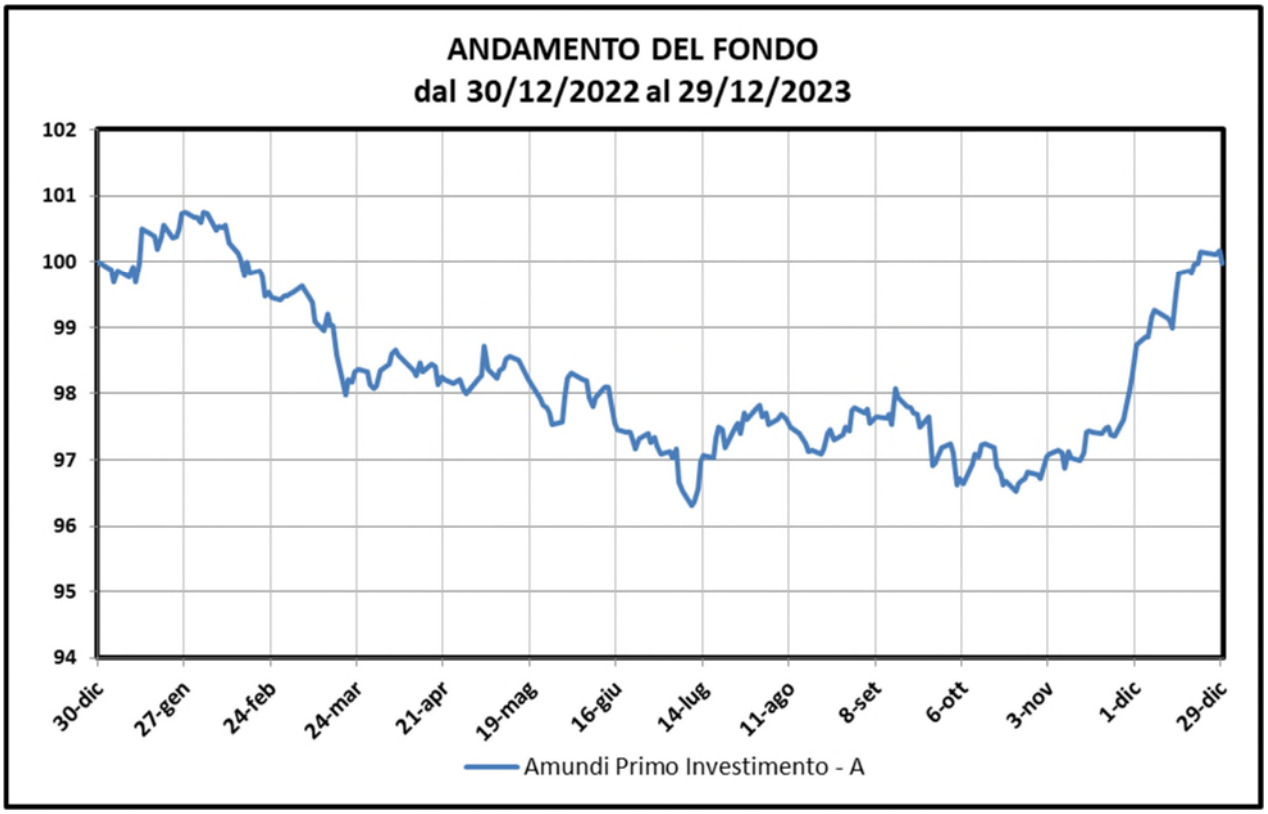
Esposizione al rischio del Fondo (Classe E)

I dati di rendimento del Fondo non includono i costi di sottoscrizione (né gli eventuali costi di rimborso) a carico dell'investitore.

I principali rischi legati agli investimenti sono classificabili come rischio di mercato, rischio di credito, e rischio di liquidità. Il rischio di mercato è costituito dalla potenziale riduzione nel valore dei singoli titoli, eventualmente denominati in diverse valute. Il rischio di credito è determinato dal peggioramento del merito di credito degli emittenti dei titoli detenuti dal Fondo. Il rischio di liquidità è infine definito come il rischio che il Fondo investa in strumenti finanziari che possono risultare di difficile vendita, a seguito del verificarsi di determinate condizioni di mercato, con effetti negativi sul prezzo di realizzo.

Il monitoraggio di tali rischi viene effettuato su base continuativa dal gestore attraverso la costante verifica dell'effettivo posizionamento del fondo rispetto al profilo rischio-rendimento desiderato. La misura e il controllo dei rischi in oggetto viene inoltre effettuata con frequenza giornaliera mediante l'utilizzo di modelli matematico-statistici utilizzati autonomamente dalla struttura di Risk Management. I risultati di tali valutazioni sono regolarmente portati all'attenzione degli organi amministrativi della SGR.

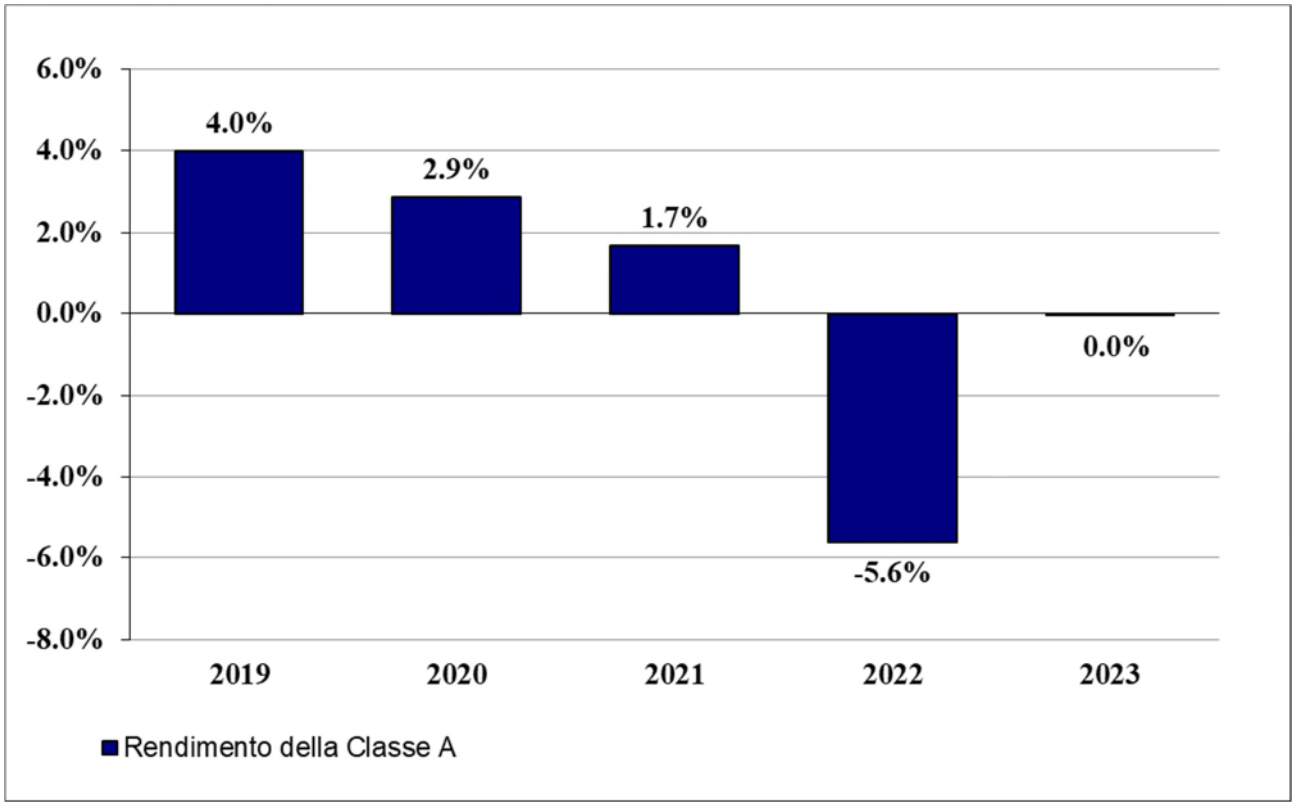
La volatilità (scarto quadratico medio annualizzato dei rendimenti settimanali del fondo) nel periodo che va dal 30 dicembre 2022 (ultima quota del Fondo nell'esercizio 2022) al 29 dicembre 2023 (ultima quota del Fondo nell'esercizio) è stata pari al **3,12%**.



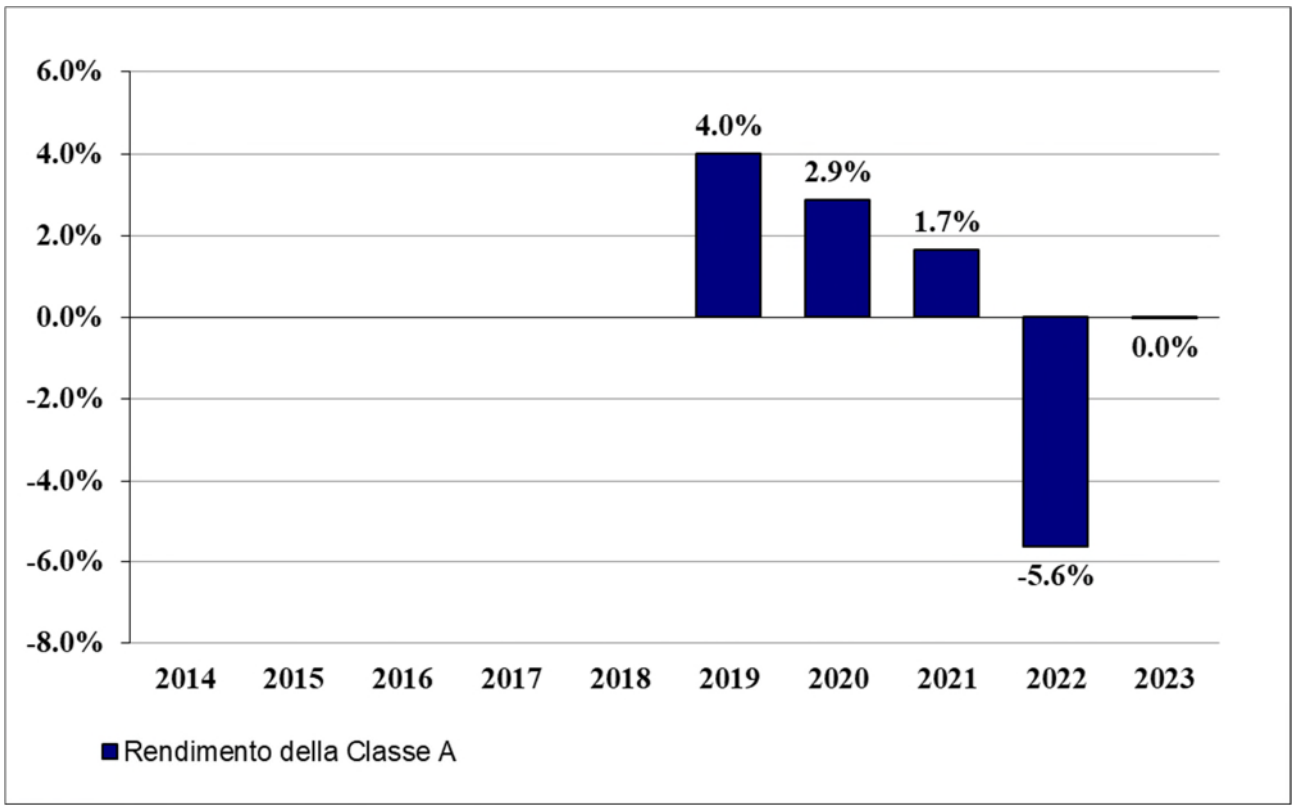
Il minimo rendimento mensile realizzato nell'esercizio, determinato considerando tutti gli intervalli di 20 giorni lavorativi consecutivi è stato pari a **-1,90%**.

Il VaR 95% mensile (che esprime in termini percentuali la massima perdita a cui è esposto il fondo su un orizzonte temporale di un mese e al livello di confidenza del 95%) determinato a posteriori sulla base dei rendimenti realizzati dal Fondo, considerando tutti gli intervalli di 20 rendimenti giornalieri consecutivi dell'esercizio ed escludendo il 5% dei peggiori risultati, è stato pari a **-1,25%**.

La medesima misura calcolata ipotizzando la normalità della distribuzione dei rendimenti settimanali del Fondo è pari a **-1,48%**.



Valori minimi e massimi della quota durante l'esercizio - Classe A



Andamento del valore della quota durante l'esercizio	
Valore minimo al 10/07/2023	4,782
Valore massimo al 27/01/2023	5,002

Nel corso dell'esercizio non sono stati rilevati errori nella valorizzazione delle quote.

Rendimento annuo del Fondo e del benchmark (ove applicabile) nel corso degli ultimi 5-10 anni solari

Esposizione al rischio del Fondo (Classe A)

I dati di rendimento del Fondo non includono i costi di sottoscrizione (né gli eventuali costi di rimborso) a carico dell'investitore.

I principali rischi legati agli investimenti sono classificabili come rischio di mercato, rischio di credito, e rischio di liquidità. Il rischio di mercato è costituito dalla potenziale riduzione nel valore dei singoli titoli, eventualmente denominati in diverse valute. Il rischio di credito è determinato dal peggioramento del merito di credito degli emittenti dei titoli detenuti dal Fondo. Il rischio di liquidità è infine definito come il rischio che il Fondo investa in strumenti finanziari che possono risultare di difficile vendita, a seguito del verificarsi di determinate condizioni di mercato, con effetti negativi sul prezzo di realizzo.

Il monitoraggio di tali rischi viene effettuato su base continuativa dal gestore attraverso la costante verifica dell'effettivo posizionamento del fondo rispetto al profilo rischio-rendimento desiderato. La misura e il controllo dei rischi in oggetto viene inoltre effettuata con frequenza giornaliera mediante l'utilizzo di modelli matematico-statistici utilizzati autonomamente dalla struttura di Risk Management. I risultati di tali valutazioni sono regolarmente portati all'attenzione degli organi amministrativi della SGR.

La volatilità (scarto quadratico medio annualizzato dei rendimenti settimanali del fondo) nel periodo che va dal 30 dicembre 2022 (ultima quota del Fondo nell'esercizio 2022) al 29 dicembre 2023 (ultima quota del Fondo nell'esercizio) è stata pari al **3,10%**.

Il minimo rendimento mensile realizzato nell'esercizio, determinato considerando tutti gli intervalli di 20 giorni lavorativi consecutivi è stato pari a **-1,88%**.

Il VaR 95% mensile (che esprime in termini percentuali la massima perdita a cui è esposto il fondo su un orizzonte temporale di un mese e al livello di confidenza del 95%) determinato a posteriori sulla base dei rendimenti realizzati dal Fondo, considerando tutti gli intervalli di 20 rendimenti giornalieri consecutivi dell'esercizio ed escludendo il 5% dei peggiori risultati, è stato pari a **-1,25%**.

La medesima misura calcolata ipotizzando la normalità della distribuzione dei rendimenti settimanali del Fondo è pari a **-1,47%**.

Parte B – Le attività, le passività e il valore complessivo netto

Sezione I - Criteri di valutazione

Per quanto riguarda i criteri di valutazione del Fondo, si fa riferimento a quanto esposto nelle considerazioni generali.

Sezione II - Le attività

** Si precisa che gli oneri di negoziazione su strumenti finanziari, sostenuti nell'esercizio e riportati al punto 11) della presente tabella, consistono nelle commissioni di negoziazione esplicitate dalle controparti, tali oneri accessori se non evidenziabili risultano già inclusi nel prezzo di acquisto o dedotti dal prezzo di vendita.

IV.2 COMMISSIONE DI PERFORMANCE (GIÀ PROVVIGIONE DI INCENTIVO)

Il Fondo Classe **B** non ha maturato commissioni di performance nell'esercizio 2023.
Il Fondo Classe **E** non ha maturato commissioni di performance nell'esercizio 2023.
Il Fondo Classe **A** non ha maturato commissioni di performance nell'esercizio 2023.

Sezione IV.3 Remunerazioni (*)

Si riportano di seguito le informazioni in materia di Remunerazioni

Remunerazioni	Remunerazione complessiva	Componente fissa	Componente variabile	Numero beneficiari
1.Retribuzione complessiva, suddivisa nella componente fissa e variabile del personale, con indicazione del numero dei beneficiari	45.395.331	30.515.826	14.879.505	370
2.Retribuzione complessiva, suddivisa nella componente fissa e variabile, del personale coinvolto nella gestione dell'attività dell'OICVM	23.694	11.876	11.818	
3.Retribuzione complessiva, del personale distinta tra alta dirigenza ed altro personale, il cui operato impatta in misura significativa sul profilo di rischio dell'OICVM	15.352.037	7.900.451	7.451.586	48
Board of Directors	2.953.993	1.369.978	1.584.015	5
General Manager & Heads of main Business Lines	1.551.156	891.512	659.644	4
Control Functions	1.058.645	732.916	325.729	6
Investments	9.788.242	4.906.044	4.882.198	33
Others	30.043.294	22.615.375	7.427.919	322
4.Remunerazione complessiva del personale attribuibile all'OICVM	75.902	51.023	24.879	0,62

(*) Le informazioni sopra riportate si riferiscono alle remunerazioni relative al personale di Amundi SGR SpA e non includono quelle relative ai gestori delegati.

La politica di remunerazione e incentivazione di Amundi SGR trae origine da quella formulata dalla capogruppo Amundi S.A., per tutte le entità del Gruppo Amundi ("Group Remuneration Policy").

La Group Remuneration Policy ingloba i principi e gli obblighi contemplati dalle direttive AIFM e UCITS V così come implementati dal regolatore locale, ed è coerente con la strategia aziendale, gli obiettivi, i valori e gli interessi della SGR e dei fondi da essa gestiti, nonché dei partecipanti ai fondi. Essa comprende misure volte a evitare i conflitti d'interesse.

Con riferimento al dato "remunerazione totale, suddivisa nella componente fissa e variabile, corrisposta nell'esercizio dalla SGR al personale", esso è composto, sulla base della posizione individuale di ciascun soggetto, dagli elementi di remunerazione fissa e variabile corrisposte dall'azienda nel periodo di riferimento.

Per "Remunerazione Variabile" si intendono gli importi delle remunerazioni variabili effettivamente corrisposte nell'anno, con esclusione di quelle relative al premio di produttività aziendale.

La componente variabile individuale, che può essere corrisposta sia in forma di bonus sia tramite strumenti finanziari o equivalenti, è l'unica remunerazione attribuita in relazione al contributo effettivo dell'individuo al raggiungimento dei risultati, determinato sulla base di specifici criteri, sia qualitativi sia quantitativi. I bonus di ammontare più elevato sono soggetti a meccanismi di differimento del pagamento e sono corrisposti al ricorrere di specifiche condizioni ("vesting condition"). In particolare le remunerazioni variabili corrisposte su una pluralità di anni vengono considerate nell'anno di effettivo pagamento.

Le informazioni aggiornate di dettaglio sulla politica e prassi di remunerazione e incentivazione del personale, inclusi i criteri e le modalità di calcolo delle remunerazioni e degli altri benefici e i soggetti responsabili per la determinazione delle remunerazioni e per l'assegnazione degli altri benefici, sono disponibili sul sito web della SGR. Una copia cartacea o un diverso supporto durevole contenente tali informazioni saranno forniti gratuitamente agli investitori che ne faranno richiesta.

Informazioni sulle modalità di calcolo della remunerazione:

Per le remunerazioni non attribuibili direttamente al singolo Fondo si è considerato quale parametro di riferimento significativo per la loro attribuzione:

- il totale del valore complessivo netto del fondo sul totale dei valori complessi netti dei fondi istituiti dalla SGR gestiti a Milano, per la "determinazione della retribuzione complessiva, suddivisa nella componente fissa e variabile, del personale coinvolto nella gestione dell'attività dell'OICVM";

- il totale del valore complessivo netto del fondo sul totale dei valori complessivi netti dei fondi istituiti dalla SGR, per definire la "proporzione della remunerazione complessiva del personale attribuibile all' OICVM". Analogo criterio è stato utilizzato per determinare il numero dei beneficiari, in quanto la loro attività non è direttamente attribuibile al singolo fondo.

Inoltre per le remunerazioni non attribuibili direttamente al singolo Fondo si è considerato quale parametro di riferimento significativo per la loro attribuzione il totale del valore complessivo netto del fondo sul totale dei valori complessi netti dei fondi istituiti dalla SGR, per definire la "proporzione della remunerazione complessiva del personale attribuibile al OICVM". Analogo criterio è stato utilizzato per determinare il numero dei beneficiari, in quanto la loro attività non è direttamente attribuibile al singolo fondo.

Eventi che hanno interessato il fondo
Non si segnalano particolari eventi rilevanti che interessano il fondo.
Nel corso dell'esercizio non sono stati rilevati errori nella valorizzazione delle quote.

Politica d'investimento

Il fondo ha evidenziato le seguenti performance:

Classe **B**: nel periodo 30 dicembre 2022 – 29 dicembre 2023 performance pari a +6,06%.
Classe **P**: nel periodo 30 dicembre 2022 – 29 dicembre 2023 performance pari a +6,06%.
Classe **A**: nel periodo 30 dicembre 2022 – 29 dicembre 2023 performance pari a +7,33%.

La performance del fondo è calcolata al lordo dell'effetto fiscale.

La performance del fondo è stata positiva, sostenuta sia dalla componente obbligazionaria che dalla componente azionaria. La componente obbligazionaria ha beneficiato del calo dei rendimenti. L'esposizione ai titoli di Stato italiani ha fornito un contributo positivo. I rendimenti sui titoli di Stato italiani hanno infatti evidenziato un calo generalizzato, più ampio sulle scadenze a lungo termine, con il tasso a 2 anni passato da 3,31% di fine 2022 a 2,99% di fine 2023 e con il tasso a dieci anni passato da 4,72% a 3,70%. Lo spread BTP-Bund, a 214 pb a fine 2022, si è ridotto a 168 a fine anno, beneficiando del progresso dei fondamentali, della domanda stabile e delle conferme/miglioramenti delle valutazioni di credito da parte delle agenzie di rating (S&P ha confermato BBB con Outlook Stabile; Moody's ha conferma Baa3 con una revisione dell'Outlook da Negativo a Stabile). Il contributo maggiore alla performance è venuto dagli investimenti nei titoli societari, in particolare nel settore dei servizi di pubblica utilità, a seguire nel settore finanziario e nel settore industriale.
La componente azionaria ha beneficiato dei rialzi dei corsi, in scia al ridimensionamento dei timori di un rallentamento marcato, alla riduzione dei costi energetici, alla resilienza della domanda, al beneficio derivante dall'incremento dei prezzi di vendita deciso dalle aziende nella seconda metà del 2022 e infine ad un livello di debito in scadenza contenuto che ridimensiona l'impatto sui costi di finanziamento dell'incremento dei tassi di interesse. A livello settoriale, contributi maggiori da industriali, servizi di pubblica utilità, materie di base, telecomunicazioni.

Il portafoglio ha evidenziato nell'anno una esposizione contenuta ai titoli di Stato, concentrata sui titoli di Stato italiani. L'esposizione è stata maggiore all'obbligazionario societario, concentrata sull'Italia; a livello settoriale, la preferenza è andata ai finanziari (parte alta della scala di subordinazione) e ai servizi di pubblica utilità, in subordine agli industriali. A livello di rating, mantenuta una preferenza per titoli con merito di credito elevato (investment grade).
Il livello della duration di portafoglio a fine anno è pari a 2,2 anni.
Con riferimento al segmento azionario, l'esposizione è stata mantenuta in media su livelli inferiori al 30%. Su tutto il periodo, l'esposizione è stata maggiore sui titoli di piccola/media capitalizzazione. A livello di operatività, nella prima parte dell'anno il fondo presentava un posizionamento a favore dei settori più ciclici. Dopo le tensioni sul sistema bancario di piccole e medie dimensioni USA e in scia ai timori di rallentamento globale più forte delle attese, è stato implementato un graduale ribilanciamento settoriale, con riduzione dell'esposizione ai settori più ciclici e a più alto beta (come consumi discrezionali) e ai finanziari (segmento banche) a favore dei settori difensivi. Nella seconda metà dell'anno è stato incrementato il peso del settore energetico, ridotto il peso dei segmenti lusso e aumentato il peso dei consumi di base.

In chiusura di periodo, le posizioni principali sono sui settori consumi discrezionali, industriali, materie di base, servizi di pubblica utilità (in questo segmento, preferenza per società legate alle energie rinnovabili).

In prospettiva riteniamo che, sebbene i recenti dati economici si siano rivelati solidi a livello globale, sia possibile un rallentamento nei prossimi trimestri. Ciò, unitamente al rallentamento della dinamica dei prezzi al consumo, dovrebbe favorire un orientamento di politica monetaria espansiva e un calo dei tassi. Il ridimensionamento dei tassi e il ritardo in termini di performance accumulato nel 2023 dovrebbero fornire sostegno ai titoli azionari di piccola e media capitalizzazione. Con riferimento al mercato obbligazionario, si

ritiene che i titoli di Stato italiani possano continuare a beneficiare del progresso dei fondamentali, della domanda stabile, in assenza di rischi nell'immediato sul rating italiano.

A partire da questo contesto, sul segmento azionario il portafoglio presenta un sottopeso su settori che si ritiene possano essere vicini al picco degli utili/margini o più sensibili ad un eventuale rallentamento, e un sovrappeso su settori più difensivi e su titoli con buona visibilità di lungo termine. Sul segmento obbligazionario, si mantiene la preferenza per i titoli obbligazionari societari investment grade e per i titoli di Stato italiani.

La gestione del portafoglio nel corso del primo semestre del 2024 verrà modificata sulla base delle evoluzioni dei mercati finanziari.

Eventi successivi al 29 dicembre 2023

Non si segnalano eventi rilevanti successivi alla data del 29 dicembre 2023.

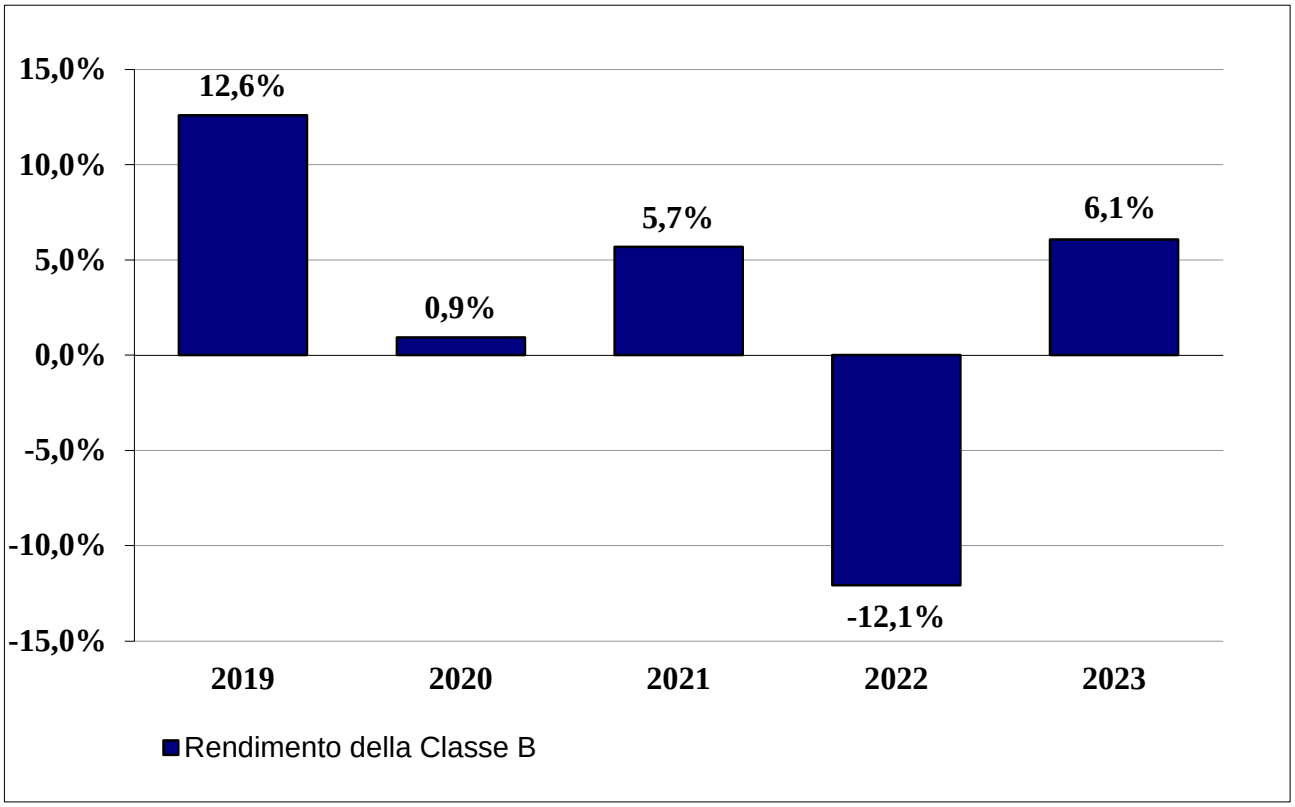
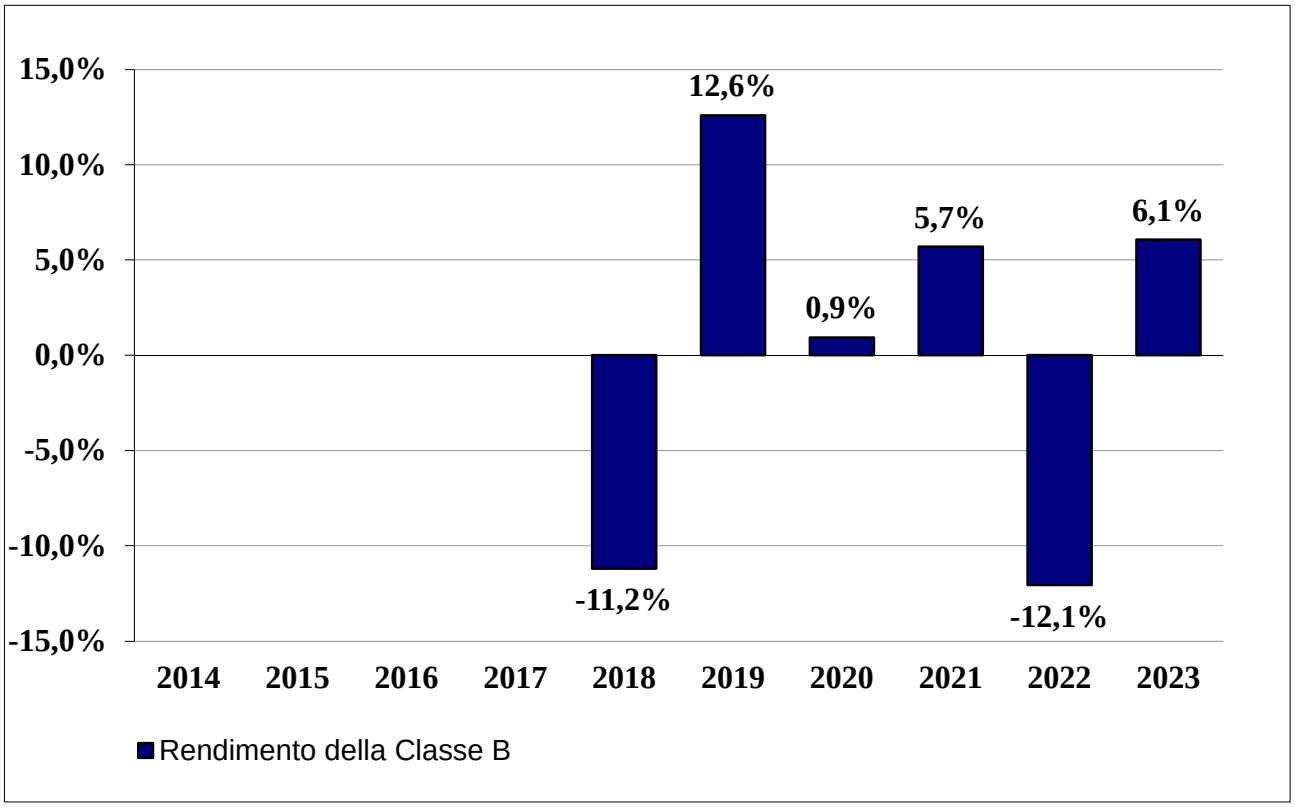
NOTA INTEGRATIVA

Parte A – Andamento del valore della quota



Valori minimi e massimi della quota durante l'esercizio - Classe B



Andamento del valore della quota durante l'esercizio	
Valore minimo al 27/10/2023	4,917
Valore massimo al 27/12/2023	5,239

Nel corso dell'esercizio non sono stati rilevati errori nella valorizzazione delle quote.

Rendimento annuo del Fondo e del benchmark (ove applicabile) nel corso degli ultimi 5-10 anni solari

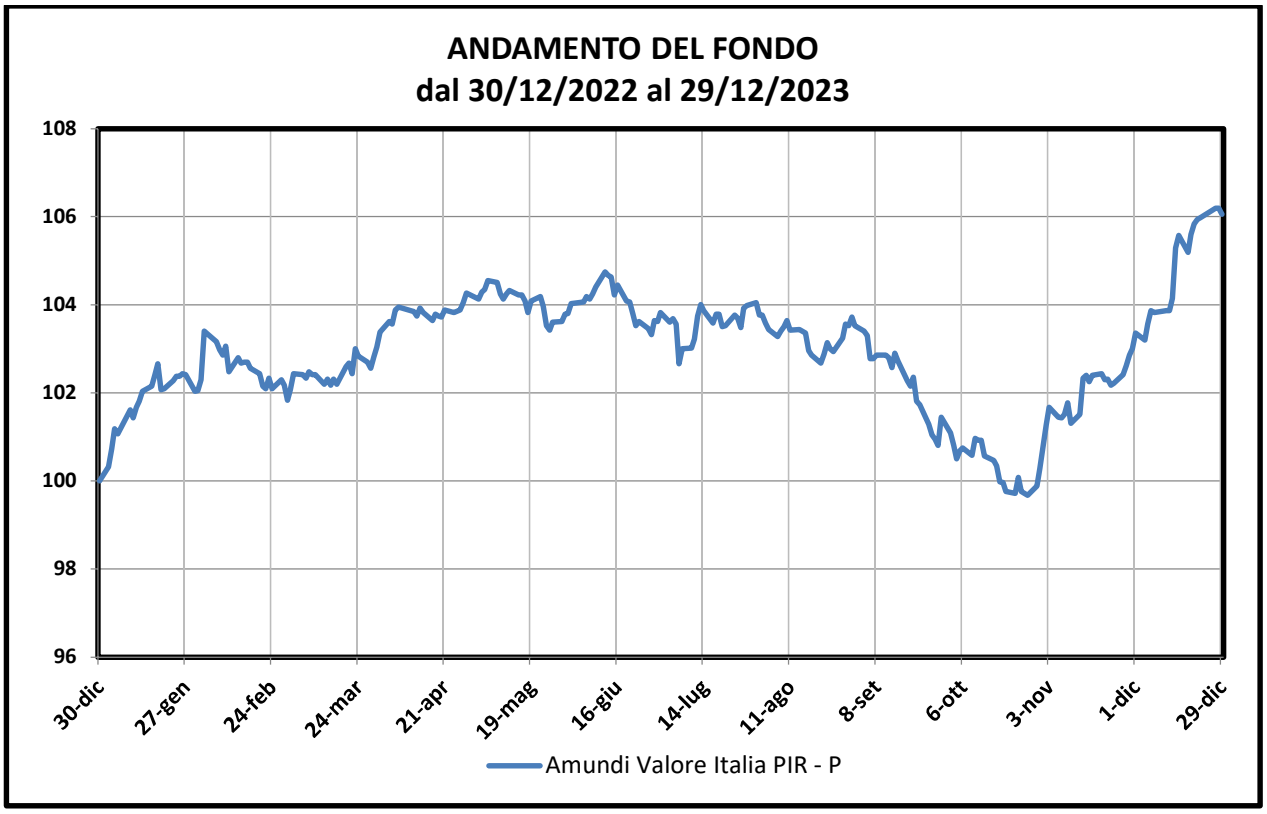
Esposizione al rischio del Fondo (Classe B)

I dati di rendimento del Fondo non includono i costi di sottoscrizione (né gli eventuali costi di rimborso) a carico dell'investitore.

I principali rischi legati agli investimenti sono classificabili come rischio di mercato, rischio di credito, e rischio di liquidità. Il rischio di mercato è costituito dalla potenziale riduzione nel valore dei singoli titoli, eventualmente denominati in diverse valute. Il rischio di credito è determinato dal peggioramento del merito di credito degli emittenti dei titoli detenuti dal Fondo. Il rischio di liquidità è infine definito come il rischio che il Fondo investa in strumenti finanziari che possono risultare di difficile vendita, a seguito del verificarsi di determinate condizioni di mercato, con effetti negativi sul prezzo di realizzo.

Il monitoraggio di tali rischi viene effettuato su base continuativa dal gestore attraverso la costante verifica dell'effettivo posizionamento del fondo rispetto al profilo rischio-rendimento desiderato. La misura e il controllo dei rischi in oggetto viene inoltre effettuata con frequenza giornaliera mediante l'utilizzo di modelli matematico-statistici utilizzati autonomamente dalla struttura di Risk Management. I risultati di tali valutazioni sono regolarmente portati all'attenzione degli organi amministrativi della SGR.

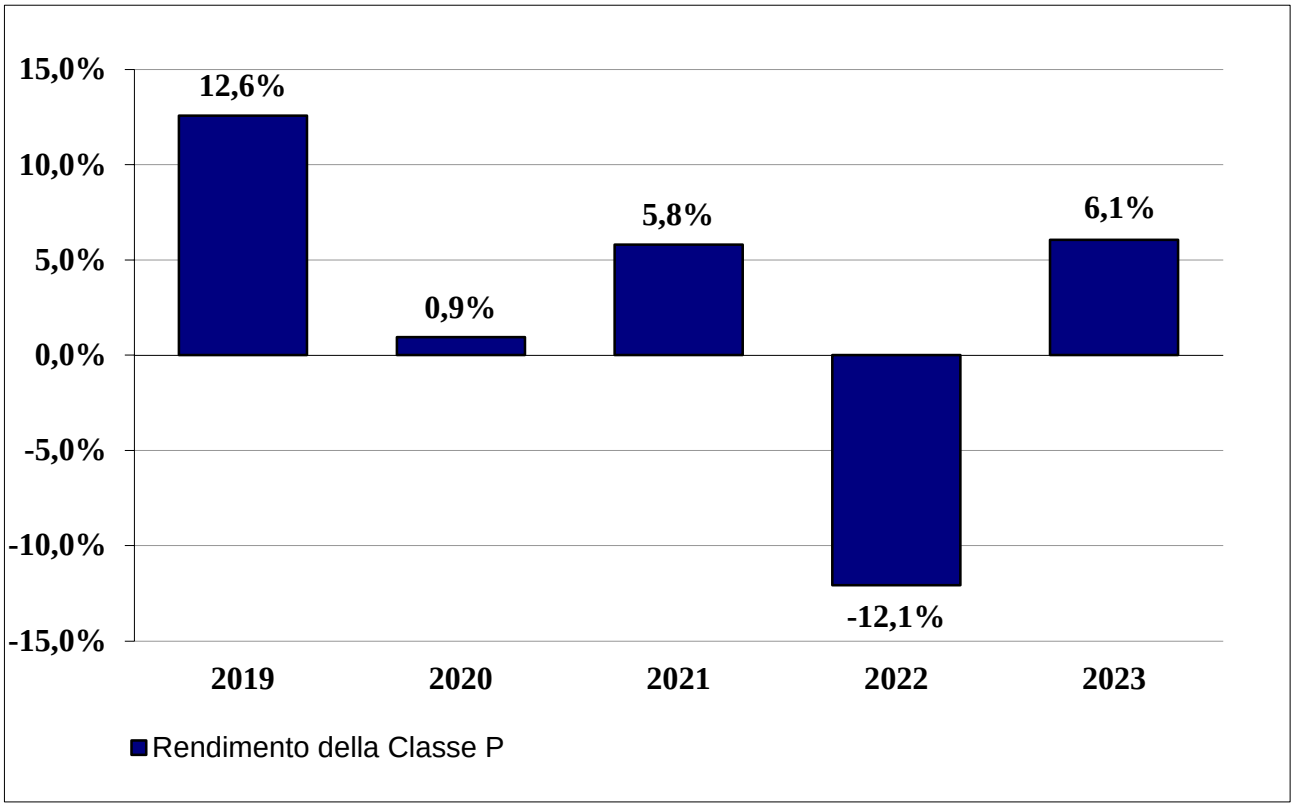
La volatilità (scarto quadratico medio annualizzato dei rendimenti settimanali del fondo) nel periodo che va dal 30 dicembre 2022 (ultima quota del Fondo nell'esercizio 2022) al 29 dicembre 2023 (ultima quota del Fondo nell'esercizio) è stata pari al **4,58%.**



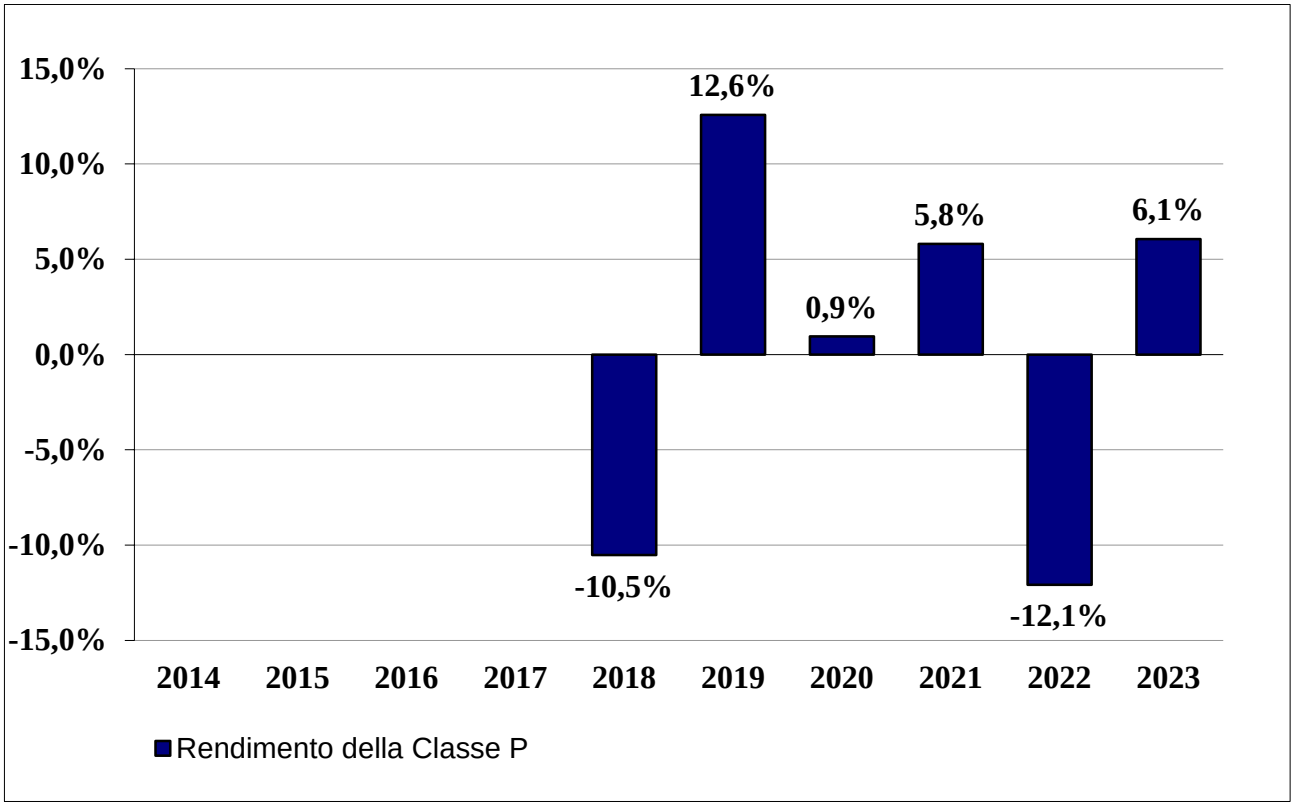
Il minimo rendimento mensile realizzato nell'esercizio, determinato considerando tutti gli intervalli di 20 giorni lavorativi consecutivi è stato pari a **-2,81%.**

Il VaR 95% mensile (che esprime in termini percentuali la massima perdita a cui è esposto il fondo su un orizzonte temporale di un mese e al livello di confidenza del 95%) determinato a posteriori sulla base dei rendimenti realizzati dal Fondo, considerando tutti gli intervalli di 20 rendimenti giornalieri consecutivi dell'esercizio ed escludendo il 5% dei peggiori risultati, è stato pari a **-1,93%.**

La medesima misura calcolata ipotizzando la normalità della distribuzione dei rendimenti settimanali del Fondo è pari a **-2,17%.**



Valori minimi e massimi della quota durante l'esercizio - Classe P



Andamento del valore della quota durante l'esercizio	
Valore minimo al 27/10/2023	4,954
Valore massimo al 27/12/2023 e al 28/12/2023	5,278

Nel corso dell'esercizio non sono stati rilevati errori nella valorizzazione delle quote.

Rendimento annuo del Fondo e del benchmark (ove applicabile) nel corso degli ultimi 5-10 anni solari

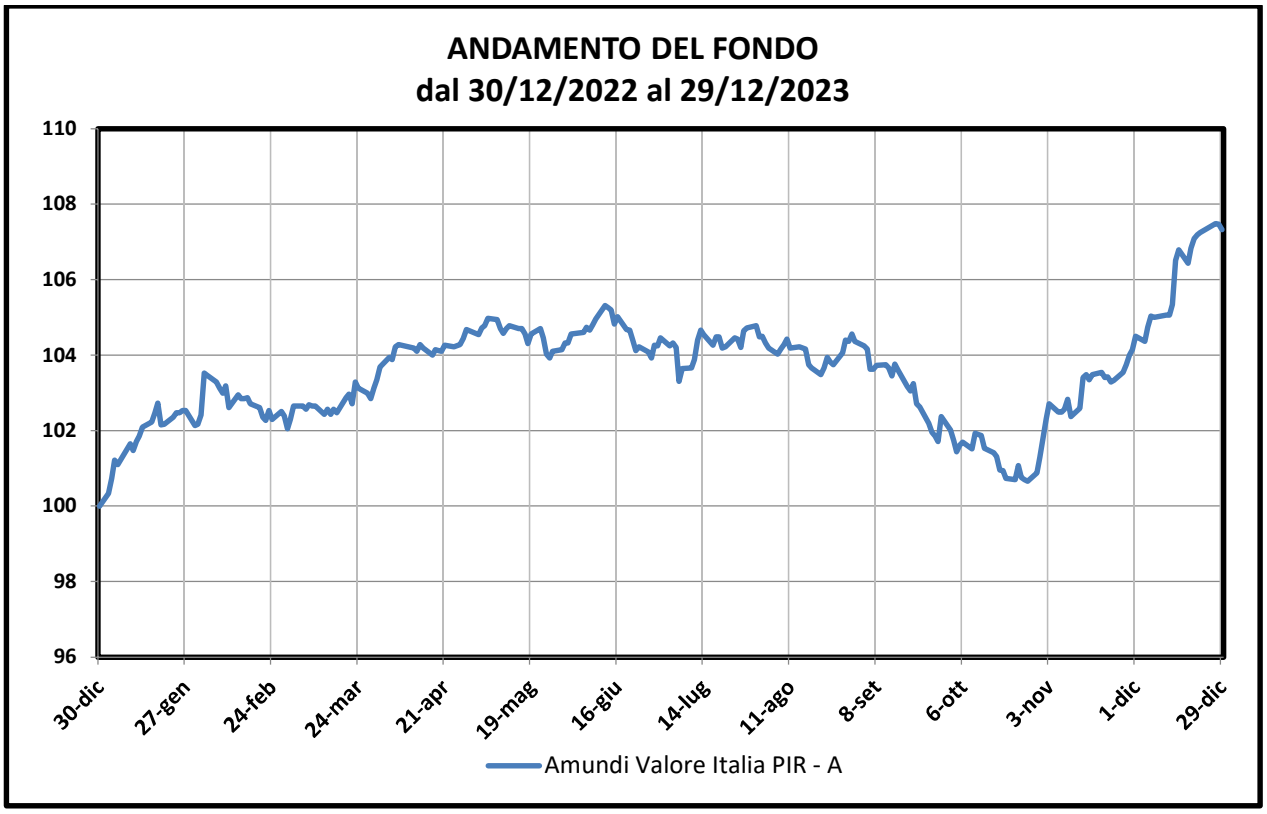
Esposizione al rischio del Fondo (Classe P)

I dati di rendimento del Fondo non includono i costi di sottoscrizione (né gli eventuali costi di rimborso) a carico dell'investitore.

I principali rischi legati agli investimenti sono classificabili come rischio di mercato, rischio di credito, e rischio di liquidità. Il rischio di mercato è costituito dalla potenziale riduzione nel valore dei singoli titoli, eventualmente denominati in diverse valute. Il rischio di credito è determinato dal peggioramento del merito di credito degli emittenti dei titoli detenuti dal Fondo. Il rischio di liquidità è infine definito come il rischio che il Fondo investa in strumenti finanziari che possono risultare di difficile vendita, a seguito del verificarsi di determinate condizioni di mercato, con effetti negativi sul prezzo di realizzo.

Il monitoraggio di tali rischi viene effettuato su base continuativa dal gestore attraverso la costante verifica dell'effettivo posizionamento del fondo rispetto al profilo rischio-rendimento desiderato. La misura e il controllo dei rischi in oggetto viene inoltre effettuata con frequenza giornaliera mediante l'utilizzo di modelli matematico-statistici utilizzati autonomamente dalla struttura di Risk Management. I risultati di tali valutazioni sono regolarmente portati all'attenzione degli organi amministrativi della SGR.

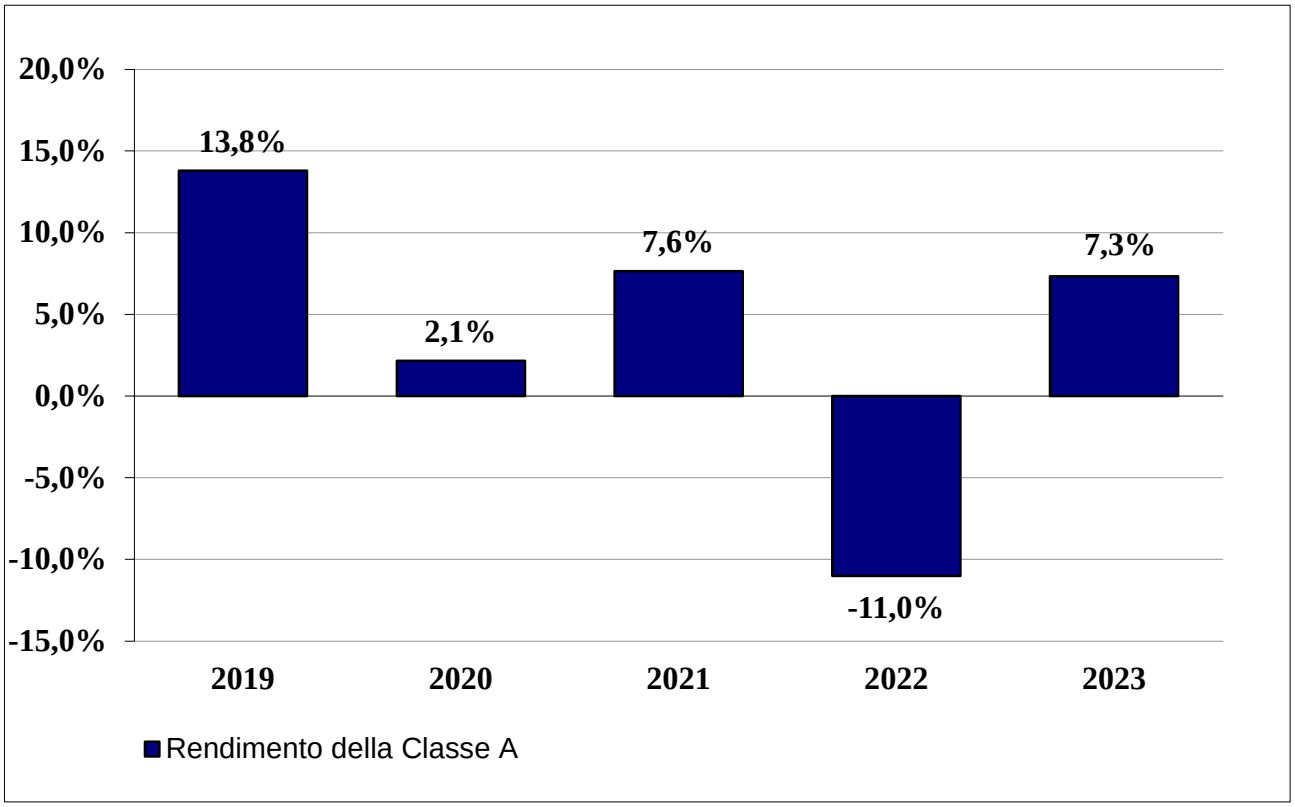
La volatilità (scarto quadratico medio annualizzato dei rendimenti settimanali del fondo) nel periodo che va dal 30 dicembre 2022 (ultima quota del Fondo nell'esercizio 2022) al 29 dicembre 2023 (ultima quota del Fondo nell'esercizio) è stata pari al **4,56%.**



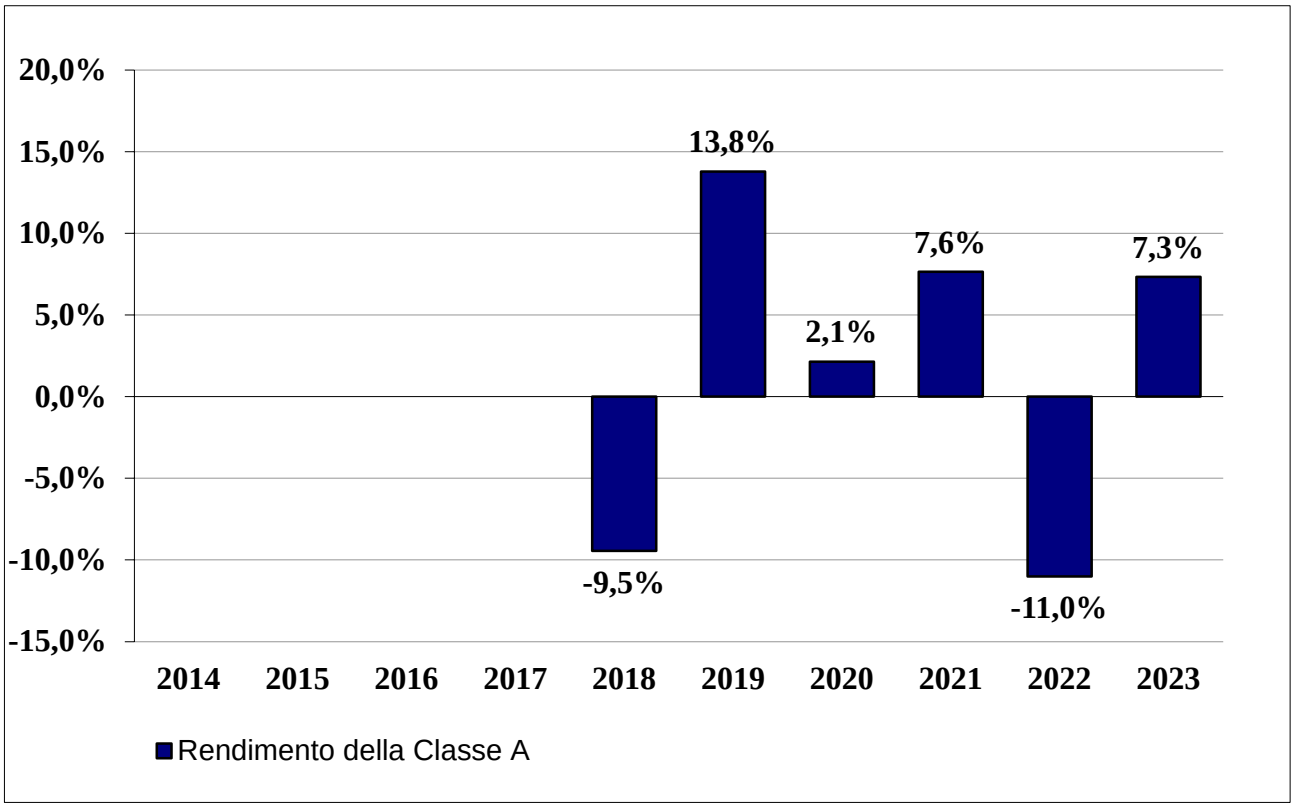
Il minimo rendimento mensile realizzato nell'esercizio, determinato considerando tutti gli intervalli di 20 giorni lavorativi consecutivi è stato pari a **-2,81%.**

Il VaR 95% mensile (che esprime in termini percentuali la massima perdita a cui è esposto il fondo su un orizzonte temporale di un mese e al livello di confidenza del 95%) determinato a posteriori sulla base dei rendimenti realizzati dal Fondo, considerando tutti gli intervalli di 20 rendimenti giornalieri consecutivi dell'esercizio ed escludendo il 5% dei peggiori risultati, è stato pari a **-1,94%.**

La medesima misura calcolata ipotizzando la normalità della distribuzione dei rendimenti settimanali del Fondo è pari a **-2,17%.**



Valori minimi e massimi della quota durante l'esercizio - Classe A



Andamento del valore della quota durante l'esercizio	
Valore minimo al 02/01/2023	5,040
Valore massimo al 27/12/2023	5,399

Nel corso dell'esercizio non sono stati rilevati errori nella valorizzazione delle quote.

Rendimento annuo del Fondo e del benchmark (ove applicabile) nel corso degli ultimi 5-10 anni solari

Esposizione al rischio del Fondo (Classe A)

I dati di rendimento del Fondo non includono i costi di sottoscrizione (né gli eventuali costi di rimborso) a carico dell'investitore.

I principali rischi legati agli investimenti sono classificabili come rischio di mercato, rischio di credito, e rischio di liquidità. Il rischio di mercato è costituito dalla potenziale riduzione nel valore dei singoli titoli, eventualmente denominati in diverse valute. Investments	9.788.242	4.906.044	4.882.198	33
Others	30.043.294	22.615.375	7.427.919	322
4.Remunerazione complessiva del personale attribuibile all'OICVM	51.948	34.921	17.027	0,42

(*) Le informazioni sopra riportate si riferiscono alle remunerazioni relative al personale di Amundi SGR SpA e non includono quelle relative ai gestori delegati.

La politica di remunerazione e incentivazione di Amundi SGR trae origine da quella formulata dalla capogruppo Amundi S.A., per tutte le entità del Gruppo Amundi ("Group Remuneration Policy").

La Group Remuneration Policy ingloba i principi e gli obblighi contemplati dalle direttive AIFM e UCITS V così come implementati dal regolatore locale, ed è coerente con la strategia aziendale, gli obiettivi, i valori e gli interessi della SGR e dei fondi da essa gestiti, nonché dei partecipanti ai fondi. Essa comprende misure volte a evitare i conflitti d'interesse.

Con riferimento al dato "remunerazione totale, suddivisa nella componente fissa e variabile, corrisposta nell'esercizio dalla SGR al personale", esso è composto, sulla base della posizione individuale di ciascun soggetto, dagli elementi di remunerazione fissa e variabile corrisposte dall'azienda nel periodo di riferimento.

Per "Remunerazione Variabile" si intendono gli importi delle remunerazioni variabili effettivamente corrisposte nell'anno, con esclusione di quelle relative al premio di produttività aziendale.

La componente variabile individuale, che può essere corrisposta sia in forma di bonus sia tramite strumenti finanziari o equivalenti, è l'unica remunerazione attribuita in relazione al contributo effettivo dell'individuo al raggiungimento dei risultati, determinato sulla base di specifici criteri, sia qualitativi sia quantitativi. I bonus di ammontare più elevato sono soggetti a meccanismi di differimento del pagamento e sono corrisposti al ricorrere di specifiche condizioni ("vesting condition"). In particolare le remunerazioni variabili corrisposte su una pluralità di anni vengono considerate nell'anno di effettivo pagamento.

Le informazioni aggiornate di dettaglio sulla politica e prassi di remunerazione e incentivazione del personale, inclusi i criteri e le modalità di calcolo delle remunerazioni e degli altri benefici e i soggetti responsabili per la determinazione delle remunerazioni e per l'assegnazione degli altri benefici, sono disponibili sul sito web della SGR. Una copia cartacea o un diverso supporto durevole contenente tali informazioni saranno forniti gratuitamente agli investitori che ne faranno richiesta.

Informazioni sulle modalità di calcolo della remunerazione:

Per le remunerazioni non attribuibili direttamente al singolo Fondo si è considerato quale parametro di riferimento significativo per la loro attribuzione:

- il totale del valore complessivo netto del fondo sul totale dei valori complessi netti dei fondi istituiti dalla SGR gestiti a Milano, per la "determinazione della retribuzione complessiva, suddivisa nella componente fissa e variabile, del personale coinvolto nella gestione dell'attività dell'OICVM";

- il totale del valore complessivo netto del fondo sul totale dei valori complessivi netti dei fondi istituiti dalla SGR, per definire la "proporzione della remunerazione complessiva del personale attribuibile all' OICVM". Analogo criterio è stato utilizzato per determinare il numero dei beneficiari, in quanto la loro attività non è direttamente attribuibile al singolo fondo.

Inoltre per le remunerazioni non attribuibili direttamente al singolo Fondo si è considerato quale parametro di riferimento significativo per la loro attribuzione il totale del valore complessivo netto del fondo sul totale dei valori complessi netti dei fondi istituiti dalla SGR, per definire la "proporzione della remunerazione complessiva del personale attribuibile al OICVM". Analogo criterio è stato utilizzato per determinare il numero dei beneficiari, in quanto la loro attività non è direttamente attribuibile al singolo fondo.

Sezione V - Altri ricavi ed oneri

Descrizione	Importi

Parte D – Altre informazioni

2) Informazioni sugli oneri d'intermediazione

	Soggetti non appartenenti al gruppo	*Soggetti appartenenti al gruppo*	*Totale*
Banche italiane	2.172		2.172
SIM	5.096		5.096
Banche e imprese di investimento estere	10.937		10.937
Altre controparti	213		213

Relativamente alle negoziazioni su strumenti finanziari diversi dai titoli azionari e dai derivati, gli oneri corrisposti alle controparti per l'intermediazione sono inclusi nel prezzo di acquisto o dedotti dal prezzo di vendita dello strumento stesso; per queste categorie di strumenti finanziari non è possibile fornire una ripartizione di tali oneri per tipologia di controparte.

5) Turnover

Il tasso di movimentazione del portafoglio del Fondo (c.d. turnover), espresso dal rapporto percentuale tra la somma degli acquisti e delle vendite di strumenti finanziari, al netto delle sottoscrizioni e rimborsi delle quote del Fondo, e il patrimonio netto medio del Fondo, nell'esercizio è stato pari a 3,59.

8) Esercizio del diritto di voto alle Assemblee di società quotate

La società ha adottato una policy per l'esercizio dei diritti di voto inerenti agli strumenti finanziari di pertinenza degli OICR gestiti al fine di assicurare che tali diritti siano esercitati nell'esclusivo interesse dei partecipanti agli OICR, la cui sintesi è disponibile sul sito internet www.amundi.it.

Nell'ambito dei suddetti interventi, la SGR ha altresi proposto una lista di candidati per la carica di amministratori e sindaci alle assemblee di Avio Spa, Moncler Spa, Safilo Group Spa, Erg Spa, Interpump Spa, Enav Spa, Brunello Cucinelli Spa, Sol Spa, Enel Spa.

Trasparenza degli OICR sull'uso delle operazioni di finanziamento tramite titoli e dei Total Return Swap ai sensi del regolamento (UE) 2015/2365 (Regolamento SFT)

L'OICR non presenta posizioni aperte relative ad operazioni di Prestito titoli, Pronti contro Termine, Repurchase transaction e Total Return Swap alla data di riferimento della relazione e non ha fatto ricorso a tali operazioni nel periodo di riferimento della relazione.

RELAZIONE DELLA SOCIETA' DI REVISIONE INDIPENDENTE AI SENSI DEGLI ARTICOLI 14 e 19 BIS DEL DLGS 27 GENNAIO 2010, N° 39 E DELL'ARTICOLO 9 DEL DLGS 24 FEBBRAIO 1998, n° 58

FONDO COMUNE DI INVESTIMENTO MOBILIARE APERTO "AMUNDI IMPEGNO ITALIA (GIÀ AMUNDI DIVIDENDO ITALIA)"

RELAZIONE DI GESTIONE AL 29 DICEMBRE 2023

AMUNDI SGR SPA

Relazione della società di revisione indipendente

ai sensi degli articoli 14 e 19 bis del DLgs 27 gennaio 2010, n° 39 e dell'articolo 9 del DLgs 24 febbraio 1998, n°58

Ai partecipanti al Fondo Comune di Investimento Mobiliare Aperto "Amundi Impegno Italia (già Amundi Dividendo Italia)"

Relazione sulla revisione contabile della relazione di gestione

Giudizio

Abbiamo svolto la revisione contabile della relazione di gestione del Fondo Comune di Investimento Mobiliare Aperto "Amundi Impegno Italia (già Amundi Dividendo Italia)" (il "Fondo"), costituita dalla situazione patrimoniale al 29 dicembre 2023, dalla sezione reddituale per l'esercizio chiuso a tale data e dalla nota integrativa.

A nostro giudizio, la relazione di gestione fornisce una rappresentazione veritiera e corretta della situazione patrimoniale e finanziaria del Fondo al 29 dicembre 2023 e del risultato economico per l'esercizio chiuso a tale data in conformità al Provvedimento emanato dalla Banca d'Italia il 19 gennaio 2015 e successive modifiche (di seguito anche il "Provvedimento") che ne disciplina i criteri di redazione.

Elementi alla base del giudizio

Abbiamo svolto la revisione contabile in conformità ai principi di revisione internazionali (ISA Italia). Le nostre responsabilità ai sensi di tali principi sono ulteriormente descritte nella sezione "*Responsabilità della società di revisione per la revisione contabile della relazione di gestione*" della presente relazione. Siamo indipendenti rispetto al Fondo e alla società Amundi SGR SpA, Società di Gestione del Fondo, in conformità alle norme e ai principi in materia di etica e di indipendenza applicabili nell'ordinamento italiano alla revisione contabile del bilancio. Riteniamo di aver acquisito elementi probativi sufficienti e appropriati su cui basare il nostro giudizio.

Responsabilità degli amministratori e del collegio sindacale per la relazione di gestione

Gli amministratori della Società di Gestione del Fondo, sono responsabili per la redazione della relazione di gestione del Fondo che fornisca una rappresentazione veritiera e corretta in conformità al

Provvedimento che ne disciplina i criteri di redazione e, nei termini previsti dalla legge, per quella parte del controllo interno dagli stessi ritenuta necessaria per consentire la redazione di una relazione di gestione che non contenga errori significativi dovuti a frodi o a comportamenti o eventi non intenzionali.

Gli amministratori della Società di Gestione del Fondo sono responsabili per la valutazione della capacità del Fondo di continuare a operare come un'entità in funzionamento e, nella redazione della relazione di gestione, per l'appropriatezza dell'utilizzo del presupposto della continuità aziendale, nonché per una adeguata informativa in materia. Gli amministratori utilizzano il presupposto della continuità aziendale nella redazione della relazione di gestione a meno che abbiano valutato che sussistono le condizioni per la liquidazione del Fondo o per l'interruzione dell'attività o non abbiano alternative realistiche a tali scelte.

Il collegio sindacale della Società di Gestione del Fondo ha la responsabilità della vigilanza, nei termini previsti dalla legge, sul processo di predisposizione dell'informativa finanziaria del Fondo.

Responsabilità della società di revisione per la revisione contabile della relazione di gestione

I nostri obiettivi sono l'acquisizione di una ragionevole sicurezza che la relazione di gestione nel suo complesso non contenga errori significativi, dovuti a frodi o a comportamenti o eventi non intenzionali, e l'emissione di una relazione di revisione che includa il nostro giudizio. Per ragionevole sicurezza si intende un livello elevato di sicurezza che, tuttavia, non fornisce la garanzia che una revisione contabile svolta in conformità ai principi di revisione internazionali (ISA Italia) individui sempre un errore significativo, qualora esistente. Gli errori possono derivare da frodi o da comportamenti o eventi non intenzionali e sono considerati significativi qualora ci si possa ragionevolmente attendere che essi, singolarmente o nel loro insieme, siano in grado di influenzare le decisioni economiche prese dagli utilizzatori sulla base della relazione di gestione.

Nell'ambito della revisione contabile svolta in conformità ai principi di revisione internazionali (ISA Italia), abbiamo esercitato il giudizio professionale e abbiamo mantenuto lo scetticismo professionale per tutta la durata della revisione contabile. Inoltre:

- abbiamo identificato e valutato i rischi di errori significativi nella relazione di gestione, dovuti a frodi o a comportamenti o eventi non intenzionali; abbiamo definito e svolto procedure di revisione in risposta a tali rischi; abbiamo acquisito elementi probativi sufficienti e appropriati su cui basare il nostro giudizio. Il rischio di non individuare un errore significativo dovuto a frodi è più elevato rispetto al rischio di non individuare un errore significativo derivante da comportamenti o eventi non intenzionali, poiché la frode può implicare l'esistenza di collusioni, falsificazioni, omissioni intenzionali, rappresentazioni fuorvianti o forzature del controllo interno;
- abbiamo acquisito una comprensione del controllo interno rilevante ai fini della revisione contabile allo scopo di definire procedure di revisione appropriate nelle circostanze e non

per esprimere un giudizio sull'efficacia del controllo interno del Fondo e della Società di Gestione del Fondo;

- abbiamo valutato l'appropriatezza dei criteri e delle modalità di valutazione adottati, nonché la ragionevolezza delle stime contabili effettuate dagli amministratori, inclusa la relativa informativa;
- siamo giunti ad una conclusione sull'appropriatezza dell'utilizzo da parte degli amministratori del presupposto della continuità aziendale e, in base agli elementi probativi acquisiti, sull'eventuale esistenza di un'incertezza significativa riguardo a eventi o circostanze che possono far sorgere dubbi significativi sulla capacità del Fondo di continuare a operare come una entità in funzionamento. In presenza di un'incertezza significativa, siamo tenuti a richiamare l'attenzione nella relazione di revisione sulla relativa informativa della relazione di gestione, ovvero, qualora tale informativa sia inadeguata, a riflettere tale circostanza nella formulazione del nostro giudizio. Le nostre conclusioni sono basate sugli elementi probativi acquisiti fino alla data della presente relazione. Tuttavia, eventi o circostanze successivi possono comportare il fatto che il Fondo cessi di operare come un'entità in funzionamento;
- abbiamo valutato la presentazione, la struttura e il contenuto della relazione di gestione nel suo complesso, inclusa l'informativa, e se la relazione di gestione rappresenti le operazioni e gli eventi sottostanti in modo da fornire una corretta rappresentazione.

Abbiamo comunicato ai responsabili delle attività di governance della Società di Gestione del Fondo, identificati a un livello appropriato come richiesto dai principi di revisione internazionali (ISA Italia), tra gli altri aspetti, la portata e la tempistica pianificate per la revisione contabile e i risultati significativi emersi, incluse le eventuali carenze significative nel controllo interno identificate nel corso della revisione contabile.

Relazione su altre disposizioni di legge e regolamentari

Giudizio ai sensi dell'articolo 14, comma 2, lettera e), del DLgs 39/10

Gli amministratori di Amundi SGR SpA sono responsabili per la predisposizione della relazione degli amministratori del fondo "Amundi Impegno Italia (già Amundi Dividendo Italia)" al 29 dicembre 2023, incluse la sua coerenza con la relazione di gestione e la sua conformità al Provvedimento.

Abbiamo svolto le procedure indicate nel principio di revisione (SA Italia) n. 720B al fine di esprimere un giudizio sulla coerenza della relazione degli amministratori con la relazione di gestione del fondo "Amundi Impegno Italia (già Amundi Dividendo Italia)" al 29 dicembre 2023 e sulla conformità della stessa al Provvedimento, nonché di rilasciare una dichiarazione su eventuali errori significativi.

A nostro giudizio, la relazione degli amministratori è coerente con la relazione di gestione del fondo "Amundi Impegno Italia (già Amundi Dividendo Italia)" al 29 dicembre 2023 ed è redatta in conformità al Provvedimento.

Con riferimento alla dichiarazione di cui all'articolo 14, comma 2, lettera e), del D.Lgs. 39/10, rilasciata sulla base delle conoscenze e della comprensione del Fondo e del relativo contesto acquisite nel corso dell'attività di revisione, non abbiamo nulla da riportare.

Ai partecipanti al Fondo Comune di Investimento Mobiliare Aperto "Amundi Obbligazionario Breve Termine"

Relazione sulla revisione contabile della relazione di gestione

Giudizio

Abbiamo svolto la revisione contabile della relazione di gestione del Fondo Comune di Investimento Mobiliare Aperto "Amundi Obbligazionario Breve Termine" (il "Fondo"), costituita dalla situazione patrimoniale al 29 dicembre 2023, dalla sezione reddituale per l'esercizio chiuso a tale data e dalla nota integrativa.

A nostro giudizio, la relazione di gestione fornisce una rappresentazione veritiera e corretta della situazione patrimoniale e finanziaria del Fondo al 29 dicembre 2023 e del risultato economico per l'esercizio chiuso a tale data in conformità al Provvedimento emanato dalla Banca d'Italia il 19 gennaio 2015 e successive modifiche (di seguito anche il "Provvedimento") che ne disciplina i criteri di redazione.

Elementi alla base del giudizio

Abbiamo svolto la revisione contabile in conformità ai principi di revisione internazionali (ISA Italia). Le nostre responsabilità ai sensi di tali principi sono ulteriormente descritte nella sezione "*Responsabilità della società di revisione per la revisione contabile della relazione di gestione*" della presente relazione. Siamo indipendenti rispetto al Fondo e alla società Amundi SGR SpA, Società di Gestione del Fondo, in conformità alle norme e ai principi in materia di etica e di indipendenza applicabili nell'ordinamento italiano alla revisione contabile del bilancio. Riteniamo di aver acquisito elementi probativi sufficienti e appropriati su cui basare il nostro giudizio.

Responsabilità degli amministratori e del collegio sindacale per la relazione di gestione

Gli amministratori della Società di Gestione del Fondo, sono responsabili per la redazione della relazione di gestione del Fondo che fornisca una rappresentazione veritiera e corretta in conformità al

Provvedimento che ne disciplina i criteri di redazione e, nei termini previsti dalla legge, per quella parte del controllo interno dagli stessi ritenuta necessaria per consentire la redazione di una relazione di gestione che non contenga errori significativi dovuti a frodi o a comportamenti o eventi non intenzionali.

Gli amministratori della Società di Gestione del Fondo sono responsabili per la valutazione della capacità del Fondo di continuare a operare come un'entità in funzionamento e, nella redazione della relazione di gestione, per l'appropriatezza dell'utilizzo del presupposto della continuità aziendale, nonché per una adeguata informativa in materia. Gli amministratori utilizzano il presupposto della continuità aziendale nella redazione della relazione di gestione a meno che abbiano valutato che sussistono le condizioni per la liquidazione del Fondo o per l'interruzione dell'attività o non abbiano alternative realistiche a tali scelte.

Il collegio sindacale della Società di Gestione del Fondo ha la responsabilità della vigilanza, nei termini previsti dalla legge, sul processo di predisposizione dell'informativa finanziaria del Fondo.

Responsabilità della società di revisione per la revisione contabile della relazione di gestione

I nostri obiettivi sono l'acquisizione di una ragionevole sicurezza che la relazione di gestione nel suo complesso non contenga errori significativi, dovuti a frodi o a comportamenti o eventi non intenzionali, e l'emissione di una relazione di revisione che includa il nostro giudizio. Per ragionevole sicurezza si intende un livello elevato di sicurezza che, tuttavia, non fornisce la garanzia che una revisione contabile svolta in conformità ai principi di revisione internazionali (ISA Italia) individui sempre un errore significativo, qualora esistente. Gli errori possono derivare da frodi o da comportamenti o eventi non intenzionali e sono considerati significativi qualora ci si possa ragionevolmente attendere che essi, singolarmente o nel loro insieme, siano in grado di influenzare le decisioni economiche prese dagli utilizzatori sulla base della relazione di gestione.

Nell'ambito della revisione contabile svolta in conformità ai principi di revisione internazionali (ISA Italia), abbiamo esercitato il giudizio professionale e abbiamo mantenuto lo scetticismo professionale per tutta la durata della revisione contabile. Inoltre:

- abbiamo identificato e valutato i rischi di errori significativi nella relazione di gestione, dovuti a frodi o a comportamenti o eventi non intenzionali; abbiamo definito e svolto procedure di revisione in risposta a tali rischi; abbiamo acquisito elementi probativi sufficienti e appropriati su cui basare il nostro giudizio. Il rischio di non individuare un errore significativo dovuto a frodi è più elevato rispetto al rischio di non individuare un errore significativo derivante da comportamenti o eventi non intenzionali, poiché la frode può implicare l'esistenza di collusioni, falsificazioni, omissioni intenzionali, rappresentazioni fuorvianti o forzature del controllo interno;
- abbiamo acquisito una comprensione del controllo interno rilevante ai fini della revisione contabile allo scopo di definire procedure di revisione appropriate nelle circostanze e non

per esprimere un giudizio sull'efficacia del controllo interno del Fondo e della Società di Gestione del Fondo;

- abbiamo valutato l'appropriatezza dei criteri e delle modalità di valutazione adottati, nonché la ragionevolezza delle stime contabili effettuate dagli amministratori, inclusa la relativa informativa;
- siamo giunti ad una conclusione sull'appropriatezza dell'utilizzo da parte degli amministratori del presupposto della continuità aziendale e, in base agli elementi probativi acquisiti, sull'eventuale esistenza di un'incertezza significativa riguardo a eventi o circostanze che possono far sorgere dubbi significativi sulla capacità del Fondo di continuare a operare come una entità in funzionamento. In presenza di un'incertezza significativa, siamo tenuti a richiamare l'attenzione nella relazione di revisione sulla relativa informativa della relazione di gestione, ovvero, qualora tale informativa sia inadeguata, a riflettere tale circostanza nella formulazione del nostro giudizio. Le nostre conclusioni sono basate sugli elementi probativi acquisiti fino alla data della presente relazione. Tuttavia, eventi o circostanze successivi possono comportare il fatto che il Fondo cessi di operare come un'entità in funzionamento;
- abbiamo valutato la presentazione, la struttura e il contenuto della relazione di gestione nel suo complesso, inclusa l'informativa, e se la relazione di gestione rappresenti le operazioni e gli eventi sottostanti in modo da fornire una corretta rappresentazione.

Abbiamo comunicato ai responsabili delle attività di governance della Società di Gestione del Fondo, identificati a un livello appropriato come richiesto dai principi di revisione internazionali (ISA Italia), tra gli altri aspetti, la portata e la tempistica pianificate per la revisione contabile e i risultati significativi emersi, incluse le eventuali carenze significative nel controllo interno identificate nel corso della revisione contabile.

Relazione su altre disposizioni di legge e regolamentari

Giudizio ai sensi dell'articolo 14, comma 2, lettera e), del DLgs 39/10

Gli amministratori di Amundi SGR SpA sono responsabili per la predisposizione della relazione degli amministratori del fondo "Amundi Obbligazionario Breve Termine" al 29 dicembre 2023, incluse la sua coerenza con la relazione di gestione e la sua conformità al Provvedimento.

Abbiamo svolto le procedure indicate nel principio di revisione (SA Italia) n. 720B al fine di esprimere un giudizio sulla coerenza della relazione degli amministratori con la relazione di gestione del fondo "Amundi Obbligazionario Breve Termine" al 29 dicembre 2023 e sulla conformità della stessa al Provvedimento, nonché di rilasciare una dichiarazione su eventuali errori significativi.

A nostro giudizio, la relazione degli amministratori è coerente con la relazione di gestione del fondo "Amundi Obbligazionario Breve Termine" al 29 dicembre 2023 ed è redatta in conformità al Provvedimento.

Con riferimento alla dichiarazione di cui all'articolo 14, comma 2, lettera e), del D.Lgs. 39/10, rilasciata sulla base delle conoscenze e della comprensione del Fondo e del relativo contesto acquisite nel corso dell'attività di revisione, non abbiamo nulla da riportare.

FONDO COMUNE DI INVESTIMENTO MOBILIARE APERTO "AMUNDI PRIMO INVESTIMENTO"

RELAZIONE DI GESTIONE AL 29 DICEMBRE 2023

AMUNDI SGR SPA

Relazione della società di revisione indipendente

ai sensi degli articoli 14 e 19 bis del DLgs 27 gennaio 2010, n° 39 e dell'articolo 9 del DLgs 24 febbraio 1998, n°58

Ai partecipanti al Fondo Comune di Investimento Mobiliare Aperto "Amundi Primo Investimento"

Relazione sulla revisione contabile della relazione di gestione

Giudizio

Abbiamo svolto la revisione contabile della relazione di gestione del Fondo Comune di Investimento Mobiliare Aperto "Amundi Primo Investimento" (il "Fondo"), costituita dalla situazione patrimoniale al 29 dicembre 2023, dalla sezione reddituale per l'esercizio chiuso a tale data e dalla nota integrativa.

A nostro giudizio, la relazione di gestione fornisce una rappresentazione veritiera e corretta della situazione patrimoniale e finanziaria del Fondo al 29 dicembre 2023 e del risultato economico per l'esercizio chiuso a tale data in conformità al Provvedimento emanato dalla Banca d'Italia il 19 gennaio 2015 e successive modifiche (di seguito anche il "Provvedimento") che ne disciplina i criteri di redazione.

Elementi alla base del giudizio

Abbiamo svolto la revisione contabile in conformità ai principi di revisione internazionali (ISA Italia). Le nostre responsabilità ai sensi di tali principi sono ulteriormente descritte nella sezione "*Responsabilità della società di revisione per la revisione contabile della relazione di gestione*" della presente relazione. Siamo indipendenti rispetto al Fondo e alla società Amundi SGR SpA, Società di Gestione del Fondo, in conformità alle norme e ai principi in materia di etica e di indipendenza applicabili nell'ordinamento italiano alla revisione contabile del bilancio. Riteniamo di aver acquisito elementi probativi sufficienti e appropriati su cui basare il nostro giudizio.

Responsabilità degli amministratori e del collegio sindacale per la relazione di gestione

Gli amministratori della Società di Gestione del Fondo, sono responsabili per la redazione della relazione di gestione del Fondo che fornisca una rappresentazione veritiera e corretta in conformità al Provvedimento che ne disciplina i criteri di redazione e, nei termini previsti dalla legge, per quella parte del controllo interno dagli stessi ritenuta necessaria per consentire la redazione di una relazione

di gestione che non contenga errori significativi dovuti a frodi o a comportamenti o eventi non intenzionali.

Gli amministratori della Società di Gestione del Fondo sono responsabili per la valutazione della capacità del Fondo di continuare a operare come un'entità in funzionamento e, nella redazione della relazione di gestione, per l'appropriatezza dell'utilizzo del presupposto della continuità aziendale, nonché per una adeguata informativa in materia. Gli amministratori utilizzano il presupposto della continuità aziendale nella redazione della relazione di gestione a meno che abbiano valutato che sussistono le condizioni per la liquidazione del Fondo o per l'interruzione dell'attività o non abbiano alternative realistiche a tali scelte.

Il collegio sindacale della Società di Gestione del Fondo ha la responsabilità della vigilanza, nei termini previsti dalla legge, sul processo di predisposizione dell'informativa finanziaria del Fondo.

Responsabilità della società di revisione per la revisione contabile della relazione di gestione

I nostri obiettivi sono l'acquisizione di una ragionevole sicurezza che la relazione di gestione nel suo complesso non contenga errori significativi, dovuti a frodi o a comportamenti o eventi non intenzionali, e l'emissione di una relazione di revisione che includa il nostro giudizio. Per ragionevole sicurezza si intende un livello elevato di sicurezza che, tuttavia, non fornisce la garanzia che una revisione contabile svolta in conformità ai principi di revisione internazionali (ISA Italia) individui sempre un errore significativo, qualora esistente. Gli errori possono derivare da frodi o da comportamenti o eventi non intenzionali e sono considerati significativi qualora ci si possa ragionevolmente attendere che essi, singolarmente o nel loro insieme, siano in grado di influenzare le decisioni economiche prese dagli utilizzatori sulla base della relazione di gestione.

Nell'ambito della revisione contabile svolta in conformità ai principi di revisione internazionali (ISA Italia), abbiamo esercitato il giudizio professionale e abbiamo mantenuto lo scetticismo professionale per tutta la durata della revisione contabile. Inoltre:

- abbiamo identificato e valutato i rischi di errori significativi nella relazione di gestione, dovuti a frodi o a comportamenti o eventi non intenzionali; abbiamo definito e svolto procedure di revisione in risposta a tali rischi; abbiamo acquisito elementi probativi sufficienti e appropriati su cui basare il nostro giudizio. Il rischio di non individuare un errore significativo dovuto a frodi è più elevato rispetto al rischio di non individuare un errore significativo derivante da comportamenti o eventi non intenzionali, poiché la frode può implicare l'esistenza di collusioni, falsificazioni, omissioni intenzionali, rappresentazioni fuorvianti o forzature del controllo interno;
- abbiamo acquisito una comprensione del controllo interno rilevante ai fini della revisione contabile allo scopo di definire procedure di revisione appropriate nelle circostanze e non per esprimere un giudizio sull'efficacia del controllo interno del Fondo e della Società di Gestione del Fondo;

- abbiamo valutato l'appropriatezza dei criteri e delle modalità di valutazione adottati, nonché la ragionevolezza delle stime contabili effettuate dagli amministratori, inclusa la relativa informativa;
- siamo giunti ad una conclusione sull'appropriatezza dell'utilizzo da parte degli amministratori del presupposto della continuità aziendale e, in base agli elementi probativi acquisiti, sull'eventuale esistenza di un'incertezza significativa riguardo a eventi o circostanze che possono far sorgere dubbi significativi sulla capacità del Fondo di continuare a operare come una entità in funzionamento. In presenza di un'incertezza significativa, siamo tenuti a richiamare l'attenzione nella relazione di revisione sulla relativa informativa della relazione di gestione, ovvero, qualora tale informativa sia inadeguata, a riflettere tale circostanza nella formulazione del nostro giudizio. Le nostre conclusioni sono basate sugli elementi probativi acquisiti fino alla data della presente relazione. Tuttavia, eventi o circostanze successivi possono comportare il fatto che il Fondo cessi di operare come un'entità in funzionamento;
- abbiamo valutato la presentazione, la struttura e il contenuto della relazione di gestione nel suo complesso, inclusa l'informativa, e se la relazione di gestione rappresenti le operazioni e gli eventi sottostanti in modo da fornire una corretta rappresentazione.

Abbiamo comunicato ai responsabili delle attività di governance della Società di Gestione del Fondo, identificati a un livello appropriato come richiesto dai principi di revisione internazionali (ISA Italia), tra gli altri aspetti, la portata e la tempistica pianificate per la revisione contabile e i risultati significativi emersi, incluse le eventuali carenze significative nel controllo interno identificate nel corso della revisione contabile.

Relazione su altre disposizioni di legge e regolamentari

Giudizio ai sensi dell'articolo 14, comma 2, lettera e), del DLgs 39/10

Gli amministratori di Amundi SGR SpA sono responsabili per la predisposizione della relazione degli amministratori del fondo "Amundi Primo Investimento" al 29 dicembre 2023, incluse la sua coerenza con la relazione di gestione e la sua conformità al Provvedimento.

Abbiamo svolto le procedure indicate nel principio di revisione (SA Italia) n. 720B al fine di esprimere un giudizio sulla coerenza della relazione degli amministratori con la relazione di gestione del fondo "Amundi Primo Investimento" al 29 dicembre 2023 e sulla conformità della stessa al Provvedimento, nonché di rilasciare una dichiarazione su eventuali errori significativi.

A nostro giudizio, la relazione degli amministratori è coerente con la relazione di gestione del fondo "Amundi Primo Investimento" al 29 dicembre 2023 ed è redatta in conformità al Provvedimento.

Con riferimento alla dichiarazione di cui all'articolo 14, comma 2, lettera e), del D.Lgs. 39/10, rilasciata sulla base delle conoscenze e della comprensione del Fondo e del relativo contesto acquisite nel corso dell'attività di revisione, non abbiamo nulla da riportare.

Ai partecipanti al Fondo Comune di Investimento Mobiliare Aperto "Amundi Valore Italia PIR"

Relazione sulla revisione contabile della relazione di gestione

Giudizio

Abbiamo svolto la revisione contabile della relazione di gestione del Fondo Comune di Investimento Mobiliare Aperto "Amundi Valore Italia PIR" (il "Fondo"), costituita dalla situazione patrimoniale al 29 dicembre 2023, dalla sezione reddituale per l'esercizio chiuso a tale data e dalla nota integrativa.

A nostro giudizio, la relazione di gestione fornisce una rappresentazione veritiera e corretta della situazione patrimoniale e finanziaria del Fondo al 29 dicembre 2023 e del risultato economico per l'esercizio chiuso a tale data in conformità al Provvedimento emanato dalla Banca d'Italia il 19 gennaio 2015 e successive modifiche (di seguito anche il "Provvedimento") che ne disciplina i criteri di redazione.

Elementi alla base del giudizio

Abbiamo svolto la revisione contabile in conformità ai principi di revisione internazionali (ISA Italia). Le nostre responsabilità ai sensi di tali principi sono ulteriormente descritte nella sezione "*Responsabilità della società di revisione per la revisione contabile della relazione di gestione*" della presente relazione. Siamo indipendenti rispetto al Fondo e alla società Amundi SGR SpA, Società di Gestione del Fondo, in conformità alle norme e ai principi in materia di etica e di indipendenza applicabili nell'ordinamento italiano alla revisione contabile del bilancio. Riteniamo di aver acquisito elementi probativi sufficienti e appropriati su cui basare il nostro giudizio.

Responsabilità degli amministratori e del collegio sindacale per la relazione di gestione

Gli amministratori della Società di Gestione del Fondo, sono responsabili per la redazione della relazione di gestione del Fondo che fornisca una rappresentazione veritiera e corretta in conformità al Provvedimento che ne disciplina i criteri di redazione e, nei termini previsti dalla legge, per quella parte del controllo interno dagli stessi ritenuta necessaria per consentire la redazione di una relazione

di gestione che non contenga errori significativi dovuti a frodi o a comportamenti o eventi non intenzionali.

Gli amministratori della Società di Gestione del Fondo sono responsabili per la valutazione della capacità del Fondo di continuare a operare come un'entità in funzionamento e, nella redazione della relazione di gestione, per l'appropriatezza dell'utilizzo del presupposto della continuità aziendale, nonché per una adeguata informativa in materia. Gli amministratori utilizzano il presupposto della continuità aziendale nella redazione della relazione di gestione a meno che abbiano valutato che sussistono le condizioni per la liquidazione del Fondo o per l'interruzione dell'attività o non abbiano alternative realistiche a tali scelte.

Il collegio sindacale della Società di Gestione del Fondo ha la responsabilità della vigilanza, nei termini previsti dalla legge, sul processo di predisposizione dell'informativa finanziaria del Fondo.

Responsabilità della società di revisione per la revisione contabile della relazione di gestione

I nostri obiettivi sono l'acquisizione di una ragionevole sicurezza che la relazione di gestione nel suo complesso non contenga errori significativi, dovuti a frodi o a comportamenti o eventi non intenzionali, e l'emissione di una relazione di revisione che includa il nostro giudizio. Per ragionevole sicurezza si intende un livello elevato di sicurezza che, tuttavia, non fornisce la garanzia che una revisione contabile svolta in conformità ai principi di revisione internazionali (ISA Italia) individui sempre un errore significativo, qualora esistente. Gli errori possono derivare da frodi o da comportamenti o eventi non intenzionali e sono considerati significativi qualora ci si possa ragionevolmente attendere che essi, singolarmente o nel loro insieme, siano in grado di influenzare le decisioni economiche prese dagli utilizzatori sulla base della relazione di gestione.

Nell'ambito della revisione contabile svolta in conformità ai principi di revisione internazionali (ISA Italia), abbiamo esercitato il giudizio professionale e abbiamo mantenuto lo scetticismo professionale per tutta la durata della revisione contabile. Inoltre:

- abbiamo identificato e valutato i rischi di errori significativi nella relazione di gestione, dovuti a frodi o a comportamenti o eventi non intenzionali; abbiamo definito e svolto procedure di revisione in risposta a tali rischi; abbiamo acquisito elementi probativi sufficienti e appropriati su cui basare il nostro giudizio. Il rischio di non individuare un errore significativo dovuto a frodi è più elevato rispetto al rischio di non individuare un errore significativo derivante da comportamenti o eventi non intenzionali, poiché la frode può implicare l'esistenza di collusioni, falsificazioni, omissioni intenzionali, rappresentazioni fuorvianti o forzature del controllo interno;
- abbiamo acquisito una comprensione del controllo interno rilevante ai fini della revisione contabile allo scopo di definire procedure di revisione appropriate nelle circostanze e non per esprimere un giudizio sull'efficacia del controllo interno del Fondo e della Società di Gestione del Fondo;

- abbiamo valutato l'appropriatezza dei criteri e delle modalità di valutazione adottati, nonché la ragionevolezza delle stime contabili effettuate dagli amministratori, inclusa la relativa informativa;
- siamo giunti ad una conclusione sull'appropriatezza dell'utilizzo da parte degli amministratori del presupposto della continuità aziendale e, in base agli elementi probativi acquisiti, sull'eventuale esistenza di un'incertezza significativa riguardo a eventi o circostanze che possono far sorgere dubbi significativi sulla capacità del Fondo di continuare a operare come una entità in funzionamento. In presenza di un'incertezza significativa, siamo tenuti a richiamare l'attenzione nella relazione di revisione sulla relativa informativa della relazione di gestione, ovvero, qualora tale informativa sia inadeguata, a riflettere tale circostanza nella formulazione del nostro giudizio. Le nostre conclusioni sono basate sugli elementi probativi acquisiti fino alla data della presente relazione. Tuttavia, eventi o circostanze successivi possono comportare il fatto che il Fondo cessi di operare come un'entità in funzionamento;
- abbiamo valutato la presentazione, la struttura e il contenuto della relazione di gestione nel suo complesso, inclusa l'informativa, e se la relazione di gestione rappresenti le operazioni e gli eventi sottostanti in modo da fornire una corretta rappresentazione.

Abbiamo comunicato ai responsabili delle attività di governance della Società di Gestione del Fondo, identificati a un livello appropriato come richiesto dai principi di revisione internazionali (ISA Italia), tra gli altri aspetti, la portata e la tempistica pianificate per la revisione contabile e i risultati significativi emersi, incluse le eventuali carenze significative nel controllo interno identificate nel corso della revisione contabile.

Relazione su altre disposizioni di legge e regolamentari

Giudizio ai sensi dell'articolo 14, comma 2, lettera e), del DLgs 39/10

Gli amministratori di Amundi SGR SpA sono responsabili per la predisposizione della relazione degli amministratori del fondo "Amundi Valore Italia PIR" al 29 dicembre 2023, incluse la sua coerenza con la relazione di gestione e la sua conformità al Provvedimento.

Abbiamo svolto le procedure indicate nel principio di revisione (SA Italia) n. 720B al fine di esprimere un giudizio sulla coerenza della relazione degli amministratori con la relazione di gestione del fondo "Amundi Valore Italia PIR" al 29 dicembre 2023 e sulla conformità della stessa al Provvedimento, nonché di rilasciare una dichiarazione su eventuali errori significativi.

A nostro giudizio, la relazione degli amministratori è coerente con la relazione di gestione del fondo "Amundi Valore Italia PIR" al 29 dicembre 2023 ed è redatta in conformità al Provvedimento.

Con riferimento alla dichiarazione di cui all'articolo 14, comma 2, lettera e), del D.Lgs. 39/10, rilasciata sulla base delle conoscenze e della comprensione del Fondo e del relativo contesto acquisite nel corso dell'attività di revisione, non abbiamo nulla da riportare.

Milano, 19 aprile 2024

PricewaterhouseCoopers SpA

Lia Lucilla Turri
(Revisore legale)

La seguente informativa SFDR non è assoggettata a revisione contabile da parte della società di revisione, PricewaterhouseCoopers S.p.A.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, paragrafi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI IMPEGNO ITALIA

Identificativo della persona giuridica: 529900LXP1DJMGIEOO27

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

☐ **Sì**

☒ **No**

☐ Ha effettuato **investimenti sostenibili con un obiettivo ambientale: _____%**

- ☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
- ☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

☒ Ha **promosso caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, aveva una quota del (o) **64,07%** di investimenti sostenibili

- ☐ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
- ☒ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
- ☐ con un obiettivo sociale

☐ Ha effettuato **investimenti sostenibili con un obiettivo sociale: _____%**

☐ Ha promosso caratteristiche A/S, ma **non ha effettuato alcun investimento sostenibile**

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **tassonomia dell'UE** è un sistema di classificazione istituito dal regolamento (UE) 2020/852, che stabilisce un elenco di attività economiche ecosostenibili. Tale regolamento non stabilisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha costantemente promosso caratteristiche ambientali e/o sociali al fine di ottenere un punteggio ESG più elevato rispetto al punteggio ESG del suo universo di investimento rappresentato da **75% FTSE MIB + 25% FTSE ITALIA MID CAP**. Nel determinare il punteggio ESG dell'universo d'investimento, la performance ESG è stata costantemente valutata mettendo a confronto la performance media di un titolo con quella del settore di appartenenza del rispettivo emittente, in relazione a ciascuna delle tre dimensioni ambientale, sociale e di governance.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

- ***Qual è stata la prestazione degli indicatori di sostenibilità?***

Amundi ha messo a punto un proprio processo di assegnazione dei rating ESG basato sull'approccio “best in class”.

I rating applicati a ciascun settore industriale mirano a valutare gli emittenti tenendo conto delle dinamiche specifiche del loro settore di appartenenza.

Per maggiori dettagli si rimanda alla Politica di investimento responsabile disponibile sul sito internet www.amundi.it.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del Prodotto che viene misurato rispetto al punteggio ESG del parametro di riferimento.

Alla fine del periodo:

- la media ponderata del rating ESG del portafoglio è 0.907 (C).

- la media ponderata del rating ESG dell' universo di investimento è 0.86 (C).

Il rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio quantitativo ESG tradotto in sette gradi, che vanno da A (l'universo con i punteggi migliori) a G (il peggiore). Nella scala di Amundi ESG Rating, i titoli appartenenti alla lista di esclusione corrispondono a una G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri rilevanti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per lo sviluppo del capitale umano e il rispetto dei diritti umani in generale;
- Dimensione di governance: Valuta la capacità dell'emittente di garantire le basi per un efficace quadro di corporate governance e di generare valore nel lungo periodo.

La metodologia applicata da Amundi ESG utilizza 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o specifici del settore, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione di un emittente. I rating ESG di Amundi possono essere espressi globalmente sulle tre dimensioni E, S e G o singolarmente su qualsiasi fattore ambientale o sociale.

- ***… e rispetto ai periodi precedenti?***

Alla fine del periodo precedente la media ponderata del rating ESG del portafoglio era C+ (0.887) e la media ponderata del rating ESG dell' universo di investimento era C+ (0.869)

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario in parte ha realizzato e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli obiettivi degli investimenti sostenibili erano quelli di indirizzare risorse verso imprese che operano sulla base di entrambi i seguenti criteri:

1) rispettare le migliori prassi ambientali e sociali;

2) astenersi dalla produzione di prodotti e servizi che arrecano danni all'ambiente e alla società.

Affinché si possa ritenere che la società beneficiaria di investimenti contribuisca ai predetti obiettivi, essa deve essere un "best performer" all'interno del proprio settore di attività con riguardo ad almeno uno dei fattori ambientali o sociali rilevanti.

La definizione di "best performer" si basa sull'approccio ESG proprietario di Amundi che mira a misurare i risultati ESG delle imprese beneficiarie di investimenti. Per essere considerata "best performer", un'impresa beneficiaria di investimenti deve essere valutata con un rating alto (cioè A, B o C, su una scala di 7 livelli che va da A a G) nell'ambito del proprio settore su almeno uno dei fattori ambientali o sociali considerati rilevanti. I fattori ambientali e sociali rilevanti sono identificati a livello di settore. L'identificazione dei fattori rilevanti si basa sul sistema di analisi ESG di Amundi, che combina dati non finanziari e analisi qualitative dei temi settoriali e di sostenibilità associati. I fattori identificati come rilevanti contribuiscono al calcolo del punteggio ESG complessivo in misura superiore al 10%. Per il settore energetico, ad esempio, i fattori rilevanti sono: emissioni ed energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per un'informativa completa sui settori e i fattori si rimanda all'informativa fornita da Amundi ai sensi dell'art. 4 di SFDR disponibile sul sito www.amundi.it.

Al fine di contribuire ai predetti obiettivi, l'impresa beneficiaria di investimenti non deve essere esposta in misura significativa verso attività non compatibili con essi (quali, ad esempio, tabacco, armamenti, gioco d'azzardo, carbone, aviazione, produzione di carne, produzione di fertilizzanti e pesticidi, produzione di plastiche monouso).

La natura sostenibile di un investimento è valutata a livello di impresa emittente.

I **principali effetti negativi** sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

- ***In che modo gli investimenti sostenibili che il prodotto finanziario in parte ha realizzato non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino danni significativi ("DNSH"), Amundi utilizza due filtri:
Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori universali dei PAI di cui all'Allegato 1, Tabella 1 delle RTS, laddove siano disponibili dati solidi (ad esempio, l'intensità dei gas serra delle società partecipate) attraverso una combinazione di indicatori (ad esempio, l'intensità di carbonio) e di soglie o regole specifiche (ad esempio, che l'intensità di carbonio della società partecipata non appartenga all'ultimo decile del settore).

Amundi comunque considera gli indicatori di specifici PAI nell'ambito della propria politica di esclusione in quanto parte della Politica di Investimento Responsabile di Amundi. Queste esclusioni, che si applicano a monte delle verifiche sopra descritte, riguardano le armi controverse, le violazioni dei principi del Global Compact delle Nazioni Unite, il carbone e il tabacco.

Oltre agli specifici fattori di sostenibilità oggetto della prima verifica, Amundi ha previsto un secondo filtro, che non prende in considerazione i predetti indicatori obbligatori universali dei PAI, al fine di verificare che l'emittente non abbia prestazioni negative in termini di risultato complessivo sulle dimensioni ambientale e sociale, in confronto alle altre società del suo settore,

il che corrisponde un punteggio ambientale e sociale superiore o uguale a E in base al sistema di rating di Amundi.

Gli investimenti sostenibili in cui il prodotto ha investito durante il periodo hanno superato il test di cui sopra.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

  Gli indicatori per gli effetti negativi sono stati presi in considerazione come dettagliato nel primo filtro DNSH di cui sopra:
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori universali dei PAI di cui all'Allegato 1, Tabella 1 delle RTS, laddove siano disponibili dati robusti, per il tramite della combinazione dei seguenti indicatori e delle seguenti specifiche soglie e regole:
  - avere un'intensità di CO2 che non rientra nell'ultimo decile in confronto alle altre società del settore di appartenenza (regola applicata solo con riguardo ai settori a più alta intensità),
  - avere una diversità di genere nel consiglio di amministrazione che non rientra nell'ultimo decile in confronto alle altre società del settore di appartenenza,
  - dare trasparenza di ogni controversia relativa alle condizioni di lavoro e diritti umani,
  - dare trasparenza di ogni controversia relativa alla biodiversità e inquinamento.

  Amundi comunque considera gli indicatori di specifici PAI nell'ambito della propria politica di esclusione in quanto parte della Politica di Investimento Responsabile di Amundi. Queste esclusioni, che si applicano a monte delle verifiche sopra descritte, riguardano le armi controverse, le violazioni dei principi del Global Compact delle Nazioni Unite, il carbone e il tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

  Le Linee guida dell'OCSE per le imprese multinazionali e i Principi guida delle Nazioni Unite su imprese e diritti umani sono stati integrati nella metodologia di assegnazione del punteggio ESG di Amundi. Il sistema di elaborazione dei rating ESG di Amundi valuta gli emittenti utilizzando i dati disponibili forniti da data providers terzi. Ad esempio, il modello prevede un criterio dedicato denominato "Community Involvement & Human Rights" che si applica a tutti i settori in aggiunta ad altri criteri connessi ai diritti umani, tra cui supply chains socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, monitoriamo su base almeno trimestrale questioni controverse quali quelle che riguardano la violazione dei diritti umani. Al manifestarsi di una controversia, gli analisti valutano la situazione ed attribuiscono alla controversia un punteggio (utilizzando la metodologia proprietaria di Amundi) e stabiliscono la migliore linea di condotta. I punteggi delle controversie sono aggiornati trimestralmente al fine di seguirne l'andamento e i risultati dei rimedi risolutori.

La tassonomia dell'UE stabilisce il principio "non arrecare un danno significativo", in base al quale gli investimenti allineati alla tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della tassonomia dell'UE, ed è corredata di criteri specifici dell'Unione.

Il principio "non arrecare un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'Unione per le

attività economiche ecosostenibili. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri dell'Unione per le attività economiche ecosostenibili.

Nessun altro investimento sostenibile deve arrecare un danno significativo agli obiettivi ambientali o sociali.

In che modo questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il Fondo ha preso in considerazione tutti gli indicatori obbligatori universali dei PAI di cui all'Allegato 1, Tabella 1 delle RTS applicabili alla strategia del Fondo attraverso una combinazione di politiche di esclusione (normative e settoriali), l'integrazione del rating ESG nei processi di investimento, il coinvolgimento proattivo nel dialogo con le aziende e le attività di voto:

- Esclusioni: Amundi ha definito regole per operare esclusioni di tipo normativo, settoriale e relative a specifiche attività, che coprono alcuni dei principali indicatori di sostenibilità elencati dal Regolamento (UE) 2019/2088.

- Integrazione dei fattori ESG: Amundi ha adottato standard minimi di integrazione ESG applicati di default a tutti i fondi aperti a gestione attiva (esclusione degli emittenti con rating G e miglior punteggio medio ponderato ESG superiore a quello del parametro di riferimento applicabile). Anche i 38 criteri utilizzati nell'approccio di Amundi alla valutazione ESG sono stati concepiti per tenere conto sia dei principali impatti sui fattori di sostenibilità sia della qualità delle azioni di mitigazione intraprese.

- Engagement: l'engagement è un processo che nel continuo mira ad influenzare le attività e i comportamenti delle società beneficiarie di investimenti. Lo scopo delle attività di engagement può essere ricompreso nelle seguenti due categorie: impegnare un emittente a migliorare le modalità di integrazione delle dimensioni ambientale e sociale, impegnare un emittente a migliorare i suoi impatti sulle questioni ambientali, sociali e legate ai diritti umani o altre questioni sulla sostenibilità che sono rilevanti per la società e l'economia globale.

- Voto: la politica di voto di Amundi risponde a un'analisi olistica di tutte le questioni che sul lungo termine potrebbero influenzare la creazione di valore, ivi inclusi gli aspetti ESG rilevanti. Per maggiori informazioni si rimanda alla Voting Policy di Amundi.

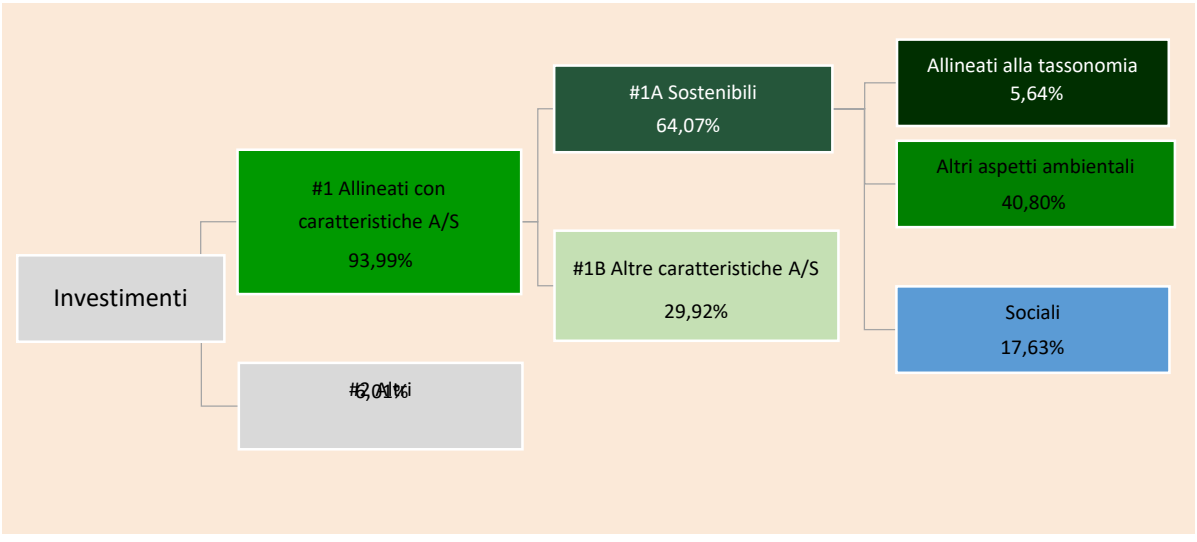
- Monitoraggio delle controversie: Amundi ha sviluppato un sistema di tracciamento delle controversie che si avvale della rilevazione sistematica delle controversie e del loro livello di gravità operata da tre data provider esterni. Questo approccio quantitativo è arricchito da un'approfondita valutazione delle controversie più gravi, condotta dagli analisti ESG, e dalla periodica revisione della loro evoluzione. Questo approccio si applica a tutti i fondi di Amundi.

Per ulteriori informazioni circa il modo in cui sono utilizzati gli indicatori obbligatori universali dei PAI si rimanda all'informativa fornita da Amundi ai sensi dell'art. 4 di SFDR disponibile sul sito www.amundi.it

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che hanno costituito **la quota**

Investimenti di maggiore entità	Settore	Sottosettore	Paese	% di attivi
ENEL SPA	Servizi	Utenze elettriche	Italia	9,69%
UNICREDIT SPA	Finanziari	Banche	Italia	7,28%



maggiore di investimenti del prodotto finanziario durante il periodo di riferimento, ossia: **dal 01/01/2023 al 31/12/2023**

INTESA SANPAOLO	Finanziari	Banche	Italia	5,78%
STMICROELECTRONICS/I	Nuove tecnologie	Semiconduttori e Infrastrutture	Olanda	5,27%
STELLANTIS MILAN	Beni ciclici	Automobili e Componentistica	Olanda	4,96%
AMPLIFON SPA	Farmaceutico	apparecchiature e servizi sanitari	Italia	3,43%
REPLY SPA	Nuove tecnologie	Software e Servizi Informatici	Italia	3,04%
ENI SPA	Energia	Petrolio, gas e combustibili di consumo	Italia	2,96%
FINECOBANK SPA	Finanziari	Banche	Italia	2,82%
PRYSMIAN SPA	Industriale	Beni Capitali	Italia	2,78%
MONCLER SPA	Beni ciclici	Beni di Consumo Durevoli	Italia	2,64%
CAREL INDUSTRIES SPA	Industriale	Beni Capitali	Italia	2,50%
FERRARI NV MILAN	Beni ciclici	Automobili e Componentistica	Olanda	2,31%
TENARIS SA	Energia	Attrezzature e servizi energetici	Lussemburgo	2,09%
SANLORENZO SPA/AMEGLIA	Beni ciclici	Beni di Consumo Durevoli	Italia	2,04%

Qual è stata la quota degli investimenti in materia di sostenibilità?

Qual è stata l'allocazione degli attivi?

L'**allocazione degli attivi** descrive la quota di investimenti in attivi specifici.

#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende gli investimenti rimanenti del prodotto finanziario che non sono allineati con le caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- la sottocategoria **#1A Sostenibili** che contempla gli investimenti sostenibili dal punto di vista ambientale e sociale.
- la sottocategoria **#1B Altre caratteristiche A/S** che contempla gli investimenti allineati con le caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Settore	***Sottosettore***	***% di attivi***

Le **attività allineate alla tassonomia** sono espresse in percentuale di:
- **fatturato** riflette il carattere ecologico attuale delle imprese beneficiarie degli investimenti;
- spese in conto capitale (CapEx) rivelano gli investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, utili per la transizione verso un'economia verde;
- **spese operative (OpEx)** illustrano le attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE[1]?

Il fondo promuove caratteristiche ambientali e sociali. Sebbene il fondo non si sia impegnato a effettuare investimenti in linea con la tassonomia dell'UE, durante il periodo di riferimento il fondo ha investito 5,64% in investimenti sostenibili in linea con la tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione dei cambiamenti climatici della tassonomia dell'UE.

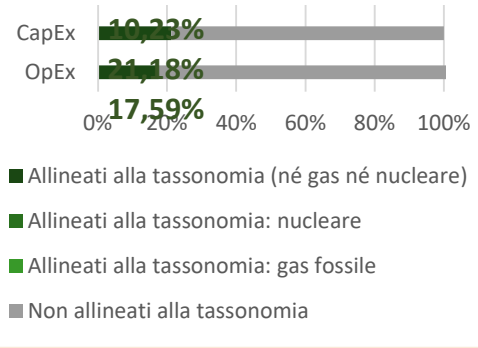
L'allineamento delle imprese beneficiarie degli investimenti agli obiettivi della tassonomia dell'UE sopra menzionati viene misurato utilizzando i dati sul fatturato (o sui ricavi) e/o sull'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo riportata con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terze parti.

Il prodotto finanziario investe in attività connesse al gas fossile e/o all'energia nucleare che sono conformi alla tassonomia dell'UE[1]?

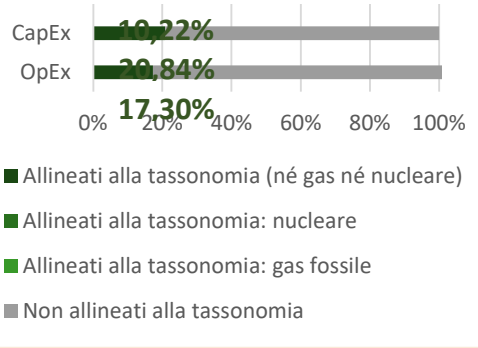
☐ Sì:

☐ Gas fossile ☐ Energia nucleare



☒ No

Non esistevano dati attendibili riguardanti l'allineamento con la tassonomia UE del gas fossile e dell'energia nucleare disponibile nel periodo.



[1] Le attività connesse al gas fossile e/o all'energia nucleare sono conformi alla tassonomia dell'UE solo se contribuiscono all'azione di contenimento dei cambiamenti climatici («mitigazione dei cambiamenti climatici») e non arrecano un danno significativo a nessuno degli obiettivi della tassonomia dell'UE - cfr. nota esplicativa sul margine sinistro. I criteri completi riguardanti le attività economiche connesse al gas fossile e all'energia nucleare che sono conformi alla tassonomia dell'UE sono stabiliti nel regolamento delegato (UE) 2022/1214 della Commissione.

I due grafici che seguono mostrano in verde la percentuale di investimenti che erano allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Allineamento degli investimenti alla tassonomia **comprese le obbligazioni sovrane***

2. Allineamento degli investimenti alla tassonomia **escluse le obbligazioni sovrane***

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane*

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le **attività di transizione** sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

- ***Qual era la quota degli investimenti effettuati in attività transitorie e abilitanti?***

Al 31/12/2023, utilizzando come indicatore i dati sul fatturato e/o sull'utilizzo dei proventi dei green bond, la quota di investimento del fondo in attività transitorie era pari al 0,00% e la quota di investimento in attività abilitanti era pari al 5,76%. La percentuale di allineamento degli investimenti del fondo riportata con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terze parti.

- ***Qual è l'esito del raffronto della percentuale di investimenti che erano allineati alla tassonomia dell'UE rispetto ai precedenti periodi di riferimento?***

Nel periodo precedente l'allineamento tassonomico non era stato riportato perché all'epoca non erano ancora disponibili dati attendibili riportati.

Qual era la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili a norma del regolamento (UE) 2020/852.

Alla fine del periodo, la quota di investimenti sostenibili con obiettivo ambientale non allineati alla tassonomia era **40,80%**
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del Regolamento sull'informativa di sostenibilità dei servizi finanziari (SFDR) tuttavia parte delle attività che svolgono non sono allineate con gli standard della tassonomia dell'UE o non sono ancora disponibili dati su tali attività per eseguire una valutazione secondo la tassonomia dell'UE.

Qual era la quota di investimenti socialmente sostenibili?

Alla fine del periodo, la quota di investimenti socialmente sostenibili era 17,63%.

Quali investimenti erano compresi nella categoria "Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

Nella voce "#2 Altri" sono inclusi liquidità e altri strumenti finalizzati alla gestione della liquidità e alla gestione dei rischi di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in vigore salvaguardie ambientali e sociali minime attraverso lo screening delle controversie rispetto ai principi del Global Compact delle Nazioni Unite. Potrebbero essere inclusi anche titoli privi di rating ESG per i quali non erano disponibili i dati necessari a misurare il rispetto delle caratteristiche ambientali o sociali.

Quali azioni sono state adottate per soddisfare le caratteristiche ambientali e/o sociali durante il periodo di riferimento?

Gli indicatori di sostenibilità sono continuamente resi disponibili nel sistema di gestione di portafogli, consentendo ai gestori di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono integrati nel quadro di controllo di Amundi, con responsabilità ripartite tra il primo livello di controlli effettuati dai team di investimento e il secondo livello di controlli effettuati dai team addetti all'analisi del rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base costante.

Inoltre, la Politica di investimento responsabile di Amundi definisce un approccio attivo al coinvolgimento che promuove il dialogo con le società beneficiarie degli investimenti, comprese quelle incluse nel portafoglio di questo prodotto. La nostra Relazione annuale sull'impegno, disponibile al sito https://about.amundi.com/esg-documentation, fornisce una rendicontazione dettagliata su tale impegno e sui rispettivi risultati

Qual è stata la prestazione di questo prodotto finanziario rispetto all'indice di riferimento?

Gli **indici di riferimento** sono indici atti a misurare se il prodotto finanziario rispetti le caratteristiche ambientali o sociali che promuove.

Questo prodotto non ha un indice di riferimento ESG

- ***In che modo l'indice di riferimento differisce da un indice generale di mercato?***

Questo prodotto non ha un indice di riferimento ESG

- ***Qual è stata la prestazione di questo prodotto finanziario in relazione agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento con le caratteristiche ambientali o sociali promosse?***

Questo prodotto non ha un indice di riferimento ESG

- ***Qual è stata la prestazione di questo prodotto finanziario rispetto all'indice di riferimento?***

Questo prodotto non ha un indice di riferimento ESG

La seguente informativa SFDR non è assoggettata a revisione contabile da parte della società di revisione, PricewaterhouseCoopers S.p.A.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, paragrafi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI OBBLIGAZIONARIO BREVE TERMINE

Identificativo della persona giuridica: 529900DT4NGJ6I181187

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **tassonomia dell'UE** è un sistema di classificazione istituito dal regolamento (UE) 2020/852, che stabilisce un elenco di attività economiche ecosostenibili. Tale regolamento non

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

- ☐ **Sì**
- ☒ **No**

☐ Ha effettuato **investimenti sostenibili con un obiettivo ambientale: _____%**

- ☐ in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
- ☐ in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE

☒ Ha **promosso caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, aveva una quota del (19,81% _____ di investimenti sostenibili

- ☐ con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
- ☐ con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
- ☐ con un obiettivo sociale

☐ Ha effettuato **investimenti sostenibili con un obiettivo sociale: _____%**

☐ Ha promosso caratteristiche A/S, ma **non ha effettuato alcun investimento sostenibile**

stabilisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha costantemente promosso caratteristiche ambientali e/o sociali al fine di ottenere un punteggio ESG più elevato rispetto al punteggio ESG del suo universo di investimento rappresentato da **ICE BOFA 0-1 YEAR US CORPORATE INDEX**. Nel determinare il punteggio ESG dell'universo d'investimento, la performance ESG è stata costantemente valutata mettendo a confronto la performance media di un titolo con quella del settore di appartenenza del rispettivo emittente, in relazione a ciascuna delle tre dimensioni ambientale, sociale e di governance.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

Qual è stata la prestazione degli indicatori di sostenibilità?

Amundi ha messo a punto un proprio processo di assegnazione dei rating ESG basato sull'approccio “best in class”.

I rating applicati a ciascun settore industriale mirano a valutare gli emittenti tenendo conto delle dinamiche specifiche del loro settore di appartenenza.

Per maggiori dettagli si rimanda alla Politica di investimento responsabile disponibile sul sito internet www.amundi.it.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del Prodotto che viene misurato rispetto al punteggio ESG del parametro di riferimento.

Alla fine del periodo:

- la media ponderata del rating ESG del portafoglio è 0.807 (C).

- la media ponderata del rating ESG dell' universo di investimento è 0 (D).

Il rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio quantitativo ESG tradotto in sette gradi, che vanno da A (l'universo con i punteggi migliori) a G (il peggiore). Nella scala di Amundi ESG Rating, i titoli appartenenti alla lista di esclusione corrispondono a una G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri rilevanti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per lo sviluppo del capitale umano e il rispetto dei diritti umani in

generale;

- Dimensione di governance: Valuta la capacità dell'emittente di garantire le basi per un efficace quadro di corporate governance e di generare valore nel lungo periodo.

La metodologia applicata da Amundi ESG utilizza 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o specifici del settore, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione di un emittente. I rating ESG di Amundi possono essere espressi globalmente sulle tre dimensioni E, S e G o singolarmente su qualsiasi fattore ambientale o sociale.

- ***… e rispetto ai periodi precedenti?***

Alla fine del periodo precedente la media ponderata del rating ESG del portafoglio era C (0.792) e la media ponderata del rating ESG dell' universo di investimento era D+ (0)

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario in parte ha realizzato e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli obiettivi degli investimenti sostenibili erano quelli di indirizzare risorse verso imprese che operano sulla base di entrambi i seguenti criteri:

1) rispettare le migliori prassi ambientali e sociali;

2) astenersi dalla produzione di prodotti e servizi che arrecano danni all'ambiente e alla società.

Affinché si possa ritenere che la società beneficiaria di investimenti contribuisca ai predetti obiettivi, essa deve essere un "best performer" all'interno del proprio settore di attività con riguardo ad almeno uno dei fattori ambientali o sociali rilevanti.

La definizione di "best performer" si basa sull'approccio ESG proprietario di Amundi che mira a misurare i risultati ESG delle imprese beneficiarie di investimenti. Per essere considerata "best performer", un'impresa beneficiaria di investimenti deve essere valutata con un rating alto (cioè A, B o C, su una scala di 7 livelli che va da A a G) nell'ambito del proprio settore su almeno uno dei fattori ambientali o sociali considerati rilevanti. I fattori ambientali e sociali rilevanti sono identificati a livello di settore. L'identificazione dei fattori rilevanti si basa sul sistema di analisi ESG di Amundi, che combina dati non finanziari e analisi qualitative dei temi settoriali e di sostenibilità associati. I fattori identificati come rilevanti contribuiscono al calcolo del punteggio ESG complessivo in misura superiore al 10%. Per il settore energetico, ad esempio, i fattori rilevanti sono: emissioni ed energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per un'informativa completa sui settori e i fattori si rimanda all'informativa fornita da Amundi ai sensi dell'art. 4 di SFDR disponibile sul sito www.amundi.it.

Al fine di contribuire ai predetti obiettivi, l'impresa beneficiaria di investimenti non deve essere esposta in misura significativa verso attività non compatibili con essi (quali, ad esempio, tabacco, armamenti, gioco d'azzardo, carbone, aviazione, produzione di carne, produzione di fertilizzanti e pesticidi, produzione di plastiche monouso).

La natura sostenibile di un investimento è valutata a livello di impresa emittente.

I **principali effetti negativi** sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di

- ***In che modo gli investimenti sostenibili che il prodotto finanziario in parte ha realizzato non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

Per garantire che gli investimenti sostenibili non arrechino danni significativi ("DNSH"), Amundi utilizza due filtri:

sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori universali dei PAI di cui all'Allegato 1, Tabella 1 delle RTS, laddove siano disponibili dati solidi (ad esempio, l'intensità dei gas serra delle società partecipate) attraverso una combinazione di indicatori (ad esempio, l'intensità di carbonio) e di soglie o regole specifiche (ad esempio, che l'intensità di carbonio della società partecipata non appartenga all'ultimo decile del settore).

Amundi comunque considera gli indicatori di specifici PAI nell'ambito della propria politica di esclusione in quanto parte della Politica di Investimento Responsabile di Amundi. Queste esclusioni, che si applicano a monte delle verifiche sopra descritte, riguardano le armi controverse, le violazioni dei principi del Global Compact delle Nazioni Unite, il carbone e il tabacco.

Oltre agli specifici fattori di sostenibilità oggetto della prima verifica, Amundi ha previsto un secondo filtro, che non prende in considerazione i predetti indicatori obbligatori universali dei PAI, al fine di verificare che l'emittente non abbia prestazioni negative in termini di risultato complessivo sulle dimensioni ambientale e sociale, in confronto alle altre società del suo settore, il che corrisponde un punteggio ambientale e sociale superiore o uguale a E in base al sistema di rating di Amundi.

Gli investimenti sostenibili in cui il prodotto ha investito durante il periodo hanno superato il test di cui sopra.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

  Gli indicatori per gli effetti negativi sono stati presi in considerazione come dettagliato nel primo filtro DNSH di cui sopra:
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori universali dei PAI di cui all'Allegato 1, Tabella 1 delle RTS, laddove siano disponibili dati robusti, per il tramite della combinazione dei seguenti indicatori e delle seguenti specifiche soglie e regole:
  - avere un'intensità di CO2 che non rientra nell'ultimo decile in confronto alle altre società del settore di appartenenza (regola applicata solo con riguardo ai settori a più alta intensità),
  - avere una diversità di genere nel consiglio di amministrazione che non rientra nell'ultimo decile in confronto alle altre società del settore di appartenenza,
  - dare trasparenza di ogni controversia relativa alle condizioni di lavoro e diritti umani,
  - dare trasparenza di ogni controversia relativa alla biodiversità e inquinamento.

  Amundi comunque considera gli indicatori di specifici PAI nell'ambito della propria politica di esclusione in quanto parte della Politica di Investimento Responsabile di Amundi. Queste esclusioni, che si applicano a monte delle verifiche sopra descritte, riguardano le armi controverse, le violazioni dei principi del Global Compact delle Nazioni Unite, il carbone e il tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

  Le Linee guida dell'OCSE per le imprese multinazionali e i Principi guida delle Nazioni Unite su imprese e diritti umani sono stati integrati nella metodologia di assegnazione del punteggio ESG di Amundi. Il sistema di elaborazione dei rating ESG di Amundi valuta gli emittenti utilizzando i dati disponibili forniti da data providers terzi. Ad esempio, il modello prevede un criterio dedicato denominato "Community Involvement & Human Rights" che si applica a tutti i settori in aggiunta ad altri criteri connessi ai diritti umani, tra cui supply chains socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, monitoriamo su base almeno trimestrale questioni controverse quali quelle che

riguardano la violazione dei diritti umani. Al manifestarsi di una controversia, gli analisti valutano la situazione ed attribuiscono alla controversia un punteggio (utilizzando la metodologia proprietaria di Amundi) e stabiliscono la migliore linea di condotta. I punteggi delle controversie sono aggiornati trimestralmente al fine di seguirne l'andamento e i risultati dei rimedi risolutori.

La tassonomia dell'UE stabilisce il principio "non arrecare un danno significativo", in base al quale gli investimenti allineati alla tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della tassonomia dell'UE, ed è corredata di criteri specifici dell'Unione.

Il principio "non arrecare un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'Unione per le attività economiche ecosostenibili. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri dell'Unione per le attività economiche ecosostenibili.

Nessun altro investimento sostenibile deve arrecare un danno significativo agli obiettivi ambientali o sociali.

In che modo questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il Fondo ha preso in considerazione tutti gli indicatori obbligatori universali dei PAI di cui all'Allegato 1, Tabella 1 delle RTS applicabili alla strategia del Fondo attraverso una combinazione di politiche di esclusione (normative e settoriali), l'integrazione del rating ESG nei processi di investimento, il coinvolgimento proattivo nel dialogo con le aziende e le attività di voto:

- Esclusioni: Amundi ha definito regole per operare esclusioni di tipo normativo, settoriale e relative a specifiche attività, che coprono alcuni dei principali indicatori di sostenibilità elencati dal Regolamento (UE) 2019/2088.

- Integrazione dei fattori ESG: Amundi ha adottato standard minimi di integrazione ESG applicati di default a tutti i fondi aperti a gestione attiva (esclusione degli emittenti con rating G e miglior punteggio medio ponderato ESG superiore a quello del parametro di riferimento applicabile). Anche i 38 criteri utilizzati nell'approccio di Amundi alla valutazione ESG sono stati concepiti per tenere conto sia dei principali impatti sui fattori di sostenibilità sia della qualità delle azioni di mitigazione intraprese.

- Engagement: l'engagement è un processo che nel continuo mira ad influenzare le attività e i comportamenti delle società beneficiarie di investimenti. Lo scopo delle attività di engagement può essere ricompreso nelle seguenti due categorie: impegnare un emittente a migliorare le modalità di integrazione delle dimensioni ambientale e sociale, impegnare un emittente a migliorare i suoi impatti sulle questioni ambientali, sociali e legate ai diritti umani o altre questioni sulla sostenibilità che sono rilevanti per la società e l'economia globale.

- Voto: la politica di voto di Amundi risponde a un'analisi olistica di tutte le questioni che sul lungo termine potrebbero influenzare la creazione di valore, ivi inclusi gli aspetti ESG rilevanti. Per maggiori informazioni si rimanda alla Voting Policy di Amundi.

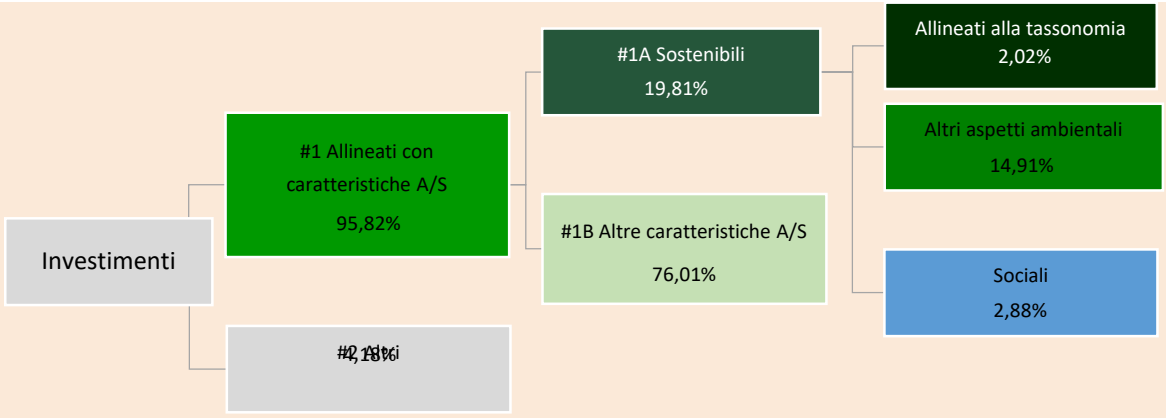
- Monitoraggio delle controversie: Amundi ha sviluppato un sistema di tracciamento delle controversie che si avvale della rilevazione sistematica delle controversie e del loro livello di gravità operata da tre data provider esterni. Questo approccio quantitativo è arricchito da

un’approfondita valutazione delle controversie più gravi, condotta dagli analisti ESG, e dalla periodica revisione della loro evoluzione. Questo approccio si applica a tutti i fondi di Amundi.

Per ulteriori informazioni circa il modo in cui sono utilizzati gli indicatori obbligatori universali dei PAI si rimanda all’informativa fornita da Amundi ai sensi dell’art. 4 di SFDR disponibile sul sito www.amundi.it

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che hanno costituito **la quota maggiore di investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **dal 01/01/2023 al 31/12/2023**



Investimenti di maggiore entità	Settore	Sottosettore	Paese	% di attivi

Qual è stata la quota degli investimenti in materia di sostenibilità?

Qual è stata l'allocazione degli attivi?

L'**allocazione degli attivi** descrive la quota di investimenti in attivi specifici.

#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende gli investimenti rimanenti del prodotto finanziario che non sono allineati con le caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- la sottocategoria **#1A Sostenibili** che contempla gli investimenti sostenibili dal punto di vista ambientale e sociale.
- la sottocategoria **#1B Altre caratteristiche A/S** che contempla gli investimenti allineati con le caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

- ***In quali settori economici sono stati effettuati gli investimenti?***

Settore	***Sottosettore***	***% di attivi***
Governativi	*Governativi*	*54,77%*
Corporate	*Banche*	*23,08%*
Finanziari	*Fondi comuni di investimento*	*9,89%*
Corporate	*Trasporti*	*3,13%*
Corporate	*Finanziari*	*2,80%*
Corporate	*Beni voluttuari*	*2,44%*
Corporate	*Beni di prima necessita'*	*0,67%*
Forex	*Forex*	*0,01%*
Altro	*Altro*	*-0,48%*
Liquidità	*Liquidità*	*3,70%*

Le **attività allineate alla tassonomia** sono espresse in percentuale di:
- **fatturato** riflette il carattere ecologico attuale delle imprese beneficiarie degli investimenti;
- spese in conto capitale (CapEx) rivelano gli investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, utili per la transizione verso un'economia verde;
- **spese operative (OpEx)** illustrano le attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE[1]?

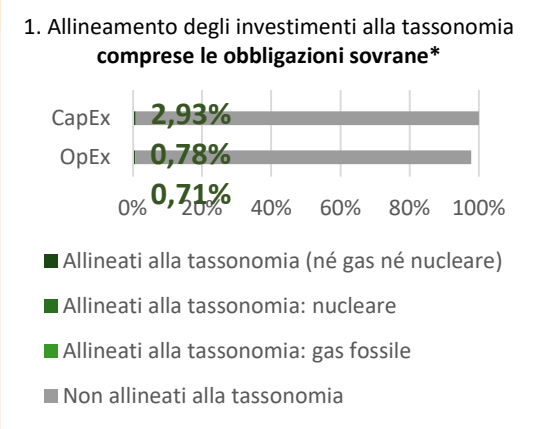
Il fondo promuove caratteristiche ambientali e sociali. Sebbene il fondo non si sia impegnato a effettuare investimenti in linea con la tassonomia dell'UE, durante il periodo di riferimento il fondo ha investito 2,02% in investimenti sostenibili in linea con la tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione dei cambiamenti climatici della tassonomia dell'UE.

L'allineamento delle imprese beneficiarie degli investimenti agli obiettivi della tassonomia dell'UE sopra menzionati viene misurato utilizzando i dati sul fatturato (o sui ricavi) e/o sull'utilizzo dei proventi dei green bond.

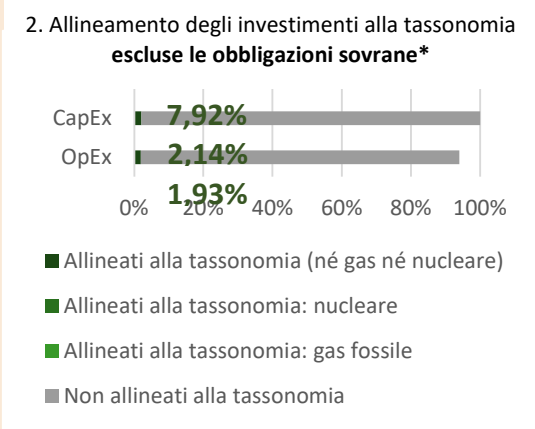
La percentuale di allineamento degli investimenti del fondo riportata con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terze parti.

Il prodotto finanziario investe in attività connesse al gas fossile e/o all'energia nucleare che sono conformi alla tassonomia dell'UE[1]?

☐ Sì:



☐ Gas fossile ☐ Energia nucleare



☒ No

Non esistevano dati attendibili riguardanti l'allineamento con la tassonomia UE del gas fossile e dell'energia nucleare disponibile nel periodo.

[1] Le attività connesse al gas fossile e/o all'energia nucleare sono conformi alla tassonomia dell'UE solo se contribuiscono all'azione di contenimento dei cambiamenti climatici («mitigazione dei cambiamenti climatici») e non arrecano un danno significativo a nessuno degli obiettivi della tassonomia dell'UE - cfr. nota esplicativa sul margine sinistro. I criteri completi riguardanti le attività economiche connesse al gas fossile e all'energia nucleare che sono conformi alla tassonomia dell'UE sono stabiliti nel regolamento delegato (UE) 2022/1214 della Commissione.

I due grafici che seguono mostrano in verde la percentuale di investimenti che erano allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane*

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le **attività di transizione** sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

- ***Qual era la quota degli investimenti effettuati in attività transitorie e abilitanti?***

Al 31/12/2023, utilizzando come indicatore i dati sul fatturato e/o sull'utilizzo dei proventi dei green bond, la quota di investimento del fondo in attività transitorie era pari al 0,00% e la quota di investimento in attività abilitanti era pari al 0,09%. La percentuale di allineamento degli investimenti del fondo riportata con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terze parti.

- ***Qual è l'esito del raffronto della percentuale di investimenti che erano allineati alla tassonomia dell'UE rispetto ai precedenti periodi di riferimento?***

Nel periodo precedente l'allineamento tassonomico non era stato riportato perché all'epoca non erano ancora disponibili dati attendibili riportati.

Qual era la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili a norma del regolamento (UE) 2020/852.

Alla fine del periodo, la quota di investimenti sostenibili con obiettivo ambientale non allineati alla tassonomia era **14,91%**
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del Regolamento sull'informativa di sostenibilità dei servizi finanziari (SFDR) tuttavia parte delle attività che svolgono non sono allineate con gli standard della tassonomia dell'UE o non sono ancora disponibili dati su tali attività per eseguire una valutazione secondo la tassonomia dell'UE.

Qual era la quota di investimenti socialmente sostenibili?

Alla fine del periodo, la quota di investimenti socialmente sostenibili era 2,88%.

Quali investimenti erano compresi nella categoria "Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

Nella voce "#2 Altri" sono inclusi liquidità e altri strumenti finalizzati alla gestione della liquidità e alla gestione dei rischi di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in vigore salvaguardie ambientali e sociali minime attraverso lo screening delle controversie rispetto ai principi del Global Compact delle Nazioni Unite. Potrebbero essere inclusi anche titoli privi di rating ESG per i quali non erano disponibili i dati necessari a misurare il rispetto delle caratteristiche ambientali o sociali.

Quali azioni sono state adottate per soddisfare le caratteristiche ambientali e/o sociali durante il periodo di riferimento?

Gli indicatori di sostenibilità sono continuamente resi disponibili nel sistema di gestione di portafogli, consentendo ai gestori di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono integrati nel quadro di controllo di Amundi, con responsabilità ripartite tra il primo livello di controlli effettuati dai team di investimento e il secondo livello di controlli effettuati dai team addetti all'analisi del rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base costante.

Inoltre, la Politica di investimento responsabile di Amundi definisce un approccio attivo al coinvolgimento che promuove il dialogo con le società beneficiarie degli investimenti, comprese quelle incluse nel portafoglio di questo prodotto. La nostra Relazione annuale sull'impegno, disponibile al sito https://about.amundi.com/esg-documentation, fornisce una rendicontazione dettagliata su tale impegno e sui rispettivi risultati

Qual è stata la prestazione di questo prodotto finanziario rispetto all'indice di riferimento?

Gli **indici di riferimento** sono indici atti a misurare se il prodotto finanziario rispetti le caratteristiche ambientali o sociali che promuove.

Questo prodotto non ha un indice di riferimento ESG

- ***In che modo l'indice di riferimento differisce da un indice generale di mercato?***

Questo prodotto non ha un indice di riferimento ESG

Questo prodotto non ha un indice di riferimento ESG

La seguente informativa SFDR non è assoggettata a revisione contabile da parte della società di revisione, PricewaterhouseCoopers S.p.A.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, paragrafi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI PRIMO INVESTIMENTO

Identificativo della persona giuridica: 549300JYIC6DYO8MJT41

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **tassonomia dell'UE** è un sistema di classificazione istituito dal regolamento (UE) 2020/852, che stabilisce un elenco di attività economiche ecosostenibili. Tale

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

- [ ] **Sì**
- [X] **No**

- [ ] Ha effettuato **investimenti sostenibili con un obiettivo ambientale: _____%**
  - [ ] in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
  - [ ] in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
- [X] Ha **promosso caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, aveva una quota del 30,89% di investimenti sostenibili
  - [ ] con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
  - [ ] con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
  - [ ] con un obiettivo sociale

regolamento non stabilisce un elenco di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

☐ Ha effettuato **investimenti sostenibili con un obiettivo sociale: _____%**

☐ Ha promosso caratteristiche A/S, ma **non ha effettuato alcun investimento sostenibile**

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha costantemente promosso caratteristiche ambientali e/o sociali al fine di ottenere un punteggio ESG più elevato rispetto al punteggio ESG del suo universo di investimento rappresentato da **ICE BOFA 0-1 YEAR US CORPORATE INDEX**. Nel determinare il punteggio ESG dell'universo d'investimento, la performance ESG è stata costantemente valutata mettendo a confronto la performance media di un titolo con quella del settore di appartenenza del rispettivo emittente, in relazione a ciascuna delle tre dimensioni ambientale, sociale e di governance.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

Qual è stata la prestazione degli indicatori di sostenibilità?

Amundi ha messo a punto un proprio processo di assegnazione dei rating ESG basato sull'approccio “best in class”.

I rating applicati a ciascun settore industriale mirano a valutare gli emittenti tenendo conto delle dinamiche specifiche del loro settore di appartenenza.

Per maggiori dettagli si rimanda alla Politica di investimento responsabile disponibile sul sito internet www.amundi.it.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del Prodotto che viene misurato rispetto al punteggio ESG del parametro di riferimento.

Alla fine del periodo:

- la media ponderata del rating ESG del portafoglio è 0.71 (C).

- la media ponderata del rating ESG dell' universo di investimento è 0 (D).

Il rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio quantitativo ESG tradotto in sette gradi, che vanno da A (l'universo con i punteggi migliori) a G (il peggiore). Nella scala di Amundi ESG Rating, i titoli appartenenti alla lista di esclusione corrispondono a una G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri rilevanti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la

strategia dell'emittente per lo sviluppo del capitale umano e il rispetto dei diritti umani in generale;

- Dimensione di governance: Valuta la capacità dell'emittente di garantire le basi per un efficace quadro di corporate governance e di generare valore nel lungo periodo.

La metodologia applicata da Amundi ESG utilizza 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o specifici del settore, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione di un emittente. I rating ESG di Amundi possono essere espressi globalmente sulle tre dimensioni E, S e G o singolarmente su qualsiasi fattore ambientale o sociale.

- ***… e rispetto ai periodi precedenti?***

Alla fine del periodo precedente la media ponderata del rating ESG del portafoglio era C (0.644) e la media ponderata del rating ESG dell' universo di investimento era D+ (0)

- ***Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario in parte ha realizzato e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?***

Gli obiettivi degli investimenti sostenibili erano quelli di indirizzare risorse verso imprese che operano sulla base di entrambi i seguenti criteri:

1) rispettare le migliori prassi ambientali e sociali;

2) astenersi dalla produzione di prodotti e servizi che arrecano danni all'ambiente e alla società.

Affinché si possa ritenere che la società beneficiaria di investimenti contribuisca ai predetti obiettivi, essa deve essere un "best performer" all'interno del proprio settore di attività con riguardo ad almeno uno dei fattori ambientali o sociali rilevanti.

La definizione di "best performer" si basa sull'approccio ESG proprietario di Amundi che mira a misurare i risultati ESG delle imprese beneficiarie di investimenti. Per essere considerata "best performer", un'impresa beneficiaria di investimenti deve essere valutata con un rating alto (cioè A, B o C, su una scala di 7 livelli che va da A a G) nell'ambito del proprio settore su almeno uno dei fattori ambientali o sociali considerati rilevanti. I fattori ambientali e sociali rilevanti sono identificati a livello di settore. L'identificazione dei fattori rilevanti si basa sul sistema di analisi ESG di Amundi, che combina dati non finanziari e analisi qualitative dei temi settoriali e di sostenibilità associati. I fattori identificati come rilevanti contribuiscono al calcolo del punteggio ESG complessivo in misura superiore al 10%. Per il settore energetico, ad esempio, i fattori rilevanti sono: emissioni ed energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per un'informativa completa sui settori e i fattori si rimanda all'informativa fornita da Amundi ai sensi dell'art. 4 di SFDR disponibile sul sito www.amundi.it.

Al fine di contribuire ai predetti obiettivi, l'impresa beneficiaria di investimenti non deve essere esposta in misura significativa verso attività non compatibili con essi (quali, ad esempio, tabacco, armamenti, gioco d'azzardo, carbone, aviazione, produzione di carne, produzione di fertilizzanti e pesticidi, produzione di plastiche monouso).

La natura sostenibile di un investimento è valutata a livello di impresa emittente.

I **principali effetti negativi** sono gli effetti negativi più significativi delle decisioni di investimento sui

- ***In che modo gli investimenti sostenibili che il prodotto finanziario in parte ha realizzato non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?***

fattori di sostenibilità relativi a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

Per garantire che gli investimenti sostenibili non arrechino danni significativi ("DNSH"), Amundi utilizza due filtri:

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori universali dei PAI di cui all'Allegato 1, Tabella 1 delle RTS, laddove siano disponibili dati solidi (ad esempio, l'intensità dei gas serra delle società partecipate) attraverso una combinazione di indicatori (ad esempio, l'intensità di carbonio) e di soglie o regole specifiche (ad esempio, che l'intensità di carbonio della società partecipata non appartenga all'ultimo decile del settore).

Amundi comunque considera gli indicatori di specifici PAI nell'ambito della propria politica di esclusione in quanto parte della Politica di Investimento Responsabile di Amundi. Queste esclusioni, che si applicano a monte delle verifiche sopra descritte, riguardano le armi controverse, le violazioni dei principi del Global Compact delle Nazioni Unite, il carbone e il tabacco.

Oltre agli specifici fattori di sostenibilità oggetto della prima verifica, Amundi ha previsto un secondo filtro, che non prende in considerazione i predetti indicatori obbligatori universali dei PAI, al fine di verificare che l'emittente non abbia prestazioni negative in termini di risultato complessivo sulle dimensioni ambientale e sociale, in confronto alle altre società del suo settore, il che corrisponde un punteggio ambientale e sociale superiore o uguale a E in base al sistema di rating di Amundi.

Gli investimenti sostenibili in cui il prodotto ha investito durante il periodo hanno superato il test di cui sopra.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

  Gli indicatori per gli effetti negativi sono stati presi in considerazione come dettagliato nel primo filtro DNSH di cui sopra:
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori universali dei PAI di cui all'Allegato 1, Tabella 1 delle RTS, laddove siano disponibili dati robusti, per il tramite della combinazione dei seguenti indicatori e delle seguenti specifiche soglie e regole:
  - avere un'intensità di CO2 che non rientra nell'ultimo decile in confronto alle altre società del settore di appartenenza (regola applicata solo con riguardo ai settori a più alta intensità),
  - avere una diversità di genere nel consiglio di amministrazione che non rientra nell'ultimo decile in confronto alle altre società del settore di appartenenza,
  - dare trasparenza di ogni controversia relativa alle condizioni di lavoro e diritti umani,
  - dare trasparenza di ogni controversia relativa alla biodiversità e inquinamento.

  Amundi comunque considera gli indicatori di specifici PAI nell'ambito della propria politica di esclusione in quanto parte della Politica di Investimento Responsabile di Amundi. Queste esclusioni, che si applicano a monte delle verifiche sopra descritte, riguardano le armi controverse, le violazioni dei principi del Global Compact delle Nazioni Unite, il carbone e il tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

  Le Linee guida dell'OCSE per le imprese multinazionali e i Principi guida delle Nazioni Unite su imprese e diritti umani sono stati integrati nella metodologia di assegnazione del punteggio ESG di Amundi. Il sistema di elaborazione dei rating ESG di Amundi valuta gli emittenti utilizzando i dati disponibili forniti da data providers terzi. Ad esempio, il modello prevede un criterio dedicato denominato "Community Involvement & Human Rights" che si applica a tutti i settori in aggiunta ad altri criteri connessi ai diritti umani,

tra cui supply chains socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, monitoriamo su base almeno trimestrale questioni controverse quali quelle che riguardano la violazione dei diritti umani. Al manifestarsi di una controversia, gli analisti valutano la situazione ed attribuiscono alla controversia un punteggio (utilizzando la metodologia proprietaria di Amundi) e stabiliscono la migliore linea di condotta. I punteggi delle controversie sono aggiornati trimestralmente al fine di seguirne l'andamento e i risultati dei rimedi risolutori.

La tassonomia dell'UE stabilisce il principio "non arrecare un danno significativo", in base al quale gli investimenti allineati alla tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della tassonomia dell'UE, ed è corredata di criteri specifici dell'Unione.

Il principio "non arrecare un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'Unione per le attività economiche ecosostenibili. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri dell'Unione per le attività economiche ecosostenibili.

Nessun altro investimento sostenibile deve arrecare un danno significativo agli obiettivi ambientali o sociali.

In che modo questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il Fondo ha preso in considerazione tutti gli indicatori obbligatori universali dei PAI di cui all'Allegato 1, Tabella 1 delle RTS applicabili alla strategia del Fondo attraverso una combinazione di politiche di esclusione (normative e settoriali), l'integrazione del rating ESG nei processi di investimento, il coinvolgimento proattivo nel dialogo con le aziende e le attività di voto:

- Esclusioni: Amundi ha definito regole per operare esclusioni di tipo normativo, settoriale e relative a specifiche attività, che coprono alcuni dei principali indicatori di sostenibilità elencati dal Regolamento (UE) 2019/2088.

- Integrazione dei fattori ESG: Amundi ha adottato standard minimi di integrazione ESG applicati di default a tutti i fondi aperti a gestione attiva (esclusione degli emittenti con rating G e miglior punteggio medio ponderato ESG superiore a quello del parametro di riferimento applicabile). Anche i 38 criteri utilizzati nell'approccio di Amundi alla valutazione ESG sono stati concepiti per tenere conto sia dei principali impatti sui fattori di sostenibilità sia della qualità delle azioni di mitigazione intraprese.

- Engagement: l'engagement è un processo che nel continuo mira ad influenzare le attività e i comportamenti delle società beneficiarie di investimenti. Lo scopo delle attività di engagement può essere ricompreso nelle seguenti due categorie: impegnare un emittente a migliorare le modalità di integrazione delle dimensioni ambientale e sociale, impegnare un emittente a migliorare i suoi impatti sulle questioni ambientali, sociali e legate ai diritti umani o altre questioni sulla sostenibilità che sono rilevanti per la società e l'economia globale.

- Voto: la politica di voto di Amundi risponde a un'analisi olistica di tutte le questioni che sul lungo termine potrebbero influenzare la creazione di valore, ivi inclusi gli aspetti ESG rilevanti. Per maggiori informazioni si rimanda alla Voting Policy di Amundi.

- Monitoraggio delle controversie: Amundi ha sviluppato un sistema di tracciamento delle controversie che si avvale della rilevazione sistematica delle controversie e del loro livello di gravità operata da tre data provider esterni. Questo approccio quantitativo è arricchito da

un’approfondita valutazione delle controversie più gravi, condotta dagli analisti ESG, e dalla periodica revisione della loro evoluzione. Questo approccio si applica a tutti i fondi di Amundi.

Per ulteriori informazioni circa il modo in cui sono utilizzati gli indicatori obbligatori universali dei PAI si rimanda all’informativa fornita da Amundi ai sensi dell’art. 4 di SFDR disponibile sul sito www.amundi.it

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che hanno costituito **la quota maggiore di investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **dal 01/01/2023 al 31/12/2023**

Le **attività allineate alla tassonomia** sono espresse in percentuale di:
- **fatturato** riflette il carattere ecologico attuale delle imprese beneficiarie degli investimenti;
- spese in conto capitale (CapEx) rivelano gli investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, utili per la transizione verso un'economia verde;
- **spese operative (OpEx)** illustrano le attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE[1]?

Il fondo promuove caratteristiche ambientali e sociali. Sebbene il fondo non si sia impegnato a effettuare investimenti in linea con la tassonomia dell'UE, durante il periodo di riferimento il fondo ha investito 6,31% in investimenti sostenibili in linea con la tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione dei cambiamenti climatici della tassonomia dell'UE.

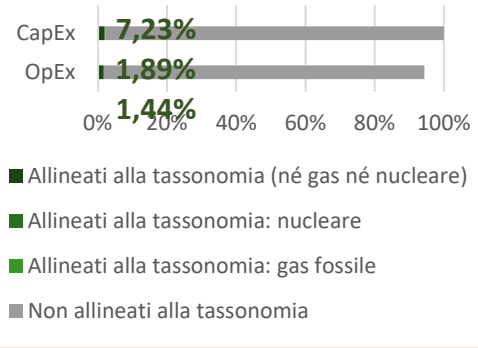
L'allineamento delle imprese beneficiarie degli investimenti agli obiettivi della tassonomia dell'UE sopra menzionati viene misurato utilizzando i dati sul fatturato (o sui ricavi) e/o sull'utilizzo dei proventi dei green bond.

La percentuale di allineamento degli investimenti del fondo riportata con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terze parti.

Il prodotto finanziario investe in attività connesse al gas fossile e/o all'energia nucleare che sono conformi alla tassonomia dell'UE[1]?

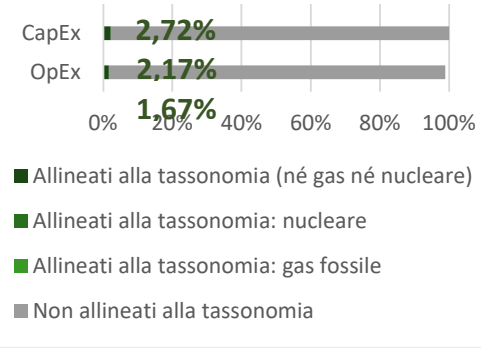
☐ Sì:

☐ Gas fossile ☐ Energia nucleare



☒ No

Non esistevano dati attendibili riguardanti l'allineamento con la tassonomia UE del gas fossile e dell'energia nucleare disponibile nel periodo.



[1] Le attività connesse al gas fossile e/o all'energia nucleare sono conformi alla tassonomia dell'UE solo se contribuiscono all'azione di contenimento dei cambiamenti climatici («mitigazione dei cambiamenti climatici») e non arrecano un danno significativo a nessuno degli obiettivi della tassonomia dell'UE - cfr. nota esplicativa sul margine sinistro. I criteri completi riguardanti le attività economiche connesse al gas fossile e all'energia nucleare che sono conformi alla tassonomia dell'UE sono stabiliti nel regolamento delegato (UE) 2022/1214 della Commissione.

I due grafici che seguono mostrano in verde la percentuale di investimenti che erano allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

1. Allineamento degli investimenti alla tassonomia **comprese le obbligazioni sovrane***

2. Allineamento degli investimenti alla tassonomia **escluse le obbligazioni sovrane***

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane*

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le **attività di transizione** sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

- ***Qual era la quota degli investimenti effettuati in attività transitorie e abilitanti?***

Al 31/12/2023, utilizzando come indicatore i dati sul fatturato e/o sull'utilizzo dei proventi dei green bond, la quota di investimento del fondo in attività transitorie era pari al 0,03% e la quota di investimento in attività abilitanti era pari al 0,40%. La percentuale di allineamento degli investimenti del fondo riportata con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terze parti.

- ***Qual è l'esito del raffronto della percentuale di investimenti che erano allineati alla tassonomia dell'UE rispetto ai precedenti periodi di riferimento?***

Nel periodo precedente l'allineamento tassonomico non era stato riportato perché all'epoca non erano ancora disponibili dati attendibili riportati.

Qual era la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili a norma del regolamento (UE) 2020/852.

Alla fine del periodo, la quota di investimenti sostenibili con obiettivo ambientale non allineati alla tassonomia era **26,45%**
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del Regolamento sull'informativa di sostenibilità dei servizi finanziari (SFDR) tuttavia parte delle attività che svolgono non sono allineate con gli standard della tassonomia dell'UE o non sono ancora disponibili dati su tali attività per eseguire una valutazione secondo la tassonomia dell'UE.

Qual era la quota di investimenti socialmente sostenibili?

Alla fine del periodo, la quota di investimenti socialmente sostenibili era 4,13%.

Quali investimenti erano compresi nella categoria "Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

Nella voce "#2 Altri" sono inclusi liquidità e altri strumenti finalizzati alla gestione della liquidità e alla gestione dei rischi di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in vigore salvaguardie ambientali e sociali minime attraverso lo screening delle controversie rispetto ai principi del Global Compact delle Nazioni Unite. Potrebbero essere inclusi anche titoli privi di rating ESG per i quali non erano disponibili i dati necessari a misurare il rispetto delle caratteristiche ambientali o sociali.

Quali azioni sono state adottate per soddisfare le caratteristiche ambientali e/o sociali durante il periodo di riferimento?

Gli indicatori di sostenibilità sono continuamente resi disponibili nel sistema di gestione di portafogli, consentendo ai gestori di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono integrati nel quadro di controllo di Amundi, con responsabilità ripartite tra il primo livello di controlli effettuati dai team di investimento e il secondo livello di controlli effettuati dai team addetti all'analisi del rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base costante.

Inoltre, la Politica di investimento responsabile di Amundi definisce un approccio attivo al coinvolgimento che promuove il dialogo con le società beneficiarie degli investimenti, comprese quelle incluse nel portafoglio di questo prodotto. La nostra Relazione annuale sull'impegno, disponibile al sito https://about.amundi.com/esg-documentation, fornisce una rendicontazione dettagliata su tale impegno e sui rispettivi risultati

Qual è stata la prestazione di questo prodotto finanziario rispetto all'indice di riferimento?

Gli **indici di riferimento** sono indici atti a misurare se il prodotto finanziario rispetti le caratteristiche ambientali o sociali che promuove.

Questo prodotto non ha un indice di riferimento ESG

- ***In che modo l'indice di riferimento differisce da un indice generale di mercato?***

Questo prodotto non ha un indice di riferimento ESG

- ***Qual è stata la prestazione di questo prodotto finanziario in relazione agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento con le caratteristiche ambientali o sociali promosse?***

Questo prodotto non ha un indice di riferimento ESG

- ***Qual è stata la prestazione di questo prodotto finanziario rispetto all'indice di riferimento?***

Questo prodotto non ha un indice di riferimento ESG

- ***Qual è stata la prestazione di questo prodotto finanziario rispetto all'indice generale di mercato?***

Questo prodotto non ha un indice di riferimento ESG

La seguente informativa SFDR non è assoggettata a revisione contabile da parte della società di revisione, PricewaterhouseCoopers S.p.A.

Informativa periodica per i prodotti finanziari di cui all'articolo 8, paragrafi 1, 2 e 2 bis, del regolamento (UE) 2019/2088 e all'articolo 6, primo comma, del regolamento (UE) 2020/852

Nome del prodotto: AMUNDI VALORE ITALIA PIR

Identificativo della persona giuridica: 549300IMUV88H7EUCC35

Si intende per **investimento sostenibile** un investimento in un'attività economica che contribuisce a un obiettivo ambientale o sociale, purché tale investimento non arrechi un danno significativo a nessun obiettivo ambientale o sociale e l'impresa beneficiaria degli investimenti segua prassi di buona governance.

La **tassonomia dell'UE** è un sistema di classificazione istituito dal regolamento (UE) 2020/852, che stabilisce un elenco di attività economiche ecosostenibili. Tale regolamento non stabilisce un elenco

Caratteristiche ambientali e/o sociali

Questo prodotto finanziario aveva un obiettivo di investimento sostenibile?

- [ ] **Sì**
- [x] **No**

- [ ] Ha effettuato **investimenti sostenibili con un obiettivo ambientale: _____%**
  - [ ] in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
  - [ ] in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
- [x] Ha **promosso caratteristiche ambientali/sociali (A/S)** e pur non avendo come obiettivo un investimento sostenibile, aveva una quota del 16% di investimenti sostenibili
  - [ ] con un obiettivo ambientale in attività economiche considerate ecosostenibili conformemente alla tassonomia dell'UE
  - [ ] con un obiettivo ambientale in attività economiche che non sono considerate ecosostenibili conformemente alla tassonomia dell'UE
  - [ ] con un obiettivo sociale
- [ ] Ha effettuato **investimenti sostenibili con un obiettivo sociale: _____%**
- [ ] Ha promosso caratteristiche A/S, ma **non ha effettuato alcun investimento sostenibile**

di attività economiche socialmente sostenibili. Gli investimenti sostenibili con un obiettivo ambientale potrebbero essere allineati o no alla tassonomia.

In che misura sono state soddisfatte le caratteristiche ambientali e/o sociali promosse da questo prodotto finanziario?

Nel corso dell'esercizio, il prodotto ha costantemente promosso caratteristiche ambientali e/o sociali al fine di ottenere un punteggio ESG più elevato rispetto al punteggio ESG del suo universo di investimento rappresentato da **INDEX AMUNDI RATING D**. Nel determinare il punteggio ESG dell'universo d'investimento, la performance ESG è stata costantemente valutata mettendo a confronto la performance media di un titolo con quella del settore di appartenenza del rispettivo emittente, in relazione a ciascuna delle tre dimensioni ambientale, sociale e di governance.

Gli **indicatori di sostenibilità** misurano in che modo sono rispettate le caratteristiche ambientali o sociali promosse del prodotto finanziario.

Qual è stata la prestazione degli indicatori di sostenibilità?

Amundi ha messo a punto un proprio processo di assegnazione dei rating ESG basato sull'approccio “best in class”.

I rating applicati a ciascun settore industriale mirano a valutare gli emittenti tenendo conto delle dinamiche specifiche del loro settore di appartenenza.

Per maggiori dettagli si rimanda alla Politica di investimento responsabile disponibile sul sito internet www.amundi.it.

L'indicatore di sostenibilità utilizzato è il punteggio ESG del Prodotto che viene misurato rispetto al punteggio ESG del parametro di riferimento.

Alla fine del periodo:

- la media ponderata del rating ESG del portafoglio è 0.774 (C).

- la media ponderata del rating ESG dell' universo di investimento è 0 (D).

Il rating ESG di Amundi utilizzato per determinare il punteggio ESG è un punteggio quantitativo ESG tradotto in sette gradi, che vanno da A (l'universo con i punteggi migliori) a G (il peggiore). Nella scala di Amundi ESG Rating, i titoli appartenenti alla lista di esclusione corrispondono a una G. Per gli emittenti societari, la performance ESG viene valutata a livello globale e a livello di criteri rilevanti, confrontandola con la performance media del proprio settore, attraverso la combinazione delle tre dimensioni ESG:

- Dimensione ambientale: esamina la capacità degli emittenti di controllare il proprio impatto ambientale diretto e indiretto, limitando il consumo di energia, riducendo le emissioni a effetto serra, combattendo l'esaurimento delle risorse e proteggendo la biodiversità.
- Dimensione sociale: misura il modo in cui un emittente opera su due concetti distinti: la strategia dell'emittente per lo sviluppo del capitale umano e il rispetto dei diritti umani in generale;

- Dimensione di governance: Valuta la capacità dell'emittente di garantire le basi per un efficace quadro di corporate governance e di generare valore nel lungo periodo.

La metodologia applicata da Amundi ESG utilizza 38 criteri generici (comuni a tutte le società, indipendentemente dalla loro attività) o specifici del settore, ponderati in base al settore e considerati in termini di impatto sulla reputazione, sull'efficienza operativa e sulla regolamentazione di un emittente. I rating ESG di Amundi possono essere espressi globalmente sulle tre dimensioni E, S e G o singolarmente su qualsiasi fattore ambientale o sociale.

… e rispetto ai periodi precedenti?

Alla fine del periodo precedente la media ponderata del rating ESG del portafoglio era C (0.825) e la media ponderata del rating ESG dell' universo di investimento era D+ (0)

Quali erano gli obiettivi degli investimenti sostenibili che il prodotto finanziario in parte ha realizzato e in che modo l'investimento sostenibile ha contribuito a tali obiettivi?

Gli obiettivi degli investimenti sostenibili erano quelli di indirizzare risorse verso imprese che operano sulla base di entrambi i seguenti criteri:

1) rispettare le migliori prassi ambientali e sociali;

2) astenersi dalla produzione di prodotti e servizi che arrecano danni all'ambiente e alla società.

Affinché si possa ritenere che la società beneficiaria di investimenti contribuisca ai predetti obiettivi, essa deve essere un "best performer" all'interno del proprio settore di attività con riguardo ad almeno uno dei fattori ambientali o sociali rilevanti.

La definizione di "best performer" si basa sull'approccio ESG proprietario di Amundi che mira a misurare i risultati ESG delle imprese beneficiarie di investimenti. Per essere considerata "best performer", un'impresa beneficiaria di investimenti deve essere valutata con un rating alto (cioè A, B o C, su una scala di 7 livelli che va da A a G) nell'ambito del proprio settore su almeno uno dei fattori ambientali o sociali considerati rilevanti. I fattori ambientali e sociali rilevanti sono identificati a livello di settore. L'identificazione dei fattori rilevanti si basa sul sistema di analisi ESG di Amundi, che combina dati non finanziari e analisi qualitative dei temi settoriali e di sostenibilità associati. I fattori identificati come rilevanti contribuiscono al calcolo del punteggio ESG complessivo in misura superiore al 10%. Per il settore energetico, ad esempio, i fattori rilevanti sono: emissioni ed energia, biodiversità e inquinamento, salute e sicurezza, comunità locali e diritti umani. Per un'informativa completa sui settori e i fattori si rimanda all'informativa fornita da Amundi ai sensi dell'art. 4 di SFDR disponibile sul sito www.amundi.it.

Al fine di contribuire ai predetti obiettivi, l'impresa beneficiaria di investimenti non deve essere esposta in misura significativa verso attività non compatibili con essi (quali, ad esempio, tabacco, armamenti, gioco d'azzardo, carbone, aviazione, produzione di carne, produzione di fertilizzanti e pesticidi, produzione di plastiche monouso).

La natura sostenibile di un investimento è valutata a livello di impresa emittente.

I **principali effetti negativi** sono gli effetti negativi più significativi delle decisioni di investimento sui fattori di sostenibilità relativi

In che modo gli investimenti sostenibili che il prodotto finanziario in parte ha realizzato non hanno arrecato un danno significativo a nessun obiettivo di investimento sostenibile sotto il profilo ambientale o sociale?

Per garantire che gli investimenti sostenibili non arrechino danni significativi ("DNSH"), Amundi utilizza due filtri:

Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori universali dei PAI di cui all'Allegato 1, Tabella 1 delle RTS, laddove siano disponibili dati solidi (ad esempio, l'intensità dei

a problematiche ambientali, sociali e concernenti il personale, il rispetto dei diritti umani e le questioni relative alla lotta alla corruzione attiva e passiva.

gas serra delle società partecipate) attraverso una combinazione di indicatori (ad esempio, l'intensità di carbonio) e di soglie o regole specifiche (ad esempio, che l'intensità di carbonio della società partecipata non appartenga all'ultimo decile del settore).

Amundi comunque considera gli indicatori di specifici PAI nell'ambito della propria politica di esclusione in quanto parte della Politica di Investimento Responsabile di Amundi. Queste esclusioni, che si applicano a monte delle verifiche sopra descritte, riguardano le armi controverse, le violazioni dei principi del Global Compact delle Nazioni Unite, il carbone e il tabacco.

Oltre agli specifici fattori di sostenibilità oggetto della prima verifica, Amundi ha previsto un secondo filtro, che non prende in considerazione i predetti indicatori obbligatori universali dei PAI, al fine di verificare che l'emittente non abbia prestazioni negative in termini di risultato complessivo sulle dimensioni ambientale e sociale, in confronto alle altre società del suo settore, il che corrisponde un punteggio ambientale e sociale superiore o uguale a E in base al sistema di rating di Amundi.

Gli investimenti sostenibili in cui il prodotto ha investito durante il periodo hanno superato il test di cui sopra.

- ***In che modo si è tenuto conto degli indicatori degli effetti negativi sui fattori di sostenibilità?***

  Gli indicatori per gli effetti negativi sono stati presi in considerazione come dettagliato nel primo filtro DNSH di cui sopra:
  Il primo filtro DNSH si basa sul monitoraggio degli indicatori obbligatori universali dei PAI di cui all'Allegato 1, Tabella 1 delle RTS, laddove siano disponibili dati robusti, per il tramite della combinazione dei seguenti indicatori e delle seguenti specifiche soglie e regole:
  - avere un'intensità di CO2 che non rientra nell'ultimo decile in confronto alle altre società del settore di appartenenza (regola applicata solo con riguardo ai settori a più alta intensità),
  - avere una diversità di genere nel consiglio di amministrazione che non rientra nell'ultimo decile in confronto alle altre società del settore di appartenenza,
  - dare trasparenza di ogni controversia relativa alle condizioni di lavoro e diritti umani,
  - dare trasparenza di ogni controversia relativa alla biodiversità e inquinamento.

  Amundi comunque considera gli indicatori di specifici PAI nell'ambito della propria politica di esclusione in quanto parte della Politica di Investimento Responsabile di Amundi. Queste esclusioni, che si applicano a monte delle verifiche sopra descritte, riguardano le armi controverse, le violazioni dei principi del Global Compact delle Nazioni Unite, il carbone e il tabacco.

- ***Gli investimenti sostenibili erano allineati con le linee guida OCSE destinate alle imprese multinazionali e con i Principi guida delle Nazioni Unite su imprese e diritti umani? Descrizione particolareggiata:***

  Le Linee guida dell'OCSE per le imprese multinazionali e i Principi guida delle Nazioni Unite su imprese e diritti umani sono stati integrati nella metodologia di assegnazione del punteggio ESG di Amundi. Il sistema di elaborazione dei rating ESG di Amundi valuta gli emittenti utilizzando i dati disponibili forniti da data providers terzi. Ad esempio, il modello prevede un criterio dedicato denominato "Community Involvement & Human Rights" che si applica a tutti i settori in aggiunta ad altri criteri connessi ai diritti umani, tra cui supply chains socialmente responsabili, condizioni di lavoro e relazioni sindacali. Inoltre, monitoriamo su base almeno trimestrale questioni controverse quali quelle che riguardano la violazione dei diritti umani. Al manifestarsi di una controversia, gli analisti valutano la situazione ed attribuiscono alla controversia un punteggio (utilizzando la

metodologia proprietaria di Amundi) e stabiliscono la migliore linea di condotta. I punteggi delle controversie sono aggiornati trimestralmente al fine di seguirne l'andamento e i risultati dei rimedi risolutori.

La tassonomia dell'UE stabilisce il principio "non arrecare un danno significativo", in base al quale gli investimenti allineati alla tassonomia non dovrebbero arrecare un danno significativo agli obiettivi della tassonomia dell'UE, ed è corredata di criteri specifici dell'Unione.

Il principio "non arrecare un danno significativo" si applica solo agli investimenti sottostanti il prodotto finanziario che tengono conto dei criteri dell'Unione per le attività economiche ecosostenibili. Gli investimenti sottostanti la parte restante di questo prodotto finanziario non tengono conto dei criteri dell'Unione per le attività economiche ecosostenibili.

Nessun altro investimento sostenibile deve arrecare un danno significativo agli obiettivi ambientali o sociali.

In che modo questo prodotto finanziario ha preso in considerazione i principali effetti negativi sui fattori di sostenibilità?

Il Fondo ha preso in considerazione tutti gli indicatori obbligatori universali dei PAI di cui all'Allegato 1, Tabella 1 delle RTS applicabili alla strategia del Fondo attraverso una combinazione di politiche di esclusione (normative e settoriali), l'integrazione del rating ESG nei processi di investimento, il coinvolgimento proattivo nel dialogo con le aziende e le attività di voto:

- Esclusioni: Amundi ha definito regole per operare esclusioni di tipo normativo, settoriale e relative a specifiche attività, che coprono alcuni dei principali indicatori di sostenibilità elencati dal Regolamento (UE) 2019/2088.

- Integrazione dei fattori ESG: Amundi ha adottato standard minimi di integrazione ESG applicati di default a tutti i fondi aperti a gestione attiva (esclusione degli emittenti con rating G e miglior punteggio medio ponderato ESG superiore a quello del parametro di riferimento applicabile). Anche i 38 criteri utilizzati nell'approccio di Amundi alla valutazione ESG sono stati concepiti per tenere conto sia dei principali impatti sui fattori di sostenibilità sia della qualità delle azioni di mitigazione intraprese.

- Engagement: l'engagement è un processo che nel continuo mira ad influenzare le attività e i comportamenti delle società beneficiarie di investimenti. Lo scopo delle attività di engagement può essere ricompreso nelle seguenti due categorie: impegnare un emittente a migliorare le modalità di integrazione delle dimensioni ambientale e sociale, impegnare un emittente a migliorare i suoi impatti sulle questioni ambientali, sociali e legate ai diritti umani o altre questioni sulla sostenibilità che sono rilevanti per la società e l'economia globale.

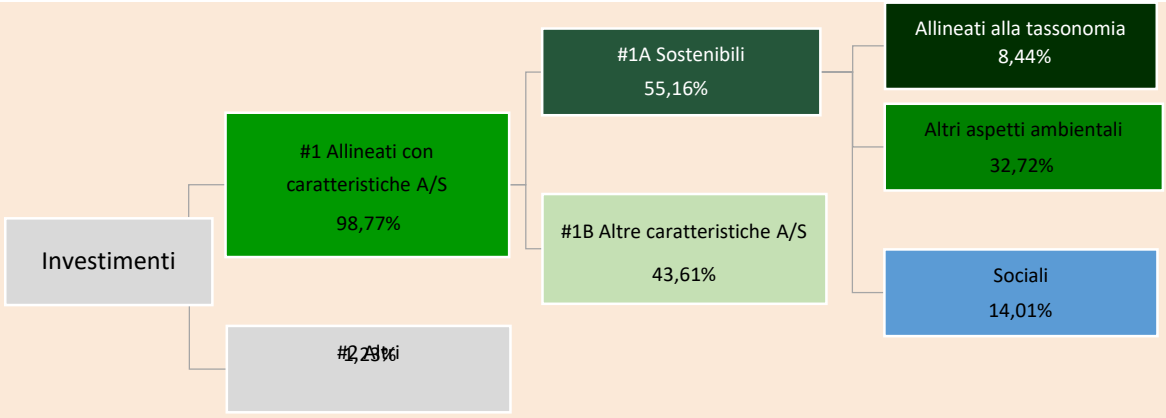
- Voto: la politica di voto di Amundi risponde a un'analisi olistica di tutte le questioni che sul lungo termine potrebbero influenzare la creazione di valore, ivi inclusi gli aspetti ESG rilevanti. Per maggiori informazioni si rimanda alla Voting Policy di Amundi.

- Monitoraggio delle controversie: Amundi ha sviluppato un sistema di tracciamento delle controversie che si avvale della rilevazione sistematica delle controversie e del loro livello di gravità operata da tre data provider esterni. Questo approccio quantitativo è arricchito da un'approfondita valutazione delle controversie più gravi, condotta dagli analisti ESG, e dalla periodica revisione della loro evoluzione. Questo approccio si applica a tutti i fondi di Amundi.

Per ulteriori informazioni circa il modo in cui sono utilizzati gli indicatori obbligatori universali dei PAI si rimanda all'informativa fornita da Amundi ai sensi dell'art. 4 di SFDR disponibile sul sito www.amundi.it

Quali sono stati i principali investimenti di questo prodotto finanziario?

L'elenco comprende gli investimenti che hanno costituito **la quota maggiore di investimenti** del prodotto finanziario durante il periodo di riferimento, ossia: **dal 01/01/2023 al 31/12/2023**



Investimenti di maggiore entità	Settore	Sottosettore	Paese	% di attivi
FIREIT 1.608% 10/27	Corporate	Gas naturale	Italia	4,35%

Qual è stata la quota degli investimenti in materia di sostenibilità?

Qual è stata l'allocazione degli attivi?

L'**allocazione degli attivi** descrive la quota di investimenti in attivi specifici.

#1 Allineati con caratteristiche A/S comprende gli investimenti del prodotto finanziario utilizzati per rispettare le caratteristiche ambientali o sociali promosse dal prodotto finanziario.
#2 Altri comprende gli investimenti rimanenti del prodotto finanziario che non sono allineati con le caratteristiche ambientali o sociali, né sono considerati investimenti sostenibili.
La categoria **#1 Allineati con caratteristiche A/S** comprende:
- la sottocategoria **#1A Sostenibili** che contempla gli investimenti sostenibili dal punto di vista ambientale e sociale.
- la sottocategoria **#1B Altre caratteristiche A/S** che contempla gli investimenti allineati con le caratteristiche ambientali o sociali che non sono considerati investimenti sostenibili.

Le **attività allineate alla tassonomia** sono espresse in percentuale di:
- **fatturato** riflette il carattere ecologico attuale delle imprese beneficiarie degli investimenti;
- **spese in conto capitale (CapEx)** rivelano gli investimenti verdi effettuati dalle imprese beneficiarie degli investimenti, utili per la transizione verso un'economia verde;
- **spese operative (OpEx)** illustrano le attività operative verdi delle imprese beneficiarie degli investimenti.

In quale misura gli investimenti sostenibili con un obiettivo ambientale erano allineati alla tassonomia dell'UE[1]?

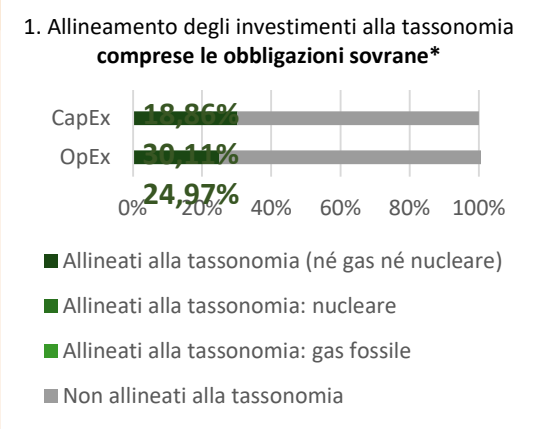
Il fondo promuove caratteristiche ambientali e sociali. Sebbene il fondo non si sia impegnato a effettuare investimenti in linea con la tassonomia dell'UE, durante il periodo di riferimento il fondo ha investito 8,44% in investimenti sostenibili in linea con la tassonomia dell'UE. Questi investimenti hanno contribuito agli obiettivi di mitigazione dei cambiamenti climatici della tassonomia dell'UE.

L'allineamento delle imprese beneficiarie degli investimenti agli obiettivi della tassonomia dell'UE sopra menzionati viene misurato utilizzando i dati sul fatturato (o sui ricavi) e/o sull'utilizzo dei proventi dei green bond.

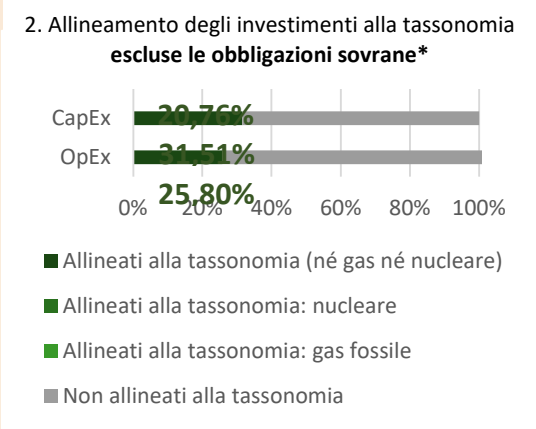
La percentuale di allineamento degli investimenti del fondo riportata con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terze parti.

Il prodotto finanziario investe in attività connesse al gas fossile e/o all'energia nucleare che sono conformi alla tassonomia dell'UE[1]?

☐ Sì:



☐ Gas fossile ☐ Energia nucleare



☒ No

Non esistevano dati attendibili riguardanti l'allineamento con la tassonomia UE del gas fossile e dell'energia nucleare disponibile nel periodo.

[1] Le attività connesse al gas fossile e/o all'energia nucleare sono conformi alla tassonomia dell'UE solo se contribuiscono all'azione di contenimento dei cambiamenti climatici («mitigazione dei cambiamenti climatici») e non arrecano un danno significativo a nessuno degli obiettivi della tassonomia dell'UE - cfr. nota esplicativa sul margine sinistro. I criteri completi riguardanti le attività economiche connesse al gas fossile e all'energia nucleare che sono conformi alla tassonomia dell'UE sono stabiliti nel regolamento delegato (UE) 2022/1214 della Commissione.

I due grafici che seguono mostrano in verde la percentuale di investimenti che erano allineati alla tassonomia dell'UE. Poiché non esiste una metodologia adeguata per determinare l'allineamento delle obbligazioni sovrane* alla tassonomia, il primo grafico mostra l'allineamento alla tassonomia in relazione a tutti gli investimenti del prodotto finanziario comprese le obbligazioni sovrane, mentre il secondo grafico mostra l'allineamento alla tassonomia solo in relazione agli investimenti del prodotto finanziario diversi dalle obbligazioni sovrane.

** Ai fini dei grafici di cui sopra, per "obbligazioni sovrane" si intendono tutte le esposizioni sovrane*

Le **attività abilitanti** consentono direttamente ad altre attività di apportare un contributo sostanziale a un obiettivo ambientale.

Le **attività di transizione** sono attività per le quali non sono ancora disponibili alternative a basse emissioni di carbonio e che presentano, tra l'altro, livelli di emissione di gas a effetto serra corrispondenti alla migliore prestazione.

- ***Qual era la quota degli investimenti effettuati in attività transitorie e abilitanti?***

Al 31/12/2023, utilizzando come indicatore i dati sul fatturato e/o sull'utilizzo dei proventi dei green bond, la quota di investimento del fondo in attività transitorie era pari al 0,00% e la quota di investimento in attività abilitanti era pari al 6,81%. La percentuale di allineamento degli investimenti del fondo riportata con la tassonomia dell'UE non è stata verificata dai revisori del fondo o da terze parti.

- ***Qual è l'esito del raffronto della percentuale di investimenti che erano allineati alla tassonomia dell'UE rispetto ai precedenti periodi di riferimento?***

Nel periodo precedente l'allineamento tassonomico non era stato riportato perché all'epoca non erano ancora disponibili dati attendibili riportati.

Qual era la quota di investimenti sostenibili con un obiettivo ambientale non allineati alla tassonomia dell'UE?

sono investimenti sostenibili con un obiettivo ambientale che **non tengono conto dei criteri** per le attività economiche ecosostenibili a norma del regolamento (UE) 2020/852.

Alla fine del periodo, la quota di investimenti sostenibili con obiettivo ambientale non allineati alla tassonomia era **32,72%**
Ciò è dovuto al fatto che alcuni emittenti sono considerati investimenti sostenibili ai sensi del Regolamento sull'informativa di sostenibilità dei servizi finanziari (SFDR) tuttavia parte delle attività che svolgono non sono allineate con gli standard della tassonomia dell'UE o non sono ancora disponibili dati su tali attività per eseguire una valutazione secondo la tassonomia dell'UE.

Qual era la quota di investimenti socialmente sostenibili?

Alla fine del periodo, la quota di investimenti socialmente sostenibili era 14,01%.

Quali investimenti erano compresi nella categoria "Altri", qual era il loro scopo ed esistevano garanzie minime di salvaguardia ambientale o sociale?

Nella voce "#2 Altri" sono inclusi liquidità e altri strumenti finalizzati alla gestione della liquidità e alla gestione dei rischi di portafoglio. Per le obbligazioni e le azioni prive di rating, sono in vigore salvaguardie ambientali e sociali minime attraverso lo screening delle controversie rispetto ai principi del Global Compact delle Nazioni Unite. Potrebbero essere inclusi anche titoli privi di rating ESG per i quali non erano disponibili i dati necessari a misurare il rispetto delle caratteristiche ambientali o sociali.

Quali azioni sono state adottate per soddisfare le caratteristiche ambientali e/o sociali durante il periodo di riferimento?

Gli indicatori di sostenibilità sono continuamente resi disponibili nel sistema di gestione di portafogli, consentendo ai gestori di valutare l'impatto delle loro decisioni di investimento.

Questi indicatori sono integrati nel quadro di controllo di Amundi, con responsabilità ripartite tra il primo livello di controlli effettuati dai team di investimento e il secondo livello di controlli effettuati dai team addetti all'analisi del rischio, che monitorano la conformità alle caratteristiche ambientali o sociali promosse dal fondo su base costante.

Inoltre, la Politica di investimento responsabile di Amundi definisce un approccio attivo al coinvolgimento che promuove il dialogo con le società beneficiarie degli investimenti, comprese quelle incluse nel portafoglio di questo prodotto. La nostra Relazione annuale sull'impegno, disponibile al sito https://about.amundi.com/esg-documentation, fornisce una rendicontazione dettagliata su tale impegno e sui rispettivi risultati

Qual è stata la prestazione di questo prodotto finanziario rispetto all'indice di riferimento?

Gli **indici di riferimento** sono indici atti a misurare se il prodotto finanziario rispetti le caratteristiche ambientali o sociali che promuove.

Questo prodotto non ha un indice di riferimento ESG

- ***In che modo l'indice di riferimento differisce da un indice generale di mercato?***

Questo prodotto non ha un indice di riferimento ESG

- ***Qual è stata la prestazione di questo prodotto finanziario in relazione agli indicatori di sostenibilità per determinare l'allineamento dell'indice di riferimento con le caratteristiche ambientali o sociali promosse?***
