## Report by the Réviseur d'entreprises agréé

To shareholders of the  
Swisscanto (LU) Bond Fund

### Audit opinion

We have audited the annual financial statements of the Swisscanto (LU) Bond Fund and for each of its respective sub-funds (the "Fund") - consisting of the statement of assets as of January 31, 2024 and the statement of operations and other changes in net assets for the year ended on that date fiscal year and the appendix with a summary of significant accounting methods.

In our opinion, the attached annual financial statements give a true and fair view of the assets and financial position of the Fund and each of its sub-funds as of January 31, 2024, as well as their results of operations, in accordance with the legal provisions and regulations applicable in Luxembourg regarding the preparation and presentation of the annual financial statements and their development of net fund assets for the financial year ending on that date

### Basis for our audit opinion

We conducted our audit in accordance with the Law on Auditing (Law of July 23, 2016) and the International Auditing Standards ("ISA") adopted for Luxembourg by the Commission de Surveillance du Secteur Financier ("CSSF"). Our responsibilities under the law of July 23, 2016 and the ISA standards as adopted in Luxembourg by the CSSF are further described in the section "Responsibility of the Réviseur d'entreprises agréé for the annual audit". We are also independent of the Company in accordance with the "International Code of Ethics for Professional Accountants, including International Independence Standards" adopted for Luxembourg by the CSSF, issued by the "International Ethics Standards Board for Accountants" (IESBA Code), together with the professional conduct requirements that we must comply with as part of the annual audit and have fulfilled all other professional duties in accordance with these conduct requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

### Other information

The board of directors of the management company is responsible for the other information. The other information includes the information contained in the annual report, but does not include the annual financial statements or our report of the Réviseur d'entreprises agréé on these annual financial statements. Our opinion on the financial statements does not cover the other information and we do not provide any assurance of any kind on this information.

In connection with the audit of the annual financial statements, our responsibility is to read the other information and to assess whether there is a material inconsistency between it and the annual financial statements or with the findings obtained in the audit, or whether the other information otherwise appears to be materially misstated. If, based on the work we have carried out, we conclude that other information contains material misstatements, we are required to report this matter. We have nothing to report regarding this.

## **Responsibility of the Board of Directors of the Management Company for the financial statements**

The Board of Directors of the Management Company is responsible for the preparation and fair overall presentation of the annual financial statements in accordance with the legal provisions and regulations applicable in Luxembourg regarding the preparation and presentation of the annual financial statements and for such internal controls as the Board of Directors of the Management Company deems necessary for the preparation of the financial statements to enable annual financial statements to be free from material misstatements, whether intentional or unintentional.

In preparing the annual financial statements, the Board of Directors of the Management Company is responsible for assessing the ability of the Fund and each of its sub-funds to continue as a going concern and, where relevant, to provide information on matters relating to going concern and acceptance going concern basis as an accounting principle unless the board of directors of the management company intends to liquidate the fund or one of its sub-funds, to cease business activities or has no other realistic alternative than to do so.

## **Responsibility of the Réviseur d'Entreprises agréé for the audit of the annual financial statements**

Our objectives are to obtain reasonable assurance about whether the annual financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a Report by the Réviseur d'Entreprises agréé that contains our audit opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit in accordance with the Law of 23 July 2016 and pursuant to the ISAs as adopted by the CSSF for Luxembourg will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these annual financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and pursuant to the ISAs as adopted by the CSSF for Luxembourg, we exercise professional judgement and maintain professional scepticism. In addition:

- We identify and assess the risks of material misstatement of the annual financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for the audit opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- We obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- We evaluate the appropriateness of accounting policies used by the Management Company's Board of Directors, and the reasonableness of accounting estimates and related disclosures.
- We draw conclusions on the appropriateness of the Board of Directors of the Management Company's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Fund or any of its Sub-Funds to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in the Report by the Réviseur d'Entreprises agréé to the related disclosures in the annual financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of the report by the Réviseur d'Entreprises agréé. However, future events or circumstances may result in the Fund or one of its sub-funds being unable to continue as a going concern.

- We evaluate the overall presentation, structure and content of the annual financial statements, including the disclosures, and whether they constitute a fair presentation of the underlying transactions and events.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

## 2 General information

### **Investment fund under Luxembourg law „Umbrella Construction“**

Swisscanto (LU) Bond Fund is subject to the legal provisions set forth in Part I of the Luxembourg law of 17 December 2010 on undertakings for collective investment.

The management regulations of the investment fund were established by the management company on 30 October 1991. Several amendments have been made and, in accordance with the management regulations, published in the “Mémorial”.

The current versions of the management company's articles of association and the fund's management regulations have been deposited at the Register of Companies in Luxembourg.

The fund contract, the detailed sales prospectus, the key investor information, and the annual and semi-annual reports may be obtained directly and free of charge in printed form from Swisscanto Asset Management AG, the head office of the management company, the custodian bank and the representative in Switzerland, from the German payment and information agent, from any branch of the Cantonal banks and any payment and sales office. The information is also available on the Swisscanto website ([www.swisscanto.com](http://www.swisscanto.com)), where current information on the fund is available.

Subscriptions shall only be made after consulting the current sales prospectus and the most recent annual report, as well as, where available, any subsequent semi-annual report. Subscriptions to fund units solely on the basis of the annual and semi-annual reports are not accepted.

### **Sales restrictions**

Units in Swisscanto (LU) Bond Fund may not be offered, sold or delivered within the US or to persons considered US persons within the meaning of Regulation S of the US Securities Act of 1933 or in accordance with the US Commodity Exchange Act, as amended.

According to the rules of conduct of the Asset Management Association Switzerland of August 5 and September 23, 2021 (effective January 1, 2022)

Compensation for the marketing of the investment fund is paid out of the flat-rate administrative commission. Swisscanto Asset Management International S.A. also offers remuneration to institutional investors holding fund units for third parties from the fixed administrative commission.

### **Risk management process**

As part of the risk management process the total risk of all the subfunds is measured and checked using the so-called commitment approach. The management company applies a risk management process to the fund and each subfund that complies with the Luxembourg law of 17 December 2010 and other applicable regulations, in particular CSSF Circular 11/51.

## 3 Activity Report

### Swisscanto (LU) Bond Fund Vision Responsible AUD

#### 1. Market Overview

Since November 2023, an early year-end rally has reconciled the majority of investors with a changeable investment period from February 2023 to January 2024. The financial markets started with a lot of euphoria, even though the market consensus at the beginning of the year was that a global recession would soon occur. But the energy crisis that was partly predicted came to fruition. A mild winter was avoided and, particularly in the USA, the surprisingly robust economic development provided the necessary support of the stock markets. Neither further key interest rate increases in practically all developed regions (with the exception of Japan) nor the turbulence in the banking sector could ensure a lasting reversal of this positive trend.

The infection figures published, which were mostly lower than expected, also had a supportive effect and it became increasingly clear that the fight against price increases, which have gotten out of hand in some places, will soon be won. Accordingly, there was speculation early in the year about possible interest rate peaks or even possible interest rate cuts at the end of the year. The first half of the at least at first glance, the reporting period showed an outstanding performance, especially for American stocks. Upon closer inspection, however, the conclusion remained that it was primarily the hype surrounding artificial intelligence and the closely related issues the increase in the value of seven US mega-caps caused the strongly positive difference.

After the summer, the long-awaited (mild) recession was particularly damaging, which would also have opened the door to less high interest rates. With inflation rates visibly declining, the American central bank Fed recently announced another one. This gave rise to fantasies of interest rate cuts and thus stimulated the financial markets again at the end of the year. In this environment, bonds and stocks recorded significant gains while the US dollar and the euro fell against the Swiss franc.

#### 2. Review of categories relevant to the Fund

Last year, interest rates in many currencies rose over the reporting period. In Australia, the yield on the 10-year government bond reached a new high since 2011 of almost 5% at the beginning of November 2023. It then fell again by around one percent. Credit premiums moved lower in Australia amid high volatility.

#### 3. Performance review

The fund anticipated the rise in interest rates, but was surprised by the wide spreads at the top. Because the interest and credit premiums had already reached attractive levels, the absolute performance was attractive. Thanks to active interest rate management and balanced credit allocation, the fund was able to outperform the gross benchmark.

## Swisscanto (LU) Bond Fund Vision Responsible CAD

### 1. Market Overview

Since November 2023, an early year-end rally has reconciled the majority of investors with a changeable investment period from February 2023 to January 2024. The financial markets started with a lot of euphoria, even though the market consensus at the beginning of the year was that a global recession would soon occur. But the energy crisis that was partly predicted came to fruition. A mild winter was avoided and, particularly in the USA, the surprisingly robust economic development provided the necessary effect. Support of the stock markets. Neither further key interest rate increases in practically all developed regions (with the exception of Japan) nor the turbulence in the banking sector could ensure a lasting reversal of this positive trend.

The infection figures published, which were mostly lower than expected, also had a supportive effect and it became increasingly clear that the fight against price increases, which have gotten out of hand in some places, will soon be won. Accordingly, there was speculation early in the year about possible interest rate peaks or even possible interest rate cuts at the end of the year. The first half of the at least at first glance, the reporting period showed an outstanding performance, especially for American stocks. Upon closer inspection, however, the conclusion remained that it was primarily the hype surrounding artificial intelligence and the closely related issues the increase in the value of seven US mega-caps caused the strongly positive difference.

After the summer, the long-awaited (mild) recession was particularly damaging, which would also have opened the door to less high interest rates. With inflation rates visibly declining, the American central bank Fed recently announced another one. This gave rise to fantasies of interest rate cuts and thus stimulated the financial markets again at the end of the year. In this environment, bonds and stocks recorded significant gains while the US dollar and the euro fell against the Swiss franc.

### 2. Review of categories relevant to the Fund

At the beginning of the reporting period, the central banks appeared to have successfully established their narrative of "higher interest rates for longer" on the markets. The specter of a third consecutive year of negative total returns became increasingly realistic for global government bonds. Supported by high-spending consumers and a resilient labor market in the USA and inflation figures remaining at a high level, interest rates continued to climb on both sides of the Atlantic. The market reaction to the increased geopolitical risks caused by the devastating terrorist attack on Israel was muted. Interest rates fell only temporarily and the price of oil barely moved. Interest rate volatility remained very high and peaked in late October when the 10-year US Treasury yield exceeded 5% for the first time since 2007. The first day of November brought a complete change in mood: After the European Central Bank (ECB) and the since the Bank of Japan had not made any interest rate changes, the American Fed also held its regular meeting as expected interest rates remain unchanged. The subsequent press conference by Jerome Powell marked a turning point (pivot) for the Markets. Investors interpreted his statements to mean that the Fed was not planning any further interest rate increases and that the first interest rate cuts were imminent. The weak economic data and falling short of expectations new issuance plans for US government bonds caused the stock markets and the yield on ten-year bonds to rise sharply US Treasury bonds fall. This was just the beginning of a self-reinforcing movement that lasted until the end of the reporting period. This made November the best month for the US bond market in the past 40 years. For at least the seventh time in this interest rate cycle, markets speculated that central banks would turn towards expansionary policies. But hopes of imminent interest rate cuts have so far been regularly disappointed. This time, however, the rally across asset classes in the final two months of the year was fueled by a number of technical factors and investor behavior patterns. Until the end of October, most market players were positioned defensively and held high levels of cash. They were from the rising prices of risky assets and the falling interest rates. Accordingly, they had to close their short positions and increase the risk in the portfolios. The meanwhile attractive initial valuations and the fear of the Investors' fear of missing out (FOMO) contributed to the price fireworks. At its last meeting of 2023 in mid-December, the Fed did nothing to curb the euphoria on the markets. The more cautious tones of the ECB were ignored, causing many markets to go from annual lows to annual highs in just two months skyrocketed. CAD interest rates were unable to escape the international environment, although the Bank of Canada took a break in the interest rate hike cycle earlier than the Fed and has left its key interest rate unchanged at 5% since July 2023.

### 3. Performance review

The absolute fund performance and the relative performance compared to the benchmark were positive in the reporting period. Absolute and relative was characterized by the positioning on the CAD yield curve - with higher rates for short maturities than long maturities. Security selection - no defaults - and the general narrowing of spreads between corporate bonds and government bonds also contributed positively to performance. The commitment to capture various risk premiums such as high yield, coco and emerging markets has once again proven its worth.

Class	ISIN	Security	Distribution	Performance in %

## 1. Market Overview

Since November 2023, an early year-end rally has reconciled the majority of investors with a changeable investment period from February 2023 to January 2024. The financial markets started with a lot of euphoria, even though the market consensus at the beginning of the year was that a global recession would soon occur. But the energy crisis that was partly predicted came to fruition. A mild winter was avoided and, particularly in the USA, the surprisingly robust economic development provided the necessary support for the stock markets. Neither further key interest rate increases in practically all developed regions (with the exception of Japan) nor the turbulence in the banking sector could ensure a lasting reversal of this positive trend.

The infection figures published, which were mostly lower than expected, also had a supportive effect and it became increasingly clear that the fight against price increases, which have gotten out of hand in some places, will soon be won. Accordingly, there was speculation early in the year about possible interest rate peaks or even possible interest rate cuts at the end of the year. The first half of the year, at least at first glance, showed an outstanding performance, especially for American stocks. Upon closer inspection, however, the conclusion remained that it was primarily the hype surrounding artificial intelligence and the closely related issues of the increase in the value of seven US mega-caps that caused the strongly positive difference.

After the summer, the long-awaited (mild) recession was particularly damaging, which would also have opened the door to less high interest rates. With inflation rates visibly declining, the American central bank Fed recently announced another one. This gave rise to fantasies of interest rate cuts and thus stimulated the financial markets again at the end of the year. In this environment, bonds and stocks recorded significant gains while the US dollar and the euro fell against the Swiss franc.

## 2. Review of categories relevant to the Fund

At the beginning of the reporting period, the central banks appeared to have successfully established their narrative of "higher interest rates for longer" on the markets. The specter of a third consecutive year of negative total returns has been raised for global Corporate bonds and is becoming more and more realistic. Supported by high-spending consumers and one resilient labor market in the USA and inflation figures remaining at a high level, interest rates climbed on both sides of the Atlantic and continue to rise. The market reaction to the increased geopolitical risks caused by the devastating terrorist attack on Israel was muted. Interest rates fell only temporarily and the price of oil barely moved. Interest rate volatility remained very high, reaching a peak in late October when the 10-year US Treasury yield fell for the first time since 2007 below the five percent mark. The continuous rise in nominal and real interest rates weighed on the stock markets and led to a widening of credit spreads. The first day of November brought a complete change in mood: After the European Central Bank (ECB) and the Bank of Japan did not change interest rates, the American Fed also left interest rates unchanged at its regular meeting, as expected. The subsequent press conference by Jerome Powell marked the event but a turning point (pivot) for the markets. Investors interpreted his statements to mean that the Fed did not plan further interest rate increases and that the first interest rate cuts are imminent.

The weak economic data and the new issuance plans for US government bonds that fell short of expectations caused the stock markets to rise sharply and the yield on ten-year US government bonds to fall. This was just the beginning of a self-reinforcing movement that lasted until the end of the reporting period. This made November the best month for the US bond market in the past 40 years. For at least the seventh time in this interest rate cycle, markets speculated on a turnaround by central banks towards expansionary policy. But hopes of imminent interest rate cuts have so far been regularly disappointed. This time, however, the rally across all asset classes in the final two months of the year was driven by a number of technical factors and behavioral patterns of investors that were fueled. Most market players were positioned defensively until the end of October, held high cash holdings. They were surprised by the rising prices of risky assets and the falling interest rates. Accordingly, they had to close their short positions and increase the risk in the portfolios. The relatively attractive initial valuations and investors' fear of missing out (FOMO) contributed to the price fireworks. At its last meeting of 2023 in mid-December, the Fed did nothing to quell the euphoria or to slow down markets. As a result, the broad US stock index S&P500 reached an all-time high. The ECB's more cautious tones were ignored, sending many markets soaring from annual lows to annual highs in just two months. In the comparison with March 2022, when the Fed began raising interest rates, the stock markets are now trading higher again, spreads have narrowed and implied volatilities have fallen everywhere. The resulting financial conditions, however, underlying conditions thwart central banks' intentions to keep inflation under control and could force them to raise interest rates again later or at least adopt a more restrictive tone. The latest market movements also reveal another contradiction, namely that between low interest rates and weaker interest rate economic development) and high stock valuations (which reflect a booming economy and rising implied corporate profits). The only way out of this dilemma would be a controlled slowdown in the economy (soft landing), which would allow interest rates to be reduced before high interest rates cause further accidents. This soft landing scenario doesn't seem impossible. But the risk that it will not succeed is not currently priced into the markets.

## 3. Performance review

The Swisscanto (LU) Bond Fund Responsible COCO achieved a positive performance over the reporting period, and we also outperformed the benchmark. The main positive contributions to relative performance came from the overweight in AT1 bonds with first call dates in one to five years, the underweight in Credit Suisse and the overweight in Spanish banks.

The main negative contributors to relative performance were underweights in UK banks, French banks and AT1 bonds with first call dates of zero to one year.

The subsequent press conference by Jerome Powell marked the event but a turning point (pivot) for the markets. Investors interpreted his statements to mean that the Fed did not planning further interest rate increases and that the first interest rate cuts are imminent.

The weak economic data and the new issuance plans for US government bonds that fell short of expectations caused the stock markets to rise sharply and the yield on ten-year US government bonds to fall. This was just the beginning of a self-reinforcing movement that lasted until the end of the reporting period. This made November the best month for the US bond market in the past 40 years. For at least the seventh time in this interest rate cycle, markets speculated on a turnaround by central banks Towards expansionary policy. But hopes of imminent interest rate cuts have so far been regularly disappointed. This time, however, the rally across all asset classes in the final two months of the year was driven by a number of technical factors and Behavioral patterns of investors are fueled. Most market players were positioned defensively until the end of October held high cash holdings. They were surprised by the rising prices of risky assets and the falling interest rates. Accordingly, they had to close their short positions and increase the risk in the portfolios. The relatively attractive ones Initial valuations and investors' fear of missing out (FOMO) contributed to the price fireworks at. At its last meeting of 2023 in mid-December, the Fed did nothing to quell the euphoria to slow down markets. As a result, the broad US stock index S&P500 reached an all-time high. The ECB's more cautious tones were ignored, sending many markets soaring from annual lows to annual highs in just two months. In the Compared to March 2022, when the Fed began raising interest rates, the stock markets are now trading higher again, spreads have narrowed and implied volatilities have fallen everywhere. The resulting financial however, underlying conditions thwart central banks' intentions to keep inflation under control and could force them to raise interest rates again later or at least adopt a more restrictive tone. The latest market movements also reveal another contradiction, namely that between low interest rates and weaker interest rates economic development) and high stock valuations (which reflect a booming economy and rising imply corporate profits). The only way out of this dilemma would be a controlled slowdown in the economy (soft landing), which would allow interest rates to be reduced before high interest rates cause further accidents. This soft landing scenario doesn't seem impossible. But the risk that it will not succeed is not currently priced into the markets.

### 3. Performance review

The emerging market bonds asset class recorded a positive performance in 2023. The fund generated a outperformance. Also during this period, our local currency overweights in Latin America and the underweights in Turkish bonds made the biggest positive contributions to performance. On the other hand, the "non-holding" of various countries in distress such as Pakistan, Sri Lanka and Zambia had a negative impact on relative performance.

## 1. Market Overview

Since November 2023, an early year-end rally has reconciled the majority of investors with a changeable investment period from February 2023 to January 2024. The financial markets started with a lot of euphoria, even though the market consensus at the beginning of the year was that a global recession would soon occur. But the energy crisis that was partly predicted came to fruition. A mild winter was avoided and, particularly in the USA, the surprisingly robust economic development provided the necessary support for the stock markets. Neither further key interest rate increases in practically all developed regions (with the exception of Japan) nor the turbulence in the banking sector could ensure a lasting reversal of this positive trend.

The infection figures published, which were mostly lower than expected, also had a supportive effect and it became increasingly clear that the fight against price increases, which have gotten out of hand in some places, will soon be won. Accordingly, there was speculation early in the year about possible interest rate peaks or even possible interest rate cuts at the end of the year. The first half of the year at least at first glance, the reporting period showed an outstanding performance, especially for American stocks. Upon closer inspection, however, the conclusion remained that it was primarily the hype surrounding artificial intelligence and the closely related issues the increase in the value of seven US mega-caps caused the strongly positive difference.

After the summer, the long-awaited (mild) recession was particularly damaging, which would also have opened the door to less high interest rates. With inflation rates visibly declining, the American central bank Fed recently announced another one. This gave rise to fantasies of interest rate cuts and thus stimulated the financial markets again at the end of the year. In this environment, bonds and stocks recorded significant gains while the US dollar and the euro fell against the Swiss franc.

## 2. Review of categories relevant to the Fund

At the beginning of the reporting period, the central banks appeared to have successfully established their narrative of "higher interest rates for longer" on the markets. The specter of a third consecutive year of negative total returns has been raised for global Corporate bonds are becoming more and more realistic. Supported by high-spending consumers and one resilient labor market in the USA and inflation figures remaining at a high level, interest rates climbed on both sides Atlantic continues to rise. The market reaction to the increased geopolitical risks caused by the devastating terrorist attack on Israel was muted. Interest rates fell only temporarily and the price of oil barely moved. Interest rate volatility remained very high, reaching a peak in late October when the 10-year US Treasury yield fell for the first time since 2007 the five percent mark was exceeded. The continuous rise in nominal and real interest rates weighed on the stock markets and led to a widening of credit spreads. The first day of November brought a complete change in mood: After the European Central Bank (ECB) and the Bank of Japan did not change interest rates, the American Fed also left interest rates unchanged at its regular meeting, as expected. The subsequent press conference by Jerome Powell marked the event but a turning point (pivot) for the markets. Investors interpreted his statements to mean that the Fed did not planning further interest rate increases and that the first interest rate cuts are imminent.

The weak economic data and the new issuance plans for US government bonds that fell short of expectations caused the stock markets to rise sharply and the yield on ten-year US government bonds to fall. This was just the beginning of a self-reinforcing movement that lasted until the end of the reporting period. This made November the best month for the US bond market in the past 40 years. For at least the seventh time in this interest rate cycle, markets speculated on a turnaround by central banks towards expansionary policy. But hopes of imminent interest rate cuts have so far been regularly disappointed. This time, however, the rally across all asset classes in the final two months of the year was driven by a number of technical factors and behavioral patterns of investors are fueled. Most market players were positioned defensively until the end of October held high cash holdings. They were surprised by the rising prices of risky assets and the falling interest rates. Accordingly, they had to close their short positions and increase the risk in the portfolios. The relatively attractive ones Initial valuations and investors' fear of missing out (FOMO) contributed to the price fireworks at. At its last meeting of 2023 in mid-December, the Fed did nothing to quell the euphoria to slow down markets. As a result, the broad US stock index S&P500 reached an all-time high. The ECB's more cautious tones were ignored, sending many markets soaring from annual lows to annual highs in just two months. In the Compared to March 2022, when the Fed began raising interest rates, the stock markets are now trading higher again, spreads have narrowed and implied volatilities have fallen everywhere. The resulting financial however, underlying conditions thwart central banks' intentions to keep inflation under control and could force them to raise interest rates again later or at least adopt a more restrictive tone. The latest market movements also reveal another contradiction, namely that between low interest rates and weaker interest rates economic development) and high stock valuations (which reflect a booming economy and rising imply corporate profits). The only way out of this dilemma would be a controlled slowdown in the economy (soft landing), which would allow interest rates to be reduced before high interest rates cause further accidents. This soft landing scenario doesn't seem impossible. But the risk that it will not succeed is not currently priced into the markets.

### 3. Performance review

The fund was able to generate a positive return in its reference currency, USD, which was only slightly below the overall market. The main drivers were the allocations to the local emerging markets of Mexico, Brazil and South Africa as well as the good ones Positioning on the USD yield curve. Investments in NOK, AUD and CNY made further positive contributions to performance. Investments in EUR government bonds and corporate bonds in GBP reduced performance. In terms of sector allocation, corporate bonds in particular made a positive contribution. In the first three quarters the fund had a below-average performance due to the generally difficult environment. The fund was able to rally in Q4 ultimately exploited to secure a clearly positive return for the past year.

This soft landing scenario doesn't seem impossible. But the risk that it will not succeed is not currently priced into the markets.

## 3. Performance review

After a very volatile year, it seems almost unbelievable that the yield curve for US government bonds with maturities of ten years or longer ended the year at the same yield level as at the beginning of the year. Thanks to lower US interest rates in the two to ten year range as well as lower credit spreads and lower European interest rates, global corporate bonds were able to end the period

under review with a clearly positive performance. Despite the events surrounding the US regional banks and Credit Suisse in the first quarter, the overweighting of the financial sector continued to make the largest positive contribution to performance throughout the year.

## Swisscanto (LU) Bond Fund Responsible Global Convertible

### 1. Market Overview

Since November 2023, an early year-end rally has reconciled the majority of investors with a changeable investment period from February 2023 to January 2024. The financial markets started with a lot of euphoria, even though the market consensus at the beginning of the year was that a global recession would soon occur. But the energy crisis that was partly predicted came to fruition. A mild winter was avoided and, particularly in the USA, the surprisingly robust economic development provided the necessary support of the stock markets. Neither further key interest rate increases in practically all developed regions (with the exception of Japan) nor the turbulence in the banking sector could ensure a lasting reversal of this positive trend.

The infection figures published, which were mostly lower than expected, also had a supportive effect and it became increasingly clear that the fight against price increases, which have gotten out of hand in some places, will soon be won. Accordingly, there was speculation early in the year about possible interest rate peaks or even possible interest rate cuts at the end of the year. The first half of the at least at first glance, the reporting period showed an outstanding performance, especially for American stocks. Upon closer inspection, however, the conclusion remained that it was primarily the hype surrounding artificial intelligence and the closely related issues the increase in the value of seven US mega-caps caused the strongly positive difference.

After the summer, the long-awaited (mild) recession was particularly damaging, which would also have opened the door to less high interest rates. With inflation rates visibly declining, the American central bank Fed recently announced another one. This gave rise to fantasies of interest rate cuts and thus stimulated the financial markets again at the end of the year. In this environment, bonds and stocks recorded significant gains while the US dollar and the euro fell against the Swiss franc.

### 2. Review of categories relevant to the Fund

As expected, the new issues market recovered in the reporting period from the low volumes in 2022. The new issue volume has increased but is still below historical averages. We expect this recovery to continue in the coming years.

In addition to the usual sectors, the increased appearance of utilities on the market was observed in the reporting period. New issuers with official investment grade ratings have entered the market and have convertible bonds with a higher rating placed for short terms. Such issuers from the utilities sector do not rely on convertible bonds for their refinancing and typically already have corporate bonds outstanding. They issue more for tactical reasons in order to benefit from the cheaper refinancing costs.

### 3. Performance review

The year was one of volatility; The market fluctuated between positive and negative single-digit performance during the reporting period.

The Swisscanto Bond Fund Responsible Global Convertible achieved a positive gross performance, although slightly behind its benchmark.

This is mainly due to the underweight in the industrial and pharmaceutical sectors and the overweight in the retail/wholesale sector. Our defensive positioning - quality bias - did not pay off in this context. Within the Industrial sector we were underweight Electric Vehicles, which cost us performance as this sector has achieved extremely positive results.

On the other hand, our positioning in Leisure / Transportation and Food & Drink contributed positively to performance, but could not fully compensate for the negative contribution from the sectors mentioned above.

We have gone through some changes, but this has not significantly contributed to our overall exposure to the stock market.

The overall delta (stock sensitivity) was slightly above that of the benchmark at the end of the reporting period. The effective duration is low and is therefore significantly lower than most bond funds.

## Swisscanto (LU) Bond Fund Responsible Global Rates

### 1. Market Overview

Since November 2023, an early year-end rally has reconciled the majority of investors with a changeable investment period from February 2023 to January 2024. The financial markets started with a lot of euphoria, even though the market consensus at the beginning of the year was that a global recession would soon occur. But the energy crisis that was partly predicted came to fruition. A mild winter was avoided and, particularly in the USA, the surprisingly robust economic development provided the necessary support of the stock markets. Neither further key interest rate increases in practically all developed regions (with the exception of Japan) nor the turbulence in the banking sector could ensure a lasting reversal of this positive trend.

The infection figures published, which were mostly lower than expected, also had a supportive effect and it became increasingly clear that the fight against price increases, which have gotten out of hand in some places, will soon be won. Accordingly, there was speculation early in the year about possible interest rate peaks or even possible interest rate cuts at the end of the year. The first half of the at least at first glance, the reporting period showed an outstanding performance, especially for American stocks. Upon closer inspection, however, the conclusion remained that it was primarily the hype surrounding artificial intelligence and the closely related issues the increase in the value of seven US mega-caps caused the strongly positive difference.

After the summer, the long-awaited (mild) recession was particularly damaging, which would also have opened the door to less high interest rates. With inflation rates visibly declining, the American central bank Fed recently announced another one. This gave rise to fantasies of interest rate cuts and thus stimulated the financial markets again at the end of the year. In this environment, bonds and stocks recorded significant gains while the US dollar and the euro fell against the Swiss franc.

### 2. Review of categories relevant to the Fund

At the beginning of the reporting period, the central banks appeared to have successfully established their narrative of "higher interest rates for longer" on the markets. The specter of a third consecutive year of negative total returns became increasingly realistic for global government bonds. Supported by high-spending consumers and a resilient labor market in the USA and inflation figures remaining at a high level, interest rates continued to climb on both sides of the Atlantic. The market reaction to the increased geopolitical risks caused by the devastating terrorist attack on Israel was muted. Interest rates fell only temporarily and the price of oil barely moved. Interest rate volatility remained very high and peaked in late October when the 10-year US Treasury yield exceeded 5% for the first time since 2007. The first day of November brought a complete change in mood: After the European Central Bank (ECB) and the since the Bank of Japan had not made any interest rate changes, the American Fed also held its regular meeting as expected interest rates remain unchanged. The subsequent press conference by Jerome Powell marked a turning point (pivot) for them Markets. Investors interpreted his statements to mean that the Fed was not planning any further interest rate increases and that the first interest rate cuts were imminent. The weak economic data and falling short of expectations new issuance plans for US government bonds caused the stock markets and the yield on ten-year bonds to rise sharply US Treasury bonds fall. This was just the beginning of a self-reinforcing movement that lasted until the end of the reporting period. This made November the best month for the US bond market in the past 40 years. For at least the seventh time in this interest rate cycle, markets speculated that central banks would turn towards expansionary policies. But hopes of imminent interest rate cuts have so far been regularly disappointed. This time, however, the rally across asset classes in the final two months of the year was fueled by a number of technical factors and investor behavior patterns. Until the end of October, most market players were positioned defensively and held high levels of cash. They were from the rising prices of risky assets and the falling interest rates. Accordingly, they had to close their short positions and increase the risk in the portfolios. The relatively attractive initial valuations and the fear of investors Fear of missing out (FOMO) contributed to the price fireworks. At their last meeting of 2023 mid in December, the Fed did nothing to curb the euphoria on the markets. As a result, the broad US stock index S&P500 reached an all-time high. The ECB's more cautious tones were ignored, sending many markets soaring from annual lows to annual highs in just two months. The resulting financial framework conditions however, this would undermine central banks' intentions to keep inflation under control and could force them to do so raise interest rates again later or at least adopt a more restrictive tone. The recent market movements are also encouraging another contradiction comes to light, namely that between low interest rates (that of weaker economic development would correspond) and high stock valuations (which reflect a booming economy and rising corporate profits imply).

### 3. Performance review

The fund was refocused on global government bonds at the end of September. The performance in the last quarter was both absolute and positive (before costs). The main drivers were the long duration bets on the main yield curves and allocations in MXN.

# Swisscanto (LU) Bond Fund Responsible Secured High Yield

## 1. Market Overview

Since November 2023, an early year-end rally has reconciled the majority of investors with a changeable investment period from February 2023 to January 2024. The financial markets started with a lot of euphoria, even though the market consensus at the beginning of the year was that a global recession would soon occur. But the energy crisis that was partly predicted came to fruition. A mild winter was avoided and, particularly in the USA, the surprisingly robust economic development provided the necessary support for the stock markets. Neither further key interest rate increases in practically all developed regions (with the exception of Japan) nor the turbulence in the banking sector could ensure a lasting reversal of this positive trend.

The infection figures published, which were mostly lower than expected, also had a supportive effect and it became increasingly clear that the fight against price increases, which have gotten out of hand in some places, will soon be won. Accordingly, there was speculation early in the year about possible interest rate peaks or even possible interest rate cuts at the end of the year. The first half of the at least at first glance, the reporting period showed an outstanding performance, especially for American stocks. Upon closer inspection, however, the conclusion remained that it was primarily the hype surrounding artificial intelligence and the closely related issues the increase in the value of seven US mega-caps caused the strongly positive difference.

After the summer, the long-awaited (mild) recession was particularly damaging, which would also have opened the door to less high interest rates. With inflation rates visibly declining, the American central bank Fed recently announced another one. This gave rise to fantasies of interest rate cuts and thus stimulated the financial markets again at the end of the year. In this environment, bonds and stocks recorded significant gains while the US dollar and the euro fell against the Swiss franc.

## 2. Review of categories relevant to the Fund

Overall, the 2023 financial year was an extremely successful year for high-yield bonds. Decisive factors for the extraordinarily high annual return were falling risk premiums and interest rates as well as economic growth, which proved to be much more resilient than feared. Various risk off phases such as in the 1st quarter due to the collapse of various banks were possible but were mastered without damage.

After an optimistic summer, financial markets began the fourth quarter on the defensive, with the trends that dominated the second and third quarters continuing: rising government bond yields and weak stock markets. At the end of October, when 10-year US Treasury yields reached nearly 5%, the Fed signaled the end of the interest rate hike phase has been reached. This triggered significant price increases in financial markets, with bond yields falling, credit spreads fell and the stock markets climbed to their highest level of the year. Against this background High-yield bonds posted positive returns for the fifth quarter in a row. And these returns are included above average. Credit premiums for high-yield bonds fell in Europe and the USA. Bonds with a B rating rose the most, closely followed by bonds with a BB rating. CCC ratings deteriorated during the quarter, particularly in Europe, where economic growth is weaker than in North America. The Issuance activity for new high-yield bonds slowed somewhat over the course of the quarter. Until mid-November, many issuers held back due to the high level of interest rates. Thanks to falling yields and better investor sentiment, the primary market activity increased for a few weeks before tapering off again in mid-December. We saw a good mix of issuers from different sectors and across the ratings spectrum, including well-known names and Issuers of primary bonds.

## 3. Performance review

The Swisscanto Bond Fund Secured High Yield achieved a very positive performance, and we were also able to generate an attractive outperformance compared to the benchmark. Maintaining an appropriate beta position throughout the year was critical in an environment of volatile but overall narrowing spreads. Strongest to retail, automotive and consumer goods, which were in high demand, contributed to performance. From an alpha perspective overall, our long positioning in the automotive, telecommunications and transportation sectors contributed the most to the relative outperformance. In contrast, our positioning in technology, utilities and consumer goods increased over the year underperformed, primarily due to our overweight in these segments. What the post from a rating perspective, the difference between BB and B has narrowed. Therefore, our overweight in BB was not optimal, but was supported by excellent selection in B-rated bonds, resulting in a solid overall exposure relative performance in all rating segments.

## Swisscanto (LU) Bond Fund Sustainable Global High Yield

### 1. Market Overview

Since November 2023, an early year-end rally has reconciled the majority of investors with a changeable investment period from February 2023 to January 2024. The financial markets started with a lot of euphoria, even though the market consensus at the beginning of the year was that a global recession would soon occur. But the energy crisis that was partly predicted came to fruition. A mild winter was avoided and, particularly in the USA, the surprisingly robust economic development provided the necessary support of the stock markets. Neither further key interest rate increases in practically all developed regions (with the exception of Japan) nor the turbulence in the banking sector could ensure a lasting reversal of this positive trend.

The infection figures published, which were mostly lower than expected, also had a supportive effect and it became increasingly clear that the fight against price increases, which have gotten out of hand in some places, will soon be won. Accordingly, there was speculation early in the year about possible interest rate peaks or even possible interest rate cuts at the end of the year. The first half of the at least at first glance, the reporting period showed an outstanding performance, especially for American stocks. Upon closer inspection, however, the conclusion remained that it was primarily the hype surrounding artificial intelligence and the closely related issues the increase in the value of seven US mega-caps caused the strongly positive difference.

After the summer, the long-awaited (mild) recession was particularly damaging, which would also have opened the door to less high interest rates. With inflation rates visibly declining, the American central bank Fed recently announced another one. This gave rise to fantasies of interest rate cuts and thus stimulated the financial markets again at the end of the year. In this environment, bonds and stocks recorded significant gains while the US dollar and the euro fell against the Swiss franc.

### 2. Review of categories relevant to the Fund

Financial markets began the fourth quarter on the defensive, with the trends that dominated the second and third quarters continued: rising yields on government bonds and weak stock markets. At the end of October, the Fed signaled that the end of the interest rate hike phase had been reached. This triggered significant price increases on the financial markets. Bond yields fell, credit spreads fell and stock markets climbed to their highest level of the year. Against this backdrop, high-yield bonds posted positive returns for the fifth consecutive quarter. The credit rating premiums for High-yield bonds also fell, and even more so, in Europe and the US. The bonds with one B-rated bonds rose the most, followed closely by BB-rated bonds. CCC ratings developed during the quarter, particularly in Europe, where economic growth is weaker than in North America. The issuing activity for new high-yield bonds fell slightly over the course of the quarter. Many issuers held out until mid-November given the high level of interest rates. Thanks to falling yields and improving investor sentiment, primary market activity increased for a few weeks before tapering off again in mid-December. We saw a good mix of issuers from different sectors and across the ratings spectrum, including well-known names and issuers of Initial bonds. 2023 proved to be an excellent year for high-yield bond investors.

### 3. Performance review

The fund achieved a positive performance, but we lost some performance compared to the benchmark. The majority of the underperformance was due to certain emerging market issuers performing poorly over the period performance achieved. Our Chinese stocks did not perform as hoped as the real estate sector did not recover has occurred. We also held a US and a European bond with poor performance. What they missed in terms of opportunities, we had no exposure to cruise, airline and energy companies, all of which contributed very positively to benchmark performance. On the other hand, we did very well when selecting securities in the banking, media and telecommunications sectors. Among the individual issuers in other sectors that have a notable had a positive impact on performance include some of our favorite SDG leaders. In terms of asset allocation, our underweight to CCC-rated stocks had a positive impact relative to the benchmark index in this strong market environment negative. 2023 was a difficult year for sustainable high-yield bonds compared to traditional high-yield bonds, as some of the best-performing sectors and rating classes are underrepresented in this segment. Before this one despite this, the fund still performed well.

## 1. Market Overview

Since November 2023, an early year-end rally has reconciled the majority of investors with a changeable investment period from February 2023 to January 2024. The financial markets started with a lot of euphoria, even though the market consensus at the beginning of the year was that a global recession would soon occur. But the energy crisis that was partly predicted came to fruition. A mild winter was avoided and, particularly in the USA, the surprisingly robust economic development provided the necessary support for the stock markets. Neither further key interest rate increases in practically all developed regions (with the exception of Japan) nor the turbulence in the banking sector could ensure a lasting reversal of this positive trend.

The infection figures published, which were mostly lower than expected, also had a supportive effect and it became increasingly clear that the fight against price increases, which have gotten out of hand in some places, will soon be won. Accordingly, there was speculation early in the year about possible interest rate peaks or even possible interest rate cuts at the end of the year. The first half of the year, at least at first glance, the reporting period showed an outstanding performance, especially for American stocks. Upon closer inspection, however, the conclusion remained that it was primarily the hype surrounding artificial intelligence and the closely related issues the increase in the value of seven US mega-caps caused the strongly positive difference.

After the summer, the long-awaited (mild) recession was particularly damaging, which would also have opened the door to less high interest rates. With inflation rates visibly declining, the American central bank Fed recently announced another one. This gave rise to fantasies of interest rate cuts and thus stimulated the financial markets again at the end of the year. In this environment, bonds and stocks recorded significant gains while the US dollar and the euro fell against the Swiss franc.

## 2. Review of categories relevant to the Fund

At the beginning of the reporting period, the central banks appeared to have successfully established their narrative of "higher interest rates for longer" on the markets. The specter of a third consecutive year of negative total returns has been raised for global Corporate bonds are becoming more and more realistic. Supported by high-spending consumers and one resilient labor market in the USA and inflation figures remaining at a high level, interest rates climbed on both sides Atlantic continues to rise. The market reaction to the increased geopolitical risks caused by the devastating terrorist attack on Israel was muted. Interest rates fell only temporarily and the price of oil barely moved. Interest rate volatility remained very high, reaching a peak in late October when the 10-year US Treasury yield fell for the first time since 2007 the five percent mark was exceeded. The continuous rise in nominal and real interest rates weighed on the stock markets and led to a widening of credit spreads. The first day of November brought a complete change in mood: After the European Central Bank (ECB) and the Bank of Japan did not change interest rates, the American Fed also left interest rates unchanged at its regular meeting, as expected. The subsequent press conference by Jerome Powell marked the event but a turning point (pivot) for the markets. Investors interpreted his statements to mean that the Fed did not planning further interest rate increases and that the first interest rate cuts are imminent.

The weak economic data and the new issuance plans for US government bonds that fell short of expectations caused the stock markets to rise sharply and the yield on ten-year US government bonds to fall. This was just the beginning of a self-reinforcing movement that lasted until the end of the reporting period. This made November the best month for the US bond market in the past 40 years. For at least the seventh time in this interest rate cycle, markets speculated on a turnaround by central banks towards expansionary policy. But hopes of imminent interest rate cuts have so far been regularly disappointed. This time, however, the rally across all asset classes in the final two months of the year was driven by a number of technical factors and Behavioral patterns of investors are fueled. Most market players were positioned defensively until the end of October held high cash holdings. They were surprised by the rising prices of risky assets and the falling interest rates. Accordingly, they had to close their short positions and increase the risk in the portfolios. The relatively attractive ones Initial valuations and investors' fear of missing out (FOMO) contributed to the price fireworks at. At its last meeting of 2023 in mid-December, the Fed did nothing to quell the euphoria to slow down markets. As a result, the broad US stock index S&P500 reached an all-time high. The ECB's more cautious tones were ignored, sending many markets soaring from annual lows to annual highs in just two months. In the Compared to March 2022, when the Fed began raising interest rates, the stock markets are now trading higher again, spreads have narrowed and implied volatilities have fallen everywhere. The resulting financial however, underlying conditions thwart central banks' intentions to keep inflation under control and could force them to raise interest rates again later or at least adopt a more restrictive tone. The latest market movements also reveal another contradiction, namely that between low interest rates and weaker interest rates economic development) and high stock valuations (which reflect a booming economy and rising imply corporate profits). The only way out of this dilemma would be a controlled slowdown in the economy (soft landing), which would allow interest rates to be reduced before high interest rates cause further accidents. This soft landing scenario doesn't seem impossible. But the risk that it will not succeed is not currently priced into the markets.

### 3. Performance review

The fund ended the year outperforming (before expenses) its benchmark. Initially, one was able to benefit from the lower credit risk premiums at the beginning of the year, although the increased volatility was temporarily offset by the CS's emergency takeover dampened its performance. The overweight in financials was not helpful here. Thanks to his good investments in corporate bonds, he was able to catch up and end the year on a positive note.

This soft landing scenario doesn't seem impossible. But the risk that it will not succeed is not currently priced into the markets.

### 3. Performance review

The market for subordinated corporate bonds has recovered well from the turbulence of the previous year. Thanks to solid investor demand and fewer new issues than redemptions, corporate hybrids were able to achieve significantly better performance than the overall market. The fund has a positive absolute performance and a positive relative performance compared to the Benchmark achieved. In the reporting period, the overweighting of Telekom and Energy as well as the BB sector were the largest made a positive contribution.

This soft landing scenario doesn't seem impossible. But the risk that it will not succeed is not currently priced into the markets.

### 3. Performance review

The fund was able to achieve a small outperformance over the year. Initially, the portfolio benefited from a good start to the reporting year. However, the preponderance of financial stocks had a strong performance impact with the CS emergency takeover cost. The fund subsequently recovered steadily and ultimately outperformed its benchmark. The main driver was the overweight in corporate bonds and good duration positioning towards the end of the year.

The subsequent press conference by Jerome Powell marked the event but a turning point (pivot) for the markets. Investors interpreted his statements to mean that the Fed did not planning further interest rate increases and that the first interest rate cuts are imminent.

The weak economic data and the new issuance plans for US government bonds that fell short of expectations caused the stock markets to rise sharply and the yield on ten-year US government bonds to fall. This was just the beginning of a self-reinforcing movement that lasted until the end of the reporting period. This made November the best month for the US bond market in the past 40 years. For at least the seventh time in this interest rate cycle, markets speculated on a turnaround by central banks towards expansionary policy. But hopes of imminent interest rate cuts have so far been regularly disappointed. This time, however, the rally across all asset classes in the final two months of the year was driven by a number of technical factors and Behavioral patterns of investors are fueled. Most market players were positioned defensively until the end of October held high cash holdings. They were surprised by the rising prices of risky assets and the falling interest rates. Accordingly, they had to close their short positions and increase the risk in the portfolios. The relatively attractive ones Initial valuations and investors' fear of missing out (FOMO) contributed to the price fireworks at. At its last meeting of 2023 in mid-December, the Fed did nothing to quell the euphoria to slow down markets. As a result, the broad US stock index S&P500 reached an all-time high. The ECB's more cautious tones were ignored, sending many markets soaring from annual lows to annual highs in just two months. In the Compared to March 2022, when the Fed began raising interest rates, the stock markets are now trading higher again, spreads have narrowed and implied volatilities have fallen everywhere. The resulting financial however, underlying conditions thwart central banks' intentions to keep inflation under control and could force them to raise interest rates again later or at least adopt a more restrictive tone. The latest market movements also reveal another contradiction, namely that between low interest rates and weaker interest rates economic development) and high stock valuations (which reflect a booming economy and rising imply corporate profits). The only way out of this dilemma would be a controlled slowdown in the economy (soft landing), which would allow interest rates to be reduced before high interest rates cause further accidents. This soft landing scenario doesn't seem impossible. But the risk that it will not succeed is not currently priced into the markets.

### 3. Performance review

At the start of 2023, global corporate bond total returns were at their highest level in over 13 years. Expectations for this year's performance were correspondingly high. In the last quarter of the year the price fireworks finally started and the performance turned significantly positive. The fund achieved a positive gross performance and also outperformed the benchmark before costs. The biggest positive contribution came from Overweighting and selection within the financial sector. The overweighting of defensive sectors and the extensive Exclusion of the energy sector had a negative effect. Duration positioning did not make a significant contribution over the year.

## Swisscanto (LU) Bond Fund Vision Responsible CHF

### 1. Market Overview

Since November 2023, an early year-end rally has reconciled the majority of investors with a changeable investment period from February 2023 to January 2024. The financial markets started with a lot of euphoria, even though the market consensus at the beginning of the year was that a global recession would soon occur. But the energy crisis that was partly predicted came to fruition. A mild winter was avoided and, particularly in the USA, the surprisingly robust economic development provided the necessary support of the stock markets. Neither further key interest rate increases in practically all developed regions (with the exception of Japan) nor the turbulence in the banking sector could ensure a lasting reversal of this positive trend.

The infection figures published, which were mostly lower than expected, also had a supportive effect and it became increasingly clear that the fight against price increases, which have gotten out of hand in some places, will soon be won. Accordingly, there was speculation early in the year about possible interest rate peaks or even possible interest rate cuts at the end of the year. The first half of the at least at first glance, the reporting period showed an outstanding performance, especially for American stocks. Upon closer inspection, however, the conclusion remained that it was primarily the hype surrounding artificial intelligence and the closely related issues the increase in the value of seven US mega-caps caused the strongly positive difference.

After the summer, the long-awaited (mild) recession was particularly damaging, which would also have opened the door to less high interest rates. With inflation rates visibly declining, the American central bank Fed recently announced another one. This gave rise to fantasies of interest rate cuts and thus stimulated the financial markets again at the end of the year. In this environment, bonds and stocks recorded significant gains while the US dollar and the euro fell against the Swiss franc.

### 2. Review of categories relevant to the Fund

In 2023, Switzerland also experienced declining inflation. From the second half of the year, the inflation rate was already within the target range set by the Swiss National Bank (SNB). A positive base effect, especially among the energy costs, has led to a significant reduction in inflation. Switzerland recorded a slowdown in the economy not least due to Germany's weakening trading partner. However, private consumption remained robust, supported by a stable labor market. The Swiss franc retained its status as a strong currency, especially compared to the euro. The Swiss franc was in demand as a result of geopolitical uncertainties, while the euro was in demand due to the difficult conditions in the Eurozone weakened.

### 3. Performance review

In the reporting period from February 2023 to the end of January 2024, the Swisscanto (LU) Bond Fund Vision Responsible CHF achieved an absolutely positive gross performance. It was a volatile year for interest rates. Interest rates are particularly high in November and December but fell across all maturities and contributed positively to the absolute performance. The yield curve became more complex and is now long end continues to be inverted. Interest rate positioning had a negative impact on relative performance during the reporting period. Credit positioning, however, had a positive impact, with the fund benefiting greatly from its overweight in the financial sector.

## Swisscanto (LU) Bond Fund Sustainable Global Aggregate

### 1. Market Overview

Since November 2023, an early year-end rally has reconciled the majority of investors with a changeable investment period from February 2023 to January 2024. The financial markets started with a lot of euphoria, even though the market consensus at the beginning of the year was that a global recession would soon occur. But the energy crisis that was partly predicted came to fruition. A mild winter was avoided and, particularly in the USA, the surprisingly robust economic development provided the necessary support for the stock markets. Neither further key interest rate increases in practically all developed regions (with the exception of Japan) nor the turbulence in the banking sector could ensure a lasting reversal of this positive trend.

The infection figures published, which were mostly lower than expected, also had a supportive effect and it became increasingly clear that the fight against price increases, which have gotten out of hand in some places, will soon be won. Accordingly, there was speculation early in the year about possible interest rate peaks or even possible interest rate cuts at the end of the year. The first half of the at least at first glance, the reporting period showed an outstanding performance, especially for American stocks. Upon closer inspection, however, the conclusion remained that it was primarily the hype surrounding artificial intelligence and the closely related issues the increase in the value of seven US mega-caps caused the strongly positive difference.

After the summer, the long-awaited (mild) recession was particularly damaging, which would also have opened the door to less high interest rates. With inflation rates visibly declining, the American central bank Fed recently announced another one. This gave rise to fantasies of interest rate cuts and thus stimulated the financial markets again at the end of the year. In this environment, bonds and stocks recorded significant gains while the US dollar and the euro fell against the Swiss franc.

### 2. Review of categories relevant to the Fund

At the beginning of the reporting period, the central banks appeared to have successfully established their narrative of "higher interest rates for longer" on the markets. The specter of a third consecutive year of negative total returns became increasingly realistic for global government bonds. Supported by high-spending consumers and a resilient labor market in the USA and inflation figures remaining at a high level, interest rates continued to climb on both sides of the Atlantic. The market reaction to the increased geopolitical risks caused by the devastating terrorist attack on Israel was muted. Interest rates fell only temporarily and the price of oil barely moved. Interest rate volatility remained very high and peaked in late October when the 10-year US Treasury yield exceeded 5% for the first time since 2007. The first day of November brought a complete change in mood: After the European Central Bank (ECB) and the since the Bank of Japan had not made any interest rate changes, the American Fed also held its regular meeting as expected interest rates remain unchanged. The subsequent press conference by Jerome Powell marked a turning point (pivot) for them Markets. Investors interpreted his statements to mean that the Fed was not planning any further interest rate increases and that the first interest rate cuts were imminent. The weak economic data and falling short of expectations New issuance plans for US government bonds caused the stock markets and the yield on ten-year bonds to rise sharply US Treasury bonds fall. This was just the beginning of a self-reinforcing movement that lasted until the end of the reporting period. This made November the best month for the US bond market in the past 40 years. For at least the seventh time in this interest rate cycle, markets speculated that central banks would turn towards expansionary policies. But hopes of imminent interest rate cuts have so far been regularly disappointed. This time, however, the rally across asset classes in the final two months of the year was fueled by a number of technical factors and investor behavior patterns. Until the end of October, most market players were positioned defensively and held high levels of cash. They were from the rising prices of risky assets and the falling interest rates. Accordingly, they had to close their short positions and increase the risk in the portfolios. The meanwhile attractive initial valuations and the fear of the Investors' fear of missing out (FOMO) contributed to the price fireworks. At its last meeting of 2023 in mid-December, the Fed did nothing to curb the euphoria on the markets. The broad US stock index as a result, the S&P500 reached an all-time high. The ECB's more cautious tones were ignored, sending many markets soaring from annual lows to annual highs in just two months.

### 3. Performance review

The fund was aligned with the sustainable investment universe over the course of the year. The absolute fund performance was dominated by the strong appreciation of the Swiss franc against most currencies and was correspondingly negative. In terms of relative performance (before costs), however, the fund performed very positively compared to the benchmark. The reasons for this lie in the security selection, the narrowing of the spreads of corporate bonds compared to government bonds and the positioning on the Yield curves in different currencies.

Class	ISIN	Security	Distribution	Performance in %

## Swisscanto (LU) Bond Fund Vision Responsible GBP

### 1. Market Overview

Since November 2023, an early year-end rally has reconciled the majority of investors with a changeable investment period from February 2023 to January 2024. The financial markets started with a lot of euphoria, even though the market consensus at the beginning of the year was that a global recession would soon occur. But the energy crisis that was partly predicted came to fruition. A mild winter was avoided and, particularly in the USA, the surprisingly robust economic development provided the necessary support for the stock markets. Neither further key interest rate increases in practically all developed regions (with the exception of Japan) nor the turbulence in the banking sector could ensure a lasting reversal of this positive trend.

The infection figures published, which were mostly lower than expected, also had a supportive effect and it became increasingly clear that the fight against price increases, which have gotten out of hand in some places, will soon be won. Accordingly, there was speculation early in the year about possible interest rate peaks or even possible interest rate cuts at the end of the year. The first half of the year at least at first glance, the reporting period showed an outstanding performance, especially for American stocks. Upon closer inspection, however, the conclusion remained that it was primarily the hype surrounding artificial intelligence and the closely related issues the increase in the value of seven US mega-caps caused the strongly positive difference.

After the summer, the long-awaited (mild) recession was particularly damaging, which would also have opened the door to less high interest rates. With inflation rates visibly declining, the American central bank Fed recently announced another one. This gave rise to fantasies of interest rate cuts and thus stimulated the financial markets again at the end of the year. In this environment, bonds and stocks recorded significant gains while the US dollar and the euro fell against the Swiss franc.

### 2. Review of categories relevant to the Fund

The year 2023, like the years before, was extraordinary. After global monetary policy was transferred to a restrictive sphere, clear signs were expected in the form of a slowing economic dynamic. However, the forecast slowdown did not materialize and the market adjusted its expectations in the form of further rising interest rates.

In most developed countries, however, inflation rates were clearly on the decline. Still above the information targets of the respective central banks, but no longer quite as worrying in absolute terms. In Great Britain, this trend took a long time to emerge and only became established towards the end of the third quarter. At the same time it also showed up wage developments in the UK are problematic. Although the labor market was showing early signs of weakening, wages continued to rise too much for the Bank of England to be comfortable with.

These local divergences also led to the members of the Bank of England celebrating the victory over infection in the wake of the Covid pandemic less euphorically than their peers. However, global financial markets are highly correlated. This was clearly reflected in the fact that in the wake of US interest rates, interest rates in the UK also fell significantly in the last two months of the year.

Whether, and by how much, the Bank of England will cut interest rates next year depends heavily on the further development of inflation and wage pressure in Great Britain. However, the weakening of the labor market clearly warns that local businesses are suffering from the interest burden and households' willingness to consume has declined. This should be the Bank of England give us confidence that the UK is also on the right track, albeit with a slight delay.

### 3. Performance review

Even in a challenging year like 2023, the fund managed to outperform relative (before costs). To achieve benchmark. The slight overweight in credit risk cost performance slightly at the start of the year, but had a strong overall positive contribution due to the rally in the final two months of the year. The fund tended to be overweight in interest rate risk throughout the year. This positioning cost a lot at the beginning. During a slowdown as had been expected, the British and global economy was surprisingly resilient, which has lowered interest rates for the time being continued to rise. In the last two months, interest rates fell significantly and reduced the overall negative contribution from the interest side. Overall, this resulted in a clearly positive, relative performance for 2023.

## 24 Notes

### Note 1: Financial Reports

The fund reports are produced in accordance with the legal provisions and regulations governing undertakings for collective investments applicable in Luxembourg.

### Note 2: Main Accounting Policies

The net assets of each subfund or each unit class correspond to the difference between the total assets of the subfund or unit class and the total liabilities of the subfund or unit class concerned.

The total net assets are given in Swiss Francs (CHF). For this purpose the net assets of any subfunds that are not denominated in CHF are converted at the last known middle rate of exchange at the closing date. This conversion was based on the following rates:

---

Subscriptions, redemptions and conversions are made based on an unknown net asset value.

Valuation principles:

a) Securities, derivatives and other investments that are listed on a stock market are valued at the last-known market prices. If these securities, derivatives and other investments are listed on several stock exchanges the last available price on the stock exchange that is the main market for this security is key. For securities, derivatives and other investments for which trading on an exchange is minor and for which there is a second market between securities traders with

b) Securities and other investments that are not listed on a stock exchange or on a regulated market are valued at the last market price available. If this is not available, the valuation of the securities is undertaken by the management company in accordance with other criteria to be specified by the Board of Directors and on the basis of the probable sale price, the value of which must be estimated with due care and in good faith.

c) Money market instruments which are not listed on a stock exchange, but are traded on another regulated market which is recognized, open to the public and functions properly, may be valued as follows: starting from the net purchase price, the valuation price of such investments is progressively adjusted to the redemption price, while keeping the investment yield constant. In the event of significant changes in market conditions, the valuation basis of the individual investments is brought into line with the new market yield.

d) Liquid assets, trustee funds and fixed-term deposits are valued on the basis of their nominal value plus accrued interest.

e) Units in UCITS and other UCIs are valued according to their last published net asset value. If no net asset value is available, but only acquisition and sale prices, the units of such UCITS and other UCIs may be valued at the mean value between such acquisition and sale prices. If no current prices are available, the valuation is carried out by the management company in accordance with other criteria to be specified by the Board of Directors and on the basis of the probable sale price which must be estimated with due care and in good faith.

f) Derivatives that are not traded on a stock exchange or any other regulated market are to be valued at the fair value that is appropriate after careful assessment, taking into account the overall circumstances.

g) For each subfund the assets that are denominated in a currency other than that of the subfund are converted to the subfund's currency at the prevailing mean rate. Forward contracts entered into to hedge currency risk are included in the conversion.

h) Calculation of the net asset value

The net asset value of the units is calculated by the management company for each individual subfund and for each unit class as per the contractual conditions and item 3.1 in the sales prospectus on every banking business day in Luxembourg.

i) Swinging Single Prices (SSP)

The SSP method is used for all subfunds. With the SSP method, the ancillary costs created by subscriptions and redemptions for the purchase and sale of investments (price spreads, brokerage in line with market conditions, commission, fiscal charges etc.) are taken into account in the calculation of the NAV. If, on a banking day, the total subscriptions and redemptions of all unit classes of a subfund result in a net inflow or outflow, the net asset value of the relevant subfund is increased or reduced. This amount is known as the "modified net asset value". The adjustment results in an increase in the net asset value if the net movements lead to a rise in the number of units in the relevant subfund. It results in a decrease in the net asset value if the net movements cause a fall in the number of units. The transaction costs incurred by subscriptions and redemptions on the trading day are paid by the investors who commission these transactions.

The surcharge on, or deduction from, the transaction costs incurred by subscriptions or redemptions is effected at a flat rate and is based on an average value from a previous period of a maximum of one year. The maximum adjustment is 2% of the net asset value of the subfund in question. If the fund has been on the market for less than one year, depending on the fund's special features this factor will be determined so that a representative figure results.

j) Valuation of forward exchange contracts

Any unrealised gains or losses resulting from the valuation of open forward exchange contracts at the reporting date are included in the statement of net assets and the income and expense statement.

k) Capital gains or losses from security transactions

The realised gains or losses resulting from the sale of securities will be calculated on the basis of the average purchase price.

### Note 3: Administrative commission

The fund will be invoiced a fixed administrative commission for management and administration plus the distribution of fund units, to be paid to the Management Company. This commission will be paid monthly, based on the average net fund volume of the respective subfund.

The flat-rate administrative commission comprises the two components of the flat-rate management fee (costs of asset management and sales) and the flat-rate administration fee (costs of management and administration).

As at reporting date, the effective flat-rate administrative commission amounted to:

FAC: flat-rate administrative commission / FMF: flat-rate management fee / FAF: flat-rate administration fee

#### Note 4: Subscription tax ("Taxe d'abonnement")

In accordance with the rules applicable in Luxembourg, the fund is subject to a quarterly subscription tax ("taxe d'abonnement") of 0.05% p.a. in the case of units of unit classes A, B, C, and M of 0.01% p.a. for units of unit classes D, G, N and S, based on the net assets of the given subfund at the end of the respective quarter.

Pursuant to Article 175a of the amended Law of 17 December 2010, the portion of net assets invested in UCITS that are already subject to capital tax is exempt from this tax.

#### Note 5: Total Expense Ratio (TER)

The TER reported under "Statistics" in this report was calculated in accordance with the 'Guidelines on the Calculation and Disclosure of TER and PTR' published by the Swiss Funds and Asset Management Association (SFAMA) on 16 May 2008. These Guidelines have been aligned with the revised Collective Investment Schemes Ordinance-FINMA. The amended TER Guidelines entered into force on 1 June 2015. It is no longer necessary to disclose the PTR in the annual report.

The TER has been calculated for the last 12 months prior to the date of this report.

Total Expense Ratio (TER) = (operating expenses / average net assets) x 100

The operating expenses include all of the fees and costs associated with the fund. The operating expenses do not include the ancillary costs that the fund incurred when buying and selling assets.

## Note 6: Information on forward exchange contracts

## Note 10: Changes in the investment portfolio

Information on changes in the investment portfolio for the reporting period are available to all unitholders at the Swisscanto website ([www.swisscanto.com](http://www.swisscanto.com)) or can be obtained free of charge from Swisscanto Asset Management AG, the head office of the management company, the custodian bank and the representative in Switzerland, from the German payment and information agent, from any branch of the Cantonal banks and any payment and sales office.

## Note 11: Tax information for investors in the Federal Republic of Germany (in accordance with Section 5 of the Investment Tax Act, para. 1, sentence 1, no. 1)

This information will be published in the electronic Federal Gazette. It is also available on the Swisscanto website ([www.swisscanto.com](http://www.swisscanto.com)).

Investors should consult their own financial advisor for advice on any tax consequences that could result from the acquisition, possession, transfer or disposal of units under the laws of the countries of which they are nationals or in which they are resident or domiciled.

## Note 12: Transaction costs

In the year under review, the fund incurred the following transaction costs from buying or selling transferable securities or money market instruments:

Swisscanto (LU) Bond Fund Responsible Global Absolute Return	USD	3'836.22
Swisscanto (LU) Bond Fund Vision Responsible CAD	CAD	874.19
Swisscanto (LU) Bond Fund Vision Responsible USD	USD	816.01
Swisscanto (LU) Bond Fund Responsible Global Convertible	USD	2'011.26
Swisscanto (LU) Bond Fund Responsible Global Rates	USD	648.69
Swisscanto (LU) Bond Fund Vision Responsible EUR	EUR	741.03
Swisscanto (LU) Bond Fund Vision Responsible CHF	CHF	842.59
Swisscanto (LU) Bond Fund Sustainable Global Aggregate	CHF	536.20
Swisscanto (LU) Bond Fund Vision Responsible AUD	AUD	2'070.49

The transaction costs, which are shown in the statement of income and expenses and which are primarily related to sub-custodian bank fees and similar fees, are therefore not included in the values listed above, but are also directly related to purchases and sales of securities. Due to accounting restrictions, these transaction costs cannot be covered acquisition values of the various securities are added.

## Note 13: Securities lending transactions

In order to ensure efficient asset management, a subfund may, in accordance with the requirements of the applicable provisions, use securities lending techniques and instruments in accordance with Article 51, para. 2 of the UCITS Directive and Article 11 of Directive 2007/16/EC of 19 March 2007 (Eligible Assets Directive) to generate additional income. In securities lending transactions, the subfund acts as lender and lends the borrower a security for use during a limited time; the subfund receives a fee for this. Zürcher Kantonalbank is the only direct borrower (principal) and the only direct counterparty of the securities lending transactions. As an independent, public-law institution of the canton of Zurich, the bank enjoys an unlimited state guarantee. It is therefore subject to regulatory supervision by the Swiss supervisory authority (Swiss Financial Market Supervisory – FINMA), which is considered by the CSSF as equivalent to the rules laid down under European Union law (Art. 41 (1) f) of the UCITS Law).

As at reporting date, securities lending transactions existed in the following amount:

Subfund	Currency	Fair Value	Guarantee amount
Swisscanto (LU) Bond Fund Responsible COCO	USD	66'167'111	74'232'487

#### Note 14: Fees for subscription and redemption of target funds

In accordance with the amended law of 2010, no fees are payable for the subscription or redemption of units in target funds managed by the same management company or by a company affiliated with the management company. Some subfunds invest in other subfunds of the Umbrella. As at the reporting date, the value of these cross-investments stands at:

Target fund	Market value (in CHF)
Swisscanto (LU) Bond Fund Responsible COCO	16'211'483.88
Swisscanto (LU) Bond Fund Responsible Corporate Hybrid	21'759'173.68
Swisscanto (LU) Bond Fund Responsible Emerging Markets Opportunities	12'855'000.07
Swisscanto (LU) Bond Fund Responsible Global Convertible	1'439'395.98
Swisscanto (LU) Bond Fund Sustainable Global High Yield	11'420'525.98

## **Note 16: Important Event**

In February 2022, several countries (including the U.S., the UK and the EU) imposed sanctions on certain institutions and persons in Russia due to the official recognition by the Russian Federation of the People's Republics of Donetsk and Lugansk. Following the military operations against Ukraine launched by Russia on 24 February 2022, possible further sanctions have been announced.

Since February 2022, the increasing geopolitical tensions have led to a considerable increase in volatility in securities and foreign exchange markets as well as a significant depreciation of the rouble against the US dollar and the euro. These events are expected to affect the activities of Russian companies in various sectors of the economy.

The Company considers these to be non-adjusting events after the reporting period. Although, at the time of reporting, neither the performance of the Company nor the Company's continuing operations or transactions were affected by the above events, the Board of Directors continues to monitor the evolving situation and its effects on the Company's financial position and results of operations.

With effect from May 31, 2022, the sub-fund Swisscanto (LU) Bond Fund Responsible Global Short Term High Yield will be renamed Swisscanto (LU) Bond Fund Sustainable Global High Yield. The sub-fund became sustainable in the future Track investments and at least two thirds of the assets in compliance with the requirements of the Sustainable approach. In the future, the composition of the portfolio should be based on the reference index "ICE BofA Global High Yield Index TR", whereby the investment universe is limited by the sustainable approach.

## **Note 17: Subsequent events**

Not relevant in the reporting period.

## **Note 18: Classification according to SFDR Regulation (EU 2019/2088) (unaudited)**

The sub-funds that follow the Responsible approach and include the name "Responsible" in the name were actively managed by the asset manager of these sub-funds in line with Article 8 of 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosure obligations in the financial services sector (hereinafter "SFDR").

Compliance with the requirements of Article 8 SFDR has been achieved in that the asset manager has applied the criteria included in the ESG approach, namely exclusion criteria and ESG factors, to at least two thirds of the assets of the respective sub-fund when making investment decisions.

As far as investments have been made in companies, those have been selected that adhere to the principles of good have fulfilled corporate management requirements. To achieve this, companies have been selected based on indicators provided by third parties.

No targeted investments have been made in accordance with the requirements of Regulation (EU) 2020/852 of June 18, 2020 establishing a framework to facilitate sustainable investments.

## 25 Unaudited information

### Information on remuneration policy

European Directive 2014/91/EU amending Directive 2009/65/EC on undertakings for collective investment in transferable securities, which is applicable to the fund, entered into force on 18 March 2016. It was transposed into national law by the Luxembourg Law of 10 May 2016 on the transposition of Directive 2014/91/EU. Due to these new regulations, the fund is required to publish information relating to the remuneration of identified employees within the meaning of the Law in the annual report. This information corresponds with the appropriate remuneration information which the management company has published in the previous annual report for 2017, and relates to the entire workforce:

	Number of employees	CHF
Total compensation Swisscanto Asset Management International S.A. (01.01.2023 – 31.12.2023)		
	17	2'549'839.67
davon fester Bestandteil		1'748'982.55
variabler Bestandteil*		800'857.12
	Number of employees	CHF
Total compensation deligeted Asset Management Zürcher Kantonalbank (01.01.2023 – 31.12.2023)		
	19	5'789'000.00
davon fester Bestandteil		3'319'500.00
variabler Bestandteil*		2'469'500.00

Due to the low number of employees and based on the principle of proportionality, no further breakdown of the remuneration of identified employees will be provided. The calculation of the remuneration and other benefits is based on prevailing market norms and the individual performance of the employee. The fixed part of the remuneration relates to factors of long-term significance, such as sustainable profitability, robust risk and capital management, first-class customer service and teamwork. The same procedure applies for the variable part of the remuneration, which also encompasses factors such as the reward of success and achievement, and the continued adherence to corporate governance guidelines. Furthermore, variable remuneration depends to a significant extent on the income of the group as well as the management company and the funds it manages.

Further information on the remuneration policy can be found on the website:

<https://www.swisscanto.com/lu/de/gs/rechtliche-hinweise/verguetungspolitik.html>

## Periodic disclosure as at 31.01.2024

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

### Product Name:

Swisscanto (LU) Bond Fund Responsible COCO

### Legal entity identifier (LEI-Code):

5493000GXMB1PV730R63

### Benchmark

ICE BofA Contingent Capital Index Hedged in USD

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : _%  <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  <input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : _%	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <b>19.92%</b> of sustainable investments  <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy  <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy  <input checked="" type="checkbox"/> with a social objective  <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The promoted environmental and social characteristics were achieved by following indicators:

1. Exclusion Criteria
2. ESG-Integration
3. Reduction of CO2e intensity
4. Sustainable Investments

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

For reasons of clarity, the information on the performance of the sustainability indicators (see details at the end of the report) is answered directly with the historical comparison in the next question.

### ...and compared to previous periods?

## Exclusion Criteria

Responsible							
Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Coal reserves (ex. metal production)	0.00%	0.00%	0	 Controversial weapons	0.00%	0.00%	0
Extraction of coal (>5% revenue)	0.00%	0.00%	0	Exploitative child labour	0.00%	0.00%	0
 Climate change		 Risk to society and health		Manufacture of weapons and ammunition	0.00%	0.00%	0
				Production of military hardware (>5% revenue)	0.00%	0.00%	0
				Production of pornography	0.00%	0.00%	0
				UN Global Compact violations	0.00%	0.00%	0

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above. The historical comparisons are made in the table below. For reasons of clarity, the exclusion criteria are aggregated.

	Indicator	Date 2023	Date 2024
Portfolio	Exclusion Criteria Total*	0%	0%
Benchmark	Exclusion Criteria Total*	0%	0%

\*all exclusion criteria cumulated.

# ESG-integration

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Exposure to ESG Laggards	2.83%	3.6%
Benchmark	Exposure to ESG Laggards	9.9%	5.89%

# Reduction of CO<sub>2</sub>e intensity

In line with the < 2° Paris climate target ("<2°C max"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO<sub>2</sub>e emissions by at least 4% per year. The reduction path is calculated from the weighted CO<sub>2</sub>e intensity of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO<sub>2</sub>e intensities of the portfolio and of the benchmark respectively. CO<sub>2</sub>e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at " "Achievement of climate target" " put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	CO <sub>2</sub> e intensity Corporate	2	2
	Reduction Corporate	-14%	-34%
Benchmark	CO <sub>2</sub> e intensity Corporate	3	2
	Reduction Corporate	2%	-11%

# Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental and social goals resulting from the UN Sustainable Development Goals (SDGs) as per Art. 2 (17) SFDR.

The fund did not seek to invest in environmentally sustainable activities within the meaning of the EU Taxonomy Regulation. The investment manager of the (sub)fund has developed a methodology for defining sustainable investments that fulfils the requirements of Art. 2 (17) SFDR. The methodology is described in detail in the pre-contractual information. In the below chart, the sustainable investments are split according to the UN SDGs. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Socially sustainable investments	16.84%	18.3%
	Sustainable Investments with environmental target	0.71%	1.62%
	<b>Total sustainable quota</b>	<b>17.55%</b>	<b>19.92%</b>
Benchmark	Socially sustainable investments	13.94%	14.98%
	Sustainable Investments with environmental target	0.9%	0.48%
	<b>Total sustainable quota</b>	<b>14.84%</b>	<b>15.47%</b>

■ Portfolio ■ Benchmark

With the different treatment of green, social and sustainable bonds, SDG exposure may differ from the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17 SDGs and did not have DNSH and/or Minimum Safeguards violations.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGP) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

### Principal Adverse Impacts - Corporate Assets

#### Primary Indicators - Energy and Emissions

Indicator	Factor	Portfolio Current	Coverage	Portfolio previous year	Benchmark current	Benchmark previous year	Explanation

Nationwide Building Society 5.875% PERP REGS	Financial and Insurance Activities	0.36%	
UniCredit SpA 7.5% PERP REGS	Financial and Insurance Activities	0.36%	Italy

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments and information on asset allocation are answered in the question below.

### What was the asset allocation?

### In which economic sectors were the investments made?

Due to lack of data availability, subsectors cannot not be shown.

\*this classification includes all holdings for which a NACE classification cannot be found or estimated; cash is herein included.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Even though the sustainable investments made do not qualify as environmental activities according to EU-Taxonomy, the below disclosure is made to show the alignment of sustainable investments with EU-Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below shown in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\*For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

Information on transition activities and enabling activities is summarised in the table. If no information is available, then the table will also show no information.

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)
-------------	-------------	---------------------------------	-----------------------	------------------------------	-----------------------------------	----------------------------

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As no data was available in the previous reporting year, there is no need for a comparison with the previous year.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

 **What was the share of socially sustainable investments?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the social goals resulting from the SDGs as per Art. 2 (17) SFDR.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs). More information is available at: [Swisscanto | Proxy Voting Dashboard \(issgovernance.com\)](https://www.swisscanto.com/int/en/sustainability/investment-stewardship.html)  
<https://www.swisscanto.com/int/en/sustainability/investment-stewardship.html>

<https://www.swisscanto.com/int/en/sustainability/investment-stewardship.html>

### How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**How does the reference benchmark differ from a broad market index?**

Not applicable.

**How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

**How did this financial product perform compared with the reference benchmark?**

Not applicable.

**How did this financial product perform compared with the broad market index?**

Not applicable.

The document was prepared by Swisscanto with due care and may contain information from carefully selected third-party sources. Investors should note that the data previously calculated and published for 2023 has been recalculated for this document published in 2024. Accordingly, there may be discrepancies in these historical data published in 2023 and 2024.

## Periodic disclosure as at 31.01.2024

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

### Product Name:

Swisscanto (LU) Bond Fund Responsible Corporate Hybrid

### Legal entity identifier (LEI-Code):

549300GAYISEMK2SEE06

### Benchmark

ICE BofA Gl. Hybrid Non-Financial Corp. Index (TR) (Constrained 3% per Issuer) hedged in EUR

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> _ % <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> _ %	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <b>49.52%</b> of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul> <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The promoted environmental and social characteristics were achieved by following indicators:

1. Exclusion Criteria
2. ESG-Integration
3. Reduction of CO2e intensity
4. Sustainable Investments

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

For reasons of clarity, the information on the performance of the sustainability indicators (see details at the end of the report) is answered directly with the historical comparison in the next question.

### ...and compared to previous periods?

## Exclusion Criteria

Responsible							
Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Coal reserves (ex. metal production)	0.00%	4.99%	2	 UN Global Compact violations	0.00%	1.50%	1
Extraction of coal (>5% revenue)	0.00%	0.30%	0	Controversial weapons	0.00%	0.00%	0
 Climate change		 Risk to society and health		Exploitative child labour	0.00%	0.00%	0
				Manufacture of weapons and ammunition	0.00%	0.00%	0
				Production of military hardware (>5% revenue)	0.00%	0.00%	0
				Production of pornography	0.00%	0.00%	0

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above. The historical comparisons are made in the table below. For reasons of clarity, the exclusion criteria are aggregated.

	Indicator	Date 2023	Date 2024
Portfolio	Exclusion Criteria Total*	0%	0%
Benchmark	Exclusion Criteria Total*	4.64%	6.78%

\*all exclusion criteria cumulated.

# ESG-integration

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Exposure to ESG Laggards	17.03%	2.49%
Benchmark	Exposure to ESG Laggards	9.5%	5.77%

# Reduction of CO<sub>2</sub>e intensity

In line with the < 2° Paris climate target ("<2°C max"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO<sub>2</sub>e emissions by at least 4% per year. The reduction path is calculated from the weighted CO<sub>2</sub>e intensity of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO<sub>2</sub>e intensities of the portfolio and of the benchmark respectively. CO<sub>2</sub>e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at "Achievement of climate target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	CO <sub>2</sub> e intensity Corporate	309	252
	Reduction Corporate	-9%	-19%
Benchmark	CO <sub>2</sub> e intensity Corporate	557	473
	Reduction Corporate	64%	51%

# Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental and social goals resulting from the UN Sustainable Development Goals (SDGs) as per Art. 2 (17) SFDR.

The fund did not seek to invest in environmentally sustainable activities within the meaning of the EU Taxonomy Regulation. The investment manager of the (sub)fund has developed a methodology for defining sustainable investments that fulfils the requirements of Art. 2 (17) SFDR. The methodology is described in detail in the pre-contractual information. In the below chart, the sustainable investments are split according to the UN SDGs. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Socially sustainable investments	14.42%	16.35%
	Sustainable Investments with environmental target	29.77%	33.2%
	<b>Total sustainable quota</b>	<b>44.19%</b>	<b>49.55%</b>
Benchmark	Socially sustainable investments	7.6%	9.08%
	Sustainable Investments with environmental target	20.95%	23.13%
	<b>Total sustainable quota</b>	<b>28.56%</b>	<b>32.2%</b>

■ Portfolio
 ■ Benchmark

With the different treatment of green, social and sustainable bonds, SDG exposure may differ from the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17 SDGs and did not have DNSH and/or Minimum Safeguards violations.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGP) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

### Principal Adverse Impacts - Corporate Assets

The document was prepared by Swisscanto with due care and may contain information from carefully selected third-party sources. Investors should note that the data previously calculated and published for 2023 has been recalculated for this document published in 2024. Accordingly, there may be discrepancies in these historical data published in 2023 and 2024.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01.02.2023 - 31.01.2024

Largest investments	Sector	% Assets	Country
TotalEnergies SE 2% PERP REGS	Mining and Quarrying	0.85%	France
Enel SpA 1.375% PERP REGS	Electricity, Gas, Steam and Air Conditioning Supply	0.81%	Italy
OMV AG 2.5% PERP REGS	Mining and Quarrying	0.79%	Austria
Telia Co AB 4.625% 21-DEC-2082 REGS	Information and Communication	0.73%	Sweden
ELM BV for Firmenich International SA 3.75% PERP REGS	Mining and Quarrying	0.72%	
EUR Cash		0.66%	
BP Capital Markets PLC 4.375% PERP	Financial and Insurance Activities	0.64%	United Kingdom
BP Capital Markets PLC 3.625% PERP REGS	Financial and Insurance Activities	0.64%	United Kingdom
Orsted AS 1.75% 09-DEC-3019 REGS	Electricity, Gas, Steam and Air Conditioning Supply	0.63%	Denmark
Orange SA 1.75% PERP REGS	Information and Communication	0.62%	France
Engie SA 1.5% PERP REGS	Electricity, Gas, Steam and Air Conditioning Supply	0.61%	France
Total SE 1.625% PERP REGS	Mining and Quarrying	0.61%	France
SSE PLC 3.74% PERP REGS	Electricity, Gas, Steam and Air Conditioning Supply	0.52%	United Kingdom
Koninklijke KPN NV 6% PERP REGS	Information and Communication	0.51%	Netherlands
Vodafone Group PLC 8% 30-AUG-2086 REGS	Information and Communication	0.50%	United Kingdom

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments and information on asset allocation are answered in the question below.

### What was the asset allocation?

### In which economic sectors were the investments made?

Due to lack of data availability, subsectors cannot not be shown.

\*this classification includes all holdings for which a NACE classification cannot be found or estimated; cash is herein included.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Even though the sustainable investments made do not qualify as environmental activities according to EU-Taxonomy, the below disclosure is made to show the alignment of sustainable investments with EU-Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below shown in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\*For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.

## What was the share of investments made in transitional and enabling activities?

Information on transition activities and enabling activities is summarised in the table. If no information is available, then the table will also show no information.

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)
Elia Group SA/NV	Construction	99.98%	24.95%	15.00%	0.00%	0.97%
Terna S.p.A.	Electricity, Gas, Steam and Air Conditioning Supply	87.76%	21.75%	13.10%	0.00%	1.67%
Redeia Corporacion SA	Construction	84.35%	19.80%	12.73%	0.00%	1.14%
Orsted	Electricity, Gas, Steam and Air Conditioning Supply	56.27%	18.25%	31.86%	0.00%	3.48%
NGG Finance Plc	Financial and Insurance Activities	19.17%	16.75%	0.00%	0.36%	1.50%
EDP-Energias de Portugal SA	Electricity, Gas, Steam and Air Conditioning Supply	77.52%	12.25%	0.00%	32.43%	3.12%
Electricite de France SA	Electricity, Gas, Steam and Air Conditioning Supply	71.56%	9.50%	0.00%	7.23%	2.75%
Iberdrola International BV	Electricity, Gas, Steam and Air Conditioning Supply	61.60%	9.13%	0.00%	15.60%	2.03%
Iberdrola Finanzas SA	Electricity, Gas, Steam and Air Conditioning Supply	61.60%	9.13%	0.00%	15.60%	1.23%
Veolia Environnement SA	Water Supply, Sewerage, Waste Management and Remediation Activities	68.52%	8.28%	30.01%	0.00%	1.74%

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As no data was available in the previous reporting year, there is no need for a comparison with the previous year.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

**What was the share of socially sustainable investments?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the social goals resulting from the SDGs as per Art. 2 (17) SFDR.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs). More information is available at: [Swisscanto | Proxy Voting Dashboard \(issgovernance.com\)](https://www.swisscanto.com/int/en/sustainability/investment-stewardship.html)  
<https://www.swisscanto.com/int/en/sustainability/investment-stewardship.html>

## How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### How does the reference benchmark differ from a broad market index?

Not applicable.

### How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

### How did this financial product perform compared with the reference benchmark?

Not applicable.

### How did this financial product perform compared with the broad market index?

Not applicable.

The document was prepared by Swisscanto with due care and may contain information from carefully selected third-party sources. Investors should note that the data previously calculated and published for 2023 has been recalculated for this document published in 2024. Accordingly, there may be discrepancies in these historical data published in 2023 and 2024.

## Periodic disclosure as at 31.01.2024

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

### Product Name:

Swisscanto (LU) Bond Fund Responsible Emerging Markets Opportunities

### Legal entity identifier (LEI-Code):

549300J68T7Q0GVJ6Z95

### Benchmark

JP Morgan JEMB Sovereign-only 50-50 (TR) in USD

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: _%</b> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective: _%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <b>1.99%</b> of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul> <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The promoted environmental and social characteristics were achieved by following indicators:

1. Exclusion Criteria
2. ESG-Integration
3. Reduction of CO2e intensity

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

For reasons of clarity, the information on the performance of the sustainability indicators (see details at the end of the report) is answered directly with the historical comparison in the next question.

### ...and compared to previous periods?

## Exclusion Criteria

Responsible							
Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Coal reserves (ex. metal production)	0.00%	0.08%	1	 UN Global Compact violations	0.00%	0.88%	3
Extraction of coal (>5% revenue)	0.00%	0.08%	1	Controversial weapons	0.00%	0.00%	0
 Climate change		 Risk to society and health		Exploitative child labour	0.00%	0.00%	0
				Manufacture of weapons and ammunition	0.00%	0.00%	0
				Production of military hardware (>5% revenue)	0.00%	0.00%	0
				Production of pornography	0.00%	0.00%	0

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above. The historical comparisons are made in the table below. For reasons of clarity, the exclusion criteria are aggregated.

	Indicator	Date 2023	Date 2024
Portfolio	Exclusion Criteria Total*	0%	0%
Benchmark	Exclusion Criteria Total*	0.4%	0.96%

\*all exclusion criteria cumulated.

# ESG-integration

The portfolio targeted an allocation to ESG Laggards <= 20% during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Exposure to ESG Laggards	0%	0.07%
Benchmark	Exposure to ESG Laggards	0.05%	0.84%

# Reduction of CO<sub>2</sub>e intensity

## Portfolio

CO<sub>2</sub>e intensity (Sovereign) tonnes CO<sub>2</sub>e / million USD GDP

751

## Benchmark

CO<sub>2</sub>e intensity (Sovereign) tonnes CO<sub>2</sub>e / million USD GDP

834

The portfolio targeted a lower CO<sub>2</sub>e intensity than the benchmark.  
The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	CO <sub>2</sub> e intensity Sovereign	796	751
Benchmark	CO <sub>2</sub> e intensity Sovereign	915	834

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

This financial product did not have an objective to make sustainable investments within the reporting year. A comparison to previous years is therefore not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

This financial product did not have an objective to make sustainable investments within the reporting year. A comparison to previous years is therefore not applicable.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

This financial product did not have an objective to make sustainable investments within the reporting year. A comparison to previous years is therefore not applicable.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

This financial product did not have an objective to make sustainable investments within the reporting year. A comparison to previous years is therefore not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

### Principal Adverse Impacts - Corporate Assets

#### Primary Indicators - Energy and Emissions

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments and information on asset allocation are answered in the question below.

### What was the asset allocation?

### In which economic sectors were the investments made?

Due to lack of data availability, subsectors cannot not be shown.

\*this classification includes all holdings for which a NACE classification cannot be found or estimated; cash is herein included.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Even though the sustainable investments made do not qualify as environmental activities according to EU-Taxonomy, the below disclosure is made to show the alignment of sustainable investments with EU-Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below shown in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\*For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

Information on transition activities and enabling activities is summarised in the table. If no information is available, then the table will also show no information.

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)
Petrobras Global Finance BV	Mining and Quarrying	2.42%	0.00%	0.00%	0.01%	35.62%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As no data was available in the previous reporting year, there is no need for a comparison with the previous year.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental goals resulting from the UN Sustainable Development Goals (SDGs) as per Art. 2 (17) SFDR.

 **What was the share of socially sustainable investments?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the social goals resulting from the SDGs as per Art. 2 (17) SFDR.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs). ## How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### How does the reference benchmark differ from a broad market index?

Not applicable.

### How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

### How did this financial product perform compared with the reference benchmark?

Not applicable.

### How did this financial product perform compared with the broad market index?

Not applicable.

The document was prepared by Swisscanto with due care and may contain information from carefully selected third-party sources. Investors should note that the data previously calculated and published for 2023 has been recalculated for this document published in 2024. Accordingly, there may be discrepancies in these historical data published in 2023 and 2024.

## Periodic disclosure as at 31.01.2024

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

### Product Name:

Swisscanto (LU) Bond Fund Responsible Global Absolute Return

### Legal entity identifier (LEI-Code):

5493000621Y00HOW1538

### Benchmark

FTSE 3-Month US Dollar Eurodeposit

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : _% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : _%	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <b>49.59%</b> of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul> <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The promoted environmental and social characteristics were achieved by following indicators:

1. Exclusion Criteria
2. ESG-Integration
3. Reduction of CO2e intensity
4. Sustainable Investments

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

For reasons of clarity, the information on the performance of the sustainability indicators (see details at the end of the report) is answered directly with the historical comparison in the next question.

### ...and compared to previous periods?

## Exclusion Criteria

Responsible		Portfolio weight	Criteria	Portfolio weight	
	Coal reserves (ex. metal production)	0.00%		Controversial weapons	0.00%
	Extraction of coal (>5% revenue)	0.00%		Exploitative child labour	0.00%
	Climate change			Manufacture of weapons and ammunition	0.00%
	Risk to society and health			Production of military hardware (>5% revenue)	0.00%
				Production of pornography	0.00%
				UN Global Compact violations	0.00%

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the respective portfolio exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above.

The historical comparisons are made in the table below. For reasons of clarity, the exclusion criteria are aggregated.

Indicator	Date 2023	Date 2024
Portfolio Exclusion Criteria Total*	0%	0%

\*all exclusion criteria cumulated.

# ESG-integration

The portfolio targeted an allocation to ESG Laggards  $\leq$  20% during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Exposure to ESG Laggards	4.2%	0.48%

# Reduction of CO<sub>2</sub>e intensity

In line with the < 2° Paris climate target ("<2°C max"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO<sub>2</sub>e emissions by at least 4% per year. The reduction path is calculated from the weighted CO<sub>2</sub>e intensity of the investment universe of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO<sub>2</sub>e intensities of the portfolio. CO<sub>2</sub>e intensities below the 2° Max line indicate that the portfolio meets the <2° climate target. Values at " "Achievement of climate target" " put the portfolio in relation to the climate target. Negative values mean that the target has been achieved.

The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Achievement of climate target	-70%	-69%
	CO <sub>2</sub> e intensity Corporate	61	36
	CO <sub>2</sub> e intensity Sovereign	244	256
	Reduction Corporate	-81%	-88%
	Reduction Sovereign	-51%	-44%

# Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio that have been invested in away that is not taxonomy compliant but in line with the environmental and social goals resulting from the UN Sustainable Development Goals (SDGs) as per Art. 2 (17) SFDR.

The fund did not seek to invest in environmentally sustainable activities within the meaning of the EU Taxonomy Regulation. The investment manager of the (sub)fund has developed a methodology for defining sustainable investments that fulfils the requirements of Art. 2 (17) SFDR. The methodology is described in detail in the pre-contractual information. In the below chart, the sustainable investments are split according to the UN SDGs. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Socially sustainable investments	26.7%	18.59%
	Sustainable Investments with environmental target	47.76%	31%
	<b>Total sustainable quota</b>	<b>74.46%</b>	<b>49.59%</b>

■ Portfolio

With the different treatment of green, social and sustainable bonds, SDG exposure may differ from the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17 SDGs and did not have DNSH and/or Minimum Safeguards violations.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGP) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

### Principal Adverse Impacts - Corporate Assets

#### Primary Indicators - Energy and Emissions

Indicator	Factor	Portfolio Current	Coverage	Portfolio previous year	Explanation
1. GHG emissions	1a. GHG Emissions - Scope 1 per Mio EUR Enterprise Value	2091.66	38.1%	3274.39	
	1b. GHG Emissions - Scope 2 per Mio EUR Enterprise Value	643.47	38.1%	1372.62	
	1c. GHG Emissions - Scope 3 per Mio EUR Enterprise Value	29452	38.1%	54761.3	
2. Carbon footprint	2. GHG Emissions - Scope 1+2+3 per Mio EUR Enterprise Value	105.8	38.1%	201.8	
3. GHG intensity of investee companies	3. GHG Emissions - Emissions Intensity - Total Emissions (EUR)	60.65	39.38%	112.49	
4. Exposure to companies active in the fossil fuel sector	4. Fossil Fuel - Involvement (PAI)	3%	42.51%	4.22%	

Indicator	Factor	Portfolio Current	Coverage	Portfolio previous year	Explanation
5. Share of non-renewable energy consumption and production	5a. CR Raw - Energy use - Coal/nuclear/unclear energy sources	55.29%	6.88%	53.31%	
	5b. Non-renewable energy consumption	56.85%	11.65%	69.93%	Non-renewable energy consumption encompasses consumption of energy generated from non-renewable sources, as well as energy consumption from biomass. Any energy use figures where the source of energy is unclear is also included in this factor.
	5c. Non-renewable energy production	1.23%	41.22%	0.28%	
6. Energy consumption intensity per high impact climate sector	6. Energy consumption intensity (GWh/mEUR)	0.27	21.95%	0.23	

Energy Consumption Intensity per High Impact Climate Sector (per mio EUR)

Indicator	Factor	Portfolio Current	Coverage	Portfolio previous year	Explanation
7. Activities negatively affecting biodiversity-sensitive areas	7. Companies negatively affecting biodiversity-sensitive areas	0.21%	42.98%	0.1%	
8. Emissions to water	8. CR Raw - COD emissions	5.01	0.65%	7.14	
9. Hazardous waste and radioactive waste ratio	9. CR Raw - Hazardous waste	0.02	3.91%	0	

Indicator	Factor	Portfolio Current	Coverage	Portfolio previous year	Explanation
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	10. UNGC / OECD Guidelines Violation	0%	42.98%	0%	
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	11. Lack of processes monitoring UNGC and OECD Guidelines compliance	5.14%	34.39%	5.87%	
12. Unadjusted gender pay gap	12. Unadjusted gender pay gap	0.45%	5.43%	0.45%	
13. Board gender diversity	13. Ratio of female to male board members	67.21%	26.04%	57.34%	
14. Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)	14. Controversial weapons involvement (APM, CM, Bio, Chem)	0%	42.98%	0%	

## Principal Adverse Impacts - Sovereign and Supranational Assets

### Primary Indicators

Environmental					
Indicator	Factor	Portfolio Current	Coverage	Portfolio previous year	Explanation
15. GHG Intensität	15. GHG Intensity	308.38	39.77%	289.45	

Social

Government of the United States of America 0.125% 15-APR-2027	Public Administration and Defence, Compulsory Social Security	1.01%	USA

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments and information on asset allocation are answered in the question below.

### What was the asset allocation?

### In which economic sectors were the investments made?

Due to lack of data availability, subsectors cannot not be shown.

\*this classification includes all holdings for which a NACE classification cannot be found or estimated; cash is herein included.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Even though the sustainable investments made do not qualify as environmental activities according to EU-Taxonomy, the below disclosure is made to show the alignment of sustainable investments with EU-Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below shown in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\*For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Information on transition activities and enabling activities is summarised in the table. If no information is available, then the table will also show no information.

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)
Orsted	Electricity, Gas, Steam and Air Conditioning Supply	56.27%	18.25%	31.86%	0.00%	1.08%
EDP-Energias de Portugal SA	Electricity, Gas, Steam and Air Conditioning Supply	77.52%	12.25%	0.00%	32.43%	0.34%
EDP Finance BV	Electricity, Gas, Steam and Air Conditioning Supply	77.52%	12.25%	0.00%	32.43%	0.22%
CTP N.V.	Real Estate Activities	100.00%	11.60%	0.00%	0.00%	0.23%
VERBUND AG Class A	Electricity, Gas, Steam and Air Conditioning Supply	50.94%	11.23%	36.58%	0.00%	0.18%
Electricite de France SA	Electricity, Gas, Steam and Air Conditioning Supply	71.56%	9.50%	0.00%	7.23%	0.08%
Iberdrola International BV	Electricity, Gas, Steam and Air Conditioning Supply	61.60%	9.13%	0.00%	15.60%	1.03%
Neste Corporation	Manufacturing	36.90%	7.25%	5.60%	22.41%	0.13%
Enel SpA	Electricity, Gas, Steam and Air Conditioning Supply	33.21%	5.35%	0.00%	8.48%	0.12%
ENGIE SA.	Electricity, Gas, Steam and Air Conditioning Supply	32.14%	3.75%	0.00%	8.00%	0.23%

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As no data was available in the previous reporting year, there is no need for a comparison with the previous year.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The chart shows the percentage revenue of companies included in the fund's portfolio that have been invested in a way that is not taxonomy compliant but in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

 **What was the share of socially sustainable investments?**

The chart shows the percentage revenue of companies included in the fund's portfolio that have been invested in a way that is not taxonomy compliant but in line with the social goals resulting from the SDGs as per Art. 2 (17) SFDR.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs). ## How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### How does the reference benchmark differ from a broad market index?

Not applicable.

### How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

### How did this financial product perform compared with the reference benchmark?

Not applicable.

### How did this financial product perform compared with the broad market index?

Not applicable.

The document was prepared by Swisscanto with due care and may contain information from carefully selected third-party sources. Investors should note that the data previously calculated and published for 2023 has been recalculated for this document published in 2024. Accordingly, there may be discrepancies in these historical data published in 2023 and 2024.

## Periodic disclosure as at 31.01.2024

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

### Product Name:

Swisscanto (LU) Bond Fund Responsible Global Convertible Hedged

### Legal entity identifier (LEI-Code):

549300BEZ1CJCP4C0A88

### Benchmark

Thomson Reuters Global Focus Convertible Index (TR) hedged in USD

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: _%</b> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective: _%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <b>34.3%</b> of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul> <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The promoted environmental and social characteristics were achieved by following indicators:

1. Exclusion Criteria
2. ESG-Integration
3. Reduction of CO2e intensity
4. Sustainable Investments

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

For reasons of clarity, the information on the performance of the sustainability indicators (see details at the end of the report) is answered directly with the historical comparison in the next question.

### ...and compared to previous periods?

## Exclusion Criteria

Responsible							
Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Coal reserves (ex. metal production)	0.00%	1.57%	2	 Production of military hardware (>5% revenue)	0.00%	2.05%	2
Extraction of coal (>5% revenue)	0.00%	0.10%	0	 UN Global Compact violations	0.00%	0.71%	2
 Climate change		 Risk to society and health		 Manufacture of weapons and ammunition	0.00%	0.19%	1
				 Controversial weapons	0.00%	0.00%	0
				 Exploitative child labour	0.00%	0.00%	0
				 Production of pornography	0.00%	0.00%	0

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above. The historical comparisons are made in the table below. For reasons of clarity, the exclusion criteria are aggregated.

	Indicator	Date 2023	Date 2024
Portfolio	Exclusion Criteria Total*	0%	0%
Benchmark	Exclusion Criteria Total*	1.75%	4.53%

\*all exclusion criteria cumulated.

# ESG-integration

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Exposure to ESG Laggards	27.54%	19.94%
Benchmark	Exposure to ESG Laggards	31.91%	23.12%

# Reduction of CO<sub>2</sub>e intensity

In line with the < 2° Paris climate target ("<2°C max"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO<sub>2</sub>e emissions by at least 4% per year. The reduction path is calculated from the weighted CO<sub>2</sub>e intensity of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO<sub>2</sub>e intensities of the portfolio and of the benchmark respectively. CO<sub>2</sub>e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at "Achievement of climate target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	CO <sub>2</sub> e intensity Corporate	168	239
	Reduction Corporate	-1%	-17%
Benchmark	CO <sub>2</sub> e intensity Corporate	223	373
	Reduction Corporate	30%	30%

# Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental and social goals resulting from the UN Sustainable Development Goals (SDGs) as per Art. 2 (17) SFDR.

The fund did not seek to invest in environmentally sustainable activities within the meaning of the EU Taxonomy Regulation. The investment manager of the (sub)fund has developed a methodology for defining sustainable investments that fulfils the requirements of Art. 2 (17) SFDR. The methodology is described in detail in the pre-contractual information. In the below chart, the sustainable investments are split according to the UN SDGs.

The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Socially sustainable investments	18.49%	21.12%
	Sustainable Investments with environmental target	7.95%	13.19%
	Total sustainable quota	26.44%	34.30%
Benchmark	Socially sustainable investments	19.36%	20.88%
	Sustainable Investments with environmental target	8.11%	12.06%
	Total sustainable quota	27.47%	32.94%

■ Portfolio
 ■ Benchmark

With the different treatment of green, social and sustainable bonds, SDG exposure may differ from the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17 SDGs and did not have DNSH and/or Minimum Safeguards violations.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGP) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

### Principal Adverse Impacts - Corporate Assets

#### Primary Indicators - Energy and Emissions

Indicator	Factor	Portfolio Current	Coverage	Portfolio previous year	Benchmark current	Benchmark previous year	Explanation
1. GHG emissions	1a. GHG Emissions - Scope 1 per Mio EUR Enterprise Value	6403.85	86.05%	5625.42	10648.5	10110.3

Akamai Technologies, Inc. 0.375% 01-SEP-2027	Information and Communication	0.96%	USA

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments and information on asset allocation are answered in the question below.

### What was the asset allocation?

### In which economic sectors were the investments made?

Due to lack of data availability, subsectors cannot not be shown.

\*this classification includes all holdings for which a NACE classification cannot be found or estimated; cash is herein included.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Even though the sustainable investments made do not qualify as environmental activities according to EU-Taxonomy, the below disclosure is made to show the alignment of sustainable investments with EU-Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below shown in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\*For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Information on transition activities and enabling activities is summarised in the table. If no information is available, then the table will also show no information.

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)
SPIE SA	Professional, Scientific and Technical Activities	83.99%	11.50%	13.95%	0.00%	0.28%
Iberdrola Finanzas SA	Electricity, Gas, Steam and Air Conditioning Supply	61.60%	9.13%	0.00%	15.60%	0.17%
Veolia Environnement SA	Water Supply, Sewerage, Waste Management and Remediation Activities	68.52%	8.28%	30.01%	0.00%	0.24%
Pirelli & C. S.p.A.	Manufacturing	15.75%	6.25%	0.00%	0.00%	0.11%
Schneider Electric SE	Manufacturing	18.50%	5.00%	0.00%	0.00%	0.62%
Snam S.p.A.	Water Supply, Sewerage, Waste Management and Remediation Activities	5.25%	5.00%	0.00%	0.00%	0.15%
Groupe Bruxelles Lambert SA	Financial and Insurance Activities	3.73%	3.38%	0.00%	0.00%	0.33%
Deutsche Post AG	Transporting and Storage	55.94%	3.00%	8.51%	0.00%	0.62%
LEG Immobilien SE	Real Estate Activities	99.85%	2.95%	0.00%	0.00%	0.55%
Prismian S.p.A.	Manufacturing	10.30%	2.85%	0.00%	0.00%	0.60%

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As no data was available in the previous reporting year, there is no need for a comparison with the previous year.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

 **What was the share of socially sustainable investments?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the social goals resulting from the SDGs as per Art. 2 (17) SFDR.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs). More information is available at: [Swisscanto | Proxy Voting Dashboard \(issgovernance.com\)](https://www.swisscanto.com/int/en/sustainability/investment-stewardship.html)

[Swisscanto | Proxy Voting Dashboard \(issgovernance.com\)](https://www.swisscanto.com/int/en/sustainability/investment-stewardship.html)

<https://www.swisscanto.com/int/en/sustainability/investment-stewardship.html>

### How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**How does the reference benchmark differ from a broad market index?**

Not applicable.

**How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

**How did this financial product perform compared with the reference benchmark?**

Not applicable.

**How did this financial product perform compared with the broad market index?**

Not applicable.

The document was prepared by Swisscanto with due care and may contain information from carefully selected third-party sources. Investors should note that the data previously calculated and published for 2023 has been recalculated for this document published in 2024. Accordingly, there may be discrepancies in these historical data published in 2023 and 2024.

## Periodic disclosure as at 31.01.2024

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

### Product Name:

Swisscanto (LU) Bond Fund Responsible Global Corporate

### Legal entity identifier (LEI-Code):

5493000JNVEMQLD6378

### Benchmark

ICE BofA Global Corporate Bond Index (TR) hedged in USD

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: _%</b> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective: _%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <b>49.44%</b> of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul> <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The promoted environmental and social characteristics were achieved by following indicators:

1. Exclusion Criteria
2. ESG-Integration
3. Reduction of CO2e intensity
4. Sustainable Investments

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

For reasons of clarity, the information on the performance of the sustainability indicators (see details at the end of the report) is answered directly with the historical comparison in the next question.

### ...and compared to previous periods?

## Exclusion Criteria

Responsible							
Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Coal reserves (ex. metal production)	0.00%	1.72%	26	 Production of military hardware (>5% revenue)	0.00%	1.20%	18
Extraction of coal (>5% revenue)	0.00%	0.15%	3	Exploitative child labour	0.00%	0.88%	6
 Climate change		 Risk to society and health		Manufacture of weapons and ammunition	0.00%	0.79%	8
				Controversial weapons	0.00%	0.58%	3
				UN Global Compact violations	0.00%	0.50%	5
				Production of pornography	0.00%	0.00%	0

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above. The historical comparisons are made in the table below. For reasons of clarity, the exclusion criteria are aggregated.

	Indicator	Date 2023	Date 2024
Portfolio	Exclusion Criteria Total*	0%	0%
Benchmark	Exclusion Criteria Total*	3.91%	4.51%

\*all exclusion criteria cumulated.

# ESG-integration

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Exposure to ESG Laggards	6.54%	2.35%
Benchmark	Exposure to ESG Laggards	14.45%	9.88%

# Reduction of CO<sub>2</sub>e intensity

In line with the < 2° Paris climate target ("<2°C max"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO<sub>2</sub>e emissions by at least 4% per year. The reduction path is calculated from the weighted CO<sub>2</sub>e intensity of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO<sub>2</sub>e intensities of the portfolio and of the benchmark respectively. CO<sub>2</sub>e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at "Achievement of climate target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	CO <sub>2</sub> e intensity Corporate	68	61
	Reduction Corporate	-72%	-73%
Benchmark	CO <sub>2</sub> e intensity Corporate	250	229
	Reduction Corporate	1%	1%

# Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental and social goals resulting from the UN Sustainable Development Goals (SDGs) as per Art. 2 (17) SFDR.

The fund did not seek to invest in environmentally sustainable activities within the meaning of the EU Taxonomy Regulation. The investment manager of the (sub)fund has developed a methodology for defining sustainable investments that fulfils the requirements of Art. 2 (17) SFDR. The methodology is described in detail in the pre-contractual information. In the below chart, the sustainable investments are split according to the UN SDGs.

The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Socially sustainable investments	29.05%	28.85%
	Sustainable Investments with environmental target	21.97%	20.59%
	<b>Total sustainable quota</b>	<b>51.02%</b>	<b>49.44%</b>
Benchmark	Socially sustainable investments	17.06%	18.07%
	Sustainable Investments with environmental target	6.86%	7.9%
	<b>Total sustainable quota</b>	<b>23.93%</b>	<b>25.97%</b>

■ Portfolio
 ■ Benchmark

With the different treatment of green, social and sustainable bonds, SDG exposure may differ from the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17 SDGs and did not have DNSH and/or Minimum Safeguards violations.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGP) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

### Principal Adverse Impacts - Corporate Assets

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments and information on asset allocation are answered in the question below.

### What was the asset allocation?

### In which economic sectors were the investments made?

Due to lack of data availability, subsectors cannot not be shown.

\*this classification includes all holdings for which a NACE classification cannot be found or estimated; cash is herein included.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Even though the sustainable investments made do not qualify as environmental activities according to EU-Taxonomy, the below disclosure is made to show the alignment of sustainable investments with EU-Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below shown in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\*For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Information on transition activities and enabling activities is summarised in the table. If no information is available, then the table will also show no information.

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)
Elia Group SA/NV	Construction	99.98%	24.95%	15.00%	0.00%	0.04%
Terna S.p.A.	Electricity, Gas, Steam and Air Conditioning Supply	87.76%	21.75%	13.10%	0.00%	0.06%
Redeia Corporacion SA	Construction	84.35%	19.80%	12.73%	0.00%	0.04%
Orsted	Electricity, Gas, Steam and Air Conditioning Supply	56.27%	18.25%	31.86%	0.00%	0.35%
National Grid plc	Electricity, Gas, Steam and Air Conditioning Supply	19.17%	16.75%	0.00%	0.36%	0.45%
National Grid Electricity Transmission Plc	Electricity, Gas, Steam and Air Conditioning Supply	19.17%	16.75%	0.00%	0.36%	0.17%
NGG Finance Plc	Financial and Insurance Activities	19.17%	16.75%	0.00%	0.36%	0.05%
EDP-Energias de Portugal SA	Electricity, Gas, Steam and Air Conditioning Supply	77.52%	12.25%	0.00%	32.43%	0.64%
EDP Finance BV	Electricity, Gas, Steam and Air Conditioning Supply	77.52%	12.25%	0.00%	32.43%	0.39%
Electricite de France SA	Electricity, Gas, Steam and Air Conditioning Supply	71.56%	9.50%	0.00%	7.23%	0.10%

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As no data was available in the previous reporting year, there is no need for a comparison with the previous year.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

**What was the share of socially sustainable investments?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the social goals resulting from the SDGs as per Art. 2 (17) SFDR.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs). ## How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### How does the reference benchmark differ from a broad market index?

Not applicable.

### How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

### How did this financial product perform compared with the reference benchmark?

Not applicable.

### How did this financial product perform compared with the broad market index?

Not applicable.

The document was prepared by Swisscanto with due care and may contain information from carefully selected third-party sources. Investors should note that the data previously calculated and published for 2023 has been recalculated for this document published in 2024. Accordingly, there may be discrepancies in these historical data published in 2023 and 2024.

## Periodic disclosure as at 31.01.2024

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

### Product Name:

Swisscanto (LU) Bond Fund Responsible Global Rates

### Legal entity identifier (LEI-Code):

5493007MXNV1316JL462

### Benchmark

Bloomberg Global Treasury Index (TR) in USD

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: _%</b> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective: _%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <b>12.7%</b> of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul> <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The promoted environmental and social characteristics were achieved by following indicators:

1. Exclusion Criteria
2. ESG-Integration
3. Reduction of CO2e intensity

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

For reasons of clarity, the information on the performance of the sustainability indicators (see details at the end of the report) is answered directly with the historical comparison in the next question.

### ...and compared to previous periods?

## Exclusion Criteria

Responsible							
Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Coal reserves (ex. metal production)	0.00%	0.00%	0	 Controversial weapons	0.00%	0.00%	0
Extraction of coal (>5% revenue)	0.00%	0.00%	0	Exploitative child labour	0.00%	0.00%	0
 Climate change		 Risk to society and health		Manufacture of weapons and ammunition	0.00%	0.00%	0
				Production of military hardware (>5% revenue)	0.00%	0.00%	0
				Production of pornography	0.00%	0.00%	0
				UN Global Compact violations	0.00%	0.00%	0

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above. The historical comparisons are made in the table below. For reasons of clarity, the exclusion criteria are aggregated.

	Indicator	Date 2023	Date 2024
Portfolio	Exclusion Criteria Total*	0%	0%
Benchmark	Exclusion Criteria Total*	0.31%	0%

\*all exclusion criteria cumulated.

# ESG-integration

The portfolio targeted an allocation to ESG Laggards <= 20% during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Exposure to ESG Laggards	6.45%	1.73%
Benchmark	Exposure to ESG Laggards	1.72%	0%

# Reduction of CO<sub>2</sub>e intensity

The portfolio targeted a lower CO<sub>2</sub>e intensity than the benchmark.  
The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	CO <sub>2</sub> e intensity Corporate	198	0
	CO <sub>2</sub> e intensity Sovereign	645	272
	Reduction Corporate	25%	0%
Benchmark	CO <sub>2</sub> e intensity Corporate	76	0
	CO <sub>2</sub> e intensity Sovereign	450	304
	Reduction Corporate	24%	0%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

This financial product did not have an objective to make sustainable investments within the reporting year. A comparison to previous years is therefore not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

This financial product did not have an objective to make sustainable investments within the reporting year. A comparison to previous years is therefore not applicable.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

This financial product did not have an objective to make sustainable investments within the reporting year. A comparison to previous years is therefore not applicable.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

This financial product did not have an objective to make sustainable investments within the reporting year. A comparison to previous years is therefore not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

### Principal Adverse Impacts - Corporate Assets

Government of China 3.13% 21-NOV-2029	Financial and Insurance Activities	1.43%	Luxembourg

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments and information on asset allocation are answered in the question below.

### What was the asset allocation?

### In which economic sectors were the investments made?

Due to lack of data availability, subsectors cannot not be shown.

\*this classification includes all holdings for which a NACE classification cannot be found or estimated; cash is herein included.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Even though the sustainable investments made do not qualify as environmental activities according to EU-Taxonomy, the below disclosure is made to show the alignment of sustainable investments with EU-Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below shown in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\*For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

Information on transition activities and enabling activities is summarised in the table. If no information is available, then the table will also show no information.

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)
-------------	-------------	---------------------------------	-----------------------	------------------------------	-----------------------------------	----------------------------

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As no data was available in the previous reporting year, there is no need for a comparison with the previous year.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental goals resulting from the UN Sustainable Development Goals (SDGs) as per Art. 2 (17) SFDR.

 **What was the share of socially sustainable investments?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the social goals resulting from the SDGs as per Art. 2 (17) SFDR.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs). More information is available at: [Swisscanto | Proxy Voting Dashboard \(issgovernance.com\)](https://www.swisscanto.com/int/en/sustainability/investment-stewardship.html)

## How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### How does the reference benchmark differ from a broad market index?

Not applicable.

### How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

### How did this financial product perform compared with the reference benchmark?

Not applicable.

### How did this financial product perform compared with the broad market index?

Not applicable.

The document was prepared by Swisscanto with due care and may contain information from carefully selected third-party sources. Investors should note that the data previously calculated and published for 2023 has been recalculated for this document published in 2024. Accordingly, there may be discrepancies in these historical data published in 2023 and 2024.

## Periodic disclosure as at 31.01.2024

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

### Product Name:

Swisscanto (LU) Bond Fund Responsible Secured High Yield

### Legal entity identifier (LEI-Code):

549300OW4OTO4HNXLS12

### Benchmark

ICE BofA 50% Secured HY EUR & ICE BofA 50% Secured HY USD (TR) hedged in USD

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: _%</b> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective: _%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <b>30.74%</b> of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul> <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The promoted environmental and social characteristics were achieved by following indicators:

1. Exclusion Criteria
2. ESG-Integration
3. Reduction of CO2e intensity
4. Sustainable Investments

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

For reasons of clarity, the information on the performance of the sustainability indicators (see details at the end of the report) is answered directly with the historical comparison in the next question.

### ...and compared to previous periods?

## Exclusion Criteria

Responsible							
Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Coal reserves (ex. metal production)	0.00%	0.08%	1	 Production of pornography	0.00%	1.27%	2
Extraction of coal (>5% revenue)	0.00%	0.00%	0	Controversial weapons	0.00%	0.00%	0
 Climate change		 Risk to society and health		Exploitative child labour	0.00%	0.00%	0
				Manufacture of weapons and ammunition	0.00%	0.00%	0
				Production of military hardware (>5% revenue)	0.00%	0.00%	0
				UN Global Compact violations	0.00%	0.00%	0

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above. The historical comparisons are made in the table below. For reasons of clarity, the exclusion criteria are aggregated.

	Indicator	Date 2023	Date 2024
Portfolio	Exclusion Criteria Total*	0%	0%
Benchmark	Exclusion Criteria Total*	1.02%	1.35%

\*all exclusion criteria cumulated.

# ESG-integration

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Exposure to ESG Laggards	9.9%	5.46%
Benchmark	Exposure to ESG Laggards	12.2%	9.63%

# Reduction of CO<sub>2</sub>e intensity

## Corporate

In line with the < 2° Paris climate target ("<2°C max"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO<sub>2</sub>e emissions by at least 4% per year. The reduction path is calculated from the weighted CO<sub>2</sub>e intensity of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO<sub>2</sub>e intensities of the portfolio and of the benchmark respectively. CO<sub>2</sub>e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at "Achievement of climate target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	CO <sub>2</sub> e intensity Corporate	111	94
	Reduction Corporate	-4%	-12%
Benchmark	CO <sub>2</sub> e intensity Corporate	179	170
	Reduction Corporate	57%	59%

# Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental and social goals resulting from the UN Sustainable Development Goals (SDGs) as per Art. 2 (17) SFDR.

The fund did not seek to invest in environmentally sustainable activities within the meaning of the EU Taxonomy Regulation. The investment manager of the (sub)fund has developed a methodology for defining sustainable investments that fulfils the requirements of Art. 2 (17) SFDR. The methodology is described in detail in the pre-contractual information. In the below chart, the sustainable investments are split according to the UNSDGs.

The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Socially sustainable investments	17.89%	22.01%
	Sustainable Investments with environmental target	7.33%	8.73%
	<b>Total sustainable quota</b>	<b>25.21%</b>	<b>30.74%</b>
Benchmark	Socially sustainable investments	14.17%	17.77%
	Sustainable Investments with environmental target	2.81%	2.99%
	<b>Total sustainable quota</b>	<b>16.98%</b>	<b>20.76%</b>

■ Portfolio
 ■ Benchmark

With the different treatment of green, social and sustainable bonds, SDG exposure may differ from the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17 SDGs and did not have DNSH and/or Minimum Safeguards violations.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGP) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

### Principal Adverse Impacts - Corporate Assets

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments and information on asset allocation are answered in the question below.

### What was the asset allocation?

### In which economic sectors were the investments made?

Due to lack of data availability, subsectors cannot not be shown.

\*this classification includes all holdings for which a NACE classification cannot be found or estimated; cash is herein included.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Even though the sustainable investments made do not qualify as environmental activities according to EU-Taxonomy, the below disclosure is made to show the alignment of sustainable investments with EU-Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below shown in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\*For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Information on transition activities and enabling activities is summarised in the table. If no information is available, then the table will also show no information.

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)
Getlink SE	Transporting and Storage	99.00%	23.25%	14.85%	0.00%	0.39%
Webuild SpA	Construction	20.18%	10.40%	0.00%	0.00%	0.66%
Webuild S.p.A.	Construction	20.18%	10.40%	0.00%	0.00%	0.23%
Gatwick Airport Finance Plc	Financial and Insurance Activities	33.15%	5.00%	4.53%	0.00%	0.85%
Mundys Spa	Transporting and Storage	95.42%	1.58%	0.00%	0.00%	0.18%
Forvia SE	Manufacturing	20.57%	0.93%	3.93%	11.79%	0.24%
Neptune Energy Bondco Plc	Administrative and Support Service Activities	3.03%	0.15%	0.00%	0.07%	0.54%
Telecom Italia S.p.A.	Information and Communication	1.10%	0.00%	0.00%	0.00%	0.41%
Constellium SE Class A	Transporting and Storage	75.89%	0.00%	13.43%	21.78%	0.26%
Grupo Antolin-Irausa SA	Manufacturing	30.09%	0.00%	5.77%	0.00%	0.66%

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As no data was available in the previous reporting year, there is no need for a comparison with the previous year.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

**What was the share of socially sustainable investments?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the social goals resulting from the SDGs as per Art. 2 (17) SFDR.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs). More information is available at: [Swisscanto | Proxy Voting Dashboard \(issgovernance.com\)](https://www.swisscanto.com/int/en/sustainability/investment-stewardship.html)  
<https://www.swisscanto.com/int/en/sustainability/investment-stewardship.html>

[Swisscanto | Proxy Voting Dashboard \(issgovernance.com\)](https://www.swisscanto.com/int/en/sustainability/investment-stewardship.html)

<https://www.swisscanto.com/int/en/sustainability/investment-stewardship.html>

### How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**How does the reference benchmark differ from a broad market index?**

Not applicable.

**How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

**How did this financial product perform compared with the reference benchmark?**

Not applicable.

**How did this financial product perform compared with the broad market index?**

Not applicable.

The document was prepared by Swisscanto with due care and may contain information from carefully selected third-party sources. Investors should note that the data previously calculated and published for 2023 has been recalculated for this document published in 2024. Accordingly, there may be discrepancies in these historical data published in 2023 and 2024.

## Periodic disclosure as at 31.01.2024

for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

### Product Name:

Swisscanto (LU) Bond Fund Sustainable Global Aggregate

### Legal entity identifier (LEI-Code):

5493007MXNV1316JL462

### Benchmark

Bloomberg Barclays Global Aggregate Index (TR) in CHF

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system, establishing a list of **environmentally sustainable economic activities**. For the time being, it does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainable investment objective

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <input type="radio"/> <b>X</b> Yes	<input type="radio"/> <input type="radio"/> <input type="radio"/> <b>No</b>
<p><b>X</b> It made <b>sustainable investments with an environmental objective: 24.2%</b></p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><b>X</b> It made <b>sustainable investments with a social objective: 28.16%</b></p>	<p><input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of _ % of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy</p> <p><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy</p> <p><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments.</p>

## To what extent was the sustainable investment objective of this financial product met?

The subfund was repositioned in September 2023. The advertised environmental and social characteristics are valid as of the repositioning date. The primary sustainable investment objective of this financial product is the reduction of CO2e emissions (quota of minimum 80%) within the meaning of Article 9(3) of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector (hereinafter SFDR). The share of sustainable investments in accordance with Article 9(3) was in the reporting period 87.03%:

Additionally, following sustainability indicators were used to assess the attainment of the sustainable investment objectives:

1. Reduction of CO2e intensity
2. Exclusion criteria
3. Sustainable investments in accordance with Article 9(2) SFDR

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### How did the sustainability indicators perform?

For reasons of clarity, the information on the performance of the sustainability indicators (see details at the end of the report) is answered directly with the historical comparison in the next question.

### ...and compared to previous periods?

## Exclusion Criteria

Sustainable				Exclusion Criteria			
Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Genetic engineering: Release of GMOs	0.00%	0.23%	9	 Nuclear energy	0.00%	1.19%	65
Non-sustainable forestry	0.00%	0.05%	12	Production of military hardware	0.00%	0.52%	40
Uncertified Palm Oil (<50% RSPO)	0.00%	0.04%	10	Production of alcohol (>5% revenue)	0.00%	0.24%	16
Unsustainable fisheries and aquaculture	0.00%	0.00%	2	Manufacture of tobacco and smokers' accessories	0.00%	0.22%	14
 Extraction of fossil fuels	0.00%	2.64%	107	Exploitative child labour	0.00%	0.18%	6
Operation of fossil-fuel power stations	0.00%	1.34%	110	Manufacture of weapons and ammunition	0.00%	0.15%	9
Manufacture of automobiles and aircraft	0.00%	0.78%	28	Controversial weapons	0.00%	0.11%	3
Coal reserves	0.00%	0.51%	50	UN Global Compact violations	0.00%	0.11%	6
Airlines	0.00%	0.06%	25	Intensive livestock farming	0.00%	0.09%	19
Extraction of coal (>5% revenue)	0.00%	0.04%	4	Gambling (>5% revenue)	0.00%	0.03%	5
Cruise ship operators	0.00%	0.01%	1	Genetic engineering: human medicine	0.00%	0.00%	1
 Decline in biodiversity				Production of pornography	0.00%	0.00%	0
 Climate change							
 Risk to society and health							

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above. The historical comparisons are made in the table below. For reasons of clarity, the exclusion criteria are aggregated.

	Indicator	Date 2023	Date 2024
Portfolio	Exclusion Criteria Total*	0%	0%
Benchmark	Exclusion Criteria Total*	4.5%	4.35%

\*all exclusion criteria cumulated.

# Reduction of CO<sub>2</sub>e intensity

In line with the 1.5° Paris climate target, the fund's investment activity during the reporting period aimed to reduce the portfolio's CO<sub>2</sub>e emissions by at least 7.5% per year. The reduction path is calculated from the weighted CO<sub>2</sub>e intensity of the benchmark, discounted at 7.5% per year plus nominal economic growth. The dashed 1.5° max line indicates the maximum value. The bars represent the CO<sub>2</sub>e intensities of the portfolio and of the benchmark respectively. CO<sub>2</sub>e intensities below the 1.5° Max line indicate that the portfolio or benchmark meets the 1.5° climate target. Values at "Achievement of climate target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Achievement of climate target	-9%	-36%
	CO <sub>2</sub> e intensity Corporate	84	35
	CO <sub>2</sub> e intensity Sovereign	340	222
	Reduction Corporate	-39%	-67%
	Reduction Sovereign	30%	10%
Benchmark	Achievement of climate target	26%	51%
	CO <sub>2</sub> e intensity Corporate	136	122
	CO <sub>2</sub> e intensity Sovereign	364	344
	Reduction Corporate	-1%	15%
	Reduction Sovereign	40%	71%

# Sustainable Investments Article 9(2) SFDR

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental and social goals resulting from the UN Sustainable Development Goals (SDGs) as per Art. 2 (17) SFDR.

The fund did not seek to invest in environmentally sustainable activities within the meaning of the EU Taxonomy Regulation. The investment manager of the (sub)fund has developed a methodology for defining sustainable investments that fulfils the requirements of Art. 2 (17) SFDR. The methodology is described in detail in the pre-contractual information. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Socially sustainable investments	25.43%	28.16%
	Sustainable Investments with environmental target	15.77%	24.20%
	Total sustainable quota	41.19%	52.36%
Benchmark	Socially sustainable investments	6.34%	6.41%
	Sustainable Investments with environmental target	2.41%	3.65%
	Total sustainable quota	8.75%	10.06%

■ Portfolio
 ■ Benchmark

With the different treatment of green, social and sustainable bonds, SDG exposure may differ from the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGP) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

## How did this financial product consider principal adverse impacts on sustainability factors?

### Principal Adverse Impacts - Corporate Assets

#### Primary Indicators - Energy and Emissions

Indicator	Factor	Portfolio Current	Coverage	Portfolio previous year	Benchmark current	Benchmark previous year	Explanation

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments in accordance with Article 9(2) SFDR and information on asset allocation are answered in the question below.

### What was the asset allocation?

### In which economic sectors were the investments made?

Due to lack of data availability, subsectors cannot not be shown.

\*this classification includes all holdings for which a NACE classification cannot be found or estimated; cash is herein included.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Even though the sustainable investments made do not qualify as environmental activities according to EU-Taxonomy, the below disclosure is made to show the alignment of sustainable investments with EU-Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below shown in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\*For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.

## What was the share of investments made in transitional and enabling activities?

Information on transition activities and enabling activities is summarised in the table. If no information is available, then the table will also show no information.

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)
Orsted	Electricity, Gas, Steam and Air Conditioning Supply	61.85%	36.50%	21.24%	0.00%	0.38%
VERBUND AG Class A	Electricity, Gas, Steam and Air Conditioning Supply	51.30%	22.45%	24.39%	0.00%	0.14%
Iberdrola International BV	Water Supply, Sewerage, Waste Management and Remediation Activities	59.83%	18.25%	0.00%	10.40%	0.22%

## How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

As no data was available in the previous reporting year, there is no need for a comparison with the previous year.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR. In addition the Portfolio Manager also achieved sustainable investments with this financial product by targeting the portfolio to reduce CO2e emissions (ratio of 87.03%) in sense of Article 9(3) SFDR.

**What was the share of socially sustainable investments?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the social goals resulting from the SDGs as per Art. 2 (17) SFDR.

**What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?**

These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

## What actions have been taken to meet the sustainable investment objective during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs). ## How did this financial product perform compared to the reference sustainable benchmark?

No benchmark was determined as a reference value for achieving the sustainable investment targets.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- How did the reference benchmark differ from a broad market index?**  
Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**  
Not applicable.
- How did this financial product perform compared with the reference benchmark?**  
Not applicable.
- How did this financial product perform compared with the broad market index?**  
Not applicable.

The document was prepared by Swisscanto with due care and may contain information from carefully selected third-party sources. Investors should note that the data previously calculated and published for 2023 has been recalculated for this document published in 2024. Accordingly, there may be discrepancies in these historical data published in 2023 and 2024.

## Periodic disclosure as at 31.01.2024

for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

### Product Name:

Swisscanto (LU) Bond Fund Sustainable Global Credit

### Legal entity identifier (LEI-Code):

5493000B02IZLS3ZZF50

### Benchmark

ICE BofA Global Corporate Bond Index (TR) hedged in CHF

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system, establishing a list of **environmentally sustainable economic activities**. For the time being, it does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainable investment objective

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <input type="radio"/> <b>X</b> Yes	<input type="radio"/> <input checked="" type="radio"/> <input type="radio"/> <b>No</b>
<p><b>X</b> It made <b>sustainable investments with an environmental objective: 36.79%</b></p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><b>X</b> It made <b>sustainable investments with a social objective: 25.82%</b></p>	<p><input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of _ % of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy</p> <p><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy</p> <p><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments.</p>

## To what extent was the sustainable investment objective of this financial product met?

The primary sustainable investment objective of this financial product is the reduction of CO2e emissions (quota of minimum 80%) within the meaning of Article 9(3) of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector (hereinafter: SFDR). The share of sustainable investments in accordance with Article 9(3) was in the reporting period 96.73%:

Additionally, following sustainability indicators were used to assess the attainment of the sustainable investment objectives:

1. Reduction of CO2e intensity
2. Exclusion criteria
3. Sustainable investments in accordance with Article 9(2) SFDR

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### How did the sustainability indicators perform?

For reasons of clarity, the information on the performance of the sustainability indicators (see details at the end of the report) is answered directly with the historical comparison in the next question.

### ...and compared to previous periods?

## Exclusion Criteria

Sustainable				Excluded			
Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Genetic engineering: Release of GMOs	0.00%	1.18%	9	 Nuclear energy	0.00%	6.10%	68
Non-sustainable forestry	0.00%	0.23%	13	Production of military hardware	0.00%	2.58%	41
Uncertified Palm Oil (<50% RSPO)	0.00%	0.15%	8	Production of alcohol (>5% revenue)	0.00%	1.24%	15
Unsustainable fisheries and aquaculture	0.00%	0.01%	2	Manufacture of tobacco and smokers' accessories	0.00%	1.07%	13
 Extraction of fossil fuels	0.00%	13.56%	107	Exploitative child labour	0.00%	0.88%	6
Operation of fossil-fuel power stations	0.00%	6.88%	112	Manufacture of weapons and ammunition	0.00%	0.78%	8
Manufacture of automobiles and aircraft	0.00%	3.77%	27	Controversial weapons	0.00%	0.58%	3
Coal reserves	0.00%	2.67%	53	UN Global Compact violations	0.00%	0.50%	5
Airlines	0.00%	0.19%	11	Intensive livestock farming	0.00%	0.37%	16
Extraction of coal (>5% revenue)	0.00%	0.15%	3	Gambling (>5% revenue)	0.00%	0.14%	4
Cruise ship operators	0.00%	0.06%	1	Genetic engineering: human medicine	0.00%	0.01%	0
 Decline in biodiversity				Production of pornography	0.00%	0.00%	0
 Climate change							
 Risk to society and health							

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above. The historical comparisons are made in the table below. For reasons of clarity, the exclusion criteria are aggregated.

	Indicator	Date 2023	Date 2024
Portfolio	Exclusion Criteria Total*	0%	0%
Benchmark	Exclusion Criteria Total*	21.63%	21.5%

\*all exclusion criteria cumulated.

# Reduction of CO<sub>2</sub>e intensity

In line with the 1.5° Paris climate target, the fund's investment activity during the reporting period aimed to reduce the portfolio's CO<sub>2</sub>e emissions by at least 7.5% per year. The reduction path is calculated from the weighted CO<sub>2</sub>e intensity of the benchmark, discounted at 7.5% per year plus nominal economic growth. The dashed 1.5° max line indicates the maximum value. The bars represent the CO<sub>2</sub>e intensities of the portfolio and of the benchmark respectively. CO<sub>2</sub>e intensities below the 1.5° Max line indicate that the portfolio or benchmark meets the 1.5° climate target. Values at " "Achievement of climate target " " put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	CO <sub>2</sub> e intensity Corporate	64	58
	Reduction Corporate	-72%	-71%
Benchmark	CO <sub>2</sub> e intensity Corporate	251	230
	Reduction Corporate	8%	16%

# Sustainable Investments Article 9(2) SFDR

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental and social goals resulting from the UN Sustainable Development Goals (SDGs) as per Art. 2 (17) SFDR.

The fund did not seek to invest in environmentally sustainable activities within the meaning of the EU Taxonomy Regulation. The investment manager of the (sub)fund has developed a methodology for defining sustainable investments that fulfils the requirements of Art. 2 (17) SFDR. The methodology is described in detail in the pre-contractual information. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Socially sustainable investments	24.27%	25.82%
	Sustainable Investments with environmental target	38.1%	36.79%
	<b>Total sustainable quota</b>	<b>62.37%</b>	<b>62.61%</b>
Benchmark	Socially sustainable investments	17.14%	18.07%
	Sustainable Investments with environmental target	6.9%	7.89%
	<b>Total sustainable quota</b>	<b>24.04%</b>	<b>25.96%</b>

■ Portfolio
 ■ Benchmark

With the different treatment of green, social and sustainable bonds, SDG exposure may differ from the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGP) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

## How did this financial product consider principal adverse impacts on sustainability factors?

### Principal Adverse Impacts - Corporate Assets

#### Primary Indicators - Energy and Emissions

Indicator	Factor	Portfolio Current	Coverage	Portfolio previous year	Benchmark current	Benchmark previous year	Explanation

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments in accordance with Article 9(2) SFDR and information on asset allocation are answered in the question below.

### What was the asset allocation?

### In which economic sectors were the investments made?

Due to lack of data availability, subsectors cannot not be shown.

\*this classification includes all holdings for which a NACE classification cannot be found or estimated; cash is herein included.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Even though the sustainable investments made do not qualify as environmental activities according to EU-Taxonomy, the below disclosure is made to show the alignment of sustainable investments with EU-Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below shown in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\*For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Information on transition activities and enabling activities is summarised in the table. If no information is available, then the table will also show no information.

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)
Terna S.p.A.	Electricity, Gas, Steam and Air Conditioning Supply	87.76%	21.75%	13.10%	0.00%	0.50%
Redeia Corporacion SA	Construction	84.35%	19.80%	12.73%	0.00%	0.55%
Orsted	Electricity, Gas, Steam and Air Conditioning Supply	56.27%	18.25%	31.86%	0.00%	0.47%
National Grid Electricity Distribution (South West) Plc	Financial and Insurance Activities	19.17%	16.75%	0.00%	0.36%	0.08%
Acciona Energia Financiacion Filiales SA	Professional, Scientific and Technical Activities	82.21%	13.62%	0.00%	0.00%	0.09%
EDP-Energias de Portugal SA	Electricity, Gas, Steam and Air Conditioning Supply	77.52%	12.25%	0.00%	32.43%	0.89%
CTP N.V.	Real Estate Activities	100.00%	11.60%	0.00%	0.00%	0.24%
Iberdrola International BV	Electricity, Gas, Steam and Air Conditioning Supply	61.60%	9.13%	0.00%	15.60%	0.61%
Iberdrola Finanzas SA	Electricity, Gas, Steam and Air Conditioning Supply	61.60%	9.13%	0.00%	15.60%	0.12%
Vigie SA	Water Supply, Sewerage, Waste Management and Remediation Activities	68.52%	8.28%	30.01%	0.00%	0.36%

### How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

As no data was available in the previous reporting year, there is no need for a comparison with the previous year.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR. In addition the Portfolio Manager also achieved sustainable investments with this financial product by targeting the portfolio to reduce CO2e emissions (ratio of 96.73%) in sense of Article 9(3) SFDR.

**What was the share of socially sustainable investments?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the social goals resulting from the SDGs as per Art. 2 (17) SFDR.

**What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?**

These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

## What actions have been taken to meet the sustainable investment objective during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs). ## How did this financial product perform compared to the reference sustainable benchmark?

No benchmark was determined as a reference value for achieving the sustainable investment targets.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- How did the reference benchmark differ from a broad market index?**

Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

Not applicable.
- How did this financial product perform compared with the reference benchmark?**

Not applicable.
- How did this financial product perform compared with the broad market index?**

Not applicable.

The document was prepared by Swisscanto with due care and may contain information from carefully selected third-party sources. Investors should note that the data previously calculated and published for 2023 has been recalculated for this document published in 2024. Accordingly, there may be discrepancies in these historical data published in 2023 and 2024.

## Periodic disclosure as at 31.01.2024

for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

### Product Name:

Swisscanto (LU) Bond Fund Sustainable Global High Yield

### Legal entity identifier (LEI-Code):

549300QT8R0DJRSOJL97

### Benchmark

ICE BofA Global High Yield Index (TR) hedged in USD

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system, establishing a list of **environmentally sustainable economic activities**. For the time being, it does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainable investment objective

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="radio"/> <b>Yes</b>	<input type="radio"/> <input type="radio"/> <input type="radio"/> <b>No</b>
<p><input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective: 29.62%</b></p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: 31.21%</b></p>	<p><input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of _ % of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy</p> <p><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy</p> <p><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments.</p>

## To what extent was the sustainable investment objective of this financial product met?

The primary sustainable investment objective of this financial product is the reduction of CO2e emissions (quota of minimum 80%) within the meaning of Article 9(3) of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector (hereinafter: SFDR). The share of sustainable investments in accordance with Article 9(3) was in the reporting period 96.07%:

Additionally, following sustainability indicators were used to assess the attainment of the sustainable investment objectives:

1. Reduction of CO2e intensity
2. Exclusion criteria
3. Sustainable investments in accordance with Article 9(2) SFDR

### How did the sustainability indicators perform?

For reasons of clarity, the information on the performance of the sustainability indicators (see details at the end of the report) is answered directly with the historical comparison in the next question.

### ...and compared to previous periods?

## Exclusion Criteria

Sustainable				Exclusion			
Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Genetic engineering: Release of GMOs	0.00%	0.48%	7	 Gambling (>5% revenue)	0.00%	2.70%	34
Uncertified Palm Oil (<50% RSPO)	0.00%	0.20%	2	UN Global Compact violations	0.00%	2.14%	5
Non-sustainable forestry	0.00%	0.12%	5	Nuclear energy	0.00%	1.61%	15
Unsustainable fisheries and aquaculture	0.00%	0.02%	1	Production of military hardware	0.00%	1.06%	20
 Extraction of fossil fuels	0.00%	15.90%	79	Intensive livestock farming	0.00%	0.69%	11
Manufacture of automobiles and aircraft	0.00%	2.51%	10	Production of pornography	0.00%	0.57%	3
Operation of fossil-fuel power stations	0.00%	2.34%	32	Manufacture of tobacco and smokers' accessories	0.00%	0.35%	6
Coal reserves	0.00%	1.42%	22	Manufacture of weapons and ammunition	0.00%	0.21%	5
Airlines	0.00%	1.41%	16	Exploitative child labour	0.00%	0.08%	1
Cruise ship operators	0.00%	1.16%	5	Production of alcohol (>5% revenue)	0.00%	0.04%	2
Extraction of coal (>5% revenue)	0.00%	0.15%	7	Controversial weapons	0.00%	0.00%	0
 Decline in biodiversity				 Genetic engineering: human medicine	0.00%	0.00%	0
 Climate change							
 Risk to society and health							

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above. The historical comparisons are made in the table below. For reasons of clarity, the exclusion criteria are aggregated.

	Indicator	Date 2023	Date 2024
Portfolio	Exclusion Criteria Total*	0%	0%
Benchmark	Exclusion Criteria Total*	20.99%	20.86%

\*all exclusion criteria cumulated.

# Reduction of CO<sub>2</sub>e intensity

In line with the 1.5° Paris climate target, the fund's investment activity during the reporting period aimed to reduce the portfolio's CO<sub>2</sub>e emissions by at least 7.5% per year. The reduction path is calculated from the weighted CO<sub>2</sub>e intensity of the benchmark, discounted at 7.5% per year plus nominal economic growth. The dashed 1.5° max line indicates the maximum value. The bars represent the CO<sub>2</sub>e intensities of the portfolio and of the benchmark respectively. CO<sub>2</sub>e intensities below the 1.5° Max line indicate that the portfolio or benchmark meets the 1.5° climate target. Values at " "Achievement of climate target" " put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	CO <sub>2</sub> e intensity Corporate	116	107
	Reduction Corporate	-41%	-45%
Benchmark	CO <sub>2</sub> e intensity Corporate	288	262
	Reduction Corporate	44%	35%

## Sustainable Investments according to Article 9 (2)

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental and social goals resulting from the UN Sustainable Development Goals (SDGs) as per Art. 2 (17) SFDR.

The fund did not seek to invest in environmentally sustainable activities within the meaning of the EU Taxonomy Regulation. The investment manager of the (sub)fund has developed a methodology for defining sustainable investments that fulfils the requirements of Art. 2 (17) SFDR. The methodology is described in detail in the pre-contractual information. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Socially sustainable investments	24.22%	31.21%
	Sustainable Investments with environmental target	20.1%	29.62%
	<b>Total sustainable quota</b>	<b>44.33%</b>	<b>60.83%</b>
Benchmark	Socially sustainable investments	13.09%	14.02%
	Sustainable Investments with environmental target	3.85%	5.05%
	<b>Total sustainable quota</b>	<b>16.94%</b>	<b>19.07%</b>

■ Portfolio
 ■ Benchmark

With the different treatment of green, social and sustainable bonds, SDG exposure may differ from the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGP) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

## How did this financial product consider principal adverse impacts on sustainability factors?

### Principal Adverse Impacts - Corporate Assets

#### Primary Indicators - Energy and Emissions

Indicator	Factor	Portfolio Current	Coverage	Portfolio previous year	Benchmark current	Benchmark previous year	Explanation
1. GHG emissions	1a. GHG Emissions - Scope 1 per Mio EUR Enterprise Value	4066.6	78.42%	3792.6	6359.91	8150.59	
	1b. GHG Emissions - Scope 2 per Mio EUR Enterprise Value	1123.25	78.42%	1076.13	912.27	1193.37

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments in accordance with Article 9(2) SFDR and information on asset allocation are answered in the question below.

### What was the asset allocation?

### In which economic sectors were the investments made?

Due to lack of data availability, subsectors cannot not be shown.

\*this classification includes all holdings for which a NACE classification cannot be found or estimated; cash is herein included.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Even though the sustainable investments made do not qualify as environmental activities according to EU-Taxonomy, the below disclosure is made to show the alignment of sustainable investments with EU-Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below shown in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\*For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Information on transition activities and enabling activities is summarised in the table. If no information is available, then the table will also show no information.

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)
Elia Group SA/NV	Construction	99.98%	24.95%	15.00%	0.00%	0.71%
Orsted	Electricity, Gas, Steam and Air Conditioning Supply	56.27%	18.25%	31.86%	0.00%	0.35%
EDP-Energias de Portugal SA	Electricity, Gas, Steam and Air Conditioning Supply	77.52%	12.25%	0.00%	32.43%	0.88%
Webuild SpA	Construction	20.18%	10.40%	0.00%	0.00%	0.40%
Webuild S.p.A.	Construction	20.18%	10.40%	0.00%	0.00%	0.19%
Castellum Helsinki Finance Holding Abp	Financial and Insurance Activities	100.00%	8.14%	15.00%	7.50%	0.19%
Castellum AB	Real Estate Activities	100.00%	8.14%	15.00%	7.50%	0.06%
Gatwick Airport Finance Plc	Financial and Insurance Activities	33.15%	5.00%	4.53%	0.00%	0.37%
Forvia SE	Manufacturing	20.57%	0.93%	3.93%	11.79%	0.53%
Atos SE	Information and Communication	76.13%	0.63%	15.00%	0.00%	0.10%

### How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

As no data was available in the previous reporting year, there is no need for a comparison with the previous year.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR. In addition the Portfolio Manager also achieved sustainable investments with this financial product by targeting the portfolio to reduce CO2e emissions (ratio of 96.07%) in sense of Article 9(3) SFDR.

**What was the share of socially sustainable investments?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the social goals resulting from the SDGs as per Art. 2 (17) SFDR.

**What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?**

These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

## What actions have been taken to meet the sustainable investment objective during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs). ## How did this financial product perform compared to the reference sustainable benchmark?

No benchmark was determined as a reference value for achieving the sustainable investment targets.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### How did the reference benchmark differ from a broad market index?

Not applicable.

### How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

Not applicable.

### How did this financial product perform compared with the reference benchmark?

Not applicable.

### How did this financial product perform compared with the broad market index?

Not applicable.

The document was prepared by Swisscanto with due care and may contain information from carefully selected third-party sources. Investors should note that the data previously calculated and published for 2023 has been recalculated for this document published in 2024. Accordingly, there may be discrepancies in these historical data published in 2023 and 2024.

## Periodic disclosure as at 31.01.2024

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

### Product Name:

Swisscanto (LU) Bond Fund Vision Responsible AUD

### Legal entity identifier (LEI-Code):

549300G7JSDUD5I1ZE39

### Benchmark

Bloomberg Barclays Australian Aggregate 300MN Bond Index in AUD

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: _%</b> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective: _%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <b>17.57%</b> of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul> <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The promoted environmental and social characteristics were achieved by following indicators:

1. Exclusion Criteria
2. ESG-Integration
3. Reduction of CO2e intensity
4. Sustainable Investments

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

For reasons of clarity, the information on the performance of the sustainability indicators (see details at the end of the report) is answered directly with the historical comparison in the next question.

### ...and compared to previous periods?

## Exclusion Criteria

Responsible							
Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Coal reserves (ex. metal production)	0.00%	0.00%	0	 UN Global Compact violations	0.00%	0.02%	1
Extraction of coal (>5% revenue)	0.00%	0.00%	0	Controversial weapons	0.00%	0.00%	0
 Climate change		 Risk to society and health		Exploitative child labour	0.00%	0.00%	0
				Manufacture of weapons and ammunition	0.00%	0.00%	0
				Production of military hardware (>5% revenue)	0.00%	0.00%	0
				Production of pornography	0.00%	0.00%	0

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above. The historical comparisons are made in the table below. For reasons of clarity, the exclusion criteria are aggregated.

	Indicator	Date 2023	Date 2024
Portfolio	Exclusion Criteria Total*	0%	0%
Benchmark	Exclusion Criteria Total*	0.03%	0.02%

\*all exclusion criteria cumulated.

# ESG-integration

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Exposure to ESG Laggards	2.33%	0.06%
Benchmark	Exposure to ESG Laggards	0.33%	0.37%

# Reduction of CO<sub>2</sub>e intensity

In line with the < 2° Paris climate target ("<2°C max"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO<sub>2</sub>e emissions by at least 4% per year. The reduction path is calculated from the weighted CO<sub>2</sub>e intensity of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO<sub>2</sub>e intensities of the portfolio and of the benchmark respectively. CO<sub>2</sub>e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at "Achievement of climate target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Achievement of climate target	-40%	-27%
	CO <sub>2</sub> e intensity Corporate	51	40
	CO <sub>2</sub> e intensity Sovereign	356	342
	Reduction Corporate	-70%	-74%
	Reduction Sovereign	-7%	-3%
Benchmark	Achievement of climate target	7%	1%
	CO <sub>2</sub> e intensity Corporate	203	155
	CO <sub>2</sub> e intensity Sovereign	408	357
	Reduction Corporate	18%	-2%
	Reduction Sovereign	6%	1%

# Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental and social goals resulting from the UN Sustainable Development Goals (SDGs) as per Art. 2 (17) SFDR.

The fund did not seek to invest in environmentally sustainable activities within the meaning of the EU Taxonomy Regulation. The investment manager of the (sub)fund has developed a methodology for defining sustainable investments that fulfils the requirements of Art. 2 (17) SFDR. The methodology is described in detail in the pre-contractual information. In the below chart, the sustainable investments are split according to the UN SDGs.

The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Socially sustainable investments	8.53%	7.62%
	Sustainable Investments with environmental target	7.9%	9.96%
	<b>Total sustainable quota</b>	<b>16.43%</b>	<b>17.57%</b>
Benchmark	Socially sustainable investments	5.31%	4.99%
	Sustainable Investments with environmental target	3.38%	3.77%
	<b>Total sustainable quota</b>	<b>8.69%</b>	<b>8.77%</b>

<b>1</b>  <b>No Poverty</b>	1.85% 1.21%	<b>7</b>  <b>Affordable and Clean Energy</b>	3.69% 0.53%	<b>13</b>  <b>Climate Action</b>	0.00% 0.00%
<b>2</b>  <b>Zero Hunger</b>	0.02% 0.03%	<b>8</b>  <b>Decent Work and Economic Growth</b>	4.46% 1.78%	<b>14</b>  <b>Life Below Water</b>	0.10% 0.03%
<b>3</b>  <b>Good Health and Well-being</b>	0.07% 0.29%	<b>9</b>  <b>Industry, Innovation and Infrastructure</b>	1.92% 1.78%	<b>15</b>  <b>Life On Land</b>	0.06% 0.02%
<b>4</b>  <b>Quality Education</b>	0.19% 0.13%	<b>10</b>  <b>Reduced Inequalities</b>	0.00% 0.00%	<b>16</b>  <b>Peace, Justice and Strong Institutions</b>	0.00% 0.00%
<b>5</b>  <b>Gender Equality</b>	0.00% 0.01%	<b>11</b>  <b>Sustainable Cities and Communities</b>	2.65% 1.38%	<b>17</b>  <b>Partnerships to achieve the Goals</b>	1.59% 0.92%
<b>6</b>  <b>Clean Water and Sanitation</b>	0.60% 0.55%	<b>12</b>  <b>Responsible Consumption and Production</b>	0.06% 0.02%	<b>Total</b>	17.27% 8.68%

■ Portfolio
 ■ Benchmark

With the different treatment of green, social and sustainable bonds, SDG exposure may differ from the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17 SDGs and did not have DNSH and/or Minimum Safeguards violations.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGP) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

### Principal Adverse Impacts - Corporate Assets

#### Primary Indicators - Energy and Emissions

Indicator	Factor	Portfolio Current	Coverage	Portfolio previous year	Benchmark current	Benchmark previous year	Explanation
1. GHG emissions	1a. GHG Emissions - Scope 1 per Mio EUR Enterprise Value	251.39	22.65%	600.68	178.74	177.63	
	1b. GHG Emissions - Scope 2 per Mio EUR Enterprise Value	148.38	22.65%	182.58	47.83	45.6	
	1c. GHG Emissions - Scope 3 per Mio EUR Enterprise Value	3866.49	22.65%	6782.72	959.87	683.12	
2. Carbon footprint	2. GHG Emissions - Scope 1+2+3 per Mio EUR Enterprise Value	47.22	22.65%	63.66	13.23	7.9	
3. GHG intensity of investee companies	3. GHG Emissions - Emissions Intensity - Total Emissions (EUR)	31.82	23.05%	64.74	93.73	86.23	
4. Exposure to companies active in the fossil fuel sector	4. Fossil Fuel - Involvement (PAI)	0.31%	21.95%	0.16%	0.18%	0.16%	

Indicator	Factor	Portfolio Current	Coverage	Portfolio previous year	Benchmark current	Benchmark previous year	Explanation
5. Share of non-renewable energy consumption and production	5a. CR Raw - Energy use - Coal/nuclear/unclear energy sources	87.14%	0.93%	85.72%	86.43%	79.38%	
	5b. Non-renewable energy consumption	72.69%	4%	89.65%	71.25%	90.39%	Non-renewable energy consumption encompasses consumption of energy generated from non-renewable sources, as well as energy consumption from biomass. ## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments and information on asset allocation are answered in the question below.

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

### In which economic sectors were the investments made?

Due to lack of data availability, subsectors cannot not be shown.

\*this classification includes all holdings for which a NACE classification cannot be found or estimated; cash is herein included.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Even though the sustainable investments made do not qualify as environmental activities according to EU-Taxonomy, the below disclosure is made to show the alignment of sustainable investments with EU-Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below shown in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\*For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Information on transition activities and enabling activities is summarised in the table. If no information is available, then the table will also show no information.

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)
Orsted	Electricity, Gas, Steam and Air Conditioning Supply	56.27%	18.25%	31.86%	0.00%	0.00%
EDP-Energias de Portugal SA	Electricity, Gas, Steam and Air Conditioning Supply	77.52%	12.25%	0.00%	32.43%	0.00%
Electricite de France SA	Electricity, Gas, Steam and Air Conditioning Supply	71.56%	9.50%	0.00%	7.23%	0.00%
Iberdrola International BV	Electricity, Gas, Steam and Air Conditioning Supply	61.60%	9.13%	0.00%	15.60%	0.00%
Enel SpA	Electricity, Gas, Steam and Air Conditioning Supply	33.21%	5.35%	0.00%	8.48%	0.00%
Aroundtown SA	Real Estate Activities	99.33%	4.18%	0.00%	0.00%	0.27%
Forvia SE	Manufacturing	20.57%	0.93%	3.93%	11.79%	0.00%
Atos SE	Information and Communication	76.13%	0.63%	15.00%	0.00%	0.01%
Telefonica Europe BV	Financial and Insurance Activities	2.30%	0.33%	0.00%	0.00%	0.00%
Merck KGaA	Manufacturing	0.01%	0.01%	0.00%	0.00%	0.01%

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As no data was available in the previous reporting year, there is no need for a comparison with the previous year.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

 **What was the share of socially sustainable investments?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the social goals resulting from the SDGs as per Art. 2 (17) SFDR.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs). <https://www.swisscanto.com/int/en/sustainability/investment-stewardship.html>

## How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### How does the reference benchmark differ from a broad market index?

Not applicable.

### How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

### How did this financial product perform compared with the reference benchmark?

Not applicable.

### How did this financial product perform compared with the broad market index?

Not applicable.

The document was prepared by Swisscanto with due care and may contain information from carefully selected third-party sources. Investors should note that the data previously calculated and published for 2023 has been recalculated for this document published in 2024. Accordingly, there may be discrepancies in these historical data published in 2023 and 2024.

## Periodic disclosure as at 31.01.2024

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

### Product Name:

Swisscanto (LU) Bond Fund Vision Responsible CAD

### Legal entity identifier (LEI-Code):

5493002H8R636PLBUX16

### Benchmark

Bloomberg Barclays Canadian Aggregate 300MN Bond Index in CAD

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: _%</b> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective: _%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <b>14.6%</b> of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul> <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The promoted environmental and social characteristics were achieved by following indicators:

1. Exclusion Criteria
2. ESG-Integration
3. Reduction of CO2e intensity
4. Sustainable Investments

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

For reasons of clarity, the information on the performance of the sustainability indicators (see details at the end of the report) is answered directly with the historical comparison in the next question.

### ...and compared to previous periods?

## Exclusion Criteria

Responsible							
Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Coal reserves (ex. metal production)	0.00%	0.23%	2	 UN Global Compact violations	0.00%	0.06%	1
Extraction of coal (>5% revenue)	0.00%	0.00%	0	Controversial weapons	0.00%	0.00%	0
 Climate change		 Risk to society and health		Exploitative child labour	0.00%	0.00%	0
				Manufacture of weapons and ammunition	0.00%	0.00%	0
				Production of military hardware (>5% revenue)	0.00%	0.00%	0
				Production of pornography	0.00%	0.00%	0

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above. The historical comparisons are made in the table below. For reasons of clarity, the exclusion criteria are aggregated.

	Indicator	Date 2023	Date 2024
Portfolio	Exclusion Criteria Total*	0%	0%
Benchmark	Exclusion Criteria Total*	0.24%	0.29%

\*all exclusion criteria cumulated.

# ESG-integration

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Exposure to ESG Laggards	1.17%	0.66%
Benchmark	Exposure to ESG Laggards	1.26%	1.77%

# Reduction of CO<sub>2</sub>e intensity

In line with the < 2° Paris climate target ("<2°C max"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO<sub>2</sub>e emissions by at least 4% per year. The reduction path is calculated from the weighted CO<sub>2</sub>e intensity of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO<sub>2</sub>e intensities of the portfolio and of the benchmark respectively. CO<sub>2</sub>e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at "Achievement of climate target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Achievement of climate target	-25%	-28%
	CO <sub>2</sub> e intensity Corporate	118	87
	CO <sub>2</sub> e intensity Sovereign	396	363
	Reduction Corporate	-74%	-80%
	Reduction Sovereign	9%	9%
Benchmark	Achievement of climate target	4%	-1%
	CO <sub>2</sub> e intensity Corporate	285	207
	CO <sub>2</sub> e intensity Sovereign	429	385
	Reduction Corporate	-39%	-51%
	Reduction Sovereign	18%	15%

# Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental and social goals resulting from the UN Sustainable Development Goals (SDGs) as per Art. 2 (17) SFDR.

The fund did not seek to invest in environmentally sustainable activities within the meaning of the EU Taxonomy Regulation. The investment manager of the (sub)fund has developed a methodology for defining sustainable investments that fulfils the requirements of Art. 2 (17) SFDR. The methodology is described in detail in the pre-contractual information. In the below chart, the sustainable investments are split according to the UN SDGs.

The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Socially sustainable investments	9.31%	8.52%
	Sustainable Investments with environmental target	6.44%	6.08%
	<b>Total sustainable quota</b>	<b>15.74%</b>	<b>14.6%</b>
Benchmark	Socially sustainable investments	11.68%	7.94%
	Sustainable Investments with environmental target	2.46%	7.99%
	<b>Total sustainable quota</b>	<b>14.14%</b>	<b>15.94%</b>

■ Portfolio ■ Benchmark

With the different treatment of green, social and sustainable bonds, SDG exposure may differ from the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17 SDGs and did not have DNSH and/or Minimum Safeguards violations.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGP) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

### Principal Adverse Impacts - Corporate Assets

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments and information on asset allocation are answered in the question below.

### What was the asset allocation?

### In which economic sectors were the investments made?

Due to lack of data availability, subsectors cannot not be shown.

\*this classification includes all holdings for which a NACE classification cannot be found or estimated; cash is herein included.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Even though the sustainable investments made do not qualify as environmental activities according to EU-Taxonomy, the below disclosure is made to show the alignment of sustainable investments with EU-Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below shown in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\*For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Information on transition activities and enabling activities is summarised in the table. If no information is available, then the table will also show no information.

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)
Orsted	Electricity, Gas, Steam and Air Conditioning Supply	56.27%	18.25%	31.86%	0.00%	0.00%
EDP-Energias de Portugal SA	Electricity, Gas, Steam and Air Conditioning Supply	77.52%	12.25%	0.00%	32.43%	0.00%
SPIE SA	Professional, Scientific and Technical Activities	83.99%	11.50%	13.95%	0.00%	0.01%
Electricite de France SA	Electricity, Gas, Steam and Air Conditioning Supply	71.56%	9.50%	0.00%	7.23%	0.00%
Iberdrola Finanzas SA	Electricity, Gas, Steam and Air Conditioning Supply	61.60%	9.13%	0.00%	15.60%	0.00%
Iberdrola International BV	Electricity, Gas, Steam and Air Conditioning Supply	61.60%	9.13%	0.00%	15.60%	0.00%
Veolia Environnement SA	Water Supply, Sewerage, Waste Management and Remediation Activities	68.52%	8.28%	30.01%	0.00%	0.01%
Pirelli & C. S.p.A.	Manufacturing	15.75%	6.25%	0.00%	0.00%	0.00%
Enel SpA	Electricity, Gas, Steam and Air Conditioning Supply	33.21%	5.35%	0.00%	8.48%	0.00%
Schneider Electric SE	Manufacturing	18.50%	5.00%	0.00%	0.00%	0.02%

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As no data was available in the previous reporting year, there is no need for a comparison with the previous year.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

 **What was the share of socially sustainable investments?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the social goals resulting from the SDGs as per Art. 2 (17) SFDR.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs). ## How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### How does the reference benchmark differ from a broad market index?

Not applicable.

### How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

### How did this financial product perform compared with the reference benchmark?

Not applicable.

### How did this financial product perform compared with the broad market index?

Not applicable.

The document was prepared by Swisscanto with due care and may contain information from carefully selected third-party sources. Investors should note that the data previously calculated and published for 2023 has been recalculated for this document published in 2024. Accordingly, there may be discrepancies in these historical data published in 2023 and 2024.

## Report by the Réviseur d'entreprises agréé

To shareholders of the  
Swisscanto (LU) Bond Fund

### Audit opinion

We have audited the annual financial statements of the Swisscanto (LU) Bond Fund and for each of its respective sub-funds (the "Fund") - consisting of the statement of assets as of January 31, 2024 and the statement of operations and other changes in net assets for the year ended on that date fiscal year and the appendix with a summary of significant accounting methods.

In our opinion, the attached annual financial statements give a true and fair view of the assets and financial position of the Fund and each of its sub-funds as of January 31, 2024, as well as their results of operations, in accordance with the legal provisions and regulations applicable in Luxembourg regarding the preparation and presentation of the annual financial statements and their development of net fund assets for the financial year ending on that date

### Basis for our audit opinion

We conducted our audit in accordance with the Law on Auditing (Law of July 23, 2016) and the International Auditing Standards ("ISA") adopted for Luxembourg by the Commission de Surveillance du Secteur Financier ("CSSF"). Our responsibilities under the law of July 23, 2016 and the ISA standards as adopted in Luxembourg by the CSSF are further described in the section "Responsibility of the Réviseur d'entreprises agréé for the annual audit". We are also independent of the Company in accordance with the "International Code of Ethics for Professional Accountants, including International Independence Standards" adopted for Luxembourg by the CSSF, issued by the "International Ethics Standards Board for Accountants" (IESBA Code), together with the professional conduct requirements that we must comply with as part of the annual audit and have fulfilled all other professional duties in accordance with these conduct requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

### Other information

The board of directors of the management company is responsible for the other information. The other information includes the information contained in the annual report, but does not include the annual financial statements or our report of the Réviseur d'entreprises agréé on these annual financial statements. Our opinion on the financial statements does not cover the other information and we do not provide any assurance of any kind on this information.

In connection with the audit of the annual financial statements, our responsibility is to read the other information and to assess whether there is a material inconsistency between it and the annual financial statements or with the findings obtained in the audit, or whether the other information otherwise appears to be materially misstated. If, based on the work we have carried out, we conclude that other information contains material misstatements, we are required to report this matter. We have nothing to report regarding this.

## **Responsibility of the Board of Directors of the Management Company for the financial statements**

The Board of Directors of the Management Company is responsible for the preparation and fair overall presentation of the annual financial statements in accordance with the legal provisions and regulations applicable in Luxembourg regarding the preparation and presentation of the annual financial statements and for such internal controls as the Board of Directors of the Management Company deems necessary for the preparation of the financial statements to enable annual financial statements to be free from material misstatements, whether intentional or unintentional.

In preparing the annual financial statements, the Board of Directors of the Management Company is responsible for assessing the ability of the Fund and each of its sub-funds to continue as a going concern and, where relevant, to provide information on matters relating to going concern and acceptance going concern basis as an accounting principle unless the board of directors of the management company intends to liquidate the fund or one of its sub-funds, to cease business activities or has no other realistic alternative than to do so.

## **Responsibility of the Réviseur d'Entreprises agréé for the audit of the annual financial statements**

Our objectives are to obtain reasonable assurance about whether the annual financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a Report by the Réviseur d'Entreprises agréé that contains our audit opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit in accordance with the Law of 23 July 2016 and pursuant to the ISAs as adopted by the CSSF for Luxembourg will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these annual financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and pursuant to the ISAs as adopted by the CSSF for Luxembourg, we exercise professional judgement and maintain professional scepticism. In addition:

- We identify and assess the risks of material misstatement of the annual financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for the audit opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- We obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- We evaluate the appropriateness of accounting policies used by the Management Company's Board of Directors, and the reasonableness of accounting estimates and related disclosures.
- We draw conclusions on the appropriateness of the Board of Directors of the Management Company's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Fund or any of its Sub-Funds to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in the Report by the Réviseur d'Entreprises agréé to the related disclosures in the annual financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of the report by the Réviseur d'Entreprises agréé. However, future events or circumstances may result in the Fund or one of its sub-funds being unable to continue as a going concern.

- We evaluate the overall presentation, structure and content of the annual financial statements, including the disclosures, and whether they constitute a fair presentation of the underlying transactions and events.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Ernst & Young  
Société anonyme  
Cabinet de révision agréé

Nadia Faber

## 2 General information

### **Investment fund under Luxembourg law „Umbrella Construction“**

Swisscanto (LU) Bond Fund is subject to the legal provisions set forth in Part I of the Luxembourg law of 17 December 2010 on undertakings for collective investment.

The management regulations of the investment fund were established by the management company on 30 October 1991. Several amendments have been made and, in accordance with the management regulations, published in the “Mémorial”.

The current versions of the management company's articles of association and the fund's management regulations have been deposited at the Register of Companies in Luxembourg.

The fund contract, the detailed sales prospectus, the key investor information, and the annual and semi-annual reports may be obtained directly and free of charge in printed form from Swisscanto Asset Management AG, the head office of the management company, the custodian bank and the representative in Switzerland, from the German payment and information agent, from any branch of the Cantonal banks and any payment and sales office. The information is also available on the Swisscanto website ([www.swisscanto.com](http://www.swisscanto.com)), where current information on the fund is available.

Subscriptions shall only be made after consulting the current sales prospectus and the most recent annual report, as well as, where available, any subsequent semi-annual report. Subscriptions to fund units solely on the basis of the annual and semi-annual reports are not accepted.

### **Sales restrictions**

Units in Swisscanto (LU) Bond Fund may not be offered, sold or delivered within the US or to persons considered US persons within the meaning of Regulation S of the US Securities Act of 1933 or in accordance with the US Commodity Exchange Act, as amended.

According to the rules of conduct of the Asset Management Association Switzerland of August 5 and September 23, 2021 (effective January 1, 2022)

Compensation for the marketing of the investment fund is paid out of the flat-rate administrative commission. Swisscanto Asset Management International S.A. also offers remuneration to institutional investors holding fund units for third parties from the fixed administrative commission.

### **Risk management process**

As part of the risk management process the total risk of all the subfunds is measured and checked using the so-called commitment approach. The management company applies a risk management process to the fund and each subfund that complies with the Luxembourg law of 17 December 2010 and other applicable regulations, in particular CSSF Circular 11/51.

## 3 Activity Report

### Swisscanto (LU) Bond Fund Vision Responsible AUD

#### 1. Market Overview

Since November 2023, an early year-end rally has reconciled the majority of investors with a changeable investment period from February 2023 to January 2024. The financial markets started with a lot of euphoria, even though the market consensus at the beginning of the year was that a global recession would soon occur. But the energy crisis that was partly predicted came to fruition. A mild winter was avoided and, particularly in the USA, the surprisingly robust economic development provided the necessary support of the stock markets. Neither further key interest rate increases in practically all developed regions (with the exception of Japan) nor the turbulence in the banking sector could ensure a lasting reversal of this positive trend.

The infection figures published, which were mostly lower than expected, also had a supportive effect and it became increasingly clear that the fight against price increases, which have gotten out of hand in some places, will soon be won. Accordingly, there was speculation early in the year about possible interest rate peaks or even possible interest rate cuts at the end of the year. The first half of the at least at first glance, the reporting period showed an outstanding performance, especially for American stocks. Upon closer inspection, however, the conclusion remained that it was primarily the hype surrounding artificial intelligence and the closely related issues the increase in the value of seven US mega-caps caused the strongly positive difference.

After the summer, the long-awaited (mild) recession was particularly damaging, which would also have opened the door to less high interest rates. With inflation rates visibly declining, the American central bank Fed recently announced another one. This gave rise to fantasies of interest rate cuts and thus stimulated the financial markets again at the end of the year. In this environment, bonds and stocks recorded significant gains while the US dollar and the euro fell against the Swiss franc.

#### 2. Review of categories relevant to the Fund

Last year, interest rates in many currencies rose over the reporting period. In Australia, the yield on the 10-year government bond reached a new high since 2011 of almost 5% at the beginning of November 2023. It then fell again by around one percent. Credit premiums moved lower in Australia amid high volatility.

#### 3. Performance review

The fund anticipated the rise in interest rates, but was surprised by the wide spreads at the top. Because the interest and credit premiums had already reached attractive levels, the absolute performance was attractive. Thanks to active interest rate management and balanced credit allocation, the fund was able to outperform the gross benchmark.

Class	ISIN	Security	Distribution	Performance in %

### 1. Market Overview

Since November 2023, an early year-end rally has reconciled the majority of investors with a changeable investment period from February 2023 to January 2024. The financial markets started with a lot of euphoria, even though the market consensus at the beginning of the year was that a global recession would soon occur. But the energy crisis that was partly predicted came to fruition. A mild winter was avoided and, particularly in the USA, the surprisingly robust economic development provided the necessary effect. Support of the stock markets. Neither further key interest rate increases in practically all developed regions (with the exception of Japan) nor the turbulence in the banking sector could ensure a lasting reversal of this positive trend.

The infection figures published, which were mostly lower than expected, also had a supportive effect and it became increasingly clear that the fight against price increases, which have gotten out of hand in some places, will soon be won. Accordingly, there was speculation early in the year about possible interest rate peaks or even possible interest rate cuts at the end of the year. The first half of the at least at first glance, the reporting period showed an outstanding performance, especially for American stocks. Upon closer inspection, however, the conclusion remained that it was primarily the hype surrounding artificial intelligence and the closely related issues the increase in the value of seven US mega-caps caused the strongly positive difference.

After the summer, the long-awaited (mild) recession was particularly damaging, which would also have opened the door to less high interest rates. With inflation rates visibly declining, the American central bank Fed recently announced another one. This gave rise to fantasies of interest rate cuts and thus stimulated the financial markets again at the end of the year. In this environment, bonds and stocks recorded significant gains while the US dollar and the euro fell against the Swiss franc.

### 2. Review of categories relevant to the Fund

At the beginning of the reporting period, the central banks appeared to have successfully established their narrative of "higher interest rates for longer" on the markets. The specter of a third consecutive year of negative total returns became increasingly realistic for global government bonds. Supported by high-spending consumers and a resilient labor market in the USA and inflation figures remaining at a high level, interest rates continued to climb on both sides of the Atlantic. The market reaction to the increased geopolitical risks caused by the devastating terrorist attack on Israel was muted. Interest rates fell only temporarily and the price of oil barely moved. Interest rate volatility remained very high and peaked in late October when the 10-year US Treasury yield exceeded 5% for the first time since 2007. The first day of November brought a complete change in mood: After the European Central Bank (ECB) and the since the Bank of Japan had not made any interest rate changes, the American Fed also held its regular meeting as expected interest rates remain unchanged. The subsequent press conference by Jerome Powell marked a turning point (pivot) for the Markets. Investors interpreted his statements to mean that the Fed was not planning any further interest rate increases and that the first interest rate cuts were imminent. The weak economic data and falling short of expectations new issuance plans for US government bonds caused the stock markets and the yield on ten-year bonds to rise sharply US Treasury bonds fall. This was just the beginning of a self-reinforcing movement that lasted until the end of the reporting period. This made November the best month for the US bond market in the past 40 years. For at least the seventh time in this interest rate cycle, markets speculated that central banks would turn towards expansionary policies. But hopes of imminent interest rate cuts have so far been regularly disappointed. This time, however, the rally across asset classes in the final two months of the year was fueled by a number of technical factors and investor behavior patterns. Until the end of October, most market players were positioned defensively and held high levels of cash. They were from the rising prices of risky assets and the falling interest rates. Accordingly, they had to close their short positions and increase the risk in the portfolios. The meanwhile attractive initial valuations and the fear of the Investors' fear of missing out (FOMO) contributed to the price fireworks. At its last meeting of 2023 in mid-December, the Fed did nothing to curb the euphoria on the markets. The more cautious tones of the ECB were ignored, causing many markets to go from annual lows to annual highs in just two months skyrocketed. CAD interest rates were unable to escape the international environment, although the Bank of Canada took a break in the interest rate hike cycle earlier than the Fed and has left its key interest rate unchanged at 5% since July 2023.

### 3. Performance review

The absolute fund performance and the relative performance compared to the benchmark were positive in the reporting period. Absolute and relative was characterized by the positioning on the CAD yield curve - with higher rates for short maturities than long maturities. Security selection - no defaults - and the general narrowing of spreads between corporate bonds and government bonds also contributed positively to performance. The commitment to capture various risk premiums such as high yield, coco and emerging markets has once again proven its worth.

In this environment, bonds and stocks recorded significant gains while the US dollar and the euro fell against the Swiss franc.

## 2. Review of categories relevant to the Fund

At the beginning of the reporting period, the central banks appeared to have successfully established their narrative of "higher interest rates for longer" on the markets. The specter of a third consecutive year of negative total returns has been raised for global Corporate bonds and is becoming more and more realistic. Supported by high-spending consumers and one resilient labor market in the USA and inflation figures remaining at a high level, interest rates climbed on both sides of the Atlantic and continue to rise. The market reaction to the increased geopolitical risks caused by the devastating terrorist attack on Israel was muted. Interest rates fell only temporarily and the price of oil barely moved. Interest rate volatility remained very high, reaching a peak in late October when the 10-year US Treasury yield fell for the first time since 2007 below the five percent mark. The continuous rise in nominal and real interest rates weighed on the stock markets and led to a widening of credit spreads. The first day of November brought a complete change in mood: After the European Central Bank (ECB) and the Bank of Japan did not change interest rates, the American Fed also left interest rates unchanged at its regular meeting, as expected. The subsequent press conference by Jerome Powell marked the event but a turning point (pivot) for the markets. Investors interpreted his statements to mean that the Fed did not plan further interest rate increases and that the first interest rate cuts are imminent.

The weak economic data and the new issuance plans for US government bonds that fell short of expectations caused the stock markets to rise sharply and the yield on ten-year US government bonds to fall. This was just the beginning of a self-reinforcing movement that lasted until the end of the reporting period. This made November the best month for the US bond market in the past 40 years. For at least the seventh time in this interest rate cycle, markets speculated on a turnaround by central banks towards expansionary policy. But hopes of imminent interest rate cuts have so far been regularly disappointed. This time, however, the rally across all asset classes in the final two months of the year was driven by a number of technical factors and behavioral patterns of investors that were fueled. Most market players were positioned defensively until the end of October, held high cash holdings. They were surprised by the rising prices of risky assets and the falling interest rates. Accordingly, they had to close their short positions and increase the risk in the portfolios. The relatively attractive initial valuations and investors' fear of missing out (FOMO) contributed to the price fireworks. At its last meeting of 2023 in mid-December, the Fed did nothing to quell the euphoria to slow down markets. As a result, the broad US stock index S&P500 reached an all-time high. The ECB's more cautious tones were ignored, sending many markets soaring from annual lows to annual highs in just two months. In the comparison with March 2022, when the Fed began raising interest rates, the stock markets are now trading higher again, spreads have narrowed and implied volatilities have fallen everywhere. The resulting financial conditions, however, underlying conditions thwart central banks' intentions to keep inflation under control and could force them to raise interest rates again later or at least adopt a more restrictive tone. The latest market movements also reveal another contradiction, namely that between low interest rates and weaker interest rate economic development) and high stock valuations (which reflect a booming economy and rising implied corporate profits). The only way out of this dilemma would be a controlled slowdown in the economy (soft landing), which would allow interest rates to be reduced before high interest rates cause further accidents. This soft landing scenario doesn't seem impossible. But the risk that it will not succeed is not currently priced into the markets.

## 3. Performance review

The Swisscanto (LU) Bond Fund Responsible COCO achieved a positive performance over the reporting period, and we also outperformed the benchmark. The main positive contributions to relative performance came from the overweight in AT1 bonds with first call dates in one to five years, the underweight in Credit Suisse and the overweight in Spanish banks.

The main negative contributors to relative performance were underweights in UK banks, French banks and AT1 bonds with first call dates of zero to one year.

This soft landing scenario doesn't seem impossible. But the risk that it will not succeed is not currently priced into the markets.

### 3. Performance review

The emerging market bonds asset class recorded a positive performance in 2023. The fund generated a outperformance. Also during this period, our local currency overweights in Latin America and the underweights in Turkish bonds made the biggest positive contributions to performance. On the other hand, the "non-holding" of various countries in distress such as Pakistan, Sri Lanka and Zambia had a negative impact on relative performance.

The ECB's more cautious tones were ignored, sending many markets soaring from annual lows to annual highs in just two months. In the Compared to March 2022, when the Fed began raising interest rates, the stock markets are now trading higher again, spreads have narrowed and implied volatilities have fallen everywhere. The resulting financial however, underlying conditions thwart central banks' intentions to keep inflation under control and could force them to raise interest rates again later or at least adopt a more restrictive tone. The latest market movements also reveal another contradiction, namely that between low interest rates and weaker interest rates economic development) and high stock valuations (which reflect a booming economy and rising imply corporate profits). The only way out of this dilemma would be a controlled slowdown in the economy (soft landing), which would allow interest rates to be reduced before high interest rates cause further accidents. This soft landing scenario doesn't seem impossible. But the risk that it will not succeed is not currently priced into the markets.

### 3. Performance review

The fund was able to generate a positive return in its reference currency, USD, which was only slightly below the overall market. The main drivers were the allocations to the local emerging markets of Mexico, Brazil and South Africa as well as the good ones Positioning on the USD yield curve. Investments in NOK, AUD and CNY made further positive contributions to performance. Investments in EUR government bonds and corporate bonds in GBP reduced performance. In terms of sector allocation, corporate bonds in particular made a positive contribution. In the first three quarters the fund had a below-average performance due to the generally difficult environment. The fund was able to rally in Q4 ultimately exploited to secure a clearly positive return for the past year.

# Swisscanto (LU) Bond Fund Responsible Global Corporate

## 1. Market Overview

Since November 2023, an early year-end rally has reconciled the majority of investors with a changeable investment period from February 2023 to January 2024. The financial markets started with a lot of euphoria, even though the market consensus at the beginning of the year was that a global recession would soon occur. But the energy crisis that was partly predicted came to fruition. A mild winter was avoided and, particularly in the USA, the surprisingly robust economic development provided the necessary effect. Support of the stock markets. Neither further key interest rate increases in practically all developed regions (with the exception of Japan) nor the turbulence in the banking sector could ensure a lasting reversal of this positive trend.

The infection figures published, which were mostly lower than expected, also had a supportive effect and it became increasingly clear that the fight against price increases, which have gotten out of hand in some places, will soon be won. Accordingly, there was speculation early in the year about possible interest rate peaks or even possible interest rate cuts at the end of the year. The first half of the at least at first glance, the reporting period showed an outstanding performance, especially for American stocks. Upon closer inspection, however, the conclusion remained that it was primarily the hype surrounding artificial intelligence and the closely related issues the increase in the value of seven US mega-caps caused the strongly positive difference.

After the summer, the long-awaited (mild) recession was particularly damaging, which would also have opened the door to less high interest rates. With inflation rates visibly declining, the American central bank Fed recently announced another one. This gave rise to fantasies of interest rate cuts and thus stimulated the financial markets again at the end of the year. In this environment, bonds and stocks recorded significant gains while the US dollar and the euro fell against the Swiss franc.

## 2. Review of categories relevant to the Fund

At the beginning of the reporting period, the central banks appeared to have successfully established their narrative of "higher interest rates for longer" on the markets. The specter of a third consecutive year of negative total returns has been raised for global Corporate bonds are becoming more and more realistic. Supported by high-spending consumers and one resilient labor market in the USA and inflation figures remaining at a high level, interest rates climbed on both sides Atlantic continues to rise. The market reaction to the increased geopolitical risks caused by the devastating terrorist attack on Israel was muted. Interest rates fell only temporarily and the price of oil barely moved. Interest rate volatility remained very high, reaching a peak in late October when the 10-year US Treasury yield fell for the first time since 2007 the five percent mark was exceeded. The continuous rise in nominal and real interest rates weighed on the stock markets and led to a widening of credit spreads. The first day of November brought a complete change in mood: After the European Central Bank (ECB) and the Bank of Japan did not change interest rates, the American Fed also left interest rates unchanged at its regular meeting, as expected. The subsequent press conference by Jerome Powell marked the event but a turning point (pivot) for the markets. Investors interpreted his statements to mean that the Fed did not planning further interest rate increases and that the first interest rate cuts are imminent.

The weak economic data and the new issuance plans for US government bonds that fell short of expectations caused the stock markets to rise sharply and the yield on ten-year US government bonds to fall. This was just the beginning of a self-reinforcing movement that lasted until the end of the reporting period. This made November the best month for the US bond market in the past 40 years. For at least the seventh time in this interest rate cycle, markets speculated on a turnaround by central banks Towards expansionary policy. But hopes of imminent interest rate cuts have so far been regularly disappointed. This time, however, the rally across all asset classes in the final two months of the year was driven by a number of technical factors and Behavioral patterns of investors are fueled. Most market players were positioned defensively until the end of October held high cash holdings. They were surprised by the rising prices of risky assets and the falling interest rates. Accordingly, they had to close their short positions and increase the risk in the portfolios. The relatively attractive ones Initial valuations and investors' fear of missing out (FOMO) contributed to the price fireworks at. At its last meeting of 2023 in mid-December, the Fed did nothing to quell the euphoria to slow down markets. As a result, the broad US stock index S&P500 reached an all-time high. The ECB's more cautious tones were ignored, sending many markets soaring from annual lows to annual highs in just two months. In the Compared to March 2022, when the Fed began raising interest rates, the stock markets are now trading higher again, spreads have narrowed and implied volatilities have fallen everywhere. The resulting financial however, underlying conditions thwart central banks' intentions to keep inflation under control and could force them to raise interest rates again later or at least adopt a more restrictive tone. The latest market movements also reveal another contradiction, namely that between low interest rates and weaker interest rates economic development) and high stock valuations (which reflect a booming economy and rising imply corporate profits). The only way out of this dilemma would be a controlled slowdown in the economy (soft landing), which would allow interest rates to be reduced before high interest rates cause further accidents. This soft landing scenario doesn't seem impossible. But the risk that it will not succeed is not currently priced into the markets.

## 3. Performance review

After a very volatile year, it seems almost unbelievable that the yield curve for US government bonds with maturities of ten years or longer ended the year at the same yield level as at the beginning of the year. Thanks to lower US interest rates in the two to ten year range as well as lower credit spreads and lower European interest rates, global corporate bonds were able to end the period

under review with a clearly positive performance. Despite the events surrounding the US regional banks and Credit Suisse in the first quarter, the overweighting of the financial sector continued to make the largest positive contribution to performance throughout the year.

## Swisscanto (LU) Bond Fund Responsible Global Convertible

### 1. Market Overview

Since November 2023, an early year-end rally has reconciled the majority of investors with a changeable investment period from February 2023 to January 2024. The financial markets started with a lot of euphoria, even though the market consensus at the beginning of the year was that a global recession would soon occur. But the energy crisis that was partly predicted came to fruition. A mild winter was avoided and, particularly in the USA, the surprisingly robust economic development provided the necessary support of the stock markets. Neither further key interest rate increases in practically all developed regions (with the exception of Japan) nor the turbulence in the banking sector could ensure a lasting reversal of this positive trend.

The infection figures published, which were mostly lower than expected, also had a supportive effect and it became increasingly clear that the fight against price increases, which have gotten out of hand in some places, will soon be won. Accordingly, there was speculation early in the year about possible interest rate peaks or even possible interest rate cuts at the end of the year. The first half of the at least at first glance, the reporting period showed an outstanding performance, especially for American stocks. Upon closer inspection, however, the conclusion remained that it was primarily the hype surrounding artificial intelligence and the closely related issues the increase in the value of seven US mega-caps caused the strongly positive difference.

After the summer, the long-awaited (mild) recession was particularly damaging, which would also have opened the door to less high interest rates. With inflation rates visibly declining, the American central bank Fed recently announced another one. This gave rise to fantasies of interest rate cuts and thus stimulated the financial markets again at the end of the year. In this environment, bonds and stocks recorded significant gains while the US dollar and the euro fell against the Swiss franc.

### 2. Review of categories relevant to the Fund

As expected, the new issues market recovered in the reporting period from the low volumes in 2022. The new issue volume has increased but is still below historical averages. We expect this recovery to continue in the coming years.

In addition to the usual sectors, the increased appearance of utilities on the market was observed in the reporting period. New issuers with official investment grade ratings have entered the market and have convertible bonds with a higher rating placed for short terms. Such issuers from the utilities sector do not rely on convertible bonds for their refinancing and typically already have corporate bonds outstanding. They issue more for tactical reasons in order to benefit from the cheaper refinancing costs.

### 3. Performance review

The year was one of volatility; The market fluctuated between positive and negative single-digit performance during the reporting period.

The Swisscanto Bond Fund Responsible Global Convertible achieved a positive gross performance, although slightly behind its benchmark.

This is mainly due to the underweight in the industrial and pharmaceutical sectors and the overweight in the retail/wholesale sector. Our defensive positioning - quality bias - did not pay off in this context. Within the Industrial sector we were underweight Electric Vehicles, which cost us performance as this sector has achieved extremely positive results.

On the other hand, our positioning in Leisure / Transportation and Food & Drink contributed positively to performance, but could not fully compensate for the negative contribution from the sectors mentioned above.

We have gone through some changes, but this has not significantly contributed to our overall exposure to the stock market.

The overall delta (stock sensitivity) was slightly above that of the benchmark at the end of the reporting period. The effective duration is low and is therefore significantly lower than most bond funds.

## Swisscanto (LU) Bond Fund Responsible Global Rates

### 1. Market Overview

Since November 2023, an early year-end rally has reconciled the majority of investors with a changeable investment period from February 2023 to January 2024. The financial markets started with a lot of euphoria, even though the market consensus at the beginning of the year was that a global recession would soon occur. But the energy crisis that was partly predicted came to fruition. A mild winter was avoided and, particularly in the USA, the surprisingly robust economic development provided the necessary support of the stock markets. Neither further key interest rate increases in practically all developed regions (with the exception of Japan) nor the turbulence in the banking sector could ensure a lasting reversal of this positive trend.

The infection figures published, which were mostly lower than expected, also had a supportive effect and it became increasingly clear that the fight against price increases, which have gotten out of hand in some places, will soon be won. Accordingly, there was speculation early in the year about possible interest rate peaks or even possible interest rate cuts at the end of the year. The first half of the at least at first glance, the reporting period showed an outstanding performance, especially for American stocks. Upon closer inspection, however, the conclusion remained that it was primarily the hype surrounding artificial intelligence and the closely related issues the increase in the value of seven US mega-caps caused the strongly positive difference.

After the summer, the long-awaited (mild) recession was particularly damaging, which would also have opened the door to less high interest rates. With inflation rates visibly declining, the American central bank Fed recently announced another one. This gave rise to fantasies of interest rate cuts and thus stimulated the financial markets again at the end of the year. In this environment, bonds and stocks recorded significant gains while the US dollar and the euro fell against the Swiss franc.

### 2. Review of categories relevant to the Fund

At the beginning of the reporting period, the central banks appeared to have successfully established their narrative of "higher interest rates for longer" on the markets. The specter of a third consecutive year of negative total returns became increasingly realistic for global government bonds. Supported by high-spending consumers and a resilient labor market in the USA and inflation figures remaining at a high level, interest rates continued to climb on both sides of the Atlantic. The market reaction to the increased geopolitical risks caused by the devastating terrorist attack on Israel was muted. Interest rates fell only temporarily and the price of oil barely moved. Interest rate volatility remained very high and peaked in late October when the 10-year US Treasury yield exceeded 5% for the first time since 2007. The first day of November brought a complete change in mood: After the European Central Bank (ECB) and the since the Bank of Japan had not made any interest rate changes, the American Fed also held its regular meeting as expected interest rates remain unchanged. The subsequent press conference by Jerome Powell marked a turning point (pivot) for them Markets. Investors interpreted his statements to mean that the Fed was not planning any further interest rate increases and that the first interest rate cuts were imminent. The weak economic data and falling short of expectations new issuance plans for US government bonds caused the stock markets and the yield on ten-year bonds to rise sharply US Treasury bonds fall. This was just the beginning of a self-reinforcing movement that lasted until the end of the reporting period. This made November the best month for the US bond market in the past 40 years. For at least the seventh time in this interest rate cycle, markets speculated that central banks would turn towards expansionary policies. But hopes of imminent interest rate cuts have so far been regularly disappointed. This time, however, the rally across asset classes in the final two months of the year was fueled by a number of technical factors and investor behavior patterns. Until the end of October, most market players were positioned defensively and held high levels of cash. They were from the rising prices of risky assets and the falling interest rates. Accordingly, they had to close their short positions and increase the risk in the portfolios. The relatively attractive initial valuations and the fear of investors Fear of missing out (FOMO) contributed to the price fireworks. At their last meeting of 2023 mid in December, the Fed did nothing to curb the euphoria on the markets. As a result, the broad US stock index S&P500 reached an all-time high. The ECB's more cautious tones were ignored, sending many markets soaring from annual lows to annual highs in just two months. The resulting financial framework conditions however, this would undermine central banks' intentions to keep inflation under control and could force them to do so raise interest rates again later or at least adopt a more restrictive tone. The recent market movements are also encouraging another contradiction comes to light, namely that between low interest rates (that of weaker economic development would correspond) and high stock valuations (which reflect a booming economy and rising corporate profits imply).

### 3. Performance review

The fund was refocused on global government bonds at the end of September. The performance in the last quarter was both absolute and positive (before costs). The main drivers were the long duration bets on the main yield curves and allocations in MXN.

# Swisscanto (LU) Bond Fund Responsible Secured High Yield

## 1. Market Overview

Since November 2023, an early year-end rally has reconciled the majority of investors with a changeable investment period from February 2023 to January 2024. The financial markets started with a lot of euphoria, even though the market consensus at the beginning of the year was that a global recession would soon occur. But the energy crisis that was partly predicted came to fruition. A mild winter was avoided and, particularly in the USA, the surprisingly robust economic development provided the necessary support for the stock markets. Neither further key interest rate increases in practically all developed regions (with the exception of Japan) nor the turbulence in the banking sector could ensure a lasting reversal of this positive trend.

The infection figures published, which were mostly lower than expected, also had a supportive effect and it became increasingly clear that the fight against price increases, which have gotten out of hand in some places, will soon be won. Accordingly, there was speculation early in the year about possible interest rate peaks or even possible interest rate cuts at the end of the year. The first half of the at least at first glance, the reporting period showed an outstanding performance, especially for American stocks. Upon closer inspection, however, the conclusion remained that it was primarily the hype surrounding artificial intelligence and the closely related issues the increase in the value of seven US mega-caps caused the strongly positive difference.

After the summer, the long-awaited (mild) recession was particularly damaging, which would also have opened the door to less high interest rates. With inflation rates visibly declining, the American central bank Fed recently announced another one. This gave rise to fantasies of interest rate cuts and thus stimulated the financial markets again at the end of the year. In this environment, bonds and stocks recorded significant gains while the US dollar and the euro fell against the Swiss franc.

## 2. Review of categories relevant to the Fund

Overall, the 2023 financial year was an extremely successful year for high-yield bonds. Decisive factors for the extraordinarily high annual return were falling risk premiums and interest rates as well as economic growth, which proved to be much more resilient than feared. Various risk off phases such as in the 1st quarter due to the collapse of various banks were possible but were mastered without damage.

After an optimistic summer, financial markets began the fourth quarter on the defensive, with the trends that dominated the second and third quarters continuing: rising government bond yields and weak stock markets. At the end of October, when 10-year US Treasury yields reached nearly 5%, the Fed signaled the end of the interest rate hike phase has been reached. This triggered significant price increases in financial markets, with bond yields falling, credit spreads fell and the stock markets climbed to their highest level of the year. Against this background High-yield bonds posted positive returns for the fifth quarter in a row. And these returns are included above average. Credit premiums for high-yield bonds fell in Europe and the USA. Bonds with a B rating rose the most, closely followed by bonds with a BB rating. CCC ratings deteriorated during the quarter, particularly in Europe, where economic growth is weaker than in North America. The Issuance activity for new high-yield bonds slowed somewhat over the course of the quarter. Until mid-November, many issuers held back due to the high level of interest rates. Thanks to falling yields and better investor sentiment, the primary market activity increased for a few weeks before tapering off again in mid-December. We saw a good mix of issuers from different sectors and across the ratings spectrum, including well-known names and Issuers of primary bonds.

## 3. Performance review

The Swisscanto Bond Fund Secured High Yield achieved a very positive performance, and we were also able to generate an attractive outperformance compared to the benchmark. Maintaining an appropriate beta position throughout the year was critical in an environment of volatile but overall narrowing spreads. Strongest to retail, automotive and consumer goods, which were in high demand, contributed to performance. From an alpha perspective overall, our long positioning in the automotive, telecommunications and transportation sectors contributed the most to the relative outperformance. In contrast, our positioning in technology, utilities and consumer goods increased over the year underperformed, primarily due to our overweight in these segments. What the post from a rating perspective, the difference between BB and B has narrowed. Therefore, our overweight in BB was not optimal, but was supported by excellent selection in B-rated bonds, resulting in a solid overall exposure relative performance in all rating segments.

## Swisscanto (LU) Bond Fund Sustainable Global High Yield

### 1. Market Overview

Since November 2023, an early year-end rally has reconciled the majority of investors with a changeable investment period from February 2023 to January 2024. The financial markets started with a lot of euphoria, even though the market consensus at the beginning of the year was that a global recession would soon occur. But the energy crisis that was partly predicted came to fruition. A mild winter was avoided and, particularly in the USA, the surprisingly robust economic development provided the necessary support of the stock markets. Neither further key interest rate increases in practically all developed regions (with the exception of Japan) nor the turbulence in the banking sector could ensure a lasting reversal of this positive trend.

The infection figures published, which were mostly lower than expected, also had a supportive effect and it became increasingly clear that the fight against price increases, which have gotten out of hand in some places, will soon be won. Accordingly, there was speculation early in the year about possible interest rate peaks or even possible interest rate cuts at the end of the year. The first half of the at least at first glance, the reporting period showed an outstanding performance, especially for American stocks. Upon closer inspection, however, the conclusion remained that it was primarily the hype surrounding artificial intelligence and the closely related issues the increase in the value of seven US mega-caps caused the strongly positive difference.

After the summer, the long-awaited (mild) recession was particularly damaging, which would also have opened the door to less high interest rates. With inflation rates visibly declining, the American central bank Fed recently announced another one. This gave rise to fantasies of interest rate cuts and thus stimulated the financial markets again at the end of the year. In this environment, bonds and stocks recorded significant gains while the US dollar and the euro fell against the Swiss franc.

### 2. Review of categories relevant to the Fund

Financial markets began the fourth quarter on the defensive, with the trends that dominated the second and third quarters continued: rising yields on government bonds and weak stock markets. At the end of October, the Fed signaled that the end of the interest rate hike phase had been reached. This triggered significant price increases on the financial markets. Bond yields fell, credit spreads fell and stock markets climbed to their highest level of the year. Against this backdrop, high-yield bonds posted positive returns for the fifth consecutive quarter. The credit rating premiums for High-yield bonds also fell, and even more so, in Europe and the US. The bonds with one B-rated bonds rose the most, followed closely by BB-rated bonds. CCC ratings developed during the quarter, particularly in Europe, where economic growth is weaker than in North America. The issuing activity for new high-yield bonds fell slightly over the course of the quarter. Many issuers held out until mid-November given the high level of interest rates. Thanks to falling yields and improving investor sentiment, primary market activity increased for a few weeks before tapering off again in mid-December. We saw a good mix of issuers from different sectors and across the ratings spectrum, including well-known names and issuers of Initial bonds. 2023 proved to be an excellent year for high-yield bond investors.

### 3. Performance review

The fund achieved a positive performance, but we lost some performance compared to the benchmark. The majority of the underperformance was due to certain emerging market issuers performing poorly over the period performance achieved. Our Chinese stocks did not perform as hoped as the real estate sector did not recover has occurred. We also held a US and a European bond with poor performance. What they missed in terms of opportunities, we had no exposure to cruise, airline and energy companies, all of which contributed very positively to benchmark performance. On the other hand, we did very well when selecting securities in the banking, media and telecommunications sectors. Among the individual issuers in other sectors that have a notable had a positive impact on performance include some of our favorite SDG leaders. In terms of asset allocation, our underweight to CCC-rated stocks had a positive impact relative to the benchmark index in this strong market environment negative. 2023 was a difficult year for sustainable high-yield bonds compared to traditional high-yield bonds, as some of the best-performing sectors and rating classes are underrepresented in this segment. Before this one despite this, the fund still performed well.

## 1. Market Overview

Since November 2023, an early year-end rally has reconciled the majority of investors with a changeable investment period from February 2023 to January 2024. The financial markets started with a lot of euphoria, even though the market consensus at the beginning of the year was that a global recession would soon occur. But the energy crisis that was partly predicted came to fruition. A mild winter was avoided and, particularly in the USA, the surprisingly robust economic development provided the necessary support for the stock markets. Neither further key interest rate increases in practically all developed regions (with the exception of Japan) nor the turbulence in the banking sector could ensure a lasting reversal of this positive trend.

The infection figures published, which were mostly lower than expected, also had a supportive effect and it became increasingly clear that the fight against price increases, which have gotten out of hand in some places, will soon be won. Accordingly, there was speculation early in the year about possible interest rate peaks or even possible interest rate cuts at the end of the year. The first half of the year, at least at first glance, the reporting period showed an outstanding performance, especially for American stocks. Upon closer inspection, however, the conclusion remained that it was primarily the hype surrounding artificial intelligence and the closely related issues the increase in the value of seven US mega-caps caused the strongly positive difference.

After the summer, the long-awaited (mild) recession was particularly damaging, which would also have opened the door to less high interest rates. With inflation rates visibly declining, the American central bank Fed recently announced another one. This gave rise to fantasies of interest rate cuts and thus stimulated the financial markets again at the end of the year. In this environment, bonds and stocks recorded significant gains while the US dollar and the euro fell against the Swiss franc.

## 2. Review of categories relevant to the Fund

At the beginning of the reporting period, the central banks appeared to have successfully established their narrative of "higher interest rates for longer" on the markets. The specter of a third consecutive year of negative total returns has been raised for global Corporate bonds are becoming more and more realistic. Supported by high-spending consumers and one resilient labor market in the USA and inflation figures remaining at a high level, interest rates climbed on both sides Atlantic continues to rise. The market reaction to the increased geopolitical risks caused by the devastating terrorist attack on Israel was muted. Interest rates fell only temporarily and the price of oil barely moved. Interest rate volatility remained very high, reaching a peak in late October when the 10-year US Treasury yield fell for the first time since 2007 the five percent mark was exceeded. The continuous rise in nominal and real interest rates weighed on the stock markets and led to a widening of credit spreads. The first day of November brought a complete change in mood: After the European Central Bank (ECB) and the Bank of Japan did not change interest rates, the American Fed also left interest rates unchanged at its regular meeting, as expected. The subsequent press conference by Jerome Powell marked the event but a turning point (pivot) for the markets. Investors interpreted his statements to mean that the Fed did not planning further interest rate increases and that the first interest rate cuts are imminent.

The weak economic data and the new issuance plans for US government bonds that fell short of expectations caused the stock markets to rise sharply and the yield on ten-year US government bonds to fall. This was just the beginning of a self-reinforcing movement that lasted until the end of the reporting period. This made November the best month for the US bond market in the past 40 years. For at least the seventh time in this interest rate cycle, markets speculated on a turnaround by central banks Towards expansionary policy. But hopes of imminent interest rate cuts have so far been regularly disappointed. This time, however, the rally across all asset classes in the final two months of the year was driven by a number of technical factors and Behavioral patterns of investors are fueled. Most market players were positioned defensively until the end of October held high cash holdings. They were surprised by the rising prices of risky assets and the falling interest rates. Accordingly, they had to close their short positions and increase the risk in the portfolios. The relatively attractive ones Initial valuations and investors' fear of missing out (FOMO) contributed to the price fireworks at. At its last meeting of 2023 in mid-December, the Fed did nothing to quell the euphoria to slow down markets. As a result, the broad US stock index S&P500 reached an all-time high. The ECB's more cautious tones were ignored, sending many markets soaring from annual lows to annual highs in just two months. In the Compared to March 2022, when the Fed began raising interest rates, the stock markets are now trading higher again, spreads have narrowed and implied volatilities have fallen everywhere. The resulting financial however, underlying conditions thwart central banks' intentions to keep inflation under control and could force them to raise interest rates again later or at least adopt a more restrictive tone. The latest market movements also reveal another contradiction, namely that between low interest rates and weaker interest rates economic development) and high stock valuations (which reflect a booming economy and rising imply corporate profits). The only way out of this dilemma would be a controlled slowdown in the economy (soft landing), which would allow interest rates to be reduced before high interest rates cause further accidents. This soft landing scenario doesn't seem impossible. But the risk that it will not succeed is not currently priced into the markets.

### 3. Performance review

The fund ended the year outperforming (before expenses) its benchmark. Initially, one was able to benefit from the lower credit risk premiums at the beginning of the year, although the increased volatility was temporarily offset by the CS's emergency takeover dampened its performance. The overweight in financials was not helpful here. Thanks to his good investments in corporate bonds, he was able to catch up and end the year on a positive note.

### 3. Performance review

The market for subordinated corporate bonds has recovered well from the turbulence of the previous year. Thanks to solid investor demand and fewer new issues than redemptions, corporate hybrids were able to achieve significantly better performance than the overall market. The fund has a positive absolute performance and a positive relative performance compared to the Benchmark achieved. In the reporting period, the overweighting of Telekom and Energy as well as the BB sector were the largest made a positive contribution.

This soft landing scenario doesn't seem impossible. But the risk that it will not succeed is not currently priced into the markets.

### 3. Performance review

The fund was able to achieve a small outperformance over the year. Initially, the portfolio benefited from a good start to the reporting year. However, the preponderance of financial stocks had a strong performance impact with the CS emergency takeover cost. The fund subsequently recovered steadily and ultimately outperformed its benchmark. The main driver was the overweight in corporate bonds and good duration positioning towards the end of the year.

This soft landing scenario doesn't seem impossible. But the risk that it will not succeed is not currently priced into the markets.

### 3. Performance review

At the start of 2023, global corporate bond total returns were at their highest level in over 13 years. Expectations for this year's performance were correspondingly high. In the last quarter of the year the price fireworks finally started and the performance turned significantly positive. The fund achieved a positive gross performance and also outperformed the benchmark before costs. The biggest positive contribution came from Overweighting and selection within the financial sector. The overweighting of defensive sectors and the extensive Exclusion of the energy sector had a negative effect. Duration positioning did not make a significant contribution over the year.

## Swisscanto (LU) Bond Fund Vision Responsible CHF

### 1. Market Overview

Since November 2023, an early year-end rally has reconciled the majority of investors with a changeable investment period from February 2023 to January 2024. The financial markets started with a lot of euphoria, even though the market consensus at the beginning of the year was that a global recession would soon occur. But the energy crisis that was partly predicted came to fruition. A mild winter was avoided and, particularly in the USA, the surprisingly robust economic development provided the necessary support of the stock markets. Neither further key interest rate increases in practically all developed regions (with the exception of Japan) nor the turbulence in the banking sector could ensure a lasting reversal of this positive trend.

The infection figures published, which were mostly lower than expected, also had a supportive effect and it became increasingly clear that the fight against price increases, which have gotten out of hand in some places, will soon be won. Accordingly, there was speculation early in the year about possible interest rate peaks or even possible interest rate cuts at the end of the year. The first half of the at least at first glance, the reporting period showed an outstanding performance, especially for American stocks. Upon closer inspection, however, the conclusion remained that it was primarily the hype surrounding artificial intelligence and the closely related issues the increase in the value of seven US mega-caps caused the strongly positive difference.

After the summer, the long-awaited (mild) recession was particularly damaging, which would also have opened the door to less high interest rates. With inflation rates visibly declining, the American central bank Fed recently announced another one. This gave rise to fantasies of interest rate cuts and thus stimulated the financial markets again at the end of the year. In this environment, bonds and stocks recorded significant gains while the US dollar and the euro fell against the Swiss franc.

### 2. Review of categories relevant to the Fund

In 2023, Switzerland also experienced declining inflation. From the second half of the year, the inflation rate was already within the target range set by the Swiss National Bank (SNB). A positive base effect, especially among the energy costs, has led to a significant reduction in inflation. Switzerland recorded a slowdown in the economy not least due to Germany's weakening trading partner. However, private consumption remained robust, supported by a stable labor market. The Swiss franc retained its status as a strong currency, especially compared to the euro. The Swiss franc was in demand as a result of geopolitical uncertainties, while the euro was in demand due to the difficult conditions in the Eurozone weakened.

### 3. Performance review

In the reporting period from February 2023 to the end of January 2024, the Swisscanto (LU) Bond Fund Vision Responsible CHF achieved an absolutely positive gross performance. It was a volatile year for interest rates. Interest rates are particularly high in November and December but fell across all maturities and contributed positively to the absolute performance. The yield curve became more complex and is now long end continues to be inverted. Interest rate positioning had a negative impact on relative performance during the reporting period. Credit positioning, however, had a positive impact, with the fund benefiting greatly from its overweight in the financial sector.

## Swisscanto (LU) Bond Fund Sustainable Global Aggregate

### 1. Market Overview

Since November 2023, an early year-end rally has reconciled the majority of investors with a changeable investment period from February 2023 to January 2024. The financial markets started with a lot of euphoria, even though the market consensus at the beginning of the year was that a global recession would soon occur. But the energy crisis that was partly predicted came to fruition. A mild winter was avoided and, particularly in the USA, the surprisingly robust economic development provided the necessary support of the stock markets. Neither further key interest rate increases in practically all developed regions (with the exception of Japan) nor the turbulence in the banking sector could ensure a lasting reversal of this positive trend.

The infection figures published, which were mostly lower than expected, also had a supportive effect and it became increasingly clear that the fight against price increases, which have gotten out of hand in some places, will soon be won. Accordingly, there was speculation early in the year about possible interest rate peaks or even possible interest rate cuts at the end of the year. The first half of the at least at first glance, the reporting period showed an outstanding performance, especially for American stocks. Upon closer inspection, however, the conclusion remained that it was primarily the hype surrounding artificial intelligence and the closely related issues the increase in the value of seven US mega-caps caused the strongly positive difference.

After the summer, the long-awaited (mild) recession was particularly damaging, which would also have opened the door to less high interest rates. With inflation rates visibly declining, the American central bank Fed recently announced another one. This gave rise to fantasies of interest rate cuts and thus stimulated the financial markets again at the end of the year. In this environment, bonds and stocks recorded significant gains while the US dollar and the euro fell against the Swiss franc.

### 2. Review of categories relevant to the Fund

At the beginning of the reporting period, the central banks appeared to have successfully established their narrative of "higher interest rates for longer" on the markets. The specter of a third consecutive year of negative total returns became increasingly realistic for global government bonds. Supported by high-spending consumers and a resilient labor market in the USA and inflation figures remaining at a high level, interest rates continued to climb on both sides of the Atlantic. The market reaction to the increased geopolitical risks caused by the devastating terrorist attack on Israel was muted. Interest rates fell only temporarily and the price of oil barely moved. Interest rate volatility remained very high and peaked in late October when the 10-year US Treasury yield exceeded 5% for the first time since 2007. The first day of November brought a complete change in mood: After the European Central Bank (ECB) and the since the Bank of Japan had not made any interest rate changes, the American Fed also held its regular meeting as expected interest rates remain unchanged. The subsequent press conference by Jerome Powell marked a turning point (pivot) for them Markets. Investors interpreted his statements to mean that the Fed was not planning any further interest rate increases and that the first interest rate cuts were imminent. The weak economic data and falling short of expectations New issuance plans for US government bonds caused the stock markets and the yield on ten-year bonds to rise sharply US Treasury bonds fall. This was just the beginning of a self-reinforcing movement that lasted until the end of the reporting period. This made November the best month for the US bond market in the past 40 years. For at least the seventh time in this interest rate cycle, markets speculated that central banks would turn towards expansionary policies. But hopes of imminent interest rate cuts have so far been regularly disappointed. This time, however, the rally across asset classes in the final two months of the year was fueled by a number of technical factors and investor behavior patterns. Until the end of October, most market players were positioned defensively and held high levels of cash. They were from the rising prices of risky assets and the falling interest rates. Accordingly, they had to close their short positions and increase the risk in the portfolios. The meanwhile attractive initial valuations and the fear of the Investors' fear of missing out (FOMO) contributed to the price fireworks. At its last meeting of 2023 in mid-December, the Fed did nothing to curb the euphoria on the markets. The broad US stock index as a result, the S&P500 reached an all-time high. The ECB's more cautious tones were ignored, sending many markets soaring from annual lows to annual highs in just two months.

### 3. Performance review

The fund was aligned with the sustainable investment universe over the course of the year. The absolute fund performance was dominated by the strong appreciation of the Swiss franc against most currencies and was correspondingly negative. In terms of relative performance (before costs), however, the fund performed very positively compared to the benchmark. The reasons for this lie in the security selection, the narrowing of the spreads of corporate bonds compared to government bonds and the positioning on the Yield curves in different currencies.

## Swisscanto (LU) Bond Fund Vision Responsible GBP

### 1. Market Overview

Since November 2023, an early year-end rally has reconciled the majority of investors with a changeable investment period from February 2023 to January 2024. The financial markets started with a lot of euphoria, even though the market consensus at the beginning of the year was that a global recession would soon occur. But the energy crisis that was partly predicted came to fruition. A mild winter was avoided and, particularly in the USA, the surprisingly robust economic development provided the necessary support for the stock markets. Neither further key interest rate increases in practically all developed regions (with the exception of Japan) nor the turbulence in the banking sector could ensure a lasting reversal of this positive trend.

The infection figures published, which were mostly lower than expected, also had a supportive effect and it became increasingly clear that the fight against price increases, which have gotten out of hand in some places, will soon be won. Accordingly, there was speculation early in the year about possible interest rate peaks or even possible interest rate cuts at the end of the year. The first half of the year at least at first glance, the reporting period showed an outstanding performance, especially for American stocks. Upon closer inspection, however, the conclusion remained that it was primarily the hype surrounding artificial intelligence and the closely related issues the increase in the value of seven US mega-caps caused the strongly positive difference.

After the summer, the long-awaited (mild) recession was particularly damaging, which would also have opened the door to less high interest rates. With inflation rates visibly declining, the American central bank Fed recently announced another one. This gave rise to fantasies of interest rate cuts and thus stimulated the financial markets again at the end of the year. In this environment, bonds and stocks recorded significant gains while the US dollar and the euro fell against the Swiss franc.

### 2. Review of categories relevant to the Fund

The year 2023, like the years before, was extraordinary. After global monetary policy was transferred to a restrictive sphere, clear signs were expected in the form of a slowing economic dynamic. However, the forecast slowdown did not materialize and the market adjusted its expectations in the form of further rising interest rates.

In most developed countries, however, inflation rates were clearly on the decline. Still above the information targets of the respective central banks, but no longer quite as worrying in absolute terms. In Great Britain, this trend took a long time to emerge and only became established towards the end of the third quarter. At the same time it also showed up wage developments in the UK are problematic. Although the labor market was showing early signs of weakening, wages continued to rise too much for the Bank of England to be comfortable with.

These local divergences also led to the members of the Bank of England celebrating the victory over infection in the wake of the Covid pandemic less euphorically than their peers. However, global financial markets are highly correlated. This was clearly reflected in the fact that in the wake of US interest rates, interest rates in the UK also fell significantly in the last two months of the year.

Whether, and by how much, the Bank of England will cut interest rates next year depends heavily on the further development of inflation and wage pressure in Great Britain. However, the weakening of the labor market clearly warns that local businesses are suffering from the interest burden and households' willingness to consume has declined. This should be the Bank of England give us confidence that the UK is also on the right track, albeit with a slight delay.

### 3. Performance review

Even in a challenging year like 2023, the fund managed to outperform relative (before costs). To achieve benchmark. The slight overweight in credit risk cost performance slightly at the start of the year, but had a strong overall positive contribution due to the rally in the final two months of the year. The fund tended to be overweight in interest rate risk throughout the year. This positioning cost a lot at the beginning. During a slowdown as had been expected, the British and global economy was surprisingly resilient, which has lowered interest rates for the time being continued to rise. In the last two months, interest rates fell significantly and reduced the overall negative contribution from the interest side. Overall, this resulted in a clearly positive, relative performance for 2023.

## 24 Notes

### Note 1: Financial Reports

The fund reports are produced in accordance with the legal provisions and regulations governing undertakings for collective investments applicable in Luxembourg.

### Note 2: Main Accounting Policies

The net assets of each subfund or each unit class correspond to the difference between the total assets of the subfund or unit class and the total liabilities of the subfund or unit class concerned.

The total net assets are given in Swiss Francs (CHF). For this purpose the net assets of any subfunds that are not denominated in CHF are converted at the last known middle rate of exchange at the closing date. This conversion was based on the following rates:

---

Subscriptions, redemptions and conversions are made based on an unknown net asset value.

Valuation principles:

a) Securities, derivatives and other investments that are listed on a stock market are valued at the last-known market prices. If these securities, derivatives and other investments are listed on several stock exchanges the last available price on the stock exchange that is the main market for this security is key. For securities, derivatives and other investments for which trading on an exchange is minor and for which there is a second market between securities traders with

b) Securities and other investments that are not listed on a stock exchange or on a regulated market are valued at the last market price available. If this is not available, the valuation of the securities is undertaken by the management company in accordance with other criteria to be specified by the Board of Directors and on the basis of the probable sale price, the value of which must be estimated with due care and in good faith.

c) Money market instruments which are not listed on a stock exchange, but are traded on another regulated market which is recognized, open to the public and functions properly, may be valued as follows: starting from the net purchase price, the valuation price of such investments is progressively adjusted to the redemption price, while keeping the investment yield constant. In the event of significant changes in market conditions, the valuation basis of the individual investments is brought into line with the new market yield.

d) Liquid assets, trustee funds and fixed-term deposits are valued on the basis of their nominal value plus accrued interest.

e) Units in UCITS and other UCIs are valued according to their last published net asset value. If no net asset value is available, but only acquisition and sale prices, the units of such UCITS and other UCIs may be valued at the mean value between such acquisition and sale prices. If no current prices are available, the valuation is carried out by the management company in accordance with other criteria to be specified by the Board of Directors and on the basis of the probable sale price which must be estimated with due care and in good faith.

f) Derivatives that are not traded on a stock exchange or any other regulated market are to be valued at the fair value that is appropriate after careful assessment, taking into account the overall circumstances.

g) For each subfund the assets that are denominated in a currency other than that of the subfund are converted to the subfund's currency at the prevailing mean rate. Forward contracts entered into to hedge currency risk are included in the conversion.

h) Calculation of the net asset value

The net asset value of the units is calculated by the management company for each individual subfund and for each unit class as per the contractual conditions and item 3.1 in the sales prospectus on every banking business day in Luxembourg.

i) Swinging Single Prices (SSP)

The SSP method is used for all subfunds. With the SSP method, the ancillary costs created by subscriptions and redemptions for the purchase and sale of investments (price spreads, brokerage in line with market conditions, commission, fiscal charges etc.) are taken into account in the calculation of the NAV. If, on a banking day, the total subscriptions and redemptions of all unit classes of a subfund result in a net inflow or outflow, the net asset value of the relevant subfund is increased or reduced. This amount is known as the "modified net asset value". The adjustment results in an increase in the net asset value if the net movements lead to a rise in the number of units in the relevant subfund. It results in a decrease in the net asset value if the net movements cause a fall in the number of units. The transaction costs incurred by subscriptions and redemptions on the trading day are paid by the investors who commission these transactions.

The surcharge on, or deduction from, the transaction costs incurred by subscriptions or redemptions is effected at a flat rate and is based on an average value from a previous period of a maximum of one year. The maximum adjustment is 2% of the net asset value of the subfund in question. If the fund has been on the market for less than one year, depending on the fund's special features this factor will be determined so that a representative figure results.

j) Valuation of forward exchange contracts

Any unrealised gains or losses resulting from the valuation of open forward exchange contracts at the reporting date are included in the statement of net assets and the income and expense statement.

k) Capital gains or losses from security transactions

The realised gains or losses resulting from the sale of securities will be calculated on the basis of the average purchase price.

### Note 3: Administrative commission

The fund will be invoiced a fixed administrative commission for management and administration plus the distribution of fund units, to be paid to the Management Company. This commission will be paid monthly, based on the average net fund volume of the respective subfund.

The flat-rate administrative commission comprises the two components of the flat-rate management fee (costs of asset management and sales) and the flat-rate administration fee (costs of management and administration).

As at reporting date, the effective flat-rate administrative commission amounted to:

FAC: flat-rate administrative commission / FMF: flat-rate management fee / FAF: flat-rate administration fee

#### Note 4: Subscription tax ("Taxe d'abonnement")

In accordance with the rules applicable in Luxembourg, the fund is subject to a quarterly subscription tax ("taxe d'abonnement") of 0.05% p.a. in the case of units of unit classes A, B, C, and M of 0.01% p.a. for units of unit classes D, G, N and S, based on the net assets of the given subfund at the end of the respective quarter.

Pursuant to Article 175a of the amended Law of 17 December 2010, the portion of net assets invested in UCITS that are already subject to capital tax is exempt from this tax.

#### Note 5: Total Expense Ratio (TER)

The TER reported under "Statistics" in this report was calculated in accordance with the 'Guidelines on the Calculation and Disclosure of TER and PTR' published by the Swiss Funds and Asset Management Association (SFAMA) on 16 May 2008. These Guidelines have been aligned with the revised Collective Investment Schemes Ordinance-FINMA. The amended TER Guidelines entered into force on 1 June 2015. It is no longer necessary to disclose the PTR in the annual report.

The TER has been calculated for the last 12 months prior to the date of this report.

Total Expense Ratio (TER) = (operating expenses / average net assets) x 100

The operating expenses include all of the fees and costs associated with the fund. The operating expenses do not include the ancillary costs that the fund incurred when buying and selling assets.

## Note 6: Information on forward exchange contracts

## Note 10: Changes in the investment portfolio

Information on changes in the investment portfolio for the reporting period are available to all unitholders at the Swisscanto website ([www.swisscanto.com](http://www.swisscanto.com)) or can be obtained free of charge from Swisscanto Asset Management AG, the head office of the management company, the custodian bank and the representative in Switzerland, from the German payment and information agent, from any branch of the Cantonal banks and any payment and sales office.

## Note 11: Tax information for investors in the Federal Republic of Germany (in accordance with Section 5 of the Investment Tax Act, para. 1, sentence 1, no. 1)

This information will be published in the electronic Federal Gazette. It is also available on the Swisscanto website ([www.swisscanto.com](http://www.swisscanto.com)).

Investors should consult their own financial advisor for advice on any tax consequences that could result from the acquisition, possession, transfer or disposal of units under the laws of the countries of which they are nationals or in which they are resident or domiciled.

## Note 12: Transaction costs

In the year under review, the fund incurred the following transaction costs from buying or selling transferable securities or money market instruments:

Swisscanto (LU) Bond Fund Responsible Global Absolute Return	USD	3'836.22
Swisscanto (LU) Bond Fund Vision Responsible CAD	CAD	874.19
Swisscanto (LU) Bond Fund Vision Responsible USD	USD	816.01
Swisscanto (LU) Bond Fund Responsible Global Convertible	USD	2'011.26
Swisscanto (LU) Bond Fund Responsible Global Rates	USD	648.69
Swisscanto (LU) Bond Fund Vision Responsible EUR	EUR	741.03
Swisscanto (LU) Bond Fund Vision Responsible CHF	CHF	842.59
Swisscanto (LU) Bond Fund Sustainable Global Aggregate	CHF	536.20
Swisscanto (LU) Bond Fund Vision Responsible AUD	AUD	2'070.49

The transaction costs, which are shown in the statement of income and expenses and which are primarily related to sub-custodian bank fees and similar fees, are therefore not included in the values listed above, but are also directly related to purchases and sales of securities. Due to accounting restrictions, these transaction costs cannot be covered acquisition values of the various securities are added.

## Note 13: Securities lending transactions

In order to ensure efficient asset management, a subfund may, in accordance with the requirements of the applicable provisions, use securities lending techniques and instruments in accordance with Article 51, para. 2 of the UCITS Directive and Article 11 of Directive 2007/16/EC of 19 March 2007 (Eligible Assets Directive) to generate additional income. In securities lending transactions, the subfund acts as lender and lends the borrower a security for use during a limited time; the subfund receives a fee for this. Zürcher Kantonalbank is the only direct borrower (principal) and the only direct counterparty of the securities lending transactions. As an independent, public-law institution of the canton of Zurich, the bank enjoys an unlimited state guarantee. It is therefore subject to regulatory supervision by the Swiss supervisory authority (Swiss Financial Market Supervisory – FINMA), which is considered by the CSSF as equivalent to the rules laid down under European Union law (Art. 41 (1) f) of the UCITS Law).

As at reporting date, securities lending transactions existed in the following amount:

Subfund	Currency	Fair Value	Guarantee amount
Swisscanto (LU) Bond Fund Responsible COCO	USD	66'167'111	74'232'487
Swisscanto (LU) Bond Fund Responsible Corporate Hybrid	EUR	913'581	1'024'966

#### Note 14: Fees for subscription and redemption of target funds

In accordance with the amended law of 2010, no fees are payable for the subscription or redemption of units in target funds managed by the same management company or by a company affiliated with the management company. Some subfunds invest in other subfunds of the Umbrella. As at the reporting date, the value of these cross-investments stands at:

Target fund	Market value (in CHF)
Swisscanto (LU) Bond Fund Responsible COCO	16'211'483.88
Swisscanto (LU) Bond Fund Responsible Corporate Hybrid	21'759'173.68
Swisscanto (LU) Bond Fund Responsible Emerging Markets Opportunities	12'855'000.07
Swisscanto (LU) Bond Fund Responsible Global Convertible	1'439'395.98
Swisscanto (LU) Bond Fund Sustainable Global High Yield	11'420'525.98

## **Note 16: Important Event**

In February 2022, several countries (including the U.S., the UK and the EU) imposed sanctions on certain institutions and persons in Russia due to the official recognition by the Russian Federation of the People's Republics of Donetsk and Lugansk. Following the military operations against Ukraine launched by Russia on 24 February 2022, possible further sanctions have been announced.

Since February 2022, the increasing geopolitical tensions have led to a considerable increase in volatility in securities and foreign exchange markets as well as a significant depreciation of the rouble against the US dollar and the euro. These events are expected to affect the activities of Russian companies in various sectors of the economy.

The Company considers these to be non-adjusting events after the reporting period. Although, at the time of reporting, neither the performance of the Company nor the Company's continuing operations or transactions were affected by the above events, the Board of Directors continues to monitor the evolving situation and its effects on the Company's financial position and results of operations.

With effect from May 31, 2022, the sub-fund Swisscanto (LU) Bond Fund Responsible Global Short Term High Yield will be renamed Swisscanto (LU) Bond Fund Sustainable Global High Yield. The sub-fund became sustainable in the future Track investments and at least two thirds of the assets in compliance with the requirements of the Sustainable approach. In the future, the composition of the portfolio should be based on the reference index "ICE BofA Global High Yield Index TR", whereby the investment universe is limited by the sustainable approach.

## **Note 17: Subsequent events**

Not relevant in the reporting period.

## **Note 18: Classification according to SFDR Regulation (EU 2019/2088) (unaudited)**

The sub-funds that follow the Responsible approach and include the name "Responsible" in the name were actively managed by the asset manager of these sub-funds in line with Article 8 of 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosure obligations in the financial services sector (hereinafter "SFDR").

Compliance with the requirements of Article 8 SFDR has been achieved in that the asset manager has applied the criteria included in the ESG approach, namely exclusion criteria and ESG factors, to at least two thirds of the assets of the respective sub-fund when making investment decisions.

As far as investments have been made in companies, those have been selected that adhere to the principles of good have fulfilled corporate management requirements. To achieve this, companies have been selected based on indicators provided by third parties.

No targeted investments have been made in accordance with the requirements of Regulation (EU) 2020/852 of June 18, 2020 establishing a framework to facilitate sustainable investments.

## 25 Unaudited information

### Information on remuneration policy

European Directive 2014/91/EU amending Directive 2009/65/EC on undertakings for collective investment in transferable securities, which is applicable to the fund, entered into force on 18 March 2016. It was transposed into national law by the Luxembourg Law of 10 May 2016 on the transposition of Directive 2014/91/EU. Due to these new regulations, the fund is required to publish information relating to the remuneration of identified employees within the meaning of the Law in the annual report. This information corresponds with the appropriate remuneration information which the management company has published in the previous annual report for 2017, and relates to the entire workforce:

	Number of employees	CHF
Total compensation Swisscanto Asset Management International S.A. (01.01.2023 – 31.12.2023)		
	17	2'549'839.67
davon fester Bestandteil		1'748'982.55
variabler Bestandteil*		800'857.12
	Number of employees	CHF
Total compensation delisted Asset Management Zürcher Kantonalbank (01.01.2023 – 31.12.2023)		
	19	5'789'000.00
davon fester Bestandteil		3'319'500.00
variabler Bestandteil*		2'469'500.00

Due to the low number of employees and based on the principle of proportionality, no further breakdown of the remuneration of identified employees will be provided. The calculation of the remuneration and other benefits is based on prevailing market norms and the individual performance of the employee. The fixed part of the remuneration relates to factors of long-term significance, such as sustainable profitability, robust risk and capital management, first-class customer service and teamwork. The same procedure applies for the variable part of the remuneration, which also encompasses factors such as the reward of success and achievement, and the continued adherence to corporate governance guidelines. Furthermore, variable remuneration depends to a significant extent on the income of the group as well as the management company and the funds it manages.

Further information on the remuneration policy can be found on the website:

<https://www.swisscanto.com/lu/de/gs/rechtliche-hinweise/verguetungspolitik.html>

## Periodic disclosure as at 31.01.2024

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

### Product Name:

Swisscanto (LU) Bond Fund Responsible COCO

### Legal entity identifier (LEI-Code):

5493000GXMB1PV730R63

### Benchmark

ICE BofA Contingent Capital Index Hedged in USD

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: _%</b> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective: _%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <b>19.92%</b> of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul> <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The promoted environmental and social characteristics were achieved by following indicators:

1. Exclusion Criteria
2. ESG-Integration
3. Reduction of CO2e intensity
4. Sustainable Investments

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

For reasons of clarity, the information on the performance of the sustainability indicators (see details at the end of the report) is answered directly with the historical comparison in the next question.

### ...and compared to previous periods?

## Exclusion Criteria

Responsible							
Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Coal reserves (ex. metal production)	0.00%	0.00%	0	 Controversial weapons	0.00%	0.00%	0
Extraction of coal (>5% revenue)	0.00%	0.00%	0	Exploitative child labour	0.00%	0.00%	0
 Climate change		 Risk to society and health		Manufacture of weapons and ammunition	0.00%	0.00%	0
				Production of military hardware (>5% revenue)	0.00%	0.00%	0
				Production of pornography	0.00%	0.00%	0
				UN Global Compact violations	0.00%	0.00%	0

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above. The historical comparisons are made in the table below. For reasons of clarity, the exclusion criteria are aggregated.

	Indicator	Date 2023	Date 2024
Portfolio	Exclusion Criteria Total*	0%	0%
Benchmark	Exclusion Criteria Total*	0%	0%

\*all exclusion criteria cumulated.

# ESG-integration

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Exposure to ESG Laggards	2.83%	3.6%
Benchmark	Exposure to ESG Laggards	9.9%	5.89%

# Reduction of CO<sub>2</sub>e intensity

In line with the < 2° Paris climate target ("<2°C max"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO<sub>2</sub>e emissions by at least 4% per year. The reduction path is calculated from the weighted CO<sub>2</sub>e intensity of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO<sub>2</sub>e intensities of the portfolio and of the benchmark respectively. CO<sub>2</sub>e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at " "Achievement of climate target" " put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	CO <sub>2</sub> e intensity Corporate	2	2
	Reduction Corporate	-14%	-34%
Benchmark	CO <sub>2</sub> e intensity Corporate	3	2
	Reduction Corporate	2%	-11%

# Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental and social goals resulting from the UN Sustainable Development Goals (SDGs) as per Art. 2 (17) SFDR.

The fund did not seek to invest in environmentally sustainable activities within the meaning of the EU Taxonomy Regulation. The investment manager of the (sub)fund has developed a methodology for defining sustainable investments that fulfils the requirements of Art. 2 (17) SFDR. The methodology is described in detail in the pre-contractual information. In the below chart, the sustainable investments are split according to the UN SDGs. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Socially sustainable investments	16.84%	18.3%
	Sustainable Investments with environmental target	0.71%	1.62%
	<b>Total sustainable quota</b>	<b>17.55%</b>	<b>19.92%</b>
Benchmark	Socially sustainable investments	13.94%	14.98%
	Sustainable Investments with environmental target	0.9%	0.48%
	<b>Total sustainable quota</b>	<b>14.84%</b>	<b>15.47%</b>

■ Portfolio ■ Benchmark

With the different treatment of green, social and sustainable bonds, SDG exposure may differ from the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17 SDGs and did not have DNSH and/or Minimum Safeguards violations.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGP) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

### Principal Adverse Impacts - Corporate Assets

#### Primary Indicators - Energy and Emissions

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments and information on asset allocation are answered in the question below.

### What was the asset allocation?

### In which economic sectors were the investments made?

Due to lack of data availability, subsectors cannot not be shown.

\*this classification includes all holdings for which a NACE classification cannot be found or estimated; cash is herein included.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Even though the sustainable investments made do not qualify as environmental activities according to EU-Taxonomy, the below disclosure is made to show the alignment of sustainable investments with EU-Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below shown in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\*For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

Information on transition activities and enabling activities is summarised in the table. If no information is available, then the table will also show no information.

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)
-------------	-------------	---------------------------------	-----------------------	------------------------------	-----------------------------------	----------------------------

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As no data was available in the previous reporting year, there is no need for a comparison with the previous year.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

 **What was the share of socially sustainable investments?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the social goals resulting from the SDGs as per Art. 2 (17) SFDR.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs). More information is available at: [Swisscanto | Proxy Voting Dashboard \(issgovernance.com\)](https://www.swisscanto.com/int/en/sustainability/investment-stewardship.html)  
<https://www.swisscanto.com/int/en/sustainability/investment-stewardship.html>

[Swisscanto | Proxy Voting Dashboard \(issgovernance.com\)](https://www.swisscanto.com/int/en/sustainability/investment-stewardship.html)

<https://www.swisscanto.com/int/en/sustainability/investment-stewardship.html>

## How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### How does the reference benchmark differ from a broad market index?

Not applicable.

### How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

### How did this financial product perform compared with the reference benchmark?

Not applicable.

### How did this financial product perform compared with the broad market index?

Not applicable.

The document was prepared by Swisscanto with due care and may contain information from carefully selected third-party sources. Investors should note that the data previously calculated and published for 2023 has been recalculated for this document published in 2024. Accordingly, there may be discrepancies in these historical data published in 2023 and 2024.

## Periodic disclosure as at 31.01.2024

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

### Product Name:

Swisscanto (LU) Bond Fund Responsible Corporate Hybrid

### Legal entity identifier (LEI-Code):

549300GAYISEMK2SEE06

### Benchmark

ICE BofA Gl. Hybrid Non-Financial Corp. Index (TR) (Constrained 3% per Issuer) hedged in EUR

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> _ % <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> _ %	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <b>49.52%</b> of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul> <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The promoted environmental and social characteristics were achieved by following indicators:

1. Exclusion Criteria
2. ESG-Integration
3. Reduction of CO2e intensity
4. Sustainable Investments

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

For reasons of clarity, the information on the performance of the sustainability indicators (see details at the end of the report) is answered directly with the historical comparison in the next question.

### ...and compared to previous periods?

## Exclusion Criteria

Responsible							
Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Coal reserves (ex. metal production)	0.00%	4.99%	2	 UN Global Compact violations	0.00%	1.50%	1
Extraction of coal (>5% revenue)	0.00%	0.30%	0	Controversial weapons	0.00%	0.00%	0
 Climate change		 Risk to society and health		Exploitative child labour	0.00%	0.00%	0
				Manufacture of weapons and ammunition	0.00%	0.00%	0
				Production of military hardware (>5% revenue)	0.00%	0.00%	0
				Production of pornography	0.00%	0.00%	0

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above. The historical comparisons are made in the table below. For reasons of clarity, the exclusion criteria are aggregated.

	Indicator	Date 2023	Date 2024
Portfolio	Exclusion Criteria Total*	0%	0%
Benchmark	Exclusion Criteria Total*	4.64%	6.78%

\*all exclusion criteria cumulated.

# ESG-integration

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Exposure to ESG Laggards	17.03%	2.49%
Benchmark	Exposure to ESG Laggards	9.5%	5.77%

# Reduction of CO<sub>2</sub>e intensity

## Corporate

In line with the < 2° Paris climate target ("<2°C max"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO<sub>2</sub>e emissions by at least 4% per year. The reduction path is calculated from the weighted CO<sub>2</sub>e intensity of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO<sub>2</sub>e intensities of the portfolio and of the benchmark respectively. CO<sub>2</sub>e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at "Achievement of climate target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	CO <sub>2</sub> e intensity Corporate	309	252
	Reduction Corporate	-9%	-19%
Benchmark	CO <sub>2</sub> e intensity Corporate	557	473
	Reduction Corporate	64%	51%

# Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental and social goals resulting from the UN Sustainable Development Goals (SDGs) as per Art. 2 (17) SFDR.

The fund did not seek to invest in environmentally sustainable activities within the meaning of the EU Taxonomy Regulation. The investment manager of the (sub)fund has developed a methodology for defining sustainable investments that fulfils the requirements of Art. 2 (17) SFDR. The methodology is described in detail in the pre-contractual information. In the below chart, the sustainable investments are split according to the UN SDGs. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Socially sustainable investments	14.42%	16.35%
	Sustainable Investments with environmental target	29.77%	33.2%
	<b>Total sustainable quota</b>	<b>44.19%</b>	<b>49.55%</b>
Benchmark	Socially sustainable investments	7.6%	9.08%
	Sustainable Investments with environmental target	20.95%	23.13%
	<b>Total sustainable quota</b>	<b>28.56%</b>	<b>32.2%</b>

■ Portfolio
 ■ Benchmark

With the different treatment of green, social and sustainable bonds, SDG exposure may differ from the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17 SDGs and did not have DNSH and/or Minimum Safeguards violations.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGP) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

### Principal Adverse Impacts - Corporate Assets

#### Primary Indicators - Energy and Emissions

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments and information on asset allocation are answered in the question below.

### What was the asset allocation?

### In which economic sectors were the investments made?

Due to lack of data availability, subsectors cannot not be shown.

\*this classification includes all holdings for which a NACE classification cannot be found or estimated; cash is herein included.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Even though the sustainable investments made do not qualify as environmental activities according to EU-Taxonomy, the below disclosure is made to show the alignment of sustainable investments with EU-Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below shown in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\*For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Information on transition activities and enabling activities is summarised in the table. If no information is available, then the table will also show no information.

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)
Elia Group SA/NV	Construction	99.98%	24.95%	15.00%	0.00%	0.97%
Terna S.p.A.	Electricity, Gas, Steam and Air Conditioning Supply	87.76%	21.75%	13.10%	0.00%	1.67%
Redeia Corporacion SA	Construction	84.35%	19.80%	12.73%	0.00%	1.14%
Orsted	Electricity, Gas, Steam and Air Conditioning Supply	56.27%	18.25%	31.86%	0.00%	3.48%
NGG Finance Plc	Financial and Insurance Activities	19.17%	16.75%	0.00%	0.36%	1.50%
EDP-Energias de Portugal SA	Electricity, Gas, Steam and Air Conditioning Supply	77.52%	12.25%	0.00%	32.43%	3.12%
Electricite de France SA	Electricity, Gas, Steam and Air Conditioning Supply	71.56%	9.50%	0.00%	7.23%	2.75%
Iberdrola International BV	Electricity, Gas, Steam and Air Conditioning Supply	61.60%	9.13%	0.00%	15.60%	2.03%
Iberdrola Finanzas SA	Electricity, Gas, Steam and Air Conditioning Supply	61.60%	9.13%	0.00%	15.60%	1.23%
Veolia Environnement SA	Water Supply, Sewerage, Waste Management and Remediation Activities	68.52%	8.28%	30.01%	0.00%	1.74%

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As no data was available in the previous reporting year, there is no need for a comparison with the previous year.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

**What was the share of socially sustainable investments?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the social goals resulting from the SDGs as per Art. 2 (17) SFDR.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs). ## How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### How does the reference benchmark differ from a broad market index?

Not applicable.

### How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

### How did this financial product perform compared with the reference benchmark?

Not applicable.

### How did this financial product perform compared with the broad market index?

Not applicable.

The document was prepared by Swisscanto with due care and may contain information from carefully selected third-party sources. Investors should note that the data previously calculated and published for 2023 has been recalculated for this document published in 2024. Accordingly, there may be discrepancies in these historical data published in 2023 and 2024.

## Periodic disclosure as at 31.01.2024

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

### Product Name:

Swisscanto (LU) Bond Fund Responsible Emerging Markets Opportunities

### Legal entity identifier (LEI-Code):

549300J68T7Q0GVJ6Z95

### Benchmark

JP Morgan JEMB Sovereign-only 50-50 (TR) in USD

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: _%</b> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective: _%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <b>1.99%</b> of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul> <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The promoted environmental and social characteristics were achieved by following indicators:

1. Exclusion Criteria
2. ESG-Integration
3. Reduction of CO2e intensity

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

For reasons of clarity, the information on the performance of the sustainability indicators (see details at the end of the report) is answered directly with the historical comparison in the next question.

### ...and compared to previous periods?

## Exclusion Criteria

Responsible							
Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Coal reserves (ex. metal production)	0.00%	0.08%	1	 UN Global Compact violations	0.00%	0.88%	3
Extraction of coal (>5% revenue)	0.00%	0.08%	1	Controversial weapons	0.00%	0.00%	0
 Climate change		 Risk to society and health		Exploitative child labour	0.00%	0.00%	0
				Manufacture of weapons and ammunition	0.00%	0.00%	0
				Production of military hardware (>5% revenue)	0.00%	0.00%	0
				Production of pornography	0.00%	0.00%	0

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above. The historical comparisons are made in the table below. For reasons of clarity, the exclusion criteria are aggregated.

	Indicator	Date 2023	Date 2024
Portfolio	Exclusion Criteria Total*	0%	0%
Benchmark	Exclusion Criteria Total*	0.4%	0.96%

\*all exclusion criteria cumulated.

# ESG-integration

The portfolio targeted an allocation to ESG Laggards  $\leq 20\%$  during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Exposure to ESG Laggards	0%	0.07%
Benchmark	Exposure to ESG Laggards	0.05%	0.84%

# Reduction of CO<sub>2</sub>e intensity

## Portfolio

CO<sub>2</sub>e intensity (Sovereign) tonnes CO<sub>2</sub>e / million USD GDP

751

## Benchmark

CO<sub>2</sub>e intensity (Sovereign) tonnes CO<sub>2</sub>e / million USD GDP

834

The portfolio targeted a lower CO<sub>2</sub>e intensity than the benchmark.  
The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	CO <sub>2</sub> e intensity Sovereign	796	751
Benchmark	CO <sub>2</sub> e intensity Sovereign	915	834

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

This financial product did not have an objective to make sustainable investments within the reporting year. A comparison to previous years is therefore not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

This financial product did not have an objective to make sustainable investments within the reporting year. A comparison to previous years is therefore not applicable.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

This financial product did not have an objective to make sustainable investments within the reporting year. A comparison to previous years is therefore not applicable.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

This financial product did not have an objective to make sustainable investments within the reporting year. A comparison to previous years is therefore not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

### Principal Adverse Impacts - Corporate Assets

#### Primary Indicators - Energy and Emissions

Indicator	Factor	Portfolio Current	Coverage	Portfolio previous year	Benchmark current	Benchmark previous year	Explanation

The document was prepared by Swisscanto with due care and may contain information from carefully selected third-party sources. Investors should note that the data previously calculated and published for 2023 has been recalculated for this document published in 2024. Accordingly, there may be discrepancies in these historical data published in 2023 and 2024.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01.02.2023 - 31.01.2024

Largest investments	Sector	% Assets	Country
Government of Brazil 10.0% 01-JAN-2029	Public Administration and Defence, Compulsory Social Security	4.04%	Brazil
Government of Mexico 7.75% 29-MAY-2031	Financial and Insurance Activities	3.97%	
Government of Malaysia 2.632% 15-APR-2031	Public Administration and Defence, Compulsory Social Security	3.67%	Malaysia
Government of South Africa 8.25% 31-MAR-2032	Public Administration and Defence, Compulsory Social Security	2.98%	South Africa
Government of Indonesia 7.0% 15-SEP-2030	Public Administration and Defence, Compulsory Social Security	2.92%	Indonesia
Government of Mexico 8.5% 31-MAY-2029	Financial and Insurance Activities	2.89%	
USD Cash		2.87%	
Government of South Africa 8.5% 31-JAN-2037	Public Administration and Defence, Compulsory Social Security	2.41%	South Africa
Government of the United States of America 0.0% 25-JAN-2024	Public Administration and Defence, Compulsory Social Security	2.38%	USA
Government of Poland 1.25% 25-OCT-2030	Financial and Insurance Activities	2.19%	
Government of Brazil 10.0% 01-JAN-2025	Public Administration and Defence, Compulsory Social Security	2.15%	Brazil
Government of Oman 6.25% 25-JAN-2031 REGS	Financial and Insurance Activities	2.03%	
Government of Mexico 2.659% 24-MAY-2031	Financial and Insurance Activities	1.89%	
Government of Thailand 3.39% 17-JUN-2037	Public Administration and Defence, Compulsory Social Security	1.87%	Thailand
Government of Indonesia 6.125% 15-MAY-2028	Public Administration and Defence, Compulsory Social Security	1.80%	Indonesia

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments and information on asset allocation are answered in the question below.

### What was the asset allocation?

### In which economic sectors were the investments made?

Due to lack of data availability, subsectors cannot not be shown.

\*this classification includes all holdings for which a NACE classification cannot be found or estimated; cash is herein included.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Even though the sustainable investments made do not qualify as environmental activities according to EU-Taxonomy, the below disclosure is made to show the alignment of sustainable investments with EU-Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below shown in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\*For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

Information on transition activities and enabling activities is summarised in the table. If no information is available, then the table will also show no information.

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)
Petrobras Global Finance BV	Mining and Quarrying	2.42%	0.00%	0.00%	0.01%	35.62%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As no data was available in the previous reporting year, there is no need for a comparison with the previous year.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental goals resulting from the UN Sustainable Development Goals (SDGs) as per Art. 2 (17) SFDR.

 **What was the share of socially sustainable investments?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the social goals resulting from the SDGs as per Art. 2 (17) SFDR.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs). **Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : _% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : _%	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <b>49.59%</b> of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul> <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The promoted environmental and social characteristics were achieved by following indicators:

1. Exclusion Criteria
2. ESG-Integration
3. Reduction of CO2e intensity
4. Sustainable Investments

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

For reasons of clarity, the information on the performance of the sustainability indicators (see details at the end of the report) is answered directly with the historical comparison in the next question.

### ...and compared to previous periods?

## Exclusion Criteria

Responsible		Portfolio weight	Criteria	Portfolio weight
 Coal reserves (ex. metal production)		0.00%	 Controversial weapons	0.00%
Extraction of coal (>5% revenue)		0.00%	Exploitative child labour	0.00%
 Climate change	 Risk to society and health		Manufacture of weapons and ammunition	0.00%
			Production of military hardware (>5% revenue)	0.00%
			Production of pornography	0.00%
			UN Global Compact violations	0.00%

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the respective portfolio exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above.

The historical comparisons are made in the table below. For reasons of clarity, the exclusion criteria are aggregated.

Indicator	Date 2023	Date 2024
Portfolio Exclusion Criteria Total*	0%	0%

\*all exclusion criteria cumulated.

# ESG-integration

The portfolio targeted an allocation to ESG Laggards  $\leq$  20% during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Exposure to ESG Laggards	4.2%	0.48%

# Reduction of CO<sub>2</sub>e intensity

In line with the < 2° Paris climate target ("<2°C max"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO<sub>2</sub>e emissions by at least 4% per year. The reduction path is calculated from the weighted CO<sub>2</sub>e intensity of the investment universe of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO<sub>2</sub>e intensities of the portfolio. CO<sub>2</sub>e intensities below the 2° Max line indicate that the portfolio meets the <2° climate target. Values at " "Achievement of climate target" " put the portfolio in relation to the climate target. Negative values mean that the target has been achieved.

The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Achievement of climate target	-70%	-69%
	CO <sub>2</sub> e intensity Corporate	61	36
	CO <sub>2</sub> e intensity Sovereign	244	256
	Reduction Corporate	-81%	-88%
	Reduction Sovereign	-51%	-44%

# Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio that have been invested in away that is not taxonomy compliant but in line with the environmental and social goals resulting from the UN Sustainable Development Goals (SDGs) as per Art. 2 (17) SFDR.

The fund did not seek to invest in environmentally sustainable activities within the meaning of the EU Taxonomy Regulation. The investment manager of the (sub)fund has developed a methodology for defining sustainable investments that fulfils the requirements of Art. 2 (17) SFDR. The methodology is described in detail in the pre-contractual information. In the below chart, the sustainable investments are split according to the UN SDGs. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Socially sustainable investments	26.7%	18.59%
	Sustainable Investments with environmental target	47.76%	31%
	<b>Total sustainable quota</b>	<b>74.46%</b>	<b>49.59%</b>

 Portfolio

With the different treatment of green, social and sustainable bonds, SDG exposure may differ from the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17 SDGs and did not have DNSH and/or Minimum Safeguards violations.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGP) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

### Principal Adverse Impacts - Corporate Assets

#### Primary Indicators - Energy and Emissions

Indicator	Factor	Portfolio Current	Coverage	Portfolio previous year	Explanation
1. GHG emissions	1a. GHG Emissions - Scope 1 per Mio EUR Enterprise Value	2091.66	38.1%	3274.39	
	1b. GHG Emissions - Scope 2 per Mio EUR Enterprise Value	643.47	38.1%	1372.62	
	1c. GHG Emissions - Scope 3 per Mio EUR Enterprise Value	29452	38.1%	54761.3	
2. Carbon footprint	2. GHG Emissions - Scope 1+2+3 per Mio EUR Enterprise Value	105.8	38.1%	201.8	
3. GHG intensity of investee companies	3. GHG Emissions - Emissions Intensity - Total Emissions (EUR)	60.65	39.38%	112.49	
4. Exposure to companies active in the fossil fuel sector	4. Fossil Fuel - Involvement (PAI)	3%	42.51%	4.22%	

Indicator	Factor	Portfolio Current	Coverage	Portfolio previous year	Explanation
5. Share of non-renewable energy consumption and production	5a. CR Raw - Energy use - Coal/nuclear/unclear energy sources	55.29%	6.88%	53.31%	
	5b. Non-renewable energy consumption	56.85%	11.65%	69.93%	Non-renewable energy consumption encompasses consumption of energy generated from non-renewable sources, as well as energy consumption from biomass. Any energy use figures where the source of energy is unclear is also included in this factor.
	5c. Non-renewable energy production	1.23%	41.22%	0.28%

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments and information on asset allocation are answered in the question below.

### What was the asset allocation?

### In which economic sectors were the investments made?

Due to lack of data availability, subsectors cannot not be shown.

\*this classification includes all holdings for which a NACE classification cannot be found or estimated; cash is herein included.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Even though the sustainable investments made do not qualify as environmental activities according to EU-Taxonomy, the below disclosure is made to show the alignment of sustainable investments with EU-Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below shown in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

### What was the share of investments made in transitional and enabling activities?

Information on transition activities and enabling activities is summarised in the table. If no information is available, then the table will also show no information.

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)
Orsted	Electricity, Gas, Steam and Air Conditioning Supply	56.27%	18.25%	31.86%	0.00%	1.08%
EDP-Energias de Portugal SA	Electricity, Gas, Steam and Air Conditioning Supply	77.52%	12.25%	0.00%	32.43%	0.34%
EDP Finance BV	Electricity, Gas, Steam and Air Conditioning Supply	77.52%	12.25%	0.00%	32.43%	0.22%
CTP N.V.	Real Estate Activities	100.00%	11.60%	0.00%	0.00%	0.23%
VERBUND AG Class A	Electricity, Gas, Steam and Air Conditioning Supply	50.94%	11.23%	36.58%	0.00%	0.18%
Electricite de France SA	Electricity, Gas, Steam and Air Conditioning Supply	71.56%	9.50%	0.00%	7.23%	0.08%
Iberdrola International BV	Electricity, Gas, Steam and Air Conditioning Supply	61.60%	9.13%	0.00%	15.60%	1.03%
Neste Corporation	Manufacturing	36.90%	7.25%	5.60%	22.41%	0.13%
Enel SpA	Electricity, Gas, Steam and Air Conditioning Supply	33.21%	5.35%	0.00%	8.48%	0.12%
ENGIE SA.	Electricity, Gas, Steam and Air Conditioning Supply	32.14%	3.75%	0.00%	8.00%	0.23%

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As no data was available in the previous reporting year, there is no need for a comparison with the previous year.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The chart shows the percentage revenue of companies included in the fund's portfolio that have been invested in a way that is not taxonomy compliant but in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

 **What was the share of socially sustainable investments?**

The chart shows the percentage revenue of companies included in the fund's portfolio that have been invested in a way that is not taxonomy compliant but in line with the social goals resulting from the SDGs as per Art. 2 (17) SFDR.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs). More information is available at: [Swisscanto | Proxy Voting Dashboard \(issgovernance.com\)](https://www.swisscanto.com/int/en/sustainability/investment-stewardship.html)

### How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**How does the reference benchmark differ from a broad market index?**

Not applicable.

**How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

**How did this financial product perform compared with the reference benchmark?**

Not applicable.

**How did this financial product perform compared with the broad market index?**

Not applicable.

The document was prepared by Swisscanto with due care and may contain information from carefully selected third-party sources. Investors should note that the data previously calculated and published for 2023 has been recalculated for this document published in 2024. Accordingly, there may be discrepancies in these historical data published in 2023 and 2024.

## Periodic disclosure as at 31.01.2024

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

### Product Name:

Swisscanto (LU) Bond Fund Responsible Global Convertible Hedged

### Legal entity identifier (LEI-Code):

549300BEZ1CJCP4C0A88

### Benchmark

Thomson Reuters Global Focus Convertible Index (TR) hedged in USD

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : _% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : _%	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <b>34.3%</b> of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul> <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The promoted environmental and social characteristics were achieved by following indicators:

1. Exclusion Criteria
2. ESG-Integration
3. Reduction of CO2e intensity
4. Sustainable Investments

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

For reasons of clarity, the information on the performance of the sustainability indicators (see details at the end of the report) is answered directly with the historical comparison in the next question.

### ...and compared to previous periods?

## Exclusion Criteria

Responsible							
Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Coal reserves (ex. metal production)	0.00%	1.57%	2	 Production of military hardware (>5% revenue)	0.00%	2.05%	2
Extraction of coal (>5% revenue)	0.00%	0.10%	0	 UN Global Compact violations	0.00%	0.71%	2
 Climate change		 Risk to society and health		Manufacture of weapons and ammunition	0.00%	0.19%	1
				Controversial weapons	0.00%	0.00%	0
				Exploitative child labour	0.00%	0.00%	0
				Production of pornography	0.00%	0.00%	0

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above. The historical comparisons are made in the table below. For reasons of clarity, the exclusion criteria are aggregated.

	Indicator	Date 2023	Date 2024
Portfolio	Exclusion Criteria Total*	0%	0%
Benchmark	Exclusion Criteria Total*	1.75%	4.53%

\*all exclusion criteria cumulated.

# ESG-integration

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Exposure to ESG Laggards	27.54%	19.94%
Benchmark	Exposure to ESG Laggards	31.91%	23.12%

# Reduction of CO<sub>2</sub>e intensity

In line with the < 2° Paris climate target ("<2°C max"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO<sub>2</sub>e emissions by at least 4% per year. The reduction path is calculated from the weighted CO<sub>2</sub>e intensity of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO<sub>2</sub>e intensities of the portfolio and of the benchmark respectively. CO<sub>2</sub>e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at "Achievement of climate target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	CO <sub>2</sub> e intensity Corporate	168	239
	Reduction Corporate	-1%	-17%
Benchmark	CO <sub>2</sub> e intensity Corporate	223	373
	Reduction Corporate	30%	30%

# Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental and social goals resulting from the UN Sustainable Development Goals (SDGs) as per Art. 2 (17) SFDR.

The fund did not seek to invest in environmentally sustainable activities within the meaning of the EU Taxonomy Regulation. The investment manager of the (sub)fund has developed a methodology for defining sustainable investments that fulfils the requirements of Art. 2 (17) SFDR. The methodology is described in detail in the pre-contractual information. In the below chart, the sustainable investments are split according to the UN SDGs.

The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Socially sustainable investments	18.49%	21.12%
	Sustainable Investments with environmental target	7.95%	13.19%
	<b>Total sustainable quota</b>	<b>26.44%</b>	<b>34.30%</b>
Benchmark	Socially sustainable investments	19.36%	20.88%
	Sustainable Investments with environmental target	8.11%	12.06%
	<b>Total sustainable quota</b>	<b>27.47%</b>	<b>32.94%</b>

■ Portfolio
 ■ Benchmark

With the different treatment of green, social and sustainable bonds, SDG exposure may differ from the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17 SDGs and did not have DNSH and/or Minimum Safeguards violations.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGP) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

### Principal Adverse Impacts - Corporate Assets

#### Primary Indicators - Energy and Emissions

Indicator	Factor	Portfolio Current	Coverage	Portfolio previous year	Benchmark current	Benchmark previous year	Explanation

Akamai Technologies, Inc. 0.375% 01-SEP-2027	Information and Communication	0.96%	USA

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments and information on asset allocation are answered in the question below.

### What was the asset allocation?

### In which economic sectors were the investments made?

Due to lack of data availability, subsectors cannot not be shown.

\*this classification includes all holdings for which a NACE classification cannot be found or estimated; cash is herein included.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Even though the sustainable investments made do not qualify as environmental activities according to EU-Taxonomy, the below disclosure is made to show the alignment of sustainable investments with EU-Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below shown in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\*For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Information on transition activities and enabling activities is summarised in the table. If no information is available, then the table will also show no information.

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)
SPIE SA	Professional, Scientific and Technical Activities	83.99%	11.50%	13.95%	0.00%	0.28%
Iberdrola Finanzas SA	Electricity, Gas, Steam and Air Conditioning Supply	61.60%	9.13%	0.00%	15.60%	0.17%
Veolia Environnement SA	Water Supply, Sewerage, Waste Management and Remediation Activities	68.52%	8.28%	30.01%	0.00%	0.24%
Pirelli & C. S.p.A.	Manufacturing	15.75%	6.25%	0.00%	0.00%	0.11%
Schneider Electric SE	Manufacturing	18.50%	5.00%	0.00%	0.00%	0.62%
Snam S.p.A.	Water Supply, Sewerage, Waste Management and Remediation Activities	5.25%	5.00%	0.00%	0.00%	0.15%
Groupe Bruxelles Lambert SA	Financial and Insurance Activities	3.73%	3.38%	0.00%	0.00%	0.33%
Deutsche Post AG	Transporting and Storage	55.94%	3.00%	8.51%	0.00%	0.62%
LEG Immobilien SE	Real Estate Activities	99.85%	2.95%	0.00%	0.00%	0.55%
Prismian S.p.A.	Manufacturing	10.30%	2.85%	0.00%	0.00%	0.60%

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As no data was available in the previous reporting year, there is no need for a comparison with the previous year.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

 **What was the share of socially sustainable investments?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the social goals resulting from the SDGs as per Art. 2 (17) SFDR.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs). More information is available at: [Swisscanto | Proxy Voting Dashboard \(issgovernance.com\)](https://www.swisscanto.com/int/en/sustainability/investment-stewardship.html)

[Swisscanto | Proxy Voting Dashboard \(issgovernance.com\)](https://www.swisscanto.com/int/en/sustainability/investment-stewardship.html)

<https://www.swisscanto.com/int/en/sustainability/investment-stewardship.html>

### How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**How does the reference benchmark differ from a broad market index?**

Not applicable.

**How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

**How did this financial product perform compared with the reference benchmark?**

Not applicable.

**How did this financial product perform compared with the broad market index?**

Not applicable.

The document was prepared by Swisscanto with due care and may contain information from carefully selected third-party sources. Investors should note that the data previously calculated and published for 2023 has been recalculated for this document published in 2024. Accordingly, there may be discrepancies in these historical data published in 2023 and 2024.

## Periodic disclosure as at 31.01.2024

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

### Product Name:

Swisscanto (LU) Bond Fund Responsible Global Corporate

### Legal entity identifier (LEI-Code):

5493000JNVEMQLQD6378

### Benchmark

ICE BofA Global Corporate Bond Index (TR) hedged in USD

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : _ % <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : _ %	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <b>49.44%</b> of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul> <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The promoted environmental and social characteristics were achieved by following indicators:

1. Exclusion Criteria
2. ESG-Integration
3. Reduction of CO2e intensity
4. Sustainable Investments

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

For reasons of clarity, the information on the performance of the sustainability indicators (see details at the end of the report) is answered directly with the historical comparison in the next question.

### ...and compared to previous periods?

## Exclusion Criteria

Responsible							
Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Coal reserves (ex. metal production)	0.00%	1.72%	26	 Production of military hardware (>5% revenue)	0.00%	1.20%	18
Extraction of coal (>5% revenue)	0.00%	0.15%	3	Exploitative child labour	0.00%	0.88%	6
 Climate change		 Risk to society and health		Manufacture of weapons and ammunition	0.00%	0.79%	8
				Controversial weapons	0.00%	0.58%	3
				UN Global Compact violations	0.00%	0.50%	5
				Production of pornography	0.00%	0.00%	0

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above. The historical comparisons are made in the table below. For reasons of clarity, the exclusion criteria are aggregated.

	Indicator	Date 2023	Date 2024
Portfolio	Exclusion Criteria Total*	0%	0%
Benchmark	Exclusion Criteria Total*	3.91%	4.51%

\*all exclusion criteria cumulated.

# ESG-integration

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Exposure to ESG Laggards	6.54%	2.35%
Benchmark	Exposure to ESG Laggards	14.45%	9.88%

# Reduction of CO<sub>2</sub>e intensity

In line with the < 2° Paris climate target ("<2°C max"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO<sub>2</sub>e emissions by at least 4% per year. The reduction path is calculated from the weighted CO<sub>2</sub>e intensity of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO<sub>2</sub>e intensities of the portfolio and of the benchmark respectively. CO<sub>2</sub>e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at " "Achievement of climate target" " put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	CO <sub>2</sub> e intensity Corporate	68	61
	Reduction Corporate	-72%	-73%
Benchmark	CO <sub>2</sub> e intensity Corporate	250	229
	Reduction Corporate	1%	1%

# Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental and social goals resulting from the UN Sustainable Development Goals (SDGs) as per Art. 2 (17) SFDR.

The fund did not seek to invest in environmentally sustainable activities within the meaning of the EU Taxonomy Regulation. The investment manager of the (sub)fund has developed a methodology for defining sustainable investments that fulfils the requirements of Art. 2 (17) SFDR. The methodology is described in detail in the pre-contractual information. In the below chart, the sustainable investments are split according to the UN SDGs.

The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Socially sustainable investments	29.05%	28.85%
	Sustainable Investments with environmental target	21.97%	20.59%
	<b>Total sustainable quota</b>	<b>51.02%</b>	<b>49.44%</b>
Benchmark	Socially sustainable investments	17.06%	18.07%
	Sustainable Investments with environmental target	6.86%	7.9%
	<b>Total sustainable quota</b>	<b>23.93%</b>	<b>25.97%</b>

■ Portfolio
 ■ Benchmark

With the different treatment of green, social and sustainable bonds, SDG exposure may differ from the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17 SDGs and did not have DNSH and/or Minimum Safeguards violations.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGP) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

### Principal Adverse Impacts - Corporate Assets

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments and information on asset allocation are answered in the question below.

### What was the asset allocation?

### In which economic sectors were the investments made?

Due to lack of data availability, subsectors cannot not be shown.

\*this classification includes all holdings for which a NACE classification cannot be found or estimated; cash is herein included.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Even though the sustainable investments made do not qualify as environmental activities according to EU-Taxonomy, the below disclosure is made to show the alignment of sustainable investments with EU-Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below shown in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\*For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Information on transition activities and enabling activities is summarised in the table. If no information is available, then the table will also show no information.

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)
Elia Group SA/NV	Construction	99.98%	24.95%	15.00%	0.00%	0.04%
Terna S.p.A.	Electricity, Gas, Steam and Air Conditioning Supply	87.76%	21.75%	13.10%	0.00%	0.06%
Redeia Corporacion SA	Construction	84.35%	19.80%	12.73%	0.00%	0.04%
Orsted	Electricity, Gas, Steam and Air Conditioning Supply	56.27%	18.25%	31.86%	0.00%	0.35%
National Grid plc	Electricity, Gas, Steam and Air Conditioning Supply	19.17%	16.75%	0.00%	0.36%	0.45%
National Grid Electricity Transmission Plc	Electricity, Gas, Steam and Air Conditioning Supply	19.17%	16.75%	0.00%	0.36%	0.17%

EDP-Energias de Portugal SA	Electricity, Gas, Steam and Air Conditioning Supply	77.52%	12.25%	0.00%	32.43%	0.64%
EDP Finance BV	Electricity, Gas, Steam and Air Conditioning Supply	77.52%	12.25%	0.00%	32.43%	0.39%
Electricite de France SA	Electricity, Gas, Steam and Air Conditioning Supply	71.56%	9.50%	0.00%	7.23%	0.10%

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As no data was available in the previous reporting year, there is no need for a comparison with the previous year.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

 **What was the share of socially sustainable investments?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the social goals resulting from the SDGs as per Art. 2 (17) SFDR.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs). ## How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### How does the reference benchmark differ from a broad market index?

Not applicable.

### How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

### How did this financial product perform compared with the reference benchmark?

Not applicable.

### How did this financial product perform compared with the broad market index?

Not applicable.

The document was prepared by Swisscanto with due care and may contain information from carefully selected third-party sources. Investors should note that the data previously calculated and published for 2023 has been recalculated for this document published in 2024. Accordingly, there may be discrepancies in these historical data published in 2023 and 2024.

## Periodic disclosure as at 31.01.2024

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

### Product Name:

Swisscanto (LU) Bond Fund Responsible Global Rates

### Legal entity identifier (LEI-Code):

5493007MXNV1316JL462

### Benchmark

Bloomberg Global Treasury Index (TR) in USD

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: _%</b> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective: _%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <b>12.7%</b> of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul> <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The promoted environmental and social characteristics were achieved by following indicators:

1. Exclusion Criteria
2. ESG-Integration
3. Reduction of CO2e intensity

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

For reasons of clarity, the information on the performance of the sustainability indicators (see details at the end of the report) is answered directly with the historical comparison in the next question.

### ...and compared to previous periods?

## Exclusion Criteria

Responsible							
Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Coal reserves (ex. metal production)	0.00%	0.00%	0	 Controversial weapons	0.00%	0.00%	0
Extraction of coal (>5% revenue)	0.00%	0.00%	0	Exploitative child labour	0.00%	0.00%	0
 Climate change		 Risk to society and health		Manufacture of weapons and ammunition	0.00%	0.00%	0
				Production of military hardware (>5% revenue)	0.00%	0.00%	0
				Production of pornography	0.00%	0.00%	0
				UN Global Compact violations	0.00%	0.00%	0

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above. The historical comparisons are made in the table below. For reasons of clarity, the exclusion criteria are aggregated.

	Indicator	Date 2023	Date 2024
Portfolio	Exclusion Criteria Total*	0%	0%
Benchmark	Exclusion Criteria Total*	0.31%	0%

\*all exclusion criteria cumulated.

# ESG-integration

The portfolio targeted an allocation to ESG Laggards <= 20% during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Exposure to ESG Laggards	6.45%	1.73%
Benchmark	Exposure to ESG Laggards	1.72%	0%

# Reduction of CO<sub>2</sub>e intensity

The portfolio targeted a lower CO<sub>2</sub>e intensity than the benchmark.  
The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	CO <sub>2</sub> e intensity Corporate	198	0
	CO <sub>2</sub> e intensity Sovereign	645	272
	Reduction Corporate	25%	0%
Benchmark	CO <sub>2</sub> e intensity Corporate	76	0
	CO <sub>2</sub> e intensity Sovereign	450	304
	Reduction Corporate	24%	0%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

This financial product did not have an objective to make sustainable investments within the reporting year. A comparison to previous years is therefore not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

This financial product did not have an objective to make sustainable investments within the reporting year. A comparison to previous years is therefore not applicable.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

This financial product did not have an objective to make sustainable investments within the reporting year. A comparison to previous years is therefore not applicable.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

This financial product did not have an objective to make sustainable investments within the reporting year. A comparison to previous years is therefore not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

### Principal Adverse Impacts - Corporate Assets

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments and information on asset allocation are answered in the question below.

### What was the asset allocation?

### In which economic sectors were the investments made?

Due to lack of data availability, subsectors cannot not be shown.

\*this classification includes all holdings for which a NACE classification cannot be found or estimated; cash is herein included.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Even though the sustainable investments made do not qualify as environmental activities according to EU-Taxonomy, the below disclosure is made to show the alignment of sustainable investments with EU-Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below shown in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\*For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

Information on transition activities and enabling activities is summarised in the table. If no information is available, then the table will also show no information.

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)
-------------	-------------	---------------------------------	-----------------------	------------------------------	-----------------------------------	----------------------------

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

As no data was available in the previous reporting year, there is no need for a comparison with the previous year.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental goals resulting from the UN Sustainable Development Goals (SDGs) as per Art. 2 (17) SFDR.

 **What was the share of socially sustainable investments?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the social goals resulting from the SDGs as per Art. 2 (17) SFDR.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs). More information is available at: [Swisscanto | Proxy Voting Dashboard \(issgovernance.com\)](https://www.swisscanto.com/int/en/sustainability/investment-stewardship.html)

## How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### How does the reference benchmark differ from a broad market index?

Not applicable.

### How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

### How did this financial product perform compared with the reference benchmark?

Not applicable.

### How did this financial product perform compared with the broad market index?

Not applicable.

The document was prepared by Swisscanto with due care and may contain information from carefully selected third-party sources. Investors should note that the data previously calculated and published for 2023 has been recalculated for this document published in 2024. Accordingly, there may be discrepancies in these historical data published in 2023 and 2024.

## Periodic disclosure as at 31.01.2024

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

### Product Name:

Swisscanto (LU) Bond Fund Responsible Secured High Yield

### Legal entity identifier (LEI-Code):

549300OW4OTO4HNXLS12

### Benchmark

ICE BofA 50% Secured HY EUR & ICE BofA 50% Secured HY USD (TR) hedged in USD

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: _%</b> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective: _%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <b>30.74%</b> of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul> <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The promoted environmental and social characteristics were achieved by following indicators:

1. Exclusion Criteria
2. ESG-Integration
3. Reduction of CO2e intensity
4. Sustainable Investments

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

For reasons of clarity, the information on the performance of the sustainability indicators (see details at the end of the report) is answered directly with the historical comparison in the next question.

### ...and compared to previous periods?

## Exclusion Criteria

Responsible							
Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Coal reserves (ex. metal production)	0.00%	0.08%	1	 Production of pornography	0.00%	1.27%	2
Extraction of coal (>5% revenue)	0.00%	0.00%	0	Controversial weapons	0.00%	0.00%	0
 Climate change		 Risk to society and health		Exploitative child labour	0.00%	0.00%	0
				Manufacture of weapons and ammunition	0.00%	0.00%	0
				Production of military hardware (>5% revenue)	0.00%	0.00%	0
				UN Global Compact violations	0.00%	0.00%	0

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above. The historical comparisons are made in the table below. For reasons of clarity, the exclusion criteria are aggregated.

	Indicator	Date 2023	Date 2024
Portfolio	Exclusion Criteria Total*	0%	0%
Benchmark	Exclusion Criteria Total*	1.02%	1.35%

\*all exclusion criteria cumulated.

# ESG-integration

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Exposure to ESG Laggards	9.9%	5.46%
Benchmark	Exposure to ESG Laggards	12.2%	9.63%

# Reduction of CO<sub>2</sub>e intensity

## Corporate

In line with the < 2° Paris climate target ("<2°C max"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO<sub>2</sub>e emissions by at least 4% per year. The reduction path is calculated from the weighted CO<sub>2</sub>e intensity of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO<sub>2</sub>e intensities of the portfolio and of the benchmark respectively. CO<sub>2</sub>e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at "Achievement of climate target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	CO <sub>2</sub> e intensity Corporate	111	94
	Reduction Corporate	-4%	-12%
Benchmark	CO <sub>2</sub> e intensity Corporate	179	170
	Reduction Corporate	57%	59%

# Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental and social goals resulting from the UN Sustainable Development Goals (SDGs) as per Art. 2 (17) SFDR.

The fund did not seek to invest in environmentally sustainable activities within the meaning of the EU Taxonomy Regulation. The investment manager of the (sub)fund has developed a methodology for defining sustainable investments that fulfils the requirements of Art. 2 (17) SFDR. The methodology is described in detail in the pre-contractual information. In the below chart, the sustainable investments are split according to the UNSDGs.

The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Socially sustainable investments	17.89%	22.01%
	Sustainable Investments with environmental target	7.33%	8.73%
	<b>Total sustainable quota</b>	<b>25.21%</b>	<b>30.74%</b>
Benchmark	Socially sustainable investments	14.17%	17.77%
	Sustainable Investments with environmental target	2.81%	2.99%
	<b>Total sustainable quota</b>	<b>16.98%</b>	<b>20.76%</b>

■ Portfolio
 ■ Benchmark

With the different treatment of green, social and sustainable bonds, SDG exposure may differ from the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17 SDGs and did not have DNSH and/or Minimum Safeguards violations.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGP) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

### Principal Adverse Impacts - Corporate Assets

#### Primary Indicators - Energy and Emissions

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments and information on asset allocation are answered in the question below.

### What was the asset allocation?

### In which economic sectors were the investments made?

Due to lack of data availability, subsectors cannot not be shown.

\*this classification includes all holdings for which a NACE classification cannot be found or estimated; cash is herein included.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Even though the sustainable investments made do not qualify as environmental activities according to EU-Taxonomy, the below disclosure is made to show the alignment of sustainable investments with EU-Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below shown in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\*For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Information on transition activities and enabling activities is summarised in the table. If no information is available, then the table will also show no information.

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)
Getlink SE	Transporting and Storage	99.00%	23.25%	14.85%	0.00%	0.39%
Webuild SpA	Construction	20.18%	10.40%	0.00%	0.00%	0.66%
Webuild S.p.A.	Construction	20.18%	10.40%	0.00%	0.00%	0.23%
Gatwick Airport Finance Plc	Financial and Insurance Activities	33.15%	5.00%	4.53%	0.00%	0.85%
Mundys Spa	Transporting and Storage	95.42%	1.58%	0.00%	0.00%	0.18%
Forvia SE	Manufacturing	20.57%	0.93%	3.93%	11.79%	0.24%
Neptune Energy Bondco Plc	Administrative and Support Service Activities	3.03%	0.15%	0.00%	0.07%	0.54%
Telecom Italia S.p.A.	Information and Communication	1.10%	0.00%	0.00%	0.00%	0.41%
Constellium SE Class A	Transporting and Storage	75.89%	0.00%	13.43%	21.78%	0.26%
Grupo Antolin-Irausa SA	Manufacturing	30.09%	0.00%	5.77%	0.00%	0.66%

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As no data was available in the previous reporting year, there is no need for a comparison with the previous year.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

**What was the share of socially sustainable investments?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the social goals resulting from the SDGs as per Art. 2 (17) SFDR.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs). ### Benchmark

Bloomberg Barclays Global Aggregate Index (TR) in CHF

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system, establishing a list of **environmentally sustainable economic activities**. For the time being, it does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainable investment objective

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <b>X</b> Yes	<input type="radio"/> <input type="radio"/> <b>No</b>
<p><b>X</b> It made <b>sustainable investments with an environmental objective: 24.2%</b></p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><b>X</b> It made <b>sustainable investments with a social objective: 28.16%</b></p>	<p><input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of _ % of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy</p> <p><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy</p> <p><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments.</p>

## To what extent was the sustainable investment objective of this financial product met?

The subfund was repositioned in September 2023. The advertised environmental and social characteristics are valid as of the repositioning date. The primary sustainable investment objective of this financial product is the reduction of CO2e emissions (quota of minimum 80%) within the meaning of Article 9(3) of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector (hereinafter SFDR). The share of sustainable investments in accordance with Article 9(3) was in the reporting period 87.03%:

Additionally, following sustainability indicators were used to assess the attainment of the sustainable investment objectives:

1. Reduction of CO2e intensity
2. Exclusion criteria
3. Sustainable investments in accordance with Article 9(2) SFDR

### How did the sustainability indicators perform?

For reasons of clarity, the information on the performance of the sustainability indicators (see details at the end of the report) is answered directly with the historical comparison in the next question.

### ...and compared to previous periods?

## Exclusion Criteria

Sustainable				Exclusion Criteria			
Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Genetic engineering: Release of GMOs	0.00%	0.23%	9	 Nuclear energy	0.00%	1.19%	65
Non-sustainable forestry	0.00%	0.05%	12	Production of military hardware	0.00%	0.52%	40
Uncertified Palm Oil (<50% RSPO)	0.00%	0.04%	10	Production of alcohol (>5% revenue)	0.00%	0.24%	16
Unsustainable fisheries and aquaculture	0.00%	0.00%	2	Manufacture of tobacco and smokers' accessories	0.00%	0.22%	14
 Extraction of fossil fuels	0.00%	2.64%	107	Exploitative child labour	0.00%	0.18%	6
Operation of fossil-fuel power stations	0.00%	1.34%	110	Manufacture of weapons and ammunition	0.00%	0.15%	9
Manufacture of automobiles and aircraft	0.00%	0.78%	28	Controversial weapons	0.00%	0.11%	3
Coal reserves	0.00%	0.51%	50	UN Global Compact violations	0.00%	0.11%	6

 Climate change							
 Risk to society and health							

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above. The historical comparisons are made in the table below. For reasons of clarity, the exclusion criteria are aggregated.

	Indicator	Date 2023	Date 2024
Portfolio	Exclusion Criteria Total*	0%	0%
Benchmark	Exclusion Criteria Total*	4.5%	4.35%

\*all exclusion criteria cumulated.

# Reduction of CO<sub>2</sub>e intensity

In line with the 1.5° Paris climate target, the fund's investment activity during the reporting period aimed to reduce the portfolio's CO<sub>2</sub>e emissions by at least 7.5% per year. The reduction path is calculated from the weighted CO<sub>2</sub>e intensity of the benchmark, discounted at 7.5% per year plus nominal economic growth. The dashed 1.5° max line indicates the maximum value. The bars represent the CO<sub>2</sub>e intensities of the portfolio and of the benchmark respectively. CO<sub>2</sub>e intensities below the 1.5° Max line indicate that the portfolio or benchmark meets the 1.5° climate target. Values at "Achievement of climate target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Achievement of climate target	-9%	-36%
	CO <sub>2</sub> e intensity Corporate	84	35
	CO <sub>2</sub> e intensity Sovereign	340	222
	Reduction Corporate	-39%	-67%
	Reduction Sovereign	30%	10%
Benchmark	Achievement of climate target	26%	51%
	CO <sub>2</sub> e intensity Corporate	136	122
	CO <sub>2</sub> e intensity Sovereign	364	344
	Reduction Corporate	-1%	15%
	Reduction Sovereign	40%	71%

# Sustainable Investments Article 9(2) SFDR

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental and social goals resulting from the UN Sustainable Development Goals (SDGs) as per Art. 2 (17) SFDR.

The fund did not seek to invest in environmentally sustainable activities within the meaning of the EU Taxonomy Regulation. The investment manager of the (sub)fund has developed a methodology for defining sustainable investments that fulfils the requirements of Art. 2 (17) SFDR. The methodology is described in detail in the pre-contractual information. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Socially sustainable investments	25.43%	28.16%
	Sustainable Investments with environmental target	15.77%	24.20%
	<b>Total sustainable quota</b>	<b>41.19%</b>	<b>52.36%</b>
Benchmark	Socially sustainable investments	6.34%	6.41%
	Sustainable Investments with environmental target	2.41%	3.65%
	<b>Total sustainable quota</b>	<b>8.75%</b>	<b>10.06%</b>

■ Portfolio
 ■ Benchmark

With the different treatment of green, social and sustainable bonds, SDG exposure may differ from the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGP) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

## How did this financial product consider principal adverse impacts on sustainability factors?

### Principal Adverse Impacts - Corporate Assets

#### Primary Indicators - Energy and Emissions

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments in accordance with Article 9(2) SFDR and information on asset allocation are answered in the question below.

### What was the asset allocation?

### In which economic sectors were the investments made?

Due to lack of data availability, subsectors cannot not be shown.

\*this classification includes all holdings for which a NACE classification cannot be found or estimated; cash is herein included.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Even though the sustainable investments made do not qualify as environmental activities according to EU-Taxonomy, the below disclosure is made to show the alignment of sustainable investments with EU-Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below shown in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\*For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.

## What was the share of investments made in transitional and enabling activities?

Information on transition activities and enabling activities is summarised in the table. If no information is available, then the table will also show no information.

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)
Orsted	Electricity, Gas, Steam and Air Conditioning Supply	61.85%	36.50%	21.24%	0.00%	0.38%
VERBUND AG Class A	Electricity, Gas, Steam and Air Conditioning Supply	51.30%	22.45%	24.39%	0.00%	0.14%
Iberdrola International BV	Water Supply, Sewerage, Waste Management and Remediation Activities	59.83%	18.25%	0.00%	10.40%	0.22%

Merck KGaA	Manufacturing	0.02%	0.02%	0.00%	0.00%	0.40%
Merck Financial Services GmbH	Financial and Insurance Activities	0.02%	0.02%	0.00%	0.00%	0.39%
United Utilities Water Finance Plc	Water Supply, Sewerage, Waste Management and Remediation Activities	100.00%	0.00%	99.60%	0.04%	0.16%
Waste Connections, Inc.	Transporting and Storage	87.82%	0.00%	38.21%	43.00%	0.48%
SNCF Réseau	Transporting and Storage	100.00%	0.00%	19.49%	0.00%	1.92%
Vicinity Centres Re Ltd.	Real Estate Activities	95.08%	0.00%	19.02%	76.06%	0.36%

## How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

As no data was available in the previous reporting year, there is no need for a comparison with the previous year.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR. In addition the Portfolio Manager also achieved sustainable investments with this financial product by targeting the portfolio to reduce CO2e emissions (ratio of 87.03%) in sense of Article 9(3) SFDR.

**What was the share of socially sustainable investments?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the social goals resulting from the SDGs as per Art. 2 (17) SFDR.

**What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?**

These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

## What actions have been taken to meet the sustainable investment objective during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs). ## How did this financial product perform compared to the reference sustainable benchmark?

No benchmark was determined as a reference value for achieving the sustainable investment targets.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- How did the reference benchmark differ from a broad market index?**  
Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**  
Not applicable.
- How did this financial product perform compared with the reference benchmark?**  
Not applicable.
- How did this financial product perform compared with the broad market index?**  
Not applicable.

The document was prepared by Swisscanto with due care and may contain information from carefully selected third-party sources. Investors should note that the data previously calculated and published for 2023 has been recalculated for this document published in 2024. Accordingly, there may be discrepancies in these historical data published in 2023 and 2024.

## Periodic disclosure as at 31.01.2024

for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

### Product Name:

Swisscanto (LU) Bond Fund Sustainable Global Credit

### Legal entity identifier (LEI-Code):

5493000B02IZLS3ZZF50

### Benchmark

ICE BofA Global Corporate Bond Index (TR) hedged in CHF

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system, establishing a list of **environmentally sustainable economic activities**. For the time being, it does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainable investment objective

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <input type="radio"/> <b>X</b> Yes	<input type="radio"/> <input checked="" type="radio"/> <input type="radio"/> <b>No</b>
<p><b>X</b> It made <b>sustainable investments with an environmental objective: 36.79%</b></p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><b>X</b> It made <b>sustainable investments with a social objective: 25.82%</b></p>	<p><input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of _ % of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy</p> <p><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy</p> <p><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments.</p>

## To what extent was the sustainable investment objective of this financial product met?

The primary sustainable investment objective of this financial product is the reduction of CO2e emissions (quota of minimum 80%) within the meaning of Article 9(3) of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector (hereinafter: SFDR). The share of sustainable investments in accordance with Article 9(3) was in the reporting period 96.73%:

Additionally, following sustainability indicators were used to assess the attainment of the sustainable investment objectives:

1. Reduction of CO2e intensity
2. Exclusion criteria
3. Sustainable investments in accordance with Article 9(2) SFDR

### How did the sustainability indicators perform?

For reasons of clarity, the information on the performance of the sustainability indicators (see details at the end of the report) is answered directly with the historical comparison in the next question.

### ...and compared to previous periods?

## Exclusion Criteria

Sustainable				Exclusion Criteria			
Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark

 Climate change							
 Risk to society and health							

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above. The historical comparisons are made in the table below. For reasons of clarity, the exclusion criteria are aggregated.

	Indicator	Date 2023	Date 2024
Portfolio	Exclusion Criteria Total*	0%	0%
Benchmark	Exclusion Criteria Total*	21.63%	21.5%

\*all exclusion criteria cumulated.

# Reduction of CO<sub>2</sub>e intensity

In line with the 1.5° Paris climate target, the fund's investment activity during the reporting period aimed to reduce the portfolio's CO<sub>2</sub>e emissions by at least 7.5% per year. The reduction path is calculated from the weighted CO<sub>2</sub>e intensity of the benchmark, discounted at 7.5% per year plus nominal economic growth. The dashed 1.5° max line indicates the maximum value. The bars represent the CO<sub>2</sub>e intensities of the portfolio and of the benchmark respectively. CO<sub>2</sub>e intensities below the 1.5° Max line indicate that the portfolio or benchmark meets the 1.5° climate target. Values at " "Achievement of climate target " " put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	CO <sub>2</sub> e intensity Corporate	64	58
	Reduction Corporate	-72%	-71%
Benchmark	CO <sub>2</sub> e intensity Corporate	251	230
	Reduction Corporate	8%	16%

## Sustainable Investments Article 9(2) SFDR

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental and social goals resulting from the UN Sustainable Development Goals (SDGs) as per Art. 2 (17) SFDR.

The fund did not seek to invest in environmentally sustainable activities within the meaning of the EU Taxonomy Regulation. The investment manager of the (sub)fund has developed a methodology for defining sustainable investments that fulfils the requirements of Art. 2 (17) SFDR. The methodology is described in detail in the pre-contractual information. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Socially sustainable investments	24.27%	25.82%
	Sustainable Investments with environmental target	38.1%	36.79%
	Total sustainable quota	62.37%	62.61%
Benchmark	Socially sustainable investments	17.14%	18.07%
	Sustainable Investments with environmental target	6.9%	7.89%
	Total sustainable quota	24.04%	25.96%

■ Portfolio
 ■ Benchmark

With the different treatment of green, social and sustainable bonds, SDG exposure may differ from the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGP) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

## How did this financial product consider principal adverse impacts on sustainability factors?

### Principal Adverse Impacts - Corporate Assets

#### Primary Indicators - Energy and Emissions

Indicator	Factor	Portfolio Current	Coverage	Portfolio previous year	Benchmark current	Benchmark previous year	Explanation

AT&T Inc 2.25% 01-FEB-2032	Information and Communication	0.69%	USA

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments in accordance with Article 9(2) SFDR and information on asset allocation are answered in the question below.

### What was the asset allocation?

### In which economic sectors were the investments made?

Due to lack of data availability, subsectors cannot not be shown.

\*this classification includes all holdings for which a NACE classification cannot be found or estimated; cash is herein included.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Even though the sustainable investments made do not qualify as environmental activities according to EU-Taxonomy, the below disclosure is made to show the alignment of sustainable investments with EU-Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below shown in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\*For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Information on transition activities and enabling activities is summarised in the table. If no information is available, then the table will also show no information.

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)
Terna S.p.A.	Electricity, Gas, Steam and Air Conditioning Supply	87.76%	21.75%	13.10%	0.00%	0.50%
Redeia Corporacion SA	Construction	84.35%	19.80%	12.73%	0.00%	0.55%
Orsted	Electricity, Gas, Steam and Air Conditioning Supply	56.27%	18.25%	31.86%	0.00%	0.47%
National Grid Electricity Distribution (South West) Plc	Financial and Insurance Activities	19.17%	16.75%	0.00%	0.36%	0.08%
Acciona Energia Financiacion Filiales SA	Professional, Scientific and Technical Activities	82.21%	13.62%	0.00%	0.00%	0.09%
EDP-Energias de Portugal SA	Electricity, Gas, Steam and Air Conditioning Supply	77.52%	12.25%	0.00%	32.43%	0.89%
CTP N.V.	Real Estate Activities	100.00%	11.60%	0.00%	0.00%	0.24%
Iberdrola International BV	Electricity, Gas, Steam and Air Conditioning Supply	61.60%	9.13%	0.00%	15.60%	0.61%
Iberdrola Finanzas SA	Electricity, Gas, Steam and Air Conditioning Supply	61.60%	9.13%	0.00%	15.60%	0.12%
Vigie SA	Water Supply, Sewerage, Waste Management and Remediation Activities	68.52%	8.28%	30.01%	0.00%	0.36%

### How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

As no data was available in the previous reporting year, there is no need for a comparison with the previous year.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR. In addition the Portfolio Manager also achieved sustainable investments with this financial product by targeting the portfolio to reduce CO2e emissions (ratio of 96.73%) in sense of Article 9(3) SFDR.

**What was the share of socially sustainable investments?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the social goals resulting from the SDGs as per Art. 2 (17) SFDR.

**What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?**

These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

## What actions have been taken to meet the sustainable investment objective during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs). ## How did this financial product perform compared to the reference sustainable benchmark?

No benchmark was determined as a reference value for achieving the sustainable investment targets.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- How did the reference benchmark differ from a broad market index?**  
Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**  
Not applicable.
- How did this financial product perform compared with the reference benchmark?**  
Not applicable.
- How did this financial product perform compared with the broad market index?**  
Not applicable.

The document was prepared by Swisscanto with due care and may contain information from carefully selected third-party sources. Investors should note that the data previously calculated and published for 2023 has been recalculated for this document published in 2024. Accordingly, there may be discrepancies in these historical data published in 2023 and 2024.

## Periodic disclosure as at 31.01.2024

for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

### Product Name:

Swisscanto (LU) Bond Fund Sustainable Global High Yield

### Legal entity identifier (LEI-Code):

549300QT8R0DJRSOJL97

### Benchmark

ICE BofA Global High Yield Index (TR) hedged in USD

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system, establishing a list of **environmentally sustainable economic activities**. For the time being, it does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Sustainable investment objective

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <input type="radio"/> <b>X</b> Yes	<input type="radio"/> <input checked="" type="radio"/> <input type="radio"/> <b>No</b>
<p><b>X</b> It made <b>sustainable investments with an environmental objective: 29.62%</b></p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p>	<p><input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of _ % of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy</p> <p><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy</p> <p><input type="checkbox"/> with a social objective</p>
<p><b>X</b> It made <b>sustainable investments with a social objective: 31.21%</b></p>	<p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments.</p>

## To what extent was the sustainable investment objective of this financial product met?

The primary sustainable investment objective of this financial product is the reduction of CO2e emissions (quota of minimum 80%) within the meaning of Article 9(3) of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector (hereinafter: SFDR). The share of sustainable investments in accordance with Article 9(3) was in the reporting period 96.07%:

Additionally, following sustainability indicators were used to assess the attainment of the sustainable investment objectives:

1. Reduction of CO2e intensity
2. Exclusion criteria
3. Sustainable investments in accordance with Article 9(2) SFDR

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### How did the sustainability indicators perform?

For reasons of clarity, the information on the performance of the sustainability indicators (see details at the end of the report) is answered directly with the historical comparison in the next question.

### ...and compared to previous periods?

## Exclusion Criteria

Sustainable				Exclusion Criteria			
Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Genetic engineering: Release of GMOs	0.00%	0.48%	7	 Gambling (>5% revenue)	0.00%	2.70%	34
Uncertified Palm Oil (<50% RSPO)	0.00%	0.20%	2	UN Global Compact violations	0.00%	2.14%	5
Non-sustainable forestry	0.00%	0.12%	5	Nuclear energy	0.00%	1.61%	15
Unsustainable fisheries and aquaculture	0.00%	0.02%	1	Production of military hardware	0.00%	1.06%	20
 Extraction of fossil fuels	0.00%	15.90%	79	Intensive livestock farming	0.00%	0.69%	11
Manufacture of automobiles and aircraft	0.00%	2.51%	10	Production of pornography	0.00%	0.57%	3
Operation of fossil-fuel power stations	0.00%	2.34%	32	Manufacture of tobacco and smokers' accessories	0.00%	0.35%	6
Coal reserves	0.00%	1.42%	22	Manufacture of weapons and ammunition	0.00%	0.21%	5
Airlines	0.00%	1.41%	16	Exploitative child labour	0.00%	0.08%	1
Cruise ship operators	0.00%	1.16%	5	Production of alcohol (>5% revenue)	0.00%	0.04%	2
Extraction of coal (>5% revenue)	0.00%	0.15%	7	Controversial weapons	0.00%	0.00%	0
 Decline in biodiversity				 Genetic engineering: human medicine	0.00%	0.00%	0
 Climate change							
 Risk to society and health							

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above. The historical comparisons are made in the table below. For reasons of clarity, the exclusion criteria are aggregated.

	Indicator	Date 2023	Date 2024
Portfolio	Exclusion Criteria Total*	0%	0%
Benchmark	Exclusion Criteria Total*	20.99%	20.86%

\*all exclusion criteria cumulated.

# Reduction of CO<sub>2</sub>e intensity

In line with the 1.5° Paris climate target, the fund's investment activity during the reporting period aimed to reduce the portfolio's CO<sub>2</sub>e emissions by at least 7.5% per year. The reduction path is calculated from the weighted CO<sub>2</sub>e intensity of the benchmark, discounted at 7.5% per year plus nominal economic growth. The dashed 1.5° max line indicates the maximum value. The bars represent the CO<sub>2</sub>e intensities of the portfolio and of the benchmark respectively. CO<sub>2</sub>e intensities below the 1.5° Max line indicate that the portfolio or benchmark meets the 1.5° climate target. Values at " "Achievement of climate target" " put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	CO <sub>2</sub> e intensity Corporate	116	107
	Reduction Corporate	-41%	-45%
Benchmark	CO <sub>2</sub> e intensity Corporate	288	262
	Reduction Corporate	44%	35%

## Sustainable Investments according to Article 9 (2)

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental and social goals resulting from the UN Sustainable Development Goals (SDGs) as per Art. 2 (17) SFDR.

The fund did not seek to invest in environmentally sustainable activities within the meaning of the EU Taxonomy Regulation. The investment manager of the (sub)fund has developed a methodology for defining sustainable investments that fulfils the requirements of Art. 2 (17) SFDR. The methodology is described in detail in the pre-contractual information. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Socially sustainable investments	24.22%	31.21%
	Sustainable Investments with environmental target	20.1%	29.62%
	Total sustainable quota	44.33%	60.83%
Benchmark	Socially sustainable investments	13.09%	14.02%
	Sustainable Investments with environmental target	3.85%	5.05%
	Total sustainable quota	16.94%	19.07%

■ Portfolio
 ■ Benchmark

With the different treatment of green, social and sustainable bonds, SDG exposure may differ from the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGP) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

## How did this financial product consider principal adverse impacts on sustainability factors?

### Principal Adverse Impacts - Corporate Assets

#### Primary Indicators - Energy and Emissions

Indicator	Factor	Portfolio Current	Coverage	Portfolio previous year	Benchmark current	Benchmark previous year	Explanation
1. GHG emissions	1a. GHG Emissions - Scope 1 per Mio EUR Enterprise Value	4066.6	78.42%	3792.6	6359.91	8150.59	
	1b. GHG Emissions - Scope 2 per Mio EUR Enterprise Value	1123.25	78.42%	1076.13	912.27	1193.37

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments in accordance with Article 9(2) SFDR and information on asset allocation are answered in the question below.

### What was the asset allocation?

### In which economic sectors were the investments made?

Due to lack of data availability, subsectors cannot not be shown.

\*this classification includes all holdings for which a NACE classification cannot be found or estimated; cash is herein included.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Even though the sustainable investments made do not qualify as environmental activities according to EU-Taxonomy, the below disclosure is made to show the alignment of sustainable investments with EU-Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below shown in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\*For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Information on transition activities and enabling activities is summarised in the table. If no information is available, then the table will also show no information.

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)
Elia Group SA/NV	Construction	99.98%	24.95%	15.00%	0.00%	0.71%
Orsted	Electricity, Gas, Steam and Air Conditioning Supply	56.27%	18.25%	31.86%	0.00%	0.35%
EDP-Energias de Portugal SA	Electricity, Gas, Steam and Air Conditioning Supply	77.52%	12.25%	0.00%	32.43%	0.88%
Webuild SpA	Construction	20.18%	10.40%	0.00%	0.00%	0.40%
Webuild S.p.A.	Construction	20.18%	10.40%	0.00%	0.00%	0.19%
Castellum Helsinki Finance Holding Abp	Financial and Insurance Activities	100.00%	8.14%	15.00%	7.50%	0.19%
Castellum AB	Real Estate Activities	100.00%	8.14%	15.00%	7.50%	0.06%
Gatwick Airport Finance Plc	Financial and Insurance Activities	33.15%	5.00%	4.53%	0.00%	0.37%
Forvia SE	Manufacturing	20.57%	0.93%	3.93%	11.79%	0.53%
Atos SE	Information and Communication	76.13%	0.63%	15.00%	0.00%	0.10%

### How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

As no data was available in the previous reporting year, there is no need for a comparison with the previous year.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR. In addition the Portfolio Manager also achieved sustainable investments with this financial product by targeting the portfolio to reduce CO2e emissions (ratio of 96.07%) in sense of Article 9(3) SFDR.

 **What was the share of socially sustainable investments?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the social goals resulting from the SDGs as per Art. 2 (17) SFDR.

 **What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?**

These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

## What actions have been taken to meet the sustainable investment objective during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs). ## How did this financial product perform compared to the reference sustainable benchmark?

No benchmark was determined as a reference value for achieving the sustainable investment targets.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- How did the reference benchmark differ from a broad market index?**  
Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**  
Not applicable.
- How did this financial product perform compared with the reference benchmark?**  
Not applicable.
- How did this financial product perform compared with the broad market index?**  
Not applicable.

The document was prepared by Swisscanto with due care and may contain information from carefully selected third-party sources. Investors should note that the data previously calculated and published for 2023 has been recalculated for this document published in 2024. Accordingly, there may be discrepancies in these historical data published in 2023 and 2024.

## Periodic disclosure as at 31.01.2024

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

### Product Name:

Swisscanto (LU) Bond Fund Vision Responsible AUD

### Legal entity identifier (LEI-Code):

549300G7JSDUD5I1ZE39

### Benchmark

Bloomberg Barclays Australian Aggregate 300MN Bond Index in AUD

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: _%</b> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective: _%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <b>17.57%</b> of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul> <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The promoted environmental and social characteristics were achieved by following indicators:

1. Exclusion Criteria
2. ESG-Integration
3. Reduction of CO2e intensity
4. Sustainable Investments

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

For reasons of clarity, the information on the performance of the sustainability indicators (see details at the end of the report) is answered directly with the historical comparison in the next question.

### ...and compared to previous periods?

## Exclusion Criteria

Responsible							
Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Coal reserves (ex. metal production)	0.00%	0.00%	0	 UN Global Compact violations	0.00%	0.02%	1
Extraction of coal (>5% revenue)	0.00%	0.00%	0	Controversial weapons	0.00%	0.00%	0
 Climate change		 Risk to society and health		Exploitative child labour	0.00%	0.00%	0
				Manufacture of weapons and ammunition	0.00%	0.00%	0
				Production of military hardware (>5% revenue)	0.00%	0.00%	0
				Production of pornography	0.00%	0.00%	0

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above. The historical comparisons are made in the table below. For reasons of clarity, the exclusion criteria are aggregated.

	Indicator	Date 2023	Date 2024
Portfolio	Exclusion Criteria Total*	0%	0%
Benchmark	Exclusion Criteria Total*	0.03%	0.02%

\*all exclusion criteria cumulated.

# ESG-integration

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Exposure to ESG Laggards	2.33%	0.06%
Benchmark	Exposure to ESG Laggards	0.33%	0.37%

# Reduction of CO<sub>2</sub>e intensity

In line with the < 2° Paris climate target ("<2°C max"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO<sub>2</sub>e emissions by at least 4% per year. The reduction path is calculated from the weighted CO<sub>2</sub>e intensity of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO<sub>2</sub>e intensities of the portfolio and of the benchmark respectively. CO<sub>2</sub>e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at "Achievement of climate target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Achievement of climate target	-40%	-27%
	CO <sub>2</sub> e intensity Corporate	51	40
	CO <sub>2</sub> e intensity Sovereign	356	342
	Reduction Corporate	-70%	-74%
	Reduction Sovereign	-7%	-3%
Benchmark	Achievement of climate target	7%	1%
	CO <sub>2</sub> e intensity Corporate	203	155
	CO <sub>2</sub> e intensity Sovereign	408	357
	Reduction Corporate	18%	-2%
	Reduction Sovereign	6%	1%

# Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental and social goals resulting from the UN Sustainable Development Goals (SDGs) as per Art. 2 (17) SFDR.

The fund did not seek to invest in environmentally sustainable activities within the meaning of the EU Taxonomy Regulation. The investment manager of the (sub)fund has developed a methodology for defining sustainable investments that fulfils the requirements of Art. 2 (17) SFDR. The methodology is described in detail in the pre-contractual information. In the below chart, the sustainable investments are split according to the UN SDGs.

The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Socially sustainable investments	8.53%	7.62%
	Sustainable Investments with environmental target	7.9%	9.96%
	<b>Total sustainable quota</b>	<b>16.43%</b>	<b>17.57%</b>
Benchmark	Socially sustainable investments	5.31%	4.99%
	Sustainable Investments with environmental target	3.38%	3.77%
	<b>Total sustainable quota</b>	<b>8.69%</b>	<b>8.77%</b>

■ Portfolio
 ■ Benchmark

With the different treatment of green, social and sustainable bonds, SDG exposure may differ from the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17 SDGs and did not have DNSH and/or Minimum Safeguards violations.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGP) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

### Principal Adverse Impacts - Corporate Assets

#### Primary Indicators - Energy and Emissions

Indicator	Factor	Portfolio Current	Coverage	Portfolio previous year	Benchmark current	Benchmark previous year	Explanation
1. GHG emissions	1a. GHG Emissions - Scope 1 per Mio EUR Enterprise Value	251.39	22.65%	600.68	178.74	177.63	
	1b. GHG Emissions - Scope 2 per Mio EUR Enterprise Value	148.38	22.65%	182.58	47.83	45.6

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments and information on asset allocation are answered in the question below.

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

### In which economic sectors were the investments made?

Due to lack of data availability, subsectors cannot not be shown.

\*this classification includes all holdings for which a NACE classification cannot be found or estimated; cash is herein included.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Even though the sustainable investments made do not qualify as environmental activities according to EU-Taxonomy, the below disclosure is made to show the alignment of sustainable investments with EU-Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below shown in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\*For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

Information on transition activities and enabling activities is summarised in the table. If no information is available, then the table will also show no information.

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)
Orsted	Electricity, Gas, Steam and Air Conditioning Supply	56.27%	18.25%	31.86%	0.00%	0.00%
EDP-Energias de Portugal SA	Electricity, Gas, Steam and Air Conditioning Supply	77.52%	12.25%	0.00%	32.43%	0.00%
Electricite de France SA	Electricity, Gas, Steam and Air Conditioning Supply	71.56%	9.50%	0.00%	7.23%	0.00%
Iberdrola International BV	Electricity, Gas, Steam and Air Conditioning Supply	61.60%	9.13%	0.00%	15.60%	0.00%
Enel SpA	Electricity, Gas, Steam and Air Conditioning Supply	33.21%	5.35%	0.00%	8.48%	0.00%
Aroundtown SA	Real Estate Activities	99.33%	4.18%	0.00%	0.00%	0.27%
Forvia SE	Manufacturing	20.57%	0.93%	3.93%	11.79%	0.00%
Atos SE	Information and Communication	76.13%	0.63%	15.00%	0.00%	0.01%
Telefonica Europe BV	Financial and Insurance Activities	2.30%	0.33%	0.00%	0.00%	0.00%
Merck KGaA	Manufacturing	0.01%	0.01%	0.00%	0.00%	0.01%

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As no data was available in the previous reporting year, there is no need for a comparison with the previous year.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

 **What was the share of socially sustainable investments?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the social goals resulting from the SDGs as per Art. 2 (17) SFDR.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs). ## How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### How does the reference benchmark differ from a broad market index?

Not applicable.

### How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

### How did this financial product perform compared with the reference benchmark?

Not applicable.

### How did this financial product perform compared with the broad market index?

Not applicable.

The document was prepared by Swisscanto with due care and may contain information from carefully selected third-party sources. Investors should note that the data previously calculated and published for 2023 has been recalculated for this document published in 2024. Accordingly, there may be discrepancies in these historical data published in 2023 and 2024.

## Periodic disclosure as at 31.01.2024

for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

### Product Name:

Swisscanto (LU) Bond Fund Vision Responsible CAD

### Legal entity identifier (LEI-Code):

5493002H8R636PLBUX16

### Benchmark

Bloomberg Barclays Canadian Aggregate 300MN Bond Index in CAD

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: _%</b> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective: _%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <b>14.6%</b> of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul> <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The promoted environmental and social characteristics were achieved by following indicators:

1. Exclusion Criteria
2. ESG-Integration
3. Reduction of CO2e intensity
4. Sustainable Investments

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

For reasons of clarity, the information on the performance of the sustainability indicators (see details at the end of the report) is answered directly with the historical comparison in the next question.

### ...and compared to previous periods?

## Exclusion Criteria

Responsible							
Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of companies in benchmark
 Coal reserves (ex. metal production)	0.00%	0.23%	2	 UN Global Compact violations	0.00%	0.06%	1
Extraction of coal (>5% revenue)	0.00%	0.00%	0	Controversial weapons	0.00%	0.00%	0
 Climate change		 Risk to society and health		Exploitative child labour	0.00%	0.00%	0
				Manufacture of weapons and ammunition	0.00%	0.00%	0
				Production of military hardware (>5% revenue)	0.00%	0.00%	0
				Production of pornography	0.00%	0.00%	0

For the purpose of mitigating sustainability risks and with the aim of not investing in securities with controversial business models, the above exclusion criteria have been applied. The table shows the number of companies that have violated the exclusion criteria and the respective portfolio and benchmark exposure. If there are multiple violations for a company, these are listed separately for each criterion. Therefore, the sum of all positions in this report is generally higher than the effective weight of the positions in criteria above. The historical comparisons are made in the table below. For reasons of clarity, the exclusion criteria are aggregated.

	Indicator	Date 2023	Date 2024
Portfolio	Exclusion Criteria Total*	0%	0%
Benchmark	Exclusion Criteria Total*	0.24%	0.29%

\*all exclusion criteria cumulated.

# ESG-integration

The portfolio aimed for a lower exposure to ESG laggards compared to the benchmark during the reporting period. ESG laggards are companies with the weakest environmental, social and governance performance of the relevant investment universe.

The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Exposure to ESG Laggards	1.17%	0.66%
Benchmark	Exposure to ESG Laggards	1.26%	1.77%

# Reduction of CO<sub>2</sub>e intensity

In line with the < 2° Paris climate target ("<2°C max"), the fund's investment activity during the reporting period aimed to reduce the portfolio's CO<sub>2</sub>e emissions by at least 4% per year. The reduction path is calculated from the weighted CO<sub>2</sub>e intensity of the benchmark, discounted at 4% per year plus nominal economic growth. The dashed 2° max line indicates the maximum value. The bars represent the CO<sub>2</sub>e intensities of the portfolio and of the benchmark respectively. CO<sub>2</sub>e intensities below the 2° Max line indicate that the portfolio or benchmark meets the <2° climate target. Values at "Achievement of climate target" put the portfolio and benchmark in relation to the climate target. Negative values mean that the target has been achieved. The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Achievement of climate target	-25%	-28%
	CO <sub>2</sub> e intensity Corporate	118	87
	CO <sub>2</sub> e intensity Sovereign	396	363
	Reduction Corporate	-74%	-80%
	Reduction Sovereign	9%	9%
Benchmark	Achievement of climate target	4%	-1%
	CO <sub>2</sub> e intensity Corporate	285	207
	CO <sub>2</sub> e intensity Sovereign	429	385
	Reduction Corporate	-39%	-51%
	Reduction Sovereign	18%	15%

# Sustainable Investments

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental and social goals resulting from the UN Sustainable Development Goals (SDGs) as per Art. 2 (17) SFDR.

The fund did not seek to invest in environmentally sustainable activities within the meaning of the EU Taxonomy Regulation. The investment manager of the (sub)fund has developed a methodology for defining sustainable investments that fulfils the requirements of Art. 2 (17) SFDR. The methodology is described in detail in the pre-contractual information. In the below chart, the sustainable investments are split according to the UN SDGs.

The historical comparisons are made in the table below.

	Indicator	Date 2023	Date 2024
Portfolio	Socially sustainable investments	9.31%	8.52%
	Sustainable Investments with environmental target	6.44%	6.08%
	<b>Total sustainable quota</b>	<b>15.74%</b>	<b>14.6%</b>
Benchmark	Socially sustainable investments	11.68%	7.94%
	Sustainable Investments with environmental target	2.46%	7.99%
	<b>Total sustainable quota</b>	<b>14.14%</b>	<b>15.94%</b>

■ Portfolio ■ Benchmark

With the different treatment of green, social and sustainable bonds, SDG exposure may differ from the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

**What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reporting period, the asset manager focused on securities of companies that generated revenues from the sale of products and services with a positive contribution to the 17 SDGs and did not have DNSH and/or Minimum Safeguards violations.

**How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Issuers with a negative net contribution to the SDGs were removed from the investment universe of the financial product during the reporting period. In addition, the subfund took into account adverse impacts on sustainability factors (Principal Adverse Impacts - PAI). For this purpose, the mandatory indicators Annex 1 of Delegated Regulation (EU) 2022/1288 supplementing Regulation (EU) 2019/2088 were used. Companies that the asset manager classified as particularly harmful according to the PAIs were accordingly not included in the sustainable investments. Issuers violating PAIs 7 (biodiversity), 10 (United Nations Global Compact (UNGC)/OECD Guidelines for Multinational Enterprises) or 14 (engagement in controversial arms) received a PAI score of zero. A PAI score was calculated from the remaining PAI indicators. Instruments from issuers with a score < 10 were not counted toward sustainable investments.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Principal Adverse Impacts (PAI) have been systematically considered in the investment process.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

In the investment analysis for sustainable investments, the following norm violations were taken into account in the reporting period: United Nations Global Compact (UNGC), the UN Guiding Principles on Business and Human Rights (UNGP) and the International Labor Organization (ILO) Convention. Any serious violation of these standards resulted in the exclusion of the issuer from the investable universe of the financial product.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

### Principal Adverse Impacts - Corporate Assets

#### Primary Indicators - Energy and Emissions

Indicator	Factor	Portfolio Current	Coverage	Portfolio previous year	Benchmark current	Benchmark previous year	Explanation

Indicator	Metric
1a	Scope 1 GHG emissions
1b	Scope 2 GHG emissions
1c	Scope 3 GHG emissions
2.	Carbon footprint per Mio EUR
3.	GHG intensity of investee companies
4.	Share of investments in companies active in the fossil fuel sector
5a	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources
5b	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources
5c	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources
6.	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector impact climate sector
7.	Share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
8.	Tonnes of emissions to water generated by investee companies per million EUR invested, expressed as a weighted average
9.	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
10.	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
11.	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance /complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
12.	Average unadjusted gender pay gap of investee companies
13.	Average ratio of female to male board members in investee companies, expressed as a percentage of all board members
14.	Share of investments in investee companies involved in the manufacture or selling of controversial weapons
15.	GHG intensity of investee countries
16a	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law
16b	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law

The document was prepared by Swisscanto with due care and may contain information from carefully selected third-party sources. Investors should note that the data previously calculated and published for 2023 has been recalculated for this document published in 2024. Accordingly, there may be discrepancies in these historical data published in 2023 and 2024.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01.02.2023 - 31.01.2024

Largest investments	Sector	% Assets	Country
Government of Canada 4.0% 01-JUN-2041	Financial and Insurance Activities	1.88%	
Government of Canada 5.75% 01-JUN-2033	Financial and Insurance Activities	1.84%	
Swisscanto (LU) Bond Fund Responsible Emerging Markets Opportunities NT USD Klasse		1.64%	
Government of Canada 3.5% 01-DEC-2045	Financial and Insurance Activities	1.55%	
Swisscanto (LU) Bond Fund Sustainable Global High Yield NT USD Klasse		1.49%	
Swisscanto (LU) Bond Fund Responsible COCO NT USD Klasse		1.44%	
Canada Housing Trust No. 1 3.1% 15-JUN-2028 144A	Financial and Insurance Activities	1.26%	
Government of Canada 3.5% 01-MAR-2028	Financial and Insurance Activities	1.26%	
Barclays PLC 2.166% 23-JUN-2027 REGS	Financial and Insurance Activities	1.17%	United Kingdom
Morgan Stanley 1.779% 04-AUG-2027	Financial and Insurance Activities	1.17%	USA
USD Cash		1.15%	
Bank of Nova Scotia/The 1.4% 01-NOV-2027	Financial and Insurance Activities	1.13%	Canada
Royal Bank of Canada 2.352% 02-JUL-2024	Financial and Insurance Activities	1.08%	Canada
Bank of America Corp 3.515% 24-MAR-2026	Financial and Insurance Activities	1.07%	USA
Government of Canada 2.75% 01-DEC-2048	Financial and Insurance Activities	1.07%	

## What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments and information on asset allocation are answered in the question below.

### What was the asset allocation?

### In which economic sectors were the investments made?

Due to lack of data availability, subsectors cannot not be shown.

\*this classification includes all holdings for which a NACE classification cannot be found or estimated; cash is herein included.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Even though the sustainable investments made do not qualify as environmental activities according to EU-Taxonomy, the below disclosure is made to show the alignment of sustainable investments with EU-Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below shown in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

## What was the share of investments made in transitional and enabling activities?

Information on transition activities and enabling activities is summarised in the table. If no information is available, then the table will also show no information.

Issuer Name	Nace Sector	Total Eligible Activity Revenue	Total Aligned Revenue	Total Likely Aligned Revenue	Total Potentially Aligned Revenue	Portfolio Weight (Consol.)
Orsted	Electricity, Gas, Steam and Air Conditioning Supply	56.27%	18.25%	31.86%	0.00%	0.00%
EDP-Energias de Portugal SA	Electricity, Gas, Steam and Air Conditioning Supply	77.52%	12.25%	0.00%	32.43%	0.00%
SPIE SA	Professional, Scientific and Technical Activities	83.99%	11.50%	13.95%	0.00%	0.01%
Electricite de France SA	Electricity, Gas, Steam and Air Conditioning Supply	71.56%	9.50%	0.00%	7.23%	0.00%
Iberdrola Finanzas SA	Electricity, Gas, Steam and Air Conditioning Supply	61.60%	9.13%	0.00%	15.60%	0.00%
Iberdrola International BV	Electricity, Gas, Steam and Air Conditioning Supply	61.60%	9.13%	0.00%	15.60%	0.00%
Veolia Environnement SA	Water Supply, Sewerage, Waste Management and Remediation Activities	68.52%	8.28%	30.01%	0.00%	0.01%
Pirelli & C. S.p.A.	Manufacturing	15.75%	6.25%	0.00%	0.00%	0.00%
Enel SpA	Electricity, Gas, Steam and Air Conditioning Supply	33.21%	5.35%	0.00%	8.48%	0.00%
Schneider Electric SE	Manufacturing	18.50%	5.00%	0.00%	0.00%	0.02%

## How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As no data was available in the previous reporting year, there is no need for a comparison with the previous year.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the environmental goals resulting from the SDGs as per Art. 2 (17) SFDR.

 **What was the share of socially sustainable investments?**

The chart shows the percentage revenue of companies included in the fund's portfolio and those of the benchmark that have been invested in a way that is not taxonomy compliant but in line with the social goals resulting from the SDGs as per Art. 2 (17) SFDR.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

These assets have comprised of investments provided for in the specific investment policy, including derivatives for hedging purposes and cash & cash equivalents. The investments, excluding derivatives and liquid funds, have implemented the principles of minimum environmental or social protection.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the asset manager promoted sustainable business practices and compliance with recognized international principles and ESG best practice standards through investment stewardship and capital allocation. Accordingly, it engaged in dialogue with the management teams of invested companies. In addition, the asset manager engaged with the United Nations Collaboration Platform for Responsible Investment (UN PRI) and investor initiatives. Voting behavior was based on Swiss and international corporate governance rules as well as on the principles of the UN Global Compact and the 17 Sustainable Development Goals (UN SDGs). ## How did this financial product perform compared to the reference benchmark?

No index has been determined as a reference value to determine whether this financial product is aligned with the advertised environmental and/or social characteristics.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### How does the reference benchmark differ from a broad market index?

Not applicable.

### How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

### How did this financial product perform compared with the reference benchmark?

Not applicable.

### How did this financial product perform compared with the broad market index?

Not applicable.
