[1] The Fund pledged fixed income securities to Morgan Stanley with a total nominal holding of 39,487,000 and a market value of $39,200,794 as collateral in respect of open financial derivative instruments held by the Fund as of December 31, 2023.

[2] The Fund pledged fixed income securities to Morgan Stanley with a total nominal holding of 1,473,000 and a market value of $1,429,924 as collateral in respect of open financial derivative instruments held by the Fund as of December 31, 2023.

[3] Reverse repurchase agreement with State Street Corporation dated 29/12/2023 at 4.750% to be repurchased at $87,642,000 on 02/01/2024 collateralised by 29,310,000 U.S. Treasury Notes 1.625%, 30/09/2026 with a market value of $27,611,273, 6,220,400 U.S. Treasury Notes 0.250%, 31/10/2025 with a market value of $5,778,745, 7,267,300 U.S. Treasury Notes 0.375%, 30/11/2025 with a market value of $6,748,542, 26,275,000 U.S. Treasury Notes 0.375%, 31/01/2026 with a market value of $24,305,803 and 25,000,000 U.S. Treasury Notes 0.125%, 15/01/2024 with a market value of $24,950,507.

[4] OTC financial derivative instruments.

[5] Exchange traded financial derivative instruments.

[6] Alpha Swap agreement where the Fund has exposure to the capital gains and income of the underlying basket of securities in the special purpose vehicle (SPV) owned and funded by Morgan Stanley in return for a fixed annual fee of 0.2% and managed by Wellington Management Company. The Alpha Swap is collateralized with margin payments made to and from the SPV. As of December 31, 2023, the number of shares of the SPV were 478,857, the notional value of the securities held at the SPV was $54,578,699, the NAV of SPV was $54,097,912 and the net loss was $480,787.

[7] All cash holdings are held with State Street Bank and Trust Company with the exception of cash collateral for open financial derivative instruments which is held with Bank of America Merrill Lynch, Barclays Bank, BNP Paribas, Citibank, Deutsche Bank, Goldman Sachs, Mizuho Securities USA, Inc., Morgan Stanley and Wells Fargo & Company and for open future contracts which is held with Morgan Stanley.

[8] The Fund received fixed income securities from Bank of America Merrill Lynch with a total nominal holding of 328,000 and a market value of $267,219 and 1,971,000 and a market value of $1,697,469 as collateral in respect of open financial derivative instruments held by the Fund as of December 31, 2023. This collateral does not form part of the assets of the Fund.

[*] The holding/nominal value of the transferable securities with a holding/nominal value of less than 500 have been rounded to zero ("0").

Investment objective and policies

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the ICE Bank of America Sterling Broad Market Index (the "Index") and achieve the objective, investing primarily in Sterling denominated fixed income debt securities. The Fund combines a core of Sterling fixed income assets combined with a range of global fixed income and currency strategies, including global interest rates, investment grade corporate bonds, global high yield bonds or sovereign bonds. As the Fund has a Sterling benchmark, the Investment Manager aims to generate returns by using the widest fixed income opportunity set in conjunction with a majority of Sterling assets.

The assessment of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process as, in the Investment Manager's view, Sustainability Risks can materially affect an issuer's financial performance and competitiveness.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which they will be considered will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of the securities over the time horizon of the Fund. Whilst Sustainability Risks vary from issuer to issuer those that are particularly relevant to the Fund include:

a) The willingness of sovereigns to make their bond payments. The Investment Manager uses a number of factors to assess the ability and willingness of governments to pay their debts, including contingent liabilities of the state, total debt to exports or revenue to debt, amongst others. The issue of willingness to pay also necessitates the inclusion of politics into risk assessments, as it can be a major factor in determining how bond markets will behave.
b) Changes in climate are posing an increasing risk to some sovereign issuers. Where considered to be material, climate change factors are incorporated into the assessment of sovereign risk and security selection, using a framework which considers two key types of climate risk: physical risk and transition risk.

Through interactions with issuer management teams, the Investment Manager seeks a better understanding of these and other Sustainability Risks, incorporating them into their assessments and looking to avoid investments in securities where the likelihood of a Sustainability Risk event is under-represented in the price of the security. The Investment Manager believes that active engagement with issuers can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between issuers within regional and sector peer groups.

It is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided at the Appendix - Sustainable Finance Disclosure Regulation (SFDR) of these financial statements.

The Index may be considered during portfolio construction and is used for performance comparison purposes.

The Fund will invest, either directly or indirectly through the use of FDIs and in a broad range of debt securities. The Fund may hold equity securities where they are a result of a corporate action, conversion or exercising a warrant. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

The Fund is denominated in GBP.

Investment objective and policies (continued)

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Sterling Core Bond Plus Fund launched on January 27, 2010. The table below details the performance of all funded share classes within the Fund.

	Total returns (%) Periods ended December 31, 2023					
Share class[1]	*6 mths*	*1 year*	*3 years*	*5 years*	*Since inception*[*]	*Inception date*
GBP S	7.64%	3.21%	(8.27%)	(2.22%)	N/A	January 27, 2010
ICE Bank of America Sterling Broad Market Index	8.38%	5.08%	(8.31%)	(2.05%)	N/A	

[1]All classes are accumulating and unhedged unless otherwise noted.
Fund returns are net of fees and expenses.
Returns for periods greater than one year are annualised.
Benchmark returns are expressed in the currency of the share class unless it is a hedged benchmark.
Past performance is no indication of current or future performance.
[*] The since inception total return is not disclosed for classes aged 10 years and more.

Investment objective and policies

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the ICE Bank of America US High Yield Constrained Index (the "Index"), primarily through investment in debt securities of US corporations which are considered by the Investment Manager to be below investment grade. The Fund's investment approach is based on analysis of the credit profile of individual high yield issuers, as well as the analysis of the behaviour and performance of the broader economic environment.

The assessment of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process as, in the Investment Manager's view, Sustainability Risks can materially affect an issuer's financial performance and competitiveness.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which they will be considered by the Investment Manager will vary depending on the security in question, but typically include ownership structure, board structure & and membership, capital allocation track record, management incentives, labour relations history, and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of the assets over the time horizon of the Fund. Whilst Sustainability Risks vary from issuer to issuer those that are particularly relevant to the Fund include:

a) Generally lower public information and disclosure for high yield corporate bonds (in comparison to investment grade corporate bonds) such that a greater level of engagement is required to identify risks.
b) In the high yield corporate bond market, higher levels of founder ownership are prevalent, which enhances governance related risks such as concentration of control and reduced diversity.
c) Changes in climate are posing an increasing risk to some high yield corporate issuers. Where considered to be material, climate change factors are incorporated into the assessment of credit risk and security selection, using a framework which considers two key types of climate risk: physical risk and transition risk.

Through interactions with issuer management teams, the Investment Manager seeks a better understanding of these and other Sustainability Risks, incorporating them into its assessments, and looking to avoid investments in securities where the likelihood of a Sustainability Risk event is under-represented in the price of the security.

The Investment Manager believes that active engagement with issuers can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between issuers within regional and sector peer groups.

It is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided at the Appendix - Sustainable Finance Disclosure Regulation (SFDR) of these financial statements.

The Index may be considered during portfolio construction and is used for performance comparison and WACI purposes.

The Fund will invest, either directly or indirectly through the use of FDIs and in a broad range of debt securities. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to debt securities. The Fund may hold equity securities where they are a result of a corporate action, conversion or exercising a warrant. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Investment objective and policies (continued)

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington US$ Core High Yield Bond Fund launched on July 20, 2009. The table below details the performance of all funded share classes within the Fund.

	Total returns (%) Periods ended December 31, 2023					
Share class[1]	*6 mths*	*1 year*	*3 years*	*5 years*	*Since inception*[*]	*Inception date*

Investment objective and policies

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to achieve the objective primarily through investment in global sovereign government and government-related debt combined with opportunistic exposure to other fixed income assets including corporate, securitised, developed and emerging market debt and currencies.

The Fund is expected to have high average credit quality.

The assessment of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process as, in the Investment Manager's view, Sustainability Risks can materially affect an issuer's financial performance and competitiveness.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which they will be considered will vary depending on the security in question, but typically include ownership structure, board structure & and membership, capital allocation track record, management incentives, labour relations history, and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of the securities over the time horizon of the Fund. Whilst Sustainability Risks vary from issuer to issuer those that are particularly relevant to the Fund include:

a) The willingness of sovereigns to make their bond payments. The Investment Manager uses a number of factors to assess the ability and willingness of governments to pay their debts, including contingent liabilities of the state, total debt to exports or revenue to debt, amongst others. The issue of willingness to pay also necessitates the inclusion of politics into risk assessments, as it can be a major factor in determining how bond markets will behave.
b) Changes in climate are posing an increasing risk to some sovereign issuers. Where considered to be material, climate change factors are incorporated into the assessment of sovereign risk and security selection, using a framework which considers two key types of climate risk: physical risk and transition risk.

Through interactions with issuer management teams, the Investment Manager seeks a better understanding of these and other Sustainability Risks, incorporating them into their assessments, and looking to avoid investments in securities where the likelihood of a Sustainability Risk event is under-represented in the price of the security. The Investment Manager believes that active engagement with issuers can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between issuer within regional and sector peer groups.

It is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided at the Appendix - Sustainable Finance Disclosure Regulation (SFDR) of these financial statements.

The Fund does not consider a benchmark during portfolio construction or for performance comparison purposes.

The Fund will invest, either directly or indirectly through the use of FDIs and in a broad range of debt securities. The Fund may also buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to debt securities. The Fund may hold equity securities where they are a result of a corporate action, conversion or exercising a warrant. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Investment objective and policies (continued)

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington World Bond Fund launched on March 31, 2014. The table below details the performance of all funded share classes within the Fund.

	Total returns (%) Periods ended December 31, 2023

Investment objective and policies

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the MSCI China All Shares Index (the "Index") and achieve the objective, primarily through investment in companies that are located, and/or conduct substantial business activities in China.

The Investment Manager will look to the location of a company's assets, revenues and earnings in determining whether a company conducts substantial business activities in China and the location of a company's stock exchange listing will have no bearing in this evaluation. The Fund may be concentrated in a relatively small number of securities and industry sectors and will be more concentrated in terms of country exposures and, as a result, may be more volatile than more broadly diversified funds. The Fund is unconstrained by market capitalization and turnover is expected to be low.

The evaluation of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors, and the extent to which they will be considered, will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks. Further information on the ESG factors that the Investment Manager will consider can be found in the Prospectus.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external research (such as company meetings) to assess any potential impact on the value of a security over the time horizon of the Fund. Whilst Sustainability Risks vary from company to company the following are particularly relevant to the Fund:

a) Governance: When the Investment Manager seeks emerging high quality companies, there is often higher insider ownership in comparison to more well-established counterparts. Founder's or family control over the company is often seen by the market as potentially higher risk from a reputational and regulatory perspective. For the companies the Investment Manager invests in, the founder's or family's strategic guidance of the business can be key to the investment thesis, however poor corporate governance in relation to founder-led companies may reduce the success of the company and may impact the value of the investment. At all times the Investment Manager seeks to invest in companies with strong governance standards and demonstrated track records of fair treatment of stakeholders.
b) Emerging Markets: The nature of the Investment Manager's focus can also result in exposure to emerging markets, including China, where corporate ownership, governance structure and policies may differ from developed markets. The Investment Manager seeks to understand the standard and best practices across individual emerging market countries but recognizes that there might be less transparency around information and disclosures in some of these markets. The Investment Manager seeks to critically evaluate and understand these risks through its fundamental research and company engagement.
c) Small Cap: Given the Investment Manager focuses on identifying companies whose social or environmental impact is material to the business, the Fund tends to have a higher level of exposure to smaller cap companies. These companies may present governance considerations that require greater scrutiny and engagement with company management teams relative to large capitalization companies.

It is not anticipated that any single Sustainability Risk will materially drive a negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided at the Appendix - Sustainable Finance Disclosure Regulation (SFDR) of these financial statements.

The Index serves as a reference benchmark for performance comparison purposes.

Investment objective and policies (continued)

The Fund will invest in China A Shares traded via Stock Connect. In addition, the Fund will invest, directly or indirectly through the use of FDIs, in other equities and securities with equity characteristics. These may include, but are not limited to, common stocks (such as Hong Kong listed ''H shares'' and other international listings), depository receipts (such as ADRs, GDRs and European Depository Receipts), market access products (including warrants on equities, options on equities and equity swaps), preferred stock, dividend-right certificates, shares of closed-ended real estate investment trusts, exchange-traded funds and other collective investment schemes.

The Fund may invest in collective investment schemes as described in the Prospectus and in exchange traded funds ("ETFs") that provide exposure to the types of securities listed above and which constitute an eligible investment for the Fund. Such ETFs will be listed and/or traded on the markets and/or exchanges as set out in the Prospectus and regulated as UCITS or as AIF ETFs. No more than 5% of the Net Asset Value of the Fund will be invested in non-listed and non-traded collective investment schemes.

The Fund may buy and sell exchange-traded and over-the-counter FDIs, comprising the market access products mentioned above, as well as index futures and currency forwards, to gain exposure to the instruments listed above in pursuit of the investment objective and for efficient portfolio management purposes, including hedging against risk. Full details of the types of FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington All-China Focus Equity Fund launched on January 8, 2020. The table below details the performance of all funded share classes within the Fund.

Investment objective and policies

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to achieve the objective primarily by investing globally in companies that the Investment Manager considers to be durable companies. Durable companies are those that the Investment Manager considers to exhibit stability and anticipates will generate positive returns over time. Stability is defined by the Investment Manager as a profit base that is not likely to decline significantly from current levels and the possibility of future value creation largely through management's ability to allocate capital effectively. The merits of stability are widely appreciated by the market and so are often reflected in the valuation of well-known stable businesses. In order to identify these businesses at more attractive valuations, the Investment Manager looks for stability in less conventional places such as a) mid and small capitalisation companies, industry sectors considered from time to time by the Investment Manager to be more volatile and geographies that are typically less favoured by the investment industry and b) in companies that do not grow fast enough for growth investors, lack the blue chip financial characteristics sought by quality investors and are not cheap enough for value investors.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which they will be considered by the Investment Manager will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In evaluating risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of the assets over the time horizon of the Fund. Sustainability Risks are considered material where they could impact a company's management's ability to consistently create value over the long-term. Similarly, poor labour relations may adversely impact a company's reputation or ability to retain key staff. The Investment Manager implements a rating system as described above, inclusive of ESG considerations, for each holding in the Fund, that helps inform investment decisions, ensuring they are factored directly into assessments of the investment opportunities. The links between ESG factors and stability over the long-term make these a particular catalyst for active company engagement, which the Investment Manager believes can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks.

Through interactions with company management teams, the Investment Manager seeks a better understanding of any underlying Sustainability Risks, incorporating them into its assessments of a company's outlook, and looking to avoid investments in assets where the likelihood of a Sustainability Risk event is under-represented in the price of the security. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between companies within regional and sector peer groups.

As the Fund is broadly diversified, it is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on Sustainability Risks considered and their potential impacts are included under Sustainability Risks within the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided at the Appendix - Sustainable Finance Disclosure Regulation (SFDR) of these financial statements.

The MSCI All Country World Index (the "Index") serves as a reference benchmark for market context and WACI comparison purposes only.

The Fund will invest, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. The Fund may buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to equity securities. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund may invest in developed countries and any country which is considered by the Investment Manager to be an emerging market. These are primarily located in Latin/Central America and the Caribbean, Central and Eastern Europe, Middle East, Africa and Asia. The Fund may make limited investment in securities traded on Russian markets and may invest up to 10% of its net asset value in China A Shares traded via Stock Connect.

Investment objective and policies (continued)

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Durable Companies Fund launched on November 19, 2014. The table below details the performance of all funded share classes within the Fund.

	Total returns (%) Periods ended December 31, 2023					
Share class[1]	*6 mths*	*1 year*	*3 years*	*5 years*	*Since inception*	*Inception date*

Investment objective and policies

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to achieve the objective primarily by investing globally in companies that the Investment Manager considers to be durable companies and that have a minimum market capitalisation of USD 2 billion at initial purchase. Durable companies are those that the Investment Manager considers to exhibit stability and anticipates will generate positive returns over time. Stability is defined by the Investment Manager as a profit base that is not likely to decline significantly from current levels combined with the possibility of future value creation largely through management's ability to allocate capital effectively. The merits of stability are widely appreciated by the market and so are often reflected in the valuation of well-known stable businesses. In order to identify these businesses at more attractive valuations, the Investment Manager looks for stability in less conventional places such as a) mid and small capitalisation companies, industry sectors considered from time to time by the Investment Manager to be more volatile and geographies that are typically less favoured by the investment industry and b) in companies that do not grow fast enough for growth investors, lack the blue chip financial characteristics sought by quality investors and are not cheap enough for value investors.

Given the Investment Manager's long-term view on holding periods (typically 4-5 years) and emphasis on stability, the assessment of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered by the Investment Manager will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In evaluating risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of the assets over the time horizon of the Fund. Sustainability Risks are considered material where they could impact a company's management's ability to consistently create value over the long-term. Similarly, poor labour relations may adversely impact a company's reputation or ability to retain key staff. The Investment Manager implements a rating system as described above, inclusive of ESG considerations, for each holding in the Fund, that helps inform investment decisions, ensuring they are factored directly into assessments of the investment opportunities. The links between ESG factors and stability over the long-term make these a particular catalyst for active company engagement, which the Investment Manager believes can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks.

Through interactions with company management teams, the Investment Manager seeks a better understanding of any underlying Sustainability Risks, incorporating them into its assessments of a company's outlook, and looking to avoid investments in assets where the likelihood of a Sustainability Risk event is under-represented in the price of the security. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between companies within regional and sector peer groups.

As the Fund is broadly diversified, it is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided at the Appendix - Sustainable Finance Disclosure Regulation (SFDR) of these financial statements.

The MSCI All Country World Index (the "Index") serves as a reference benchmark for market context and WACI comparison purposes only.

The Fund will invest, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. The Fund may buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to equity securities. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

Investment objective and policies (continued)

The Fund may invest in developed countries and any country which is considered by the Investment Manager to be an emerging market. These are primarily located in Latin/Central America and the Caribbean, Central and Eastern Europe, Middle East, Africa and Asia. The Fund may make limited investment in securities traded on Russian markets and may invest up to 10% of its net asset value in China A Shares traded via Stock Connect.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Investment objective and policies

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the MSCI Emerging Markets Index (the "Index"), primarily through investing in companies domiciled or listed in emerging markets, and to a lesser extent, in developed and frontier (as defined by MSCI) market countries and to achieve the objective by investing in companies which are positioned to benefit from themes relating to the structural and economic development of emerging markets.

Investments in developed markets will be focused on companies which conduct substantial business in emerging markets as determined by the Investment Manager, including (i) companies that have substantial assets in emerging markets; (ii) companies the Investment Manager believes will experience significant growth from business activities conducted in emerging markets; and (iii) companies that derive a substantial portion of their total revenues from either goods and services produced in, or sales made in, emerging markets.

The assessment of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered by the Investment Manager will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of a security over the time horizon of the Fund.

Through interactions with company management teams, the Investment Manager seeks a better understanding of any underlying Sustainability Risks, incorporating them into its assessments of a company's outlook, and looking to avoid investments in securities where the likelihood of a Sustainability Risk event is under-represented in the price of the security. The Investment Manager believes that active engagement with companies can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between companies within regional and sector peer groups.

As the Fund is broadly diversified, it is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided at the Appendix - Sustainable Finance Disclosure Regulation (SFDR) of these financial statements.

The Index serves as a reference benchmark for performance comparison purposes.

The Fund will invest, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. The Fund may buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to equity securities. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in USD.

Investment objective and policies (continued)

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Investment objective and policies

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the MSCI Emerging Markets Index (the "Index") and achieve the objective, primarily through investment in equity securities of companies that are either located in emerging markets or conduct substantial business in emerging markets. The Investment Manager uses bottom-up fundamental research on companies, industries, and countries to seek to identify emerging markets stocks with the strongest returns, adjusted for risk and liquidity.

The Investment Manager will invest in companies domiciled or listed in emerging markets, and to a lesser extent, in developed and frontier market countries. Investments in developed markets will be focused on companies which conduct substantial business in emerging markets as determined by the Investment Manager, including (i) companies that have substantial assets in emerging markets; (ii) companies the Investment Manager believes will experience significant growth from business activities conducted in emerging markets; and (iii) companies that derive a substantial portion of their total revenues from either goods and services produced in, or sales made in, emerging markets.

The evaluation of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors, and the extent to which they will be considered, will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks. Further information on the ESG factors that the Investment Manager will consider can be found in the Prospectus.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external research (such as company meetings) to assess any potential impact on the value of a security over the time horizon of the Fund. Whilst Sustainability Risks vary from company to company the following are particularly relevant to the Fund:

a) Governance: When the Investment Manager seeks emerging high quality companies, there is often higher insider ownership in comparison to more well-established counterparts. Founder's or family control over the company is often seen by the market as potentially higher risk from a reputational and regulatory perspective. For the companies the Investment Manager invests in, the founder's or family's strategic guidance of the business can be key to the investment thesis, however poor corporate governance in relation to founder-led companies may reduce the success of the company and may impact the value of the investment. At all times the Investment Manager seeks to invest in companies with strong governance standards and demonstrated track records of fair treatment of stakeholders.
b) Emerging Markets: The nature of the Investment Manager's focus can also result in exposure to emerging markets, where corporate ownership, governance structure and policies may differ from developed markets. The Investment Manager seeks to understand the standard and best practices across individual emerging market countries but recognizes that there might be less transparency around information and disclosures in some of these markets. The Investment Manager seeks to critically evaluate and understand these risks through its fundamental research and company engagement.
c) Small Cap: Given the Investment Manager focuses on identifying companies whose social or environmental impact is material to the business, the Fund tends to have a higher level of exposure to smaller cap companies. These companies may present governance considerations that require greater scrutiny and engagement with company management teams relative to large capitalization companies.

It is not anticipated that any single Sustainability Risk will materially drive a negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Position sizing reflects the Investment Manager's target prices, level of conviction, and risk assessments. Risk analysis is an integral part of the investment process and is monitored and managed at the security, sector, country, and total Fund levels on an on-going basis.

Investment objective and policies (continued)

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided at the Appendix - Sustainable Finance Disclosure Regulation (SFDR) of these financial statements.

The Index may be considered during portfolio construction and is used for performance comparison purposes.

For temporary defensive purposes in case of unusual or extraordinary market conditions, the Fund may hold up to 100% of its assets in ancillary liquid assets. The Fund may make substantial investment in securities traded on Russian markets and may invest in China A Shares traded via Stock Connect.

The Fund will invest, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. The Fund may buy and sell exchange-traded and OTC FDIs. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in GBP.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Emerging Markets Equity Fund launched on September 1, 2005. The table below details the performance of all funded share classes within the Fund.

Investment objective and policies*

The investment objective of the Fund was to seek long-term total returns.

The Investment Manager actively managed the Fund, seeking to outperform the MSCI Emerging Markets Index (the "Index") and achieve the objective, primarily through investment in equity securities of companies that are either located in emerging markets, or conduct substantial business in emerging markets as described below, and by focusing on companies that derive or expect to derive the majority of their total revenues or profits from such emerging market countries. The Investment Manager sought to generate excess returns over the long-term by identifying companies whose financial performance expected to exceed expectations. This process incorporated top-down elements, such as macroeconomic and sector analysis, within a bottom-up portfolio construction process. The Fund invested opportunistically in companies with different styles (e.g. value, growth) and market capitalization (smaller companies and larger companies).

The evaluation of Sustainability Risks through the analysis of ESG factors was part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks could materially affect a company's financial performance and competitiveness. However, Sustainability Risks were just some of a number of considerations in the overall research process so might not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considered ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which were considered varied depending on the security in question, but typically included ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks.

The Investment Manager believed that the Fund was exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager drew upon a wide variety of internal (such as research by its team of global industry analysts) and external research (such as company meetings) to assess any potential impact on the value of a security over the time horizon of the Fund. Whilst Sustainability Risks vary from company to company those that are particularly relevant to the Fund include:

a) Governance: When the Investment Manager sought emerging high quality companies, there was often higher insider ownership in comparison to more well-established counterparts. Founder's or family control over the company was often seen by the market as potentially higher risk from a reputational and regulatory perspective. For the companies the Investment Manager invested in, the founder's or family's strategic guidance of the business could be key to the investment thesis, however poor corporate governance in relation to founder-led companies might reduce the success of the company and could impact the value of the investment. At all times the Investment Manager sought to invest in companies with strong governance standards and demonstrated track records of fair treatment of stakeholders.
b) Emerging Markets: The nature of the Investment Manager's focus could also result in exposure to emerging markets, where corporate ownership, governance structure and policies might differ from developed markets. The Investment Manager sought to understand the standard and best practices across individual emerging market countries but recognized that there might be less transparency around information and disclosures in some of these markets. The Investment Manager sought to critically evaluate and understand these risks through its fundamental research and company engagement.
c) Small Cap: Given the Investment Manager focused on identifying companies whose social or environmental impact was material to the business, the Fund tended to have a higher level of exposure to smaller cap companies. These companies could present governance considerations that required greater scrutiny and engagement with company management teams relative to large capitalization companies.

It was not anticipated that any single Sustainability Risk would materially drive a negative financial impact on the value of the Fund.

The Index served as a reference benchmark for performance comparison purposes. In addition, the MSCI Emerging Markets IMI Local Index (the "Secondary Index") served as a reference benchmark for market context purposes.

The Fund might have made substantial investment in securities traded on Russian markets and might have invested in China A Shares traded via Stock Connect.

The Fund invested, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. The Fund may have bought and sold exchange-traded and OTC FDIs. Full details of the types of securities and FDIs and the ways in which the Fund may have utilised them are further detailed in the Prospectus.

Investment objective and policies* (continued)

The Fund was suitable for retail investors seeking long-term total returns. Investors in the Fund should have been prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund was suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not have constituted a substantial proportion of an investment portfolio and may not have been appropriate for all investors.

The Fund was denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

Investment objective and policies

The Fund is subject to the disclosure requirements of Article 6 of the SFDR.

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the MSCI Emerging Markets Investable Market Index (the "Index") and achieve the objective, primarily through investment in companies that are located, and/or conduct substantial business activities, in non-developed markets, including frontier markets (as defined by MSCI). The Investment Manager will look to the location of a company's assets, revenues and earnings in determining whether a company conducts substantial business activities in non-developed markets and the location of a company's stock exchange listing will have no bearing in this evaluation.

The Fund will apply the Company's Exclusion Policy, further details of which can be found in the Prospectus.

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities.

The Fund does not consider the adverse impacts of its investment decisions on Sustainability Factors.

The Index serves as a reference benchmark for performance comparison purposes.

The Fund will invest, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. The Fund may buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

Whilst the Fund does not promote any specific ESG characteristics or have a sustainable investment objective, the assessment of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of a security over the time horizon of the Fund.

As the Fund is broadly diversified, it is not anticipated that any single Sustainability Risk will materially drive a negative financial impact on the value of the Fund. Further details on Sustainability Risks considered and their potential impacts are included in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Emerging Markets Opportunities Fund launched on September 3, 2013. The table below details the performance of all funded share classes within the Fund.

	Total returns (%) Periods ended December 31, 2023					
Share class[1]	*6 mths*	*1 year*	*3 years*	*5 years*	*Since inception*[*]	*Inception date*
CAD S	0.31%	1.23%	(4.68%)	4.32%	N/A	September 3, 2013

Investment objective and policies

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to achieve the objective primarily through global investment in companies that own long-lived physical assets (such as companies in the utility, transportation, energy, real estate, and industrial sectors). The Investment Manager will seek to invest in companies which it believes possess an advantaged competitive position, such as companies in monopolistic industries or that have products that are non-discretionary with limited substitution risk, and that exhibit low levels of earnings volatility in order to mitigate against the risk of losing capital relative to global equities in periods of market stress. No industry is formally excluded from the investment universe. The Fund will be concentrated in terms of individual companies held and from time to time by industry sectors but is expected to be diversified by country. The Fund is expected to have a low to moderate turnover.

The assessment of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered by the Investment Manager will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks.

A strong weight is also placed on the future trajectory of ESG related variables, specifically, a company's plans and any key inflection points that will drive improvement. For example, as the world transitions from hydrocarbon reliance towards greater electrification, the Investment Manager prefers low carbon and alternative energy production. Additionally, the Investment Manager looks for companies providing valuable public services that align the interests of regulators, governments, customers, and Shareholders, such as clean water, carbon-free electricity, or wider access to broadband.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of the assets over the time horizon of the Fund. Through interactions with company management teams, the Investment Manager seeks a better understanding of any underlying Sustainability Risks, particularly those related to the ESG factors highlighted above, incorporating them into its assessments of a company's outlook, and looking to avoid investments in securities where the likelihood of a Sustainability Risk event is under-represented in the price of the security. The Investment Manager believes that active engagement with companies can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between companies within regional and sector peer groups.

It is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided at the Appendix - Sustainable Finance Disclosure Regulation (SFDR) of these financial statements.

The MSCI All Country World Index (the "Index") serves as a reference benchmark for market context purposes only.

The Fund will invest, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. The Fund may buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to equity securities. The Fund may also invest in debt securities. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Investment objective and policies (continued)

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Enduring Assets Fund launched on May 31, 2013. The table below details the performance of all funded share classes within the Fund.

Investment objective and policies

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the MSCI All Country World Index (the "Index") and achieve the objective, primarily through investment in companies globally that leverage technology to enhance or disrupt traditional financial services.

The Investment Manager seeks to achieve the objective by investing in financial technology companies and/or companies where the key growth driver is to provide or use technology to deliver the next generation of financial services ("FinTech"). The digital transformation of the global financial services industry through the use of technology and data is increasingly becoming a driver of success for companies and is creating what the Investment Manager anticipates to be compelling investment opportunities.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered by the Investment Manager will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, executive compensation, labour relations history, data privacy and security, cyber security, culture and inclusion, customer relations, environmental initiatives and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In evaluating risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of the assets over the time horizon of the Fund. While these risks vary from company to company, those that are particularly relevant include:

a) Data Privacy: Where the Investment Manager invests in companies within the new "FinTech" industry, social considerations are critical when evaluating companies with access to large customer data sets, particularly in relation to the company's transparency around the type of data collected, the security of that data, the manner in which it is used, and the circumstances under which it might be shared. Consumer perceptions that a company's products or services do not protect personal information could inhibit sales and may impact the value of an investment.
b) Governance: Where the Investment Manager invests in newly listed companies, there is a general lack of public information and disclosure in comparison to larger cap companies such that a greater level of engagement is required to identify risks. In the FinTech universe there can at times be higher insider ownership, particularly with new entrants to the industry. Higher levels of founder ownership are at times prevalent, which enhances governance related risks such as concentration of control and reduced diversity.

Through interactions with company management teams, the Investment Manager seeks a better understanding of these and any other Sustainability Risks, incorporating them into their assessments of a company's outlook, and looking to avoid investments in assets where the likelihood of a Sustainability Risk event is under-represented in the price of the asset. The Investment Manager believes that active engagement with companies can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between companies within regional and sector peer groups.

As the Fund is broadly diversified, it is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided at the Appendix - Sustainable Finance Disclosure Regulation (SFDR) of these financial statements.

The Index serves as a reference benchmark for performance comparison and market context purposes only. Whilst Fund securities may be components of the Index, the Index is not considered during portfolio construction and the Investment Manager will not manage the extent to which Fund securities differ from the Index. The Index is market capitalisation weighted and designed to measure the equity market performance of developed and emerging markets.

The Fund will invest, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. The Fund may buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to equity securities. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

Investment objective and policies (continued)

The Fund may be concentrated in a relatively small number of securities and industry sectors and/or countries and, as a result, may be more volatile than more broadly diversified funds.

The Fund may invest in developed countries and any country which is considered by the Investment Manager to be an emerging market. These are primarily located in Latin/Central America and the Caribbean, Central and Eastern Europe, Middle East, Africa and Asia. The Fund may make limited investment in securities traded on Russian markets and may invest in China A Shares traded via Stock Connect.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington FinTech Fund launched on October 16, 2018. The table below details the performance of all funded share classes within the Fund.

Investment objective and policies

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the MSCI Europe Index (the "Index") and achieve the objective primarily through investment in the equity and equity related securities of companies domiciled or operating primarily in developed European markets.

The assessment of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. The Investment Manager incorporates ESG factors into the analysis of individual companies (including with regards to Sustainability Risk assessment), in the belief that ESG considerations are crucial in long-term investing; non-compliance can threaten the viability of the business and positive action can support its growth. Companies are reviewed based on ESG criteria which will differ from company to company but may include a company's actions to reduce carbon emissions in its operational footprint, its policy around water usage and how it works to understand and mitigate its supply chain risks, as well as management incentives or board composition.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and proxy voting and collaborate on new research.

The factors which will be considered will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks. Whilst Sustainability Risks vary from company to company, the following are particularly relevant to the Fund:

a) The Fund demonstrates a bias towards small and mid-capitalisation companies which typically have lower public information and disclosure relative to large capitalisation companies. These companies present governance considerations that require greater scrutiny and engagement with the company management teams to identify risk.
b) The Investment Manager considers transition risks associated with climate change which may have a potential material impact on the value of assets in the Fund. At times the Fund has exhibited a higher carbon footprint than the Index, which is used for performance measurement and market context only. The Investment Manager places a greater focus on understanding and quantifying the net carbon emissions that are avoided over the lifetime of a company's product or services, and on those companies that have demonstrated an accelerated pathway for carbon reduction versus the broader universe.
c) The Investment Manager believes that the principles underlying the United Nations Global Compact (UNGC) are intrinsic to the sustainability of business, people and the planet, and additionally contribute towards the Paris Agreement by supporting organizations to align their practices for a sustainable and inclusive future. In the Investment Manager's view non-compliance with the principles increases inherent business risks, may negatively impact financial performance and generally challenges the sustainability of the business model. Failure to comply without any clear remediations could mean that problems confronting the company are more structural in nature.

Through interactions with company management teams, the Investment Manager seeks a better understanding of these and other Sustainability Risks, incorporating them into their assessments of a company's outlook, and looking to avoid investments in assets where the likelihood of a Sustainability Risk event is under-represented in the price of the asset. The Investment Manager believes that active engagement with companies can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between companies within regional and sector peer groups.

It is not anticipated that any single Sustainability Risk will materially drive a negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided at the Appendix - Sustainable Finance Disclosure Regulation (SFDR) of these financial statements.

The Index serves as a reference benchmark for performance comparison purposes.

Investment objective and policies (continued)

The Fund will invest, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. The Fund may buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to equity securities. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in EUR.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

Investment objective and policies

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the MSCI World Health Care Index (the "Index") and achieve the objective, primarily through investment in the equity securities of health care companies worldwide.

The Fund's investment approach is based primarily on bottom-up fundamental research conducted by the global health care analysts in the Investment Manager's Global Industry Analyst group.

The assessment of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process because, in the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. In addition, the Investment Manager believes there is a strong link between a company's ability to identify and manage Sustainability Risks and its ability to provide long-term capital appreciation.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment) using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered by the Investment Manager will vary depending on the security in question, but may include drug efficacy and safety records, product recall and quality control and good corporate governance. The Investment Manager believes that the Fund may be exposed to a broad range of Sustainability Risks and in assessing these risks the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of the security over the time horizon of the Fund.

Through interactions with company management teams, the Investment Manager seeks a better understanding of any underlying Sustainability Risks, incorporating them into their assessments of a company's outlook, and looking to avoid investments in securities where the likelihood of a Sustainability Risk event is under-represented in the price of the security. The Investment Manager believes that active engagement with companies can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between companies within regional and sub-sector peer groups.

It is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided at the Appendix - Sustainable Finance Disclosure Regulation (SFDR) of these financial statements.

The Index serves as a reference benchmark for performance comparison purposes.

The Fund will invest, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund's variability of return is expected to be very high, well above that of a more broadly diversified, global equity Fund. The Fund is suitable as an investment in a well-diversified portfolio.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Global Health Care Equity Fund launched on November 30, 2000. The table below details the performance of all funded share classes within the Fund.

Investment objective, policies and sustainable objective

The Fund is subject to the disclosure requirements of Article 9 of the SFDR.

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will seek to understand the world's social and environmental problems and to identify and invest in companies that it believes are addressing these needs in a differentiated way through their core products and services. Through the Fund's investments, the Investment Manager seeks to improve access to, and quality of, basic life essentials, reduce inequality, and mitigate the effects of climate change.

The Investment Manager will actively manage the Fund, seeking to outperform the MSCI All Country World Index (the "Index") and achieve the objectives by investing primarily in global equities, focusing on companies whose core business, in the opinion of the Investment Manager, aims to generate positive social and/or environmental change alongside a financial return.

The Investment Manager will seek to identify the universe of these companies based on three primary impact categories: life essentials, human empowerment, and the environment.

The assessment of Sustainability Risks through the analysis of ESG factors is an integral part of the Fund's investment process as, in the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered by the Investment Manager will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks. The Investment Manager has found that companies that have strengths in these areas have more stable growth trajectories and have created competitive advantages by reducing material. Sustainability Risks which may negatively impact their competitors.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of the assets over the time horizon of the Fund.

Whilst Sustainability Risks vary from company to company the following are particularly relevant to the Fund:

a) Given the Investment Manager focuses on identifying companies whose social or environmental impact is material to the business, the Fund tends to have a higher level of exposure to smaller cap companies. These companies may present governance considerations that require greater scrutiny and engagement with company management teams relative to large capitalization companies.
b) The nature of the Investment Manager's focus can also result in exposure to emerging markets, where corporate ownership, governance structure and policies may differ from developed markets. The Investment Manager seeks to understand the standard and best practices across individual emerging market countries but recognizes that there might be less transparency around information and disclosures in some of these markets. The Investment Manager seeks to critically evaluate and understand these risks through its fundamental research and company engagement.

Through interactions with company management teams, the Investment Manager seeks a better understanding of these and any additional underlying Sustainability Risks, incorporating them into its assessments of a company's outlook, and looking to avoid investments in assets where the likelihood of a Sustainability Risk event is under-represented in the price of the asset. The Investment Manager believes that active engagement with companies can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between companies within regional and sector peer groups.

As the Fund is broadly diversified, it is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided at the Appendix - Sustainable Finance Disclosure Regulation (SFDR) of these financial statements.

Investment objective, policies and sustainable objective (continued)

The Fund will invest, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. The Fund may buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to equity securities. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Global Impact Fund launched on December 8, 2016. The table below details the performance of all funded share classes within the Fund.

Investment objective and policies

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the MSCI All Countries World Small Cap Index (the "Index") and achieve the objective by investing globally, primarily in small to mid-capitalisation companies with a market capitalisation of typically below $10bn at the time of initial purchase.

The assessment of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered by the Investment Manager will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of a security over the time horizon of the Fund.

Whilst Sustainability Risks vary from company to company the following are particularly relevant to the Fund:

a) Generally lower public information and disclosure in small capitalisation companies (in comparison to larger capitalisation companies) such that a greater level of engagement may be required to identify risks.
b) In the small capitalisation company segment, higher levels of founder ownership are prevalent, which may enhance governance related risks such as concentration of control and reduced diversity.

Through interactions with company management teams, the Investment Manager seeks a better understanding of these and other Sustainability Risks, incorporating them into its assessments of a company's outlook, and looking to avoid investments in securities where the likelihood of a Sustainability Risk event is under-represented in the price of the security. The Investment Manager believes that active engagement with companies can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between companies within regional and sector peer groups.

As the Fund is broadly diversified, it is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided at the Appendix - Sustainable Finance Disclosure Regulation (SFDR) of these financial statements.

The Index may be considered during portfolio construction and is used for performance comparison purposes.

The Fund will invest, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. The Fund may buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to equity securities. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund may invest in developed countries and any country which is considered by the Investment Manager to be an emerging market. These are primarily located in Latin/Central America and the Caribbean, Central and Eastern Europe, Middle East, Africa and Asia. The Fund may make a limited investment in securities traded on Russian markets and may invest up to 10% of its net asset value in China A Shares traded via Stock Connect. The Fund will be well diversified by country, currency, industry and issuer but may hold positions that are concentrated in this manner from time to time.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

Investment objective and policies (continued)

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Global Perspectives Fund launched on October 30, 2015. The table below details the performance of all funded share classes within the Fund.

	Total returns (%) Periods ended December 31, 2023					
Share class[1]	*6 mths*	*1 year*	*3 years*	*5 years*	*Since inception*	*Inception date*

Investment objective and policies

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund seeking outperform the FTSE EPRA/NAREIT Developed Index (the "Index") and achieve the objective through investment primarily in companies and/or REITs, globally, with activities in or related to the development, operation, service and/or ownership of real estate, such as homebuilders, lodging, multi-family housing, retail real estate, office properties and property service companies. The Fund may also invest in other issuers that have a significant exposure to real estate through ownership of real estate assets.

Given the Investment Manager's long-term view on holding periods (typically 3-5 years), the assessment of Sustainability Risks through the analysis of ESG factors is an integral part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. In addition, the strong links between ESG factors make ESG factors a particular catalyst for active company engagement.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors considered by the Investment Manager will vary depending on the security in question, but may include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of the assets over the time horizon of the Fund.

The Investment Manager invests in companies in the real estate sector and therefore the sustainable use of materials, lighting, energy and waste systems may impact the value of an investment due to cost savings from more efficient energy and waste management. In addition, there may be physical and transition risks associated with climate change and extreme weather events may impact the terminal values of properties, insurance premiums and local taxes.

Through interactions with company and REIT management teams, the Investment Manager seeks a better understanding of any underlying Sustainability Risks, incorporating them into its assessments of a company's or a REIT's outlook, and looking to avoid investments in assets where the likelihood of a Sustainability Risk event is under-represented in the price of the asset. The Investment Manager believes that active engagement with companies and REITs can support changes in corporate behaviour and actions that may benefit the Fund and help mitigate Sustainability Risks. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between companies and REITs within regional and sub-sector peer groups.

It is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided at the Appendix - Sustainable Finance Disclosure Regulation (SFDR) of these financial statements.

The Index may be considered during portfolio construction and is used for performance comparison purposes.

The Fund will invest, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. The Fund may buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to equity securities. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Global Property Fund launched on June 2, 2020. The table below details the performance of all funded share classes within the Fund.

	Total returns (%) Periods ended December 31, 2023					
Share class[1]	*6 mths*	*1 year*	*3 years*	*5 years*	*Since inception*	*Inception date*

Investment objective, policies and sustainable objective

The Fund is subject to the disclosure requirements of Article 9 of the SFDR.

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will seek to invest in companies whose management teams and boards display exemplary 'stewardship'. The Investment Manager defines stewardship as how companies balance the interests of all stakeholders (e.g. customers, employees, communities and the supply chain) in the pursuit of profits and how they incorporate material ESG risks and opportunities in their corporate strategy. The Investment Manager will manage the Fund to target net zero emissions by 2050 in alignment with the Paris Agreement by actively engaging with companies held in the Fund to commit to net zero science-based targets.

The Investment Manager will actively manage the Fund, seeking to outperform the MSCI All Country World Index (the "Index") and achieve the objectives, primarily through investment in equity securities issued by large-cap companies worldwide.

The Fund has adopted the following binding restrictions that are consistent with its sustainable objective and which also support certain environmental or social characteristics in the following ways:

The Fund will not invest in any companies identified as failing to comply with the United Nations Global Compact.

The Fund will not invest in securities of any company identified as involved in the manufacturing or selling of weapons.

Evaluating ESG factors (including Sustainability Risks) is an integral part of the Fund's investment process as, in the Investment Manager's view, ESG factors can materially affect a company's financial performance and competitiveness.

The strong links between stewardship and return on capital over the long-term make ESG factors a particular catalyst for active company engagement, which the Investment Manager believes is essential if investee companies are to sustain their returns in the long-term. The Investment Manager looks for stewardship that is long-term oriented; implemented by strong management and an engaged board; exemplified by excellent capital and resource allocation; and distinguished in its consideration of all stakeholders in the pursuit of profit. ESG factors capture many of these elements, therefore the Investment Manager's bias is to focus on the ESG issues most material to the long-term value of each company in the Fund.

The Investment Manager uses inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered by the Investment Manager will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of the assets over the time horizon of the Fund. Through interactions with company management teams, the Investment Manager seeks a better understanding of any underlying Sustainability Risks, incorporating them into their assessments of a company's outlook, and looking to avoid investments in securities where the likelihood of a Sustainability Risk event is under-represented in the price of the asset. The Investment Manager believes that active engagement with companies can support changes in corporate behaviour and actions that benefit the Fund, while also helping to mitigate Sustainability Risks. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between companies within regional and sector peer groups.

It is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided at the Appendix - Sustainable Finance Disclosure Regulation (SFDR) of these financial statements.

The Index serves as a reference benchmark for performance comparison and WACI purposes.

The Fund will invest, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. The Fund may buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to equity securities. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

Investment objective, policies and sustainable objective (continued)

The Fund may invest in developed countries and up to 20% of its net asset value in countries which are considered by the Investment Manager to be emerging markets. These are primarily located in Latin/Central America and the Caribbean, Central and Eastern Europe, Middle East, Africa and Asia. The Fund may make a limited investment in securities traded on Russian markets and may invest up to 10% of its net asset value in China A Shares traded via Stock Connect.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Global Stewards Fund launched on January 31, 2019. The table below details the performance of all funded share classes within the Fund.

	Total returns (%) Periods ended December 31, 2023					
Share class[1]	*6 mths*	*1 year*	*3 years*	*5 years*	*Since inception*	*Inception date*

Investment objective and policies

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the MSCI India Index (the "Index") and achieve the objective by investing primarily in equity and equity related securities of companies that are incorporated or operating in India.

The evaluation of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks. Further information on the ESG factors that the Investment Manager will consider can be found in the Prospectus.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external research (such as company meetings) to assess any potential impact on the value of a security over the time horizon of the Fund. Whilst Sustainability Risks vary from company to company the following are particularly relevant to the Fund:

a) Governance: When the Investment Manager seeks emerging high quality companies, there is often higher insider ownership in comparison to more well-established counterparts. Founder's or family control over the company is often seen by the market as potentially higher risk from a reputational and regulatory perspective. For the companies the Investment Manager invests in, the founder's or family's strategic guidance of the business can be key to the investment thesis, however poor corporate governance in relation to founder-led companies may reduce the success of the company and may impact the value of the investment. At all times the Investment Manager seeks to invest in companies with strong governance standards and demonstrated track records of fair treatment of stakeholders.
b) Emerging Markets: The nature of the Investment Manager's focus can also result in exposure to emerging markets, including India, where corporate ownership, governance structure and policies may differ from developed markets. The Investment Manager seeks to understand the standard and best practices across individual emerging market countries but recognizes that there might be less transparency around information and disclosures in some of these markets. The Investment Manager seeks to critically evaluate and understand these risks through its fundamental research and company engagement.
c) Small Cap: Given the Investment Manager focuses on identifying companies whose social or environmental impact is material to the business, the Fund tends to have a higher level of exposure to smaller cap companies. These companies may present governance considerations that require greater scrutiny and engagement with company management teams relative to large capitalization companies.

It is not anticipated that any single Sustainability Risk will materially drive a negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided at the Appendix - Sustainable Finance Disclosure Regulation (SFDR) of these financial statements.

The Index serves as a reference benchmark for performance comparison purposes.

The Fund will invest, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. The Fund may buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to equity securities. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

Investment objective and policies (continued)

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington India Focus Equity Fund launched on November 29, 2013. The table below details the performance of all funded share classes within the Fund.

	Total returns (%) Periods ended December 31, 2023

Investment objective and policies*

The investment objective of the Fund was to seek long-term total returns.

The Investment Manager actively managed the Fund, seeking to outperform the MSCI Europe Small Cap Index (the "Index") and achieve the objective, primarily through investment in the equity and equity related securities of small capitalisation companies domiciled or operating in developed European markets. The Investment Manager used a bottom-up stock selection process, researching smaller capitalisation stocks to identify companies that the Investment Manager believed had the potential for significant long-term returns. For the purposes of this Fund, the Investment Manager defined small capitalisation companies as those whose market capitalisation was within the range of companies in the Index at the time of purchase, and developed markets as those included within the Index.

The assessment of Sustainability Risks through the analysis of ESG, factors was part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks could materially affect a company's financial performance and competitiveness. The Investment Manager incorporated ESG factors into the analysis of individual companies (including with regards to Sustainability Risk assessment), in the belief that ESG considerations were crucial in long-term investing; non-compliance could threaten the viability of the business and positive action could support growth. The Investment Manager conducted extensive due diligence around each investment because it believed that material ESG factors were also strategic business issues that could impact financial performance. Companies are reviewed based on ESG criteria which will differ from company to company but may include a company's actions to reduce carbon emissions in its operational footprint, its policy around water usage and how it works to understand and mitigate its supply chain risks, as well human capital management, e.g. employee retention or board composition. The Investment Manager used inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research.

The Investment Manager believed that the Fund was exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager drew upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of the assets over the time horizon of the Fund. Whilst Sustainability Risks vary from company to company those that are particularly relevant to the Fund include:

a) Generally lower public information and disclosure in small capitalisation companies (in comparison to larger capitalisation companies) such that a greater level of engagement was required to identify risks.
b) In the small capitalisation segment, higher levels of founder ownership were prevalent, which enhances governance related risks such concentration of control and reduced diversity.
c) The Fund often invested in knowledge intensive businesses, where human capital was a key asset leading to risks such as critical knowledge being concentrated with key individuals.

Through interactions with company management teams, the Investment Manager sought a better understanding of these and other Sustainability Risks, incorporating them into their assessments of a company's outlook, and looking to avoid investments in assets where the likelihood of a Sustainability Risk event was under-represented in the price of the asset. The Investment Manager believed that active engagement with companies can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks. The Investment Manager also consulted its ESG analysts for insight on how Sustainability Risks could differ between companies within regional and sector peer groups.

It was not anticipated that any single Sustainability Risk could drive a material negative financial impact on the value of the Fund.

The Fund invested, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. The Fund could buy and sell exchange-traded and OTC FDIs. The Fund could also invest in collective investment schemes and in ETFs that provided exposure to equity securities.

The Fund was suitable for retail investors seeking long-term total returns. Investors in the Fund were prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund invested in securities of smaller companies which are less liquid, more volatile and tend to carry greater financial risk than securities of larger companies. The Fund was suitable as an investment in a well-diversified portfolio.

The Fund was denominated in EUR.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund could invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Pan European Small Cap Equity Fund launched on September 29, 2017. The Fund terminated on May 31, 2023. The final published net asset values per share were: EUR D 12.8621, EUR N 13.3848, EUR S 13.4997, EUR T 10.0916 and GBP N 13.2896.

* The Wellington Pan European Small Cap Equity Fund terminated on May 31, 2023.

Investment objective and policies

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the MSCI Europe Index (the "Index") and achieve the objective by investing predominantly in a diversified portfolio of European-domiciled companies that the Investment Manager believes will enjoy earnings and cash flow growth that are greater than the average earnings and cash flow growth of constituents of the Index.

The evaluation of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external research (such as company meetings) to assess any potential impact on the value of a security over the time horizon of the Fund.

It is not anticipated that any single Sustainability Risk will materially drive a negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided at the Appendix - Sustainable Finance Disclosure Regulation (SFDR) of these financial statements.

The Index serves as a reference benchmark for performance comparison purposes.

The Fund will invest, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to equity securities. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

The Fund is denominated in EUR.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Investment objective and policies*

The investment objective of the Fund was to seek long-term total returns.

The Investment Manager actively managed the Fund, seeking to outperform the MSCI All Country World Index (the "Index") and achieve the objective, primarily through investment in equity and equity-related securities of companies worldwide, using a risk-managed framework, seeking to provide exposure to multiple equity 'factors'. Factors are common characteristics (for example, including but not limited to company valuation, company earnings growth, share price volatility) that apply to a group of issuers or securities and that are important in explaining the returns and risks of those issuers' securities.

The Investment Manager believed that the Fund was exposed to a broad range of Sustainability Risks. In the Investment Manager's view, Sustainability Risks could materially affect a company's risk profile. The assessment of Sustainability Risks was integral to the investment philosophy of the Fund, the Investment Manager relied on ESG ratings to determine any potential impact on the value of assets over the time horizon of the Fund, with aggregate ESG scores driving company weightings in the Fund. The Investment Manager was looking to limit exposure to assets where the likelihood of a Sustainability Risk event is under-represented in the price of the asset.

As the Fund was broadly diversified, it was not anticipated that any single Sustainability Risk drove a material negative financial impact on the value of the Fund.

The Index was integral to portfolio construction and was used for performance and WACI comparison purposes.

The Fund invested, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. The Fund could buy and sell exchange-traded and OTC FDIs. The Fund invested in collective investment schemes and in ETFs that provided exposure to equity securities.

The Fund might have made a limited investment in securities traded on Russian markets and could invest up to 10% of its net asset value in China A Shares traded via Stock Connect.

The Fund was suitable for retail investors seeking long-term total returns. Investors in the Fund were prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund was suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not have constituted a substantial proportion of an investment portfolio and might not have been appropriate for all investors.

The Fund was denominated in USD.

Performance

The Wellington Universal Vision Fund launched on September 17, 2019. The Fund terminated on November 7, 2023. The final published net asset values per share were: USD D 12.2763, USD N 12.5327, USD S 12.5849, GBP N 15.6465, GBP S 15.7102.

* The Wellington Universal Vision Fund terminated on November 7, 2023.

Investment objective and policies

The Fund is subject to the disclosure requirements of Article 6 of the SFDR.

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the S&P 500 Index (the "Index") and achieve the objective by investing primarily in a concentrated, high conviction portfolio of equity securities of US companies in combination with broad U.S. market exposure as represented by the Index.

The Fund will apply the Company's Exclusion Policy with respect to the portion of the Fund not invested in S&P 500 index futures, further details of which can be found in the Prospectus.

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities.

The Fund does not consider the adverse impacts of its investment decisions on Sustainability Factors.

The Index serves as a reference benchmark for performance comparison purposes, as well as providing broad US market exposure as stated above.

The Fund will invest, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. The Fund may buy and sell exchange-traded and OTC FDIs. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

Whilst the Fund does not promote any specific ESG characteristics or have a sustainable investment objective, the assessment of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of a security over the time horizon of the Fund.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington US Dynamic Equity Fund launched on December 18, 2019. The table below details the performance of all funded share classes within the Fund.

Investment objective and policies

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek a combination of long-term total returns with a regular income and actively manage downside risk.

The Investment Manager will actively manage the Fund, seeking to achieve the objective by investing in a broad array of global assets such as equities, government bonds, investment grade and high yield credit (such as corporate bonds).

The Fund's investment strategy is based on the Investment Manager's belief that a consistent income combined with long-term capital growth can be achieved through the active management of assets and market exposures within a disciplined risk control framework.

The Fund does not consider a benchmark during portfolio construction or for performance comparison purposes.

The evaluation of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors, and the extent to which they will be considered will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of a security over the time horizon of the Fund.

As the Fund is broadly diversified, it is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided at the Appendix - Sustainable Finance Disclosure Regulation (SFDR) of these financial statements.

The Fund will invest, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics and in debt securities. The Fund may buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for an investor seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio. Investors in the Fund should be aware that, as set out in the Prospectus dividends may be declared out of the capital of the Fund.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Multi-Asset Total Return Income Fund launched on June 28, 2018. The table below details the performance of all funded share classes within the Fund.

	Total returns (%) Periods ended December 31, 2023					
Share class[1]	*6 mths*	*1 year*	*3 years*	*5 years*	*Since inception*	*Inception date*

The accompanying notes form an integral part of these financial statements.

1. Material accounting policies

The material accounting policies adopted by the Company for the financial year ended December 31, 2023 are outlined below. These policies have been consistently applied to all years presented, unless otherwise stated.

Basis of preparation

The financial statements have been prepared on a historical cost basis except for those financial assets and financial liabilities that have been measured at fair value. The financial statements have been prepared on a going concern basis with the exception of the Wellington Emerging Markets Local Equity Fund, Wellington Pan European Small Cap Equity Fund and Wellington Universal Vision Fund which are prepared on a non-going concern basis given their terminations on November 30, 2023, on May 31, 2023 and on November 7, 2023 respectively, as outlined on page 12 of the Directors' report.

The financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by the European Union, Irish statute comprising the Companies Act 2014, and the UCITS Regulations.

New standards and amendments to existing standards effective January 1, 2023

There were no new standards, interpretations or amendments to existing standards that are effective for the first time for the financial year beginning on January 1, 2023 that might have a material impact on the Company's financial statements.

New standards, amendments and interpretations effective after January 1, 2023 and have not been early adopted

A number of new standards, amendments to standards and interpretations are effective for annual periods beginning after January 1, 2023, and have not been early adopted in preparing these financial statements. None of these are expected to have a material impact on the financial statements of the Company.

Financial instruments at fair value through profit or loss

a) Classification

(i) Financial assets at fair value through profit and loss

The Company classifies its investments, including derivatives, based on both the Company's business model for managing those financial assets and the contractual cash flow characteristics of the financial assets. The portfolio of financial assets is managed and performance is evaluated on a fair value basis. The Company is primarily focused on fair value information and uses that information to assess the assets' performance and to make decisions. Therefore, while the contractual cash flows of the Company's debt securities are solely principal and interest, this is only incidental to achieving the Company's business model's objective and consequently, all investments, including derivatives and short-term investments with a maturity of up to one year from the date of acquisition, are measured at fair value through profit or loss (''FVTPL'').

(ii) Financial liabilities at fair value through profit and loss

Derivative contracts that have a negative fair value are presented as financial liabilities at FVTPL. The Company's obligations for net assets attributable to holders of redeemable shares are presented at the redemption amount, which approximates their fair value. As such, the Company classifies its investment portfolio as financial assets or financial liabilities at FVTPL. All other financial assets and financial liabilities are measured at amortised cost, which approximates their fair value.

(iii) Financial assets and financial liabilities at amortised cost

Amounts classified at amortised cost are recognised initially at fair value and subsequently measured at amortised cost. At each reporting date, the Company shall measure the loss allowance on financial assets measured at amortised cost at an amount equal to the lifetime expected credit losses if the credit risk has increased significantly since initial recognition. If, at the reporting date, the credit risk has not increased significantly since initial recognition, the Company shall measure the loss allowance at an amount equal to 12-month expected credit losses. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganization, and default in payments are all considered indicators that a loss allowance may be required. If the credit risk increases to the point that it is considered to be credit impaired, interest income will be calculated based on the gross carrying amount adjusted for the loss allowance.

The Company's policy requires the Investment Manager and the Board of Directors to evaluate the information about these financial assets and financial liabilities on a fair value basis together with other related financial information.

1. Material accounting policies (continued)

Financial instruments at fair value through profit or loss (continued)

b) Recognition, derecognition and measurement

Regular purchases and sales of investments are recognised on the trade date, the date on which the Company commits to purchase or sell the investment. Financial assets and financial liabilities at fair value through profit or loss are initially recognised at fair value.

The Company's outstanding redeemable shares are classified as financial liabilities in accordance with the requirements of IAS 32 Financial Instruments: Presentation ("IAS 32"). The Company's obligations for net assets attributable to holders of redeemable shares are presented at their redemption amounts.

Financial assets are derecognised when the rights to receive cash flows from the investments have expired or the Company has transferred substantially all risks and rewards of ownership. Financial liabilities are derecognised when they are extinguished, that is, when the obligation specified in the contract is discharged, cancelled or expires. In respect of each instrument type classified as financial assets or financial liabilities at fair value through profit or loss, the movement in unrealised gains/(losses) since the prior financial year end and realised gains/(losses) are included in net changes in fair value on financial assets and financial liabilities at fair value through profit or loss in the statement of comprehensive income for each relevant Fund.

Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value of the financial assets or financial liabilities at fair value through profit or loss category are presented in the statement of comprehensive income within net changes in fair value on financial assets and financial liabilities at fair value through profit or loss and are calculated on a first in first out cost basis.

See the statement of comprehensive income for details of realised gains/(losses) and movements in unrealised gains/(losses) for the financial years ended December 31, 2023 and December 31, 2022.

c) Fair value estimation

If an asset or a liability measured at fair value has a bid price and an ask price, it is required by IFRS 13 Fair value measurement that the valuation be based on a price within the bid-ask spread that is most representative of fair value and allows the use of last traded pricing or other pricing conventions that are used by market participants as a practical expedient for fair value measurement within a bid-ask spread. Financial assets and financial liabilities were valued using last traded prices as this has been deemed a practical expedient of fair value.

An active market is a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

The fair value of financial instruments that are not traded in an active market (for example OTC FDIs) is determined by using valuation techniques. The Management Company uses a variety of methods and makes assumptions that are based on market conditions existing at each statement of financial position date. Valuation techniques used include the use of comparable recent arm's length transactions, reference to the other instruments that are substantially the same, discounted cash flow analysis, pricing models and other valuation techniques commonly used by market participants making the maximum use of market inputs and relying as little as possible on entity specific inputs.

Fair Value Adjustment Factors ("FVAF") were introduced on a daily basis to all Funds of the Company to counter the risk of potential market timing due to the investor dealing cycle being on a trade date basis. Most non-U.S. exchanges typically close prior to the time the Company's securities are valued, the close of the New York Stock Exchange. The application of FVAF provides a best estimate of the pricing divergence between local exchange closing prices, per security, and what the same securities are estimated to be worth at the valuation point of the NAV.

During the financial years ended December 31, 2023 and December 31, 2022, FVAF were provided by the Intercontinental Exchange ("ICE").

1. Material accounting policies (continued)

Critical accounting estimates and assumptions

The preparation of financial statements requires management to use judgement in applying its material accounting policies and to make estimates and assumptions about the future. The Management Company together with the Investment Managers constitute the 'management' which reference is made to in these notes to the financial statements. The following paragraphs discuss the most material accounting judgements and estimates that the Company has made in preparing the financial statements:

Fair value measurement of FDIs and securities not quoted in active market

The Funds hold financial instruments that are not quoted in active markets, including FDIs. Fair value of such instruments is determined using valuation techniques and may be determined using reputable pricing sources (such as pricing agencies) or indicative prices from market makers. Broker quotes as obtained from the pricing sources may be indicative and not executable or binding. Where no market data is available, the Management Company may value positions using its own models, which are usually based on valuation methods and techniques generally recognised as standard within the industry. The models used to determine fair values are validated and periodically reviewed by experienced personnel of the Investment Manager, independent of the party that created them.

Models use observable data, to the extent practicable. However, areas such as credit risk (both own and counterparty) volatilities and correlations require the Investment Manager to make estimates. Changes in assumptions about these factors could affect the reported fair values of financial instruments. The Funds consider observable data to be market data that is readily available, regularly distributed and updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. Refer to note 1 b) recognition, derecognition and measurement for further information about the fair value measurement of the Funds' financial instruments.

Income

(i) Interest from debt securities held at FVTPL

Income from assets held at fair value through profit or loss is recognised on an effective interest basis and is included in the statement of comprehensive income. Income not yet received is included in 'income receivable from assets held at fair value through profit or loss' in the statement of financial position.

(ii) Bank interest

Bank interest income is recognised on a time-proportionate basis using the effective interest method and includes interest income from cash and cash equivalents.

(iii) Dividend income

Dividend income arising on the underlying equity investments of a Fund is recognised as income of that Fund on the ex-dividend date. Income is shown gross of any non-recoverable withholding taxes which are disclosed separately in the statement of comprehensive income. Dividend income not yet received is included in 'dividends receivable' in the statement of financial position.

Fees

All fees are accrued daily based on the net assets value of the Funds, attributable to the relevant class of shares. The Funds are paying administrative fees to the Management Company for the provision of various type services (including Depositary fees, Administrator's fees, Transfer Agent fees, Directors' fees and other professional fees) provided to the Funds by other 3rd parties vendors. Aside from the administrative fees, the Funds will still be paying an investment management fee and an performance fee (where applicable) to their Investment Manager and a distribution fee to their Distributor. Please refer to note 5 for further information.

Capital gains and withholding tax

The Company currently incurs withholding tax imposed by certain countries on investment income and capital gains and such tax may not be recoverable by the Company or its Shareholders. Such income or gains are recorded gross of withholding tax in the statement of comprehensive income. 'Withholding tax' and 'capital gains tax' are shown as separate items in the statement of comprehensive income.

1. Material accounting policies (continued)

Distribution policy

Any distributions for the financial year will be recorded in the statement of comprehensive income. Distributions reinvested are recorded in the 'reinvestment of distributions' line in the statement of changes in net assets attributable to holders of redeemable shares for the financial year. For further information please refer to the Prospectus.

As per the Prospectus of the Company, the Directors at such times as they deem appropriate, may also declare distributions out of the capital of the Fund. In this instance the capital of the relevant Fund will be eroded, the distribution is achieved by foregoing the potential for future capital growth and the cycle may continue until all capital is depleted. Distributions out of capital may have different tax implications to distributions out of income. For further information please refer to the Prospectus.

Redeemable shares

Redeemable shares are redeemable at the Shareholder's option and are classified as financial liabilities. The redeemable shares can be repurchased by the Company at any time for cash equal to a proportionate share of the Company's net asset value. The redeemable share is carried at the redemption amount that is payable at the statement of financial position date if a Shareholder exercised his or her right to have the Company repurchase his or her share. In accordance with the Prospectus, for the relevant Funds, the Company is contractually obliged to redeem shares at dealing prices. Monetary value share transactions during the financial year are recognised in the statement of changes in net assets attributable to holders of redeemable shares of the relevant Fund.

Transaction costs

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument. When a financial asset or financial liability is recognised initially, each Fund shall measure it at its fair value through profit or loss with transaction costs for such instruments being recognised directly in the statement of comprehensive income.

Transaction costs charged by the Depositary on the settlement of purchases and sales of investments are covered under the administrative fees which are disclosed in the statement of comprehensive income for each Fund. These costs are separately identified in note 9 transaction costs.

Brokerage charges, taxes and linked charges on purchases and sales of equities, investment funds, open future contracts and options are included in 'net realised gain/(loss) on financial assets and financial liabilities at fair value through profit or loss' in the statement of comprehensive income for each Fund. These costs are also separately identified in note 9 Fees within the transaction costs section for each relevant Fund.

Transaction costs on the purchase and sale of bonds, open forward foreign currency exchange contracts, swaps, swaptions, reverse repurchase agreements, bank loans and credit-linked notes are included in the purchase and sale price of the investment. These costs cannot be practically or reliably gathered as they are embedded in the cost of the investment and cannot be separately verified or disclosed.

Foreign currency

In accordance with IAS 21 The Effects of Changes in Foreign Exchange Rates ("IAS 21"), items included in each individual Fund are measured using the currency of the primary economic environment in which it operates (functional currency). The functional currency for all Funds is US Dollar (USD) with the exception of the Wellington Euro High Yield Bond Fund, the Wellington Sterling Core Bond Plus Fund, the Wellington Emerging Markets Equity Fund, the Wellington Focused European Equity Fund, the Wellington Pan European Small Cap Equity Fund and the Wellington Strategic European Equity Fund.

The combined financial statements of the Company are presented in US Dollars.

The Wellington Sterling Core Bond Plus Fund primarily invests in Pound Sterling (GBP) denominated securities and as such it has adopted GBP as its functional currency. The Wellington Emerging Markets Equity Fund invests globally with no particular bias towards country of investment. When launching this Fund, the Company took a view that the functional currency should be GBP. The Wellington Euro High Yield Bond Fund, the Wellington Focused European Equity Fund, the Wellington Pan European Small Cap Equity Fund (until termination) and the Wellington Strategic European Equity Fund primarily invest in European securities and as such have adopted Euro (EUR) as their functional currency.

1. Material accounting policies (continued)

Foreign currency (continued)

Transactions in other currencies have been translated to the functional currency at the rate of exchange ruling at the time of the transaction. Assets and liabilities have been translated at the rate of exchange ruling at the financial year-end. Resulting profits or losses are dealt with in the statement of comprehensive income.

Financial derivative instruments

The Company can enter into OTC FDIs subject to the restrictions set forth in the Prospectus and to the extent consistent with the individual Fund's investment objective and policies. Details of global exposure can be found in note 12 (a) Market Risk.

Forward and spot foreign exchange contracts

The unrealised gain or loss on open forward foreign exchange contracts and open spot foreign exchange contracts is calculated by reference to the difference between the contracted rate and the forward rate to close out the contract as at the financial year-end. The forward rates applied at year end were pulled at 16:00 GMT. For each relevant Fund, gains or losses on open spot foreign exchange contracts are included in 'cash and cash equivalents' in the statement of financial position and gains or losses on open forward foreign exchange contracts are included in financial assets or liabilities at fair value through profit or loss, as appropriate, on the statement of financial position and schedule of investments.

For foreign security hedging, realised and unrealised gains and losses are allocated at Fund level. For hedges relating to hedged share classes, the realised and unrealised gains and losses are allocated solely to the relevant hedged share classes. Details of hedged share classes are provided in the Investment Manager's report for each Fund. While the Company will attempt to hedge against currency exposure in the hedged classes, there can be no guarantee that the value of the hedged classes will not be affected by the value of the hedged share class currency relative to the functional currency of the Fund or to the currency allocations within the Fund.

Future contracts

For open future contracts, changes in the value of the contract are recognised as unrealised gains or losses by ''marking-to-market'' the value of the contract at the statement of financial position date. When the contract is closed, the difference between the proceeds from (or fair value of) the closing transactions and the original transaction is recorded as a realised gain or loss.

Options

The premium on purchased put options exercised is subtracted from the proceeds of the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on purchased call options exercised is included in determining initial fair value of the securities or foreign currency purchased. Premiums paid from the purchase of options which expire unexercised are treated as realised losses.

The premium on written call options exercised is added to the proceeds from the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on written put options exercised is included in determining initial fair value of the securities or foreign currencies purchased. Premiums received from written options which expire unexercised are treated as realised gains. The Company may not carry out uncovered short sales of options.

In respect of the Wellington Multi-Asset Total Return Income Fund written call options may be traded with the purpose of enhancing operating income. The premium on written call options is amortised to income from settlement date to expiry date or in full on exercise date and is excluded from the proceeds when determining realised gains and losses.

Swaptions

Swaptions are options (see previous section) that grant the right, with no obligation, to enter into an underlying swap (see below) on pre-agreed terms. When a swaption is exercised, the treatment of the premium is determined by the type of swaption. For purchased put and written call swaptions, the premium is included with the proceeds from the sale of the underlying swap in determining the realised gain or loss. For purchased call and written put swaptions, the premium is included in determining the initial fair value of the swap purchased. Premiums paid/received from the purchase/sale of swaptions which expire unexercised are treated as realised losses and gains respectively.

1. Material accounting policies (continued)

Financial derivative instruments (continued)

Swaps

- *Credit default swaps*

Credit default swaps involve, to varying degrees, elements of credit and counterparty risk in excess of the amount recognised in the statement of financial position. Valuation of the credit default swap is an estimate of a credit default event happening at a particular point in time. Notional principal amounts are used to express the extent of involvement in these transactions, but the amounts potentially subject to credit risk are much smaller.

The fair values of credit default swaps are calculated using standard net present value methodologies whereby all future cash flows of the fixed side of the swap are discounted to their present value using the appropriate interest rate and whereby all future cash flows of the default side of the swap are discounted to their present value based on the cost of default to the default payer. This cost is determined by the recovery rate, notional amount of the contract, and default probability among other factors. The fair value calculations are completed daily and provided to the Administrator by a pre-approved independent valuation agent.

- *Interest rate swaps*

The fair values of interest rate swaps are calculated using standard net present value methodologies whereby all future cash flows of the interest rate swaps are discounted to their present value using the appropriate interest rate. The fair value calculations are completed daily and provided to the Administrator by a pre-approved independent valuation agent.

- *Total return swaps*

A total return swap is an agreement in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains. In total return swaps, the underlying asset, referred to as the reference asset, is usually a stock or fixed income index. This is owned by the party receiving the set rate payment. Total return swaps allow the party receiving the total return to gain exposure and benefit from a reference asset without actually having to own it.

The fair value of the swap is reported as an asset or liability as appropriate on the statement of financial position of the Fund and movements in the fair value are recorded in the statement of comprehensive income as part of net changes in fair value on financial assets at fair value through profit or loss. The net amounts of interest payments and receipts on swaps are included in interest income in the statement of comprehensive income and in interest receivable or payable on the statement of financial position.

TBA purchase commitments

The Funds may hold and maintain until settlement date, cash or high-grade debt obligations in an amount sufficient to meet the purchase price, or the Funds may enter into offsetting contracts for the forward sale of other securities they own.

Income on the securities will not be earned until settlement date. TBA purchase commitments may be considered securities in themselves, and involve a risk of loss if the value of the security to be purchased declines prior to settlement date, the risk of which is in addition to the risk of decline in the value of a Fund's other assets.

Unsettled TBA purchase commitments are valued at the current market value of the underlying securities.

Although the Funds may enter into TBA purchase commitments with the intention of acquiring securities or for delivery pursuant to options they have entered into, the Funds may dispose of a commitment prior to settlement if the Investment Manager deems it appropriate to do so.

TBA sale commitments

Certain Funds may enter into TBA sale commitments to hedge their Fund positions or to sell mortgage-backed securities they own under delayed delivery arrangements. Proceeds of TBA sale commitments are not received until the contractual settlement date.

The Funds that hold TBAs outstanding as at December 31, 2023, which are included in 'financial derivative instruments' in the statement of financial position, are listed under their correspondent FDIs section of the schedule of investments.

1. Material accounting policies (continued)

Warrants

Warrants are used to gain exposure to emerging market and other equities where custody, liquidity, or other issues make ownership of local shares sub-optimal. The warrants are expected to have similar market risk characteristics as the underlying equity security. In addition, these instruments have issuer (counterparty) risk to the issuer of the warrant and may have different liquidity risks as deemed appropriate by the Investment Manager. The valuation of the warrants depends on the level of trading. If the warrants are actively traded in the market then the market price is used. If the warrants are not actively traded in the market then either the intrinsic value of the warrant based on underlying equity price and warrant strike price or modified Black-Scholes derived value, adjusted for liquidity/other risks deemed appropriate are used.

Bank loans

Consistent with permitted investment policies of the Funds, certain Funds may invest in direct debt instruments which are interests in amounts owed by corporate, governmental, or other borrowers to lenders or lending syndicates. A Fund's investments in loans may be in the form of participations in loans or assignments of all or a portion of loans from third parties. A loan is often administered by a bank or other financial institution (the "lender") that acts as agent for all holders. The agent administers the terms of the loan, as specified in the loan agreement. When investing in a loan participation, a Fund has the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling the loan agreement and only upon receipt by the lender of payments from the borrower. A Fund generally has no right to enforce compliance with the terms of the loan agreement with the borrower. As a result, a Fund may be subject to the credit risk of both the borrower and the lender that is selling the loan agreement. However when a Fund purchases assignments from lenders it acquires direct rights against the borrower of the loan. Bank loan income is included in 'income from assets held at fair value through profit and loss' in the statement of comprehensive income.

Reverse repurchase agreements

The Company may invest in reverse repurchase agreements, which are short-term agreements in which the Company receives delivery of underlying collateral securities and the seller of such securities agrees to repurchase the securities at a future time and specified price. Reverse repurchase agreements are fully collateralized by the seller/Trustee in an amount not less than the proceeds due, including interest. The Funds do not record the purchase of the securities received but do record the reverse repurchase agreement as if it were a loan. The Company carries reverse repurchase agreements at cost, which combined with accrued interest, approximates market value.

The underlying collateral securities consist of US Treasury and/or Government Agency Securities and are marked-to-market daily. Securities collateralizing certain tri-party repurchase agreements are held at a clearing bank in a segregated account for the benefit of the Fund and the seller. Details of repurchase agreements open at year end, if any, are included on the Schedule of Investments under the caption "Repurchase Agreements".

As at December 31, 2023 all reverse repurchase agreements were held with State Street Corporation and collateralised by debt securities, details of which are disclosed in a footnote to the relevant Fund's schedule of investments.

It is the Company's policy to take custody of securities purchased under reverse repurchase agreements and to value the securities on a daily basis to protect the Company in the event the securities are not repurchased by the counterparty. The Company will generally obtain additional collateral if the market value of the underlying securities is less than the face value of the reverse repurchase agreements plus any accrued interest. In the event of default on the obligation to repurchase, the Company has the right to liquidate the collateral and apply the proceeds in satisfaction of the obligation. In the event of default or bankruptcy by the counterparty to the agreement, realisation and/or retention of the collateral or proceeds may be subject to legal proceedings.

Cash and cash equivalents and bank overdrafts

Cash and cash equivalents and bank overdrafts include cash in hand and bank overdrafts. All amounts are subject to insignificant changes in fair value. All cash holdings are held with State Street Bank and Trust Company with the exception of cash collateral for open FDIs. Details of collateral counterparties are located at the end of each schedule of investments for the relevant Funds.

Collateral

Cash received as collateral is recorded as an asset on the statement of financial position and is valued at its fair value. A related liability to repay the collateral is recorded as a liability on the statement of financial position and is also valued at its fair value.

1. Material accounting policies (continued)

Collateral (continued)

Broker and counterparty cash received as collateral for FDI transactions is recorded as an asset on the statement of financial position as 'cash received as collateral' and a related liability to repay the collateral is disclosed within 'creditors - amounts falling due within one year as 'collateral due to counterparties'. Where the party to whom the collateral is provided does not have the right to sell or re-pledge, a disclosure of the collateral provided is made at the end of each schedule of investments for the relevant Funds.

A Fund's assets may be deposited by or on behalf of the Fund for collateral purposes with brokers, for options and future contracts, and counterparties, in respect of OTC FDIs and TBA positions, held on the Fund. Such assets remain in the ownership of the relevant Fund and are recorded as an asset on the statement of financial position. Cash pledged by the Funds as collateral is recognised on the statement of financial position as 'cash held with brokers and counterparties for open financial derivative instruments'. Margin deposits due to brokers are recognised on the statement of financial position as 'cash due to brokers and counterparties for open financial derivative instruments'.

Swing pricing

Funds may suffer dilution of the net asset value per share due to investors buying or selling shares at a price that does not take into account dealing and other costs arising when the Investment Manager makes or sells investments to accommodate cash inflows or outflows. To counteract this, a partial swing pricing mechanism may be adopted to protect Shareholders' interests. If on any dealing day, the aggregate net transactions in shares for a Fund exceeds a pre-determined threshold, as determined by the Management Company from time to time, the net asset value may be adjusted upwards or downwards to reflect net inflows and net outflows respectively as a means of apportioning trading costs associated with such transactions to the investors that create these costs in order to protect existing or remaining Shareholders. Where the net asset value is adjusted upwards subscribing investors will pay and redeeming Shareholders will receive a higher net asset value per share than they would have done had the net asset value not been adjusted. Where the net asset value is adjusted downwards subscribing investors will pay and redeeming Shareholders will receive a lower net asset value per share than they would have done had the net asset value not been adjusted. The extent of the price adjustment will be set by the Management Company to reflect bid-ask spreads, transaction taxes, dealing and other costs. Such adjustment is not expected to exceed 3% of the original net asset value per share. Partial swing pricing may be applied by the Management Company to any Fund of the Company and is not aimed at addressing the specific circumstances of each individual investor transaction. The swing factor and swing thresholds are set and reviewed on a quarterly basis by a Wellington Management's swing pricing review group, which reports to the board of the Company on a quarterly basis. This group has the ability to respond to market events (e.g. higher market volatility) and make intra quarter adjustments. In any other cases where there are net subscriptions or redemptions in a Fund and the Directors reasonably believe that imposing a partial swing price is in the best interests of existing Shareholders, the Management Company may, at its discretion, impose one.

Income equalisation

The Directors may determine that the Company, on behalf of any of the distributing share classes of the Funds, uses an accounting technique known as income equalisation to prevent dilution of current Shareholders' earnings. This is accomplished by applying a portion of the proceeds from shares issued and redeemed, equivalent on a per share basis to the amount of undistributed net investment income on the date of the transaction. Apportioned amounts are credited or charged to undistributed income. As a result distributions of the share classes will be protected from the potential distortions caused by issues or redemptions of shares. Income equalisation is recognised in the financial statements in the statement of comprehensive income. Income equalisation is applicable on distributing share classes of all Funds.

Hedged share classes

Hedged share classes may be created for the purpose of (i) effecting currency and/or interest rate hedging at the share class level; (ii) hedging the denomination of the assets of a Fund; (iii) providing different levels of participation in the performance of the underlying portfolio of assets; (iv) providing different levels of capital protection; and (v) other arrangements similar to these which will be considered on a case-by-case basis.

Where the Company creates hedged share classes for the purpose of (i) and (ii) in the paragraph above, over-hedged or under-hedged positions may occur due to factors outside the control of the Fund. Over-hedged positions will not exceed 105% of the net asset value of each hedged share class, under-hedged positions will not fall short of 95% of the portion of the net asset value of each hedged share class which is to be hedged and hedged positions will be kept under review to ensure that positions do not exceed permitted levels and to ensure that positions materially in excess of 100% of the net asset value of the relevant hedged share class will not be carried forward from month to month.

1. Material accounting policies (continued)

Hedged share classes (continued)

To the extent that currency hedging is successful for a particular hedged share class, the performance of the hedged share class is likely to move in line with the performance of the underlying assets. The Shareholders in the hedged share classes may not benefit from circumstances (such as changes in relative currency values or changes in interest rates) from which other Shareholders benefit if (i) the class currency falls against the base currency, (ii) the class currency falls against the currency in which the Fund's assets are denominated, or (iii) interest rates fall.

All material costs (as well as any gains or losses) associated with currency hedging transactions at the share class level have been allocated to the hedged share classes engaging in such transactions. These fees are included in 'administrative fees' in the statement of comprehensive income. Details of how the gains or losses on the currency hedging transactions are allocated are provided in the material accounting policy on forward and spot foreign exchange contracts.

2. Foreign currency exchange rates

The following exchange rates have been used in preparing the financial statements. The exchange rates applied as at December 31, 2023 and December 31, 2022 were pulled at 16:00 GMT from the World Markets Company and Reuters.

The average exchange rate for the financial year ending December 31, 2023 of USD 1: GBP 0.8017 (December 31, 2022: USD 1: GBP 0.8150) and of USD 1: EUR 0.9238 (December 31, 2022: USD 1: EUR 0.9529) has been used to translate the foreign currency amounts in the combined statements for the statement of comprehensive income and the statement of changes in net assets attributable to holders of redeemable shares into US Dollars.

For the purpose of combining the financial statements of each Fund to arrive at total figures for the financial year ended December 31, 2023, the amounts in the financial statements have been translated to USD at the exchange rate ruling as at December 31, 2023 for the statement of financial position and at the average rate for the financial year for the statement of comprehensive income and the statement of changes in net assets attributable to holders of redeemable shares. The same approach was adopted for the financial year ended December 31, 2022. This method of translation has no effect on the net asset value per share attributable to the individual Funds. The foreign currency translation adjustment of USD 77,851,508 (December 31, 2022: USD (155,291,843)) included in the combined statement of changes in net assets attributable to holders of redeemable shares is due to the movement in exchange rates between January 1, 2023 and December 31, 2023 and to the difference between the average and December 31, 2022 exchange rates used in combining the financial statements. This is a notional gain or loss which has no impact on the net asset value of the Funds.

3. Shares

Authorised

The authorised share capital of the Company is EUR 38,092 comprised of 30,000 subscriber shares of EUR 1.269738 each and 500,000,000,000 redeemable shares of no par value initially designated as unclassified shares. The unclassified shares are available for issue as shares.

The subscriber shares are partly paid-up to the value of EUR 9,523 and as they do not form part of the shares of the Funds, they do not form part of the net asset value of the Funds.

They are thus disclosed in the financial statements by way of this note only. In the opinion of the Directors, this disclosure reflects the nature of the Company's investment business.

Share rights

Subscriber shares do not entitle the holders to any dividend and, on a winding up, entitle the holders to receive the amount paid-up thereon but not otherwise to participate in the assets of the Company. At a general meeting, on both a show of hands and on a poll, the holder or holders of the subscriber shares shall only have one vote in respect of all subscriber shares.

The number of subscriber shares in issue as at December 31, 2023 was 30,000 (December 31, 2022: 30,000).

Unclassified shares (''shares'') are entitled to such dividends as the Directors may from time to time declare and in the event of a winding up or dissolution of the Company, have the entitlements referred to in the Company's Prospectus. At a general meeting, for both a show of hands and on a poll, every holder of shares who is present in person or by proxy shall have one vote in respect of each whole share held by them. Shares are issued as redeemable participating shares.

3. Shares (continued)

Share rights (continued)

The issued redeemable participating share capital is at all times equal to the net asset value of the Company. The net asset value attributable to holders of redeemable participating shares of the individual Funds are at all times equal to the net asset value (''NAV'') of the respective Fund. Redeemable participating shares are redeemable at the Shareholder's option and are classified as financial liabilities.

Redeemable shares

All redeemable shares issued by the Company provide Shareholders with the right to require redemption for cash at the value proportionate to the investor's share in the Fund's net assets at the redemption date. Such shares are classified as financial liabilities.

The shares are carried at the redemption amount that is payable at the statement of financial position date if the holder exercises its redemption right to put the shares back to the Funds. Shares are issued and redeemed at the Shareholders' option at prices based on the Funds' net asset value per share at the time of issue or redemption.

The movements in the number of redeemable participating shares in the financial years ended December 31, 2023 and December 31, 2022 are as follows:

	Shares in issue December 31, 2023	*Shares issued*	*Shares redeemed*	*Shares in issue December 31, 2022*	*Shares issued*	*Shares redeemed*	*Shares in issue December 31, 2021*

5. Fees

(a) Investment management fees

Investment management fees are calculated based on the NAV of each share class using the investment management fee rates applicable to each of the share classes. Investment management fees are accrued daily and paid monthly to the Investment Manager.

The investment management fee rates applicable to each of the share classes of each of the Funds are outlined later in this note. All percentages are unchanged from December 31, 2022 unless otherwise stated. These fees are included under 'investment management fees' in the statement of comprehensive income. The amounts payable are included under 'investment management fees payable' in the statement of financial position.

(b) Distribution fees

With respect to the class D and class DL shares of each Fund and in addition the class G shares of the Wellington Global Bond Fund, class GR shares of the Wellington Emerging Local Debt Fund, class UD shares of the Wellington Global Stewards Fund, class GD shares of the Wellington India Focus Equity Fund and ED shares of the Wellington FinTech Fund the Company shall pay to financial intermediaries a distribution fee ranging from 0.30% to 1.45% per annum of the net assets attributable to those shares, as set forth in the Prospectus.

The distribution fee is paid to intermediaries to compensate the intermediary for distribution and shareholder services provided to underlying beneficial owners of Fund shares. The distribution fee is accrued daily and paid quarterly in arrears. Investors considering investing via an intermediary should be aware of these fees and the potential for conflict of interest that they create where, for example, an intermediary might be incentivised to recommend a particular Fund, or class of shares within a Fund, that has a higher distribution fee.

The distribution fee rates applicable to each of the share classes of each of the Funds are outlined later in this note. All percentages are unchanged from December 31, 2022 unless otherwise stated. These fees are included under 'distribution fees' in the statement of comprehensive income. The amounts payable are included under 'distribution fees payable' in the statement of financial position.

(c) Administrative fees

The Management Company shall be paid an administrative fee out of the assets of each Fund, attributable to the relevant class of shares. The ultimate parent company of the Management Company is Wellington Management Group LLP (Wellington Group Entities). This administrative fee is calculated as a percentage of the daily net assets of the relevant class of shares, accrued daily in the net asset value of the class of shares and paid quarterly in arrears. The administrative fee rate will vary across Funds and classes of shares, reflecting the differing expenses of such Funds and/or classes of shares, but the maximum administrative fee that is paid shall not exceed 0.25% per annum for all classes of shares with the exception of classes BN, D, DL, E, ED, EN, GD, GN, N and UN where the maximum administrative fee that is paid shall not exceed 0.40% per annum.

5. Fees (continued)

(c) Administrative fees (continued)

The administrative fee is paid for the provision of various services to the Funds. The purpose of the administrative fee is to provide a fixed level of fees to cover the expenses of the Funds for the various services provided, which expenses might otherwise be subject to fluctuation over time. The administrative fee ensures that the Funds are protected from these fluctuations, which would not be the case if the Funds were to pay such charges directly. Any increase in the maximum rate of the administrative fee shown above will only be implemented upon receipt of the affected Shareholders' approval.

The administrative fees are fixed which means that Wellington Group Entities will bear any costs and expenses incurred by the relevant class of shares in any period in excess of the administrative fee charged to the class of shares but conversely will be entitled to retain any amount of the administrative fee paid to it which exceeds the actual operating expenses incurred by the relevant class of shares during any period. Wellington Group Entities at their discretion may choose to waive a portion of the administrative fee at any time where they consider it appropriate to do so taking into account the level of assets in a particular Fund.

Further the Wellington Group Entities may instruct the Company to pay a portion of the administrative fee directly out of the assets of the Funds to any third-party service providers. In such case the administrative fee due to the Wellington Group Entities will be reduced by the same amount.

The administrative fee covers the following expenses, if applicable to the relevant class of shares:

- Depositary fees and reasonable, properly incurred out of pocket expenses
- Administrator fees and reasonable out of pocket expenses
- Transfer Agent fees and reasonable out of pocket expenses
- fees relating to services provided to the Company by affiliates within the Wellington Management group, including, but not limited to, providing, procuring, overseeing, and/or monitoring of various services including administrative, domiciliary, corporate, risk management, regulatory compliance, reporting services and fees incurred by these entities and payable to third parties providing certain infrastructure and other support services
- fees in consideration of the services provided by the Distributor (and its affiliates) in establishing, servicing on an ongoing basis and administering relationships with financial intermediaries and distributors and the cost incurred, including the costs of performing diligence on financial intermediaries/distributors, the additional oversight of third parties service providers, and the provision of additional marketing support
- fees of the Directors of the Company who are not employed by affiliates of the Wellington Management group, as well as reasonable out of pocket expenses incurred in discharging their Directors' duties
- Auditor's and Company secretarial fees and reasonable out of pocket expenses
- professional costs (including, without limitation, the fees and disbursements of counsel, consultants, tax and other advisers or third-party support services) that may be incurred by the Company, the Depositary, the correspondents or the Administrator or affiliates of the Wellington Management group while acting in the interest of the Shareholders
- the costs of taking out and maintaining any insurance policy in relation to the Company and/or its Directors
- any start-up costs associated with the creation of a new Fund or class and the offer of its shares
- the costs associated with preparing and/or filing, translating, distributing, or maintaining any materials or documents of the Company, including, without limitation, the Prospectus (as well as any amendments or supplements), Key Investor Information Documents, Fact sheets, websites, annual and semi-annual reports or other documents as may be required under the Articles of Association or under the applicable laws or regulations as well as registration or private placement costs incurred for purposes of distributing shares of the Company (including any lawyers', auditors' and other experts' fee in connection with the foregoing, as well as any administrative charges or taxes incurred) and the costs associated with ratings and/or ranking of Funds
- fees payable to third parties for currency management services in relation to the hedged share classes or SC and TC share class (with the exception of the Wellington Emerging Local Debt Advanced Beta Fund, where fees for services related to managing currency at the share class level are borne by the Investment Manager directly).

The funds use a volume discount mechanism ("VDM") which allows to pass on economies of scale achieved by a Fund reaching significant levels of assets.

The administrative fee rates applicable to each of the share classes of each of the Funds are outlined later in this note. All percentages are unchanged from December 31, 2022 unless otherwise stated. These fees are included under 'administrative fees' in the statement of comprehensive income. The amounts payable are included under 'administrative fees payable' in the statement of financial position.

5. Fees (continued)

Summary of fee rates per share class and Total Expense Ratios (TER)

The investment management fees, distribution fees, administrative fees and ongoing charges rates (which is the sum of those three fee types) applicable to each of the share classes of each of the Funds for the financial year ended December 31, 2023 are outlined below.

The below table also shows the ongoing charges rates for the financial year ended December 31, 2022.

Details of share class launches and closures during the financial year ended December 31, 2023 are listed in the relevant Investment Manager's report.

Ongoing charges are equivalent to the total expense ratios calculated for the twelve months ended December 31, 2023 and December 31, 2022. Total Expense Ratios have been calculated in accordance with the Asset Management Association Switzerland guidelines dated August 5, 2021 and effective from January 1, 2022.

[1] The fixed administrative fee increased from 0.21% to 0.22% effective from April 1, 2023, and decreased to 0.21% effective from July 1, 2023, for share classes USD D, USD N, EUR DL and GBP N (hedged).

[2] The fixed administrative fee increased from 0.11% to 0.12% effective from April 1, 2023, and decreased to 0.11% effective from July 1, 2023, for share classes USD S, USD S Q1 (distributing), USD T, EUR S (hedged) and GBP S (hedged).

[3] The fixed administrative fee decreased from 0.15% to 0.14% effective from July 1, 2023, and increased to 0.15% effective from October 1, 2023, for share classes USD G, USD GR, USD NI, USD NR, USD S, USD T, CHF S, EUR G, EUR NR (hedged), EUR S, EUR S Q1 (distributing), GBP S, GBP S (hedged), GBP T and JPY G.

[4] The fixed administrative fee decreased from 0.25% to 0.24% effective from July 1, 2023, and increased to 0.25% effective from October 1, 2023, for share classes USD GN, USD N and EUR N (hedged).

[5] Prior to April 1, 2023 the administrative fee was 0.07%.

[6] Prior to July 1, 2023 the administrative fee was 0.16%.

(d) Performance fees

In addition to the base investment management fee, the Investment Manager may also be paid a performance fee, based on the share class' net return or NAV per share (excluding any swing pricing adjustment) but inclusive of any performance fee previously accrued in respect of such performance period.

The period at the end of which the accrued performance fee is crystallised and paid (the "performance period") is generally the Company's fiscal year (January 1 — December 31), but may also begin or end mid-year in certain circumstances a) from the launch of a Fund or share class to the performance period end, b) from the previous performance period end to the closure of a Fund or share class. When this occurs, the performance period may be less than one calendar year.

The performance fee is crystallised at the end of the performance period and is paid as soon as practicable after the end of the relevant performance period. The end of the performance period is generally the Company's fiscal year end, except where a Fund or share class closes mid-year as described above. As well as crystallising at the end of each performance period, a proportion of accrued performance fees is crystallised on any dealing day (other than the last dealing day of the performance period) in which there is a net reduction in the number of shares in a share class but only in respect of such net reduction. Any accrued performance fee with respect to such net reduction of shares will crystallise on that dealing day and will be paid as soon as is practicable to the Investment Manager.

5. Fees (continued)

(d) Performance fees (continued)

The calculation of the performance fee is verified by the Depositary and is based on unswung Fund net asset values.

This fee is included under 'performance fees' in the statement of comprehensive income. The amounts payable are included under 'performance fees payable' in the statement of financial position.

The below table also shows the actual performance fees incurred by share class of Fund and the relevant total expense TER during the previous twelve months ended December 31, 2023 and December 31, 2022 expressed as a percentage of the average net asset value of each Fund for the corresponding period.

* The % net assets is calculated based on the average net assets of each share class in the financial year.

For certain classes a High Water Mark, Performance Benchmark, Hurdle or Performance Benchmark with a High Water Mark may also be applicable:

(i) High water mark (HWM)

Where a HWM mechanism applies, a performance fee will be accrued on the basis of the increase in a share class' NAV per share in excess of the HWM, over a performance period, multiplied by the average number of shares in issue for the performance period calculated for each dealing day.

The average number of shares used for the performance fee calculation is calculated on each dealing day and adjusted on any dealing day in which there is a net reduction of shares in a share class. At the launch of a share class, the HWM means the initial issue price and is taken as the starting point for the performance fee calculation. If the NAV per share on the last dealing day of a performance period is higher than the previous HWM, the HWM is set to the NAV per share calculated at the end of the performance period.

To the extent that the share class' NAV per share did not exceed its HWM at the end of a performance period, the HWM is carried forward, and no performance fees will be accrued until the NAV per share of that share class exceeds its HWM in a subsequent performance period. When this occurs, the performance period will extend beyond one year and continue until the end of the next performance period when a performance fee does crystallise. The HWM will be adjusted for any distributions in the case of a distributing share class.

(ii) Performance benchmark

Where a performance benchmark applies, a performance fee may be accrued on the basis of a share class' net return per share in excess of the return of the performance benchmark over a performance period, multiplied by the average number of shares in issue for the performance period calculated on each dealing day. The average number of shares used for the performance fee calculation is calculated on each dealing day and adjusted on any dealing day in which there is a net reduction of shares in a share class. The performance benchmark is expressed in the denomination currency of the relevant share class, or for hedged share classes, hedged to the denomination currency of the relevant class. If the net return per share on the last dealing day of a performance period is higher than the performance benchmark over the same period, the performance fee will crystallise. The net return per share may exceed the performance benchmark and crystallise a performance fee even where the share class' NAV per share decreases.

5. Fees (continued)

(d) Performance fees (continued)

(ii) Performance benchmark (continued)

To the extent that a class did not exceed its performance benchmark at the end of a performance period, no performance fee will accrue until the class' cumulative net return exceeds the cumulative performance benchmark return over the same period. When this occurs, the performance period will extend beyond one year and continue until the next fiscal year end that a performance fee does crystallise. The performance benchmark will be adjusted for any distributions in the case of a distributing share class.

(iii) Hurdle

Where a Hurdle mechanism applies, a performance fee may be accrued on the basis of a share class' NAV per share in excess of the Hurdle over a performance period multiplied by the average number of shares in issue for the fiscal year calculated on each dealing day. The average number of shares used for the performance fee calculation is calculated on each dealing day and adjusted on any dealing day in which there is a net reduction of shares in a share class. The Hurdle is the initial issue price of a share plus a predefined rate, set on a Fund by Fund basis. The Hurdle is calculated as a percentage of the initial Issue price, annualised to create a daily rate which is accrued daily for that performance period.

In the event that the NAV per share of a share class is higher than the accrued Hurdle on the last dealing day of that performance period, the performance fee will crystallise, and the Hurdle for the following year will be the previous performance period end NAV per share of that share class plus the predefined rate annualised, and accrued daily. To the extent that a share class' NAV per share does not exceed the Hurdle on the last dealing day of the performance period, no performance fee will crystallise, and the new Hurdle for the following year will be the Hurdle from the last dealing day of the previous performance period, plus a rate equal to the predefined rate, annualised and accrued daily. When this occurs, the performance period will extend beyond one year and continue until the end of the next performance period when a performance fee does crystallise.

Note that for any non-base currency classes which are unhedged, the performance fee accrual will be calculated based on the class' net return in excess of the Hurdle which may be positively or negatively impacted by currency differentials between the Fund's base currency and the currency of the unhedged class. As a result the performance fee for these classes may differ from the performance fees for hedged/base currency classes. The Hurdle for distributing share classes will be reduced for any distributions made with respect to such share classes.

(iv) Performance benchmark with HWM

Where a performance benchmark with a HWM applies, a performance fee will be accrued on the basis of a share class' net return per share in excess of the performance benchmark and the HWM, over a performance period, multiplied by the average number of shares in issue for the fiscal year calculated on each dealing day.

The average number of shares used for the performance fee calculation is calculated on each dealing day and adjusted on any dealing day in which there is a net reduction of shares in a share class. The performance benchmark is expressed in the denomination currency of the relevant share class, or for hedged share classes, hedged to the denomination currency of the relevant class. At the launch of a share class, the HWM means the initial issue price and is taken as the starting point for the performance fee calculation. If (i) the net return per share on the last dealing day of a performance period is higher than the performance benchmark over the same period and (ii) the NAV per share is higher than the previous HWM, then the performance fee will crystallise.

If the NAV per share on the last dealing day of a performance period is higher than the previous HWM, the HWM is set to the NAV calculated at the end of the performance period. To the extent that a share class' net return per share did not exceed its performance benchmark and the NAV per share did not exceed the HWM at the end of a performance period, no performance fee will accrue until the share class' cumulative net return exceeds the cumulative performance benchmark return and the NAV per share exceeds the HWM over the same period. When this occurs, the performance period will extend beyond one year and continue until the next performance period when a performance fee does crystallise. The HWM and performance benchmark will be adjusted for any distributions in the case of a distributing share class.

5. Fees (continued)

(d) Performance fees (continued)

(iv) Performance benchmark with HWM (continued)

Fund name	Performance benchmark	Predefined rate* (for Hurdle)	HWM	Class	Performance fee
Wellington Durable Companies Fund	N/A	8%	-	S,D,N	10%
Wellington Enduring Assets Fund	N/A	8%	-	G,GD,GN	10%
Wellington US Dynamic Equity Fund	S&P 500 Index	-	-	S,D,N,E,EN	20%

* The predefined rate is an additional amount added to the Hurdle which is set on a Fund by Fund basis and approved by the Directors.

Due to differences in timing between their date(s) of investment and a class' performance fee calculation period, subscribers and Shareholders of the Fund should be aware that their own individual performance experience as a Shareholder may not be equivalent to the actual performance of the Fund on which the performance fee is calculated and paid, and the performance fee paid to the Fund may be higher or lower than the actual performance they experience as a Shareholder. Although a daily accrual of a portion of the performance fee in a class' net asset value mitigates some of these timing differences, the performance fee is calculated and paid based on the class' fiscal year assets and performance, not on the basis of a Shareholder's specific assets or performance.

The class' net return on which the performance fee is based, includes net unrealised gains and losses as at the end of each calculation period and as a result, a performance fee may be paid on unrealised gains which may subsequently never be realised. The performance fee is calculated prior to any dilution adjustments and is verified by the Depositary on a periodic basis. Performance fees are paid where the relevant high water mark is surpassed, which may be achieved due to market movements.

6. Related party transactions

Transactions with key management personnel

Related parties include the Company's Directors, the Investment Managers of the Funds, Wellington Global Administrator, Ltd as the Distributor of the Funds, Wellington Luxembourg S.à r.l. as the Management Company and the Wellington Group Entities as the receivers of the administrative fee.

At the date of these financial statements neither the Directors nor any associated person have any beneficial interest in the share capital of the Company or any options in respect of such capital.

For the financial year ended December 31, 2023 the amount earned by the Directors was $204,563 and this is covered by the administrative fee (December 31, 2022: $197,321).

Transactions with the Investment Managers and affiliates

Amounts earned by the Investment Managers, the Distributor and Wellington Group Entities are disclosed in the statement of comprehensive income. Performance fees earned are also disclosed in the statement of comprehensive income. Fee amounts payable at financial year end are disclosed in the statement of financial position. Details of the investment management, distribution, administrative and performance fee rates are disclosed in note 5.

As at December 31, 2023 and December 31, 2022 a Shareholder affiliated to one of the following Investment Managers: Wellington Management Company LLP, Wellington Management International Ltd, Wellington Management Singapore Pte Ltd and Wellington Management Hong Kong Limited owned shares in a number of the Funds, details of which are disclosed in the tables below.

A Fund has a concentration risk in relation to total Fund net assets in situations where most issued shares of the Fund are held by a small number of investors. In such a situation, if investors were to redeem all or a significant proportion of their investment, this could have an impact on the operations of the Fund, including the ability of the Fund to continue as a going concern. Funds with a single investor as at December 31, 2023 and December 31, 2022 are also disclosed in the table below.

6. Related party transactions (continued)

Cross trades

Wellington Group carries out order execution on behalf of the Funds. These orders are executed in accordance with Wellington Group policies and procedures. Occasionally Wellington Group may execute a purchase and a sale of the same security between client accounts (a "cross trade") for accounts eligible to participate in such trades. Wellington Group initiates such trades between eligible client accounts when it reasonably determines that the trade is consistent with the guidelines of the transacting client accounts and achieves best execution on behalf of each participating client account. During the financial year ended December 31, 2023, there were the following cross trades:

Fund	Trade amount
Wellington Durable Companies Fund	USD 2,291,876
Wellington Durable Enterprises Fund	USD 852,407
Wellington Emerging Market Development Fund	USD 1,993,600
Wellington Emerging Markets Equity Fund	GBP 19,131
Wellington Global Health Care Equity Fund	USD 1,048,658
Wellington Global Impact Fund	USD 1,754,494
Wellington Global Perspectives Fund	USD 4,525,211
Wellington Global Property Fund	USD 35,907
Wellington Strategic European Equity Fund	EUR 3,046,929

6. Related party transactions (continued)

Cross trades (continued)

The cross trades have been carried out at arm's length and in the best interests of investors in the transacting funds.

7. Dividends distributions

The following distributions were declared for Funds for the financial year ended December 31, 2023. For all other Funds there were no distributions declared.

* Transaction costs are covered under the administrative fee which is disclosed in the statement of comprehensive income for each Fund. These costs already form part of the TER calculation.

As described in the material accounting policies Note 1, transaction costs in the table above do not include costs which cannot be separately identified and disclosed.

10. Soft commission arrangements and directed brokerage

Soft commission transactions occur when the Investment Manager uses certain investment research services which assist in the management of a Fund's investments and which arrangements are paid for by certain brokers. These services may include, for example, research and analysis of the relative merits of individual shares or markets. In return, the Investment Manager places a proportion of business with these brokers including transactions relating to the Fund's investments. The Investment Manager has satisfied itself that it obtains best execution on behalf of the Funds and that these arrangements are to the benefit of the Funds.

There were soft commission transactions during the financial year ended December 31, 2023 in the following Funds:

Wellington All-China Focus Equity Fund, Wellington Durable Companies Fund, Wellington Durable Enterprises Fund, Wellington Emerging Market Development Fund, Wellington Emerging Markets Equity Fund, Wellington Emerging Markets Local Equity Fund, Wellington Emerging Markets Opportunities Fund, Wellington Enduring Assets Fund, Wellington FinTech Fund, Wellington Global Health Care Equity Fund, Wellington Global Impact Fund, Wellington Global Perspectives Fund, Wellington Global Property Fund, Wellington Global Stewards Fund, Wellington India Focus Equity Fund, Wellington Universal Vision Fund, Wellington US Dynamic Equity Fund and Wellington Multi-Asset Total Return Income Fund.

There were soft commission transactions during the financial year ended December 31, 2022 in the following Funds:

Wellington All-China Focus Equity Fund, Wellington Durable Companies Fund, Wellington Durable Enterprises Fund, Wellington Emerging Market Development Fund, Wellington Emerging Markets Equity Fund, Wellington Emerging Markets Local Equity Fund, Wellington Emerging Markets Opportunities Fund, Wellington Global Impact Fund, Wellington Global Perspectives Fund, Wellington Global Property Fund, Wellington Global Stewards Fund, Wellington India Focus Equity Fund, Wellington Universal Vision Fund, Wellington US Dynamic Equity Fund and Wellington Multi-Asset Total Return Income Fund.

There were no directed brokerage services utilised for the financial years ended December 31, 2023 and December 31, 2022.

11. Taxation

Under current Irish law and practice, the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997 as amended. On that basis, it is not chargeable to Irish tax on its income and gains.

However, Irish tax may arise on the happening of a "chargeable event". A chargeable event includes any distribution payments to Shareholders or any encashment, repurchase, redemption, cancellation, transfer or deemed disposal of shares and the holding of shares at the end of each eight year period beginning with the acquisition of such shares.

11. Taxation (continued)

No Irish tax will arise on the Company in respect of chargeable events in respect of:

(i) a Shareholder who is not Irish resident and not ordinarily resident in Ireland for tax purposes at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997 as amended, are held by the Company or the Company has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and

(ii) certain exempted Irish tax resident investors who have provided the Company with the necessary signed statutory declarations.

Dividend income, interest and capital gains (if any) received on investments made by the Company may be subject to withholding and capital gains taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its Shareholders, although where possible or appropriate, the Company may file for tax reclaims or exemptions.

12. Financial derivative instruments and other financial instruments

In accordance with IFRS 7 Financial Instruments: Disclosure, this note details the way in which the Company manages risks associated with the use of financial instruments.

General risk management process

As an Investment Company, the management of financial instruments is fundamental to the management of the Company's business.

The Company's risk management function is represented by the Permanent Risk Management Function (''PRMF'') of the Management Company who manages risk on a day-to-day basis under the leadership and supervision of the Conducting Officer in charge of the risk management function. The Board reviews at least annually the risk management policy and procedures in place and the Conducting Officers monitor on an ongoing basis the reports prepared by the PRMF. The Board and the Conducting Officers may issue risk guidelines which will be binding on the Investment Managers. Currently the guidelines include monitoring and highlighting any deviation from the investment objective and policy of each Fund and ensuring that each Fund's global exposure from the use of FDIs, and the counterparty exposure to any counterparty, is maintained within the parameters set out by the Central Bank of Ireland. The PRMF monitors these guidelines and the Investment Managers also perform such reviews through their oversight and portfolio management functions.

The full list of authorised OTC FDIs counterparties was presented to and approved by the Board of Directors during the Board of Directors meeting covering the second and third quarters of the year under review.

As defined in the reporting standard, risk can be separated into the following components: market risk, credit risk and liquidity risk. Each type of risk is discussed in turn and qualitative and quantitative analyses are provided where relevant to give the reader an understanding of the methods used by PRMF, the Conducing Officers and the Board of Directors to manage and monitor the risks.

(a) Market risk

This is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and market price risk.

(i) Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. This risk arises on financial instruments that are denominated in a currency other than the functional currency in which they are measured.

For the purposes of IFRS 7, currency risk does not arise from financial instruments that are non-monetary items or from financial instruments denominated in the functional currency. Further information on the foreign currency exposures of the Funds is provided within the schedule of investments. The sensitivity of the Funds to foreign currency risk is incorporated in the VaR analysis provided in the market risk section of this note below.

12. Financial derivative instruments and other financial instruments (continued)

General risk management process (continued)

(a) Market risk (continued)

(ii) Interest rate risk

This is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The sensitivity of the Funds to interest rate risk is incorporated in the VaR analysis provided in the market risk section of this note below.

(iii) Market price risk

This is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk and currency risk), whether those changes are caused by factors specific to individual financial instruments or their issuer, or other factors affecting similar financial instruments traded in the market.

(b) Credit risk

This is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. This is also referred to as counterparty risk. In relation to the Company, it can arise from receivables from another party, placing deposits with other entities, transacting in debt securities and entering into FDI contracts.

Counterparty risk associated with transacting in debt securities is monitored by use of credit ratings. For Funds investing in debt securities, the investment objectives provide details of the credit rating restrictions imposed on that Fund.

In addition, those Funds using OTC FDIs have an exposure to counterparty risk such that the counterparty may become insolvent or otherwise incapable of meeting its obligations under an FDI contract. This includes the legal risk arising from a contract not being enforceable.

The Management Company is responsible for approving counterparties for use in OTC FDI arrangements, periodically reviewing quantitative and qualitative criteria designed to reduce the risk of counterparty default.

This includes a calculation of counterparty exposure and overall issuer exposure. Each Fund has the following set exposure limits:
- Counterparty exposure limit is 5% or 10% of a Fund's NAV depending on the nature of the counterparty;
- Overall issuer exposure limit is 20% of a Fund's NAV*

* This is not applicable for transferable securities or MMIs which are issued or guaranteed by EU or Non-EU Member States.

The methods and calculation examples used by PRMF to ensure compliance with the above set limits are detailed in the risk management process statement that is reviewed regularly by the Board of Directors and is filed with the Central Bank at least annually.

(c) Liquidity risk

This is the risk that the Company will encounter difficulty in meeting obligations associated with its financial liabilities. The Company has availed itself of the segregated liability provisions of the Companies Act. As such there is no potential for cross liability between the Funds. This means that liquidity risk needs to be managed at the Fund level.

Each Fund's assets comprise mainly readily realisable securities. The main financial liability of each Fund is the redemption of redeemable shares. As an open-ended investment company with variable capital, the Company is required to sell shares back to Shareholders at a price equivalent to the net asset value per share, subject to settlement and dealing restrictions laid down in the Company's Constitution and Prospectus.

To meet the redemption liability the Funds may be required to unwind positions in FDIs or sell securities. Those Funds that are either heavily invested in FDIs or hold securities in less liquid or illiquid markets may find it more difficult to unwind these positions quickly. This can lead to investments not being liquidated at fair value.

12. Financial derivative instruments and other financial instruments (continued)

General risk management process (continued)

(c) Liquidity risk (continued)

PRMF monitors the liquidity of each Fund on a periodic basis, at least monthly, to ensure that each Fund's current liquidity aligns with its liquidity profile. In some cases the Investment Manager may make use of access products or ETFs to allow exposure to all required markets whilst maintaining sufficient liquidity. Also the Directors are able, by the provisions in the Prospectus, to defer settlement of redemptions of significant size to facilitate an orderly disposition of securities as is in the interests of the remaining Shareholders. The Company is entitled to limit the number of shares of any Fund redeemed on any Dealing Day to 10% of the total number of shares of that Fund in issue. In this event, the limitation will apply pro rata so that all Shareholders wishing to have shares of that Fund redeemed on that dealing day realise the same proportion of redeemed shares. Shares not redeemed, but which would otherwise have been redeemed, will be carried forward for redemption on the next dealing day and will be dealt with in priority (on a pro rata basis) to redemption requests received subsequently.

Finally, all FDIs carry some liquidity risk. The liquidity of the underlying assets of the FDIs as well as the residual maturity of the contract are generally the main drivers of the liquidity risk. PRMF monitors the current liquidity of the Funds on a periodic basis, at least monthly, to ensure that each of the Funds current liquidity aligns with its liquidity profile.

If at any time the monitoring process identifies a deterioration of market liquidity that results in a level that is inconsistent with the Funds liquidity profiles, PRMF will direct the Investment Managers, if required, to bring the Funds liquidity back to an acceptable level.

The liquidity algorithm has the following warning signals:
- If the sum of positions that can be fully liquidated within 3 days does not exceed 10% of the NAV;
- If the sum of positions that cannot be fully liquidated within 30 days exceeds 5% of the NAV.

This liquidity analysis based on actual Fund holdings and assets under management as of December 31, 2023 did not trigger any warning signal.

For equities and single-name equity derivatives, days-to-cash ("DTC") is computed based on 15% of trailing 3-month volume sourced from FactSet and Bloomberg, plus a 2-day settlement period.

For bonds and single-name credit derivatives, a DTC is computed based on normal expected trade sizes derived from Wellington Management's internal trader survey, plus standard settlement periods by security type. Other security types are assigned a default DTC value by Wellington Management. This aims to capture the time to convert holdings to cash, incorporating the time to trade and the time to settle. Each security's weight is allocated to liquidity buckets on a pro-rata basis, based on the portion of the security that can be converted to cash within each time period. Securities are aggregated into liquidity buckets based on absolute notional value, with the exception of rates and currency derivatives which are measured at absolute market value. Cash is excluded.

Financial derivative instruments

Some of the Funds make use of FDIs to aid in managing their risks and market exposures. Some of these FDIs also carry with them their own inherent risks. The FDIs are held in pursuit of the investment objectives of the Funds and for efficient portfolio management purposes, including hedging against risk. The FDIs and other financial instruments note should be read in conjunction with the schedule of investments, where details of the counterparties used and collateral held are disclosed. The types of FDIs used currently and the reasoning behind their use are summarised as follows:

Forward foreign exchange contracts

These are used both in order to hedge unwanted currency risk as well as to achieve a specific currency exposure. Forward foreign exchange contracts have the risk of currency exposure in the same way as a regular currency spot transaction.

Forward foreign exchange contracts are OTC FDIs traded and therefore have counterparty risk. Forward foreign exchange contracts also carry roll risk, which is the risk that when a forward contract expires, a new forward foreign exchange contract to replace the expired one cannot be put into place at the same cost or on the same hedge basis. This may occur due to changes in market liquidity or interest rates, resulting in a potential slippage or loss in the hedge position due to the contract expiration and roll.

12. Financial derivative instruments and other financial instruments (continued)

General risk management process (continued)

Financial derivative instruments (continued)

Future contracts

Interest rate future contracts are used to both achieve targeted interest rate exposure as well as to hedge unwanted exposure. Future contracts are also frequently used to achieve targeted duration segments along the yield curve. Interest rate future contracts are exchange traded and carry the interest rate risk (duration) of the cheapest to deliver bond in the deliverable basket, or the otherwise contractually set interest rate risk. Bond future contracts with a basket of allowed deliverable bonds also carry so called basis risk that can affect the returns on the margin.

Currency future contracts are used in the Funds to hedge unwanted currency exposure as well as to gain access to exposures sought in the Funds. Currency future contracts are exchange traded and do not carry counterparty risk but have the same currency risk as the underlying currency transaction.

Options and swaptions

These are used to gain investment exposure and hedge exposures both in the global fixed income markets as well as the currency market. Options and swaptions can be both exchange traded as well as OTC FDIs. Options carry the delta weighted risk of the underlying asset such as a bond or a currency pair and swaptions carry the delta weighted risk of the underlying swaps. Options on a bond future also carry the same basis risk as the future contract. In addition, OTC traded FDIs have counterparty risk.

Swaps

A credit default swap is an instrument used to seek exposure or protection from a credit default event. Interest payments are made or received on a net basis on the stated payment dates and are recognised as gains or losses in the period in which they arise.

The Funds may enter into a credit default swap to isolate and transfer the credit risk associated with a particular reference asset. Credit default swaps provide a measure of protection against defaults of debt issuers. The use of credit default swaps does not assure their use will be effective or will have the desired result. The Funds may either be the buyer or the seller in a credit default swap transaction. Credit default swaps are transactions under which the parties' obligations depend on whether a credit event has occurred in relation to the reference asset. The credit events are specified in the contract and are intended to identify the occurrence of a significant deterioration in the creditworthiness of the reference asset.

If a Fund is a buyer and no credit event occurs, that Fund's losses will be limited to the periodic stream of payments over the term of the contract. As a seller, the Fund will receive a fixed-rate of income throughout the term of the contract, provided that there is no credit event. If a credit event occurs, the seller must pay the buyer the full notional value of the reference obligation in exchange for such obligation or the difference between the notional and market values of the obligation, if agreed between the parties.

Interest rate and total return swaps are used to adjust sector exposures without paying the transaction costs associated with purchasing individual securities. Interest rate swaps are also used to adjust interest rate exposures at the individual country and aggregate Fund levels, while allowing for more precise yield curve positioning. Swaps are two party contracts and therefore carry counterparty risk. In addition, because swaps are two-party contracts and may have terms of greater than seven days, swap contracts may be considered to be illiquid or difficult to value.

TBAs

TBA commitments are forward agreements for the purchase or sale of mortgage-backed securities for a fixed price, with payment and delivery taking place beyond the customary settlement period. The specific securities to be delivered are not identified at the trade date; however, delivered securities must meet certain specified terms, including issuer, rate, and mortgage terms.

Warrants

Warrants are sometimes used to gain exposure to emerging market equities where custody, liquidity, or other issues make ownership of local shares sub-optimal. It is expected that warrants will have similar market risk characteristics as the underlying equity security. In addition, these instruments have issuer (counterparty) risk to the issuer of the warrant and may have different liquidity risks as deemed appropriate by the Investment Manager.

12. Financial derivative instruments and other financial instruments (continued)

General risk management process (continued)

Financial derivative instruments (continued)

Warrants (continued)

Finally, all FDIs carry some liquidity risk in times of extreme volatility of financial markets.

Fund specific risk management process

As UCITS Funds, the Funds are required to adhere to investment and borrowing powers laid down by the UCITS directives. Among other restrictions, the Funds are restricted to holding a maximum of 10% of the total net asset value of the Funds in any one particular security. Compliance with these restrictions is monitored both by the Investment Manager and by the Depositary.

In addition to UCITS restrictions, the investment objectives of the Funds contain specific self-imposed restrictions. The investment objectives also determine the impact of each type of risk on a particular Fund. The investment objective for each Fund is given in full in the Investment Manager's reports.

In accordance with IFRS 7, the following section gives a detailed analysis of how each Fund manages the various elements of risk.

(a) Market risk

The Management Company monitors all elements of market risk by means of an integrated value at risk ('VaR') approach. This is a complex risk monitoring strategy that measures the expected market value decrease of a given Fund over a specified time horizon, measured in a specified unit of currency within a particular confidence interval. The VaR approach also identifies interest rate and foreign currency exposure experienced by the Fund.

The Management Company will apply an Advanced Risk Measurement Approach to assess market risk of each Fund under the UCITS VaR approach and ensure the leverage effect of using FDIs is not significant enough to cause disproportionate losses to a Fund's overall value.

Below is the list of parameters regarding the VaR calculation:

- A one day holding period.
- A 99 percent confidence level does not reflect losses that may occur beyond this level, meaning that within the model used there is a 1 percent probability that losses could exceed the VaR.
- VaR is calculated on an end of day basis and does not reflect exposures that may arise on positions during the trading day.
- The use of historical data as a basis for determining the possible range of future outcomes may not always cover all possible scenarios, especially those of an exceptional nature.
- The VaR measure is always dependent upon the Fund's position and the volatility of market prices.
- The VaR of an unchanged position reduces if market volatility reduces and vice versa.

Although VaR is an important tool for measuring market risk, the assumptions on which the model is based give rise to some limitations, including the following:

- The models are based on historical data and cannot take account of the fact that future market price movements, correlations between markets and levels of market liquidity in conditions of market stress may bear no relation to historical patterns.
- The market price risk information is a relative estimate of risk rather than a precise and accurate number.
- The market price information represents a hypothetical outcome and is not intended to be predictive (in the case of probability-based methods, such as VaR, profits and losses are almost certain to exceed the reported amount with a frequency depending on the confidence interval chosen).
- Future market conditions could vary significantly from those experienced in the past.

The absolute VaR approach measures the maximum potential loss at a given confidence level (probability) over a specific time period under normal market conditions. Funds using VaR approach to compute their Global Exposure are complying with the VaR limits defined in the CESR guideline 10/788 and a Monte Carlo fat-tailed model is used to compute their VaR. The VaR of Funds is computed via a parametric VaR model.

12. Financial derivative instruments and other financial instruments (continued)

Fund specific risk management process (continued)

(a) Market risk (continued)

The absolute VaR of Funds under the UCITS commitment approach is computed under a parametric VaR model whose volatility is derived from both implied volatility and historical volatility. This involves estimating a projected volatility for the portfolio and converting that into VaR given a 1 day holding period and a 99% confidence level.

Absolute VaR	VaR December 31, 2023	VaR December 31, 2022

Wellington Multi-Asset Total Return Income Fund	1.46%	1.30%

Impairment assessment

IFRS 9 requires an impairment assessment to be carried out on the Company's financial assets. Management has assessed that impairment does not apply to financial assets classified as fair value through profit or loss. For the financial assets measured at amortised cost, where applicable, the Company measures credit risk and expected credit loss using probability of default, exposure at default and loss given default.

Management considers historical analysis and forward-looking information in determining any expected credit loss. As at December 31, 2023 and December 31, 2022, Management has determined the probability of default on financial assets carried at amortised cost to be low, as they are short-term in nature (i.e. interest receivable, receivables due from brokers), and accordingly no loss allowance has been recognised based on the 12-month expected credit loss as any such impairment would be insignificant.

12. Financial derivative instruments and other financial instruments (continued)

Fund specific risk management process (continued)

(b) Credit risk

The Funds are exposed to credit risk on cash & cash equivalents, debtors, debt securities and FDIs. The Funds' maximum exposure to credit risk at the statement of financial position date is the value disclosed on the statement of financial position and the schedule of investments of each Fund.

The table below details the schedule of investments by investment grade for all Funds which invest in debt securities.

As noted earlier on this note, some of the Funds use FDIs. These Funds are exposed to credit risk in respect of the counterparties to those FDIs, however such credit risk is mitigated by collateral received. Further information on the exposures of the Funds and the related collateral are provided in the schedule of investments and also in the offsetting section of this note below.

There were no material carrying amounts of financial assets that would otherwise be past due or impaired whose terms have been renegotiated as at December 31, 2023 (December 31, 2022: Nil).

Substantially all of the cash and securities held by the Company are held via State Street Custodial Services (Ireland) Limited (the "Depositary"). State Street Bank and Trust Company acts as the Global Depositary for State Street Custodial Services (Ireland) Limited. Bankruptcy or insolvency by the Depositary may cause the Company's rights with respect to the cash and securities held by the Depositary to be delayed or limited. The credit rating of the Depositary is highly rated by prominent rating agencies. If the credit quality or financial position of the Depositary deteriorates significantly, the Board of Directors in conjunction with the Investment Manager will attempt to move the cash holdings to another bank.

The Company's securities are always separately identified on the books and records of State Street Bank and Trust Company, therefore the rights, with respect to those securities, are preserved. Thus in the event of insolvency or bankruptcy of the Depositary, the Company's assets are segregated and protected and this further reduces counterparty risk. Cash cannot be registered in the name of, or identified as beneficially owned by a client, nor can it practically be held in physical segregation, however, for all major currencies, the cash at the sub depositary is maintained in correspondent accounts of State Street Bank and Trust Company. The Company's asset is a deposit with State Street Bank and Trust Company that is not conditional upon the solvency of a correspondent bank.

(c) Liquidity risk

The Company's financial liabilities and net settled financial liabilities comprises forward foreign exchange contracts, future contracts, options, warrants, swaps and accrued expenses. Substantially all had a maturity of not greater than 6 months based on the remaining period as at December 31, 2023 and for the comparative period December 31, 2022 to the contractual maturity date. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

(d) Global exposure

Currently the UCITS guidelines include monitoring and highlighting any deviation from the investment objective and policy of each Fund and ensuring that each Fund's global exposure from the use of FDIs, and the counterparty exposure to any counterparty, is maintained within the parameters set out by the Central Bank of Ireland. PRMF monitors these guidelines and the Investment Managers also perform such reviews through their oversight and portfolio management functions.

For those Funds employing relative VaR, the VaR of a Fund shall not exceed twice the VaR on a comparable benchmark.

Since relative VaR is an integral part of the Funds' market risk management, a VaR limit of 200% has been established for all relevant Funds. These limits are monitored daily by the Risk management team of the Investment Manager. The Risk management team monitored the total global exposure of the Funds for the observation period from January 1, 2023 to December 31, 2023 and comparative period January 1, 2022 to December 31, 2022, utilising the VaR calculated on a relative basis.

As part of the UCITS monitoring of derivative use, the Depositary reviews the relative and absolute VaR on a daily basis.

12. Financial derivative instruments and other financial instruments (continued)

Fund specific risk management process (continued)

(d) Global exposure (continued)

In accordance with the various investment objectives of the Funds within the Company, the Investment Manager does not expect to utilise bank borrowing. However, it is expected that the various Funds will generally incur leverage through the use of FDIs. The Funds could incur a higher level of leverage because of their use of FDIs for investment purposes and because of the potential for adverse movements of both the long and short strategies being adopted. In calculating leverage the Investment Manager will utilise the gross notional approach for Funds under the UCITS VaR approach, calculated as the sum of the notional of the FDIs used. The daily average is used to calculate an average leverage percentage for each Fund, previously and for the comparative observation period January 1, 2022 to December 31, 2022 two observations were taken each month and this data was used.

As at December 31, 2023 the commitment approach was the methodology used for assessing global exposure for the following Funds: Wellington Global High Yield Bond Fund, Wellington Higher Quality Global High Yield Bond Fund, Wellington US$ Core High Yield Bond Fund, Wellington All-China Focus Equity Fund, Wellington Durable Companies Fund, Wellington Durable Enterprises Fund, Wellington Emerging Market Development Fund, Wellington Emerging Markets Equity Fund, Wellington Emerging Markets Opportunities Fund, Wellington Enduring Assets Fund, Wellington FinTech Fund, Wellington Focused European Equity Fund, Wellington Global Health Care Equity Fund, Wellington Global Impact Fund, Wellington Global Perspectives Fund, Wellington Global Property Fund, Wellington Global Stewards Fund, Wellington India Focus Equity Fund, Wellington Strategic European Equity Fund and Wellington US Dynamic Equity Fund.

As at December 31, 2022 the commitment approach was the methodology used for assessing global exposure for the following Funds: Wellington Global High Yield Bond Fund, Wellington Higher Quality Global High Yield Bond Fund, Wellington US$ Core High Yield Bond Fund, Wellington All-China Focus Equity Fund, Wellington Durable Companies Fund, Wellington Durable Enterprises Fund, Wellington Emerging Market Development Fund, Wellington Emerging Markets Equity Fund, Wellington Emerging Markets Local Equity Fund, Wellington Emerging Markets Opportunities Fund, Wellington Enduring Assets Fund, Wellington FinTech Fund, Wellington Focused European Equity Fund, Wellington Global Health Care Equity Fund, Wellington Global Impact Fund, Wellington Global Perspectives Fund, Wellington Global Property Fund, Wellington Global Stewards Fund, Wellington India Focus Equity Fund, Wellington Pan European Small Cap Equity Fund, Wellington Strategic European Equity Fund, Wellington Universal Vision Fund and Wellington US Dynamic Equity Fund.

Financial assets and financial liabilities at fair value through profit or loss

In relation to fair value measurement, IFRS 13 Fair value measurement requires the Company to classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. IFRS 13 requires an entity to provide a quantitative and qualitative analysis of those instruments recognised at fair value based on a three-level measurement hierarchy.

The fair value of bank loans is determined based on the liquidity score of the positions and the contributor depth scores.

The fair value hierarchy has the following levels as defined under IFRS 13:

Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company can access at the measurement date.
Level 2 - Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).
Level 3 - Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Furthermore, for those instruments which have significant unobservable inputs (level 3), IFRS 13 requires disclosures on the transfers into and out of level 3, a reconciliation of the opening and closing balances, total gains and losses for the period split between those recognised in the statement of comprehensive income and recognised through the statement of total recognised gains and losses, purchases, sales issues and settlements, and a sensitivity analysis of assumptions used in determining the fair value of level 3 positions.

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety.

For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' requires significant judgement by the Company. The Company considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

Cash and cash equivalents, bank overdrafts, other short-term investments in an active market, cash held with/due to brokers and counterparties for open FDIs, cash received as collateral and collateral due to counterparties are categorised as level 1.

Sales awaiting settlement and other receivables (interest income receivable, dividends receivable and other debtors) include the contractual amounts for settlement of trades and other obligations due to the Company. Purchases awaiting settlement and other payables (expenses payable, distributions payable, withholding and capital gains tax payable) include the contractual amounts and other obligations due by the Company for settlement of trades and expenses. All receivable and payable balances are categorised as level 2.

The redeemable shares can be repurchased by the Company at any time for cash equal to a proportionate share of the Company's net asset value. These shares are not traded on an active market. Level 2 is deemed to be the most appropriate categorisation for net assets attributable to holders of redeemable shares.

12. Financial derivative instruments and other financial instruments (continued)

Financial assets and financial liabilities at fair value through profit or loss (continued)

The following tables analyse within the fair value hierarchy the Company's financial assets and financial liabilities measured at fair value as at December 31, 2023 and December 31, 2022.

Investments whose values are based on quoted market prices in active markets, and therefore classified within level 1, include active listed equities, exchange traded FDIs, US government treasury bills and certain non-US sovereign obligations. The Company does not adjust the quoted price for these instruments.

Financial instruments that do not have quoted market prices but are valued based on market values, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2. These include investment-grade corporate bonds, certain non-US sovereign obligations, bank loans, equities and OTC FDIs. As level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

Investments classified within level 3 have significant unobservable inputs, as they trade infrequently. Level 3 instruments include private equity, corporate debt securities and bank loans. As observable prices are not available for these securities, the Company has used valuation techniques to derive the fair value.

12. Financial derivative instruments and other financial instruments (continued)

Financial assets and financial liabilities at fair value through profit or loss (continued)

As at December 31, 2023 the valuation methodology for the level 3 positions held on the Wellington Blended Opportunistic Emerging Markets Debt Fund, Wellington Opportunistic Emerging Markets Debt Fund and Wellington Opportunistic Fixed Income Fund are based on the last available price.

Equities	(54,765)	-	54,765

The equity securities transferred out of Level 1 relate to positions that were either priced as stale or fair valued as at the financial year end. The debt securities transferred out of Level 2 relate to positions that resumed active trading during the reporting period. Transfers between levels of the fair value hierarchy, for the purpose of preparing the above table, are deemed to have occurred at the beginning of the reporting period.

Level 3 reconciliation

The following table shows a reconciliation of all movements in the fair value of financial instruments categorised within level 3 between the beginning and the end of the reporting period:

Level 3 sensitivity analysis

As at December 31, 2023 and December 31, 2022 the Company has not developed unobservable inputs for the valuation of the financial instruments categorised within level 3.

Offsetting

Offsetting and amounts subject to master netting arrangement and similar agreements
Each Fund is a party to various master netting agreements. While the terms and conditions of these agreements may vary, all transactions under any such agreement constitute a single contractual relationship. Each party's obligation to make any payments, deliveries or other transfers in respect of any transaction under such an agreement may be netted against the other party's obligations under such agreement. A default by a party in performance with respect to one transaction under such an agreement would give the other party the right to terminate all transactions under such agreement and calculate one net amount owed from one party to the other.

12. Financial derivative instruments and other financial instruments (continued)

Offsetting (continued)

The following tables present information about the offsetting of FDIs and collateral amounts as at December 31, 2023:

Wellington Management Funds (Ireland) plc
Appendix 1 UCITS V Remuneration report (unaudited)

December 31, 2023

Wellington Management Funds (Ireland) plc, (the "Company"), is an umbrella type open ended investment company with variable capital and segregated liability between Funds incorporated under the laws of Ireland on June 25, 1997 as a public company pursuant to the Companies Act 2014. As of December 22, 1998, the Company has been authorised by the Central Bank of Ireland (the "Central Bank") as an Undertaking for Collective Investment in Transferable Securities ("UCITS") pursuant to the provisions of the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "UCITS Regulations"). Up to June 30, 2021 the Company's remuneration policy was applied consistent with the applicable regulatory requirements. As from July 1, 2021 with the appointment of Wellington Luxembourg S.à r.l. ("WLSARL") as the Management Company of Wellington Management Funds (Ireland) plc, the Company is required to disclose the remuneration policy adopted by WLSARL as described below in accordance with the UCITS Regulations.

Remuneration Policy

In accordance with the UCITS Regulations, Wellington Luxembourg S.à r.l. ("WLSARL") has adopted a UCITS compliant remuneration policy which restricts the structure and form of remuneration to certain categories of staff. Under the UCITS Regulations, WLSARL is required to establish and apply remuneration policies and practices that are consistent with and promote sound and effective risk management and do not encourage risk taking which is inconsistent with the risk profile or constitution of the funds managed.

WLSARL, a member of the Wellington group of companies (the "Wellington Group"), believes that its employees should be remunerated in a manner that (i) is fair and rewards achievement over time, (ii) is consistent with and promotes sound and effective risk management (and discourages inappropriate risk-taking), (iii) is in line with the business strategy, objectives, values, and interests of WLSARL and the Wellington Group, and (iv) aligns the interests of WLSARL staff with those of the Funds WLSARL manages (the "Funds") and the underlying fund investors. These beliefs are consistent with the remuneration principles applied throughout the Wellington Group, which manages assets for a wide range of clients and for commingled Funds in a variety of structures and domiciles.

This document sets out (i) the WLSARL's remuneration policy ("the Policy"), (ii) the principles on which WLSARL's policy is based, and (iii) WLSARL's practices aimed at ensuring that its remuneration approach is consistent with applicable regulatory requirements and the above-mentioned principles.

Compliance with regulatory requirements
WLSARL manages undertakings for collective investment in transferable securities ("UCITS"). With regards to the regulatory requirements relating to remuneration policies of management companies, WSARL is subject to the laws and regulations of Luxembourg as its home member state. WLSARL applies remuneration policies, practices, and procedures that are consistent with and promote sound, prudent and effective risk management and do not encourage inappropriate risk-taking. Furthermore, these policies and practices are designed to ensure that conflicts of interest are prevented or appropriately managed. WLSARL's compliance function will review this Policy against relevant laws and regulations at least annually.

Responsibility and oversight
The Board of WLSARL ("the Board") and the Executive Committee[1] are responsible for establishing and applying the Policy. The Policy shall be reviewed and updated at least annually and will be submitted to the Executive Committee and the Board for approval. The practices associated with implementation of the Policy are overseen by the Conducting Officers responsible for Risk Management and Human Resources. This Policy will be subject to central and independent internal review by the Internal Auditor[2] at least annually.

Overall application of this Policy
This Policy and the practices described below shall be applied in a flexible way that (i) is consistent with applicable employment and privacy laws, including pre-existing employment contracts and other obligations of the Wellington Group to its staff, (ii) aligns with the business strategy, objectives, values, and interests of WLSARL and the Wellington Group, and the interests of the Funds and investors in the Funds, (iii) is appropriate given the size, internal organisation, nature, and complexity of the business of WLSARL and the Funds, and (iv) takes into account individual circumstances. Remuneration will not be paid through vehicles or methods that facilitate the avoidance of the requirements of the UCITS Directive. Remuneration paid in accordance with this Policy will relate directly to Wellington Group's overall financial performance, and a covered individual's achievement in the performance of the duties assigned to them.

[1] "Executive Committee" in this Policy refers to the Executive Committee of Conducting Officers for the Luxembourg IFM.
[2] The Investment Fund Manager has delegated the Internal Audit Function to an external expert.

Remuneration Policy (continued)

Overall application of this Policy (continued)
Specific requirements (including the payout process rules) may not be applied (a) where they are not believed to be proportionate (given the factors listed above) or to promote regulatory objectives, and/or (b) based on "disapplication" standards or thresholds applicable in Luxembourg or other Member States,[1] provided such requirements are not believed necessary to (i) promote sound and effective risk management, (ii) act in the best interests of WLSARL and/or the Funds or (iii) reward individual and functional team achievement.

Where staff are subject to remuneration rules from multiple remuneration regimes, the remuneration rules shall be applied pro rata based on the activities carried out under each regime or, if there is a conflict between the rules, the rules will be applied that are deemed more effective for achieving the outcomes both of discouraging excessive risk taking and of aligning the interests of the relevant individuals with those of the investors in the Funds they manage.

Independence
The remuneration of employees involved in control functions will be determined independently from business units controlled by the control functions and in accordance with the achievement of objectives linked to relevant control functions.[2]

Identified Staff
The general principles set forth in this Policy apply to all WLSARL staff, however, the payout process below applies only to WLSARL staff, including senior management, risk-takers, control functions, and any employees receiving total remuneration that takes them into the same bracket as senior management and risk-takers whose professional activities have a material impact on the risk profiles of WLSARL or the Funds (collectively "the Identified Staff"). In order to arrive at the universe of Identified Staff, WLSARL will determine whether the activities of each member of staff, senior management or the delegates could have a significant impact on WLSARL's results, WLSARL's balance sheet, or the performance of the Funds. WLSARL may also consider other relevant factors. The Conducting Officer responsible for Human Resources will inform the relevant individuals of their classification as Identified Staff.

Relevant remuneration
This Policy applies to all forms of payment by WLSARL of salaries, discretionary payments, and pension benefits or by a Fund to Identified Staff, including any transfer of Funds' shares/units, in relation to services rendered by Identified Staff for the benefit of the applicable Funds. This Policy does not apply to payments from other Wellington Group entities (including partnership distributions), but the Wellington Group will not design remuneration practices intended to circumvent the requirements of the UCI Law, related ESMA Guidelines (as defined below) and the Circular.

Policy Specifics

The following provisions are designed to ensure compliance with the remuneration requirements of the UCI Law and with related directives, regulation, and guidance.

Guarantees and early termination
WLSARL will not normally offer guaranteed bonuses and will only do so in connection with hiring new staff. WLSARL will not offer guarantees in excess of one year. WLSARL will not make payments related to early termination of a contract, except as required by law.

Performance assessment
When assessing performance for the purposes of determining remuneration, WLSARL will assess the performance of the individual (including by reference to non-financial criteria) and the function or business unit concerned, along with the overall results of WLSARL. Fund performance will be assessed in a multi-year framework appropriate to the life cycle of the holding period recommended to fund investors in the UCITS, to ensure that the assessment is based on longer-term performance and that the payment of performance-based compensation is spread over a period taking into account the redemption policy of the holding period recommended to fund investors in the UCITS and their investment risks. The measurement of performance used to calculate variable remuneration (or to calculate the size of pools available for variable remuneration) will include adjustment mechanisms for relevant current and future risks.

Bonus withholding and claw-back
Should it be proven that an employee took excessive risks or breached WLSARL's compliance rules or any regulations, no bonus will be paid to that employee and claw-back proceedings may be invoked in relation to bonuses paid during prior periods.

[1] In light of 'need' identified in European Securities Markets Authority ("ESMA") guidance to preserve a level playing field among AIFMs and jurisdictions.
[2] Full independence is not possible, as remuneration is ultimately linked to performance of the Wellington Group as a whole.

Policy Specifics (continued)

Bonus withholding and claw-back (continued)
The Board of Managers of WLSARL ("the Board") will be able to require employees to repay all or part of any bonus that has been paid for performance based on data which was subsequently proven to be fraudulent or subject to a material error or misstatement.

Payout process
1. Fixed/variable balance: Fixed and variable components of remuneration will be appropriately balanced, and fixed compensation component will represent any sufficiently high proportion of total compensation to allow for a flexible policy (e.g. payment of no variable remuneration in a given year). Variable remuneration will only be paid if it is sustainable given the overall financial situation of WLSARL and of the Wellington Group combined and justified given performance of business unit, the Funds, and the individuals concerned.

2. Variable remuneration in shares or units: Subject to the legal structure of the Funds and their rules or instruments of incorporation and considering the outcome of a proportionality assessment, a substantial portion (at least 50%) of variable remuneration may consist of units or shares of the Funds concerned or unit/share-linked non-cash instruments, unless the management of UCITS (as applicable) accounts for less than half of the portfolios managed by WLSARL, in which case the 50% minimum shall not apply. Any non-cash instruments granted in accordance with the above will be subject to an appropriate retention policy, designed to align the Identified Staffs' incentives with the interests of the Funds.

3. Variable remuneration deferral:

- A substantial portion (at least 40%) of the variable remuneration may be deferred over an appropriate period, in view of the life cycles and the recommended investment holding period of the UCITS concerned and will be aligned with the nature of the risks of the Funds in question.
- This period shall be at least three years for UCITS and vesting will occur no faster than on a pro-rata basis.
- If variable remuneration is particularly high, 60% may be deferred.
- Variable remuneration will generally be considerably reduced where negative financial performance of WLSARL or the Funds it manages occurs, taking into account current compensation and reductions in payouts previously earned.

4. Discretionary pension benefits: If WLSARL is aware of Identified Staff leaving WLSARL before retirement, any discretionary pension benefits that may have been awarded will be held by WLSARL for a period of five years in the form of shares or share-linked instruments. Otherwise, discretionary pension benefits shall be paid in the form of shares or share-linked instruments, subject to a five-year retention period.

5. Hedging: Identified Staff subject to the payout process rules must undertake not to use personal hedging or remuneration-related insurance to undermine the risk-alignment effects of their remuneration arrangements.

Delegates
When delegating portfolio management or risk management activities and where the remuneration rules would otherwise be circumvented, WLSARL will ensure that (i) the delegates are subject to regulatory requirements on remuneration deemed equally effective as those applicable under the European Securities and Markets Authority ("ESMA") Guidelines on Sound Remuneration Policies Under the UCITS (ESMA/2016/579 and ESMA/2016/575) (the "ESMA Guidelines") or (ii) appropriate contractual arrangements are put in place to ensure that there is no circumvention of the remuneration rules set out in the ESMA Guidelines. This practice adopted by WLSARL is in line with Sub-section 6.3.2.2, paragraph 495 of the Circular.

Remuneration committee
On the basis of proportionality, given the number of employees of WLSARL, WLSARL is currently not intending to establish a remuneration committee. WLSARL will establish a remuneration committee if at any point it deems such establishment proportionate to oversee the implementation of this Policy with respect to decisions with risk implications relating to WLSARL and the Funds managed by WLSARL.

Sustainability Risks
In accordance with Article 5 of the Sustainable Finance Disclosure Regulation, WLSARL believes this Policy to be consistent with the integration of the consideration of sustainability risks in the investment decision-making process. For more information, please see www.wellingtonfunds.com/SFDR.

Annual Review

The policy was updated in May.

The Board of Directors is satisfied that WLSARL's remuneration policies are designed to be consistent with the UCITS Regulations.

Remuneration for the year ended December 31, 2023

For the financial year ended December 31, 2023, WLSARL acted as the Management Company of Wellington Management Funds (Luxembourg), Wellington Management Funds (Luxembourg) III SICAV and Wellington Management Funds Ireland plc, and as Alternative Investment Fund Manager of Wellington Management Funds (Luxembourg) II and Wellington Management Funds (Luxembourg) II SICAV. The remuneration information provided below represents information relevant to the Company and is calculated as outlined in the footnotes.

Quantitative remuneration information is outlined below:

Remuneration of IFM Year ended December 31, 2023	Fixed Remuneration	Variable Remuneration	Total Remuneration
Total aggregated remuneration paid by the IFM to its staff, attributable to the Company[1]	**$1,431,901**	**$269,738**	**$1,701,639**
Total number of beneficiaries[2]			**19**
Total aggregated remuneration paid to the IFM senior management, attributable to the Company[3]	**$575,211**	**$365,519**	**$940,730**
Total aggregated remuneration paid to members of staff of entities to which investment management activities have a material impact on the risk profile of the Company, attributable to the Company[4]	**$1,295,789**	**$4,725,705**	**$6,021,494**

[1] The total remuneration paid within the year has been allocated based on the proportion of the total net assets of the Company with respect to the total net assets of the Funds managed by the Investment Fund Manager ("IFM").

[2] The average number of staff through the year from January 1, 2023 to December 31, 2023 excluding senior management.

[3] The total remuneration paid within the year has been allocated based on the proportion of the total net assets of the Company with respect to the total net assets of the Funds managed by the IFM, as well as the proportionate time spent on Management functions.

[4] The total remuneration has been aggregated based on the incentives earned by staff for each Fund of the Company.

Wellington Management Funds (Ireland) plc
Appendix 2 Securities financing transactions regulations (unaudited)

December 31, 2023

The Securities Financing Transactions Regulation (Regulation (EU) 2015/2365) ("SFTR") came into force on January 12, 2016 and, amongst other requirements, introduces new disclosure requirements in the Company's annual and semi-annual reports published after January 13, 2017 detailing the Company's use of securities financing transactions and total return swaps. Under Regulation (EU) 2015/2365 on transparency of securities financing transactions (SFTs) and of reuse, and amending Regulation (EU) No 648/2012, Article 13 requires UCITS investment companies to provide the following information on the use made of SFTs.

A Securities Financing Transaction (SFT) is defined as per Article 3(11) of the SFTR as:

- a repurchase transaction
- securities or commodities lending and securities or commodities borrowing
- a buy-sell back transaction or sell-buy back transaction, or
- a margin lending transaction

As at December 31, 2023, the Funds held reverse repurchase agreements and total return swaps which are types of securities in scope for the SFTR Annual Reporting Disclosure Requirements.

1. Market value of assets engaged in securities financing transactions as at December 31, 2023

Below is the amount of assets engaged in each type of SFTs and total return swaps expressed as an absolute amount and as a proportion of the Funds' assets under management ("AUM"). The AUM is equivalent to the Funds' total net assets.

	Currency	Reverse repurchase agreements	% of AUM	Currency	Total return swaps notional	% of AUM
Wellington Blended Opportunistic Emerging Markets Debt Fund	USD	48,130,000	4.35	-	-	-
Wellington Opportunistic Fixed Income Fund	USD	87,642,000	7.95	USD	93,608,857	8.49
Wellington Global Impact Fund	-	-	-	CAD	395,482	0.04

2a). Top 10 counterparties used for the reverse repurchase agreements held as at December 31, 2023*

Listed below are the top 10 counterparties in respect of reverse repurchase agreements including the name of the counterparty, volume of outstanding transactions and country in which the counterparties are established.

Counterparty Name	State Street Corporation
Country of Establishment	United States

* This list is a complete list of the counterparties for the reverse repurchase agreements held as at December 31, 2023, the market value of outstanding transactions for each Fund is as per table 1 above.

2b). Top 10 counterparties used for the total return swaps held as at December 31, 2023*

Listed below are the top 10 counterparties in respect of total return swaps including the name of the counterparty, volume of outstanding transactions and country in which the counterparties are established.

Fund name	*Counterparty name*	*Currency*	*Gross value of outstanding assets*	*Gross value of outstanding liabilities*
Wellington Opportunistic Fixed Income Fund	Goldman Sachs	USD	-	5,190,000
	JPMorgan Chase	USD	-	33,255,000
	Morgan Stanley	USD	-	55,163,857
Wellington Global Impact Fund	Goldman Sachs	CAD	255,088	140,394

Counterparty name	*Country of establishment*
Goldman Sachs	United States
JPMorgan Chase	United States
Morgan Stanley	United States

* This list is a complete list of the counterparties for the total return swaps held as at December 31, 2023.

3. Settlement/clearing for each total return swap

Bi-Lateral.

4. Maturity tenor of the SFTs and total return swaps held as at December 31, 2023

The maturity tenor of the SFTs and total return swaps is broken down in the following maturity buckets: less than one day, one day to one week, one week to one month, one to three months, three months to one year, above one year, open transactions.

The maturity of all reverse repurchase agreements held on the Fund as at December 31, 2023 is January 2, 2024 therefore the maturity tenor is between 1 day to 1 week.

4b). Maturity tenor of total return swaps held as at December 31, 2023

	Wellington Opportunistic Fixed Income Fund USD	Wellington Global Impact Fund CAD
1 to 3 months	15,190,000	-
3 months to 1 year	77,940,000	395,482
above 1 year	478,857	-

5. Maturity tenor of collateral pledged/received in respect of the SFTs and total return swaps

The maturity tenor of the collateral is broken down into the following maturity buckets: less than one day, one day to one week, one week to one month, one to three months, three months to one year, above one year, open maturity.

5a). Maturity tenor of collateral received in respect of reverse repurchase agreements held as at December 31, 2023

		Greater than 1 year
Wellington Blended Opportunistic Emerging Markets Debt Fund	USD	49,092,600
Wellington Opportunistic Fixed Income Fund	USD	89,394,870

5b). Maturity tenor of collateral pledged in respect of reverse repurchase agreements held

There were no collateral amounts pledged in respect of reverse repurchase agreements held as at December 31, 2023.

5c). Maturity tenor of collateral received in respect of total return swaps

	Wellington Global Impact Fund USD
Open Maturity	187,322

5d). Maturity tenor of collateral pledged in respect of total return swaps

	Wellington Opportunistic Fixed Income Fund USD
Open Maturity	2,816,806

6a). Listed below are the type, quality and currency of collateral received in respect of reverse repurchase agreements as at December 31, 2023

	Counterparty	Value of collateral received	Rating (S&P)	Currency	Type
Wellington Blended Opportunistic Emerging Markets Debt Fund	State Street Corporation	49,092,600	AA-	USD	Bonds
Wellington Opportunistic Fixed Income Fund	State Street Corporation	89,394,870	AA-	USD	Bonds

6b). Listed below are the type, quality and currency of collateral pledged in respect of reverse repurchase agreements as December 31, 2023

There were no collateral amounts pledged in respect of reverse repurchase agreements held as at December 31, 2023.

6c). Listed below are the type, quality and currency of collateral received in respect of total return swaps as at December 31, 2023

	Counterparty	Value of collateral received	Rating	Currency	Type
Wellington Global Impact Fund	Goldman Sachs	187,322	N/A	USD	Cash

6d). Listed below are the type, quality and currency of collateral pledged in respect of total return swaps as at December 31, 2023

	Counterparty	Value of collateral pledged	Rating	Currency	Type
Wellington Opportunistic Fixed Income Fund	Goldman Sachs	69,541	N/A	USD	Cash
	Morgan Stanley	2,747,265	N/A	USD	Cash

7. Re-investment of collateral received

There was no re-hypothecation of collateral received in respect of reverse repurchase agreements or total return swaps held during the financial year ended December 31, 2023.

8a). Safe-keeping of collateral received

State Street Custodial Services (Ireland) Limited are responsible for the safe-keeping of all collateral received in relation to the SFTs held on the Funds. All cash collateral received as at December 31, 2023 was held with State Street Bank and Trust Company.

Included in the table below are details of the safe-keeping of the collateral received from the Funds to the relevant counterparties in relation to the total return swaps held on the relevant Funds.

	Total value of collateral received USD	*% of total collateral received held in pooled accounts*
Wellington Global Impact Fund		
Goldman Sachs	187,322	100%

8b). Safe-keeping of collateral pledged

Included in the table below are details of the safe-keeping of the collateral pledged from the Funds to the relevant counterparties in relation to the total return swaps held on the relevant Funds.

	Total value of collateral pledged USD	*% of total collateral pledged held in pooled accounts*
Wellington Opportunistic Fixed Income Fund		
Goldman Sachs	69,541	100%
Morgan Stanley	2,747,265	100%

9a). Returns and costs of total return swaps

	Currency	Net interest income/expense	Gains/ losses	Costs incurred*	Net returns
Wellington Opportunistic Fixed Income Fund	USD	3,056,446	1,580,421	-	4,636,867

Appendix 4 Acronyms

December 31, 2023

The following table presents acronyms and their corresponding full name used within this report.

Acronyms	Full name
ADR	american depository receipt
AIF	alternative investment fund
CFD	contract for difference
EDR	european depository receipt
ESG	environmental, social and governance
ESMA	European Securities and Markets Authority
ETF	exchange traded fund
FDI	financial derivative instrument
GDN	global depository note
GDR	global depository receipt
KPI	key performance indicators
MMI	money market instrument
MSCI	Morgan Stanley Capital International
OECD	Organisation for Economic Co-operation and Development
OTC	over the counter
PAI	Principal Adverse Impact
REIT	real estate investment trust
TBA	to be announced
UCI	Undertakings for Collective Investment
UCITS	Undertakings for Collective Investment in Transferable Securities
SFDR	Sustainable Finance Disclosure Regulation
SFTR	Securities Financing Transactions Regulations
WACI	weighted average carbon intensity

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Wellington All-China Focus Equity Fund

Legal entity identifier:
549300WVK1H3DSJ3CE12

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 1.48% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending December 31, 2023:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet one or more of the following social characteristics.

1. Issuers who receive a survey to enable the Fund to promote the adoption of appropriate policies and practices among certain investee companies with regard to modern slavery risk management, forced labour, child labour and debt bondage ("Modern Slavery"). In order to do this, the Investment Manager applies Wellington Management Group's Emerging Markets Modern Slavery Policy (the "EM Modern Slavery Policy"). Under the EM Modern Slavery Policy investee companies are evaluated by the Investment Manager on the basis of proprietary research and third-party research for inclusion to the Watch List (as defined below) and various levels of engagement are undertaken over a period of time

until adequate remediation measures are adopted.

The EM Modern Slavery Policy does not aim to eliminate Modern Slavery risk exposure in all investee companies and the Fund may from time to time invest in companies which have exposure to such risk and which are not subject to enhanced engagement. Further details about the EM Modern Slavery Policy and Watch List may be found in the section below "What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?".

2. Issuers that are screened for United Nations Global Compact Principles to enable the Fund to further promote appropriate policies and practices with regard to child labour and forced labour by excluding investment in companies that are assessed for and known to be involved in controversies regarding child labour or forced labour. In order to do this, the Fund excludes investments in companies which are assessed to have failed United Nations Global Compact Principles 4 (businesses should uphold the elimination of all forms of forced and compulsory labour) and 5 (businesses should uphold the effective abolition of child labour).

A reference benchmark has not been designated for the purpose of attaining the social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	December 31, 2023
The number of companies held which have been assessed to be in violation of United Nations Global Compact principles 4 (businesses should uphold the elimination of all forms of forced and compulsory labour) or 5 (businesses should uphold the effective abolition of child labour). Since the Fund excludes investments in companies which are assessed to have failed United Nations Global Compact Principles 4 and 5, this number is expected to be 0.	0
The percentage of companies deemed as having a higher risk of Modern Slavery exposure that are placed on the Watch List and are subject to enhanced engagement. Since this percentage will depend on 1) the time of the investments and 2) the result of the survey, this percentage cannot be disclosed in the Fund's pre-contractual template but will be disclosed in the Fund's periodic reporting.	34.30%
The percentage of companies held for over a year that have responded to an engagement survey regarding their modern slavery risk management policies and procedures. Since this percentage will depend on 1) the time of the investments and 2) the response to the engagement of the survey, this percentage cannot be disclosed in the Fund's pre-contractual template but will be disclosed in the Fund's periodic reporting.	40.00%
The percentage of companies where remediation measures have been adopted such that they are no longer assessed as having a higher risk of Modern Slavery exposure and may be removed from the internal Watch List. Since this percentage will depend on 1) the time of the investments and 2) the result of the remediation measures adopted following the survey, this percentage cannot be disclosed in the Fund's pre-contractual template but will be disclosed in the Fund's periodic reporting.	10.00%
The percentage of the Fund's equity issuers who received a survey and have been formally evaluated for inclusion to the Watch List regarding Modern Slavery risk management. Since at least 70% of the Fund's equity issuers are generally expected to receive a survey and be formally evaluated for inclusion to the Watch List regarding Modern Slavery risk management, this percentage is expected to be at least 70%.	100.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

**Companies that were held in the portfolio as of calendar year-end but that were no longer on the active or inactive watch list in part due to the fund's remediation measures, including but not limited to additional information gained from company outreach efforts and/or companies' actions towards mitigating controversies.*

… and compared to previous periods?

Sustainability Indicator	December 31, 2023	December 31, 2022
The number of companies held which have been assessed to be in violation of United Nations Global Compact principles 4 (businesses should uphold the elimination of all forms of forced and compulsory labour) or 5 (businesses should uphold the effective abolition of child labour). Since the Fund excludes investments in companies which are assessed to have failed United Nations Global Compact Principles 4 and 5, this number is expected to be 0.	0	0
The percentage of companies deemed as having a higher risk of Modern Slavery exposure that are placed on the Watch List and are subject to enhanced engagement. Since this percentage will depend on 1) the time of the investments and 2) the result of the survey, this percentage cannot be disclosed in the Fund's pre-contractual template but will be disclosed in the Fund's periodic reporting.	34.30%	40.54%
The percentage of companies held for over a year that have responded to an engagement survey regarding their modern slavery risk management policies and procedures. Since this percentage will depend on 1) the time of the investments and 2) the response to the engagement of the survey, this percentage cannot be disclosed in the Fund's pre-contractual template but will be disclosed in the Fund's periodic reporting.	40.00%	42.31%
The percentage of companies where remediation measures have been adopted such that they are no longer assessed as having a higher risk of Modern Slavery exposure and may be removed from the internal Watch List. Since this percentage will depend on 1) the time of the investments and 2) the result of the remediation measures adopted following the survey, this percentage cannot be disclosed in the Fund's pre-contractual template but will be disclosed in the Fund's periodic reporting.	10.00%	0.00%
The percentage of the Fund's equity issuers who received a survey and have been formally evaluated for inclusion to the Watch List regarding Modern Slavery risk management. Since at least 70% of the Fund's equity issuers are generally expected to receive a survey and be formally evaluated for inclusion to the Watch List regarding Modern Slavery risk management, this percentage is expected to be at least 70%.	100.00%	97.30%

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment Guideline, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:
1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.
2. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.
While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	December 31, 2023
4. Exposure to companies active in the fossil fuel sector	6.68%
5. Share of non - renewable energy consumption and production	98.43%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-01-01/2023-12-31

Largest investments	Sector	% of net assets	Country
TENCENT HOLDINGS LTD	Communication services	9.29%	CN
NETEASE INC	Communication services	7.86%	CN
ALIBABA GROUP HOLDING SP ADR	Consumer discretionary	6.02%	CN

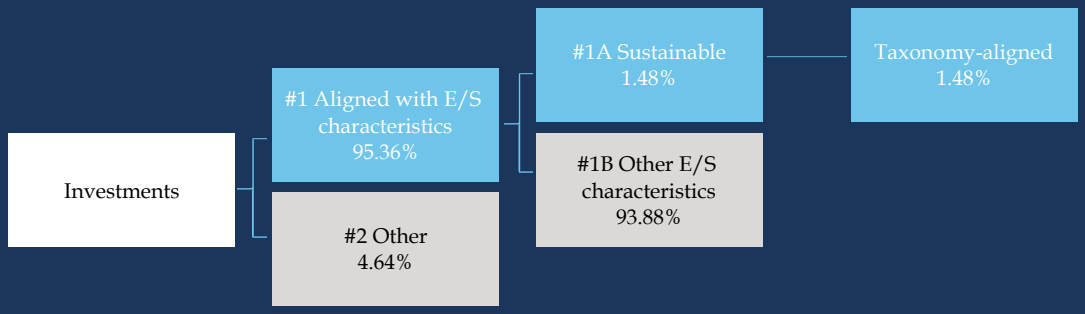
SHENZHEN MINDRAY BIO MEDIC A	Health care	3.15%	CN

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Pre-contractual disclosure commitment:

During normal market conditions, a minimum of 70% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

On occasion, due to possible settlement mismatch related to fund investor flows or market holidays during times when large subscriptions are received, the portion of the Fund which is not aligned with the environmental or social characteristic may affect the Fund's ability to meet the commitment as described above under normal market conditions. The Investment Manager does not consider these short-term fluctuations to materially impact the Fund's ability to attain its environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#1 Aligned with E/S characteristics	95.36%
#2 Other	4.64%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

In which economic sectors were the investments made?

Sector	Sub Sector	% of net assets
Communication services	Interactive media & services	11.64%

	Ind pwr and renewable elec producer	2.44%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS classification hierarchy. Source: MSCI

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of December 31, 2023:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

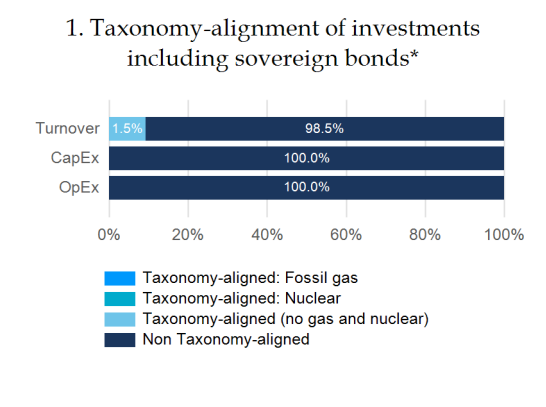
☒ No

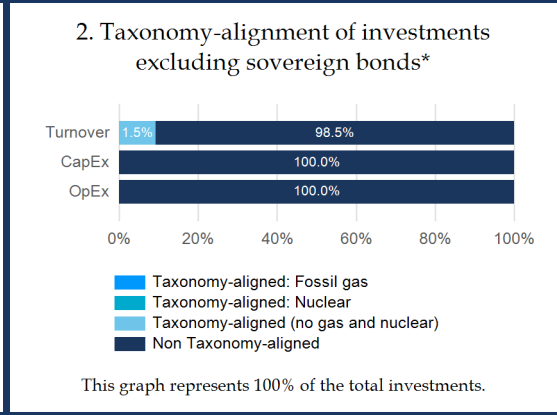
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: Clarity AI

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of investments in transitional and enabling activities is 0%.

Taxonomy aligned investments	% of market value as at December 31, 2023
Transitional Turnover	0.00%
Transitional Capex	0.00%
Transitional Opex	0.00%
Enabling Turnover	1.48%
Enabling Capex	0.00%
Enabling Opex	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: Clarity AI

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Asset allocation overview	% of net assets as at December 31, 2023	% of net assets as at December 31, 2022
Taxonomy aligned investments	1.48%	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: Clarity AI

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable. This Fund does not commit to invest in sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for hedging and investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards. However, some minimum safeguards may still be considered to apply to the extent such holdings are aligned with one or more but not all of the Fund's environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#2 Other	4.64%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

The Fund assessed and promoted the adoption of appropriate policies and practices among certain investee companies with regard to modern slavery risk management, with regards to forced labour, child labour and debt bondage ("Modern Slavery") by engaging with 35 companies via survey distribution, which accounted for 100.00% of the companies held longer than a year, and by engaging with 1 companies during meetings over the reference period.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Wellington Durable Companies Fund

Legal entity identifier:
549300MTQFV76KPFJ821

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 2.57% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending December 31, 2023:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet one or more of the following environmental or social characteristics.

1. Issuers with disclosed carbon data that enable the Fund to achieve long term net zero carbon intensity by 2050 by aiming to reduce its weighted average carbon intensity ("WACI"), as compared to the 2019 WACI of the MSCI All Country World Index (the "Index").

2. Companies are screened to enable the Fund to exclude investments in companies involved in the production and sales of fossil fuels, or the mining of metals.

3. Companies are screened for United Nations Global Compact Principles to enable the Fund aims to exclude investment in companies that are involved in known controversies regarding child labour or forced labour by excluding investments in companies which are assessed to have failed United Nations Global Compact Principles 4 and 5.

Whilst the Index is used for WACI comparison purposes, a reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	December 31, 2023
The number of companies held identified which have been assessed to be in violation of United Nations Global Compact principles 4 (businesses should uphold the elimination of all forms of forced and compulsory labour) or 5 (businesses should uphold the effective abolition of child labour).	0
The number of securities of any company involved in the production and sales of fossil fuels, or the mining of metals, as defined by standard industry classifications for Energy, and Metals and Mining.	0
The percentage difference of the Fund's WACI and the Index's 2019 WACI.	-50.40%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:

1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.

2. The Fund will aim to reduce its weighted average carbon intensity ("WACI") to net zero by 2050, or sooner, in accordance with the Paris Agreement. - PAIs: Carbon Footprint; GHG Emissions, GHG Intensity of Investee Companies.

3. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy. In addition the Fund will exclude companies engaged in the production and sales of fossil fuels. - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	December 31, 2023
1. GHG emissions	175057.96tCO2e
2. Carbon footprint	406.57tCO2e/ €M invested
3. GHG intensity of investee companies	628.10tCO2e/ €M revenue
4. Exposure to companies active in the fossil fuel sector	9.40%
5. Share of non - renewable energy consumption and production	86.80%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-01-01/2023-12-31

Largest investments	Sector	% of net assets	Country
INTACT FINANCIAL CORP	Financials	5.89%	CA
ENGIE	Utilities	5.06%	FR

BWX TECHNOLOGIES INC	Industrials	2.93%	US
SCIENCE APPLICATIONS INTE	Industrials	2.91%	US
VIDRALA SA	Materials	2.85%	ES

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

Wellington Management Funds (Ireland) plc

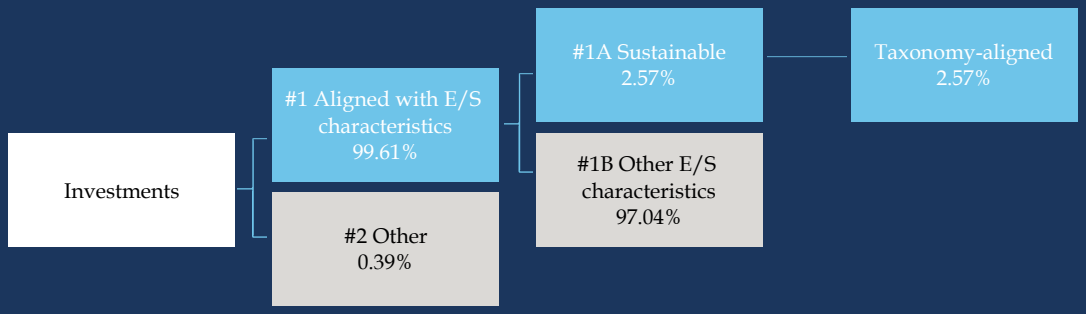
Appendix 5 Sustainable Finance Disclosure Regulation ("SFDR") (unaudited)

December 31, 2023

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Pre-contractual disclosure commitment:

During normal market conditions, a minimum of 80% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

On occasion, due to possible settlement mismatch related to investor flows or market holidays during times when large subscriptions are received, the portion of the Fund which is not aligned with the environmental or social characteristic may affect the Fund's ability to meet the commitment as described above under normal market conditions. The Investment Manager does not consider these short-term fluctuations to materially impact the Fund's ability to attain its environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#1 Aligned with E/S characteristics	99.61%
#2 Other	0.39%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

In which economic sectors were the investments made?

Sector	Sub Sector	% of net assets
Consumer discretionary	Distributors	2.44%
Consumer staples	Consumer staples distrib & retail	4.67%
	Food products	2.34%
Financials	Insurance	18.29%
	Banks	7.29%
	Financial services	1.76%
	Capital markets	1.72%
Health care	Health care providers & services	7.13%
	Pharmaceuticals	2.27%
	Life sciences tools & services	1.97%
	Health care equipment & supplies	1.18%
Industrials	Trading companies & distributors	9.76%
	Professional services	6.90%
	Commercial services & supplies	6.15%
	Marine transportation	3.31%
	Aerospace & defense	2.93%
	Ground transportation	1.53%
Information technology	Software	4.47%
	Communications equipment	1.72%
Materials	Containers & packaging	4.22%
Not classified	Not classified	2.88%
Utilities	Multi-utilities	5.06%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS classification hierarchy. Source: MSCI

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of December 31, 2023:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☒ Yes

☐ In fossil gas ☒ In nuclear energy

☐ No

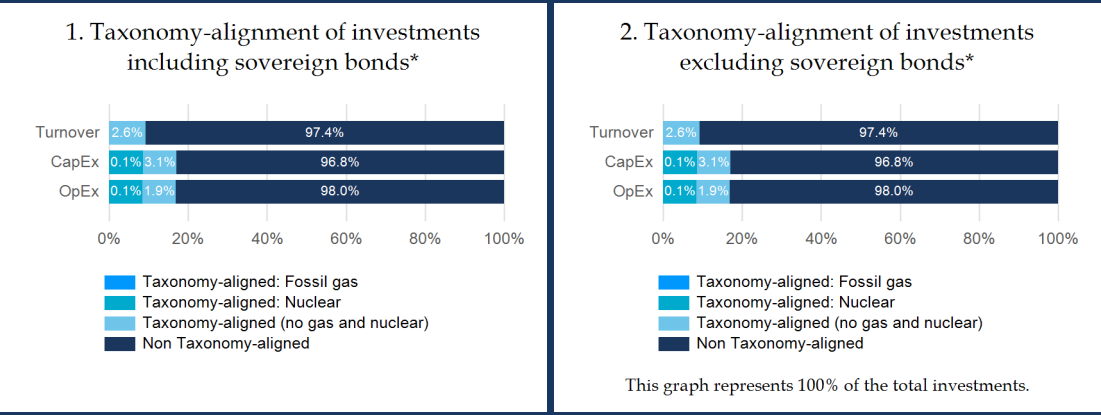
[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.



** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: Clarity AI

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of investments in transitional and enabling activities is 0%.

Taxonomy aligned investments	% of market value as at December 31, 2023
Transitional Turnover	0.02%
Transitional Capex	0.06%
Transitional Opex	0.06%
Enabling Turnover	0.30%
Enabling Capex	0.38%
Enabling Opex	0.40%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: Clarity AI

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Asset allocation overview	% of net assets as at December 31, 2023	% of net assets as at December 31, 2022
Taxonomy aligned investments	2.57%	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: Clarity AI

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable. This Fund does not commit to invest in sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for hedging and/or investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards.

However, some minimum safeguards may still be considered to apply to the extent such holdings are aligned with one or more but not all of the Fund's environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#2 Other	0.39%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

The Fund engaged with companies held in the portfolio to establish or to commit to net zero science-based targets. During the reference period the Fund engaged with 17 companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Wellington Durable Enterprises Fund

Legal entity identifier:

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 3.03% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending December 31, 2023:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet one or more of the following environmental or social characteristics.

1. Issuers with disclosed carbon data that enable the Fund to achieve long term net zero carbon intensity by 2050 by aiming to reduce its weighted average carbon intensity ("WACI"), as compared to the 2019 WACI of the MSCI All Country World Index (the "Index").

2. Companies are screened to enable the Fund to exclude investments in securities of any company involved in the production and sales of fossil fuels, or the mining of metals.

3. Companies are screened for United Nations Global Compact Principles to enable the Fund to exclude investment in companies that are involved in known controversies regarding child labour or forced labour by excluding investments in companies which are assessed to have failed United Nations Global Compact Principles 4 and 5.

Whilst the Index is used for WACI comparison purposes, a reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	December 31, 2023
The number of companies held identified which have been assessed to be in violation of United Nations Global Compact principles 4 (businesses should uphold the elimination of all forms of forced and compulsory labour) or 5 (businesses should uphold the effective abolition of child labour).	0
The number of securities of any corporate issuers involved in the production and sales of fossil fuels, or the mining of metals, as defined by standard industry classifications for Energy, and Metals and Mining.	0
The percentage difference of the Fund's WACI and the Index's 2019 WACI.	-58.54%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:

1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.
2. The Fund will aim to reduce its weighted average carbon intensity ("WACI") to net zero by 2050, or sooner, in accordance with the Paris Agreement. - PAIs: Carbon Footprint; GHG Emissions, GHG Intensity of Investee Companies.
3. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy. In addition the Fund will exclude companies engaged in the production and sales of fossil fuels. - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	December 31, 2023
1. GHG emissions	62746.23tCO2e
2. Carbon footprint	352.73tCO2e/ €M invested
3. GHG intensity of investee companies	570.19tCO2e/ €M revenue
4. Exposure to companies active in the fossil fuel sector	10.15%
5. Share of non - renewable energy consumption and production	87.65%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-01-01/2023-12-31

Largest investments	Sector	% of net assets	Country
INTACT FINANCIAL CORP	Financials	6.51%	CA
ENGIE	Utilities	5.08%	FR

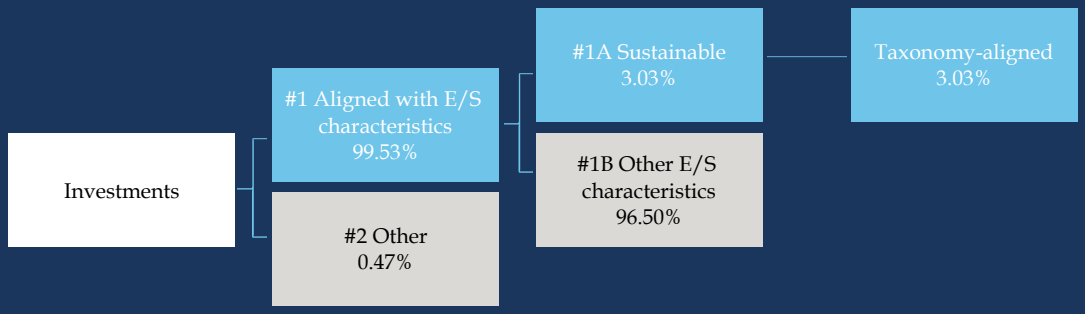
The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Pre-contractual disclosure commitment:

During normal market conditions, a minimum of 80% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

On occasion, due to possible settlement mismatch related to investor flows or market holidays during times when large subscriptions are received, the portion of the Fund which is not aligned with the environmental or social characteristic may affect the Fund's ability to meet the commitment as described above under normal market conditions. The Investment Manager does not consider these short-term fluctuations to materially impact the Fund's ability to attain its environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of December 31, 2023:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☒ Yes

☐ In fossil gas ☒ In nuclear energy

☐ No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

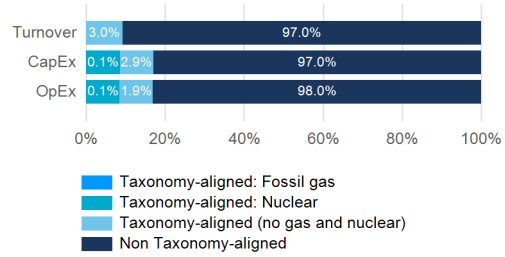
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

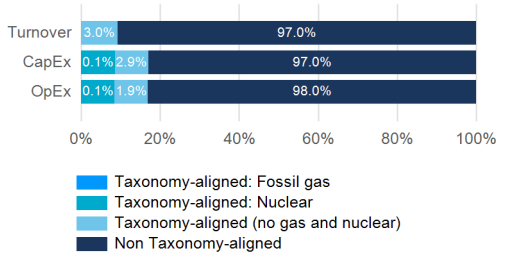
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*



2. Taxonomy-alignment of investments excluding sovereign bonds*



This graph represents 100% of the total investments.

**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable. This Fund does not commit to invest in sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes derivatives for hedging and/or investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards.

However, some minimum safeguards may still be considered to apply to the extent such holdings are aligned with one or more but not all of the Fund's environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#2 Other	0.47%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

The Fund engaged with companies held in the portfolio to establish or to commit to net zero science-based targets. During the reference period the Fund engaged with 16 companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Wellington Emerging Market Development Fund

Legal entity identifier:
5493004E3LPOWFC4YP37

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 86.06% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending December 31, 2023:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet one or more of the following environmental or social characteristics.

1. Companies that are considered Sustainable Investments. The Fund invests in companies the Investment Manager believes are positioned to benefit from themes relating to the structural and economic development of emerging markets. In line with the Fund's thematic approach, the Investment Manager will seek to promote sustainable economic development by investing at least 75% of the Fund's net assets in companies that are considered Sustainable Investments.

2. Companies that are screened to enable the Fund to exclude companies identified as involved in the

mining of thermal coal. The Fund also considers any revenue generated from thermal coal, excluding any company that generates a certain percentage of its revenue from thermal coal energy generation (in addition to the criteria set out in the Exclusion Policy).

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	December 31, 2023
The number of companies held that are involved in the mining of thermal coal.	0
The number of companies that generate more than 25% of their revenue from thermal coal energy generation identified using a combination of third party and/or internal Wellington Management analysis.	0
The percentage of the Fund's net assets invested in companies that are considered Sustainable Investments.	86.06%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Pre-contractual disclosure commitment:

The Fund invests in companies that the Investment Manager believes contribute to sustainable economic development in emerging markets.
The Investment Manager will identify investment opportunities which both align with the UN Sustainable Development Goals ("UN SDGs") and reflect the following long-term themes:
• Innovation –Increasing innovation and the efficiency of all available factors of production in areas such as advances in use of technology, promotion of innovation, institutional reform.
• Sustainability –Using available resources with due consideration for future generations and the environment in areas such providing better access to recycling, waste management, energy efficiency, alternative energy sources, testing and diagnostics.
• Inclusion –Improving living standards and broadening the range of beneficiaries of economic development in areas such as improving access to health care, education and finance.
Alignment with these sustainable goals is determined in the theme universe construction process. Only companies which meet our threshold for theme purity —where a minimum of 50% of the revenue is aligned with the theme's objective (or the Investment Manager projects that the total revenue that aligns with the theme will grow to at least a minimum of 50% in the near future) —are included in the investible universe for that theme.

The Investment Manager invested in investment opportunities mentioned above during the period across all themes, which are therefore considered contributors to the sustainable objective. Allocation to individual topics within the themes may fluctuate throughout the year.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Effective January 1, 2023, Sustainable Investments were assessed against each of the mandatory corporate and/or sovereign Principal Adverse Impacts, as appropriate for the asset type, and as listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs"). PAIs were assessed quantitatively and/or qualitatively according to third party data or by Wellington's research analysts and investment teams using company disclosures, internal research and analysis regarding issuer activities. Where PAI data was determined to be unreliable or unavailable, and as applicable to the asset type, the Investment Manager conducted further due diligence and assessed the issuer's activities, processes or policies related to climate, environmental, social and/or anti-bribery/anti-corruption matters to determine that the issuer was not doing significant harm. Instances of controversy or negative findings were evaluated against the issuer's response in alignment with the expectations set forth by the UN Guiding Principles on Business and Human Rights.

Please refer to the Fund's Pre-Contractual Disclosure, attached to the Fund's prospectus, for additional detail on this assessment.

How were the indicators for adverse impacts on sustainability factors taken into account?

Effective January 1, 2023, and pursuant to Level II of SFDR, adverse impact compliance screens were implemented to assess Do No Significant Harm (DNSH) for Sustainable Investments. Where the PAIs reflect a quantitative data point and such quantitative data is available, each Sustainable Investment is compared against quantitative thresholds set by the Investment Manager as applicable to the asset type. The thresholds may be determined by setting express conditions or fixed numerical thresholds for a given PAI. Certain PAIs are evaluated relative to industry peers and the worst companies in those industries will set the standard for determining significant harm. Where the Investment Manager has determined that industry differentiation is less meaningful, thresholds will be set in the context of all issuers. Where the Investment Manager has determined that differentiation is less meaningful or for PAIs which are more qualitative in nature (e.g., PAIs relating to the UNGC Principles and the OECD Guidelines for Multinational Enterprises) significant harm is assessed by evaluating, among others, companies' activities, management policies and practices, remediation activities or unresolved controversies using third party data.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was tested as part of the Investment Manager's process to identify Sustainable Investments. Assessment of management policies and practices is used to determine alignment. Misalignment with the OECD Guidelines for Multinational Enterprises or the UN Guiding Principles on Business and Human Rights may be determined where the Investment Manager identifies UN Global Compact non-compliance, inadequate policies and/or unresolved controversies.

Issuers assessed to be in breach of the OECD Guidelines for Multinational Enterprises or the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights are not eligible to be classified as Sustainable Investments. As of December 31, 2023, none of the Fund's Sustainable Investments were identified to have failed the test.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

The Fund's Sustainable Investments are assessed against each of the mandatory corporate and/or sovereign PAIs to determine that the Sustainable Investments do not cause significant harm to any environmental or social sustainable objective. In addition, by virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the PAIs into consideration either directly or indirectly on all or a portion of the Fund as follows:

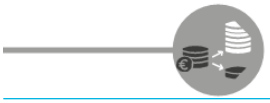
1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.
2. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	December 31, 2023
4. Exposure to companies active in the fossil fuel sector	4.45%
5. Share of non - renewable energy consumption and production	78.79%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI



What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-01-01/2023-12-31

Largest investments	Sector	% of net assets	Country

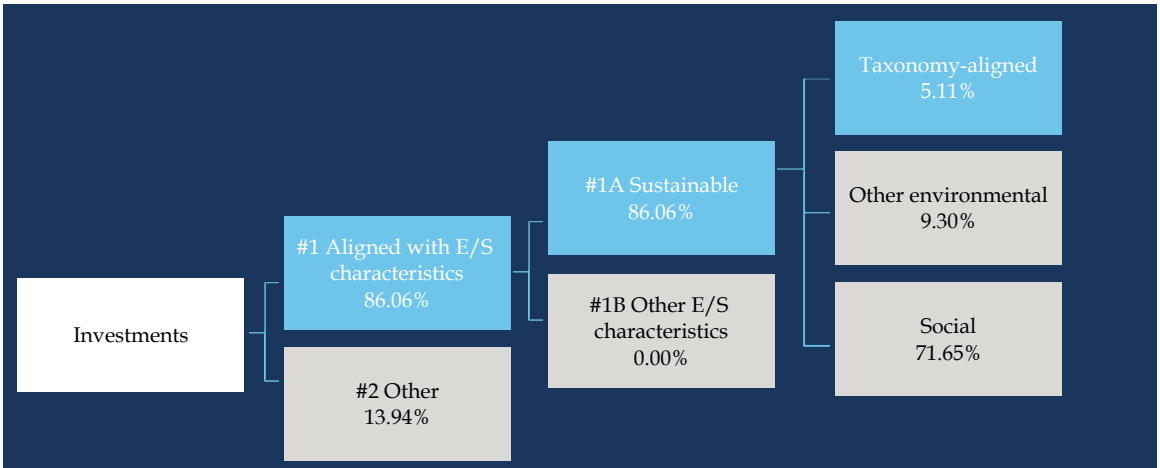
The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Pre-contractual disclosure commitment:

During normal market conditions, a minimum of 75% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

In line with the Fund's thematic approach, the Investment Manager will seek to promote sustainable economic development by investing at least 75% of the Fund's net assets in companies that are considered Sustainable Investments. Although the proportion of Sustainable Investments with environmental or social objectives may vary over time, the Investment Manager will maintain at least 10% in Sustainable Investments with an environmental objective and at least 40% in Sustainable Investments with a social objective.

On occasion, due to possible settlement mismatch related to investor flows or market holidays during times when large subscriptions are received, the portion of the Fund which is not aligned with the environmental or social characteristic may affect the Fund's ability to meet the commitment as described above under normal market conditions. The Investment Manager does not consider these short-term fluctuations to materially impact the Fund's ability to attain its environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#1 Aligned with E/S characteristics	86.06%
#2 Other	13.94%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

In which economic sectors were the investments made?

Source: MSCI

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

Although the Fund commits to invest in Sustainable Investments with an environmental objective within the meaning of the SFDR, the minimum share of EU Taxonomy-aligned investments is 0%.

However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of December 31, 2023:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

Although the Fund commits to make Sustainable Investments with an environmental objective within the meaning of the SFDR, the minimum share of such investments with an environmental objective not EU Taxonomy-aligned is 10%. These investments could be aligned with the EU Taxonomy but the Investment Manager is not currently in a position to specify the exact proportion of the Fund's underlying investments which take into account the EU criteria for environmentally sustainable economic activities. However, the position is kept under review as the underlying rules are finalized and the availability of reliable data increases over time.

Pre-contractual disclosure commitment:

Minimum 40% of the Fund's net assets are invested in socially sustainable investments.

Asset allocation overview	% of net assets as at December 31, 2023
#1A Sustainable Investments: Social	71.65%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for hedging and/or investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards. However, some minimum safeguards may still be considered to apply to the extent such holdings are aligned with one or more but not all of the Fund's environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#2 Other	13.94%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.30% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending December 31, 2023:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet one or more of the following social characteristics.

1. Issuers who receive a survey to enable the Fund to promote the adoption of appropriate policies and practices among certain investee companies with regard to modern slavery risk management, forced labour, child labour and debt bondage ("Modern Slavery"). In order to do this, the Investment Manager applies Wellington Management Group's Emerging Markets Modern Slavery Policy (the "EM Modern Slavery Policy"). Under the EM Modern Slavery Policy investee companies are evaluated by the Investment Manager on the basis of proprietary research and third-party research for inclusion to the Watch List (as defined below) and various levels of engagement are undertaken over a period of time

until adequate remediation measures are adopted.

The EM Modern Slavery Policy does not aim to eliminate Modern Slavery risk exposure in all investee companies and the Fund may from time to time invest in companies which have exposure to such risk and which are not subject to enhanced engagement. Further details about the EM Modern Slavery Policy and Watch List may be found in the section below "What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?".

2. Issuers that are screened for United Nations Global Compact Principles to enable the Fund to further promote appropriate policies and practices with regard to child labour and forced labour by excluding investment in companies that are assessed for and known to be involved in controversies regarding child labour or forced labour. In order to do this, the Fund excludes investments in companies which are assessed to have failed United Nations Global Compact Principles 4 (businesses should uphold the elimination of all forms of forced and compulsory labour) and 5 (businesses should uphold the effective abolition of child labour).

A reference benchmark has not been designated for the purpose of attaining the social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	December 31, 2023
The number of companies held which have been assessed to be in violation of United Nations Global Compact principles 4 (businesses should uphold the elimination of all forms of forced and compulsory labour) or 5 (businesses should uphold the effective abolition of child labour). Since the Fund excludes investments in companies which are assessed to have failed United Nations Global Compact Principles 4 and 5, this number is expected to be 0.	0
The percentage of companies deemed as having a higher risk of Modern Slavery exposure that are placed on the Watch List and are subject to enhanced engagement. Since this percentage will depend on 1) the time of the investments and 2) the result of the survey, this percentage cannot be disclosed in the Fund's pre-contractual template but will be disclosed in the Fund's periodic reporting.	18.40%
The percentage of companies held for over a year that have responded to an engagement survey regarding their modern slavery risk management policies and procedures. Since this percentage will depend on 1) the time of the investments and 2) the response to the engagement of the survey, this percentage cannot be disclosed in the Fund's pre-contractual template but will be disclosed in the Fund's periodic reporting.	32.70%
The percentage of companies where remediation measures have been adopted such that they are no longer assessed as having a higher risk of Modern Slavery exposure and may be removed from the internal Watch List. Since this percentage will depend on 1) the time of the investments and 2) the result of the remediation measures adopted following the survey, this percentage cannot be disclosed in the Fund's pre-contractual template but will be disclosed in the Fund's periodic reporting.	0.00%
The percentage of the Fund's equity issuers who received a survey and have been formally evaluated for inclusion to the Watch List regarding Modern Slavery risk management. Since at least 70% of the Fund's equity issuers are generally expected to receive a survey and be formally evaluated for inclusion to the Watch List regarding Modern Slavery risk management, this percentage is expected to be at least 70%.	96.60%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

**Companies that were held in the portfolio as of calendar year-end but that were no longer on the active or inactive watch list in part due to the fund's remediation measures, including but not limited to additional information gained from company outreach efforts and/or companies' actions towards mitigating controversies.*

… and compared to previous periods?

Sustainability Indicator	December 31, 2023	December 31, 2022

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment Guideline, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:
1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.
2. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.
While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	December 31, 2023
4. Exposure to companies active in the fossil fuel sector	8.03%
5. Share of non - renewable energy consumption and production	90.25%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	2.18%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-01-01/2023-12-31

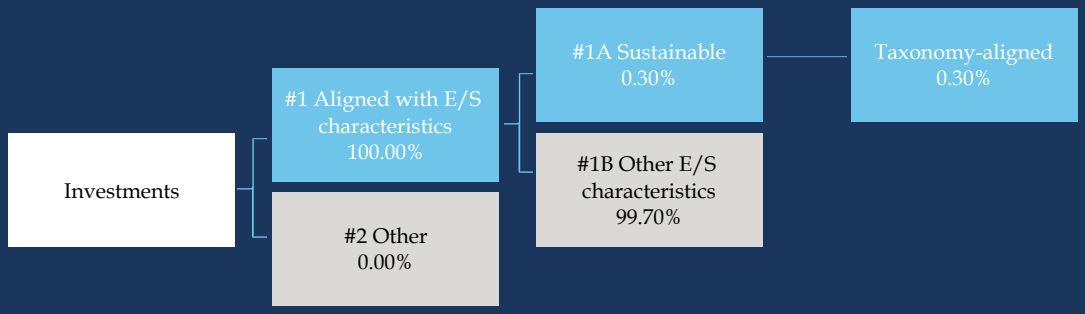
Largest investments	Sector	% of net assets	Country
TAIWAN SEMICONDUCTOR MANUFAC	Information technology	9.05%	TW
SAMSUNG ELECTRONICS CO LTD	Information technology	6.15%	KR
TENCENT HOLDINGS LTD	Communication services	4.15%	CN
NASPERS LTD N SHS	Consumer discretionary	2.79%	ZA
SK HYNIX INC	Information technology	2.60%	KR
ALIBABA GROUP HOLDING SP ADR	Consumer discretionary	2.20%	CN
LARSEN + TOUBRO LTD	Industrials	2.18%	IN
RELIANCE INDUSTRIES LTD	Energy	2.11%	IN
HDFC BANK LIMITED	Financials	1.84%	IN
BHARTI AIRTEL LTD	Communication services	1.78%	IN
VALE SA	Materials	1.55%	BR
SBI LIFE INSURANCE CO LTD	Financials	1.52%	IN
THE SAUDI NATIONAL BANK	Financials	1.48%	SA
COUPANG INC	Consumer discretionary	1.44%	US
ICICI BANK LTD	Financials	1.40%	IN

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Pre-contractual disclosure commitment:

During normal market conditions, a minimum of 70% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

On occasion, due to possible settlement mismatch related to investor flows or market holidays during times when large subscriptions are received, the portion of the Fund which is not aligned with the environmental or social characteristic may affect the Fund's ability to meet the commitment as described above under normal market conditions. The Investment Manager does not consider these short-term fluctuations to materially impact the Fund's ability to attain its environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#1 Aligned with E/S characteristics	100.00%
#2 Other	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

Source: MSCI

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of December 31, 2023:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

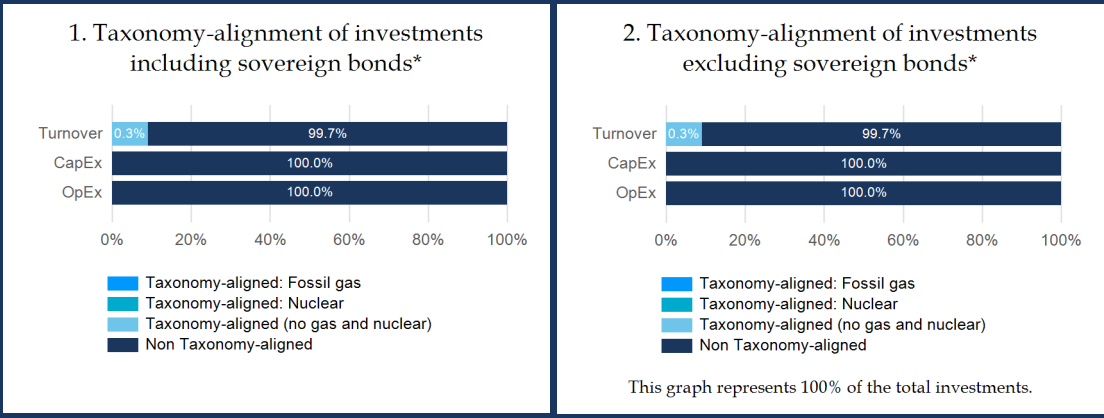
☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.



** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: Clarity AI

What was the share of investments made in transitional and enabling activities?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of investments in transitional and enabling activities is 0%.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Taxonomy aligned investments	% of market value as at December 31, 2023
Transitional Turnover	0.00%
Transitional Capex	0.00%
Transitional Opex	0.00%
Enabling Turnover	0.30%
Enabling Capex	0.00%
Enabling Opex	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: Clarity AI

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Asset allocation overview	% of net assets as at December 31, 2023	% of net assets as at December 31, 2022
Taxonomy aligned investments	0.30%	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: Clarity AI

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable. This Fund does not commit to invest in sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for hedging and investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards. However, some minimum safeguards may still be considered to apply to the extent such holdings are aligned with one or more but not all of the Fund's environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#2 Other	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

The Fund assessed and promoted the adoption of appropriate policies and practices among certain investee companies with regard to modern slavery risk management, with regards to forced labour, child labour and debt bondage ("Modern Slavery") by engaging with 84 companies via survey distribution, which accounted for 96.60% of the companies held longer than a year, and by engaging with 4 companies during meetings over the reference period.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending December 31, 2023:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet the following environmental characteristic.

The Fund invests in companies with an E Rating of 1-3 and will limit its investments in companies with a below-average E Ratings relative to their peer universe, using a rating scale of 1-5, where 1 is the highest rating.

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	December 31, 2023
The percentage of the Fund's NAV invested in companies with an E Rating of 1-3.	88.31%

Represents point-in-time data. Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:

1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.

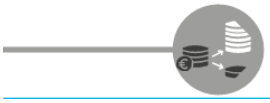
2. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	December 31, 2023
4. Exposure to companies active in the fossil fuel sector	57.72%
5. Share of non - renewable energy consumption and production	79.61%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI



What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-01-01/2023-12-31

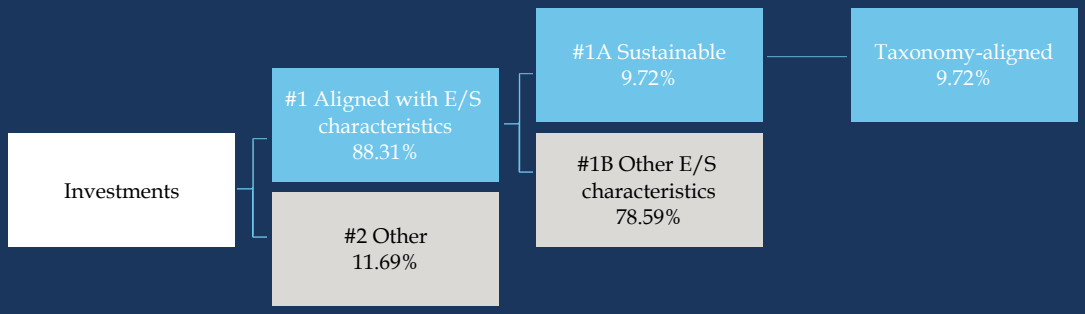
Largest investments	Sector	% of net assets	Country
VINCI SA	Industrials	4.61%	FR
ENGIE	Utilities	4.30%	FR
AENA SME SA	Industrials	3.82%	ES
TARGA RESOURCES CORP	Energy	3.63%	US
CANADIAN NATL RAILWAY CO	Industrials	3.51%	CA
NATIONAL GRID PLC	Utilities	3.45%	GB
CIA SANEAMENTO BASICO DE SP	Utilities	3.43%	BR
SEMPRA	Utilities	3.41%	US
AMERICAN TOWER CORP	Real estate	3.39%	US
ENEL SPA	Utilities	3.38%	IT
EDISON INTERNATIONAL	Utilities	3.33%	US
SK TELECOM	Communication services	3.31%	KR
NIPPON TELEGRAPH + TELEPHONE	Communication services	3.30%	JP
ATMOS ENERGY CORP	Utilities	3.22%	US

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Pre-contractual disclosure commitment:

During normal market conditions, a minimum of 70% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

On occasion, due to possible settlement mismatch related to investor flows or market holidays during times when large subscriptions are received, the portion of the Fund which is not aligned with the environmental or social characteristic may affect the Fund's ability to meet the commitment as described above under normal market conditions. The Investment Manager does not consider these short-term fluctuations to materially impact the Fund's ability to attain its environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#1 Aligned with E/S characteristics	88.31%
#2 Other	11.69%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

In which economic sectors were the investments made?

Sector	Sub Sector	% of net assets
Communication services	Wireless telecommunication services	6.37%
	Diversified telecommunication svcs	3.30%
Consumer staples	Consumer staples distrib & retail	0.95%
Energy	Oil, gas & consumable fuels	10.25%
Financials	Financial services	2.80%
Industrials	Transportation infrastructure	5.12%
	Construction & engineering	4.61%
	Ground transportation	3.51%
	Industrial conglomerates	1.73%
Not classified	Not classified	1.78%
Real estate	Specialized reits	3.39%
	Residential reits	2.74%
Utilities	Electric utilities	24.17%
	Multi-utilities	15.50%
	Ind pwr and renewable elec producer	7.09%
	Water utilities	3.43%
	Gas utilities	3.22%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS classification hierarchy. Source: MSCI

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of December 31, 2023:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☒ Yes

☐ In fossil gas ☒ In nuclear energy

☐ No

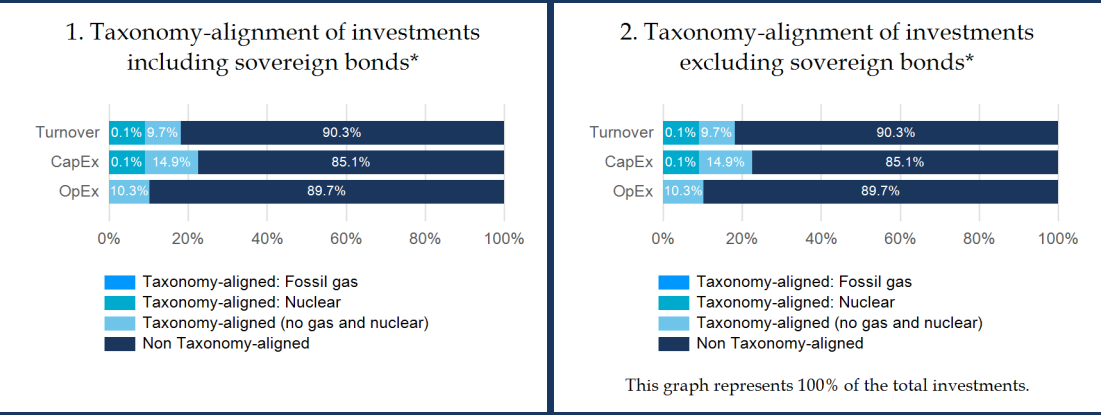
[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.



**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: Clarity AI

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of investments in transitional and enabling activities is 0%.

Taxonomy aligned investments	% of market value as at December 31, 2023
Transitional Turnover	0.06%
Transitional Capex	0.10%
Transitional Opex	0.05%
Enabling Turnover	4.13%
Enabling Capex	2.19%
Enabling Opex	2.89%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Asset allocation overview	% of net assets as at December 31, 2023	% of net assets as at December 31, 2022
Taxonomy aligned investments	9.72%	3.15%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: Clarity AI

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable. This Fund does not commit to invest in sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards.

Asset allocation overview	% of net assets as at December 31, 2023
#2 Other	11.69%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Wellington Euro High Yield Bond Fund

Legal entity identifier:
549300CPM6LQIQPQTM10

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.66% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending December 31, 2023:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet the following social characteristic.

The Fund will invest in issuers with an S rating and maintain an overall weighted average S Rating, in excess of the ICE Bank of America Euro High Yield Constrained Index (the "Index").

Whilst the Index is used for S Rating comparison, a reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	December 31, 2023
The difference between the Fund's weighted average S Rating and that of the Index.	-0.02

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

… and compared to previous periods?

Sustainability Indicator	December 31, 2023	December 31, 2022
The difference between the Fund's weighted average S Rating and that of the Index.	-0.02	-0.22

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:

1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.

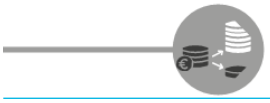
2. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	December 31, 2023
4. Exposure to companies active in the fossil fuel sector	1.74%
5. Share of non - renewable energy consumption and production	68.79%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI



What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-01-01/2023-12-31

Largest investments	Sector	% of net assets	Country
German Treasury Bills	Not classified	5.67%	DE

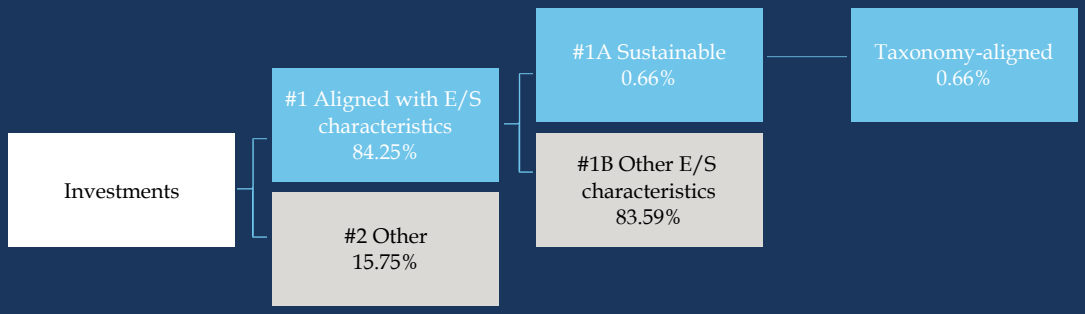
The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Pre-contractual disclosure commitment:

During normal market conditions, a minimum of 60% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

On occasion, due to possible settlement mismatch related to investor flows or market holidays during times when large subscriptions are received, the portion of the Fund which is not aligned with the environmental or social characteristic may affect the Fund's ability to meet the commitment as described above under normal market conditions. The Investment Manager does not consider these short-term fluctuations to materially impact the Fund's ability to attain its environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#1 Aligned with E/S characteristics	84.25%
#2 Other	15.75%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of December 31, 2023:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

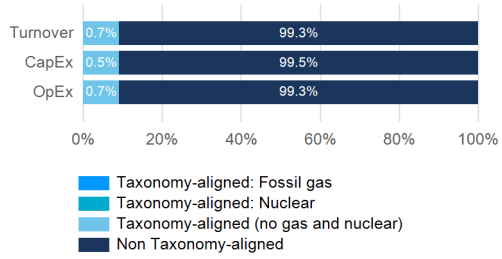
☐ Yes

☐ In fossil gas ☐ In nuclear energy

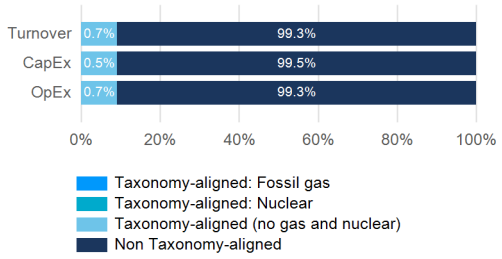
☒ No

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*



2. Taxonomy-alignment of investments excluding sovereign bonds*



This graph represents 94.33% of the total investments.

**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable. This Fund does not commit to invest in sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for hedging and investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards.

Asset allocation overview	% of net assets as at December 31, 2023
#2 Other	15.75%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of__% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending December 31, 2023:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet the following social characteristic.

The Fund aims to promote gender diversity in board representation amongst a portion of the investee companies by investing a portion of the Fund's net assets in companies that appoint three or more women to their board.

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	December 31, 2023
The percentage of the Fund's net assets invested in companies with three or more women on their board.	79.31%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

… and compared to previous periods?

Sustainability Indicator	December 31, 2023	December 31, 2022
The percentage of the Fund's net assets invested in companies with three or more women on their board.	79.31%	69.29%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:

1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.
2. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.
3. The Fund will invest at least 51% of the Fund's net assets in companies that seek to promote diversity by appointing three or more women to their board - PAI: Board Gender Diversity.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	December 31, 2023
4. Exposure to companies active in the fossil fuel sector	0.00%
5. Share of non - renewable energy consumption and production	64.26%
13. Board gender diversity	33.66%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI

Wellington Management Funds (Ireland) plc

Appendix 5 Sustainable Finance Disclosure Regulation ("SFDR") (unaudited)

December 31, 2023

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-01-01/2023-12-31

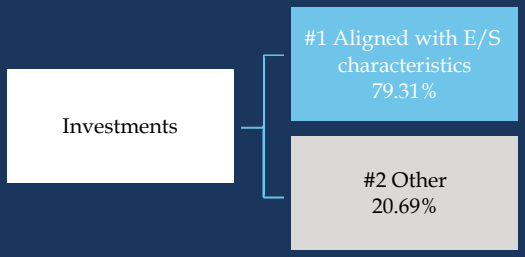
Largest investments	Sector	% of net assets	Country
FLEETCOR TECHNOLOGIES INC	Financials	5.05%	US
INTUIT INC	Information technology	5.00%	US
WEX INC	Financials	4.97%	US
GLOBAL PAYMENTS INC	Financials	4.96%	US
EQUIFAX INC	Industrials	4.96%	US
BLOCK INC	Financials	4.88%	US
S+P GLOBAL INC	Financials	4.85%	US
TRUPANION INC	Financials	4.68%	US
COSTAR GROUP INC	Real estate	4.56%	US
SHOPIFY INC CLASS A	Information technology	4.54%	CA
MASTERCARD INC A	Financials	4.51%	US

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Pre-contractual disclosure commitment:

During normal market conditions, a minimum of 51% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

On occasion, due to possible settlement mismatch related to investor flows or market holidays during times when large subscriptions are received, the portion of the Fund which is not aligned with the environmental or social characteristic may affect the Fund's ability to meet the commitment as described above under normal market conditions. The Investment Manager does not consider these short-term fluctuations to materially impact the Fund's ability to attain its environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#1 Aligned with E/S characteristics	79.31%
#2 Other	20.69%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

In which economic sectors were the investments made?

Sector	Sub Sector	% of net assets
Consumer discretionary	Broadline retail	4.43%
Financials	Financial services	38.73%
	Capital markets	9.95%
	Insurance	4.68%
Industrials	Professional services	19.67%
Information technology	Software	13.35%
	It services	4.54%
Not classified	Not classified	0.11%
Real estate	Real estate management & develop	4.56%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS classification hierarchy. Source: MSCI

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of December 31, 2023:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

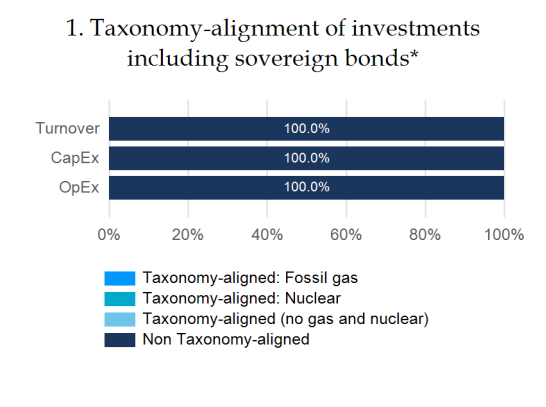
[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

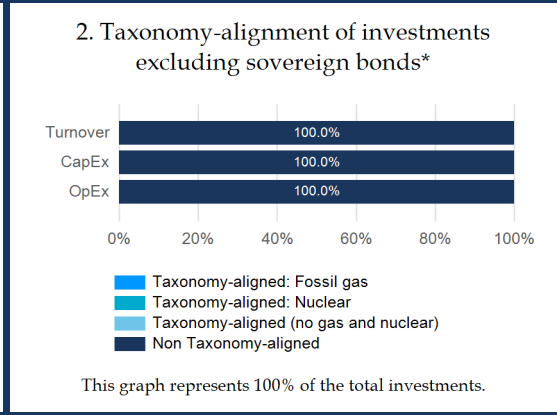
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: Clarity AI

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of investments in transitional and enabling activities is 0%.

Taxonomy aligned investments	% of market value as at December 31, 2023
Transitional Turnover	0.00%
Transitional Capex	0.00%
Transitional Opex	0.00%
Enabling Turnover	0.00%
Enabling Capex	0.00%
Enabling Opex	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: Clarity AI

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Asset allocation overview	% of net assets as at December 31, 2023	% of net assets as at December 31, 2022
Taxonomy aligned investments	0.00%	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: Clarity AI

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not commit to invest in sustainable investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable. This Fund does not commit to invest in sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for hedging and investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards.

Asset allocation overview	% of net assets as at December 31, 2023
#2 Other	20.69%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 2.84% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending December 31, 2023:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet the following environmental characteristic.

Companies with science-based targets and commitments to enable the Fund to seek to achieve long term net zero carbon intensity by 2050, by promoting the establishment of net zero science-based targets amongst investee companies. In relation to the net zero commitment, the Science Based Targets initiative ("SBTi") provides a clearly defined pathway for companies to reduce greenhouse gas emissions. Targets are considered 'science-based' if they are in line with what the latest climate science deems necessary to meet the goals of the Paris Agreement –limiting global warming to well-below 2°C above pre-industrial levels and pursuing efforts to limit warming to 1.5°C.

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	December 31, 2023
The percentage of the Fund's NAV invested in companies with established or which have committed to establish a target validated by the Science Based Targets initiative (SBTi).	78.09%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

… and compared to previous periods?

Source: MSCI and Wellington.

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:

1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.
2. The Fund will invest in a minimum percentage of companies with targets validated by SBTi or a commitment to establish such targets, and actively engage with companies held in the portfolio to commit to set a science-based target - PAIs: Carbon Footprint; GHG Emissions, GHG Intensity of Investee Companies.
3. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	December 31, 2023
1. GHG emissions	1453.19tCO2e
2. Carbon footprint	514.41tCO2e/ €M invested
3. GHG intensity of investee companies	707.95tCO2e/ €M revenue
4. Exposure to companies active in the fossil fuel sector	4.23%
5. Share of non - renewable energy consumption and production	66.06%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI

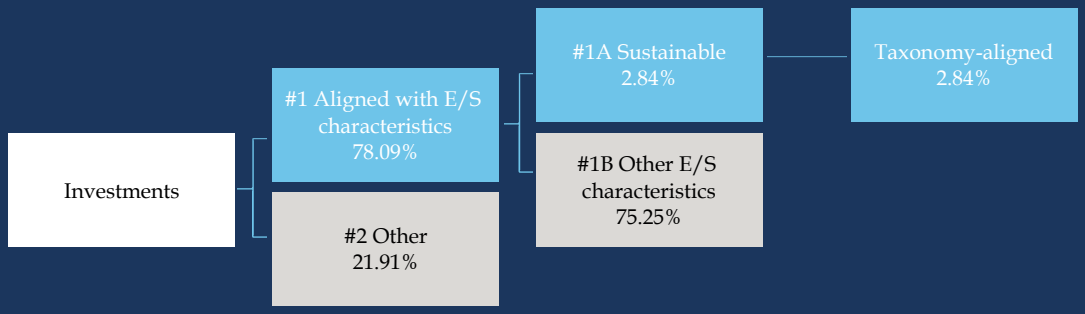
The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Pre-contractual disclosure commitment:

During normal market conditions, a minimum of 40% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

On occasion, due to possible settlement mismatch related to investor flows or market holidays during times when large subscriptions are received, the portion of the Fund which is not aligned with the environmental or social characteristic may affect the Fund's ability to meet the commitment as described above under normal market conditions. The Investment Manager does not consider these short-term fluctuations to materially impact the Fund's ability to attain its environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#1 Aligned with E/S characteristics	78.09%
#2 Other	21.91%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

Source: MSCI

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of December 31, 2023:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

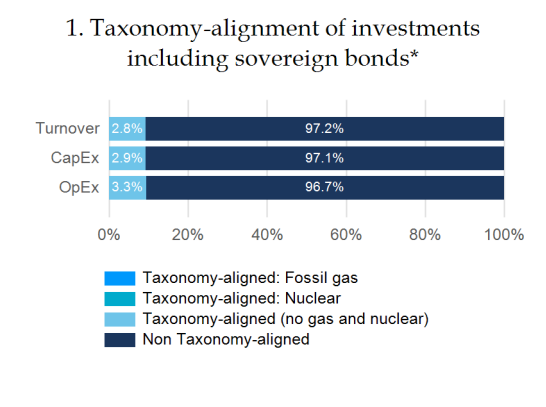
☒ No

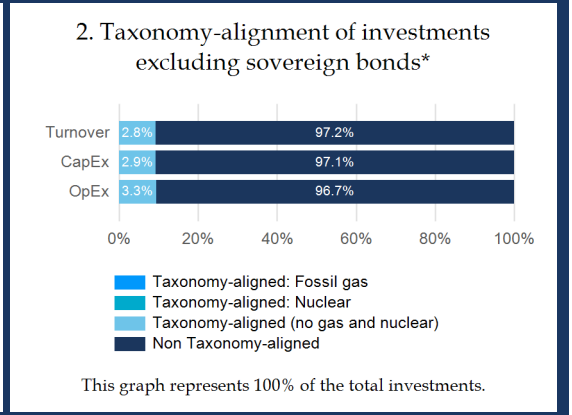
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: Clarity AI

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of investments in transitional and enabling activities is 0%.

Taxonomy aligned investments	% of market value as at December 31, 2023
Transitional Turnover	0.03%
Transitional Capex	0.04%
Transitional Opex	0.03%
Enabling Turnover	0.50%
Enabling Capex	1.66%
Enabling Opex	0.84%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: Clarity AI

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Asset allocation overview	% of net assets as at December 31, 2023	% of net assets as at December 31, 2022
Taxonomy aligned investments	2.84%	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable. This Fund does not commit to invest in sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for hedging and/or investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards.

Asset allocation overview	% of net assets as at December 31, 2023
#2 Other	21.91%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

The Fund engaged with companies held in the portfolio to establish or to commit to net zero science-based targets. During the reference period the Fund engaged with 16 companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Wellington Global Bond Fund

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.48% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending December 31, 2023:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet one or more of the following environmental or social characteristics.

1. Issuers that are screened to enable the Fund to limit its exposure to sovereign issuers whose fossil fuels exports represent a significant portion of their total exports.

2. Issuers with an E or S Rating to enable the Fund to exclude investment in the worst rated corporate issuers with the worse E or S Ratings relative to their peer universe, using a rating scale of 1-5, where 1 is the highest rating.

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	December 31, 2023
The number of corporate bonds held with an E Rating or S Rating of 5.	0
The percentage of the Fund's NAV invested in sovereign issuers where fossil fuels make up more than 67% of their exports.	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

… and compared to previous periods?

Sustainability Indicator	December 31, 2023	December 31, 2022
The number of corporate bonds held with an E Rating or S Rating of 5.	0	0
The percentage of the Fund's NAV invested in sovereign issuers where fossil fuels make up more than 67% of their exports.	0.00%	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:

1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.

2. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	December 31, 2023
4. Exposure to companies active in the fossil fuel sector	3.12%
5. Share of non - renewable energy consumption and production	71.23%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.56%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI

Wellington Management Funds (Ireland) plc

Appendix 5 Sustainable Finance Disclosure Regulation ("SFDR") (unaudited)

December 31, 2023

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-01-01/2023-12-31

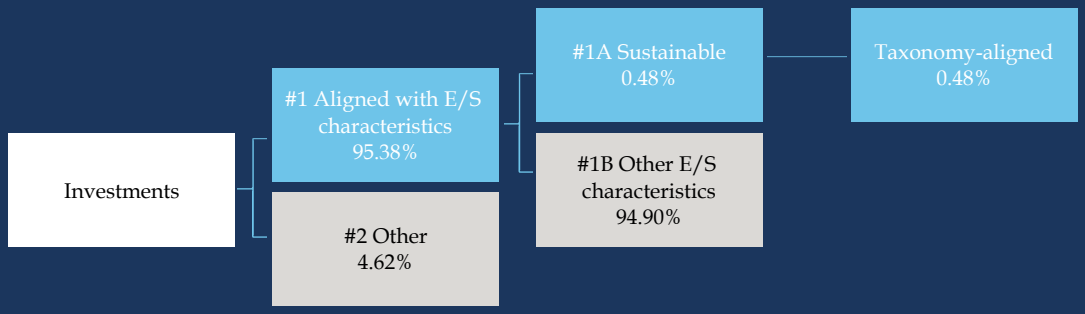
Largest investments	Sector	% of net assets	Country
Federal National Mortgage Association	Financials	5.68%	US
Japan Treasury Discount Bills	Not classified	4.63%	JP
China Government Bonds	Not classified	3.71%	CN
French Republic Government Bonds OAT	Not classified	3.28%	FR
U.S. Treasury Bonds	Not classified	3.14%	US
Bundesrepublik Deutschland Bundesanleihe	Not classified	2.66%	DE
Federal Home Loan Mortgage Corp.	Financials	2.64%	US
Japan Government Thirty Year Bonds	Not classified	2.60%	JP
Ontario Teachers' Finance Trust	Financials	2.42%	CA
U.K. Gilts	Not classified	2.39%	GB
Government National Mortgage Association	Financials	2.04%	US
China Development Bank	Financials	1.95%	CN
Italy Buoni Poliennali Del Tesoro	Not classified	1.80%	IT
Agricultural Development Bank of China	Financials	1.66%	CN
Australia Government Bonds	Not classified	1.65%	AU

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Pre-contractual disclosure commitment:

During normal market conditions, a minimum of 65% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

On occasion, due to possible settlement mismatch related to investor flows or market holidays during times when large subscriptions are received, the portion of the Fund which is not aligned with the environmental or social characteristic may affect the Fund's ability to meet the commitment as described above under normal market conditions. The Investment Manager does not consider these short-term fluctuations to materially impact the Fund's ability to attain its environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#1 Aligned with E/S characteristics	95.38%
#2 Other	4.62%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS classification hierarchy. Source: MSCI

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of December 31, 2023:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

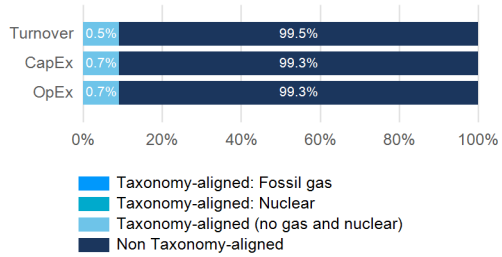
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

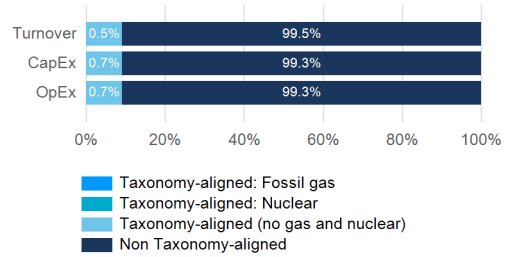
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*



2. Taxonomy-alignment of investments excluding sovereign bonds*



This graph represents 56.42% of the total investments.

**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable. This Fund does not commit to invest in sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for hedging and/or investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards. However, some minimum safeguards may still be considered to apply to the extent such holdings are aligned with one or more but not all of the Fund's environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#2 Other	4.62%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Wellington Global Credit Buy and Maintain Fund

Legal entity identifier: 549300B8E4VMSRZZ6612

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 1.86% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending December 31, 2023:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet the following environmental characteristic.

Companies with science-based targets and commitments to enable the Fund to seek to achieve long term net zero carbon intensity by 2050, by promoting the establishment of net zero science-based targets amongst investee companies. In relation to the net zero commitment, the Science Based Targets initiative ("SBTi") provides a clearly defined pathway for companies to reduce greenhouse gas emissions. Targets are considered 'science-based' if they are in line with what the latest climate science deems necessary to meet the goals of the Paris Agreement –limiting global warming to well-below 2°C above pre-industrial levels and pursuing efforts to limit warming to 1.5°C.

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	December 31, 2023
The percentage of the Fund's NAV invested in companies with established or which have committed to establish a target validated by the Science Based Targets initiative (SBTi).	33.47%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

… and compared to previous periods?

Sustainability Indicator	December 31, 2023	December 31, 2022
The percentage of the Fund's NAV invested in companies with established or which have committed to establish a target validated by the Science Based Targets initiative (SBTi).	33.47%	32.78%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Source: MSCI and Wellington.

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

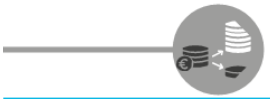
Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:
1. The Fund will invest in a minimum percentage of companies with targets validated by SBTi or a commitment to establish such targets, and actively engage with companies held in the portfolio to commit to set a science-based target. - PAIs: Carbon Footprint; GHG Emissions, GHG Intensity of Investee Companies.
While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	December 31, 2023
1. GHG emissions	26357.53tCO2e
2. Carbon footprint	371.18tCO2e/ €M invested
3. GHG intensity of investee companies	801.95tCO2e/ €M revenue
4. Exposure to companies active in the fossil fuel sector	6.83%
5. Share of non - renewable energy consumption and production	70.16%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI



What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-01-01/2023-12-31

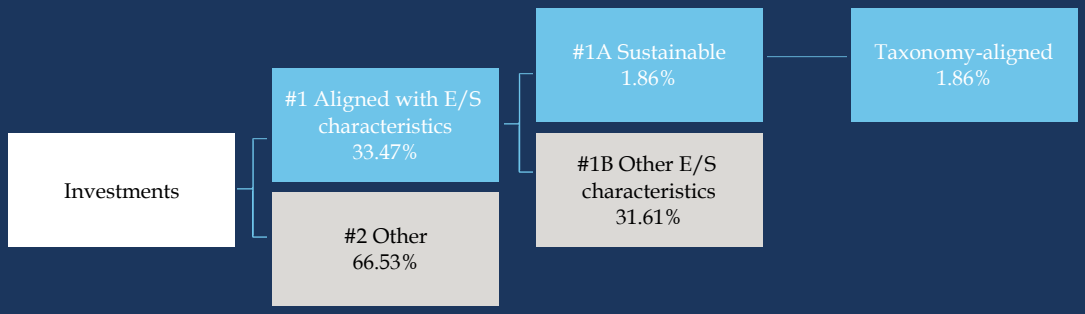
Largest investments	Sector	% of net assets	Country
Chubb INA Holdings, Inc.	Financials	1.30%	US
Marsh & McLennan Cos., Inc.	Financials	1.30%	US
Scentre Group Trust 1	Real estate	1.29%	AU
Wells Fargo & Co.	Financials	1.25%	US
JPMorgan Chase & Co.	Financials	1.25%	US
UBS Group AG	Financials	1.23%	CH
MetLife, Inc.	Financials	1.21%	US
Grainger PLC	Real estate	1.08%	GB
BAWAG Group AG	Financials	1.07%	AT
JAB Holdings BV	Financials	1.06%	NL
RAC Bond Co. PLC	Consumer discretionary	1.05%	GB
Toronto-Dominion Bank	Financials	1.05%	CA
Yorkshire Water Finance PLC	Utilities	1.04%	GB
NatWest Group PLC	Financials	1.04%	GB
Heathrow Funding Ltd.	Industrials	1.04%	GB

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Pre-contractual disclosure commitment:

During normal market conditions, a minimum of 20% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

On occasion, due to possible settlement mismatch related to investor flows or market holidays during times when large subscriptions are received, the portion of the Fund which is not aligned with the environmental or social characteristic may affect the Fund's ability to meet the commitment as described above under normal market conditions. The Investment Manager does not consider these short-term fluctuations to materially impact the Fund's ability to attain its environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#1 Aligned with E/S characteristics	33.47%
#2 Other	66.53%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of December 31, 2023:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

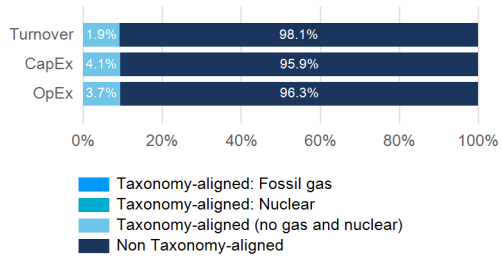
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

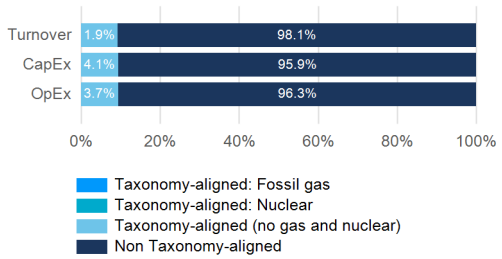
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*



2. Taxonomy-alignment of investments excluding sovereign bonds*



This graph represents 96.22% of the total investments.

**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What was the share of investments made in transitional and enabling activities?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of investments in transitional and enabling activities is 0%.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure**

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Taxonomy aligned investments	% of market value as at December 31, 2023
Transitional Turnover	0.02%
Transitional Capex	0.00%
Transitional Opex	0.02%
Enabling Turnover	0.97%
Enabling Capex	0.93%
Enabling Opex	1.49%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable. This Fund does not commit to invest in sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for hedging and/or investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund.

Asset allocation overview	% of net assets as at December 31, 2023
#2 Other	66.53%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

The Fund engaged with companies held in the portfolio to establish or to commit to net zero science-based targets. During the reference period the Fund engaged with 102 companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Wellington Global Credit ESG Fund

Legal entity identifier:
DVNIEMSUF6LETV826916

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 1.64% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending December 31, 2023:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet one or more of the following environmental or social characteristics.

1. Issuers that do not have the worst E or S Ratings relative to their peer universe. In order to do this, the Fund assigns issuers an individual E and S Rating, based on Wellington Management's proprietary ratings framework, using a rating scale of 1-5, where 1 is the highest rating, and excludes issuers that have received an E or S Rating of 5. A rating of 1 is the most positive rating, indicating that the company is a leader among its peers in managing material environmental or social risks or incorporating environmental or social factors into its practices. A rating of 5 is the most negative, indicating that the company may be lagging its peers in managing certain material environmental or social risks or

incorporating environmental or social factors into its practices. E Ratings use environmental indicators (such as energy efficiency, carbon emissions and pollutants, sustainable packaging and hazardous waste), and S Ratings use social indicators (such as corruption and bribery, labour relations, product safety and supply chain management) in the assessment of the environmental and social activities and attributes of issuers.

Issuers with a below average E or S Rating (E or S Rating of 4) may only be included in the Fund if the Investment Manager determines that the Fund is adequately compensated for the additional risk.

2. Issuers are screened to enable the Fund to apply a number of exclusionary screens in order to exclude or reduce certain harmful impacts on the environment and society. These include avoiding corporate issuers principally involved in the following industries: fossil fuels, thermal coal, controversial and conventional weapons; and will not invest in corporate issuers that do not have responsible practices on human rights, forced labour or do not comply with the United Nations Global Compact; and avoiding corporate issuers that engage in or harmful social activities such as adult entertainment, tobacco and cannabis.

The Fund will not invest in the sovereign debt of countries generating a majority of revenues from fossil fuel exports as well as those that are identified as "not free" in terms of political rights and civil liberties (in addition to the criteria set out in the Exclusion Policy).

3. Issuers with disclosued carbon data that enable the Fund to seek to achieve long term net zero carbon intensity by aiming to reduce its weighted average carbon intensity ("WACI"), as compared to the 2019 WACI of the Custom Bloomberg Global Aggregate Corporate (Fin 40% cap) USD/Euro/GBP 1% Cap $500M Min Index (ex Tier 1, Upper Tier 2, and Capital Credit securities) Index (the "Index") by 2050.

Whilst the Index is used for WACI comparison purposes, a reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	December 31, 2023
The number of bonds of any countries identified as generating >50% of export revenues from fossil fuels. Since the Fund will exclude such issuers, this number should be 0.	0
The number of bonds of countries that are identified as "not free" in terms of political rights and civil liberties. Since the Fund will exclude such issuers, this number should be 0.	0
The number of corporate issuers held identified as failing to comply with the United Nations Global Compact. Since the Fund will exclude such issuers, this number should be 0.	0
The number of corporate issuers held identified as generating >25% of their revenue from thermal coal energy generation. Since the Fund will exclude such issuers, this number should be 0.	0
The number of corporate issuers identified as generating >5% of their revenue from adult entertainment. Since the Fund will exclude such issuers, this number should be 0.	0
The number of corporate issuers identified as generating >5% of their revenue from the production of civilian firearms. Since the Fund will exclude such issuers, this number should be 0.	0
The number of corporate issuers identified as having any tie to the manufacturing of controversial or nuclear weapons. Since the Fund will exclude such issuers, this number should be 0.	0
The number of corporate issuers identified as producing tobacco or generating >25% of their revenue from tobacco or cannabis related business activities. Since the Fund will exclude such issuers, this number should be 0.	0
The number of issuers held with an E Rating or S Rating of 5. Since the Fund will exclude such issuers, this number should be 0.	0
The number of securities of any corporate issuers involved in the production and sales of fossil fuels, or the mining of metals, as defined by standard industry classifications for Energy, and Metals and Mining.	0
The percentage difference of the Fund's WACI and that of the Index's 2019 WACI. Since the Fund maintains a WACI that is 25% below the Index's 2019 WACI, with this percentage increasing to 50% by 2030, this percentage is expected to be at least 25% and to increase to at least 50% by 2030.	-53.10%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:

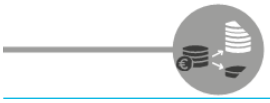
1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.
2. The Fund will maintain a carbon footprint (weighted average carbon intensity) that is lower than the Index. The Fund will aim to reduce its weighted average carbon intensity ("WACI") to net zero by 2050, or sooner, in line with the Paris Agreement - PAI: Carbon Footprint; GHG Emissions, GHG Intensity of Investee Companies.
3. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy. In addition the Fund will exclude companies engaged in the production and sales of fossil fuels. - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.
4. The Fund excludes companies which have been identified as failing to comply with the United Nations Global Compact –PAI: Violations of United Nations Global Compact.
5. The Fund excludes companies that are identified as "not free" according to the MSCI's Freedom House Global Freedom Status - PAIs: Investee countries subject to social violations.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	December 31, 2023
1. GHG emissions	207757.39tCO2e
2. Carbon footprint	255.77tCO2e/ €M invested
3. GHG intensity of investee companies	661.46tCO2e/ €M revenue
4. Exposure to companies active in the fossil fuel sector	7.53%
5. Share of non - renewable energy consumption and production	70.77%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI



What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-01-01/2023-12-31

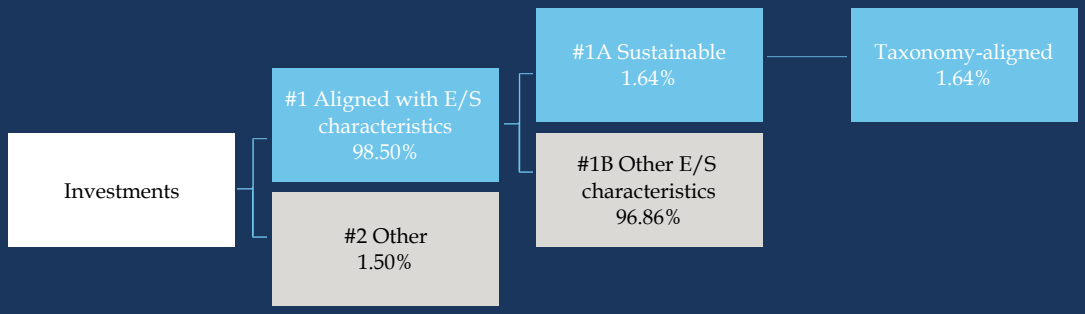
Largest investments	Sector	% of net assets	Country
AT&T, Inc.	Communication services	2.74%	US
Wells Fargo & Co.	Financials	2.10%	US
HCA, Inc.	Health care	1.92%	US
Pacific Gas & Electric Co.	Utilities	1.83%	US
Celanese U.S. Holdings LLC	Materials	1.71%	US
UBS Group AG	Financials	1.69%	CH
Capital One Financial Corp.	Financials	1.53%	US
U.S. Cash Management Bills - Reopening	Not classified	1.44%	US
T-Mobile USA, Inc.	Communication services	1.41%	US
EDP Servicios Financieros Espana SA	Utilities	1.39%	ES
AbbVie, Inc.	Health care	1.39%	US
M&T Bank Corp.	Financials	1.33%	US
Warnermedia Holdings, Inc.	Communication services	1.31%	US
Oracle Corp.	Information technology	1.31%	US
UnitedHealth Group, Inc.	Health care	1.29%	US

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Pre-contractual disclosure commitment:

During normal market conditions, a minimum of 80% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

On occasion, due to possible settlement mismatch related to investor flows or market holidays during times when large subscriptions are received, the portion of the Fund which is not aligned with the environmental or social characteristic may affect the Fund's ability to meet the commitment as described above under normal market conditions. The Investment Manager does not consider these short-term fluctuations to materially impact the Fund's ability to attain its environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#1 Aligned with E/S characteristics	98.50%
#2 Other	1.50%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS classification hierarchy. Source: MSCI

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of December 31, 2023:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

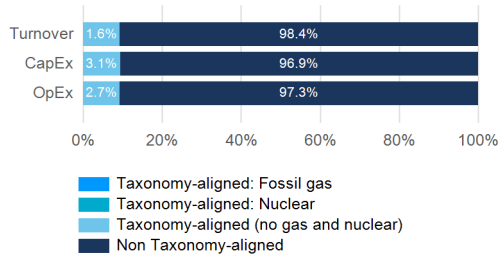
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

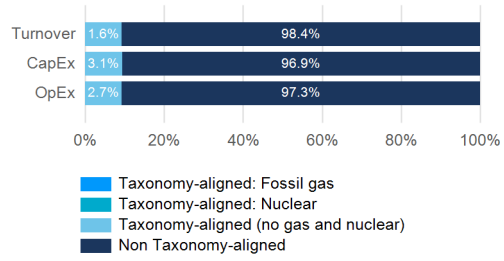
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*



2. Taxonomy-alignment of investments excluding sovereign bonds*



This graph represents 96.94% of the total investments.

**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What was the share of investments made in transitional and enabling activities?

Taxonomy-aligned activities are expressed as a share of:

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of investments in transitional and enabling activities is 0%.

Taxonomy aligned investments	% of market value as at December 31, 2023
Transitional Turnover	0.03%
Transitional Capex	0.01%
Transitional Opex	0.01%
Enabling Turnover	1.02%
Enabling Capex	0.65%
Enabling Opex	0.96%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable. This Fund does not commit to invest in sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for hedging and/or investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards. However, some minimum safeguards may still be considered to apply to the extent such holdings are aligned with one or more but not all of the Fund's environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#2 Other	1.50%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

The Fund engaged with companies held in the portfolio to establish or to commit to net zero science-based targets. During the reference period the Fund engaged with 103 companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Wellington Global Health Care Equity Fund

Legal entity identifier: BIN54GDXNDVZ6CYZUZ36

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.37% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending December 31, 2023:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet the following social characteristic.

The Fund will encourage the creation of new therapies and addressing unmet medical needs by favouring companies with higher research and development expense to sales ratios than the MSCI World Health Care Index (the "Index"). Companies with a research and development expense to sales ratio ("R&D-to-sales ratio") is used to calculate the Fund's overall R&D-to-sales ratio and maintain an overall weighted R&D-to-sales ratio that is at least two times greater than the Index.

Whilst the Index is used for R&D-to-sales ratio comparison, a reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the

Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	December 31, 2023
The relative ratio of the Fund's weighted average R&D-to-sales ratio and that of the Index.	60.77

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

… and compared to previous periods?

Sustainability Indicator	December 31, 2023	December 31, 2022
The relative ratio of the Fund's weighted average R&D-to-sales ratio and that of the Index.	60.77	86.69

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Source: MSCI and Wellington.

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:

1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.

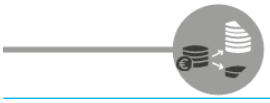
2. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	December 31, 2023
4. Exposure to companies active in the fossil fuel sector	0.00%
5. Share of non - renewable energy consumption and production	82.91%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI



What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-01-01/2023-12-31

Largest investments	Sector	% of net assets	Country
ELI LILLY + CO	Health care	7.43%	US
UNITEDHEALTH GROUP INC	Health care	6.57%	US
MERCK + CO. INC.	Health care	4.86%	US
ASTRAZENECA PLC	Health care	4.42%	GB
NOVARTIS AG REG	Health care	3.42%	CH
PFIZER INC	Health care	2.43%	US

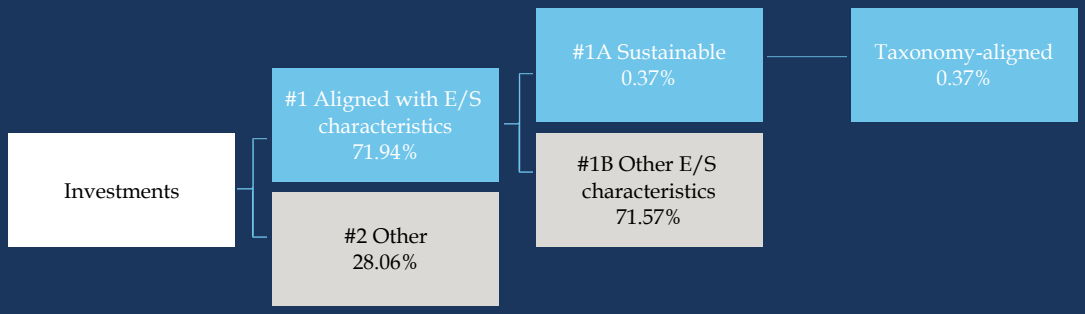
ABBOTT LABORATORIES	Health care	1.51%	US

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Pre-contractual disclosure commitment:

During normal market conditions, a minimum of 51% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

On occasion, due to possible settlement mismatch related to investor flows or market holidays during times when large subscriptions are received, the portion of the Fund which is not aligned with the environmental or social characteristic may affect the Fund's ability to meet the commitment as described above under normal market conditions. The Investment Manager does not consider these short-term fluctuations to materially impact the Fund's ability to attain its environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#1 Aligned with E/S characteristics	71.94%
#2 Other	28.06%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

In which economic sectors were the investments made?

Sector	Sub Sector	% of net assets
Health care	Pharmaceuticals	33.26%
	Biotechnology	28.63%
	Health care providers & services	19.02%
	Health care equipment & supplies	11.35%
	Life sciences tools & services	6.38%
	Health care technology	0.27%
Not classified	Not classified	0.90%
Sovereign	Sovereign	0.17%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS classification hierarchy. Source: MSCI

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of December 31, 2023:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

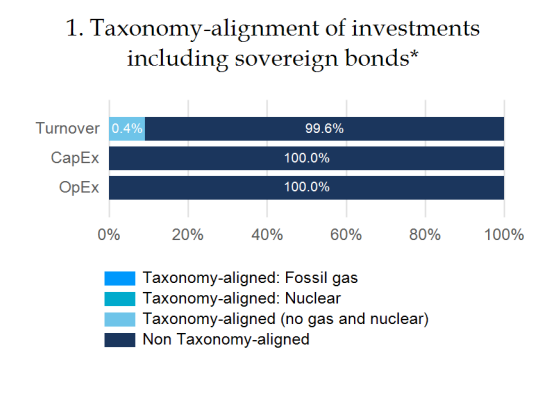
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

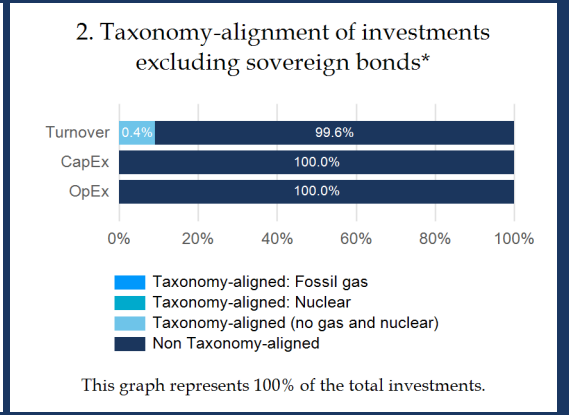
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable. This Fund does not commit to invest in sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards.

Asset allocation overview	% of net assets as at December 31, 2023
#2 Other	28.06%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.24% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending December 31, 2023:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet one or more of the following environmental or social characteristics.

1. Issuers with disclosed carbon data that enable the Fund to limit the overall impact of the portfolio on climate change relative to the investment universe by maintaining a lower weighted average carbon intensity ("WACI") than the ICE Bank of America Global High Yield Constrained Index (the "Index").

2. Issuers are screened to enable the Fund to exclude investment in any securities of any corporate issuer that generates more than 25% of their revenue from thermal coal energy generation (in addition to the criteria set out in the Exclusion Policy).

3. Issuers are screened to enable the Fund to exclude investment in corporate issuers that generates more than 5% of their revenue from adult entertainment.

Whilst the Index is used for WACI comparison purposes, a reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	December 31, 2023
The number of corporate issuers held that generate more than 25% of their revenue from thermal coal energy generation identified using a combination of third party and/or internal Wellington Management analysis.	0
The number of issuers held that generate more than 5% of their revenue from adult entertainment identified using a combination of third party and/or internal Wellington Management analysis.	0
The percentage difference of the Fund's WACI and that of the Index's.	-43.83%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:
1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.
2. The Fund will maintain a carbon footprint (weighted average carbon intensity) that is lower than the Index. PAIs: Carbon Footprint; GHG Emissions, GHG Intensity of Investee Companies.
3. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.
While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	December 31, 2023
1. GHG emissions	306534.16tCO2e
2. Carbon footprint	709.96tCO2e/ €M invested
3. GHG intensity of investee companies	1457.94tCO2e/ €M revenue
4. Exposure to companies active in the fossil fuel sector	9.56%
5. Share of non - renewable energy consumption and production	81.96%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-01-01/2023-12-31

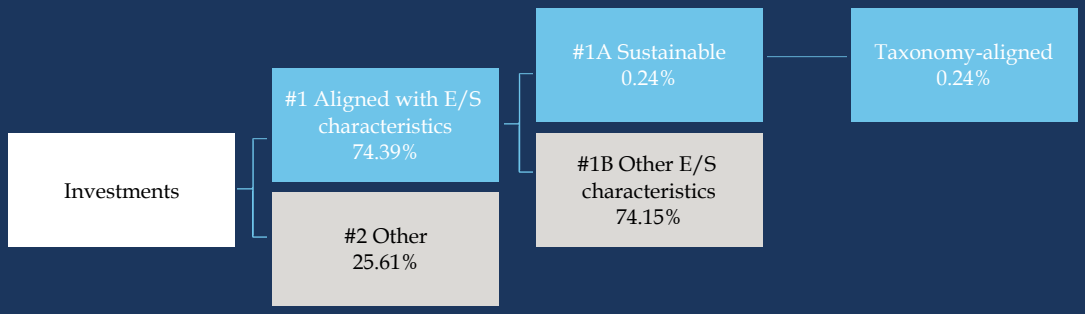
Largest investments	Sector	% of net assets	Country
Petroleos Mexicanos	Energy	1.73%	MX
CCO Holdings LLC/CCO Holdings Capital Corp.	Communication services	1.39%	US
McAfee Corp.	Information technology	1.26%	US
Buckeye Partners LP	Energy	1.07%	US
Uber Technologies, Inc.	Industrials	1.06%	US
CSC Holdings LLC	Communication services	1.05%	US
Teva Pharmaceutical Finance Netherlands II BV	Health care	1.02%	NL
OneMain Finance Corp.	Financials	1.01%	US
TransDigm, Inc.	Industrials	0.99%	US
Royal Caribbean Cruises Ltd.	Consumer discretionary	0.98%	US
Altice France SA	Communication services	0.95%	FR
Medline Borrower LP	Health care	0.91%	US
Loxam SAS	Industrials	0.90%	FR
Trivium Packaging Finance BV	Materials	0.88%	NL
Frontier Communications Holdings LLC	Communication services	0.83%	US

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Pre-contractual disclosure commitment:

During normal market conditions, a minimum of 60% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

On occasion, due to possible settlement mismatch related to investor flows or market holidays during times when large subscriptions are received, the portion of the Fund which is not aligned with the environmental or social characteristic may affect the Fund's ability to meet the commitment as described above under normal market conditions. The Investment Manager does not consider these short-term fluctuations to materially impact the Fund's ability to attain its environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#1 Aligned with E/S characteristics	74.39%
#2 Other	25.61%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of December 31, 2023:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

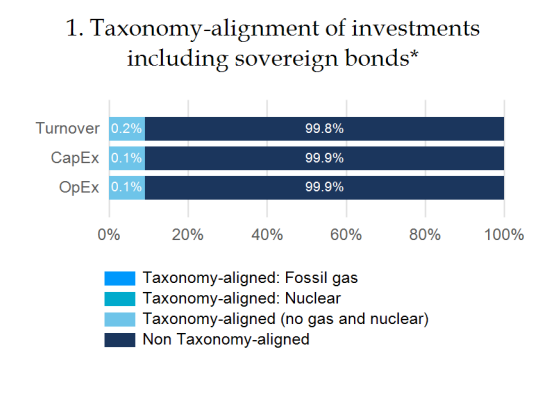
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

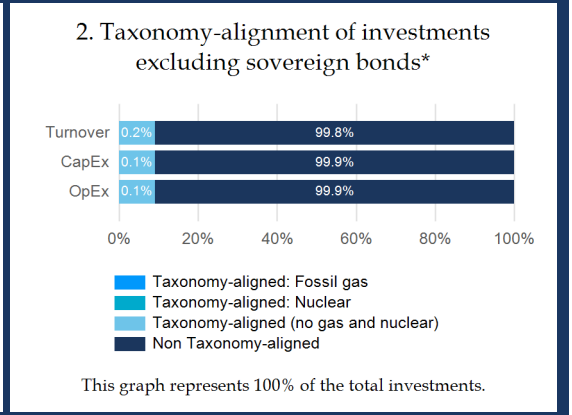
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: Clarity AI

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of investments in transitional and enabling activities is 0%.

Taxonomy aligned investments	% of market value as at December 31, 2023
Transitional Turnover	0.01%
Transitional Capex	0.00%
Transitional Opex	0.00%
Enabling Turnover	0.03%
Enabling Capex	0.02%
Enabling Opex	0.03%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable. This Fund does not commit to invest in sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for EPM, and/or hedging, and/or investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards. However, some minimum safeguards may still be considered to apply to the extent such holdings are aligned with one or more but not all of the Fund's environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#2 Other	25.61%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Wellington Global Impact Bond Fund

Legal entity identifier:

Sustainable investment objective

Does this financial product have a sustainable investment objective ?

☒ Yes	☐ No
☒ It made **sustainable investments with an environmental objective:** 41.5%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of__% of sustainable investments
☒ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☒ It made **sustainable investments with a social objective:** 52.27%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The following sustainable investment objectives were met by the Fund during the financial year ending December 31, 2023:

Pre-contractual disclosure commitment:

The Investment Manager will seek to invest in debt issued by companies and organizations that it believes address specific social and environmental challenges in a differentiated way through their core products and services. The Investment Manager will make investments in issuers and issuances that have the potential to improve access to, and quality of, basic life essentials, reduce inequality, and mitigate the effects of climate change.

Within these categories, the Fund will aim to diversify across impact themes including, but not limited to, the following:

- Life Essentials: addresses social objectives such as increasing access to affordable housing and

improving access and outcomes related to health. Life essentials also addresses social and environmental objectives through increasing access to clean water & sanitation and sustainable agriculture & nutrition.
• Human Empowerment: addresses social objectives such as bridging the digital divide, increasing access to education and job training, expanding financial inclusion, and increasing safety and security.
• Environment: addresses environmental objectives such as combatting climate change through the development and promotion of alternative energy and resource efficiency, while also considering resource stewardship.

The Investment Manager aims to select securities where fundamental analysis supports the approach's long-term return objective, and whose core products, services and/or projects align with any one or a combination of different Impact Themes in a way that is quantifiable. The Fund may have greater exposures to some Impact Themes than others. This is because there can be more impact investment opportunities within certain Impact Themes like affordable housing, health, and resource efficiency.

The Investment Manager relies on a bottom-up process for identifying and analyzing candidate issuers for investment. In defining the opportunity set, the Investment Manager takes into account both quantitative and qualitative considerations to fulfill each of the three impact criteria:

1. Materiality: Impact activity must be central to the issuer. In the case of use-of-proceeds bonds, proceeds must be used for an activity that the Investment Manager deems to be related to one of its Impact Themes.
2. Additionality: The Investment Manager evaluates each issuer's value proposition, the specific needs it addresses, competitor product and services, and the degree to which alternative solutions already exist.
3. Measurable key performance indicators (KPIs): The impact case must be quantifiable. The Investment Manager uses issuer reports and proprietary models to develop individualized KPIs to understand the nature of the impact generated by the issuer, its alignment with the Fund's Impact Themes, and progress over time.

The Fund typically expects to invest a minimum of 85% of its net assets in issuers which meet the above criteria and are assessed to be Sustainable Investments. Sustainable Investments may contribute to either environmental or social objectives. Although the proportion of Sustainable Investments with environmental or social objectives may vary over time, the Investment Manager will maintain at least 10% in Sustainable Investments with an environmental objective and at least 20% in Sustainable Investments with a social objective.

Although the Fund does not have a reduction in carbon emissions as its objective pursuant to Article 9(3) of SFDR, the Fund targets net zero emissions for its corporate holdings by 2050 in alignment with the Paris Agreement. The Investment Manager monitors the WACI of the Fund's corporate holdings compared to the 2019 WACI baseline of the Index and adjusts it over time in order to target net zero emissions by 2050, or sooner.

Whilst the Index is used for WACI comparison purposes, a reference benchmark has not been designated for the purpose of attaining the Sustainable Investment objective of the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

The Investment Manager invested across all of the impact themes mentioned above during the period. All themes are therefore considered contributors to the sustainable objective. Allocation to individual topics within the impact themes may fluctuate throughout the year.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	December 31, 2023
The percentage difference of the WACI of the Fund's corporate holdings and that of the Index's 2019 WACI baseline. Since the Fund maintains a WACI of its corporate holdings that is 30% below the Index's 2019 WACI baseline, with this percentage increasing to 50% by 2030, this percentage is expected to be at least 30% and to increase to at least 50% by 2030.	-81.57%
The percentage of the Fund's net assets in companies that are considered Sustainable Investments and contribute to the Funds impact categories of life essentials, human empowerment, and the environment. The Fund will invest at least 85% of net assets in issuers that meet these criteria.	93.77%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

… and compared to previous periods?

Sustainability Indicator	December 31, 2023	December 31, 2022
The percentage difference of the WACI of the Fund's corporate holdings and that of the Index's 2019 WACI baseline. Since the Fund maintains a WACI of its corporate holdings that is 30% below the Index's 2019 WACI baseline, with this percentage increasing to 50% by 2030, this percentage is expected to be at least 30% and to increase to at least 50% by 2030.	-81.57%	-77.86%
The percentage of the Fund's net assets in companies that are considered Sustainable Investments and contribute to the Funds impact categories of life essentials, human empowerment, and the environment. The Fund will invest at least 85% of net assets in issuers that meet these criteria.	93.77%	86.92%

Source: MSCI and Wellington.

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

Effective January 1, 2023, Sustainable Investments were assessed against each of the mandatory corporate and/or sovereign Principal Adverse Impacts, as appropriate for the asset type, and as listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs"). PAIs were assessed quantitatively and/or qualitatively according to third party data or by Wellington's research analysts and investment teams using company disclosures, internal research and analysis regarding issuer activities. Where PAI data was determined to be unreliable or unavailable, and as applicable to the asset type, the Investment Manager conducted further due diligence and assessed the issuer's activities, processes or policies related to climate, environmental, social and/or anti-bribery/anti-corruption matters to determine that the issuer was not doing significant harm. Instances of controversy or negative findings were evaluated against the issuer's response in alignment with the expectations set forth by the UN Guiding Principles on Business and Human Rights.

Please refer to the Fund's Pre-Contractual Disclosure, attached to the Fund's prospectus, for additional detail on this assessment.

How were the indicators for adverse impacts on sustainability factors taken into account?

Effective January 1, 2023, and pursuant to Level II of SFDR, adverse impact compliance screens were implemented to assess Do No Significant Harm (DNSH) for Sustainable Investments. Where the PAIs reflect a quantitative data point and such quantitative data is available, each Sustainable Investment is compared against quantitative thresholds set by the Investment Manager as applicable to the asset type. The thresholds may be determined by setting express conditions or fixed numerical thresholds for a given PAI. Certain PAIs are evaluated relative to industry peers and the worst companies in those industries will set the standard for determining significant harm. Where the Investment Manager has determined that industry differentiation is less meaningful, thresholds will be set in the context of all issuers. Where the Investment Manager has determined that differentiation is less meaningful or for PAIs which are more qualitative in nature (e.g., PAIs relating to the UNGC Principles and the OECD Guidelines for Multinational Enterprises) significant harm is assessed by evaluating, among others, companies' activities, management policies and practices, remediation activities or unresolved controversies using third party data.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was tested as part of the Investment Manager's process to identify Sustainable Investments. Assessment of management policies and practices is used to determine alignment. Misalignment with the OECD Guidelines for Multinational Enterprises or the UN Guiding Principles on Business and Human Rights may be determined where the Investment Manager identifies UN Global Compact non-compliance, inadequate policies and/or unresolved controversies.

Issuers assessed to be in breach of the OECD Guidelines for Multinational Enterprises or the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights are not eligible to be classified as Sustainable Investments. As of December 31, 2023, none of the Fund's Sustainable Investments were identified to have failed the test.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

The Fund's Sustainable Investments are assessed against each of the mandatory corporate and/or sovereign PAIs to determine that the Sustainable Investments do not cause significant harm to any environmental or social sustainable objective. In addition, by virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the PAIs into consideration either directly or indirectly on all or a portion of the Fund as follows:

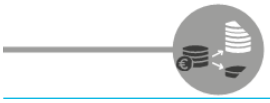
1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.
2. The Fund will maintain a carbon footprint (as measured by their total WACI) that is lower than the Index. The Fund will aim to reduce the (WACI) of its corporate holdings to net zero by 2050, or sooner, in accordance with the Paris Agreement - PAIs: Carbon Footprint; GHG Emissions, GHG Intensity of Investee Companies.
3. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy , and also includes oil - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	December 31, 2023
4. Exposure to companies active in the fossil fuel sector	0.39%
5. Share of non - renewable energy consumption and production	65.61%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.47%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI



What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-01-01/2023-12-31

Largest investments	Sector	% of net assets	Country
Federal National Mortgage Association	Financials	9.24%	US

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

Wellington Management Funds (Ireland) plc

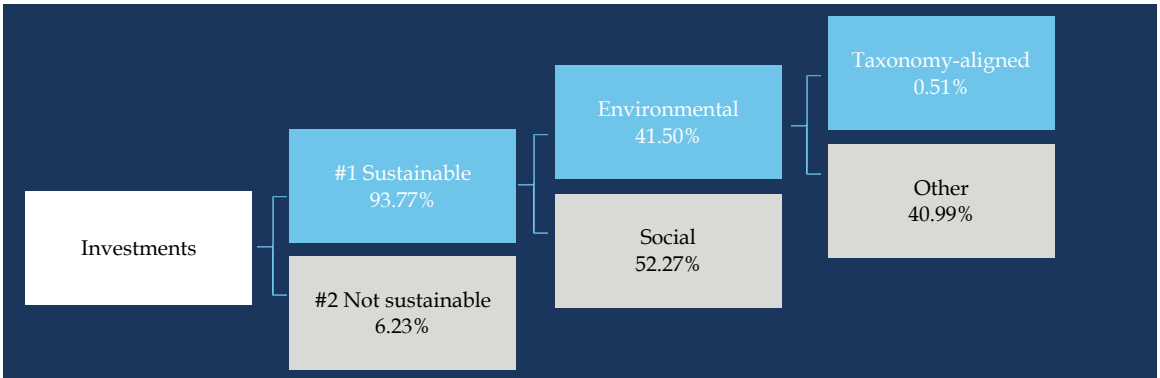
Appendix 5 Sustainable Finance Disclosure Regulation ("SFDR") (unaudited)

December 31, 2023

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments

Pre-contractual disclosure commitment:

During normal market conditions, the Fund will have a minimum of 85% of its net assets aligned with the #1 Sustainable category, as defined in the diagram below, with the proportion of Sustainable Investments with environmental versus social objectives varying based on the Fund's composition. Although the proportion of Sustainable Investments with environmental or social objectives may vary over time, the Investment Manager will maintain at least 10% in Sustainable Investments with an environmental objective and at least 20% in Sustainable Investments with a social objective.

On occasion, due to possible settlement mismatch related to investor flows or market holidays during times when large subscriptions are received, the portion of the Fund which is not aligned with the environmental or social objective may affect the Fund's ability to meet the commitment as described above under normal market conditions. The Investment Manager does not consider these short-term fluctuations to materially impact the Fund's ability to attain its environmental or social objective.

Asset allocation overview	% of net assets as at December 31, 2023
#1 Sustainable	93.77%
#2 Not sustainable	6.23%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

In which economic sectors were the investments made?

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

Although the Fund commits to invest in Sustainable Investments with an environmental objective within the meaning of the SFDR, the minimum share of EU Taxonomy-aligned investments is 0%.

However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of December 31, 2023:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

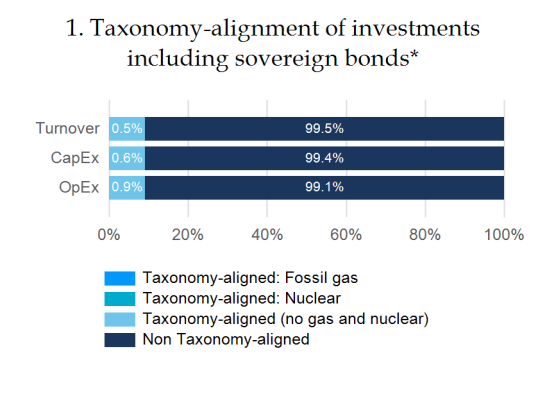
☐ Yes

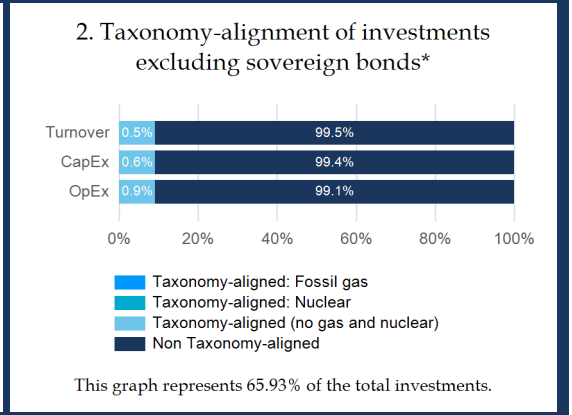
☐ In fossil gas ☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: Clarity AI

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Pre-contractual disclosure commitment:

Although the Fund commits to invest in Sustainable Investments within the meaning of the SFDR, the minimum share of investments in transitional and enabling activities is 0%.

Taxonomy aligned investments	% of market value as at December 31, 2023
Transitional Turnover	0.01%
Transitional Capex	0.03%
Transitional Opex	0.01%
Enabling Turnover	0.40%
Enabling Capex	0.25%
Enabling Opex	0.67%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

Although the Fund commits to make Sustainable Investments with an environmental objective within the meaning of the SFDR, the minimum share of such investments with an environmental objective not EU Taxonomy-aligned is 10%.
These investments could be aligned with the EU Taxonomy, but the Investment Manager is not currently in a position to specify the exact proportion of the Fund's underlying investments which take into account the EU criteria for environmentally sustainable economic activities. However, the position is kept under review as the underlying rules are finalized and the availability of reliable data increases over time.

Asset allocation overview	% of net assets as at December 31, 2023
#1 Sustainable Investments: Environmental	41.50%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What was the share of socially sustainable investments?

Pre-contractual disclosure commitment:

Minimum 20% of the Fund's net assets invested in socially sustainable investments.

Asset allocation overview	% of net assets as at December 31, 2023
#1 Sustainable Investments: Social	52.27%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Not sustainable' may include cash and cash equivalents for liquidity purposes, and derivatives for EPM and hedging purposes.

There are no minimum environmental or social safeguards applied to investments made under '#2 Not sustainable'.

Asset allocation overview	% of net assets as at December 31, 2023
#2 Not sustainable	6.23%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

Following completion of the annual review the Investment Manager concluded that all issuers met the relevant materiality thresholds. Therefore, there wasn't a need to directly engage with any issuers.

How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Not applicable.

How did the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Wellington Global Impact Fund

Legal entity identifier:

Sustainable investment objective

Does this financial product have a sustainable investment objective ?

☒ Yes	☐ No
☒ It made **sustainable investments with an environmental objective:** 29.39%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of__% of sustainable investments
☒ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☒ It made **sustainable investments with a social objective:** 66.29%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The following sustainable investment objectives were met by the Fund during the financial year ending December 31, 2023:

Pre-contractual disclosure commitment:

The Investment Manager will seek to understand some of the world's social and environmental challenges and to identify and invest in companies that it believes addresses these challenges in a differentiated way through their core products and services. Through the Fund's investments, the Investment Manager will make investment in companies that improve access to, and quality of, basic life essentials, reduce inequality, and mitigate the effects of climate change.

Within these categories, the Fund will aim to diversify across impact themes including, but not limited to, the following:

- Life Essentials addresses social objectives such as increasing access to affordable housing and

improving access and outcomes related to health. Life essentials also addresses social and environmental objectives through increasing access to clean water & sanitation and sustainable agriculture & nutrition.
• Human Empowerment addresses social objectives such as bridging the digital divide, increasing access to education and job training, expanding financial inclusion, and increasing safety and security.
• Environment addresses environmental objectives such as combatting climate change through the development and promotion of alternative energy and resource efficiency, while also considering resource stewardship.

The Investment Manager relies on a bottom-up process for identifying and analyzing potential companies for investment. This process, among other sources, relies on internal research, industry and thematic research, field research, industry and thematic conferences and discussions, news media, company meetings, filings, financials, sustainability reports and sell-side or other third-party subscription research. In defining the opportunity set, the Investment Manager takes into account both quantitative and qualitative considerations to fulfil each of the three impact criteria:

• Material: Impact activity must be central to the investee company. To determine this, the Investment Manager evaluates a company's business units, product lines and services. Primary considerations are (a) the importance of the social problem being addressed and the alignment with our impact themes and (b) the materiality of impact activities to a company's overall activity (which needs to account for 50% or more of revenues).
• Additionality: The Investment Manager evaluates each company's value proposition, the specific needs it addresses, competitor product and services, and the degree to which alternative solutions already exist.
• Measurable key performance indicators (KPIs): The impact case must be quantifiable. The Investment Manager uses company reports and proprietary models, to develop individualized KPIs to understand the nature of the impact generated by a portfolio company on an annual basis.

The Fund expects to maintain a minimum of 90% of its net assets in companies which meet the above criteria and which are assessed to be Sustainable Investments. Sustainable Investments may contribute to either environmental or social objectives. Although the proportion of Sustainable Investments with environmental or social objectives may vary over time, the Investment Manager will maintain at least 10% in Sustainable Investments with an environmental objective and at least 20% in Sustainable Investments with a social objective.

A reference benchmark has not been designated for the purpose of attaining the Sustainable Investment objective of the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

The Investment Manager invested across all of the impact categories and underlying impact themes mentioned above during the period. All impact themes are therefore considered contributors to the sustainable objective. Allocation to individual topics within the impact themes may fluctuate throughout the year.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	December 31, 2023
The percentage of the Fund's net assets in companies that are considered Sustainable Investments and contribute to the Funds impact categories of life essentials, human empowerment and the environment. The Fund will maintain at least 90% of its net assets in shares of companies that meet these criteria.	95.68%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

… and compared to previous periods?

Sustainability Indicator	December 31, 2023	December 31, 2022
The percentage of the Fund's net assets in companies that are considered Sustainable Investments and contribute to the Funds impact categories of life essentials, human empowerment and the environment. The Fund will maintain at least 90% of its net assets in shares of companies that meet these criteria.	95.68%	96.55%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

Effective January 1, 2023, Sustainable Investments were assessed against each of the mandatory corporate and/or sovereign Principal Adverse Impacts, as appropriate for the asset type, and as listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs"). PAIs were assessed quantitatively and/or qualitatively according to third party data or by Wellington's research analysts and investment teams using company disclosures, internal research and analysis regarding issuer activities. Where PAI data was determined to be unreliable or unavailable, and as applicable to the asset type, the Investment Manager conducted further due diligence and assessed the issuer's activities, processes or policies related to climate, environmental, social and/or anti-bribery/anti-corruption matters to determine that the issuer was not doing significant harm. Instances of controversy or negative findings were evaluated against the issuer's response in alignment with the expectations set forth by the UN Guiding Principles on Business and Human Rights.

Please refer to the Fund's Pre-Contractual Disclosure, attached to the Fund's prospectus, for additional detail on this assessment.

How were the indicators for adverse impacts on sustainability factors taken into account?

Effective January 1, 2023, and pursuant to Level II of SFDR, adverse impact compliance screens were implemented to assess Do No Significant Harm (DNSH) for Sustainable Investments. Where the PAIs reflect a quantitative data point and such quantitative data is available, each Sustainable Investment is compared against quantitative thresholds set by the Investment Manager as applicable to the asset type. The thresholds may be determined by setting express conditions or fixed numerical thresholds for a given PAI. Certain PAIs are evaluated relative to industry peers and the worst companies in those industries will set the standard for determining significant harm. Where the Investment Manager has determined that industry differentiation is less meaningful, thresholds will be set in the context of all issuers. Where the Investment Manager has determined that differentiation is less meaningful or for PAIs which are more qualitative in nature (e.g., PAIs relating to the UNGC Principles and the OECD Guidelines for Multinational Enterprises) significant harm is assessed by evaluating, among others, companies' activities, management policies and practices, remediation activities or unresolved controversies using third party data.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was tested as part of the Investment Manager's process to identify Sustainable Investments. Assessment of management policies and practices is used to determine alignment. Misalignment with the OECD Guidelines for Multinational Enterprises or the UN Guiding Principles on Business and Human Rights may be determined where the Investment Manager identifies UN Global Compact non-compliance, inadequate policies and/or unresolved controversies. Issuers assessed to be in breach of the OECD Guidelines for Multinational Enterprises or the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights are not eligible to be classified as Sustainable Investments. As of December 31, 2023, none of the Fund's Sustainable Investments were identified to have failed the test.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

The Fund's Sustainable Investments are assessed against each of the mandatory corporate and/or sovereign PAIs to determine that the Sustainable Investments do not cause significant harm to any environmental or social sustainable objective. In addition, by virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the PAIs into consideration either directly or indirectly on all or a portion of the Fund as follows:

1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.
2. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy, and also includes petroleum - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	December 31, 2023
4. Exposure to companies active in the fossil fuel sector	0.00%
5. Share of non - renewable energy consumption and production	76.52%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-01-01/2023-12-31

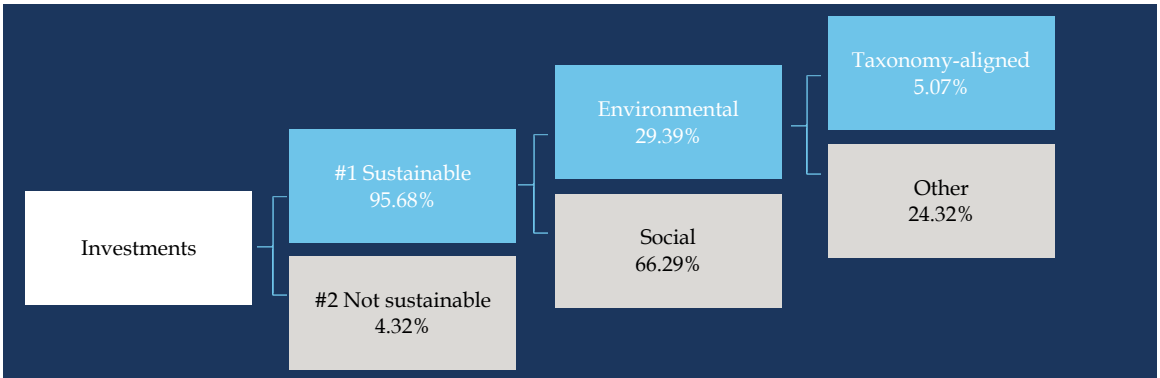
Largest investments	Sector	% of net assets	Country
XYLEM INC	Industrials	3.23%	US
BOSTON SCIENTIFIC CORP	Health care	3.03%	US
ABBOTT LABORATORIES	Health care	2.89%	US
WABTEC CORP	Industrials	2.79%	US
TRANE TECHNOLOGIES PLC	Industrials	2.73%	IE
GLOBE LIFE INC	Financials	2.54%	US
HUBBELL INC	Industrials	2.48%	US
GODADDY INC CLASS A	Information technology	2.44%	US
CYBERARK SOFTWARE LTD/ISRAEL	Information technology	2.09%	IL
F5 INC	Information technology	2.05%	US
TELEFONICA BRASIL S.A.	Communication services	2.03%	BR
DANAHER CORP	Health care	2.01%	US
SCHNEIDER ELECTRIC SE	Industrials	1.95%	FR
BANK RAKYAT INDONESIA PERSER	Financials	1.93%	ID
AGILENT TECHNOLOGIES INC	Health care	1.91%	US

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments

Pre-contractual disclosure commitment:

During normal market conditions, the Fund will have a minimum of 90% of its net assets aligned with the #1 Sustainable category, as defined in the diagram below, with the proportion of Sustainable Investments with environmental versus social objectives varying based on the Fund's composition. Although the proportion of Sustainable Investments with environmental or social objectives may vary over time, the Investment Manager will maintain at least 10% in Sustainable Investments with an environmental objective and at least 20% in Sustainable Investments with a social objective.

On occasion, due to possible settlement mismatch related to investor flows or market holidays during times when large subscriptions are received, the portion of the Fund which is not aligned with the environmental or social objective may affect the Fund's ability to meet the commitment as described above under normal market conditions. The Investment Manager does not consider these short-term fluctuations to materially impact the Fund's ability to attain its environmental or social objective.

Asset allocation overview	% of net assets as at December 31, 2023
#1 Sustainable	95.68%
#2 Not sustainable	4.32%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What was the share of socially sustainable investments?

Pre-contractual disclosure commitment:

Minimum 20% of the Fund's net assets invested in socially sustainable investments.

Asset allocation overview	% of net assets as at December 31, 2023
#1 Sustainable Investments: Social	66.29%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Not sustainable' may include cash and cash equivalents for liquidity purposes, and derivatives for EPM and hedging purposes.

There are no minimum environmental or social safeguards applied to investments made under '#2 Not sustainable'.

Asset allocation overview	% of net assets as at December 31, 2023
#2 Not sustainable	4.32%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

Following completion of the annual review the Investment Manager concluded that all issuers met the relevant materiality thresholds. Therefore, there wasn't a need to directly engage with any issuers.

How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Not applicable.

How did the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Wellington Global Perspectives Fund

Legal entity identifier:
549300SQDCZ1HDC9H010

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 2.59% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending December 31, 2023:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet the following environmental or social characteristics.

The Fund will invest in companies and REITs with average or above-average ESG Rating relative to their peer universe, using a rating scale of 1-5, where 1 is the highest rating.

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	December 31, 2023
The percentage of the Fund's net assets invested in companies with an ESG Rating of 1-3.	90.44%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

… and compared to previous periods?

Sustainability Indicator	December 31, 2023	December 31, 2022
The percentage of the Fund's net assets invested in companies with an ESG Rating of 1-3.	90.44%	95.34%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:

1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.

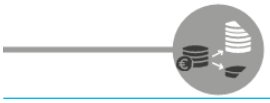
2. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	December 31, 2023
4. Exposure to companies active in the fossil fuel sector	3.90%
5. Share of non - renewable energy consumption and production	80.49%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI



What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-01-01/2023-12-31

Largest investments	Sector	% of net assets	Country
ISHARES MSCI WORLD UCITS ETF	Pooled vehicle	1.74%	IE
RUSH ENTERPRISES INC CL A	Industrials	1.54%	US

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

Wellington Management Funds (Ireland) plc

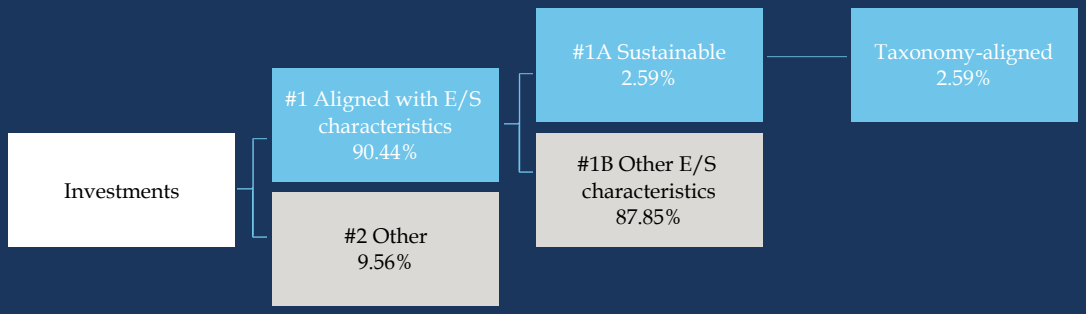
Appendix 5 Sustainable Finance Disclosure Regulation ("SFDR") (unaudited)

December 31, 2023

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Pre-contractual disclosure commitment:

During normal market conditions, a minimum of 70% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

On occasion, due to possible settlement mismatch related to investor flows or market holidays during times when large subscriptions are received, the portion of the Fund which is not aligned with the environmental or social characteristic may affect the Fund's ability to meet the commitment as described above under normal market conditions. The Investment Manager does not consider these short-term fluctuations to materially impact the Fund's ability to attain its environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#1 Aligned with E/S characteristics	90.44%
#2 Other	9.56%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

Source: MSCI

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of December 31, 2023:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

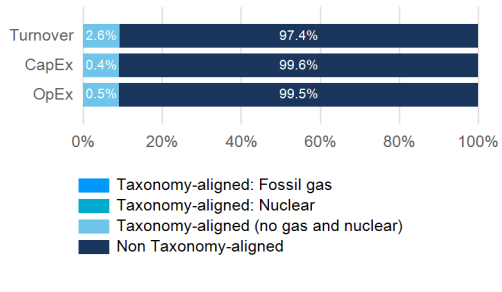
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

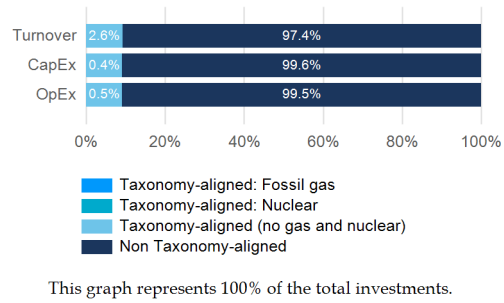
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*



2. Taxonomy-alignment of investments excluding sovereign bonds*



This graph represents 100% of the total investments.

**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: Clarity AI

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of investments in transitional and enabling activities is 0%.

Taxonomy aligned investments	% of market value as at December 31, 2023
Transitional Turnover	0.10%
Transitional Capex	0.22%
Transitional Opex	0.01%
Enabling Turnover	0.59%
Enabling Capex	0.20%
Enabling Opex	0.48%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable. This Fund does not commit to invest in sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards.

Asset allocation overview	% of net assets as at December 31, 2023
#2 Other	9.56%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 1.99% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending December 31, 2023:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet the following environmental characteristics.

The Fund will invest in companies and REITs with average or above-average E Rating relative to their peer universe, using a rating scale of 1-5, where 1 is the highest rating.

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	December 31, 2023
The percentage of the Fund's net assets invested in companies and REITs with an E Rating of 1-3.	93.43%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

… and compared to previous periods?

Sustainability Indicator	December 31, 2023	December 31, 2022
The percentage of the Fund's net assets invested in companies and REITs with an E Rating of 1-3.	93.43%	76.30%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:

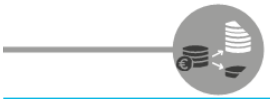
1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.
2. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	December 31, 2023
4. Exposure to companies active in the fossil fuel sector	1.49%
5. Share of non - renewable energy consumption and production	79.91%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI



What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-01-01/2023-12-31

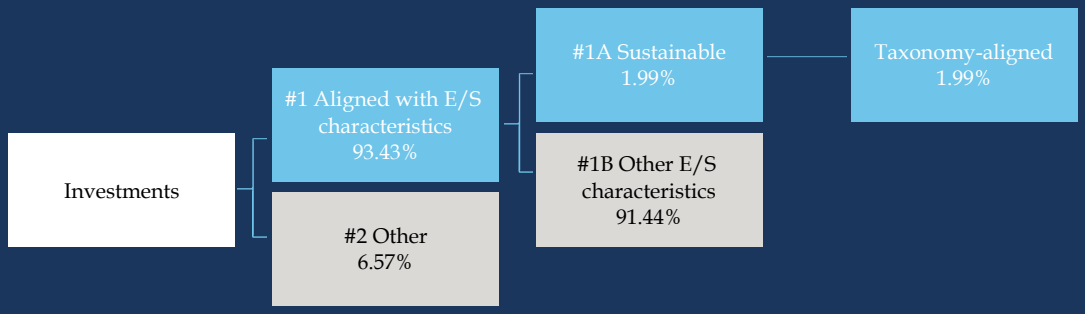
The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Pre-contractual disclosure commitment:

During normal market conditions, a minimum of 75% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

On occasion, due to possible settlement mismatch related to investor flows or market holidays during times when large subscriptions are received, the portion of the Fund which is not aligned with the environmental or social characteristic may affect the Fund's ability to meet the commitment as described above under normal market conditions. The Investment Manager does not consider these short-term fluctuations to materially impact the Fund's ability to attain its environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#1 Aligned with E/S characteristics	93.43%
#2 Other	6.57%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

In which economic sectors were the investments made?

Sector	Sub Sector	% of net assets
Consumer discretionary	Hotels, restaurants & leisure	3.35%
	Household durables	2.98%
Industrials	Industrial conglomerates	1.49%
	Construction & engineering	0.11%
Not classified	Not classified	1.09%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of December 31, 2023:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

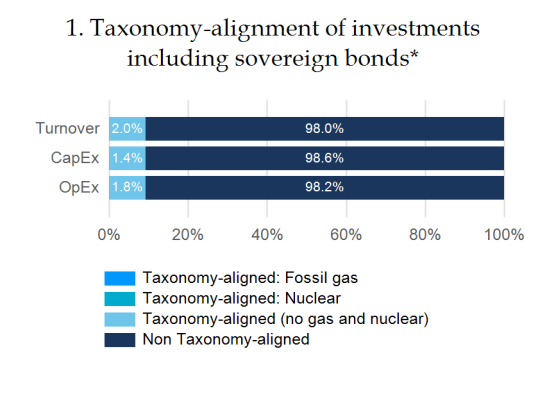
[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

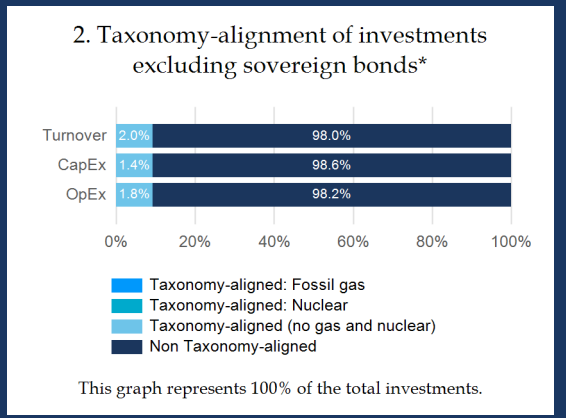
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of investments in transitional and enabling activities is 0%.

Taxonomy aligned investments	% of market value as at December 31, 2023
Transitional Turnover	0.00%
Transitional Capex	0.00%
Transitional Opex	0.00%
Enabling Turnover	0.00%
Enabling Capex	0.01%
Enabling Opex	0.00%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable. This Fund does not commit to invest in sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for hedging and investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards.

Asset allocation overview	% of net assets as at December 31, 2023
#2 Other	6.57%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Wellington Global Stewards Fund

Legal entity identifier:

Sustainable investment objective

Does this financial product have a sustainable investment objective ?

☒ Yes	☐ No
☒ It made **sustainable investments with an environmental objective:** 62.17%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of__% of sustainable investments
☒ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☒ It made **sustainable investments with a social objective:** 35.20%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The following sustainable investment objectives were met by the Fund during the financial year ending December 31, 2023:

Pre-contractual disclosure commitment:

The Investment Manager will seek to invest in companies whose management teams and boards display exemplary "stewardship". The Investment Manager defines stewardship as how companies balance the interests of all stakeholders (e.g. customers, employees, communities and the supply chain) in the pursuit of profits and how they incorporate material environmental, social and governance ("ESG") risks and opportunities in their corporate strategy.

The Investment Manager will invest in companies that are assessed to contribute to one or more of the following environmental and social stewardship criteria which are aligned with the sustainable objective of the Fund.

Social criteria such as:

- responsible sourcing and production practices;
- consumer privacy and cybersecurity;
- sustainable investment in technology, innovation, and human capital.

Environmental criteria such as:

- sustainable product design and resilient infrastructure;
- responsible waste / end of product life cycle;
- supply chain engagement.

As described in the paragraph above, each of the themes includes either predominantly environmental or predominantly social stewardship criteria. However, each environmental and social stewardship criteria may have both environmental and social benefits.

The Investment Manager uses its proprietary scorecard to evaluate both the return and stewardship pillars of the investment approach. The scorecard will quantify otherwise qualitative critical stewardship attributes such as executive skill and alignment and the effectiveness of the board. The Investment Manager anticipate the scorecard framework to evolve over time given ESG/stewardship issues are not static. The Investment Manager believes that if a company prioritizes stewardship in running its business, it will increase the ability of the company to sustain high returns over the long term. Further, every investment candidate for the Fund must exhibit an explicit focus on all stakeholders by evidencing factors such as their accountability of supply chain, focus on water usage intensity or running the business with a long term orientation.

The Fund expects to maintain a minimum of 90% of its net assets in companies which meet the above criteria and which are assessed to be Sustainable Investments. Sustainable Investments may contribute to either environmental or social objectives. Although the proportion of Sustainable Investments with environmental or social objectives may vary over time, the Investment Manager will maintain at least 20% in Sustainable Investments with an environmental objective and at least 10% in Sustainable Investments with a social objective.

Although the Fund does not have a reduction in carbon emissions as its objective pursuant to Article 9(3) of SFDR, the Fund targets net zero emissions by 2050 in alignment with the Paris Agreement by investing in companies that have set carbon emission reduction targets or maintain lower carbon emissions relative to their industry average.

In relation to the net zero commitment, the science-based targets initiative ("SBTi") provides a clearly defined pathway for companies to reduce greenhouse gas emissions. Targets are considered 'science-based' if they are in line with what the latest climate science deems necessary to meet the goals of the Paris Agreement –limiting global warming to well-below 2°C above pre-industrial levels and pursuing efforts to limit warming to 1.5°C.

A reference benchmark has not been designated for the purpose of attaining the Sustainable Investment objective of the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

The Investment Manager invested across the environmental and social stewardship criteria mentioned above or equivalent environmental and social stewardship criteria during the period and are therefore contributors to the sustainable objective. Allocations across the environmental or social stewardship criteria may fluctuate throughout the year.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	December 31, 2023
The percentage of the Fund's NAV invested in companies with combined scope 1 and 2 carbon intensity (tons CO2/$M revenue) that is at least 25% below their industry average based on publicly disclosed emissions.	77.10%
The percentage of the Fund's net assets in companies that are considered Sustainable Investments and contribute to one or more of the Funds stewardship criteria.	97.37%
The percentage of the Fund's net assets invested in companies with an alternative public active emissions reduction target.	97.37%
The percentage of the Fund's net assets invested in companies with established or which have committed to establish a science-based target.	67.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

Source: MSCI and Wellington.

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

Effective January 1, 2023, Sustainable Investments were assessed against each of the mandatory corporate and/or sovereign Principal Adverse Impacts, as appropriate for the asset type, and as listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs"). PAIs were assessed quantitatively and/or qualitatively according to third party data or by Wellington's research analysts and investment teams using company disclosures, internal research and analysis regarding issuer activities. Where PAI data was determined to be unreliable or unavailable, and as applicable to the asset type, the Investment Manager conducted further due diligence and assessed the issuer's activities, processes or policies related to climate, environmental, social and/or anti-bribery/anti-corruption matters to determine that the issuer was not doing significant harm. Instances of controversy or negative findings were evaluated against the issuer's response in alignment with the expectations set forth by the UN Guiding Principles on Business and Human Rights.

Please refer to the Fund's Pre-Contractual Disclosure, attached to the Fund's prospectus, for additional detail on this assessment.

How were the indicators for adverse impacts on sustainability factors taken into account?

Effective January 1, 2023, and pursuant to Level II of SFDR, adverse impact compliance screens were implemented to assess Do No Significant Harm (DNSH) for Sustainable Investments. Where the PAIs reflect a quantitative data point and such quantitative data is available, each Sustainable Investment is compared against quantitative thresholds set by the Investment Manager as applicable to the asset type. The thresholds may be determined by setting express conditions or fixed numerical thresholds for a given PAI. Certain PAIs are evaluated relative to industry peers and the worst companies in those industries will set the standard for determining significant harm. Where the Investment Manager has determined that industry differentiation is less meaningful, thresholds will be set in the context of all issuers. Where the Investment Manager has determined that differentiation is less meaningful or for PAIs which are more qualitative in nature (e.g., PAIs relating to the UNGC Principles and the OECD Guidelines for Multinational Enterprises) significant harm is assessed by evaluating, among others, companies' activities, management policies and practices, remediation activities or unresolved controversies using third party data.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was tested as part of the Investment Manager's process to identify Sustainable Investments. Assessment of management policies and practices is used to determine alignment. Misalignment with the OECD Guidelines for Multinational Enterprises or the UN Guiding Principles on Business and Human Rights may be determined where the Investment Manager identifies UN Global Compact non-compliance, inadequate policies and/or unresolved controversies.

Issuers assessed to be in breach of the OECD Guidelines for Multinational Enterprises or the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights are not eligible to be classified as Sustainable Investments. As of December 31, 2023, none of the Fund's Sustainable Investments were identified to have failed the test.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

The Fund's Sustainable Investments are assessed against each of the mandatory corporate and/or sovereign PAIs to determine that the Sustainable Investments do not cause significant harm to any environmental or social sustainable objective. In addition, by virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the PAIs into consideration either directly or indirectly on all or a portion of the Fund as follows:

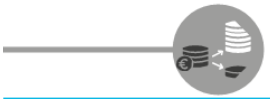
1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.
2. The Fund will invest in companies that have a target validated by SBTi, an alternative public active emissions reduction target or a combined Scope 1+2 carbon intensity (tons CO2/$M revenue) that is at least 25% below their industry average based on publicly disclosed emissions - PAIs: Carbon Footprint; GHG Emissions, GHG Intensity of Investee Companies.
3. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	December 31, 2023
1. GHG emissions	243867.26tCO2e
2. Carbon footprint	148.87tCO2e/ €M invested
3. GHG intensity of investee companies	541.68tCO2e/ €M revenue
4. Exposure to companies active in the fossil fuel sector	7.29%
5. Share of non - renewable energy consumption and production	59.68%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI



What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-01-01/2023-12-31

Largest investments	Sector	% of net assets	Country
MICROSOFT CORP	Information technology	5.67%	US
DEERE + CO	Industrials	3.95%	US
TAIWAN SEMICONDUCTOR MANUFAC	Information technology	3.85%	TW
TEXAS INSTRUMENTS INC	Information technology	3.60%	US
RECRUIT HOLDINGS CO LTD	Industrials	3.59%	JP
DBS GROUP HOLDINGS LTD	Financials	3.50%	SG

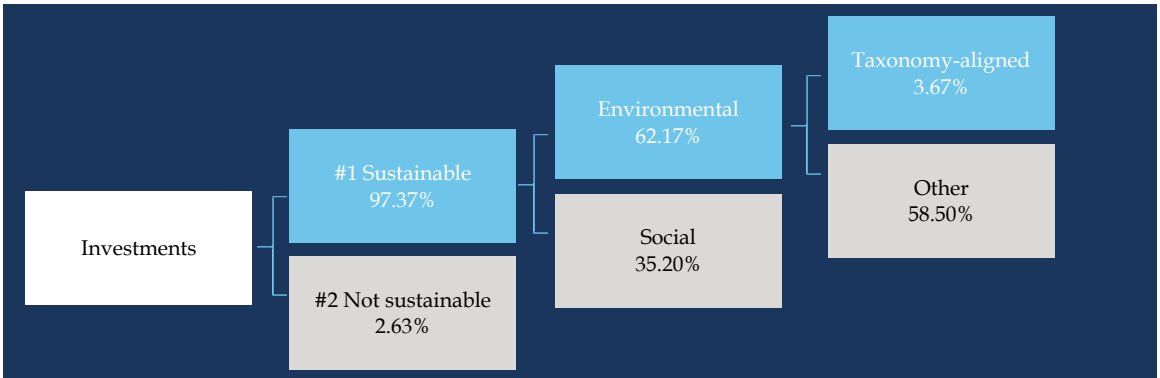
DSM FIRMENICH AG	Materials	3.37%	CH
VISA INC CLASS A SHARES	Financials	3.36%	US
CISCO SYSTEMS INC	Information technology	3.29%	US
MICHELIN (CGDE)	Consumer discretionary	3.25%	FR
EDWARDS LIFESCIENCES CORP	Health care	3.11%	US
INDUSTRIA DE DISENO TEXTIL	Consumer discretionary	3.00%	ES
HOME DEPOT INC	Consumer discretionary	2.79%	US
NATIONAL GRID PLC	Utilities	2.59%	GB

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments

Pre-contractual disclosure commitment:

During normal market conditions, the Fund will have a minimum of 90% of its net assets aligned with the #1 Sustainable category, as defined in the diagram below, with the proportion of Sustainable Investments with environmental versus social objectives varying based on the Fund's composition. Although the proportion of Sustainable Investments with environmental or social objectives may vary over time, the Investment Manager will maintain at least 20% in Sustainable Investments with an environmental objective and at least 10% in Sustainable Investments with a social objective.

On occasion, due to possible settlement mismatch related to investor flows or market holidays during times when large subscriptions are received, the portion of the Fund which is not aligned with the environmental or social objective may affect the Fund's ability to meet the commitment as described above under normal market conditions. The Investment Manager does not consider these short-term fluctuations to materially impact the Fund's ability to attain its environmental or social objective.

Asset allocation overview	% of net assets as at December 31, 2023
#1 Sustainable	97.37%
#2 Not sustainable	2.63%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

Source: MSCI

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

Although the Fund commits to invest in Sustainable Investments with an environmental objective within the meaning of the SFDR, the minimum share of EU Taxonomy-aligned investments is 0%.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of December 31, 2023:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

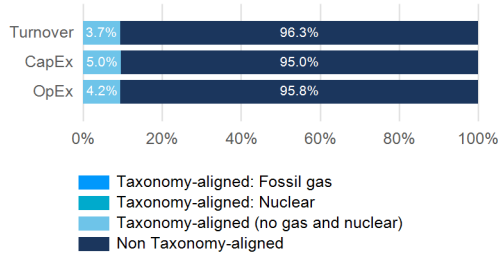
☐ Yes

☐ In fossil gas ☐ In nuclear energy

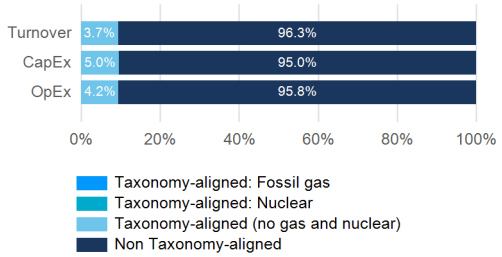
☒ No

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*



2. Taxonomy-alignment of investments excluding sovereign bonds*



This graph represents 100% of the total investments.

**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

Although the Fund commits to make Sustainable Investments with an environmental objective within the meaning of the SFDR, the minimum share of such investments with an environmental objective not EU Taxonomy-aligned is 20%.
These investments could be aligned with the EU Taxonomy but the Investment Manager is not currently in a position to specify the exact proportion of the Fund's underlying investments which take into account the EU criteria for environmentally sustainable economic activities. However, the position is kept under review as the underlying rules are finalized and the availability of reliable data increases over time.

Asset allocation overview	% of net assets as at December 31, 2023
#1 Sustainable Investments: Environmental	62.17%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What was the share of socially sustainable investments?

Pre-contractual disclosure commitment:

Minimum 10% of the Fund's net assets invested in socially sustainable investments.

Asset allocation overview	% of net assets as at December 31, 2023
#1 Sustainable Investments: Social	35.20%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Not sustainable' may include cash and cash equivalents for liquidity purposes, and derivatives for EPM and hedging purposes.

There are no minimum environmental or social safeguards applied to investments made under '#2 Not sustainable'.

Asset allocation overview	% of net assets as at December 31, 2023
#2 Not sustainable	2.63%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

The Fund engaged with companies held in the portfolio to establish or to commit to net zero science-based targets. During the reference period the Fund engaged with 31 companies.

How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Not applicable.

How did the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Wellington Higher Quality Global High Yield Bond Fund

Legal entity identifier:
5493008P462PNCNR5B36

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.23% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending December 31, 2023:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet one or more of the following environmental or social characteristics.

1. Issuers with disclosed carbon data that enable the Fund to limit the overall impact of the portfolio on climate change relative to the investment universe by maintaining a lower weighted average carbon intensity - "WACI") than the ICE Bank of America Global High Yield Constrained BB-B Index (the "Index").

2. Issuers are screened to enable the Fund to exclude investment in securities of any corporate issuer that generate more than 25% of their revenue from thermal coal energy generation (in addition to the criteria set out in the Exclusion Policy).

3. Issuers are screened to enable the Fund to exclude investment in corporate issuers that generate more than 5% of their revenue from adult entertainment.

Whilst the Index is used for WACI comparison purposes, a reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	December 31, 2023
The number of corporate issuers held that generate more than 25% of their revenue from thermal coal energy generation identified using a combination of third party and/or internal Wellington Management analysis.	0
The number of issuers held that generate more than 5% of their revenue from adult entertainment identified using a combination of third party and/or internal Wellington Management analysis.	0
The percentage difference of the Fund's WACI and that of the Index's.	-43.85%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

… and compared to previous periods?

Sustainability Indicator	December 31, 2023	December 31, 2022

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:
1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.
2. The Fund will maintain a carbon footprint (weighted average carbon intensity) that is lower than the Index. PAIs: Carbon Footprint; GHG Emissions, GHG Intensity of Investee Companies.
3. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.
While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	December 31, 2023
1. GHG emissions	49867.89tCO2e
2. Carbon footprint	686.59tCO2e/ €M invested
3. GHG intensity of investee companies	1375.68tCO2e/ €M revenue
4. Exposure to companies active in the fossil fuel sector	9.74%
5. Share of non - renewable energy consumption and production	83.30%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-01-01/2023-12-31

Largest investments	Sector	% of net assets	Country
Petroleos Mexicanos	Energy	1.76%	MX
Teva Pharmaceutical Finance Netherlands II BV	Health care	1.61%	NL
CCO Holdings LLC/CCO Holdings Capital Corp.	Communication services	1.61%	US
Medline Borrower LP	Health care	1.28%	US
Frontier Communications Holdings LLC	Communication services	1.28%	US
Uber Technologies, Inc.	Industrials	1.12%	US
Altice France SA	Communication services	1.11%	FR

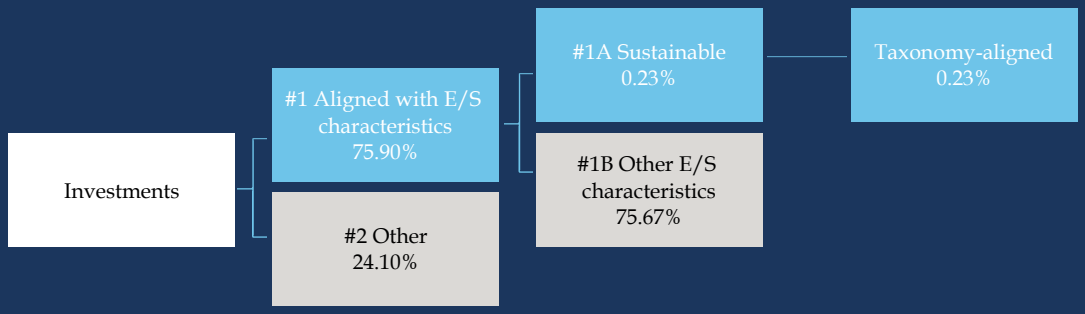
Gen Digital, Inc.	Information technology	1.04%	US
Royal Caribbean Cruises Ltd.	Consumer discretionary	1.03%	US
TransDigm, Inc.	Industrials	1.02%	US
Trivium Packaging Finance BV	Materials	1.00%	NL
IQVIA, Inc.	Health care	0.98%	US
Buckeye Partners LP	Energy	0.94%	US
Owens & Minor, Inc.	Health care	0.93%	US

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Pre-contractual disclosure commitment:

During normal market conditions, a minimum of 60% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

On occasion, due to possible settlement mismatch related to investor flows or market holidays during times when large subscriptions are received, the portion of the Fund which is not aligned with the environmental or social characteristic may affect the Fund's ability to meet the commitment as described above under normal market conditions. The Investment Manager does not consider these short-term fluctuations to materially impact the Fund's ability to attain its environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#1 Aligned with E/S characteristics	75.90%
#2 Other	24.10%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

Source: MSCI

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of December 31, 2023:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

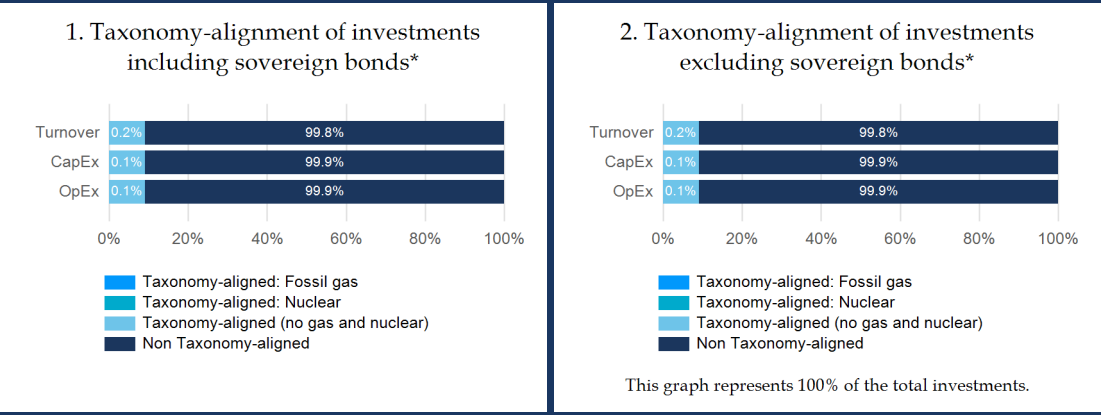
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.



**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: Clarity AI

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of investments in transitional and enabling activities is 0%.

Taxonomy aligned investments	% of market value as at December 31, 2023
Transitional Turnover	0.00%
Transitional Capex	0.00%
Transitional Opex	0.00%
Enabling Turnover	0.03%
Enabling Capex	0.02%
Enabling Opex	0.02%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable. This Fund does not commit to invest in sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for EPM, and/or hedging, and/or investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards. However, some minimum safeguards may still be considered to apply to the extent such holdings are aligned with one or more but not all of the Fund's environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#2 Other	24.10%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Wellington India Focus Equity Fund

Legal entity identifier:
5493001UKPK6ZGV48G80

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of__% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending December 31, 2023:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet one or more of the following social characteristics.

1. Issuers who receive a survey to enable the Fund to promote the adoption of appropriate policies and practices among certain investee companies with regard to modern slavery risk management, forced labour, child labour and debt bondage ("Modern Slavery"). In order to do this, the Investment Manager applies Wellington Management Group's Emerging Markets Modern Slavery Policy (the "EM Modern Slavery Policy"). Under the EM Modern Slavery Policy investee companies are evaluated by the Investment Manager on the basis of proprietary research and third-party research for inclusion to the Watch List (as defined below) and various levels of engagement are undertaken over a period of time

until adequate remediation measures are adopted.

The EM Modern Slavery Policy does not aim to eliminate Modern Slavery risk exposure in all investee companies and the Fund may from time to time invest in companies which have exposure to such risk and which are not subject to enhanced engagement. Further details about the EM Modern Slavery Policy and Watch List may be found in the section below "What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?".

2. Issuers that are screened for United Nations Global Compact Principles to enable the Fund to further promote appropriate policies and practices with regard to child labour and forced labour by excluding investment in companies that are assessed for and known to be involved in controversies regarding child labour or forced labour. In order to do this, the Fund excludes investments in companies which are assessed to have failed United Nations Global Compact Principles 4 (businesses should uphold the elimination of all forms of forced and compulsory labour) and 5 (businesses should uphold the effective abolition of child labour).

A reference benchmark has not been designated for the purpose of attaining the social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	December 31, 2023
The number of companies held which have been assessed to be in violation of United Nations Global Compact principles 4 (businesses should uphold the elimination of all forms of forced and compulsory labour) or 5 (businesses should uphold the effective abolition of child labour). Since the Fund excludes investments in companies which are assessed to have failed United Nations Global Compact Principles 4 and 5, this number is expected to be 0.	0
The percentage of companies deemed as having a higher risk of Modern Slavery exposure that are placed on the Watch List and are subject to enhanced engagement. Since this percentage will depend on 1) the time of the investments and 2) the result of the survey, this percentage cannot be disclosed in the Fund's pre-contractual template but will be disclosed in the Fund's periodic reporting.	21.40%
The percentage of companies held for over a year that have responded to an engagement survey regarding their modern slavery risk management policies and procedures. Since this percentage will depend on 1) the time of the investments and 2) the response to the engagement of the survey, this percentage cannot be disclosed in the Fund's pre-contractual template but will be disclosed in the Fund's periodic reporting.	20.00%
The percentage of companies where remediation measures have been adopted such that they are no longer assessed as having a higher risk of Modern Slavery exposure and may be removed from the internal Watch List. Since this percentage will depend on 1) the time of the investments and 2) the result of the remediation measures adopted following the survey, this percentage cannot be disclosed in the Fund's pre-contractual template but will be disclosed in the Fund's periodic reporting.	14.30%
The percentage of the Fund's equity issuers who received a survey and have been formally evaluated for inclusion to the Watch List regarding Modern Slavery risk management. Since at least 70% of the Fund's equity issuers are generally expected to receive a survey and be formally evaluated for inclusion to the Watch List regarding Modern Slavery risk management, this percentage is expected to be at least 70%.	96.40%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

**Companies that were held in the portfolio as of calendar year-end but that were no longer on the active or inactive watch list in part due to the fund's remediation measures, including but not limited to additional information gained from company outreach efforts and/or companies' actions towards mitigating controversies.*

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment Guideline, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:
1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.
2. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.
While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	December 31, 2023
4. Exposure to companies active in the fossil fuel sector	8.62%
5. Share of non - renewable energy consumption and production	94.98%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	7.99%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-01-01/2023-12-31

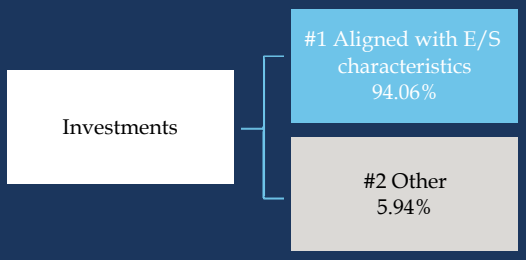
Largest investments	Sector	% of net assets	Country
ICICI BANK LTD	Financials	8.65%	IN
RELIANCE INDUSTRIES LTD	Energy	8.62%	IN
LARSEN + TOUBRO LTD	Industrials	6.78%	IN
AXIS BANK LTD	Financials	6.71%	IN
MAHINDRA + MAHINDRA LTD	Consumer discretionary	5.70%	IN
BAJAJ AUTO LTD	Consumer discretionary	4.33%	IN
MACROTECH DEVELOPERS LTD	Real estate	4.26%	IN
ULTRATECH CEMENT LTD	Materials	3.73%	IN
APOLLO HOSPITALS ENTERPRISE	Health care	3.63%	IN

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Pre-contractual disclosure commitment:

During normal market conditions, a minimum of 70% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

On occasion, due to possible settlement mismatch related to investor flows or market holidays during times when large subscriptions are received, the portion of the Fund which is not aligned with the environmental or social characteristic may affect the Fund's ability to meet the commitment as described above under normal market conditions. The Investment Manager does not consider these short-term fluctuations to materially impact the Fund's ability to attain its environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#1 Aligned with E/S characteristics	94.06%
#2 Other	5.94%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

In which economic sectors were the investments made?

Sector	Sub Sector	% of net assets
Consumer discretionary	Automobiles	10.03%
	Household durables	3.97%
	Hotels, restaurants & leisure	3.01%
Consumer staples	Personal care products	2.96%
	Food products	2.76%
	Beverages	2.40%
Energy	Oil, gas & consumable fuels	8.62%
Financials	Banks	17.50%
	Insurance	5.25%
	Consumer finance	2.52%
	Financial services	1.20%
Health care	Health care providers & services	5.63%
Industrials	Construction & engineering	6.78%
	Electrical equipment	3.22%
Information technology	It services	3.32%
Materials	Construction materials	3.73%
Not classified	Not classified	1.76%
Pooled vehicle	Pooled vehicle	2.99%
Real estate	Real estate management & develop	12.35%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS classification hierarchy. Source: MSCI

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of December 31, 2023:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

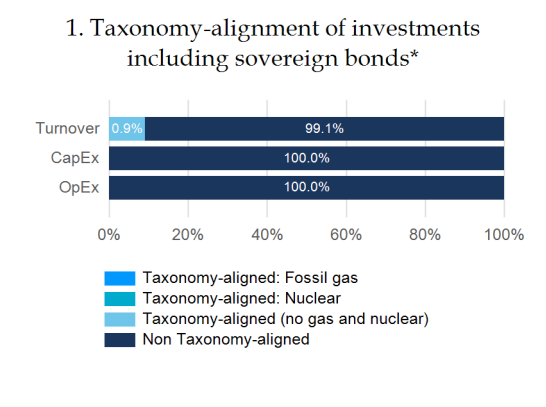
[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

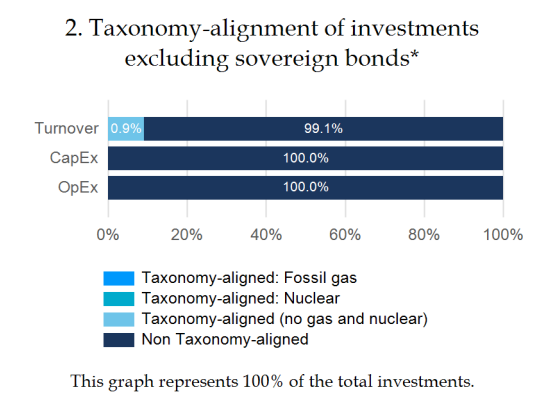
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: Clarity AI

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of investments in transitional and enabling activities is 0%.

Taxonomy aligned investments	% of market value as at December 31, 2023
Transitional Turnover	0.01%
Transitional Capex	0.00%
Transitional Opex	0.00%
Enabling Turnover	0.92%
Enabling Capex	0.00%
Enabling Opex	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: Clarity AI

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Asset allocation overview	% of net assets as at December 31, 2023	% of net assets as at December 31, 2022
Taxonomy aligned investments	0.00%	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: Clarity AI

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable. This Fund does not commit to invest in sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for hedging and investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards. However, some minimum safeguards may still be considered to apply to the extent such holdings are aligned with one or more but not all of the Fund's environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#2 Other	5.94%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

The Fund assessed and promoted the adoption of appropriate policies and practices among certain investee companies with regard to modern slavery risk management, with regards to forced labour, child labour and debt bondage ("Modern Slavery") by engaging with 27 companies via survey distribution, which accounted for 96.40% of the companies held longer than a year, and by engaging with 1 companies during meetings over the reference period.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Wellington Multi-Asset Total Return Income Fund

Legal entity identifier:
549300EUVIT1SBJ2Y122

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.53% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending December 31, 2023:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet the following environmental or social characteristic.

The Fund will limit its investments in companies with a below-average ESG Rating, relative to their peer universe.

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	December 31, 2023
The percentage of the Fund's net assets invested in companies with an ESG Rating of between 1-3.	78.14%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

… and compared to previous periods?

Sustainability Indicator	December 31, 2023	December 31, 2022
The percentage of the Fund's net assets invested in companies with an ESG Rating of between 1-3.	78.14%	85.27%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:

1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.

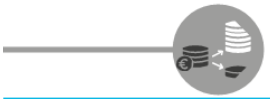
2. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	December 31, 2023
4. Exposure to companies active in the fossil fuel sector	10.71%
5. Share of non - renewable energy consumption and production	69.87%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.32%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI



What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-01-01/2023-12-31

Largest investments	Sector	% of net assets	Country
U.S. Treasury Bills	Not classified	4.32%	US
Apple, Inc.	Information technology	1.54%	US
Comcast Corp.	Communication services	1.45%	US

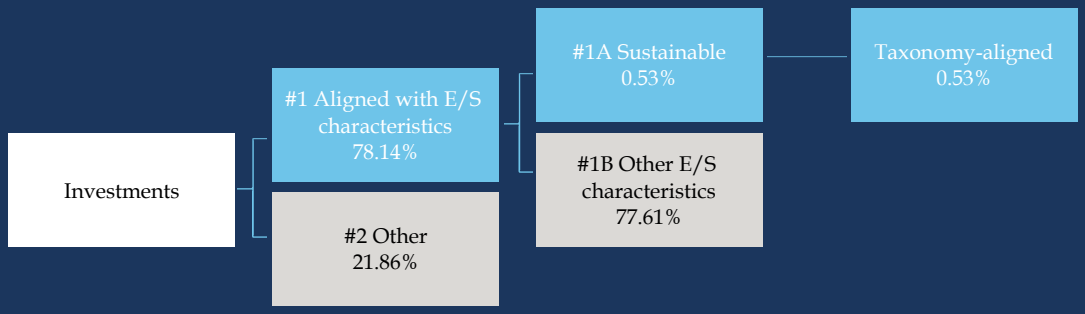
CVS Health Corp.	Health care	0.77%	US
Home Depot, Inc.	Consumer discretionary	0.74%	US
Bristol-Myers Squibb Co.	Health care	0.70%	US
Duke Energy Corp.	Utilities	0.68%	US

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Pre-contractual disclosure commitment:

During normal market conditions, a minimum of 65% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

On occasion, due to possible settlement mismatch related to investor flows or market holidays during times when large subscriptions are received, the portion of the Fund which is not aligned with the environmental or social characteristic may affect the Fund's ability to meet the commitment as described above under normal market conditions. The Investment Manager does not consider these short-term fluctuations to materially impact the Fund's ability to attain its environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#1 Aligned with E/S characteristics	78.14%
#2 Other	21.86%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of December 31, 2023:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

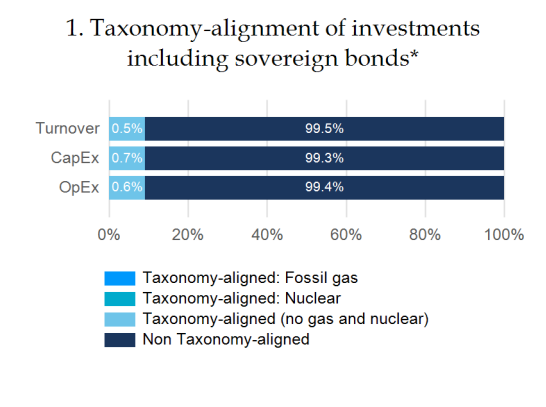
☒ No

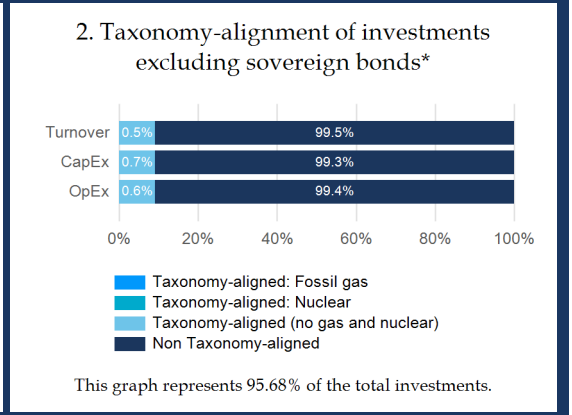
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable. This Fund does not commit to invest in sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for hedging, and/or/ investment purposes (such as gaining exposure to a security, to create leverage and/or a short position, and efficient asset allocation) or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards.

Asset allocation overview	% of net assets as at December 31, 2023
#2 Other	21.86%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.42% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending December 31, 2023:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet one or more of the following environmental or social characteristics.

1. Issuers that are screened to enable the Fund to limit its exposure to sovereign issuers whose fossil fuels exports represent a significant portion of their total exports.

2. Issuers with an E or S Rating to enable the Fund to exclude investment in the worst rated corporate issuers with the worse E or S Ratings relative to their peer universe, using a rating scale of 1-5, where 1 is the highest rating.

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	December 31, 2023
The percentage of the Fund's NAV invested in sovereign issuers where fossil fuels make up more than 67% of their exports.	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

… and compared to previous periods?

Sustainability Indicator	December 31, 2023	December 31, 2022
The percentage of the Fund's NAV invested in sovereign issuers where fossil fuels make up more than 67% of their exports.	0.00%	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:

- The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.
- The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	December 31, 2023
4. Exposure to companies active in the fossil fuel sector	2.04%
5. Share of non - renewable energy consumption and production	65.30%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-01-01/2023-12-31

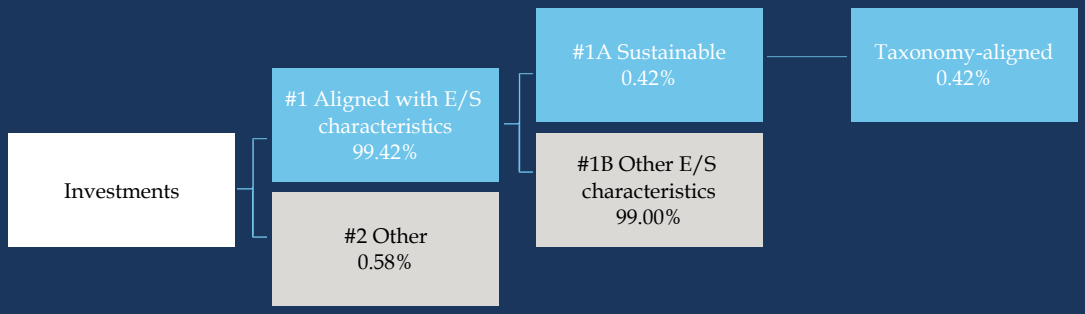
Largest investments	Sector	% of net assets	Country
U.K. Gilts	Not classified	65.94%	GB

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Pre-contractual disclosure commitment:

During normal market conditions, a minimum of 65% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

On occasion, due to possible settlement mismatch related to investor flows or market holidays during times when large subscriptions are received, the portion of the Fund which is not aligned with the environmental or social characteristic may affect the Fund's ability to meet the commitment as described above under normal market conditions. The Investment Manager does not consider these short-term fluctuations to materially impact the Fund's ability to attain its environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#1 Aligned with E/S characteristics	99.42%
#2 Other	0.58%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

	Water utilities	0.20%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS classification hierarchy. Source: MSCI

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of December 31, 2023:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

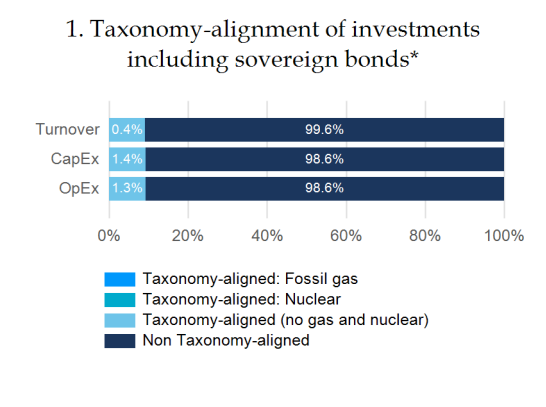
☒ No

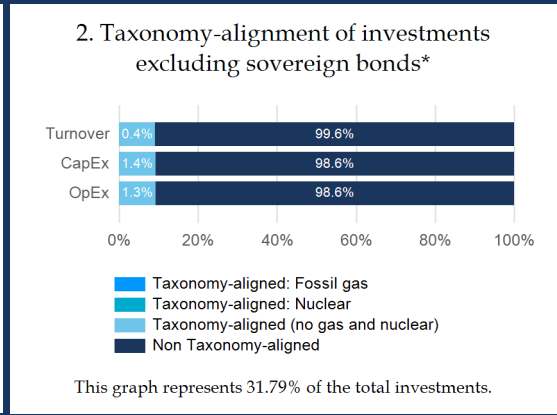
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: Clarity AI

What was the share of investments made in transitional and enabling activities?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of investments in transitional and enabling activities is 0%.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Taxonomy aligned investments	% of market value as at December 31, 2023
Transitional Turnover	0.00%
Transitional Capex	0.02%
Transitional Opex	0.01%
Enabling Turnover	0.27%
Enabling Capex	0.67%
Enabling Opex	0.99%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: Clarity AI

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Asset allocation overview	% of net assets as at December 31, 2023	% of net assets as at December 31, 2022
Taxonomy aligned investments	0.42%	0.17%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: Clarity AI

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable. This Fund does not commit to invest in sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for hedging and/or investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards.

However, some minimum safeguards may still be considered to apply to the extent such holdings are aligned with one or more but not all of the Fund's environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#2 Other	0.58%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 1.13% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending December 31, 2023:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet one or more of the following environmental or social characteristics.

1. Companies with an average or above-average S Rating, relative to their peer universe.

2. Issuers that are screened to enable the Investment Manager to implement the following exclusions. The Fund will not invest directly in the securities of any issuer identified as being principally engaged in the production of thermal coal (mining and power generation), oil sands extraction, nuclear warheads and missiles, and also excludes controversial weapons.

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	December 31, 2023
The number of securities of any issuer held identified as being principally engaged in the production of thermal coal (mining and power generation), oil sands extraction, nuclear warheads and missiles, and also controversial weapons.	0
The percentage of the Fund's net assets invested in companies with a S Rating of 1-3.	81.77%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

… and compared to previous periods?

Sustainability Indicator	December 31, 2023	December 31, 2022

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:

1. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.

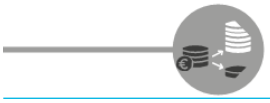
2. The Fund will systematically exclude companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	December 31, 2023
4. Exposure to companies active in the fossil fuel sector	1.04%
5. Share of non - renewable energy consumption and production	78.43%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI



What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-01-01/2023-12-31

Largest investments	Sector	% of net assets	Country

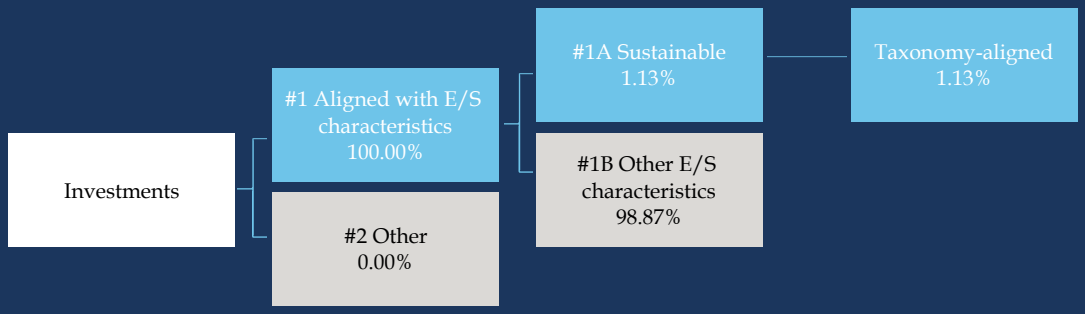
The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Pre-contractual disclosure commitment:

During normal market conditions, a minimum of 80% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

On occasion, due to possible settlement mismatch related to investor flows or market holidays during times when large subscriptions are received, the portion of the Fund which is not aligned with the environmental or social characteristic may affect the Fund's ability to meet the commitment as described above under normal market conditions. The Investment Manager does not consider these short-term fluctuations to materially impact the Fund's ability to attain its environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#1 Aligned with E/S characteristics	100.00%
#2 Other	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

Wellington Management Funds (Ireland) plc

Appendix 5 Sustainable Finance Disclosure Regulation ("SFDR") (unaudited)

December 31, 2023

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of December 31, 2023:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

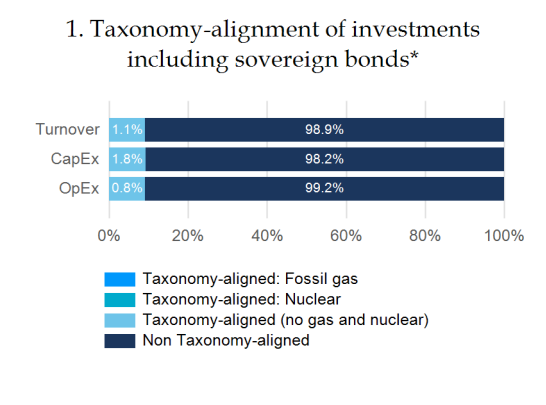
☒ No

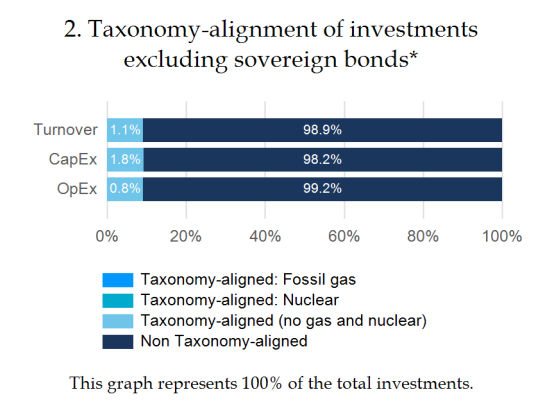
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: Clarity AI

What was the share of investments made in transitional and enabling activities?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of investments in transitional and enabling activities is 0%.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Taxonomy aligned investments	% of market value as at December 31, 2023
Transitional Turnover	0.06%
Transitional Capex	0.22%
Transitional Opex	0.01%
Enabling Turnover	0.61%
Enabling Capex	0.82%
Enabling Opex	0.76%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: Clarity AI

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Asset allocation overview	% of net assets as at December 31, 2023	% of net assets as at December 31, 2022
Taxonomy aligned investments	1.13%	0.22%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable. This Fund does not commit to invest in sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards. However, some minimum safeguards may still be considered to apply to the extent such holdings are aligned with one or more but not all of the Fund's environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#2 Other	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Wellington Universal Vision Fund

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of__% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending December 31, 2023:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet one or more of the following environmental or social characteristics.

1. Issuers that do not have the worst ESG Ratings using third party data to derive aggregate ESG Ratings.

2. Issuers with disclosed carbon data that enable the Fund to limit the overall impact of the portfolio on climate change relative to the investment universe by maintaining a lower weighted average carbon intensity ("WACI") than the MSCI All Country World Index (the "Index"), and will achieve long term net zero carbon intensity by 2050 by aiming to reduce its WACI, as compared to the 2019 WACI of the Index.

3. Issuers that are screened to enable the Fund to exclude the securities of any issuer identified as being principally engaged in the following categories in line with the methodology outlined for each in the Exclusions Policy: production of tobacco products, thermal coal (mining and power generation), oil sands extraction, or controversial weapons.

Whilst the Index is used for WACI comparison purposes, a reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	October 31, 2023
The number of securities of any issuer identified as being principally engaged in the production of tobacco products, thermal coal (mining and power generation), oil sands extraction, or controversial weapons.	0
The percentage difference of the Fund's WACI and that of the Index's 2019 WACI.	-62.29%
The percentage difference of the Fund's WACI and that of the Index's.	-45.37%
The percentage of the Fund's net assets invested in companies with an ESG Rating of between 1-4.	98.84%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

… and compared to previous periods?

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:

1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.

2. The Fund will maintain a carbon footprint (weighted average carbon intensity) that is lower than the Index. The Fund will aim to reduce its weighted average carbon intensity ("WACI") to net zero by 2050, or sooner, in accordance with the Paris Agreement. - PAIs: Carbon Footprint; GHG Emissions, GHG Intensity of Investee Companies.

3. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	October 31, 2023
1. GHG emissions	782.77tCO2e
2. Carbon footprint	353.24tCO2e/ €M invested
3. GHG intensity of investee companies	771.02tCO2e/ €M revenue
4. Exposure to companies active in the fossil fuel sector	5.59%
5. Share of non - renewable energy consumption and production	59.33%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.03%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-01-01/2023-10-31

Largest investments	Sector	% of net assets	Country
APPLE INC	Information technology	4.21%	US

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

Wellington Management Funds (Ireland) plc

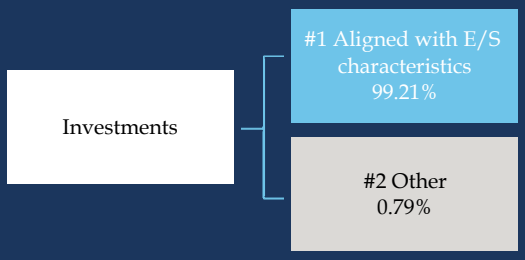
Appendix 5 Sustainable Finance Disclosure Regulation ("SFDR") (unaudited)

December 31, 2023

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Pre-contractual disclosure commitment:

During normal market conditions, a minimum of 90% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

On occasion, due to possible settlement mismatch related to investor flows or market holidays during times when large subscriptions are received, the portion of the Fund which is not aligned with the environmental or social characteristic may affect the Fund's ability to meet the commitment as described above under normal market conditions. The Investment Manager does not consider these short-term fluctuations to materially impact the Fund's ability to attain its environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#1 Aligned with E/S characteristics	99.21%
#2 Other	0.79%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of October 31, 2023:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

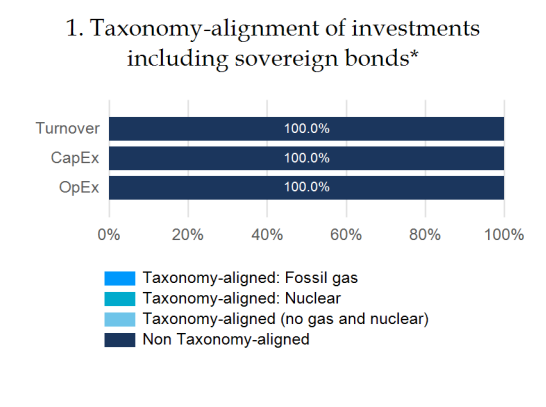
[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

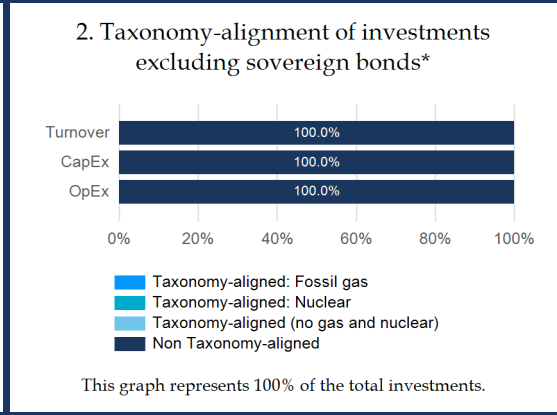
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending December 31, 2023:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet one or more of the following environmental or social characteristics.

1. Issuers with disclosed carbon data that enable the Fund to limit the overall impact of the portfolio on climate change relative to the investment universe by maintaining a lower weighted average carbon intensity - "WACI") than the ICE Bank of America US High Yield Constrained Index (the "Index").

2. Issuers are screened to enable the Fund to exclude investment in securities of any corporate issuer that generate more than 25% of their revenue from thermal coal energy generation (in addition to the criteria set out in the Exclusion Policy).

3. Issuers are screened to enable the Fund to exclude investment in corporate issuers that generate more than 5% of their revenue from adult entertainment.

Whilst the Index is used for WACI comparison purposes, a reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	December 31, 2023
The number of corporate issuers held that generate more than 25% of their revenue from thermal coal energy generation identified using a combination of third party and/or internal Wellington Management analysis	0
The number of issuers held that generate more than 5% of their revenue from adult entertainment identified using a combination of third party and/or internal Wellington Management analysis.	0
The percentage difference of the Fund's WACI and that of the Index's	-36.38%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

… and compared to previous periods?

Sustainability Indicator	December 31, 2023	December 31, 2022

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:
1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.
2. The Fund will maintain a carbon footprint (weighted average carbon intensity) that is lower than the Index - PAIs: Carbon Footprint; GHG Emissions, GHG Intensity of Investee Companies.
3. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.
While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	December 31, 2023
1. GHG emissions	17324.22tCO2e
2. Carbon footprint	686.33tCO2e/ €M invested
3. GHG intensity of investee companies	1332.82tCO2e/ €M revenue
4. Exposure to companies active in the fossil fuel sector	8.09%
5. Share of non - renewable energy consumption and production	86.18%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-01-01/2023-12-31

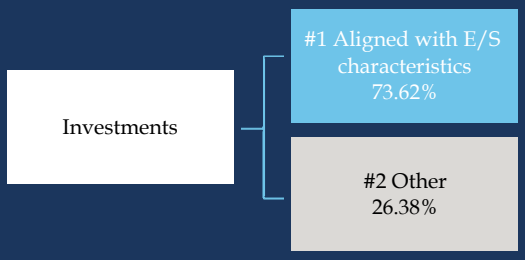
Largest investments	Sector	% of net assets	Country
CCO Holdings LLC/CCO Holdings Capital Corp.	Communication services	2.60%	US
Medline Borrower LP	Health care	1.62%	US
Carnival Corp.	Consumer discretionary	1.43%	US
Uber Technologies, Inc.	Industrials	1.40%	US
Frontier Communications Holdings LLC	Communication services	1.26%	US
PetSmart, Inc./PetSmart Finance Corp.	Consumer discretionary	1.22%	US
Ardagh Packaging Finance PLC/Ardagh Holdings USA, Inc.	Materials	1.14%	IE
LBM Acquisition LLC	Consumer discretionary	1.13%	US
TransDigm, Inc.	Industrials	1.07%	US
1011778 BC ULC/New Red Finance, Inc.	Consumer discretionary	1.06%	CA
HUB International Ltd.	Financials	1.04%	US
Owens & Minor, Inc.	Health care	1.03%	US
CSC Holdings LLC	Communication services	1.02%	US
Enerflex Ltd.	Energy	1.00%	CA
OneMain Finance Corp.	Financials	1.00%	US

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Pre-contractual disclosure commitment:

During normal market conditions, a minimum of 70% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

On occasion, due to possible settlement mismatch related to investor flows or market holidays during times when large subscriptions are received, the portion of the Fund which is not aligned with the environmental or social characteristic may affect the Fund's ability to meet the commitment as described above under normal market conditions. The Investment Manager does not consider these short-term fluctuations to materially impact the Fund's ability to attain its environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#1 Aligned with E/S characteristics	73.62%
#2 Other	26.38%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

In which economic sectors were the investments made?

Source: MSCI

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of December 31, 2023:

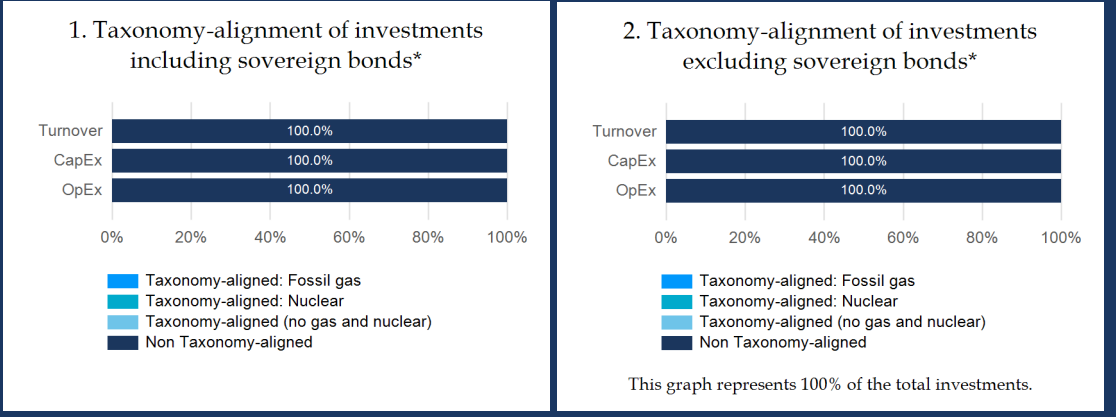
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.



**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of

What was the share of investments made in transitional and enabling activities?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of investments in transitional and enabling activities is 0%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Taxonomy aligned investments	% of market value as at December 31, 2023

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable. This Fund does not commit to invest in sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for EPM and/or hedging and/or investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards.

However, some minimum safeguards may still be considered to apply to the extent such holdings are aligned with one or more but not all of the Fund's environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#2 Other	26.38%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Wellington World Bond Fund

Legal entity identifier:
549300OMU0PTQULTMQ53

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of__% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending December 31, 2023:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet one or more of the following environmental or social characteristics.

1. Issuers that are screened to enable the Fund to limit its exposure to sovereign issuers whose fossil fuels exports represent a significant portion of their total exports.

2. Issuers with an E or S Rating to enable the Fund to exclude investment in the worst rated corporate issuers with the worse E or S Ratings relative to their peer universe, using a rating scale of 1-5, where 1 is the highest rating.

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	December 31, 2023
The number of corporate issuers held with an E Rating or S Rating of 5.	0
The percentage of the Fund's NAV invested in sovereign issuers where fossil fuels make up more than 67% of their exports.	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:

1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.

2. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	December 31, 2023
4. Exposure to companies active in the fossil fuel sector	1.56%
5. Share of non - renewable energy consumption and production	74.15%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.55%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-01-01/2023-12-31

Largest investments	Sector	% of net assets	Country
Japan Treasury Discount Bills	Not classified	17.95%	JP
Korea Treasury Bonds	Not classified	10.47%	KR
Norway Government Bonds	Not classified	8.30%	NO
New Zealand Government Bonds	Not classified	5.88%	NZ
U.S. Treasury Bills	Not classified	4.31%	US
Australia Government Bonds	Not classified	4.26%	AU

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

Wellington Management Funds (Ireland) plc

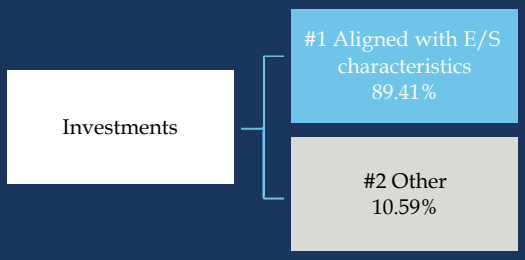
Appendix 5 Sustainable Finance Disclosure Regulation ("SFDR") (unaudited)

December 31, 2023

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Pre-contractual disclosure commitment:

During normal market conditions, a minimum of 65% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

On occasion, due to possible settlement mismatch related to investor flows or market holidays during times when large subscriptions are received, the portion of the Fund which is not aligned with the environmental or social characteristic may affect the Fund's ability to meet the commitment as described above under normal market conditions. The Investment Manager does not consider these short-term fluctuations to materially impact the Fund's ability to attain its environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#1 Aligned with E/S characteristics	89.41%
#2 Other	10.59%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS classification hierarchy. Source: MSCI

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of December 31, 2023:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

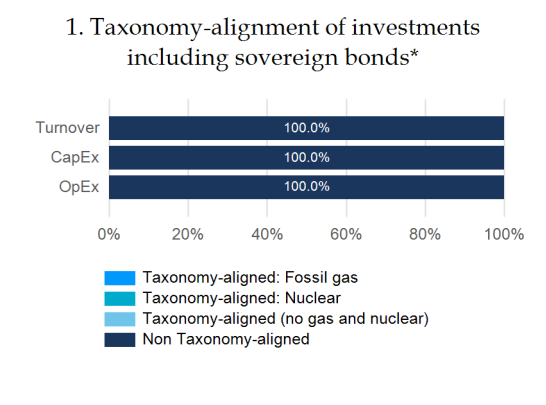
☒ No

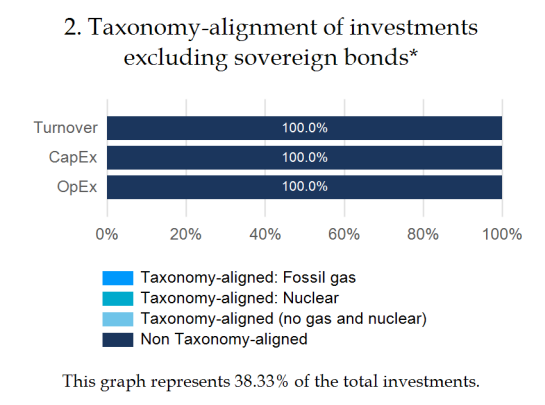
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: Clarity AI

Taxonomy-aligned activities are expressed as a share of:

What was the share of investments made in transitional and enabling activities?

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of investments in transitional and enabling activities is 0%.

Taxonomy aligned investments	% of market value as at December 31, 2023

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable. This Fund does not commit to invest in sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes derivatives for EPM or investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards.

However, some minimum safeguards may still be considered to apply to the extent such holdings are aligned with one or more but not all of the Fund's environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#2 Other	10.59%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of__% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending December 31, 2023:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet the following environmental or social characteristic.

The Fund will invest in issuers with ESG ratings and maintain an overall weighted average ESG Rating, in excess of the blended index of 50% JPMorgan Emerging Market Bond Index - Global Diversified and 50% JPMorgan Government Bond Index - Emerging Markets Global Diversified (the "Index").

Whilst the Index is used for ESG Ratings comparison purposes, a reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	December 31, 2023
The difference between the Fund's weighted average ESG Rating and that of the Index.	-0.21

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

Negative sustainable indicator values indicate how much lower the ESG rating is compared to the index using the 1-5 scale, where 1 is the highest rating.

… and compared to previous periods?

Sustainability Indicator	December 31, 2023	December 31, 2022
The difference between the Fund's weighted average ESG Rating and that of the Index.	-0.21	-0.24

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Negative sustainable indicator values indicate how much lower the ESG rating is compared to the index using the 1-5 scale, where 1 is the highest rating.

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:

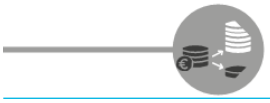
1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.
2. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	December 31, 2023
4. Exposure to companies active in the fossil fuel sector	3.03%
5. Share of non - renewable energy consumption and production	79.36%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI



What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-01-01/2023-12-31

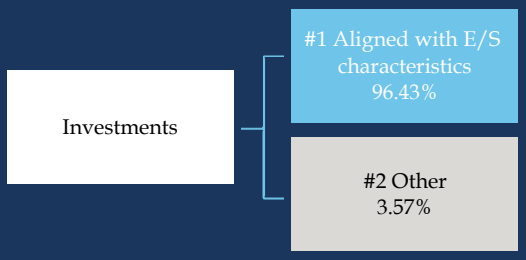
Largest investments	Sector	% of net assets	Country
Mexico Bonos	Not classified	6.23%	MX
Republic of South Africa Government Bonds	Not classified	4.78%	ZA
Colombia TES	Not classified	3.63%	CO
Indonesia Treasury Bonds	Not classified	2.67%	ID
Czech Republic Government Bonds	Not classified	2.38%	CZ
Malaysia Government Bonds	Not classified	2.31%	MY
Peru Government Bonds	Not classified	2.20%	PE
Republic of Poland Government Bonds	Not classified	2.17%	PL
Dominican Republic International Bonds	Not classified	2.05%	DO
Hungary Government International Bonds	Not classified	1.77%	HU
Romania Government Bonds	Not classified	1.75%	RO
Angola Government International Bonds	Not classified	1.74%	AO
Malaysia Government Investment Issue	Not classified	1.71%	MY
Hungary Government Bonds	Not classified	1.69%	HU
Romania Government International Bonds	Not classified	1.56%	RO

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Pre-contractual disclosure commitment:

During normal market conditions, a minimum of 80% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

On occasion, due to possible settlement mismatch related to investor flows or market holidays during times when large subscriptions are received, the portion of the Fund which is not aligned with the environmental or social characteristic may affect the Fund's ability to meet the commitment as described above under normal market conditions. The Investment Manager does not consider these short-term fluctuations to materially impact the Fund's ability to attain its environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#1 Aligned with E/S characteristics	96.43%
#2 Other	3.57%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

In which economic sectors were the investments made?

Source: MSCI

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of December 31, 2023:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

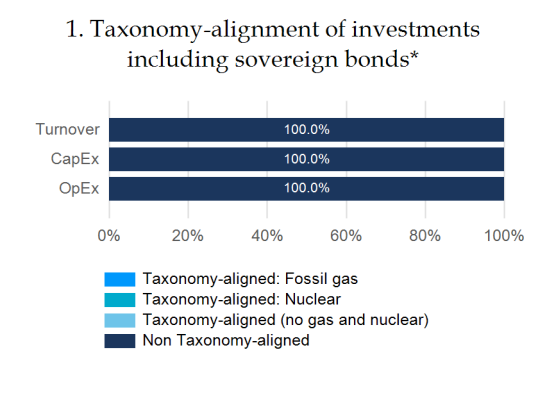
☒ No

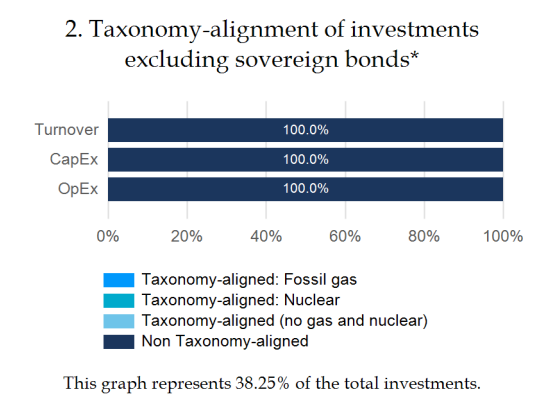
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Wellington Emerging Local Debt Advanced Beta Fund

Legal entity identifier:
5493000R38EMCUIFSH52

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of__% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending December 31, 2023:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet the following environmental or social characteristic.

The Fund will invest in issuers with an ESG rating and maintain an overall weighted average ESG Rating, in excess of the JP Morgan Government Bond Index –Emerging Markets Global Diversified Index (the "Index").

Whilst the Index is used for ESG Ratings comparison purposes, a reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	December 31, 2023
The difference between the Fund's weighted average ESG Rating and that of the Index.	-0.28

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

Negative sustainable indicator values indicate how much lower the ESG rating is compared to the index using the 1-5 scale, where 1 is the highest rating.

… and compared to previous periods?

Sustainability Indicator	December 31, 2023	December 31, 2022
The difference between the Fund's weighted average ESG Rating and that of the Index.	-0.28	-0.25

Represents point-in-time data. Negative sustainable indicator values indicate how much lower the ESG rating is compared to the index using the 1-5 scale, where 1 is the highest rating.

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:

1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.

2. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	December 31, 2023
4. Exposure to companies active in the fossil fuel sector	0.00%
5. Share of non - renewable energy consumption and production	100.00%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-01-01/2023-12-31

Largest investments	Sector	% of net assets	Country
Malaysia Government Bonds	Not classified	12.12%	MY
China Government Bonds	Not classified	9.85%	CN
Thailand Government Bonds	Not classified	9.21%	TH
Republic of South Africa Government Bonds	Not classified	8.60%	ZA
Indonesia Treasury Bonds	Not classified	6.71%	ID
Peru Government Bonds	Not classified	6.48%	PE

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

Wellington Management Funds (Ireland) plc

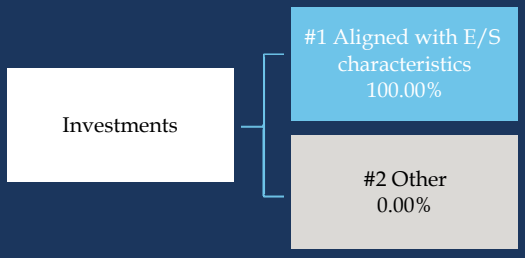
Appendix 5 Sustainable Finance Disclosure Regulation ("SFDR") (unaudited)

December 31, 2023

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Pre-contractual disclosure commitment:

During normal market conditions, a minimum of 80% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

On occasion, due to possible settlement mismatch related to investor flows or market holidays during times when large subscriptions are received, the portion of the Fund which is not aligned with the environmental or social characteristic may affect the Fund's ability to meet the commitment as described above under normal market conditions. The Investment Manager does not consider these short-term fluctuations to materially impact the Fund's ability to attain its environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#1 Aligned with E/S characteristics	100.00%
#2 Other	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

In which economic sectors were the investments made?

Sector	Sub Sector	% of net assets
Not classified	Not classified	11.00%
Sovereign	Sovereign	90.11%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS classification hierarchy. Source: MSCI

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of December 31, 2023:

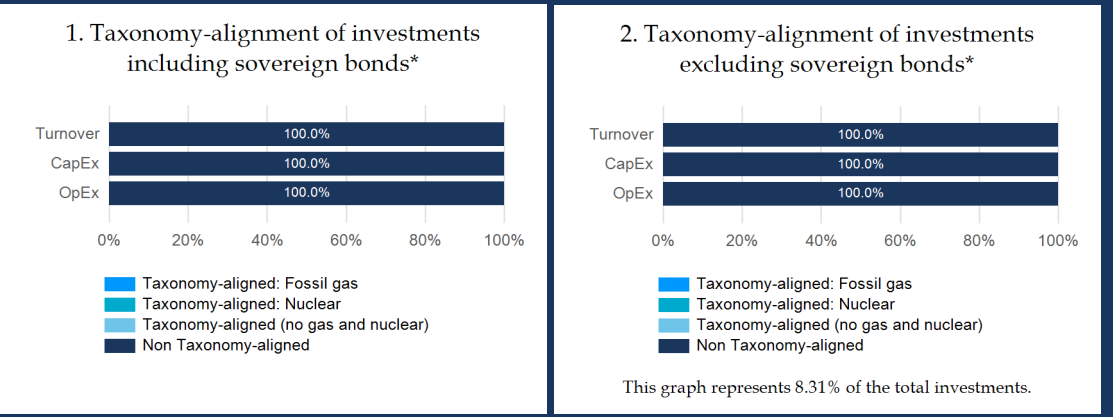
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.



**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: Clarity AI

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of

What was the share of investments made in transitional and enabling activities?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of investments in transitional and enabling activities is 0%.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

investee companies.

Taxonomy aligned investments	% of market value as at December 31, 2023
Transitional Turnover	0.00%
Transitional Capex	0.00%
Transitional Opex	0.00%
Enabling Turnover	0.00%
Enabling Capex	0.00%
Enabling Opex	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable. This Fund does not commit to invest in sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for hedging and investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards.

Asset allocation overview	% of net assets as at December 31, 2023
#2 Other	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of__% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending December 31, 2023:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet one or more of the following environmental or social characteristics.

1. Issuers with an S Rating to enable the Fund to maintain an overall weighted average S Rating, in excess of the JP Morgan Government Bond Index –Emerging Markets Global Diversified Index (the "Index").

2. Corporate or quasi- sovereign issuers that are screened for United Nations Global Compact Principles to enable the Fund to avoid investment in businesses that do not have responsible practices in the areas of human rights, labor, the environment, and corruption by excluding investment in any corporate or quasi- sovereign issuers that are identified as failing to comply with the United Nations Global Compact

principles.

Whilst the Index is used for S Ratings comparison purposes, a reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	December 31, 2023
The difference between the Fund's weighted average S Rating and that of the Index.	-0.41
The number of corporate or quasi-sovereign issuers held identified as failing to comply with the United Nations Global Compact.	0

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

Negative sustainable indicator values indicate how much lower the ESG rating is compared to the index using the 1-5 scale, where 1 is the highest rating.

… and compared to previous periods?

Sustainability Indicator	December 31, 2023	December 31, 2022
The difference between the Fund's weighted average S Rating and that of the Index.	-0.41	-0.28
The number of corporate or quasi-sovereign issuers held identified as failing to comply with the United Nations Global Compact.	0	0

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

Negative sustainable indicator values indicate how much lower the ESG rating is compared to the index using the 1-5 scale, where 1 is the highest rating.

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:

1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.
2. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.
3. The Fund excludes companies which have been identified as failing to comply with the United Nations Global Compact –PAI: Violations of United Nations Global Compact.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	December 31, 2023
4. Exposure to companies active in the fossil fuel sector	0.00%
5. Share of non - renewable energy consumption and production	88.18%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable. This Fund does not commit to invest in sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for hedging and investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards.

However, some minimum safeguards may still be considered to apply to the extent such holdings are aligned with one or more but not all of the Fund's environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#2 Other	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of__% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending December 31, 2023:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet one or more of the following social characteristics.

1. Issuers who receive a survey to enable the Fund to promote the adoption of appropriate policies and practices among certain investee companies with regard to modern slavery risk management, forced labour, child labour and debt bondage ("Modern Slavery"). In order to do this, the Investment Manager applies Wellington Management Group's Emerging Markets Modern Slavery Policy (the "EM Modern Slavery Policy"). Under the EM Modern Slavery Policy investee companies are evaluated by the Investment Manager on the basis of proprietary research and third-party research for inclusion to the Watch List (as defined below) and various levels of engagement are undertaken over a period of time

until adequate remediation measures are adopted.

The EM Modern Slavery Policy does not aim to eliminate Modern Slavery risk exposure in all investee companies and the Fund may from time to time invest in companies which have exposure to such risk and which are not subject to enhanced engagement. Further details about the EM Modern Slavery Policy and Watch List may be found in the section below "What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?".

2. Issuers that are screened for United Nations Global Compact Principles to enable the Fund to further promote appropriate policies and practices with regard to child labour and forced labour by excluding investment in companies that are assessed for and known to be involved in controversies regarding child labour or forced labour. In order to do this, the Fund excludes investments in companies which are assessed to have failed United Nations Global Compact Principles 4 (businesses should uphold the elimination of all forms of forced and compulsory labour) and 5 (businesses should uphold the effective abolition of child labour).

A reference benchmark has not been designated for the purpose of attaining the social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	November 30, 2023
The number of companies held which have been assessed to be in violation of United Nations Global Compact principles 4 (businesses should uphold the elimination of all forms of forced and compulsory labour) or 5 (businesses should uphold the effective abolition of child labour). Since the Fund excludes investments in companies which are assessed to have failed United Nations Global Compact Principles 4 and 5, this number is expected to be 0.	0
The percentage of companies deemed as having a higher risk of Modern Slavery exposure that are placed on the Watch List and are subject to enhanced engagement. Since this percentage will depend on 1) the time of the investments and 2) the result of the survey, this percentage cannot be disclosed in the Fund's pre-contractual template but will be disclosed in the Fund's periodic reporting.	25.00%
The percentage of companies held for over a year that have responded to an engagement survey regarding their modern slavery risk management policies and procedures. Since this percentage will depend on 1) the time of the investments and 2) the response to the engagement of the survey, this percentage cannot be disclosed in the Fund's pre-contractual template but will be disclosed in the Fund's periodic reporting.	21.40%
The percentage of companies where remediation measures have been adopted such that they are no longer assessed as having a higher risk of Modern Slavery exposure and may be removed from the internal Watch List. Since this percentage will depend on 1) the time of the investments and 2) the result of the remediation measures adopted following the survey, this percentage cannot be disclosed in the Fund's pre-contractual template but will be disclosed in the Fund's periodic reporting.	5.70%
The percentage of the Fund's equity issuers who received a survey and have been formally evaluated for inclusion to the Watch List regarding Modern Slavery risk management. Since at least 70% of the Fund's equity issuers are generally expected to receive a survey and be formally evaluated for inclusion to the Watch List regarding Modern Slavery risk management, this percentage is expected to be at least 70%.	91.70%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

**Companies that were held in the portfolio as of calendar year-end but that were no longer on the active or inactive watch list in part due to the fund's remediation measures, including but not limited to additional information gained from company outreach efforts and/or companies' actions towards mitigating controversies.*

… and compared to previous periods?

Sustainability Indicator	November 30, 2023	December 31, 2022
The number of companies held which have been assessed to be in violation of United Nations Global Compact principles 4 (businesses should uphold the elimination of all forms of forced and compulsory labour) or 5 (businesses should uphold the effective abolition of child labour). Since the Fund excludes investments in companies which are assessed to have failed United Nations Global Compact Principles 4 and 5, this number is expected to be 0.	0	0
The percentage of companies deemed as having a higher risk of Modern Slavery exposure that are placed on the Watch List and are subject to enhanced engagement. Since this percentage will depend on 1) the time of the investments and 2) the result of the survey, this percentage cannot be disclosed in the Fund's pre-contractual template but will be disclosed in the Fund's periodic reporting.	25.00%	22.31%
The percentage of companies held for over a year that have responded to an engagement survey regarding their modern slavery risk management policies and procedures. Since this percentage will depend on 1) the time of the investments and 2) the response to the engagement of the survey, this percentage cannot be disclosed in the Fund's pre-contractual template but will be disclosed in the Fund's periodic reporting.	21.40%	47.37%
The percentage of companies where remediation measures have been adopted such that they are no longer assessed as having a higher risk of Modern Slavery exposure and may be removed from the internal Watch List. Since this percentage will depend on 1) the time of the investments and 2) the result of the remediation measures adopted following the survey, this percentage cannot be disclosed in the Fund's pre-contractual template but will be disclosed in the Fund's periodic reporting.	5.70%	0.00%
The percentage of the Fund's equity issuers who received a survey and have been formally evaluated for inclusion to the Watch List regarding Modern Slavery risk management. Since at least 70% of the Fund's equity issuers are generally expected to receive a survey and be formally evaluated for inclusion to the Watch List regarding Modern Slavery risk management, this percentage is expected to be at least 70%.	91.70%	94.21%

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment Guideline, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:
1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.
2. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.
While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	November 30, 2023
4. Exposure to companies active in the fossil fuel sector	4.22%
5. Share of non - renewable energy consumption and production	86.88%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-01-01/2023-11-30

Largest investments	Sector	% net assets	Country

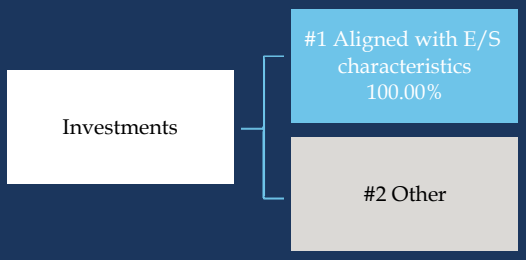
The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Pre-contractual disclosure commitment:

During normal market conditions, a minimum of 70% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

On occasion, due to possible settlement mismatch related to investor flows or market holidays during times when large subscriptions are received, the portion of the Fund which is not aligned with the environmental or social characteristic may affect the Fund's ability to meet the commitment as described above under normal market conditions. The Investment Manager does not consider these short-term fluctuations to materially impact the Fund's ability to attain its environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#1 Aligned with E/S characteristics	100.00%
#2 Other	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

In which economic sectors were the investments made?

Sector	Sub Sector	% of net assets
Consumer discretionary	Automobile components	5.71%
	Broadline retail	3.79%
	Hotels, restaurants & leisure	3.43%
	Textiles, apparel & luxury goods	0.23%

Materials	Construction materials	1.39%
Not classified	Not classified	47.60%
Real estate	Real estate management & develop	3.64%
Utilities	Water utilities	1.54%
	Multi-utilities	1.22%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS classification hierarchy. Source: MSCI

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of November 30, 2023:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

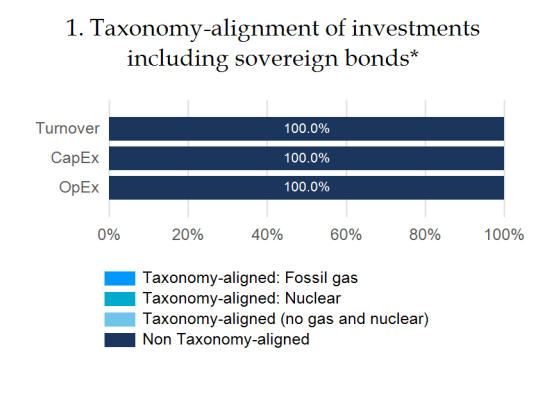
[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

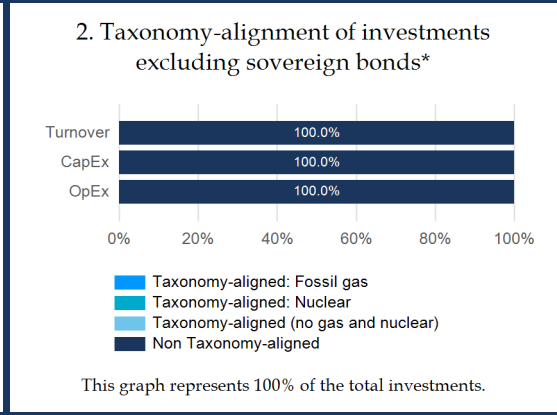
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: Clarity AI

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of investments in transitional and enabling activities is 0%.

Taxonomy aligned investments	% of market value as at November 30, 2023
Transitional Turnover	0.00%
Transitional Capex	0.00%
Transitional Opex	0.00%
Enabling Turnover	0.00%
Enabling Capex	0.00%
Enabling Opex	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable. This Fund does not commit to invest in sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for hedging and investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards. However, some minimum safeguards may still be considered to apply to the extent such holdings are aligned with one or more but not all of the Fund's environmental or social characteristics.

Asset allocation overview	% of net assets as at November 30, 2023
#2 Other	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

The Fund assessed and promoted the adoption of appropriate policies and practices among certain investee companies with regard to modern slavery risk management, with regards to forced labour, child labour and debt bondage ("Modern Slavery") by engaging with 22 companies via survey distribution, which accounted for 91.7% of the companies held longer than a year, and by engaging with 3 companies during meetings over the reference period.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Wellington Opportunistic Emerging Markets Debt Fund

Legal entity identifier:
PTMS64OT6ELV6NLCGK56

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of__% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending December 31, 2023:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet the following environmental or social characteristic.

The Fund will invest in issuers with an ESG rating and maintain an overall weighted average ESG Rating, in excess of the JP Morgan Emerging Markets Bond Global Index (the "Index").

Whilst the Index is used for ESG Rating comparison purposes, a reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	December 31, 2023
The difference between the Fund's weighted average ESG Rating and that of the Index.	-0.28

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

Negative sustainable indicator values indicate how much lower the ESG rating is compared to the index using the 1-5 scale, where 1 is the highest rating.

… and compared to previous periods?

Sustainability Indicator	December 31, 2023	December 31, 2022
The difference between the Fund's weighted average ESG Rating and that of the Index.	-0.28	-0.28

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

Negative sustainable indicator values indicate how much lower the ESG rating is compared to the index using the 1-5 scale, where 1 is the highest rating.

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:

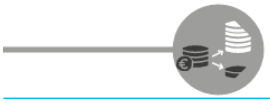
1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.
2. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	December 31, 2023
4. Exposure to companies active in the fossil fuel sector	5.83%
5. Share of non - renewable energy consumption and production	81.70%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI



What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-01-01/2023-12-31

Largest investments	Sector	% of net assets	Country
Hungary Government International Bonds	Not classified	4.70%	HU

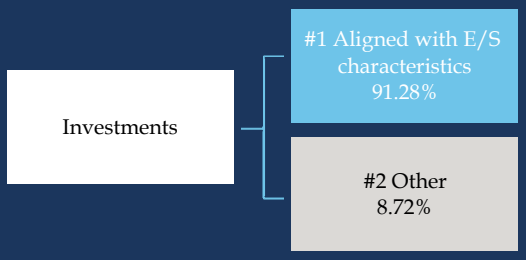
The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Pre-contractual disclosure commitment:

During normal market conditions, a minimum of 80% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

On occasion, due to possible settlement mismatch related to investor flows or market holidays during times when large subscriptions are received, the portion of the Fund which is not aligned with the environmental or social characteristic may affect the Fund's ability to meet the commitment as described above under normal market conditions. The Investment Manager does not consider these short-term fluctuations to materially impact the Fund's ability to attain its environmental or social characteristics.

Asset allocation overview	% of net assets as at December 31, 2023
#1 Aligned with E/S characteristics	91.28%
#2 Other	8.72%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

Source: MSCI

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of December 31, 2023:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

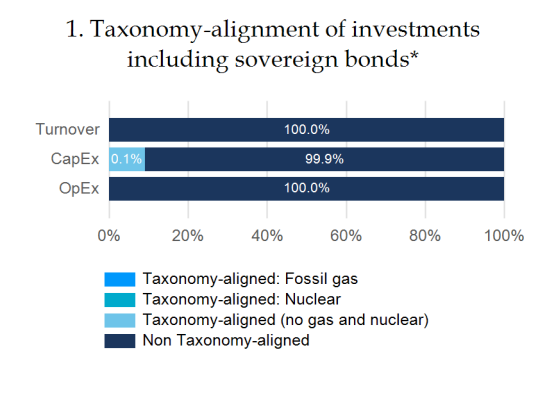
☒ No

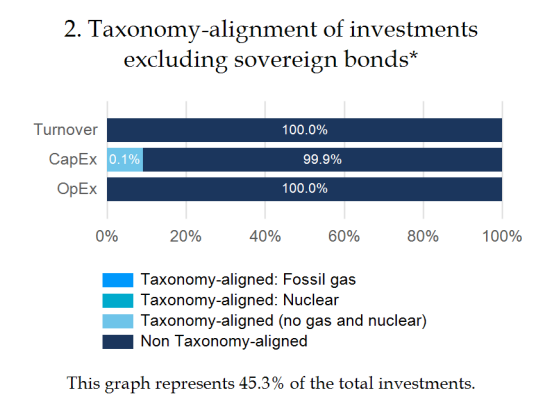
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: Clarity AI

What was the share of investments made in transitional and enabling activities?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of investments in transitional and enabling activities is 0%.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Taxonomy aligned investments	% of market value as at December 31, 2023
Transitional Turnover	0.00%
Transitional Capex	0.00%
Transitional Opex	0.00%
Enabling Turnover	0.00%
Enabling Capex	0.00%
Enabling Opex	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: Clarity AI

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Asset allocation overview	% of net assets as at December 31, 2023	% of net assets as at December 31, 2022
Taxonomy aligned investments	0.00%	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable. This Fund does not commit to invest in sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for hedging and investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards.

Asset allocation overview	% of net assets as at December 31, 2023
#2 Other	8.72%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Wellington Pan-European Small-Cap Equity Fund

Legal entity identifier: 549300EEZ96KHJZXGO94

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 22.03% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending December 31, 2023:

Pre-contractual disclosure commitment:

The Fund excludes investments in any issuer principally involved in either the production and sales of fossil fuels, or the mining of thermal coal or power generation from thermal coal, or owning thermal coal reserves containing a certain amount of potential carbon emissions.

The Fund seeks to achieve long term net zero carbon intensity by 2050, by promoting the establishment of net zero Science-Based Targets ("SBT") amongst investee companies.

The Fund seeks to invest in companies with average or above-average E Rating and S Rating relative to their peer universe, using a rating scale of 1-5, where 1 is the highest rating.

The Investment Manager seeks to invest in companies which derive their revenue from sustainable products or services that the Investment Manager has determined are economic activities that contribute to a positive or social environmental outcome and which are considered Sustainable Investments under SFDR.

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	May 23, 2023
The number of companies held owning thermal coal reserves containing more than 1000MtCO2 of potential carbon emissions.	0
The number of companies held principally involved in mining of thermal coal or power generation from thermal coal.	0
The number of companies held principally involved in the production and sales of fossil fuels, as defined by the standard energy sector industry classification.	0
The percentage of the Fund's holdings invested in companies which derive revenue from sustainable products or services that the Investment Manager has determined are economic activities that contribute to a positive environmental or social outcome and which are categorized as Sustainable Investments under SFDR.	22.03%
The percentage of the Fund's NAV invested in companies with established or which have committed to establish science-based targets (SBT).	51.72%
The percentage of the Fund's number of holdings invested in companies identified as rated 1-3 for environmental practices.	93.10%
The percentage of the Fund's number of holdings invested in companies identified as rated 1-3 for social practices.	87.93%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

Source: MSCI and Wellington.

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Pre-contractual disclosure commitment:

The Investment Manager will seek to invest in companies that derive more than 25% of revenues from a sustainable product or service (economic activities that contribute to a positive environmental or social outcome). For example, this may be a company that manufacturers LED lighting products, recycling solutions or smart metering installations, or a company that delivers health care to economically or socially disadvantaged communities.

The Investment Manager invested in companies that derived more than 25% of revenues from a sustainable product or service during the period. These investments are therefore considered contributors to the sustainable objective. Allocations may fluctuate throughout the year.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Effective January 1, 2023, Sustainable Investments were assessed against each of the mandatory corporate and/or sovereign Principal Adverse Impacts, as appropriate for the asset type, and as listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs"). PAIs were assessed quantitatively and/or qualitatively according to third party data or by Wellington's research analysts and investment teams using company disclosures, internal research and analysis regarding issuer activities. Where PAI data was determined to be unreliable or unavailable, and as applicable to the asset type, the Investment Manager conducted further due diligence and assessed the issuer's activities, processes or policies related to climate, environmental, social and/or anti-bribery/anti-corruption matters to determine that the issuer was not doing significant harm. Instances of controversy or negative findings were evaluated against the issuer's response in alignment with the expectations set forth by the UN Guiding Principles on Business and Human Rights.

Please refer to the Fund's Pre-Contractual Disclosure, attached to the Fund's prospectus, for additional detail on this assessment.

How were the indicators for adverse impacts on sustainability factors taken into account?

Effective January 1, 2023, and pursuant to Level II of SFDR, adverse impact compliance screens were implemented to assess Do No Significant Harm (DNSH) for Sustainable Investments. Where the PAIs reflect a quantitative data point and such quantitative data is available, each Sustainable Investment is compared against quantitative thresholds set by the Investment Manager as applicable to the asset type. The thresholds may be determined by setting express conditions or fixed numerical thresholds for a given PAI. Certain PAIs are evaluated relative to industry peers and the worst companies in those industries will set the standard for determining significant harm. Where the Investment Manager has determined that industry differentiation is less meaningful, thresholds will be set in the context of all issuers. Where the Investment Manager has determined that differentiation is less meaningful or for PAIs which are more qualitative in nature (e.g., PAIs relating to the UNGC Principles and the OECD Guidelines for Multinational Enterprises) significant harm is assessed by evaluating, among others, companies' activities, management policies and practices, remediation activities or unresolved controversies using third party data.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was tested as part of the Investment Manager's process to identify Sustainable Investments. Assessment of management policies and practices is used to determine alignment. Misalignment with the OECD Guidelines for Multinational Enterprises or the UN Guiding Principles on Business and Human Rights may be determined where the Investment Manager identifies UN Global Compact non-compliance, inadequate policies and/or unresolved controversies.

Issuers assessed to be in breach of the OECD Guidelines for Multinational Enterprises or the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights are not eligible to be classified as Sustainable Investments. As of December 31, 2023, none of the Fund's Sustainable Investments were identified to have failed the test.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

The Fund's Sustainable Investments are assessed against each of the mandatory corporate and/or sovereign PAIs to determine that the Sustainable Investments do not cause significant harm to any environmental or social sustainable objective. In addition, by virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the PAIs into consideration either directly or indirectly on all or a portion of the Fund as follows:

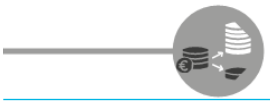
1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.
2. The Fund will invest in a minimum percentage of companies with established SBT or a commitment to establish such targets, and actively engage with companies held in the portfolio to commit to net zero SBT. - PAIs: Carbon Footprint; GHG Emissions, GHG Intensity of Investee Companies.
3. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy. In addition, the Fund will exclude companies engaged in the production and sales of fossil fuels. The Fund will also exclude companies owning thermal coal reserves containing more than 1,000 metric tonnes of potential carbon dioxide emissions. - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	May 23, 2023
1. GHG emissions	3107.90tCO2e
2. Carbon footprint	346.64tCO2e/ €M invested
3. GHG intensity of investee companies	835.44tCO2e/ €M revenue
4. Exposure to companies active in the fossil fuel sector	3.88%
5. Share of non - renewable energy consumption and production	81.16%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI



What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-01-01/2023-05-23

Largest investments	Sector	% of net assets	Country
ALD SA	Not classified	2.71%	FR
SPECTRIS PLC	Not classified	2.67%	GB

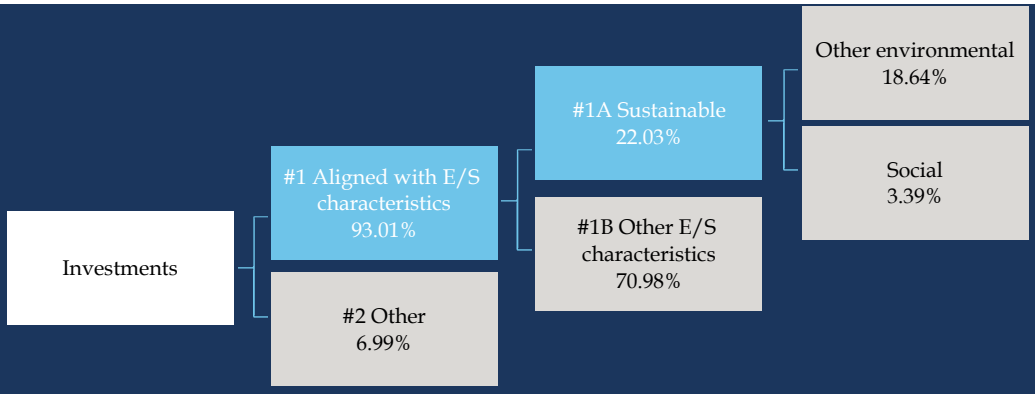
The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Pre-contractual disclosure commitment:

The Fund is expected to have 100% (excluding cash and cash equivalents) of its holdings aligned to the #1 E/S characteristics category by restricting investment in securities as per the above exclusions.

A minimum of 15% of the Fund's number of holdings (excluding cash and cash equivalents) will be invested in companies which have established, or have committed to establish SBT, with this percentage increasing to a minimum of 50% by 2030, and 100% by 2040.

A minimum of 70% of the Fund (by number of holdings) will be invested in companies with an E Rating of 1-3, and a minimum of 70% of the Fund (by number of holdings) will be invested in companies with a S Rating of 1-3, using a rating scale of 1-5, where 1 is the highest rating.

The Fund will also make Sustainable Investments typically targeting a range of 10%-20% of its companies by number of holdings (with a minimum of 5%) which derive greater than 25% of revenues from sustainable products or services that the Investment Manager has determined are economic activities that contribute to a positive environmental or social outcome and which are categorised as Sustainable Investments under SFDR.

While these allocations are indicative of typical allocations of the Fund, actual numbers may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

Asset allocation overview	% of holdings as at December 31, 2023
#1 Aligned with E/S characteristics	93.01%
#2 Other	6.99%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

In which economic sectors were the investments made?

Sector	Sub Sector	% of net assets
Not classified	Not classified	99.98%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS classification hierarchy. Source: MSCI

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

Although the Fund commits to invest in Sustainable Investments with an environmental objective within the meaning of the SFDR, the minimum share of EU Taxonomy-aligned investments is 0%.

However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of May 23, 2023:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

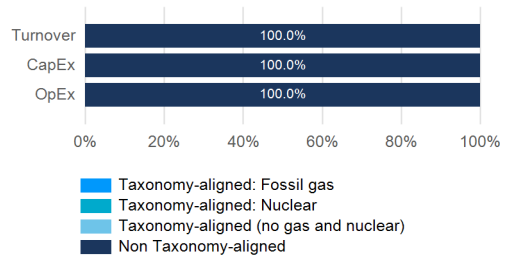
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

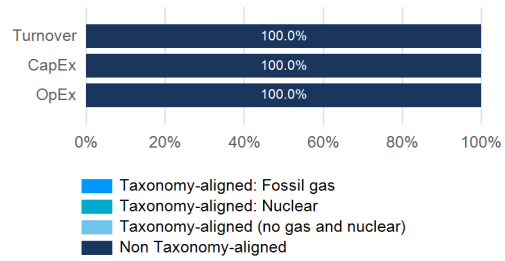
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*



2. Taxonomy-alignment of investments excluding sovereign bonds*



This graph represents 100% of the total investments.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: Clarity AI

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Pre-contractual disclosure commitment:

Not applicable. Although the Fund commits to invest in Sustainable Investments within the meaning of the SFDR, the minimum share of investments in transitional and enabling activities is 0%.

Taxonomy aligned investments	% of market value as at May 23, 2023

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

Although the Fund commits to make Sustainable Investments with an environmental objective within the meaning of the SFDR, the minimum share of investments not EU Taxonomy-aligned is 0%.

Asset allocation overview	% of holdings as at May 23, 2023
#1A Sustainable Investments: Other environmental	18.64%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What was the share of socially sustainable investments?

Pre-contractual disclosure commitment:

Minimum 0% of social Sustainable Investments.

Asset allocation overview	% of holdings as at May 23, 2023
#1A Sustainable Investments: Social	3.39%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for EPM, hedging and investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards. However, some minimum safeguards may still be considered to apply to the extent such holdings are aligned with one or more but not all of the Fund's environmental or social characteristics.

Asset allocation overview	% of holdings as at May 23, 2023
#2 Other	6.99%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.
