General information on the Fund

CoRe Series is a common fund (fonds commun de placement, "FCP", hereinafter referred to as the "Fund") with 36 separate Sub-Funds (individually a "Sub-Fund" and collectively the "Sub-Funds"). The Fund is established under Part I of the Luxembourg Law of December 17, 2010 and is governed by the Management Regulations effective as of December 19, 2019.

The Fund is managed by Fineco Asset Management DAC (the "Management Company"), a company organized in the form of designated activity company under the Irish Companies Act 2014 and having its registered office in Dublin, Ireland.

The Fund is an "umbrella Fund" enabling investors to choose between one or more investment objectives by investing in the various Sub-Fund(s).

Information to the Unitholders

The accounts of the Fund shall be kept in euro and are closed each year on December 31.

Unaudited semi-annual accounts shall also be issued each year for the period closed on June 30.

Audited annual reports and unaudited semi-annual reports will be provided free of charge by the Management Company to the Unitholders at their request and in line with applicable law. In addition, such reports will be available at the registered offices of the Management Company/Distributor or its Agent(s) (if any) and the Depositary as well as at the offices of the information agents of the Fund in any country where the Fund is marketed.

A list of changes in the portfolio for the year ended December 31, 2023 is available free of charge at the registered office of the Management Company of the Fund.

Report of the Board of the Directors

CoRe Series - FAM Park

FAM Park posted a positive performance returning approximately 3.45% performance after fees in 2024. The Amundi Enhanced Ultra Short Term fund returned 4.19% over the course of 2023 while BNP Enhanced Bond 6m returned 4.59%. The BNP 6m fund returned 3.83% during the same period. The BNP Sustainable Enhanced 12m fund returned 4.60%. Candriam Money Market fund returned 3.42. The Bloomberg Passive 1-3y fund 3.18% and was the lowest performing contributor to the fund. The Amundi Ultra Short Term Bond fund returned 3.82% this year for the fund. Finally Groupama Money Market Fund 6m and La Francaise Money Market fund returned 3.39% and 3.38% respectfully.

The main driver of performance was to keep the fund very low in terms of duration thereby avoiding the drag underperforming longer maturity bonds could have had on the portfolio.

CoRe Series - CoRe Coupon

In 2023, CoRe Coupon has risen of 5.92% net of fees.

The key drivers of our performance came from fixed income side with first of all EUR Corporate funds which have benefitted from carry effect, appetite for subordinated financials. Most of EUR Corp funds have delivered a return close to 8% over the year. The second positive contributor have been Emerging Markets Debt Bond Funds with expectations as for FED cuts rate expectations as for 2024. 3 funds have particularly well performed: Vontobel Emerging Markets Debt FAM Fund, Emerging Market Bond Hard Currency FAM Fund and Emerging Markets Debt FAM Fund which have respectively jumped of +13.03%, +11.67% and +12.36% over 2024. The third main contributor has been EUR HY despite its underweight has been a contributor as for 168 bps in absolute terms but has underperformed in relative terms. EUR AGG funds have also added 126 bps following ECB meeting and last inflation figures at lowest levels since September 2021 with Fidelity Euro Bond FAM Fund which thanks to the highest duration above 8 has overperformed others peers by delivering a return of 8.18% over 2023.

Some active contributors have also added values like Flexibles funds with Invesco Global Total Return FAM Fund as for 28 bps with a more defensive stance with less credit risk and govies in his allocation on US notably. The 2 others flexibles funds Nordea Stable Performance FAM Fund and Amundi Strategic Bond FAM Fund sold in Q2 2023 have added respectively 8 bps and 15 bps. The 2 other active bets have been Euro linker with Fineco AM Euro Inflation Linked Government Bond Fund which has added 19 bps. Meanwhile, Fineco AM US Dollar Bond Fund added in April 2023 has been flat of -3 bps.

Concerning the main transactions, we have added in April Fineco AM US Dollar Bond Fund (2%) in Q2 23. Then, we have reduced European High yield Bond FAM Fund and Ultra Short term Bond SRI FAM Fund. Furthermore, we have added two HY ETF: Fineco AM MSCI EUR HY SRI Sustainable Corporate Bond UCITS ETF (1.24%) and Fineco AM MSCI USD HY SRI Sustainable Corporate Bond UCITS ETF (0.8%) and we have reduced Euro High Yield Bond FAM Fund (-1.14%). As for EUR flexibles, we have sold Amundi Strategic Bond FAM Fund (-3.2%) and Nordea Stable Performance FAM Fund (-2.65%). As for Credit corp funds, we have reduced European Corporate Bond FAM Fund whom allocation will converge to Fineco AM Euro Corp Bonds Fund on the coming weeks. As for EM Bonds, we have reduced Vontobel Emerging Markets Debt FAM Fund (-0.94%), Emerging Markets Bond Hard Currency FAM Fund (-0.79%). As for futures, we have implemented roll over short position over Japanese 10 year Dec 2023 at end of December to get March 2024 maturity - long positions over US 2 year rates futures and short positions over US 10 year rates have been closed in June 2023.

CoRe Series - CoRe Income Opportunity

In 2023, CoRe Income Opportunity has risen of 4.11% net of fees.

The key drivers of our performance came from fixed income side with first of all EUR Corporate funds which have benefitted from carry effect, appetite for subordinated financials. Most of EUR Corp funds have delivered a return close to 8% over 2023. Our highest holding in EUR Corp has been Euro Corporate Fixed Income FAM Fund which has benefitted from a small exposure to AT1 and HY (close to 3%) with a resilient HY market. The second main contributor has been Euro Agg Short term funds with our 2 positions over Euro Short Duration FAM Fund and Fidelity Euro Short Duration which have largely overperformed (respectively with an absolute return of 4.9% and 4.62% over 2023). At last, EUR HY despite its underweight has been a contributor as for 54 bps in absolute terms but has underperformed in relative terms.

Concerning EM HC Euro Hdg strategy, it has delivered a return of 25 bps with outperformance as for Emerging Markets Debt FAM Fund (+12.36%) regarding Amundi Emerging Markets Bond FAM Fund (+7.33% over 2023).

Some active contributors have also added values like Flexibles funds with Invesco Global Total Return FAM Fund as for 35 bps with a more defensive stance with less credit risk and govies in his allocation on US notably. The other flexible fund Amundi Strategic Bond FAM Fund sold in Q2 2023 has added 18 bps .The 2 other active bets have been Euro linker with Fineco AM Euro Inflation Linked Government Bond Fund which has added 20 bps. Meanwhile Fineco AM US Dollar Bond Fund added in April 2023 has been flat of -3 bps.

Concerning the main transactions, we have added in April Fineco AM US Dollar Bond Fund (1.99%) and Fineco AM Euro Inflation Linked Government Bond Fund (2.82%) in Q2 23. Then, we have reduced European High yield Bond FAM Fund and Ultra Short term Bond SRI FAM Fund. Besides, we have reduced the 2 Euro Agg Short Term funds: Euro Short Duration FAM Fund (-3.004%), and Fidelity Euro Short Term FAM Fund (-3.55%). Furthermore, we have added one HY ETF: Fineco AM MSCI EUR HY SRI Sustainable Corporate Bond UCITS ETF (0.5%) and we have reduced Euro High Yield Bond FAM Fund (2.74%) and European High Yield Bond FAM Fund (-2.96%). As for EUR flexibles, we have sold Amundi Strategic Bond FAM Fund (-4.95%). As for Credit corp funds, we have reduced Fineco AM Euro Credit Bond Fund (-1.52%), Fineco AM Euro Corporate Bond Fund (-1.22%) whom allocation will converge to Fineco AM Euro Corp on the coming weeks. As for futures, we have implemented roll over short position over Japanese 10 year Dec 2023 at end of December to get March 2024 maturity - long positions over US 2 year rates futures and short positions over US 10 year rates have been closed in June 2023.

CoRe Series - CoRe Emerging Markets Bond

CoRe Emerging Markets Bond returned 11.26% (gross of ongoing charge) during 2023.

The portfolio is split 70/30 between Emerging Market Hard Currency and Local Currency Bonds.

EM Local Currency outperformed Hard Currency during 2023 given strong performance of selective EM FX and local rates. The DPAM EM Local Fund was the best performing, followed by the PIMCO EM Local and GAM EM Local Fund.

On the Hard Currency side, the portfolio is split between Euro hedged and unhedged. On the Euro hedged side, the Amundi Emerging Markets Bond Hard Currency FAM Fund and M&G Emerging Markets Debt FAM Fund led the way, followed by the Jupiter Short Duration EM

Debt fund which has provided protection from higher rates, while the Amundi Emerging Markets Bond FAM Fund has lagged a small bit due to poor credit selection during 2023 albeit still returned positively. On the unhedged side, the Vontobel Emerging Markets Debt FAM Fund had strong performance overall and provided protection against the stronger US Dollar during 2023.

CoRe Series - CoRe Global Currencies

CoRe Global Currencies returned 4.4% (gross of ongoing charge) during 2023.

The portfolio is invested in a number of global currency money market and short-term bond funds. The largest weights are in EM Local Currency, US Dollar, Swiss Franc, and Japanese Yen funds followed by smaller weights in Canadian Dollar, Australia Dollar, Swedish Krona, and British Pound funds.

EM Local Currency has led the way from a performance perspective with strong positive contributions from the DPAM EM Local and PIMCO EM Local funds who have benefitted from selective strength in EM local rates and FX. Returns across the Amundi US Dollar Fund, BNP Sterling Deposit Fund, Vontobel Swiss Money Fund, Nordea Swedish Krona, and HSBC Canadian Dollar are more mixed but positive. The Goldman Sachs Japanese Yen Fund has been the major laggard during 2023 given the weakness in the Japanese currency as a result of the easy monetary policy continued by the Bank of Japan in the face of significantly higher than target inflation.

The fund also has a smaller allocation to the Amundi Gold ETC and Amundi Ultra Short-Term FAM Fund which contributed positively during 2023.

CoRe Series - Global Macro Credit FAM Fund

The Global Macro Credit FAM Fund returned 9.5% for the year 2023 after fees.

2023 started with a strong fixed income market. Continued disinflation in the US lead to a substantial tightening of US 10year Treasuries and credit spreads. Primary markets opened again after a soft 2022, and the US dollar weakened, leading to outperformance in non-US assets. February saw a takeback of January's strong performance in fixed income markets. Credit spreads held up better, due to strong resilient economic data which resulted in outperformance of the high yield segments of the market. The Fund continued to be long credit, but we reduced our exposure to tight high-rated names positioning to higher yielding areas. We re-focused our attention on higher yielding credits and reduced overall long cash credit exposure to protect from a situation where rates volatility filters through to credit markets. Performance across financial credit in March was impacted by the developments in both the US with the collapse of Silicon Valley Bank and in Europe with the sale of Credit Suisse to UBS. In April, markets recovered a good part of March losses, and credit valuations tightened. Financials recovered less, and we remained positive given more attractive valuations than broader credit. By June, markets had fully priced out the recession fears that emerged post the US banking stress in March / April and major economies were set for flat or just marginal growth in 2023. July was a strong month for risk and high yield credit. Valuations in risk assets approached 18-month highs, despite a marked softening in leading economic indicators in major developed countries and China. In our view, markets underplayed the chances of a "growth scare". We positioned accordingly as we focused cash longs in areas where valuation was dislocated vs fundamentals (rather than pure beta) and added duration and protection to the fund. The next few months proved to be weaker months for risk assets. The US curve widened and steepened, and weakness in the 10y affected credit. We believed economic weakness took a more central role in the market narrative. As a result, we added back some of the risk but remained light vs history. We increased duration at the high side of the historical range. We focused on cash bonds with 8-10% yield while using flow credit as a protection tool. In EM, we focused on local markets where central banks have room to cut. November/ December were strong months for fixed income markets which further helped the Fund performance. The driver of asset prices was an attenuation of economic strength, which stabilized interest rates. The re-pricing was almost too quick: the front end of US and EU curve priced five cuts in 2024, and high-yield credit spreads were at one-year tights. Financial conditions continued to ease, and global spreads tightened. The Fed meeting was dovish, with Powell opening the door to cuts in 2024 more explicitly than anticipated. Overall, our flexible approach allowed the Fund to deliver positive returns during the fastest interest rate repricing of the past twenty years. AT1 and financial subordinated were a key trade in 2023, and some of the bonds re-priced 25% since March. EM outperformed since October, and EM local was a key winner in 2023.

CoRe Series - Bond 6M Fineco AM Fund

The Federal Open Market Committee (FOMC) meeting on 12/13 December concluded with a status quo on key interest rates. The federal funds target rate thus remains unchanged in the 5.25% -5.50% range to which it was raised at the end of the July meeting after a cumulative 525bp rise since March 2022. The decision to hold rates steady came as no surprise. US Federal Reserve (Fed)'s official communication, however, proved more dovish than expected. Fed Chair Powell pointed out that monetary policy is now 'well into restrictive territory'. On the other hand, projections of the level of the federal funds rate that FOMC members deem 'appropriate' revealed that policy easing may start in the first half of next year.

In line with expectations, the drop in inflation confirmed the slower pace of price increases in November. Core inflation, as measured by the core PCE (personal consumption expenditures ex food and energy) price index, was 3.2% year-on-year, its lowest since March 2021. The consumer price indices published earlier in the month had sent the same message, which understandably led the FOMC to revise down its expectations for core PCE inflation at the end of 2023 (to 3.2% from 3.7% forecast in September), at the end of 2024 (2.4%) and at the end of 2025 (2.2%). At the same time, the FOMC expects the unemployment rate to rise moderately (to 4.1% from 2024 to 2026), which would mean it remaining close to its equilibrium level of 4.0%. The Fed's central scenario appears to be a soft landing, whereby a return of inflation to target would not require a sharp slowdown in activity. The economic indicators released in December validate this to some extent.

At the Governing Council meeting on 14 December, the European Central Bank (ECB) left its key rates unchanged. The September hike thus appears to be the last one in the current cycle, which started in July 2022 and took the deposit rate to 4.00%, the refi rate to 4.50% and the marginal lending facility rate to 4.75%. The post-meeting communication was seen as rather hawkish, unlike some statements that had caught investors' attention earlier in December. The Governing Council reiterated that it is 'too early to declare victory in the fight against inflation' as 'domestic price pressures remain elevated,

primarily owing to strong growth in unit labour costs. Data from Eurostat in mid-December revealed a 5.3% year-on-year increase in hourly labour costs in the eurozone in the third quarter (after 4.5% in Q2).

Weak growth, especially in Germany, seems, for investors, to be a good argument for easing monetary policy in the coming months. The eurozone flash PMI signalled a deepening decline in activity in December. The average PMI Composite index level in the fourth quarter stands at 47 (47.5 in the preceding quarter), which corresponds to a recession (after GDP contracted by -0.1% in the third quarter). Against this backdrop of slowing inflation and depressed growth, expectations of rapid rate cuts in 2024 strengthened. At the end of December, the levels on the Overnight Indexed Swap (OIS) showed three cuts of 25bp in the first half of the year.

The yield on the US 10-year T-note maintained the clear downward trend that had started in November, as investors continued to react to the slowdown in inflation and the Fed's less hawkish comments. In this context, the employment report, which was above expectations and still solid, was seen as confirmation of the rebalancing of the labour market and thus a soft landing for the US economy. This report led to a brief rise in long-term bond yields when it was released in early December. Other than that, the yield on the 10-year T-note fell continuously, from 4.33% at the end of November to below 3.80% on 27 December, its lowest since 19 July. Compared to the highest close of the year at 4.99% on 19 October, the fall in the US 10-year yield reached 120bp. In narrow volumes, and with little investor response to the end-of-year economic data, it ended the year at 3.88%, a monthly fall of 45bp that sent it back to its end of 2022 level. Expectations of rapid cuts in key interest rates in 2024 could explain such a result. The FOMC meeting on 12/13 December was decisive: Jerome Powell's comments confirmed that the policy rate hike cycle was over and forecasts showed that most FOMC members consider that significantly lower rates would be appropriate in 2024 (4.625% for the median level from 5.375% at the end of 2023), which was not the case after the September meeting when the median level of these projections for the end of 2024 was 5.125%.

In the Eurozone, the 10-year Bund yield (2.45% at the end of November) gradually eased to 1.90% on 27 December, its lowest in more than a year, with bond market activity very light in the last week of the year. It ended December at 2.02% (-42bp in one month and -55bp compared to the end of 2022). The 2-year Bund yield eased by 42bp in one month to end at 2.40%, its lowest since the mini crisis triggered by the bankruptcies of several US regional banks in March.

Peripheral eurozone government bond markets did not suffer from the announcement of the reduction in reinvestments of Pandemic Emergency Purchase Programme (PEPP) assets in the second half of 2024, which accompanied the ECB's status quo on key rates. The announcement removed one element of uncertainty since it was made clear that these reinvestments will continue until the end of 2024. The Italian 10-year yield fell by 53bp to 3.70% and Spanish and Portuguese yields fell by 48bp to 2.99% and 2.66%, respectively.

In 2023, the portfolio delivered a strong performance of + 4.1 % (gross of fees). This strong performance is mainly due to the positive contribution of the carry effect (+ 3.33 %) and the spread effect (+ 1 %).

We stuck to a relatively low exposure to both rates (modified duration :0.21 year) and credit (Duration Times Spread- DTS: 0.41 year) in a very volatile context. The portfolio offers a very significant yield (4.24 % annualized) which represents in our view a very good investment opportunity for the year to come.

Thanks to the positive current yield of the portfolios (YTM) achieved end 2022 (after the strong yields increases, we witnessed in 2022), we had the base to get a positive carry effect. This effect is by far the main contributor to the performance. It helped to deliver positive performance month after month, even though ST yields continued to move up, reaching a high in early October.

Another key factor is the strong compression of credit spreads since March 2023 which brought another positive effect, the "spread effect".

Lastly, the significant rally of rates over the Q4 of 2023 considerably helped us to get the third positive effect: the "duration effect".

CoRe Series - Enhanced Bond 6M Fineco AM Fund

The Federal Open Market Committee (FOMC) meeting on 12/13 December concluded with a status quo on key interest rates. The federal funds target rate thus remains unchanged in the 5.25% -5.50% range to which it was raised at the end of the July meeting after a cumulative 525bp rise since March 2022. The decision to hold rates steady came as no surprise. US Federal Reserve (Fed)'s official communication, however, proved more dovish than expected. Fed Chair Powell pointed out that monetary policy is now 'well into restrictive territory'. On the other hand, projections of the level of the federal funds rate that FOMC members deem 'appropriate' revealed that policy easing may start in the first half of next year.

In line with expectations, the drop in inflation confirmed the slower pace of price increases in November. Core inflation, as measured by the core PCE (personal consumption expenditures ex food and energy) price index, was 3.2% year-on-year, its lowest since March 2021. The consumer price indices published earlier in the month had sent the same message, which understandably led the FOMC to revise down its expectations for core PCE inflation at the end of 2023 (to 3.2% from 3.7% forecast in September), at the end of 2024 (2.4%) and at the end of 2025 (2.2%). At the same time, the FOMC expects the unemployment rate to rise moderately (to 4.1% from 2024 to 2026), which would mean it remaining close to its equilibrium level of 4.0%. The Fed's central scenario appears to be a soft landing, whereby a return of inflation to target would not require a sharp slowdown in activity. The economic indicators released in December validate this to some extent.

At the Governing Council meeting on 14 December, the European Central Bank (ECB) left its key rates unchanged. The September hike thus appears to be the last one in the current cycle, which started in July 2022 and took the deposit rate to 4.00%, the refi rate to 4.50% and the marginal lending facility rate to 4.75%. The yield on the US 10-year T-note maintained the clear downward trend that had started in November, as investors continued to react to the slowdown in inflation and the Fed's less hawkish comments. In this context, the employment report, which was above expectations and still solid, was seen as confirmation of the rebalancing of the labour market and thus a soft landing for the US economy. This report led to a brief rise in long-term bond yields when it was released in early December. Other than that, the yield on the 10-year T-note fell continuously, from 4.33% at the end of November to below 3.80% on 27 December, its lowest since 19 July. Compared to the highest close of the year at 4.99% on 19 October, the fall in the US 10-year yield reached 120bp. In narrow volumes, and with little investor response to the end-of-year economic data, it ended the year at 3.88%, a monthly fall of 45bp that sent it back to its end of 2022 level. Expectations of rapid cuts in key interest rates in 2024 could explain such a result. The FOMC meeting on 12/13 December was decisive:

Jerome Powell's comments confirmed that the policy rate hike cycle was over and forecasts showed that most FOMC members consider that significantly lower rates would be appropriate in 2024 (4.625% for the median level from 5.375% at the end of 2023), which was not the case after the September meeting when the median level of these projections for the end of 2024 was 5.125%.

In the Eurozone, the 10-year Bund yield (2.45% at the end of November) gradually eased to 1.90% on 27 December, its lowest in more than a year, with bond market activity very light in the last week of the year. It ended December at 2.02% (-42bp in one month and -55bp compared to the end of 2022). The 2-year Bund yield eased by 42bp in one month to end at 2.40%, its lowest since the mini crisis triggered by the bankruptcies of several US regional banks in March.

Peripheral eurozone government bond markets did not suffer from the announcement of the reduction in reinvestments of Pandemic Emergency Purchase Programme (PEPP) assets in the second half of 2024, which accompanied the ECB's status quo on key rates. The announcement removed one element of uncertainty since it was made clear that these reinvestments will continue until the end of 2024. The Italian 10-year yield fell by 53bp to 3.70% and Spanish and Portuguese yields fell by 48bp to 2.99% and 2.66%, respectively.

In 2023, the portfolio delivered a strong performance of + 5.16 % (gross of fees). This strong performance is mainly due to the positive contribution of the carry effect (+ 3 %) and the spread effect (+ 2.13 %).

We stuck to a relatively low exposure to both rates (modified duration :0.75 year) and credit (Duration Times Spread- DTS: 1.44 year) in a very volatile context. The portfolio offers a very significant yield (4.45 % annualized) which represents in our view a very good investment opportunity for the year to come.

Thanks to the positive current yield of the portfolios (YTM) achieved end 2022 (after the strong yields increases, we witnessed in 2022), we had the base to get a positive carry effect. This effect is by far the main contributor to the performance. It helped to deliver positive performance month after month, even though ST yields continued to move up, reaching a high in early October.

Another key factor is the strong compression of credit spreads since March 2023 which brought another positive effect, the "spread effect".

Lastly, the significant rally of rates over the Q4 of 2023 considerably helped us to get the third positive effect: the "duration effect".

CoRe Series - Sustainable Enhanced Bond 12M Fineco AM Fund

The Federal Open Market Committee (FOMC) meeting on 12/13 December concluded with a status quo on key interest rates. The federal funds target rate thus remains unchanged in the 5.25% -5.50% range to which it was raised at the end of the July meeting after a cumulative 525bp rise since March 2022. The decision to hold rates steady came as no surprise. US Federal Reserve (Fed)'s official communication, however, proved more dovish than expected. Fed Chair Powell pointed out that monetary policy is now 'well into restrictive territory'. On the other hand, projections of the level of the federal funds rate that FOMC members deem 'appropriate' revealed that policy easing may start in the first half of next year.

In line with expectations, the drop in inflation confirmed the slower pace of price increases in November. Core inflation, as measured by the core PCE (personal consumption expenditures ex food and energy) price index, was 3.2% year-on-year, its lowest since March 2021. The consumer price indices published earlier in the month had sent the same message, which understandably led the FOMC to revise down its expectations for core PCE inflation at the end of 2023 (to 3.2% from 3.7% forecast in September), at the end of 2024 (2.4%) and at the end of 2025 (2.2%). At the same time, the FOMC expects the unemployment rate to rise moderately (to 4.1% from 2024 to 2026), which would mean it remaining close to its equilibrium level of 4.0%. The Fed's central scenario appears to be a soft landing, whereby a return of inflation to target would not require a sharp slowdown in activity. The economic indicators released in December validate this to some extent.

At the Governing Council meeting on 14 December, the European Central Bank (ECB) left its key rates unchanged. The September hike thus appears to be the last one in the current cycle, which started in July 2022 and took the deposit rate to 4.00%, the refi rate to 4.50% and the marginal lending facility rate to 4.75%. The post-meeting communication was seen as rather hawkish, unlike some statements that had caught investors' attention earlier in December. The Governing Council reiterated that it is 'too early to declare victory in the fight against inflation' as 'domestic price pressures remain elevated, primarily owing to strong growth in unit labour costs. Data from Eurostat in mid-December revealed a 5.3% year-on-year increase in hourly labour costs in the eurozone in the third quarter (after 4.5% in Q2).

Weak growth, especially in Germany, seems, for investors, to be a good argument for easing monetary policy in the coming months. The eurozone flash PMI signalled a deepening decline in activity in December. The average PMI Composite index level in the fourth quarter stands at 47 (47.5 in the preceding quarter), which corresponds to a recession (after GDP contracted by -0.1% in the third quarter). Against this backdrop of slowing inflation and depressed growth, expectations of rapid rate cuts in 2024 strengthened. At the end of December, the levels on the Overnight Indexed Swap (OIS) showed three cuts of 25bp in the first half of the year.

The yield on the US 10-year T-note maintained the clear downward trend that had started in November, as investors continued to react to the slowdown in inflation and the Fed's less hawkish comments. In this context, the employment report, which was above expectations and still solid, was seen as confirmation of the rebalancing of the labour market and thus a soft landing for the US economy. This report led to a brief rise in long-term bond yields when it was released in early December. Other than that, the yield on the 10-year T-note fell continuously, from 4.33% at the end of November to below 3.80% on 27 December, its lowest since 19 July. Compared to the highest close of the year at 4.99% on 19 October, the

fall in the US 10-year yield reached 120bp. In narrow volumes, and with little investor response to the end-of-year economic data, it ended the year at 3.88%, a monthly fall of 45bp that sent it back to its end of 2022 level. Expectations of rapid cuts in key interest rates in 2024 could explain such a result. The FOMC meeting on 12/13 December was decisive: Jerome Powell's comments confirmed that the policy rate hike cycle was over and forecasts showed that most FOMC members consider that significantly lower rates would be appropriate in 2024 (4.625% for the median level from 5.375% at the end of 2023), which was not the case after the September meeting when the median level of these projections for the end of 2024 was 5.125%.

In the Eurozone, the 10-year Bund yield (2.45% at the end of November) gradually eased to 1.90% on 27 December, its lowest in more than a year, with bond market activity very light in the last week of the year. It ended December at 2.02% (-42bp in one month and -55bp compared to the end of 2022). The 2-year Bund yield eased by 42bp in one month to end at 2.40%, its lowest since the mini crisis triggered by the bankruptcies of several US regional banks in March.

Peripheral eurozone government bond markets did not suffer from the announcement of the reduction in reinvestments of Pandemic Emergency Purchase Programme (PEPP) assets in the second half of 2024, which accompanied the ECB's status quo on key rates. The announcement removed one element of uncertainty since it was made clear that these reinvestments will continue until the end of 2024. The Italian 10-year yield fell by 53bp to 3.70% and Spanish and Portuguese yields fell by 48bp to 2.99% and 2.66%, respectively.

In 2023, the portfolio delivered a strong performance of + 5.22 % (gross of fees). This strong performance is mainly due to the positive contribution of the carry effect (+ 3.02 %) and the spread effect (+ 1.81 %).

We stuck to a relatively low exposure to both rates (modified duration :0.84 year) and credit (Duration Times Spread- DTS: 1.41 years) in a very volatile context. The portfolio offers a very significant yield (4.40 % annualized) which represents in our view a very good investment opportunity for the year to come.

Thanks to the positive current yield of the portfolios (YTM) achieved end 2022 (after the strong yields increases, we witnessed in 2022), we had the base to get a positive carry effect. This effect is by far the main contributor to the performance. It helped to deliver positive performance month after month, even though ST yields continued to move up, reaching a high in early October.

Another key factor is the strong compression of credit spreads since March 2023 which brought another positive effect, the "spread effect".

Lastly, the significant rally of rates over the Q4 of 2023 considerably helped us to get the third positive effect: the "duration effect".

CoRe Series - CoRe Champions

CoRe Champions returned 9.19% (gross of ongoing charge) during 2023.

On the equity side, the best performing funds were the FAM MSCI World Index Fund, Smart Factors US FAM Fund, Smart Factors World FAM Fund, FAM Global Equity Fund and S&P500 Index Fund. There was some strong performance in the Fineco AM ETF range which are held at small weights including the Information Technology, Semiconductor, and Cyber Security ETFs. Fineco AM MSCI World Consumer Staples ESG Leaders UCITS ETF was the sole negative contributor.

On the fixed income side, performance was strong and led by the Fidelity Euro Bond FAM Fund, Amundi Euro Bond FAM Fund, and Schroder Euro Bond FAM Fund. There was also notably strong performance from the Fineco AM Investment Grade Euro Agg Bond Fund and Fineco AM Euro Inflation Linked Bond Fund. The Euro Hedged US Dollar Bond FAM Fund which is a smaller fund weight posted negative performance.

On the flexible side, the Vontobel Flexible Equity Strategy was the strongest followed by M&G Optimal Income and Amundi Strategic Bond, while Invesco Global Total Return and Nordea Stable Performance had smaller positive returns.

CoRe Series - CoRe Balanced Opportunity

In 2023, CoRe Balanced Opportunity has risen of 5.30% net of fees.

The key drivers of our performance came from first equities which have added 226 bps. Our underweight over equities has explained our relative underperformance. The main contributors to equity returns have been Fineco AM Smart Factors World Fund (57 bps), FAM Fund Global Equities (27 bps) and Fidelity World FAM Fund (31 bps). Some overperformance can be stressed in absolute terms on ETF Fineco AM MSCI World Semiconductors and Semiconductor Equipment UCITS ETF (+81.38%), Fineco AM MSCI World Information Technology ESG Leaders 20% Capped UCITS ETF (+57.57%), Fineco AM MSCI ACWI IMI Cyber Security UCITS ETF (+34.34%) even if these positions have micro weights.

On fixed income side, the main positive contributor have been EUR Corporate funds which have benefitted from carry effect, appetite for subordinated financials. Most of EUR Corp funds have delivered a return close to 8% over the year. The second positive contributor have been EUR AGG funds which have added 155 bps following ECB meetings and last inflation figures at lowest levels since September 2021 with Fidelity Euro Bond FAM Fund which thanks to the highest duration above 8 has overperformed others peers by delivering a return of 8.18% over 2023.

Some active contributors have also added values like Flexibles funds as for 161 bps notably Invesco Global Total Return FAM Fund as for 54 bps with a more defensive stance with less credit risk and govies in his allocation on US notably. The other flexible has been M&G Optimal Income FAM Fund (+83 bps over 2024) which had implemented some long positions over CDS HY indexes. The other flexible is Nordea Stable Performance FAM Fund which has delivered a return of 24 bps benefitting of US equity exposure. The 2 other active bets have been Alternatives with Henderson Gartmore FD UK Absolute Return sold in Q2 23 and which has added 32 bps, Euro linker with Fineco AM Euro Inflation Linked Government Bond Fund which has added 21 bps and at last Ultra Short Term Bond SRI Fund strengthened during mid year which has added 20 bps. Meanwhile, Fineco AM US Dollar Bond Fund added in April 2023 has been flat of -2 bps.

Concerning the main transactions, we have added in April Fineco AM US Dollar Bond Fund (2.7%) and Fineco AM Euro Inflation Linked Government Bond Fund (1.91%) in Q2 23. Furthermore, we have added on liquidity fund Ultra Short Term SRI FAM Fund. As for EUR flexibles, we have reduced Invesco Global Total Return FAM Fund (-6.54%), M&G Optimal Income FAM Fund (-6.94%) and Nordea Stable Performance FAM Fund (-6.7%). As for Credit corp funds, we have reduced Fineco AM Euro Credit Bond Fund (-0.46%), Fineco AM Euro Corporate Bond Fund (-1.06%) whom allocation will converge to Fineco AM Euro Corp on the coming weeks. Concerning equities, we have added Global Sustain Paris Aligned FAM Fund (1.2%) and Fineco AM Global Equities Income Fund (2.4%). As for alternatives, we have taken our profit over Janus Henderson Absolute Return FAM Fund in Q2 23. As for futures, we have implemented roll over short position over Japanese 10 year Dec 2023 at end of December to get March 2024 maturity - long positions over US 2 year rates futures and short positions over US 10 year rates have been closed in June 2023.

CoRe Series - CoRe Champions Emerging Markets

CoRe Champions Emerging Markets returned 7.31% (gross of ongoing charge) during 2023.

CoRe Champions Emerging Markets is split 50/50 equity and fixed income.

In the equity bucket, China was a negative detractor through the JPMorgan China A-Shares Opportunities FAM Fund given ongoing concerns about the property sector and sluggish economic growth. Global EM Equity funds contributed positively, led by the RBC EM Value Equity Fund and FAM MSCI EM Index. The Federated Hermes Small/Mid Cap Fund had small positive return, while the Vontobel mtx Sustainable Emerging Market Leaders and Invesco Emerging Markets Equity FAM Fund slipped.

In the fixed income bucket, positive contributions came from both EM Local Currency Funds and EM Hard Currency Euro Hedged Funds. EM Local Currency is ahead of Hard Currency year to date given strong performance of selective EM FX and local rates. The DPAM EM Local Fund was the best performing, followed by the PIMCO EM Local and GAM EM Local Fund. On the Hard Currency side, the Vontobel Emerging Markets Debt FAM Fund and Emerging Markets Debt FAM Fund led the way, while the Jupiter Short Duration EM Debt fund has provided protection from higher rates, and the Amundi Emerging Markets Bond FAM Fund has lagged albeit still positive.

CoRe Series - CoRe Balanced Conservative

In 2023, CoRe Balanced Conservative has risen of 5.25% net of fees.

The key drivers of our performance came from fixed income side with first of all EUR Corporate funds which have benefitted from carry effect, appetite for subordinated financials. Most of EUR Corp funds have delivered a return close to 8% over the year. The second positive contributor have been EUR AGG funds which have added 190 bps following ECB meetings and last inflation figures at lowest levels since September 2021 with Fidelity Euro Bond FAM Fund which thanks to the highest duration above 8 has overperformed others peers by delivering a return of 8.18% over 2023.

Concerning equities, they have added 106 bps. Our underweight over equities has explained our relative underperformance. Moreover, the main contributors to equity returns have Fineco AM Smart Factors World Fund (27 bps), FAM Fund Global Equities (11 bps) and Fidelity World FAM Fund (11 bps). Some overperformance can be stressed in absolute terms on ETF Fineco AM MSCI World Semiconductors and Semiconductor Equipment UCITS ETF (+81.38%), Fineco AM MSCI World Information Technology ESG Leaders 20% Capped UCITS ETF (57.57%), Fineco AM MSCI ACWI IMI Cyber Security UCITS ETF (+34.34%) even if these positions have micro weights.

Some active contributors have also added values like Flexibles funds as for 128 bps notably FAM Fund Invesco Global Total Return FAM Fund as for 51 bps with a more defensive stance with less credit risk and govies in his allocation on US notably. The second flexible has been M&G Optimal Income FAM Fund (+61 bps over 2024) which had implemented some long positions over CDS HY indexes. The other flexible is Nordea Stable Performance FAM Fund which has delivered a return of 16 bps benefitting of US equity exposure. The 2 other active bets have been Alternatives with Henderson Gartmore FD UK Absolute Return sold in Q2 23 and which has added 28 bps, Euro linker with Fineco AM Euro Inflation Linked Government Bond Fund which has added 19 bps and at last Ultra Short Term Bond SRI Fund strengthened during mid year which has added 21 bps. Meanwhile, Fineco AM US Dollar Bond Fund added in April 2023 has been flat of -3 bps.

Concerning the main transactions, we have added in April Fineco AM US Dollar Bond Fund (2.66%) and Fineco AM Euro Inflation Linked Government Bond Fund (1.86%) in Q2 23. Furthermore, we have added on liquidity fund Ultra Short Term SRI FAM Fund. As for EUR flexibles, we have reduced Invesco Global Total Return FAM Fund (-7.54%), M&G Optimal Income FAM Fund (-5.01%) and Nordea Stable Performance FAM Fund (-3.15%). As for Credit corp funds, we have reduced Fineco AM Euro Credit Bond Fund (-1.11%), Fineco AM Euro Corporate Bond Fund (-1.12%) whom allocation will converge to Fineco AM Euro Corp on the coming weeks. Concerning equities, we have added Global Sustain Paris Aligned FAM Fund (1.1%) and Fineco AM Global Equities Income Fund (0.91%). As for alternatives, we have taken our profit over Janus Henderson Absolute Return FAM Fund in Q2 23. As for futures, we have implemented roll over short position over Japanese 10 year Dec 2023 at end of December to get March 2024 maturity - long positions over US 2 year rates futures and short positions over US 10 year rates have been closed in June 2023.

Concerning transactions changes, we have added on short term part with Ultra Short Term Bond SRI FAM Fund (4.93%), Inflation linked part with Fineco AM Euro Inflation Linked Government Bond Fund (2,96%), the two Corporates ETF Fineco AM MSCI USD IG Liquid SRI Sustainable Corporate Bond UCITS ETF (1,5%) and Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel Corporate Bond UCITS ETF (1,59%) but also some new equities FAM ETF and mutual funds: Fineco AM Global Premium Equities Fund (1,35%), FAM Funds Global Equities (0.79%) and Global Listed Infrastructure FAM Fund (0.59%). As for sell side, We have reduced Eur corp part with Euro Corporate Fixed income FAM Fund (-3,57%), part of fixed income flexible fund like BSF Euro Strategic (-3,35%) and JPM Income Opportunity Fund (-2.79%).

CoRe Series - CoRe Multi-Asset Income

The CoRe Multi Asset Income Fund returned +4.4% (gross of ongoing charge) during 2023.

The fund has been positioned with a slight underweight in equities and overweight to HY and Corporate Credit. The fund was short duration for most of the year but we reduced this position into year end.

Within the equity building block the top drivers of performance have been the Fidelity Global Dividend FAM Fund and the Fineco AM Smart Factors World Fund. Both funds benefitted from their quality growth style tilts while The Fidelity Global

Dividend FAM fund has benefitted from its quality growth style tilt and positive stock selection in Financials (Progressive Corp and Munich Re), Industrials (Relx and Schneider) and IT (TSMC).

The main detractors from performance have been the European Equity Value FAM Fund, which underperformed YTD due to its Technology underweight and poor stock selection in Materials (Anglo American) and Energy (Neste), and the Fineco AM Global Equities Income Fund which underperformed the broader markets due to its Income Style tilt.

In Fixed Income, the funds European Corporates, and Emerging Market Hard Currency (Euro hedged) allocations were the main positive contributors while the overweight to European Inflation linkers also contributed positively.

In the Flexibles building block, the M&G Optimal Income FAM fund was the main positive contributor YTD.

CoRe Series - CoRe Aggressive

CoRe Aggressive returned 11.28% (gross of ongoing charge) during 2023.

On the equity side, the best performing funds have been the FAM MSCI World Index Fund, Smart Factors World FAM Fund, FAM Global Equity Fund, Fidelity World FAM Fund, Stoxx Europe 600 FAM Fund and S&P500 Index Fund. There was some strong performance in the Fineco AM ETF range which are held at small weights including the Information Technology, Semiconductor, and Cyber Security ETFs. Fineco AM MSCI World Consumer Staples ESG Leaders UCITS ETF was the only negative performance contributor.

On the fixed income side, Fidelity Euro Bond FAM Fund, Fineco AM Investment Grade Euro Agg Bond Fund and Schroders Euro Bond FAM were the best performers. The Euro Hedged US Dollar Bond Fund was the sole negative contributor.

CoRe Series - CoRe Target Allocation 25

In 2023, CoRe Target Allocation 25 has risen of 6.35% net of fees.

The key drivers of our performance came from first equities which have added 425 bps. Our underweight over equities has explained our relative underperformance. The main contributors to equity returns have been FAM MSCI World Index Fund (208 bps), Fineco AM Global Premium Equities Fund (57 bps) and Fidelity World FAM Fund (91 bps). Some overperformance can be stressed in absolute terms on ETF Fineco AM MSCI World Semiconductors and Semiconductor Equipment UCITS ETF (+81.38%), Fineco AM MSCI World Information Technology ESG Leaders 20% Capped UCITS ETF (+57.57%), Fineco AM MSCI ACWI IMI Cyber Security UCITS ETF (+34.34%) even if these positions have micro weights.

On fixed income side, the main positive contributor have been EUR AGG funds which have added 239 bps following ECB meetings and last inflation figures at lowest levels since September 2021 with Fidelity Euro Bond FAM Fund which thanks to the highest duration above 8 has overperformed others peers by delivering a return of 8.18% over 2023. The second main positive contributor on fixed income have been EUR Corporate funds (154 bps) which have benefitted from carry effect, appetite for subordinated financials. Most of EUR Corp funds have delivered a return close to 8% over the year.

Some active contributors have also added values like Euro linker with Fineco AM Euro Inflation Linked Government Bond Fund which has added 30 bps and at last Ultra Short Term Bond SRI Fund strengthened during mid year which has added 29 bps. Meanwhile, Fineco AM US Dollar Bond Fund added in April 2023 has been flat.

Concerning the main transactions, we have added in April Fineco AM US Dollar Bond Fund (2.74%) and Fineco AM Euro Inflation Linked Government Bond Fund (2.63%) in Q2 23. Furthermore, we have added on liquidity fund Ultra Short Term SRI FAM Fund. Concerning EUR AGG, we have reduced Schroder Euro Bond FAM Fund (-3.03%) and Fidelity Euro Bond FAM Fund (-1.74%) As for EUR flexible, we have sold in Q2 23 BSF Fixed Income Strategies (-5.41%), SLI Global SICAV Absolute Return (-4.06%). As for alternatives, we have taken our profit over Janus Henderson Absolute Return FAM Fund in Q2 23. Concerning equities, we have reduced Fineco AM Global Premium Equities Fund during H2 23 (-1.17%).

CoRe Series - CoRe Target Allocation 25 (II)

In 2023, CoRe Target Allocation 25 II has risen of 6.40% net of fees.

The key drivers of our performance came from first equities which have added 425 bps. Our underweight over equities has explained our relative underperformance. The main contributors to equity returns have been FAM MSCI World Index Fund (208 bps), Fineco AM Global Premium Equities Fund (57 bps) and Fidelity World FAM Fund (91 bps). Some overperformance can be stressed in absolute terms on ETF Fineco AM MSCI World Semiconductors and Semiconductor Equipment UCITS ETF (+81.38%), Fineco AM MSCI World Information Technology ESG Leaders 20% Capped UCITS ETF (+57.57%), Fineco AM MSCI ACWI IMI Cyber Security UCITS ETF (+34.34%) even if these positions have micro weights.

On fixed income side, the main positive contributor have been EUR AGG funds which have added 239 bps following ECB meetings and last inflation figures at lowest levels since September 2021 with Fidelity Euro Bond FAM Fund which thanks to the highest duration above 8 has overperformed others peers by delivering a return of 8.18% over 2023. The second main positive contributor on fixed income have been EUR Corporate funds (154 bps) which have benefitted from carry effect, appetite for subordinated financials. Most of EUR Corp funds have delivered a return close to 8% over the year.

Some active contributors have also added values like Euro linker with Fineco AM Euro Inflation Linked Government Bond Fund which has added 30 bps and at last Ultra Short Term Bond SRI Fund strengthened during mid year which has added 29 bps. Meanwhile, Fineco AM US Dollar Bond Fund added in April 2023 has been flat.

Concerning the main transactions, we have added in April Fineco AM US Dollar Bond Fund (2.74%) and Fineco AM Euro Inflation Linked Government Bond Fund (2.63%) in Q2 23. Furthermore, we have added on liquidity fund Ultra Short Term SRI FAM Fund. Concerning EUR AGG, we have reduced Schorder Euro Bond FAM Fund (-3.03%) and Fidelity Euro Bond FAM Fund (-1.74%). As for EUR flexible, we have sold in Q2 23 BSF Fixed Income Strategies (-5.41%), SLI Global SICAV Absolute Return (-4.06%). As for alternatives, we have taken our profit over Janus Henderson Absolute Return FAM Fund in Q2 23. Concerning equities, we have reduced Fineco AM Global Premium Equities Fund during H2 23 (-1.17%).

CoRe Series - CoRe Target Allocation 25 (III)

In 2023, CoRe Target Allocation 25 III has risen of 6.17% net of fees.

The key drivers of our performance came from first equities which have added 425 bps. Our underweight over equities has explained our relative underperformance. The main contributors to equity returns have been FAM MSCI World Index Fund (208 bps), Fineco AM Global Premium Equities Fund (57 bps) and Fidelity World FAM Fund (91 bps). Some overperformance can be stressed in absolute terms on ETF Fineco AM MSCI World Semiconductors and Semiconductor Equipment UCITS ETF (+81.38%), Fineco AM MSCI World Information Technology ESG Leaders 20% Capped UCITS ETF (+57.57%), Fineco AM MSCI ACWI IMI Cyber Security UCITS ETF (+34.34%) even if these positions have micro weights.

On fixed income side, the main positive contributor have been EUR AGG funds which have added 239 bps following ECB meetings and last inflation figures at lowest levels since September 2021 with Fidelity Euro Bond FAM Fund which thanks to the highest duration above 8 has overperformed others peers by delivering a return of 8.18% over 2023. The second main positive contributor on fixed income have been EUR Corporate funds (154 bps) which have benefitted from carry effect, appetite for subordinated financials. Most of EUR Corp funds have delivered a return close to 8% over the year.

Some active contributors have also added values like Euro linker with Fineco AM Euro Inflation Linked Government Bond Fund which has added 30 bps and at last Ultra Short Term Bond SRI Fund strengthened during mid year which has added 29 bps. Meanwhile, Fineco AM US Dollar Bond Fund added in April 2023 has been flat.

Concerning the main transactions, we have added in April Fineco AM US Dollar Bond Fund (2.74%) and Fineco AM Euro Inflation Linked Government Bond Fund (2.63%) in Q2 23. Furthermore, we have added on liquidity fund Ultra Short Term SRI FAM Fund. Concerning EUR AGG, we have reduced Schorder Euro Bond FAM Fund (-3.03%) and Fidelity Euro Bond FAM Fund (-1.74%) As for EUR flexible, we have sold in Q2 23 BSF Fixed Income Strategies (-5.41%), SLI Global SICAV Absolute Return (-4.06%). As for alternatives, we have taken our profit over Janus Henderson Absolute Return FAM Fund in Q2 23. Concerning equities, we have reduced Fineco AM Global Premium Equities Fund during H2 23 (-1.17%).

CoRe Series - CoRe Target Allocation 25 (IV)

In 2023, CoRe Target Allocation 25 IV has risen of 6.20% net of fees.

The key drivers of our performance came from first equities which have added 425 bps. Our underweight over equities has explained our relative underperformance. The main contributors to equity returns have been FAM MSCI World Index Fund (208 bps), Fineco AM Global Premium Equities Fund (57 bps) and Fidelity World FAM Fund (91 bps). Some overperformance can be stressed in absolute terms on ETF Fineco AM MSCI World Semiconductors and Semiconductor Equipment UCITS ETF (+81.38%), Fineco AM MSCI World Information Technology ESG Leaders 20% Capped UCITS ETF (+57.57%), Fineco AM MSCI ACWI IMI Cyber Security UCITS ETF (+34.34%) even if these positions have micro weights.

On fixed income side, the main positive contributor have been EUR AGG funds which have added 239 bps following ECB meetings and last inflation figures at lowest levels since September 2021 with Fidelity Euro Bond FAM Fund which thanks to the highest duration above 8 has overperformed others peers by delivering a return of 8.18% over 2023. The second main positive contributor on fixed income have been EUR Corporate funds (154 bps) which have benefitted from carry effect, appetite for subordinated financials. Most of EUR Corp funds have delivered a return close to 8% over the year.

Some active contributors have also added values like Euro linker with Fineco AM Euro Inflation Linked Government Bond Fund which has added 30 bps and at last Ultra Short Term Bond SRI Fund strengthened during mid year which has added 29 bps. Meanwhile, Fineco AM US Dollar Bond Fund added in April 2023 has been flat.

Concerning the main transactions, we have added in April Fineco AM US Dollar Bond Fund (2.74%) and Fineco AM Euro Inflation Linked Government Bond Fund (2.63%) in Q2 23. Furthermore, we have added on liquidity fund Ultra Short Term SRI FAM Fund. Concerning EUR AGG, we have reduced Schorder Euro Bond FAM Fund (-3.03%) and Fidelity Euro Bond FAM Fund (-1.74%) As for EUR flexible, we have sold in Q2 23 BSF Fixed Income Strategies (-5.41%), SLI Global SICAV Absolute Return (-4.06%). As for alternatives, we have taken our profit over Janus Henderson Absolute Return FAM Fund in Q2 23. Concerning equities, we have reduced Fineco AM Global Premium Equities Fund during H2 23 (-1.17%).

CoRe Series - CoRe Target Allocation 50

In 2023, CoRe Target Allocation50 has risen of 7.56% net of fees.

The key drivers of our performance came from first equities which have added 798 bps. Our underweight over equities has explained our relative underperformance. The main contributors to equity returns have been FAM MSCI World Index Fund (324 bps), Fineco AM Global Premium Equities Fund (140 bps) and Fidelity World FAM Fund (196 bps). Some overperformance can be stressed in absolute terms on ETF Fineco AM MSCI World Semiconductors and Semiconductor Equipment UCITS ETF (+81.38%), Fineco AM MSCI World Information Technology ESG Leaders 20% Capped UCITS ETF (+57.57%), Fineco AM MSCI ACWI IMI Cyber Security UCITS ETF (+34.34%) even if these positions have micro weights.

On fixed income side, the main positive contributor have been EUR AGG funds which have added 220 bps following ECB meetings and last inflation figures at lowest levels since September 2021 with Fidelity Euro Bond FAM Fund which thanks to the highest duration above 8 has overperformed others peers by delivering a return of 8.18% over 2023. The second main positive contributor on fixed income have been EUR Corporate funds (51 bps) which have benefitted from carry effect, appetite for subordinated financials. Most of EUR Corp funds have delivered a return close to 8% over the year.

Some active contributors have also added values like Euro linker with Fineco AM Euro Inflation Linked Government Bond Fund which has added 17 bps and at last Ultra Short Term Bond SRI Fund strengthened during mid year which has added 11 bps. Meanwhile, Fineco AM US Dollar Bond Fund added in April 2023 has been flat of -2 bps.

Concerning the main transactions, we have added in April Fineco US Dollar Bond Fund (1.49%) and Fineco AM Euro Inflation Linked Government Bond Fund (0.61%) in Q2 23. Concerning EUR AGG, we have reduced Schorder Euro Bond FAM Fund (-3.29%) Euro bond FAM (-1.2%) and Fidelity Euro Bond FAM Fund (-3.45%). Concerning equities, we have reduced Fineco AM Global Premium Equities Fund during H2 23 (-2.37%), FAM MSCI World Index Fund (-1.89%) and Fidelity World FAM Fund (-1.75%).

CoRe Series - CoRe Target Allocation 50 (II)

In 2023, CoRe Target Allocation 50 II has risen of 7.51% net of fees.

The key drivers of our performance came from first equities which have added 798 bps. Our underweight over equities has explained our relative underperformance. The main contributors to equity returns have been FAM MSCI World Index Fund (324 bps), Fineco AM Global Premium Equities Fund (140 bps) and Fidelity World FAM Fund (196 bps). Some overperformance can be stressed in absolute terms on ETF Fineco AM MSCI World Semiconductors and Semiconductor Equipment UCITS ETF (+81.38%), Fineco AM MSCI World Information Technology ESG Leaders 20% Capped UCITS ETF (+57.57%), Fineco AM MSCI ACWI IMI Cyber Security UCITS ETF (+34.34%) even if these positions have micro weights.

On fixed income side, the main positive contributor have been EUR AGG funds which have added 220 bps following ECB meetings and last inflation figures at lowest levels since September 2021 with Fidelity Euro Bond FAM Fund which thanks to the highest duration above 8 has overperformed others peers by delivering a return of 8.18% over 2023. CoRe Series - CoRe Target Allocation 100

The CoRe Series – Target Allocation 100 fund returned 10.7% net of fees in 2023.

Sector wise the fund has been overweight defensives such as Health Care and Consumer Staples while being underweight Information Technology, Consumer Discretionary, and Communication Services.

All of the funds developed global equity allocations contributed positively in 2023. Top performances coming from the CoRe FAM MSCI World Index Fund, the Fidelity Global Dividend FAM fund and the Fineco AM Global Equity Fund.

The Fidelity Global Dividend FAM fund has benefitted from its quality growth style tilt and positive stock selection in Financials (Progressive Corp and Munich Re), Industrials (Relx and Schneider) and IT (TSMC). The Fineco AM Global Equity Fund has benefited from its overweight to Energy and positive stock picking in IT (Microsoft), Financials (London SE) and Industrials (Kingspan).

The main detractors in 2023 have been the Fineco AM Global Premium Equities Fund hurt by stock selection in healthcare (Bayer, CVS Health) and Consumer goods (Estee Lauder) and the other detractor has been the Fineco AM Global Equities Income Fund which has underperformed the broader markets due to Income Style tilts.

CoRe Series - CoRe Target Allocation 100 (II)

The CoRe Series – Target Allocation 100 fund returned 10.7% net of fees in 2023.

Sector wise the fund has been overweight defensives such as Health Care and Consumer Staples while being underweight Information Technology, Consumer Discretionary, and Communication Services.

All of the funds developed global equity allocations contributed positively in 2023. Top performances coming from the CoRe FAM MSCI World Index Fund, the Fidelity Global Dividend FAM fund and the Fineco AM Global Equity Fund.

The Fidelity Global Dividend FAM fund has benefitted from its quality growth style tilt and positive stock selection in Financials (Progressive Corp and Munich Re), Industrials (Relx and Schneider) and IT (TSMC). The Fineco AM Global

Equity Fund has benefited from its overweight to Energy and positive stock picking in IT (Microsoft), Financials (London SE) and Industrials (Kingspan).

The main detractors in 2023 have been the Fineco AM Global Premium Equities Fund hurt by stock selection in healthcare (Bayer, CVS Health) and Consumer goods (Estee Lauder) and the other detractor has been the Fineco AM Global Equities Income Fund which has underperformed the broader markets due to Income Style tilts.

CoRe Series - CoRe Target Allocation 100 (III)

The CoRe Series – Target Allocation 100 fund returned 10.6% net of fees in 2023.

Sector wise the fund has been overweight defensives such as Health Care and Consumer Staples while being underweight Information Technology, Consumer Discretionary, and Communication Services.

All of the funds developed global equity allocations contributed positively in 2023. Top performances coming from the CoRe FAM MSCI World Index Fund, the Fidelity Global Dividend FAM fund and the Fineco AM Global Equity Fund.

CoRe Series - Invesco Pan European High Income FAM Fund

In an attempt to tackle inflationary pressures, the European Central Bank raised interest rates in a series of incremental steps. The last hike in September took the key interest rate to a record high of 4%, whereupon the ECB signalled that this increase was likely to be its last. With underlying price pressures subsiding as the year end approached, investors became more confident that the ECB could start to cut interest rates in the months ahead. In December ECB President Christine Lagarde, however, pushed back on imminent cuts to interest rates by reaffirming that borrowing costs would remain at record highs despite lower inflation expectations. With industrial production falling, trade with China slowing and consumer spending squeezed due to rising prices and higher borrowing costs, the ECB downgraded its growth forecast for 2024. It was a positive year for European corporate bond markets with both investment grade and high yield bonds delivering healthy returns. In terms of credit spreads, euro investment grade narrowed from 167bps to 136bps and euro high yield moved from 498bps to 396bps. With investor sentiment bolstered by the prospect of lower borrowing costs, European

equities finished the year on a positive note, delivering strong gains for 2023. All sectors finished in positive territory with technology stocks, driven by excitement about the potential of artificial Credit was the biggest driver of performance with the largest contributions coming from high yield bonds and subordinated financials. There was also positive input from investment grade bonds, corporate hybrids and senior bank debt. Duration delivered positive returns on increasing optimism that the European Central Bank could start to cut interest rates in 2024 due to waning inflationary pressures. Returns from the fund's allocation to equities, bolstered by strong stock selection, were positive too. The largest individual contributors were Inditex (equity), SAP (equity) and UBS Group (senior bank debt). The unexpected write-down of Credit Suisse Additional Tier 1 (AT1) bonds when the bank was acquired by UBS was a negative factor, although the fund's other holdings in AT1s recovered strongly after the event. Currency costs, including hedging non-euro exposure, had a modest negative impact on returns. The fund continues to be biased towards higher yielding parts of the bond market but avoiding companies that are likely to face significant challenges in dealing with rising borrowing costs and weakening economic activity. The largest allocation by industry within the bond portion remains financials. By industry the biggest non-financial exposures are to food, utilities and pharmaceuticals. The fund also has exposure to relatively defensive credits such as investment grade corporate bonds. To broaden the opportunities for income and increase the opportunities for capital return, the fund also holds an allocation in European equities. We increased the credit quality of the portfolio during 2023 with exposure to high yielding credit reduced from 62% to 59%. Within this cohort, exposure to subordinated financials was cut from 21% to 19%. Exposure to equities was modestly raised from 17% to 18% in the first half of the year with no further adjustments. Within the equity allocation, the focus is on high-quality companies with strong balance sheets, healthy free cash flow generation and good management teams that are committed to and capable of returning that cash flow to shareholders where appropriate The Portfolio returned 11.32% (gross of ongoing charge) over the 12-month period to the end of December 2023.

CoRe Series - MFS Prudent Capital FAM Fund

For the twelve months ended December 31, 2023, the CoRe Series - MFS Prudent Capital FAM Fund (portfolio) provided a total return of 11.63% (net return) in EUR. This compares with a return of 19.60% (EUR) for the portfolio's benchmark, the MSCI World Index (net div).

During the reporting period, central banks around the world had to combat the strongest inflationary pressures in four decades, fueled by the global fiscal response to the pandemic, disrupted supply chains and the dislocations to energy markets stemming from the war in Ukraine. Interest rates rose substantially, but the effects of a tighter monetary policy may not have been fully experienced yet, given that monetary policy works with long and variable lags. Strains resulting from the abrupt tightening of monetary policy began to affect some parts of the economy, most acutely among small and regional US banks, which suffered from deposit flight as depositors sought higher yields on their savings. Additionally, activity in the US housing sector has slowed as a result of higher mortgage rates. China's abandonment of its Zero-COVID policy ushered in a brief uptick in economic activity in the world's second-largest economy in early 2023, although its momentum soon stalled as the focus turned to the country's highly indebted property development sector. In developed markets, consumer demand for services remained stronger than the demand for goods.

Early on, policymakers found themselves in the difficult position of trying to restrain inflation without tipping economies into recession. Despite the challenging macroeconomic and geopolitical environment, central banks focused on controlling price pressures while also confronting increasing financial stability concerns. Central banks had to juggle achieving their inflation mandates while using macroprudential tools (financial policies aimed at safeguarding the stability of the financial system) to keep banking systems liquid, a potentially difficult balancing act, and one that suggested that we may be nearing a peak in policy rates. As inflationary pressures eased toward the end of the period, financial conditions loosened in anticipation of easier monetary policy, boosting the market's appetite for risk. Rapid advancements in artificial intelligence were a focus for investors.

Normalizing supply chains, low levels of unemployment across developed markets and signs that inflation levels have peaked were supportive factors for the macroeconomic backdrop.

The portfolio's defensive asset allocation and its exposure to US treasuries, cash & cash equivalents and corporate debt detracted from performance relative to the MSCI World Index. The allocation to index options also hindered relative returns.

An underweight position and security selection within the information technology sector detracted from relative performance.

Within this sector, not owning strong-performing computer graphics processor maker NVIDIA, computer and personal electronics maker Apple, broadband communications and networking services company Broadcom and an underweight position in software giant Microsoft weakened relative results.

Stock selection within the communication services sector also hindered relative returns. Here, not owning shares of social networking service provider Meta Platforms and an overweight position in telecommunications company KDDI (Japan) hampered relative results.

Elsewhere, not owning shares of internet retailer Amazon.com and electric vehicle manufacturer Tesla detracted from relative returns. Additionally, overweight positions in specialized products manufacturer for the life science research and clinical diagnostics markets Bio-Rad Laboratories and brewer Heineken (Netherlands) further held back relative results.

An underweight position in the health care sector benefited relative performance. Within this sector, avoiding poor-performing pharmaceutical giant Pfizer and diversified medical products maker Johnson & Johnson contributed to relative returns.

The portfolio's underweight position and stock selection within both the financials and consumers staples sectors aided relative results, however, there were no individual stocks within those sectors, either in the portfolio or in the benchmark, that were among the portfolio's top relative contributors over the reporting period.

Stocks in other sectors that contributed to relative returns included overweight positions in business management solutions provider Sage Group (United Kingdom), online travel company Booking Holdings, real estate company LEG Immobilien (Germany), technology company Alphabet, software company Adobe Systems, property developer Barratt Developments (United Kingdom), enterprise software products maker Oracle and online business solutions provider Scout24 (Germany).

CoRe Series - CoRe Dividend

The CoRe Dividend fund returned +9.4% net of fees in 2023.

The fund is a diversified global equity fund of funds strategy with the objective to provide capital appreciation to investors over the long term.

The fund has benefitted from its Growth and Quality tilts and overweights to the Technology and Communication Services Sectors relative to comparator.

The fund's global income related allocations have been the strongest contributors to performance YTD with the Fidelity Global Dividend FAM Fund and the Fineco AM Global Equities Income Fund both aiding relative performance. The Fidelity Global Dividend FAM fund has benefitted from its quality growth style tilt and positive stock selection in Financials (Progressive Corp and Munich Re), Industrials (Relx and Schneider) and IT (TSMC).

The main detractors from performance YTD have been the fund's North American Value allocations. The M&G North American Value FAM Fund has underperformed the broader US market YTD due to its large underweight to the Information Technology sector and poor stock selection in healthcare, energy and utilities sectors. Similarly the US Equity Value FAM Fund has underperformed YTD due to its Technology underweight and poor stock selection in healthcare, energy, staples and utilities.

CoRe Series - CoRe Emerging Markets Equity

CoRe Emerging Markets Equity returned 5.21% (gross of ongoing charge) during 2023

The portfolio is split 65/25/5/5 on a regional basis between Global Emerging Markets, Asia, Latin America, and Eastern Europe.

Eastern Europe and Latin America were the best performing regions during 2023 where the fund holds the Schroders Emerging Europe Fund, and Aberdeen Latin American Equities Fund. Global Emerging Market Equities recorded marginally positive performance year to date with mixed returns amongst the funds – positive contributors include the RBC EM Value Equity Fund and MSCI EM Index FAM Fund. The Federated Hermes Small/Mid Cap Fund and JP Morgan EM Equity Fund had small positive return, while the Vontobel mtx Sustainable Emerging Market Leaders and Invesco Emerging Markets Equity FAM Fund slipped.

In Asia, China has been the main detractor with negative performance from JPMorgan China A-Shares Opportunities FAM Fund given ongoing concerns about the property sector and sluggish recovery post Covid-19, while the Schroders Asian Opportunities Fund and AC Asia Pacific Ex Japan Fund also posted negative returns.

CoRe Series - CoRe US Strategy

CoRe US Strategy returned 14.81% net of fees during 2023.

The main driver for positive contribution came from the passive blend building block, as the US market was mainly driven by the top 7 most capitalised companies. Active managers struggled to keep pace with the index, as most of them tended to underweight highly expensive mega-cap stocks. Allocation to more defensive/Value sectors/style resulted in the greatest underperformance. Specifically, Fineco AM Smart Factors US Fund and S&P 500 Index FAM Fund led performances, while the SPDR S&P US Consumer Staples Select Sector UCITS ETF and the iShares S&P 500 Utilities Sector UCITS ETF acted as worst detractors.

Justified by a highly uncertain macro and geopolitical context, the PM decided to adopt a more defensive and Value-oriented strategy. This was accomplished by selling out the Morgan Stanley US Advantage FAM Fund and the JP Morgan US Select fund, while allocating the proceeds to the US Equity Value FAM fund, M&G North American Value, and by adding to the portfolio three sectoral ETFs with exposure to US utilities, staples and energy.

CoRe Series - CoRe All Europe

CoRe All Europe returned +11.13% net of fees during 2023.

The main drivers of the performance in the portfolio were Value and Blend building blocks. Value as a factor did well in 2023, with investors favouring exposure to high-quality businesses with solid fundamentals. Small caps and high-dividend stocks lagged the broad market instead. Within sectors, tech and industrial stocks reported the best performances, while energy and staples names disappointed. Best contributors within the portfolio were European Stars Equity FAM fund and Amundi European Equity Value FAM Fund. On the opposite, the iShares Edge MSCI Europe Minimum Volatility UCITS ETF and the iShares MSCI Europe Consumer Staples Sector UCITS ETF acted as worst detractors.

Several changes were made during the year. The PM sold out the iShares Edge MSCI EUR MinVol ETF, the MFS Meridian European Value fund and the Wellington Strategic European Equity, while allocating the proceeds to the iShares Edge MSCI Europe Value Factor ETF and increasing the exposure to the Amundi European Equity Value FAM fund. Also, active bets on specific sectors were adjusted to reflect an over/underweight in those areas of the market considered more defensive/attractive like staples, healthcare and energy through the iShares MSCI Europe Consumer Staples ETF, iShares MSCI Europe Healthcare ETF and SPDR MSCI Europe Energy ETF.

CoRe Series - FAM Sustainable

The CoRe Series – FAM Sustainable fund returned 11.1% net of fees in 2023.

Relative to the broader market the fund has been positioned with an overweight to Industrials, Utilities and Financial Services while the fund has been underweight Technology, Consumer Discretionary and Energy. This positioning relative to the broader market is largely driven by the Thematic building block which focuses on best in class Sustainability focused funds.

Within the Thematic building block the main detractor from YTD performance has been the Global Listed Infrastructure FAM Fund. This fund has lagged the broader market due to its significant overweights to the Utilities and Real Estate sectors and zero weights in Information Technology and Consumer Discretionary sectors. However, YTD the fund is performing in line with peers.

The top performer has been the Global Sustain Paris Aligned FAM Fund which has benefitted from positive stock selection across Health Care, Technology and Financials.

Within the Global Building block the main negative contribution has come from the Fidelity World FAM fund which suffered from negative selection in Health Care, Consumer Staples and Utilities, although this has been somewhat offset by positive selection in Financials.

Top contributors to performance were the M&G Global Paris Aligned FAM fund and the Smart Factors US FAM Fund. M&G Paris Aligned benefitted from positive stock selection in Technology with overweights to Microsoft, Alphabet and Adobe while the Smart Factors US Fam Fund benefitted from similar overweight in the technology sector and Tesla.

CoRe Series - CoRe Global Opportunity

CoRe Global Opportunity returned +3.39% net of fees during 2023.

The Euro Govies, corporate and equity building blocks drove the positive performance. On the opposite, liquid alternatives and flexible allocation lagged the most. In fact, despite spending most of the period in a trading range, the November and December rally boosted both stocks and bonds.

Top performers were Fineco AM Bloomberg Euro Aggregate Treasury 10+ Year Index Fund and Global STARS Equity FAM Fund, while the worst detractors were the Amundi Metori Epsilon Global Trends Fund and the AXA World Funds - Global Strategic Bonds.

Over the period, the PM rationalized the portfolio, by focusing on three building blocks: fixed income, liquid alternatives, equities. In order to accomplish this, actively managed flexible and absolute return managers were sold. These include: Henderson Gartmore Fund United Kingdom Absolute Return Fund, Amundi Strategic Bond FAM fund, Candriam Bonds Total Return fund, AXA World Funds - Global Strategic Bonds, BlackRock Sustainable Fixed Income Strategies Fund, JPMorgan Funds SICAV - Global Bond Opportunities Fund, JPMorgan Investment Funds SICAV - Income Opportunity Fund and Morgan Stanley Investment Funds SICAV - Global Fixed Income Opportunities Fund. The proceeds have been allocated across different passive fixed income strategies that helped lowering the overall fund's costs while increasing flexibility in the implementation of markets views. These are: Fineco AM US Dollar Bond Fund, Fineco AM MSCI USD IG Liquid SRI Sustainable Corporate Bond UCITS ETF, Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel Corporate Bond UCITS ETF, Fineco AM Bloomberg Euro Aggregate Treasury 1-3 Year Index Fund, Fineco AM Bloomberg Euro Aggregate Treasury 5-7 Year Index Fund, Fineco AM Bloomberg Euro Aggregate Treasury 10+ Year Index Fund, Fineco AM Bloomberg Euro Government Inflation-Linked Bond All Maturities Index Fund, Amundi Emerging Markets Bond FAM Fund and the iShares CoRe Global Aggregate Bond UCITS ETF.

CoRe Series - CoRe Alternative

CoRe Alternative returned +2.21% net of fees in 2023.

Equity hedge and systematic global macro strategies contributed the most to the overall performance, while low-vol multistrategy and the relative value fixed income block underperformed the most. In a year where a few US mega-cap names drove equity markets toward new highs, global hedge fund strategies closed the year pretty flat. In the alternative universe, equity hedge and relative value strategies reported the best results in 2023, while CTAs and Event driven struggled, closing in red territory.

In the portfolio of CoRe Alternative, the Candriam Absolute Return Equity Market Neutral and the MAN Funds VI PLC - Man AHL TargetRisk acted as top performers, while Nordea 1 SICAV - Alpha 15MA Fund and the BlackRock Sustainable Fixed Income Strategies Fund dragged the most on final results.

During the period, no major changes were brought to the allocation.

Deloitte Audit Société à responsabilité limitée 20 Boulevard de Kockelscheuer L-1821 Luxembourg

To the Unitholders of CoRe Series 28-32, Place de la gare L-1616 Luxembourg Grand Duchy of Luxembourg

REPORT OF THE RÉVISEUR D'ENTREPRISES AGRÉÉS

Opinion

We have audited the annual accounts of CoRe Series (the "Company"), which comprise the balance sheet as at December 31, 2023, and the profit and loss account for the year then ended, and notes to the annual accounts, including a summary of significant accounting policies.

In our opinion, the accompanying annual accounts give a true and fair view of the financial position of the Company as at December 31, 2023, and of the results of its operations for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the annual accounts.

Basis for Opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the Commission de Surveillance du Secteur Financier (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "Responsibilities of the réviseur d'entreprises agréé for the Audit of the annual accounts" section of our report. We are also independent of the Company in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the annual accounts, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors is responsible for the other information. The other information comprises the information stated in the annual report including the management report but does not include the annual accounts and our report of the *réviseur d'entreprises agréé* thereon.

Our opinion on the annual accounts does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the annual accounts, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the annual accounts or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors and Those Charged with Governance for the annual accounts

The Board of Directors is responsible for the preparation and fair presentation of these annual accounts in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the annual accounts, and for such internal control as the Board of Directors determines is necessary to enable the preparation of annual accounts that are free from material misstatement, whether due to fraud or error.

In preparing the annual accounts, the Board of Directors] is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the réviseur d'entreprises agréé for the Audit of the annual accounts

Our objectives are to obtain reasonable assurance about whether the annual accounts as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the réviseur d'entreprises agréé that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these annual accounts.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the annual accounts, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors.
- Conclude on the appropriateness of Board of Directors use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the réviseur d'entreprises agréé to the related disclosures in the annual accounts or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the réviseur d'entreprises agréé. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the annual accounts, including the disclosures, and whether the annual accounts represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with	those charged with	governance reg	garding, among	g other matters,	the planned	scope and t	iming of the
audit and significant au	ıdit findings, includir	ng any significa	nt deficiencies	in internal contr	ol that we ide	entify during	our audit.

For Deloitte Audit, Cabinet de révision agréé

Yann Mérillou, *Réviseur d'entreprises agréé* Partner

Luxembourg, April 24, 2024

2 - Significant accounting policies

2.1 Presentation of financial statements

These financial statements are prepared in accordance with Luxembourg legal and regulatory requirements relating to undertakings for collective investment in transferable securities and generally accepted accounting principles in Luxembourg. The financial statements reflect the Net Asset Values ("NAV") as calculated on December 31, 2023 based on latest available market prices of the investments.

2.2 Valuation of assets

The value of Transferable Securities, Money Market Instruments and any financial liquid assets and instruments which are quoted or dealt in on a stock exchange or on a Regulated Market or any Other Regulated Market is based on their last available price at the time of valuation of the assets on the relevant stock exchange or market which is normally the main market for such assets.

In the event that any assets held in a Sub-Fund's portfolio on the relevant day are not quoted or dealt in on any stock exchange or on any Regulated Market, or on any Other Regulated Market or if, with respect of assets quoted or dealt in on any stock exchange or dealt in on any such markets, the last available price (as determined pursuant to the previous paragraph) is not representative of the fair market value of the relevant assets, the value of such assets is based on a reasonably foreseeable sales price determined prudently and in good faith by the Board of Directors of the Management Company.

Units or shares of open-ended UCIs are valued at their last determined and available Net Asset Value or, if such price is not representative of the fair market value of such assets, then the price is determined prudently and in good faith by the Board of Directors of the Management Company. Units or shares of a closed-ended UCI are valued at their last available market value.

The value of any cash on hand or on deposit bills and demand notes and accounts receivable, prepaid expenses, cash dividends, interest declared or accrued and not yet received, are deemed to be the full amount thereof, unless in any case the same is unlikely to be paid or received in full, in which case the value thereof is arrived at after making such discount as may be considered appropriate in such case to reflect the true value thereof.

2.3 Net realised gains or losses resulting from investments

The realised gains or losses resulting from the sales of investments are calculated on an average cost basis.

2.4 Foreign currency conversion

Assets and liabilities expressed in currencies other than the Base Currency of the relevant Sub-Fund are converted at exchange rates prevailing as at December 31, 2023. Transactions in foreign currencies are converted into the Base Currency of the relevant Sub-Fund at exchange rates prevailing on the transaction dates.

The exchange rates used as at December 31, 2023 are as follows:

1 EUR =	1.61890	AUD	1 EUR =	5.36595	BRL
1 EUR =	1.45660	CAD	1 EUR =	0.92970	CHF
1 EUR =	4 279.41425	COP	1 EUR =	7.45455	DKK
1 EUR =	0.86655	GBP	1 EUR =	17 008.29635	IDR
1 EUR =	155.73355	JPY	1 EUR =	18.70670	MXN
1 EUR =	11.21850	NOK	1 EUR =	1.7447	NZD
1 EUR =	11.13250	SEK	1 EUR =	32.62475	TRY
1 EUR =	1.10465	USD	1 EUR =	43.12560	UYU
1 EUR =	20.2013	ZAR			

2.5 Forward foreign exchange contracts

Forward foreign exchange contracts are valued at the forward rate applicable at the Statement of Net Assets date for the remaining period until maturity. Unrealised appreciation or depreciation resulting from outstanding forward foreign exchange contracts, if any, are recorded in the Statement of Net Assets.

Net change in unrealised profits and losses and net realised gains and losses are recorded in the Statement of Operations and Changes in Net Assets.

2.6 Swaps contracts

Swaps contracts are posted off-balance sheet and valued on the basis of the recalculated market prices by using the traditional elements of pricing considering the value, the volatility of the underlying, the interest rates and the residual value of the swap. Swaps are disclosed in the Statement of Net Assets under caption "swaps at market value".

Effective interest expense/income on swaps is booked in full in the "Statement of Operations and Changes in Net Assets". Accrued expense/income on swaps are netted on each Net Asset Valuation calculation date for each swap contract and the resulting net balance is posted per swap, either as interest expense on swap or interest income on swap, in the "Statement of Operations and Changes in Net Assets".

2.7 Financial Futures contracts

Futures contracts are disclosed in the Statement of Net Assets under the item "Unrealised appreciation on financial futures contracts" and "Unrealised depreciation on financial futures contracts".

Financial futures contracts are valued at the quoted price available on an official stock exchange.

Net realised and net change in unrealised gain/(loss) on financial futures contracts are recorded in the "Statement of Operations and Changes in Net Assets". When the contract is closed, the concerned Sub-Fund records a realised gain or loss equal to the difference between the proceeds from (or cost of) the closing transaction and the opening transaction.

2.8 Options

The liquidating value of option contracts traded on a stock exchange or on another Regulated Market is based upon the last available settlement prices of these contracts on stock exchange and/or Regulated Markets which the particular options contracts are traded by the Fund; provided that if an option contract could not be liquidated on the day with respect to which assets are being determined, the basis for determining the liquidating value of such contract is such value as the Board of Directors of the Management Company may deem fair and reasonable. The liquidating value of options contracts not traded on exchanges or on Other Regulated Markets and/or Regulated Markets shall mean their net liquidating value determined, pursuant to the policies established in good faith by the Board of Directors of the Management Company, on a basis consistently applied for each different variety of contracts.

Net realised and net change in unrealised gain/(loss) on options contracts are recorded in the "Statement of Operations and Changes in Net Assets".

2.9 Repurchase agreements

Repurchase agreements (Repos) are equivalent to borrowings guaranteed by underlying assets presented in the securities portfolio of the Sub-Fund which remains exposed to market risk. Reverse Repurchase agreements (Reverse Repos) are similar to guaranteed loans. In this case, the Sub-Fund is not subject to the risk of depreciation in the value of the underlying assets. Repos and Reverse Repos are regarded as borrowings and loans, respectively, of the sum of liquid assets received and/or paid.

2.10 Contracts for difference (CFD)

At each valuation date, the difference in price between the opening price and the current market price of the underlying security or index to the CFD is recorded as the market value (unrealised gain or loss) of the contract; when the Sub-Fund enters a closing transaction, the difference between the opening notional amount and the closing notional amount of the underlying security is recorded as a realised gain or loss under captions Net realised profit/(loss) on swaps and CFD in Statement of Operations and Changes in Net Assets. Initial margin deposits may be made in cash upon entering in CFD. Subsequent payments, referred to as variation margins, are made or received by the Sub-Fund periodically and are based on changes in the market value of open CFD contracts.

2.11 Income

Dividends are credited to income on the ("ex-dividend") date. Interest income is accrued on a daily basis.

2.12 Combined financial statements

The figures of each Sub-Fund are presented in their respective Base Currency. The combined financial statements are expressed in Euros and the sum of the Sub-Funds' net assets which are in another currency are converted in Euros at the exchange rates prevailing at year end.

2.13 Securities lending

In securities lending and borrowing transactions, a lender transfers securities or instruments to a borrower, subject to a commitment that the borrower will return equivalent securities or instruments on a future date or when requested by the lender. The borrower must provide a guarantee, in the form of collateral, that extends throughout the loan period and is at least equal to the global valuation of the securities lent, plus the value of any haircut considered appropriate in light of the collateral quality.

3 - Management, Investment Management and Distribution Fees

The management fee is a percentage of the Net Asset Value of each Sub-Fund, which ranges, according to the prospectus, from 0.15% to max 3.00% p.a, depending on the relevant unit class and is calculated and accrued on each Valuation Day on the basis of the Net Asset Value of the unit class and is payable monthly in arrears.

The Management fees rates applicable at December 31, 2023, are as follows:

Sub-Funds	Class of shares	Management fees p.a.

4 - Fixed Operating Expenses

Each Sub-Fund (or, wherever relevant, the Fund as a whole) bears all ordinary costs and expenses incurred in its operation and administration at a fixed rate. The Fixed Operating Expenses ensure that the relevant Sub-Fund is protected from expenses fluctuations which would not be the case had the Sub-Fund chosen to pay directly such charges.

The Fixed Operating Expenses are calculated, in respect of each class and for each calendar year, as a percentage of the average of the net asset value of the Sub-Fund attributable to the relevant Sub-Fund calculated in prorata temporis for the relevant calendar year.

The effective level of Fixed Operating Expenses as at December 31, 2023 are disclosed below:

Sub-Funds	Fixed Operating Expenses
CoRe Series - FAM Park	0.07%
CoRe Series - CoRe Coupon	0.09%
CoRe Series - CoRe Income Opportunity	0.10%
CoRe Series - CoRe Emerging Markets Bond	0.22%

CoRe Series - FAM Sustainable	0.25%
CoRe Series - CoRe Global Opportunity	0.23%
CoRe Series - CoRe Alternative	0.12%

The Fixed Operating Expenses include, the following fees and expenses:

- Depositary and Paying Agent, Administrator, Registrar and Transfer Agent Fees;
- Auditor's fees and expenses;
- Directors' fees and expenses;
- Marketing fees and expenses;
- Legal expenses that may be incurred by the Management Company, the Depositary, and the Administrator while acting
 in the interest of the Unitholders;
- Investment services taken and/or data obtained by any Sub-Fund;

- Taxes, charges and duties payable to the local government and local authorities (including the Luxembourg subscription tax (taxe d'abonnement) and any VAT or similar tax associated with any fees and expenses paid by the Fund (excluding any tax included in the "Transaction Costs").

5 - Depositary and Paying Agent, Administrator, Registrar and Transfer Agent Fees

The Depositary and Paying Agent and the Administrator are entitled to receive a fee out of the assets of the relevant Sub-Fund (or the relevant class of units, if applicable), which will range, depending on the country where the assets of the relevant Sub-Fund are held, from 0.003% to 0.5% of the asset values underlying the relevant Sub-Fund or class of units, payable guarterly in arrears.

For the Registrar and Transfer Agent, the main components of the compensation for the services provided are the number of the existing active unit classes, the number of clients' accounts and the number of transactions processed.

As disclosed in Note 4, the Depositary, Paying Agent, Administrator, Registrar and Transfer Agent as applicable, are included in the Fixed Operating Expenses.

6 - Taxation

In accordance with the legislation currently prevailing in Luxembourg, the Fund is not subject to any taxes on income or capital gains. The Fund is subject to a subscription tax "*Taxe d'abonnement*", which amounts to an annual rate of 0.05% based on the Net Asset Value of each Sub-Fund at the end of each calendar quarter, calculated and paid quarterly. However, this tax is reduced to 0.01% for Net Asset Value related to units classes only aimed at eligible institutional investors and for Sub-Funds whose sole object is collective investment in money market instruments and in deposits with credit institutions. Pursuant to Article 175 (a) of the amended Law of December 17, 2010, the net asset invested in UCIs already subject to "*Taxe d'abonnement*" is exempted from this tax.

As disclosed in Note 4, "Taxe d'abonnement" is included in the Fixed Operating Expenses.

7 - Futures contracts

Dividond

Notes to the financial statements (continued)

11 - Dividend Distribution

All distributions will, in principle, be paid out of the net income available for distribution. The Management Company may, in compliance with the principle of equal treatment of Unitholders, decide that for some classes of units, distributions will be paid out of the gross assets and not only of net realised income available for distribution or net realised capital gain.

During the year ended December 31, 2023, the following dividends have been distributed:

CoRe Series - CoRe Coupon

			Dividend

13 - Change in portfolios

A list of changes in the portfolio for the year ended December 31, 2023 is available free of charge at the registered office of the Management Company of the Fund.

14 - Transaction costs

The transaction costs include broker fees and fees charged by the depositary for securities and derivatives transactions. The broker fees are excluded from the cost of securities and derivatives purchased and sold. All these fees are recorded under caption "transaction costs" in Statement of Operations and Changes in Net Assets.

15 - Other Income

Amounts of other income in the Statement of Operations and Changes in Net Assets mainly include revenues from rebate fees.

16 - Other expenses

Amounts of other expenses in the Statement of Operations and Changes in Net Assets mainly include rebate fees.

17 - Related party transactions

All transactions were on normal market conditions and conducted at arm's length.

Other information

1 - Securities Financing Transactions Regulation (EU Regulation no. 2015/2365)

Following the Regulation 2015/2365 of the European Parliament and of the Council of November 25, 2015 on transparency of securities financing transactions and of reuse, only transactions on securities lending were subject to this Regulation, during the year ending December 31, 2023:

All transactions are bilateral transactions.

For each counterparty and each sub-fund, collateral positions are followed-up globally for all OTC instrument types.

Cash collateral is managed as a whole; the investment management process does not specifically isolate cash received as collateral from other cash.

Returns and costs incurred from performance swaps transactions during the year ended December 31,2023 are included in the valuation of the swaps.

Unaudited Information

2 - Remuneration

UCITS V Remuneration Disclosure

Fineco Asset Management Designated Activity Company (the "Management Company"), the Management Company of CoRe Series acts as the Management Company for two other umbrella UCITS.

The Management Company follows a remuneration policy which complies with the requirements of the UCITS regulation in Ireland and in particular the S.I. 143/2016.

The remuneration policy and practices objectives are consistent with and promote sound and effective risk management, aligning remuneration with long-term performance and risks in order to avoid conflicts of interest. Fixed remuneration components are linked to the roles covered, the professional services rendered and the scope of responsibilities, reflecting the level of the talent, skills and competencies, market pay levels, experience and skills required for each position, as well as the level of excellence demonstrated. Variable remuneration is designed to promote a sustainable long-term development of the Management Company and a solid and effective risk management system. Variable remuneration awards consider the performance of the employee, her/his business unit and the Management Company as a whole, and it is based on both financial and non-financial criteria, among other criteria.

The total remuneration paid by the Management Company to its staff for the financial year end December 31, 2023 is as follows:

Financial Year End December 31, 2023

	<u>Fixed</u>	<u>Variable</u>	<u>Total</u>
Employees	7,363,650	2,341,062	9,704,712
Executive Directors	991,983	977,314	1,969,297
Non-Executive Directors	88,900	-	88,900

The Fund represents as at December 31, 2023 around 17% of the Total AUM of the Management Company.

The remuneration policy is reviewed at least annually.

3 - Risk disclosures

Global Exposure

In accordance with current Fineco policy, global exposure is measured using the "Commitment Approach" or the Value at Risk ("VaR") approach which considers the full constituents of the portfolio.

The Commitment Approach is a methodology that aggregates the underlying market or notional values of financial derivative instruments to determine the degree of global exposure of a Fund to financial derivative instruments.

Pursuant to the 2010 Law, the global exposure for a Fund under the Commitment Approach must not exceed 100% of that Fund's Net Asset Value.

Below is the list of sub-funds that follow the Commitment Approach:

Sub-Fund	Risk approach
CoRe Series - FAM Park	Commitment
CoRe Series - CoRe Coupon	Commitment
CoRe Series - CoRe Income Opportunity	Commitment
CoRe Series - CoRe Emerging Markets Bond	Commitment
CoRe Series - CoRe Global Currencies	Commitment
CoRe Series - Bond 6M Fineco AM Fund	Commitment
CoRe Series - Enhanced Bond 6M Fineco AM Fund	Commitment
CoRe Series - Sustainable Enhanced Bond 12M Fineco AM Fund	Commitment
CoRe Series - CoRe Champions	Commitment
CoRe Series - CoRe Balanced Opportunity	Commitment
CoRe Series - CoRe Champions Emerging Markets	Commitment
CoRe Series - CoRe Balanced Conservative	Commitment
CoRe Series - CoRe Multi-Asset Income	Commitment
CoRe Series - CoRe Aggressive	Commitment

CoRe Series - CoRe Dividend	Commitment
CoRe Series - CoRe Emerging Markets Equity	Commitment
CoRe Series - CoRe US Strategy	Commitment
CoRe Series - CoRe All Europe	Commitment
CoRe Series - FAM Sustainable	Commitment
CoRe Series - CoRe Global Opportunity	Commitment
CoRe Series - CoRe Alternative	Commitment

VaR is a statistical risk measure that estimates the potential loss from adverse market movements in an ordinary market

The VaR calculations are based on an adjusted historical simulation model with a confidence level of 99%, a holding period of one day and a historical observation period of not less than one year (250 days). A VaR number is defined at a specified probability and a specified time horizon. A 99% one day VaR means that the expectation is that 99% of the time over a one day period the Fund will lose no more than this number in percentage terms. Therefore, higher VaR numbers indicate higher risk.

The table below details the highest, lowest and average utilisation of the VaR limit, expressed as a percentage of the respective absolute VaR regulatory limit.

Sub-Fund	Risk approach	Risk Basis	Highest utilisation of the VaR limit %		Average utilisation of the VaR limit %
CoRe Series - Invesco Pan European	VaR	Absolute	26 40%	11 10%	19.10%
High Income FAM Fund	var	Absolute	20.40%	11.10%	19.10%
CoRe Series - Global Macro Credit FAM					
Fund	VaR	Absolute	24.50%	11.20%	17.00%

Leverage

The use of derivatives may expose sub-funds to a higher degree of risk. In particular, derivative contracts can be highly volatile, and the amount of initial margin is generally small relative to the size of the contract so that transactions may be leveraged in terms of market exposure. A relatively small market movement may have a potentially larger impact on derivatives than on standard bonds or equities. Leveraged derivative positions can therefore increase Funds volatility.

The leverage is calculated on a gross exposure basis, by taking the sum of the notional values of the derivatives used by the sub-funds, without netting, and is expressed as a percentage of the net asset value.

Disclosed in the table below is the level of leverage employed during the year (All funds not listed have 0%):

Sub-Fund	Average Leverage
CoRe Series - Invesco Pan European High Income FAM	24.000/
Fund	31.86%
CoRe Series - Global Macro Credit FAM Fund	79.42%

4 - Sustainable Finance Disclosure Regulation

Environmental, social and governance ("ESG") Integration describes the mechanism by which the Manager, acting through the Investment Manager as its delegate, when applicable, may integrate sustainability risks into investment decision-making, which may, where relevant, require the Investment Manager to assess the potential sustainability risks associated with the purchase of investments.

Sustainability Risk means an ESG event or condition that, if it occurs, could potentially or actually cause a material negative impact on the value of a Sub-Fund's investment. Sustainability risks can either represent a risk of their own or have an impact on other risks which they may contribute significantly to such as market risks, operational risks, liquidity risks or counterparty risks.

The ICAV reserves the right to reassess the classification of its Sub-Funds under Regulation (EU) 2019/2088 ("SFDR") at any time and shall keep this classification under review in case of issuing of new or amendments made to the the applicable Regulatory Technical Standards ("RTS") to SFDR or any other relevant pieces of legislation or regulation or regulatory guidance impacting such a classification. RTS are standards for implementation of the provisions set forth in SFDR issued by the European Supervisory Authorities ("ESAs") to market operators.

If the ICAV determines at any future point that a Sub-Fund does not meet the criteria to qualify as an Art. 8 or Art. 9 SFDR fund, the relevant disclosure pertaining to such a Sub-Fund shall be updated or withdrawn as appropriate, in accordance with the revised classification of the Sub-Fund.

The following Sub-Funds are classified as Article 6 funds under SFDR:

Fund	SFDR Classification	Investment Manager
CoRe Series - FAM Park	Article 6	Fineco Asset Management DAC
CoRe Series - CoRe Coupon	Article 6	Fineco Asset Management DAC
CoRe Series - CoRe Income Opportunity	Article 6	Fineco Asset Management DAC

CoRe Series - CoRe Emerging Markets Bond	Article 6	Fineco Asset Management DAC
CoRe Series - CoRe Global Currencies	Article 6	Fineco Asset Management DAC
CoRe Series - CoRe Champions	Article 6	Fineco Asset Management DAC
CoRe Series - CoRe Balanced Opportunity	Article 6	Fineco Asset Management DAC
CoRe Series - CoRe Champions Emerging Markets	Article 6	Fineco Asset Management DAC

CoRe Series - CoRe Global Opportunity	Article 6	Fineco Asset Management DAC
CoRe Series - CoRe Alternative	Article 6	Fineco Asset Management DAC

The investments underlying the above-named Sub-Funds do not take into account the EU criteria for environmentally sustainable economic activities. The classification of the abovenamed Sub-Funds as Article 6 SFDR funds means that the Sub-Funds do not promote environmental or social characteristics in a way that meet the specific criteria contained in Article 8 of SFDR or have Sustainable Investment as its objective in a way that meet the specific criteria contained in Article 9 of SFDR.

When assessing the Sustainability Risks associated with the Fund's underlying investments, the Manager (or the Investment Manager, as the case) is attempting to understand the likelihood of the risk that the value of such underlying investments could be materially negatively impacted by an environmental, social or governance event or condition. While the Manager (or the Investment Manager, as the case) integrates Sustainability Risk into the Sub-Fund's investment decision making process, the output of such Sustainability Risk integration is not the determining factor, nor potentially even among the most prominent factors, considered in the investment decisions in respect of the assets which the Sub-Fund may buy and/or hold. Accordingly, the Manager (or the Investment Manager, as the case) may buy and/or hold assets which may expose the Sub-Fund to high or low levels of Sustainability Risk. For further information on how Sustainability Risks are integrated, please refer to section "SFDR disclosure" under each Sub-Fund's supplement.

The following sub-funds are classified as financial products which promote environmental and/or social characteristics pursuant to Article 8 and Article 9 SFDR:

Fund	SFDR Classification	Investment Manager
CoRe Series - Global Macro Credit FAM Fund	Article 8	Algebris (UK) Limited
CoRe Series - Bond 6M Fineco AM Fund	Article 8	BNP Paribas Asset Management France
CoRe Series - Enhanced Bond 6M Fineco AM Fund	Article 8	BNP Paribas Asset Management France
CoRe Series - Sustainable Enhanced Bond 12M Fineco AM Fund	Article 8	BNP Paribas Asset Management France
CoRe Series - FAM Sustainable	Article 8	Fineco Asset Management DAC

SFDR and Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment, and amending SFDR (the "Taxonomy Regulation") require certain information to be disclosed in the audited financial statements where a Sub-Fund is classified under Article 8 or Article 9 of SFDR. This information is required to be presented in the form of the template set out in the annexes to Commission Delegated Regulation (EU) 2023/363 of 31 October 2022 amending and correcting the regulatory technical standards laid down in Delegated Regulation (EU) 2022/1288, which supplement SFDR. Further information on the environmental and/or social characteristics promoted by the Sub-Funds during the year can therefore be found in the annexes to these financial statements (the "SFDR Annexes").

The data used to complete the disclosures set out in the SFDR Annexes for the Sub-Funds is provided:

- -For internally managed Sub-Funds other than Funds of Funds: by relevant third-party sources;
- -For internally managed Funds of Funds: by the managers of the underlying funds which our Funds of Funds are invested in;
- -For Sub-Funds managed by Delegate Investment Managers: by the relevant Delegate Investment Managers.
- -The data used is the data available as at the year-end considered by the financial statements (December 2023) on backward-looking analysis.

The analysis is dependent on the underlying investee entities disclosing relevant data and the availability of this data can be limited. Data may also be incomplete, inaccurate and/or contain errors that may not be detected by the Manager. It has been observed that the availability and accuracy of data, from the relevant third party data providers and underlying investee entities, continues to be challenging in some respects. Additionally, there may be further regulatory guidance of relevance to the content of the disclosures that is still to be issued. The disclosures included in the SFDR Annexes should consequently be read and understood in light of these continuing challenges. With the assistance of the Manager and, where applicable for the relevant Sub-Fund, the Investment Manager, the Board of the ICAV continues to monitor the ongoing development and evolution of sustainability-related regulation, including SFDR and the Taxonomy Regulation, and associated guidance and the availability of relevant third party and investee entities' data in this regard.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: CoRe Series – Global Macro Credit FAM Fund Legal entity identifier: 254900CQBF3SE59D9X06

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be

aligned with the Taxonomy or not.

The EU Taxonomy is

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund for the year ending 31 December 2023 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party. All data and other information contained in the annex has been compiled in accordance with the proprietary sustainable finance framework implemented by the Manager [and the Investment Manager] for the Fund.

Environmental and/or social characteristics

Did this financial product have a susta	inable investment objective?
Yes	• No
investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments

indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics which were promoted by the Fund are:

- 1. Prevention of predatory lending practices ("Characteristic 1")
- 2. Pollution prevention and control ("Characteristic 2")
- 3. Emissions reduction ("Characteristic 3")

- 4. Human rights ("Characteristic 4")
- 5. Labour relations ("Characteristic 5")

(Each a "Characteristic" and Characteristics 1 to 5 together referred to as the "Core ESG Concerns")

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

For the reference period 1 January 2023 to 31 December 2023 (the "Reference Period") the overall percentage of holdings of the Fund (i.e., the total NAV of the Fund) (the "Holdings") that promoted one or more Core ESG Concerns was **90%**. The remaining **10%** of the Holdings that did not promote the Fund's environmental and social characteristics (the "ES Characteristics") were in assets that are considered "other" assets for the purpose of this annex.

To measure the attainment of Characteristics 1 to 5 above the following sustainability indicators were used:

	<u>Ch</u>	aracteristic 1:
		Indicator: the share of revenues derived from predatory lending activities ("Indicator 1").
	<u>Ch</u>	aracteristic 2:
		Indicator: amount of air pollutants in proportion to company revenue ("Indicator 2.a") and/or the amount of inorganic pollutants in proportion to company revenues ("Indicator 2.b").
	<u>Ch</u>	aracteristic 3:
		Indicator: the share of investments in companies that explicitly disclose they have either committed to setting or have set science-based targets ("SBTs") in relation to decarbonisation (" Indicator 3 ").
	<u>Ch</u>	aracteristic 4:
		Indicator: the share of investments in companies involved in very serious violations of human rights under the United Nations Global Compact ("UNGC") ("Indicator 4.a").
		Indicator: the existence of human rights commitments, policies and procedures at the individual investee level measured as the share invested in companies without Human Rights policies (" Indicator 4.b ").
	<u>Ch</u>	aracteristics 5:
		<i>Indicator:</i> the share of investments in companies involved in very serious violations of labour rights under the UNGC ("Indicator 5.a").
		Indicator: the evolution at portfolio level of an aggregate labour practice score (" Indicator 5.b "). The score reflects the investees' gender balance; gender pay ratio; performance in terms of preventing discrimination and harassment; freedom of association; ethnic diversity.
In add	dition	to indicators 1 to 5B listed above (the "Core Indicators") the following

In addition to indicators 1 to 5B listed above (the "Core Indicators"), the following indicators are also considered by the Fund to measure the attainment of its overall ESG policy (the "Additional Indicators"):

□ Exclusion Policies:

Indicator:	any	holdings	(0%)	of t	he	Fund	comprising	of	issuers	on	the
exclusion li	st dis	sclosed in	the Fu	und's	SL	ıpplem	ent (" Indica	tor	6 ").		

Voting policy and engagement

Indicator: the % of meeting voted ("Indicator 7.a"); the % of proposals voted ("Indicator 7.b"); the % of shareholders' resolutions voted against ("Indicator 7.c"); the % of shareholders' resolutions voted in favour ("Indicator 7.d"); the number of ESG-related engagements with investees ("Indicator 7.e").

□ ESG screening

- □ **Indicator:** any share of investment (0%) in companies that are identified to be in the bottom 10% of the distribution of the relevant sector's ESG score ("Indicator 8.a").
- Indicator: the evolution at portfolio level of a global ESG score ("Indicator 8.b"), as well as of individual environmental ("Indicator 8.c"), social ("Indicator 8.d"), and governance scores ("Indicator 8.e").

The Core Indicators and Additional Indicators together referred to as the "Indicators".

How did the sustainability indicators perform?

Methodologies Used

The Investment Manager assessed the performance of the Indicators using the following methodologies to calculate the value of Indicators for the Reference Period as applicable:

- a percentage of Holdings calculated as the average of the Fund's quarter-end calculations invested in the applicable issuers over the Reference Period (the "Average Holdings Methodology");
- (ii) a percentage of revenues of the applicable issuer attributable to the applicable activity calculated as the average revenues of the Fund's quarter-end calculations over the Reference Period (the "Average Revenues Methodology");
- (iii) the tonnes¹ of air pollutants of the investee companies in the Portfolio for the Reference Period (the "Air Pollutants Methodology") and/or the tonnes of inorganic pollutants of the investee companies in the Portfolio for the Reference Period (the "Inorganic Pollutants Methodology") per million EUR invested.
- (iv) the tonnes of CO2 emissions of the investee companies in the Portfolio for the Reference Period (the "CO2e Calculation"), the tonnes of CO2 emissions of the Portfolio per €1,000,000.00 of AuM for the Reference Period (the "Carbon Footprint Calculation"), and the tonnes of CO2 emissions of the Portfolio per €1,000,000.00 of revenue generated by the investee companies (or in the case of sovereigns per €1,000,000.00 of GDP of the investee country) in the Portfolio for the Reference Period (the "GHG Intensity Methodology");

 $^{^{1}\,\}mathrm{All}$ references to "tonnes" in this report are to metric tonnes unless expressed otherwise.

- (v) the tonnes of hazardous waste and radioactive waste generated by the Portfolio per €1,000,000.00 of revenue generated by the investee companies in the Portfolio for the Reference Period (the "Hazardous Waste Calculation");
- (vi) the GWh consumed by the Portfolio per €1,000,000.00 of revenue generated by the investee companies in the Portfolio for the Reference Period (the "Energy Consumption Calculation");
- (vii) the share of the investee companies in the Portfolio' consumption of non-renewable energy and energy production from non-renewable sources compared to renewable energy sources for the Reference Period (the "Non-Renewable Energy Consumption" and "Non-Renewable Energy Production")
- (viii) the average unadjusted gender pay-gap of investee companies ("Gender Pay Gap Calculation"). Unadjusted gender pay gap means the difference between average gross hourly earnings of male paid employees and of female paid employees as a % of average gross hourly earnings of male paid employees.
- (ix) the average percentage of female board members in investee companies ("Board Gender Diversity Calculation")
- a percentage of meetings, proposals, and shareholder resolutions voted for or against calculated as a simple percentage out of the total number of the applicable meetings, proposals, and shareholder resolutions during the Reference Period (the "Voting Methodology");
- (xi) the number of engagements made during the Reference Period (the "**Total Engagements Calculation**");
- (xii) the portfolio average (weighted using investment weights) of an issuer-level score from third party ESG data providers covering labour relations and labour practices; the portfolio average (weighted using investment weights) of an issuer-level governance score from third party ESG data providers; the portfolio average (weighted using investment weights) of an issuer-level environmental score from third party ESG data providers; the portfolio average (weighted using investment weights) of an issuer-level social score from third party ESG data providers; and the portfolio average (weighted using investment weights) of an issuer-level ESG score from third party ESG data providers. These are all computed according to the same methodology being the average scores of quarter-end portfolios for the four quarters of the year (the "Average Score Methodology")
- ((i) to (xii) above together referred to as the "Reporting Methodologies").

The Reporting Methodologies used by the Investment Manager in consultation with the Manager were chosen for the applicable Indicators in compliance with the Fund, Manager and Investment Managers' obligation to ensure that information disclosed is fair, clear and not misleading. Unless expressed otherwise, all methodologies are based on the average of the Fund's four quarter-ends.

Performance of the Indicators

(A) Core ESG Concerns:

For the Reference Period the Core Indicators reported as follows:

INDICATOR	DEFINITION	METHODOLOGY	VALUE	SOURCE
Indicator 1	Share of investees' revenues from predatory lending activities (%)	Average Revenues Methodology	0 %2	Sustainalytics
Indicator 2.a	Emissions of air pollutants (tonnes per EUR million EVIC)	Air Pollutants Methodology	0.26 ³	S&P
Indicator 2.b	Emissions of inorganic pollutants ()	Inorganic Pollutants Methodology	0.001 4	S&P
Indicator 3	Share of investments in companies that explicitly disclose they have either committed to setting or have set science-based targets ("SBTs") in relation to decarbonisation	Average Holdings Methodology	36% ⁵ Of which, companies with formally committed or validated SBTs:	Bloomberg LP SBT Initiative
Indicator 4.a	Share of investments in companies involved in very serious violations of human rights under the UN Global Compact (UNGC), (%)	Average Holding Methodology	0 % ⁶	MSCI
Indicator 4.b	Share of investments in companies lacking human rights commitments, policies, and procedures at the individual investee level (%)	Average Holding Methodology	14 % ⁷	Clarity Al
Indicator 5.a	Share of investments in companies involved in very serious violations of labour rights under UNGC (%)	Average Holding Methodology	0 %8	MSCI

² Reported as a % of any applicable revenue for the Reference Period, such % calculated using the Average Revenues Methodology. All companies screened prior to investment against the Algebris Predatory Lending Exclusions List – which flags companies deriving any revenues from this activity. Investment in such companies is not allowed at Firm level.

³ Reported as tonnes of emissions per € 1 million of EVIC using the Air Pollutants Methodology.

⁴ Reported as tonnes of emissions per € 1 million of EVIC using the Inorganic Pollutants Methodology.

⁵ Reported as a % of Portfolio invested in applicable companies over the Reference Period, such % calculated using the Average Holding Methodology.

⁶ Reported as a % of Portfolio invested in applicable companies over the Reference Period, such % calculated using the Average Holding Methodology. All companies are screened prior to the investment against the Algebris UNGC Exclusion List – which flags companies involved in very serious violations of the UNGC principles. Investment in such companies is not allowed at Manager–level.

⁷ Reported as % of Portfolio invested in applicable companies over the Reference Period, such % calculated using the Average Holding Methodology.

⁸ Reported as a % of Portfolio invested in applicable companies over the Reference Period, in accordance with the Average Holding Methodology. All companies are screened prior to the investment against the Algebris UNGC Exclusion List – which flags companies involved in very serious violations of the UNGC principles. Investment in such companies is not allowed at Manager level.

Indicator 5.b	Portfolio level annual average Labour Practice score (0-100, 100 = best)	Average Score Methodology	62 ⁹	Clarity Al

(B) Exclusion Policies

For the Reference Period Indicator 6 reported as follows:

□ Indicator 6 ¹⁰: 0%

Over the period under consideration, the Fund held **no** positions in companies that were listed on the Investment Manager's ESG exclusion lists.

(C) Voting Policy and Engagement

For the Reference Period Indicator 7 reported as follows:

INDICATOR	DEFINITION	METHODOLOGY	VALUE	SOURCE
Indicator 7.a	The share of meeting voted (% of total)	Voting & Engagement Methodology	N/A ¹¹	N/A
Indicator 7.b	The % of shareholders' resolutions voted against (% of all shareholders resolutions)	Voting & Engagement Methodology	N/A ¹²	N/A
Indicator 7.c	The share of shareholders' resolutions voted in favour (% of all shareholders resolution)	Voting & Engagement Methodology	N/A ¹³	N/A
Indicator 7.d	The number of ESG-related engagements with investees (N)	Voting & Engagement Methodology	3 ¹⁴	Algebris

(D) ESG screening

For the Reference Period Indicators 8.a - 8.e performed as follows:

⁹ Reported as the average of quarter-end portfolios for the four quarters of the year in accordance with the Average Score

¹⁰ Reported as a % of Portfolio invested in applicable companies over the Reference Period, in accordance with the Average Portfolio Methodology. All companies are screened prior to investment against the Algebris ESG exclusion list applicable to the Fund. Investments in such companies are not permitted at Investment Manager level.

¹¹ The Fund invests in credit and does not hold any equity investment, on which it can exercise voting rights.

¹² The Fund invests in credit and does not hold any equity investment, on which it can exercise voting rights.

¹³ The Fund invests in credit and does not hold any equity investment, on which it can exercise voting rights.

¹⁴ Reported as absolute number of engagements on ESG matters held with investee companies during the Reference Period, either individually or as part of collective engagement initiatives.

INDICATOR	DEFINITION	METHODOLOGY	VALUE	SOURCE
Indicator 8.a	Share of investments in companies in bottom 10% of ESG score distribution	Average Holding Methodology	0.4% ¹⁵	Algebris
Indicator 8.b	Portfolio level annual average Global ESG score (0-100, 100 = best)	Average Score Methodology	65 Corporate: 69 ¹⁶ Sovereign: 53 ¹⁷	Clarity AI
Indicator 8.c	Portfolio level annual average Environmental Score (0-100, 100 = best)	Average Score Methodology	68 Corporate: 71 ¹⁸ Sovereign: 57 ¹⁹	Clarity AI
Indicator 8.d	Portfolio level annual average Social Scores (0-100, 100 = best)	Average Score Methodology	63 Corporate: 65 ²⁰ Sovereign: 53 ²¹	Clarity AI
Indicator 8.e	Portfolio level annual average Governance Scores (0-100, 100 = best)	Average Score Methodology	67 Corporate: 73 ²² Sovereign: 50 ²³	Clarity Al

Over the course of the Reference Period, the Fund held a position in a company whose ESG score belonged in the bottom 10% of the score distribution for the reference sector. It was assessed by the ESG team that the low score was reflective of limited disclosure on the side of the company (who was being scored by the third party provider for the first time) rather than of underlying ESG-related issues. As such, it was decided to maintain the position and engage with the company to seek to improve the company's ESG disclosure rather than divest immediately. The Investment Manager received reassurance from the company that management was aware of the issue, and was working towards improvement. The Investment Manager expects this to be reflected in the next reporting period. The position accounted for 0.4% of the portfolio on average during the Reference Period.

The Indicators evolved as follow:

Performance of the Indicators

¹⁵ See comment below table.

 $^{^{\}rm 16}$ Annual average coverage from the third party provider is of 85%

¹⁷ Annual average coverage for this indicator was 100%

 $^{^{\}rm 18}$ Annual average coverage from the third party provider is of 85%

 $^{^{\}rm 19}$ Annual average coverage for this indicator was 100%

 $^{^{\}rm 20}$ Annual average coverage from the third party provider is of 85%

²¹ Annual average coverage for this indicator was 100%

²² Annual average coverage from the third party provider is of 85%

²³ Annual average coverage for this indicator was 100%

(E) Core ESG Concerns:

INDICATOR	DEFINITION	2022	2023	Change / comment
Indicator 1	Share of investees' revenues from predatory lending activities (%)	0 %	0 %	Unchanged
Indicator 2.a	Emissions of air pollutants (tonnes per EUR million EVIC)	1.07 ²⁴	0.26	Decreased
Indicator 2.b	Emission of inorganic pollutants (tonnes per EUR million EVIC)		0.001	N/A
Indicator 3	Share of investments in companies that explicitly disclose they have either committed to setting or have set science-based targets ("SBTs") in relation to decarbonisation	21 %	36%	Increased The share invested in companies with formally committed or validated SBTs remaind constant at 12%
Indicator 4.a	Share of investments in companies involved in very serious violations of human rights under the UN Global Compact (UNGC), (%)	0.9 %	0 %	Decreased The positive % in 2022 reflected investment in a company that held by the Fund during Q1 2022 and became ineligible as a result of an update in the Investment Manager's UNGC screening. The position was exited as a result, and the value of this Indicator has been 0% since Q2 2022
Indicator 4.b	Share of investments in companies lacking human rights commitments, policies, and procedures at the individual investee level (%)	11 %	14 %	Increased. Coverage for this indicator has increased considerable in 2023 from 2022 (from 76% to 92%) which may contribute to explain the increase.
Indicator 5.a	Share of investments in companies involved in very serious violations of labour rights under UNGC (%)	0 %	0 %	Unchanged
Indicator 5.b	Portfolio level annual average Labour Practice score (0-100, 100 = best)	60	62	Increased

(F) Exclusion Policies

²⁴ The 2022 figure has been amended due to a methodology revision to ensure consistency with 2023.

For the Reference Period Indicator 6 reported as follows:

The relevant indicator was 0% in 2022 and remained at 0% in 2023

Over the period under consideration, the Fund held **no** positions in companies that were listed on the Investment Manager's ESG exclusion lists.

(G) Voting Policy and Engagement

For the Reference Period Indicator 7 reported as follows:

INDICATOR	DEFINITION	2022	2023	Change
Indicator 7.a	The share of meeting voted (% of total)	N/A	N/A	N/A
Indicator 7.b	The % of shareholders' resolutions voted against (% of all shareholders resolutions)	N/A	N/A	N/A
Indicator 7.c	The share of shareholders' resolutions voted in favour (% of all shareholders resolution)	N/A	N/A	N/A
Indicator 7.d	The number of ESG-related engagements with investees (N)	0	3	Increased

(H) ESG screening

For the Reference Period Indicators 8.a – 8.e performed as follows:

INDICATOR	DEFINITION	2022	2023	Change
Indicator 8.a	Share of investments in companies in bottom 10% of ESG score distribution	0.2 %	0.4 %	Increased As noted above, the 2023 number is representative of a position in a company where the ESG team assessed that the low score was reflective of limited disclosure on the side of the company rather than of underlying ESG-related issues. As such, it was decided to maintain the position and engage with the company to seek to improve disclosure

INDICATOR	DEFINITION	2022	2023	Change
Indicator 8.b	Portfolio level annual average Global ESG Score (0-100, 100 = best)	65 Corporate: 67 Sovereign: 57	65 Corporate: 69 Sovereign: 53	Unchanged
Indicator 8.c	Portfolio level annual average Environmental Score (0-100, 100 = best)	69 Corporate: 73 Sovereign: 60	68 Corporate: 71 Sovereign: 57	Stable
Indicator 8.d	Portfolio level annual average Social Score (0-100, 100 = best)	62 Corporate: 62 Sovereign: 58	63 Corporate: 65 Sovereign: 53	Stable
Indicator 8.e	Portfolio level annual average Governance Score (0-100, 100 = best)	66 Corporate: 70 Sovereign: 55	67 Corporate: 73 Sovereign: 50	Stable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

N/A

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

How did this financial product consider principal adverse impacts on sustainability factors?

During the Reference Period, the Investment Manager considered the principal adverse impacts ("**PAI**") of the Fund's investments prior to investment, and on an ongoing basis, by considering the following PAI adverse sustainability indicators (the "**Adverse Indicators**") in respect of all investee companies:

(1) Climate and other Environmental Adverse Indicators:

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

GHG Emissions

GHG Emissions : the total greenhouse gases (" GHG ") emissions of the investee company (" PAI 1 ").
Carbon Footprint: the carbon footprint of the investment company (" PAI 2 ").
GHG Intensity: the measure of the GHG intensity of the investee company ("PAI 3").
Exposure to Fossil Fuel: the share of investments the Fund made in companies active in the fossil fuel sectors ("PAI 4").
Non-Renewable Energy Consumption: the investee companies' share of non-renewable energy consumption and non-renewable energy production from non-renewable energy sources compared to renewable energy sources (" PAI 5 ").
Energy Consumption Intensity: the investee companies' energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector (" PAI 6 ").

PAIs 1 to 6 together referred to as the "GHG Indicators".

Biodiversity

Adverse Biodiversity Activities: the share of investments by the Fund in investee companies with sites and/or operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas ("PAI 7" or the "Biodiversity Indicator").

Water

		Emissions to Water: the tonnes of emissions to water generated by investee companies per million EUR invested ("PAI 8" or the "Water Indicator").
	Wa	este
		Hazardous Waste Ratio : the tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested (" PAI 9 " or the " Waste Indicator ").
	Em	nissions
		Absence of Carbon Emission Reduction Initiatives: the share of investments in investee companies without carbon emission reduction initiatives aimed at aligning with the Paris Agreement adopted under the UN Framework Convention on Climate Change ("PAI 10" or the "Emissions Reduction Indicator").
(2)	<u>Sc</u>	ocial Adverse Indicators:
	So	cial and Employee Matters
		Violations of UNGC principles and OECD Guidelines: the share of investments the Fund makes in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for multinational enterprises ("PAI 11").
		Lack of process to monitor compliance with UNGC: the share of investments of the Fund in companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance /complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises ("PAI 12").
		Unadjusted Gender Pay Gap : the average unadjusted gender pay gap of investee companies of the Fund (" PAI 13 ").
		Board Gender Diversity : the ratio of female to male board members in the investee companies of the Fund (" PAI 14 ").
		Exposure to Controversial Weapons: the share of investments the Fund makes in investee companies involved in the manufacturing or selling of controversial weapons ("PAI 15").
		Absence of Anti-Corruption and Anti-Bribery Polices: the share of investments in investee companies that do not have polices on anti-corruption and anti-bribery consistent with the United Nations Convention against Corruption ("PAI 16").
	РА	ls 11 to 16 referred to together as the (" Social Indicators ").
(3)	So	vereign Adverse Indicators:
	GH	IG Emissions
		GHG Intensity: the measure of the GHG intensity of the investee country ("PAI 17").
	So	cial

Social Violations: the number of investee countries subject to applicable social violations²⁵ ("**PAI 18**").

Adverse Indicators Reporting:

During the Reference Period, the impact applicable to the PAIs applied to the investee companies in the Fund's portfolio can be reported as²⁶:

Adverse Indicator		Metric	Impact 2023		
	CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS				
Greenhouse gas emissions	PAI 1. GHG emissions ²⁷	Scope 1 GHG emissions	3,908.56 tonnes CO2e		
		Scope 2 GHG emissions	489.04 tonnes CO2e		
		Scope 3 GHG emissions	31,718.35 tonnes CO2e		
		Total GHG emissions	37,560.92 tonnes CO2e		
	PAI 2. Carbon footprint	Carbon footprint	313.10 tonnes CO2e / EUR M invested 28		
	PAI 3. GHG intensity of investee companies	GHG intensity of investee companies	677.18 tonnes CO2e / EUR M revenue ²⁹		
	PAI 4. Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	12.09 %³⁰		
	PAI 5. Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	Consumption: 58.69 % % ³¹ Production: 68.89 % ³²		

²⁵ Algebris sources data on this indicator from Clarity Al. The provider identifies a country as subject to social violation if it meets any of the following criteria:

⁽¹⁾ Countries with sanctions imposed by the European Union or the United Nations that satisfy one of the following: (i) Human rights abuses by the governmental institutions; (ii) Evidence to show that at least one person from the list of sanctioned persons in the country holds a position in the government or governmental institutions; (iii) the current regime is the result of a coup; (iv) violations of international law; (v) misappropriation of public funds resulting in undermining of democracy.

⁽²⁾ Countries with sanctions imposed by the Office of Foreign Asset Control (OFAC) of the United States that satisfy the following: (i) human rights abuses by the government or governmental institutions

What was the proportion of sustainability-related investments?

Information on the proportion of the Fund which promoted environmental/social characteristics during the Reference Period is provided below.

What was the asset allocation?

The proportion of the Fund's investments that were aligned with the E/S Characteristics was **90%** (88.585% in 2022). Please note that voting is not relevant to the particular assets of the Fund and this was not taken into account in determining this percentage. Please refer to the section 'What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?' below for a description of the purpose of the investments during the Reference Period within #2 Other.

The Fund achieved incidental Taxonomy aligned investments, assessed ex post and not during the pre investment phase, as the Fund did not commit to have sustainable investment. As such, it is not possible to disclose what climate objective incidental Taxonomy aligned investments contributed to.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund promotes environmental and social characteristics, during the Reference Period investments of the Fund in environmentally sustainable economic activities aligned with the "EU Taxonomy" (being Regulation (EU) 2020/852 of the European Parliament and the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investments) (including in transitional and enabling activities) were 1.9% of the investments of the Fund based on revenue alignment and

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

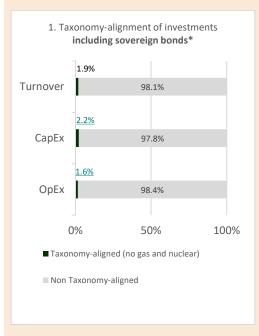

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

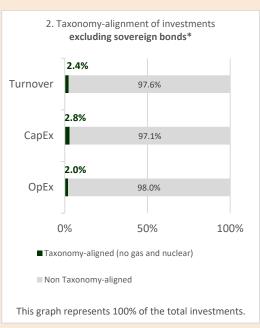

2.2% based on CapEX alignment. This assessment is based upon public data issuers sourced via Clarity AI which has not been subject to an assurance or third party review.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁴⁷?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Over the course of the year, the average annual exposure to enabling activities was **0.49%** and the average annual exposure to transitional activities was **0.01%**

⁴⁷ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage investments that were aligned with the EU Taxonomy increased in 2023 compared to 2022. The share of enabling activities has increased, whereas the share of transitional activities has remained constant.

Aligned (including Sovereign)	2022	2023	Change
Turnover	0.07%	1.91%	1.85%
CapEx	0.08%	2.24%	2.16%
OpEx	0.06%	1.59%	1.54%
Aligned (excluding Sovereign)	2022	2023	Change
Turnover	0.23%	2.37%	2.15%
CapEx	0.28%	2.84%	2.56%
OpEx	0.19%	2.00%	1.81%
	2022	2023	Change
Enabling Activities	0.01%	0.49%	0.49%
Transitional Activities	0.01%	0.01%	0.00%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy

0%

What was the share of socially sustainable investments? 0%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The "#2 Other" investments made by the Fund during the Reference Period include instruments which are used for the purpose of hedging (including currency risk management), liquidity, diversification, and efficient portfolio management. These investments include, but are not limited to, ancillary liquid assets and financial derivative instruments. Whilst these investments may not be aligned with the environmental or social characteristics promoted by the Fund, they will, to the extent possible, still be subject to the exclusion policies detailed above, in addition to the UNGC Screening. These provide the minimum safeguards.

The remaining assets of the Fund during the Reference Period comprised of cash and cash equivalents held from time to time on an ancillary basis, as well as instruments for hedging purposes. No minimum environmental or social safeguards applied in respect of these.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The following actions taken during the Reference Period to meet the environmental and/or social characteristics promoted by the Fund:

(i) Characteristic 1 (Prevention and Contrast of Predatory Lending Practices):

All companies are screened prior to investment against the Investment Manager's Predatory Lending Exclusion List – which flags companies deriving any (>0%) revenues from this activity. Investment in such companies is not allowed at Investment Manager level. All ESG exclusion lists are coded into Algebris' internal automated controls system. These have fully integrated pre- and post-trade controls which include the relevant investment guidelines for a particular fund. Any attempts at trading a security that is restricted on ESG grounds would trigger a pre-trade alert.

(ii) Characteristic 2 (Pollution Prevention and Control):

Where available, the Investment Manager monitors GHG emission, air pollutants emissions, and inorganic pollutants emission data from third party providers. Since data coverage from third party providers on air pollutants and inorganic pollutants emissions is still limited, for the time being no hard threshold has been set on this indicator for the purpose of investment eligibility. The value of this indicator has decreased at portfolio level in 2023 compared to 2022.

(iii) Characteristic 3 (Emission Reduction):

The Investment Manager monitors the share of investments in companies that explicitly disclose they have either committed to setting or have set science-based targets ("SBTs") in relation to decarbonisation. The Investment Manager also monitors transition from those commitments into validated targets. The share invested in companies that explicitly disclose they have either committed to setting or have set science-based targets ("SBTs") in relation to decarbonisation has increased during 2023, whereas the share invested in companies with public commitments to set targets confirmed or validated by SBTi has remained stable.

(iv) Characteristic 4 (Human Rights):

All companies are screened prior to investment against the Investment Manager's UNGC Exclusion List – which uses MSCI data to identify companies involved in breaches of the UNGC Principles. Investment in such companies is not allowed at Investment Manager level. All ESG exclusion lists are coded into Algebris' internal automated controls system. These have fully integrated pre- and post-trade controls which include the relevant investment guidelines for a particular fund. Any attempts at trading a security that is restricted on ESG grounds would trigger a pre-trade alert. During 2023, the Fund held no positions in in names listed on the Investment Manager's UNGC exclusion list.

The share invested in companies identified as lacking human rights commitment and policies has increased marginally in 2023 (from 11% to 14%). This may in part be due to the significant improvement in portfolio coverage for this indicator (from 76% to 91%).

(v) Characteristics 5 (Labour Relations):

All companies are screened prior to investment against the Investment Manager's UNGC Exclusion List – which uses MSCI data to identify companies involved in very serious violations of the UNGC principles, including labour rights. The screening includes an assessment of compliance with labour standards (broad and narrow measures). Investment in such companies is not allowed at Investment Manager level. All ESG exclusion lists are coded into Algebris' internal automated controls system. These have fully integrated pre- and post-trade controls which include the relevant investment guidelines for a particular fund. Any attempts at trading a security that is restricted on ESG grounds would trigger a pre-trade alert. During 2023, the Fund held no positions in names listed on the Investment Manager's UNGC exclusion list.

The Investment Manager monitors the evolution of third-party Labour Practice scores – aggregating a variety of indicators pertaining to labour conditions, health and safety, discrimination, and other relevant labour practices. The portfolio level annual average labour practice score increased marginally in 2023, by 2 points.

(vi) Characteristic 6 (Exclusion Policies):

All companies are screened prior to investment against the Investment Manager's ESG Exclusion Lists applicable to the Fund – which flags companies deriving any (>0%) revenues from this activity. Investment in such companies is not allowed at Investment Manager level. All ESG exclusion lists are coded into Algebris' internal automated controls system. These have fully integrated pre- and post-trade controls which include the relevant investment guidelines for a particular fund. Any attempts at trading a security that is restricted on ESG grounds would trigger a pre-trade alert. During 2023, the Fund held no positions in in names listed on the Investment Manager's ESG exclusion lists.

(vii) Characteristic 7 (Voting policy and engagement)

Voting provisions do not apply to this Fund. The Investment Manager has been participating in the Carbon Disclosure Project's Non-disclosure Campaign since 2021 – requesting investees to respond to climate change, forests and water security questionnaires developed and managed by CDP. Two of the investee companies of the Fund were targeted in the 2022 NDC round.

Typically, if an investee company is flagged by the Investment Manager's UNGC screening or ESG screening, the ESG team and the investment team would engage with the company to establish whether the investment becomes unacceptable.

Over the course of the Reference Period, the Fund held a position in a company whose ESG score belonged in the bottom 10% of the distribution for the reference sector. It was assessed by the ESG team that the low score was reflective of limited disclosure on the side of the company (who was being scored by the third party provider for the first time) rather than of underlying ESG-related issues. As such, it was decided to maintain the position and engage with the company to seek to improve the company's ESG disclosure rather than divest immediately. The Investment Manager received reassurance from the company that management was aware of the issue, and was working towards improvement. The Investment Manager expects this to be reflected in the next reporting period. The position accounted for 0.4% of the portfolio on average over the course of 2023.

(viii) Characteristic 8 (ESG screening):

Where available, an Environmental Score, a Social Score, a Governance Score and an aggregate ESG Score from third-party ESG data providers is considered as part of the investment process.

The aggregate ESG score profile of the portfolio remained broadly stable in 2023, compared to 2022. The individual E, S and G scores also remained broadly stable.

The following actions taken during the Reference Period upon considering PAI:

Climate and Other Environmental Indicators:

- GHG Emissions / Carbon Footprint / GHG Intensity: the Investment Manager monitors investee companies' GHG emissions and GHG intensity, as well as the carbon footprint at portfolio level. The Investment Manager applies a strict fossil fuel exclusion policy that also includes a financing angle. Investment is not permitted in: (1) companies deriving 5% or more of their revenues from thermal coal mining and/or 10% or more of their revenues from thermal coal power generation; (2) companies deriving 5% or more of their revenues from Arctic Oil; (3) companies deriving 10% or more of their revenues from Tar sands; (5) any companies having a significant ownership stake in entities excluded under the Investment Manager's Climate-related exclusion policies applicable to the Fund and described above 48; (6) Debt or equity issued by the top-5 global coal shareholders and bondholders, nor in debt or equity issued by major coal financers as described in the Investment Manager's ESG Exclusion policy.
- Exposure to companies active in the fossil fuel sector: the Investment Manager joined the Net Zero Asset Managers Initiative (NZAM) in 2021, committing to manage a progressively larger share of its AUM in line with net zero emissions by 2050 or sooner and committing to implement a science-based Fossil Fuel Investment Policy. As set out in the 2018 IPCC 1.5 degrees scenarios and the 2021 IEA Net Zero scenario, achieving net zero by 2050 will require a rapid reduction in emissions from fossil fuel combustion and phase out of investment in fossil fuels. The pathway laid out in the IEA report requires that no new unabated coal plants, no new oil and gas fields, and no new coal mines or mine extensions be approved from 2021 on. In its guidance for the financial sector, the Science Based Target Initiative (SBTi) also recommends that financial institutions seeking to align with the Paris Agreement transparently address the role of fossil fuels in their investment portfolio. The SBTi recommended phaseout of thermal coal investments and more thorough disclosure on financial institutions' fossil fuel investments and related activities. The Fund is subject to strict restrictions regarding investment in companies deriving revenues from fossil fuels. See details in the bullet point above.
- □ Share of non-renewable energy consumption and production: the Investment Manager monitors the average share of non-renewable energy consumption by investee companies, where available.
- □ **Biodiversity:** the Investment Manager monitors the exposure of investee companies to biodiversity risk and the existence of biodiversity policies. Where warranted, this may be part of ESG engagement with investee companies.
- Water: the Investment Manager monitors emission to water of investee companies, where available. Where warranted, this may be part of ESG engagement with investee companies.

⁴⁸ Significant ownership data are sourced from data provider Sustainalytics. Significant ownership is typically defined as an ownership stake of 10% or above.

	Waste: the Investment Manager monitors the hazardous waste ratio of investee companies, where available. Where warranted, this may be part of ESG engagement with investee companies.
	Emission Reduction: the Investment Manager monitors investee companies' commitment to set Science Based Targets for emission reduction (SBTs) and also monitors transition from these commitments into targets validated by the Science Based Target Initiative (SBTi).
So	cial Indicators:
	UNGC / OECD Violations (PAI 10): the Investment Manager applies an exclusion policy restricting investment in companies that are found to be in breach of the UN Global Compact principles. See details for under the section <i>What actions have been taken to meet the environmental and/or social characteristics during the reference period?</i>
	UNGC / OECD Policies (PAI 11): the Investment Manager monitors the existence of policies to monitor compliance with UNGC Principles and OECD guidelines. See details under the section <i>What actions have been taken to meet the environmental and/or social characteristics during the reference period?</i>
	Unadjusted Gender Pay Gap: the Investment Manager monitors the unadjusted gender pay gap of investee companies, where available. Where warranted, this may be part of ESG engagement with investee companies.
	Board Gender Diversity: the Investment Manager monitors the board gender diversity of investee companies. Where warranted, this may be part of ESG engagement with investee companies.
	Exposure to Controversial Weapons: the Fund is prevented from investing in companies deriving any (0%) revenue from the manufacturing or selling of controversial weapons. The Fund is also prevented from investing in any company having a significant ownership in the entities excluded under the above rule ⁴⁹ . The Fund is also restricted from investing in debt or equity issued by the top-5 nuclear weapons shareholders and lenders – as described in the Investment Manager's ESGEXCLUSION Policy .
	Lack of anti-corruption and anti-bribery policies: the Investment Manager monitors the hazardous waste ratio of investee companies, where available. Where warranted, this may be part of ESG engagement with investee companies.
So	vereign Indicators
	GHG Emissions – Sovereign: the Investment Manager monitors the GHG emissions for sovereign investments (defined in terms of tonnes of CO2e per EUR million of the country's GDP) but has not set a quantitative threshold for the time being.
	Number and Share of Countries subject to social violations: the Fund held no position in countries subject to social violations.

 $^{^{49}}$ Significant ownership data are sourced from data provider Sustainalytics. Significant ownership is typically defined as an ownership stake of 10% or above.

How did this financial product perform compared to the reference benchmark?

N/A

How does the reference benchmark differ from a broad market index?
N/A

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

N/A

- How did this financial product perform compared with the reference benchmark?
 N/A
- How did this financial product perform compared with the broad market index?`
 N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: CoRe Series - Bond 6M Fineco AM Fund Legal entity identifier: 254900WF30KTLU9ARG37

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes No It made **sustainable** It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: % sustainable investment, it had a proportion of in economic activities that 25.5% of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally with an environmental objective in economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but **did not** make any sustainable investments with a social objective: %

Unless otherwise specified, all actual data, within this periodic report are expressed as a quarterly weighted average

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation

does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product

are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and social characteristics by assessing underlying investments against Environmental, Social, and Governance (ESG) criteria using an ESG internal proprietary methodology, and by investing in issuers that demonstrate good environmental, social and governance practices.

Corporate issuers

The investment strategy selects corporate issuers with good or improving ESG practices within their sector of activity.

The ESG performance of an issuer is evaluated against a combination of environmental, social and governance factors which include but are not limited to:

- Environmental: energy efficiency, reduction of emissions of greenhouse gases (GHG), treatment of waste;
- Social: respect of human rights and workers' rights, human resources management (workers' health and safety, diversity);
- Governance: Board of Directors independence, managers' remuneration, respect of minority shareholders rights.

The exclusion criteria are applied with regard to issuers that are in violation of international norms and convention, or operate in sensitive sectors as defined by the Responsible Business Conduct Policy (RBC Policy).

Sovereign issuers

The investment strategy selects sovereign issuers based on their performance across the environmental, social and governance pillars. The ESG performance of each country is assessed using an internal Sovereign ESG methodology that focuses on measuring governments' efforts to produce and preserve assets, goods, and services with high ESG values, according to their level of economic development. This involves evaluation of a country against a combination of environmental, social and governance factors, which include but not limited to:

- Environmental: climate mitigation, biodiversity, energy efficiency, land resources, pollution;
- Social: life conditions, economic inequality, education, employment, health infrastructure, human capital;
- Governance: business rights, corruption, democratic life, political stability, security.

BNP Paribas Asset Management's Global Sustainability Strategy places a strong emphasis on combatting climate change. Therefore, given the importance of sovereigns in addressing climate change, the internal Sovereign ESG methodology includes an additional scoring component that captures the country's contribution to progress towards the net-zero goals set out in the Paris Agreement. This additional scoring component reflects countries' commitment to future targets balanced by their current policies and their forward-looking physical climate risk exposure. It combines temperature alignment methodology for determining national contributions to climate change with an assessment of the laws and policies countries have in place for addressing climate change.

The investment manager also applies the BNP Paribas Group's sensitive countries framework, which includes restrictive measures on certain countries and/or activities that are considered as being particularly exposed to money laundering and terrorism financing related risks.

Furthermore, the investment manager promotes better environmental and social outcomes through engagement with issuers and the exercise of voting rights according to the Stewardship policy, where applicable.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The environmental objectives as well as the social objectives to which the sustainable investments of the financial product have contributed are indicated in the question "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the attainment of the environmental and social characteristics promoted by the sub-fund:

- The percentage of the Sub-Fund's portfolio compliant with the RBC Policy: 100%
- The percentage of the Sub-Fund's portfolio covered by ESG analysis based on the ESG internal proprietary methodology: 99.6%
- The weighted average ESG score of the Sub-Fund's portfolio compared to the weighted average ESG score of its investment universe: 59.0 vs 53.4 (Bloomberg Multiverse 1-3Y (USD) RI)
- The percentage of the Sub-Fund's portfolio invested in 'sustainable investments' as defined in Article 2 (17) of the SFDR regulation: 25.5%

None of the indicators were subject to an assurance provided by an auditor or a review by a third party for the current and previous years.

...and compared to previous periods?

Indicator	2022*	2023**	Comparison
The percentage of the Sub-Fund's portfolio compliant with the RBC policy	100%	100%	In line with the sub-fund's commitment
The percentage of the Sub-Fund's portfolio covered by the ESG analysis based on the ESG internal proprietary methodology	100%%	99.6%	In line with the sub-fund's commitment
The weighted average ESG score of the Sub-Fund's portfolio compared to the weighted average ESG score of its investment universe	59.0 vs 53.9	59.0 vs 53.4	In line with the sub-fund's commitment
The percentage of the Sub-Fund's portfolio invested in 'sustainable investments' as defined in Article 2 (17) of the SFDR regulation	39.5%	25.5%	In line with the sub-fund's commitment

^{*}Figures reported in 2022 were calculated on the closing date of the accounting year

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments made by the are to finance companies that contribute to environmental and/or social objectives through their products and services, as well as their sustainable practices.

The internal methodology integrates several criteria into its definition of sustainable investments that are considered to be core components to qualify a company as sustainable. These criteria are complementary to each other. In practice, a company must meet at least one of the criteria described below in order to be considered as contributing to an environmental or social objective:

- 1. A company with an economic activity aligned with the EU Taxonomy objectives
- 2. A company with an economic activity contributing to one or more United Nations Sustainable Development goals (UN SDG) targets;
- 3. A company operating in high GHG emission sector that is transitioning its business model to align with the objective of maintaining the global temperature rise below 1.5°C;

^{**} Figures reported in 2023 are expressed as a quaterly weighted average.

4. A company with best-in-class environmental or social practices compared to its peers within the relevant sector and geographical region.

Green bonds, social bonds and sustainability bonds issued to support specific environmental and/or social projects are also qualified as sustainable investments provided that these debt securities receive an investment recommendation 'POSITIVE' or 'NEUTRAL' from the Sustainability Center following the issuer and underlying project assessment based on a proprietary Green/Social/Sustainability Bond Assessment methodology.

Companies identified as a sustainable investment should not significantly harm any other environmental or social objectives (the Do No Significant Harm 'DNSH' principle) and should follow good governance practices. BNP Paribas Asset Management (BNPP AM) uses its proprietary methodology to assess all companies against these requirements.

The share of sub-fundinvestments considered by the SFDR regulation to be sustainable investments contributes in the proportions described in the question on the allocation of assets to the environmental objectives defined in the European Regulation on Taxonomy in force to date: climate change mitigation and/or adaptation to climate change.

More information on the internal methodology can be found on the website of the investment manager:

https://docfinder.bnpparibas-am.com/api/files/14787511-CB33-49FC-B9B5-7E934948BE63

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments that the product partially intends to make should not significantly harm any environmental or social objective (DNSH Principle). In this respect, the investment manager commits to consider principal adverse impacts on sustainability factors by taking into account indicators for adverse impacts as defined in SFDR and set out in Table 1 and any relevant additional indicator from Tables 2 and 3 of Annex I of the Delegated Regulation, and to not invest in companies that do not meet their fundamental obligations in line with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights

How were the indicators for adverse impacts on sustainability factors taken into account?

The investment manager ensures that throughout its investment process, the financial product takes into account principal adverse impact indicators that are relevant to its investment strategy to select the sustainable investments that the financial product partially intends to make by systematically implementing the sustainable investment pillars defined in the BNP Paribas Asset Management Global Sustainability Strategy (GSS) into its investment process and as further detailed below in this document; RBC policy, ESG integration guidelines, Stewardship, the forward-looking vision – the '3Es' (Energy transition, Environmental sustainability, Equality & Inclusive Growth).

All issuers included in the proportion of sustainable investments were compliant with the DNSH test

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The investment universe of the sub-fundis periodically screened with a view to identify issuers that are potentially in violation or at risk of violation of the UN Global Compact Principles, OECD Guidelines for Multinational Enterprises and UN Guiding Principles on Business & Human Rights,

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. This assessment is conducted within the BNPP AM Sustainability Centre on the basis of internal analysis and information provided by external experts, and in consultation with BNP Paribas Group CSR Team. If an issuer is found to be in serious and repeated violations of any of the principles, it will be placed on an 'exclusion list' and will not be available for investment. Existing investments should be divested from the portfolio according to an internal procedure. If an issuer is at risk of violating any of the principles, it is placed on a 'watch list' monitored, as appropriate.

The issuers that have been placed on watch list are excluded from the proportion of sustainable investments disclosed in the report.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considers principal adverse impacts on sustainability factors by systematically implementing the sustainable investment pillars defined in the GSS into its investment process. These pillars are covered by firm-wide policies that set criteria to identify, consider and prioritise as well as address or mitigate adverse sustainability impacts caused by issuers.

The RBC policy establishes a common framework across investments and economic activities that help identify industries and behaviours presenting a high risk of adverse impacts in violation of international norms. As part of the RBC Policy, sector policies provide a tailored approach to identify and prioritize principal adverse impacts based on the nature of the economic activity, and in many cases, the geography in which these economic activities take place.

The ESG Integration Guidelines includes a series of commitments, which are material to consideration of principal adverse sustainability impacts, and guides the internal ESG integration process. The proprietary ESG scoring framework includes an assessment of a number of adverse sustainability impacts caused by companies in which we invest. Outcome of this assessment may impact the valuation models as well as the portfolio construction depending on the severity and materiality of adverse impacts identified.

Thus, the Investment Manager considers principal adverse sustainability impacts throughout the investment process through the use of the internal ESG scores and construction of the portfolio with an improved ESG profile compared to its investment universe.

The Forward-looking perspective defines a set of objectives and developed performance indicators to measure how the researches, portfolios and commitments are aligned on three issues, the '3Es' (Energy transition, Environmental sustainability, Equality & inclusive growth) and thus support investment processes.

Furthermore, the Stewardship team regularly identifies adverse impacts through ongoing research, collaboration with other long-term investors, and dialogue with NGOs and other experts.

Actions to address or mitigate principal adverse sustainability impacts depend on the severity and materiality of these impacts. These actions are guided by the RBC Policy, ESG Integration Guidelines, and Engagement and Voting Policy which include the following provisions:

- Exclusion of issuers that are in violation of international norms and conventions and issuers that are
 involved in activities presenting an unacceptable risk to society and/or the environment
- Engagement with issuers with the aim of encouraging them to improve their environmental, social and governance practices and, thus, mitigate potential adverse impacts
- In case of equity holdings, voting at Annual General Meetings of companies the portfolio is invested in to promote good governance and advance environmental and social issues
- Ensuring all securities included in the portfolio have supportive ESG research
- Managing portfolios so that their aggregate ESG score is better than the relevant benchmark or universe

Based on the above approach, and depending on the composition of the sub-fund's portfolio (i.e. the type of issuer), the financial product considers and addresses or mitigates the following principal adverse sustainability impacts:

Corporate mandatory indicators:

- 1. GreenHouse Gas (GHG) Emissions
- 2. Carbon footprint
- 3. GHG intensity of investee companies
- 4. Exposure to companies active in the fossil fuel sector
- 5. Share of non-renewable energy consumption and production
- 6. Energy consumption intensity per high impact climate sector
- 7. Activities negatively affecting biodiversity sensitive areas
- 8. Emissions to water
- 9. Hazardous waste ratio
- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators:

Environment

- 4. Investments in companies without carbon emission reduction initiatives Social
- 4. Lack of a supplier code of conduct
- 9. Lack of a human rights policy

Sovereign mandatory indicator:

- 15. GHG intensity
- 16. Investee countries subject to social violations

More detailed information on the manner in which principal adverse impacts on sustainability factors are considered can be found in the BNP PARIBAS ASSET MANAGEMENT SFDR disclosure statement: https://docfinder.bnpparibas-am.com/api/files/874ADAE2-3EE7-4AD4-B0ED-84FC06E090BF

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: From 01.01.2023 to 29.12.2023

Source of data: BNP Paribas Asset Management, expressed as a quaterly weighted average.

The largest investments are based on official accounting data and are based on the transaction date.

What was the proportion of sustainability-related investments?

The proportion of sustainable investments of the sub-fund is 25.5%.

What was the asset allocation?

The proportion of the investments of the sub-fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the sub-fund is **87.8%**.

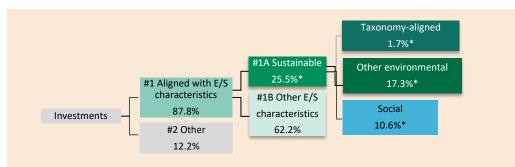

The remaining proportion of the investments is mainly used as described under the question: "What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

^{*} Any percentage differences with the financial statement portfolios result from a rounding difference.

^{**} Any difference with the portfolio statements above are coming from the use of different data's sources.

Asset allocation describes the share of investments in specific assets.

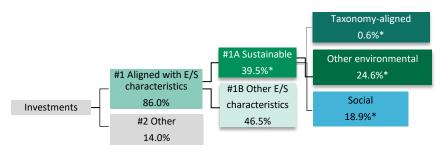

- **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- -The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- -The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.
- *A portfolio security classified as sustainable investment may, taking into account all its activities, both contribute to a social objective and to an environmental objective (aligned or not with the taxonomy of the EU) and the figures shown take this into account. However, the same issuer can only be recognised once for sustainable investments (#1A Sustainable).

As at 30.12.2022, the figures were as follow:

In which economic sectors were the investments made?

Sectors	% Asset
Government	31,23%
Financials	23,23%
Cash	9,45%
Funds	9,45%
Real Estate	4,66%
Industrials	3,94%
Health Care	3,83%
Consumer Discretionary	3,07%
Communications	2,74%
Consumer Staples	2,68%
Materials	2,35%
Utilities	1,41%
Technology	1,14%
Energy	0,60%
Exploration & Production	0,31%
Integrated Oils	0,29%
Commercial Paper	0,22%

Source of data: BNP Paribas Asset Management, expressed as a quaterly weighted average. The largest investments are based on official accounting data and are based on the transaction date.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The sub-fund did not commit itself to having a minimum proportion of sustainable investments with an environmental objective in economic activities that are considered environmentally sustainable within the meaning of the EU Taxonomy, but did do so.

The two graphs below illustrate, according to the data available, the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy and contribute to the environmental objectives of climate change mitigation and adaptation.

The investment manager uses data from third-party providers to measure the proportion of investments that are aligned with the EU Taxonomy. Providers collect companies' self-reported alignment KPIs and may use equivalent information where these are not readily available in public disclosures. More information on BNPP AM the methodology and the providers used can be found here: https://docfinder.bnpparibas-am.com/api/files/0EE37EC2-8612-48A5-8AA1-D5C09CCB58DD

The investment manager is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Further updates of the prospectus and the alignment of commitments with the EU Taxonomy may be made accordingly.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Economic activities that are not recognised by the EU taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

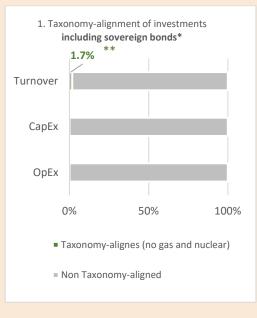

The compliance of those investments with the requirements laid down in article 3 of Regulation (EU) 2020/852 (Taxonomy Regulation) has not been subject to an assurance provided by an auditor or review by a third party

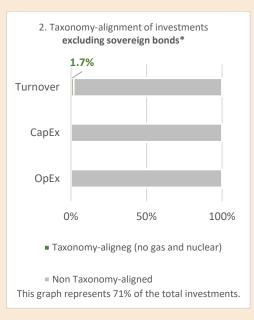

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The data covering the proportion of taxonomy-aligned activities related to fossil gas and nuclear energy and on which the report is based in this respect were solely available starting from the last quarter of the accounting year.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

** Real taxonomy aligned

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the Regulations Taxonomy is 0% for transitional activities and 0% for enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Revenue
2022*	0.6%
2023**	1.7%

^{*}Figures reported in 2022 were calculated on the closing date of the accounting year

The proportion of taxonomy-aligned economic activities in CapEx or OpEx are not disclosed given the current level of data at the disposal of the management company related to such information.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that are not aligned with the European Taxonomy Regulation is 17.3%.

The investment manager is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Meanwhile, the sub-fund will invest in sustainable investments whose environmental objective is not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Socially sustainable investments represent 10.6% of the sub-fund.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining proportion of the investments includes the proportion of assets that do not attain the following standards established by the investment manager: 1) a positive ESG score and either a positive E score or a positive S score or 2) being Sustainable Investment according to BNPP AM ESG proprietary methodology or instruments which are mainly used for liquidity, such as cash and cash equivalent assets and/or efficient portfolio management, and/or hedging purposes. Those investments are made in compliance with our internal processes, including the risk management policy and the RBC policy when applicable as minimum environmental or social safeguards. The risk management policy comprises procedures as are necessary to enable the assessment for each financial product of the exposure of that product to market, liquidity, sustainability and counterparty risks.

What actions have been taken to meet the environmental and/or social characteristics during the reference period

 The sub-fund shall comply with the RBC Policy by excluding companies involved in controversies due to poor practices related to human and labor rights, environment, and corruption, as well as

^{**} Figures reported in 2023 are expressed as a quaterly weighted average.

companies operating in sensitive sectors (tobacco, coal, controversial weapons, asbestos,...), as these companies are deemed to be in violation of international norms, or to cause unacceptable harm to society and/or the environment.

- The sub-fund shall systematically integrate relevant ESG factors in line with its investment strategy into its investment analysis and decision-making processes.
- The sub-fund shall have at least 90% of its assets (excluding ancillary liquid assets) covered by the ESG analysis based on the ESG internal proprietary methodology.
- The sub-fund shall have the weighted average ESG score of its portfolio higher than the weighted average ESG score of its investment universe.
- The sub-fund shall invest a proportion of its assets in "sustainable investments" as defined in Article 2 (17) of the SFDR regulation
- The exclusions covered by the investment manager's exclusion policy applies, being (1) Issuers that breach the principles of the UN Global Compact (UNGC), (2) Issuers involved in the manufacture or product life cycle of controversial weapons (such as but not limited to chemical weapons, cluster munitions and landmines); (3) Issuers deriving a certain percentage of their revenue from the production of tobacco or from other type of involvement in the life cycle of tobacco products such as distribution or licencing activities; (4) Issuers that derive a certain percentage of their revenue from thermal coal extraction and/or arctic drilling; and (5) Issuers that contravene the UNGC labourrelated principles and International Labour Organisation's ("ILO") broader set of labour standards.

In addition, the investment manager has implemented a voting and engagement policy. Several examples of commitments are detailed in the vote and commitment section of the Sustainability Report. These documents are available at the following link: https://www.bnpparibas-am.com/en/sustainability-documents/

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the sub-fund

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

- How did this financial product perform compared with the reference benchmark?
 Not applicable
- How did this financial product perform compared with the broad market index?`

 Not applicable

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: CoRe Series – Enhanced Bond 6M Fineco AM Fund Legal entity identifier: 254900F9P3O95UQMTG29

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes No It made **sustainable** It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: % sustainable investment, it had a proportion of in economic activities that **33.1%** of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally with an environmental objective in economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but **did not** make any sustainable investments with a social objective: %

Unless otherwise specified, all actual data, within this periodic report are expressed as a quarterly weighted average

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and social characteristics by assessing underlying investments against Environmental, Social, and Governance (ESG) criteria using an ESG internal proprietary methodology, and by investing in issuers that demonstrate good environmental, social and governance practices.

Corporate issuers

The investment strategy selects corporate issuers with good or improving ESG practices within their sector of activity.

The ESG performance of an issuer is evaluated against a combination of environmental, social and governance factors which include but are not limited to:

- Environmental: energy efficiency, reduction of emissions of greenhouse gases (GHG), treatment of waste;
- Social: respect of human rights and workers' rights, human resources management (workers' health and safety, diversity);
- Governance: Board of Directors independence, managers' remuneration, respect of minority shareholders rights.

The exclusion criteria are applied with regard to issuers that are in violation of international norms and convention, or operate in sensitive sectors as defined by the Responsible Business Conduct Policy (RBC Policy).

Sovereign issuers

The investment strategy selects sovereign issuers based on their performance across the environmental, social and governance pillars. The ESG performance of each country is assessed using an internal Sovereign ESG methodology that focuses on measuring governments' efforts to produce and preserve assets, goods, and services with high ESG values, according to their level of economic development. This involves evaluation of a country against a combination of environmental, social and governance factors, which include but not limited to:

- Environmental: climate mitigation, biodiversity, energy efficiency, land resources, pollution;
- Social: life conditions, economic inequality, education, employment, health infrastructure, human capital;
- Governance: business rights, corruption, democratic life, political stability, security.

BNP Paribas Asset Management's Global Sustainability Strategy places a strong emphasis on combatting climate change. Therefore, given the importance of sovereigns in addressing climate change, the internal Sovereign ESG methodology includes an additional scoring component that captures the country's contribution to progress towards the net-zero goals set out in the Paris Agreement. This additional scoring component reflects countries' commitment to future targets balanced by their current policies and their forward-looking physical climate risk exposure. It combines temperature alignment methodology for determining national contributions to climate change with an assessment of the laws and policies countries have in place for addressing climate change.

The investment manager also applies the BNP Paribas Group's sensitive countries framework, which includes restrictive measures on certain countries and/or activities that are considered as being particularly exposed to money laundering and terrorism financing related risks.

Furthermore, the investment manager promotes better environmental and social outcomes through engagement with issuers and the exercise of voting rights according to the Stewardship policy, where applicable.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The environmental objectives as well as the social objectives to which the sustainable investments of the financial product have contributed are indicated in the question "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the attainment of the environmental and social characteristics promoted by the sub-fund :

- The percentage of the Sub-Fund's portfolio compliant with the RBC Policy: 100%
- The percentage of the Sub-Fund's portfolio covered by ESG analysis based on the ESG internal proprietary methodology: **99.6**%
- The weighted average ESG score of the Sub-Fund's portfolio compared to the weighted average ESG score of its investment universe: **58.1** vs **53.0** (Bloomberg Multiverse (USD) RI)
- The percentage of the Sub-Fund's portfolio invested in 'sustainable investments' as defined in Article 2 (17) of the SFDR regulation: **33.1%**

None of the indicators above were subject to an assurance provided by an auditor or a review by a third party for the current and previous years.

... and compared to previous periods?

Indicator	2022*	2023**	Comparison
The percentage of the Sub-Fund's portfolio compliant with the RBC policy	100%	100%	In line with the sub-fund's commitment
The percentage of the Sub-Fund's portfolio covered by the ESG analysis based on the ESG internal proprietary methodology	100%%	99.6%	In line with the sub-fund's commitment
The weighted average ESG score of the Sub-Fund's portfolio compared to the weighted average ESG score of its investment universe	58.3 vs 53.5	58.1 vs 53.0	In line with the sub-fund's commitment
The percentage of the Sub-Fund's portfolio invested in 'sustainable investments' as defined in Article 2 (17) of the SFDR regulation	35.1%	33.1%	In line with the sub-fund's commitment

^{*}Figures reported in 2022 were calculated on the closing date of the accounting year

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments made by the sub-fund are to finance companies that contribute to environmental and/or social objectives through their products and services, as well as their sustainable practices.

The internal methodology integrates several criteria into its definition of sustainable investments that are considered to be core components to qualify a company as sustainable. These criteria are complementary to each other. In practice, a company must meet at least one of the criteria described below in order to be considered as contributing to an environmental or social objective:

- 1. A company with an economic activity aligned with the EU Taxonomy objectives
- 2. A company with an economic activity contributing to one or more United Nations Sustainable Development goals (UN SDG) targets;

^{**} Figures reported in 2023 are expressed as a quaterly weighted average.

objective?

- 3. A company operating in high GHG emission sector that is transitioning its business model to align with the objective of maintaining the global temperature rise below 1.5°C;
- 4. A company with best-in-class environmental or social practices compared to its peers within the relevant sector and geographical region.

Green bonds, social bonds and sustainability bonds issued to support specific environmental and/or social projects are also qualified as sustainable investments provided that these debt securities receive an investment recommendation 'POSITIVE' or 'NEUTRAL' from the Sustainability Center following the issuer and underlying project assessment based on a proprietary Green/Social/Sustainability Bond Assessment methodology.

Companies identified as a sustainable investment should not significantly harm any other environmental or social objectives (the Do No Significant Harm 'DNSH' principle) and should follow good governance practices. BNP Paribas Asset Management (BNPP AM) uses its proprietary methodology to assess all companies against these requirements.

The share of the sub-fund's investments considered by the SFDR regulation to be sustainable investments contributes in the proportions described in the question on the allocation of assets to the environmental objectives defined in the European Regulation on Taxonomy in force to date: climate change mitigation and/or adaptation to climate change.

More information on the internal methodology can be found on the website of the investment manager: https://docfinder.bnpparibas-am.com/api/files/14787511-CB33-49FC-B9B5-7E934948BE63

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment

Sustainable investments that the product partially intends to make should not significantly harm any environmental or social objective (DNSH Principle). In this respect, the investment manager commits to consider principal adverse impacts on sustainability factors by taking into account indicators for adverse impacts as defined in SFDR and set out in Table 1 and any relevant additional indicator from Tables 2 and 3 of Annex I of the Delegated Regulation, and to not invest in companies that do not meet their fundamental obligations in line with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights

How were the indicators for adverse impacts on sustainability factors taken into account?

The investment manager ensures that throughout its investment process, the financial product takes into account principal adverse impact indicators that are relevant to its investment strategy to select the sustainable investments that the financial product partially intends to make by systematically implementing the sustainable investment pillars defined in the BNP Paribas Asset Management Global Sustainability Strategy (GSS) into its investment process and as further detailed below in this document; RBC policy, ESG integration guidelines, Stewardship, the forward-looking vision – the '3Es' (Energy transition, Environmental sustainability, Equality & Inclusive Growth).

All issuers included in the proportion of sustainable investments were compliant with the DNSH test.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The investment universe of the sub-fund is periodically screened with a view to identify issuers that are potentially in violation or at risk of violation of the UN Global Compact Principles, OECD Guidelines for Multinational Enterprises and UN Guiding Principles on Business & Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. This assessment is conducted within the BNPP AM Sustainability Centre on the basis of internal analysis and information provided by external experts, and in consultation with BNP Paribas Group CSR Team. If an issuer is found to be in serious and repeated violations of any of the principles, it will be placed on an 'exclusion list' and will not be available for investment. Existing investments should be divested from the portfolio according to an internal procedure. If an issuer is at risk of violating any of the principles, it is placed on a 'watch list' monitored, as appropriate.

The issuers that have been placed on watch list are excluded from the proportion of sustainable investments disclosed in the report.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considers principal adverse impacts on sustainability factors by systematically implementing the sustainable investment pillars defined in the GSS into its investment process. These pillars are covered by firm-wide policies that set criteria to identify, consider and prioritise as well as address or mitigate adverse sustainability impacts caused by issuers.

The RBC policy establishes a common framework across investments and economic activities that help identify industries and behaviours presenting a high risk of adverse impacts in violation of international norms. As part of the RBC Policy, sector policies provide a tailored approach to identify and prioritize principal adverse impacts based on the nature of the economic activity, and in many cases, the geography in which these economic activities take place.

The ESG Integration Guidelines includes a series of commitments, which are material to consideration of principal adverse sustainability impacts, and guides the internal ESG integration process. The proprietary ESG scoring framework includes an assessment of a number of adverse sustainability impacts caused by companies in which we invest. Outcome of this assessment may impact the valuation models as well as the portfolio construction depending on the severity and materiality of adverse impacts identified.

Thus, the Investment Manager considers principal adverse sustainability impacts throughout the investment process through the use of the internal ESG scores and construction of the portfolio with an improved ESG profile compared to its investment universe.

The Forward-looking perspective defines a set of objectives and developed performance indicators to measure how the researches, portfolios and commitments are aligned on three issues, the '3Es' (Energy transition, Environmental sustainability, Equality & inclusive growth) and thus support investment processes.

Furthermore, the Stewardship team regularly identifies adverse impacts through ongoing research, collaboration with other long-term investors, and dialogue with NGOs and other experts.

Actions to address or mitigate principal adverse sustainability impacts depend on the severity and materiality of these impacts. These actions are guided by the RBC Policy, ESG Integration Guidelines, and Engagement and Voting Policy which include the following provisions:

- Exclusion of issuers that are in violation of international norms and conventions and issuers that are
 involved in activities presenting an unacceptable risk to society and/or the environment
- Engagement with issuers with the aim of encouraging them to improve their environmental, social and governance practices and, thus, mitigate potential adverse impacts
- In case of equity holdings, voting at Annual General Meetings of companies the portfolio is invested in to promote good governance and advance environmental and social issues
- Ensuring all securities included in the portfolio have supportive ESG research
- Managing portfolios so that their aggregate ESG score is better than the relevant benchmark or universe

Based on the above approach, and depending on the composition of the fund's portfolio (i.e. the type of issuer), the financial product considers and addresses or mitigates the following principal adverse sustainability impacts:

Corporate mandatory indicators:

- 1. GreenHouse Gas (GHG) Emissions
- 2. Carbon footprint
- 3. GHG intensity of investee companies
- 4. Exposure to companies active in the fossil fuel sector
- 5. Share of non-renewable energy consumption and production
- 6. Energy consumption intensity per high impact climate sector
- 7. Activities negatively affecting biodiversity sensitive areas
- 8. Emissions to water
- 9. Hazardous waste ratio
- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators:

Environment

- 4. Investments in companies without carbon emission reduction initiatives $\underline{\textbf{Social}}$
- 4. Lack of a supplier code of conduct
- 9. Lack of a human rights policy

Sovereign mandatory indicator:

- 15. GHG intensity
- 16. Investee countries subject to social violations

More detailed information on the manner in which principal adverse impacts on sustainability factors are considered can be found in the BNP PARIBAS ASSET MANAGEMENT SFDR disclosure statement: https://docfinder.bnpparibas-am.com/api/files/874ADAE2-3EE7-4AD4-B0ED-84FC06E090BF

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: From 01.01.2023 to 29.12.2023

Largest investments**	Sector	% Assets*	Country**
BNPP MONEY 3 M I C	Funds	3,84%	France

Source of data: BNP Paribas Asset Management, expressed as a quaterly weighted average.

The largest investments are based on official accounting data and are based on the transaction date.

What was the proportion of sustainability-related investments?

The proportion of sustainable investments of the sub-fund is 33.1%.

What was the asset allocation?

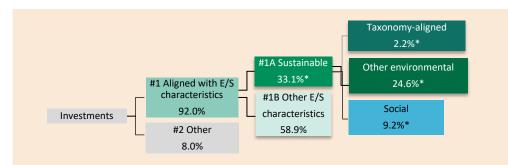

The proportion of the investments of the sub-fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the sub-fund is **92.0%**.

The remaining proportion of the investments is mainly used as described under the question: "What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?"

^{*} Any percentage differences with the financial statement portfolios result from a rounding difference.

^{**} Any difference with the portfolio statements above are coming from the use of different data's sources.

Asset allocation describes the share of investments in specific assets.

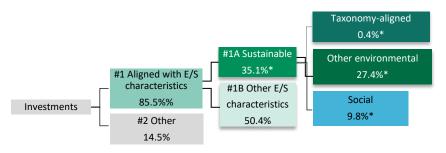

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- -The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- -The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.
- *A portfolio security classified as sustainable investment may, taking into account all its activities, both contribute to a social objective and to an environmental objective (aligned or not with the taxonomy of the EU) and the figures shown take this into account. However, the same issuer can only be recognised once for sustainable investments (#1A Sustainable).

As at 30.12.2022, the figures were as follow:

In which economic sectors were the investments made?

Sectors	% Asset
Financials	43,71%
Real Estate	7,73%
Industrials	7,70%
Health Care	5,94%
Consumer Discretionary	5,83%
Government	5,66%
Cash	4,81%
Materials	4,09%
Funds	3,84%
Communications	3,73%
Consumer Staples	2,92%
Utilities	1,96%
Energy	1,34%
Exploration & Production	0,60%
Integrated Oils	0,45%
Oilfield Services & Equipment	0,28%
Technology	0,65%
Commercial Paper	0,23%

Source of data: BNP Paribas Asset Management, expressed as a quaterly weighted average. The largest investments are based on official accounting data and are based on the transaction date.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The sub-fund did not commit itself to having a minimum proportion of sustainable investments with an environmental objective in economic activities that are considered environmentally sustainable within the meaning of the EU Taxonomy, but did do so.

The two graphs below illustrate, according to the data available, the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy and contribute to the environmental objectives of climate change mitigation and adaptation.

The investment manager uses data from third-party providers to measure the proportion of investments that are aligned with the EU Taxonomy. Providers collect companies' self-reported alignment KPIs and may use equivalent information where these are not readily available in public disclosures. More information on BNPP AM the methodology and the providers used can be found here: https://docfinder.bnpparibas-am.com/api/files/0EE37EC2-8612-48A5-8AA1-D5C09CCB58DD

The investment manager is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Further updates of the prospectus and the alignment of commitments with the EU Taxonomy may be made accordingly.

Economic activities that are not recognised by the EU taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

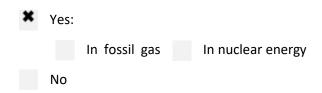

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The compliance of those investments with the requirements laid down in article 3 of Regulation (EU) 2020/852 (Taxonomy Regulation) has not been subject to an assurance provided by an auditor or review by a third party.

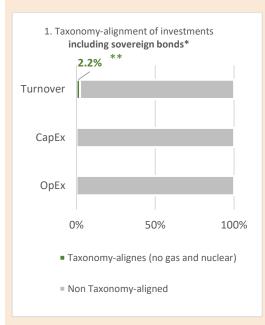

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

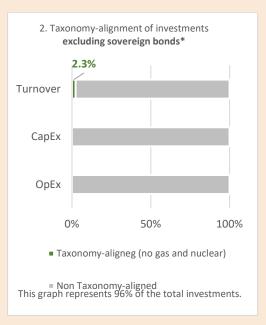

The data covering the proportion of taxonomy-aligned activities related to fossil gas and nuclear energy were solely available starting from the last quarter of the accounting year and as such have not been included in the data reported.

However, the weighted average of the proportion of such investments does not exceed 1%.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures
- ** Real taxonomy aligned

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the Regulations Taxonomy is 0% for transitional activities and 0% for enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Revenue
2022*	0.4%
2023**	2.2%

^{*}Figures reported in 2022 were calculated on the closing date of the accounting year

The proportion of taxonomy-aligned economic activities in CapEx or OpEx are not disclosed given the current level of data at the disposal of the management company related to such information.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that are not aligned with the European Taxonomy Regulation is **24.6%**.

The investment manager is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Meanwhile, the sub-fund will invest in sustainable investments whose environmental objective is not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Socially sustainable investments represent 9.2% of the sub-fund

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining proportion of the investments includes the proportion of assets that do not attain the following standards established by the investment manager: 1) a positive ESG score and either a positive E score or a positive S score or 2) being Sustainable Investment according to BNPP AM ESG proprietary methodology or instruments which are mainly used for liquidity, such as cash and cash equivalent assets and/or efficient portfolio management, and/or hedging purposes. Those investments are made in compliance with our internal processes, including the risk management policy and the RBC policy when applicable as minimum environmental or social safeguards. The risk management policy comprises procedures as are necessary to enable the assessment for each financial product of the exposure of that product to market, liquidity, sustainability and counterparty risks.

What actions have been taken to meet the environmental and/or social characteristics during the reference period

- The sub-fund shall comply with the RBC Policy by excluding companies involved in controversies due to poor practices related to human and labor rights, environment, and corruption, as well as companies operating in sensitive sectors (tobacco, coal, controversial weapons, asbestos,...), as these companies are deemed to be in violation of international norms, or to cause unacceptable harm to society and/or the environment.

^{**} Figures reported in 2023 are expressed as a quaterly weighted average.

- The sub-fund shall systematically integrate relevant ESG factors in line with its investment strategy into its investment analysis and decision-making processes.
- The sub-fund shall have at least 90% of its assets (excluding ancillary liquid assets) covered by the ESG analysis based on the ESG internal proprietary methodology.
- The sub-fund shall have the weighted average ESG score of its portfolio higher than the weighted average ESG score of its investment universe.
- The sub-fund shall invest a proportion of its assets in "sustainable investments" as defined in Article 2 (17) of the SFDR regulation.
- The exclusions covered by the investment manager's exclusion policy applies, being (1) Issuers that breach the principles of the UN Global Compact (UNGC), (2) Issuers involved in the manufacture or product life cycle of controversial weapons (such as but not limited to chemical weapons, cluster munitions and landmines); (3) Issuers deriving a certain percentage of their revenue from the production of tobacco or from other type of involvement in the life cycle of tobacco products such as distribution or licencing activities; (4) Issuers that derive a certain percentage of their revenue from thermal coal extraction and/or arctic drilling; and (5) Issuers that contravene the UNGC labourrelated principles and International Labour Organisation's ("ILO") broader set of labour standards.

In addition, the investment manager has implemented a voting and engagement policy. Several examples of commitments are detailed in the vote and commitment section of the Sustainability Report. These documents are available at the following link: https://www.bnpparibas-am.com/en/sustainability-documents/

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the sub-fund

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?`

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: CoRe Series - Sustainable Enhanced Bond 12M Fineco AM Fund

Legal entity identifier: 2549000QFK53UW8Y2E07

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes It made **sustainable** It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: ___% sustainable investment, it had a proportion of in economic activities that **49.4%** of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but **did not** make any sustainable investments with a social objective: %

Unless otherwise specified, all actual data, within this periodic report are expressed as a quarterly weighted average

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and social characteristics by assessing underlying investments against Environmental, Social, and Governance (ESG) criteria using an ESG internal proprietary methodology, and by investing in issuers that demonstrate good environmental, social and governance practices.

Corporate issuers

The investment strategy selects corporate issuers with good or improving ESG practices within their sector of activity.

The ESG performance of an issuer is evaluated against a combination of environmental, social and governance factors which include but are not limited to:

- Environmental: energy efficiency, reduction of emissions of greenhouse gases (GHG), treatment of waste;
- Social: respect of human rights and workers' rights, human resources management (workers' health and safety, diversity);
- Governance: Board of Directors independence, managers' remuneration, respect of minority shareholders rights.

The exclusion criteria are applied with regard to issuers that are in violation of international norms and convention, or operate in sensitive sectors as defined by the Responsible Business Conduct Policy (RBC Policy).

Sovereign issuers

The investment strategy selects sovereign issuers based on their performance across the environmental, social and governance pillars. The ESG performance of each country is assessed using an internal Sovereign ESG methodology that focuses on measuring governments' efforts to produce and preserve assets, goods, and services with high ESG values, according to their level of economic development. This involves evaluation of a country against a combination of environmental, social and governance factors, which include but not limited to:

- Environmental: climate mitigation, biodiversity, energy efficiency, land resources, pollution;
- Social: life conditions, economic inequality, education, employment, health infrastructure, human capital;
- Governance: business rights, corruption, democratic life, political stability, security.

BNP Paribas Asset Management's Global Sustainability Strategy places a strong emphasis on combatting climate change. Therefore, given the importance of sovereigns in addressing climate change, the internal Sovereign ESG methodology includes an additional scoring component that captures the country's contribution to progress towards the net-zero goals set out in the Paris Agreement. This additional scoring component reflects countries' commitment to future targets balanced by their current policies and their forward-looking physical climate risk exposure. It combines temperature alignment methodology for determining national contributions to climate change with an assessment of the laws and policies countries have in place for addressing climate change.

The investment manager also applies the BNP Paribas Group's sensitive countries framework, which includes restrictive measures on certain countries and/or activities that are considered as being particularly exposed to money laundering and terrorism financing related risks.

Furthermore, the investment manager promotes better environmental and social outcomes through engagement with issuers and the exercise of voting rights according to the Stewardship policy, where applicable.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The environmental objectives as well as the social objectives to which the sustainable investments of the subfund have contributed are indicated in the question "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the attainment of the environmental and social characteristics promoted by the sub-fund:

- The percentage of the Sub-Fund's portfolio compliant with the RBC Policy: 100%
- The percentage of the Sub-Fund's portfolio covered by ESG analysis based on the ESG internal proprietary methodology: **100**%
- The percentage of the Sub-Fund's investment universe reduction due to exclusion of securities with low ESG score and/or sector exclusions as per the RBC Policy; 20%
- The weighted average ESG score of the Sub-Fund's portfolio compared to the weighted average ESG score of its investment universe: **62.6** vs **53.0** (**Bloomberg Multiverse** (**USD**) **RI**)
- The percentage of the Sub-Fund's portfolio invested in 'sustainable investments' as defined in Article 2 (17) of the SFDR regulation: **49.4%**

None of the indicators were subject to an assurance provided by an auditor or a review by a third party for the current and previous years

...and compared to previous periods?

Indicator	2022*	2023**	Comparison
The percentage of the Sub-Fund's portfolio compliant with the RBC policy	100%	100%	In line with the sub-fund's commitment
The percentage of the Sub-Fund's portfolio covered by the ESG analysis based on the ESG internal proprietary methodology	100%%	100%	In line with the sub-fund's commitment
The weighted average ESG score of the Sub-Fund's portfolio compared to the weighted average ESG score of its investment universe	61.9 vs 53.5	62.6 vs 53.0	In line with the sub-fund's commitment
The percentage of the Sub-Fund's portfolio invested in 'sustainable investments' as defined in Article 2 (17) of the SFDR regulation	47.5%	49.4%	In line with the sub-fund's commitment

^{*}Figures reported in 2022 were calculated on the closing date of the accounting year

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments made by the sub-fund are to finance companies that contribute to environmental and/or social objectives through their products and services, as well as their sustainable practices.

The internal methodology integrates several criteria into its definition of sustainable investments that are considered to be core components to qualify a company as sustainable. These criteria are complementary to each other. In practice, a company must meet at least one of the criteria described below in order to be considered as contributing to an environmental or social objective:

- 1. A company with an economic activity aligned with the EU Taxonomy objectives
- A company with an economic activity contributing to one or more United Nations Sustainable Development goals (UN SDG) targets;

^{**} Figures reported in 2023 are expressed as a quaterly weighted average.

- A company operating in high GHG emission sector that is transitioning its business model to align with the objective of maintaining the global temperature rise below 1.5°C;
- A company with best-in-class environmental or social practices compared to its peers within the relevant sector and geographical region.

Green bonds, social bonds and sustainability bonds issued to support specific environmental and/or social projects are also qualified as sustainable investments provided that these debt securities receive an investment recommendation 'POSITIVE' or 'NEUTRAL' from the Sustainability Center following the issuer and underlying project assessment based on a proprietary Green/Social/Sustainability Bond Assessment methodology.

Companies identified as a sustainable investment should not significantly harm any other environmental or social objectives (the Do No Significant Harm 'DNSH' principle) and should follow good governance practices. BNP Paribas Asset Management (BNPP AM) uses its proprietary methodology to assess all companies against these requirements.

The share of the sub-fund's investments considered by the SFDR regulation to be sustainable investments contributes in the proportions described in the question on the allocation of assets to the environmental objectives defined in the European Regulation on Taxonomy in force to date: climate change mitigation and/or adaptation to climate change.

More information on the internal methodology can be found on the website of the investment manager: https://docfinder.bnpparibas-am.com/api/files/14787511-CB33-49FC-B9B5-7E934948BE63

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments that the product partially intends to make should not significantly harm any environmental or social objective (DNSH Principle). In this respect, the investment manager commits to consider principal adverse impacts on sustainability factors by taking into account indicators for adverse impacts as defined in SFDR and set out in Table 1 and any relevant additional indicator from Tables 2 and 3 of Annex I of the Delegated Regulation, and to not invest in companies that do not meet their fundamental obligations in line with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights

How were the indicators for adverse impacts on sustainability factors taken into account?

The investment manager ensures that throughout its investment process, the financial product takes into account principal adverse impact indicators that are relevant to its investment strategy to select the sustainable investments that the financial product partially intends to make by systematically implementing the sustainable investment pillars defined in the BNP Paribas Asset Management Global Sustainability Strategy (GSS) into its investment process and as further detailed below in this document; RBC policy, ESG integration guidelines, Stewardship, the forward-looking vision – the '3Es' (Energy transition, Environmental sustainability, Equality & Inclusive Growth).

All issuers included in the proportion of sustainable investments were compliant with the DNSH test.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The investment universe of the sub-fund is periodically screened with a view to identify issuers that are potentially in violation or at risk of violation of the UN Global Compact Principles, OECD Guidelines for Multinational Enterprises and UN Guiding Principles on Business & Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. This assessment is conducted within the BNPP AM Sustainability Centre on the basis of internal analysis and information provided by external experts, and in

consultation with BNP Paribas Group CSR Team. If an issuer is found to be in serious and repeated violations of any of the principles, it will be placed on an 'exclusion list' and will not be available for investment. Existing investments should be divested from the portfolio according to an internal procedure. If an issuer is at risk of violating any of the principles, it is placed on a 'watch list' monitored, as appropriate.

The issuers that have been placed on watch list are excluded from the proportion of sustainable investments disclosed in the report.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considers principal adverse impacts on sustainability factors by systematically implementing the sustainable investment pillars defined in the GSS into its investment process. These pillars are covered by firm-wide policies that set criteria to identify, consider and prioritise as well as address or mitigate adverse sustainability impacts caused by issuers.

The RBC policy establishes a common framework across investments and economic activities that help identify industries and behaviours presenting a high risk of adverse impacts in violation of international norms. As part of the RBC Policy, sector policies provide a tailored approach to identify and prioritize principal adverse impacts based on the nature of the economic activity, and in many cases, the geography in which these economic activities take place.

The ESG Integration Guidelines includes a series of commitments, which are material to consideration of principal adverse sustainability impacts, and guides the internal ESG integration process. The proprietary ESG scoring framework includes an assessment of a number of adverse sustainability impacts caused by companies in which we invest. Outcome of this assessment may impact the valuation models as well as the portfolio construction depending on the severity and materiality of adverse impacts identified.

Thus, the Investment Manager considers principal adverse sustainability impacts throughout the investment process through the use of the internal ESG scores and construction of the portfolio with an improved ESG profile compared to its investment universe.

The Forward-looking perspective defines a set of objectives and developed performance indicators to measure how the researches, portfolios and commitments are aligned on three issues, the '3Es' (Energy transition, Environmental sustainability, Equality & inclusive growth) and thus support investment processes.

Furthermore, the Stewardship team regularly identifies adverse impacts through ongoing research, collaboration with other long-term investors, and dialogue with NGOs and other experts.

Actions to address or mitigate principal adverse sustainability impacts depend on the severity and materiality of these impacts. These actions are guided by the RBC Policy, ESG Integration Guidelines, and Engagement and Voting Policy which include the following provisions:

- Exclusion of issuers that are in violation of international norms and conventions and issuers that are
 involved in activities presenting an unacceptable risk to society and/or the environment
- Engagement with issuers with the aim of encouraging them to improve their environmental, social and governance practices and, thus, mitigate potential adverse impacts
- In case of equity holdings, voting at Annual General Meetings of companies the portfolio is invested in to promote good governance and advance environmental and social issues
- Ensuring all securities included in the portfolio have supportive ESG research
- Managing portfolios so that their aggregate ESG score is better than the relevant benchmark or universe

Based on the above approach, and depending on the composition of the sub-fund's portfolio (i.e. the type of issuer), the financial product considers and addresses or mitigates the following principal adverse sustainability impacts:

Corporate mandatory indicators:

- 1. GreenHouse Gas (GHG) Emissions
- 2. Carbon footprint
- 3. GHG intensity of investee companies
- 4. Exposure to companies active in the fossil fuel sector
- 5. Share of non-renewable energy consumption and production
- 6. Energy consumption intensity per high impact climate sector
- 7. Activities negatively affecting biodiversity sensitive areas
- 8. Emissions to water
- 9. Hazardous waste ratio
- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators:

Environment

- 4. Investments in companies without carbon emission reduction initiatives Social
- 4. Lack of a supplier code of conduct
- 9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity

Source of data: BNP Paribas Asset Management, expressed as a quaterly weighted average.

The largest investments are based on official accounting data and are based on the transaction date.

What was the proportion of sustainability-related investments?

The proportion of sustainable investments of the sub-fund is 49.4%.

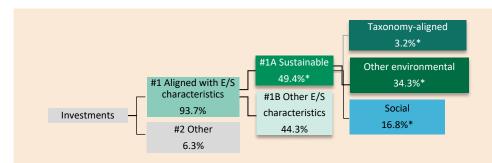

What was the asset allocation?

The proportion of the investments of the sub-fund used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the sub-fund sub-fund is 93.7%.

The remaining proportion of the investments is mainly used as described under the question: "What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?"

^{*} Any percentage differences with the financial statement portfolios result from a rounding difference.

^{**} Any difference with the portfolio statements above are coming from the use of different data's sources.

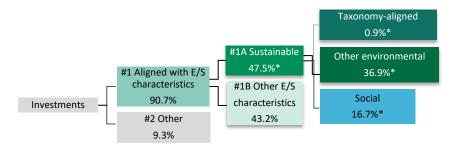

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- -The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- -The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.
- *A portfolio security classified as sustainable investment may, taking into account all its activities, both contribute to a social objective and to an environmental objective (aligned or not with the taxonomy of the EU) and the figures shown take this into account. However, the same issuer can only be recognised once for sustainable investments (#1A Sustainable).

As at 30.12.2022, the figures were as follow:

In which economic sectors were the investments made?

% Asset
47,48%
9,88%
8,91%
7,51%
6,92%
5,03%
4,81%
3,83%

1,77%
1,01%
0,82%

Source of data: BNP Paribas Asset Management, expressed as a quaterly weighted average. The largest investments are based on official accounting data and are based on the transaction date. The fund did not have exposure to fossil fuel.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The sub-fund did not commit itself to having a minimum proportion of sustainable investments with an environmental objective in economic activities that are considered environmentally sustainable within the meaning of the EU Taxonomy, but did do so.

The two graphs below illustrate, according to the data available, the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy and contribute to the environmental objectives of climate change mitigation and adaptation.

The investment manager uses data from third-party providers to measure the proportion of investments that are aligned with the EU Taxonomy. Providers collect companies' self-reported alignment KPIs and may use equivalent information where these are not readily available in public disclosures. More information on BNPP AM the methodology and the providers used can be found here: https://docfinder.bnpparibas-am.com/api/files/0EE37EC2-8612-48A5-8AA1-D5C09CCB58DD

The investment manager is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Further updates of the prospectus and the alignment of commitments with the EU Taxonomy may be made accordingly.

Economic activities that are not recognised by the EU taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

The compliance of those investments with the requirements laid down in article 3 of Regulation (EU) 2020/852 (Taxonomy Regulation) has not been subject to an assurance provided by an auditor or review by a third party.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

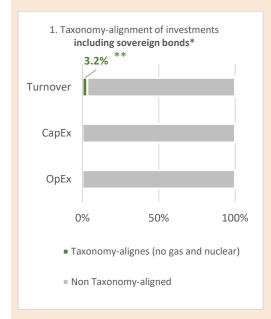

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

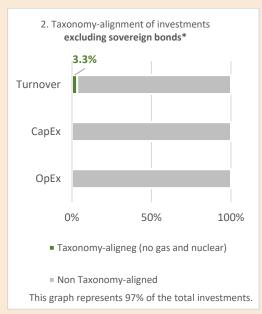

The data covering the proportion of taxonomy-aligned activities related to fossil gas and nuclear energy were solely available starting from the last quarter of the accounting year and as such have not been included in the data reported.

However, the weighted average of the proportion of such investments does not exceed 1%.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures
- ** Real taxonomy aligned

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the Regulations Taxonomy is 0% for transitional activities and 0% for enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Revenue
2022*	0.9%
2023**	3.2%

^{*}Figures reported in 2022 were calculated on the closing date of the accounting year

The proportion of taxonomy-aligned economic activities in CapEx or OpEx are not disclosed given the current level of data at the disposal of the management company related to such information.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that are not aligned with the European Taxonomy Regulation is **34.3%**.

The investment manager is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Meanwhile, the sub-fund will invest in sustainable investments whose environmental objective is not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Socially sustainable investments represent 16.8% of the sub-fund .

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining proportion of the investments includes the proportion of assets that do not attain the following standards established by the investment manager: 1) a positive ESG score and either a positive E score or a positive S score or 2) being Sustainable Investment according to BNPP AM ESG proprietary methodology or instruments which are mainly used for liquidity, such as cash and cash equivalent assets and/or efficient portfolio management, and/or hedging purposes. Those investments are made in compliance with our internal processes, including the risk management policy and the RBC policy when applicable as minimum environmental or social safeguards. The risk management policy comprises procedures as are necessary to enable the assessment for each financial product of the exposure of that product to market, liquidity, sustainability and counterparty risks.

What actions have been taken to meet the environmental and/or social characteristics during the reference period

 The sub-fund shall comply with the RBC Policy by excluding companies involved in controversies due to poor practices related to human and labor rights, environment, and corruption, as well as

^{**} Figures reported in 2023 are expressed as a quaterly weighted average.

companies operating in sensitive sectors (tobacco, coal, controversial weapons, asbestos,...), as these companies are deemed to be in violation of international norms, or to cause unacceptable harm to society and/or the environment.

- The sub-fund shall systematically integrate relevant ESG factors in line with its investment strategy into its investment analysis and decision-making processes.
- The sub-fund shall have at least 90% of its assets (excluding ancillary liquid assets) covered by the ESG analysis based on the ESG internal proprietary methodology.
- The sub-fund's investment universe shall be reduced by a minimum of 20% due to exclusion of securities with low ESG score and/or sector exclusions as per the RBC Policy.
- The sub-fund shall have the weighted average ESG score of its portfolio higher than the weighted average ESG score of its investment universe.
- The sub-fund shall invest a proportion of its assets in "sustainable investments" as defined in Article 2 (17) of the SFDR regulation
- The exclusions covered by the investment manager's exclusion policy applies, being (1) Issuers that breach the principles of the UN Global Compact (UNGC), (2) Issuers involved in the manufacture or product life cycle of controversial weapons (such as but not limited to chemical weapons, cluster munitions and landmines); (3) Issuers deriving a certain percentage of their revenue from the production of tobacco or from other type of involvement in the life cycle of tobacco products such as distribution or licencing activities; (4) Issuers that derive a certain percentage of their revenue from thermal coal extraction and/or arctic drilling; and (5) Issuers that contravene the UNGC labourrelated principles and International Labour Organisation's ("ILO") broader set of labour standards.

In addition, the investment manager has implemented a voting and engagement policy. Several examples of commitments are detailed in the vote and commitment section of the Sustainability Report. These documents are available at the following link: https://www.bnpparibas-am.com/en/sustainability-documents/

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the sub-fund

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?`

Not applicable

Sustainable investment means

an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation

does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: CoRe Series - FAM Sustainable (the "Sub-Fund")

Legal entity identifier: 213800VAU6995BQI8X17

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?					
Yes	● ○ 🗶 No				
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 74.43% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective				
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments				

Unless otherwise stated, all actual data within this periodic report are calculated as quarterly average figures for 2023 (1 January 2023 – 31 December 2023).

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product included:

a. Minimum investment in funds in scope of Article 8 and 9 of the SFDR

The Sub-Fund invested 99.77% in Underlying Funds which fall within the meaning of either Article 8 or Article 9 of the SFDR, which means, that the majority of the

Underlying Funds which he Sub-Fund held promoted environmental and social characteristics while investing in companies which follow good governance practices.

b. Positive Screening

Consideration of ESG factors was a key element of portfolio construction/fund selection. Portfolio managers took a holistic approach which included the analysis of ESG factors as part of their overall risk adjusted valuation assessment. This supported the overall promotion of investment in funds which the Manager deems desirable on ESG grounds. By incorporating positive ESG factors as part of the overall portfolio construction/fund selection, the Sub-Fund through its investments, supported a tilt towards investment in Underlying Funds that have a more positive impact on the environment or society at large.

c. Fund Level ESG Scoring

A monthly independent analysis and classification of the Sub-Fund's ESG score was performed internally by the Manager. A minimum ESG score of "A" was applied at Fund level to ensure that the Sub-Fund's ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund Level ESG score and promoted engagement and challenge of portfolio managers on ESG topics.

d. Negative Screening (Norm-based exclusions)

For any direct holdings the Manager applied norms-based exclusions. The Manager wanted its funds under management to avoid making any investments which the Manager or its clients might deem incompatible with minimum responsible investing principles. To align the Sub-Fund's investments with this sustainable investment approach, the Manager adopted a firm wide exclusion policy which screens all investments for their compliance with minimum international standards and norms, from which an Exclusion List is derived.

Exclusion categories considered in the Exclusion Policy were:

- United Nations Global Compact Principles
- Controversial Weapons
- Tobacco
- Climate Change
- Forced Labour

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

Sustainability

how the

social

indicators measure

environmental or

characteristics

promoted by the

financial product are attained.

How did the sustainability indicators perform?

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Sub-Fund;

 the percentage of the Sub-Fund's Underlying Fund holdings rated A or above by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 99.7% of holdings for 2023.

...and compared to previous periods?

For 2022, the percentage of the Sub-Fund's Underlying Fund holdings rated A or above by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 99.72%.

Please be informed that the difference between the percentages of sustainable investments disclosed between 2022 and 2023 partially relies on an update to the third party data provider's sustainable investments calculation methodology which the Manager relies on as follows:

As of 7 June 2023, MSCI updated their Sustainable Investment calculation methodology. An extra metric has been added to the positive contribution category, that includes companies with a carbon emissions reduction target approved by the Science Based Targets initiative ("SBTi"). SBTi is a partnership between CDP, the United Nations Global Compact, the World Wildlife Fund for Nature (WWF) and the World Resources Institute (WRI). Other frameworks for measuring and comparing GHG reduction targets exist (including those developed by MSCI ESG Research), however, SBTi is currently the most commonly used framework to assess the aggressiveness of GHG emission reduction targets required under international treaties. As a result, the Manager implemented this new metric, into its sustainable investment calculation methodology.

Link to Managers SI methodology is per below:

https://finecoassetmanagement.com/wp-content/uploads/2023/09/FINECO-AM-Sustainable-Investment-Methodology.pdf

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Please note that the Sub-Fund currently follows a fund of funds investment approach and can invest principally in underlying open-ended UCIs and UCITS (as well as other permissable instruments). The Management Company therefore relies on data provided by the investment managers of the underlying fund investments when calculating the percentage proportion of sustainable investment of the Sub-Fund and when calculating the percentages required in the section below dealing with the asset allocation of the Sub-Fund.

The objectives of the sustainable investments that the Sub-Fund made was to promote environmental and/or social characteristics. On the basis that the Sub-Fund is currently following a fund of funds investment approach, the objectives of

the sustainable investments that the Sub-Fund partially intends to make is linked to the sustainable investments made by the Underlying Funds. The Sub-Fund sought to make investments in Underlying Funds that committed/partially committed to invest in sustainable investments and who had a process for ensuring that their sustainable investments met the following criteria:

- a. Made in investee companies that demonstrate good governance;
- b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
- c. Made in investee companies that make a positive contribution towards an environmental or social objective. The Sub-Fund allocated between Underlying Funds which make sustainable investments of any type, i.e. investments with an environmental, and/or a social objective. The Sub-Fund did not favour any specific type of sustainable investment.

In 2023, the Sub-Fund had a proportion of 74.43% of sustainable investments.

The sustainable investments that the Sub-Fund made did not cause significant harm to any environmental or social sustainable investment objective based on the policies adopted by the relevant Underlying Fund investment managers. These policies were considered as part of the Manager's initial and ongoing investment due diligence procedures and were assessed for alignment with the indicators set out in Table 1 and any relevant additional indicator from Tables 2 and 3 of Annex I of the Delegated Regulation.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impact ("PAI") indicators were calculated at both the Sub-Fund level and the Underlying Fund level. The results were compared with that of a chosen proxy benchmark representative of the Sub-Fund's investment universe and/or peers. These calculations were used as the basis of assessment of adverse impacts on sustainability factors in order to determine whether the Manager could improve at Fund level and/or where Manager could engage with Underlying Fund investment managers to improve at the Underlying Fund level.

The Sub-Fund considered the following principal adverse sustainability impacts indicators for the proportion of assets qualified as sustainable investments:

Corporate mandatory indicators;

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- 1. GreenHouse Gas (GHG) Emissions
- 2. Carbon footprint
- 3. GHG intensity of investee companies
- 4. Exposure to companies active in the fossil fuel sector
- 5. Share of non-renewable energy consumption and production
- 6. Energy consumption intensity per high impact climate sector
- 7. Activities negatively affecting biodiversity sensitive areas
- 8. Emissions to water
- 9. Hazardous waste ratio
- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

<u>Corporate voluntary indicators - Environment;</u>

15. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators - Social;

16. Lack of a human rights policy

Sovereign mandatory indicator;

- 17. GHG intensity
- 18. Investee countries subject to social violations

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments which the Sub-Fund made in the Underlying Funds and their alignment with the OECD Guidelines for Multinational

Enterprises and the UN Guiding Principles on Business and Human Rights were assessed in the following ways:

- a. Via PAI monitoring of the following indicators;
 - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD)
 Guidelines for Multinational Enterprises; and
 - Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises.
- b. Through engagement with the Underlying Fund investment managers to ensure that the sustainable investments that the Underlying Funds made are:
 - Made in investee companies that demonstrate good governance;

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

- Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
- Made in investee companies that make a positive contribution towards an environmental or social objective.

How did this financial product consider principal adverse impacts on sustainability factors?

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Sub-Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the

Sub-Fund, provided that all minimum standards were met. The results were compared with that of a chosen proxy benchmark representative of the Sub-Fund's investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were:

Corporate mandatory indicators;

- 1. GreenHouse Gas (GHG) Emissions
- 2. Carbon footprint
- 3. GHG intensity of investee companies
- 4. Exposure to companies active in the fossil fuel sector
- 5. Share of non-renewable energy consumption and production
- 6. Energy consumption intensity per high impact climate sector
- 7. Activities negatively affecting biodiversity sensitive areas
- 8. Emissions to water
- 9. Hazardous waste ratio
- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

<u>Corporate voluntary indicators - Environment;</u>

15. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators - Social;

16. Lack of a human rights policy

Sovereign mandatory indicator;

17. GHG intensity

18. Investee countries subject to social violations

More detailed information on the manner in which the Manager considered principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager's SFDR disclosure statement; "Statement on principal adverse impacts of investment decisions on sustainability factors".

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31 December 2023

Asset allocation

describes the share of

investments in specific assets.

What were the top investments of this financial product?

		% of	
Largest Investment	Sector	Asset	Country
NORTH AMERICAN STARS EQUITY FAM			
FUND - J	Open-ended Investment Funds	16%	Ireland
FIDELITY WORLD FAM FUND	Open-ended Investment Funds	15%	Ireland
GLOBAL SUSTAIN PARIS ALIGNED FAM			
FUND	Open-ended Investment Funds	13%	Ireland
SMART FACTORS US FAM FUND	Open-ended Investment Funds	13%	Ireland

The following data has been compiled as of 31 December 2023. Classification of securities including Sector and Country are determined as at the last day of the reference period. (31 December 2023) This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

74.43%

What was the asset allocation?

99.77% of the Sub-Fund's Investments were aligned with the environmental and/or social characteristics promoted by the Sub-Fund.

The Sub-Fund also committed to a minimum proportion of 40% in sustainable investments and as at 31 December the Sub-Fund had a proportion of 74.43% of sustainable investments. The remaining investments of the Sub-Fund were invested in cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. Calculations

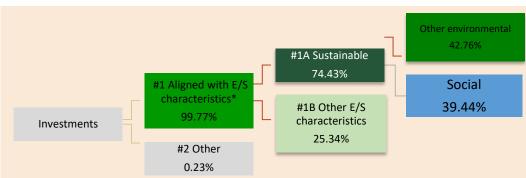

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

may rely on incomplete or inaccurate underlying fund manager data and/or company or third-party data.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sectors	% Assets
Open-ended Investment Funds	99.55%

The following data has been compiled as of 31 December 2023. Classification of securities including Sector and Country are determined as at the last day of the reference period. (31 December 2023) This data includes all securities, excluding derivatives.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

As the investments underlying this Sub-Fund do not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation, the Sub-Fund's portfolio alignment with the Taxonomy Regulation was not calculated. It follows that the Sub-Fund does not currently commit to investing more than 0% of its assets in investments aligned with the Taxonomy.

^{*}Please note that the above is calculated using the quarterly average's Total Net Asset Value of the Fund.

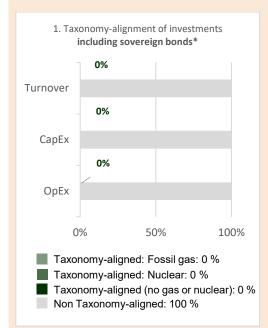

Taxonomy-aligned activities are expressed as a share of:

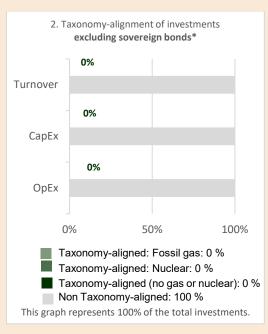

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation" —) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities in 2022.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that was not aligned with the European Taxonomy Regulation is 42.76%. The fund did not have Taxonomy aligned commitment.

What was the share of socially sustainable investments?

Socially sustainable investments represented 39.44% of the financial product.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

As the Fund uses Total Net Asset Value of the Fund in its asset allocation calculation, the portion of "Others" includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. along with other amounts contributing to the Total Net Asset Value.

Any "#2 Other" potential investments, other than cash or cash equivalents are screened according to the Managers exclusion policy.

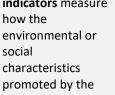

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as a minimum investment in funds in scope of Article 8 and 9 of the SFDR, Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

Furthermore, the Sub-Fund invested 74.43% its assets in "sustainable investments" as defined in Article 2 (17) of SFDR. Criteria to qualify an investment as "sustainable investment" are indicated in the above question "What were the objectives of the sustainable investments that the financial product partially intends to make and does the sustainable investments contribute to such objectives?".

The Sub-Fund invested 99.77% in Underlying Funds which fall within the meaning of either Article 8 or Article 9 of the SFDR, which means, the majority of the Underlying Funds which the Sub-Fund held promoted environmental and social characteristics while investing in companies which follow good governance practices.

financial product

are attained.

How did this financial product perform compared to the reference benchmark?

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

- How does the reference benchmark differ from a broad market index?
 Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
 Not applicable.
- How did this financial product perform compared with the broad market index?`
 Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Investment Manager's Report

Fidelity Euro Bond FAM Fund (the "Sub-Fund")

The fund posted negative returns and underperformed the index during the year 2022. The fund's term structure positioning is primary detractor whereas its credit strategy supported the performance. Markets battled with soaring inflation, unprecedented interest rate hikes by central banks and a subsequent synchronised slowdown in global economic activity. Russia's invasion of Ukraine, supply chain disruptions, an energy crisis in Europe and COVID-19 related lockdowns in China earlier in the year exacerbated an already challenging macro backdrop. The continued hawkish rhetoric of US Federal Reserve and the European Central Bank led to several hikes in 2022, with a clear prioritisation of inflation at the cost of growth. In turn, benchmark 10year sovereign yields touched multi-year highs and government bonds posted negative returns. In this regard, the fund's tactical long USD duration dragged the performance. Furthermore, the overall long EUR duration also detracted from gains, however the fund's favourable position along the 1y to 5y part of the EUR curve helped offset the losses. In addition to this, the short JPY duration also aided the returns marginally. We entered the year with an underweight credit beta position which aided the returns when spreads widened. The shift to overweight credit beta helped the fund generate alpha in O4 2022 when spreads tightened on account of improved risk sentiments. At a sector level, the overweight exposure to Banks & Brokers, Insurance, Property, Basic Industry, Capital goods, Consumer Non-Cyclical and Utility supported the performance. Moreover, the underweight allocation to Tech & Communication also added value, whereas underweight exposure to Treasury and Quasi Sovereign detracted from performance. The underweight position in government bond of Netherland, France and Portugal detracted from gains. In terms of ratings, the underweight exposure to AA-rated credits weighed on the gains whereas the allocation to AAA, A and BBB-rated credits supported the performance. From an issuer perspective, the overweight stance in Allianz, AXA SA and Thames Water Utilities added value. Conversely, the exposure to Credit Suisse Group costed the fund some performance in relative terms.

FIL Pensions Management March 2023

Investment Manager's Report (continued)

Fidelity Euro Short Term Bond FAM Fund (the "Sub-Fund")

The fund posted negative returns and underperformed the index during 12-months ending December 2022. The fund's term structure positioning primarily contributed to the alpha generation whereas its credit strategy detracted from gains. Markets battled with soaring inflation, unprecedented interest rate hikes by central banks and a subsequent synchronised slowdown in global economic activity. Russia's invasion of Ukraine, supply chain disruptions, an energy crisis in Europe and COVID-19 related lockdowns in China earlier in the year exacerbated an already challenging macro backdrop. The continued hawkish rhetoric of US Federal Reserve and the European Central Bank led to several hikes in 2022, with a clear prioritisation of inflation at the cost of growth. In turn, benchmark 10-year sovereign yields touched multi-year highs. In line with the backdrop, the tactical long USD duration detracted from gains. However, the fund's short EUR duration supported the returns and more than offset the losses from positioning along the USD curve. At a sector level, the overweight exposure to Banks & Brokers, Basic Industry, Capital goods, and Consumer non-cyclicals supported the performance. In addition to this, the underweight allocation to Energy and Utility also added value. Conversely, the underweight allocation to Quasi Sovereign and Treasury detracted from gains. In terms exposure to governments bond, the underweight allocation to Spanish, Italian and French government dragged the performance. Within ratings, the underweight allocation to AAA and AA-rated credits were the primary detractor, whereas the exposure towards A and BB & below rated credits contributed to the performance. Overall, the exposure to banking has contributed, as despite the rally in Financials, the spread verses corporates remain attractive and thus, our significant overweight in issuers like ABN AMRO, Commerzbank, and Deutsche Bank contributed to the performance. The underweight stance in Italian and French government bonds also weighed on the alpha generation. From an issuer perspective, the exposure to banking credits including ABN Amro, Commerzbank, Deutsche Bank and Standard Chartered contributed primarily, on account of favourable spreads against the corporates and we had significant overweight in these credits. Conversely, the exposure to Credit Suisse Group and Blackstone Property Partners costed the fund some performance in relative terms.

FIL Pensions Management March 2023

Investment Manager's Report (continued)

Fidelity Global Dividend FAM Fund (the "Sub-Fund")

Global equity markets posted negative performance in 2022 after three consecutive years of strong absolute performance. In 2022, markets had their worst yearly decline since the Global Financial Crisis of 2008. The year began with inflation surging higher along with supply chain issues as Covid-19 cases finally came under control in most parts of the world except China which was under a strict lockdown policy until the last months of the year. Europe's energy crisis emerged following Russia's invasion of Ukraine. Major central banks increased rates aggressively, often by more than expected, as they attempted to contain inflation. Against this backdrop, all sectors except energy ended in negative territory in US Dollar terms, with consumer discretionary and communication services emerging as the bottom performers. The fund's bias towards the insurance industry contributed the most to the relative performance. Additionally, the fund's limited exposure to software & services and media & entertainment stocks enhanced gains. Conversely, the fund's lack of exposure to energy stocks held back gains. At a stock level, the fund benefited from the lack of exposure to large-cap growth companies, namely Amazon, Tesla and Meta, whose valuations contracted in light of rising interest rates. Insurance companies Progressive Corporation and Munich Re were notable contributors to returns. The former reported strong third-quarter results and the management believe that they have now achieved rate adequacy and are positioned for growth as competitors continue to raise prices. The latter reported third-quarter results that were in line with expectations. It increased its guidance for gross premiums in its reinsurance line of business as a result of strong performance in the first nine months of 2022. German exchange Deutsch Boerse benefited from positive broker commentary that cited strong volume data for Q3, which is likely to drive consensus earnings upgrades. It is well-positioned to benefit from rising interest rates and elevated levels of gas trading. Some of the relative outperformance was offset by the holding in Intel. Its shares slid given ongoing capital expenditures to transform the competitiveness of the business in light of an industrywide downturn. However, Intel generated solid results and made substantial progress on its product and process execution during the third quarter. Shares in UK-based motor insurer Admiral were weak despite stronger pricing, which still needs to catch up with high levels of inflation. European capital goods company Sandvik declined on concerns around a potential recession in Europe. Nonetheless, it witnessed continued strong demand across the board for its products and its supply chain and pricing were effectively handled.

FIL Pensions Management March 2023

Investment Manager's Report (continued)

Fidelity World FAM Fund (the "Sub-Fund")

Fund (Gross): -16.9%. MSCI World Index (Net): -18.0%. W.e.f. January 2022, the Fidelity World FAM Fund is being managed by Jamie Harvey. The manager's core bottom-up stock picking approach is anchored in the belief that markets are semi-efficient. He believes the companies addressing the greatest environmental and social challenges stand to earn higher and more durable returns over time. These companies enjoy better growth opportunities and lower long-term risk profiles, and therefore have the potential to deliver strong returns to shareholders while also being a driving force for positive societal change. Within these ESG leaders, the PM then looks for companies where market expectations over 3-5 years are too low i.e., duration (companies with sustainable competitive advantages and pricing power) and change (through accelerated structural and cyclical change). This concentrated global equity strategy has a quality growth bias and adopts a Sustainable Focused strategy. The fund outperformed the comparative benchmark during 2022 in a falling market. The underweight stance in large cap growth stocks including ecommerce player Amazon.com, electric vehicle manufacturer Tesla, iPhone maker Apple and lack of exposure to Meta Platforms (formerly Facebook) and Nvidia contributed to relative returns as negative investor sentiment coupled with supply issues in respective end markets weighed on shares. The top contributor, infrastructure services provider Quanta Services added value following an upbeat revenue guidance for the year. The company has attractive growth prospects in electrical grid development and underground gas infrastructure modernization. Another key contributor, HDFC Bank and a play on financial inclusion theme maintains a healthy asset quality with a sequential decline in slippages and healthy recoveries and continues to offer superior returns compared to its peers. Conversely, the fund's underweight stance in the energy sector (best performing sector) with lack of exposure to Exxon Mobil and Chevron hurt relative returns. The fund was not immune to dramatic selloffs in some of the higher growth stocks, and exposure to Omnicell and Icon hurt relative returns. Automated pharmacy solutions provider Omnicell declined as a slowing revenue growth trajectory continued to drag performance lower. This position was closed. The position in clinical research organisation (CRO) Icon declined over concerns regarding the ongoing market concerns about the level of biotech funding. Elsewhere, shares in credit reporting agency TransUnion underperformed after the company lowered its full year revenue and earnings guidance. Nonetheless, it is a high-quality compounder with continuous runway for outperformance, that bodes well for the earnings growth of the company in the long-term. US-based installer and distributor of insulation products TopBuild also declined as inflation concerns and higher mortgage rates weighed on stock performance. The position was sold in favour of better opportunities elsewhere.

FIL Pensions Management March 2023

Investment Manager's Report (continued)

US Equity Value FAM Fund (the "Sub-Fund")

Equity markets declined in the first quarter of 2022 amid volatility sparked by Russia's invasion of Ukraine, rising commodity prices, rampant global inflation and the US Federal Reserve's (the Fed) shift toward tighter monetary policy. Russia's invasion exacerbated inflation pressures, disrupting already strained supply chains and increasing shortages of oil, gas and raw materials. The price of oil rose sharply, with crude prices reaching their highest price per barrel since 2008. Inflation continued to be a top concern for consumers, investors and the Fed. To combat inflation, the Fed raised the federal funds rate by one-quarter percentage point in March and indicated it would "taper" its asset purchase program quickly. As the war in Ukraine continued and inflation rose, the equity markets sold off in April, continuing into the second quarter of 2022. Driven by higher food and energy prices, the consumer price index rose by a 40-year high to 8.6% for the twelve months ended May 2022 and oil prices peaked near \$122 per barrel in early June. To tame inflation, the Fed raised the benchmark federal funds rate three more times, by 0.50% in May, by 0.75% in June and another 0.75% in July, which were the largest increases in nearly 30 years. US equity markets rose in July and August until the Fed reiterated that it would continue taking aggressive action to curb inflation, even though such measures could "bring pain to households and businesses," and the Fed raised the benchmark federal funds rate by another 0.75% in September. After experiencing a sharp drop in September 2022, US equity markets rebounded in October and November, despite mixed data on the economy and corporate earnings. However, the Fed's message of continued rate hikes, sent markets lower in December. As energy prices declined, the rate of inflation slowed modestly in the fourth quarter. Corporate earnings generally met expectations, though companies provided cautious future guidance. With inflation still at multi-decade highs, the Fed raised its target rate by 0.75% in November and by 0.50% in December, marking its highest level in over a decade. Contributors to relative performance included stock selection within real estate, materials, consumer staples, communication services, utilities, healthcare and consumer discretionary. Within real estate, Host Hotels & Resorts outperformed based on the massive increase in travel over 2022, while not owning specialty REITs also helped. In materials, fertilizer and agriculture chemical companies, CF Industries Holdings and Corteva both outperformed after beating earnings estimates and reporting higher average selling prices for its top products. In consumer staples, Philip Morris's IOOS (line of heated tobacco and electronic cigarette products) growth should serve as a tailwind to revenue growth due to higher revenue for IQOS vs traditional combustibles. Favorable geographic mix shift to Europe should allow for higher revenue growth compared to other regions. Within consumer discretionary, Las Vegas Sands outperformed and contributed to absolute and relative returns. The stock rallied after the Macau government announced it will resume Detractors to relative performance included stock selection in financials, information technology (IT), industrials and energy. In financials, large banks, Bank of America and Citigroup, underperformed due to lower profits from increased reserves and investor concerns of a pending recession. Also, having an overweight in regional banks that underperformed and not owning visitation access from Mainland China. Berkshire Hathaway that outperformed, hurt relative performance. Within IT, NXP Semiconductors, Qualcomm, Cognizant Technology and DXC Technology underperformed. Qualcomm stock fell on prospects of an inventory correction. While industry challenges remain, we see the company's leadership in cellular technology (3G/4G/5G) as a differentiator given improving demand for handsets. Within materials, International Paper was a large detractor. The stock price suffered after management reported weaker demand and lower profit margins due to an environment with more pervasive inflation. Within energy, having no exposure to oil/gas service and refining/marketing industries, as well as being largely underweight Exxon Mobil, were the largest detractors.

Invesco Advisers, Inc. March 2023

Investment Manager's Report (continued)

M&G North American Value FAM Fund (the "Sub-Fund")

The fund fell in 2022 but ended the year well ahead of its benchmark index, helped by a powerful rotation towards the value investment style. Asset allocation and stock selection both supported relative performance, reflecting the breadth of the value tailwind. Above-index positions in energy was helpful as oil and gas prices were elevated for much of the year, as well as in more defensive areas of the market such as consumer staples and healthcare. The underweights in information technology and consumer discretionary also assisted relative performance, as the former weakened with the market rotation away from the growth investment style, and the latter was affected by rising costs. Stock selection was strong across the market except in energy and communications services where it had a neutral effect, and in industrials where it detracted value, but this was mainly due to stocks the fund did not hold. At the individual stock level, energy holdings Chevron and ConocoPhillips were notable contributors as they benefited from soaring oil and gas prices after Russia's invasion of Ukraine. Some of our defensive holdings held up well as concerns about the economic outlook took hold. These included the utility Constellation Energy, which also benefited from the US\$400bn Inflation Reduction Act (IRA) supporting the shift to renewables, and healthcare stocks Bristol Myers Squibb and Merck. We have liked the sector's valuation and fundamentals for some time, especially the stable cashflows earned by pharmaceutical companies. In addition, the drug pricing caps implemented in the IRA were not as severe as expected. Not holding Amazon, Tesla, Apple and Nvidia added value too, given the weakness in the consumer discretionary and technology sectors. On the other hand, TV and media group Warner Bros Discovery was a notable laggard. The company was formed in a merger in April and the shares have been weak since amid concerns about the integration process. In addition, the HBO owner reported falling revenues in its latest results, reflecting increased competition in streaming services. However, we believe the company produces a huge amount of varied content and investors are underappreciating its prospects. The fund's technology company holdings were not immune from the sector weakness and included eBay, Micron Technology and Western Digital. Elsewhere, car maker General Motors declined amid concerns about higher input costs and disruption to the automotive supply chain. Conversely, not holding Eli Lilly and United Health in the healthcare sector detracted value, as did a zero weighting in energy company Exxon Mobil which is not a participant in the transition to clean energy.

M&G Investment Management Limited March 2023

Investment Manager's Report (continued)

Amundi Emerging Markets Bond FAM Fund (the "Sub-Fund")

The portfolio outperformed its benchmark in 2022, mainly driven by our duration strategy and cash positioning, while our FX allocations detracted marginally from excess returns. Over majority of the year we retained an underweight duration bias, in the face of sticky inflation. In the second half of the year, we recalibrated our positioning taking profits and were less short duration, as yields repriced higher. Our view has remained that inflationary pressures were likely to cause DM central banks to raise policy rates. Over the year ending December, the yield on 10-year US treasuries moved higher by 2.36% to close the year at 3.87%. We maintained our beta and cash positioning dynamically over the course of the year that contributed positively. Within hard currency credit selection, the largest drivers of excess returns included an underweight bias to Russian debt, as well as an overweight bias to Argentina. Within FX, our positioning in the South African rand detracted marginally from returns, while our positioning in the dollar for majority of the second half of the year did well.

Amundi Ireland Limited March 2023

Investment Manager's Report (continued)

Amundi Strategic Bond FAM Fund (the "Sub-Fund")

The portfolio delivered negative returns in 2022. The fixed income universe, had a challenging start of the year.

The geopolitical tensions triggered by the escalating conflict between Russia and Ukraine dominated the market focus. Despite turning more defensive and progressively reducing out exposure to the conflict since the beginning of 20222, our exposure to these countries detracted performance over the year. Our reduced exposure to both countries contained, but did not eliminate, the negative performance contribution of this conflict.

However, the rates environment was the main performance detractor in 2022. Our active duration management proved beneficial mitigating the negative performance impact from the rates move. Nevertheless, duration was an overall detractor of performance over the period mainly driven by our exposure to the EUR curve. Coming into 2023, whilst the markets expect the ECB to slow its hiking process, we believe that we will remain in an environment of tighter monetary policy.

Within European High Yield, the real estate sector detracted performance in the second half of the year. The poor governance of a couple of issuers caught investors by surprise leading to negative performance within the sector. In line with our risk allocation, the banking sector was another significant driver of negative returns.

The previously mentioned geopolitical conflict also led to a rise in commodity prices, in particular Oil prices. Within EM the energy sector was one of the strongest contributors to performance over the year. Oil prices remained sustained throughout the year on the back of the conflict and other events such as OPEC reducing their supply or signs of China reopening towards the end of the year.

Within China, the developments surrounding the real estate sector detracted performance. This trend started to reverse as we approached year-end as expectations of further easing of the zero covid policy increased. In one month, China dropped most of its Covid-related restrictions, vowed to support the housing market further, and set pro-growth policies.

Investment Manager's Report (continued)

Amundi European Equity Value FAM Fund (the "Sub-Fund")

The portfolio underperformed its benchmark, the MSCI Europe Value, in 2022. As a general comment, our exposure to the "real economy" cyclicals (the consumer/industrial names) was a headwind given the recessionary concerns. Adding to this, our underweight exposure to the more commodity related areas hurt the relative performance given the geopolitical premium in some commodity markets post the Russia/Ukraine war in February. This has started to abate as commodity prices have recently declined. Looking across sectors for the year, Utilities and our zero exposure to Real Estate contributed positively while Consumer Discretionary and Materials (not owning some mining names hurt in H1), and Consumer Staples all detracted.

At a single stock level, our holding of integrated energy company Repsol added solid gains helped by the strong oil price. Our holding of media and events company Informa also performed well helped by the post Covid reopening and normalisation of public events. Lastly, on the positive side, Deutsche Telekom performed well as investors favoured the more defensive names given the market volatility.

On the negative side, UK homebuilder Persimmon lagged as a combination of cost inflation, a slowing UK economy, and higher interest rates caused nervousness amongst investors. The Covid-19 lockdown situation in China which persisted for most of 2022 was a clear headwind for our holding of luxury company Kering. Finally on the negative side, our holding of auto component maker Faurecia suffered as concerns about inflation impacting margins as well as slowing end markets were a clear headwind. We sold this name in 2022.

Investment Manager's Report (continued)

Emerging Markets Bond Hard Currency FAM Fund (the "Sub-Fund")

2022 was a negative year for financial markets, with equities seeing their worst annual performance since 2008, just as global bonds fell into a bear market for the first time in decades. Investors grappled with multi-decade high inflation, aggressive monetary policy normalisation and geopolitical turmoil, since Russia's invasion of Ukraine in February led to massive spikes in energy and food prices. The Fed began its hiking cycle in March with a 25bps move. In the face of stubborn inflation, they increased the pace of rate hikes to 75bps in June, July and November. The ECB also hiked rates for the first time in over a decade, opening with a 50bps move in July and following up with a 75bps move in September. Q4 marked the only quarter of the year where markets had a broadly positive performance. In early October, the S&P 500 hit its closing low for the year amidst a nervous market backdrop. However, markets were more resilient after that as both the October and November CPI readings from the US surprised on the downside. Strong US November job market data cooled the markets' dovish narrative. With inflation falling back, both the Fed and the ECB stepped down to 50bp hikes in December, but they remained hawkish in both cases, signalling further rate hikes ahead in 2023.

Within Emerging Markets, we saw different dynamics across regions. Central banks in Latin America proactively fought against an elevated inflation by strengthening their tight monetary policies at the beginning of the year. As the year passed, this proactivity allowed countries such as Brazil to pause their tightening policies and be well positioned at the time of global growth deceleration. In Asia, the picture is different and inflation had been somehow subdued due to an economic reopening which only started in the second quarter 2022 and had been gradual across the region. The exception to this has been China, which moved from a zero COVID policy to a full reopening in only couple of weeks, after the re-election of Xi Jiping mid-October. Apart from central banks actions, emerging markets faced a numerous number of challenges in 2022.

Starting with Central Eastern Europe, the conflict between Ukraine and Russia had a global impact across a wide range of implications such as economic (sharp increase of energy & food price), social (Migration wave across European countries) and geopolitical impact. The conflict is far from being resolved as of December end 2022. Moving to Asia, the Zero Covid policy in China combined with the tightening of regulatory policies across sectors including Real Estate, also had a strong impact on markets, pushing many property developers to default on their debt. Sovereign issuers were not immune against debt restructuring and we saw various emerging countries defaulting (Sri Lanka, Ghana) or seeking help from the International Monetary Fund (IMF).

In USD terms, EM Hard Currency Sovereign (JPM EMBI Global Diversified) delivered -17.78% with most of the underperformance coming from US treasuries component (-14.%). In 2022, there were strong regional disparity with the Middle East outperforming other regions including Europe (-35.88%) which lagged due to the direct impact of the Ukraine war. Within the asset class, both Investment Grade and High Yield underperformed, returning -19.76% and -15.68% respectively for the year.

The fund annual returns were negative at -18.23% (net of fees, for the IHC share class) but above the benchmark by 1.91% net of fees with a positive contribution from both our duration and emerging bonds strategies.

On duration, an underweight duration positioning that we kept through the year was the key performance driver. The portfolio had a defensive positioning on duration as we were expecting US treasuries to sell off in anticipation of higher inflation in the US and tighter monetary policy from the US Federal Reserve. The Fed action pushed US Treasury yields higher across the curve (Between 369bps for 2y tenor and 206bps for longer dated bonds). On Emerging bonds, our strategy had a positive contribution too, on the back of the active management of our directional exposure toward the asset class. A defensive positioning in the first part of the year allowed the portfolio to remain ahead of the benchmark, while we succeeded to benefit from the strong rebound of risky asset in the fourth quarter. Finally, country selection detracted returns. We benefitted from the underweight exposure to Russia that we had before the Russia-Ukraine conflict started, and maintained up to the removal of Russia and Belarus from the benchmark. Elsewhere we benefitted from overweight allocations such as in Bahrein or in Brazil, two countries that benefited from elevated commodity prices. Our underweight exposure to Pakistan also brought gains, as the country was negatively impacted by historical floods that put further pressure in an economy already relying on the IMF support. On the flip side, the overweight exposure to Ukraine detracted due to the impact the war has had on Ukraine's economy and the reconstruction cost which keeps rising. Furthermore, our slight overweight exposure to Sri Lanka, combined with an overweight exposure to Chinese real estate detracted returns. Finally, our underweight exposure to Turkey brought losses, as the country recorded a strong performance from hard currency bonds despite maintaining an unorthodox monetary policy and facing historically high inflation.

Investment Manager's Report (continued)

Emerging Markets Bond Hard Currency FAM Fund (the "Sub-Fund") (continued)

We actively managed both our duration and directional exposure to emerging market hard currency bonds through the year. On duration we entered 2022 with an underweight of around 3 years versus the benchmark that we gradually reduced through the year, taking profit on the gain made from the treasury market sell-off. As for our directional exposure, while we had a constructive view on the medium term, we started the year with a tactical defensive positioning toward the asset class that we further reduced during the first semester with the implementation of some credit protection via CDS following the unexpected war declaration from Russia. Credit protection was gradually removed and we increased our exposure to the asset class, mainly through high yielding bonds (Senegal, Brazil, Egypt, El Salvador) which were providing an attractive valuation following the spread decompression that they faced versus Investment Grade bonds until October 2022. In terms of countries allocation, while the primary market has been depressed through the year, we actively adjusted our positioning via the secondary market. One of our key adjustment was performed in Russia where we moved from a neutral to an underweight positioning in February 2022 before the conflict starts. Closer to year-end, we took some profits in Mexico and reduced the exposure to quasi issuers, which benefitted from elevated oil prices. We reallocated some of our exposure across various countries where we had a defensive positioning such as Poland and Ukraine (Due to the geographical proximity with Ukraine), Turkey or South Africa.

Amundi (UK) Limited March 2023

Investment Manager's Report (continued)

Euro Bond FAM Fund (the "Sub-Fund")

Throughout the year, inflation figures, Central Banks communication and actions remained the main market movers.

The levels reached by inflation figures are the result of consecutive supply shocks – bottlenecks post Pandemic to face the pentup demand, energy prices plummeting because of the Russian-Ukrainian conflict. These levels have called for a monetary response from Central Banks, which took the form of several rates hikes.

Hence, the Federal Reserve hiked seven times during the year for a total of +425 bp, being really concerned to be able to contain the price to wage loop even at the expense of economic activity. The ECB delivered a series of four hikes totaling +250 bp to curb inflation spillover effects, driving market expectations one way or another depending on the hawkishness of C. Lagarde tone. The ECB also ended its buying program in June and pointed several risks to the inflation front in its new forecasts. Even if inflation may have peaked at 10.6% in October, the deceleration is slow. The ECB has no certainty as to the extent of wage catching-up, especially as the fiscal measures decided since September preserve consumption potential. The resilience of advanced business indicators supports this vision. While there was at first the fear of an hard recession, holding back Central Bankers, growth now seems more resilient than expected and the ECB warns that it plans to move key interest rates into restrictive territory well beyond the bond market pricing and to hold them there for longer.

In this context, the German 10 year rate went up by +128 bp to 2.56% after reaching a low at 0.78% by end of July when market participants hoped the July +50 bp move would limit the number of necessary hikes. During the part of the year, 2 year German rates went up by +213 bp to 2.77%. As a result, the yield curve flattened to become inverted. This is consistent with the ECB going into a restrictive territory and being obliged to cut rates afterwards.

Despite tightening in the end of the year, credit spreads widened over the year, driven by rising interest rates. A significant part of this spread widening came from the underperformance of swap spreads. Swap rates were first driven up by banks hedging their mortgage exposure (swap payers). The second most impactful effect was the scarcity of German paper, sought after for collateral needs, thus limiting the sell-off of German debt. But in the end of the year, the Finanzagentur and the ECB took technical measures to alleviate the collateral scarcity helping swap spreads to perform. Therefore during the last quarter, swap rates went up but by a lesser extend as Banks hedging flows have diminished drastically while the issuance programs of Sovereigns are significantly higher in 2023.

The absolute performance suffered from the increase in interest rates even if it proved more resilient than its benchmark thanks to the underweight in modified duration and its flattening stance, despite the credit and swap related products overweight.

The central issue for 2023 remains the inflation landing point that will determine how restrictive central banks, and the ECB in particular, will be.

The absolute performance suffered from the increase in interest rates even if it proved more resilient than its benchmark thanks to the underweight in modified duration and its flattening stance, despite the credit and swap related products overweight.

2022 is the worst performance since 2008 on Credit Investment Grade with -13% total return.

Credit markets ended the year in negative territory as a result of the accumulation of negative events: a hawkish ECB and Fed, Russia's referendums in Ukraine, the Italian elections and the minibudget in the UK. The first catalyst was the latest news from the war between Ukraine and Russia, ie. The annexation decision by Russia of territories in Ukraine and the decision to stop gas supply. Nordstream 1 has been closed for an indefinite period and possible sanctions by Russia on Naftogaz 3 would threaten gas flows to Europe, via Ukraine. The decisive win of right wing parties in Italy's parliamentary election led to strong BTP-Bund widening. More recently, the new UK government's controversial mini-Budget caused significant volatility on the market. New issuance fell victim to rising risk aversion. With more than half of the year gone, IG and HY issues will certainly end at a lower level than last year, except for senior financials, which largely drove the primary market.

On the credit side, primary activity slowed at the end of the year, bringing the annual figure to €512bn. This figure is 20% lower than in 2021, but still very high given the rise in risk aversion.

We kept our Beta below 1. In Q3 2022 A possible recession in the coming months in Europe was approaching and the fear of a deterioration in corporate fundamentals was growing. There were many elements of market volatility in Q3 and it therefore seemed more prudent to us not to put risk back into the portfolio. In Q4 2022 the Beta of the portfolio was brought to 1.10 around. We were able to take advantage of the primary issues and New Issue Premiums in Q4.

Impact of the rise in rates by central banks has a negative effect on rates and credit spreads. The speed and strength of this rise in interest rates on both sides of the Atlantic influences our positioning in terms of interest rate duration. We remained underweight against our benchmark. On the curve, we stay away from long dated bonds, which are more sensitive to the volatility of sovereign rates.

Volatility and the rise in European interest rates following the decisions of the various central banks in mid-December led us to decrease the modified duration of the portfolio relative to its benchmark. We went from -0.20 in October to +0.17 in November to -0.37 at the end of the year.

Investment Manager's Report (continued)

Euro Corporate Fixed Income FAM Fund (the "Sub-Fund") (continued)

In a volatile market after the decisions of the Central Banks, we were still able to observe many positive flows on GI. The attraction of the level of rates and credit spreads is reviving interest in the GI asset class even in this volatile environment. We ended the year with over 10 billion in redemptions in the asset class.

The trend in January will be based on the different interpretations of inflation figures in the US and Europe. A slowdown, proven or insufficient for the inflation targets, will influence the level of rates and credit spreads.

Looking ahead, we maintain our cautious credit stance. Credit spreads and sovereign rates will remain volatile. A real policy reversal by central banks is not yet possible, given the persistence of inflation and the strong will to fight it. On the growth side, falling earnings, declining consumer demand and rising financing costs should add to investor unease. That said, the uncertain economic environment and attractive bond valuations make IG credit more attractive to investors, who should continue to return to the asset class.

Amundi (UK) Limited March 2023

Investment Manager's Report (continued)

Euro Short Duration Bond FAM Fund (the "Sub-Fund")

Amid extremely challenging market conditions, portfolio performance suffered a drawdown over 2022. Duration management was responsible for much of the underperformance. An overweight duration stance was used to express various iterations of our slowing growth theme over the year. Our rates strategy reflected our pessimistic growth outlook. As we started the year, we saw evidence that the post-Covid rebound in demand was behind us and identified a number of headwinds to growth as fiscal support was withdrawn. We held an overweight duration stance (initially concentrated in the UK and Europe) to reflect this view. While we didn't foresee the outbreak of war in Ukraine, we were concerned that the market was too complacent about this risk. We closed our shorts in US and European inflation and retained overweight duration on the rationale that any war would lead to a flight to quality. With hindsight we underestimated that central banks and markets would focus on the upside risk to inflation rather than the downside risk to growth. Central banks as a result became more engaged, focusing on the containment of inflation pressures, which saw the traditional safe-haven correlations of bond markets break down. During usual risk-off events, duration would have been sufficient to protect some of the more cyclical risk held in the portfolio, but on this occasion it was an ineffective hedge. The war shifted the narrative on inflation and increasingly it contributed to our negative view on global growth, especially across Europe. With inflation acting as a tax on the consumer and squeezing profit margins, we expected challenging times ahead. We saw additional signs of the global growth slowdown underway as purchasing managers indices (PMIs) fell into contractionary territory and there was further evidence of deteriorating housing markets across the world. Against this backdrop and given already elevated Treasury yields, US duration was becoming an increasingly attractive means of adding risk to the fund. With the US economy well into a rate hiking cycle, we expected tighter financial conditions to act as an additional headwind. However, in retrospect we were too early in implementing outright US duration. We underestimated the Fed's commitment to contain inflation even at the risk of the economy falling into recession. With the Fed's Chair Powell increasing emphasis over the need to address labour market imbalances in a period where official inflation measures continued to surprise to the upside, we cut our position given the risk of further losses. In the latter stages of the year, while being alert to opportunities emerging as a result of labour market weakness, we kept overall duration much closer to benchmark, seeing greater benefit from exploiting relative value opportunities. Signs of divergence in central bank forward guidance, driven in part by a more dovish outcome in those economies that are more vulnerable to weaker housing markets, was increasingly a determinant of our rates strategy. This generally worked well, particularly through the short European rates position against the UK. While UK duration was a major factor in the fund's relative underperformance over the year, it's worth noting that we avoided much of September's dramatic market sell-off by cutting positions ahead of the Budget announcement. The lack of robust framework around the new Prime Minister Truss' fiscal package, which looked to be permanent and largely unfunded at a time when the deficit was already high, was clearly a concern for investors. With the drastically revised, more fiscally prudent Budget later presented by the government of new Prime Minister Sunak bringing some semblance of calm to the market, we have been more confident in adding back UK duration longs on a cross-market basis, such as the position against Europe noted above. In summary, performance was disappointing in an extraordinary year for fixed income. Duration was the wrong way to reflect our pessimistic view on growth as the market continued to grapple with problematic inflation even though recessionary risks loomed. Better performance was delivered towards the end of the year, in part by managing duration risk cross-markets.

Amundi (UK) Limited March 2023

Investment Manager's Report (continued)

Fineco AM European Corporate Bond Fund (the "Sub-Fund")

The European Corporate Bond FAM Fund was internalised in June 2021, having previously been managed by M&G. Overall for the full year, the Fund realised a total return of -14.90% net of fees.

In a year with significant idiosyncratic risks, the Fund benefitted from positive Issuer and security selection. While the Fund maintained a higher credit spread exposure than its benchmark, it managed to largely avoid idiosyncratic events. The Fund held an overweight in financial sector assets, mainly in the banking space, while underweighting consumer and industrials sectors.

The Fund was active in primary markets and tended to use new trades as an opportunity to capture pricing anomalies and to switch into quality Issuers

Fineco Asset Management Designated Activity Company March 2023

Investment Manager's Report (continued)

M&G Optimal Income FAM Fund (the "Sub-Fund")

The fund delivered a negative return in 2022, although the return was ahead of its reference benchmark over the year. It has been a challenging period for bond markets overall, with returns and investor confidence affected by high inflation, hawkish sentiment from central banks, and uncertainty over international events more generally. Positive drivers of relative return over the period include corporate credit, mainly in the fourth quarter of the year. Within corporate credit - still the investment manager's preferred bond asset in 2022 - fund exposure to credit default swap markets proved helpful as financial derivatives mainly outperformed physical bonds for most of the period. Within this, exposure to investment grade (high-quality) bonds issued by financial companies was a key driver. The sharp fall in the value of sterling assets towards the final days of the third quarter weighed on relative fund return, given exposure to both UK credit and UK duration. Equity exposure, which was trimmed in the year, was marginally supportive year-to-date on a relative basis. High yield exposure – which is around a third of fund assets - proved flat in terms of relative contributions.

Schroder Investment Management Limited March 2023

Investment Manager's Report (continued)

European Equity FAM Fund (the "Sub-Fund")

European equities generated negative returns in 2022. Increasing concerns around inflation and higher bond yields led to volatile swings and significant sector and style rotations across global markets. The geopolitical crisis arising from the war in Ukraine accelerated the economic deterioration that was already underway and increased the pressure on supply chains that were already strained due to successive COVID-19 lockdowns. There has also been a sharp rise in the cost of energy, further fuelling inflationary pressures and inviting a more hawkish stance by most major central banks. Record high levels of inflation led the European Central Bank (ECB) to hike its policy rate by 0.5% in July and 0.75% in September. The ECB further increased rates by 0.75% in October and by 0.5% in December. On the back of upward revisions to the inflation outlook, the central bank is likely to implement further significant rate hikes at a steady pace to ensure a timely return of inflation to its 2% target. The ECB's future decisions are likely to be data and outlook dependent and will depend on the size and composition of fiscal responses and developments in euro and peripheral spreads. Equities were also supported by optimism around European corporate earnings and the reversal of nearly all the unfunded tax cuts announced in the UK's September "mini-budget". The appointment of Prime Minister Rishi Sunak following the resignation of Mary Elizabeth Truss also supported markets. Against this backdrop, all sectors ended the year in negative territory. Energy, which rose over 40%, was the only exception. The portfolio returned -16.4% (gross of fees, EUR) versus the benchmark which returned -9.5%. The underperformance was largely driven by unfavourable stock selection in the industrials and health care sectors. Positioning within most sectors, notably the underweight stance in health care and the overweight exposure to information technology (IT), also hampered performance. However, robust stock picking within IT added notable value. At the stock level, shares in hearing aid manufacturer GN Store were weak as Shanghai and other areas in China entered lockdowns to curb COVID-19 infections, thus increasing the uncertainty around component supplies. The stock further derated given uncertainties around slowing customer demand and elevated input costs. Wizz Air declined given its exposure to Ukraine. Later in the period, it reported a net loss for FY22, cautioning that it expects an operating loss for the first quarter of FY23 as a result of industry disruptions and a volatile macroeconomic environment. In August, the stock further derated as its Chief Financial Officer, who successfully guided the company during the pandemic, decided to step down from his position. The holding was sold in October. Networking and telecommunications company Ericsson traded lower after it disclosed the results of an internal investigation that detailed suspect payments and misconduct in Iraq during 2011–2019. The company's share price derated further on weak quarterly results and on news that it sold equipment to clients in Russia. However, the company clarified that it only provided support related to equipment that had already shipped and had not made any sales to Russian customers post the implementation of sanctions. German real estate company Vonovia fell as the stock was treated as a bond proxy. Despite reporting in line first half 2022 results in August, Vonovia further declined as management issued a cautious outlook around higher energy prices and rising interest rates, which dampened investor sentiment. On a positive note, the position in employee benefits and incentives programme provider Edenred was the most notable contributor to performance, driven by consensus-beating first quarter and first half results. Edenred said that it expects to continue to benefit from the current macroeconomic environment. Inflation is a positive for the company, through the higher face value of vouchers, rise in fuel prices and increased financial income. This, coupled with strong structural growth opportunities, should continue to drive upgrades to organic growth. Oil major TotalEnergies rose in line with the wider energy sector. Luxury conglomerate Richemont announced strong first half results with a beat across divisions driven primarily by Jewellery Maisons. The sale of Richemont's controlling stake in online retailer Yoox Net-A-Porter also supported the group's operating margin. Pharmaceutical business AstraZeneca was also a source of strength following better than anticipated fourth quarter results and the signing of a contract with the Swiss Federal Office of Public Health to procure drugs to prevent COVID-19. Strong second quarter results, with a solid beat across the board and upward revision to its revenue guidance, also supported its shares. In November, the company announced positive third quarter results, with sales beating consensus estimates.

FIL Pensions Management March 2023

Investment Manager's Report (continued)

Fineco AM Global Premium Equities Fund (the "Sub-Fund")

The fund returned -2.8% in absolute terms, net of fees for 2022. Global equity markets experienced a tough 2022, posting their worst performance since GFC in 2018. Its negative performance was mainly driven by high valuation multiples. Russia's invasion of Ukraine and inflation. Continuation of persistent inflation, mainly driven by supply chain bottlenecks, in 2022 prompted central banks around the world to aggressively start hiking interest rates hurting stocks, in particular growth stocks which due to their higher valuation multiples and the nature of long duration earnings was hurt the most. On the contrary the cheaper part of the market held out relatively well as can be seen by the value style. In the US inflation reached a 40 year high above 9% in June which appears to have been the peak and eased to 6.5% in December. During the year the fund was overweight inflation sensitive sectors such as Energy and Materials, defensive sectors such as Healthcare and underweight economically sensitive sectors such as Consumer Discretionary and also underweight Information Technology and Communication Services which suffered from a central bank pivot from easy money policies in 2021 to interest rate increases. From an sector allocation perspective, overweight in Energy and underweight in IT were the two single largest contributors. On an individual security basis, our single largest contributor in 2022 was Rheinmetall which manufactures armoured cars and was a significant beneficiary from the German government's announcement of a EUR100bn defense force increase. Other positive contributors were in the Energy and Healthcare sector with Schlumberger and McKesson, respectively followed by Merck on the pharma side. Negative contributors include Evolution Mining, on the back of lower gold production guidance. Other detractors include Travis Perkins (building materials), Sony (Consumer Electronics) due to higher materials cost, poor economic outlook. On outlook, the fund is well positioned for a continuation of volatility and the economic slowdown that looks likely given still high inflation pressures and tightening financial conditions. Were Central Banks to pivot and start cutting interest rates, the fund would likely perform will in an absolute sense but would at least initially lag behind more long duration growth strategies.

Boston Partners Global Investors, Inc. March 2023

Investment Manager's Report (continued)

Fineco AM Global Equity Fund (the "Sub-Fund")

The fund returned -15.8% in absolute terms, net of fees for 2022. Global equity markets experienced a tough 2022, posting their worst performance since GFC in 2018. Its negative performance was mainly driven by high valuation multiples. Russia's invasion of Ukraine and inflation. Continuation of persistent inflation, mainly driven by supply chain bottlenecks, in 2022 prompted central banks around the world to aggressively start hiking interest rates hurting stocks, in particular growth stocks which due to their higher valuation multiples and the nature of long duration earnings was hurt the most. On the contrary the cheaper part of the market held out relatively well as can be seen by the value style. In the US inflation reached a 40 year high above 9% in June which appears to have been the peak and eased to 6.5% in December. The strategy's poor performance is mainly explained by stock selection as the market moved to price in interest rate hikes which hurt the valuation of long duration quality names in the portfolio. The fund was also hurt by low allocation to Energy, the best performing sector in 2022. On an individual security basis, Healthcare and Consumer Staples names did best, perhaps not surprisingly given the volatile and softening economic climate. Companies such as Merck, United Health and Becton Dickinson all proved their value, as did Coca Cola in the Consumer Staples sector. Main detractors unsurprisingly given higher interest rates were long duration quality growth stocks such as Microsoft and Amazon. Lower quality names such as Paypal which faced tough comparators, allied to an inflationary backdrop impacting costs and operational missteps were punished heavily. Other detractors included Hoya (inflation impacting margins) and Alphabet (lower revenues from digital advertising). On outlook, the fund owns high quality companies with long runways of growth, compelling business models and almost exclusively very strong balance sheets. While the current inflationary backdrop and higher interest rates continue to be a headwind, it also opens up significant opportunities for the companies in the fund to strengthen their franchises, improve their cost bases and to acquire assets which would have been economically unviable prior to the current sell off.

Investment Manager's Report (continued)

Fineco AM Euro Corp Bonds Fund (the "Sub-Fund")

The Fineco AM Euro Corp Bonds Fund was internalised on December 1st 2021 having previously been managed by DWS Asset Management. Over the full year, we sought to gradually and opportunistically transform the legacy portfolio closer towards preferred positioning. Reshaping trades tended to be done on an opportunistic basis both to minimise transaction costs, but also to take advantage of pockets of trading liquidity, particularly against the backdrop of broad market volatility.

The legacy portfolio was very granular, with a high number of individual issuers. As such, the Fund had exposure to a number of idiosyncratic / special situation type risks which weighed on performance. These included Issuers which were significantly impacted by the war in Ukraine as well as a meaningful number of ex-of-benchmark issuers.

Overall, the Fund realised a total return of -15.45% (net of fees).

As we entered 2023, work was ongoing to continue the reshaping on a tactical basis. The Fund has and continues to sell less preferred exposures into market strength, and looks to use primary market opportunities to further rationalise and consolidate exposures.

Investment Manager's Report (continued)

Flexible Equity Strategy FAM Fund (the "Sub-Fund")

2022 was one of the most challenging years since records began, with such negative performance not seen since 1931 and 1969. The situation in 2022 was extremely delicate, from Russia's invasion of Ukraine at the start of the year to the energy crisis caused by the war and, finally, spiralling inflation. The US Federal Reserve launched the most aggressive series of hikes seen in recent decades (7 hikes from March 2022) and inflation hit its highest level since the seventies. In Europe, inflation soared to over 10%, leading the ECB to intervene with a more aggressive monetary policy than in the past (4 hikes since July 2022). At yearend, the interest rates set by the central banks stood at 4.5% in the US and 2.5% in the Eurozone. The lockdown associated with the extremely strict zero-Covid policy adopted by China represented a further negative factor. The main market drivers in 2022 were the policies to manage interest rates adopted by the central banks to combat rising inflation, and fears of recession in the second half of the year. In this macroeconomic context, the markets performed extremely poorly: the only asset classes with positive performance were commodities (+13.8%) and the US Dollar (+6.2%). On the equity markets, the MSCI World index ended the year at -17%, with developed markets outperforming emerging markets. The only sector to perform positively at a global level was energy (+47.7%). In terms of investment strategies, the Value strategy performed best, while the Growth strategy performed worst. On the bond markets, every sector, from the safest to those with the highest risk, fell sharply. As regards government rates, the US 10-Year yield rose from 1.2% to 4.7%, while the Germany government bond went from negative figures to 2.7%. Consequently, the global government bond segment closed the year at -12.8%. In the corporate sector, however, there was a sharp widening of spreads which returned to the pandemic levels seen in 2020. In fact, both the High Yield and Investment Grade segments recorded extremely negative performance of -11% and -15% respectively.

PORTFOLIO REVIEW:

In 2022, the Fund recorded negative performance due in particular to the strong corrective action of the equity markets in the first half of the year. In the second half of the year, performance was slightly positive thanks to a value-dividend positioning that outperformed the rest of the market. Over the course of the year, the energy, healthcare and financials sectors performed positively. The short-term bond component was marginally negative. During the year, the weighting of the equity component was initially stable, before rising in response to the first signs of a drop in inflation in the US. As at 31 December 2022, the equity weighting was 56.8% and the main sectors were information technology, financials, and healthcare. The equity segment is distributed equally in terms of geographic exposure between Europe and the United States.

Fineco AM Investment Grade Euro Aggregate Bond Fund (the "Sub-Fund")

In 2022, the fund outperformed its index gross of fees and heavily outperformed its peer group. Our internal fund management team place an emphasis on the reflation trade in markets, monitoring the persistence of inflation and looking for opportunities in relative value positions. Our corporate bond exposure was more muted than competitors and we reduced risk over the period as the interest rate environment became more restrictive. Key outperforming strategies included a decision to underweight UK bonds at the beginning of the brief Truss premiership and positioning underweight Japanese government bonds ahead of the Bank of Japan partially raising their target yield curve control. Both positions benefitted performance. We also had a conviction to be long US bonds versus European bonds which also benefitted relative performance over the year

FIL Pensions Management March 2023

Investment Manager's Report (continued)

Fineco AM Euro Corporate Bond Fund (the "Sub-Fund")

The Euro Corporate Bond FAM Fund was internalised in June 2021, having previously been managed by Janus Henderson. Overall for the full year, the Fund realised a total return of -17.14% (net of fees).

The main driver of underperformance was the Fund's legacy overweight exposures to Real Estate issuers as well as a number of special situation Issuers which were significantly impacted by the war in Ukraine.

Over the full year, we sought to gradually and opportunistically transform the legacy portfolio closer towards preferred positioning. This involved a reduction in high yield and ex-of-benchmark exposures, replaced by "up in quality" trades. Reshaping trades tended to be done on an opportunistic basis both to minimise transaction costs, but also to take advantage of pockets of trading liquidity, particularly against the backdrop of broad market volatility.

Throughout the year, the Fund was selectively active in primary market transactions, and maintained a higher average yield than that of its benchmark.

Fineco Asset Management Designated Activity Company March 2023

Investment Manager's Report (continued)

Fineco AM Global Equities Income Fund (the "Sub-Fund")

The fund returned -3.5% in absolute terms, net of fees for 2022. Global equity markets experienced a tough 2022, posting their worst performance since GFC in 2018. Its negative performance was mainly driven by high valuation multiples, Russia's invasion of Ukraine and inflation. Continuation of persistent inflation, mainly driven by supply chain bottlenecks, in 2022 prompted central banks around the world to aggressively start hiking interest rates hurting stocks, in particular growth stocks which due to their higher valuation multiples and the nature of long duration earnings was hurt the most. On the contrary the cheaper part of the market held out relatively well as can be seen by the value style. In the US inflation reached a 40 year high above 9% in June which appears to have been the peak and eased to 6.5% in December. The strategy was overweight inflation sensitive sectors such as Energy and Materials, defensive sectors such as Consumer Staples and Healthcare and underweight economically sensitive sectors such as Consumer Discretionary and also underweight Information Technology and Communication Services. The more interest rate sensitive sectors of the market suffered from a central bank pivot from easy money policies in 2021 to interest rate increases. From a sector allocation perspective, fund benefited the most by being overweight in Energy and underweight in IT were the two single largest contributors.

On an individual security basis, largest contribution came from the Energy and Healthcare sectors. In Healthcare, Merck and Bristol Myers Squib were the main contributors whereas on the Energy sector, Valero and Equinor were main contributors performance benefiting from higher prices on the oil and gas markets. On the other side of the equation, increased interest rates impacted the IT sector significantly and while a net underweight in the sector overall, the fund holdings in Mediatek and Samsung suffered. European medical equipment maker Koninklijke Philips suffered as a result of supply chain bottlenecks and an impairment charge taken to provision for a potential settlement in US courts.

Fineco Asset Management Designated Activity Company March 2023

Investment Manager's Report (continued)

Invesco Global Total Return Bond FAM Fund (the "Sub-Fund")

It was a challenging year for financial assets with surging inflation driving market turmoil. With consumer price growth rising to double-digit levels, central banks tightened monetary policy at an unprecedented rate. Their action prompted a sharp sell-off in global bond markets. However, calmer conditions prevailed in Q4 as encouraging signs began to emerge that inflation in the US and eurozone may have peaked, raising hopes that the US Federal Reserve and European Central Bank would reduce the pace of expected rate hikes in 2023. However, government bonds finished the year in negative territory. Corporate bonds also fell in value with the ICE BofA Global Corporate index returning -16.2% in euro terms and the ICE BofA High Yield index declining by 13.6% for 2022. Credit spreads widened from 100bps to 148bps for global investment grade bonds and from 373bps to 515bps for high yield bonds. With US and eurozone government bond yields rising, interest rate risk (duration) was the main detractor from performance. Currency costs associated with hedging most of the Portfolio's non-euro exposure was also negative although this was offset by higher underlying yields from these bonds. Although spreads widened over the year, credit was a positive contributor with corporate hybrids and investment grade bonds leading the gains. In terms of individual holdings, the largest detractors were all long-dated government bonds issued by the US, Germany and France. The biggest contributors were US Treasury Inflation Protected Securities (these bonds help to hedge against inflation risk because they increase in value during inflationary periods), a long-dated UK government bond (which we bought at a significant discount to par during the turmoil resulting from the UK government's unfunded mini-budget) and a US dollar-denominated sovereign bond issued by Argentina. Given the significant repricing in bond markets over recent months we utilised the Portfolio's strong liquidity position (cash, government bonds and bonds with maturities less than one year) to increase exposure to credit, particularly in investment grade corporates. The allocation to subordinated financials and corporate hybrids was also increased, unlike high yield where we remain more cautious. Emerging markets is another area which we believe offers attractive opportunities with our preference being local currency bonds from countries where we think are coming to the end of their rate hiking cycle, for example Latin American ones and South Africa. The Portfolio's largest allocation is to developed market government bonds. Alongside conventional government exposure, the portfolio has an allocation to US Treasury Inflation Protected Securities (TIPS). To benefit from the additional yield available, the portfolio currently has exposure to corporate, Italian government and emerging market bonds. Corporate bond exposure includes holdings in financials. Modified duration was increased from 2.6 to 4.8 over the period after peaking at 5.6 at the end of October. The Portfolio returned -5.9% (net return) over the one-year period to the end of December 2022.

Invesco Asset Management Limited March 2023

Investment Manager's Report (continued)

Nordea Stable Performance FAM Fund (the "Sub-Fund")

The Nordea Stable Performance FAM fund delivered a negative performance of -6.82% (gross of fees)1 in 2022. From a relative perspective, it outperformed traditional 60/40 allocations down about -18%, with stocks and bonds falling in almost similar proportion. It was a difficult year, with sharp markets' regime shifts and main asset classes posting significant losses. Such mayhem was due to an accumulation of black swans, from war in Ukraine driving up commodity prices, 40-year high inflation, along with key central banks initiating monetary tightening and interest rates hikes to fight inflation. In fact, on both sides of the Atlantic, inflation accelerated to peak at 9.1% in the United States (June) and 10.6% in the euro zone (October). The interest rate hikes needed to reduce it fueled growing recession fears. In contrast with the sentiment driven first quarter, it has led to sudden changes in market regimes, a dispersion of performance between and within asset classes, as well as high and fluctuating volatility. In such uncertain environment, each attempt for main asset classes to rebound in the third and fourth quarter was short-lived and followed by a selloff, as the Fed and the ECB reemphasized their determination to fight inflation, even at the cost of recession. During 2022, equities have faced rough waters, with US indices posting their worst performance since 2008. Developed markets slightly underperformed their emerging peers, while European equities outperforming the US ones. Stylewise, Value has largely towered above Growth, with a massive relative outperformance of 23%, slightly shy of 2000's record when the "dotcom bubble" started to burst. As for the sectors, energy was the only one to be positive with a rally driven by the war in Ukraine and the sanctions against Russia, while communication services suffered the most. Against this backdrop, the fund's equity component moderately detracted from performance with its developed markets exposure, while its emerging one posted a small positive return. Moreover, the Stable/Low Risk Equities the fund invests in have consistently outperformed the market and generated alpha, which was particularly strong in December. This was key to diversifying the portfolio, limiting the impact of extreme market movements. Furthermore, the Momentum strategy, used to reduce net equity exposure when risks are high, had a positive contribution, offering protection during the tumbles of the third and fourth quarters, thus reducing portfolio's volatility. Within the fixed income space, sovereign yields were trending higher on both sides of the Atlantic, with now US and European curves being inverted. While US yields were multiplied by 6 to 2.5 times respectively for 2 and 10 years maturities, their European counterparts returned to positive territory with the entire curve above 2%. These movements were fueled by inflation's surge. In 2022, the exposure to duration has been partly increased compared to last year, due to a more attractive risk/return trade-off and growing diversification potential, particularly in the US, where inflation is starting to slow with six consecutive months of decline. Over the year, Duration suffered the most, although it stabilized during the last quarter with rising recession risks. Moreover, the open currency positions in high quality G10 FXs (coming from both the FX Valuation & Quality and Cross Assets Anti-Beta strategies) posted a slightly negative performance. However, they offered diversification and performance during a volatile third quarter, while giving back a part of the accumulated gains in the last one. Among the open currency positions, the long exposure to USD vs. EUR stood out.

The portfolio's modified duration was 1.9 years at the end of December 2022. In 2022, the exposure to duration has been partly increased compared to last year, due to a more attractive risk/return trade-off and growing diversification potential. As it's been the case for some years now, the management team continues to be more positive on US than Europe due to the more attractive risk-reward profile within the relative yield curves. Net equity exposure has decreased from 56.1% at the end of 2021 to around 48.3% at the end of December 2022 (mainly DM Equities), while the fund's beta vs global equities remains fairly low at 0.3. Currency-wise, the fund continues to be mostly hedged to EUR. The management team continues to prefer high quality currencies offering good valuation with strong diversification. Some examples of the actively managed currencies in the FX Valuation & Quality strategy include long JPY or USD, as well as short AUD or CAD.

Nordea Investment Management, AB March 2023

Investment Manager's Report (continued)

Fineco AM Euro Credit Bond Fund (the "Sub-Fund")

The Fineco AM Euro Credit Bond Fund was internalised in June 2021, having previously been managed by HSBC Asset Management. For the full year, the Fund had a total return net of fees of -15.61%.

In broad terms, the Fund's performance tended to be led by rates exposure and a generally more concentrated portfolio. One strategy employed by the Fund was to actively trade and reshape duration exposure, to manage downside volatility. This was very challenging against the prevailing risk backdrop throughout 2022, whereby expectations around Central Banks were subject to material shifts which led to gapping price action. Throughout the year, the Fund maintained a higher average yield than that of its benchmark, and on average had a higher credit rating profile.

The Fund was particularly active in both primary and secondary markets. In terms of primary activity, the Fund maintained strict price discipline when considering new transactions, mindful to achieve the best possible entry points for new exposures and not overpay versus secondary curves. The Fund was also active in derivatives, namely iTraxx Main and Crossover.

Fineco Asset Management Designated Activity Company March 2023

Investment Manager's Report (continued)

Euro High Yield Bond FAM Fund (the "Sub-Fund")

Markets battled with soaring inflation, unprecedented interest rate hikes by central banks and a subsequent synchronized slowdown in global economic activity. Russia's invasion of Ukraine, supply chain disruptions, an energy crisis in Europe and COVID-19 related lockdowns in China earlier in the year exacerbated an already challenging macroeconomic backdrop. However, markets recovered some lost ground towards the end of the year, as investors bet on easing inflation and slowing growth, which could eventually force global central banks to pursue a slower pace of tightening. Markets fell further in the last few weeks of the year amid worries that easing mobility restrictions and a complete reopening of China could keep inflation higher for longer. Nevertheless, the European Central Bank (ECB) and the Bank of England (BoE) stuck to a hawkish stance and delivered several interest rate hikes over the period, with a clear prioritisation of inflation at the cost of growth. In turn, benchmark 10-year sovereign yields touched multi-year highs. The fund posted negative returns but outperformed the comparative index over the review period. Consistent with the aims of the investment process, security selection strongly contributed to performance. In this respect holdings in Spanish communication company Cellnex and French telecom company Orange SA were among the top contributors to performance. Holdings in defensive issuers such as Grifols SA and Bayer AG also supported performance. Income returns had a small negative impact on performance, while interest rate risk was closely in line with the fund's reference index.

FIL Pensions Management March 2023

Investment Manager's Report (continued)

European High Yield Bond FAM Fund (the "Sub-Fund")

Over the past year, the global high yield market has experienced weakness in all regions. A variety of factors, including persistent inflation fears, geopolitical tensions and central bank tightening have contributed to the overall market weakness. The European high yield market underperformed the US high yield market, and generated a negative total return of -11.55% (in EUR) for the year which was driven by both higher rates and spread widening. The OAS spreads ended the year at 511 bps, which was 174 bps wider than the end of the previous year. In terms of rating buckets, triple Cs widened the most (+728 bps), followed by single Bs (+205 bps) and double Bs (+115 bps). The US high yield market had a negative total return of -11.22% on a local basis, with spreads widening by +171 bps to close the year at an OAS spread of 481 bps. Emerging markets high yield closed the year with a total return of -12.09%, underperforming developed markets high yield.

PORTFOLIO REVIEW:

Early in the year, we started to restructure the portfolio to gradually align it with our HY strategy. We gradually aligned the exposure towards financials, and also made a few changes in the CCC bucket by switching out of names we did not like from a liquidity perspective. Early March we started to de-risk the portfolio and took profit in low rated bonds that we screened to have performed well. We reduced our exposure towards European real estate and also towards names with less pricing power whose earnings we believe to be more strongly impacted by cost inflation. Then going into Q2, we maintained a cautious stance amid continued volatility. We opportunistically sold out of smaller low conviction positions, names with refinancing needs, and also continued to reduce our CCC exposure. We maintained our cautious stance throughout the second half of the year due to the heightened volatility associated with the push and pull of global rates and economic growth. We continued to skew our portfolio towards higher quality. In Q3 we further trimmed our exposure to European real estate, CCC names, alongside other names we either didn't like the risk reward or didn't see further upside, to monetize on the strong market rally early in the quarter. To partly balance that out, we reduced our underweight in financials and added on some defensive names. In Q4, we reduce our exposure in the automotive sector and also gradually sold all of our debt collectors exposure during the quarter.

PERFORMANCE ANALYSIS:

The fund outperformed the benchmark by 126bps (gross performance). This outperformance is primarily driven by the conservative positioning of the portfolio over the year.

Vontobel Asset Management AG March 2023

Investment Manager's Report (continued)

Emerging Markets Debt FAM Fund (the "Sub-Fund")

Fund performance in 2022 was negative and behind the reference index, despite much better (and positive) portfolio performance in H2. Despite a rebound in the last quarter of the year, emerging market debt suffered one of its worst ever years in 2022, due to a combination of recession fears in Western economies; China lockdowns; and Russia's invasion of Ukraine early in the period which showed no signs of ending by year-end. In H1 hard currency assets underperformed their local currency counterparts due to faster US interest rate rises than previously signalled and a stronger US dollar, which worked against the fund. In H2 local currency debt once again outperformed its hard currency counterpart. Top contributors over the year included Guatemala and Romania while top detractors included Pakistan and Ecuador.

Goldman Sachs Asset Management International March 2023

Investment Manager's Report (continued)

Vontobel Emerging Markets Debt FAM Fund (the "Sub-Fund")

We've observed three waves of risk aversion this year starting in Spring with the Russian invasion of Ukraine. After a brief recovery after the initial shock, eves turned towards renewed Covid lockdowns in China, renewed tension in commodities markets and a more broad "cost of living crisis" that really started to bite during the summer months. This was the second wave of risk aversion. A certain complacency returned over the latter part of summer as market participants started pricing a more dovish pivot from central banks who had been turning the screws since the start of the year, but these hopes were dashed by a hawkish Jackson Hole and subsequent poor inflation readings/re-hawkish Fed messages through September, as well a "disappointing" China party congress end October, constituting the third risk off wave of the year. However, market sentiment improved quite considerably in late Autumn/early Winter as China was pushed to revisit and abolish its zero covid policy, as well as start reflate its economy, starting with the real estate sector. Moreover, inflation figures in many developed market countries (and specifically the US) started to cool, leading market participants to anticipate less hawkish central bank policy. Risk assets rallied as interest rates and the USD softened markedly. In terms of emerging markets sovereign hard currency debt, absolute market performance was challenged in 2022 during which period the JP Morgan EMBI delivered a return of -17.8% in USD (ticker JPGCCOMP). This was made up of three negative quarters (O1, 2 & 3) and one positive quarter (O4). In terms of contributors to the year to date of the absolute negative performance of -17.8%, the bulk of the negative performance came from interest rate movements. The spreads sub index of the EMBI also delivered a negative performance (-4.4% in USD), but less significant than the negative contribution of rates (-14%). The initial hit to the spreads sub index took place with the Russian invasion of Ukraine in February then oscillated around low levels with the ebbs and flows of the other risk waves (and recoveries) described supra. Nevertheless, green shoots of recovery appeared to be taking place from Autumn as a number of risks which had been weighing on sentiment (War, US monetary policy, Chinese Covid) looked to be easing and spreads performed well in Q4 accordingly. As regards the FAM Vontobel Fund – Emerging Markets Debt (I share class EUR hedged, ticker VOEMDIH), the net performance for 2022 (to 30.12.2022, ISIN LU0926440222, net of fees) amounted to -21.9% on an absolute basis, underperforming the benchmark by -1.8%. In terms of the relative performance trajectory of the fund compared to the benchmark; the portfolio underperformed (as can be expected given the spread optimization approach) in each of the three risk aversion waves described supra. The portfolio did bounce back strongly after the Ukraine invasion and relative net performance was actually positive YTD as of mid-May compared to the benchmark. However, the second wave of risk aversion during the summer "cost of living crisis" had a significant negative impact on higher yield/lower quality countries. This was the period when the portfolio underperformed the most this year. The third risk aversion period caused another smaller relative performance trough, before a period of sustained risk appetite and outperformance of high yield/Frontier market, EUR denominated sovereign debt and Chinese real estate (Corporate) exposure allowed the portfolio to markedly outperform the benchmark in Q4, and thus limit relative underperformance in a hostile year for credit spreads and risk sentiment. Over the year, country allocation delivered the bulk of the negative relative performance. Bond selection was also negative. Duration/yield curve contributed positively too thanks to the broadly underweight duration in a rising rate environment. In terms of country allocation, there was a bit of a barbell between best and worst performing country. At the start of the year, the portfolio was running a large underweight in Russia (largest country allocation contributor), and Belarus, whilst it was at the same time running a sizeable overweight in Ukraine (largest country allocation detractor). Other than the above, most of the out/under performances relative to benchmark were in the HY space. On the negative side, country allocation was also affected by some idio-synchractic stories such as Ghana (officially defaulted in Autumn on its Eurobonds), Lebanon continued to suffer and we observed a corporate default in Luxembourg (a DM domiciled company exposed to emerging markets). Indeed, as described, high yield was particularly affected during the "cost of living" sell off of summer 2022, which exacerbated some price actions. Thus said, the "high yield rally" at the end of the year certainly reduced this negative impact. Indeed, exposures to countries such as Bahamas, which had been negative all year, actually turned positive into the year end. Positive performances also came from countries in which we'd reinforced/taken positions a bit later in the year and which benefitted from the rebound, such as Pakistan. Negative bond selection was to a large extent concentrated in Ukraine where the GDP warrant was particularly affected by the invasion, and to a lesser extent in Colombia (Credivalores) where a corporate issuer was affected "by association" by defaults in the same non-bank financial sector in Mexico. This was to some degree mitigated by positive bond selection in Russia, China (real estate) and Mexico.

Vontobel Asset Management AG March 2023

Investment Manager's Report (continued)

Jupiter Flexible Income FAM Fund (the "Sub-Fund")

The year began on a sour note, with the equity markets falling sharply due to the US Federal Reserve's hawkish tone. Risk assets continued to face pressure in February due to expectations of monetary tightening, with the Ukraine crisis exacerbating the situation. The earlier part of March had a stagflationary feel about it. The markets saw a big turnaround in the latter part of March due to a combination of hopes of deescalation in Ukraine and reasonable economic data. At the start of April, markets continued to reprice policy support as spiralling inflation sent interest rate expectations higher. In May, equities sold off due to a combination of worries about China and some disappointing sales figures from bellwether US consumer companies. Global equities fell sharply in June, credit spreads widened significantly, and the US dollar continued to rise during the month. The third quarter was an extremely complex one for fixed income markets. The key theme was a renewed hawkish posture from global central banks and especially the US Federal Reserve. Liz Truss's attempt to kindle the economy through unfunded fiscal expenditure spurred Gilt yields sharply higher towards the end of that quarter. October was a relatively diverse month for financial markets, with two distinct parts. The first half of the month was characterized by weak sentiment and rising yields as CPI numbers came higher than expected in the United States. The second half of the month, however, saw markets romancing once more with a possible Fed pivot. In November, the key market mover was the US CPI. Market reaction was extremely strong. Government bonds closed the month in positive territory, with yields ending lower across most of regions and especially in the United States and the United Kingdom. Credit markets also delivered robust returns across the board, with spreads tightening in most market segments. If markets hoped for a quiet end to the year, the principal central banks had other ideas. The European Central Bank's (ECB) much more aggressive "higher for longer" approach to interest rate rises caught many investors off guard, particularly in fixed income. The Bank of Japan (BoJ) too announced a major shift in its policy goal posts as the relentless pressure on the yen drove up the price of energy imports. The BoJ was forced to accept that its unilateral stance of managing monetary policy without raising interest rates was unsustainable. The strategy struggled during the first quarter. The key detractor in January was US equities, predominantly S&P futures, although we were able to cushion some of the losses with short Russell and Nasdaq futures as the volatility continued. Although we reduced risk in January, our preference for European assets (driven by diverging monetary policy) hurt in February as the Russia-Ukraine crisis caused Europe to underperform materially. The bad run continued in March. We shifted exposure away from the US in favour of Europe and Asia, expecting non-US assets to outperform thanks to relatively looser liquidity. Instead, a combination of the escalation of the war (which like many we didn't expect) and continued weak data and relatively hawkish policy from China, caused Europe and Asia to underperform. The most significant contributor in April was FX. Alternatives also had a strong month, in particular infrastructure but also energy and REITs. The key detractors were equities: while our UK overweight outperformed, we underperformed in the US and in Asia. The strategy underperformed in May: the primary driver was duration. We had added to duration given our expectation that yields would fall as recession risks increased and the Fed is likely to be unable to achieve all the hikes that are priced. In June, the main detractor to performance in June was alternatives, where diversifying incomebaskets of stocks with exposure to energy and agriculture, gave up much of the year's gains as commodities dived. In fixed income, duration modestly detracted overall. High yield detracted in absolute terms. Flexible Income underperformed the peer group in July given the broad underweight risk posture (especially equities). The key drivers of relative underperformance were an overall underweight to equities, particularly in Europe, and in Asia where we had some long exposure to China in the expectation of further stimulus which did not arrive. In August, the strategy performed strongly in relative terms. Our long USD positioning made a positive contribution, as it has been for much of this year. Equity performance was broadly flat: a large positive contribution from European equity hedges was offset by long positioning in the US, UK and Japan. A The strategy modestly underperformed the peer group in September. Key detractors were US equity futures, alternatives, and duration as markets sold off. The portfolio underperformed in October. The biggest negative contribution came from our short position in UK gilts, given the strong recovery induced by the new government. Our shorts on the GBP was also a negative contribution. The strategy underperformed slightly in November. Positive contributions came from our exposure to risk assets, in particular exposure to US equities, UK equities, HY bonds and bank capital were major contributors. Long exposure to government bonds (US and Austria) contributed positively as well. Negative contributions came instead from our long USD and CAD FX exposure and short GBP FX exposure as a from our short exposure to European equities. Inflation seems to be over its hump; the question now is how enduring it is and where it pitches in relation to the central banks' targets of 2%; only then will we really know how long it will be before interest rates peak, and when they then begin to come down again. China has significantly relaxed its zerotolerance to covid in response to civil unrest and it remains to be seen how an under-vaccinated population reacts as the virus runs rampant with a mortality rate likely to be significantly greater than any official data made public to the West.

Jupiter Flexible Income FAM Fund (the "Sub-Fund") (continued)

The Russian campaign in Ukraine has no end in sight: it will keep going as long as both sides have the political will to keep fighting and the military capability to wage war. There is still the potential for further dislocation especially in those commodities where Russia and Ukraine hold significant global supply positions.

Fineco Asset Management Designated Activity Company March 2023

Investment Manager's Report (continued)

Infusive Consumer Alpha Global Leaders FAM Fund (the "Sub-Fund")

For broad equity markets, 2022 was a challenging year. The MSCI All Country World Index ("MSCI ACWI") peaked on the forth of January, before beginning a steady downward move throughout the year. Early in the year the focus was entirely on inflation and the prospects of rising rates, but ultimately came to include worries about economic growth and a potential recession. Despite a challenging backdrop, the consumer remained fairly resilient throughout the year thanks to significant pent up savings from during the pandemic period and a labor market that remained strong despite the macroeconomic concerns. Below we'll review some of the key dynamics in the market each quarter. The Fund's total performance in 2022 was -22.8%, which compares unfavorably to the MSCI ACWI which was down -17.9% for the year. The key challenges we faced were (1) a heavy exposure to long duration equities that were most pressured in a year of rapidly rising interest rates and (2) an RMP that was ineffective at protecting the Long Book from the broad downside move in equity markets.

Recognizing these issues and expecting a challenging year for equities, we took actions throughout the first quarter to better position the Fund to outperform in the remainder of the year. As a result of these changes, we ended the year with a high concentration of the Fund in our best-in-class, Consumer AlphaTM companies that are defensive thanks to their significant cash flow generation and steady consumer demand. Additionally, we have maintained a lower than typical net exposure. After making these changes we have seen outperformance relative to the broad equity market. For reference, since the end of Q1 2022, the Fund was down -8.3% through the end of 2022 while the MSCI ACWI was down -13.4%, demonstrating the relative outperformance since those adjustments.

First Quarter

The first quarter saw the MSCI ACWI fall -5.2% and there were major developments across a few key themes. First, with respect to inflation. The cost of everything had been rapidly rising since the middle of 2021 driven by a list of factors including excessive fiscal and monetary stimulus, supply chain issues and shortages, the reopening of the global economy post covid shutdowns, and tight labor markets and rising wages. Then came the Russian invasion of Ukraine which was a tragic event. This further exacerbated the rise of inflation as sanctions and supply chain disruptions resulted in spiking food and energy costs. Headline inflation in the U.S. (CPI) reached +8.5% in March, which was squeezing consumers and raising costs for companies. The second ongoing theme was rising interest rates. Driven by the inflation and central banks around the world needing to reign in prices, we saw a dramatic rise in yields. The 10Y U.S. Treasury was yielding 1.5% at the start of the year and rose to 2.3% by quarter end with expectations for ongoing rate hikes. That has caused a negative de-rating of many long duration assets like growth stocks, which hurt their market values.

During the first quarter of 2022, the Long Book was down -14.5% as it faced a number of headwinds that weighed materially on performance. The major challenge was the rapid rise in interest rates that had a negative impact on the valuation of our longer duration investments. This is not unique to just hyper growth or unprofitable tech companies, but rather impacts any company that has a long runway for growth and thus a greater proportion of value sitting in more distant cash flows relative to a no growth asset. Given the quality and durability of growth at Consumer AlphaTM companies, the majority of our portfolio saw nontrivial reductions in valuations.

Additionally, our exposure to discretionary sectors was a headwind as inflation, uncertainty, and falling consumer confidence all weighed on these sectors. Finally, our exposure to European companies and companies that derive sales from Europe (including many of our consumer staples companies) were under pressure due to worries about consumer spending given the war in Eastern Europe and spiking inflation.

Second Quarter

During the second quarter, the MSCI ACWI fell -15.5% as a number of headwinds continued to challenge global equity markets. First, inflation remained very elevated, and the U.S. CPI ultimately peaked at 9.1% in June. Persistently high inflation throughout the quarter drove interest rates up, which had a negative impact on valuations. For reference, the yield on the 10Y UST rose from 2.3% at the end of March to 3.0% at the end of June. This was a major factor in the decline of the S&P 500's NTM PE ratio from 19.6x at the end of March to 15.9x at the end of June, which weighed heavily on equity prices. At the consumption level, stubbornly high inflation means a larger share of wallet is going toward spending on everyday things like groceries and gas, and thereby crowding out less necessary purchase.

Investment Manager's Report (continued)

Infusive Consumer Alpha Global Leaders FAM Fund (the "Sub-Fund") (continued)

Second Quarter (continued)

As troubling as high inflation was to the market, by the end of the quarter there was increasing concern around the likelihood and severity of a recession or serious growth slowdown. Consensus expectations for real GDP growth had been revised down to +2.4% in 2022 (with the fastest growth in H1) and +1.8% in 2023 (which compares to +5.7% in 2021). The reality is that rapidly tightening financial conditions and high input cost inflation was going to slow economic growth.

During the second quarter, our Long Book was down -9.3%. While this was a poor absolute performance in the quarter, given the worse drawdown seen by broad equity markets, this was a satisfactory outcome. A positive driver of performance was our consumer staples exposure. In fact, the top four contributors (British American Tobacco, Coca-Cola, Kirin, and Nestle) are all stable, highly cash generative, consumer staples companies. It should also be noted that our holding of cash in the quarter was a positive factor in our performance given the down market we experienced.

On the negative contributor during the 2nd quarter, we had the consumer discretionary and tech companies including Amazon, Alphabet, Apple, and Meta in the bottom four. The market environment for these sectors was very difficult given the uncertainty facing the economy. For reference, the MSCI ACWI Consumer Discretionary Index was down -20.2% in the quarter and the MSCI ACWI Communication Services Index was down -18.1% in the quarter. Against that weak performance in key sectors we invest in, we were content with the overall performance.

Third Quarter

During the third quarter of 2022, the MSCI ACWI fell -6.7% in a volatile quarter as the market was again dominated by debate around inflation and the path of central banks, particularly the U.S. Federal Reserve. In the first half of the quarter, the market was supported by a growing view that U.S. CPI peaked in June at 9.1%, and that as inflation cooled the Fed would "pivot" and be cutting rates early in 2023. In mid-August, the market expected 3.6% peak Fed Funds rate in 2023 and projected a year end 2023 level of 3.1%. This helped to drive the MSCI ACWI up +11% between the start of the quarter and 16-August. However, Chairman Powell's commentary at Jackson Hole, and again at the September Fed meeting, made it clear that there would be no pivot and, in fact, that the Fed was committed to rapidly raising rates even if it caused some pain in the economy. Given these comments, at quarter end the market was expecting 4.5% peak rate in 2023 and a year end 2023 level of 4.3%, which helped reverse the early quarter gains and put the MSCI ACWI down for the full quarter.

Despite several macroeconomic headwinds, the consumer remained resilient in the quarter as they had in the first half of the year. This was bolstered by the consumer's healthy position entering the year, including effectively full employment, a high level of wealth, and reasonable levels of debt. The U.S. consumer's strength could be seen in the continued growth in real (inflation adjusted) personal consumption expenditures throughout the year.

During the third quarter, our Long Book was down -4.1%. This was not inspiring in absolute terms but it was at least ahead of the broader global equity market. Performance benefited from holding cash and our higher exposure to our strongest companies. Our top five contributors were a collection of Consumer AlphaTM champions including Titan, Diageo, Apple, Starbucks, and Hermes.

On the negative side, we saw weakness from companies with significant exposure to China, given the surprising resumption of lock downs and strict zero covid policy, as well as continued weakness in tech names. The top detractors were Alibaba, Estee Lauder, Meta Platforms, Alphabet, and JD.com.

Investment Manager's Report (continued)

Infusive Consumer Alpha Global Leaders FAM Fund (the "Sub-Fund") (continued)

Fourth Quarter

During the fourth quarter of 2022, the MSCI ACWI was up +9.9% in the quarter after reaching its low point for the year in mid-October. Coinciding with the trough in the Index was the release of U.S. CPI for September which was higher than expected and in fact the core CPI reading of 6.6% was the highest of the current cycle. After this data point, the Fed funds futures priced in a 5.0% terminal rate. However, in the balance of the quarter, the two U.S. CPI releases showed a continued moderation in inflation and each print was below expectations. Slowing inflation helped the market get increasingly comfortable with the idea that the Fed would be close to its peak in rate hikes, and the Fed funds futures still priced in a 5.0% terminal rate at the end of the quarter. This easing inflation narrative helped drive the upside in the equity market in the after making its year to date low.

As we had seen all year, the consumer largely remained resilient in the quarter. They still had a healthy balance sheet and employment was robust with just 3.5% unemployment in U.S. at year end. Despite the macroeconomic headwinds, the consumer continued to grow its real personal consumption expenditures on a 3 year CAGR basis in the +2.5-3.0% range (not dissimilar from pre pandemic trends), as it has all year. That said, the consumer is not a uniform group and there were pockets of weakness in places like the lower end consumer and in discretionary spending. This was translating into some evidence of trading down by the consumer and a reprioritization away from discretionary spending (if not discounted), which created an environment where consumer loyalty and that emotional connection was more important than ever - a good for Consumer AlphaTM companies.

During the fourth quarter our Long Book was up +5.7%. This performance was below the broader equity market but given the investment level was $\sim 60\%$ throughout the quarter, with the balance in cash, this is not a surprising outcome. Given our views on the attractiveness of equity markets at large, this was a conscious decision.

Our top five contributors were several Consumer AlphaTM champions including Richemont, Netflix, TJX, Nike, and McDonald's. These strong contributors represent a few ongoing themes including the beginning of a reopening in China, idiosyncratic growth stories, and the importance of delivering good value to the consumer in times of uncertainty.

On the negative side, we saw ongoing weakness in our large tech companies and several of our China single name options experienced weakness before we closed those positions as explained more below. The top detractors were Amazon, PayPal, Meta, JD.com, and Wuliangye.

Infusive Asset Management Inc. March 2023

Investment Manager's Report (continued)

Fidelity Sustainable Water and Waste FAM Fund (the "Sub-Fund")

Performance

The fund recorded returns of -28.7%, while the comparative index delivered -18.4% over 2022. At an industry level, security selection in industrials and materials detracted from returns. Market selection had a positive impact on performance within the consumer discretionary sector, while the underweight stance in information technology also added relative value. Selected positions weighed on performance: Azek (a leading manufacturer of environmentally sustainable building products and decking) detracted from value. Its shares sold off due to weak investor sentiment surrounding the rising rate environment and subsequent impact on names with housing/residential exposure. The company's new residential exposure is 15-20% of sales. However, the portfolio mangers' view these risks as short term and the investment thesis has not changed; The group operates in an industry with high barriers to entry and enjoy strong competitive positions. The position in Crown Holdings, which makes products like aluminum and steel cans for food and beverages, fell. The packaging company posted solid top-line growth, but profits fell during the third quarter. It also slashed its full-year guidance as rising costs weighed on profits. The good news is that most of those challenges should be temporary, which means the stock should eventually bounce back, especially as underlying demand for its products has been strong. Japanese environmental machinery manufacturer Ebara Corp came under pressure despite reporting solid Q1 results and robust FY21 results which beat expectations, on strong sales and record level orders. In addition to being the largest manufacturer of industrial pumps and turbines, the company makes equipment used in semiconductor manufacturing. The stock therefore sold off given investor concerns surrounding the semiconductor sector (supply chain issues and peak semi cycle concerns). Notable contributors: Brazilian water utility Sabesp was the largest contributor to returns following reports that São Paulo state regulators will consider a proposed rate revision. The October 2022 Sao Paulo gubernatorial elections reignited the Sabesp privatisation theme, which is seen as being a key driver of stock returns. This led to the stock outperforming. Service Corp, the largest death care provider in the US and Canada, was another notable contributor. The business provides exposure to the waste management theme due to its cemetery, cremation, and funeral services, i.e., the disposal of human waste. Management is not expecting any earnings cut for either 2022 or 2023. Instead, they expect to meet this year's guidance and continue to deliver growth in an industry with high barriers to entry, strong pricing power and growth in earnings. This high-quality defensive position has performed well, given its defensive demand characteristics and dominant market position. Sales reflected a strong increase in year-on-year numbers in the cemetery and funerals segments. The lack of exposure to underperforming consumer discretionary names such as Amazon and Tesla, communication services groups Meta Platform and Alphabet as well as information technology stocks Nvidia, Microsoft and Apple also added to relative performance, as investors largely moved out of growth-oriented stocks during the year amid the ongoing economic uncertainty.

FIL Pensions Management March 2023

Investment Manager's Report (continued)

JPMorgan China A-Shares Opportunities FAM Fund (the "Sub-Fund")

The fund underperformed the falling market in 2022, primarily due to challenging first and third calendar quarters. During the second and fourth quarters the fund fared better in relative terms as the stimulus measures and relaxation of zero-Covid policy had a positive impact. The opening months of 2022 presented a highly challenging environment for an investment philosophy rooted in growth and quality. Russia's invasion of Ukraine boosted energy prices, in turn compounding the inflationary pressure suffered by much of the world (but not China) as most countries moved towards a more reflationary post-COVID environment. The resulting increase in interest rates caused "long duration" growth stocks to derate, while investors rotated into value names. Because of this the driver of the underperformance over the year was sector allocation, offset to some extent by positive stock selection later in 2022. The key detractors involved being overweight information technology and industrials, and underweight financials and energy. The market's bias away from new economy sectors was evident, but we retained conviction to avoid those sectors with weaker corporate governance, higher levels of government ownership, and inferior returns on capital. To some extent that view was vindicated in the fourth quarter, when two important policy moves resulted a change in market direction. First, in November the PBOC (central bank) and CBIRC (financial regulator) announced a comprehensive set of credit support measures for the real estate sector, exceeding market expectations. In essence this alleviated the systemic risk associated with real estate which had been worrying investors for some time. Even more importantly, in the closing weeks of the year the Chinese government effectively removed all COVID containment policies. The initial wave of resulting infections was faster than expected, such that by the end of December many large cities appeared already to have passed the initial peak of infection – but not of hospitalization. Despite some initial disruption to traffic and productivity, consumers began to look forward, with a budding recovery of consumption, traffic and business activities, and financial markets did the same. At the stock level, spirit manufacturer Wuliangye Yibin was a key detractor as weak holiday sales during the September-October period impacted the stock negatively. It recovered later in the year as the Covid restrictions were relaxed. Yunnan New Energy Materials detracted on the back of the news of some of its executives being taken to residential confinement. Initially during the year, semiconductor names Maxscend and Bestechnic fell as the market reacted negatively to the concerns over lockdown and the semi cycle turning. On the positive side, solar name Tongwei was the largest contributor as the stock rose as polysilicon prices continued to exceed expectations due to tight supply. Software name Beijing Kingsoft Office did well as market expectations received a boost post the 20th Party Congress, which highlighted the importance for self-sufficiency within the sector, together with availability of some low-cost financing. Zhejiang Supcon, an industrial automation name, did well as it delivered solid results with a strong end demand outlook. We retain our emphasis on longer term structural growth areas such as carbon transition, consumer and technology. Cyclically, later in the year we added to some beneficiaries of the reopening economy, for example in travel and leisure, whilst reallocating capital within the solar space from upstream to downstream names – as price declines afflicting the former may boost demand for the latter. China's focus on national security offers another area for attention, spanning opportunities such as energy, automation, digitisation and semiconductors - all fields in which China's government is determined to become more self-sufficient, at the same time as targeting higher productivity as the policy emphasis shifts from Zero COVID to stimulus of the economy. The post-reopening first wave swept across China much faster than authorities' expectations, something which may be further accelerated by massive movement of people around the Lunar New Year holidays. Near term disruptions to production, consumption and traffic are within expectations and we do not believe that negative effects such as loss of productivity and a reluctance to travel will be long-lived. Major cities which have been early to see a spike in post-COVID Zero infections have witnessed a rapid recovery of traffic. Looking forward through 2023, many policy and regulatory overhangs have been removed. The government must refocus on economic stability and growth. On balance global inflation pressures have been easing, suggesting no immediate need for more hawkish monetary policy in China. On the fiscal side China is once again resorting to stimulating investment, but it is also likely to do more to help consumption. Having lived through the past three difficult years, the mindsets of many corporates have changed, resulting in improvements in cost efficiency and capital allocation. We will be watching closely to assess if positive operating leverage will boost earnings through the recovery process, and whether the improved capital allocation will persist.

JPMorgan Asset Management (UK) Limited March 2023

Investment Manager's Report (continued)

Diversity and Inclusion FAM Fund (the "Sub-Fund")

The fund delivered a relative outperformance versus the benchmark index, albeit still recording a substantial deficit in a very weak year amidst a generally more challenging backdrop for asset markets. However, this was an improvement on the first half of the year when the fund lagged the benchmark. Stock selection added value over the 12 months, while sector allocation detracted from performance. The latter was due to the portfolio's zero weightings in energy and materials, along with an aboveindex position in the consumer discretionary sector which was affected by rising costs. However, the impact was partially offset through an above-index position in industrials, and below index positions in communication services and technology. The latter weakened as the market rotated away from growth stocks in response to rising interest rates. The main source of added value at the stock level came largely from stock picking within the banks and technology sectors – the latter largely reflecting stocks that were not held. Conversely, the fund's healthcare positions made a negative contribution - again, mainly reflecting stocks that were not held. At the individual stock level, banks dominated the top contributors and included AIB Group, Bank of Georgia and HDFC Bank as their operating models benefited from a rising interest rate environment. Elsewhere, automotive, freight and outsourcing firm Bidvest continued to be supported by good results. In addition, not holding some of the behemoths such as Amazon, Tesla and Facebook owner Meta Platforms benefited the fund's performance. The main detractors included US genetic sequencing firm Illumina, which fell on the back of disappointing earnings and the infringement of a rival's DNA-sequencing patents. Other negative contributors included US engineering simulation software firm Ansys, which was caught up in the weakness in the technology sector, industrial group Schneider Electric and childcare provider Bright Horizons Family Solutions.

M&G Investment Management Limited March 2023

Investment Manager's Report (continued)

Global Listed Infrastructure FAM Fund (the "Sub-Fund")

The fund provided downside protection in a falling market and outperformed the MSCI ACWI Net Return Index. PrairieSky Royalty added the most value in a buoyant energy sector, Gibson Energy, ONEOK and Keyera also outperformed, AES Corp. outperformed in a strong year for US utilities. ContourGlobal, a transition company listed in the UK, jumped after receiving a takeover bid. Home REIT led the laggards after a weak fourth quarter. Enel underperformed in European utilities. Crown Castle, which is structured as a REIT, drifted lower in a real estate sector hampered by concerns about interest-rate sensitivity. We made two new purchases and two complete sales during the year. We initiated new holdings in Segro and Alexandria Real Estate, both structured as REITs, which provide exposure to structural growth in e-commerce and life sciences, respectively. The indiscriminate selling of stocks weighed down by perceived interest-rate sensitivity provided the buying opportunity. We sold ContourGlobal as a source of cash after the company received a takeover offer at a 36% premium. We divested China Gas Holdings due to corporate governance issues and operational shortcomings. Equity markets have succumbed to a renewed bout of volatility as hawkish commentary from central banks rekindled concerns about persistent inflation and a potential recession as the effects of higher interest rates take hold. Despite the ongoing uncertainty at the macro level, we strongly believe that short-term volatility presents long-term opportunity and remain as optimistic as ever about the long-term growth prospects in listed infrastructure. The asset class offers defensive qualities, combined with the ability to offer inflation protection by way of index-linked revenue, but the attractions of its reliable and growing cashflows have considerable appeal beyond the current environment. Listed infrastructure is a beneficiary of long-term structural trends, such as renewable energy, digital connectivity and demographics – powerful themes which we believe will endure for many decades to come. The attractions of infrastructure, particularly in the listed sphere, have not gone unnoticed. We have seen increasing corporate activity across the asset class, the most recent example being the interest from private equity in Vantage Towers, the European communications towers company spun off by Vodafone. We believe that these symbolic events provide a clear indication that the reliable and growing cashflows from infrastructure assets are going cheap in the stockmarket. Investors with a long-term time horizon, such as those in the private sphere, are starting to take notice and act on their convictions. We remain optimistic about the asset class.

M&G Investment Management Limited March 2023

Investment Manager's Report (continued)

European STARS Equity FAM Fund (the "Sub-Fund")

The European market ended down -9.49% in 2022 in a volatile and negative European equity market. However, this was a good comeback, as the European market was down close to -20% at the worst point by the end of September. The year was characterised by the beginning of the largest war in Europe since the Second World War, as Russia invaded Ukraine and at the same time used gas supply as a weapon to hit the European economy and unity. Luckily the European continent and NATO moved together to support Ukraine's fight against the aggressor and warm weather, LNG-supply and substitution, and lower consumption of natural gas have helped reduce the impact on the economy. The year was also characterised by high inflation, which led global central banks to raise interest rate aggressively and rapidly, and this has had profound implications for fixed income markets. At the peak (in the beginning of 2021), close to 15 trillion USD worth of debt globally was negatively yielding but by the end of 2022 this number fell to zero. According to Deutsche Bank, the US 10 year Treasury had its worst year in 2022 since 1787, being down close to -20%! The bursting bobble in the fixed income space had negative effects for the overall equity market and led to a large rotation in the market. We saw especially interest sensitive growth stocks underperforming massively over the year, while value stocks did much better - this was a large reversal of what we have seen the last decade. The best sectors in Europe were Energy and Financials while the worst were Information Technology and Real Estate. Looking at European Equites from a global perspective, 2022 was also a reversal of what had been previously seen, as MSCI Europe outperformed MSC ACWI ex Europe by more than +400bps and also outperformed MSCI US. In Q4 alone MSCI Europe outperformed by more than +1.000bps! The reason for the outperformance is multifold, firstly Europe has low exposure to interest sensitive mega cap technology companies and is overindexed on value companies. Secondly, the valuation starting point in Europe was (and is still today) much more attractive than in other regions and thirdly, Europe is home to many companies that are positively positioned towards the green transition, which got accelerated in 2022. We are firm believers that the outperformance of European equities can continue into 2023 and find European equites attractive in a global perspective. The underperformance was due to negative attribution from both stock selection and sector allocation. The strategy was hit in particular by unfavourable stock picks in Consumer Discretionary (-197 bps) and Consumer Staples (-131 bps), whereas it benefitted from good stock picks in Materials (+129 bps) and Communication Services (+114 bps). In terms of sector allocation, the strategy was negatively affected by being underweight Energy (-210 bps) and over-weight Information Technology (-35 bps), but was rewarded by the underweights in Consumer Discretionary (+55 bps) and in Real Estate (+36 bps). Top 3 contributors: AstraZeneca PLC, the pharmaceutical company, outperformed the market in 2022, as the market favoured defensive companies with low starting valuation and inflation protection. At the same time AstraZeneca continued to deliver strongly on its strong pipeline and delivered good organic sales and earnings growth throughout the year. Deutsche Telekom AG, he telecom operator, Deutsche Telekom outperformed the market in 2022, as the market favoured defensive companies with low starting valuation. At the same time Deutsche Telekom benefitted from a strong USD and strong performance in the US T-Mobile business where it has a material ownership. Norsk Hydro ASA, the Norwegian producer of aluminium, shares outperformed during 2022, as the company benefitted from its structurally positive competitive position with access to cheap renewable energy. The direct aluminium competitors, especially in Europe, have on the other hand faced increasing energy costs from the gas shortage situation, which has led to closure of several aluminium plants. Furthermore, Norsk Hydro benefits from a stronger ESG focus in China, which means that fewer new aluminium plants are getting open which helps improve global supply and demand dynamics and increase localisation of production. Bottom 3 contributors: KION Group AG, the warehouse automation and forklift company, underperformed the market in 2022, as in-creasing steel prices, component supply shortages and especially badly managed contracts in its warehouse automation business led to a large profit warning. The profit warning created question marks around the strength of the balance sheet and a capital raise was discussed in the market putting further pressure on the shares. During the end of the year the market got more confidence in that a capital raise is unlikely, which helped the stock to recover a bit, but it still ended significantly down for the year. Zur Rose Group AG, the e-pharmacy company, underperformed the market in 2022 as the e-script project was postponed. This led to questions around the strength of the balance sheet despite that the company was raising new money during the year and this put pressure on the shares. In spite of having a large potential as an e-script enabler in the German pharmacy industry, the roadmap towards implementation became difficult short-term be-cause of challenging of the project from the stakeholders. Puma SE, the German producer of sporting goods, underperformed the market in 2022 despite limited cut to sales and profitability forecasts. The sentiment towards Puma and the sector was however negatively impacted for several reasons over the course of 2022. In the beginning of the year covid-related supply chain problems in South East Asia hit the company, this was followed by general negative sentiment from Chinese consumers towards western sport brands, the loss of the well-regarded CEO to the key competitor Adidas and lastly the weak consumer confidence in especially Europe hit the shares.

Investment Manager's Report (continued)

European STARS Equity FAM Fund (the "Sub-Fund") (continued)

Buys: Cie Financiere Richemont: The fund initiated a position in the Swiss luxury jewellery company Richemont. The company owns some of the best jewellery and Swiss watch brands including the biggest global jewellery brand Cartier. Jewellery is an attractive category, which has grown strongly in the last decades and which should continue to grow strongly. Compared to the past, jewellery now makes up a large proportion of the sale/profit split in the group and is hence a more significant driver of long-term growth and especially profit. Jewellery is largely an "unbranded" industry and there is lots of room for brands to take share. Richemont is also positively positioned to Chinese re-opening/pent-up Covid spend. Essity B: We entered into a position in Essity, the Swedish producer of health and hygiene products. The company has been hit hard by increasing electricity and pulp prices, which has created an attractive expectation gap as the company's price increases come through the P&L and input costs roll-over. Symrise We re-initiated a position in the ingredients company Symrise. We fundamentally still liked Symrise when we sold it in the end of 2021, but we found the valuation too demanding. Post unchanged fundamentals, rising earnings and a falling stock price we now find the case attractive again. Cie De Saint-Gobain: The fund re-initiated a position in the French building materials manufacturer and supplier, Saint-Gobain. The company benefits from "ESG demand" driven by European energy renovation and the European green deal. Furthermore, a clean-up of the company's portfolio is positive for long-term company returns. National Grid: We entered into a position in the UK utility company National Grid. The company is a beneficiary of green energy capex driven by the build out of the grid to support electrification of the society and more renewable energy in the energy mix. We have followed the company for long, but now find the valuation attractive post a selloff in the utility space. Prysmian: Prysmian is the global leader in the power and telecom cable systems industry with a particularly strong position within the attractive high-voltage market. Power transmission is among the most important enablers of the energy transition, and we see the cable names including Prysmian as key beneficiaries of the push towards higher energy independence in Europe and the expansion of renewables globally. Siemens: We bought into Siemens in March, which offers an attractive valuation for its growth outlook. Siemens has in recent years cleaned up its portfolio, so it now has high exposure towards structural growth within automation and digitalization that is again driven by ESG policies. Pandora: Pandora has after a period of several difficult years restructured the company and brand position to become a more focused company in affordable jewellery with a good growth outlook. Pandora has also emerged as a leader in sustainable sourcing of raw materials for the production which means it scores well on ESG-metrics. We do not think that the positive development over the recent years is fully reflected in the valuation of the company today. Elekta B: We re-entered into Elekta, which produces radiation treatment machines for cancer, during February after a period on the side. We structurally like the story, as the company operates in a (sadly) growing market with an increasing number of global cancer patients. Furthermore, the market is consolidated with two large players that create good returns in the market. After several profit warnings due to Covid-19 and high logistics costs, we now find the valuation attractive and see a good expectations gap. Societe Generale SA: The French bank has restructured its operations during the last decade to a degree where we anticipate that they will generate an improving return of tangible equity over the coming years and narrow the gap with other banks. Despite the improving outlook, the valuation of the bank's shares are only at half the multiple of other banks. Pirelli & C SpA: The premium Italian tyre manufacturer is a beneficiary of the accelerating shift towards electric automotive vehicles as EVs require tyres with higher qualities due to the higher weight, instant torque (fast acceleration and breaking) and requirement for noise reduction. We do not believe that the current valuation reflects a structurally better demand outlook. BT Group: The integrated UK telecom operator is benefitting from having introduced CPIlinked contracts in the majority of their business at the same time as they have executed faster on the rollout of their fiber-option Openreach. Additionally, it is likely that the UK mobile market may move from a 4 player towards a 3 player market to the benefit of BT. Compass Group: The UK based contract catering company is seeing increasing outsourcing prospects from inhouse managed cantinas as a consequence of the rising inflationary outlook at the same time as new contract KPIs are becoming important for caterers to be able to execute on in terms of digital order solutions, ESG criteria, café- and vending machine options among others which adds to the competitive advantage of the largest providers by being able to better scale their solutions than inhouse managed alternatives. Roche Holding: We initiated a position in the pharmaceutical company Roche. The share price of Roche has underperformed other European pharmaceutical companies in the first half of 2022, as the company has seen Covid-19 benefits falling away and negative pipeline news questioning long-term growth. We believe that this underperformance is largely unjustified, as the company has a very large pipeline with good optionality and historically has been good at bringing new products to the market. We are therefore not overly concerned about the future growth outlook. Sells: BT Group: We sold out the position as the initial assumptions behind the investment case as a beneficiary of rising inflation are being questioned by the equity market on concerns about the ability to raise prices in the consumer division combined with an unclear strategy in the wholesale fibre division.

Investment Manager's Report (continued)

European STARS Equity FAM Fund (the "Sub-Fund") (continued)

Sanofi: We sold out the position as we expect better prospects in other health care related companies. SKF B: Was disposed due to better expected prospects in other investments in the portfolio. Valeo: We sold out the position in Valeo, as we are concerned about a slow-down in auto demand. The company has made good progress in restructuring its operations during the Covid-19 period, but the rebound of auto demand and thereby profitability for Valeo have so far been delayed by shortages of semiconductor equipment. We are afraid that the slowdown of the economy now will make this auto cycle a "lost cycle" without demand coming back, which currently is not discounted by the market. Unilever: We sold out the position in Unilever post good relative performance of consumer staples companies in general and Unilever specifically. This outperformance is despite question marks around capital allocation policies post the attempt of the company to buy the peer Haleon (GSK Consumer Health). Zur Rose Group: Despite having a large potential for an e-script enabler in the German pharmacy industry, the roadmap towards implementation has been challenging by interference from all related stakeholders. As the company has limited financial resources available to endure a potential resolution to the stumbling blocks, we decided to dispose our in-vestment to await any clarity before reconsidering commitment. Enel: The Italian utility company Enel was divested in August, as the gas-supply situation in Europe created several head-winds for the utility industry and as there were talks about new windfall taxes, funding stress in the power market and consumers facing difficulties paying their utility bills. Also, Enel is a large domestic company in Italy and hence negatively affected by the increasing spread between Italian and German interest rates. Just Eat Takeaway.com NV: The online food delivery company has complicated its strategic direction by acquiring Grubhub in the US. At the same time the valuation of growth companies with low profitability is being pressured by expectations for higher real interest rates. Alstom: The French manufacturer of railway equipment is trying to execute on a complicated acquisition, however with setbacks as the acquired order book was not as financially solid as expected. We now expect that this complicated integration process will be lasting longer. Koninklijke Philips: We have fully disposed of our position in the Dutch manufacturer of medical equipment as the investigation by the US authorities into the sleep apnea business carries on for longer than we previously expected with potentially larger risks related to the size of the potential fine and general management distraction related to the incidents. AVEVA Group: We have divested our position in Aveva, as we believe that the earning visibility remains low as the company goes through a cloud transition. Even though valuation remains low, we believe that it will be difficult for the shares to perform before we get more clarity. We still have an indirect ownership in Aveva through our position in Schneider Electric, which holds a majority stake in the company and fully consolidates its accounts. Antofagasta: Our position in the copper mining company was sold as we believe that the near term fundamentals are likely not supportive for the price of copper due to potentially rising near term supply and a deteriorating Chinese economy. Long term i.e. by the latter part of the decade we believe that the copper price will be supported by the environmental transition where use of copper is necessary. Nordea Bank: We have divested our position in Nordea Bank, as we reduced our overall exposure to European banks and portfolio beta. The transaction was also funding for our new position in Roche, where we see a better expectation gap. Portfolio Metrics: We had an active risk of 3.47% and a beta of 1.07 at the end of December 2022. The fund had an overweight in Financials (+4.07%) and Industrials (+3.40 %) relative to the benchmark at the end of the month. On the contrary, the fund had an underweight in Energy (-6.62%) and Consumer Staples (-3.15%). We are cautiously optimistic about the outlook for European equities going into 2023 despite a challenging macro backdrop. The war in Ukraine is increasing the global geopolitical risk and the conflict over gas supply between Europe and Russia is a key driver of risk sentiment in the financial markets. However, gas availability in Europe is good due to favourable weather, new LNG terminals and increased import away from Russia. We also see gas consumption being reduced by both consumers and companies without large slowdowns in industrial production and overall consumer spending is holding up. We therefore do not believe that energy rationalisation is a key risk for the European economy at this point in time. We do however believe that the current energy crisis will lead to a decade of strong build out of renewables, smart grid and transmission cables in Europe in order to reduce the dependency on external energy. This is a mega trend which we are well positioned towards as ESG investors and where European companies have strong capabilities in developing solutions. The market currently believes that we are heading towards a recession with central banks tightening monetary policy to tame inflation. While we expect an economic slowdown in Europe and that we could even have a recession by technical definitions. our estimation is that currently too much negativity is priced into the stock market, which explains our positive market view. The unemployment rate is still low and we have seen a reduction in gas- and electricity prices in recent months supporting a slower than previous expected fall in consumer spending. At the same time banks are well capitalised with good buffers, meaning that the risk of a financial and balance sheet crisis seems very limited at this point in time. We believe that these factors support our view that the downturn will be smaller than currently discounted by the market – though a soft landing scenario has been starting to become priced in by the market towards the end of 2022. We currently have a fairly balanced portfolio between different factors, e.g. value, growth, defensive and cyclical exposures, but with a small tilt towards cyclical value.

Investment Manager's Report (continued)

European STARS Equity FAM Fund (the "Sub-Fund") (continued)

We have also positioned the portfolio to benefit from the above mentioned mega trend of build out of energy infrastructure. That being said, our main focus remains on stock selection which is at the core of our investment process and the largest contributor to our portfolio risk and past returns.

Nordea Investment Management AB March 2023

Investment Manager's Report (continued)

Global Sustain Paris Aligned FAM Fund (the "Sub-Fund")

In 2022, relative performance suffered materially as a result of the fund's lack of exposure to the energy sector, which was the top performer in the benchmark index. Stockpicking in the industrials and materials sectors was also negative. On the positive side, the fund's underweight to consumer discretionary companies helped relative returns, as did stockpicking in the healthcare and technology sectors. In what was a difficult year for the technology sector, the fund's largest individual detractors were US technology giants Alphabet and Microsoft. Meanwhile, the top contributing stock was Novo Nordisk. The Danish pharmaceutical company's share price rose strongly in the fourth quarter of the year, with investors responding positively to the company's financial results. The fund made a number of new purchases in the year. These were investment data business Morningstar, efficient mining equipment manufacturer Weir Group, online marketplace eBay and software specialist Adobe. Furthermore, we sold our holdings in M&T Bank and Electronic Arts.

M&G Investment Management Limited March 2023

Investment Manager's Report (continued)

North American STARS Equity FAM Fund (the "Sub-Fund")

2022 turned out to be a very challenging year for most asset classes. The 30-year US Treasuries, down -33% had its worst year on record. The Russell 3000 Index fell -19.6% in 2022 marking the worst year since 2008. But unlike 2008, market breadth was unusually healthy with 58% of stocks beating the index, and with the equal-weighted S&P 500 outperforming the cap-weighted index by 6 ppt. In December the index fell by a full -5.9%. In terms of sector performance Energy was the only sector that gained in 2022 (+59%), beating the S&P 500 by 78 ppt, the biggest outperformance by a sector in history since 1970. Defensive sectors (Utilities -1%, Staples -3%, Health Care -4%) also outperformed. The positives for long term investors today is that many sentiment readings are negative, valuations have come down and interest rates are in restrictive territory making equities more attractively priced. This is a very different backdrop from the start of 2022 when interest rates were stuck at zero and stock market valuations were elevated. We still think that we need to be patient for a while in terms of taking on too much risk in the portfolio as earnings risk remains high for cyclical companies, but in general we do think that valuation multiples could start to expand in the event of an "earnings recession" as investors are forward looking. The Russell 3000 Index trades at a 12m forward P/E multiple of 16.8x today which is basically in line with the average level since 1995 and thus somewhat supportive. What the accumulated level of central bank tightening will do to the economy will most likely be seen and felt throughout 2023 and once this is clearer it will probably imply large moves between different sectors. As inflation levels come down and monetary tightening bites there is a cushion in terms of valuations and as long as nominal growth is high the market can be relatively resilient. Fund Performance: The outperformance was driven by positive attribution from stock selection, but dragged down by negative sector allocation. The best stock picks were in Information Technology (+153 bps) and Health Care (+148 bps) whereas adverse stock picks in Industrials (-56 bps) and Materials (-56 bps) detracted the most from overall stock selection. In terms of sector allocation, the strategy primarily benefitted from Consumer Discretionary (+44 bps) as well as Communication Services (+34 bps) in which the strategy is underweight in both. On the other hand, it was dragged down the most by the underweight in Energy (-220 bps) and overweight in Information Technology (-23 bps) sectors.

Top 3 Stock Performers:

- 1. Merck & Co Inc Merck performed well as good clinical results from a cardiovascular drug in phase 3 were reported, in combination with a report that beat estimates on the back of strong results from their key drivers Keytruda and Gardasil. Moreover the shares continued to perform well during the last part of the year as it is a defensive company.
- 2. AbbVie Inc performed strongly for the whole year due to its defensive profile. During the month of September, pharmaceutical stocks increased a lot in value as investors digested the news from the drug pricing bill that passed congress in August and reversed some of the drawdown seen in the month before.
- 3. Chubb Ltd was a top performer following results which saw the company deliver a beat driven by higher investment income and stable underwriting margins despite impact from Hurricane Ian. Looking forward, management guided for a continued hard market with rate increases exceeding loss cost which supports further growth and margin expansion which was received positively by the market. The share price continued to perform well for most part of the year due to the favorable market conditions.

Bottom 3 Stock Performers:

- 1. Alphabet Inc share price weakness continued into year-end as many investors are selling out of "Big Tech" names. Moreover the digital ad business is cyclical and there is a high level of uncertainty in the market how much this will impact Alphabet earnings in the coming quarters.
- 2. Amazon.com Inc underperformed after disappointing results end of October where AWS decelerated more than expected and commentary from management on an expected slowdown in e-commerce both in the US and Europe. The company has continued to sell off along with the rest of "Big Tech" as investors have been rotating out of these shares in general.
- 3. PayPal Holdings Inc has been trading weekly as it has been a challenging year with elevated comps post pandemic for e-commerce players in general. We are of the view that the set up turns more favorable in 2023 and that the company can also defend margins which should boost earnings growth.

Investment Manager's Report (continued)

North American STARS Equity FAM Fund (the "Sub-Fund") (continued)

Buys: Take-Two Interactive Software (Moat & Tailwind) We bought into TTWO in October as the shares have sold off sharply and we saw a great entry point into a long term winner. The share price has fallen around -50% from highs and the 12m forward P/E is currently 17x vs previous highs of around 35x. We see long term tailwinds ahead in the video game publisher that was founded in 1993. Take-Two owns some of the most valuable IPs in the entertainment industry Grand Theft Auto (GTA) and NBA 2k for example. Mondelez International (Moat & Tailwind) Mondelez is a resilient company within Consumer Staples thanks to its stable category in snacks and we are of the view that organic growth as well as margins can continue to surprise on the upside why we chose to add back to the company in November. We bought into Adobe (Expectation Gap) in July. The company that most people probably know from the "Acrobat pdf" or photoshop brands offers a line of applications of software products with a focus on content creation and information management. Adobe is one of the world's largest and most diversified software companies and recurring revenue streams are significant. We saw good risk-reward in Adobe in July as the stock had fallen around 50% and with some cyclical weakness more than priced in, and furthermore we see the company being able to grow 10-15% for many years to come. On the valuation side we bought into Adobe at circa 25x EPS vs the most recent peak of 50x EPS and thus we think that the company can compound well from these levels. NextEra Energy (Moat & Tailwind) provides sustainable energy generation and distribution services and generates electricity from wind, solar and natural gas. We bought NextEra Energy in July as we are of the opinion that short term supply issues have caused a dent in the company's long term attractive solar energy business, which gave us an opportunity to enter into a position of the shares. Also NextEra has the highest quality utilities business in the US (Florida Power and Light). Becton Dickinson (Expectation Gap): We initiated a new position in Becton Dickinson in April. BDX is a high quality company that was founded in 1897 and has done the same thing since then; consumables for the healthcare sector. Today it produces over 45bn devices annually and owns >29,000 patents. R&D and M&A have diversified the business but the high-volume consumables are still the core. For us the set up to enter into a position in the stock was optimal after 2 large acquisitions, FDA recalls and 5 years of underperformance. With this behind, we think that the outlook is now bright again. Align Technology (Expectation Gap): Align was founded in 1997. It is the pioneer in clear aligners for dental malocclusions (misalignments) and launched its first commercial product Invisalign in 1999. Today, Align is one of the largest pure-play dental companies in the world, with almost 4 bn in sales, purely from clear aligners and adjacent products and services. Clear aligners category can grow >20% per year with Align being a strong leader of the field. Given the favourable tailwinds, Align can double its sales in 4-5 years and given the recent sell-off in Align shares of more than 50%, the valuation was deemed very attractive to us at ~20x 2024 earnings and almost 5% FCF yield why we entered into a position in May. NVIDIA (Expectation Gap) We initiated a new position in Nvidia which is a semiconductor company that designs, develops and markets 3D GPU and software. The company started in gaming but has now a big part of its business in datacentres and grows fast in automotive, software and other industries as well. We see Nvidia as a modern "Picks and Shovel" company that enjoys several tailwinds for the coming decades and as the stock had sold off more than -50% from its highs we finally saw an opportunity to start buying into the story. Valuation came down to around 24x EBITDA from a peak of 56x which created an entry point for us as we still see the company being able to grow 20% or more for the long term. Allstate (Expectation Gap) is one of the leading property-liability insurers in USA and primarily engages in selling passenger automobile and homeowners insurance. We bought into Allstate in March as we are now closing in on the positive effects from the ongoing rate increase cycle which we believe could serve as a multiyear positive tailwind. Moreover we see that the reduction in expenses will improve the competitive position while last year's divestiture of the life business will lead to a higher longer-term ROE profile and thus would help Allstate to re-rate from the current very attractive level of around 13x 12m forward P/E. Check Point Software Technologies (Moat & Tailwind) was added back to the portfolio in February as we now see an accelerating top line development ahead. The company is a leader in network security and the model is to sell its core firewall product and bundle it with maintenance agreements. Marvell Technology Inc. (Expectation Gap) We bought a position in the company during January as the stock sold off sharply and we are of the opinion that this is a good Growth semiconductor company. Marvel is a fabless semiconductor company, manufacturing is outsourced to TSMC. An interesting aspect of the business model is also that customers fund R&D which enables MRVL to scale without taking too much risk. Our view is that if Marvel can sustain low to mid-teens revenue and margin expansion leading to 20% earnings growth, the stock trades at a 5-6 turn discount to structural Growth semis like NVDA and this gap could close, leading to a re-rating driving performance. Sells: Alibaba Group Holding ADR (Moat & Tailwind) This has been a case were conviction has gradually been lowered and as many other names that we prefer have sold off recently we have now divested the last part of Alibaba. Citigroup (Expectation Gap) We sold completely out of Citigroup as we have been trimming down our bank holdings gradually as lending standards are tightening and we have consolidated our banks portfolio towards core and higher quality holdings. In order to finance the Adobe transaction we sold completely out of our Salesforce (Moat & Tailwind) holding. We saw a good opportunity to buy Adobe instead in order to increase the quality of our software holdings even further.

Investment Manager's Report (continued)

North American STARS Equity FAM Fund (the "Sub-Fund") (continued)

Salesforce is also a fantastic company that we continue to follow but we have recently struggled to get full conviction in the underlying organic growth rate as well as the margin trajectory of the company why we chose to switch into Adobe instead. Medtronic (Moat & Tailwind): We sold off our final position in Medtronic as we have higher conviction in other health care stocks. Neurocrine Biosciences (Moat & Tailwind): We sold off our final position in Neurocrine as we have higher conviction in other health care stocks. Cisco Systems (Expectation Gap): We sold off our remaining position in Cisco as the company is one of our more cyclical tech stocks and we saw near term expectations being somewhat elevated. Cisco is normally a value stock that we tend to revisit once the most early cyclical slowdown is behind us. Avantor (Expectation Gap) was sold during the month as we see better opportunities elsewhere within the Health Care segment. Portfolio Metrics: We had an active risk of 4.01% and a beta of 0.90 at the end of December 2022. The fund had an overweight in Information Technology (+2.88%) and Consumer Staples (+1.97%) relative to the benchmark at the end of the month. On the contrary, the fund had an underweight in Energy (-5.28%) and Consumer Discretionary (-3.88%). Market Outlook: We are bottom up investors and as such we aim to make most of the alpha from our stock picking efforts. We need to emphasize that just because we enter a new calendar year, the market outlook does not change by default and even if new eyes and perspectives are healthy we do think that several trends from 2022 are extending into 2023. Even if we are of the view that inflation rates are going to fall throughout 2023 the interest rates remain high and many central banks' balance sheets are contracting which still serves as a headwind for equity prices in general. Continued monetary tightening implies that there could be higher than normal volatility in many asset classes in the near term. The main problem is that inflation rates remain too high and if they persistently stay high they will eventually undermine the long term economic potential, why central banks are still in restrictive territory. For now the hawkishness remains high as many officials aim to keep rates at a high level until demand slows and unfortunately unemployment starts to rise. We remain of the view that it is important to hold a relatively balanced portfolio of higher quality securities in this market environment as this has historically proven to be rewarded. We are currently in a situation where the long end of the yield curve is falling but the short term rates are above long term rates which historically has indicated economic weakness ahead. In this environment with decelerating inflation (from high levels) companies that tend to do the best are in sectors such as consumer staples, software, medical equipment, pharma etc whereas companies that tend to do worse usually are found in machinery, realestate, consumer durables, mining and oil and gas. On a longer term horizon our view is that we will be able to find winners in both long duration as well as short duration securities but with that said there is a heightened need for significant "green" capex and efficiency investments to drive productivity which implies that the next 10 years will probably give market participants bigger opportunities in "old economy" stocks vs the last 10 years which was all about "new economy" stocks, long duration and enjoying ever falling long bond yields. We are also in a situation with virtually full employment which will force many companies to share more of the profits to employees and to invest in efficiency enhancing technologies in order to defend the current all-time high margins. In this environment it is of significant importance to be invested in companies which exhibit solid pricing power and strong moats to sustain above index level performance.

Nordea Investment Management AB March 2023

Investment Manager's Report (continued)

Global STARS Equity FAM Fund (the "Sub-Fund")

It is often said that investment bubbles are obvious in hindsight, but difficult to detect in real time. I am not sure that it is true. In this letter we have been warning about bubbles in many assets for some time, and 2022 was the year that the last few obvious ones burst. Bubble prone assets must be difficult to value or bubbles would not exist. Or preferably they should even be impossible to value, like Bitcoin which obviously lacks any intrinsic value. High growth stocks are another example, as it is very hard to tell how long growth will persist and how it should be valued. But eventually these stocks tend to become "invaluable, but (obviously) overvalued" and at that time the fun tends to stop. Consequently, unprofitable tech stocks (as measured by Goldman Sachs' index) have fallen more than -75% from their peak, albeit most of that decline happened in 2021. Bitcoin too is off some -75% and most recently Tesla had fallen by -74% from its peak. Nvidia fell by about -2/3 from peak to trough in the fourth quarter last year. But we were not alone in recognizing this bubble. Our clients have been very patient though this volatile period, recognizing the challenges which these valuation bubbles have posed to active portfolio managers. For example, we have received no angry comments from clients for "missing" Tesla when the stock rose sharply in 2022 and 2021. On the contrary, when we have mentioned Tesla as a detractor for the fund, most of our clients have frowned and commented that not owning Tesla was probably the right call to make. We are very grateful for that, and we feel that in 2022 we were vindicated together. Looking forward though, it is probably fair to say that most of the hot air has come out of the previous bubbles. And we have started acting on this. When Nvidia had fallen from USD 346 to USD 115 we covered the last of our underweight in that stock. We are now looking for the right opportunity to go overweight as we believe that the company remains very well positioned and has both wide moats around the business and tailwinds for years to come. Tesla is a similar, but somewhat different story. The stock has fallen a lot, the company is doing some extraordinary things and valuation is starting to look more reasonable. However, we are not convinced by the ESG profile. While the company deserves enormous credit for singlehandedly changing the auto industry and diving electrification and battery technology, we are not convinced around some of the labour practices. I have myself visited Tesla's factory in Freemont, California, and while it was an impressive display of entrepreneurship and innovation, the factory layout was chaotic and did not come across as a modern workplace in terms of safety. The story is evolving however, and I am sure that we will come back to Tesla at some point. In terms of performance, 2022 was not much to look back upon. The fund followed the market lower and the relative outperformance was limited to +2.24% gross of fees. However, while this is below our target, we are relatively happy with this outcome after all. Our underweight in Energy, as discussed previously in these letters, cost us around -180 bps of performance YTD, adjusting for which we would have met our target this year. And according to Bank of America/Merrill Lynch, some 80% of ESG funds underperformed their benchmarks in 2022, which Global STARS did not. Adding the volatile nature of markets in 2022, driven by more or less unexpected events like the war in Ukraine and new Covid lockdowns in China, we had to navigate through some significant headwinds in 2022. I am very grateful for the hard work put in by the team in 2022 to reach these results despite all the challenges. And we remain grateful and humble to our all clients for your trust and patience. We look forward to working to achieve even better results in 2023. Fund Performance in 20221: The outperformance was due to positive attribution from stock selection and but was negatively influenced by sector allocation. The strategy benefitted from good stock picks in Consumer Discretionary (+149 bps) and Information Technology (+123 bps) but was dragged down by unfavourable stock picks in Industrials (-55 bps) and Materials (-35 bps). In terms of sector allocation, the strategy was rewarded by the overweight in Health Care (+35 bps) and underweight in Communication Services (+20 bps), and was negatively affected by being underweight Energy (-178 bps) and Utilities (-16 bps).

Top 3 contributors:

- 1. Merck & Co Inc (Expectation Gap) performed particularly well as good clinical results from a cardiovascular drug in phase 3 were reported, in combination with a report that beat estimates on the back of strong results from their key drivers Keytruda and Gardasil. Moreover the shares continued to perform well during the last part of the year as it is a defensive company.
- 2. AbbVie Inc (Expectation Gap) performed strongly for the whole year due to its defensive profile. During the month of September, pharmaceutical stocks increased a lot in value as investors digested the news from the drug pricing bill that passed congress in August and reversed some of the drawdown seen in the month before.
- 3. Pan Pacific International Holdings Corp (Expectation Gap) is a Japanese discount retailer with a relatively dynamic and innovative business model.

Investment Manager's Report (continued)

Global STARS Equity FAM Fund (the "Sub-Fund") (continued)

The stock performed very well in 2022 due to (1) a rebound post Covid and (2) defensive characteristics as the market got increasingly nervous towards consumer sentiment.

Bottom 3 contributors:

- 1. Sberbank of Russia PJSC (Expectation Gap): We held a small position in Sberbank going into 2022 as the stock was very cheap and we considered it a hedge against rising oil prices. Unfortunately the hedge did not work as the stock was written down to zero as Russia invaded Ukraine and sanctions were imposed on Russian stocks.
- 2. Koninklijke Philips NV (Expectation Gap): We bought Philips as a turnaround case post a product recall in its Respironics business in the US. However, the product's safety issues dragged out longer than we expected and performance was further impacted by supply chain issues in 2022. 3. Alphabet Inc (Expectation Gap): Share price weakness continued into year-end as many investors are selling out of "Big Tech" names. Moreover the digital ad business is cyclical and there is a high level of uncertainty in the market how much this will impact Alphabet earnings in the coming quarters. The stock came into 2022 on the back of a very strong 2021. Buys: Shimano (Moat & Tailwind) has historically been one of the best performing companies in Japan. As a supplier of bicycle and electric bicycle components we think that Shimano enjoys a structural tailwind in demand, which is expected to remain for the foreseeable future. We took advantage of a decline in the share price driven by Covid backlash and general concerns about discretionary spending among consumers to take a position in this quality stock. Roche Holding (Expectation Gap) replaces Sanofi in the portfolio. We believe that the shares are de-risked after a large immune oncology study failed earlier this year. Core Roche is a solid business with proven track record in commercial execution as well as research and development. We see it now as a defensive stock at a relatively attractive price. Nestle (Moat & Tailwind) is a high quality defensive stock, which has lagged a bit recently, giving us the opportunity to add it to the portfolio. Align Technology (Expectation Gap) is a MedTech company specialising in and pioneering clear liner bracelets. The stock had fallen from USD 700 to 200 in the general rotation out of growth stocks in the past year. We took a very small position in October. HSBC Holdings (Expectation Gap) was bought to gain exposure to rapidly rising net interest income in October. Estee Lauder Cos (Moat & Tailwind) replaces LVMH in the portfolio. While still expensive the shares had fallen sharply year to date, with P/E ratio contracting from 45x to 30x. Hence, we thought it was a relatively good opportunity for the company to re-enter the portfolio after a period of absence due to high valuation. Shares of Zur Rose Group (Expectation Gap), the Swiss online pharmacy, fell 80% in a year as German regulations on online drug sales have taken longer to materialise than expected. We took the opportunity to buy a small position. High risk and low liquidity mean that the position will remain very small for us. With Becton Dickinson and Co (Moat & Tailwind) we identified another defensive growth stock in health care equipment and consumables at a reasonable valuation to replace Medtronic. Should benefit post Covid as patient volumes should recover at hospitals. We entered into a position of shares of Sanofi (Expectation Gap), which exhibit defensive characteristics and are underpinned by margin expansion and low valuation. Shares of Teleperformance (Expectation Gap) (defensive growth)have barely kept up during the bull market, and should be well placed to outperform in a slowing economy as the company benefits from outsourcing trends. Metso Outotec (Moat & Tailwind) has long suffered from the capex slump in the mining industry over the past decade. We already hold Epiroc as we believe that this megacycle may be near its trough and could reverse over coming years. When the stock fell 30% due to its 10% exposure to Russia, we took the opportunity to add the stock to the portfolio. Adobe (Expectation Gap) is a very high quality software business with solid moats and strong tailwind from digital content creation. The stock almost halved from USD 700 in November to 375 in May, significantly derating its multiple. This gave us the opportunity to enter into the stock thus further improving the quality of our software portfolio. We have started to build a position in Amadeus IT Group (Moat & Tailwind) the global leader in travel IT. We expect the company to benefit from a recovery in travel as the Covid-19 pandemic ends. Pent up demand for travelling could be significant. NVIDIA (Expectation Gap) is a company that we have liked for a long time, we first invested in the stock in 2016. However, we made the mistake of selling it too early, which we have regretted. Similarly to Adobe, the Nvidia stock halved between November and May and we took that opportunity to close part of our underweight. We still find it expensive and hope to close the remaining underweight and go overweight at a later and lower valuation. Norsk Hydro (Moat & Tailwind) is a "winner" from energy shortage and that shortage was made worse by the Russia-Ukraine war. Energy shortage means less aluminium production, and higher aluminium prices, which benefits Norks Hydro thanks to its stable electricity supply. Short term supply issues have caused a dent in NextEra Energy's (Moat & Tailwind) long term attractive solar energy business, which gave us an opportunity to enter into a position of the shares. Also, it has the highest quality utilities business in the US (Florida Power and Light).

Investment Manager's Report (continued)

Global STARS Equity FAM Fund (the "Sub-Fund") (continued)

Sells: US Foods Holding (Expectation Gap) was held as a post Covid re-opening beneficiary, which is now behind us and we sold out the last part of the position in October, Lloyds Banking Group (Expectation Gap) was sold to finance HSBC, PayPal Holdings (Moat & Tailwind) was sold as we lost conviction in the company being able to quickly turn the business around. The core business looks vulnerable to new competition. HSBC Holdings (Expectation Gap) The fundamental story remains in place and we still think that HSBC is an attractive asset. However, the corporate governance and China exposure turned out more complicated than we had anticipated and added to the China exposure in the portfolio beyond what we found desirable at this moment, which lead us to close the position in November. Zur Rose Group (Expectation Gap) was held in a very small position where we lost conviction after some regulatory setbacks. Sanofi (Expectation Gap) is a cheap defensive with self-potential to boost margins. However, as mentioned above litigation risk related to the company's OTC anti acid drug Zantac surfaced this month, introducing risk we are not comfortable with. Hence, we divested our position and reinvested proceeds in Roche. Chubb (Moat & Tailwind) shares have been in the portfolio for some time. The US P&C insurance company has benefitted from a cyclically hard market for some time now and the shares have done well as a result. Looking ahead, we would rather bet on a recovery in auto insurance and we thus focus our US P&C holdings to Allstate and Progressive. Neurocrine Biosciences (Expectation Gap) was an Expectations Gap case where the growth story was derailed by the Covid pandemic. The shares did well this year as the business recovered post Covid and we took the opportunity to exit the position. We also find that the underlying case has changed from commercial execution to delivering on its pipeline, for which we do not have any conviction at this point. Metso Outotec Oyj (Moat & Tailwind) was held in a small position, where cyclical headwinds prevented us from building a meaningful position. For now we see better use of capital elsewhere. Norsk Hydro (Moat & Tailwind) was held in a very small position. The company benefits relative to peers from high energy prices, however, the cyclical outlook does not support valuation we think. We will revisit the case at a later point. LVMH Moet Hennessy Louis Vuitton (Moat & Tailwind) was sold due to a sharpening of the Nordea STARS alcohol policy. We have owned LVMH because we think that it is an excellent operator in the luxury goods space. However, our new policy does not allow greater than 5% revenue exposure to alcohol, which disqualifies LVMH from the portfolio. Pool Corp (Moat & Tailwind) is an excellent company with very strong market positions. However it has benefitted hugely from the buoyant US housing cycle and stay at home trend during the pandemic. Due to a relatively generous valuation and riskier outlook we decided to put the stock on pause, despite solid current trends. Due to the extremely difficult situation in Ukraine and the geopolitical uncertainty we offloaded all the shares of Sberbank of Russia PJSC (Expectation Gap). The long standing Moat and Tailwind holding Medtronic proved to be of lower quality than we had expected. After several shortfalls compared to management's guidance we decided to replace it with Becton Dickinson in the portfolio. Avantor was an Expectations Gap case for us as a winner from the Covid pandemic. Tailwinds are now abating and we closed the position. Shares of United Rentals (Expectation Gap) have been among the most cyclical in our portfolio. While we still like the long term story, we think that the share price has run away somewhat and might be in for a correction. Shares of Rexel (Expectation Gap) were too cheap when we bought them. The shares have now rerated and as a consequence we closed our position. We exited SKF (Expectation Gap), despite its value characteristics as we thought that the cyclical risks were too high. SK Hynix (Moat & Tailwind) represents an extremely cyclical stock, and DRAM market is unusually opaque going into 2022. However, after a couple of quarters of rising DRAM prices and the SK Hynix stock having outperformed the broader semiconductor sector since October last year, we decided to exit our small position as we think that risk/reward is not attractive here. Twilio Inc (Moat & Tailwind) & Atlassian Corp PLC (Moat & Tailwind) were our two most expensive software stocks and were small positions in the portfolio, due to the elevated valuation risk. Still we lack the conviction in long term growth to defend these valuations in an environment of rising interest rates that we expect over coming quarters. These are still good companies and we will revisit them at a later stage. We entered into Check Point Software Technologies (Moat & Tailwind) only a few months ago for its defensive qualities, sharp valuation discount to other software stocks and apparent green shots in order intake. Since then valuation discount has been significantly reduced as many other software stocks have fallen. In addition the latest report was disappointing as the growth momentum was not maintained and costs continued to rise faster than topline. We therefore decided to switch into Adobe instead. Autodesk (Moat & Tailwind) represents a similar business model and stock to Adobe. However it was a small position for us due to valuation, lack of conviction in long term growth runway and some less than clear communication from the new management team. We sold out of the position to make room for Adobe. Positioning & Portfolio Metrics: At the end of December 2022 our active risk (tracking error) was 3.48%, our beta was 0.93 and our cash position 0.08%. Our largest sector overweight were Health Care (+3.35%) and Consumer Staples (+2.86%), while we were underweight Energy (-5.58%) and Consumer Discretionary (-2.47%).

Nordea Investment Management AB March 2023

Investment Manager's Report (continued)

Global Disruptive Opportunities FAM Fund (the "Sub-Fund")

Overall, positioning of the fund have not change, we continue to hold a defensive biais, we tend to increase exposure to names that we have the strongest convictions and underperformed year over the last 12 months. They offer the best risk-return in this market environment, mainly in the Cloud, Big data, life sciences tool and Renewables themes. Fund valuation versus the market is historically low combine with strong catalysts for the next months to come. "For the 2nd part of the year, market is going to transition from concerns exclusively on rates and valuations to more of debate and concern on growth slowdown and recession. A positive environment for secular grower.

The strategy in the fund has been to increasing exposure to Enterprise Tech: cloud, big data, cybersecurity as digital transformation remains a clear imperative to stay competitive and drive efficiencies. Names we are expose to continue to demonstrate strong execution, product excellence and strong cash flow generation. Within this segment, we don't have the "unknown" that lies ahead, with durable and recurring revenue."

The MSCI World posted a flat performance in the 3rd quarter closing two consecutive quarter in the red. Performance of the fund continue to be driven by hawkish central bank policy, that translated into another tough months for the equity market. NASDAQ is down over 18% from mid-August until the end of September, one of the worst stretches in the last decade.

Over the quarter, the fund underperform the MSCI World. Digital Economy was the main driver of this underperformance, with 3 themes: Fintech, Big Data, and ecommerce.

TransUnion is the main detractor the FinTech theme performance, results missed expectations for revenue growth in the quarter and the guidance for the year was cut.

In the Big data theme, the underperformance is driven by weakness on the semiconductors sectors, as data points continue to soften, supporting the bear case that weakness may eventually broaden out beyond PCs/Smartphone. Marvell Technology guided a revenue deceleration quarter on quarter, which push the debate on the data center, hyperscale end-market deceleration.

In the eCommerce theme, Segro, a UK real Estate that manage and develop modern warehouse, was down more than 25%, following the recent weakness in Sterling and risking risk premium across UK asset.

Finally, the performance of the Cybersecurity theme is mixed, Palo Alto Networks continue to outperform but we were penalized by Okta, leader in the identity management service was down by more than 30% after mixed 2Q result. The company lowered billings with key a key questions marks on underwhelmed RPO and sales issues, due largely to sales integration challenges associated with core Okta and AuthO; acquisition made last year.

The Healthcare dimensions contributed also negatively, with Wuxi Biologics in the Biotech themes. The Chinese healthcare company was lower on the US Executive order for a specific funding budget with over 2 B US to advance the biotech/biomanufacuring initiative to lower prices, create jobs and strengthen supply chains. The executive order has no material impact on the business operation but the geopolitical risk remain an overhang on the performance for the name.

We also have some profit taking in the eHealth theme, with Veeva Software and IQVIA after a strong earnings and performance in July.

The Industry 4.0 and Earth dimension had a neutral contribution to the performance.

Earth dimension benefited from the new reconciliation bill announced by Senator Joe Manchin and Chuck Schumer called the "Inflation Reduction Act of 2022", the bill largely preserves prior clean energy proposals and extend solar ITC for 10 years at 30%. We also had an underperformance in the energy storage theme of CATL in the energy storage theme, on weak sell through of EV cars in China.

In the Industry 4.0, the Schneider Electric in the Smart factoring theme also had a positive performance contribution, following a good earnings release.

Investment Manager's Report (continued)

Global Disruptive Opportunities FAM Fund (the "Sub-Fund") (continued)

2022 was a year of macro and geopolitical shocks with sharply higher global rates and USD, stubbornly high inflation, China headwinds, and the largest conflict in Europe since WWII.

Investors responded to these events by a sharp de-rating of the growth segment. Over the last 12 months, NASDAQ 100 went from 28x P/E to 21x P/E.

For 2023, fundamentals will likely to deteriorate as financial condition continue to tighten and monetary policy turn more restrictive. In this new environment: "higher rate for longer"

Where to find growth? Early 2023, we had a rare combination of easier year and year growth comparison and major multiple compression creating compelling opportunities. Through the year, we expect that cost cutting drives margin expansion, falling inflation combined with slow economic growth drives back positioning into secular growth that is cash-rich balance sheets.

For the first time in 20 years, everyone is bearish and expecting 2023 to be difficult and volatile. Everyone has a lot of defensive positioning already, and cautious on growth and innovation, the first time in a decade. We think of 2023 as the Tale of Two Halves.

In the fund, we want to find the right balance between growth positioning and strong fundamentals.

Outlook is set favorable in some specific segment of the semiconductors sector like the compound semiconductors for efficient high-voltage power conversion and transmission, key for clean energy adoption in multiple industries, including mobility, factory automation, and robotics. We expect the ongoing inflection in electric vehicle adoption alone to drive meaningful power semiconductor growth for at least the next decade.

Digitalization of the economy continue to be a main driver of growth and disruptive forces in the economy. We continue to expect a solid demand outlook, because ongoing need for digitalization: through Cloud, Big Data and Cybersecurity. Security, remain important given the elevated number of breaches, regardless of the macro environment, budget are viewed as more resilient.

Payments theme is more and more interesting as the theme is already pricing in a recession to a significant degree.

In the Earth dimension, we view 2022 as a game-changer owing to the global energy crisis and stronger than expected policy support, globally. We believe the industry is entering a catalyst-rich environment as companies announce new manufacturing to benefit from the US IRA, and look for order activity to accelerate, providing revenue visibility into 2024 and beyond. We believe 2023 sets up favorably for our Earth dimension, we expect another year of record renewable deployment globally driven by energy security concerned and power prices.

In the Healthcare dimension, biopharma companies broke new ground in previously untreated diseases, advanced new-targeted cancer agents into the clinic, and continued to show the potential of novel modalities. Simultaneously, diagnostic, artificial intelligence, and synthetic biology tools continue to change the face of how and when therapies are used, discovered, and manufactured. For 2023 will see an acceleration of data, trial starts, and commercial milestones as companies, providers, and payers assess the potential of these breakthroughs and how best to use them.

Amundi Ireland Limited March 2023

Investment Manager's Report (continued)

Medtech FAM Fund (the "Sub-Fund")

The inflation theme is likely to remain central in the upcoming earnings season: the war in Ukraine, coupled with the spread of a new variant BA.2 that is leading China to institute new lockdowns, reminds everyone that while inflation will be temporary, it could still be painful for some sectors. The US healthcare equipment sector will be closely watched for supply chain tensions. The possibility of stable or even rising prices after a decade of systematically lowered prices by the authorities, however, could clearly act as a shock absorber and CMS' decisions will be studied very carefully.

The recession theme weighed heavily on global equity markets during the quarter, and the CPR Invest Medtech portfolio was no exception. However, it fell less than its benchmark index, dropping only 13.45% in gross terms, while the MSCI World Health Care Equipment & Supplies fell 15.64% in euro terms. This outperformance was due to the good performance of Diagnostics and Cardiology/Neurology, thanks in particular to our preference for Boston Scientific, which significantly outperformed the index over the past quarter, as well as the significant decline in Non-Invasive Devices, which fell by 18%, even though we are heavily underweighted in this segment of the medtech market. Indeed, we benefited from our low exposure to Align Technology, in the dental sector, which fell sharply after the market became alarmed at the impact of the contraction in demand due to the macroeconomic slowdown. By the end of the period, however, we saw greater resilience in the more expensive stocks in our universe, indicating that the adjustment to the new long-rate paradigm was likely largely complete. We therefore began to build or strengthen certain positions in growth stocks on a case-by-case basis, in order to take advantage of the sharp declines observed since the beginning of the year. Thus, we increased our exposure to Sartorius (diagnostics) and Dexcom (diabetes), considering that the declines since the beginning of the year were good entry points for quality stocks whose growth profile is totally non-cyclical.

The MSCI World Healthcare Equipment & Supplies fell by 1.58% in euro terms during the III quarter: Imaging/Radiation Therapy was the best performer with a decline of 8%, followed by Medical Devices and Non-Invasive Devices, while Orthopedics, followed by Dialysis/Blood Products and Diabetes both recorded positive performances. The portfolio recorded a positive relative performance over the quarter of about 50 bps. The allocation is costly over the quarter as we were penalized by the rise in orthopedics. On the other hand, the fund benefited from a good selection: within cardiology, we benefited from strong gains in Axonics (+32%), Silk Road (+31%), Si-Bone (+41%) and Boston Scientific Group, which rose by 10%. In hearing aids, we suffered a sharp decline in GN Store, penalized by a profit warning, but also by its high level of debt, considered a handicap in a context of rising interest rates.

During the fourth quarter, the portfolio was up 3%, down about 1.5% versus the MSCI Healthcare Equipment & Supplies. There was a negative allocation effect on the cardiology sector, as the sector was one of the worst performers during the quarter. Conversely, the performance in line with the Non-Invasive Devices index cost the portfolio since we are underweighted in this segment. In addition, stock picking in this segment did not perform well. Within diagnostics, we were also penalized by a negative selection effect. Conversely, our positioning in Surgery was positive during the quarter, thanks to our position in Intuitive Surgical, which rose by 29%, as well as our selection within the Blood/Diabetes sector, with Dexcom, which rose by 30%. Within Cardio/neurology, we benefited from a good entry point in Penumbra (+27%), the good performance of Inspire after solid results (+30%) as well as Boston Scientific. The lack of investment in Abiomed penalized the portfolio as J&J acquired the company at a 35% premium. Catalent was impacted by FDA warning letters and production problems at several of its facilities.

Amundi Ireland Limited March 2023

Investment Manager's Report (continued)

Sustainable Future Connectivity FAM Fund (the "Sub-Fund")

Global equities declined over the period. Markets came under pressure as tightening monetary policies by major central banks to curb elevated inflation intensified fears around global growth. Geopolitical risks arising from Russia's attack on Ukraine and the resurgence in COVID-19 cases in several regions further weighed on investor sentiment. Fears that a lengthy period of restrictive monetary policies could lead to slower economic growth and weaker labour market conditions dampened confidence. Against this global backdrop, Europe ex UK and US equities were the biggest decliners among key developed markets. From a sector perspective, consumer discretionary, information technology and communication services were among the key laggards. Meanwhile, energy companies rose as crude oil prices surged amid risks to global energy supplies arising from the Russia-Ukraine conflict. Performance Comment: During the period, the fund recorded negative returns. Stock selection in the semiconductors & semiconductor equipment industry detracted, as did the lack of exposure to energy and defensive health care names. Key detractors: In terms of key detractors, Swedish telecommunications company Ericsson declined after the company posted third quarter results below expectations and flagged an increase in restructuring costs to help meet their 2024 margin targets. Shares received some support later in the period after the company announced it had signed a patent renewal deal with Apple, ending ongoing legal disputes. The holding in semiconductors producer Marvell Technology also fell. Its shares dropped after the company reported lacklustre second quarter earnings and reduced its third quarter guidance, citing continued supply chain constraints. Shares in the Dutch holding company Prosus was among the top detractors. Prosus initially benefited from the news that it had terminated the agreement for one of its subsidiaries to acquire an online payments firm for what was seen as an inflated price, and they completed the exit from their Russian asset for a better than expected \$2.5bn sale value. However, shares were later impacted by the general weakness in Chinese technology stocks. Key contributors: The holding in telecommunications equipment provider Motorola Solutions surged as its second quarter results exceeded expectations, with earnings and revenues above consensus estimates. The lack of exposure to Tesla contributed to relative performance. Shares in the electric vehicle company declined through the year after it had to suspend production in China due to Zero Covid-19 lockdowns more recently a sharp spike in Covid-19 infections. Telecommunications major Deutsche Telekom was a notable contributor to relative returns. The company raised its annual earnings guidance for 2022, supported by accelerating customer additions in its US business and revenue growth in its European markets. Fund positioning: The strategy adopts a fundamental, bottom-up approach to investing in the long duration, transformative trend of future connectivity. This is defined as companies involved in enabling connectivity, and those that innovate and disrupt other industries using improved connectivity. It aims to invest in underappreciated growth opportunities in the theme, and combines a rigorous, bottom-up stock selection process with thematic and industry analysis to produce a relatively concentred, high growth portfolio of 35-45 stocks. The fund has a very strong focus on sustainability - in particular, digital ethics issues - with $\geq 70\%$ of stocks held having sustainable characteristics.

FIL Pensions Management March 2023

Investment Manager's Report (continued)

Changing Lifestyles FAM Fund (the "Sub-Fund")

Global equities saw steep declines in 2022. Despite relatively resilient earnings throughout much of the year, inflation, tightening monetary conditions and geopolitical tensions drove increased volatility across equity, bond and currency markets. Russia's invasion of Ukraine in late February caused a global shock, with equities declining and commodity prices soaring, given that Russia is a key producer of several important commodities. This contributed to a further surge in inflation as well as supply chain disruption. In effect this brought about an end to the loose monetary policy era across many developed markets as central banks moved to raise rates and halt asset purchase programmes synonymous with the previous decade. This dynamic kept shares prices under pressure through spring and summer of 2022 as investors moved to price in interest rate rises and an increased risk of recession. Shares did however make gains in November as improved sentiment drove a bear market rally but hawkish central bank rhetoric amidst a slowing growth backdrop ultimately led markets to further losses in December.

The fund underperformed its comparator over the period. On the debit side of the ledger, performance was impacted by the underperformance of holdings in Zalando, Amazon and Alibaba (all constituents of the Accessibility sub-theme). German online fashion retailer Zalando came under pressure as discretionary spending declined in some markets. We sold out of the position during the period on increasing concerns about an overly optimistic management team and the strength of the company's balance sheet in the current environment. Mega cap stock Amazon – a significant beneficiaries of Covid "lockdown life" – saw its core business suffer from a deterioration in macroeconomic conditions. In the case of Chinese internet platform Alibaba, the company reported its first decline in quarterly sales (Q2) since its 2014 New York listing. More generally, the e-commerce company suffered as a result of China's strict Covid-19 lockdowns, as the government pursued a hard line zeroCovid policy through much of the period. Performance did however benefit from our positions in AIA Group (a constituent of the Wellbeing sub-theme), Dollar General (Experiences) and Deckers (Wellbeing). In the case of Dollar General, the company offers very low prices with a very efficient cost model and benefitted in an environment of consumers trading down. AIA Group rose significantly in the latter part of the year on investor expectations that Hong Kong's access to the mainland China market would improve following the Chinese government's decision to relax its strict Covid-19 rules. Deckers, for its part, benefited from strong operating performance during the period driven primarily by continued growth in Deckers' running shoe brand, Hoka, and more generally from the secular shift towards casual and comfortable footwear.

Turning to the outlook, we remain excited by our powerful changing lifestyles investment theme. This strategy continues to access the long-term growth dynamics in evolving consumer behaviours but the shorter-term influences playing out for this strategy are highly influential. In this respect, inflation and the response of monetary policy to it are critical and we will be monitoring how these influences affect both the earnings estimates and the valuation of the stocks in which we are investing. As we look at the consumer discretionary parts of the market we are calibrating the effect of slowing economic growth and determining the extent to which this is discounted in prevailing share prices. Politics in its broadest sense is also an important consideration, whether geopolitics, domestic elections, tax and spending policies or other legislation. In the meantime, we continue looking across each of our four sub-themes, namely Accessibility, Experiences, Identity and Wellbeing, to identify compelling stock selection opportunities for the portfolio.

Schroder Investment Management Limited March 2023

Investment Manager's Report (continued)

Morgan Stanley US Advantage FAM Fund (the "Sub-Fund")

Morgan Stanley US Advantage FAM Fund returned a total performance of -54.65% (net of fees) in 2022. Counterpoint Global seeks high quality companies, which we define primarily as those with sustainable competitive advantages. We manage concentrated portfolios that are highly differentiated from the benchmark, with securities weighted on our assessment of the quality of the company and our conviction. The value added or detracted in any period of time will typically result from stock selection, given our philosophy and process.

The long-term investment horizon and conviction weighted, highly active investment approach embraced by Counterpoint Global can result in periods of performance deviation from the benchmark and peers. The portfolio underperformed the S&P 500 Index this quarter primarily due to unfavourable stock selection; sector allocations also detracted to a lesser extent.

U.S. large-cap equities, as measured by the S&P 500 Index, advanced over the quarter. Energy, Industrials, Materials, and Financials posted the highest return in the S&P 500 Index. Most sectors advanced over the period; however, Consumer Discretionary and Communication Services posted negative returns and were the relative underperformers in the index. Against this backdrop, Counterpoint Global continued to focus on stock selection and the long-term outlook for companies owned in the portfolio.

Fear and uncertainty due to concerns about inflation, rising interest rates, geopolitical tensions, and ongoing effects of the global pandemic continued to weigh on market sentiment, contributing to greater volatility and a continued aversion towards high growth equities. We believe this rotation away from high growth equities remains driven primarily by non-fundamental factors. Fundamentals across portfolio holdings have largely remained healthy and in line with our expectations. Despite market volatility, we continue to find many high quality companies with attractive end-game potential due to compelling fundamentals, strong balance sheets, and multiple competitive advantages. We believe today's market offers an attractive opportunity to buy unique companies with strong fundamentals that can be long-term winners over the next three to five years. While we have opportunistically added to some positions and initiated new ones, overall we have made few changes as we remain confident in the long-term prospects for the businesses we own.

Information Technology was the top detractor in the portfolio in quarter one, due to mixed stock selection. The portfolio's stock selection in and sector allocations to most other sectors detracted as well; stock selection in Communication Services and Consumer Discretionary was most unfavourable to relative results. All sectors detracted over the period, with the exception of Real Estate, which had a negligible impact.

Information Technology was again the top detractor in the portfolio in quarter two, due to mixed stock selection. Most other sectors also detracted from relative performance over the quarter due to stock selection; among them, Industrials, Communication Services, and Consumer Discretionary had the greatest adverse impact. Lastly, Real Estate and Materials – sectors the portfolio has no exposure to – each had a negligible impact on relative performance this period.

In quarter three, Communication Services was the top contributing sector across the portfolio, as stog stock selection more than offset the unfavourable impact of an average sector overweight position. Industrials was the second greatest contributor in the portfolio, due to favourable stock selection. Stock selection in Information Technology also aided relative performance. Stock selection in Financials also contributed, as did a lack of exposure to Consumer Staples, Real Estate and Materials. To a lesser extent, Consumer Discretionary also aided relative results, as an average sector overweight position more than offset the adverse impact of mixed stock selection. Conversely, Energy and Health Care were the greatest detractors in the portfolio this quarter. The portfolio had no exposure to Energy, which was among the top performers in the index. Health Care detracted due to mixed stock selection and an average sector underweight position. Lastly, Utilities – a sector the portfolio has no exposure to – had an overall negligible impact on relative performance.

In quarter four, Communication Services was the largest relative detractor in the portfolio, due to unfavourable stock selection and an average sector overweight position. Information Technology and Health Care were also large detractors primarily due to mixed stock selection. Industrials also hurt relative performance as mixed stock selection more than offset the favourable impact of an average sector overweight position. To a lesser extent, an average underweight position in Financials and Materials also weighed on relative results, as did a lack of exposure to Energy and Consumer Staples. Consumer Discretionary was also a detractor in the portfolio, as an average overweight position more than offset favourable stock selection. Conversely, Real Estate was the top contributing sector in the portfolio this quarter, due to a lack of exposure to the sector. Lastly, Utilities – a sector the portfolio has no exposure to – had an overall negligible impact on relative performance.

DEPOSITARY'S REPORT TO THE SHAREHOLDERS OF FAM SERIES UCITS ICAV

We, BNP Paribas S.A., Dublin Branch, appointed Depositary to the ICAV provide this report solely in favour of the investors of the Fund as a body for the year ended 31 December 2022 ("the Accounting Period"). This report is provided in accordance with the UCITS Regulations – European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (SI No 352 of 2011) as amended, ("the UCITS Regulations"). We do not, in the provision of this report, accept nor assume responsibility for any other purpose or person to whom this report is shown.

In accordance with our Depositary obligation as provided for under the UCITS Regulations, we have enquired into the conduct of the ICAV for the Accounting Period and we hereby report thereon to the investors of the Fund as follows;

We are of the opinion that the Fund has been managed during the Accounting Period, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Sub-Fund by the constitutional documents, the Regulations and by the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 ("the Central Bank UCITS Regulations"); and
- (ii) otherwise in accordance with the provisions of the constitutional documents, the Regulations and the Central Bank UCITS Regulations.

Eamonn Tiernan Digitally signed by Eamonn Tiernan

For and on behalf of

BNP Paribas S.A., Dublin Branch Termini 3 Arkle Road Sandyford Dublin 18 D18 T6T7 Ireland

25 April 2023

Directors' Report

For the financial year ended 31 December 2022

The Directors of FAM Series UCITS ICAV (the "ICAV") submit their report together with the audited Financial Statements for the financial year ended 31 December 2022.

Principal activities

The ICAV has been authorised by the Central Bank of Ireland (the "Central Bank") as an Irish Collective Asset-Management Vehicle pursuant to the Irish Collective Asset-Management Vehicles Act 2015 (the "ICAV Act"). The ICAV has been authorised pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (as amended).

The ICAV is structured as an umbrella entity composed of different Sub-Funds. Each Sub-Fund will represent a separate portfolio of assets of the ICAV and may have more than one Class or Series of Shares allocated to it.

Statement of Directors' Responsibilities in Respect of the Financial Statements

The Directors are responsible for preparing the Financial Statements in accordance with applicable Irish law and International Financial Reporting Standards ("IFRS") as adopted by the European Union ("EU").

Irish company law requires the Directors to prepare Financial Statements for each financial year, which give a true and fair view of the state of affairs of the ICAV and of the profit or loss of the ICAV for that year. In preparing those Financial Statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgments and estimates that are reasonable and prudent;
- prepare the Financial Statements on the going concern basis unless it is inappropriate to presume that the ICAV will not continue in business; and
- state whether the Financial Statements have been prepared in accordance with applicable accounting standards, identify
 those standards, and note the effect and reasons for any material departure from those standards.

The Directors confirm that they have complied with the above requirements in preparing the Financial Statements for the year ended 31 December 2022 (the "Financial Statements"). In carrying out these requirements, the Directors have appointed BNP Paribas Fund Administration Services (Ireland) Limited (the "Administrator") to act as administrator to the ICAV.

Review of the business and future developments

A comprehensive overview of the ICAV's and its Sub-Funds' activities and its future developments are set out in the Investment Manager's reports. Investment objectives may change from time to time, these will be reflected in the prospectus of the ICAV and the relevant Sub-Fund supplement.

Risks and uncertainties

The principal risks and uncertainties which the ICAV faces relate to the use of financial instruments and are listed in note 13 "Financial Instruments and Associated Risks".

Results and dividends

The results for the financial year are shown in the Statement of Comprehensive Income on pages 107 to 121.

Corporate Governance

The Directors have voluntarily adopted the 'Corporate Governance Code for Collective Investment Schemes and Management Companies', as published by Irish Funds in December 2011 (the "IF Code"), as the ICAV's corporate governance code. In respect of the financial year ended 31 December 2022, the Directors confirm compliance with the provisions of the IF Code.

Secretary

The Secretary that served during the financial year is listed on page 4.

Directors' Report (continued)

For the financial year ended 31 December 2022

Directors

The Directors of the ICAV at 31 December 2022 were:

Jim Firn (Irish resident)*
Fabio Melisso (Irish resident)**
Ciaran Brady (Irish resident)**
Lorenzo Di Pietrantonio (Irish resident)** (appointed on 24 January 2022)

- * Independent non-executive Director
- ** Non-executive Director

Transactions involving Directors

Other than as disclosed in Note 12 to the Financial Statements, there are no contracts or arrangements of any significance in relation to the business of the ICAV in which the Directors or Secretary had any interest as defined in the ICAV Act at any time during the financial year.

Connected Persons

In accordance with the requirements of the UCITS Regulations, all transactions carried out with the ICAV by the promoter, manager, trustee, investment adviser and associates/group companies ("connected persons") must be conducted at arm's length and be in the best interests of shareholders. The Directors are satisfied that there are arrangements (evidenced by written procedures) in place to ensure that the obligations set out in the UCITS Regulations are applied to all transactions with connected persons and that transactions with connected persons entered into during the year complied with the obligations set out in the UCITS Regulations.

Accounting Records

The measures taken by the Directors to secure compliance with the ICAV's obligation to keep adequate accounting records are the use of appropriate accounting systems and procedures and employment of competent persons through the appointment of the Administrator. The accounting records are kept at the registered address of the Administrator at Termini, 3 Arkle Road, Sandyford, Dublin 18, D18 T6T7, Ireland.

Statement of Relevant Audit Information

The Directors acknowledge that they are responsible for providing all relevant audit information to the ICAV's statutory auditors in connection with preparing their report in accordance with section 330 of the Companies Act 2014 (as amended). The Directors confirm that:

- so far as the Directors are aware, there is no relevant audit information of which the ICAV's statutory auditors are not aware; and
- each of the Directors has taken all the steps that ought to have been taken as a Director in order to make himself or herself aware of any relevant audit information and to establish that the ICAV's statutory auditors are aware of that information.

Going concern

The ICAV's management has made an assessment of the ICAV's ability to continue as a going concern and is satisfied that the ICAV has the resources to continue in business for the foreseeable future. Furthermore, management is not aware of any material uncertainties that may cast significant doubt upon the ICAV's ability to continue as a going concern.

Independent Auditors

Deloitte Ireland LLP, Chartered Accountants and Statutory Audit Firm were appointed auditors for the financial year.

Directors' Report (continued) For the financial year ended 31 December 2022

Events during the financial year

Covid 19

The impact of the coronavirus outbreak was profound across all aspects of society. In developed economies, it is clear that the worst of the impact is now over. However, there is an expectation that seasonal peaks and new variants could give rise to renewed travel restrictions, enhanced health screenings at ports of entry and elsewhere, disruption of and delays in healthcare service preparation and delivery and supply chain disruptions which will create ongoing challenges. Widescale and comprehensive vaccination programmes have been put in place in many countries which have had a positive effect. Nevertheless, the impact of COVID-19 continues to adversely affect the economies of many nations across the globe and this in turn may continue to impact investments held by each Fund.

Russia/Ukraine Conflict and sanctions

The outbreak of war in Ukraine and the related sanctions targeted against the Russian Federation has impacted the European and Global economies. The direct exposure to Ukraine, Russia or Belarus was and continues to be not material to the overall ICAV. However, the impact on the general economic situation may require in the future revisions of certain assumptions and estimates. The Directors are carefully monitoring the situation as well as its potential impacts on the ICAV. The ICAV is fully capable of continuing its usual operations.

All disclosures relating to events during the year ended 31 December 2022 are disclosed in Note 19 of the Financial Statements.

Events post financial year end

All disclosures relating to events after the year ended 31 December 2022 are disclosed in Note 20 of the Financial Statements.

Signed for and on behalf of the board of Directors by

ear Draw.

Ciarán Brady

25 April 2023

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF FAM SERIES ICAV

Report on the audit of the financial statements

Opinion on the financial statements of FAM Series ICAV (the 'ICAV')

In our opinion the financial statements:

- give a true and fair view of the assets, liabilities and financial position of the ICAV as at 31 December 2022 and of the result for the financial year then ended; and
- have been properly prepared in accordance with the relevant financial reporting framework and the Applicable Regulations.

The financial statements we have audited comprise:

- the Statement of Financial Position;
- the Statement of Comprehensive Income;
- the Schedule of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares;
- the Statement of Cashflows and
- the related notes 1 to 23 including a summary of significant accounting policies as set out in note 2.

The relevant financial reporting framework that has been applied in the preparation of the financial statements is the Irish Collective Asset-Management Vehicles Acts 2015-2020 ("the ICAV Act") and International Financial Reporting Standards (IFRS) as adopted by the European Union ("the relevant financial reporting framework").

The applicable regulations that have been applied in their preparation is the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 ("the applicable Regulations").

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are described below in the "Auditor's responsibilities for the audit of the financial statements" section of our report.

We are independent of the ICAV in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority (IAASA), as applied to public interest entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Summary of our audit approach

Key audit matters

The key audit matters that we identified in the current year were:

- Valuation of financial assets and liabilities at fair value through profit or loss
- Existence of financial assets and liabilities at fair value through profit or loss

Materiality	The materiality that we used in the current year was 1% of average net assets determined in respect of each sub-fund and 0.50% of average net assets for the following sub-funds: 1. Fineco AM MSCI World Semiconductors and Semiconductor Equipment UCITS ETF 2. Fineco AM MSCI ACWI IMI Cyber Security UCITS ETF 3. Fineco AM MSCI World Metals and Mining UCITS ETF 4. Fineco AM MSCI USD IG Liquid SRI Sustainable Corporate Bond UCITS ETF 5. Fineco AM MSCI World Consumer Staples ESG Leaders UCITS ETF 6. Fineco AM MSCI World Financials ESG Leaders UCITS ETF 7. Fineco AM MSCI World Information Technology ESG Leaders 20% Capped UCITS ETF 8. Fineco AM MSCI USD HY SRI Sustainable Corporate Bond UCITS ETF 9. Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel Corporate Bond UCITS ETF 10. Fineco AM MSCI EUR HY SRI Sustainable Corporate Bond UCITS ETF 11. Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel (1-3y) Corporate Bond UCITS ETF					
Scoping	Our audit is a risk-based approach taking into account the structure of the ICAV, types of investments, the involvement of the third-party service providers, the accounting processes and controls in place and the industry in which the ICAV operates.					
Significant changes in our approach	There have been no significant changes in our approach from our prior year audit.					

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Our evaluation of the directors' assessment of the ICAV's ability to continue to adopt the going concern basis of accounting included:

- Obtaining an understanding of the relevant controls in place regarding going concern as part of our audit risk assessment procedures.
- Holding discussions with management on the directors' going concern assessment, the future plans for the ICAV and the feasibility of those plans.
- Challenging the reasonableness of the key assumptions applied by the directors in their assessment.
- Reviewing all board meeting minutes during the period up to the date of approval of the financial statements, for evidence of any discussions and/or decisions that could impact the ICAV's ability to continue as a going concern.
- Reviewing the capital activity and NAV movements, subsequent to the financial year end.
- Assessing the adequacy of the relevant going concern disclosures made in the financial statements.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current financial year and include the most significant assessed risks of material misstatement (whether or not due to fraud) we identified, including those which had the greatest effect on: the overall audit strategy, the allocation of resources in the audit; and directing the efforts of the engagement team. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Valuation of financial assets and liabilities at fair value through profit or loss

Key audit matter description

For the financial year ended, the financial assets and liabilities at fair value through profit or loss make up a significant percentage of the total net assets of the ICAV.

The valuation of financial assets and liabilities at fair value through profit or loss is considered a key audit matter as it is the most significant number on the Statement of Financial Position, is a key driver of performance and due to the potential for management judgement and estimation in the valuation.

As financial assets and liabilities at fair value through profit or loss are a key driver of performance and due to their significance to the net asset value, there is a risk that these investments might not be correctly valued, in accordance with IFRS.

Refer also to note 14 in the financial statements.

How the scope of our audit responded to the key audit matter

• We considered the valuation basis used in light of the valuation policy as stipulated in the ICAV's Prospectus documents and the requirements of IFRS.

- We obtained the BNP Paribas Fund Administration Services (Ireland) Limited (the "Administrator") ISAE 3402 Report and identified the key controls in place over the valuation process and reviewed those key controls for any exceptions.
- We independently valued all exchange traded securities using our own market feeds.
- We reviewed the adequacy of the fair value levelling disclosures in the financial statements.
- We revalued swap positions on a sample basis.
- We reviewed the fair value levelling disclosures in the financial statements to ensure they were appropriate.

Existence of investments

Key audit matter description

For the financial year ended, the financial assets and liabilities at fair value through profit or loss make up a significant percentage of the total net assets of the ICAV.

There is a risk that financial assets and liabilities at fair value through profit or loss recorded might not exist or might not be owned by the ICAV. Financial assets and liabilities at fair value through profit or loss are considered to be a key driver for the ICAV's performance.

Therefore, due to the significance of investments to the ICAV's financial statements, we have determined this as a key audit matter.

Refer also to note 14 in the financial statements.

How the scope of our audit responded to the key audit matter

- We obtained the BNP Paribas Fund Administration Services (Ireland) Limited (the "Administrator") ISAE 3402 Report and identified the key controls in place over the reconciliation process and reviewed those key controls for any exceptions.
- We obtained direct confirmation of the investments of the ICAV from the Depositary and brokers at year-end. Any reconciling items between the confirmations and the ICAV's investment portfolios were investigated to ensure that trades were recorded in the correct reporting period.
- We completed alternative procedures in relation to a number of positions for which confirmations were not available at the issuance of this report.

Our audit procedures relating to these matters were designed in the context of our audit of the financial statements as a whole, and not to express an opinion on individual accounts or disclosures. Our opinion on the financial statements is not modified with respect to any of the risks described above, and we do not express an opinion on these individual matters.

Our application of materiality

We define materiality as the magnitude of misstatement in the financial statements that makes it probable that the economic decisions of a reasonably knowledgeable person would be changed or influenced. We use materiality both in planning the scope of our audit work and in evaluating the results of our work.

Based on our professional judgement, we determined materiality for the financial statement as a whole as follows:

Basis for	The materiality that we used in the current year was 1% of average net assets
determining	determined in respect of each sub-fund and 0.50% of average net assets for the
materiality	following sub-funds:
·	 Fineco AM MSCI World Semiconductors and Semiconductor Equipment UCITS ETF
	2. Fineco AM MSCI ACWI IMI Cyber Security UCITS ETF
	3. Fineco AM MSCI World Metals and Mining UCITS ETF
	4. Fineco AM MSCI USD IG Liquid SRI Sustainable Corporate Bond UCITS ETF
	5. Fineco AM MSCI World Consumer Staples ESG Leaders UCITS ETF
	6. Fineco AM MSCI World Financials ESG Leaders UCITS ETF
	7. Fineco AM MSCI World Information Technology ESG Leaders 20% Capped UCITS ETF
	8. Fineco AM MSCI USD HY SRI Sustainable Corporate Bond UCITS ETF
	9. Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel Corporate Bond UCITS ETF
	10. Fineco AM MSCI EUR HY SRI Sustainable Corporate Bond UCITS ETF
	11. Fineco AM MSCI EUR IG SRI Sustainable ex Fossil Fuel (1-3y) Corporate Bond
	UCITS ETF
Rationale for the benchmark applied	The Net Asset Value of the ICAV is the primary indicator of the size and performance of the ICAV and is considered the key area of interest for the shareholders, who are the primary users of the financial statements. The use of the average net Asset value is
	considered the industry practice benchmark for Investment Funds.

The materiality used by the former auditor in the audit of the prior year financial statements was 1% of average net assets of the ICAV for all sub-funds.

We set performance materiality at a level lower than materiality to reduce the probability that, in aggregate, uncorrected and undetected misstatements exceed the materiality for the financial statements as a whole. Performance materiality was set at 50% of materiality for the 2022 audit. In determining performance materiality, we considered the following factors:

- our understanding of the ICAV;
- the quality of the control environment;
- the nature and extent of misstatements identified in previous audits; and
- our expectations in relation to misstatements in the current period.

We agreed with the Board of Directors that we would report to the Board of Directors all audit differences in excess of 5% of materiality, as well as differences below that threshold that, in our view, warranted reporting on qualitative grounds. We also report to the Board of Directors on disclosure matters that we identified when assessing the overall presentation of the financial statements.

An overview of the scope of our audit

Our audit is a risk based approach taking into account the structure of the ICAV, types of investments, the involvement of the third parties service providers, the accounting processes and controls in place and the industry in which the ICAV operates. The ICAV is incorporated as an Irish collective asset management vehicle with variable capital and segregated liability between sub-funds. The ICAV is authorised by the Central Bank of Ireland (the "Central Bank") as a qualifying investor alternative investment fund.

The ICAV is organised as an umbrella fund with segregated liability between sub-funds. We assess the risks of each sub-fund separately. We have conducted our audit based on the books and records maintained by the administrator of FAM Series ICAV at 32 Molesworth Street, Dublin 2, Ireland.

Other information

The other information comprises the information included in the Annual Report and Audited Financial Statements, other than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained within.

Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Responsibilities of directors

As explained more fully in the Statement of Directors' responsibilities, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view and otherwise comply with the ICAV Act, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the ICAV's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the ICAV or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on IAASA's website at: https://iaasa.ie/publications/description-of-the-auditors-responsibilities-for-the-audit-of-the-financial-statements/. This description forms part of our auditor's report.

Extent to which the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below.

Identifying and assessing potential risks related to irregularities

In identifying and assessing risks of material misstatement in respect of irregularities, including fraud and non-compliance with laws and regulations, we considered the following:

- the nature of the industry and sector, control environment and business performance;
- results of our enquiries of management about their own identification and assessment of the risks of irregularities;
- any matters we identified having obtained and reviewed the ICAV's documentation of their policies and procedures relating to:
 - o identifying, evaluating and complying with laws and regulations and whether they were aware of any instances of non-compliance;
 - o detecting and responding to the risks of fraud and whether they have knowledge of any actual, suspected or alleged fraud;
 - o the internal controls established to mitigate risks of fraud or non-compliance with laws and regulations;
- the matters discussed among the audit engagement team and relevant internal specialists, including IT
 and valuations regarding how and where fraud might occur in the financial statements and any potential
 indicators of fraud.

As a result of these procedures, we considered the opportunities and incentives that may exist within the organisation for fraud and identified the greatest potential for fraud in the following areas: Valuation of financial assets and liabilities at fair value through profit or loss and Revenue Recognition. In common with all audits under ISAs (Ireland), we are also required to perform specific procedures to respond to the risk of management override.

We also obtained an understanding of the legal and regulatory framework that the ICAV operates in, focusing on provisions of those laws and regulations that had a direct effect on the determination of material amounts and disclosures in the financial statements. The key laws and regulations we considered in this context included the ICAV Act, Listing Rules and the Applicable Regulations.

In addition, we considered provisions of other laws and regulations that do not have a direct effect on the financial statements but compliance with which may be fundamental to the ICAV's ability to operate or to avoid a material penalty. These included matters regulated by the Central Bank of Ireland.

Audit response to risks identified

As a result of performing the above, we identified 'Valuation of financial assets at fair value through profit or loss as a key audit matter related to the potential risk of fraud. The key audit matters section of our report explains the matter in more detail and also describes the specific procedures we performed in response to that key audit matter.

In addition to the above, our procedures to respond to risks identified included the following:

- reviewing the financial statement disclosures and testing to supporting documentation to assess compliance with provisions of relevant laws and regulations described as having a direct effect on the financial statements;
- enquiring of management and the Board of Directors concerning actual and potential litigation and claims:
- performing analytical procedures to identify any unusual or unexpected relationships that may indicate risks of material misstatement due to fraud;
- reading minutes of meetings of those charged with governance and reviewing correspondence with the Central Bank of Ireland; and
- In addressing the risk of fraud in Revenue Recognition, independently valuing all exchange traded securities using our own market feeds and completing an unrealised gain/loss reconciliation.
- In addressing the risk of fraud through management override of controls, testing the appropriateness of
 journal entries and other adjustments; assessing whether the judgements made in making accounting
 estimates are indicative of a potential bias; and evaluating the business rationale of any significant
 transactions that are unusual or outside the normal course of business.

We also communicated relevant identified laws and regulations and potential fraud risks to all engagement team members including internal specialists, and remained alert to any indications of fraud or non-compliance with laws and regulations throughout the audit.

Report on other legal and regulatory requirements

Matters on which we are required to report by the ICAV Act and the Applicable Regulations

In our opinion, the information given in the directors' report is consistent with the financial statements. The directors' report has been prepared in accordance with the ICAV Act.

Matters on which we are required to report by exception

Based on the knowledge and understanding of the ICAV and its environment obtained in the course of the audit, we have not identified material misstatements in the directors' report.

We have nothing to report in respect of the provisions in the ICAV Act which require us to report to you if, in our opinion, the disclosures of directors' remuneration specified by the ICAV Act are not made.

Opinion on other matters prescribed by the Applicable Regulations

Based solely on the work undertaken in the course of the audit, we report that:

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the ICAV were sufficient to permit the financial statements to be readily and properly audited.
- The financial statements are in agreement with the accounting records.

Other matters which we are required to address

We were appointed by the Board of Directors on 23 November 2022 to audit the financial statements for the year ending 31 December 2022. The period of total uninterrupted engagement including previous renewals and reappointments of the firm is 5 years, covering the year ending 31 December 2022.

The non-audit services prohibited by IAASA's Ethical Standard were not provided and we remained independent of the ICAV in conducting the audit.

Our audit opinion is consistent with the additional report to the Board of Directors we are required to provide in accordance with ISA (Ireland) 260.

Use of our report

This report is made solely to the ICAV's shareholders, as a body, in accordance with Section 120(1) (b) of the ICAV Act. Our audit work has been undertaken so that we might state to the ICAV's shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the ICAV and the ICAV's shareholders as a body, for our audit work, for this report, or for the opinions we have formed.

Brian Forrester

1. General Information

FAM Series UCITS ICAV (the "ICAV") is an umbrella Irish Collective Asset-management Vehicle with segregated liability between its Sub-Funds and authorised pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (as amended). The ICAV was incorporated on 8 March 2018. On 7 October 2022, FAM Series UCITS ICAV listed on the Italian Stock Exchange (Borsa Italiana).

The ICAV is structured as an umbrella entity composed of different sub-funds (the "Sub-Funds"). Each Sub-Fund will represent a separate portfolio of assets of the ICAV and may have more than one Class or Series of Shares allocated to it.

Effective 9 February 2022, the following Sub-Funds of the ICAV changed their name:

Emerging Markets Debt FAM Fund was formerly known as GS Emerging Markets Debt FAM Fund.

Effective 19 October 2022, the following Sub-Funds of the ICAV changed their name:

Fineco AM Global Premium Equities Fund was formerly known as Global Premium Equities Fund.

Effective 25 November 2022, the following Sub-Funds of the ICAV changed their name:

- Fineco AM Investment Grade Euro Aggregate Bond Fund was formerly known as FAM Investment Grade Euro Aggregate Bond Fund.
- Fineco AM Euro Corporate Bond Fund was formerly known as Euro Corporate Bond FAM Fund.
- Fineco AM Euro Corp Bonds Fund was formerly known as FAM Euro Corporate Bonds Fund.
- Fineco AM Euro Credit Bond Fund was formerly known as Euro Credit Bond FAM Fund.
- Fineco AM European Corporate Bond Fund was formerly known as European Corporate Bond FAM Fund.
- Fineco AM Global Equity Fund was formerly known as FAM Global Equity Fund.
- Fineco AM Global Equities Income Fund was formerly known as FAM Global Equities Income Fund.

Effective 1 June 2021, Fineco Asset Management Designated Activity Company (the "Manager") appointed HSBC Global Asset Management (France) to act as investment advisor (the "Investment Advisor") to Euro Credit Bond Fund.

Effective 10 June 2021, Fineco Asset Management Designated Activity Company (the "Manager") appointed M&G Investment Management Limited to act as investment advisor (the "Investment Advisor") to European Corporate Bond Fund.

Effective 17 June 2021, Fineco Asset Management Designated Activity Company (the "Manager") appointed M&G Investment Management Limited to act as investment advisor (the "Investment Advisor") to Euro Corporate Bond Fund.

Effective 13 December 2021, Fineco Asset Management Designated Activity Company (the "Manager") appointed Vontobel Asset Management S.A. to act as investment advisor (the "Investment Advisor") to Fineco AM Global Equity Fund.

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

1. General Information (continued)

The investment objective of the below Sub-Funds is to achieve income and capital growth:

- Fidelity Euro Bond FAM Fund
- Fidelity Euro Short Term Bond FAM Fund

The investment objective of Fidelity Global Dividend FAM Fund is to achieve income and long-term capital growth principally through investment in global income producing equities.

The investment objective of Fidelity World FAM Fund is to achieve long-term capital growth from a portfolio primarily made up of the equity securities of companies around the world.

The investment objective of US Equity Value FAM Fund is to provide long-term capital growth by investing primarily in a value style biased portfolio of US companies.

The investment objective of M&G North American Value FAM Fund is to achieve total returns over the medium term of typically three to five years, through a combination of income and capital appreciation.

The investment objective of the below Sub-Funds is to maximise total return, consisting of income and capital appreciation:

- Amundi Emerging Markets Bond FAM Fund
- European High Yield Bond FAM Fund
- Vontobel Emerging Markets Debt FAM Fund

The investment objective of Amundi Strategic Bond FAM Fund is to achieve capital appreciation over the medium to long term.

The investment objective of Amundi European Equity Value FAM Fund is capital appreciation over the medium to long term through investment in a diversified portfolio of European equity securities.

The investment objective of the below Sub-Funds is to maximise total returns:

- Emerging Markets Bond Hard Currency FAM Fund
- Euro Bond FAM Fund
- Euro Corporate Fixed Income FAM Fund
- Euro Short Duration Bond FAM Fund

The investment objective of the below Sub-Funds is to maximise total returns through a combination of income and capital appreciation:

- Fineco AM European Corporate Bond Fund
- M&G Optimal Income FAM Fund

The investment objective of Schroder Euro Bond FAM Fund is to provide capital growth and income over the long term by investing in fixed and floating rate bonds denominated in Euro or hedged back to Euro.

The investment objective of European Equity FAM Fund is to provide long-term capital growth by investing primarily in European companies.

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

1. General Information (continued)

The investment objective of the below Sub-Funds is to achieve long-term capital growth:

- Fineco AM Global Premium Equities Fund
- Fineco AM Global Equity Fund
- Flexible Equity Strategy FAM Fund

The investment objective of Fineco AM Euro Corp Bonds Fund is to generate a capital appreciation that exceeds the iBoxx Euro Corporate index (the "Index").

The investment objective of Fineco AM Investment Grade Euro Aggregate Bond Fund is to achieve total returns, meaning capital appreciation plus income from its investments, through investment in bonds.

The investment objective of Fineco AM Euro Corporate Bond Fund is to provide a total return (income and capital growth) in excess of that generated by the Index.

The investment objective of Fineco AM Global Equities Income Fund is to generate high levels of income, with the potential for long-term capital growth.

The investment objective of Invesco Global Total Return Bond FAM Fund is to maximize total return primarily through investment in a flexible allocation of fixed income securities (including corporate bonds, government bonds, treasury bonds, municipal bonds and asset backed securities).

The investment objective of Nordea Stable Performance FAM Fund is to preserve Shareholder's capital and provide stable growth to Shareholders over the medium to long term.

The investment objective of Fineco AM Euro Credit Bond Fund is to provide long term total return (meaning capital growth and income) by investing in a portfolio of Investment Grade rated fixed income securities (including corporate bonds and treasury bonds) denominated in Euro.

The investment objective of Euro High Yield Bond FAM Fund is to provide long term total return (meaning capital growth and income) by primarily investing in a portfolio of Euro denominated fixed income securities (including corporate bonds and treasury bonds).

The investment objective of Emerging Markets Debt FAM Fund is to provide income and capital growth over the long term.

The investment objective of Jupiter Flexible Income FAM Fund is to provide regular income with the prospect of long-term capital growth.

The investment objective of Infusive Consumer Alpha Global Leaders FAM Fund is to provide capital appreciation over the long term.

The investment objective of Fidelity Sustainable Water and Waste FAM Fund is to provide long term capital growth by investing primarily in equity securities of companies.

The investment objective of JPMorgan China A-Shares Opportunities FAM Fund is to provide long term capital growth by investing primarily in companies of the People's Republic of China (PRC).

The investment objective of Diversity and Inclusion FAM Fund is to maximise total returns through a combination of income and capital appreciation through investing in companies that have demonstrable gender and/or ethnic diversity, or which provide solutions empowering social equality.

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

1. General Information (continued)

The investment objective of Global Listed Infrastructure FAM Fund is to deliver a higher total return (combination of capital growth and income) than that of global equities markets over any five-year period.

The investment objective of European STARS Equity FAM Fund is to achieve long-term capital growth from a portfolio primarily (at least 75% of the Net Asset Value of the Fund) made up of the equity securities of companies across any sector and market capitalisation that are domiciled in, or carrying out the main part of their economic activity in, Europe.

The investment objective of Global Sustain Paris Aligned FAM Fund is to provide a higher total return (capital growth plus income) than that of global equity markets over any five-year period and to invest in companies that contribute towards the Paris Agreement climate change goal.

The investment objective of North American STARS Equity FAM Fund is to achieve long-term capital growth from a portfolio primarily (at least 75% of the Net Asset Value of the Fund) made up of the equity securities of companies across any sector and market capitalisation that are domiciled in, or carrying out the main part of their economic activity in, North America.

The investment objective of Global STARS Equity FAM Fund is to achieve long-term capital growth from a portfolio primarily (at least 75% of the Net Asset Value of the Fund) made up of the equity securities of companies across any sector and market capitalisation from anywhere in the world, including those in countries considered to be emerging markets.

The assets of a Sub-Fund will be invested separately in accordance with the investment objectives and policies of the Sub-Fund as set out in the Prospectus.

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

1. General Information (continued)

In respect of each Sub-Fund, Fineco Asset Management Designated Activity Company (the "Investment Manager") has appointed an Investment Manager to manage the assets and investments of the Sub-Fund in conformity with the Sub-Fund's investment objectives and policies. The Investment Managers shall be entitled to receive annual management fee (see Note 12) which shall be paid out of the fees of the Manager and not out of the assets of the Sub-Fund.

The Financial Statements exclude the following Sub-Funds and are presented in a separate sets of Financial Statements.

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

1. General Information (continued)

(a) Basis of Preparation

These Financial Statements have been prepared in accordance with International Financial Reporting Standards ('IFRS') issued by the International Accounting Standards Board ("IASB") and have been prepared on the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period.

Going Concern

The ICAV's management has made an assessment of the ICAV's ability to continue as a going concern and is satisfied that the ICAV has the resources to continue in business for the foreseeable future. Furthermore, the management is not aware of any material uncertainties that may cast significant doubt upon the ICAV's ability to continue as a going concern. Therefore, the Financial Statements are prepared on the going concern basis.

New standards and interpretations effective 1 January 2022

Onerous Contracts - Costs of Fulfilling a Contract - Amendments to IAS 37

In May 2020, the International Accounting Standards Board ("IASB") issued amendments to IAS 37 Provisions, Contingent Liabilities and Contingent Assets to specify which costs an entity needs to include when assessing whether a contract is onerous or loss-making.

In particular, the amendments 1 January 2022 clarify:

Entities that previously applied the incremental cost approach will see provisions increase to reflect the inclusion of costs related directly to contract activities, whilst entities that previously recognised contract loss provisions using the guidance from the former standard, IAS 11 Construction Contracts, will be required to exclude the allocation of indirect overheads from their provisions.

This amendment did not have a material impact on the ICAV.

There are no standards, interpretations or amendments to existing standards that are effective that would be expected to have a significant impact on the ICAV.

(b) New standards, amendments and interpretations issued but not effective for the financial year beginning 1 January 2022 and not early adopted

Classification of Liabilities as Current or Non-current - Amendments to IAS 1

In January 2020, the Board issued amendments to paragraphs 69 to 76 of IAS 1 Presentation of Financial Statements to specify the requirements for classifying liabilities as current or non-current.

In particular, the amendments which will become effective 1 January 2023 clarify:

- What is meant by a right to defer settlement.
- That a right to defer must exist at the end of the reporting period.
- That classification is unaffected by the likelihood that an entity will exercise its deferral right.
- That only if an embedded derivative in a convertible liability is itself an equity instrument, would the terms of a liability not impact its classification.

This amendment is not expected to have a material impact on the ICAV.

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

1. General Information (continued)

(b) New standards, amendments and interpretations issued but not effective for the financial year beginning 1 January 2022 and not early adopted (continued)

Definition of Accounting Estimates - Amendments to IAS 8

In February 2021, the Board issued amendments to IAS 8, in which it introduces a new definition of 'accounting estimates'.

In particular, the amendments which will become effective 1 January 2023 clarify:

- the distinction between changes in accounting estimates and changes in accounting policies and the correction
 of errors.
- how entities use measurement techniques and inputs to develop accounting estimates.

This amendment is not expected to have a material impact on the ICAV.

Disclosure of Accounting Policies - Amendments to IAS 1 and IFRS Practice Statement 2

In February 2021, the Board issued amendments to IAS 1 and IFRS Practice Statement 2 Making Materiality Judgements (the PS), in which it provides guidance and examples to help entities apply materiality judgements to accounting policy disclosures.

In particular, the amendments which will become effective 1 January 2023 clarify:

- that replacing the requirement for entities to disclose their 'significant' accounting policies with a requirement to disclose their 'material' accounting policies.
- that adding guidance on how entities apply the concept of materiality in making decisions about accounting policy disclosure.

This amendment is not expected to have a material impact on the ICAV.

There are no standards, interpretations or amendments to existing standards that are not yet effective that would be expected to have a significant impact on the ICAV.

2. Statement of Accounting Policies

The significant accounting policies adopted by the ICAV are as follows:

2.1 Accounting Policies

(a) Financial Assets and Liabilities at Fair Value through Profit or Loss ("FVTPL")

(i) Classification

The ICAV classifies financial assets and financial liabilities into the following categories:

Financial assets at FVTPL:

Designated at FVTPL:

- Transferable Securities
 - Bonds
 - Equities
 - Investment funds
 - Exchange traded commodity

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

- 2. Statement of Accounting Policies (continued)
- 2.1 Accounting Policies (continued)
- (a) Financial Assets and Liabilities at Fair Value through Profit or Loss ("FVTPL") (continued)
- (i) Classification (continued)
 - Derivative Instruments
 - Futures contracts
 - Forward currency contracts
 - Interest rate swaps
 - Total return swaps
 - Option contracts
 - Rights and Warrants
 - Contracts for difference
 - Money Market Instruments
 - Commercial papers
 - Treasury bills

Financial assets at amortised cost:

• Loans and receivables: cash and cash equivalents and interest and other receivables.

Financial liabilities at FVTPL:

Designated at FVTPL:

- Derivative Instruments
 - Futures contracts
 - Forward currency contracts
 - Interest rate swaps
 - Total return swaps
 - Option contracts
 - Rights and Warrants
 - Contracts for difference

Financial liabilities at amortised cost:

• Other liabilities: accrued expenses.

The ICAV designates all equity securities, bonds, funds, treasury bills, exchange traded commodity, futures contracts, forward currency contracts, interest rate swaps, option contracts, contract for differences and rights and warrants at FVTPL on initial recognition because it manages these securities on a fair value basis in accordance with its documented investment strategy. Internal reporting and performance measurement of these securities are on a fair value basis.

A non-derivative financial asset with fixed or determinable payments may be classified as a loan and receivable unless it is quoted in an active market or is an asset for which the holder may not recover substantially all of its initial investment, other than because of credit deterioration.

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

- 2. Statement of Accounting Policies (continued)
- 2.1 Accounting Policies (continued)
- (a) Financial Assets and Liabilities at Fair Value through Profit or Loss ("FVTPL") (continued)

(ii) Initial Measurement

Financial assets and financial liabilities at FVTPL are initially recognised on the trade date, which is the date on which the ICAV becomes a party to the contractual provisions of the instrument. Other financial assets and financial liabilities are recognised on the date on which they are originated.

Purchases and sales of financial instruments are accounted for on the trade date. Realised gains and losses on disposals of financial instruments are calculated using the First In, First Out ("FIFO") method.

(iii) Recognition

Financial instruments categorised at FVTPL are measured initially at fair value, with transaction costs for such instruments being recognised directly in the Statement of Comprehensive Income. Financial assets and financial liabilities are recognised on the Statement of Financial Position when the ICAV becomes party to the contractual provisions of the instrument. A regular purchase of financial assets is recognised using trade date accounting. From this date any gains or losses arising from changes in fair value of the financial assets or financial liabilities are recorded.

(iv) Fair Value Measurement

'Fair value' is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the ICAV has access at that date. The fair value of a liability reflects its non-performance risk.

When available, the ICAV measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as active if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an on-going basis.

If there is no quoted price in an active market, then the ICAV uses valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction.

Investments in open-ended investment funds are valued at fair value at the latest available unaudited net asset value for the shares or units obtained from the relevant administrator. The changes in the daily net asset value of these shares are recognised as net gains/losses on investment activities in the Statement of Comprehensive Income.

The ICAV recognises transfers between levels of the fair value hierarchy as at the end of the reporting period during which the change has occurred.

(v) Amortised Cost Measurement

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition, minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between the initial amount recognised and the maturity amount, minus any reduction for impairment.

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

- 2. Statement of Accounting Policies (continued)
- 2.1 Accounting Policies (continued)
- (a) Financial Assets and Liabilities at Fair Value through Profit or Loss ("FVTPL") (continued)

(vi) Impairment

IFRS 9 replaces the 'incurred loss' model in IAS 39 with an 'expected credit loss' ("ECL") model. The new impairment model applies to financial assets measured at amortised cost and debt investments at FVOCI, but not to investments in equity instruments. Under IFRS 9, credit losses are recognised earlier than under IAS 39.

A financial asset or liability not classified at FVTPL is assessed at each reporting date to determine whether there is objective evidence of impairment. A financial asset or a group of financial assets is 'impaired' if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset(s) and that loss event(s) had an impact on the estimated future cash flows of that asset(s) that can be estimated reliably.

Objective evidence that financial assets are impaired includes significant financial difficulty of the borrower or issuer, default or delinquency by a borrower, restructuring of the amount due on terms that the ICAV would not otherwise consider, indications that a borrower or issuer will enter bankruptcy, or adverse changes in the payment status of the borrower.

An impairment loss in respect of a financial asset measured at amortised cost is calculated as the difference between its carrying amount and the present value of the estimated future cash flows discounted at the asset's original effective interest rate. Losses are recognised in profit or loss and reflected in an allowance account against receivables. Interest on the impaired asset continues to be recognised, if an event occurring after the impairment was recognised causes the amount of impairment loss to decrease, then the decrease in impairment loss is reversed through profit or loss.

(vii) Derecognition

The ICAV derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the ICAV neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset.

On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset that is derecognised) and the consideration received (including any new asset obtained less any new liability assumed) is recognised in profit or loss. Any interest in such transferred financial assets that is created or retained by the ICAV is recognised as a separate asset or liability.

The ICAV enters into transactions whereby it transfers assets recognised on its Statement of Financial Position, but retains either all or substantially all of the risks and rewards of the transferred assets. If all or substantially all of the risks and rewards of the transferred assets are retained, then transferred assets are not derecognised. Transfer of assets usually includes sale and repurchase agreements where all or substantially all of the risks and rewards are retained.

The ICAV derecognises a financial liability when its contractual obligations are discharged, cancelled, or expired.

(b) Transferable Securities

Investment Funds

The Sub-Funds invests in a diversified portfolio of collective investment schemes, whether open or closed ended, regulated or unregulated, including investment companies, investment trusts and/or investment limited partnerships, which the Investment Manager considers will give consistent returns to investors in line with the target returns of the Sub-Funds and which may include investment in other Sub-Funds of the ICAV ("Underlying Funds").

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

2. Statement of Accounting Policies (continued)

2.1 Accounting Policies (continued)

(c) Derivative Instruments

The Sub-Funds may enter into derivatives instruments for the purposes of efficient portfolio management.

Forward currency contracts

When entering into a forward foreign currency exchange contract, the Sub-Fund agrees to receive or deliver a fixed quantity of foreign currency for an agreed price upon an agreed future date. These contracts are valued daily at the forward rate and the Sub-Fund's equity therein, representing unrealised gains or losses on the contracts, is included in the Statement of Comprehensive Income. The unrealised gain/(loss) on open forward currency contracts is calculated by reference to the difference between the contracted rate and the rate to close out the contract. Realised and movement in unrealised gains or losses are included in the Statement of Comprehensive Income.

Futures contracts

Futures contracts are valued at the last traded price on the Sub-Fund's valuation date or if no price at the valuation date, the recent last traded price. Any gain or loss in fair value is recorded as unrealised gains or losses in the Statement of Comprehensive Income. Upon settlement a realised gain or loss is recognised in the Statement of Comprehensive Income.

Interest rate swaps

Interest rate swaps involve the exchange by the Sub-Fund with another party for their respective commitment to pay or receive interest on the notional amount of principal. The changes in contract values are recorded as unrealised gains or losses and the Sub-Funds recognise a realised gain or loss when the contract is closed. Movement of unrealised gains and losses on interest rate swaps are recognised in the Statement of Comprehensive Income.

Total return swaps

A total return swap is a derivative contract between two parties where they agree to exchange the investment return and income on an underlying asset or a basket of assets for the investment return and income on a different underlying asset or a basket of assets which is agreed between the parties. Realised and movement of unrealised gains and losses are recognized in the Statement of Comprehensive Income.

Rights and warrants

Rights and warrants are recorded as an asset or liability at their fair value on the Statement of Financial Position. Fair value as determined by the Administrator is the quoted market price as provided by electronic feed from one or more reputable price vendors. The change in fair value, if any, is recorded as an unrealised gain or loss in the Statement of Comprehensive Income. Realised gains or losses on warrants are shown in the Statement of Comprehensive Income. On the expiry of a warrant the amount previously recognised in the Statement of Financial Position is recognised in the Statement of Comprehensive Income as a realised gain or loss.

Option contracts

Option contracts give the right, but not the obligation, to buy or sell within a limited time, a specific financial instrument at a contracted price that may also be settled in cash, based on differentials between specified indices or prices. Options written create an obligation to buy or sell within a limited time, the specific financial instrument at a contracted price that may also be settled in cash, based on differentials between specified indices or prices.

There were open forward currency contracts, interest rate swaps, option contracts, futures contracts and rights and warrants at 31 December 2022, and these are disclosed on the relevant Schedule of Investments of each Sub-Fund.

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

- 2. Statement of Accounting Policies (continued)
- 2.1 Accounting Policies (continued)
- (c) Derivative Instruments (continued)

Contracts for differences

Contracts for differences are over-the-counter derivatives which take advantage of economic benefits which are not afforded through investing directly in certain securities markets. The Sub-Fund may purchase an equity contract for differences as a means of gaining exposure to the economic performance and cash flows of an equity security without the need for taking or making physical delivery of the security. A contract for differences is a financial instrument linked to an underlying share price. Consequently, no rights are acquired or obligations incurred relating to the underlying share and the Sub-Fund may buy or sell depending on the Investment Manager's view of a ICAV's share price. Contracts for differences are highly leveraged instruments and for a small deposit it is possible for the Sub-Fund to hold a position much greater than would be possible with a traditional investment. These are valued daily based on quoted market prices at the Statement of Financial Position dates. The fair value of contracts for differences is the difference between the contracted price and the volume weighted average price of the financial instrument multiplied by the number of shares specified within the contract.

(d) Offsetting Financial Instruments

Financial assets and liabilities are offset and the net amount reported on the Statement of Financial Position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the assets and settle the liability simultaneously.

(e) Redeemable Participating Shares

The issued redeemable participating Shares ("Shares") is at all times equal to the net asset value of the ICAV. The Shares are redeemable at the shareholders option and are classified as financial liabilities. The Shares can be put back to the ICAV at any time for cash equal to a proportionate share of the ICAV's net asset value. The Shares are carried at the redemption amount that is payable at the Statement of Financial Position date if the holder exercises the right to put the share back to the ICAV. Each Sub-Fund's Net Asset Value ("NAV") per Share is calculated by dividing the NAV of that Sub-Fund, being the value of its assets less its liabilities by the numbers of shares of that Sub-Fund then in issue.

(f) Use of Judgements and Estimates

The preparation of Financial Statements in conformity with IFRS as adopted by the EU requires management to make judgements, estimates and assumptions that affect reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as at the date of the Financial Statements. Estimates also affect the reported amounts of income and expenses for the reporting period in the Statement of Comprehensive Income. Actual results could differ from those estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the year in which the estimates are revised and in any future accounting periods affected. Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment within the next financial year, as well as critical judgments in applying accounting policies that have the most significant effect on the amounts recognised in the Financial Statements are included in Note 13 and 14.

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

2. Statement of Accounting Policies (continued)

2.1 Accounting Policies (continued)

(g) Foreign Exchange

Items included in the ICAV's Financial Statements are measured using the currency of the primary economic environment in which it operates (the "functional currency"). The functional currency for this ICAV is Euro ("EUR" or " \in ") and each Sub-Fund's base currency is disclosed below:

Sub-Fund	Base currency
Fidelity Euro Bond FAM Fund	EUR
Fidelity Euro Short Term Bond FAM Fund	EUR
Fidelity Global Dividend FAM Fund	USD

(g) Foreign Exchange (continued)

Sub-Fund	Base currency
Global Disruptive Opportunities FAM Fund	EUR
Medtech FAM Fund	USD
Sustainable Future Connectivity FAM Fund	USD
Changing Lifestyles FAM Fund	USD
Morgan Stanley US Advantage FAM Fund	USD

The ICAV has adopted the functional currency of each Sub-Fund as the presentation currency for these Financial Statements. Assets and liabilities expressed in currencies other than the functional currency are converted into the functional currency using the exchange rates prevailing as at the Statement of Financial Position date. Transactions in foreign currencies are translated into the Sub-Fund's functional currency at the transaction dates. Gains and losses on foreign exchange transactions are recognised in the Statement of Comprehensive Income in determining the results for the financial year.

(h) Income

Interest income is recognised in the Statement of Comprehensive Income at the effective interest rate method.

Dividends are recognised in the Statement of Comprehensive Income on the dates on which the relevant securities are listed as "ex-dividend". Dividend income is shown gross of any non-recoverable withholding taxes, which is disclosed separately in the Statement of Comprehensive Income, and net of any tax credits.

(i) Expenses

All expenses are recognised in the Statement of Comprehensive Income on an accruals basis.

(j) Cash and Cash Equivalents

Cash comprises cash at banks and bank overdrafts. Cash equivalents are short term (up to three months), highly liquid investments, that are readily convertible to known amounts of cash and which are subject to insignificant changes in value. For the financial year ended 31 December 2022, cash equivalents held by the ICAV includes, commercial papers and treasury bills. They are held for the purpose of meeting short-term cash commitments rather than for investments or other purposes. The carrying amount of these assets is approximately equal to their fair value.

(k) Payable for Securities Purchased/Receivable for Securities Sold

Payable for securities purchased and receivable for securities sold include trades pending settlement.

(l) Redemptions Payable

Redemptions are recognized as liabilities when the amount requested by the unitholder in the irrevocable redemption notice becomes fixed.

(m) Subscriptions Receivable

Subscription receivable includes the amounts still to be collected from investor before the ICAV will issue the shares.

(n) Due from/to Brokers

Due from/to brokers represent margin accounts and cash collateral for borrowed securities. Margin accounts represent cash deposits with brokers, transferred as collateral against open derivative contracts.

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

2. Statement of Accounting Policies (continued)

2.1 Accounting Policies (continued)

(o) Organisational Costs

Costs incurred in organising the ICAV were amortised over the first five accounting periods of the ICAV as disclosed in the prospectus. This is not in accordance with IFRS but Management assessed the costs to be immaterial to the ICAV and refer to Note 4 for details.

(p) Management fee rebate

The ICAV has rebate agreements with certain investment managers of the Underlying Funds. These rebates are recorded on an accruals basis in the Statement of Comprehensive income.

(q) Securities lending income

Securities lending income is earned from lending securities owned by the Sub-Fund to third party borrowers. Securities lending income is recognised in the Statement of Comprehensive Income on an accruals basis.

(r) Anti-Dilution Levy

The Directors reserve the right to impose "an anti-dilution levy" representing a provision for market spreads (the difference between the prices at which assets are valued and/or bought or sold), duties and charges and other dealing costs relating to the acquisition or disposal of assets and to preserve the value of the underlying assets of a Sub-Fund, in the event of receipt for processing of net subscriptions or net redemptions exceeding such percentage of the NAV of the Sub-Funds as determined by the Directors from time to time (including subscriptions and/or redemptions which would be effected as a result of requests for conversion from one Class into another Class). Any such provision will be deducted from the subscription proceeds in the case of net subscription requests exceeding the threshold of a Sub-Fund and deducted from the redemption proceeds in the case of net redemption requests exceeding the threshold of a Sub-Fund including the price of shares issued or redeemed as a result of requests for conversion. Any such sum will be paid into the account of the relevant Sub-Fund.

The ICAV started applying the policy on 1 January 2021. The table below shows the Anti-Dilution Levy amounts per Sub-Fund included in the Other income balance in the Statement of Comprehensive Income for the year ended 31 December 2022 and 2021.

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

7. Share Capital

The actual value of paid up share capital of the ICAV shall at all times equal to the NAV of the ICAV after deduction of liabilities. The share capital of the ICAV shall be divided into share capital of 5,000,000,000,000,000 Shares of no par value and 2 Subscriber Shares of €1.00 each and shall at all times be equal to the value for the time being of the issued share capital of the ICAV.

Each of the Shares (with the exception of the Subscriber Shares) entitles the Shareholder to participate equally on a pro rata basis in the dividends and net assets of the relevant Sub-Fund attributable to the relevant class in respect of which they are issued save in the case of dividends declared prior to becoming a Shareholder.

The proceeds from the issue of Shares shall be applied in the books of the ICAV to the relevant Sub-Fund and shall be used on behalf of such Sub-Fund for the acquisition of assets in which a Fund may invest. The records and accounts of each Sub-Fund shall be maintained separately.

The Directors reserve the right to re-designate any class of Shares from time to time, provided that Shareholders in that class shall first have been notified by the ICAV that the Shares will be re-designated and shall have been given the opportunity to have their Shares redeemed by the ICAV, except that this requirement shall not apply where the Directors re-designate Shares in issue in order to facilitate the creation of an additional class.

Each of the Shares entitles the holder to attend and vote at meetings of the ICAV and of the relevant Sub-Fund represented by those Shares. No class of Shares confers on the holder there of any preferential or pre-emptive rights or any rights to participate in the profits and dividends of any other class of Shares or any voting rights in relation to matters relating solely to any other class of Shares.

Any resolution to alter the class rights of the Shares requires the approval of three quarters of the holders of the Shares of the relevant class represented or present and voting at a general meeting duly convened in accordance with the Instrument.

The Instrument of the ICAV empowers the Directors to issue fractional shares in the ICAV. Fractional shares will be issued where any part of the subscription monies for Shares represents less than the subscription price for one Share, provided however, that fractions shall not be less than 0.01 of a Share and shall not carry any voting rights at general meetings of the ICAV or a Sub-Fund and the NAV of any fractional share shall be the NAV per Share adjusted in proportion to the fraction.

The movement in the number of Shares is as follows for the financial year ended 31 December 2022:

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

9. Directors' Fees

The Directors are entitled to a fee by way of remuneration for their services at a rate to be determined from time to time by the Directors. The aggregate amount of Directors' remuneration in any one year shall not exceed €30,000 (excluding Value Added Tax, ("VAT"), if any).

All Directors will be entitled to reimbursement by the ICAV of expenses properly incurred in connection with the business of the ICAV or the discharge of their duties. Fees related to the ICAV are charged to the trading Sub-Funds. Mr. Jim Firn is the only Director of the ICAV in receipt of a director's fee. All other Directors of the ICAV have each waived their entitlement to receive a director's fee.

The directors' fees charged for the year amounted to $\[\in \] 18,038 \]$ (31 December 2021: $\[\in \] 24,538 \]$). The directors fees payable as at 31 December 2022 was $\[\in \] 32,029 \]$ (31 December 2021: $\[\in \] 46,749 \]$).

10. Administration Fees and Depositary Fees

The Manager and the Administrator entered into a new administration agreement which is applicable for a three year period. The annual fee, payable out of the assets of the relevant Sub-Fund, is at a rate of 0.05% (plus VAT, if any) and is a combined fee which includes both the Administrator and the fee of the Depositary. The fee is presented on the Statement of Comprehensive Income as Administration fees and Depositary fees.

The Administrator is also entitled to be reimbursed for all agreed registration and transaction fees and out of pocket expenses (plus VAT thereon, if any) properly incurred by it in the performance of its duties and responsibilities under the Administration Agreement.

11. Auditors Remuneration

The remuneration to the statutory audit firm in respect of the services rendered to the ICAV for the financial year is as follows:

	2022	2021
	EUR	EUR
Audit fee*	249,651	288,182

^{*} Audit fee amount shown is excluding VAT of 23%. There were no other fees paid to the statutory audit firm for tax or other assurance or non-audit work during the year.

12. Related and Connected Persons Transactions

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions.

The Directors of the ICAV are considered related parties. Details of Directors' fees charged during the year are disclosed in Note 9.

Mr. Fabio Melisso and Mr. Jim Firn (Independent director) are directors of the Manager and Mr. Ciaran Brady and Lorenzo Di Pietrantonio are employees of the Manager and will be considered to be interested in any agreement entered into by the ICAV with the Manager.

Sub-Funds of Core Series and FAM Evolution ICAV, which are also managed by the Manager, have made investments in the ICAV during the year. There were no other agreements entered into by the ICAV with either Core Series or FAM Evolution ICAV during the year. BNP Paribas Securities Services is also the securities lending agent.

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

12. Related and Connected Persons Transactions (continued)

Management Fee

The Manager is entitled to receive out of the assets of the ICAV a management fee in respect of each class, accrued daily and payable monthly in arrears at such annual percentage rate of the NAV of each class as set out in the relevant Sub-Fund supplement. Any out of pocket expenses incurred by the Manager in carrying out its role on behalf of the ICAV and its Sub-Funds shall be for its own account. These disclosed fees are the maximum charges capped as per the prospectus and actual fees charged may be lower. As per the prospectus the management fee rate can change during the year.

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

12. Related and Connected Persons Transactions (continued)

Management Fee (continued)

Receivables from the Manager

Fineco Asset Management Designated Activity Company, in its role as the Manager of the ICAV, have decided to cover certain expenses for Morgan Stanley US Advantage FAM Fund USD17,061.

There are no other receivables from the Manager for the year ended 31 December 2022 and 31 December 2021.

13. Financial Instruments and Associated risks

Each Sub-Fund's investment activities expose them to the various types of risk which are associated with the financial instruments and markets in which it invests. The following information is not intended to be a comprehensive summary of all risks and investors should refer to the prospectus for a more detailed discussion of the risks inherent in investing in each Sub-Fund. The Sub-Funds' have exposure to the following risks from financial instruments:

- a) Market risk;
- b) Liquidity risk;
- c) Credit risk;
- d) Operational risk.

Risk Management framework

The Directors review quarterly risk and investment performance reports and presentations from the Manager, or where applicable the Manager's delegate Investment Managers (together "the Manager" only for the purpose of Note 13), covering the Sub-Funds' performance and risk profile during the financial year.

The Manager is responsible for ensuring that each Sub-Fund is managed within the terms of their investment guidelines and limits set out in the prospectus. The Directors review the Manager's reporting on the investment performance, product risk monitoring and oversight activities and the monitoring and oversight of regulatory and operational risk for the Sub-Funds.

The Manager has been given discretionary authority to manage the assets in line with the investment objectives of each Sub-Fund. Compliance with the target asset allocations and the composition of the portfolio are monitored by the Directors on a quarterly basis. In instances where the portfolio has diverged from target asset allocations, the Manager is obliged to take actions to rebalance the portfolio in line with the established targets, within prescribed time limits.

(a) Market risk

Market risk arises mainly from uncertainty about future values of financial instruments influenced by price, interest rate and currency movements. It represents the potential loss each Sub-Fund may suffer through holding market positions in the face of market movements. The Manager's strategy for the management of market risk is driven by the Sub-Funds' investment objective as set out in Note 1. The ICAV's market risk is managed on a daily basis by the Manager. The Manager moderates this risk through a careful selection of securities and other financial instruments within specified limits. Details of the nature of the ICAV's investment portfolio at the Statement of Financial Position date are disclosed in the Schedule of Investments.

Value at Risk

The Manager uses three approaches to measure the Sub-Funds' global risk exposures. These are the commitment approach, Absolute Value at Risk ("VaR") and Relative VaR. These approaches are described in the prospectus and the approach each Sub-Fund uses is outlined in the table below.

13. Financial Instruments and Associated risks (continued)

(a) Market risk (continued)

Value at Risk (continued)

sing the absolute VaR, the Manager estimates the potential loss in the Sub-Fund's portfolio over a set period at a certain confidence level, and is based on statistical analysis of historical price trends and volatilities. The VaR of the Sub-Funds shall be calculated daily and shall not exceed 13-20% per cent of the NAV of the Sub Fund, based on a 1 month holding period and a "one-tailed" 99 per cent confidence interval using a historical observation period of at least 1 year.

Using the relative VaR, the Manager estimates the potential loss in the Sub-Fund's portfolio over a set period at a certain confidence level, and based on statistical analysis of historical price trends and volatilities. The VaR of the Sub-Fund's portfolio is measured relative to the benchmark index which the Manager consider a comparable benchmark to the Sub-Fund's portfolio. In compliance with the UCITS Regulations, the relative VaR of the Sub Fund's portfolio shall not exceed twice the VaR of the index, as determined daily using a one-tailed confidence interval of 99%, a holding period of one month and a historical observation period of at least 1 year.

The 1 day VaR as of 31 December 2022 and 31 December 2021 based on a 99% confidence level is outlined in the table below:

Absolute VaR	31 December 2022	31 December 2021
Amundi Strategic Bond FAM Fund	1.59%	0.45%
Euro Short Duration Bond FAM Fund	0.09%	0.10%
Fineco AM European Corporate Bond Fund	0.80%	0.71%

(a) Market risk (continued)

Value at Risk (continued)

Some limitations of VaR analysis are:

- The models are based on historical data and cannot take account of the fact that future market price movements, correlations between markets and levels of market liquidity in conditions of market stress may bear no relation to historical patterns. As a consequence, VaR can be highly variable and a single date point analysis can be of limited value. VaR can fluctuate significantly over time;
- The composition of the ICAV can change significantly over a short period of time and, as such, the ICAV's risk profile including VaR may also change materially over a short time frame;
- The market price risk information is a relative estimate of risk rather than a precise and accurate number;
- The market price information represents a hypothetical outcome and is not intended to be predictive (in the case of probability-based methods, such as VaR, profits and losses are almost certain to exceed the reported amount with a frequency depending on the confidence interval chosen);
- FX hedging for the benefit of a particular class are not included;
- Future market conditions could vary significantly from those experienced in the past.

(i) Price risk

Price risk is the risk that the value of an instrument will fluctuate as a result of changes in market prices, whether caused by factors specific to an individual investment, its issuer or all factors affecting all instruments traded in the market.

Any increase or decrease in the market price of investments would alter the ICAV's net asset value to the extent that it was invested at the time. The ICAV's investment portfolio complies with the investment restrictions as disclosed in its prospectus.

Exposure to price risk

The tables below summarises the overall market exposure of financial assets and liabilities at FVTPL as at 31 December 2022 and 31 December 2021:

Sensitivity

Sensitivity analysis for the Sub-Funds where the Manager do not use VAR approach is disclosed below.

Any increase or decrease in the market price of investments would alter the Sub-Fund's net asset value to the extent that it was invested at the time. The Sub-Fund's investment portfolio complies with the investment restrictions as disclosed in its prospectus. As at 31 December 2022 and 31 December 2021, if the fair value of investments to which the Sub-Funds were exposed had changed by 5% with all other variables held constant, this would have resulted in a change of net assets attributable to the shareholders by the amounts detailed below:

Sub-Fund		2022	2021
Fidelity Euro Bond FAM Fund	EUR	15,786,881	19,480,111
Fidelity Euro Short Term Bond FAM Fund	EUR	20,078,798	28,103,196

Management of price risk

The Manager chooses assets for investment and divestment by considering the potential contribution to portfolio volatility from the price risk of the asset considered in the transaction and in reference to the ICAV risk framework and the ICAV's prospectus, supplement and marketing materials. The Manager monitors that the exposures are within any tolerances set out in the agreed ICAV risk framework.

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

- 13. Financial Instruments and Associated risks (continued)
- (a) Market risk (continued)

(ii) Interest rate risk

The ICAV's financial assets include direct interest bearing instruments. As a result the ICAV is exposed to fair value interest rate risk due to fluctuations in the prevailing levels of market interest rates. The ICAV's interest rate risk is managed on a daily basis by the Manager.

Cash and cash equivalents are not considered to be significantly exposed to fair value interest rate risk due to the short term nature of the instruments. Cash earns interest at a variable interest rate.

The interest bearing financial instruments significantly exposed to fair value interest rate risk are the bond investments. Consequently, movements in interest rates would have an inverse effect on the movement of the net asset value of the Sub-Funds.

The Manager chooses assets for investment and divestment by considering the potential contribution to portfolio volatility from the interest rate risk of the asset considered in the transaction and in reference to the ICAV risk framework and the ICAV's prospectus, supplement and marketing materials. The Risk Management department monitors that the exposures are within any tolerances set out in the agreed ICAV risk framework.

The following Sub-Funds held interest bearing instruments. Sensitivity is not presented here for the following Sub-Funds as VaR is presented for this Sub-Fund on Page 927 to 931.

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

- 13. Financial Instruments and Associated risks (continued)
- (a) Market risk (continued)
- (iii) Currency risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

Each Sub-Fund may invest in securities denominated in currencies other than their functional currency. Consequently, each Sub-Fund is exposed to risks that the exchange rate of their functional currency relative to other currencies may change in a manner which has an adverse effect on the value of the portion of each Sub-Fund's assets which are denominated in currencies other than their own currency.

The currency risk is in relation to the notional exposure on the forward currency contracts held by the Sub-Funds. These are detailed on the Schedule of Investments.

The Manager chooses assets for investment and divestment by considering the potential contribution to portfolio volatility from the currency risk of the asset considered in the transaction and in reference to the fund risk framework and the fund's prospectus, supplement and marketing materials. The Risk Management department monitors that the exposures are within any tolerances set out in the agreed fund risk framework.

Sensitivity is not presented for the following Sub-Funds as VaR is presented for this Sub-Fund in the notes to the Financial Statements:

- Amundi Emerging Markets Bond FAM Fund
- Amundi Strategic Bond FAM Fund
- Amundi European Equity Value FAM Fund
- Emerging Markets Bond Hard Currency FAM Fund

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

13. Financial Instruments and Associated risks (continued)

(b) Liquidity risk

Liquidity risk is the risk that the Sub-Funds' may not be able to generate sufficient cash resources to settle their obligations in full as they fall due or can do so only on terms that are materially disadvantageous.

Each Sub-Fund's principal liquidity risks arise from the ability of investors to effect redemption requests and the liquidity of the underlying investments each Fund has invested in.

Each Sub-Fund's Unitholders may redeem their units on the close of any daily dealing deadline for cash equal to a proportionate share of each Sub-Fund's NAV, excluding any duties and charges where applicable. Each Sub-Fund is therefore potentially exposed to the liquidity risk of meeting the unitholders' redemptions and may need to sell assets at prevailing market prices to meet liquidity demands.

The Manager chooses assets for investment and divestment by considering the potential contribution to portfolio liquidity from the liquidity risk of the asset considered in the transaction and in reference to the fund risk framework and the fund's prospectus, supplement and marketing materials. The Risk Management department monitors that the exposures are within any tolerances set out in the agreed fund risk framework. The ICAV's overall liquidity risks are monitored on a quarterly basis by the Board of Directors.

All of the Sub-Funds assets and liabilities as of 31 December 2022 can be received or paid within or less than 1 month. While the accrued expenses can be paid within or less than 1 mmonth not all are and some can be paid at a later date due to frequency or delay of invoicing. This delay can at times exceed 1 year.

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

13. Financial Instruments and Associated risks (continued)

(c) Credit risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the ICAV. The carrying amount of financial assets as per the Statement of Financial Position on pages 77 to 106 best represents the maximum credit risk exposure as at its date. Credit risk on transactions with brokers relates to transactions awaiting settlement. Risk relating to unsettled transactions is considered small due to the short settlement period involved and the high credit quality of the broker used. Substantially all of the assets of the ICAV are held by the Depositary. Bankruptcy or insolvency of the Depositary may cause the ICAV's rights with respect to securities or cash held by the Depositary to be delayed or limited. The ICAV manages its risk by monitoring the credit quality and financial position of the Depositary the ICAV uses. The credit rating for the Depositary as at 31 December 2022 was A+ (31 December 2021: A+) published by Standard & Poor's.

The cash and cash equivalents, balances due from brokers and balances due to brokers are held with bank and financial institution counterparties, which are rated BBB+ to AA (31 December 2021: BBB+ to AA), based on Standard & Poor's ratings. The derivatives are entered into with bank and financial institution counterparties, which are rated BBB+ to AA (31 December 2021: BB+ to AA), based on Standard & Poor's ratings.

The Manager manages issuer risk through building diversified portfolios to limit exposure to any one issuer in accordance with the ICAV's investment objectives. The ICAV employs well known counterparties and ensures that concentration of investment in any one stock or counterparty is monitored against set limits.

Additionally, if required, the Manager will limit ownership of debt instruments to those instruments carrying a credit rating equal to or in excess of that provided for in the ICAV's investment objectives. The Manager monitors compliance with these restrictions on a daily basis.

All transactions in listed securities are settled/paid upon delivery using approved brokers. The risk of default is considered minimal as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker. The credit ratings of all derivative counterparties are monitored regularly. The risk managers review counterparty credit ratings and approve the use of such counterparties.

Offsetting and amounts subject to master netting arrangements

The ICAV has not offset any financial assets and financial liabilities in the statement of financial position. The disclosures set out in the tables below include financial assets and financial liabilities that are subject to an enforceable master netting or derivative clearing agreement that covers derivatives.

The International Swaps and Derivatives Association ("ISDA") and similar master netting agreements do not meet the criteria for offsetting in the statement of financial position. This is because the ICAV does not have any currently legally enforceable right to offset recognised amounts, because the right to offset is enforceable only on the occurrence of future events such as a default of the ICAV or the counterparties or other credit events.

The collateral provided in respect of the above transactions is subject to the standard industry terms of ISDA's Credit Support Annex. This means that securities received/given as collateral can be pledged or sold during the term of the transaction but have to be returned on maturity of the transaction. The terms also give each counterparty the right to terminate the related transactions on the counterparty's failure to post collateral.

The following tables disclose the derivative financial assets and liabilities subject to enforceable netting and similar arrangements, presented on an aggregate basis across multiple counterparties. Counterparties are analysed on an individual basis, offsetting assets and liabilities with individual counterparties where appropriate to do so while incorporating the collateral held by or posted by the Sub-Funds with respect to the open positions. The following tables present the total net exposure to counterparties with respect to derivative assets and liabilities on a Sub-Fund by Sub-Fund basis.

(c) Credit risk (continued)

Each Sub-Fund's engagement in securities lending activities expose the Sub-Fund to counterparty credit risk. The maximum exposure of each Fund is equal to the value of the securities loaned.

All securities lending transactions entered into by each Sub-Fund are subject to a written legal agreement between each Sub-Fund and the Manager and separately between the approved borrowing counterparty. Collateral received in exchange for securities lent is transferred under a title transfer arrangement and is delivered to and held in an account with a tri-party collateral manager in the name of the Trustee on behalf of each Sub-Fund. Collateral received is segregated from the assets belonging to each Sub-Fund's Trustee or the securities lending agent.

The collateral is registered and held in the name of Trustee on behalf of each Sub-Fund with the Depositary depending on the type of collateral the counterparty has to give in order to cover the required value of exposure. The collateral provided by these counterparties consists of shares admitted to dealing on a regulated market.

The Sub-Funds outlined below engaged in securities lending activities during the financial year. The value of securities on loan and collateral held at the financial year end are shown below:

Sub-Fund	Currency	Value of securities on loan as at 31/12/2022	Value of Collateral received as at 31/12/2022
Fidelity Euro Bond FAM Fund	EUR	70,888,818	74,422,157
Fidelity Euro Short Term Bond FAM Fund	EUR	26,756,940	28,669,826
Fidelity World FAM Fund	EUR	8,289,669	8,582,192
M&G Optimal Income FAM Fund	EUR	117,864,650	120,667,476

Finceo AM Euro Corp Bonds Fund	EUR	2,709,910	3,222,245

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

13. Financial Instruments and Associated risks (continued)

(c) Credit risk (continued)

Sub-Fund	Currency	Value of securities on loan as at 31/12/2022	Value of Collateral received as at 31/12/2022
Fineco AM Global Equities Income Fund	EUR	7,548,737	7,947,384
Euro High Yield Bond FAM Fund	EUR	11,541,632	11,848,055
Invesco Global Total Return Bond FAM Fund	EUR	51,531,958	54,252,677
Nordea Stable Performance FAM Fund	EUR	9,494,511	12,026,847
Emerging Markets Debt FAM Fund	EUR	2 856 769.61	3 222 245.48
Jupiter Flexible Income FAM Fund	EUR	2 873 651.88	3 224 723.18
European High Yield Bond FAM Fund	EUR	3 305 274.23	3 574 498.72
Vontobel Emerging Markets Debt FAM Fund	EUR	3 682 933.88	5 290 387.77

Please note that the following sub-funds are also set up in our lending programme but they did not record any loan balance as at 31 December 2022:

Sub-Fund	
Euro Corporate Bond FAM Fund	FAM Global Premium Equities Fund
Euro Corporate Fixed Income FAM Fund	Fidelity Global Dividend FAM Fund
Euro Credit Bond FAM Fund	M&G North American Value FAM Fund
Euro Short Duration Bond FAM Fund	US Equity Value FAM Fund
European Corporate Bond FAM Fund	

To mitigate this risk, each Sub-Fund receives either cash or securities as collateral equal to a certain percentage in excess of the fair value of the securities loaned. The Investment Manager monitors the fair value of the securities loaned and additional collateral is obtained, if necessary.

As at 31 December 2022 all collateral received consists of securities admitted to or dealt on a regulated market.

Each Sub-Fund also benefits from a borrower default indemnity provided by the Manager. The indemnity allows for full replacement of securities lent. The Manager bears the cost of indemnification against borrower default.

(d) Operational risk

Operational risk is the risk of direct or indirect loss arising from a wide variety of causes associated with the processes, technology and infrastructure supporting the Sub-Fund activities with financial instruments, either internally within the Sub-Fund or externally at the Sub-Fund's service providers, and from external factors other than credit, market and liquidity risks such as those arising from legal and regulatory requirements and generally accepted standards of investment management behaviour.

The Sub-Funds' objectives are to manage operational risk so as to balance the limiting of financial losses and damage to its reputation with achieving its investment objective of generating returns to investors.

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

- 13. Financial Instruments and Associated risks (continued)
- (c) Credit risk (continued)

Operational risk (continued)

The primary responsibility for the development and implementation of controls over operational risk rests with the Directors. This responsibility is supported by the development of overall standards for the management of operational risk, which encompasses the controls and processes at the service providers and the establishment of service levels with the service providers, in the following areas:

- Documentation of controls and procedures;
- Requirements for:
 - Appropriate segregation of duties between various functions, roles and responsibilities;
 - Reconciliation and monitoring of transactions; and
 - Periodic assessment of operational risk faced.
- The adequacy of controls and procedures to address the risks identified;
- Compliance with regulatory and other legal requirements;
- Development of contingency plans;
- Training and professional development;
- Ethical and business standards; and
- Risk mitigation, including insurance if this is effective.

The Directors' assessment of the adequacy of the controls and processes in place at the service providers with respect to operational risk is carried out via regular discussions with the service providers and a review of the service providers' Service Organisation Controls reports on internal controls, if any are available.

14. Fair Value of Financial Instruments

Each Sub-Fund classifies financial instruments measured at fair value using a fair value hierarchy. The fair value hierarchy has the following categories:

- Level 1: The unadjusted quoted price in an active market for identical assets or liabilities that the entity can access at the measurement date;
- Level 2: Inputs other than quoted prices included within Level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly. This category includes instruments valued using: quoted prices in active markets for similar instruments; quoted prices for similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data; and
- Level 3: Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability. This category includes all instruments where the valuation techniques used include inputs not based on market data and these inputs could have a significant impact on the instrument's valuation. This category also includes instruments that are valued based on quoted prices for similar instruments where significant entity determined adjustments or assumptions are required to reflect differences between the instruments and instruments for which there is no active market.

For this purpose, the significance of an input is assessed against the fair value measurement in its entirety.

The determination of what constitutes 'observable' requires significant judgement. The Directors consider observable data to be that market data that is readily available, regularly distributed or updated, reliable, verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

14. Fair Value of Financial Instruments (continued)

15. Exchange Rates (continued)

The following exchange rates against the CNH were used at the financial year end to translate foreign currency denominated assets and liabilities:

	31 December 2022	31 December 2021
CHF	0.13349	0.14374
EUR	0.13537	0.13867
HKD	1.12812	1.22652
USD	0.14471	0.15727

16. Efficient Portfolio Management

The ICAV may employ investment techniques and instruments for efficient portfolio management of the assets of the ICAV and, in particular, the ICAV may, for the purpose of hedging (whether against currency, exchange or interest rate risks or otherwise), or for direct investment purposes, purchase or sell put options and call options, spot contracts, forward contracts, futures contracts and other derivative instruments and may also enter into sale and repurchase agreement.

Subject to the conditions and within the limits otherwise stated in the investment objective and policies of the ICAV, the Manager may employ investment techniques and instruments such as futures, options, forward foreign currency contracts and other derivatives for investment purposes, hedging or efficient portfolio management.

17. Cross Liability

Liabilities incurred by a Sub-Fund of the ICAV may be discharged solely out of the assets of that Sub-Fund such that creditors of Sub-Funds will not have recourse to the assets of the other Sub-Funds of the ICAV to settle any liabilities incurred.

18. Taxation

Under current law and practice, the ICAV qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. It is not chargeable to Irish tax on its income or capital gains. However, the ICAV is obliged to apply a withholding tax on any distribution payments to Irish residents or ordinarily resident shareholders on any encashment, redemption or transfer of units by an Irish resident or ordinarily resident shareholder, unless the shareholder is exempted under Section 739D of the Taxes Consolidation Act, 1997, as amended. Shareholders who complete a declaration confirming that they are not Irish residents are not liable to Irish tax on the income or gains arising from their investment in the ICAV and no withholding tax will be deducted on any payments made to them. Where the ICAV has a concession from the Revenue Commissioners it may be possible to obtain an exemption from the requirement to have a valid non-resident declaration in place.

If the ICAV fails to deduct the tax or fails to collect the appropriate signed declaration from any non-resident or exempted shareholders, the ICAV will remain liable for the tax. In these circumstances, the ICAV would seek to recover the tax paid from the relevant shareholder.

Capital gains and interest received by the ICAV may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by the ICAV or its shareholders.

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

19. Events during the financial year

^{*} These Financial Statements exclude the Funds marked above which are presented in a separate sets of Financial Statements, refer to Note 1.

Effective 9 February 2022, the Manager appointed M&G Investment Management Limited to act as Investment Manager to Emerging Markets Debt FAM Fund, replacing Goldman Sachs Asset Management International.

Covid 19

The impact of the coronavirus outbreak was profound across all aspects of society. In developed economies, it is clear that the worst of the impact is now over. However, there is an expectation that seasonal peaks and new variants could give rise to renewed travel restrictions, enhanced health screenings at ports of entry and elsewhere, disruption of and delays in healthcare service preparation and delivery and supply chain disruptions which will create ongoing challenges. Widescale and comprehensive vaccination programmes have been put in place in many countries which have had a positive effect. Nevertheless, the impact of COVID-19 continues to adversely affect the economies of many nations across the globe and this in turn may continue to impact investments held by each Fund.

Russia/Ukraine Conflict and sanctions

The outbreak of war in Ukraine and the related sanctions targeted against the Russian Federation has impacted the European and Global economies. The direct exposure to Ukraine, Russia or Belarus was and continues to be not material to the overall ICAV. However, the impact on the general economic situation may require in the future revisions of certain assumptions and estimates. The Directors are carefully monitoring the situation as well as its potential impacts on the ICAV. The ICAV is fully capable of continuing its usual operations.

There were no other significant events during the financial year.

20. Events post financial year end

Effective 13 February 2023, the Manager appointed M&G Investment Management Limited to act as Investment Manager to the Jupiter Flexible Income FAM Fund, replacing Jupiter Asset Management Limited, and the Sub-Fund was also re-named as Flexible Income FAM Fund on this date.

Effective 1 January 2023, the Manager appointed Allianz Global Investors GmbH as investment advisor of Fineco AM Euro Credit Bond Fund, replacing HSBC Global Asset Management (France).

There are no other events after the period end that had a material effect on the Financial Statements.

Notes to the Financial Statements for the financial year ended 31 December 2022 (continued)

21. Soft commission arrangements

The Manager or the relevant Investment Managers of the Sub-Funds may effect transactions that will from time to time provide or procure the Manager or the Investment Managers goods and services and other benefits such as research and advisory services provided that the nature of which is such that their provision shall assist in the provision of investment services to the ICAV as a whole and which no direct payment is made but instead the Manager undertakes to place business with that party. In any event it is agreed that the execution of transactions will be on the basis of best execution standards and brokerage rates will not be in excess of customary institutional rates. Each Investment Manager shall also comply with additional regulations governing soft commission practices including where relevant requirements under MiFID II, which governs the extent to which commissions, inducements, research reports or other non-minor monetary benefits may be paid or received from brokers.

For the year ended 31 December 2022 and 2021, the following Investment Managers has entered into soft commission arrangements for research purposes as permitted by applicable regulation on behalf of the Sub-Funds with broker counterparties.

Investment Manager	Sub-Fund
Invesco Advisers, Inc	US Equity Value FAM Fund
Infusive Asset Management Inc.	Infusive Consumer Alpha Global Leaders FAM Fund

The total aggregate amount of soft commissions is USD237,959 for 31 December 2022.

There were no other soft commission arrangements for the financial year ended 31 December 2022.

22. Reconciliation to Published NAV

For certain Sub-Funds, there are differences between published NAV's, which are computed and published as per the time (the 'Valuation Point') outlined in the prospectus and supplements, management fees and the NAV's in the Financial Statements, which is calculated at close of business at 31 December 2022 for all Sub-Funds. The Financial Statements NAV's reflect these adjustments to the published NAV's as outlined below.

The Financial Statements have been adjusted for the followings Sub-Funds:

(i) Reconciliation of Net Asset Value

The following tables show the reconciliation between the NAV as per Financial Statements, Published NAV, and impact in basis points ("BPS"):

31 December 2022

In accordance with the UCITS Regulations the annual report documents material changes that have occurred in the disposition of the assets of the Sub-Funds during the year. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of purchases for the year or aggregate disposals greater than 1 per cent of the total value of sales. If there were fewer than 20 purchases that met the material changes definition, the Sub-Funds shall disclose those purchases and such number of the next largest purchases so that at least 20 purchases are disclosed. If there are fewer than 20 sales that met the material changes definition, the Sub-Funds shall disclose those sales and such number of the next largest sales so that at least 20 sales are disclosed.

In accordance with the UCITS Regulations the annual report documents material changes that have occurred in the disposition of the assets of the Sub-Funds during the year. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of purchases for the year or aggregate disposals greater than 1 per cent of the total value of sales. If there were fewer than 20 purchases that met the material changes definition, the Sub-Funds shall disclose those purchases and such number of the next largest purchases so that at least 20 purchases are disclosed. If there are fewer than 20 sales that met the material changes definition, the Sub-Funds shall disclose those sales and such number of the next largest sales so that at least 20 sales are disclosed.

In accordance with the UCITS Regulations the annual report documents material changes that have occurred in the disposition of the assets of the Sub-Funds during the year. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of purchases for the year or aggregate disposals greater than 1 per cent of the total value of sales. If there were fewer than 20 purchases that met the material changes definition, the Sub-Funds shall disclose those purchases and such number of the next largest purchases so that at least 20 purchases are disclosed. If there are fewer than 20 sales that met the material changes definition, the Sub-Funds shall disclose those sales and such number of the next largest sales so that at least 20 sales are disclosed.

Value at Risk Approach

Value at Risk ("VaR") is a statistical risk measure that estimates the potential loss from adverse market movements in an ordinary market environment.

Please refer to the financial risks note 13 to the Financial Statements for further details on the measure of VaR.

The Directors use Relative VaR to monitor and manage the global exposure of some of the Funds and Absolute VaR for others as set out below. For Relative VaR, the VaR of the respective Fund's portfolio will not exceed twice the VaR of the reference portfolio. For Absolute VaR, the monthly VaR will not exceed 20% of the Fund's NAV. Where a VaR calculation is performed using a horizon other than the one-month regulatory limit, this 20% limit shall be rescaled to reflect the appropriate risk horizon period as directed by the relevant regulatory guidelines. Utilisation refers to the level of risk taken in this context.

The table below details the highest, lowest and average utilisation of the VaR limit, expressed as a percentage of the respective Absolute or Relative VaR regulatory limit.

Sub-Fund	Global Exposure Type	Risk Model	Reference Risk Portfolio	Highest utilisation of the VaR limit %	Lowest utilisation of the VaR limit %	Average utilisation of the VaR limit %

LEVERAGE

The use of FDIs may expose a Fund to a higher degree of risk. In particular, FDI contracts can be highly volatile, and the amount of initial margin is generally small relative to the size of the contract so that transactions may be leveraged in terms of market exposure. A relatively small market movement may have a potentially larger impact on FDIs than on standard bonds or equities.

Leveraged FDI positions can therefore increase a Fund's volatility. Disclosed in the table below is the level of leverage employed by each relevant Fund during the financial year ended 31 December 2022.

Sub-Fund	% Average Leverage Employed
Fidelity Euro Bond FAM Fund	37.14%
Fidelity Euro Short Term Bond FAM Fund	14.55%

UCITS V Remuneration Disclosure

Fineco Asset Management Designated Activity Company (the "Management Company"), the Management Company of FAM Series UCITS ICAV acts as the Management Company for two other umbrella UCITS.

The Management Company follows a remuneration policy which complies with the requirements of the UCITS regulation in Ireland and in particular the S.I. 143/2016.

The remuneration policy and practices objectives are consistent with and promote sound and effective risk management, aligning remuneration with long-term performance and risks in order to avoid conflicts of interest. Fixed remuneration components are linked to the roles covered, the professional services rendered and the scope of responsibilities, reflecting the level of the talent, skills and competencies, market pay levels, experience and skills required for each position, as well as the level of excellence demonstrated. Variable remuneration is designed to promote a sustainable long-term development of the Management Company and a solid and effective risk management system. Variable remuneration awards consider the performance of the employee, her/his business unit and the Management Company as a whole, and it is based on both financial and non-financial criteria, among other criteria.

The total remuneration paid by the Management Company to its staff for the financial year end 31 December 2022 is as follows:

Financial Year End 31 December 2022

	<u>Fixed</u>	<u>Variable</u>	Total
Employees	6,259,835	2,080,091	8.339,926
Executive Directors	1,120,687	757,346	1,878,033
Non-Executive Directors	85,000	-	85,000

The ICAV represents as at 31 December 2022 around 63% of the Total AUM of the Management Company.

The remuneration policy is reviewed at least annually.

Unaudited Section (continued)

Securities Financing Transaction Regulations Disclosure (SFTR)

A Securities Financing Transaction (SFT) is defined as per Article 3(11) of the SFTR as:

- · a repurchase transaction;
- · securities or commodities lending and securities or commodities borrowing;
- · a buy-sell back transaction or sell-buy back transaction; or
- · a margin lending transaction.

As of financial year ended 31 December 2022, the FAM Series ICAV Set I Sub-Funds do not have any repos, total return swaps and margin lending transactions. Details of securities lending is disclosed below.

Securities lending

All securities lending transactions entered into by each Sub-Fund are subject to a written legal agreement between each Sub-Fund and the securities lending agent, the Manager, a related party to the Entity, and separately between the securities lending agent and the approved borrowing counterparty. Collateral received in exchange for securities lent is transferred under a title transfer arrangement. Collateral received is delivered to and held in an account in the name of the Trustee on behalf of each Fund. Collateral received is segregated from the assets belonging to each Sub-Fund's Trustee or the securities lending agent.

All OTC FDIs and total return swaps are entered into by each Sub-Fund under an International Swaps and Derivatives Associations, Inc. Master Agreement ("ISDA Master Agreement") or similar agreement. An ISDA Master Agreement is a bilateral agreement between the Fund and a counterparty that governs OTC FDIs (including total return swaps) entered into by the parties. The parties' exposures under the ISDA Master Agreement are netted and collateralised together, therefore any collateral disclosures provided are in respect of all OTC FDIs entered into by a Sub-Fund under the ISDA Master Agreement, not just total return swaps.

All collateral received/posted by each Sub-Fund under the ISDA Master Agreement is transferred bilaterally under a title transfer arrangement.

The following table details the value of securities on loan as a proportion of each Sub-Fund's total lendable assets and NAV and the value of total return swaps as a proportion of the Sub-Fund's NAV, as at 31 December 2022 and the income/returns earned for the year ended 31 December 2022. Total lendable assets represent the aggregate value of assets forming part of a Sub-Fund's securities lending programme. This excludes any assets held by the Sub-Funds that are not considered lendable due to any market, regulatory, investment or other restriction. The value of total return swaps is based on the underlying exposure value on a gross absolute basis.

Securities Financing Transaction Regulations Disclosure (SFTR) (continued)

Income earned during the year by the Sub-Funds from securities lending transactions is disclosed in the Fund's notes to the Financial Statements. The total income earned from securities lending transactions is split between the relevant Sub-Fund and the Securities Lending Agent. Each Sub-Fund receives at least 60% while securities lending agent receives up to 40% of such income with all operational costs borne out of the securities lending agent's share. All returns and costs from total return swaps will accrue to each Sub-Fund and are not subject to any returns or costs sharing arrangements with the Sub-Fund's Manager or any other third parties. The following tables details the value of securities on loan (individually identified in the relevant Fund's schedules of investments), analysed by counterparty as at 31 December 2022.

Counterparty	Amount on loan	Collateral received
Bank of Nova Scotia London Branch Triparty	253,599,750	263,514,174
Barclays Bank PLC Fixed Income Triparty	76,180,282	85,371,372
BNP Paribas-Securities Services Triparty	52,669,164	57,784,721
HSBC Bank PLC Triparty	43,765,662	46,084,423
UBS AG JP Morgan Triparty	9,780,615	10,000,664

All securities on loan have an open maturity tenor as they are recallable or terminable daily.

Sustainable Finance Disclosure Regulation (SFDR)

Environmental, social and governance ("ESG") Integration describes the mechanism by which the Manager, acting through the Investment Manager as its delegate, may integrate sustainability risks into investment decision-making, which may, where relevant, require the Investment Manager to assess the potential sustainability risks associated with the purchase of investments.

Sustainability Risk means an ESG event or condition that, if it occurs, could potentially or actually cause a material negative impact on the value of a Sub-Fund's investment. Sustainability risks can either represent a risk of their own or have an impact on other risks and may contribute significantly to risks, such as market risks, operational risks, liquidity risks or counterparty risks.

The ICAV reserves the right to reassess this classification at any time and shall keep this classification under review pending finalisation of the Regulatory Technical Standards ("RTS").

If the ICAV determines at any future point that the Fund does not meet the criteria to qualify as a Sustainable Investment Fund, this disclosure shall be updated or withdrawn as appropriate, in accordance with the revised classification of the Fund.

The following Sub-Funds are classified as Article 6 under the Sustainable Finance Disclosure Regulation ("SFDR"):

Amundi Emerging Markets Bond FAM Fund	Emerging Markets Debt FAM Fund
Emerging Markets Bond Hard Currency FAM Fund	Infusive Consumer Alpha Global Leaders FAM Fund
Euro High Yield Bond FAM Fund	Invesco Global Total Return Bond FAM Fund
Euro Short Duration Bond FAM Fund	Jupiter Flexible Income FAM Fund
European High Yield Bond FAM Fund	US Equity Value FAM Fund
Fineco AM Global Premium Equities Fund	Vontobel Emerging Markets Debt FAM Fund
Flexible Equity Strategy FAM Fund	Morgan Stanley US Advantage FAM Fund

The investments underlying the above named Sub-Funds do not take into account the EU criteria for environmentally sustainable economic activities. The classification of the above named Sub-Funds as Article 6 Funds means that the Sub-Funds do not promote environmental or social characteristics in a way that meets the specific criteria contained in Article 8 of SFDR or have Sustainable Investment as its objective in a way that meets the specific criteria contained in Article 9 of SFDR. Accordingly, the Sub-Funds do not deem sustainability risks to be relevant and does not integrate sustainability risks into its investment decisions due to the investment strategy of the Sub-Funds. Accordingly, it is not anticipated that sustainability risks will materially impact the expected risk or return characteristics of the Sub-Fund. Please refer to the section of the Prospectus entitled "Sustainable Finance Disclosure" for further information.

Sustainable Finance Disclosure Regulation (SFDR)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/85

Product name: Fidelity Euro Bond FAM Fund **Legal entity identifier:** 635400QQSTLMRC4MMX19

Environmental and/or social characteristics

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices. The EU Taxonomy

Sustainable

is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.

That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustant stretchart, the percentage figure represents the minimum Yes	mum commitment to sustainable investments] No
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 8.2% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period under review. The Fund promoted environmental and social characteristics by investing in equity securities of issuers deemed to maintain favourable ESG characteristics. Environmental characteristics included carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, while social characteristics included product safety, supply chain, health and safety and human rights.

The fund partially made sustainable investments.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

How did the sustainability indicators perform?

The performance of the sustainability indicators the mandate used to measure the attainment of the sustainable environmental or social characteristics that it promoted during the period in review as of 31 of december 2022 was:

- i) 82% of the mandate was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the mandate invested in securities of issuers with exposure to the Exclusions;
- iii) 8.2% of the mandate was invested in sustainable investments:
- iv) 4% of the mandate was invested in sustainable investments with an environmental objective in economic activities (that qualify as environmentally sustainable under the EU Taxonomy);
- v) 2.1% of the mandate was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);
- vi) 2.7% of the mandate invested in sustainable investments with a social objective.

...and compared to previous periods?

Not applicable as this is the first reporting period

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 8.2% of sustainable investments

The mandate determined a sustainable investment as follows:

- (a) issuers that undertook economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
- How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that caused significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standards that relate to principal adverse indicators (PAIs) as well as performance on PAI metrics. This included:

Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);

Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and

PAI indicators: quantitative data (where available) on PAI indicators was used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators. Issuers with a low score was ineligible to be 'sustainable investments' Fidelity's fundamental research determined that the company was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which met their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- i. Due Diligence analysis of whether principle adverse impacts were material and negative.
- ii. ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- iii. Exclusions When investing directly in corporate issuers, the Fund applied the Exclusions (as defined below) to help mitigate PAI through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

In respect of its direct investments in corporate issuers, the Fund is subject to:

- a. a firm-wide exclusions list, which includes cluster munitions and antipersonnel landmines, and
- b. a norms-based screening of issuers which the investment manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC.
- c. Fineco Asset Management DAC Investment Exclusion Policy effective on 27 July 2022.

The above exclusions and screens (the "Exclusions") may be updated from time to time.

Please refer to the website for further information on the Sustainable investing framework (fidelityinternational.com) and further details on the Exclusion Policy can be found on the Management Company's website at the following link <u>FAM</u> - <u>Sustainability | Fineco FAM - Fineco FAM (finecoassetmanagement.com)</u>

The investment manager also has discretion to implement enhanced, stricter sustainable requirements and exclusions from time to time.

- iv Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- v Quarterly reviews monitoring of principal adverse impacts through The Fund's quarterly review process.

The specific PAI indicators that were taken into consideration were subject to data availability and may evolve with improving data quality and availability. In certain circumstances, such as indirect investments made by The Fund, PAI may not have been considered.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy? [include section for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852 and include information in accordance with Article 51 of this Regulation]

The mandate did invest 4% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the Mandate with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

The taxonomy alignment of the underlying investments of the Mandate is measured by turnover.

Unaudited Section (continued)

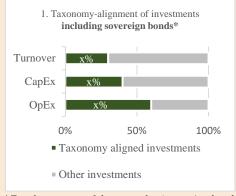

Sustainable Finance Disclosure Regulation (SFDR) (continued)

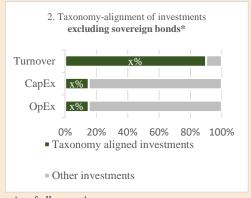

[include note for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Turnover - 4% Capex - 6.14% Opex - 4.79% Turnover - 6.87% Capex - 10.80% Opex - 8.42%

What was the share of investments made in transitional and enabling activities?

Due to data constraints, we aim to report the share of investments in transitional and enabling activities in our next periodic disclosure.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

[include note for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852 that invest in environmental economic activities that are not environmentally sustainable economic activities]

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 2.1% in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

The Mandate invested 2.7% in sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of The Fund was invested in assets aligned with the financial objective of the Fund, cash and cash equivalents for liquidity purposes and derivatives which may have been used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment managers proprietary ESG ratings framework as well as their access to external ESG data providers and ratings agencies have allowed them to assess the ESG characteristics of fund holdings over the period, and maintain a consideration of Principle Adverse Impacts. Included in the assessment is to what extent the issuers of these securities deliver on our expectations for best practices. Additionally, the Investment manager have instated a Quarterly Sustainability Review for their Article 8 funds, which has created a specific forum for discussion of the funds qualitative and quantitative ESG characteristics, and whether they are consistent with requirements and client expectations. This is an extension of their pre-existing risk and compliance processes. Where appropriate they have utilised their spheres of influence on companies via active engagement and stewardship activities.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/85

Product name: Fidelity Euro Short Term Bond FAM Fund **Legal entity identifier:** 635400PB1H3MA6O1JH42

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? [tick and fill in as relevant, the percentage figure represents the minimum commitment to sustainable investments] It made **sustainable** It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: % sustainable investment, it had a in economic activities that proportion of 5% of sustainable qualify as environmentally investments sustainable under the EU Taxonomy with an environmental objective in economic activities that qualify as in economic activities that do environmentally sustainable under not qualify as environmentally the EU Taxonomy sustainable under the EU with an environmental objective in Taxonomy economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but did not make any sustainable with a social objective: ___% investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period under review. The Fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

How did the sustainability indicators perform?

The performance of the sustainability indicators the mandate used to measure the attainment of the sustainable environmental or social characteristics that it promoted during the period in review as of 31 of december 2022 was:

- i. 81% of the mandate was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii. in respect of its direct investments in corporate issuers, 0% of the mandate invested in securities of issuers with exposure to the Exclusions;
- iii. 5% of the mandate was invested in sustainable investments;
- iv. 2% of the mandate was invested in sustainable investments with an environmental objective in economic activities (that qualify as environmentally sustainable under the EU Taxonomy);
- v. 1% of the mandate was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);
- vi. 2% of the mandate invested in sustainable investments with a social objective.

...and compared to previous periods?

Not applicable as this is the first reporting period

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and anti-

bribery matters.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 5% of sustainable investments

The mandate determined a sustainable investment as follows:

- a. issuers that undertook economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
- b. issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- c. issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
- How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that caused significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standards that relate to principal adverse indicators (PAIs) as well as performance on PAI metrics. This included:

Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);

Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and

- PAI indicators: quantitative data (where available) on PAI indicators was used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.
- How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators. Issuers with a low score was ineligible to be 'sustainable investments' Fidelity's fundamental research determined that the company was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

— Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which met their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- i. Due Diligence analysis of whether principle adverse impacts were material and negative.
- ii. ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- iii. Exclusions When investing directly in corporate issuers, the Fund applied the Exclusions (as defined below) to help mitigate PAI through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

In respect of its direct investments in corporate issuers, the Fund was subject to:

- a firm-wide exclusions list, which included cluster munitions and antipersonnel landmines, and
- b. a norms-based screening of issuers which the investment manager considered to have failed to conduct their business in accordance with international norms, including as set out in the UNGC.
- c. Fineco Asset Management DAC Investment Exclusion Policy effective on 27 July 2022.

The above exclusions and screens (the "Exclusions") may be updated from time to time.

Please refer to the website for further information on the Sustainable investing framework (fidelityinternational.com) and further details on the Exclusion Policy can be found on the Management Company's website at the following link FAM - Sustainability | Fineco FAM - Fineco FAM (finecoassetmanagement.com)

The investment manager also had discretion to implement enhanced, stricter sustainable requirements and exclusions from time to time.

- iv. Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- Quarterly reviews monitoring of principal adverse impacts through The Fund's quarterly review process.

The specific PAI indicators that were taken into consideration were subject to data availability and may evolve with improving data quality and availability. In certain circumstances, such as indirect investments made by The Fund, PAI may not have been considered.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy? [include section for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852 and include information in accordance with Article 51 of this Regulation]

The fund invested 2% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the Mandate with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

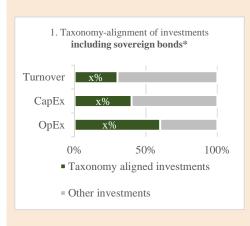

The taxonomy alignment of the underlying investments of the Mandate is measured by turnover.

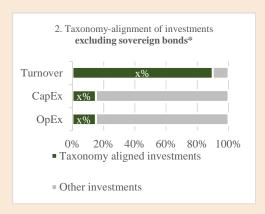

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

[include note for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- capital
 expenditure
 (CapEx) shows
 the green
 investments made
 by investee
 companies,
 relevant for a
 transition to a
 green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

^{*}For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of investments made in transitional and enabling activities?

Due to data constraints, we aim to report the share of investments in transitional and enabling activities in our next periodic disclosure.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 1% in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

The fund invested 2% in sustainable investments with a social objective.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of The Fund was invested in assets aligned with the financial objective of The Fund, cash and cash equivalents for liquidity purposes and derivatives which was used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, The Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment managers proprietary ESG ratings framework as well as their access to external ESG data providers and ratings agencies have allowed them to assess the ESG characteristics of fund holdings over the period, and maintain a consideration of Principle Adverse Impacts. Included in the assessment is to what extent the issuers of these securities deliver on our expectations for best practices. Additionally, the Investment manager have instated a Quarterly Sustainability Review for their Article 8 funds, which has created a specific forum for discussion of the funds qualitative and quantitative ESG characteristics, and whether they are consistent with requirements and client expectations. This is an extension of their pre-existing risk and compliance processes. Where appropriate they have utilised their spheres of influence on companies via active engagement and stewardship activities.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period under review. The Fund promoted environmental and social characteristics by investing in equity securities of issuers deemed to maintain favourable ESG characteristics. Environmental characteristics included carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, while social characteristics included product safety, supply chain, health and safety and human rights.

The fund partially made sustainable investments.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

• How did the sustainability indicators perform?

The performance of the sustainability indicators the mandate used to measure the attainment of the sustainable environmental or social characteristics that it promoted during the period in review as of 31 of december 2022 was:

- 90% of the mandate was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the mandate invested in securities of issuers with exposure to the Exclusions;
- iii) 55.3% of the mandate was invested in sustainable investments;
- iv) 2.3% of the mandate was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);
- v) 16.3% of the mandate was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);
- vi) 36.9% of the mandate invested in sustainable investments with a social objective.

...and compared to previous periods?

Not applicable as this is the first reporting period

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 55.3% of sustainable investments

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and anti-

bribery matters.

The mandate determined a sustainable investment as follows:

- (a) issuers that undertook economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that caused significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standards that relate to principal adverse indicators (PAIs) as well as performance on PAI metrics. This included:

Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);

Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and

PAI indicators: quantitative data (where available) on PAI indicators was used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

— How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators. Issuers with a low score was ineligible to be 'sustainable investments' Fidelity's fundamental research determined that the company was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which met their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- i. Due Diligence analysis of whether principle adverse impacts were material and negative.
- ii. ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- iii. Exclusions When investing directly in corporate issuers, the Fund applied the Exclusions (as defined below) to help mitigate PAI through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

In respect of its direct investments, The Fund was subject to:

- a. a firm-wide exclusions list, which included cluster munitions and antipersonnel landmines, and
- b. a "Sustainable Fund Exclusion List", which included, but is not limited to, tobacco, weapons and thermal coal and
- c. a principle-based screening policy which includes:
 - i) norms-based screening of issuers which the investment manager considered to have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
 - ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.
- d. Fineco Asset Management DAC Investment Exclusion Policy effective on 27 July 2022.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information on the Sustainable investing framework (fidelityinternational.com) and further details on the Exclusion Policy can be found on the Management Company's website at the following link <u>FAM - Sustainability | Fineco FAM - Fineco FAM (finecoassetmanagement.com)</u>

The investment manager also has discretion to implement enhanced, stricter sustainable requirements and exclusions from time to time.

- iv. Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- v. Voting Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- vi. Quarterly reviews monitoring of principal adverse impacts through The Fund's quarterly review process.

The specific PAI indicators that were taken into consideration were subject to data availability and may evolve with improving data quality and availability. In certain circumstances, such as indirect investments made by The Fund, PAI may not have been considered.

Sustainable

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

Taxonomy or not.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period under review. The Fund promoted environmental and social characteristics by investing in equity securities of issuers deemed to maintain favourable ESG characteristics. Environmental characteristics included carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, while social characteristics included product safety, supply chain, health and safety and human rights.

The fund partially made sustainable investments.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

How did the sustainability indicators perform?

The performance of the sustainability indicators the mandate used to measure the attainment of the sustainable environmental or social characteristics that it promoted during the period in review as of 31 of december 2022 was:

- i) 92% of the mandate was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the mandate invested in securities of issuers with exposure to the Exclusions;
- iii) 87.1% of the mandate was invested in sustainable investments;
- iv) 4% of the mandate was invested in sustainable investments with an environmental objective in economic activities (that qualify as environmentally sustainable under the EU Taxonomy);
- v) 35.2% of the mandate was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);
- vi) 46.5% of the mandate invested in sustainable investments with a social objective.

...and compared to previous periods?

Not applicable as this is the first reporting period

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product

are attained.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 87.1% of sustainable investments

The mandate determined a sustainable investment as follows:

- (a) issuers that undertook economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that caused significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standards that relate to principal adverse indicators (PAIs) as well as performance on PAI metrics. This included:

Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);

Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and

PAI indicators: quantitative data (where available) on PAI indicators was used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators. Issuers with a low score was ineligible to be 'sustainable investments' Fidelity's fundamental research determined that the company was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which met their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions When investing directly in corporate issuers, the Fund applied the Exclusions (as defined below) to help mitigate PAI through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

In respect of its direct investments, The Fund was subject to:

- a firm-wide exclusions list, which included cluster munitions and antipersonnel landmines, and
- b. a "Sustainable Fund Exclusion List", which included, but is not limited to, tobacco, weapons and thermal coal and
- c. a principle-based screening policy which includes:
 - i) norms-based screening of issuers which the investment manager considered to have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
 - ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.
- d. Fineco Asset Management DAC Investment Exclusion Policy effective on 27 July 2022.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information on the Sustainable investing framework (fidelityinternational.com) and further details on the Exclusion Policy can be found on the Management Company's website at the following link <u>FAM - Sustainability | Fineco FAM - Fineco FAM</u> (finecoassetmanagement.com)

The investment manager also has discretion to implement enhanced, stricter sustainable requirements and exclusions from time to time.

- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (vi) Quarterly reviews monitoring of principal adverse impacts through The Fund's quarterly review process.

The specific PAI indicators that were taken into consideration were subject to data availability and may evolve with improving data quality and availability. In certain circumstances, such as indirect investments made by The Fund, PAI may not have been considered.

Asset allocation

describes the share of investments in specific assets.

[include note only for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852]

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the proportion of sustainability-related investments?

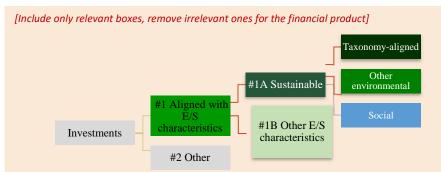

The Fund invested 87.1% in sustainable investments for the period in review

What was the asset allocation?

(#1 aligned with E/S characteristics) The Fund will invest:

- 1. 92% of its assets in securities of issuers with favourable ESG characteristics;
- 2. 87.1% in sustainable investments (#1A sustainable)* of which 4% have an environmental objective (which is aligned with the EU Taxonomy), 35.2% have an environmental objective (which is not aligned with the EU Taxonomy) 46.5% have a social objective.

(#1B Other E/S characteristics) Includes securities of issuers with favourable ESG characteristics but are not sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

[include the note below where the financial product made sustainable investments]

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

In which economic sectors were the investments made?

Economic sectors of the investments made during the period in review were

Sectors	Weight
INFORMATION TECHNOLOGY	26.76
HEALTH CARE	23.7
FINANCIALS	14.67
INDUSTRIALS	11.04
UTILITIES	7.57
CASH	5.96
CONSUMER DISCRETIONARY	3.63
COMMUNICATION SERVICES	2.72
MATERIALS	1.74
CONSUMER STAPLES	1.41
REAL ESTATE	0.8

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy? [include section for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852 and include information in accordance with Article 51 of this Regulation]

The mandate did invest 4% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the Mandate with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

The taxonomy alignment of the underlying investments of the Mandate is measured by turnover.

Unaudited Section (continued)

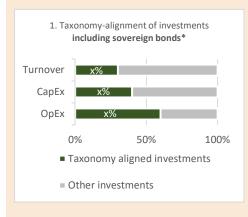

Sustainable Finance Disclosure Regulation (SFDR) (continued)

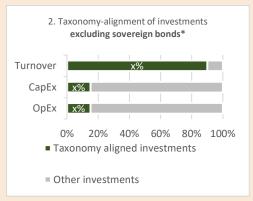

[include note for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- capital
 expenditure
 (CapEx) shows the
 green investments
 made by investee
 companies, relevant
 for a transition to a
 green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Turnover - 4% Capex - 4.54% Opex - 2.37%

What was the share of investments made in transitional and enabling activities?

Due to data constraints, we aim to report the share of investments in transitional and enabling activities in our next periodic disclosure.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 35.2% in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

The Mandate invested 46.5% in sustainable investments with a social objective.

[include note for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852 that invest in environmental economic activities that are not environmentally sustainable economic activities]

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the mandate were invested in securities of issuers that were able to demonstrate that they were on an improving trajectory with respect to their ESG characteristics, as well as cash and cash equivalents for liquidity purposes and derivatives which were used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the mandate adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment managers proprietary ESG ratings framework as well as their access to external ESG data providers and ratings agencies have allowed them to assess the ESG characteristics of fund holdings over the period, and maintain a consideration of Principle Adverse Impacts. Included in the assessment is to what extent the issuers of these securities deliver on our expectations for best practices. Additionally, the Investment manager have instated a Quarterly Sustainability Review for their Article 8 funds, which has created a specific forum for discussion of the funds qualitative and quantitative ESG characteristics, and whether they are consistent with requirements and client expectations. This is an extension of their pre-existing risk and compliance processes. Where appropriate they have utilised their spheres of influence on companies via active engagement and stewardship activities.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: M&G North American Value FAM Fund **Legal entity identifier:** 635400NI1FETHUPUEU96

Environmental and/or social characteristics

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a susta	stainable investment objective?		
Yes	● No		
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 74.42% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective		
It made sustainable investments	It promoted E/S characteristics, but		
with a social objective:%	did not make any sustainable investments		

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promotes the use of an Exclusionary Approach and a Positive ESG Tilt (as defined below):

The Fund excludes certain potential investments from its investment universe to mitigate potential negative effects on the environment and society ("Exclusionary Approach").

The Fund maintains a weighted average ESG rating that is either

- 1. Higher than that of the equity market as represented by its investment universe; or
- 2. Equivalent to at least an MSCI A rating, whichever is lower ("Positive ESG Tilt").

In constructing a portfolio positively tilted towards investments with better ESG characteristics, the Investment Manager may nonetheless invest in investments across the full spectrum of ESG ratings. At an individual security level, the Investment Manager favours investments with better ESG characteristics where this is not detrimental to the pursuit of the financial investment objective.

No reference benchmark has been designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The promoted environmental and social characteristics were generally met by all investments made for the Fund other than "Other" Investments. The alignment percentage indicated in the graphic below is tested against the Exclusionary Approach described below, showing the allocation between investments complying with the Exclusionary Approach and Investments which we as deem as "Other" as we don't consider they can be considered as aligned against the Exclusionary Approach as described in the precontractual annex, such as cash. The Positive ESG Tilt characteristic is not used as part of this alignment percentage test – instead, the Positive ESG Tilt is applied to all investments where data is available.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Exclusionary Approach: The Fund's sustainability indicators to test its compliance with its Exclusionary Approach were met at all times during the reporting period.

Positive ESG Tilt:

Sustainability Indicator Name	Value	Eligibility % NAV	Coverage % NAV
As at 31 December 2022			
Portfolio weighted average ESG score	6.3	97.04%	97.04%
Investment Universe weighted average ESG score	6.7	-	-
ESG score corresponding to the lowest numerical value of the MSCI A rating	5.7	-	-

The Fund maintained a Weighted Average ESG score that was greater than the lower of the benchmark and the lowest numerical value of the MSCI A rating throughout the reporting period. The Fund's calculation methodology does not include those securities that do not have an ESG rating, or cash, near cash, some derivatives and some collective investments schemes.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

...and compared to previous periods?

The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report disclosure. The Fund will provide historic comparison in the next Periodic Report.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund may allocate to sustainable investments of any type, i.e. investments with an environmental, and/or a social objective. The Fund is not required to favour any specific type of sustainable investment.

The Investment Manager uses a series of proprietary tests based on available data to determine whether and how an investment makes positive contribution(s) towards environmental and social objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments that the Fund intends to make do not cause significant harm to any environmental or social sustainable investment objective as they are required to pass a series of tests, including:

- 1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
- 2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
- 3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures are compatible with sustainable investment

— How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data is available (i.e. not just for sustainable investments), which allows the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators is used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund are then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Manager's website disclosures for the Fund.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

All investments purchased by the Fund must pass the Investment Manager's good governance tests, and in addition, sustainable investments must also pass tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

How did this financial product consider principal adverse impacts on sustainability factors?

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data is available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Manager's website disclosures for the Fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

What were the top investments of this financial product?

The list includes the
investments
constituting the
greatest proportion
of investments of
the financial product
during the reference
period which is: 1st
December 2022 to
31 December 2022

What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund has committed to a minimum of 70% of the Fund's assets to be aligned to the environmental or social characteristics promoted. This includes a minimum 20% of the assets that are qualified as sustainable investments. A minimum of 0% of the Fund's assets are other investments not aligned to the environmental or social characteristics.

Note that the SFDR Level 2 Pre-Contractual Disclosure commitments on asset allocation came into effect on 1st January 2023 in alignment with the SFDR Level 2 regulatory deadline. This means the commitment falls after the reference period of this SFDR Level 2 Periodic Report and therefore were not in effect at the time of investment decision-making.

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). Actual % investments that were aligned to the environmental or social characteristic promoted was 96.97% of NAV as at 31 December 2022, which is above the 70% minimum commitment. This comprised 74.42% NAV relating to sustainable investments which was above the 20% minimum threshold, and the remaining 22.55% NAV related to investments with other environmental and or social characteristics.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Asset Allocation

describes the share of investments in specific assets.

Enabling activities

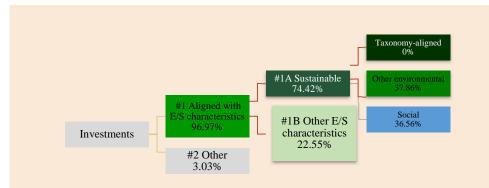

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the asset allocation?

The graphic below provides an overview of the asset allocation versus the established minimum thresholds.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic Sector	% Assets
Manufacturing	47.07%
Information and communication	15.32%
Financial and insurance activities	14.73%
Electricity, gas, steam and air conditioning supply	5.51%
Mining and quarrying	5.07%
Transportation and storage	3.50%
Cash/Other	3.02%
Wholesale and retail trade; repair of motor vehicles and mot	2.90%
Real estate activities	1.76%
Human health and social work activities	0.56%
Administrative and support service activities	0.55%

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The Fund did not take into account the EU criteria for environmentally sustainable economic activities as defined in the Taxonomy Regulation. The Fund did not target investment in taxonomy-aligned assets as part of its investment policy and recorded that 0% of the Fund's sustainable investments were aligned with the environmental objectives under the Taxonomy Regulation during the reference period.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product investments of the financial product other than sovereign bonds.

activities under

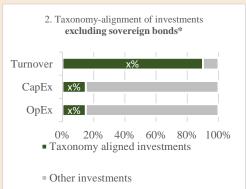

Regulation (EU) 2020/852.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the Zeros across all 6 bars 1. Taxonomy-alignment of investments 2. Taxonomy-alignment of investments including sovereign bonds* excluding sovereign bonds* Turnover

CapEx OpEx 50% 100% Taxonomy aligned investments Other investments

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The Fund is not yet able to report these measures as there is currently insufficient coverage of data. A minimum percentage commitment of 0% is stated in the Fund's precontractual disclosure.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report disclosure. The Fund will provide historic comparison in the next Periodic Report.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments in the Fund with an environmental objective not aligned with the EU taxonomy over the period was 37.86%. This compares to the commitment of 5% overall of sustainable investments with environmental objectives that were not aligned to the EU Taxonomy made in the precontractual disclosure.

What was the share of socially sustainable investments?

The share of sustainable investments in the Fund with a social objective over the period was 36.56%. This compares to the commitment of 5% overall of socially sustainable investments made in the precontractual disclosure.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held varying levels of cash and near cash and money market funds, and derivatives, in accordance with the purposes and safeguards explained in the precontractual annex.

The Fund may hold cash, near cash and money market funds and derivatives as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards are applied, other than as set out below.

Derivatives used to take investment exposure to diversified financial indices, and funds (i.e. UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test. No minimum environmental or social safeguards are applied to FX derivatives.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics.

It is also possible that the Fund may hold investments that are not in line with the promoted characteristics,

e.g. as a result of a merger or other corporate action, or as a result of the characteristics of a previously acquired investment changing. Where this happens, the Fund will generally seek to dispose of them in the best interests of investors, but may not always be able to do so immediately.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

M&G believes that the long-term success of companies is supported by effective investor stewardship and high standards of corporate governance. Over the period, we undertook investment stewardship engagements where we felt was appropriate, with the goal of protecting and enhancing the long-term value of the Portfolio's assets.

Engagement with issuers represented an integral part of how we integrated environmental, social and governance (ESG) considerations into our investment process over the period. ESG analysis was also integrated into our investment and portfolio monitoring processes, mainly through our ESG Scorecard which has been detailed previously in this disclosure.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Amundi Strategic Bond FAM Fund **Legal entity identifier:** 635400UJOIMZRUEVQL70

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

SUCIA	ar objective.	myesuncites			

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The product has respected all material aspects of the characteristics described in the prospectus

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate. For more detail, please refer to the Sustainable Investment section of the Prospectus. At the end of the period:

The weighted average ESG rating of the portfolio is C-

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

... and compared to previous periods?

The above sustainability indicators were not compared to previous periods as the regulation was not yet in force

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

- 1. follow best environmental and social practices; and
- 2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

How were the indicators for adverse impacts on sustainability factors taken into account?

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned invest should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial properties take into account the EU criteria for environmentally sustainable economic activities. The invest underlying the remaining portion of this financial product do not take into account the EU criter environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social object

Sustainable Finance Disclosure Regulation (SFDR) (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion: Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration: Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement: Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote: Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy.
- Controversies monitoring: Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- -The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Banking	24.61%
Sovereign	8.79%
Consumer Discretionary	8.42%
Capital Goods	6.97%
Communications	6.65%
Other Financials	5.17%
Energy	4.63%
Basic Industry	3.28%
Consumer Staples	3.12%
Electric	2.72%
Transportation	2.66%
Treasuries	2.27%
Other Industrials	1.40%
Banks	1.23%
Insurance	0.69%
Real Estate Investment Trust (REIT)	0.58%
Finance Companies	0.57%
Technology	0.31%
Natural Gas	0.20%
Forex	0.11%
Capital Markets	0.00%
Diversified Financial Services	0.00%
Energy Equipment & Services	0.00%

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Taxonomyaligned activities are expressed as a share of:

-turnover reflecting the share of revenue from green activities of investee companies

-capital expenditure (CapEx) showing

the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies

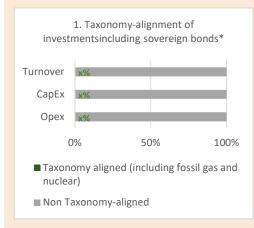

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

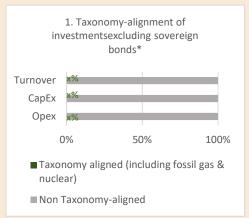

Reliable data regarding the EU Taxonomy (including fossil gas and nuclear energy related activities) was not available during the period.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy I ?
Yes: In fossil gas In nuclear energy No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereignbonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Unaudited Section (continued)

with previous reference periods?

Sustainable Finance Disclosure Regulation (SFDR) (continued)

In previous periods the regulation was not yet in force.

What was the share of investments in transitional and enabling activities?

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Reliable data regarding transitional and enabling activities was not available during the period.

How did the percentage of investments that were aligned with the EU Taxonomy compare

The share of sustainable investments with environmental objective not aligned to taxonomy was 20.17% at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

This product did not commit to have social sustainable investments over the period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions.

These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.

Moreover, AMUNDI's Responsible Investment Policy sets out an active approach to engagement that promotes dialogue with investee companies including those in the portfolio of this product. Our Annual Engagement Report, available on https://about.amundi.com/esgdocumentation, provides detailed reporting on this engagement and its results

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The product has respected all material aspects of the characteristics described in the prospectus

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach.

Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

For more detail, please refer to the Sustainable Investment section of the Prospectus.

At the end of the period:

- The weighted average ESG rating of the portfolio is C+
- The weighted average ESG rating of the reference index is C

... and compared to previous periods?

The above sustainability indicators were not compared to previous periods as the regulation was not yet in force

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

- 1. follow best environmental and social practices; and
- 2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

How were the indicators for adverse impacts on sustainability factors taken into account?

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors),
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion: Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration: Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

- Engagement: Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote: Amundi's voting policy responds to a holistic analysis of all the longterm issues that may influence value creation, including material ESG issues.
 For more information, please refer to Amundi's Voting Policy.
- Controversies monitoring: Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach.

Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

For more detail, please refer to the Sustainable Investment section of the Prospectus.

At the end of the period:

- The weighted average ESG rating of the portfolio is C+
- The weighted average ESG rating of the reference index is C+

... and compared to previous periods?

The above sustainability indicators were not compared to previous periods as the regulation was not yet in force

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

- 1. follow best environmental and social practices; and
- 2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

How were the indicators for adverse impacts on sustainability factors taken into account?

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details: Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion: Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration: Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement: Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote: Amundi's voting policy responds to a holistic analysis of all the long-term issues that
 may influence value creation, including material ESG issues. For more information, please
 refer to Amundi's Voting Policy.
- Controversies monitoring: Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product. **#2Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- -The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy (including fossil gas and nuclear energy related activities) was not available during the period.

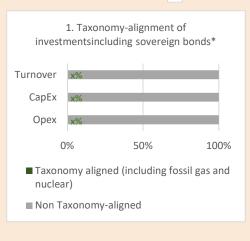

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

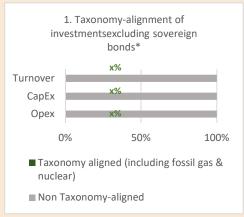

n Yes:	
In fossil gas	In nuclear energ
No	

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU

Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments in transitional and enabling activities?

Reliable data regarding transitional and enabling activities was not available during the period.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

In previous periods the regulation was not yet in force.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy was 35.86% at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

This product did not commit to have social sustainable investments over the period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions.

These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.

Moreover, AMUNDI's Responsible Investment Policy sets out an active approach to engagement that promotes dialogue with investee companies including those in the portfolio of this product. Our Annual Engagement Report, available on https://about.amundi.com/esg-documentation, provides detailed reporting on this engagement and its results

How did this financial product perform compared to the reference benchmark?

This product does not have an ESG Benchmark.

How does the reference benchmark differ from a broad market index?

This product does not have an ESG Benchmark

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

This product does not have an ESG Benchmark.

- How did this financial product perform compared with the reference benchmark?
 This product does not have an ESG Benchmark.
- How did this financial product perform compared with the broad market index?
 This product does not have an ESG Benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that

they promote.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Euro Corporate Fixed Income FAM Fund **Legal entity identifier:** 6354005UGUWVFJSFML27

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Tit made sustainable investments with an environmental objective: in economic activities that qualify as environmentally sustainable under the EU Taxonomy Taxonomy Tit made sustainable Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 55.84% of sustainable investments with an environmental objective in economic activities that objective in economic activities that	Did this financial product have a sustainable investment objective?

It made a sustainable investments with a social objective: It promoted E/S characteristics but did not make any sustainable investments		investments with a social		but	did not make any	

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The product has respected all material aspects of the characteristics described in the prospectus

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-inclass" approach.

Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

For more detail, please refer to the Sustainable Investment section of the Prospectus.

At the end of the period:

- The weighted average ESG rating of the portfolio is C
- The weighted average ESG rating of the reference index is C

... and compared to previous periods?

The above sustainability indicators were not compared to previous periods as the regulation was not yet in force

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

- 1. follow best environmental and social practices; and
- 2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

How were the indicators for adverse impacts on sustainability factors taken into account?

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.
- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

rhe product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion: Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration: Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement: Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote: Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy.
- Controversies monitoring: Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

In previous periods the regulation was not yet in force.

sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy was 51.00% at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

This product did not commit to have social sustainable investments over the period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions.

These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the significantly harm any

investment does not environmental or social objective and that the investee governance practices. The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of

Sustainable companies follow good

environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

Taxonomy or not.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product included;

- 1. Sustainable Investments: The Fund partially invested in sustainable investments as defined as investment in companies and issuers that contribute to an environmental and/or social objective, while doing no significant harm. As at 31 December the Fund had a proportion of 15.11% of sustainable investments.
- 2. Positive Screening: Consideration of ESG factors was a key element of portfolio construction. The Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social "laggards" from the Fund's investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supported a tilt towards investment in issuers that have a more positive impact on the environment or society at large.
- 3. Fund Level ESG Scoring: A monthly independent analysis and classification of the Fund's ESG score was performed internally by the Manager. A minimum ESG score of "A" was applied at Fund Level to ensure that the Fund's ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social characteristics.
- **4. Negative Screening (Norm-based exclusions):** The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:
 - United Nations Global Compact Principles
 - Controversial Weapons
 - Tobacco
 - Climate Change
 - Forced Labour

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are

attained.

How did the sustainability indicators perform?

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund;

- i. The percentage of the Fund portfolio made in sustainable investments which was 15.11% as at 31 December 2022;
- ii. The minimum Fund level ESG score was "A" as at 31 December 2022;
- iii. The percentage of the Fund's portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 10.86% as at 31 December 2022; and
- iv. The percentage of the Fund investment universe subject to the Manager's exclusion policy which was 10.86% as at 31 December 2022

...and compared to previous periods?

Not applicable for the first periodic report.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the sustainable investments that the Fund made was to promote environmental and/or social characteristics. The Fund assessed issuers of the underlying secrutiy and classified investment in issuers that met the below criteria as sustainable investments in line with Article 2 (17) of SFDR;

- a. Made in investee companies that demonstrate good governance;
- b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
- c. Made in investee companies that make a positive contribution towards an environmental or social objective. The Fund allocated between Underlying holdings with an environmental, and/or a social objective. The Fund did not favour any specific type of sustainable investment.

As at 31 December the Fund had a proportion of 15.11% of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective based on screening applied by the Manager through its Exclusion Policy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

——— How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impact ("PAI") indicators were calculated at portfolio level. The results were compared with that of a chosen proxy benchmark representative of the Fund's investment universe and/or peers. These calculations are used as the basis of assessment of adverse impacts on sustainability factors in order to determine whether the Manager could improve at Fund level and/or where the Manager could engage with relevant issuers to improve on such indicators.

The Fund considered the following principal adverse sustainability impacts indicators for the proportion of assets qualified as sustainable investments:

Corporate mandatory indicators:

- 1. GreenHouse Gas (GHG) Emissions
- 2. Carbon footprint
- 3. GHG intensity of investee companies
- 4. Exposure to companies active in the fossil fuel sector
- 5. Share of non-renewable energy consumption and production
- 6. Energy consumption intensity per high impact climate sector
- 7. Activities negatively affecting biodiversity sensitive areas
- 8. Emissions to water
- 9. Hazardous waste ratio
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Sovereign mandatory indicator:

- 15. GHG intensity
- 16. Investee countries subject to social violations

—— Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments which the Fund made and their alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were assessed in the following ways;

- 1. Via PAI monitoring of the following indicators;
 - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
 - Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- Through ensuring that the sustainable investments that the Manager made are:
 - a. Made in investee companies that demonstrate good governance:
 - b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
 - c. Made in investee companies that make a positive contribution towards an environmental or social objective.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards are met. The results were compared with that of a chosen proxy benchmark representative of the Fund's investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were;

Corporate mandatory indicators:

- 1. GreenHouse Gas (GHG) Emissions
- 2. Carbon footprint
- 3. GHG intensity of investee companies
- 4. Exposure to companies active in the fossil fuel sector
- 5. Share of non-renewable energy consumption and production
- 6. Energy consumption intensity per high impact climate sector
- 7. Activities negatively affecting biodiversity sensitive areas
- 8. Emissions to water
- 9. Hazardous waste ratio
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

- 15. GHG intensity
- 16. Investee countries subject to social violations

More detailed information on the manner in which the Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager's SFDR disclosure statement; "Statement on principal adverse impacts of investment decisions on sustainability factors".

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

What was the proportion of sustainability-related investments?

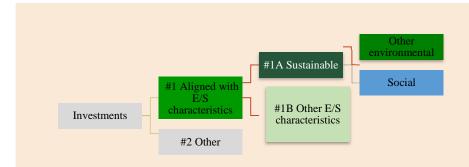

15.11%

Asset allocation describes the share of investments in

specific assets.

What was the asset allocation?

10.86% of the Fund's Investments were aligned with the environmental and/or social characteristics promoted by the Fund. The Fund also commits to a minimum proportion of 5% in sustainable investments and as at 31 December the Fund had a proportion of 15.11% of sustainable investments. The remaining investments of the Fund were invested in cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. Calculations may rely on incomplete or inaccurate company or third party data.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

In which economic sectors were the investments made?

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

As the investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation, the Fund's portfolio alignment with the Taxonomy Regulation was not calculated. It follows that the Fund does not currently commit to investing more than 0% of its assets in investments aligned with the Taxonomy.

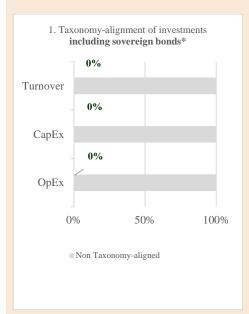

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes:		
		In fossil gas	In nuclear energy
×	No		

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

^{*} For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable for the first periodic report.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that was not aligned with the European Taxonomy Regulation is 10.86%.

What was the share of socially sustainable investments?

Socially sustainable investments represented 7.51% of the financial product.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes.

Any "#2 Other" potential investments, other than cash or cash equivalents are screened according to the Manager's exclusion policy.

sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

Furthermore, the Fund invested 15.11% of its assets in "sustainable investments" as defined in Article 2 (17) of SFDR. Criteria to qualify an investment as "sustainable investment" are indicated in the above question "What were the objectives of the sustainable investments that the financial product partially intends to make and does the sustainable investments contribute to such objectives?".

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

How did this financial product perform compared to the reference benchmark?

• How does the reference benchmark differ from a broad market index?
Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

- How did this financial product perform compared with the reference benchmark?
 Not applicable
- How did this financial product perform compared with the broad market index?`

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: M&G Optimal Income FAM Fund **Legal entity identifier:** 635400ZSWNWUL3K7NJ24

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? It made sustainable It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: ___% sustainable investment, it had a proportion in economic activities that of 49.13% of sustainable investments qualify as environmentally sustainable under the EU with an environmental objective in economic activities that qualify as Taxonomy environmentally sustainable under the in economic activities that **EU** Taxonomy do not qualify as environmentally sustainable with an environmental objective in economic activities that do not qualify under the EU Taxonomy as environmentally sustainable under the EU Taxonomy with a social objective It made **sustainable** It promoted E/S characteristics, but did not make any sustainable investments investments with a social objective: ___%

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

Taxonomy or not.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promotes the use of an Exclusionary Approach and a Positive ESG Tilt (as defined below):

The Fund excludes certain potential investments from its investment universe to mitigate potential negative effects on the environment and society. For securitised investments such as asset-backed securities (ABS), this also includes assessing them against the Investment Manager's proprietary scoring methodology ("Exclusionary Approach"). Accordingly, the Investment Manager is promoting environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

The Fund maintains a weighted average ESG rating that is higher than that of its investment universe ("Positive ESG Tilt"). In constructing a portfolio positively tilted towards investments with better ESG characteristics, the Investment Manager may nonetheless invest in investments across the full spectrum of ESG ratings. At an individual security level, the Investment Manager favours investments with better ESG characteristics where this is not detrimental to the pursuit of the financial investment objective.

No reference benchmark has been designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The promoted environmental and social characteristics were generally met by all investments made for the Fund other than "Other" Investments. The alignment percentage indicated in the graphic below is tested against the Exclusionary Approach described below, showing the allocation between investments complying with the Exclusionary Approach and Investments which we as deem as "Other" as we don't consider they can be considered as aligned against the Exclusionary Approach as described in the precontractual annex, such as cash. The Positive ESG Tilt characteristic is not used as part of this alignment percentage test – instead, the Positive ESG Tilt is applied to all investments where data is available.

promoted by the financial product are attained.

Sustainability

how the

indicators measure

social characteristics

environmental or

How did the sustainability indicators perform?

Exclusionary Approach: The Fund's sustainability indicators to test its compliance with its Exclusionary Approach were met at all times during the reporting period.

Positive ESG Tilt:

Sustainability Indicator Name	Value	Eligibility % NAV	Coverage % NAV
As at 31 December 2022			
Portfolio weighted average ESG score	6.6	55.61%	51.62%
Investment Universe weighted average ESG score	5.8	-	-

The Fund maintained a Weighted Average ESG score that was greater than the benchmark throughout the reporting period. The Fund's calculation methodology does not include those securities that do not have an ESG rating, or cash, near cash, some derivatives and some collective investments schemes.

...and compared to previous periods?

The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report disclosure. The Fund will provide historic comparison in the next Periodic Report.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund may allocate to sustainable investments of any type, i.e. investments with an environmental, and/or a social objective. The Fund is not required to favour any specific type of sustainable investment.

The Investment Manager uses a series of proprietary tests based on available data to determine whether and how an investment makes positive contribution(s) towards environmental and social objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments that the Fund intends to make do not cause significant harm to any environmental or social sustainable investment objective as they are required to pass a series of tests, including:

- 1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
- 2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
- 3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures are compatible with sustainable investment

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data is available (i.e. not just for sustainable investments), which allows the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators is used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund are then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Manager's website disclosures for the Fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

All investments purchased by the Fund must pass the Investment Manager's good governance tests, and in addition, sustainable investments must also pass tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data is available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Manager's website disclosures for the Fund.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

What was the proportion of sustainability-related investments?

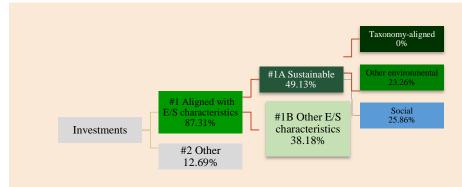

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund has committed to a minimum of 70% of the Fund's assets to be aligned to the environmental or social characteristics promoted. This includes a minimum 20% of the assets that are qualified as sustainable investments. A minimum of 0% of the Fund's assets are other investments not aligned to the environmental or social characteristics.

Note that the SFDR Level 2 Pre-Contractual Disclosure commitments on asset allocation came into effect on 1st January 2023 in alignment with the SFDR Level 2 regulatory deadline. This means the commitment falls after the reference period of this SFDR Level 2 Periodic Report and therefore were not in effect at the time of investment decision-making.

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). Actual % investments that were aligned to the environmental or social characteristic promoted was 87.31% of NAV as at 31 December 2022, which is above the 70% minimum commitment. This comprised 49.13% NAV relating to sustainable investments which was above the 20% minimum threshold, and the remaining 38.18% NAV related to investments with other environmental and or social characteristics.

What was the asset allocation?

The graphic below provides an overview of the asset allocation versus the established minimum thresholds.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Asset
Allocation
describes the
share of
investments in
specific assets.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic Sector	% Assets
Financial and insurance activities	40.70%
Public administration and defence; compulsory social security	30.75%
Cash/other	13.56%
Information and communication	4.38%
Manufacturing	4.05%
Electricity, gas, steam and air conditioning supply	2.54%
Real estate activities	0.72%
Human health and social work activities	0.72%
Accommodation and food service activities	0.66%
Transportation and storage	0.61%
Administrative and support service activities	0.57%
Wholesale and retail trade; repair of motor vehicles and mot	0.42%
Professional, scientific and technical activities	0.17%
Mining and quarrying	0.07%
Construction	0.06%
Water supply; sewerage, waste management and remediation act	0.02%

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

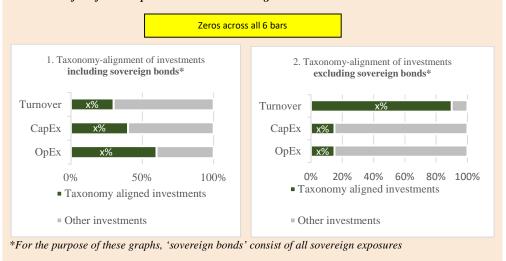

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The Fund did not take into account the EU criteria for environmentally sustainable economic activities as defined in the Taxonomy Regulation. The Fund did not target investment in taxonomy- aligned assets as part of its investment policy and recorded that 0% of the Fund's sustainable investments were aligned with the environmental objectives under the Taxonomy Regulation during the reference period.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

The share of the Fund's investments made in transitional activities over the period was 0% and in enabling activities was 0.04%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report disclosure. The Fund will provide historic comparison in the next Periodic Report.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- capital
 expenditure
 (CapEx) shows the
 green investments
 made by investee
 companies,
 relevant for a
 transition to a
 green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the

best performance.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments in the Fund with an environmental objective not aligned with the EU taxonomy over the period was 23.26%. This compares to the commitment of 5% overall of sustainable investments with environmental objectives that were not aligned to the EU Taxonomy made in the precontractual disclosure.

sustainable

investments with an environmental

objective that do not take into account

the criteria for

environmentally

under Regulation (EU) 2020/852.

sustainable economic activities

What was the share of socially sustainable investments?

The share of sustainable investments in the Fund with a social objective over the period was 25.86%. This compares to the commitment of 5% overall of socially sustainable investments made in the precontractual disclosure.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held varying levels of cash and near cash and money market funds, and derivatives, in accordance with the purposes and safeguards explained in the precontractual annex.

The Fund may hold cash, near cash and money market funds, FX, interest rate derivatives and similar derivatives (which may include certain technical trades such as government bond futures used for duration trades) as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards are applied.

Derivatives used to take investment exposure to diversified financial indices (excluding technical trades), and funds (i.e., UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics. It is also possible that the Fund may hold investments that are not in line with the promoted characteristics, e.g., as a result of a merger or other corporate action, or as a result of the characteristics of a previously acquired investment changing. Where this happens, the Fund will generally seek to dispose of them in the best interests of investors but may not always be able to do so immediately.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

M&G believes that the long-term success of companies is supported by effective investor stewardship and high standards of corporate governance. Over the period, we undertook investment stewardship engagements where we felt was appropriate, with the goal of protecting and enhancing the long-term value of the Portfolio's assets.

Engagement with issuers represented an integral part of how we integrated environmental, social and governance (ESG) considerations into our investment process over the period. ESG analysis was also integrated into our investment and portfolio monitoring processes, mainly through our ESG Scorecard which has been detailed previously in this disclosure.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Schroder Euro Bond FAM Fund **Legal Entity Identifier:** 635400INXZXUO9N6HF24

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?				
•• Yes		••	X	No
	stainable investments with an ental objective:%	X	characte as its ob it had a	oted Environmental/Social (E/S) eristics and while it did not have bjective a sustainable investment, proportion of 78% of able investments
envir	conomic activities that qualify as conmentally sustainable under EU Taxonomy			With an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
quali	onomic activities that do not fy as environmentally inable under the EU Taxonomy		X	With an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
			X	With a social objective
	stainable investments with a ective:%		•	oted E/S characteristics, but did ke any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

The Fund maintained a higher overall sustainability score than the Bloomberg EURO Aggregate Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales or GDP. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The reference period for this Fund is 1 January, 2022 to 31 December, 2022.

The Fund also invested at least 10% of its assets in sustainable investments from when this commitment came into effect in August 2022 to the end of the reference period.

• How did the sustainability indicators perform?

The Fund's sustainability score for the reference period was 3.2% and the benchmark's sustainability score for the reference period was 1.4%.

In each case the sustainability score is calculated as a notional percentage as described above.

As measured at the end of the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Clean Energy
- Connectivity
- Education
- Power Provision
- Socio-Political Stability

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the Bloomberg EURO Aggregate Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the Bloomberg EURO Aggregate Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 78% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments over the four months prior to the end of the reference period, based on month-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

...and compared to previous periods?

As this is our first reporting period, this question is not applicable.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to increasing benefits by way of the following:

- Clean Energy: the estimated environmental benefit associated with renewables and the accelerated transformation of countries' energy systems;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues;
- Socio-Political Stability: the estimated societal benefit a politically and socially stable country can provide in supporting a favourable business environment and attracting investment, thus contributing to long-run economic growth;

The above examples of the objectives of the sustainable investments that the Fund made are based on data as at the end of the reference period. Other objectives may have applied during the reference period.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. The Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders applied certain exceptions to the list during the reference period.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.
- The Fund also applied certain other exclusions.
- Further information on all of the Fund's exclusions is to be found under "Sustainability Related Disclosures" on the Fund's webpage, accessed via https://www.schroders.com/en/lu/private-investor/gfc.

How were the indicators for adverse impacts on sustainability factors taken into account?

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment

For example, the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders applied certain exceptions to the list during the reference period.

In addition the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and 19 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link https://prod.schroders.com/en/sysglobalassets/about_us/schroders-engagement-blueprint-2022.pdf). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

PAIs 20, 12 and 13 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

We used a list of UNGC violators as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is an UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors involved classifying the indicators into three categories:

1. Set thresholds

For certain PAIs (e.g. PAI 10 on violations of UNGC principles), we set thresholds for considering an investment to be a sustainable investment. Investments in breach of these thresholds were not eligible to be held as sustainable investments. Compliance with these thresholds was monitored on an ongoing basis via the Investment Manager's portfolio compliance framework.

2. Active ownership

During the reference period, the Investment Manager engaged in line with the approach and expectations set out in our Engagement Blueprint (Link https://prod.schroders.com/en/sysglobalassets/about-us/schroders-engagement-blueprint-2022.pdf) and as further described above. A summary of Schroders firm-wide engagement activity, during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	738
Diversity and Inclusion	72
Governance and Oversight	3,096
Human Capital Management	130
Human Rights	121
Natural Capital and Biodiversity	95

3. Improve coverage

Some of the engagements identified in the table above involved discussions where the primary focus was to increase reporting on sustainability data. The purpose is to improve coverage of the PAIs, for example PAI 9 on hazardous waste ratio.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

The list above represents the average of the Fund's holdings at each quarter end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

What was the proportion of sustainability-related investments?

• What was the asset allocation?

Asset allocation describes the share of investments in specific The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 94%. The Fund maintained a higher overall sustainability score than the Bloomberg EURO Aggregate Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average of the last four months of the reference period, based on month-end data. Also included within #1 is the proportion of assets that were invested in sustainable investments, as indicated in #1A.

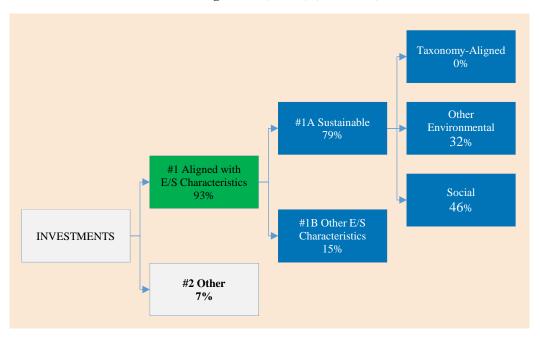

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 78% of its assets in sustainable investments. This percentage represents the average of the last four months of the reference period, based on month-end data. Within this, 32% was invested in sustainable investments with an environmental objective and 46% was invested in sustainable investments with a social objective. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. [#2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.]

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category #1 Aligned with E/S Characteristics covers:

- The sub-category #IA Sustainable covers environmentally and socially sustainable investments
- The sub-category #1B Other E/S Characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	% Assets
SOVEREIGN (DEVELOPED)	36.46
FINANCIAL	19.27
INDUSTRIAL	15.02
SUPRANATIONAL	7.27
COLLECTIVE INVESTMENTS	5.47
GOVERNMENT GUARANTEED	4.41
AGENCY	3.44
UTILITY	3.18
CASH	2.88
FOREIGN SOVEREIGN	1.33
LOCAL-AUTHORITY	1.28
EMD SOVEREIGN	0.10
PFD-UTILITY	0.03
SECURITIZED	0.01
DERIVATIVES	-0.16

The list above represents the average of the Fund's holdings at each quarter end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

the

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

	he financial pro xonomy ¹ ?	oduct invest in fossil	gas and/or nuclear ener	gy rela	tted activities complying with
	Yes:				
	Ir	ı fossil gas			In nuclear energy
X	No				

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

^{*}For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

• What was the share of investments made in transitional and enabling activities?

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance. As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

As this is our first reporting period, this question is not applicable.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

The Fund invested 32% of its assets in sustainable investments with an environmental objective that are not aligned with the Taxonomy. This percentage is a proportion of the total percentage of sustainable investments, which is calculated as the average of the last four months of the reference period, based on month-end data.

What was the share of socially sustainable investments?

The Fund invested 46% of its assets in sustainable investments with a social objective. This percentage is a proportion of the total percentage of sustainable investments, which is calculated as the average of the last four months of the reference period, based on month-end data.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. [#2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.]

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period a number of counterparties were removed from the approved list for all funds in line with our policy and compliance requirements. This meant that such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund [and of individual investments] when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link https://prod.schroders.com/en/sysglobalassets/about-us/schroders-engagement-blueprint-2022.pdf). A summary of Schroders engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies. We aim to drive change that protects and enhances the value of our investments.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• How did the reference benchmark differ from a broad market index?

This question is not applicable for this Fund.

• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

This question is not applicable for this Fund.

• How did this financial product perform compared with the reference benchmark?

This question is not applicable for this Fund.

• How did this financial product perform compared with the broad market index?

This question is not applicable for this Fund.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/85

Product name: European Equity FAM Fund

Legal entity identifier: 635400NG22RCW3MTWI11

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? [tick and fill in as relevant, the percentage figure represents the minimum commitment to sustainable investments] Yes x No x It promoted Environmental/Social (E/S) It made **sustainable** characteristics and investments with an while it did not have as its objective a environmental objective: % sustainable investment, it had a proportion in economic activities that of 67.2% of sustainable investments qualify as environmentally with an environmental objective in sustainable under the EU economic activities that qualify as Taxonomy environmentally sustainable under the in economic activities that EU Taxonomy do not qualify as with an environmental objective in environmentally sustainable economic activities that do not qualify under the EU Taxonomy as environmentally sustainable under the EU Taxonomy with a social objective It made **sustainable** It promoted E/S characteristics, but **did** not make any sustainable investments investments with a social objective: ___%

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period under review. The Fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

• How did the sustainability indicators perform?

The performance of the sustainability indicators the mandate used to measure the attainment of the sustainable environmental or social characteristics that it promoted during the period in review as of 31 of december 2022 was:

- i) 97% of the mandate was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the mandate invested in securities of issuers with exposure to the Exclusions;
- iii) 67.2% of the mandate was invested in sustainable investments;
- iv) 5.2% of the mandate was invested in sustainable investments with an environmental objective in economic activities (that qualify as environmentally sustainable under the EU Taxonomy);
- v) 30.3% of the mandate was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);
- vi) 32.7% of the mandate invested in sustainable investments with a social objective.

...and compared to previous periods?

Not applicable as this is the first reporting period

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 67% of sustainable investments

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

The mandate determined a sustainable investment as follows:

- (a) issuers that undertook economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse **impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental. social and employee matters, respect for human rights, anticorruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that caused significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standards that relate to principal adverse indicators (PAIs) as well as performance on PAI metrics. This included:

Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);

Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and

PAI indicators: quantitative data (where available) on PAI indicators was used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators. Issuers with a low score was ineligible to be 'sustainable investments' Fidelity's fundamental research determined that the company was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which met their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions When investing directly in corporate issuers, the Fund applied the Exclusions (as defined below) to help mitigate PAI through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC.

In respect of its direct investments in corporate issuers, the Fund was subject to:

- 1. a firm-wide exclusions list, which included cluster munitions and anti-personnel landmines, and
- 2. a norms-based screening of issuers which the investment manager considered to have failed to conduct their business in accordance with international norms, including as set out in the UNGC.
- 3. Fineco Asset Management DAC Investment Exclusion Policy effective on 27 July 2022.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information on the Sustainable investing framework (fidelityinternational.com) and further details on the Exclusion Policy can be found on the Management Company's website at the following link <u>FAM - Sustainability</u> | Fineco FAM - Fineco FAM (finecoassetmanagement.com)

The investment manager also had discretion to implement enhanced, stricter sustainable requirements and exclusions from time to time.

- (i) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (ii) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (iii) Quarterly reviews monitoring of principal adverse impacts through The Fund's quarterly review process.

The specific PAI indicators that were taken into consideration were subject to data availability and may evolve with improving data quality and availability. In certain circumstances, such as indirect investments made by The Fund, PAI may not have been considered.

What was the proportion of sustainability-related investments?

The Fund invested 67% in sustainable investments for the period in review

What was the asset allocation?

(#1 aligned with E/S characteristics) The Fund will invest:

- 1. 97% of its assets in securities of issuers with favourable ESG characteristics;
- 2. 67.2% in sustainable investments (#1A sustainable)* of which 5.2%

have an environmental objective (which is aligned with the EU Taxonomy), 30.3% have an environmental objective (which is not aligned with the EU Taxonomy) 32.7% have a social objective.

(#1B Other E/S characteristics) Includes securities of issuers with favourable ESG characteristics but are not sustainable investments.

characteristics

Asset allocation

describes the share of investments in specific assets.

[include note for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

[Include only relevant boxes, remove irrelevant ones for the financial product]

Taxonomyaligned

Other environmental

#1 Aligned with E/S characteristics #1B Other E/S

#2 Other

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

 $[include\ the\ note\ below\ where\ the\ financial\ product\ made\ sustainable\ investments]$

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Economic sectors of the investments made during the period in review were

Sector	Fund - % TNA
Information Technology	20.58
Industrials	12.33
Health Care	12.25
Consumer Staples	10.41
Financials	10.16
Energy	7.85
Consumer Discretionary	7.02
Materials	6.60
Communication Services	5.60
Utilities	3.34
Cash	2.18
Real Estate	1.68

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01 January 2022 to 31 December 2022

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy? [include section for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852 and include information in accordance with Article 51 of this Regulation]

The fund invested 5.2% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the Mandate with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

The taxonomy alignment of the underlying investments of the Mandate is measured by turnover.

[include note only for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852]

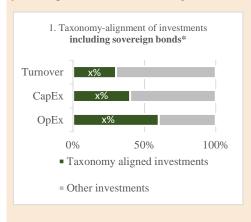

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

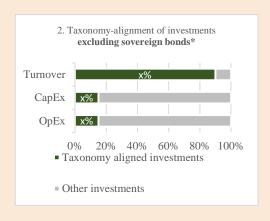

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Turnover - 5.2% Capex - 5.9%

Opex - 5.8%

What was the share of investments made in transitional and enabling activities?

Due to data constraints, we aim to report the share of investments in transitional and enabling activities in our next periodic disclosure.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 30.3% in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

The fund invested 32.7% in sustainable investments with a social objective.

[include note for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852 that invest in environmental economic activities that are not environmentally sustainable economic activities]

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of The Fund was invested in assets aligned with the financial objective of The Fund, cash and cash equivalents for liquidity purposes and derivatives which was used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, The Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment managers proprietary ESG ratings framework as well as their access to external ESG data providers and ratings agencies have allowed them to assess the ESG characteristics of fund holdings over the period, and maintain a consideration of Principle Adverse Impacts. Included in the assessment is to what extent the issuers of these securities deliver on our expectations for best practices. Additionally, the Investment manager have instated a Quarterly Sustainability Review for their Article 8 funds, which has created a specific forum for discussion of the funds qualitative and quantitative ESG characteristics, and whether they are consistent with requirements and client expectations. This is an extension of their pre-existing risk and compliance processes. Where appropriate they have utilised their spheres of influence on companies via active engagement and stewardship activities.

How did this financial product perform compared to the reference benchmark?

An index was not designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promoted.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

practices.

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product included:

- 1. Positive Screening: Consideration of ESG factors was a key element of portfolio construction. The Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social "laggards" from the Fund's investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supported a tilt towards investment in issuers that have a more positive impact on the environment or society at large.
- 2. Fund Level ESG Scoring: A monthly independent analysis and classification of the Fund's ESG score was performed internally by the Manager. A minimum ESG score of "A" was applied at Fund level to ensure that the Fund's ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social characteristics.
- 3. Negative Screening (Norm-based exclusions): The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:
 - United Nations Global Compact Principles
 - Controversial Weapons
 - Tobacco
 - Climate Change
 - Forced Labour

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse **impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and anti-bribery matters.

How did the sustainability indicators perform?

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund;

- The Fund level ESG score was rated MSCI "A" or above as at 31 December 2022;
- ii. The percentage of the Fund's portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 97.41% as at 31 December 2022; and
- iii. The percentage of the Fund investment universe subject to the Manager's exclusion policy which was 97.41% as at 31 December 2022
- ...and compared to previous periods?

Not applicable for the first periodic report.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards were met. The results were compared with that of a chosen proxy benchmark representative of the Fund's investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were;

Corporate mandatory indicators:

- 1. GreenHouse Gas (GHG) Emissions
- 2. Carbon footprint
- 3. GHG intensity of investee companies
- 4. Exposure to companies active in the fossil fuel sector
- 5. Share of non-renewable energy consumption and production
- 6. Energy consumption intensity per high impact climate sector
- 7. Activities negatively affecting biodiversity sensitive areas
- 8. Emissions to water
- 9. Hazardous waste ratio
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

Lack of a human rights policy

Sovereign mandatory indicator:

- 15. GHG intensity
- 16. Investee countries subject to social violations

More detailed information on the manner in which the Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager's SFDR disclosure statement; "Statement on principal adverse impacts of investment decisions on sustainability factors".

Not applicable

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

97.41% of the Fund's Investments were aligned with the environmental and/or social characteristics promoted by the Fund. The remaining investments of the Fund were invested in cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. Calculations may rely on incomplete or inaccurate company or third party data.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional

activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Category	Fund - % TNA
PHARMACEUTICS/ COSMETICS/ BIOTECHNOLOGY	15.89%
BANKS	9.07%

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

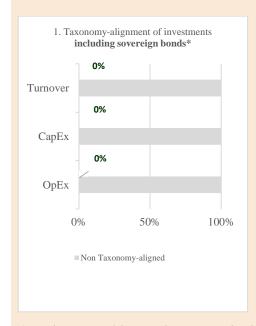

Taxonomy-aligned activities are expressed as a share of:

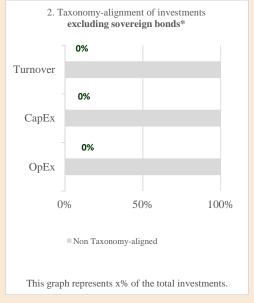

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes:			
		In fossil gas	In r	nuclear energy
×	No			

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, `sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

What was the share of socially sustainable investments?

Not applicable

measure how the environmental or social characteristics promoted by the financial product are attained.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes.

Any "#2 Other" potential investments, other than cash or cash equivalents are screened according to the Managers exclusion policy.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as a Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

Yes × No It made **sustainable** It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: ___% sustainable investment, it had a proportion of in economic activities that 23.70% of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that with an environmental objective in economic do not qualify as activities that do not qualify as environmentally sustainable environmentally sustainable under the EU under the EU Taxonomy Taxonomy with a social objective It made **sustainable** It promoted E/S characteristics, but **did not** make any sustainable investments investments with a social objective: ___%

All actual data within this periodic report are calculated on the closing date of the accounting year.

Sustainable
investment means an
investment in an
economic activity
that contributes to an
environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or
social objective and
that the investee
companies follow
good governance

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation

practices.

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product included;

- 1. Sustainable Investments: The Fund partially invested in sustainable investments as defined as investment in companies and issuers that contribute to an environmental and/or social objective, while doing no significant harm. As at 31 December the Fund had a proportion of 23.70% of sustainable investments
- 2. Positive Screening: Consideration of ESG factors was a key element of portfolio construction. The Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social "laggards" from the Fund's investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supports a tilt towards investment in issuers that have a more positive impact on the environment or society at large.
- 3. Fund Level ESG Scoring: A monthly independent analysis and classification of the Fund's ESG score was performed internally by the Manager. A minimum ESG score of "A" was applied at Fund Level to ensure that the Fund's ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social Characteristics.
- **4. Negative Screening (Norm-based exclusions):** The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:
 - United Nations Global Compact Principles
 - Controversial Weapons
 - Tobacco
 - Climate Change
 - Forced Labour

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

• How did the sustainability indicators perform?

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund;

- The percentage of the Fund portfolio made in sustainable investments was 23.70% as at 31 December 2022
- 2. The Fund level ESG score was rated MSCI "A" or above as at 31 December 2022;
- 3. The percentage of the Fund's portfolio rated above BB by MSCI ESG Manager (or an other corresponding rating from a similar rating provider) which was 23.7% as at 31 December 2022; and
- 4. The percentage of the Fund investment universe subject to the Manager's exclusion policy which was 23.7% as at 31 December 2022

...and compared to previous periods?

Not applicable for the first periodic report.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives

The objectives of the sustainable investments that the Fund made was to promote environmental and/or social characteristics. The Fund assessed issuers of the underlying secrutiy and classified investment in issuers that met the below criteria as sustainable investments inline with Article 2 (17) of SFDR;

- a. Made in investee companies that demonstrate good governance;
- b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
- c. Made in investee companies that make a positive contribution towards an environmental or social objective. The Fund allocated between Underlying holdings with an environmental, and/or a social objective. The Fund did not favour any specific type of sustainable investment.

As at 31 December the Fund had a proportion of 23.70% of sustainable investments

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective based on screening applied by the Manager through its Exclusion Policy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-

corruption and anti-

bribery matters.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impact ("PAI") indicators were calculated at portfolio level. The results were compared with that of a chosen proxy benchmark representative of the Fund's investment universe and/or peers. These calculations are used as the basis of assessment of adverse impacts on sustainability factors in order to determine whether the Manager could improve at Fund level and/or where the Manager could engage with relevant issuers to improve on such indicators.

The Fund considered the following principal adverse sustainability impacts indicators for the proportion of assets qualified as sustainable investments:

Corporate mandatory indicators:

- 1. GreenHouse Gas (GHG) Emissions
- 2. Carbon footprint
- 3. GHG intensity of investee companies
- 4. Exposure to companies active in the fossil fuel sector
- 5. Share of non-renewable energy consumption and production
- 6. Energy consumption intensity per high impact climate sector
- 7. Activities negatively affecting biodiversity sensitive areas
- 8. Emissions to water
- Hazardous waste ratio
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Sovereign mandatory indicator:

- 15. GHG intensity
- 16. Investee countries subject to social violations

——— Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments which the Fund made and their alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were assessed in the following ways;

- 1. Via PAI monitoring of the following indicators;
 - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
 - Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- Through ensuring that the sustainable investments that the Manager made are:
 - a. Made in investee companies that demonstrate good governance:
 - b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
 - c. Made in investee companies that make a positive contribution towards an environmental or social objective.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards are met. The results were compared with that of a chosen proxy benchmark representative of the Fund's investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were;

Corporate mandatory indicators:

- 1. GreenHouse Gas (GHG) Emissions
- 2. Carbon footprint
- 3. GHG intensity of investee companies
- 4. Exposure to companies active in the fossil fuel sector
- 5. Share of non-renewable energy consumption and production
- 6. Energy consumption intensity per high impact climate sector
- 7. Activities negatively affecting biodiversity sensitive areas
- 8. Emissions to water
- 9. Hazardous waste ratio
- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Sovereign mandatory indicator:

- 15. GHG intensity
- 16. Investee countries subject to social violations

More detailed information on the manner in which the Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager's SFDR disclosure statement; "Statement on principal adverse impacts of investment decisions on sustainability factors".

What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

23.70%

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

97.68% of the Fund's Investments were aligned with the environmental and/or social characteristics promoted by the Fund. The Fund also commits to a minimum proportion of 10% in sustainable investments and as at 31 December the Fund had a proportion of 23.70% of sustainable investments. The remaining investments of the Fund were invested in cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. Calculations may rely on incomplete or inaccurate company or third party data.

Unaudited Section (continued)

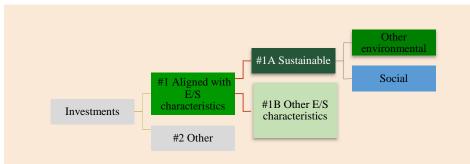

Sustainable Finance Disclosure Regulation (SFDR) (continued)

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Category	Fund - % TNA
BANKS	3.96%
BUILDING AND BUILDING MATERIALS	3.59%
CHEMICAL PRODUCTS	6.98%
CONSTRUCTION OF MACHINERY AND VEHICLES	1.77%

Sustainable Finance Disclosure Regulation (SFDR) (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

As the investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation, the Fund's portfolio alignment with the Taxonomy Regulation is not calculated. It follows that the Fund does not currently commit to investing more than 0% of its assets in investments aligned with the Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

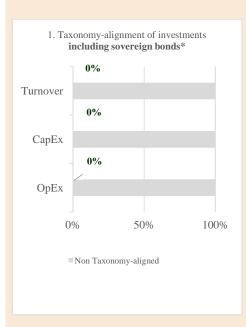

➤ No

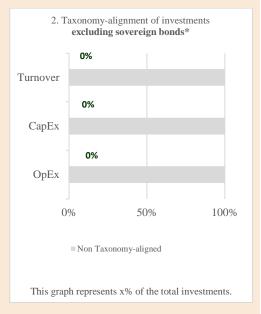

activities are expressed as a share of: - turnover

Taxonomy-aligned

- reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

^{*} For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxanomy Regulations was 0% for transitional activities and 0% for enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable for the first periodic report.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that was not aligned with the European Taxonomy Regulation is 11.77%.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What was the share of socially sustainable investments?

Socially sustainable investments represented 11.93% of the financial product.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes.

Any "#2 Other" potential investments, other than cash or cash equivalents are screened according to the Managers exclusion policy.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as a Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

Furthermore, the Fund invested 23.70% of its assets in "sustainable investments" as defined in Article 2 (17) of SFDR. Criteria to qualify an investment as "sustainable investment" are indicated in the above question "What were the objectives of the sustainable investments that the financial product partially intends to make and does the sustainable investments contribute to such objectives".

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fineco AM Euro Corp Bonds Fund **Legal entity identifier:** 549300JHYC8E0CZ4L556

Environmental and/or social characteristics

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a

sustainable
economic activities.
That Regulation
does not include a
list of socially
sustainable
economic activities.
Sustainable
investments with an
environmental
objective might be
aligned with the
Taxonomy or not.

Did this financial product have a sust	stainable investment objective?				
• • Yes	● ○ 🗶 No				
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 11.61% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective				
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments				

All actual data within this periodic report are calculated on the closing date of the accounting year.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product included;

- 1. Sustainable Investments: The Fund partially invested in sustainable investments as defined as investment in companies and issuers that contribute to an environmental and/or social objective, while doing no significant harm. As at 31 December the Fund had a proportion of 11.61% of sustainable investments.
- 2. Positive Screening: Consideration of ESG factors was a key element of portfolio construction. The Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social "laggards" from the Fund's investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supported a tilt towards investment in issuers that have a more positive impact on the environment or society at large.
- 3. Fund Level ESG Scoring: A monthly independent analysis and classification of the Fund's ESG score was performed internally by the Manager. A minimum ESG score of "A" was applied at Fund Level to ensure that the Fund's ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social characteristics.
- **4. Negative Screening (Norm-based exclusions):** The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:
 - United Nations Global Compact Principles
 - Controversial Weapons
 - Tobacco
 - Climate Change
 - Forced Labour

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

How did the sustainability indicators perform?

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund;

- i The percentage of the Fund portfolio made in sustainable investments which was 11.61% as at 31 December 2022
- ii The minimum Fund level ESG score was "A" as at 31 December 2022;
- iii The percentage of the Fund's portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 6.84% as at 31 December 2022; and
- iv The percentage of the Fund investment universe subject to the Manager's exclusion policy which was 6.84% as at 31 December 2022

...and compared to previous periods?

Not applicable for the first periodic report.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the sustainable investments that the Fund made was to promote environmental and/or social characteristics. The Fund assessed issuers of the underlying secrutiy and classified investment in issuers that met the below criteria as sustainable investments in line with Article 2 (17) of SFDR;

- a. Made in investee companies that demonstrate good governance;
- b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
- c. Made in investee companies that make a positive contribution towards an environmental or social objective. The Fund allocated between Underlying holdings with an environmental, and/or a social objective. The Fund did not favour any specific type of sustainable investment.

As at 31 December the Fund had a proportion of 11.61% of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective based on screening applied by the Manager through its Exclusion Policy.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

——— How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impact ("PAI") indicators were calculated at portfolio level. The results were compared with that of a chosen proxy benchmark representative of the Fund's investment universe and/or peers. These calculations are used as the basis of assessment of adverse impacts on sustainability factors in order to determine whether the Manager could improve at Fund level and/or where the Manager could engage with relevant issuers to improve on such indicators.

The Fund considered the following principal adverse sustainability impacts indicators for the proportion of assets qualified as sustainable investments:

Corporate mandatory indicators:

- 1. GreenHouse Gas (GHG) Emissions
- 2. Carbon footprint
- 3. GHG intensity of investee companies
- 4. Exposure to companies active in the fossil fuel sector
- 5. Share of non-renewable energy consumption and production
- 6. Energy consumption intensity per high impact climate sector
- 7. Activities negatively affecting biodiversity sensitive areas
- 8. Emissions to water
- 9. Hazardous waste ratio
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

- 15. GHG intensity
- 16. Investee countries subject to social violations

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments which the Fund made and their alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were assessed in the following ways;

- 1. Via PAI monitoring of the following indicators;
 - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
 - Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 2. Through ensuring that the sustainable investments that the Manager made are:
 - a. Made in investee companies that demonstrate good governance:
 - b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
 - c. Made in investee companies that make a positive contribution towards an environmental or social objective.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards are met. The results were compared with that of a chosen proxy benchmark representative of the Fund's investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

What was the proportion of sustainability-related investments?

11.61%

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

6.84% of the Fund's Investments were aligned with the environmental and/or social characteristics promoted by the Fund. The Fund also commits to a minimum proportion of 5% in sustainable investments and as at 31 December the Fund had a proportion of 11.61% of sustainable investments. The remaining investments of the Fund were invested in cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. Calculations may rely on incomplete or inaccurate company or third party data.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Unaudited Section (continued)

In which economic sectors were the investments made?

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear** energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

As the investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation, the Fund's portfolio alignment with the Taxonomy Regulation was not calculated. It follows that the Fund does not currently commit to investing more than 0% of its assets in investments aligned with the Taxonomy.

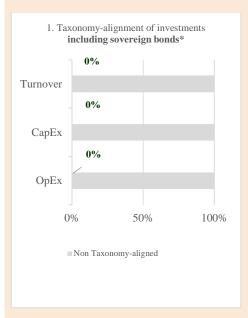

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes:		
		In fossil gas	In nuclear energy
×	No		

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable for the first periodic report.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that was not aligned with the European Taxonomy Regulation is 6.84%.

What was the share of socially sustainable investments?

Socially sustainable investments represented 7.16% of the financial product.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes.

Any "#2 Other" potential investments, other than cash or cash equivalents are screened according to the Manager's exclusion policy.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

Furthermore, the Fund invested 12% of its assets in "sustainable investments" as defined in Article 2 (17) of SFDR. Criteria to qualify an investment as "sustainable investment" are indicated in the above question "What were the objectives of the sustainable investments that the financial product partially intends to make and does the sustainable investments contribute to such objectives?".

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fineco AM Investment Grade Euro Aggregate Bond Fund

Legal entity identifier: 635400DX4FYP7WIXXR06

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?				
• • Yes	• No			
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 1.17% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective			
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments			

All actual data within this periodic report are calculated on the closing date of the accounting year.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of against the state of against the economy.

does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product included;

- Positive Screening: Consideration of ESG factors was a key element of portfolio construction. The Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social "laggards" from the Fund's investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supported a tilt towards investment in issuers that have a more positive impact on the environment or society at large.
- 2. Fund Level ESG Scoring: A monthly independent analysis and classification of the Fund's ESG score was performed internally by the Manager. A minimum ESG score of "A" was applied at Fund Level to ensure that the Fund's ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social Characteristics.
- **3. Negative Screening (Norm-based exclusions):** The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:
 - United Nations Global Compact Principles
 - Controversial Weapons
 - Tobacco
 - Climate Change
 - Forced Labour

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

• How did the sustainability indicators perform?

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund;

- i. The Fund level ESG score was rated MSCI "A" or above as at 31 December 2022;
- ii. The percentage of the Fund's portfolio rated above BB by MSCI ESG Manager (or an other corresponding rating from a similar rating provider) which was 96.51% as at 31 December 2022; and
- iii. The percentage of the Fund investment universe subject to the Manager's exclusion policy which was 96.51% as at 31 December 2022
- ...and compared to previous periods?

Not applicable for the first periodic report.

- What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives

 Not applicable
- How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards are met. The results were compared with that of a chosen proxy benchmark representative of the Fund's investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were;

Corporate mandatory indicators:

- 1. GreenHouse Gas (GHG) Emissions
- 2. Carbon footprint
- 3. GHG intensity of investee companies
- 4. Exposure to companies active in the fossil fuel sector
- 5. Share of non-renewable energy consumption and production
- 6. Energy consumption intensity per high impact climate sector
- 7. Activities negatively affecting biodiversity sensitive areas
- 8. Emissions to water
- 9. Hazardous waste ratio
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Sovereign mandatory indicator:

- 15. GHG intensity
- 16. Investee countries subject to social violations

More detailed information on the manner in which the Manager considers principal adverse impacts of investment decisions on sustainability factors taking due account of the size, the nature and scale of its activities and the types of financial products managed can be found in the Investment Manager's SFDR disclosure statement; "Statement on principal adverse impacts of investment decisions on sustainability factors".

companies follow

good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable

investments with an environmental objective might be aligned with the

Taxonomy or not.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product included:

- 1. Sustainable Investments: The Fund partially invested in sustainable investments as defined as investment in companies and issuers that contribute to an environmental and/or social objective, while doing no significant harm. As at 31 December the Fund had a proportion of 11.34% of sustainable investments.
- 2. Positive Screening: Consideration of ESG factors was a key element of portfolio construction. The Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social "laggards" from the Fund's investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supported a tilt towards investment in issuers that have a more positive impact on the environment or society at large.
- 3. Fund Level ESG Scoring: A monthly independent analysis and classification of the Fund's ESG score was performed internally by the Manager. A minimum ESG score of "A" was applied at Fund Level to ensure that the Fund's ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social characteristics.
- **4. Negative Screening (Norm-based exclusions):** The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:
 - United Nations Global Compact Principles
 - Controversial Weapons
 - Tobacco
 - Climate Change
 - Forced Labour

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

How did the sustainability indicators perform?

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund;

- i The percentage of the Fund portfolio made in sustainable investments which was 11.34% as at 31 December 2022
- ii The minimum Fund level ESG score was "A" as at 31 December 2022;
- iii The percentage of the Fund's portfolio rated above BB by MSCI ESG Manager (or another corresponding rating from a similar rating provider) which was 7.58% as at 31 December 2022; and
- iv The percentage of the Fund investment universe subject to the Manager's exclusion policy which was 7.58% as at 31 December 2022

...and compared to previous periods?

Not applicable for the first periodic report.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the sustainable investments that the Fund made was to promote environmental and/or social characteristics. The Fund assessed issuers of the underying secrutiy and classified investment in issuers that met the below criteria as sustainable investments in line with Article 2 (17) of SFDR;

- a. Made in investee companies that demonstrate good governance;
- b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
- c. Made in investee companies that make a positive contribution towards an environmental or social objective. The Fund allocated between Underlying holdings with an environmental, and/or a social objective. The Fund did not favour any specific type of sustainable investment.

As at 31 December the Fund had a proportion of 11.34% of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective based on screening applied by the Manager through its Exclusion Policy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human

rights, anti-

corruption and antibribery matters.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

— How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impact ("PAI") indicators were calculated at portfolio level. The results were compared with that of a chosen proxy benchmark representative of the Fund's investment universe and/or peers. These calculations are used as the basis of assessment of adverse impacts on sustainability factors in order to determine whether the Manager could improve at Fund level and/or where the Manager could engage with relevant issuers to improve on such indicators.

The Fund considered the following principal adverse sustainability impacts indicators for the proportion of assets qualified as sustainable investments:

Corporate mandatory indicators:

- 1. GreenHouse Gas (GHG) Emissions
- 2. Carbon footprint
- 3. GHG intensity of investee companies
- 4. Exposure to companies active in the fossil fuel sector
- 5. Share of non-renewable energy consumption and production
- 6. Energy consumption intensity per high impact climate sector
- 7. Activities negatively affecting biodiversity sensitive areas
- 8. Emissions to water
- 9. Hazardous waste ratio
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

- 15. GHG intensity
- 16. Investee countries subject to social violations

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

—— Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments which the Fund made and their alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were assessed in the following ways;

- 1. Via PAI monitoring of the following indicators;
 - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
 - Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- Through ensuring that the sustainable investments that the Manager made are:
 - d. Made in investee companies that demonstrate good governance:
 - e. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
 - f. Made in investee companies that make a positive contribution towards an environmental or social objective.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards are met. The results were compared with that of a chosen proxy benchmark representative of the Fund's investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were;

Corporate mandatory indicators:

- 1. GreenHouse Gas (GHG) Emissions
- 2. Carbon footprint
- 3. GHG intensity of investee companies
- 4. Exposure to companies active in the fossil fuel sector
- 5. Share of non-renewable energy consumption and production
- 6. Energy consumption intensity per high impact climate sector
- 7. Activities negatively affecting biodiversity sensitive areas
- 8. Emissions to water
- 9. Hazardous waste ratio
- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

- 15. GHG intensity
- 16. Investee countries subject to social violations

What was the proportion of sustainability-related investments?

11.34%

What was the asset allocation?

7.58% of the Fund's Investments were aligned with the environmental and/or social characteristics promoted by the Fund. The Fund also commits to a minimum proportion of 5% in sustainable investments and as at 31 December the Fund had a proportion of 11.34% of sustainable investments. The remaining investments of the Fund were invested in cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. Calculations may rely on incomplete or inaccurate company or third party data.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Asset allocation

describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

As the investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation, the Fund's portfolio alignment with the Taxonomy Regulation was not calculated. It follows that the Fund does not currently commit to investing more than 0% of its assets in investments aligned with the Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

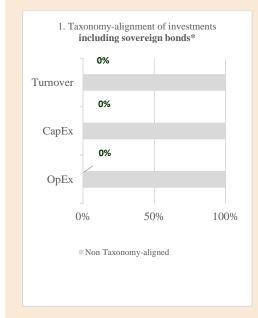

Yes:

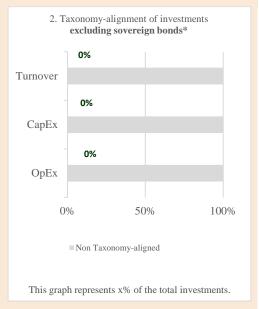

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxonomy Regulations was 0% for transitional activities and 0% for enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable for the first periodic report.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that was not aligned with the European Taxonomy Regulation is 7.58%.

What was the share of socially sustainable investments?

Socially sustainable investments represented 7.21% of the financial product.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes.

Any "#2 Other" potential investments, other than cash or cash equivalents are screened according to the Manager's exclusion policy.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

Furthermore, the Fund invested 11% of its assets in "sustainable investments" as defined in Article 2 (17) of SFDR. Criteria to qualify an investment as "sustainable investment" are indicated in the above question "What were the objectives of the sustainable investments that the financial product partially intends to make and does the sustainable investments contribute to such objectives?".

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product included:

- 1. Sustainable Investments: The Fund partially invested in sustainable investments as defined as investment in companies and issuers that contribute to an environmental and/or social objective, while doing no significant harm. As at 31 December the Fund had a proportion of 22.38% of sustainable investments.
- 2. Positive Screening: Consideration of ESG factors was a key element of portfolio construction. The Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social "laggards" from the Fund's investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supports a tilt towards investment in issuers that have a more positive impact on the environment or society at large.
- 3. Fund Level ESG Scoring: A monthly independent analysis and classification of the Fund's ESG score was performed internally by the Manager. A minimum ESG score of "A" was applied at Fund Level to ensure that the Fund's ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social Characteristics.
- **4. Negative Screening (Norm-based exclusions):** The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:
 - United Nations Global Compact Principles
 - Controversial Weapons
 - Tobacco
 - Climate Change
 - Forced Labour

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

How did the sustainability indicators perform?

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund;

- i The percentage of the Fund portfolio made in sustainable investments was 22.38% as at 31 December 2022.
- ii The Fund level ESG score was rated MSCI "A" or above as at 31 December 2022:
- iii The percentage of the Fund's portfolio rated above BB by MSCI ESG Manager (or an other corresponding rating from a similar rating provider) which was 22.38% as at 31 December 2022; and
- iv The percentage of the Fund investment universe subject to the Manager's exclusion policy which was 22.38% as at 31 December 2022.

...and compared to previous periods?

Not applicable for the first periodic report.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives

The objectives of the sustainable investments that the Fund made was to promote environmental and/or social characteristics. The Fund assessed issuers of the underlying secrutiy and classified investment in issuers that met the below criteria as sustainable investments inline with Article 2 (17) of SFDR;

- a. Made in investee companies that demonstrate good governance;
- b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
- c. Made in investee companies that make a positive contribution towards an environmental or social objective. The Fund allocated between Underlying holdings with an environmental, and/or a social objective. The Fund did not favour any specific type of sustainable investment.

As at 31 December the Fund had a proportion of 22.38% of sustainable investments

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective based on screening applied by the Manager through its Exclusion Policy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

— How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impact ("PAI") indicators were calculated at portfolio level. The results were compared with that of a chosen proxy benchmark representative of the Fund's investment universe and/or peers. These calculations are used as the basis of assessment of adverse impacts on sustainability factors in order to determine whether the Manager could improve at Fund level and/or where the Manager could engage with relevant issuers to improve on such indicators.

The Fund considered the following principal adverse sustainability impacts indicators for the proportion of assets qualified as sustainable investments:

Corporate mandatory indicators:

- 1. GreenHouse Gas (GHG) Emissions
- 2. Carbon footprint
- 3. GHG intensity of investee companies
- 4. Exposure to companies active in the fossil fuel sector
- 5. Share of non-renewable energy consumption and production
- 6. Energy consumption intensity per high impact climate sector
- 7. Activities negatively affecting biodiversity sensitive areas
- 8. Emissions to water
- 9. Hazardous waste ratio
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

- 15. GHG intensity
- 16. Investee countries subject to social violations

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

——— Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments which the Fund made and their alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were assessed in the following ways;

- 1. Via PAI monitoring of the following indicators;
 - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
 - Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- Through ensuring that the sustainable investments that the Manager made are:
 - a. Made in investee companies that demonstrate good governance:
 - b. Made in a manner that demonstrates that they do no significant harm to other environmental objectives; and
 - c. Made in investee companies that make a positive contribution towards an environmental or social objective.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards are met. The results were compared with that of a chosen proxy benchmark representative of the Fund's investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were;

Corporate mandatory indicators:

- 1. GreenHouse Gas (GHG) Emissions
- 2. Carbon footprint
- 3. GHG intensity of investee companies
- 4. Exposure to companies active in the fossil fuel sector
- 5. Share of non-renewable energy consumption and production
- 6. Energy consumption intensity per high impact climate sector
- 7. Activities negatively affecting biodiversity sensitive areas
- 8. Emissions to water
- 9. Hazardous waste ratio
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises

What was the proportion of sustainability-related investments? 22.38%

What was the asset allocation?

97.24% of the Fund's Investments were aligned with the environmental and/or social characteristics promoted by the Fund. The Fund also commits to a minimum proportion of 10% in sustainable investments and as at 31 December the Fund had a proportion of 22.38% of sustainable investments. The remaining investments of the Fund were invested in cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes. Calculations may rely on incomplete or inaccurate company or third party data.

Investments #1 Aligned with E/S characteristics #1B Other E/S characteristics

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Asset allocation

describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

As the investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation, the Fund's portfolio alignment with the Taxonomy Regulation is not calculated. It follows that the Fund does not currently commit to investing more than 0% of its assets in investments aligned with the Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

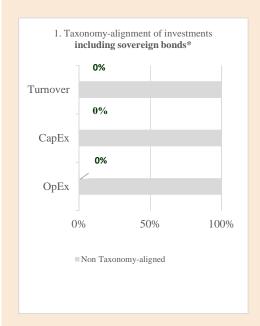

In nuclear energy

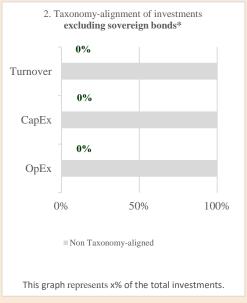

No

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the share
 of revenue from
 green activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational
 expenditure
 (OpEx) reflecting
 green operational
 activities of
 investee
 companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the EU Taxanomy Regulations was 0% for transitional activities and 0% for enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable for the first periodic report.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that was not aligned with the European Taxonomy Regulation is 6.25%.

What was the share of socially sustainable investments?

Socially sustainable investments represented 17.50% of the financial product.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes.

Any "#2 Other" potential investments, other than cash or cash equivalents are screened according to the Managers exclusion policy.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as a Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

Furthermore, the Fund invested 22.38% of its assets in "sustainable investments" as defined in Article 2 (17) of SFDR. Criteria to qualify an investment as "sustainable investment" are indicated in the above question "What were the objectives of the sustainable investments that the financial product partially intends to make and does the sustainable investments contribute to such objectives".

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or
social objective and
that the investee
companies follow
good governance

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.

practices.

That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund applied, in addition to the regulatory mandated exclusions with regards to controversial weapons and sovereign debt sanctions, additional exclusions based on the following factors:

- Level of involvement in Coal extraction and production.
- Level of involvement in Unconventional Oil and Gas such as arctic oil and gas exploration extraction, oil sands extraction and Shale Energy extraction.
- Level of involvement in Tobacco production and tobacco related products.
- Level of involvement with recreational cannabis.
- Companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the Non-Proliferation Treaty.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

In addition, companies were excluded if they were assessed as being in violation of any of the UN Global Compact's principles, based on third parties' data and the Investment Manager's proprietary analysis and research.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. This included:

Sustainability Indicator	Indicator performance
Exclusions with regards to controversial weapons	Companies that generate any of their revenue from controversial weapons were excluded
Exclusions with regards to sovereign debt sanctions	Countries that had "severe violations" were excluded
Level of involvement in Coal extraction and production.	Companies that generate >=5% of revenue from thermal coal extraction or >=10% of revenue from Thermal Coal Power Generation were excluded
Level of involvement in Unconventional Oil and Gas such as arctic oil and gas exploration extraction, oil sands extraction and Shale Energy extraction;	Companies that generate >= 5% of revenue from unconventional Oil and Gas were excluded (i.e. arctic oil & gas exploration, oil sands extraction, or shale energy extraction)
Level of involvement in Tobacco production and tobacco related products;	Companies that generate >=5% of revenue from Tobacco products production or Tobacco related products and services were excluded Compnies that generate >=15% of revenue from Toacco Products Overall were excluded
Level of involvement with recreational cannabis;	Companies that generate >=5% of their revenue from recreational cannabis were excluded
Companies excluded as being in violation of any UN Global Compact's principles	All non-compliant companies were excluded

...and compared to previous periods?

NA

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

NA

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery

matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

NA

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

NA

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors by carrying out a qualitative and quantitative review of key metrics (being the mandatory indicators defined in Table 1 of the Annex I of the regulatory technical standards for SFDR and any applicable additional indicators). The Fund identified priority investee entities using thresholds on each principal adverse impacts indicator and engaged through methods such as letters, meetings, proxy voting. If no improvement was established through such corporate engagement, then the Fund proceeded to divest and/or exclude investments.

Data as at 31st Dec 2022

Asset allocation

describes the share of investments in specific assets.

Enabling activities directly enable other

enable other activities to make a substantial contribution to an environmental objective.

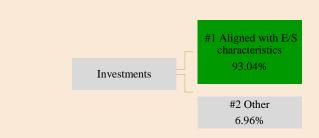

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the proportion of sustainability-related investments?

What was the asset allocation?

100% of the Fund's portfolio (except for cash -6.96% as at 31^{st} Dec 2022) was aligned with the environmental and or social characteristics.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

What was the share of socially sustainable investments?

NA

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

"#2 Other" investments include the remaining investments which were neither aligned with the environmental and social characteristics, nor are qualified as sustainable investments. They were investments that were treated as neutral, such as cash and money market instruments and derivatives used with the aim of reducing risk (hedging) or efficient portfolio management purposes. They may have been excluded from the Sub-Fund's ESG exposure calculation.

~6.96% reflects Cash (or near cash) for the whole portfolio as of 31 December 2022.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In additional to the regulatory mandated and additional exclusions outlined in the answer to the second question of the report, Invesco researched the following issuers, to establish whether a credible strategy was in place to address the PAIs, within a reasonable timeframe.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Holding	Principal Adverse Impact	Action Taken
A North American based Glass container compancy	PAI 1/2 - Contribution_ISS Scope 1 + 2 Financed Emissions	Research outcome The company operates in a hard to decarbonise industry. Notwithstanding this, they have acknowledged the issue and have set a stretching carbon reduction target. Furthermore, their target is approved by SBTi. "As the first glass packaging company to obtain an approved Science-Based Targets initiative GHG emissions reduction goal, 1 our journey to a lower-carbon future begins with working to achieve our 2030 target to reduce GHG emissions by 25%"
A North American based food company	PAI 6: SA Energy Consumption Intensity_Manufacturing-SFDR	Research outcome The issuer has expanded its business very rapidly in recent years and recent increases seen in Energy intensity may not be representative of future trends. The North American part of the business which has grown rapidly is more energy efficient than its South American business so as this grows, energy intensity should decline. Invesco will continue to monitor the company's strategy to decrease its energy consumption intensity.
A European based food company	PAI 6: SA Energy Consumption Intensity_Manufacturing-SFDR	Research outcome During 2021, renewable energy expanded significantly. Renewables now account for 29% of total power utilized. Renewable power uses expanded by 22% from 2020 to 2021. Invesco will continue to monitor the company's strategy to decrease its energy consumption intensity.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow

good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The E/S characteristics of this product included:

Sustainable investments Although the product has not committed to make any sustainable investments, the product partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the product did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The product used a benchmark which is not aligned with the product's E/S characteristics.

How did the sustainability indicators perform?

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the product partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomyaligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that support the UN SDGs or Taxonomy-aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

How were the indicators for adverse impacts on sustainability factors taken into account?

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product included:

- 1. Positive Screening: Consideration of ESG factors was a key element of portfolio construction. The Manager determined how companies integrated environmental and/or social characteristics by analysing environmental and/or social ratings attributed to such companies with the exclusion of environmental and/or social "laggards" from the Fund's investment portfolio. By incorporating positive environmental and/or social factors as part of the overall portfolio construction process, the Fund through its investments supported a tilt towards investment in issuers that have a more positive impact on the environment or society at large.
- 2. Fund Level ESG Scoring: A monthly independent analysis and classification of the Fund's ESG score was performed internally by the Manager. A minimum ESG score of "A" was applied at Fund Level to ensure that the Fund's ESG score did not fall below a level deemed by the Manager to be appropriate for a fund promoting environmental and/or social characteristics. This additional control served to highlight a minimum Fund level ESG score and promoted engagement and challenge of portfolio managers to select more positive issuers, demonstrating better environmental and/or social Characteristics.
- **3. Negative Screening (Norm-based exclusions):** The Manager applied norms-based exclusions based on its Exclusion Policy. Exclusion categories considered in the Exclusion Policy were:
 - United Nations Global Compact Principles
 - Controversial Weapons
 - Tobacco
 - Climate Change
 - Forced Labour

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

How did the sustainability indicators perform?

The following sustainability indicators were used to measure the attainment of the environmental and social characteristics promoted by the Fund;

- i. The Fund level ESG score was rated MSCI "A" or above as at 31 December 2022:
- ii. The percentage of the Fund's portfolio rated above BB by MSCI ESG Manager (or an other corresponding rating from a similar rating provider) which was 94.18% as at 31 December 2022; and
- iii. The percentage of the Fund investment universe subject to the Manager's exclusion policy which was 94.18% as at 31 December 2022

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

...and compared to previous periods?

Not applicable for the first periodic report.

- What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives Not applicable
- How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Manager considered principal adverse impacts of its investment decisions on sustainability factors on an ongoing basis by monitoring the Fund portfolio against mandatory and additional PAI indicators and as part of its investment decision making process and investment due diligence process and procedures. Principal adverse impacts were prioritized based on materiality relative to the objectives or characteristics of the Fund, provided that all minimum standards are met. The results were compared with that of a chosen proxy benchmark representative of the Fund's investment universe and/or peers. These calculations formed the basis of assessment of adverse impacts on sustainability factors in order to determine what the Portfolio Managers could improve at Fund level and where the Portfolio Managers could engage with relevant issuers to improve on such indicators.

The specific PAI indicators that were taken into consideration for this product were;

Corporate mandatory indicators:

- 1. GreenHouse Gas (GHG) Emissions
- 2. Carbon footprint
- 3. GHG intensity of investee companies
- 4. Exposure to companies active in the fossil fuel sector
- 5. Share of non-renewable energy consumption and production
- 6. Energy consumption intensity per high impact climate sector
- 7. Activities negatively affecting biodiversity sensitive areas
- 8. Emissions to water
- 9. Hazardous waste ratio
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators: Environment

4. Investments in companies without carbon emission reduction initiatives Social

Corporate voluntary indicators: Social

9. Lack of a human rights policy

Sovereign mandatory indicator:

- 15. GHG intensity
- 16. Investee countries subject to social violations

Sustainable Finance Disclosure Regulation (SFDR) (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

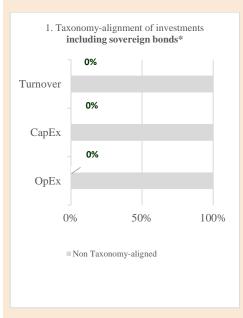

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes:			
		In fossil gas	In nuclear en	ergy
×	No			

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the share
 of revenue from
 green activities of
 investee
 companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The share of investments in transitional and enabling activities within the meaning of the EU Taxanomy Regulations was 0% for transitional activities and 0% for enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

What was the share of socially sustainable investments?

Not applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund includes cash and cash equivalents for liquidity purposes and derivatives which may be used for investment, risk reduction and hedging purposes.

Any "#2 Other" potential investments, other than cash or cash equivalents are screened according to the managers exclusion policy.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Manager has integrated various house ESG policies and procedures to ensure the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product, such as a Positive Screening, Fund Level ESG Scoring and Negative Screening have been implemented and are monitored regularly.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/85

Product name: Fidelity Sustainable Water & Waste FAM Fund

Legal entity identifier: 2549002N1GC1ZSIQ9R66

Environmental and/or social characteristics

	ustainable investment objective? [tick and fill in minimum commitment to sustainable investments]
• • Yes	• x No
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 40.1% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
It made sustainable	It promoted E/S characteristics, but did
investments with a social objective:%	not make any sustainable investments

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period under review. The Fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. The Fund invests in companies involved in the production of water and the treatment, disposal, and recycling of waste.

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

How did the sustainability indicators perform?

The performance of the sustainability indicators the mandate used to measure the attainment of the sustainable environmental or social characteristics that it promoted during the period in review as of 31 of december 2022 was:

- i) 84% of the mandate was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments in corporate issuers, 0% of the mandate invested in securities of issuers with exposure to the Exclusions;
- iii) 40.1% of the mandate was invested in sustainable investments;
- 5.8% of the mandate was invested in sustainable investments with an environmental objective in economic activities (that qualify as environmentally sustainable under the EU Taxonomy);
- v) 25.1% of the mandate was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);
- vi) 10% of the mandate invested in sustainable investments with a social objective.

...and compared to previous periods?

Not applicable as this is the first reporting period

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 40.1% of sustainable investments

The mandate determined a sustainable investment as follows:

- issuers that undertook economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and anti-

bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that caused significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standards that relate to principal adverse indicators (PAIs) as well as performance on PAI metrics. This included:

Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);

Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and

- —PAI indicators: quantitative data (where available) on PAI indicators was used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.
- How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators. Issuers with a low score was ineligible to be 'sustainable investments' Fidelity's fundamental research determined that the company was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which met their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions When investing directly in corporate issuers, the Fund applied the Exclusions (as defined below) to help mitigate PAI through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC.

In respect of its direct investments, the Fund was subject to:

- a) a firm-wide exclusions list, which included cluster munitions and anti-personnel landmines, and
- b) a principle-based screening policy which included:
 - norms-based screening of issuers which the investment manager considered to have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
 - ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may have been applied.
- c) Fineco Asset Management DAC Investment Exclusion Policy effective on 27 July 2022.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information Sustainable investing framework (fidelityinternational.com) and further details on the Exclusion Policy can be found on the Management Company's website at the following link <u>FAM - Sustainability | Fineco FAM - Fineco FAM</u> (finecoassetmanagement.com)

The investment manager also had discretion to implement enhanced, stricter sustainable requirements and exclusions from time to time.

- (i) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (ii) Voting Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (iii) Quarterly reviews monitoring of principal adverse impacts through The Fund's quarterly review process.

The specific PAI indicators that were taken into consideration were subject to data availability and may evolve with improving data quality and availability. In certain circumstances, such as indirect investments made by The Fund, PAI may not have been considered.

What was the proportion of sustainability-related investments?

The Fund invested 40.1% in sustainable investments for the period in review

Asset allocation

describes the share of investments in specific assets.

[include note for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- capital
 expenditure
 (CapEx) shows the
 green investments
 made by investee
 companies,
 relevant for a
 transition to a
 green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

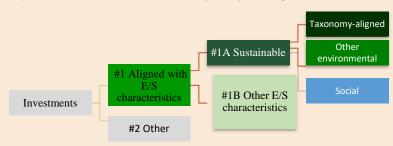

What was the asset allocation?

(#1 aligned with E/S characteristics) The Fund will invest:

- 1. 84% of its assets in securities of issuers with favourable ESG characteristics;
- 2. 40.1% in sustainable investments (#1A sustainable)* of which 5.8% have an environmental objective (which is aligned with the EU Taxonomy), 25.1% have an environmental objective (which is not aligned with the EU Taxonomy) 10% have a social objective.

(#1B Other E/S characteristics) Includes securities of issuers with favourable ESG characteristics but are not sustainable investments.

[Include only relevant boxes, remove irrelevant ones for the financial product]

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

[include the note below where the financial product made sustainable investments]

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

[include note only for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852]

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

[include note for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852 that invest in environmental economic activities that are not environmentally sustainable economic activities]

In which economic sectors were the investments made?

Economic sectors of the investments made during the period in review were

Sector	Fund - % TNA
INDUSTRIALS	44.2
UTILITIES	16.4
CONSUMER DISCRETIONARY	11.4
CASH	8.4
MATERIALS	8.0
INFORMATION TECHNOLOGY	6.4
HEALTH CARE	5.3

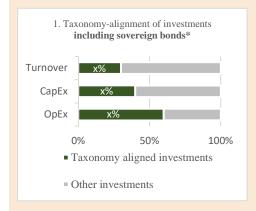

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy? [include section for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852 and include information in accordance with Article 51 of this Regulation]

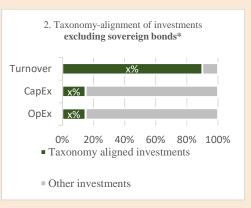

The fund invested 5.8% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the Mandate with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

The taxonomy alignment of the underlying investments of the Mandate is measured by turnover.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, `sovereign bonds' consist of all sovereign exposures

Turnover - 5.8% Capex - 0% Opex - 0%

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

What was the share of investments made in transitional and enabling activities?

Due to data constraints, we aim to report the share of investments in transitional and enabling activities in our next periodic disclosure.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 25.1% in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

The fund invested 10% in sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund may be invested in securities of issuers that are able to demonstrate that they are on an improving trajectory with respect to their ESG characteristics, as well as cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the Fund will adhere to the Exclusions

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment managers proprietary ESG ratings framework as well as their access to external ESG data providers and ratings agencies have allowed them to assess the ESG characteristics of fund holdings over the period, and maintain a consideration of Principle Adverse Impacts. Included in the assessment is to what extent the issuers of these securities deliver on our expectations for best practices. Additionally, the Investment manager have instated a Quarterly Sustainability Review for their Article 8 funds, which has created a specific forum for discussion of the funds qualitative and quantitative ESG characteristics, and whether they are consistent with requirements and client expectations. This is an extension of their pre-existing risk and compliance processes. Where appropriate they have utilised their spheres of influence on companies via active engagement and stewardship activities.

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: JPMorgan China A-Shares Opportunities FAM Fund

Legal entity identifier: 254900X39YSDFXAY5889

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes X No It made sustainable investments It promoted Environmental/Social (E/S) with an environmental characteristics and while it did objective: % not have as its objective a sustainable investment, it had a proportion of 45.70% of sustainable investments in economic activities that qualify with an environmental as environmentally sustainable objective in economic under the EU Taxonomy activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not with an environmental X qualify as environmentally objective in economic activities sustainable under the EU that do not qualify as Taxonomy environmentally sustainable under the EU Taxonomy X with a social objective It made sustainable It promoted E/S characteristics, b did not make any sustainable investments with a social investments objective: %

an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable investment means an investment in

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. Regulation does not lay down a list of socially sustainable economic Sustainable activities. investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Strategy set out to promote a broad range of environmental, social and governance characteristics through its investment inclusion criteria, specifically with a minimum asset allocation of 51% of investments having environmental and / or social characteristics and a minimum of 10% of investments being sustainable investments. This commitment was met throughout the reference period (1 January 2022 - 31 December 2022). At the end of the reference period, the Strategy held 94.14% of investments with environmental and / or social characteristics and 45.70% of sustainable investments.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

These investments were determined by the application of an inclusion and exclusion criteria which applied at both an asset and product level. The inclusion criteria is underpinned by an ESG score assigned to all investments within the strategy to identify those that may be considered to have environmental and / or social characteristics and those that meet the thresholds for being considered as sustainable investment.

The ESG score takes into account the following indicators: effective management of toxic emissions, waste, good environmental record and social characteristics such as effective sustainability disclosures, positive scores on labour relations and management of safety issues.

Through its exclusion criteria (which applied both full and partial exclusions); the Sub-Fund promoted certain norms and values including supporting the protection of internationally proclaimed human rights. The Sub-Fund fully excluded companies that are involved in the manufacture of controversial weapons and applied maximum revenue or production thresholds to others such as those that are involved in thermal coal and tobacco.

In relation to the consideration of Good Governance, all investments (excluding cash and derivatives) were screened to exclude known violators of good governance practices. In addition, for those investments considered to have environmental and / or social characteristics or qualifying sustainable investments, additional considerations applied. For these investments, the Sub-Fund incorporated a peer group comparison and screened out companies that did not score in the top 80% relative to peers based on good governance indicators.

The Sub-Fund had no specific allocation targets in favour of either environmental or social characteristics. The extent to which the promoted environmental and social characteristics were met may be understood by considering the actual % of assets allocated to the relevant companies for the Reference Period exhibiting such characteristics.

In summary: the Sub-Fund met its pre-contractual committed minimums related to environmental and / or social characteristics and sustainable investments policy throughout the reference period. The Sub-Fund applied screens with the aim of excluding all potential investments prohibited under its exclusion policy throughout this period. The extent to which the norms and values promoted by the Sub-Fund were met is based on whether the Sub-Fund held any companies during the Reference Period that would have been prohibited under the exclusion policy. The Investment Manager has no indication that such companies were held. The Investment Manager informs that the continuity of the percentage values and information disclosed cannot be guaranteed in the future and is subject to the constantly evolving legal and regulatory landscape. The duration of the reference period can be less than 12 months if the fund was launched, closed or changed its Article 8/9 status during this time.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

A combination of the Investment Manager's proprietary ESG scoring methodology: consisting of the Investment Manager's proprietary ESG score, and / or third-party data was used as part of the inclusion criteria to measure the attainment of the environmental and / or social characteristics that the Sub-Fund promotes.

The methodology was based on a company's management of relevant environmental or social issues such as its toxic emissions, waste management, labour relations and safety issues, diversity / independence of the board of directors and data privacy. To be included in the 51% of assets considered to be promoting environmental and / or social characteristics, a company must score in the top 80% relative to its peers on either its environmental score or social score and meet the good governance conditions outlined above.

At the end of the reference period, the Strategy held 94.14% of investments with environmental and / or social characteristics and 45.70% of sustainable investments.

In respect of the applied norms and values based exclusions, the Investment Manager utilised data to measure a company's participation in the relevant activities. Screening on that data resulted in full exclusions on certain potential investments and partial exclusions based on maximum percentage thresholds on revenue or production as envisaged through the exclusions policy. Throughout the reference period, and at no point, were the exclusion rules breached. A subset of the "Adverse Sustainability Indicators" as set out in the EU SFDR Regulatory Technical Standards was also incorporated in the screening.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

The Strategy had no specific allocation targets in favour of either environmental or social characteristics and therefore the performance of the indicators in respect of specific environmental or social characteristics is not set out here.

...and compared to previous periods?

Not applicable for 2022

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the Strategy partially made was comprised of any individual or combination of the following during the Reference Period:

Environmental Objectives: (i) climate risk mitigation, (ii) transition to a circular economy

Social Objectives: (i) inclusive and sustainable communities - increased female executive representation, (ii) inclusive and sustainable communities - increased female representation on boards of directors, and (iii) provision of a decent working environment and culture

Contribution to such objectives may be understood by considering the actual % of assets allocated to sustainable investments for the Reference Period. The Strategy was required to invest 10% in sustainable investments. At no time during the period did the Strategy hold sustainable investments below its committed minimum. At the end of the reference period, 45.70% of its assets were sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Sub-Fund intended to make were subject to a screening process that sought to identify and exclude, from qualifying as a sustainable investment, those companies which the Investment Manager considered the worst performing companies, based on a threshold determined by the Investment Manager, in relation to certain environmental considerations. As a consequence, only those companies demonstrating the best indicators relative to both absolute and relative measures were considered sustainable investments.

Such considerations include climate change, protection of water and marine resources, transition to a circular economy, pollution and protection of biodiversity and ecosystems. In addition, the Investment Manager also applied a screen that sought to identify and exclude those companies that the Investment Manager considers to be in violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights based on data supplied by third-party service providers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and anti-bribery matters.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

__ How were the indicators for adverse impacts on sustainability factors taken into account?

The indicators for adverse impacts on sustainability factors in Table 1 of Annex 1 and certain indicators, as determined by the Investment Manager, in Tables 2 and 3 of Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account as further described below. The Investment Manager used either the metrics in the EU SFDR Regulatory Technical Standards, or where this was not possible due to data limitations or other technical issues, a representative proxy. The Investment Manager consolidated the consideration of certain indicators into a "primary" indicator as set out further below and may have used an additional broader set of indicators than referenced below.

The relevant indicators in Table 1 of Annex 1 of the EU SFDR Regulatory Technical Standards consist of 9 environmental and 5 social and employee related indicators. The environmental indicators are listed at 1-9 and relate to green-house gas emissions (1-3), exposure to fossil fuel, share of non-renewable energy consumption and production, energy consumption intensity, activities negatively affecting biodiversity sensitive areas, emissions to water and hazardous waste (4-9 respectively). Indicators 10 – 14 relate to a company's social and employee matters and cover violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises, lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles, unadjusted gender pay gap, Board gender diversity and exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons) respectively.

The Investment Manager's approach included both quantitative and qualitative aspects to take the above indicators into account. It used particular indicators for screening, seeking to exclude companies that may cause significant harm. It used a subset for engagement with certain companies, seeking to influence best practice and it used certain of them as indicators of positive sustainability performance, by applying a minimum threshold in respect of the indicator to qualify as a sustainable investment. The data needed to take the indicators into account, where available, may have been obtained from investee companies themselves and / or supplied by third-party service providers (including proxy data). Data inputs that are self-reported by companies or supplied by third-party providers may be based on data sets and assumptions that may be insufficient, of poor quality or contain biased information. Due to dependency on third-parties, the Investment Manager cannot guarantee the accuracy or completeness of such data.

Screening

Certain of the indicators were taken into account through the values and norms-based screening to implement exclusions. These exclusions took into account indicators 10 and 14 in relation to UN Global Compact principles and OECD Guidelines for Multinational Enterprises and controversial weapons. The Investment Manager also applied a purpose-built screen. Due to certain technical considerations, such as data coverage in respect of specific indicators, the Investment Manager either applied the specific indicator per Table 1 or a representative proxy, as determined by the Investment Manager to screen investee companies in respect of the relevant environmental or social & employee matters. For example, greenhouse gas emissions are associated with several indicators and corresponding metrics in Table 1, such as greenhouse gas emissions, carbon footprint and greenhouse gas intensity (indicators 1-3). The Investment Manager used greenhouse gas intensity data (indicator 3), data in respect of non-renewable energy consumption and production (indicator 5) and data on energy consumption intensity (indicator 6) to perform its screening in respect of greenhouse gas emissions.

In connection with the purpose-built screening and in respect of activities negatively affecting biodiversity sensitive areas and the emissions to water (indicators 7 and 8), due to data limitations, third-party representative proxy data was used, rather than the specific indicators per Table 1. The Investment Manager also took into account indicator 9 in relation to hazardous waste in respect of the purpose-built screen.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Engagement

In addition to screening out certain companies as described above, the Investment Manager engaged on an ongoing basis with selected underlying investee companies. A subset of the indicators were used, subject to certain technical considerations such as data coverage, as the basis for engaging with selected underlying investee companies in accordance with the approach taken by the Investment Manager on stewardship and engagement. The indicators used in respect of such engagement include indicators 3, 5 and 13 in relation to greenhouse gas intensity, share of non-renewable energy and board gender diversity from Table 1. It also used indicators 2 in Table 2 and 3 in Table 3 in relation to emissions or air pollutants and number of days lost to injuries, accidents, fatalities or illness.

Indicators of sustainability

The Investment Manager used indicators 3 and 13 in relation to GHG Intensity and board gender diversity as indicators of sustainability to assist in qualifying an investment as a sustainable investment. One of the pathways required a company to be considered as an operational peer group leader to qualify as a sustainable investment. This required scoring against the indicator in the top 20% relative to peers.

_ Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms based portfolio exclusions as described above under "To what extent were the environmental and / or social characteristics promoted by this financial product met?" were applied to seek alignment with these guidelines and principles. Third-party data was used to identify potential violators. Unless an exception was granted, the Strategy prohibited relevant investments in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Strategy considered select principal adverse impacts on sustainability factors through values and norms-based screening to implement exclusions. Indicators 10 and 14 in relation to violations of the UN Global Compact and controversial weapons from the EU SFDR Regulatory Technical Standards were used in respect of such screening. The Sub-Fund also used certain of the indicators as part of the "Do No Significant Harm" screen as detailed in the response to the question directly above to demonstrate that an investment qualified as a sustainable investment.

A subset of the above-mentioned Adverse Sustainability Indicators were used to determine engagement with investee companies based on their respective PAI performance.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

01 January 2022 to

31 December 2022

7

What was the proportion of sustainability-related investments?

What was the asset allocation?

At the end of the reference period, the Strategy allocated 94.14% of its assets to companies that exhibited positive environmental and / or social characteristics and 45.70% of assets to sustainable investments. The Strategy did not commit to investing any proportion of assets specifically in securities exhibiting positive environmental characteristics or specifically in positive social characteristics nor is there any commitment to any specific individual or combination of environmental or social objectives.

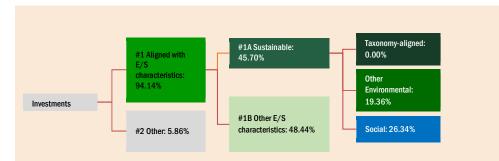

Ancillary Liquid Assets, Deposits with Credit Institutions, money market instruments / funds (for managing cash subscriptions and redemptions as well as current and exceptional payments) and derivatives for EPM are not included in the % of assets set out in the table below. These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

Asset allocation

describes the share of investments in specific assets.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Data on EU Taxonomy alignment is currently very limited, in particular with regards to fossil gas and nuclear energy. We expect this to improve over time as more companies disclose their alignment, and the data becomes available.

In the interim the Strategy has made no minimum commitment to sustainable investment with environmental objectives aligned to the EU Taxonomy.

Therefore, the precontractual disclosure document for the Sub-Fund indicates the extent of targeted sustainable investments with an environmental objective aligned with the EU Taxonomy as 0.00%. Any alignment outlined below is a by-product of the Strategy's framework which considers investments that have environmental and / or social characteristics and sustainable investments.

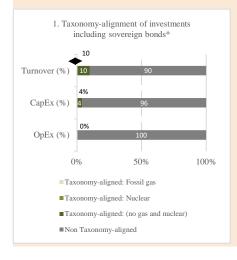

The below graphs illustrate the actual extent of investments in sustainable investments with an environmental objective aligned with the EU Taxonomy as measured at the end of the reference period.

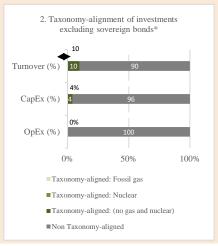

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee company today.
- capital expenditure (Capex) shows the green investments made by investee companies, relevant to a transition to a green economy.
- operational expenditure (Opex) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sove bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the final product including sovereign bonds, while the second graph shows the Taxonomy alignment or relation to the investments of the financial product other than sovereign bonds.

This graph represents 14% of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

What was the share of investments made in transitional and enabling activities?

Further to the above, the Strategy has made no minimum commitment to making EU Taxonomy aligned investments – including Transitioning and Enabling activities. Any alignment outlined below is a by-product of the Strategy's framework which considers investments that have environmental and / or social characteristics and sustainable investments.

The calculated share of Transitioning activities represents 0.00% and the calculated share of Enabling activities represents 6.75%, at the end of the reference period.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 19.36% of assets at the end of the reference period.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 26.34% of assets at the end of the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 5.86% of assets in "other" investments were comprised of companies that did not meet the criteria described in response to above question entitled, "How did the sustainability indicators perform?" to qualify as exhibiting positive environmental or social characteristics. They are investments for diversification purposes. Ancillary Liquid Assets, Deposits with Credit Institutions, money market instruments / funds (for managing cash subscriptions and redemptions as well as current and exceptional payments) and derivatives for EPM were not included in the % of assets included in the asset allocation diagram above, including under "other". These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

All investments, including "other" investments were subject to the following ESG Minimum Safeguards / principle:

- The minimum safeguards as outlined by Article 18 of the EU Taxonomy Regulation (including alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights), as implemented by the Investment Manager.
- Application of good governance practices (these include sound management structures, employee relations, remuneration of staff and tax compliance), as implemented by the Investment Manager.
- Compliance with the Do No Significant Harm principle as prescribed under the definition of sustainable investment in EU SFDR.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The following binding elements of the investment strategy were applied during the reference period to select the investments to attain each of the environmental or social characteristics:

- The requirement to invest at least 51% of assets in companies with positive environmental and / or social characteristics.
- The values and norms based screening to implement full exclusions in relation to companies that are
 involved in certain activities such as manufacturing controversial weapons and applying maximum
 revenue, production or distribution percentage thresholds to others such as those that are involved in
 thermal coal and tobacco.
- The requirement for all companies in the portfolio to follow good governance practices.

The Strategy also committed to investing at least 10% of assets in sustainable investments.

Further information on engagement is available in the answer to the question "How were the indicators for adverse impacts on sustainability factors taken into account?"

How did this financial product perform compared to the reference benchmark?

Sustainable Finance Disclosure Regulation (SFDR) (continued)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Diversity and Inclusion FAM Fund **Legal entity identifier:** 254900CFRFO6N4U4IW65

Sustainable investment objective

Did this financial product have a sustainable investment objective? × Yes No It made **sustainable** It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: % sustainable investment, it had a proportion in economic activities that of % of sustainable investments qualify as environmentally with an environmental objective in sustainable under the EU economic activities that qualify as Taxonomy environmentally sustainable under the in economic activities that do EU Taxonomy not qualify as environmentally with an environmental objective in sustainable under the EU economic activities that do not qualify Taxonomy as environmentally sustainable under the EU Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but **did** × not make any sustainable investments with a social objective: 96.36%

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities.

Sustainable

investment means an

investment in an

economic activity that contributes to an

environmental or social objective, provided that the investment does not

significantly harm

that the investee

companies follow good governance

practices.

any environmental or social objective and

That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective is to invest in companies that have demonstrable gender and/or ethnic diversity, or which provide solutions empowering social equality.

The sustainable investment objective was met by all sustainable investments with a social objective made for the Fund. The alignment percentage indicated in the graphic below shows the allocation to such investments.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainability indicators perform?

The Fund's sustainability indicators to test its compliance with its sustainable investment approach were met at all times during the reporting period.

Sustainability Indicator Name	Value	Eligibility % NAV	Coverage % NAV
As at 31 December 2022			
Year-on-Year Change of women on the board	No data coverage	96.45%	0.00%
Year-on-Year Change of women in leadership roles	1.15%	96.45%	50.49%
Year-on-Year Change of ethnic diversity on the board	0	96.45%	2.40%

Safaricom	-	-	-	100%	-
Schneider Electric SE	-	-	-	80%	-

As at 31 December 2022, the year-on-year change of women in leadership roles within companies held by the portfolio was 1.15%. This covered 50.49% of the portfolio's NAV. There was no year-on-year change recorded with regard to ethnic diversity on the board although

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1st January 2022 to 31st December 2022

data coverage was only 2.40% of the portfolio's NAV. Companies with board gender diversity of more than 30%, as reported by the company, accounted for 80.9% of NAV and coverage was for 95.02% of NAV. Companies with board ethnic diversity of more than 30%, as reported by the company, accounted for 13.2% of NAV, while coverage was for only 48.75% of NAV (as some companies choose not to or are unable to share data on employee ethnic diversity). We had no data coverage to report on the following sustainability indicators: year-on-year change of women on the board, year-on-year change of ethnic diversity in leadership roles, and percentage (%) of NAV considered by the Investment Manager to have leadership diversity, based on data reported by the company. Where data coverage is yet to be published, we shall seek to secure these data sets via direct engagement or through a market vendor.

With regards to the percentage (%) of NAV in investments aligned to the United Nations Sustainable Development Goals ("SDGs"), this can be seen in the table above. We consider companies to be aligned with the SDGs if they are impactful companies making intentional, measurable, material positive contributions towards one or more of the goals. The largest amount of NAV (10.7%) was aligned to SDG3 - Good Health and Wellbeing. Data coverage was available for 96.45% of NAV.

For each investment considered to be SDG-aligned, the strength of contribution to the relevant SDG as assessed by percentage of company revenues is decided. These can be seen in the table above. For certain companies, SDG alignment may be below 100% because some of its business activities may contribute towards secondary SDGs or other areas not related to its primary SDG.

...and compared to previous periods?

The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report disclosure. The Fund will provide historic comparison in the next Periodic Report.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

Sustainable investments that the Fund intends to make do not cause significant harm to any environmental or social sustainable investment objective as they are required to pass a series of tests, including:

- 1. Whether they represent significant exposure to businesses the Investment Manager considers harmful.
- 2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas).
- 3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures are compatible with sustainable investment.

__How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data is available (i.e. not just for sustainable investments), which allows the Investment Manager to make informed investment decisions.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Asset allocation describes the share of investments in specific assets.

The Fund's consideration of Principal Adverse Impact indicators is used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund are then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Manager's website disclosures for the Fund.

Were <u>sustainable</u> investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

All investments purchased by the Fund must pass the Investment Manager's good governance tests, and in addition, sustainable investments must also pass tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

How did this financial product consider principal adverse impacts on sustainability factors?

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data is available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Manager's website disclosures for the Fund.

What were the top investments of this financial product?

Taxonomyaligned activities are expressed as a

- share of:
 turnover
 reflecting the
 share of
 revenue from
 green activities
 of investee
 companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

operational expenditure (OpEx) reflecting green operational activities of investee companies.

What was the proportion of sustainability-related investments?

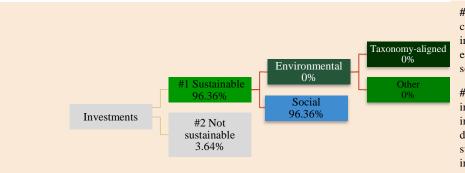

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund has committed to a minimum of 80% of the Fund's assets to be invested in social sustainable investments, in pursuit of the social sustainable investment objective. A minimum of 0% of the Fund's assets are to be invested in "Not sustainable" investments, and a minimum of 0% of the Fund's assets are to be invested in "Environmental sustainable" investments.

Note that the SFDR Level 2 Pre-Contractual Disclosure commitments on asset allocation came into effect on 1st January 2023 in alignment with the SFDR Level 2 regulatory deadline. This means the commitment falls after the reference period of this SFDR Level 2 Periodic Report and therefore were not in effect at the time of investment decision-making.

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). Actual % investments that were sustainable investments was 96.36% of NAV as at 31 December 2022. This comprised 96.36% NAV relating to social sustainable investments which is above the 80% minimum commitment and 0% NAV for environmental sustainable investments. The remaining 3.64% NAV related to investments which were not sustainable.

What was the asset allocation?

The graphic below provides an overview of the asset allocation versus the established minimum thresholds.

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic Sector	% Assets
Manufacturing	30.32%
Financial and insurance activities	19.34%
Information and communication	17.08%
Wholesale and retail trade; repair of motor vehicles and mot	13.44%
Human health and social work activities	8.92%
Cash/other	3.64%
Construction	2.89%
Water supply; sewerage, waste management and remediation act	2.24%
Administrative and support service activities	2.13%

Transitional activities are economic activities

for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

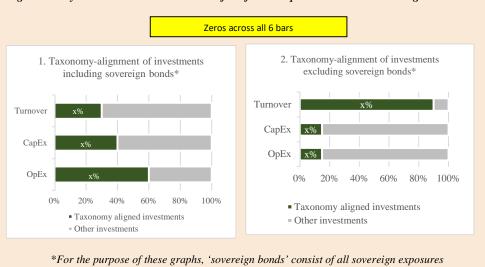

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund's investment objective is focused on making sustainable investments with a social objective. The Investment Manager expects at least 80% of the Fund to be invested in sustainable investments with a social objective.

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The Fund did not take into account the EU criteria for environmentally sustainable economic activities as defined in the Taxonomy Regulation. The Fund did not target investment in taxonomyaligned assets as part of its investment policy and recorded that 0% of the Fund's sustainable investments were aligned with the environmental objectives under the Taxonomy Regulation during the reference period.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

The share of the Fund's investments made in transitional activities over the period was 0% and in enabling activities was 0%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report disclosure. The Fund will provide historic comparison in the next Periodic Report.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments in the Fund with an environmental objective not aligned with the EU taxonomy over the period was 0%. This compares to the commitment of 0% overall of sustainable investments with environmental objectives that were not aligned to the EU Taxonomy made in the precontractual disclosure.

What was the share of socially sustainable investments?

The share of sustainable investments in the Fund with a social objective over the period was 96.36%. This compares to the commitment of 80% overall of socially sustainable investments made in the precontractual disclosure.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The Fund may hold cash, near cash and money market funds, and derivatives as "Other" investments, for hedging purposes or in connection with cash held for ancillary liquidity. No minimum environmental or social safeguards are applied, other than as stated below.

Where derivatives are used to take investment exposure to diversified financial indices, these will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

It is also possible that the Fund may hold investments that are not in line with the promoted characteristics, e.g. as a result of a merger or other corporate action, or as a result of the characteristics of a previously acquired investment changing. Where this happens, the Fund will generally seek to dispose of them in the best interests of investors, but may not always be able to do so immediately.

During the reference period the Fund held varying levels of cash and near cash and money market funds, and derivatives, in accordance with the purposes and safeguards explained in the precontractual annex

What actions have been taken to attain the sustainable investment objective during the reference period?

M&G believes that the long-term success of companies is supported by effective investor stewardship and high standards of corporate governance. Over the period, we undertook investment stewardship engagements where we felt was appropriate, with the goal of protecting and enhancing the long-term value of the Portfolio's assets.

Engagement with issuers represented an integral part of how we integrated environmental, social and governance (ESG) considerations into our investment process over the period. ESG analysis was also integrated into our investment and portfolio monitoring processes, mainly through our ESG Scorecard which has been detailed previously in this disclosure.

good governance

The EU Taxonomy

system laid down in

is a classification

practices.

investment in an economic activity

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promotes the use of an Exclusionary Approach and it makes investments that are SDG-aligned (as defined below):

The Fund excludes certain potential investments from its investment universe to mitigate potential negative effects on the environment and society and to assist it in delivering more sustainable outcomes ("Exclusionary Approach").

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

The Fund considers the UN Sustainable Development Goals (SDGs) as part of its investment process and the sustainability themes considered by the Investment Manager are based on the SDGs as a relevant framework to measure contribution to sustainability factors ("SDG-alignment"). At least 70% of the Fund's investments by value will be in investments considered by the Investment Manager to be related to sustainability themes.

No reference benchmark has been designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

The promoted environmental and social characteristics were generally met by all investments made for the Fund other than "Other" Investments. The alignment percentage indicated in the graphic below is tested against the Exclusionary Approach described below, showing the allocation between investments complying with the Exclusionary Approach and Investments which we as deem as "Other" as we don't consider they can be considered as aligned against the Exclusionary Approach as described in the precontractual annex, such as cash. The SDG aligned characteristic is not used as part of this alignment percentage test – ie investments do not need to be "both" compatible with the Exclusionary Approach and SDG-aligned to be treated as "aligned".

How did the sustainability indicators perform?

Exclusionary Approach: The Fund's sustainability indicators to test its compliance with its Exclusionary Approach were met at all times during the reporting period.

SDG Aligned:

Sustainability Indicator Name	Value	Eligibility % NAV	Coverage % NAV
As at 31 December 2022			
SDG-alignment: Percentage (%) of investments by value that is SDG-aligned	81.05%	98.81%	98.81%

The Fund maintained an SDG-alignment that was greater than 70% of the Fund's investments by value excluding cash.

...and compared to previous periods?

The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report disclosure. The Fund will provide historic comparison in the next Periodic Report.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund may allocate to sustainable investments of any type, i.e. investments with an environmental, and/or a social objective. The Fund is not required to favour any specific type of sustainable investment.

The Investment Manager uses a series of proprietary tests based on available data to determine whether and how an investment makes positive contribution(s) towards environmental and social objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments that the Fund intends to make do not cause significant harm to any environmental or social sustainable investment objective as they are required to pass a series of tests, including:

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and anti-bribery matters.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

- 1. Whether they represent significant exposure to businesses the Investment Manager considers harmful
- 2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas)
- 3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures are compatible with sustainable investment

-How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data is available (i.e. not just for sustainable investments), which allows the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators is used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund are then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Manager's website disclosures for the Fund.

-Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

All investments purchased by the Fund must pass the Investment Manager's good governance tests, and in addition, sustainable investments must also pass tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data is available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Manager's website disclosures for the Fund.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1st January 2022 to 31 December 2022

Sustainable Finance Disclosure Regulation (SFDR) (continued)

What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund has committed to a minimum of 70% of the Fund's assets to be aligned to the environmental or social characteristics promoted. This includes a minimum 51% of the assets that are qualified as sustainable investments. A minimum of 0% of the Fund's assets are other investments not aligned to the environmental or social characteristics.

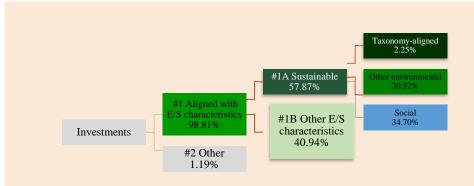

Note that the SFDR Level 2 Pre-Contractual Disclosure commitments on asset allocation came into effect on 1st January 2023 in alignment with the SFDR Level 2 regulatory deadline. This means the commitment falls after the reference period of this SFDR Level 2 Periodic Report and therefore were not in effect at the time of investment decision-making.

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). Actual % investments that were aligned to the environmental or social characteristic promoted was 98.81% of NAV as at 31 December 2022, which is above the 70% minimum commitment. This comprised 57.87% NAV relating to sustainable investments which was above the 51% minimum threshold, and the remaining 40.94% NAV related to investments with other environmental and or social characteristics.

What was the asset allocation?

The graphic below provides an overview of the asset allocation versus the established minimum thresholds.

Asset Allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic Sector	% Assets
Electricity, gas, steam and air conditioning supply	30.75%
Financial and insurance activities	15.39%
Real estate activities	14.02%
Transportation and storage	12.12%
Information and communication	6.91%
Construction	6.50%
Wholesale and retail trade; repair of motor vehicles and mot	5.44%
Mining and quarrying	5.12%
Water supply; sewerage, waste management and remediation act	2.56%
Cash/other	1.19%

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

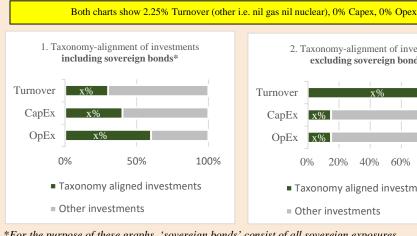

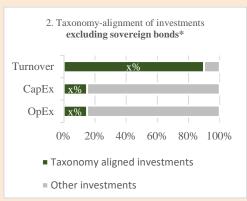

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The Fund did not take into account the EU criteria for environmentally sustainable economic activities as defined in the Taxonomy Regulation. The Fund did not target investment in taxonomyaligned assets as part of its investment policy, but recorded that 2.25% of the Fund's sustainable investments were aligned with the environmental objectives under the Taxonomy Regulation during the reference period.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

^{*}For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The share of the Fund's investments made in transitional activities over the period was 0% and in enabling activities was 2.2%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report disclosure. The Fund will provide historic comparison in the next Periodic Report.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments in the Fund with an environmental objective not aligned with the EU taxonomy over the period was 23.17%. This compares to the commitment of 5% overall of sustainable investments with environmental objectives that were not aligned to the EU Taxonomy made in the precontractual disclosure.

What was the share of socially sustainable investments?

The share of sustainable investments in the Fund with a social objective over the period was 34.70%. This compares to the commitment of 5% overall of socially sustainable investments made in the precontractual disclosure.

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held varying levels of cash and near cash and money market funds, and derivatives, in accordance with the purposes and safeguards explained in the precontractual annex.

The Fund may hold cash, near cash and money market funds and derivatives as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards are applied, other than as set out below.

Derivatives used to take investment exposure to diversified financial indices, and funds (i.e. UCITS and other UCIs) may be held for any reason permitted by the Fund's investment policy and will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test. No minimum environmental or social safeguards are applied to FX derivatives.

The Fund may also hold as Other investments those investments where insufficient data exists to determine the investments' alignment with the promoted characteristics. It is also possible that the Fund may hold investments that are not in line with the promoted characteristics, e.g. as a result of a merger or other corporate action, or as a result of the characteristics of a previously acquired investment changing. Where this happens, the Fund will generally seek to dispose of them in the best interests of investors, but may not always be able to do so immediately.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

M&G believes that the long-term success of companies is supported by effective investor stewardship and high standards of corporate governance. Over the period, we undertook investment stewardship engagements where we felt was appropriate, with the goal of protecting and enhancing the long-term value of the Portfolio's assets.

Engagement with issuers represented an integral part of how we integrated environmental, social and governance (ESG) considerations into our investment process over the period. ESG analysis was also integrated into our investment and portfolio monitoring processes, mainly through our ESG Scorecard which has been detailed previously in this disclosure.

How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

environmental and social characteristics that it promotes.

- No reference benchmark was designated to determine whether this fund is aligned with the environmental and social characteristics that it promotes.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

No reference benchmark was designated to determine whether this fund is aligned with the environmental and social characteristics that it promotes.

- How did this financial product perform compared with the reference benchmark?
 No reference benchmark was designated to determine whether this fund is aligned with the

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: European STARS Equity FAM Fund **Legal entity identifier:** 254900TOMCSFNB6RAO25

Sustainable Finance Disclosure Regulation (SFDR) (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The E/S characteristics of this product included:

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Minimum proportion of sustainable investments The product partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

ESG scoring The product invested in companies that have been analysed and scored in Nordea Asset Management's proprietary ESG platform to ensure that only securities issued by companies that met the minimum required ESG score were eligible for inclusion.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the product did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The product used a benchmark which is not aligned with the product's E/S characteristics.

How did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	93 tCO2e / m€ invested	98.00%	98.00%
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00% involved in violations	98.00%	98.00%

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the product partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that supported the UN SDGs or Taxonomy aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

How were the indicators for adverse impacts on sustainability factors taken into account?

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

In which economic sectors were the investments made?

Sector	Assets
CONSUMER, NON-CYCLICAL	29.37%
FINANCIAL	21.45%
INDUSTRIAL	12.68%
BASIC MATERIALS	10.62%
TECHNOLOGY	8.11%
CONSUMER, CYCLICAL	6.47%
COMMUNICATIONS	5.56%
CASH	2.00%
UTILITIES	1.97%
ENERGY	1.77%
Sum	100.00%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 63%.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 70%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The product may have used derivatives and other techniques for the purposes described in the investment guidelines. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product have been monitored and documented on an ongoing basis.

Did this financial product have a sustainable investment objective? Yes No It made sustainable It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: sustainable investment, it had a proportion 97.41% of % of sustainable investments in economic activities that with an environmental objective in qualify as environmentally economic activities that qualify as sustainable under the EU environmentally sustainable under the Taxonomy **EU** Taxonomy in economic activities that with an environmental objective in do not qualify as economic activities that do not qualify environmentally sustainable as environmentally sustainable under under the EU Taxonomy the EU Taxonomy with a social objective It made **sustainable** It promoted E/S characteristics, but **did** not make any sustainable investments investments with a social objective: ___%

To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective is to invest in companies that contribute towards the Paris Agreement climate change goal.

The sustainable investment objective was met by all sustainable investments with an environmental objective made for the Fund. The alignment percentage indicated in the graphic below shows the allocation to such investments.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Sustainability indicators measure how the sustainable objectives of this

financial product

How did the sustainability indicators perform?

The Fund's sustainability indicators to test its compliance with its sustainable investment approach were met at all times during the reporting period.

Sustainability Indicator Name	Value	Eligibility % NAV	Coverage % NAV
As at 31 December 2022			
% of NAV with ratified Science-Based Targets	44.4%	96.72%	83.29%
% of NAV participating in Task Force on Climate-Related Financial Disclosures (TCFD) reporting	70.2%	96.72%	96.72%
Total renewable energy produced (megawatt hours)	No data coverage	96.72%	0%
The weighted average carbon intensity (WACI) of the Fund (tCO ₂ per US\$million sales)	56.2	96.72%	96.72%
The weighted average carbon intensity (WACI) of the investment universe (tCO2 per US\$million sales)	135.3	-	-

Security Level Sustainability Indicators	Value	Eligibility % NAV	Coverage % NAV
As at 31 December 2022			
Avoided carbon emissions – for companies that provide direct solutions to the climate challenge via their products and services (CO2eT Millions)	218.3	96.72%	12.99%
Schneider Electric	120.0		
Linde Plc	85.0		
Ball Corp	12.1		
Johnson Controls International Plc	1.2		

As at 31 December 2022, companies accounting for 44.4% of the portfolio's NAV had ratified science-based targets. Data was available for companies accounting for 83.29% of NAV. Meanwhile, companies accounting for 70.2% of the portfolio's NAV said they were participating in Task Force on Climate-Related Financial Disclosures (TCFD) reporting. Data was available for companies accounting for 96.72% of NAV (in other words it excluded cash). We are unable to report on the total renewable energy produced (in megawatt hours) as we had no data coverage of companies in the portfolio.

The weighted average carbon intensity (WACI) of the portfolio (calculated as metric tonnes of CO2 emitted per US\$ million of sales) indicates the intensity of the fund's carbon emissions. The number combines the carbon intensity of every holding in the fund, weighted to their proportions in the fund. As at 31 December 2022, this was 56.2 compared to 135.3 for the investment universe as represented by the MSCI World Net Return Index. 96.72% of the portfolio was covered by the calculation as it excluded cash and "other" investments.

At a security level, companies in the portfolio providing direct solutions to the climate challenge via their products and services (12.99% of the fund), avoided 218.3 million metric tonnes of CO2. The emissions avoided by the four holdings for which data was available, which together accounted for 12.99% of the portfolio's NAV, are shown in the table above

most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Principal adverse

impacts are the

...and compared to previous periods?

The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report disclosure. The Fund will provide historic comparison in the next Periodic Report.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

How did the sustainable investments not cause significant harm to any sustainable investment objective?

Sustainable investments that the Fund intends to make do not cause significant harm to any environmental or social sustainable investment objective as they are required to pass a series of tests, including:

- 1. Whether they represent significant exposure to businesses the Investment Manager considers harmful.
- 2. Principal Adverse Impact indicators considered to render the investment incompatible with sustainable investment (violations of the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises, social violations by sovereigns such as being subject to sanctions, negative effects on biodiversity sensitive areas).
- 3. Other Principal Adverse Impact indicators form part of a materiality assessment to understand whether any exposures are compatible with sustainable investment.

__ How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data is available (i.e. not just for sustainable investments), which allows the Investment Manager to make informed investment decisions.

The Fund's consideration of Principal Adverse Impact indicators is used as part of understanding the operating practices of the investments purchased by the Fund. Investments held by the Fund are then subject to ongoing monitoring and a quarterly review process.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Manager's website disclosures for the Fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

All investments purchased by the Fund must pass the Investment Manager's good governance tests, and in addition, sustainable investments must also pass tests to confirm they do no significant harm, as described above. These tests embed a consideration of the OECD Guidelines and UN Guiding Principles.

How did this financial product consider principal adverse impacts on sustainability factors?

For sustainable investments, principal adverse impacts are a key part of assessing such investments do not do significant harm as explained above. For other investments the Investment Manager's research process includes consideration of Principal Adverse Impact indicators for all investments where data is available, which allows the Investment Manager to make informed investment decisions, as explained above.

Further information on the Principal Adverse Impact indicators which are taken into account by the Investment Manager can be found in the Annex to the Manager's website disclosures for the Fund.

Asset allocation describes the share of investments in specific assets.

What were the top investments of this financial product?

Largest Investments	Sector	% Assets	Country
United Health Group Inc	Financial and insurance activities	7.07%	US
Microsoft Corp	Information and communication	6.31%	US
Novo Nordisk Class B	Manufacturing	5.99%	Denmark
WH Smith Plc	Wholesale and retail trade; repair of motor vehicles and motorcycles	4.32%	UK
Schneider Electric	Manufacturing	4.30%	France
Unilever Plc	Manufacturing	4.06%	UK
Alphabet Inc Class A	Information and communication	3.90%	US
Manhattan Associates Inc	Information and communication	3.84%	US
Becton Dickinson	Manufacturing	3.83%	US
Visa Inc Class A	Financial and insurance activities	3.68%	US
Johnson Controls International Plc	Manufacturing	3.58%	Ireland
Tokio Marine Holdings Inc	Financial and insurance activities	3.43%	Japan
Linde Plc	Manufacturing	3.33%	UK
Discover Financial Services	Financial and insurance activities	2.95%	US
American Express	Financial and insurance activities	2.89%	US

What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund has committed to a minimum of 80% of the Fund's assets to be invested in environmental sustainable investments, in pursuit of the environmental sustainable investment objective. The Fund is not required to favour any specific type of environmental sustainable investment. A minimum of 0% of the Fund's assets are to be invested in "Not sustainable" investments, and a minimum of 0% of the Fund's assets are to be invested in "Social sustainable" investments.

Note that the SFDR Level 2 Pre-Contractual Disclosure commitments on asset allocation came into effect on 1st January 2023 in alignment with the SFDR Level 2 regulatory deadline. This means the commitment falls after the reference period of this SFDR Level 2 Periodic Report and therefore were not in effect at the time of investment decision-making.

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). Actual % investments that were sustainable investments was 97.41% of NAV as at 31 December 2022. This comprised 97.41% NAV relating to environmental sustainable investments which is above the 80% minimum commitment and 0% NAV for social sustainable investments. The remaining 2.59% NAV related to investments which were not sustainable.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

• What was the asset allocation?

Taxonomy-aligned activities are expressed as a share

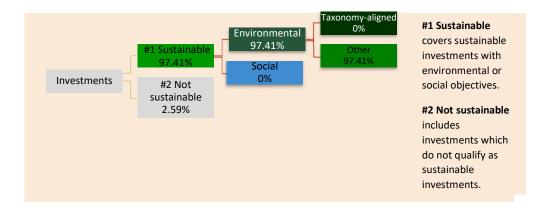

of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational
 expenditure (OpEx)
 reflecting green
 operational
 activities of
 investee
 companies.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

1st January 2022 to 31st December 2022

The graphic below provides an overview of the asset allocation versus the established minimum thresholds.

In which economic sectors were the investments made?

The investpment breakdown uses NACE (Nomenclature of Economic Activities) and is expressed as a % of Net Asset Value (NAV).

Economic Sector	% Assets
Manufacturing	36.40%
Financial and insurance activities	28.02%
Information and communication	20.43%
Wholesale and retail trade; repair of motor vehicles and mot	6.82%
Transportation and storage	2.63%
Cash/other	2.59%
Administrative and support service activities	1.76%
Other service activities	1.35%

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

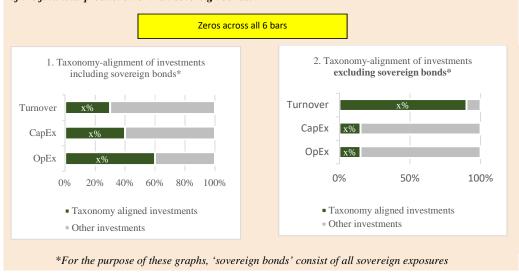

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives.

The Fund did not take into account the EU criteria for environmentally sustainable economic activities as defined in the Taxonomy Regulation. The Fund did not target investment in taxonomy-aligned assets as part of its investment policy and recorded that 0% of the Fund's sustainable investments were aligned with the environmental objectives under the Taxonomy Regulation during the reference period.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

The share of the Fund's investments made in transitional activities over the period was 0% and in enabling activities was 0%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first SFDR Level 2 Periodic Report disclosure. The Fund will provide historic comparison in the next Periodic Report.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

sustainable
investments with an
environmental
objective that do not
take into account
the criteria for
environmentally
sustainable
economic activities
under the EU
Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments in the Fund with an environmental objective not aligned with the EU taxonomy over the period was 97.41%. This compares to the commitment of 5% overall of sustainable investments with environmental objectives that were not aligned to the EU Taxonomy made in the precontractual disclosure.

What was the share of socially sustainable investments?

The share of sustainable investments in the Fund with a social objective over the period was 0%. This compares to the commitment of 0% overall of socially sustainable investments made in the precontractual disclosure.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held varying levels of cash and near cash and money market funds, and derivatives, in accordance with the purposes and safeguards explained in the precontractual annex.

The Fund may hold cash, near cash and money market funds, and derivatives as "Other" investments, for hedging purposes or in connection with cash held for ancillary liquidity. No minimum environmental or social safeguards are applied, other than as stated below.

Where derivatives are used to take investment exposure to diversified financial indices, these will be subject to such minimum environmental or social safeguard tests as the Investment Manager considers appropriate, for example a minimum weighted ESG score test.

It is also possible that the Fund may hold investments that are not in line with the promoted characteristics, e.g. as a result of a merger or other corporate action, or as a result of the characteristics of a previously acquired investment changing. Where this happens, the Fund will generally seek to dispose of them in the best interests of investors, but may not always be able to do so immediately.

What actions have been taken to attain the sustainable investment objective during the reference period?

M&G believes that the long-term success of companies is supported by effective investor stewardship and high standards of corporate governance. Over the period, we undertook investment stewardship engagements where we felt was appropriate, with the goal of protecting and enhancing the long-term value of the Portfolio's assets.

Engagement with issuers represented an integral part of how we integrated environmental, social and governance (ESG) considerations into our investment process over the period. ESG analysis was also integrated into our investment and portfolio monitoring processes, mainly through our ESG Scorecard which has been detailed previously in this disclosure.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did	Did this financial product have a sustainable investment objective?					
	Yes			V No		
	It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	>	chara as its had a	omoted Environmental/Social (E/S) acteristics and while it did not have objective a sustainable investment, it proportion of 74% of sustainable tments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The E/S characteristics of this product included:

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Minimum proportion of sustainable investments The product partly invested in sustainable investments, which means companies and issuers involved in activities that contribute to an environmental or social objective as outlined in the 17 UN Sustainable Development Goals (SDGs) and/or the EU Taxonomy, while not significantly harming any other environmental or social objectives.

ESG scoring The product invested in companies that have been analysed and scored in Nordea Asset Management's proprietary ESG platform to ensure that only securities issued by companies that met the minimum required ESG score were eligible for inclusion.

Sector- and value-based exclusions Exclusion filters were applied to the portfolio construction process to restrict investments in companies and issuers with material exposure to certain activities deemed to be detrimental to the environment or the society at large, including tobacco companies and fossil fuel companies.

Nordea Asset Management's Paris-Aligned Fossil Fuel policy whereby the product did not invest in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

The product used a benchmark which is not aligned with the product's E/S characteristics.

Mow did the sustainability indicators perform?

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	27 tCO2e / m€ invested	96.65%	96.39%
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	2.13% involved in violations	96.65%	96.65%

 $\textbf{Eligibility:} \ The \ proportion \ of the \ assets \ in \ the \ financial \ product \ (relative \ to \ NAV), \ which \ are \ in \ scope \ for \ the \ indicator.$

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Unaudited Section (continued)

...and compared to previous periods?

Sustainability Indicator	Metric	Reference Period	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon footprint	Q4 2022	27 tCO2e / m€ invested	96.65%	96.39%
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	Q4 2022	2.13% involved in violations	96.65%	96.65%

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the product partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that supported the UN SDGs or Taxonomy aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant ham to any environmental or social sustainable investment objective?

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

How were the indicators for adverse impacts on sustainability factors taken into account?

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

In which economic sectors were the investments made?

Sector	Assets
CONSUMER, NON-CYCLICAL	31.26%
TECHNOLOGY	20.98%
FINANCIAL	16.79%
CONSUMER, CYCLICAL	7.47%
INDUSTRIAL	7.24%
COMMUNICATIONS	6.97%
CASH	3.35%
UTILITIES	3.23%
BASIC MATERIALS	2.72%
Sum	100.00%

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 60%.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 63%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The product may have used derivatives and other techniques for the purposes described in the investment guidelines. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product have been monitored and documented on an ongoing basis.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Since no reports covering previous periods are available, this section provides information for the current reporting period only.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the product partially made, was to contribute to one or several of the UN SDGs or alternatively be involved in Taxonomy aligned activities. Sustainable investments contributed to the objectives through the fund's investments in companies that supported the UN SDGs or Taxonomy aligned activities by passing a minimum threshold for revenue alignment with UN SDGs or the EU Taxonomy.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments were screened to ensure that they did not significantly harm any other social or environmental objectives (DNSH test) as defined by the EU Taxonomy or any SDGs as adopted by the UN.

How were the indicators for adverse impacts on sustainability factors taken into account?

Nordea Asset Management (NAM) has developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment of the Sustainable Investments with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, was confirmed as part of the process to identify sustainable investments using Nordea Asset Management's PAI tool.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The product contains investments with both an environmental and a social objective. A single investment can both contribute to an environmental and a social objective resulting in a total allocation amounting to more than 100 per cent. There is no prioritization of environmental and social objectives, and the strategy does not target any specific allocation or minimum proportion for either of these categories. The investment process accommodates the combination of environmental and social objectives by allowing the investment manager the flexibility to allocate between these based on availability and attractiveness of investment opportunities.

UTILITIES	2.57%
ENERGY	0.58%
Sum	100.00%

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 59%.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 62%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash may have been held as ancillary liquidity or for risk balancing purposes. The product may have used derivatives and other techniques for the purposes described in the investment guidelines. This category may also have included securities for which relevant data is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this product have been monitored and documented on an ongoing basis.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: GLOBAL DISRUPTIVE OPPORTUNITIES FAM FUND

Legal entity identifier: 254900PT325H9KEZSA22

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices. The EU Taxonomy

is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?				
Yes	No No			
	Х			
It made sustainable investments with an environmental objective: in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 50.67% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic			
It made a sustainable investments with a social objective:	activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective It promoted E/S characteristics, but did not make any sustainable investments			

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The product has respected all material aspects of the characteristics described in the prospectus

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach.

Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

For more detail, please refer to the Sustainable Investment section of the Prospectus.

At the end of the period:

- The weighted average ESG rating of the portfolio is C-
- The weighted average ESG rating of the reference index is D+

... and compared to previous periods?

The above sustainability indicators were not compared to previous periods as the regulation was not yet in force

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

- 3. follow best environmental and social practices; and
- 4. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- How were the indicators for adverse impacts on sustainability factors taken into account? The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
 - The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:
 - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
 - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
 - Be cleared of any controversy in relation to work conditions and human rights.
 - Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonom aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying financial product that take into account the EU criteria for environmentally sustainal economic activities. The investments underlying the remaining portion of this financ product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environment or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion: Amundi has defined normative, activity-based and sector-based exclusion rules
 covering some of the key adverse sustainability indicators listed by the Disclosure
 Regulation.
- ESG factors integration: Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement: Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote: Amundi's voting policy responds to a holistic analysis of all the long-term issues that
 may influence value creation, including material ESG issues. For more information, please
 refer to Amundi's Voting Policy.
- Controversies monitoring: Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.cpr-am.com

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product. **#2Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- -The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy (including fossil gas and nuclear energy related activities) was not available during the period.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹ ?				
Yes:				
In fossil gas In nuclear energy				
No				

 $^{^1}$ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

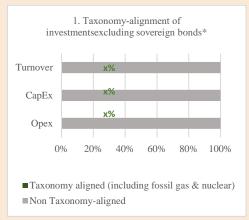

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

The graphs below show in green the percentage of investments that were aligned with the EU

Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereignbonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance. What was the share of investments in transitional and enabling activities?

Reliable data regarding transitional and enabling activities was not available during the period.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

In previous periods the regulation was not yet in force.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy was 40.82% at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

This product did not commit to have social sustainable investments over the period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions.

These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.

Moreover, AMUNDI's Responsible Investment Policy sets out an active approach to engagement that promotes dialogue with investee companies including those in the portfolio of this product. Our Annual Engagement Report, available on https://about.amundi.com/esg-documentation, provides detailed reporting on this engagement and its results

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Medtech Fam Fund

Legal entity identifier: 254900HQ05SNSPZCOS64

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?				
• • Yes	No			
	х			
It made sustainable investments with an environmental objective:	Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 35.68% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective			
It made a sustainable investments with a social objective:%	It promotes E/S characteristics, but did not make any sustainable investments			

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The product has respected all material aspects of the characteristics described in the prospectus

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach.

Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

For more detail, please refer to the Sustainable Investment section of the Prospectus.

the end of the period:

- The weighted average ESG rating of the portfolio is D+
- The weighted average ESG rating of the reference index is D+

... and compared to previous periods?

The above sustainability indicators were not compared to previous periods as the regulation was not yet in force

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

- 5. follow best environmental and social practices; and
- 6. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi Group ESG Regulatory Statement available at www.cpr-am.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

How were the indicators for adverse impacts on sustainability factors taken into account? The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonom aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying financial product that take into account the EU criteria for environmentally sustainal economic activities. The investments underlying the remaining portion of this financ product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environment or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion: Amundi has defined normative, activity-based and sector-based exclusion rules
 covering some of the key adverse sustainability indicators listed by the Disclosure
 Regulation.
- ESG factors integration: Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement: Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote: Amundi's voting policy responds to a holistic analysis of all the long-term issues that
 may influence value creation, including material ESG issues. For more information, please
 refer to Amundi's Voting Policy.
- Controversies monitoring: Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of CPR Invest's Compartments.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.cpr-am.lu.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product. **#2Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- -The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
HEALTH CARE EQUIPMENT & SUPPLIES	90.89%
LIFE SCIENCES TOOLS & SERVICES	5.51%
HEALTH CARE PROVIDERS & SERVICES	0.52%
TREASURIES	0.50%
PHARMACEUTICALS	0.45%
FOREX	0.31%

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies
- -capital expenditure (CapEx) showing the green investments made by investee a transition to a green economy. - operational

companies, e.g. for

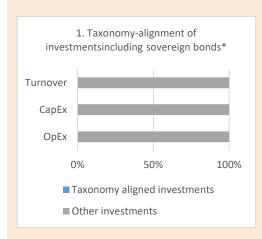

expenditure (OpEx) reflecting green operational activities of investee companies.

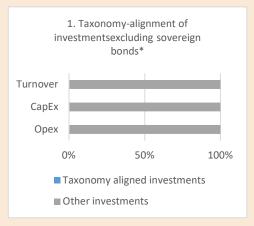

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

The graphs below show in green the percentage of investments that were aligned with the EU

Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereignbonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Data not yet available

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures
- **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.
- activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the

best performance.

Transitional

What was the share of investments in transitional and enabling activities?

Reliable data regarding transitional and enabling activities was not available during the period.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

In previous periods the regulation was not yet in force.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy was 17.64% at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

sustainable

environmental objective that **do**

not take into account the

criteria for environmentally sustainable economic activities under the EU Taxonomy.

investments with an

What was the share of socially sustainable investments?

This product did not commit to have social sustainable investments over the period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions.

These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.

Moreover, AMUNDI's Group Responsible Investment Policy sets out an active approach to engagement that promotes dialogue with investee companies including those in the portfolio of this product. Amundi Group Annual Engagement Report, available on https://about.amundi.com/esg-documentation, provides detailed reporting on this engagement and its results

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/85

Product name: Sustainable Future Connectivity FAM Fund

Legal entity identifier: 254900RJHZPU7LT4ZQ41

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? [tick and fill in as relevant, the percentage figure represents the minimum commitment to sustainable investments] Yes x No It made **sustainable** It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: sustainable investment, it had a proportion % of 22.4% of sustainable investments in economic activities that with an environmental objective in qualify as environmentally sustainable under the EU economic activities that qualify as environmentally sustainable under the Taxonomy **EU** Taxonomy in economic activities that with an environmental objective in do not qualify as economic activities that do not qualify environmentally as environmentally sustainable under sustainable under the EU the EU Taxonomy Taxonomy with a social objective It made sustainable It promoted E/S characteristics, but **did** investments with a social not make any sustainable investments objective: ___%

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period under review. The Fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. The Fund invested in the equity securities of companies throughout the world, that were linked to the theme of future connectivity (the enablers, networks and beneficiaries of next generation communications). Investments were made in companies that are involved in the roll out of cellular networks, wired networks, internet infrastructure and online content production.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

How did the sustainability indicators perform?

The performance of the sustainability indicators the mandate used to measure the attainment of the sustainable environmental or social characteristics that it promoted during the period in review as of 31 of december 2022 was:

- i. 93% of the mandate was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii. in respect of its direct investments in corporate issuers, 0% of the mandate invested in securities of issuers with exposure to the Exclusions;
- iii. 22.4% of the mandate was invested in sustainable investments;
- iv. 8.8% of the mandate was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);
- v. 13.6% of the mandate invested in sustainable investments with a social objective.
- ...and compared to previous periods?

Not applicable as this is the first reporting period

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 22.4% of sustainable investments

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

The mandate determined a sustainable investment as follows:

- (a) issuers that undertook economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
- How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that caused significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standards that relate to principal adverse indicators (PAIs) as well as performance on PAI metrics. This included:

Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);

Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and

PAI indicators: quantitative data (where available) on PAI indicators was used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

• How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators. Issuers with a low score was ineligible to be 'sustainable investments' Fidelity's fundamental research determined that the company was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which met their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principle adverse impacts were material and negative. /
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions When investing directly in corporate issuers, the Fund applied the Exclusions (as defined below) to help mitigate PAI through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC.

In respect of its direct investments, the Fund was subjected to:

- Firm-wide exclusions list, which included cluster munitions and antipersonnel landmines, and
- 2) a "Sustainable Fund Exclusion List", which included, but was not limited to, tobacco, weapons and thermal coal and

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

- 3) a principle-based screening policy which included:
 - a) norms-based screening of issuers which the investment manager considered to have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
 - b) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds was applied.
- 4) Fineco Asset Management DAC Investment Exclusion Policy effective on 27 July 2022.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information on the Sustainable investing framework (fidelityinternational.com) and further details on the Exclusion Policy can be found on the Management Company's website at the following link FAM - Sustainability | Fineco FAM - Fineco FAM (finecoassetmanagement.com)

The investment manager also had discretion to implement enhanced, stricter sustainable requirements and exclusions from time to time.

- (i) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (ii) Voting Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
- (iii) Quarterly reviews monitoring of principal adverse impacts through The Fund's quarterly review process.

The specific PAI indicators that were taken into consideration were subject to data availability and may evolve with improving data quality and availability. In certain circumstances, such as indirect investments made by The Fund, PAI may not have been considered.

To what extent we re the sustainable investments with an environmental objective aligned with the EU Taxonomy? [include section for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852 and include information in accordance with Article 51 of this Regulation]

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the Mandate with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

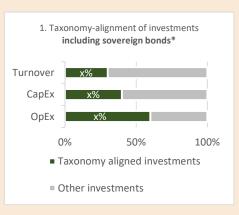

The taxonomy alignment of the underlying investments of the Mandate is measured by turnover.

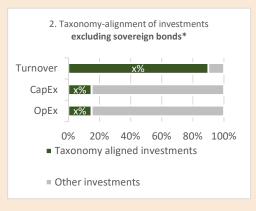

[include note for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- expenditure
 (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Turnover - 0% Capex - 0% Opex - 0%

What was the share of investments made in transitional and enabling activities?

Due to data constraints, we aim to report the share of investments in transitional and enabling activities in our next periodic disclosure.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 8.8% in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

The fund invested 13.6% in sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the Fund was invested in securities of issuers that were able to demonstrate that they were on an improving trajectory with respect to their ESG characteristics, as well as cash and cash equivalents for liquidity purposes and derivatives which was used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the Fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment managers proprietary ESG ratings framework as well as their access to external ESG data providers and ratings agencies have allowed them to assess the ESG characteristics of fund holdings over the period, and maintain a consideration of Principle Adverse Impacts. Included in the assessment is to what extent the issuers of these securities deliver on our expectations for best practices. Additionally, the Investment manager have instated a Quarterly Sustainability Review for their Article 8 funds, which has created a specific forum for discussion of the funds qualitative and quantitative ESG characteristics, and whether they are consistent with requirements and client expectations. This is an extension of their pre-existing risk and compliance processes. Where appropriate they have utilised their spheres of influence on companies via active engagement and stewardship activities.

Sustainable Finance Disclosure Regulation (SFDR) (continued)

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product: Changing Lifestyles FAM Fund

Legal Entity Identifier: 254900QNFKPR5TD69926

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Sustainable investment means an investment in an economic activity that X No contributes to an environmental or social objective, provided that It made sustainable investments with an It promoted Environmental/Social (E/S) the investment does not significantly harm any characteristics and while it did not have as its environmental objective: __% environmental or social objective a sustainable investment, it had a objective and that the proportion of 67% of sustainable investments investee companies follow good governance practices. In economic activities that qualify as With an environmental objective in environmentally sustainable under the EU economic activities that qualify as The EU Taxonomy is a environmentally sustainable under Taxonomy classification system laid the EU Taxonomy down in Regulation (EU) 2020/852 establishing a ist of environmentally In economic activities that do not qualify X With an environmental objective in sustainable economic as environmentally sustainable under the economic activities that do not activities. That **EU Taxonomy** qualify as environmentally Regulation does not lay lown a list of socially sustainable under the EU Taxonomy sustainable economic activities. Sustainable nvestments with an X With a social objective environmental objective night be aligned with the Γaxonomy or not. It made sustainable investments with a social It promoted E/S characteristics, but did not

objective: __%

To what extent were the environmental and/or social characteristics promoted by this financial product met?

make any sustainable investments

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI All Country World (Net TR) Index, based on the Investment Manager's rating system. This means that the Fund's weighted average score over a rolling sixmonth period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean an issuer contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales. The sustainability score of the Fund is derived from the scores of all issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The reference period for this Fund is 1 January 2022 to 31 December 2022.

Refer to page 1 comment. Here mentions from 1 August 2022. Are the percentages reflected on % sustainable investments reflects from this period?

How did the sustainability indicators perform?

The Fund's sustainability score for the reference period was -0.3% and the benchmark's sustainability score for the reference period was -4.6%.

In each case the sustainability score is calculated as a notional percentage as described above.

As measured at the end of the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Contraception
- Donations
- High Salaries
- Medicine

The Investment Manager monitored compliance with the characteristic to maintain a higher overall sustainability score than the MSCI All Country World (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI All Country World (Net TR) Index in Schroders' proprietary tool over a rolling six month period up to the end of the reference period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager invested 67% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments over the four months prior to the end of the reference period, based on month-end data.

The Investment Manager monitored compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

As this is our first reporting period, this question is not applicable.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to increasing benefits by way of the following:

- Connectivity: the estimated societal benefits from companies that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of contraceptives. Assigned in proportion to company market share of global revenue;
- Donations: the estimated societal benefits from a company's philanthropic donations. Measured based on the monetary value of the sum donated;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue

The above examples of the objectives of the sustainable investments that the Fund made are based on data as at the end of the reference period. Other objectives may have applied during the reference period.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/.
- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. The Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders applied certain exceptions to the list during the reference period.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.
- The Fund also applied certain other exclusions.
- Further information on all of the Fund's exclusions is to be found under "Sustainability Related Disclosures" on the Fund's webpage, accessed via https://www.schroders.com/en/lu/private-investor/gfc.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Where the Investment Manager set levels in relation to the indicators for adverse impacts on sustainability factors, compliance with these thresholds was monitored on an ongoing basis via its portfolio compliance framework. Investee companies in breach of these levels were not eligible to be considered as a sustainable investment.

For example, the Fund excluded companies in violation of the UNGC principles (principal adverse impact (PAI) 10) from the portion of the portfolio in sustainable investments. The list of UNGC violators is provided by a third party and compliance with the list was monitored via our automated compliance controls. Schroders applied certain exceptions to the list during the reference period.

In addition, the Fund excluded companies that were deemed to contribute significantly to climate change (related to PAIs 1, 2 and 3 covering GHG emissions). The thresholds that were applied were companies deriving >10% revenue from thermal coal mining and >30% revenue from coal power generation. The Fund may have applied stricter thresholds, as disclosed on the website. Compliance with these exclusions was monitored via our automated compliance controls.

In other areas Schroders set principles of engagement. We have aligned each of the PAIs to one of Schroders six core engagement themes. We summarise below the thresholds that apply and the engagement actions we have for each:

Climate Change

PAIs 1, 2, 3, 4, 5, 6 and 19 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: (Link https://prod.schroders.com/en/sysglobalassets/about-us/schroders-engagement-blueprint-2022.pdf). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

Corporate Governance

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

PAIs 20, 12 and 13 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments was aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

We used a list of UNGC violators as provided by a third party. Issuers on that list were not categorised as sustainable investments. The areas considered when determining whether an issuer is an UNGC violator included those covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors involved classifying the indicators into three categories:

1. Set thresholds

For certain PAIs (e.g. PAI 10 on violations of UNGC principles), we set thresholds for considering an investment to be a sustainable investment. Investments in breach of these thresholds were not eligible to be held as sustainable investments. Compliance with these thresholds was monitored on an ongoing basis via the Investment Manager's portfolio compliance framework.

2. Active ownership

During the reference period, the Investment Manager engaged in line with the approach and expectations set out in our Engagement Blueprint (Link https://prod.schroders.com/en/sysglobalassets/about-us/schroders-engagement-blueprint-2022.pdf) and as further described above. A summary of Schroders firm-wide engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
CLIMATE CHANGE	738
DIVERSITY AND INCLUSION	72
GOVERNANCE AND OVERSIGHT	3,096
HUMAN CAPITAL MANAGEMENT	130
HUMAN RIGHTS	121
NATURAL CAPITAL AND BIODIVERSITY	95

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

3. Improve coverage

Some of the engagements identified in the table above involved discussions where the primary focus was to increase reporting on sustainability data. The purpose is to improve coverage of the PAIs, for example PAI 9 on hazardous waste ratio.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01 January 2022 to 31 December 2022

The list above represents the average of the Fund's holdings at each quarter end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation

describes the share of investments in specific assets.

Asset allocation

describes the share of investments in specific assets.

• What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 95%. The Fund maintained a higher overall sustainability score than the MSCI All Country World (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S

Unaudited Section (continued)

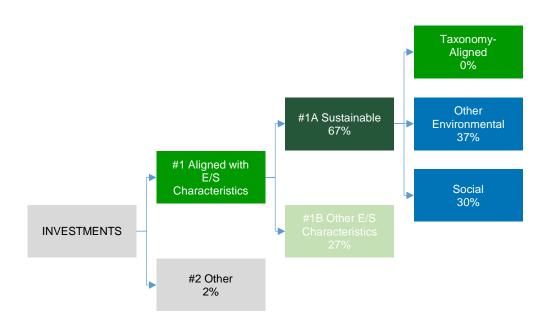

Sustainable Finance Disclosure Regulation (SFDR) (continued)

characteristics represents the average of the last four months of the reference period, based on month-end data. Also included within #1 is the proportion of assets that were invested in sustainable investments, as indicated in #1A.

The sustainability score is measured by Schroders' proprietary tool that provides an estimate of the net "impact" that an issuer may create in terms of social and environmental "costs" or "benefits". It does this by using certain indicators with respect to that issuer, and quantifying them positively and negatively to produce an aggregate notional measure of the effect that the relevant underlying issuer may have on society and the environment. Examples of such indicators are greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Fund invested 67% of its assets in sustainable investments. This percentage represents the average of the last four months of the reference period, based on month-end data. Within this, 37% was invested in sustainable investments with an environmental objective and 30% was invested in sustainable investments with a social objective. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category #1 Aligned with E/S Characteristics covers:

- The sub-category #IA Sustainable covers environmentally and socially sustainable investments
- The sub-category #**1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector CONSUMER DISCRETIONARY CONSUMER STAPLES COMMUNICATION SERVICES INDUSTRIALS	% Assets 54.08 16.83 7.11 5.48
FINANCIALS INFORMATION TECHNOLOGY HEALTH CARE	5.31 5.13 4.03
CASH	2.03

The list above represents the average of the Fund's holdings at each quarter end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?			
	Yes:		
	In fossil gas	In nuclear energy	
X	No		

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Unaudited Section (continued)

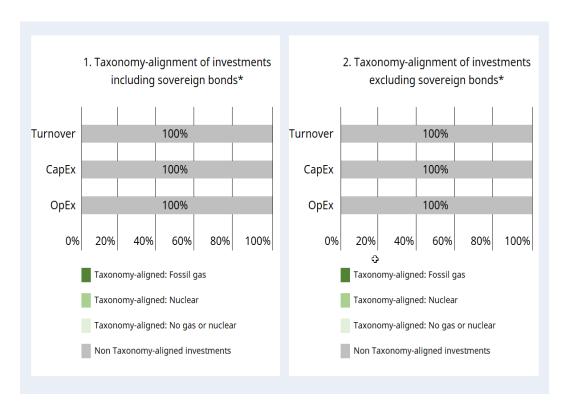

Sustainable Finance Disclosure Regulation (SFDR) (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies. The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

• How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

As this is our first reporting period, this question is not applicable.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

The Fund invested 37% of its assets in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. This percentage is a proportion of the total percentage of sustainable investments, which is calculated as the average of the last four months of the reference period, based on month-end data.

What was the share of socially sustainable investments?

The Fund invested 30% of its assets in sustainable investments with a social objective. This percentage is a proportion of the total percentage of sustainable investments, which is calculated as the average of the last four months of the reference period, based on month-end data.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period a number of counterparties were removed from the approved list for all funds in line with our policy and compliance requirements. This meant that such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

Unaudited Section (continued)

Sustainable Finance Disclosure Regulation (SFDR) (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link https://prod.schroders.com/en/sysglobalassets/about-us/schroders-engagement-blueprint-2022.pdf). A summary of Schroders engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies. We aim to drive change that protects and enhances the value of our investments.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• How did the reference benchmark differ from a broad market index?

This question is not applicable for this Fund.

• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

This question is not applicable for this Fund.

• How did this financial product perform compared with the reference benchmark?

This question is not applicable for this Fund.

• How did this financial product perform compared with the broad market index?

This question is not applicable for this Fund.
