Financial information on Wellington Management Funds (Luxembourg) III SICAV (the "Company")

The Company was incorporated on December 16, 2019 and is authorised under Part I of the Luxembourg law of December 17, 2010 relating to undertakings for collective investment, as amended (the "2010 Law"), and the law of August 10, 1915 on commercial companies, as amended (the "1915 Law") to which the 2010 Law refers, as well as by its articles of incorporation (the "Articles of Incorporation"). The Articles of Incorporation were published in Recueil Electronique des Sociétés et Associations on January 7, 2020.

The Company qualifies as an Undertaking for Collective Investment in Transferable Securities ("UCITS") under Article 1(2) of the UCITS Directive (the "Directive"), and may therefore be offered for sale in European Union ("EU") Member States (subject to registration in countries other than Luxembourg). In addition, applications to register the Company may be made in other countries.

As at September 30, 2024, the Company consisted of the following funds (the "Funds" and each a "Fund"):

- Wellington Emerging Markets Research Equity Core Fund* (SFDR Article 8)
- Wellington US Brand Power Fund (SFDR Article 8)
- Wellington US Quality Growth Fund (SFDR Article 8)
- Wellington Global Property Income Fund (SFDR Article 8)
- Wellington Next Generation Global Equity Fund (SFDR Article 8)
- Wellington European Stewards Fund* (SFDR Article 9)
- Wellington Climate Market Neutral Fund (in liquidation)* (SFDR Article 8)
- Wellington Emerging Markets Health Care Equity Fund* (SFDR Article 8)
- Wellington Next Generation Education Fund (SFDR Article 8)
- Wellington Sustainable Outcomes Fund (SFDR Article 9)
- Wellington Global Equity Income Fund (SFDR Article 8)
- Wellington Global Climate and Environment Fund (in liquidation)* (SFDR Article 9)
- Wellington Asia Quality Income Fund (SFDR Article 8)
- Wellington Global Quality Value Fund* (SFDR Article 8)
- Wellington Multi-Asset High Income Fund (SFDR Article 6)
- Wellington Credit Income Fund (SFDR Article 8)
- Wellington Euro Credit ESG Fund* (SFDR Article 8)
- Wellington Asia Credit Income Fund (SFDR Article 8)
- Wellington Credit Total Return Fund (SFDR Article 8)

* As at September 30, 2024, the Fund is not authorised in Hong Kong and is not available to the public in Hong Kong nor recognised by the Monetary Authority of Singapore under the Securities and Futures Act, Chapter 289 of Singapore, and hence is not available to the retail public in Singapore.

The Funds subject to the disclosure requirements of Articles 8 or 9 of the SFDR Regulation are presented in the Appendix 6 – Sustainable Finance Disclosure Regulation (SFDR) to these financial statements.

For all Shareholders

The Prospectus, the Key Information Document ("KID"), the unaudited semi-annual reports, audited annual reports along with information concerning issue and repurchase prices, the statement of changes in the composition of the investment portfolio and the financial situation of the Company shall be available at the registered office of the Company and from State Street Bank International GmbH, Luxembourg Branch every bank working day in Luxembourg.

Financial information concerning the Company shall be available at the registered office of the Company and from State Street Bank International GmbH, Luxembourg Branch every bank working day in Luxembourg.

Notices to Shareholders

All notices to Shareholders shall be sent to the Shareholders electronically via email. In addition, the Company may decide to inform the Shareholders by other means.

For Swiss investors

BNP PARIBAS, Paris, Zurich branch, Selnaustrasse 16, CH-8002, Zürich, Switzerland, is the Swiss Representative and Paying Agent of the Company. The Prospectus, the KIDs, the unaudited semi-annual reports, the audited annual reports and the statement of changes in the composition of the investment portfolio can be obtained free of charge from BNP PARIBAS.

For Swiss investors (continued)

The Company and its agent may pay retrocessions as remuneration for distribution activity in respect of Fund shares in or from Switzerland. At the request of the investor, the Investment Manager must disclose the amounts of such rebates free of charge. In respect of the shares distributed in or from Switzerland, the place of performance and jurisdiction is the registered office of the Representative in Switzerland. Retrocessions are included in Total Expense Ratio ("TER"). TER have been calculated in accordance with the requirements of Asset Management Association Switzerland ("AMAS") guidelines.

The Board of Directors hereby presents the audited annual report of the Company covering the year from October 01, 2023 to September 30, 2024.

State Street Bank International GmbH, Luxembourg Branch serves as a Depositary, Administrator, Registrar and Transfer Agent and Paying Agent of the Company.

Corporate governance and ALFI (the Association of the Luxembourg Fund Industry)

Code of conduct

The preparation of the financial statements of the Company is carried out by State Street Bank International GmbH, Luxembourg Branch, as Administrator under the supervision of the Board of Directors of the Company (the "Directors"). In accordance with the Luxembourg laws and regulations, the Directors have put procedures in place to ensure that appropriate internal controls relevant to accounting records, including the preparation and fair presentation of the financial statements are in place at the Management Company and its services providers, and otherwise to exercise oversight with respect to accounting estimates or judgments made in connection with the preparation of the financial statements. The Directors are satisfied that they have fully complied with these requirements.

The Directors are responsible for ensuring that a high level of corporate governance is met and consider that the Company has complied with the best practices in the Luxembourg funds industry.

In particular, the Directors have adopted the ALFI Code of Conduct (the "Code") which sets out principles of good governance.

The Directors meet at least four times a year and ensure that the Management Company maintains high standards of integrity and control in the Company's operations and that it possesses adequate governance and means of control as Luxembourg laws and regulation demand.

The Directors consider that the Company has complied with the principles of the Code in all material aspects throughout the year ended September 30, 2024. The Directors undertake an annual review of ongoing compliance with the principles of the Code.

The invasion of Ukraine by Russia

The invasion of Ukraine by Russia which began on February 24, 2022 has increased valuation, liquidity and market risk for securities issued by Belarus, Russia and Ukraine, and to a lesser extent, most global markets. As of the date of this report the resolution of this event, and the full potential impact on the Funds, continues to be uncertain. Management continues to monitor developments that may impact financial markets including sanctions, currency repatriation restrictions, debt forgiveness or defaults, and any other actions by governments and developments of the crisis. Management will further assess the impact on the Funds' portfolio operations and valuation and will take any potential actions needed, as facts and circumstances are subject to change and may be specific to investment strategies and jurisdictions. Please refer to the country concentration table presented for each of the Funds in these financial statements to assess the exposure of the net assets to securities issued by companies in Belarus, Russia or Ukraine as of September 30, 2024.

Audit report

To the Shareholders of
WELLINGTON MANAGEMENT FUNDS (LUXEMBOURG) III SICAV

Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of WELLINGTON MANAGEMENT FUNDS (LUXEMBOURG) III SICAV (the "Fund") and of each of its sub-funds as at 30 September 2024, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund's financial statements comprise:

- the combined statement of net assets as at 30 September 2024;
- the combined statement of operations and changes in net assets for the year then ended;
- the statement of investments as at 30 September 2024; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements" section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;

- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;

- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;

- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds (except for Wellington Climate Market Neutral Fund and Wellington Global Climate and Environment Fund where a decision to liquidate exists) to cease to continue as a going concern;

- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

* Fund commenced operations on January 31, 2024.

The accompanying notes are an integral part of these financial statements.

Investment Objective and Policy

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns in excess of the MSCI Emerging Markets Index (the "Index"), primarily through investing either directly or indirectly, in large and mid-cap ("core") equity and equity-related securities issued by companies located in emerging market countries, inclusive of frontier market countries (as defined by MSCI) and/or which conduct substantial business activities in emerging market countries, with a maximum of 50% of the weighted average carbon intensity of the Index.

The Index is integral to portfolio construction and is used for performance comparison and weighted average carbon intensity purposes. The Fund's securities will generally be components of the Index but are expected to have different weightings and are not predetermined by the Index.

The Fund will primarily invest, directly or indirectly through the use of FDIs, in equity and other securities with equity characteristics. These may include, but are not limited to, common stocks, depository receipts (such as ADRs, GDRs and European depository receipts), market access products (including warrants on equities, options on equities and equity swaps), preferred stock, warrants, dividend-right certificates, shares of closed ended REITs, exchange-traded funds and other UCIs. The Fund may also hold securities issued pursuant to Rule 144A and/or Regulation S securities (Rule 144A and Regulation S securities are those offered without registration under the United States Securities Act of 1933 (as amended)).

The Fund may buy and sell exchange-traded and over-the-counter FDIs including swaps, futures, options, forwards and other UCITS-eligible FDIs, for investment purposes and for efficient portfolio management, including hedging against risk. Where the Fund uses total return swaps, the underlying consists of instruments in which the Fund may invest according to its investment objective and policy.

The Fund is denominated in US Dollars.

The Sustainability Risks that are most frequently relevant to this Fund include:

Environmental
- a. Transition Risks from Climate Change
  - (i) Implied Temperature Risk (ITR)
  - (ii) Greenhouse gas emissions (WACI)

Social
- b. External Social Factors
  - (i) Social Controversy

Governance
- c. Corporate management practices
  - (i) Inadequate external or internal audit

Further details on the Sustainability Risks listed above and their potential impacts are included under Sustainability Risks within the section of the Prospectus entitled Risk Factors.

Pre-contractual disclosure information relating to the ESG characteristics, or objectives, of the Fund is provided at the Appendix 6 - Sustainable Finance Disclosure Regulation (SFDR) (unaudited) of these financial statements.

The global exposure for this Fund is calculated according to the commitment methodology. The global exposure generated through the use of financial derivative instruments is limited to 100% of net asset value of the Fund when calculated using the commitment methodology.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Emerging Markets Research Equity Core Fund launched on November 17, 2020. The table below details the performance of all funded share classes within the Fund.

	Total Returns (%) Periods ended September 30, 2024					
	3 Mths[*]	*6 Mths*[*]	*1 Year*	*3 Years*[*]	*Since Inception*[*]	*Inception Date*
Class D USD	9.25%	15.16%	22.59%	(4.22%)	(1.98%)	November 17, 2020
MSCI Emerging Markets Index	8.72%	14.16%	26.05%	0.40%	1.92%

Investment Objective and Policy

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns in excess of the S&P 500 Index (the "Index"), primarily through investing in US companies where, the Investment Manager believes, brands are key determinates of long-term value.

The Index serves as a reference benchmark for performance comparison purposes and weighted average carbon intensity purposes. Whilst Fund securities may be components of the Index, the Index is not considered during portfolio construction and the Investment Manager will not manage the extent to which Fund securities differ from the Index.

The Fund will primarily invest, directly or indirectly through the use of FDIs, in equity and other securities with equity characteristics. These may include, but are not limited to, common stocks, depository receipts (such as ADRs, GDRs and European depository receipts), market access products (including warrants on equities, options on equities and equity swaps), preferred stock, warrants, dividend-right certificates, shares of closed ended REITs, exchange-traded funds and other UCIs. The Fund may also hold securities issued pursuant to Rule 144A and/or Regulation S securities (Rule 144A and Regulation S securities are those offered without registration under the United States Securities Act of 1933 (as amended)).

The Fund may also invest in other securities, including, for example, exchange-traded funds qualifying as UCIs within the meaning of the 2010 Law and cash and cash equivalents (to achieve its investment goals, for treasury purposes, and/or in case of unfavourable market conditions), all as deemed by the Investment Manager to be consistent with the investment discipline. No more than 5% of the net asset value of the Fund will be invested in non-listed and non-traded collective investment schemes.

The Fund may buy and sell exchange-traded and over-the-counter FDIs including swaps, futures, options, forwards and other UCITS-eligible FDIs, for investment purposes and for efficient portfolio management, including hedging against risk. Where the Fund uses total return swaps, the underlying consists of instruments in which the Fund may invest according to its investment objective and policy. While there are no restrictions on the Fund's ability to use derivatives for investment purposes (such as gaining exposure to a security), derivatives are mainly used to hedge (manage) risk.

The Fund is denominated in US Dollars.

This Fund promotes environmental characteristics. As such, it is required as per Article 6 of the Taxonomy Regulation to state that the "do no significant harm" principle applies only to those investments underlying the Fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this Fund do not take into account the EU criteria for environmentally sustainable economic activities. It should however be noted that notwithstanding the above, the investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation and the proportion of the Fund's assets invested in such environmentally sustainable economic activities is currently estimated to be at least 0%. Therefore, the "do not significant harm" principle does not apply to any of the investments of this Fund.

The Sustainability Risks that are most frequently relevant to this Fund include:

Environmental
- a. Transition Risks from Climate Change
  - (i) Implied Temperature Risk (ITR)
  - (ii) Greenhouse gas emissions (WACI)

Social
- b. External Social Factors
  - (i) Social Controversy

Governance
- c. Corporate management practices
  - (i) Inadequate external or internal audit

Further details on the Sustainability Risks listed above and their potential impacts are included under Sustainability Risks within the section of the Prospectus entitled Risk Factors.

Pre-contractual disclosure information relating to the ESG characteristics, or objectives, of the Fund is provided at the Appendix 6 - Sustainable Finance Disclosure Regulation (SFDR) (unaudited) of these financial statements.

Investment Objective and Policy (continued)

The global exposure for this Fund is calculated according to the commitment methodology. The global exposure generated through the use of financial derivative instruments is limited to 100% of net asset value of the Fund when calculated using the commitment methodology.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

Investment Objective and Policy

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns, in excess of the S&P 500 (the "Index"), primarily through investment in equity and equity-related securities of US companies.

The Index may be considered during portfolio construction and is used for performance comparison and weighted average carbon intensity purposes. Fund securities may be components of the Index but are not expected to have similar weightings.

The Fund will primarily invest, directly or indirectly through the use of FDIs, in equity and other securities with equity characteristics. These may include, but are not limited to, common stocks, depository receipts (such as ADRs, GDRs and European depository receipts), market access products (including warrants on equities, options on equities and equity swaps), preferred stock, warrants, dividend-right certificates, shares of closed ended REITs, exchange-traded funds and other UCIs. The Fund may also hold securities issued pursuant to Rule 144A and/or Regulation S securities (Rule 144A and Regulation S securities are those offered without registration under the United States Securities Act of 1933 (as amended)).

The Fund may also invest in other securities, including, for example, exchange-traded funds qualifying as UCIs within the meaning of the 2010 Law and cash and cash equivalents (to achieve its investment goals, for treasury purposes, and/or in case of unfavourable market conditions), all as deemed by the Investment Manager to be consistent with the investment discipline. No more than 5% of the net asset value of the Fund will be invested in non-listed and non-traded collective investment schemes.

The Fund may buy and sell exchange-traded and over-the-counter FDIs including swaps, futures, options, forwards and other UCITS-eligible FDIs, for investment purposes and for efficient portfolio management, including hedging against risk. Where the Fund uses total return swaps, the underlying consists of instruments in which the Fund may invest according to its investment objective and policy. While there are no restrictions on the Fund's ability to use derivatives for investment purposes (such as gaining exposure to a security), derivatives are mainly used to hedge (manage) risk.

The Fund is denominated in US Dollars.

The Sustainability Risks that are most frequently relevant to this Fund include:

Environmental
- a. Transition Risks from Climate Change
  - (i) Implied Temperature Risk (ITR)
  - (ii) Greenhouse gas emissions (WACI)

Social
- b. External Social Factors
  - (i) Social Controversy

Governance
- c. Corporate management practices
  - (i) Inadequate external or internal audit

Further details on the Sustainability Risks listed above and their potential impacts are included under Sustainability Risks within the section of the Prospectus entitled Risk Factors.

Pre-contractual disclosure information relating to the ESG characteristics, or objectives, of the Fund is provided at the Appendix 6 - Sustainable Finance Disclosure Regulation (SFDR) (unaudited) of these financial statements.

The global exposure for this Fund is calculated according to the commitment methodology. The global exposure generated through the use of financial derivative instruments is limited to 100% of net asset value of the Fund when calculated using the commitment methodology.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Investment Objective and Policy

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long term total returns in excess of the FTSE EPRA/NAREIT Developed Dividend+ Index (the "Index"), with an additional focus on regular income by primarily investing either directly or indirectly, in companies, globally, with activities in or related to the development, operation, service and/or ownership of real estate including real estate investment trusts ("REITs").

The Fund will aim to declare a dividend of between 3%-5% of the Fund's net asset value in USD on an annual basis, dependent on market conditions, however this is not guaranteed. Income will be declared and paid as described in the section of the Prospectus entitled Distribution Policy and, where there is insufficient income in a given month, may be distributed before the deduction of fees and expenses and/or include capital distributions, so in order to deliver a regular income the potential for capital growth may be reduced and capital may be eroded in the long term.

The Index may be considered during portfolio construction and is used for performance comparison purposes. The Index is designed to represent general trends in eligible listed real estate equities and REITs worldwide, that have a one-year forecast dividend of 2% or greater. Fund securities may be components of the Index but are not expected to have similar weightings.

The Fund will primarily invest, directly or indirectly through the use of FDIs, in equity and other securities with equity characteristics. These may include, but are not limited to, common stocks, depository receipts (such as ADRs, GDRs and European depository receipts), market access products (including warrants on equities, options on equities and equity swaps), preferred stock, warrants, dividend-right certificates, shares of closed ended REITs, exchange-traded funds and other UCIs. The Fund may also hold securities issued pursuant to Rule 144A and/or Regulation S securities (Rule 144A and Regulation S securities are those offered without registration under the United States Securities Act of 1933 (as amended)). The exposure of the Fund to REITs is expected to exceed 30% of the net asset value of the Fund.

The Fund may also invest in other securities, including, for example, exchange-traded funds qualifying as UCIs within the meaning of the 2010 Law and cash and cash equivalents (to achieve its investment goals, for treasury purposes, and/or in case of unfavourable market conditions), all as deemed by the Investment Manager to be consistent with the investment discipline. No more than 5% of the net asset value of the Fund will be invested in non-listed and non-traded collective investment schemes. The Fund will invest in China A Shares traded via Stock Connect (see also "Risks linked with dealing in securities in China via Stock Connect") with an expected maximum of 30% of the net asset value of the Fund.

The Fund may buy and sell exchange-traded and over-the-counter FDIs including swaps, futures, options, forwards and other UCITS-eligible FDIs, for investment purposes and for efficient portfolio management, including hedging against risk. Where the Fund uses total return swaps, the underlying consists of instruments in which the Fund may invest according to its investment objective and policy. While there are no restrictions on the Fund's ability to use derivatives for investment purposes (such as gaining exposure to a security), derivatives are mainly used to hedge (manage) risk.

The Fund is denominated in US Dollars.

The Sustainability Risks that are most frequently relevant to this Fund include:

Environmental
- a. Transition Risks from Climate Change
  - (i) Implied Temperature Risk (ITR)
  - (ii) Greenhouse gas emissions (WACI)

Social
- b. Internal Social Factors
  - (i) Child & Forced Labour
  - (ii) Human Rights
- c. External Social Factors
  - (i) Social Controversy

Governance
- d. Corporate management practices
  - (i) Inadequate external or internal audit

Investment Objective and Policy (continued)

Further details on the Sustainability Risks listed above and their potential impacts are included under Sustainability Risks within the section of the Prospectus entitled Risk Factors.

Pre-contractual disclosure information relating to the ESG characteristics, or objectives, of the Fund is provided at the Appendix 6 - Sustainable Finance Disclosure Regulation (SFDR) (unaudited) of these financial statements.

The global exposure for this Fund is calculated according to the commitment methodology. The global exposure generated through the use of financial derivative instruments is limited to 100% of net asset value of the Fund when calculated using the commitment methodology.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Global Property Income Fund launched on May 18, 2021. The table below details the performance of all funded share classes within the Fund.

Investment Objective and Policy

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns in excess of the MSCI All Country World Index (the "Index"), primarily investing in companies the Investment Manager believes are positioned to benefit from themes relating to the next generation of structural changes and economic development in global developed and emerging markets.

The Index serves as a reference benchmark for performance comparison purposes. Whilst Fund securities may be components of the Index, the Index is not considered during portfolio construction and the Investment Manager will not manage the extent to which Fund securities differ from the Index. The Index is designed to measure equity market performance of developed and emerging markets.

The Fund will primarily invest, directly or indirectly through the use of FDIs, in equity and other securities with equity characteristics. These may include, but are not limited to, common stocks, depository receipts (such as ADRs, GDRs and European depository receipts), market access products (including warrants on equities, options on equities and equity swaps), preferred stock, warrants, dividend-right certificates, shares of closed ended REITs, exchange-traded funds and other UCIs. The Fund may also hold securities issued pursuant to Rule 144A and/or Regulation S securities (Rule 144A and Regulation S securities are those offered without registration under the United States Securities Act of 1933 (as amended)).

The Fund may also invest in other securities, including, for example, exchange-traded funds qualifying as UCIs within the meaning of the 2010 Law and cash and cash equivalents (to achieve its investment goals, for treasury purposes, and/or in case of unfavourable market conditions), all as deemed by the Investment Manager to be consistent with the investment discipline. No more than 5% of the net asset value of the Fund will be invested in non-listed and non-traded collective investment schemes. Generally, less than 10% of the net asset value of the Fund will be held in cash and cash equivalents.

The Fund may buy and sell exchange-traded and over-the-counter FDIs including swaps, futures, options, forwards and other UCITS-eligible FDIs, for investment purposes and for efficient portfolio management, including hedging against risk. Where the Fund uses total return swaps, the underlying consists of instruments in which the Fund may invest according to its investment objective and policy. While there are no restrictions on the Fund's ability to use derivatives for investment purposes (such as gaining exposure to a security), derivatives are mainly used to hedge (manage) risk.

The Fund is denominated in US Dollars.

The Sustainability Risks that are most frequently relevant to the investment process of this Fund include:

Environmental
- a. Transition Risks from Climate Change
  - (i) Implied Temperature Risk (ITR)
  - (ii) Greenhouse gas emissions (WACI)
- b. Scarcity of Natural Resources & Biodiversity
- c. Pollution & waste

Social
- d. Internal Social Factors
  - (i) Child & Forced Labour
  - (ii) Human Rights
- e. External Social Factors
  - (i) Social Controversy

Governance
- f. Lack of diversity at board or governing body level
- g. Corporate management practices
  - (i) Inadequate external or internal audit
- h. The absence of appropriate and effective safeguards for employment related risks
  - (i) Workplace accident prevention policy

Investment Objective and Policy (continued)

Further details on the Sustainability Risks listed above and their potential impacts are included under Sustainability Risks within the section of the Prospectus entitled Risk Factors.

Pre-contractual disclosure information relating to the ESG characteristics, or objectives, of the Fund is provided at the Appendix 6 - Sustainable Finance Disclosure Regulation (SFDR) (unaudited) of these financial statements.

The global exposure for this Fund is calculated according to the commitment methodology. The global exposure generated through the use of financial derivative instruments is limited to 100% of the net asset value of the Fund when calculated using the commitment methodology.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Next Generation Global Equity Fund launched on July 16, 2021. The table below details the performance of all funded share classes within the Fund.

	Total Returns (%) Periods ended September 30, 2024

Investment Objective and Policy

The Fund is subject to the disclosure requirements of Article 9 of the SFDR.

The investment objective of the Fund is to seek long-term total returns in excess of the MSCI Europe Index (the "Index") by primarily investing in European companies whose management teams and boards display exemplary 'stewardship'. The Investment Manager defines 'stewardship' as how companies balance the interests of all stakeholders (e.g., customers, employees, communities, and the supply chain) in the pursuit of profits and how they incorporate material environmental, social and governance ("ESG") risks and opportunities in their corporate strategy. The Investment Manager will manage the Fund to target net zero carbon emissions by 2050 in alignment with the Paris Agreement by actively engaging with companies held in the Fund to commit to net zero science-based targets.

Although the Fund does not have a reduction in carbon emissions as its objective pursuant to Article 9(3) of SFDR, the Fund targets net zero emissions by 2050 in alignment with the Paris Agreement by investing in companies that have set carbon emission reduction targets or maintain lower carbon emissions relative to their industry average.

The Index serves as a reference benchmark for performance comparison.

The Fund will primarily invest either directly or indirectly through the use of FDIs, in equity and other securities with equity characteristics, comprising shares, preferred stock, depository receipts (such as ADRs, GDRs and European Depository Receipts), convertible securities, warrants, investments in real estate investment trusts and market access products (comprising warrants on equities, options on equities and equity swaps) for securities issued by developed and emerging market companies. The Fund may also hold securities issued pursuant to Rule 144A and/or Regulation S securities (Regulation S securities are those offered outside the United States without registration under the United States Securities Act of 1933 (as amended)).

The Fund may also invest in other securities, including, for example, exchange-traded funds qualifying as UCIs within the meaning of the 2010 Law and cash and cash equivalents (to achieve its investment goals, for treasury purposes, and/or in case of unfavourable market conditions), all as deemed by the Investment Manager to be consistent with the investment discipline. No more than 5% of the net asset value of the Fund will be invested in non-listed and non-traded collective investment schemes.

The Fund may buy and sell exchange-traded and over-the-counter FDIs including swaps, futures, options, forwards and other UCITS-eligible FDIs, for investment purposes and for efficient portfolio management, including hedging against risk. Where the Fund uses total return swaps, the underlying consists of instruments in which the Fund may invest according to its investment objective and policy. While there are no restrictions on the Fund's ability to use derivatives for investment purposes (such as gaining exposure to a security), derivatives are mainly used to hedge (manage) risk.

The Fund is denominated in Euros.

The Sustainability Risks that are most frequently relevant to the investment process of this Fund include:

Environmental
- a. Transition Risks from Climate Change
  - (i) Implied Temperature Risk (ITR)
  - (ii) Greenhouse gas emissions (WACI)
- b. Scarcity of Natural Resources & Biodiversity
- c. Pollution & waste

Social
- d. Internal Social Factors
  - (i) Child & Forced Labour
  - (ii) Human Rights
- e. External Social Factors
  - (i) Social Controversy

Investment Objective and Policy (continued)

Governance

f. Lack of diversity at board or governing body level
g. Corporate management practices
    (i) Inadequate external or internal audit
h. The absence of appropriate and effective safeguards for employment related risks
    (i) Workplace accident prevention policy

Further details on the Sustainability Risks listed above and their potential impacts are included under Sustainability Risks within the section of the Prospectus entitled Risk Factors.

Pre-contractual disclosure information relating to the ESG characteristics, or objectives, of the Fund is provided at the Appendix 6 - Sustainable Finance Disclosure Regulation (SFDR) (unaudited) of these financial statements.

The global exposure for this Fund is calculated according to the commitment methodology. The global exposure generated through the use of financial derivative instruments is limited to 100% of net asset value of the Fund when calculated using the commitment methodology.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington European Stewards Fund launched on September 15, 2021. The table below details the performance of all funded share classes within the Fund.

	Total Returns (%) Periods ended September 30, 2024

Investment Objective and Policy

The Fund was subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund was to seek absolute returns, primarily investing via long and short positions in companies globally, based on the Investment Manager's assessment of relative value opportunities between climate advantaged companies and climate disadvantaged companies.

The Fund was not constructed relative to a benchmark, but the ICE Bank of America 3-Month T-Bill Index (the "Benchmark") served as the cash benchmark and was used to calculate the performance fee as disclosed in the relevant performance fee section. The Index consisted of short-term U.S. Government securities with a remaining term to final maturity of less than three months.

The Fund primarily invested, directly or indirectly through the use of FDIs within the meaning of article 8 of the Grand Ducal regulation dated February 8, 2008, in equity and other securities with equity characteristics. These included, but were not limited to, shares, preferred stock, warrants, dividend-right certificates, shares of closed-ended REITs and depositary receipts, qualifying as transferable securities within the meaning of article 41(1) of the 2010 Law, exchange-traded funds and other UCIs. The Fund also invested in China A Shares traded via Stock Connect (see also "Risks linked with dealing in securities in China via Stock Connect") with an expected maximum of 30% of the net asset value of the Fund. Long and short positions could also be established in exchange traded funds qualifying as UCIs within the meaning of the 2010 Law, for both investment purposes and for efficient portfolio management including hedging against risk. The Fund held private placements, comprising those issued pursuant to Rule 144A and/or Regulation S securities (Rule 144A and Regulation S securities were those offered without registration under the United States Securities Act of 1933 (as amended)). No more than 5% of net asset value of the Fund was invested in non-listed and non-traded collective investment schemes.

The Fund bought and sold exchange-traded and over the counter derivative instruments for hedging and investment purposes, including swaps, futures, options, forwards and other UCITS-eligible derivatives. Where the Fund used total return swaps, the underlying will consist of instruments in which the Fund invested according to its investment objective and policy. Long positions were held through a combination of direct investment and/or derivative instruments and short positions were held through derivative positions. The use of derivatives forms an important part of the investment strategy and the Fund was expected to have significant exposures to cash and/or liquid fixed income securities for collateral purposes.

The Fund was denominated in US Dollars.

The evaluation of Sustainability Risks through the analysis of ESG factors was part of the Fund's investment process as, in the Investment Manager's view, Sustainability Factors can materially affect a company's financial performance and competitiveness.

The Investment Manager considered ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors, and the extent to which they were considered by the Investment Manager will vary depending on the security in question, but typically included ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks.

The Investment Manager believed that the Fund was exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager drew upon a wide variety of internal (such as research by their team of ESG analysts) and external (such as company meetings) research to assess any potential impact on the value of the security over the time horizon of the Fund. Whilst Sustainability Risks varied from company to company the following are particularly relevant to the Fund:

- Given the Investment Manager was seeking to take exposure to companies where climate mitigation or adaptation was material to the company's business, the Fund might at times have a material exposure to small and mid-cap companies. These companies presented governance considerations that required greater scrutiny and engagement with company management teams relative to large capitalisation companies.

Through interactions with company management teams, the Investment Manager sought a better understanding of any underlying Sustainability Risks, incorporating them into their assessments of a company's outlook, and looking to avoid investments in securities where the likelihood of a Sustainability Risk event was under-represented in the price of the security. The Investment Manager believed that active engagement with companies supported changes in corporate behaviour and actions that benefit the Fund and helped mitigate Sustainability Risks. The Investment Manager also consulted its ESG analysts for insight on how Sustainability Risks differed between companies within regional and sector peer groups.

* Fund ceased the activities on November 30, 2023.

Investment Objective and Policy (continued)

Further details on sustainability risks and their potential impacts are included under Sustainability Risks within the section of the Prospectus entitled Risk Factors.

Pre-contractual disclosure information relating to the ESG characteristics, or objectives, of the Fund is provided at the Appendix 6 - Sustainable Finance Disclosure Regulation (SFDR) (unaudited) of these financial statements.

An absolute VaR approach was applied to monitor and measure global exposure. The Fund's VaR was limited to 20% of the Fund's net asset value.

It is expected that the Fund generally incurred leverage at a rate of between 0% - 450% of net asset value through the use of FDIs although it was possible that under certain circumstances this level might be exceeded. Leverage was calculated as the sum of the notionals of the FDIs and did not include the underlying investments of the Fund which make up 100% of total net assets. Further information on leverage and its calculation can be found in the All Funds section entitled Leverage.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund invested in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Climate Market Neutral Fund (in liquidation) ceased the activities on November 30, 2023 and the final published net asset value per share was: $8.7466. The final published net asset values per share class for particular classes were: CD USD $9.0659, CN USD $9.0911, D USD $8.5427, E USD $8.7753, N USD $8.6719, S USD $8.6903, CD CHF (hedged) CHF10.0349, CN CHF (hedged) CHF10.1497, CD EUR (hedged) €9.6878, CN EUR (hedged) €9.7987, E EUR (hedged) €9.0702, S EUR (hedged) €9.0674, CN GBP (hedged) £11.5159, E GBP (hedged) £10.9575 and N GBP (hedged) £10.8357.

Investment Objective and Policy

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns in excess of the S&P BMI Emerging Markets Health Care Index (the "Index"), primarily investing in health care companies that are located in and/or conduct substantial business in emerging market countries, inclusive of frontier market countries (as defined by MSCI).

The Index serves as a reference benchmark for performance comparison purposes.

The Fund will primarily invest, directly or indirectly through the use of FDIs, in equity and other securities with equity characteristics. These may include, but are not limited to, common stocks, depository receipts (such as ADRs, GDRs European depository receipts), market access products (including warrants on equities, options on equities and equity swaps), preferred stock, warrants, dividend-right certificates, exchange-traded funds and other UCIs. The Fund may also invest in shares of closed ended REITs and the exposure of the Fund to REITs will not exceed 10% of the net asset value of the Fund. The Fund may also hold securities issued pursuant to Rule 144A and/or Regulation S securities (Rule 144A and Regulation S securities are those offered without registration under the United States Securities Act of 1933 (as amended)). The Fund will invest in China A Shares traded via Stock Connect (see also "Risks linked with dealing in securities in China via Stock Connect") with an expected maximum of 50% of the net asset value of the Fund.

The Fund may also invest in other securities, including, for example, exchange-traded funds qualifying as UCIs within the meaning of the 2010 Law and cash and cash equivalents (to achieve its investment goals, for treasury purposes, and/or in case of unfavourable market conditions), all as deemed by the Investment Manager to be consistent with the investment discipline. No more than 5% of the net asset value of the Fund will be invested in non-listed and non-traded collective investment schemes.

The Fund may buy and sell exchange-traded and over-the-counter FDIs including swaps, futures, options, forwards and other UCITS-eligible FDIs, for investment purposes and for efficient portfolio management, including hedging against risk. Where the Fund uses total return swaps, the underlying consists of instruments in which the Fund may invest according to its investment objective and policy. While there are no restrictions on the Fund's ability to use derivatives for investment purposes (such as gaining exposure to a security), derivatives are mainly used to hedge (manage) risk.

The Fund is denominated in US Dollars.

The Sustainability Risks that are most frequently relevant to this Fund include:

Environmental
- a. Transition Risks from Climate Change
  - (i) Implied Temperature Risk (ITR)
  - (ii) Greenhouse gas emissions (WACI)

Social
- b. External Social Factors
  - (i) Social Controversy

Governance
- c. Corporate management practices
  - (i) Inadequate external or internal audit

Further details on the Sustainability Risks listed above and their potential impacts are included under Sustainability Risks within the section of the Prospectus entitled Risk Factors.

Pre-contractual disclosure information relating to the ESG characteristics, or objectives, of the Fund is provided at the Appendix 6 - Sustainable Finance Disclosure Regulation (SFDR) (unaudited) of these financial statements.

The global exposure for this Fund is calculated according to the commitment methodology. The global exposure generated through the use of financial derivative instruments is limited to 100% of net asset value of the Fund when calculated using the commitment methodology.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Investment Objective and Policy

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns in excess of the MSCI All Country World Index (the "Index"), primarily investing in companies that enable the provision of education and vocational training services that the Investment Manager believes are positioned to benefit from the next generation of structural changes and sustainable economic development in global developed and emerging markets.

The Index serves as a reference benchmark for performance comparison purposes.

The Fund will primarily invest, directly or indirectly through the use of FDIs, in equity and other securities with equity characteristics. These may include, but are not limited to, common stocks, depository receipts (such as ADRs, GDRs and European depository receipts), market access products (including warrants on equities, options on equities and equity swaps), preferred stock, warrants, dividend-right certificates, exchange-traded funds and other UCIs. The Fund may also invest in shares of closed ended REITs and the exposure of the Fund to REITs will not exceed 20% of the net asset value of the Fund. The Fund may also hold securities issued pursuant to Rule 144A and/or Regulation S securities (Rule 144A and Regulation S securities are those offered without registration under the United States Securities Act of 1933 (as amended)).

The Fund may buy and sell exchange-traded and over-the-counter FDIs including swaps, futures, options, forwards and other UCITS-eligible FDIs, for investment purposes and for efficient portfolio management, including hedging against risk. Where the Fund uses total return swaps, the underlying consists of instruments in which the Fund may invest according to its investment objective and policy. While there are no restrictions on the Fund's ability to use derivatives for investment purposes (such as gaining exposure to a security), derivatives are mainly used to hedge (manage) risk.

The Fund is denominated in US Dollars.

The Sustainability Risks that are most frequently relevant to the investment process of this Fund include:

Environmental
- a. Transition Risks from Climate Change
  - (i) Implied Temperature Risk (ITR)
  - (ii) Greenhouse gas emissions (WACI)
- b. Scarcity of Natural Resources & Biodiversity
- c. Pollution & waste

Social
- d. Internal Social Factors
  - (i) Child & Forced Labour
  - (ii) Human Rights
- e. External Social Factors
  - (i) Social Controversy

Governance
- f. Lack of diversity at board or governing body level
- g. Corporate management practices
  - (i) Inadequate external or internal audit
- h. The absence of appropriate and effective safeguards for employment related risks
  - (i) Workplace accident prevention policy

Further details on the Sustainability Risks listed above and their potential impacts are included under Sustainability Risks within the section of the Prospectus entitled Risk Factors.

Pre-contractual disclosure information relating to the ESG characteristics, or objectives, of the Fund is provided at the Appendix 6 - Sustainable Finance Disclosure Regulation (SFDR) (unaudited) of these financial statements.

Investment Objective and Policy (continued)

The global exposure for this Fund is calculated according to the commitment methodology. The global exposure generated through the use of financial derivative instruments is limited to 100% of the net asset value of the Fund when calculated using the commitment methodology.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Investment Objective and Policy

The Fund is subject to the disclosure requirements of Article 9 of the SFDR.

The investment objective of the Fund is to seek long-term total returns in excess of the MSCI All Country World Index (the "Index"), primarily investing in companies that are driving measurable change that results in positive outcomes for social and environmental challenges.

The Investment Manager seeks to ensure that the Fund is well diversified with stock selection being the primary driver of active risk. Whilst the Fund will generally be diversified by country, currency, industry and issuer, it may hold positions that are concentrated in this manner from time to time. The Investment Manager may invest in both developed and emerging markets and the Fund's exposure to emerging markets shall not exceed 40% of the net asset value of the Fund.

The Index serves as a reference benchmark for performance comparison purposes.

The Fund will primarily invest, directly or indirectly through the use of FDIs, in equity and other securities with equity characteristics. These may include, but are not limited to, common stocks, depository receipts (such as ADRs, GDRs and European depository receipts), market access products (including warrants on equities, options on equities and equity swaps), preferred stock, warrants, dividend-right certificates, shares of closed ended REITs, exchange-traded funds and other UCIs. The Fund may also invest in shares of closed ended REITs and the exposure of the Fund to REITs will not exceed 10% of the net asset value of the Fund. The Fund may also hold securities issued pursuant to Rule 144A and/or Regulation S securities (Rule 144A and Regulation S securities are those offered without registration under the United States Securities Act of 1933 (as amended)).

The Fund may buy and sell exchange-traded and over-the-counter FDIs including swaps, futures, options, forwards and other UCITS-eligible FDIs, for investment purposes and for efficient portfolio management, including hedging against risk. Where the Fund uses total return swaps, the underlying consists of instruments in which the Fund may invest according to its investment objective and policy. While there are no restrictions on the Fund's ability to use derivatives for investment purposes (such as gaining exposure to a security), derivatives are mainly used to hedge (manage) risk.

The Fund is denominated in US Dollars.

The Sustainability Risks that are most frequently relevant to the investment process of this Fund include:

Environmental
- a. Transition Risks from Climate Change
  - (i) Implied Temperature Risk (ITR)
  - (ii) Greenhouse gas emissions (WACI)
- b. Scarcity of Natural Resources & Biodiversity
- c. Pollution & waste

Social
- d. Internal Social Factors
  - (i) Child & Forced Labour
  - (ii) Human Rights
- e. External Social Factors
  - (i) Social Controversy

Governance
- f. Lack of diversity at board or governing body level
- g. Corporate management practices
  - (i) Inadequate external or internal audit
- h. The absence of appropriate and effective safeguards for employment related risks
  - (i) Workplace accident prevention policy

Further details on the Sustainability Risks listed above and their potential impacts are included under Sustainability Risks within the section of the Prospectus entitled Risk Factors.

Investment Objective and Policy (continued)

Pre-contractual disclosure information relating to the ESG characteristics, or objectives, of the Fund is provided at the Appendix 6 - Sustainable Finance Disclosure Regulation (SFDR) (unaudited) of these financial statements.

The global exposure for this Fund is calculated according to the commitment methodology. The global exposure generated through the use of financial derivative instruments is limited to 100% of the net asset value of the Fund when calculated using the commitment methodology.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Sustainable Outcomes Fund launched on August 31, 2022. The table below details the performance of all funded share classes within the Fund.

Investment Objective and Policy

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns in excess of the MSCI All Country World Index (the "Index"), as well to provide income in excess of broader equity markets, by primarily investing in large capitalisation companies worldwide.

The Index serves as a reference benchmark for performance comparison purposes. In addition, the FTSE All World High Dividend Yield Index (the "Secondary Index") serves as a reference benchmark for additional market context purposes. Whilst Fund securities may be components of either the Index or Secondary Index (the "Indices"), the Indices are not considered during portfolio construction and the Investment Manager will not manage the extent to which Fund securities differ from the Indices. The Index is designed to measure equity market performance of developed and emerging markets, whilst the Secondary Index is designed to measure equity market performance of higher-than-average yielding companies across developed and emerging markets. The Indices do not take into account the environmental and social characteristics referenced above.

The Fund will primarily invest, directly or indirectly through the use of FDIs, in equity and other securities with equity characteristics. These may include, but are not limited to, common stocks, depository receipts (such as ADRs, GDRs and European depository receipts), market access products (including warrants on equities, options on equities and equity swaps), preferred stock, warrants, dividend-right certificates, shares of closed ended REITs, exchange-traded funds and other UCIs. The Fund may also invest in shares of closed ended REITs and the exposure of the Fund to REITs will not exceed 10% of the net asset value of the Fund. The Fund may also hold securities issued pursuant to Rule 144A and/or Regulation S securities (Rule 144A and Regulation S securities are those offered without registration under the United States Securities Act of 1933 (as amended)).

The Fund may also invest in other securities, including, for example, exchange-traded funds qualifying as UCIs within the meaning of the 2010 Law and cash and cash equivalents (to achieve its investment goals, for treasury purposes, and/or in case of unfavourable market conditions), all as deemed by the Investment Manager to be consistent with the investment discipline. No more than 5% of the net asset value of the Fund will be invested in non-listed and non-traded collective investment schemes.

The Fund may buy and sell exchange-traded and over the counter FDIs including swaps, futures, options, forwards and other UCITS-eligible FDIs, for investment purposes and for efficient portfolio management, including hedging against risk. Where the Fund uses total return swaps, the underlying consists of instruments in which the Fund may invest according to its investment objective and policy. While there are no restrictions on the Fund's ability to use derivatives for investment purposes (such as gaining exposure to a security), derivatives are mainly used to hedge (manage) risk.

The Fund is denominated in US Dollars.

The Sustainability Risks that are most frequently relevant to this Fund include:

Environmental
- a. Transition Risks from Climate Change
  - (i) Implied Temperature Risk (ITR)
  - (ii) Greenhouse gas emissions (WACI)

Social
- b. External Social Factors
  - (i) Social Controversy

Governance
- c. Corporate management practices
  - (i) Inadequate external or internal audit

Further details on the Sustainability Risks listed above and their potential impacts are included under Sustainability Risks within the section of the Prospectus entitled Risk Factors.

Pre-contractual disclosure information relating to the ESG characteristics, or objectives, of the Fund is provided at the Appendix 6 - Sustainable Finance Disclosure Regulation (SFDR) (unaudited) of these financial statements.

The global exposure for this Fund is calculated according to the commitment methodology. The global exposure generated through the use of financial derivative instruments is limited to 100% of net asset value of the Fund when calculated using the commitment methodology.

Investment Objective and Policy (continued)

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Global Equity Income Fund launched on November 16, 2022. The table below details the performance of all funded share classes within the Fund.

Investment Objective and Policy

The Fund was subject to the disclosure requirements of Article 9 of the SFDR.

The investment objective of the Fund was to seek long-term total returns in excess of the MSCI All Country World Index (the "Index"), primarily through investment in equity securities from the global stock universe deemed by the Investment Manager to be Sustainable Investments that had contribute to and/or benefit from the battle against climate change.

Although the Fund did not have a reduction in carbon emissions as its objective pursuant to Article 9(3) of SFDR, the Fund targeted net zero emissions by 2050 in alignment with the Paris Agreement by investing in companies that had set carbon emission reduction targets or maintain lower carbon emissions relative to their industry average.

In pursuit of the Fund's sustainable investment objective, the Investment Manager sought to invest at least 90% of the portfolio in companies that had a measurable exposure to climate-related activities and contributed to protecting the environment via products, services, capital or strategy that met at least one of the following climate stewardship criteria:

- Drive decarbonisation;
- Reduce total energy and resource demand by offering efficiencies;
- Climate change adaptation;
- Support the circular economy;
- Actively reducing their own carbon footprint along with that of their supply chain.

The Index served as a reference benchmark for performance comparison purposes.

The Fund primarily invested, directly or indirectly through the use of FDIs, in equity and other securities with equity characteristics. These included, but are not limited to, common stocks, depository receipts (such as ADRs, GDRs and European depository receipts), market access products (including warrants on equities, options on equities and equity swaps), preferred stock, warrants, dividend-right certificates, shares of closed ended REITs, exchange-traded funds and other UCIs. The exposure of the Fund to REITs did not exceed 10% of the net asset value of the Fund. The Fund held securities issued pursuant to Rule 144A and/or Regulation S securities (Rule 144A and Regulation S securities are those offered without registration under the United States Securities Act of 1933 (as amended)).

The Fund bought and sold exchange-traded and over-the-counter FDIs including swaps, futures, options, forwards and other UCITS-eligible FDIs, for investment purposes and for efficient portfolio management, including hedging against risk. Where the Fund used total return swaps, the underlying consists of instruments in which the Fund invested according to its investment objective and policy. While there were no restrictions on the Fund's ability to use derivatives for investment purposes (such as gaining exposure to a security), derivatives were mainly used to hedge (manage) risk.

The assessment of Sustainability Risks through the analysis of environmental, social and governance ("ESG") factors was an integral part of the Fund's investment process as, in the Investment Manager's view, Sustainability Risks could materially affect a company's financial performance and competitiveness.

The Investment Manager considered ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors and the extent to which they were considered by the Investment Manager will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history and climate risks. The Investment Manager found that companies that have strengths in these areas have more stable growth trajectories and have created competitive advantages by reducing material Sustainability Risks which may negatively impact their competitors.

Through interactions with company management teams, the Investment Manager sought a better understanding of these and any additional underlying Sustainability Risks, incorporated them into its assessments of a company's outlook, and looking to avoid investments in assets where the likelihood of a Sustainability Risk event was under-represented in the price of the asset. The Investment Manager believed that active engagement with companies supported changes in corporate behaviour and actions that benefit the Fund and helped mitigate Sustainability Risks. The Investment Manager also consulted its ESG analysts for insight on how Sustainability Risks differed between companies within regional and sector peer groups.

As the Fund was broadly diversified, it is not anticipated that any single Sustainability Risk drived a material negative financial impact on the value of the Fund. Further details on Sustainability Risks and their potential impacts are included under Sustainability Risks within the section of the Prospectus entitled Risk Factors.

* Fund ceased the activities on May 10, 2024.

Investment Objective and Policy (continued)

Pre-contractual disclosure information relating to the ESG characteristics, or objectives, of the Fund is provided at the Appendix 6 - Sustainable Finance Disclosure Regulation (SFDR) (unaudited) of these financial statements.

The global exposure for this Fund was calculated according to the commitment methodology. The global exposure generated through the use of financial derivative instruments is limited to 100% of the net asset value of the Fund when calculated using the commitment methodology.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund invested in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Global Climate and Environment Fund (in liquidation) ceased the activities on May 10, 2024 and the final published net asset value per share was: $10.8763. The final published net asset values per share class for particular classes were: D USD $10.7367, E USD $10.8933, N USD $10.8275, S USD $10.8504, S EUR €11.7520 and N GBP £13.3290.

* Fund ceased the activities on May 10, 2024.

Investment Objective and Policy

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns with a focus on regular income by primarily investing in companies domiciled in or that conduct significant business in the Asia ex Japan region.

The Fund will be actively managed, seeking to achieve its objective by allocating its assets across a broadly diversified portfolio of publicly traded equity instruments. The investment universe will primarily comprise companies domiciled in, or that conduct significant business in, markets across the Asia ex-Japan region. The Fund may also invest up to 20% in companies either domiciled in, or that conduct significant business in, the broader Asia Pacific ex-Japan region, which includes Australia and New Zealand.

The Fund seeks to provide investors with exposure to a diversified portfolio of high-quality companies that create value and distribute dividends to shareholders. The Investment Manager uses independent, bottom-up, fundamental research and financial analysis to identify companies with the most attractive characteristics. In pursuit of high-quality companies, the Investment Manager looks for those with a sustainable competitive advantage versus peers, a strong and sustainable management team, a strong governance track record and/or undervaluation versus regional or global peers and versus country-specific parameters.

The Investment Manager categorises dividend-paying companies that exist in the high-quality universe into three broad groups, allocating to each depending on perceived opportunity:

- **Dividend Compounders**: companies with business models that the Investment Manager believes can grow dividends and shareholder value sustainably over the long term, i.e. companies that grow with lower earnings volatility and have an established dividend policy.
- **Dividend Surprisers**: companies that the Investment Manager believes are growing at a faster rate than the market expects and are able to surprise on earnings and dividends upside, i.e. companies with high dividend growth and total return potential.
- **Dividend Leaders**: companies that may not be the fastest growing but have high dividend yields and potentially strong cash generators, i.e. higher-dividend yielding companies.

The Fund will aim to declare a distribution of between 3%-7% of the Fund's net asset value in USD on an annual basis, dependent on market conditions, however this is not guaranteed. Income will be declared and paid as described in the section of the Prospectus entitled Distribution Policy and, where there is insufficient income in a given month, may be distributed before the deduction of fees and expenses and/or include capital distributions, so in order to deliver a regular income the potential for capital growth may be reduced and capital may be eroded in the long term.

The Fund takes an unconstrained approach to investing in companies across the capitalisation spectrum in developed and emerging markets, with sector and country allocations an outcome of the stock selection process. The Fund's exposure to certain sectors and countries may be concentrated from time to time.

The Fund will invest in China A Shares traded via Stock Connect (see also "Risks linked with dealing in securities in China via Stock Connect") with an expected maximum of 25% of the net asset value of the Fund.

The Fund will primarily invest, directly or indirectly through the use of FDIs, in equity and other securities with equity characteristics. These may include, but are not limited to, common stocks, depository receipts (such as ADRs, GDRs and European depository receipts), market access products (including warrants on equities, options on equities and equity swaps), preferred stock, warrants, dividend-right certificates. The Fund may also invest in shares of closed ended REITs and the exposure of the Fund to REITs will not exceed 10% of the net asset value of the Fund. The Fund may also hold securities issued pursuant to Rule 144A and/or Regulation S securities (Rule 144A and Regulation S securities are those offered without registration under the United States Securities Act of 1933 (as amended)).

The Fund may buy and sell exchange-traded and over-the-counter FDIs including swaps, futures, options, forwards and other UCITS-eligible FDIs, for investment purposes and for efficient portfolio management, including hedging against risk. Where the Fund uses total return swaps, the underlying consists of instruments in which the Fund may invest according to its investment objective and policy. While there are no restrictions on the Fund's ability to use derivatives for investment purposes (such as gaining exposure to a security), derivatives are mainly used to hedge (manage) risk.

The Fund is denominated in US Dollars.

Investment Objective and Policy (continued)

The MSCI All Country Asia ex Japan Index ("the Index") may be considered during portfolio construction and is used for performance comparison purposes. Fund securities may be components of the Index but are not expected to have similar weightings. The Investment Manager uses broad tolerance ranges when considering how security weightings differ from the Index, however this should not be expected to limit the Fund's ability to achieve long-term total returns. The Index is designed to measure large- and mid-cap equity market performance across Asian markets (excluding Japan). This Index does not take into account the environmental and social characteristics disclosed in the Pre-contractual disclosure information related to this Fund.

The Sustainability Risks that are most frequently relevant to this Fund include:

Environmental
a. Transition Risks from Climate Change
(i) Implied Temperature Risk (ITR)
(ii) Greenhouse gas emissions (WACI)

Social
b. Internal Social Factors
(i) Child & Forced Labour
(ii) Human Rights
c. External Social Factors
(i) Social Controversy

Governance
d. Corporate management practices
(i) Inadequate external or internal audit

Further details on the Sustainability Risks listed above and their potential impacts are included under Sustainability Risks within the section of the Prospectus entitled Risk Factors.

Pre-contractual disclosure information relating to the ESG characteristics, or objectives, of the Fund is provided at the Appendix 6 - Sustainable Finance Disclosure Regulation (SFDR) (unaudited) of these financial statements.

The global exposure for this Fund is calculated according to the commitment methodology. The global exposure generated through the use of financial derivative instruments is limited to 100% of net asset value of the Fund when calculated using the commitment methodology.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Investment Objective and Policy

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns, in excess of the MSCI All Country World Index (the "Index"), primarily through investment in equity and equity-related securities of companies worldwide.

The Investment Manager will actively manage the Fund, using fundamental bottom-up analysis to identify resilient, less volatile, dividend-paying companies that the Investment Manager believes have been discounted for transitory reasons. The Investment Manager will focus on companies that they believe exhibit the following qualities:

- Resilience: companies with deep expertise and scale that supports enduring value for clients, and balance sheet flexibility to invest and sustain dividends
- Dividend commitment: as demonstrated by the company's historical and projected yield, a commitment to paying a sustainable dividend, payout ratio, and the broader context of capital allocation
- Attractive valuation: companies that have strong upside potential relative to downside risk based on multiple valuation metrics such as discounted cash flow and relative price ratios such as price/earnings and price/cash flow
- Lower volatility: companies which among their peers display less volatility in their share price (subject to equity instruments generally remaining a possibly volatile asset class)

The Fund is generally unconstrained by market capitalisation and sector but is expected to have a bias towards large-capitalisation companies. Name turnover is expected to be low. The Investment Manager may invest in both developed and emerging markets and the Fund's exposure to emerging markets shall not exceed 15% of the net asset value of the Fund.

The Index may be considered during portfolio construction and is used for performance comparison purposes. Fund securities may be components of the Index but are not expected to have similar weightings. The Investment Manager uses broad tolerance ranges when considering how security weightings differ from the Index, however this should not be expected to limit the Fund's ability to achieve long-term total returns in excess of the Index and/or performance that is materially different from the Index. The Index is designed to measure performance of the broader global equity market.

In addition, the MSCI All Country World Value Index (the "Secondary Index") serves as a reference index for additional market context purposes. Whilst Fund securities may be components of the Secondary Index, the Secondary Index is not considered during portfolio construction and the Investment Manager will not manage the extent to which Fund securities differ from the Secondary Index. The Secondary Index is designed to measure equity market performance of value-oriented companies across developed and emerging markets.

The Fund will invest in China A Shares traded via Stock Connect (see also "Risks linked with dealing in securities in China via Stock Connect") with an expected maximum of 5% of the net asset value of the Fund.

The Fund will primarily invest, directly or indirectly through the use of FDIs within the meaning of article 8 of the Grand Ducal regulation dated 8 February 2008, in equity and other securities with equity characteristics. These may include, but are not limited to, common stocks, depository receipts (such as ADRs, GDRs and European depository receipts), market access products (including warrants on equities, options on equities and equity swaps), preferred stock, warrants, dividend-right certificates, shares of closed ended REITs, exchange-traded funds and other UCIs, qualifying as transferable securities within the meaning of article 41(1) of the 2010 Law. The Fund may also invest in shares of closed ended REITs and the exposure of the Fund to REITs will not exceed 10% of the net asset value of the Fund.

The Fund may also invest in other securities, including, for example, exchange-traded funds qualifying as UCIs within the meaning of the 2010 Law and cash and cash equivalents (to achieve its investment goals, for treasury purposes, and/or in case of unfavourable market conditions), all as deemed by the Investment Manager to be consistent with the investment discipline. No more than 5% of the net asset value of the Fund will be invested in non-listed and non-traded collective investment schemes. Generally, less than 10% of the net asset value of the Fund will be held in cash and cash equivalents.

The Fund may buy and sell exchange-traded and over the counter FDIs including swaps, futures, options, forwards and other UCITS-eligible FDIs, for investment purposes and for efficient portfolio management, including hedging against risk. Where the Fund uses total return swaps, the underlying consists of instruments in which the Fund may invest according to its investment objective and policy. While there are no restrictions on the Fund's ability to use derivatives for investment purposes (such as gaining exposure to a security), derivatives are mainly used to hedge (manage) risk.

The Fund is denominated in US Dollars.

Investment Objective and Policy (continued)

The Sustainability Risks that are most frequently relevant to this Fund include:

Environmental
- a. Transition Risks from Climate Change
  - (i) Implied Temperature Risk (ITR)
  - (ii) Greenhouse gas emissions (WACI)

Social
- b. Internal Social Factors
  - (i) Child & Forced Labour
  - (ii) Human Rights
- c. External Social Factors
  - (i) Social Controversy

Governance
- d. Lack of diversity at board or governing body level
- e. Corporate management practices
  - (i) Inadequate external or internal audit

Further details on the Sustainability Risks listed above and their potential impacts are included under Sustainability Risks within the section of the Prospectus entitled Risk Factors.

Pre-contractual disclosure information relating to the ESG characteristics, or objectives, of the Fund is provided at the Appendix 6 - Sustainable Finance Disclosure Regulation (SFDR) (unaudited) of these financial statements.

The global exposure for this Fund is calculated according to the commitment methodology. The global exposure generated through the use of financial derivative instruments is limited to 100% of the net asset value of the Fund when calculated using the commitment methodology.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Global Quality Value Fund launched on November 8, 2023. The table below details the performance of all funded share classes within the Fund.

	Total Returns (%) Periods ended September 30, 2024

Investment Objective and Policy

The investment objective of the Fund is to deliver a regular income, with a secondary focus on capital growth by primarily investing either directly or indirectly in global assets including equities, sovereign, corporate and inflation linked bonds.

The Fund will also apply the Company's Exclusion Policy, further details of which can be found in the section of the Prospectus entitled Exclusions.

The Fund does not consider a benchmark during portfolio construction or for performance comparison purposes.

The Fund will primarily invest, directly or indirectly through the use of FDIs, in securities including but not limited to: equity and other securities with equity characteristics, common stock, preferred stock, investments in real estate investment trusts ("REITs"), convertible securities, warrants, depository receipts (such as ADRs, GDRs and European Depository Receipts) and market access products (comprising warrants on equities, options on equities and equity swaps); securities issued by corporate, governmental (including municipal and agency) and supranational entities located around the world; mortgage securities (including CMOs and CMBS); agency mortgage-backed securities; asset-backed securities; inflation-linked bonds; index linked bonds; credit-linked notes and structured notes; reverse repurchase agreements; preferred securities; real estate investment trust (the "REIT") debt; convertible bonds; fixed income exchange traded funds (the "ETFs"); and short term instruments including cash and cash equivalents (to achieve its investment goals, for treasury purposes, and/or in case of unfavourable market conditions). Further, the Fund may invest in non-US Dollar denominated debt, unsecured debt, and subordinated debt (including Contingent Convertible and Contingent Capital Securities ("CoCos") as defined in the Glossary, but any such exposures will not in aggregate exceed 5% of the net asset value of the Fund). The Fund may also hold private placements, including those issued pursuant to Rule 144A and/or Regulation S securities (Rule 144A and Regulation S securities are those offered without registration under the United States Securities Act of 1933 (as amended)), and other restricted securities which contain commitments to register to trade publicly within 12 months or the liquidity of which is deemed appropriate by the Investment Manager and consistent with the Fund's investment objective.

There will be no limitations on the credit quality of individual securities in the Fund and the Fund will invest in securities denominated in multiple currencies. As a result of investments in high yield or sub-investment grade bonds, the Fund's weighted average credit quality may be below investment grade.

Insofar as the Fund seeks to gain exposure to commodities, such exposure shall be achieved through investing in swaps, options and futures. These may reference UCITS eligible commodity assets comprising UCITS eligible exchange traded commodities or notes and UCITS eligible commodities indices. In addition, the Fund may invest in exchange-traded securities and both UCITS and AIF exchange traded funds which are listed and/or traded on the markets and exchanges.

The Fund may invest in commingled pool vehicles offered by Wellington Management and its affiliates, as deemed by the Investment Manager to be consistent with the investment objective. Such investments may accrue operating expenses internal to their net asset values, and such accruals are separate from and in addition to the operating expenses the Fund. To the extent the Fund invests in ETFs or other commingled vehicles managed by a third party, the Fund will bear the management fees, performance fees (if any) and operating expenses charged by the commingled vehicle(s).

The Fund may buy and sell exchange-traded and over-the-counter FDIs, across all asset classes, including interest rate, credit, index, and currency futures; currency, interest rate, total rate of return, and credit default swaps; currency, bond, and swap options; deliverable and non-deliverable currency forward contracts; warrants; "to-be announced" ("TBA") securities qualifying as Transferable Securities in compliance with Luxembourg law; and other derivative instruments, and may hold outright short positions via derivative instruments for hedging purposes and otherwise in pursuit of the Fund's investment objective and policy.

Currency exposure, from the use of forward currency exchange contracts in multiple currencies, is actively managed within the Fund and may include cross-currency positions which may or may not be influenced by the Fund's positions.

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities.

The Fund does not consider the adverse impacts of its investment decisions on sustainability factors.

The Fund is denominated in US Dollars.

Investment Objective and Policy (continued)

The Sustainability Risks that are most frequently relevant to this Fund include:

Environmental
a. Transition Risks from Climate Change
(i) Implied Temperature Risk (ITR)
(ii) Greenhouse gas emissions (WACI)

Social
b. External Social Factors
(i) Social Controversy

Further details on the Sustainability Risks listed above and their potential impacts are included under Sustainability Risks within the section of the Prospectus entitled Risk Factors.

An absolute VaR approach is applied to monitor and measure the global exposure. The Fund's VaR is limited 20% of the Fund's net asset value.

It is expected that the Fund will generally incur leverage at a rate of between 0% - 450% of net asset value through the use of FDIs although it is possible that under certain circumstances this level might be exceeded.

Leverage is calculated as the sum of the notionals of the FDIs and does not include the underlying investments of the Fund which make up 100% of total net assets. Further information on leverage and its calculation can be found in the All Funds section entitled Leverage.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Multi-Asset High Income Fund launched on February 1, 2022, as a result of a cross-border merger of Wellington Dynamic Diversified Income Fund, a sub-fund of Wellington Management Funds (Ireland) plc, resulting in all the net assets of the merging Fund being transferred to the Fund. The merger exchange ratio applied was 1:1 to all of the share classes involved. The table below details the performance of all funded share classes within the Fund.

The Fund is a Non-benchmark relative strategy.
Returns are net of fees and expenses.
Returns for periods of greater than one year are annualised.
All classes are accumulating and unhedged unless otherwise noted.
The figures stated in this report are historical and not necessarily indicative of future performance.
* The 3 months, 6 months and since inception total returns are unaudited.
** The Fund was launched as the result of the merger. The performance since inception represents the performance data from the inception of the share classes of the merging Fund.

Investment Objective and Policy

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns, with a secondary focus on regular income by primarily investing either directly or indirectly, in assets across a broadly diversified portfolio of credit instruments issued globally.

The Fund will aim to declare a distribution of between 4%-6% of the Fund's net asset value in USD on an annual basis, dependent on market conditions, however this is not guaranteed. Income will be declared and paid as described in the section of the Prospectus entitled Distribution Policy and, where there is insufficient income in a given month, may be distributed before the deduction of fees and expenses and/or include capital distributions, so in order to deliver a regular income the potential for capital growth may be reduced and capital may be eroded in the long term.

The Fund will invest primarily in higher yielding sectors of the credit market, such as emerging market debt, high yield debt, but may also invest in other debt obligations deemed to be consistent with the investment objectives of the Fund. The securities the Fund may invest in include, but are not limited to, securities issued by corporate, governmental (including municipal and agency) and supranational entities located around the world; mortgage securities (including CMOs and CMBS); agency mortgage-backed securities; asset-backed securities; inflation-linked bonds; credit-linked notes and structured notes; repurchase and reverse repurchase agreements; preferred securities; real estate investment trust (the "REIT") debt; convertible bonds; fixed income exchange traded funds (the "ETFs"); and short term instruments including cash and cash equivalents (to achieve its investment goals, for treasury purposes, and/or in case of unfavourable market conditions). Further, the Fund may invest in non-US Dollar denominated debt, unsecured debt, and subordinated debt (including Contingent Convertible and Contingent Capital Securities ("CoCos") as defined in the Glossary, but any such exposures will not in aggregate exceed 15% of the net asset value of the Fund).

The Fund may purchase or receive equity or equity-related securities in connection with a restructuring or workout of a prior or existing fixed income investment. These include common stock, inclusive of public and private equity, preferred stock or securities that may be converted into or exchanged for common stock, known as convertible securities, like rights and warrants. The Fund may also hold private placements, including those issued pursuant to Rule 144A and/or Regulation S securities (Rule 144A and Regulation S securities are those offered without registration under the United States Securities Act of 1933 (as amended)), and other restricted securities which contain commitments to register to trade publicly within 12 months or the liquidity of which is deemed appropriate by the Investment Manager and consistent with the Fund's investment objective.

The Fund may also invest in other securities, including, for example, exchange-traded funds qualifying as UCIs within the meaning of the 2010 Law, all as deemed by the Investment Manager to be consistent with the investment discipline. No more than 5% of the net asset value of the Fund will be invested in non-listed and non-traded collective investment schemes. The Fund may invest up to 10% of net assets in securities traded in China via Bond Connect (see also "Risks linked with dealing in securities in China via Bond Connect").

The Fund may buy and sell exchange-traded and over-the-counter financial derivative instruments ("FDIs"), including interest rate, credit, index, and currency futures; currency, interest rate, total rate of return, and credit default swaps; currency, bond, and swap options; deliverable and non-deliverable currency forward contracts; warrants; "to-be announced" ("TBA") securities qualifying as Transferable Securities in compliance with Luxembourg law; and other derivative instruments, and may hold outright short positions via derivative instruments for hedging purposes and otherwise in pursuit of the Fund's investment objective and policy.

The Fund is denominated in US Dollars.

The Sustainability Risks that are most frequently relevant to the investment process of this Fund include:

Environmental
- a. Transition Risks from Climate Change
  - (i) Implied Temperature Risk (ITR)
  - (ii) Greenhouse gas emissions (WACI)
- b. Scarcity of Natural Resources & Biodiversity
- c. Pollution & waste

Social
- d. Internal Social Factors
  - (i) Child & Forced Labour

Investment Objective and Policy (continued)

(ii) Human Rights
e. External Social Factors
(i) Social Controversy

Governance
f. Lack of diversity at board or governing body level
g. Corporate management practices
(i) Inadequate external or internal audit
h. The absence of appropriate and effective safeguards for employment related risks
(i) Workplace accident prevention policy

Further details on the Sustainability Risks listed above and their potential impacts are included under Sustainability Risks within the section of the Prospectus entitled Risk Factors.

Pre-contractual disclosure information relating to the ESG characteristics, or objectives, of the Fund is provided at the Appendix 6 - Sustainable Finance Disclosure Regulation (SFDR) (unaudited) of these financial statements.

The global exposure for this Fund, general through the use of FDIs, is calculated and monitored using the commitment method with an exposure limit of 100% for the Fund's net asset value.

The Fund may borrow at any time for the account of the Fund and may charge the assets of the Fund as security for any such borrowing, provided that such borrowing is only for temporary purposes such as securities settlement or meeting a redemption, and not for leverage and subject to the borrowing limit below.

Without prejudice to the powers of the Fund to invest in Transferable Securities, the Fund may not lend to, or act as guarantor on behalf of, third parties. The Fund may acquire debt securities and securities which are not fully paid.

The borrowing limit is 10% of the Fund's net asset value.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Credit Income Fund launched on March 31, 2021. The table below details the performance of all funded share classes within the Fund.

Investment Objective and Policy

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns in excess of the Bloomberg Euro Aggregate Corporate Index (the "Index"), by investing primarily in a diversified portfolio of Euro-denominated corporate debt securities whilst integrating Environmental, Social and Governance ("ESG") characteristics into the investment framework.

Subject to the Fund's ESG framework, the Fund will invest primarily in Euro-denominated debt securities of issuers domiciled around the world including securities issued by commercial, governmental or supranational entities. The fund may invest in securitised debt securities which may include residential and commercial mortgage-backed securities, asset-backed securities and covered bonds. The Fund's Net Credit Exposure to securitised debt instruments will not represent more than 20% of its net asset value at the time of purchase. The fund may also invest in corporate and real estate investment trust (REIT) debt, credit-linked, index-linked, capital securities (securities that combine the features of bonds and preferred stocks), preferred stock, warrants, hybrid securities comprising convertible securities as more fully described in the section of the Prospectus entitled Types and Description of FDIs; subordinated debt. The Fund may also invest in contingent convertible and contingent capital securities ("CoCos") as defined in the Glossary, but any such exposures will not exceed 10% of the net asset value of the Fund. Further, the fund may invest in other types of debt securities, both fixed and floating-rate, including forward contracts on such securities, and hold equity securities where they are a result of a corporate action, conversion or exercising a warrant. The Fund may hold private placements, comprising those issued pursuant to Rule 144A and/or Regulation S securities (Regulation S securities are those offered outside the United States without registration under the United States Securities Act of 1933 (as amended)) and Transferable Securities, such as loan participation securities that qualify as an eligible investment by the Fund, that reference bank loans or trade finance loans.

The Index may be considered during portfolio construction and is used for performance comparison and baseline WACI purposes. Fund securities may be components of the Index but are not expected to have similar weightings.

The Fund is denominated in Euro and the majority of debt securities held will be denominated in Euro with any non-Euro exposures in the Fund generally hedged back to Euro. The Fund generally will be diversified by country, sector and issuer, but may hold positions that are concentrated from time to time. The Fund's investments will represent a broad credit spectrum, including issues rated below investment grade.

The Fund may buy and sell exchange-traded and over-the-counter derivative instruments, including interest rate, index (including credit index) and currency futures, currency, interest rate, total return swaps, and credit default swaps, currency, bond, and swap options, deliverable and non-deliverable currency forward contracts and "to-be-announced" securities to gain both long and short exposure to the instruments listed above in pursuit of the investment objective and for efficient portfolio management, including hedging against risk. Full details of the types of FDIs and the ways in which the Fund may utilise them are further detailed in the section of the Prospectus entitled Types and Description of FDIs.

The Fund may also invest in collective investment schemes as described in the section of the Prospectus entitled Investment in Other Investment Funds.

The Sustainability Risks that are most frequently relevant to this Fund include:

Environmental
- a. Transition Risks from Climate Change
  - (i) Implied Temperature Risk (ITR)
  - (ii) Greenhouse gas emissions (WACI)

Social
- b. Internal Social Factors
  - (i) Child & Forced Labour
  - (ii) Human Rights
- c. External Social Factors
  - (i) Social Controversy

Governance
- d. Corporate management practices
  - (i) Inadequate external or internal audit

Investment Objective and Policy (continued)

Further details on the Sustainability Risks listed above and their potential impacts are included under Sustainability Risks within the section of the Prospectus entitled Risk Factors.

Pre-contractual disclosure information relating to the ESG characteristics, or objectives, of the Fund is provided at the Appendix 6 - Sustainable Finance Disclosure Regulation (SFDR) (unaudited) of these financial statements.

The Investment Manager uses a risk management technique known as relative VaR to assess the Fund's market risk to seek to ensure that its use of FDIs is within regulatory limits and may not exceed twice the VaR of the Index. Further information on the risk management method can be found in the section of the Prospectus entitled Financial Derivative Instruments (FDIs).

It is expected that the Fund will generally incur leverage at a rate of between 0% and 500% of its Net Asset Value through the use of FDIs. Although it is possible that under certain circumstances the level might be exceeded.

Leverage is calculated as the sum of the notionals of the FDIs and does not include the underlying investments of the Fund which make up 100% of total net assets. Further information on leverage and its calculation can be found in the All Funds section entitled Leverage.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Euro Credit ESG Fund launched on August 10, 2022. The table below details the performance of all funded share classes within the Fund.

	Total Returns (%) Periods ended September 30, 2024				
	3 Mths[*]	*6 Mths*[*]	*1 Year*	*Since Inception*[*]	*Inception Date*

Investment Objective and Policy

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns, with a secondary focus on regular income. This is achieved by investing primarily directly or indirectly, in a diversified portfolio of Asian domiciled, US Dollar denominated credit instruments.

The Fund will be actively managed, seeking to take advantage of opportunities across a universe of primarily US Dollar denominated Asia ex-Japan credit instruments, whilst also aiming to deliver a consistent level of income. The Investment Manager combines comprehensive top-down country analysis with detailed bottom-up company research to identify the best investment opportunities.

The Fund will aim to declare a distribution of between 4%-7% of the Fund's net asset value in USD on an annual basis, dependent on market conditions, however this is not guaranteed. Income will be declared and paid as described in the section of the Prospectus entitled Distribution Policy and, in order to deliver a regular income the potential for capital growth may be reduced and capital may be eroded in the long term.

Subject to the Fund's ESG framework, the Fund may invest in, but is not limited to, securities issued by corporate, sovereigns, quasi-sovereigns (including municipal and agency) and supranational entities located primarily in the Asia ex-Japan region and denominated in US Dollars. The Fund may also invest up to 30% of its net asset value in local currency Asia-ex Japan debt instruments, currencies and derivatives however a maximum of 20% of the Fund's net asset value may be unhedged to the Fund's base currency. The Fund may invest in securitised debt securities which may include residential and commercial mortgage-backed securities (including CMOs and CMBS), agency mortgage-backed securities and asset-backed securities. The Fund's Net Credit Exposure to securitised debt instruments will not represent more than 20% of its net asset value at the time of purchase. The Fund may also invest in inflation-linked bonds; credit-linked notes and structured notes; repurchase and reverse repurchase agreements; preferred securities; real estate investment trust (the "REIT") debt; convertible bonds; covered bonds, fixed income exchange traded funds (the "ETFs"); and short term instruments including cash and cash equivalents (to achieve its investment goals, for treasury purposes, and/or in case of unfavourable market conditions). Further, the Fund may invest in unsecured debt, and subordinated debt (including Contingent Convertible and Contingent Capital Securities ("CoCos") as defined in the Glossary, but any such exposures will not in aggregate exceed 15% of the net asset value of the Fund.

The Fund may purchase or receive equity or equity-related securities in connection with a restructuring or workout of a prior or existing fixed income investment. These include common stock, inclusive of public and private equity, preferred stock or securities that may be converted into or exchanged for common stock, known as convertible securities, like rights and warrants.

The Fund may also hold private placements, including those issued pursuant to Rule 144A and/or Regulation S securities (Rule 144A and Regulation S securities are those offered without registration under the United States Securities Act of 1933 (as amended)), and other restricted securities which contain commitments to register to trade publicly within 12 months or the liquidity of which is deemed appropriate by the Investment Manager and consistent with the Fund's investment objective.

The Fund may also invest in other securities, including, for example, exchange-traded funds qualifying as UCIs within the meaning of the 2010 Law as deemed by the Investment Manager to be consistent with the investment discipline. No more than 5% of the net asset value of the Fund will be invested in non-listed and non-traded collective investment schemes. The Fund may invest up to 30% of its net asset value in securities traded in China via Bond Connect (see also "Risks linked with dealing in securities in China via Bond Connect").

The Fund may invest in UCITS vehicles offered by Wellington Management and its affiliates, as deemed by the Investment Manager to be consistent with the investment objective. Such investments may accrue operating expenses internal to their net asset value, and such accruals are separate from and in addition to the operating expenses the Fund. To the extent the Fund invests in ETFs or other UCITS vehicles managed by a third party, the Fund will bear the management fees, performance fees (if any) and operating expenses charged by the UCITS vehicle(s).

The Fund may buy and sell exchange-traded and over-the-counter financial derivative instruments ("FDIs"), including interest rate, credit, index, and currency futures; currency, interest rate, total rate of return, and credit default swaps; currency, bond, and swap options; deliverable and non-deliverable currency forward contracts; warrants; "to-be announced" ("TBA") securities qualifying as Transferable Securities in compliance with Luxembourg law; and other derivative instruments, and may hold outright short positions via derivative instruments for hedging purposes and otherwise in pursuit of the Fund's investment objective and policy.

The Fund is denominated in US Dollars.

Investment Objective and Policy (continued)

The Sustainability Risks that are most frequently relevant to this Fund include:

Environmental
- a. Transition Risks from Climate Change
  - (i) Implied Temperature Risk (ITR)
  - (ii) Greenhouse gas emissions (WACI)

Social
- b. Internal Social Factors
  - (i) Child & Forced Labour
  - (ii) Human Rights
- c. External Social Factors
  - (i) Social Controversy

Governance
- d. Corporate management practices
  - (i) Inadequate external or internal audit

Further details on the Sustainability Risks listed above and their potential impacts are included under Sustainability Risks within the section of the Prospectus entitled Risk Factors.

Pre-contractual disclosure information relating to the ESG characteristics, or objectives, of the Fund is provided at the Appendix 6 - Sustainable Finance Disclosure Regulation (SFDR) (unaudited) of these financial statements.

An absolute VaR approach is applied to monitor and measure global exposure. The Fund's VaR is limited to 20% of the Fund's net asset value.

It is expected that the Fund will generally incur leverage at a rate of between 0% - 200% of net asset value through the use of FDIs although it is possible that under certain circumstances this level might be exceeded. Leverage is calculated as the sum of the notionals of the FDIs and does not include the underlying investments of the Fund which make up 100% of total net assets. Further information on leverage and its calculation can be found in the All Funds section entitled Leverage.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Asia Credit Income Fund launched on March 15, 2023. The table below details the performance of all funded share classes within the Fund.

	Total Returns (%) Periods ended September 30, 2024				
	*3 Mths**	*6 Mths**	*1 Year*	*Since Inception**	*Inception Date*
Class A USD	5.54%	5.81%	13.03%	7.54%	March 15, 2023
Class A USD M4 (distributing)	5.54%	5.82%	13.03%	7.54%	March 15, 2023
Class D USD M4 (distributing)	5.60%	5.92%	13.26%	7.75%	March 15, 2023

Investment Objective and Policy

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns by investing primarily in a global portfolio of US Dollar-denominated treasury, corporate, high yield and emerging market fixed income instruments.

The Fund will be actively managed, seeking to maximise risk-adjusted total returns by allocating its assets dynamically across its investment universe. The amount of the portfolio invested in each sector will fluctuate according to the Investment Manager's highest conviction at a particular time.

In order to meet the Fund's objective, the Investment Manager will look to identify issuers that they believe have strong credit fundamentals within a disciplined valuation framework. The investment approach combines top-down risk allocation and bottom-up bond selection. A top-down risk assessment is conducted via a series of systematic screens to identify market segments and asset classes that present potentially attractive return opportunities. Individual bonds are then selected following a process that considers attributes such as current dollar price and callability, to identify those which have price upside potential. In market environments characterised by high volatility and a limited opportunity set, the Fund can allocate meaningfully (up to 100% of the Fund's NAV) to cash and cash equivalents including Treasury Bills (TBills), reverse repurchase agreements and US agency bonds, provided that cash and deposits at sight will not exceed 20% of the Fund's NAV.

The Fund is denominated in US Dollars.

The weighted average credit quality of the Fund will typically be investment grade i.e. at or above Baa3 by Moody's, BBB- by Standard & Poor's, or BBB- by Fitch. In the event of split ratings on a security, the Investment Manager will use the highest rating of Moody's, Standard & Poor's or Fitch. However, the Fund's average credit quality may be below investment grade from time to time as a result of credit downgrades, rating removal, default or in certain market conditions that the Investment Manager deems appropriate.

The Fund may hold a maximum of 50% in non-investment grade securities at time of purchase and will not invest more than 10% of its NAV in securities issued by or guaranteed by any single country with a credit rating below investment grade, nor more than 10% of its NAV in distressed securities. The Fund may invest in unrated debt securities up to a maximum of 10% of the NAV of the Fund. If a security is unrated, then an equivalent credit rating, as deemed by the Investment Manager, may be used. Investments in unrated debt securities are included in the credit quality calculation of the Fund.

In case the holding of below investment grade securities exceeds 50% of the NAV of the Fund, or the weighted average credit quality is below investment grade, the Investment Manager's intention is to sell the excess portion of below investment grade debt securities or purchase additional investment grade debt securities as soon as reasonably possible, under normal market circumstances and in the best interest of Shareholders.

The average portfolio duration of the Fund will generally range between 3-6 years.

The securities the Fund may invest in include, but are not limited to, securities issued by corporate, governmental (including municipal and agency) and supranational entities located around the world; mortgage securities (including CMOs and CMBS); agency mortgage-backed securities; asset-backed securities; inflation-linked bonds; credit-linked notes and structured notes; repurchase and reverse repurchase agreements; preferred securities; real estate investment trust (the "REIT") debt; convertible bonds; fixed income exchange traded funds (the "ETFs"); and short term instruments including cash and cash equivalents (to achieve its investment goals, for treasury purposes, and/or in case of unfavourable market conditions). The Fund's Net Credit Exposure to securitised debt instruments will not represent more than 20% of its NAV at the time of purchase. Should the Fund's Net Credit Exposure to securitised debt instruments exceed 20% of its NAV as a result of market movements the Investment Manager may, in its absolute discretion, either reduce such exposure or keep the exposure in excess of the 20% limit. Further, the Fund may invest in unsecured debt and subordinated debt including Contingent Convertible and Contingent Capital Securities ("CoCos") as defined in the Glossary, though any exposure to CoCos will not in aggregate exceed 10% of the NAV of the Fund. Aside from as set forth herein, equities and warrants will not be purchased directly, and the Fund will only hold these securities if received as part of a restructuring or as the result of a conversion of a hybrid security. The Fund may also hold private placements, including those issued pursuant to Rule 144A and/or Regulation S securities (Rule 144A and Regulation S securities are those offered without registration under the United States Securities Act of 1933 (as amended)), and other restricted securities which contain commitments to register to trade publicly within 12 months or the liquidity of which is deemed appropriate by the Investment Manager and consistent with the Fund's investment objective.

Investment Objective and Policy (continued)

The Fund may also invest in other securities, including, for example, exchange-traded funds qualifying as UCIs within the meaning of the 41(1) of the 2010 Law, all as deemed by the Investment Manager to be consistent with the investment discipline. No more than 5% of the NAV of the Fund will be invested in nonlisted and non-traded collective investment schemes.

The Fund may invest in commingled pool vehicles offered by Wellington Management and its affiliates, as deemed by the Investment Manager to be consistent with the investment objective. Such investments may accrue operating expenses internal to their NAV, and such accruals are separate from and in addition to the operating expenses the Fund. To the extent the Fund invests in ETFs or other commingled vehicles managed by a third party, the Fund will bear the management fees, performance fees (if any) and operating expenses charged by the commingled vehicle(s).

The Fund may buy and sell exchange-traded and over-the-counter FDIs including swaps, futures, options, forwards and other UCITS-eligible FDIs, for investment purposes and for efficient portfolio management, including hedging against risk. Where the Fund uses total return swaps, the underlying consists of instruments in which the Fund may invest according to its investment objective and policy. While there are no restrictions on the Fund's ability to use derivatives for investment purposes (such as gaining exposure to a security), derivatives are mainly used to hedge (manage) risk.All of the securities the Fund may invest in qualify as transferable securities within the meaning of the 2010 Law.

The Sustainability Risks that are most frequently relevant to this Fund include:

Environmental
- a. Transition Risks from Climate Change
  - (i) Implied Temperature Risk (ITR)
  - (ii) Greenhouse gas emissions (WACI)

Social
- b. Internal Social Factors
  - (i) Child & Forced Labour
  - (ii) Human Rights
- c. External Social Factors
  - (i) Social Controversy

Governance
- d. Corporate management practices
  - (i) Inadequate external or internal audit

Further details on the Sustainability Risks listed above and their potential impacts are included under Sustainability Risks within the section of the Prospectus entitled Risk Factors.

Pre-contractual disclosure information relating to the ESG characteristics, or objectives, of the Fund is provided at the Appendix 6 - Sustainable Finance Disclosure Regulation (SFDR) (unaudited) of these financial statements.

The global exposure for this Fund is calculated according to the commitment methodology. The global exposure generated through the use of financial derivative instruments is limited to 100% of the net asset value of the Fund when calculated using the commitment methodology.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Credit Total Return Fund launched on January 31, 2024. The table below details the performance of all funded share classes within the Fund.

1. Significant events during the financial year

(a) With effect from October 16, 2023, the following changes were implemented to the Prospectus:

- Updates to the ESG Ratings Framework section in the Investment Objectives and Policies in order to clarify the rating methodology of the ESG Ratings Framework so that it is aligned with the Investment Manager's ESG research process and capabilities;
- Addition of a new Taiwan Dollar Repatriation Risk section in the LIBOR Transition and Associated Risk chapter;
- Updates to the Anti-Money Laundering sub-section;
- Updates to the Taxation chapter to include additional tax related disclosures on Anti-Tax Avoidance Directive ("ATAD") 1 and 2 and EU Mandatory Disclosure Regime;
- Updates to the Business Day and Dealing Day/Non-Dealing Day definitions of Wellington Emerging Markets Research Equity Core Fund, Wellington Next Generation Global Equity Fund, Wellington European Stewards Fund, Wellington Emerging Markets Health Care Equity Fund, Wellington Next Generation Education Fund, Wellington Asia Quality Income Fund, Wellington Euro Credit ESG Fund and Wellington Asia Credit Income Fund. As such, the closure of exchanges and banks in certain countries, such as Hong Kong, Singapore and England will be removed, where relevant, from the definition of Business Day, while the definition of Dealing Day/Non-Dealing Day will be amended to reflect these closures;
- Updates to the Pre-Contractual Disclosures ("PCDs") of the Funds subject to the disclosure requirements of Article 8 and Article 9 of the SFDR.

(b) With effect from November 16, 2023, the following changes were implemented to the Prospectus:

- Updates to the Settlement Date for payments of Shares and payments of redemptions of the Share Class A, from two Business Days to three Business Days following the relevant Dealing Day, for Wellington US Brand Power Fund, Wellington US Quality Growth Fund, Wellington Sustainable Outcomes Fund, Wellington Multi-Asset High Income Fund and Wellington Credit Income Fund;
- Updates to the German Taxation section of Wellington Climate Market Neutral Fund (in liquidation) to reflect its reclassification from a German taxation point of view, from "mixed" to "equity";
- Updates to the Investment Policies of Wellington Asia Credit Income Fund;
- Updates to the Investment Objective section of Wellington Global Climate and Environment Fund (in liquidation).

(c) With effect from April 12, 2024, the following changes were implemented to the Prospectus:

- Changes to reflect that the Board of Directors may compulsorily redeem a Shareholder's entire holding in a given share class if the Shareholder no longer meets the qualifying criteria of the share class in question;
- Changes to reflect that the Board of Directors may compulsorily convert holdings of Shareholders from one share class to another share class, within the Company in certain conditions;
- Changes to reflect that the Board of Directors may reject in its discretion and compulsorily redeem shares held by Shareholders whose share ownership the Board of Directors believes is not in the best interest of the Company;
- Changes to clarify that the calculation of the NAV of the shares may be suspended in force majeure events and cyber-attacks in addition to the other outlined circumstances. The Fund will bear any costs resulting from the suspension;
- Following the introduction of the Share Class A in 2021, the regions in scope of this share class has been expanded to include Latin America as well;
- The definition of an Institutional Investor has been updated to provide greater clarification regarding the categories of entities that can qualify as Institutional Investors;
- The definition of Valuation Point has been amended to clarify the point in time when the Fund's investments are valued;
- The Sustainability Risk disclosures have been updated to more accurately describe the approach taken by the Investment Manager when assessing Sustainability Risk, as well as providing an updated list of sustainability risks being actively managed by the Investment Manager;
- The Wellington US Quality Growth Fund will now offer E share classes;
- The methodology to calculate the market exposure for the Wellington Asia Credit Income Fund and Wellington Credit Income Fund has changed from the Absolute VaR approach to the Commitment method;
- The Dealing Deadline for the Funds has changed from one day prior to the relevant Dealing Day to the Dealing Day. For Wellington Next Generation Global Equity Fund and Wellington Asia Quality Income Fund, the settlement date for payment of shares and payment of redemption proceeds of the Fund will change from two Business Days following the relevant Dealing Day (T+2) to three Business Days following the relevant Dealing Day (T+3). For Wellington Global Property Income Fund and Wellington Next Generation Education Fund, the settlement date for payment of shares and payment of redemption proceeds of the Share Class A will change from two Business Days following the relevant Dealing Day (T+2) to three Business Days following the relevant Dealing Day (T+3);
- The investment policies of Wellington Credit Income Fund and Wellington Asia Credit Income Fund have been updated to further clarify that the Funds may purchase or receive equity or equity-related securities in connection with a restructuring or workout of a prior or existing fixed income investment;

1. Significant events during the financial year (continued)

(c) With effect from April 12, 2024, the following changes were implemented to the Prospectus: (continued)

- For the Wellington Emerging Markets Research Equity Core Fund, Wellington Next Generation Global Equity Fund, Wellington European Stewards Fund, Wellington Emerging Markets Health Care Equity Fund, Wellington Next Generation Education Fund, Wellington Global Climate and Environment Fund (in liquidation), Wellington Asia Quality Income Fund, Wellington Euro Credit ESG Fund and Wellington Asia Credit Income Fund the definition of Dealing Day/ Non-Dealing Day has been updated to clarify that a Non-Dealing Day will not be called automatically in the context of an unexpected closure of a named bank or exchange. If the closure is expected as per the Holiday Calendar, then a Non-Dealing Day will be called. If the closure is at short notice and the operations of the relevant Fund are impacted, then a Non-Dealing Day may be called at the discretion of the Board;
- Update to the SFDR PCDs of Wellington Asia Credit Income Fund. The PCDs will be updated in order to exclude any "5" rated non-pure sovereign issuers (e.g. quasi-government and securitised issuers), and not limit the exclusion to only "5" rated corporate bonds.

(d) With effect from April 18, 2024, the following changes were implemented to the Prospectus:

- The distribution fee of the DL share class has increased to 1.65% for Wellington US Brand Power Fund, Wellington European Stewards Fund and Wellington Sustainable Outcomes Fund; 1.50% for Wellington US Quality Growth Fund and 1.40% for Wellington Multi-Asset High Income Fund.

(e) With effect from July 22, 2024, the following change was implemented to the Prospectus:

- Wellington Credit Total Return Fund changed from an Article 6 to an Article 8 of the SFDR Regulation (EU) 2019/2088 classification.

(f) Changes to the Board of Directors of the Company:

- Alain Vincent Mandy resigned as a Director of the Company, with effect from December 22, 2023;
- Jonathan Griffin was appointed as an Independent Director of the Company, with effect from January 1, 2024;

(g) Changes to the Board of Managers of the Management Company:

- Alain Vincent Mandy resigned as a Manager of the Management Company, with effect from December 22, 2023;
- Henry C. Kelly resigned as an Independent Manager of the Management Company, with effect from December 31, 2023;
- Thomas Nummer was appointed as an Independent Manager of the Management Company, with effect from January 1, 2024;
- Nicole Fortmann was appointed as a Manager of the Management Company, with effect from April 1, 2024;
- Roy Smale was appointed as a Manager of the Management Company, with effect from July 2, 2024.

(h) Changes to the Conducting Officers of the Management Company:

- Paul S. Mullins resigned as a Conducting Officer of the Management Company, with effect from November 6, 2023;
- Rami Lahoud was appointed as a Conducting Officer of the Management Company, with effect from November 6, 2023.

(i) Changes to the Company's registration in Hong Kong and Singapore:

- As of November 2023, Wellington US Brand Power Fund, Wellington Next Generation Global Equity Fund, Wellington Next Generation Education Fund and Wellington Sustainable Outcomes Fund were authorised in Hong Kong;
- As of November 2023, Wellington Asia Quality Income Fund, Wellington Global Equity Income Fund and Wellington Asia Credit Income Fund were recognised in Singapore;
- As of April 2024, Wellington Credit Total Return Fund was recognised in Singapore;
- As of June 2024, Wellington Global Equity Income Fund, Wellington Asia Quality Income Fund, Wellington Asia Credit Income Fund and Wellington Credit Total Return Fund were authorised in Hong Kong.

(j) Funds launched or liquidated during the financial year

Wellington Global Quality Value Fund was launched on November 8, 2023.

Wellington Climate Market Neutral Fund (in liquidation) ceased the activities on November 30, 2023.

1. Significant events during the financial year (continued)

(j) Funds launched or liquidated during the financial year (continued)

Wellington Credit Total Return Fund launched on January 31, 2024.

Wellington Global Climate and Environment Fund (in liquidation) ceased the activities on May 10, 2024.

(k) Share classes launched or liquidated during the financial year

Details of share classes launched and liquidated during the financial year ended September 30, 2024 are listed in the Investment Manager's Report.

2. Summary of significant accounting policies

(a) Presentation of financial statements

The financial statements are prepared in accordance with Luxembourg regulations relating to Undertakings for Collective Investments in Transferable Securities.

The combined figures are presented in US Dollar for information only and were computed with the following exchange rate prevailing as at September 30, 2024: USD 1 = EUR 0.896017.

The financial statements have been prepared on a going concern basis except for the sub-funds Wellington Climate Market Neutral Fund (in liquidation) and Wellington Global Climate and Environment Fund (in liquidation), which are presented on liquidation basis due to the Board's decision to liquidate. The final NAV was published on November 30, 2023 and May 10, 2024, respectively.

(b) Valuation of the investments in securities

The assets of the Funds are valued as follows:

The value of any cash in hand or on deposit, bills and demand notes and accounts receivable, prepaid expenses, cash dividends and interest declared or accrued as aforesaid, and not yet received shall be deemed to be the full amount thereof, unless, however, the same is unlikely to be paid or received in full, in which case the value thereof shall be determined after making such discount as the Board of Directors may consider appropriate in such case to reflect the true value thereof.

The value of transferable securities and money market instruments and any other assets which are quoted or dealt in on any stock exchange shall be based on the latest available closing price and each of the transferable securities and money market instruments and any other assets traded on any other regulated market shall be valued in a manner as similar as possible to that provided for quoted securities.

For non-quoted assets or assets not traded or dealt in on any stock exchange or other regulated market, as well as quoted or non-quoted assets on such other market for which no valuation price is available, or assets for which the quoted prices are not representative of the fair market value, the value thereof shall be determined prudently and in good faith by the Board of Directors on the basis of foreseeable purchase and sale prices.

Shares or units in underlying open-ended UCIs shall be valued at their last determined and available net asset value or, if such price is not representative of the fair market value of such assets, then the price shall be determined by the Board of Directors on a fair and equitable basis. Units or shares of a closed end fund will be valued at their last available stock market value.

Money market instruments with a remaining maturity of less than ninety days at the time of purchase or securities whose applicable interest rate or reference interest rate is adjusted at least every ninety days on the basis of market conditions shall be valued at cost plus accrued interest from its date of acquisition, adjusted by an amount equal to the sum of any accrued interest paid on its acquisition and any premium or discount from its face amount paid or credited at the time of its acquisition, multiplied by a fraction the numerator of which is the number of days elapsed from its date of acquisition to the relevant business day and the denominator of which is the number of days between such acquisition date and the maturity date of such instruments. Money market instruments with a remaining maturity of more than ninety days at the time of purchase shall be valued at their market price. When their remaining maturity falls under ninety days, the Board of Directors may decide to value them as stipulated above.

Liquid assets may be valued at nominal value plus any accrued interest or on an amortised cost basis. All other assets, where practice allows, may be valued in the same manner.

2. Summary of significant accounting policies (continued)

(b) Valuation of the investments in securities (continued)

The liquidating value of futures, forward and options contracts not traded on exchanges or on Other Regulated Markets shall mean their net liquidating value determined, pursuant to the policies established by the Management Company, on a basis consistently applied for each different variety of contracts. The liquidating value of futures, forward and options contracts traded on exchanges or on Other Regulated Markets shall be based upon the last available settlement prices of these contracts on exchanges and/or Regulated Markets on which the particular futures, forward or options contracts are traded by the Company; provided that if a futures, forward or options contract could not be liquidated on the day with respect to which net assets are being determined, the basis for determining the liquidating value of such contract shall be such value as the Board of Directors may deem fair and reasonable.

All other assets of any kind or nature will be valued at their net realisable value as determined in good faith by or under the responsibility of the Board of Directors in accordance with generally accepted valuation principles and procedures.

Whenever a foreign exchange rate is needed in order to determine the net asset value of a Fund, the last available mean rate at 11 a.m. New York time on the business day will be used.

The Management Company sets the valuation policy and ensures it is applied. The Management Company has a valuation policy and procedures in place with the Administration Agent.

The Board of Directors is authorised to instruct the Management Company to apply other adequate valuation principles for the total assets of the Company and the assets of an individual Fund if the aforementioned valuation criteria appear impossible or inappropriate, or due to extraordinary circumstances or events.

In the case of extraordinary circumstances, the Board of Directors may instruct the Management Company to cancel a valuation and replace it with another valuation.

In the case of extensive or unusually large redemption applications, the Management Company may establish the value of the Shares of the relevant Fund on the basis of the prices at which the necessary sales of securities are effected. In such an event, the same basis for calculation shall be applied for conversion and subscription applications submitted at the same time.

Funds may suffer dilution of the net asset value per Shares due to investors buying or selling Shares at a price that does not take into account dealing and other costs arising when the Investment Manager makes or sells investments to accommodate cash inflows or outflows. To counteract this, a Partial Swing Pricing mechanism may be adopted to protect Shareholders' interests.

(c) Net realised appreciation/(depreciation) on sales of securities

The net realised appreciation/(depreciation) on sales of securities is calculated on the basis of the average cost of the securities sold.

(d) Foreign exchange transactions

The combined financial statements are expressed in US Dollars and the financial statements of the Funds are expressed in the relevant base currency. The net assets of a Fund that is denominated in another currency than US Dollars is translated into US Dollars at the exchange rate prevailing at the end of the financial year.

Bank accounts, market value of the investment portfolio and other assets or liabilities expressed in currencies other than US Dollars are translated into US Dollars at applicable exchange rates prevailing at the end of the financial year.

Dividends are converted using currency exchange rates prevailing at ex-dividend date.

Other income and expenses expressed in currencies other than US Dollars are translated into US Dollars at the applicable exchange rates prevailing at payment date or at the exchange rates prevailing at the end of the financial year if they are accrued. Resulting realised and unrealised foreign exchange appreciations or depreciations are included in the combined statement of operations and changes in net assets.

2. Summary of significant accounting policies (continued)

(d) Foreign exchange transactions (continued)

As at September 30, 2024 the Company applied the following foreign exchange rates to US Dollars:

AED	3.6730	JPY	143.0400
AUD	1.4414	KRW	1,307.7000
BRL	5.4458	KZT	480.8100
CAD	1.3510	MXN	19.6020
CHF	0.8436	MYR	4.1235
CLP	897.9000	NOK	10.5327
CNH	6.9987	PHP	56.0375
CNY	7.0161	PLN	3.8363
COP	4,174.0350	SAR	3.7514
CZK	22.5940	SEK	10.1366
DKK	6.6795	SGD	1.2820
EUR	0.8960	THB	32.1775
GBP	0.7455	TWD	31.6465
HKD	7.7675	UYU	41.6800
HUF	355.8533	VND	24,565.0000
IDR	15,140.0000	ZAR	17.2325
INR	83.8013		

(e) Cost of investment securities

The cost of investment securities expressed in currencies other than the base currency of the relevant Fund is translated into the base currency of the relevant Fund at the exchange rate prevailing at the transaction date.

(f) Dividend and interest income

Dividend income is recorded on the ex-dividend date and is shown net of non-recoverable withholding taxes. Dividend income not yet received is included in "dividend income receivable" in the combined statement of net assets. Dividend expenses is included in "dividend payments on derivatives" in the combined statement of operations and changes in net assets. Interest income (including amortisation of premium and discount) is accrued daily. Interest income not yet received is included in "interest receivable" in the combined statement of net assets. Interest expenses are included in "interest expense on derivatives" in the combined statement of operations and changes in net assets.

(g) Financial derivative instruments

Realised appreciation or depreciation and change in unrealised appreciation or depreciation are recorded under "net realised appreciation/(depreciation)" and under "net change in unrealised appreciation/(depreciation)" in the combined statement of operations and changes in net assets respectively.

(i) Forward and spot foreign exchange

The unrealised gain or loss on open forward foreign exchange contracts and open spot foreign exchange contracts is calculated by reference to the difference between the contracted rate and the forward rate to close out the contract as at the financial year-end. The forward rates applied at year end were pulled at 11:00 a.m. New York time. For each relevant Fund, gains or losses on open spot foreign exchange contracts are included in "cash at bank" and "bank overdraft" in the combined statement of net assets.

(ii) Future contracts

Initial margin deposits are made to the broker upon entering into future contracts. During the period the future contract is open, changes in the value of the contract are recognised as unrealised appreciations or depreciations by "marking-to-market" on a daily basis to reflect the market value of the contract at the end of each day's trading. Variation margin payments are made or received, depending upon whether unrealised depreciations or appreciations are incurred. When the contract is closed, a realised appreciation or depreciation is recorded. This realised appreciation or depreciation is equal to the difference between the proceeds from (or cost of) the closing transaction and the Fund's basis in the contract. Margin accounts are currently recorded under "margin cash held with/due to brokers" in the combined statement of net assets.

2. Summary of significant accounting policies (continued)

(g) Financial derivative instruments (continued)

(iii) Options purchased and options written

When an option is purchased, an amount equal to the premium paid is recorded as an investment and is subsequently adjusted to the current market value of the option purchased.

Premiums paid for the purchase of options which expire unexercised are treated on the expiration date as realised depreciations. If a purchased put option is exercised, the premium is subtracted from the proceeds of the sale of the underlying security, foreign currency or index in determining whether the relevant Fund has realised an appreciation or a depreciation. If a purchased call option is exercised, the premium increases the cost basis of the security, foreign currency or index purchased by the Fund.

When an option is written, an amount equal to the premium received by the relevant Fund is recorded as a liability and is subsequently adjusted to the current market value of the option written. Premiums received from written options which expire unexercised are treated by the relevant Fund on the expiration date as realised appreciations.

If a written call option is exercised, the premium is added to the proceeds from the sale of the underlying security, foreign currency or index in determining whether the relevant Fund has realised an appreciation or a depreciation.

If a written put option is exercised, the premium reduces the cost basis of the security, foreign currency or index purchased by the relevant Fund.

Options purchased are recorded under "Investment in options purchased at market value" and options written are recorded under "Investment in options written at market value" in the combined statement of net assets.

Over The Counter options ("OTC options") are marked to market based upon daily prices obtained from third party pricing agents and verified against the value from the counterparty.

(iv) Swaptions

A swaption is an option (see Note 2g(iii)) that grants the right, with no obligation, to enter into an underlying swap on pre-agreed terms. A payer swaption gives the owner of the swaption the right to enter into a swap where they pay the fixed leg and receive the floating leg. A receiver swaption gives the owner of the swaption the right to enter into a swap where they pay the floating leg and receive the fixed leg.

Premiums paid for the purchase of swaptions which expire unexercised are treated on the expiration date as realised depreciations. If a purchased payer swaption is exercised, the premium is subtracted from the proceeds of the underlying swap in determining whether the relevant Fund has realised an appreciation or a depreciation. If a purchased receiver swaption is exercised, the premium is added to the cost basis of the floating rate investment that has been 'swapped'.

When a swaption is written, an amount equal to the premium received by the relevant Fund is recorded as a liability and is subsequently adjusted to the current market value of the swaption written. Premiums received from written swaptions that expire unexercised are treated by the relevant Fund on the expiration date as realised appreciations. If a written swaption is exercised, the premium is added to the proceeds of the underlying swap in determining whether the relevant Fund has realised an appreciation or a depreciation.

(v) Swaps

The change in the value of the swap is reported within "investment in swaps at market value" in the combined statement of net assets, until termination of the contract when it is realised.

Periodic interest payments to be paid or received are accrued on a daily basis and included in interest income or interest expense. Premiums paid or received when entering into the agreement are recorded at cost and reflected under either "receivable from brokers" or "payable to brokers" in the combined statement of net assets.

- *Credit default swaps*

The buyer of protection in a credit default swap agreement is obligated to pay the seller a periodic stream of payments over the term of the contract in return for a contingent payment upon the occurrence of a credit event with respect to an underlying reference obligation.

2. Summary of significant accounting policies (continued)

(g) Financial derivative instruments (continued)

(v) Swaps (continued)

- *Interest rate swaps*

An interest rate swap is a bilateral agreement in which each of the parties agrees to exchange a series of interest payments for another series of interest payments (usually fixed/floating) based on a notional amount that serves as a computation basis and that is usually not exchanged.

(vi) To Be Announced securities ("TBAs")

- *TBA purchase commitments*

The Funds may hold and maintain until settlement date, cash or high-grade debt obligations in an amount sufficient to meet the purchase price, or the Funds may enter into offsetting contracts for the forward sale of other securities they own.

Income on the securities will not be earned until settlement date. Unsettled TBA purchase commitments are valued at the current market value of the underlying securities, according to the procedures described under 'Valuation of the investments' above.

Although the Funds may enter into TBA purchase commitments with the intention of acquiring securities for their Funds or for delivery pursuant to options contracts they have entered into, the Funds may dispose of a commitment prior to settlement if the Investment Manager deems it appropriate to do so.

- *TBA sales commitments*

Certain Funds may enter into TBA sale commitments to hedge their Fund positions or to sell mortgage backed securities they own under delayed delivery arrangements. Proceeds of TBA sale commitments are not received until the contractual settlement date.

Only one Fund had outstanding TBAs as at September 30, 2024, which are included in "Investment in to be announced securities at market value" in the combined statement of net assets, and which are further detailed within that Fund's statement of investments - at its TBAs corresponding section.

(h) Partial Swing Pricing

A Fund may suffer dilution of its net asset value per share due to investors buying or selling shares at a price that does not take into account dealing and other costs that arise when the Investment Manager makes or sells investments to accommodate cash inflows or outflows.

If on any valuation day, the aggregate net transactions in shares for a Fund exceed a pre-determined threshold, as determined by the Company from time to time, the net asset value per share may be adjusted upwards or downwards to reflect net inflows and net outflows respectively and is a means of apportioning trading costs associated with such transactions to the investors that create these costs in order to protect existing or remaining Shareholders. Such adjustment is not expected to exceed 3% of the original net asset per share.

The extent of the swing factor price adjustment will be set by the Company to reflect bid-ask spreads, transaction taxes, dealing and other costs. and may include an adjustment reflecting some portion, or the full value, of illiquid securities, which cannot be sold at the time of the redemption due to unforeseen events such as sanctions, capital controls or absence of trading activity. The adjustment for the illiquid securities will be accounted for as a valuation reserve until such time as the securities become liquid, are sold, or are written off. As a result, redeeming Shareholders may not realise any value on these illiquid securities if they ultimately become liquid and have value. Swing pricing may be applied by the Management Company to any Fund of the Company and is not aimed at addressing the specific circumstances of each individual investor transaction.

The swing factor and swing thresholds are set and reviewed on a quarterly basis by a Wellington Management group swing pricing review governance group, which reports to the Board of the Management Company on a quarterly basis. This group has the ability to respond to market events (e.g. higher market volatility) and make intra quarter adjustments. In any other cases where there are net subscriptions or redemptions in the Funds and the Company reasonably believes that imposing a partial swing price is in the best interests of existing Shareholders, the Company may, at its discretion, impose one.

2. Summary of significant accounting policies (continued)

(i) Capital gains tax

No tax is payable in Luxembourg on realised or unrealised capital appreciation of the assets of the Funds, however, the Funds may incur foreign taxes on capital gains upon realisation of their assets.

3. Income equalisation

The Company may determine on behalf of a Fund to use an accounting technique known as income equalisation in respect of the distributing share classes to prevent dilution of current Shareholders' earnings.

The income which is accumulated for a distributing share class during a distribution period is paid out to Shareholders in that class at the end of that specified distribution period. As a result, the income per share that is distributed is the same for all Shareholders of that class, regardless of the length of time they held their shares. Income equalisation is designed to ensure that the income distributed per share is not impacted by subscriptions, conversions or redemptions in the class.

This is accomplished by applying a portion of the proceeds from shares issued, converted and redeemed, equivalent on a per share basis to the amount of undistributed net investment income on the date of the transaction. Apportioned amounts are credited or charged to undistributed income. As a result, distributions of the share class will not be impacted by issues, conversions or redemptions of shares.

Special rules may apply when a fund operates income equalisation and Shareholders should seek their own professional advice as to the tax consequences of investing in shares of the Company.

4. Charges and expenses

(a) Investment management fees

The Investment Manager shall be paid an investment management fee out of the assets of each of the Funds. The investment management fee is calculated as a percentage of the daily net assets attributable to the relevant share class, accrued daily in the net asset value of the relevant share class and paid monthly in arrears at the annual rates.

In addition to the investment management fee, a performance fee will also be payable in respect of certain Funds as described in further detail in the performance fee section (Note 4d). There were no performance fee during the financial year ended September 30, 2024.

Where permitted by applicable regulation, the Investment Manager may in its own discretion, rebate out of its own assets all or a portion of its fees to financial intermediaries who purchase or solicit sales of Shares of the Funds for their underlying clients. Investors should ask their financial intermediaries about any such payments they may receive, and any associated conflicts of interest they may have in recommending a Fund.

Financial intermediaries may impose additional costs and fees in connection with their own programs or services. In addition, the Investment Manager may enter into an alternative fee arrangement, or may vary the structure of existing fee arrangements, for any single Shareholder. This will result in some investors paying lower investment management or performance fees than other investors.

The investment management fee rates applicable to each of the share classes are outlined in Note 4e.

(b) Distribution fees

The distribution fee is calculated as a percentage of the daily net assets attributable to the respective shares held by the relevant Shareholder, accrued daily in the net asset value of the relevant share class and paid quarterly in arrears at the annual rates to financial intermediaries.

The distribution fee is paid to intermediaries holding these share classes to compensate them for distribution and Shareholder services provided to underlying beneficial owners of these Shares. Investors considering investing via an intermediary should be aware of these fees and the potential for conflicts of interest that they create where, for example, an intermediary might be incentivised to recommend a particular Fund, or share class within a Fund, that has a higher distribution fee.

The distribution fee rates applicable to each of the share classes are outlined in Note 4e.

4. Charges and expenses (continued)

(c) Administrative fee

The Management Company shall be paid an administrative fee out of the assets of the Funds attributable to the relevant share classes. This administrative fee is calculated as a percentage of the daily net assets of that class, accrued daily in the net asset value of the relevant class and paid quarterly in arrears.

The purpose of the administrative fee is to provide a fixed rate of fees covering the expenses of the Funds, which expenses might otherwise be subject to fluctuation over time.

The administrative fee ensures that the Funds are protected from these fluctuations, which would not be the case if the Funds had chosen to pay such charges directly. Any increase in the maximum rate of the administrative fee shown above will only be implemented upon giving not less than 1 month notice to affected shareholders.

The administrative fees are fixed which means that the Management Company, or other Wellington Management affiliate elected by the Management Company will bear any costs and expenses incurred by the relevant class in any period in excess of the administrative fee charged to the class, but conversely will be entitled to retain any amount of the administrative fee paid to it which exceeds the actual operating expenses incurred by the relevant class during any period.

The Management Company in its discretion may choose to waive a portion of the administrative fee at any time where the Management Company considers it appropriate to do so taking into account the level of assets in a particular Fund.

Further the Management Company may instruct the Company to pay a portion of the administrative fee directly out of the assets of the Fund to any third party service providers. In such case the administrative fee due to the Management Company will be reduced by the same amount.

The administrative fee covers the following expenses, if applicable to the relevant class:

- Depositary fees and reasonable out of pocket expenses;
- Administration Agent fees and reasonable out of pocket expenses;
- Transfer Agent fees and reasonable out of pocket expenses;
- Management Company fees relating to the provision, procuring, overseeing and/or monitoring of various services to the Company and the Funds by the Management Company and its affiliates, including, but not limited to, administrative, domiciliary, corporate, company secretarial, risk management, regulatory compliance and reporting services and fees incurred by affiliates of the Management Company and payable to third parties providing infrastructure and other support services;
- Fees in consideration of the services provided by the Distributor (and its affiliates) in establishing, servicing on an ongoing basis and administering relationships with financial intermediaries and distributors and the cost incurred, including the costs of performing diligence on financial intermediaries/distributors, the additional oversight of third parties service providers, and the provision of additional marketing support;
- Fees of the members of the Board of Directors of the Company who are not employed by affiliates of the Wellington Group as well as reasonable out of pocket expenses incurred in discharging their directors' duties;
- Auditor's fees and reasonable out of pocket expenses;
- Professional costs (including, without limitation, the fees and disbursements of counsel, consultants, tax and other advisers or third party support services) that may be incurred by the Management Company, the Depositary, the correspondents or the Administration Agent while acting in the interest of the Shareholders;
- The cost of taking out and maintaining any insurance policy in relation to the Company, its directors, the Management Company and/or the Managers;
- The Luxembourg taxe d'abonnement being 0.05% per annum for Class A Shares, Class D Shares, Class DL Shares, Class ED Shares, Class EN Shares, Class N Shares, Class UD Shares, Class UN Shares, or 0.01% per annum for Class E Shares, Class S Shares and Class T Shares;
- Any start-up costs associated with the creation of a new Fund or class and the offer of its Shares;
- The costs associated with preparing and/or filing, translating, distributing, or maintaining any materials or documents of the Company, including, without limitation, the offering memorandum (as well as any amendments or supplements), KIDs, Fact sheets, websites, annual reports or other documents as may be required under its Articles or under the applicable laws or regulations as well as registration or private placement costs incurred for purposes of distributing shares of the Company (including any paying agents', lawyers', auditors' and other experts' fee in connection with the foregoing, as well as any administrative charges or taxes incurred) and the costs associated with ratings and/or ranking of the Funds;
- Fees payable to third parties for share class currency management services in relation to the execution of currency hedging transactions for hedged share classes.

4. Charges and expenses (continued)

(c) Administrative fee (continued)

The following expenses are not covered by the administrative fee, are not subject to any maximum limit or cap and will be paid by the Company out of the assets of each Fund:

- investment management fees;
- performance fees;
- distribution fees;
- all taxes (including, without limitation, all income and franchise taxes but excluding the Luxembourg taxe d'abonnement), levies, duties or similar charge which may be due on or with respect to the assets and the income of the Company;
- all costs (including brokerage fees) of purchasing or selling assets of the Company including but not limited to brokerage charges, subscription and redemption charges, anti-dilution levies, implicit transactions costs, costs associated with execution/trading or settlement platforms, costs associated with derivative use and any losses incurred in connection therewith are for the account of the relevant Fund;
- the costs of borrowing including interest expenses;
- any extraordinary expenses, such as litigation (for instance, fees connected with the filing of class action lawsuits), exceptional measures, particularly, legal, business or tax expert appraisals or legal proceedings undertaken to protect shareholders' interests and all similar charges and expenses.

Such fees, duties and charges will be charged to the class in respect of which they were incurred or, where an expense is not considered by the Board of Directors to be attributable to any one class, the expense will be allocated by the Board of Directors with the approval of the Depositary, in such manner and on such basis as the Board of Directors in their discretion deem fair and equitable.

The Management Company implemented a volume discount mechanism ("VDM") on the administrative fee which allows the Funds to pass on economies of scale achieved by a Fund reaching significant level of assets.

The administrative fee rates applicable to each of the share classes of each of the Funds are outlined in Note 4e.

(d) Performance fees

In addition to the base investment management fee, the Investment Manager may also be paid a performance fee, based on the unswung share class' net return or net asset value per share but inclusive of any performance fee previously accrued in respect of such performance period.

The performance fee is accrued daily in the net asset value of each relevant class and is calculated as described below in respect of the relevant performance fee mechanism.

The period at the end of which the accrued performance fee is crystallised and paid (the "Performance Period") is generally the Fund's fiscal year (October 1 - September 30), but may also begin or end mid-year in certain circumstances a) from the launch of a Fund or share class to the Performance Period end, b) from the previous Performance Period end to the closure of a Fund or share class. When this occurs, the Performance Period may be less than one calendar year. For Funds using the Performance Benchmark mechanism in cases of a launch of a Fund or a share class in the ongoing Performance Period the performance fee will crystalise at the end of the immediately following Performance Period. When this occurs, the Performance Period may be longer than one calendar year.

Subject to the exceptions above, the performance fee is crystallised at the end of each Performance Period and is paid annually in arrears as soon as practicable after the end of the relevant Performance Period. The end of the Performance Period is generally the Fund's fiscal year end, except where a Fund or share class closes mid-year as described above. As well as crystallising at the end of each Performance Period, performance fees are crystallised on any Dealing Day (other than the last Business Day of the Performance Period) in which there is a net reduction in the number of shares in a share class. Any accrued performance fee with respect to such net redemption of shares will crystallise on that Dealing Day and will be paid as soon as is practicable to the Investment Manager.

For certain share classes a High Water Mark, Performance Benchmark or Performance Benchmark with a High Water Mark may also be applicable.

4. Charges and expenses (continued)

(d) Performance fees (continued)

(i) High Water Mark (HWM)

Where a HWM mechanism applies, a performance fee will be accrued on the basis of a share class' net asset value per share in excess of the HWM, over a Performance Period, multiplied by the average number of shares in issue for the fiscal year calculated on each Business Day. The average number of shares used for the performance fee calculation is calculated on each Business Day and adjusted on any Dealing Day in which there is a net reduction of shares in a share class. At the launch of a share class, the HWM means the Initial Issue Price and is taken as the starting point for the performance fee calculation. If the net asset value per share on the last Business Day of a Performance Period is higher than the previous HWM, the HWM is set to the net asset value per share calculated at the end of the Performance Period. To the extent that the share class' net asset value per share did not exceed its HWM at the end of a Performance Period, the HWM is carried forward, and no performance fees will be accrued until the net asset value per share of that share class exceeds its HWM in a subsequent Performance Period. When this occurs, the Performance Period will extend beyond one year and continue until the end of the next Performance Period when a performance fee does crystallise. The HWM will be adjusted for any distributions in the case of a distributing share class.

(ii) Performance Benchmark

Where a Performance Benchmark applies, a performance fee may be accrued on the basis of a share class' net return per share in excess of the return of the Performance Benchmark over a Performance Period, multiplied by the average number of shares in issue for the fiscal year calculated on each Business Day. The average number of shares used for the performance fee calculation is calculated on each Business Day and adjusted on any Dealing Day in which there is a net reduction of shares in a share class. The Performance Benchmark is expressed in the denomination currency of the relevant share class, or for hedged share classes, hedged to the denomination currency of the relevant class.

If the net return per share on the last Business Day of a Performance Period is higher than the Performance Benchmark over the same period, the performance fee will crystallise. The net return per share may exceed the Performance Benchmark and crystallise a performance fee even where the share class' net asset value decreases. To the extent that a share class' net return per share did not exceed its Performance Benchmark at the end of a Performance Period, no performance fee will accrue until the share class' net return per share's cumulative net return exceeds the cumulative Performance Benchmark return over the same period. When this occurs, the Performance Period will extend beyond one year and continue until the end of the next Performance Period when a performance fee does crystallise. The Performance Benchmark will be adjusted for any distributions in the case of a distributing share class.

(iii) Performance Benchmark with HWM

Where a Performance Benchmark with a HWM applies, a performance fee will be accrued on the basis of a share class' net return per share in excess of the Performance Benchmark and the net asset value in excess of the HWM, over a Performance Period, multiplied by the average number of shares in issue for the fiscal year calculated on each Business Day. The average number of shares used for the performance fee calculation is calculated on each Business Day and adjusted on any Dealing Day in which there is a net reduction of shares in a share class.

At the launch of a share class, the HWM means the Initial Issue Price and is taken as the starting point for the performance fee calculation. If (i) the net return per share on the last valuation day of a Performance Period is higher than the Performance Benchmark over the same period and (ii) the previous HWM, then the performance fee will crystallise.

If the net asset value per share on the last Business Day of a Performance Period is higher than the previous HWM, the HWM is set to the net asset value calculated at the end of the Performance Period. To the extent that a share class' net return per share did not exceed its Performance Benchmark and the net asset value per share did not exceed the HWM at the end of a Performance Period, no performance fee will accrue until the share class' cumulative net return exceeds the cumulative Performance Benchmark return and the net asset value per share exceeds the HWM over the same period. When this occurs, the Performance Period will extend beyond one year and continue until the next Performance Period when a performance fee does crystallise. The HWM and Performance Benchmark will be adjusted for any distributions in the case of a distributing share class.

(iv) Further Considerations

Due to differences in timing between their date(s) of investment and a share class' performance fee calculation period, subscribers and Shareholders of the Fund should be aware that their own individual performance experience as a Shareholder may not be equivalent to the actual performance of the Fund on which the performance fee is calculated and paid, and the performance fee paid to the Fund may be higher or lower than the actual performance they experience as a Shareholder.

4. Charges and expenses (continued)

(d) Performance fees (continued)

(iv) Further Considerations (continued)

Although a daily accrual of a portion of the performance fee in a share class' net asset value mitigates some of these timing differences, the performance fee is calculated and paid based on the share class' fiscal year assets and performance, not on the basis of a Shareholder's specific assets or performance.

The share class' net return on which the performance fee is based, includes net unrealised gains and losses as at the end of each calculation period and as a result, a performance fee may be paid on unrealised gains which may subsequently never be realised. The performance fee is calculated prior to any dilution adjustments and the methodology is verified by the Depositary on a periodic basis.

Performance fees are paid even where the relevant HWM is surpassed, which may be achieved due to market movements.

There were no performance fees incurred during the financial year nor at the financial year-end.

(e) Summary of fee rates per share class and Total Expense Ratios (TER)

The investment management fees, distribution fees, administrative fees and ongoing charges rates (which is the sum of those three fee types) applicable to each of the share classes of the Funds for the financial year ended September 30, 2024 are outlined below. Details of share class launches and closures during the financial year ended September 30, 2024 are listed in the Investment Manager's Report.

Ongoing charges are equivalent to the Total Expense Ratios calculated for the twelve months ended September 30, 2024. Total Expense Ratios have been calculated in accordance with the Asset Management Association Switzerland ("AMAS") guidelines dated August 5, 2021 and effective from January 1, 2022.

All percentages as at September 30, 2024 are disclosed in the table below:

Fund	Investment management fee rate	Distribution fee rate	Administrative fee rate	Ongoing charges (TER)

5. Related party transactions

(a) Transactions with key management personnel

Related parties include the Company's Directors, Wellington Management Company LLP as the Investment Manager of the Funds, Wellington Global Administrator, Ltd as the Distributor of the Funds, Wellington Luxembourg S.à r.l. as the Management Company as the receiver of the administrative fee. At the date of these financial statements neither the Directors nor any associated person have any beneficial interest in the share capital of the Company or any options in respect of such capital. The Directors employed by Wellington Group are not remunerated by the Company.

(b) Transactions with the Investment Managers and affiliates

Amounts earned by the Investment Manager, the Distributor, the Management Company and other Wellington Group Entities are disclosed in the combined statement of operations and changes net assets. Performance fees earned are also disclosed in the combined statement of operations and changes net assets. Fee amounts payable at financial year end are disclosed in the combined statement of net assets. Details of the investment management, distribution, administrative and performance fee rates are disclosed in note 4.

As at September 30, 2024 Shareholders affiliated with the Investment Manager, the Distributor, the Management Company or one of the other Wellington Group entities owned shares in a number of the Funds, details of which are disclosed in the tables below. A Fund has a concentration risk in relation to total Fund net assets in situations where most issued shares of the Fund are held by a small number of investors. In such a situation, if a single investor were to redeem all or a significant proportion of their investment, this could have an impact on the operations of the Fund, including the ability of the Fund to continue as a going concern. Funds with a single investor as at September 30, 2024 are also disclosed in the table below.

5. Related party transactions (continued)

(c) Transactions involving significant investors of a Fund

Fund name	Total % shares held by Wellington affiliates as at September 30, 2024	Total % shares held by significant investors who are not affiliated as at September 30, 2024	No of significant investors who are not affiliated as at September 30, 2024

* Nominee investors.
** Including 1 nominee investor.

All transactions entered into during the year by the Funds involving related parties were carried out at arm's length in the ordinary course of business and on normal commercial terms.

6. Transaction costs

Transaction costs are the costs incurred by a Fund in connection with transactions on its portfolio of investments. These costs are both incremental and directly attributable to the acquisition, issue or disposal of financial assets and liabilities, with incremental costs being those that would not have been incurred if the Fund had not entered into the transaction. These costs comprise fees and commissions paid to agents, advisers, brokers and dealers, in addition to any taxes associated with the transaction.

Transaction costs for each Fund for the financial year ended September 30, 2024 are disclosed below:

Fund	CCY	Brokerage Cost	Local Market Taxes	Total
Wellington Emerging Markets Research Equity Core Fund	USD	33,708	34,540	68,248
Wellington US Brand Power Fund	USD	54	-	54
Wellington US Quality Growth Fund	USD	16,138	-	16,138
Wellington Global Property Income Fund	USD	924	646	1,570
Wellington Next Generation Global Equity Fund	USD	3,141	4,883	8,024
Wellington European Stewards Fund	EUR	355	1,565	1,920
Wellington Climate Market Neutral Fund (in liquidation)	USD	3,702	346	4,048
Wellington Emerging Markets Health Care Equity Fund	USD	652	736	1,388
Wellington Next Generation Education Fund	USD	18,255	7,099	25,354
Wellington Sustainable Outcomes Fund	USD	76	50	126
Wellington Global Equity Income Fund	USD	234	460	694
Wellington Global Climate and Environment Fund (in liquidation)	USD	272	373	645
Wellington Asia Quality Income Fund	USD	685	1,266	1,951
Wellington Global Quality Value Fund	USD	10,518	32,898	43,416
Wellington Multi-Asset High Income Fund	USD	44,073	10,672	54,745
Wellington Credit Income Fund	USD	96	-	96
Wellington Euro Credit ESG Fund	EUR	-	-	-
Wellington Asia Credit Income Fund	USD	-	-	-
Wellington Credit Total Return Fund	USD	-	-	-

For debt securities and derivatives, transaction costs are not separately identifiable from the purchase price of the security and therefore cannot be disclosed separately.

6. Transaction costs (continued)

These amounts are included in "net realised appreciation/(depreciation) on sale of investments, currency transactions and financial derivative instruments" and in "net change in unrealised appreciation/(depreciation) on sale of investments, currency transactions and financial derivative instruments" in the combined statement of operations and changes in net assets.

7. Dividend distributions

The Board of Directors may decide whether and to what extent net investment income and net realised and unrealised capital appreciations will be distributed with respect to any Fund.

The following distributions were declared and paid in the financial year ended September 30, 2024.

Wellington Global Property Income Fund

8. Partial Swing Pricing

The following table provides details of the swing factors in place as at September 30, 2024:

Fund	Swing factor %	Methodology
Wellington Emerging Markets Research Equity Core Fund	0.15	In/Out
Wellington US Brand Power Fund	0.01	In/Out
Wellington US Quality Growth Fund	0.01	In/Out
Wellington Global Property Income Fund	0.05	In/Out
Wellington Next Generation Global Equity Fund	0.05	In/Out
Wellington European Stewards Fund	0.10	In/Out
Wellington Emerging Markets Health Care Equity Fund	0.10	In/Out
Wellington Next Generation Education Fund	0.02	In/Out
Wellington Sustainable Outcomes Fund	0.02	In/Out
Wellington Global Equity Income Fund	0.05	In/Out
Wellington Asia Quality Income Fund	0.15	In/Out
Wellington Global Quality Value Fund	0.05	In/Out
Wellington Multi-Asset High Income Fund	0.05	In/Out
Wellington Credit Income Fund	0.40	In Only
Wellington Euro Credit ESG Fund	0.25	In Only
Wellington Asia Credit Income Fund	0.40	In Only
Wellington Credit Total Return Fund	0.20	In Only

As at September 30, 2024, no swing pricing was applied to the Funds.

9. Commitments and contingencies

In the normal course of business, the Fund enters into contracts that contain a variety of representations and warranties and which provide general indemnifications. The Fund's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Fund that have not yet occurred. The amount of the loss, if any, cannot be determined at this time. However, based on experience, the Fund expects the risk of loss to be remote. From time to time, the Fund may be subject to other proceedings, including civil litigation, arising out of the ordinary course of their business. There were no commitments or contingencies as at September 30, 2024.

10. Soft commission arrangements and directed brokerage

Soft commission transactions occur when the Investment Manager uses certain investment research services which assist in the management of a Fund's investments and which arrangements are paid for by certain brokers. These services may include, for example, research and analysis of the relative merits of individual shares or markets. In return, the Investment Manager places a proportion of business with these brokers including transactions relating to the Fund's investments. The Investment Manager has satisfied itself that it obtains best execution on behalf of the Funds and that these arrangements are to the benefit of the Funds.

10. Soft commission arrangements and directed brokerage (continued)

There were soft commission transactions during the financial year ended September 30, 2024 in the following Funds:

Wellington Emerging Markets Research Equity Core Fund, Wellington US Brand Power Fund, Wellington US Quality Growth Fund, Wellington Global Property Income Fund, Wellington Next Generation Global Equity Fund, Wellington European Stewards Fund, Wellington Climate Market Neutral Fund (in liquidation), Wellington Emerging Markets Health Care Equity Fund, Wellington Next Generation Education Fund, Wellington Sustainable Outcomes Fund, Wellington Global Equity Income Fund, Wellington Asia Quality Income Fund, Wellington Global Quality Value Fund and Wellington Multi-Asset High Income Fund.

There were no directed brokerage services utilised for the financial year ended September 30, 2024.

11. Subsequent events

(a) With effect from November 1, 2024, the following changes were implemented to the Prospectus:

- For Wellington Asia Quality Income Fund, the investment policy was updated to increase the Fund's maximum permitted exposure to REITs from 10% to 25% to enable access to more income-related investment opportunities in the region.
- For Wellington Asia Quality Income Fund, the investment management fee of share class E was reduced from 0.50% to 0.25%. Share class EN was made available. Both share classes will be available until the total net asset value of the Fund reaches US Dollar 100 million.
- For Wellington Global Equity Income Fund, the settlement date for payment of shares and payment of redemption proceeds of the class A shares changed from two Business Days following the relevant Dealing Day (T+2) to three Business Days, following the relevant Dealing Day (T+3).

(b) Changes to the Board of Directors of the Company:

- Michael McKenna resigned as a Director of the Company, with effect from November 30, 2024.
- Carmine Taglione was appointed as a Director of the Company, with effect from December 1, 2024.

(c) Funds launched or liquidated after the financial year end:

- On October 11, 2024, Wellington Global Innovation Fund, a sub-fund of Wellington Management Funds (Luxembourg), (the "Merging Sub-Fund"), merged into Wellington Global Innovation Fund, a sub-fund of Wellington Management Funds (Luxembourg) III SICAV, (the "Receiving Sub-Fund"). The Receiving Sub-Fund was launched on the same date and as a result of the merger. The merger exchange ratio applied was 1:1 to all of the share classes involved.
- On December 6, 2024, Wellington Climate Strategy Fund and Wellington Global Quality Growth Fund, sub-funds of Wellington Management Funds (Luxembourg), (the "Merging Sub-Funds") merged into Wellington Climate Strategy Fund and Wellington Global Quality Growth Fund, respectively; sub-funds of Wellington Management Funds (Luxembourg) III SICAV, (the "Receiving Sub-Funds"). The Receiving Sub-Funds were launched on the same date and as a result of the mergers. The merger exchange ratio applied was 1:1 to all of the share classes involved.

(d) Changes to the valuation of fixed income securities and the related swing pricing mechanism:

- With effect from December 3, 2024, the swing pricing mechanism will change from using bid-ask spreads to using mid-ask spreads for Wellington Asia Credit Income Fund, Wellington Credit Income Fund, Wellington Credit Total Return Fund and Wellington Euro Credit ESG Fund.

Global Exposure

In accordance with the 2010 Law and other applicable regulations, in particular CSSF Circular 11/512 as amended by the CSSF Circular 18/698, the Management Company uses a risk-management process which enables it to monitor and to measure the exposure of the Company to market, liquidity and counterparty risks, and to all other risks, including operational risks, which are material for the Company.

In relation to financial derivative instruments the Company employs a process for accurate and independent assessment of the value of OTC derivatives and the Company ensures for each of its Fund that its global exposure relating to financial derivative instruments does not exceed the total net value of its Fund.

The global exposure of the Funds is measured either through the commitment, relative or absolute Value-At-Risk ("VaR") methodology, as indicated in the Section Risk Management Process and in the individual Fund's Investment Objectives and Policies of the Prospectus. The global exposure is calculated taking into account the current value of the underlying assets, the counterparty risk, future market movements and the time available to liquidate the positions.

The VaR approach is a risk measure of the risk of loss on a specific portfolio of financial assets. For a given investment portfolio, probability and time horizon, VaR is defined as a threshold value such that the probability that the mark-to-market loss on the investment portfolio over the given time horizon exceeds this value (assuming normal market conditions and no trading in the investment portfolio) is the given probability level.

- **Relative VaR**

A Fund's VaR is limited by twice the VaR of a reference portfolio.

- **Absolute VaR**

The Absolute VaR of a Fund shall not exceed 20% of a Fund's Net Asset Value.

VaR are calculated using the following criteria:

- One tailed confidence interval of 99%.
- Holding period equivalent to 1 month (20 business days);
- Effective observation period (history) of risk factors of at least 1 year (250 business) unless a shorter observation period is justified by a significant increase in price volatility (for instance extreme market conditions);
- Quarterly data set updates, or more frequent when market prices are subject to material changes.

Since VaR is an integral part of the Fund's market risk management, a VaR limit of 20% for absolute VaR has been established for all Funds under VaR approach. These limits are monitored daily by the Management Company. The Management Company monitored the total global exposure of the portfolio for the observation period ended September 30, 2024, utilising the VaR calculated on absolute basis.

Global Exposure

As at September 30, 2024 the commitment approach was the methodology used for assessing global exposure for the following Funds: Wellington Emerging Markets Research Equity Core Fund, Wellington US Brand Power Fund, Wellington US Quality Growth Fund, Wellington Global Property Income Fund, Wellington Next Generation Global Equity Fund, Wellington European Stewards Fund, Wellington Emerging Markets Health Care Equity Fund, Wellington Next Generation Education Fund, Wellington Sustainable Outcomes Fund, Wellington Global Equity Income Fund, Wellington Asia Quality Income Fund, Wellington Credit Income Fund and Wellington Asia Credit Income Fund .

As at September 30, 2024, the global exposure of Wellington Multi-Asset High Income Fund is measured through absolute VaR.

As at September 30, 2024, the global exposure of Wellington Euro Credit ESG Fund is measured through relative VaR.

Leverage

It is expected that the Wellington Multi-Asset High Income Fund and Wellington Credit Income Fund will generally incur leverage at a rate of between 0% - 450% of net asset value through the use of FDIs although it is possible that under certain circumstances this level might be exceeded.

Leverage (continued)

It is expected that the Wellington Euro Credit ESG Fund will generally incur leverage at a rate of between 0% - 500% of net asset value through the use of FDIs although it is possible that under certain circumstances this level might be exceeded.

The leverage is not used for other sub-funds. Leverage is calculated as the sum of the notionals of the FDIs and does not include the underlying investments of the Fund which make up 100% of total net assets.

Details of the average leverage, both including and excluding the impact of share class hedging, for the year under review can be found in the table below. All average leverage figures are expressed as the ratio between the sum of the absolute value of derivative notionals (no re-investment of collaterals) added to the total net asset value of the individual Fund expressed as a percentage of that net asset value.

An absolute VaR approach is applied to monitor and measure global exposure. The Fund's VaR is limited to 20% of the Fund's net asset value.

		Fund VaR				
Fund	**Benchmark/Reference Fund**	**Limit**	**High**	**Low**	**Average**	**Average Gross Leverage Excluding Share Class Hedge†††**
Wellington Multi-Asset High Income Fund†	-	20.00%	6.52%	4.11%	5.03%	58.60%
Wellington Euro Credit ESG Fund††	Bloomberg Euro Aggregate Corporate Index	200.00%	103.58%	83.08%	93.75%	27.44%

† Absolute VaR is used for the market risk calculation.
†† Relative VaR is used for the market risk calculation.
††† Figures exclude share class hedging via the sum of notional approach.

The absolute VaR of Funds under the UCITS commitment approach is computed under a parametric VaR model whose volatility is derived from both implied volatility and historical volatility. This involves estimating a projected volatility for the portfolio and converting that into VaR given a 1 day holding period and a 99% confidence level.

Absolute VaR

The SFTR introduces, inter alia, reporting requirements for securities financing transactions ("SFTs") and total return swaps. Article 13 of SFTR, which sets out the information to be included in annual reports, came into effect on January 13, 2017 and impacted Funds reporting after this date.

A Securities Financing Transaction (SFT) is defined as per Article 3(11) of the SFTR as:

- a repurchase/reverse repurchase agreement
- securities or commodities lending and securities or commodities borrowing
- a buy-sell back transaction or sell-buy back transaction, or
- a margin lending transaction

As at September 30, 2024, the Funds did not hold any SFTR instruments to be reported.

Remuneration Policy

This Policy shall be read in conjunction with the Introduction and Definitions.

Statement of Policy

This Policy is designed to comply with the relevant Regulatory Requirements, including the Circular CSSF 18/698, the Luxembourg Law of 2010, the Luxembourg Law of 2013, the UCITS.

The IFM believes that its employees should be remunerated in a manner that (i) is fair and rewards achievement over time, (ii) is consistent with and promotes sound and effective risk management (and discourages inappropriate risk-taking), (iii) is in line with the business strategy, objectives, values, and interests of the IFM and the Wellington Group, and (iv) aligns the interests of IFM staff with those of the WMF Global Funds and the underlying fund investors.

These beliefs are consistent with the remuneration principles applied throughout the Wellington Group, which manages assets for a wide range of clients and for commingled WMF Global Funds in a variety of structures and domiciles.

The Policy sets out (i) IFM's remuneration policy, (ii) the principles on which IFM's Policy is based, and (iii) IFM's practices aimed at ensuring that its remuneration approach is consistent with applicable regulatory requirements and the above-mentioned principles.

This Policy will be subject to central and independent internal review by the Internal Auditor[1] at least annually.

Policy Specifics

Overall application of this Policy

The Policy and the related practices described below shall be applied in a flexible way that (i) is consistent with applicable employment and privacy laws, including pre-existing employment contracts and other obligations of the Wellington Group to its staff, (ii) aligns with the business strategy, objectives, values, and interests of the IFM and the Wellington Group, and the interests of the WMF Global Funds and investors in the WMF Global Funds, (iii) is appropriate given the size, internal organisation, nature, and complexity of the business of the IFM and the WMF Global Funds, and (iv) takes into account individual circumstances.

Remuneration will not be paid through vehicles or methods that facilitate the avoidance of the requirements of the UCITS. Remuneration paid in accordance with the Policy will be impacted by Wellington Group's overall financial performance, and a covered individual's achievement in the performance of the duties assigned to them.

Specific requirements (including the payout process rules) may not be applied (a) where they are not believed to be proportionate (given the factors listed above) or to promote regulatory objectives, and/or (b) based on "disapplication" standards or thresholds applicable in Luxembourg or other Member States,[2] provided such requirements are not believed necessary to (i) promote sound and effective risk management, (ii) act in the best interests of IFM and/or the WMF Global Funds or (iii) reward individual and functional team achievement.

Where staff are subject to remuneration rules from multiple remuneration regimes, the remuneration rules shall be applied pro rata based on the activities carried out under each regime or, if there is a conflict between the rules, the rules will be applied that are deemed more effective for achieving the outcomes both of discouraging excessive risk taking and of aligning the interests of the relevant individuals with those of the investors in the WMF Global Funds they manage.

Independence

The remuneration of employees involved in control functions will be determined independently from the business units controlled by the control functions and in accordance with the achievement of the objectives linked to the relevant control functions.[3]

[1] The Investment Fund Manager has delegated the Internal Audit function to an external expert.
[2] In light of the "need" identified in ESMA guidance to preserve a level playing field among AIFMs and jurisdictions.
[3] Full independence is not possible, as remuneration is ultimately linked to the performance of the Wellington Group as a whole.

Remuneration Policy (continued)

Policy Specifics (continued)

Identified Staff

The general principles set forth in this Policy apply to all IFM staff, however, the payout process below applies only to the IFM staff, including senior management, risk-takers, control functions, and any employees receiving total remuneration that takes them into the same bracket as senior management and risk-takers whose professional activities have a material impact on the risk profiles of IFM or the WMF Global Funds (collectively "the Identified Staff").

In order to arrive at the universe of Identified Staff, IFM will determine whether the activities of each member of staff, senior management or the delegates could have a significant impact on IFM's results, IFM's balance sheet, or the performance of the WMF Global Funds. IFM may also consider other relevant factors. The Conducting Officer responsible for Compliance will inform the relevant individuals of their classification as Identified Staff.

Relevant remuneration

This Policy applies to all forms of payment by IFM of salaries, discretionary payments, and pension benefits, or by a WMF Global Fund to Identified Staff, including any transfer of WMF Global Funds' shares/units, in relation to services rendered by Identified Staff for the benefit of the applicable WMF Global Funds.

This Policy does not apply to payments from other Wellington Group entities (including partnership distributions), but the Wellington Group will not design remuneration practices intended to circumvent the requirements of the UCITS, related ESMA Guidelines on Sound Remuneration and the Circular CSSF 18/698.

The following provisions are designed to ensure compliance with the remuneration requirements of the UCITS and with related directives, regulation, and guidance.

Guarantees and early termination

IFM will not normally offer guaranteed bonuses and will only do so in connection with hiring new staff. IFM will not offer guarantees in excess of one year. IFM will not make payments related to early termination of a contract, except as required by law.

Performance assessment

When assessing performance for the purposes of determining remuneration, IFM will assess the performance of the individual (including by reference to non-financial criteria) and the function or business unit concerned, along with the overall results of IFM. WMF Global Fund performance will be assessed in a multi-year framework appropriate or the holding period recommended to fund investors in the UCITS, to ensure that the assessment is based on longer-term performance and that the payment of performance-based compensation is spread over a period taking into account the holding period recommended to fund investors in the UCITS and their investment risks. The measurement of performance used to calculate variable remuneration (or to calculate the size of pools available for variable remuneration) will include adjustment mechanisms for relevant current and future risks.

Bonus withholding and claw-back

Should it be proven that an employee took excessive risks or breached IFM's compliance rules or any regulations, no bonus will be paid to that employee and claw-back proceedings may be invoked in relation to bonuses paid during prior periods.

The Board will be able to require employees to repay all or part of any bonus that has been paid for performance based on data which was subsequently proven to be fraudulent or subject to a material error or misstatement.

Payout process

The IFM will regularly carry out an assessment of proportionality in relation to the appropriateness and applicability of the design of the payout process. The payout process may include the below relevant components depending on the assessment of proportionality at a given time.

1. Fixed/variable balance: The fixed and variable components of remuneration will be appropriately balanced, and the fixed compensation component will represent a sufficiently high proportion of total compensation to allow for a flexible policy (e.g. payment of no variable remuneration in any given year). Variable remuneration will only be paid if it is sustainable given the overall financial situation of IFM and of the Wellington Group combined and justified given the performance of the business unit, the WMF Global Funds, and the individuals concerned.

Remuneration Policy (continued)

Policy Specifics (continued)

Payout process (continued)

2. Variable remuneration in shares or units: - this process is not currently in place. Subject to the legal structure of the WMF Global Funds and their rules or instruments of incorporation and considering the outcome of a proportionality assessment, a substantial portion (at least 50%) of variable remuneration may consist of units or shares of the WMF Global Funds concerned or unit/share-linked non-cash instruments, unless the management of UCITS accounts for less than half of the portfolios managed by IFM, in which case the 50% minimum shall not apply. Any non-cash instruments granted in accordance with the above will be subject to an appropriate retention policy, designed to align the Identified Staffs' incentives with the interests of the WMF Global Funds.

3. Variable remuneration deferral: - this process is not currently in place.

- A substantial portion (at least 40%) of the variable remuneration may be deferred over an appropriate period, in view of the life cycles and the recommended investment holding period of the UCITS concerned and will be aligned with the nature of the risks of the WMF Global Funds in question.
- This period shall be at least three years for UCITS, and vesting will occur no faster than on a pro-rata basis.
- If variable remuneration is particularly high, 60% may be deferred.
- Variable remuneration will generally be considerably reduced where negative financial performance of IFM or the WMF Global Funds it manages occurs, taking into account current compensation and reductions in payouts previously earned.

4. Discretionary pension benefits: - this process is not currently in place. If IFM is aware of Identified Staff leaving IFM before retirement, any discretionary pension benefits that may have been awarded will be held by IFM for a period of five years in the form of shares or share-linked instruments. Otherwise, discretionary pension benefits shall be paid in the form of shares or share-linked instruments, subject to a five-year retention period.

5. Hedging: Identified Staff subject to the payout process rules must undertake not to use personal hedging or remuneration-related insurance to undermine the risk-alignment effects of their remuneration arrangements.

Delegates

When delegating portfolio management or risk management activities, and where the remuneration rules would otherwise be circumvented, IFM will ensure that (i) the delegates are subject to regulatory requirements on remuneration deemed equally effective as those applicable under the ESMA Guidelines on Sound Remuneration or (ii) appropriate contractual arrangements are put in place to ensure that there is no circumvention of the remuneration rules set out in the ESMA Guidelines on Sound Remuneration. This practice adopted by IFM is in line with Sub-section 6.3.2.2, paragraph 495 of the Circular CSSF 18/698.

Remuneration committee

Taking into consideration the IFM's size, internal organization and the nature scope and complexity of its activities and, thus, on the basis of the application of proportionality principles, the IFM is currently not intending to establish a remuneration committee. IFM will establish a remuneration committee if at any point it deems such establishment proportionate to oversee the implementation of this Policy with respect to decisions with risk implications relating to IFM and the WMF Global Funds.

Sustainability Risks

In accordance with Article 5 of the SFDR, IFM believes this Policy to be consistent with the integration of the consideration of sustainability risks in the investment decision-making process. For more information, please see www.wellingtonfunds.com/SFDR.

Procedures and practices

IFM applies remuneration policies, practices, and procedures that are consistent with and promote sound, prudent and effective risk management and do not encourage inappropriate risk-taking. Furthermore, these policies and practices are designed to ensure that conflicts of interest are prevented or appropriately managed.

The practices associated with implementation of the Policy are overseen by the Conducting Officers responsible for Risk Management and Human Resources.

Exceptions

Not applicable in the context of this Policy.

Remuneration Policy (continued)

Adoption and Annual Review

IFM's remuneration policy was adopted by the Board of Managers on November 15, 2015 for adoption on January 1, 2016. The policy was updated in May 2024.

The Board of Managers is satisfied that IFM's remuneration policies are designed to be consistent with the UCITS Regulations.

Remuneration for the year ended September 30, 2024

For the financial year ended September 30, 2024, Wellington Luxembourg S.à r.l. ("WLSARL") acted as the Management Company of Wellington Management Funds (Luxembourg), Wellington Management Funds (Luxembourg) III SICAV and Wellington Management Funds Ireland plc, and as Alternative Investment Fund Manager of Wellington Management Funds (Luxembourg) II and Wellington Management Funds (Luxembourg) II SICAV. The remuneration information provided below represents information relevant to the Company and is calculated as outlined in the footnotes.

Quantitative remuneration information is outlined below:

Remuneration Year ended September 30, 2024	Fixed Remuneration	Variable Remuneration	Total Remuneration
Total amount paid by the IFM to its staff, attributable to the Company[1]	**$45,588**	**$8,776**	**$54,364**
Total number of beneficiaries[2]			**18**
Aggregate amount paid to the IFM senior management, attributable to the Company[3]	**$22,490**	**$16,001**	**$38,491**
Aggregate amount paid to members of staff of entities to which investment management activities have been delegated by the IFM whose actions have a material impact on the risk profile of the Company, attributable to the Company[4]	**$11,240**	**$26,355**	**$37,595**

[1] The total remuneration has been allocated based on the proportion of the total net assets of the Company with respect to the total net assets of the Funds managed by the Investment Fund Manager ("IFM").
[2] The average number of staff through the year from October 1, 2023 to September 30, 2024 excluding senior management.
[3] The total remuneration has been allocated based on the proportion of the total net assets of the Company with respect to the total net assets of the Funds managed by the IFM, as well as the proportionate time spent on Management functions.
[4] The total remuneration has been aggregated based on the incentives earned by staff for each Fund of the Company.

The portfolio turnover rate for the financial year ended September 30, 2024 for each Fund is as follows:

	September 30, 2024
Wellington US Brand Power Fund	21%
Wellington US Quality Growth Fund	129%
Wellington Global Property Income Fund	99%
Wellington Next Generation Global Equity Fund	140%
Wellington Next Generation Education Fund	63%
Wellington Sustainable Outcomes Fund	12%
Wellington Global Equity Income Fund	23%
Wellington Asia Quality Income Fund	40%
Wellington Multi-Asset High Income Fund	69%
Wellington Credit Income Fund	204%
Wellington Asia Credit Income Fund	106%
Wellington Credit Total Return Fund	365%

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Wellington Emerging Markets Research Equity Core Fund

Legal entity identifier:
549300B3S4QFL321YO93

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of__% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending September 30, 2024:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet the following environmental characteristic.

Companies with disclosed carbon data that enable the Fund to limit the overall impact of the portfolio on climate change relative to the investment universe by maintaining a lower weighted average carbon intensity ("WACI") than the MSCI Emerging Markets Index (the "Index"). In order to do this, companies are screened to enable the Fund to restrict investment in companies that are principally involved in fossil fuel extraction/production related activity, companies which derive more than 5% of their revenue from thermal coal mining activities, or more than 20% of their revenue from thermal coal energy generation identified using a combination of third party and/or internal Wellington Management analysis, in addition to the criteria set out in the Exclusion Policy.

Whilst the Index is used for WACI comparison purposes, a reference benchmark has not been designated for the purpose of attaining the environmental characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	September 30, 2024
The percentage difference of the Fund's WACI and that of the Index's. Since the Fund aims to maintain a WACI that is at least 50% lower than the Index, that percentage should be at least 50%.	-54.67%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

… and compared to previous periods?

Sustainability Indicator	September 30, 2024	September 30, 2023
The percentage difference of the Fund's WACI and that of the Index's. Since the Fund aims to maintain a WACI that is at least 50% lower than the Index, that percentage should be at least 50%.	-54.67%	-55.39%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the Principal adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:
1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.
2. The Fund will maintain a carbon footprint (weighted average carbon intensity) limited to a maximum percentage of the Index. The Fund will aim to reduce its weighted average carbon intensity ("WACI") to net zero by 2050, or sooner, in accordance with the Paris Agreement - PAIs: Carbon Footprint; GHG Emissions, GHG Intensity of Investee Companies.
3. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.
While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund. The Fund further commits to report on these Principal Adverse Impacts periodically with such report to be included in the annual report of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	September 30, 2024
1. GHG emissions	31153.65tCO2e
2. Carbon footprint	399.99tCO2e/ €M invested
3. GHG intensity of investee companies	1008.34tCO2e/ €M revenue
4. Exposure to companies active in the fossil fuel sector	3.69%
5. Share of non - renewable energy consumption and production	84.93%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-10-01/2024-09-30

Largest investments	Sector	% of net assets	Country
Taiwan Semi	Information technology	8.90%	TW
Tencent Holdings Ltd	Communication services	5.62%	CN
Samsung Electronics	Information technology	4.79%	KR
HDFC Bank Ltd	Financials	2.38%	IN
Contemporary Amperex	Industrials	1.96%	CN
Axis Bank Ltd	Financials	1.77%	IN
Shinhan Financial	Financials	1.70%	KR
Bharti Airtel LTD	Communication services	1.68%	IN
Banco Bradesco SA	Financials	1.59%	BR
Meituan	Consumer discretionary	1.50%	CN

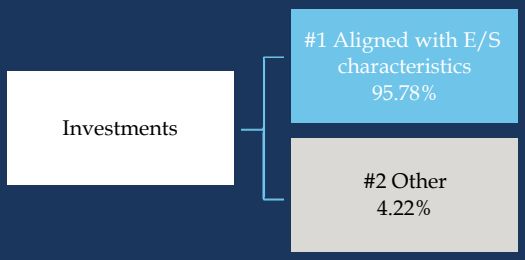
Adani Ports and SEZ	Industrials	1.45%	IN
China Merchants Bank	Financials	1.43%	CN

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Pre-contractual disclosure commitment:

A minimum of 80% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

Asset allocation overview	% of net assets as at September 30, 2024
#1 Aligned with E/S characteristics	95.78%
#2 Other	4.22%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

In which economic sectors were the investments made?

Source: MSCI

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of September 30, 2024:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

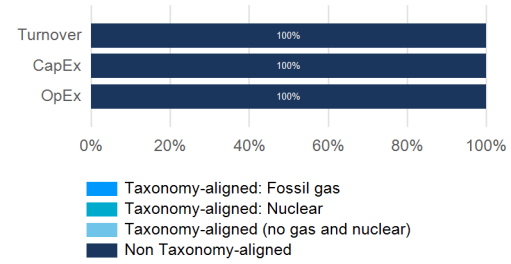
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

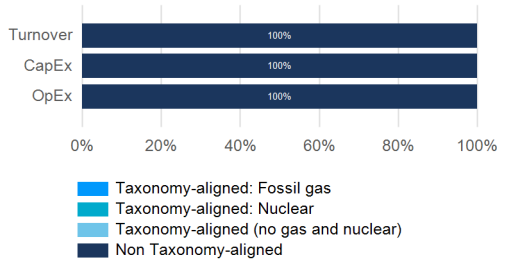
Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 99.04% of the total investments.

**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: MSCI

What was the share of investments made in transitional and enabling activities?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of investments in transitional and enabling activities is 0%.

Taxonomy aligned investments	% of market value as at September 30, 2024
Transitional Turnover	0.00%
Transitional Capex	0.00%
Transitional Opex	0.00%
Enabling Turnover	0.00%
Enabling Capex	0.00%
Enabling Opex	0.00%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable. This Fund does not commit to invest in sustainable investments.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for EPM, hedging, and investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards. However, some minimum safeguards may still be considered to apply to the extent such holdings are aligned with one or more but not all of the Fund's environmental or social characteristics.

Asset allocation overview	% of net assets as at September 30, 2024
#2 Other	4.22%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Wellington US Brand Power Fund

Legal entity identifier:
549300JNK3Q85HMM6871

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of__% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending September 30, 2024:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet the following environmental characteristic.

Companies with disclosed carbon data that enable the Fund to limit the overall impact of the portfolio on climate change relative to the investment universe by maintaining a lower weighted average carbon intensity ("WACI") than the S&P 500 Index (the "Index"). The Fund is anticipated to have a natural bias to lower carbon emitters due to its focus on companies which optimise the long-term value of their assets, including through consideration of the impact of climate change on their businesses.

Whilst the Index is used for WACI comparison purposes, a reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	September 30, 2024
The percentage difference of the Fund's WACI and that of the Index's. Since the Fund aims to maintain a WACI that is no less than 50% below the Index, that percentage should be at least 50%.	-70.92%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

… and compared to previous periods?

Sustainability Indicator	September 30, 2024	September 30, 2023
The percentage difference of the Fund's WACI and that of the Index's. Since the Fund aims to maintain a WACI that is no less than 50% below the Index, that percentage should be at least 50%.	-70.92%	-84.74%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:

1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.

2. The Fund will maintain a carbon footprint (weighted average carbon intensity) limited to a maximum percentage of the Index. PAIs: Carbon Footprint; GHG Emissions, GHG Intensity of Investee Companies.

3. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund. The Fund further commits to report on these Principal Adverse Impacts periodically with such report to be included in the annual report of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	September 30, 2024
1. GHG emissions	28412.08tCO2e
2. Carbon footprint	72.84tCO2e/ €M invested
3. GHG intensity of investee companies	387.09tCO2e/ €M revenue
4. Exposure to companies active in the fossil fuel sector	0.00%
5. Share of non - renewable energy consumption and production	50.85%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI

Wellington Management Funds (Luxembourg) III SICAV

Appendix 6 – Sustainable Finance Disclosure Regulation ("SFDR") (Unaudited)

for the financial year ended September 30, 2024

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-10-01/2024-09-30

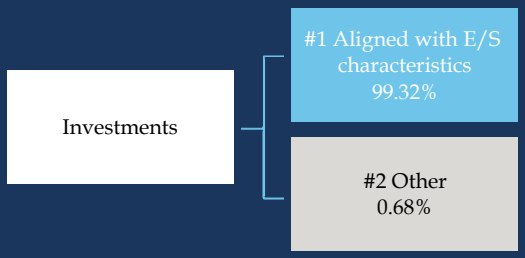
Largest investments	Sector	% of net assets	Country
Microsoft Corp	Information technology	9.03%	US
Amazon.com Inc	Consumer discretionary	5.99%	US
Apple Inc	Information technology	5.74%	US
Alphabet Inc	Communication services	5.35%	US
NVIDIA Corp	Information technology	4.71%	US
Mastercard Inc	Financials	4.01%	US
JPMorgan Chase & Co	Financials	3.40%	US
Meta Platforms Inc	Communication services	3.18%	US
Procter & Gamble Co	Consumer staples	2.99%	US
American Express Co	Financials	2.81%	US
UnitedHealth Group	Health care	2.59%	US
S&P Global Inc	Financials	2.45%	US

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Pre-contractual disclosure commitment:

A minimum of 90% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

Asset allocation overview	% of net assets as at September 30, 2024
#1 Aligned with E/S characteristics	99.32%
#2 Other	0.68%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

In which economic sectors were the investments made?

Sector	Sub Sector	% of net assets
Communication services	Interactive media & services	8.53%
	Entertainment	3.68%
Consumer discretionary	Broadline retail	5.99%
	Hotels, restaurants & leisure	4.62%
	Textiles, apparel & luxury goods	2.70%
	Specialty retail	1.55%
Consumer staples	Household products	4.47%
	Beverages	3.91%
	Personal care products	2.15%
Financials	Financial services	4.78%
	Banks	3.40%
	Capital markets	3.24%
	Consumer finance	2.81%
Health care	Life sciences tools & services	6.76%
	Health care providers & services	2.59%
	Pharmaceuticals	1.45%
	Health care technology	0.94%
Industrials	Machinery	4.78%
	Building products	1.93%
	Ground transportation	1.17%
Information technology	Software	15.56%
	Tech hardware,storage & peripheral	5.74%
	Semiconductors & semiconductor eqpt	4.71%
	It services	0.82%
Materials	Chemicals	1.69%
Not classified	Not classified	0.02%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS classification hierarchy. Source: MSCI

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of September 30, 2024:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

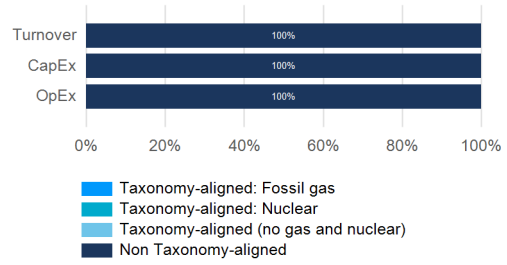
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

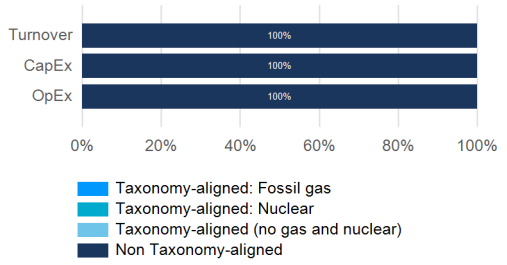
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 99.33% of the total investments.

**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: MSCI

What was the share of investments made in transitional and enabling activities?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of investments in transitional and enabling activities is 0%.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational**

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

expenditure (OpEx) reflecting green operational activities of investee companies.

Taxonomy aligned investments	% of market value as at September 30, 2024
Transitional Turnover	0.00%
Transitional Capex	0.00%
Transitional Opex	0.00%
Enabling Turnover	0.00%
Enabling Capex	0.00%
Enabling Opex	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable. This Fund does not commit to invest in sustainable investments.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for hedging and/or/ investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards.

Asset allocation overview	% of net assets as at September 30, 2024
#2 Other	0.68%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Wellington US Quality Growth Fund

Legal entity identifier:
549300UDTLYNS3A7IQ08

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of__% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending September 30, 2024:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet the following environmental characteristic.

Companies with disclosed carbon data that enable the Fund to limit the overall impact of the portfolio on climate change relative to the investment universe by maintaining a lower weighted average carbon intensity ("WACI") than the S&P 500 Index (the "Index"). The Fund is anticipated to have a natural bias to lower carbon emitters due to its focus on companies which optimise the long-term value of their assets, including through consideration of the impact of climate change on their businesses.

Whilst the Index is used for WACI comparison purposes, a reference benchmark has not been designated for the purpose of attaining the environmental characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	September 30, 2024
The percentage difference of the Fund's WACI and that of the Index's. Since the Fund aims to maintain a WACI that is at least 25% lower than the Index, that percentage should be at least 25%.	-47.64%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

… and compared to previous periods?

Sustainability Indicator	September 30, 2024	September 30, 2023
The percentage difference of the Fund's WACI and that of the Index's. Since the Fund aims to maintain a WACI that is at least 25% lower than the Index, that percentage should be at least 25%.	-47.64%	-65.98%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:
1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.

2. The Fund will maintain a carbon footprint (weighted average carbon intensity) that is lower than the Index. PAIs: Carbon Footprint; GHG Emissions, GHG Intensity of Investee Companies.

3. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	September 30, 2024
1. GHG emissions	29709.65tCO2e
2. Carbon footprint	132.53tCO2e/ €M invested
3. GHG intensity of investee companies	414.71tCO2e/ €M revenue
4. Exposure to companies active in the fossil fuel sector	5.74%
5. Share of non - renewable energy consumption and production	54.88%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI

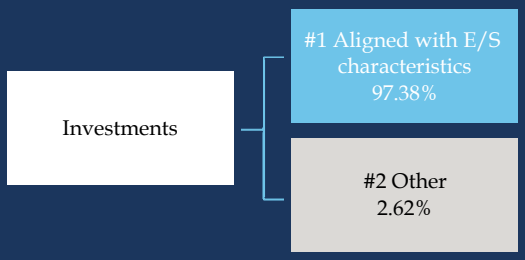
The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Pre-contractual disclosure commitment:

A minimum of 90% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

Asset allocation overview	% of net assets as at September 30, 2024
#1 Aligned with E/S characteristics	97.38%
#2 Other	2.62%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

In which economic sectors were the investments made?

Sector	Sub Sector	% of net assets
Communication services	Interactive media & services	8.65%
	Entertainment	2.02%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of September 30, 2024:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

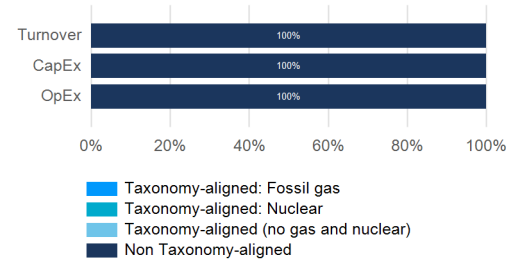
☐ Yes

☐ In fossil gas ☐ In nuclear energy

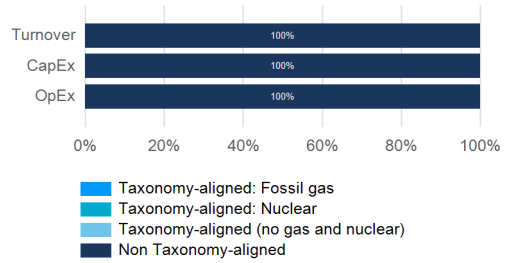
☒ No

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 97.42% of the total investments.

**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable. This Fund does not commit to invest in sustainable investments.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for hedging and investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards.

Asset allocation overview	% of net assets as at September 30, 2024
#2 Other	2.62%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Wellington Global Property Income Fund

Legal entity identifier:
549300IC20NDLXC3VC14

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 1.83% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending September 30, 2024:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet the following environmental characteristic.

The Fund will invest in companies and REITs with average or above-average E Rating relative to their peer universe, by investing at least 75% of the Fund's net assets in companies with an E Rating of 1-3, without preference for a specific rating.

In order to do this, the Fund assigns companies and REITS an individual E Rating, based on Wellington Management's proprietary ratings framework, using a rating scale of 1-5, where 1 is the highest rating. A rating of 1 is the most positive rating, indicating that the issuer is a leader among its peers in managing material environmental or social risks or incorporating environmental or social factors into its practices.

A rating of 5 is the most negative, indicating that the issuer may be lagging its peers in managing certain material environmental or social risks or incorporating environmental or social factors into its practices. E Ratings use environmental indicators (such as energy efficiency, carbon emissions and pollutants, sustainable packaging and hazardous waste).

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	September 30, 2024
The percentage of the Fund's net assets invested in companies and REITs with an E Rating of 1-3. Since the Fund will invest a minimum of 75% of the Fund's net assets in companies and REITs with an E Rating of 1-3, this percentage should be at least 75%.	93.75%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

… and compared to previous periods?

Sustainability Indicator	September 30, 2024	September 30, 2023
The percentage of the Fund's net assets invested in companies and REITs with an E Rating of 1-3. Since the Fund will invest a minimum of 75% of the Fund's net assets in companies and REITs with an E Rating of 1-3, this percentage should be at least 75%.	93.75%	88.21%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

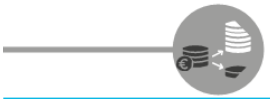
Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:
1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.
2. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.
While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund. The Fund further commits to report on these Principal Adverse Impacts periodically with such report to be included in the annual report of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	September 30, 2024
4. Exposure to companies active in the fossil fuel sector	0.00%
5. Share of non - renewable energy consumption and production	82.76%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI



What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-10-01/2024-09-30

Largest investments	Sector	% of net assets	Country
Prologis Inc	Real estate	7.01%	US
Welltower Inc	Real estate	4.53%	US

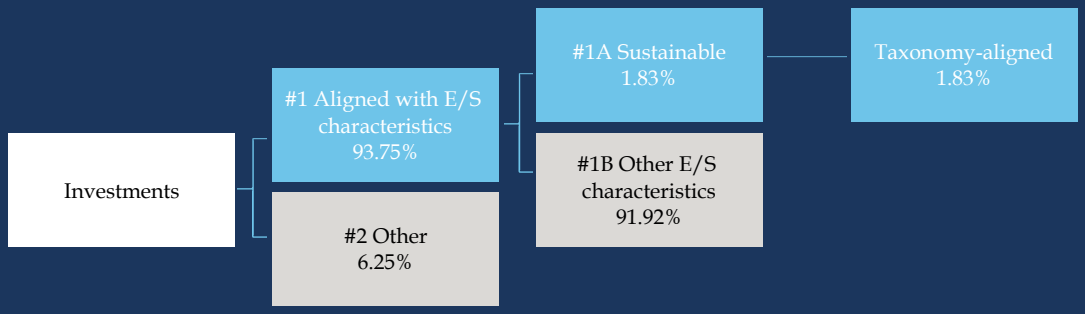
The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Pre-contractual disclosure commitment:

A minimum of 75% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

Asset allocation overview	% of net assets as at September 30, 2024
#1 Aligned with E/S characteristics	93.75%
#2 Other	6.25%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

In which economic sectors were the investments made?

Sector	Sub Sector	% of net assets
Consumer discretionary	Household durables	3.71%
Financials	Financial services	1.36%
Industrials	Industrial conglomerates	1.58%
	Construction & engineering	0.47%
Not classified	Not classified	0.10%
Real estate	Retail reits	18.52%
	Industrial reits	14.02%
	Real estate management & develop	12.68%
	Residential reits	11.42%
	Specialized reits	11.25%
	Health care reits	8.81%
	Diversified reits	7.95%
	Office reits	5.06%
	Hotel & resort reits	3.37%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS classification hierarchy. Source: MSCI

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of September 30, 2024:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

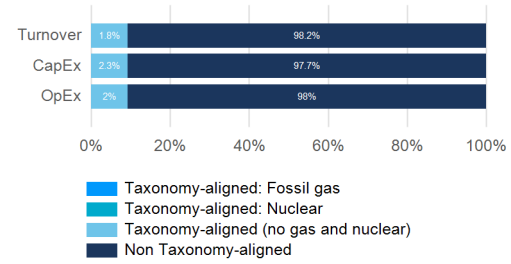
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

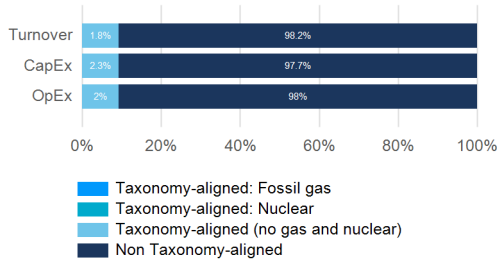
Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 98.89% of the total investments.

**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable. This Fund does not commit to invest in sustainable investments.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for hedging and investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards.

Asset allocation overview	% of net assets as at September 30, 2024
#2 Other	6.25%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 94.12% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending September 30, 2024:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet one or more of the following environmental or social characteristics.

1. Companies that are considered Sustainable Investments. The Fund invests in companies the Investment Manager believes are positioned to benefit from themes relating to the next generation of structural changes and economic development in global developed and emerging markets. The Investment Manager seeks to identify investment opportunities which both align with the UN Sustainable Development Goals ("UN SDGs") and reflect the following long-term environmental and social themes:

• Innovation –including social and environmental objectives such as increasing innovation and the efficiency of all available factors of production in areas such as advances in use of technology, promotion of innovation, and institutional reform
• Sustainability –including environmental objectives such as using available resources with due consideration for future generations and the environment in areas such providing better access to recycling, waste management, energy efficiency, alternative energy sources, testing and diagnostics
• Inclusion –including social objectives such as improving living standards and broadening the range of beneficiaries of economic development in areas such as improving access to health care, education and finance

As described in the paragraph above, each of the themes includes either predominantly environmental or predominantly social objectives. However, each such objective may have both environmental and social benefits.

Alignment with these sustainable goals is determined in the theme universe construction process. Only companies which have a minimum of 50% of their revenue aligned with the theme's objective (or the Investment Manager projects that the total revenue that aligns with the theme will grow to at least a minimum of 50% in the near future) —are included in the investible universe for that theme.

In line with the Fund's thematic approach, the Investment Manager will promote sustainable economic development by investing at least 75% of the Fund's net assets in companies that are considered Sustainable Investments. Sustainable Investments may contribute to either environmental or social objectives in line with the environmental and social themes above. Although the proportion of Sustainable Investments with environmental or social objectives may vary over time, the Investment Manager will maintain at least 40% of the Fund's NAV in Sustainable Investments with a social objective.

2. Companies that are screened to enable the Fund to exclude companies identified as involved in the mining of thermal coal. The Fund also considers any revenue generated from thermal coal, excluding any company that generates more than 25% of its revenue from thermal coal energy generation (in addition to the criteria set out in the Exclusion Policy).

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	September 30, 2024
The number of companies that are involved in the mining of thermal coal. The number of companies that generate more than 25% of their revenue from thermal coal energy generation identified using a combination of third party and/or internal Wellington Management analysis.	0
The percentage of the Fund's net assets invested in companies that are considered Sustainable Investments. The Fund will maintain at least 75% of the Fund's net assets in shares of companies that meet these criteria.	94.12%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Pre-contractual disclosure commitment:

The Fund invests in companies that the Investment Manager believes contribute to sustainable economic development in global developed and emerging markets.
The Investment Manager seeks to identify investment opportunities which both align with the UN Sustainable Development Goals ("UN SDGs") and reflect the following long-term themes:
• Innovation –Increasing innovation and the efficiency of all available factors of production in areas such as advances in use of technology, promotion of innovation, institutional reform.
• Sustainability –Using available resources with due consideration for future generations and the environment in areas such providing better access to recycling, waste management, energy efficiency, alternative energy sources, testing and diagnostics.
• Inclusion –Improving living standards and broadening the range of beneficiaries of economic development in areas such as improving access to health care, education and finance.
Alignment with these sustainable goals is determined in the theme universe construction process. Only companies which have a minimum of 50% of their revenue aligned with the theme's objective (or the Investment Manager projects that the total revenue that aligns with the theme will grow to at least a minimum of 50% in the near future) —are included in the investible universe for that theme.

The Investment Manager invested across all of the themes mentioned above during the period and are therefore contributors to the sustainable objective. Individual topics within the themes may fluctuate throughout the year. Reviews are done periodically by the investment manager.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Effective January 1, 2023, Sustainable Investments were assessed against each of the mandatory corporate and/or sovereign Principal Adverse Impacts, as appropriate for the asset type, and as listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs"). PAIs were assessed quantitatively and/or qualitatively according to third party data or by Wellington's research analysts and investment teams using company disclosures, internal research and analysis regarding issuer activities. Where PAI data was determined to be unreliable or unavailable, and as applicable to the asset type, the Investment Manager conducted further due diligence and assessed the issuer's activities, processes or policies related to climate, environmental, social and/or anti-bribery/anti-corruption matters to determine that the issuer was not doing significant harm. Instances of controversy or negative findings were evaluated against the issuer's response in alignment with the expectations set forth by the UN Guiding Principles on Business and Human Rights.

Please refer to the Fund's Pre-Contractual Disclosure, attached to the Fund's prospectus, for additional detail on this assessment.

How were the indicators for adverse impacts on sustainability factors taken into account?

Effective January 1, 2023, and pursuant to Level II of SFDR, adverse impact compliance screens were implemented to assess Do No Significant Harm (DNSH) for Sustainable Investments. Where the PAIs reflect a quantitative data point and such quantitative data is available, each Sustainable Investment is compared against quantitative thresholds set by the Investment Manager as applicable to the asset type. The thresholds may be determined by setting express conditions or fixed numerical thresholds for a given PAI.

Certain PAIs are evaluated relative to industry peers and the worst companies in those industries will set the standard for determining significant harm. Where the Investment Manager has determined that industry differentiation is less meaningful, thresholds will be set in the context of all issuers. Where the Investment Manager has determined that differentiation is less meaningful or for PAIs which are more qualitative in nature (e.g., PAIs relating to the UNGC Principles and the OECD Guidelines for Multinational Enterprises) significant harm is assessed by evaluating, among others, companies' activities, management policies and practices, remediation activities or unresolved controversies using third party data.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was tested as part of the Investment Manager's process to identify Sustainable Investments. Assessment of management policies and practices is used to determine alignment. Misalignment with the OECD Guidelines for Multinational Enterprises or the UN Guiding Principles on Business and Human Rights may be determined where the Investment Manager identifies UN Global Compact non-compliance, inadequate policies and/or unresolved controversies.

Issuers assessed to be in breach of the OECD Guidelines for Multinational Enterprises or the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights are not eligible to be classified as Sustainable Investments. As of September 30, 2024, none of the Fund's Sustainable Investments were identified to have failed the test.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

The Fund's Sustainable Investments are assessed against each of the mandatory corporate and/or sovereign PAIs to determine that the Sustainable Investments do not cause significant harm to any environmental or social sustainable objective. In addition, by virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the PAIs into consideration either directly or indirectly on all or a portion of the Fund as follows:
1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.
2. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	September 30, 2024
4. Exposure to companies active in the fossil fuel sector	7.20%
5. Share of non - renewable energy consumption and production	78.37%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-10-01/2024-09-30

Largest investments	Sector	% of net assets	Country
Wolters Kluwer	Industrials	1.50%	NL

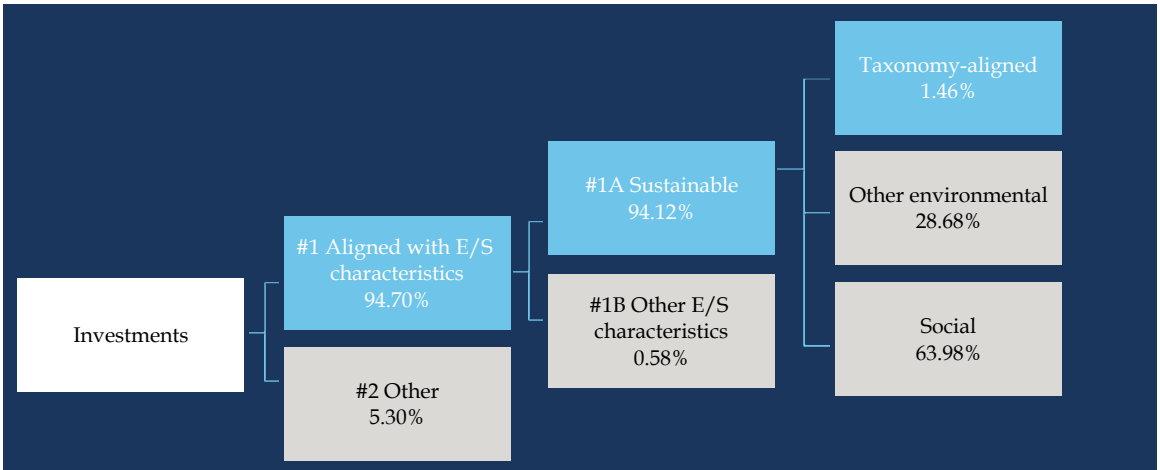
Alphabet Inc	Communication services	1.19%	US
Tencent Holdings Ltd	Communication services	1.14%	CN
Boston Scientific	Health care	1.14%	US
Edison Intl	Utilities	1.14%	US
Amazon.com Inc	Consumer discretionary	1.12%	US
Cipla Ltd/India	Health care	1.06%	IN
ICON PLC	Health care	1.05%	IE
UnitedHealth Group	Health care	1.05%	US
Vertex Pharmaceuticals	Health care	1.05%	US
Engie SA	Utilities	1.04%	FR
Manpowergroup Inc	Industrials	1.03%	US

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Pre-contractual disclosure commitment:

A minimum of 75% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

In line with the Fund's thematic approach, the Investment Manager will promote sustainable economic development by investing at least 75% of the Fund's net assets in companies that are considered Sustainable Investments. Although the proportion of Sustainable Investments with environmental or social objectives may vary over time, the Investment Manager will maintain at least 10% in Sustainable Investments with an environmental objective and at least 40% in Sustainable Investments with a social objective.

Asset allocation overview	% of net assets as at September 30, 2024
#1 Aligned with E/S characteristics	94.70%
#2 Other	5.30%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

Although the Fund commits to invest in Sustainable Investments with an environmental objective within the meaning of the SFDR, the minimum share of EU Taxonomy-aligned investments is 0%.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of September 30, 2024:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

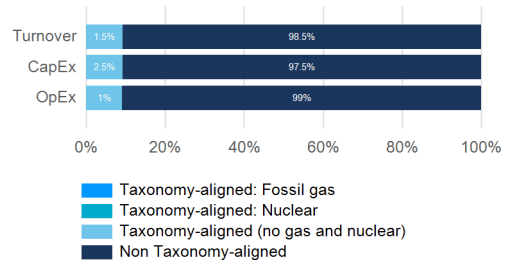
☐ Yes

☐ In fossil gas ☐ In nuclear energy

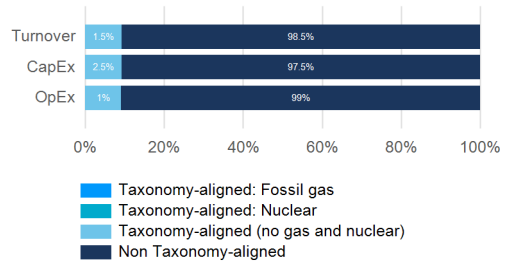
☒ No

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 99.56% of the total investments.

**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

Although the Fund commits to make Sustainable Investments with an environmental objective within the meaning of the SFDR, the minimum share of such investments with an environmental objective not EU Taxonomy-aligned is 10%. These investments could be aligned with the EU Taxonomy but the Investment Manager is not currently in a position to specify the exact proportion of the Fund's underlying investments which take into account the EU criteria for environmentally sustainable economic activities. However, the position is kept under review as the underlying rules are finalized and the availability of reliable data increases over time.

Asset allocation overview	% of net assets as at September 30, 2024
#1A Sustainable Investments: Other environmental	28.68%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What was the share of socially sustainable investments?

Pre-contractual disclosure commitment:

Minimum 40% of the Fund's net assets are invested in socially sustainable investments.

Asset allocation overview	% of net assets as at September 30, 2024
#1A Sustainable Investments: Social	63.98%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for hedging and/or investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards. However, some minimum safeguards may still be considered to apply to the extent such holdings are aligned with one or more but not all of the Fund's environmental or social characteristics.

Asset allocation overview	% of net assets as at September 30, 2024
#2 Other	5.30%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Wellington European Stewards Fund

Legal entity identifier:
549300TKJ623F5U1RM61

Sustainable investment objective

Does this financial product have a sustainable investment objective ?

☒ Yes	☐ No
☒ It made **sustainable investments with an environmental objective:** 70.77%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of__% of sustainable investments
☒ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☒ It made **sustainable investments with a social objective:** 27.89%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The following sustainable investment objectives were met by the Fund during the financial year ending September 30, 2024:

Pre-contractual disclosure commitment:

The Investment Manager will seek to invest in companies whose management teams and boards display exemplary 'stewardship'. The Investment Manager defines stewardship as how companies balance the interests of all stakeholders (e.g. customers, employees, communities and the supply chain) in the pursuit of profits and how they incorporate material environmental, social and governance ("ESG") risks and opportunities in their corporate strategy.

The Investment Manager will invest in companies that are assessed to contribute to one or more of the following environmental and social stewardship criteria which are aligned with the sustainable objective of the Fund.

Social criteria such as;
• responsible sourcing and production practices,
• consumer privacy and cybersecurity,
• sustainable investment in technology, innovation, and human capital.
Environmental criteria such as;
• sustainable product design and resilient infrastructure,
• responsible waste / end of product life cycle,
• supply chain engagement.

As described in the paragraph above, each of the themes includes either predominantly environmental or predominantly social stewardship criteria. However, each environmental and social stewardship criteria may have both environmental and social benefits.

The Investment Manager uses its proprietary scorecard to evaluate both the return and stewardship pillars of the investment approach. The scorecard seeks to quantify otherwise qualitative critical stewardship attributes such as executive skill and alignment and the effectiveness of the board. The Investment Manager anticipate the scorecard framework to evolve over time given ESG/stewardship issues are not static. The Investment Manager believes that if a company prioritizes stewardship in running its business, it will increase the ability of the company to sustain high returns over the long term. Further, every investment candidate for the Fund must exhibit an explicit focus on all stakeholders by evidencing factors such as their accountability of supply chain, focus on water usage intensity or running the business with a long term orientation.

The Fund will invest a minimum of 90% of its net assets in companies which meet the above criteria and which are assessed to be Sustainable Investments. Sustainable Investments may contribute to either environmental or social objectives. Although the proportion of Sustainable Investments with environmental or social objectives may vary over time, the Investment Manager will maintain at least 20% in Sustainable Investments with an environmental objective and at least 10% in Sustainable Investments with a social objective.

Although the Fund does not have a reduction in carbon emissions as its objective pursuant to Article 9(3) of SFDR, the Fund targets net zero emissions by 2050 in alignment with the Paris Agreement by investing in companies that have set carbon emission reduction targets or maintain lower carbon emissions relative to their industry average.

In relation to the net zero commitment, the science-based targets initiative ("SBTi") provides a clearly defined pathway for companies to reduce greenhouse gas emissions. Targets are considered 'science-based' if they are in line with what the latest climate science deems necessary to meet the goals of the Paris Agreement –limiting global warming to well-below 2°C above pre-industrial levels and pursuing efforts to limit warming to 1.5°C.

A reference benchmark has not been designated for the purpose of attaining the Sustainable Investment objective of the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

The Investment Manager invested across the environmental and social stewardship criteria mentioned above or equivalent environmental and social stewardship criteria during the period and are therefore contributors to the sustainable objective. Allocations across the environmental or social stewardship criteria may fluctuate throughout the year.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	September 30, 2024
The percentage of the Fund's net assets invested in companies with established or which have committed to establish a science-based target.	82.06%
The percentage of the Fund's net assets in companies that are considered Sustainable Investments and contribute to one or more of the Funds stewardship criteria.	98.66%
The percentage of the Fund's net assets invested in companies with an alternative public active emissions reduction target.	98.66%
The percentage of the Fund's net assets invested in companies with combined scope 1 and 2 carbon intensity (tons CO2/$M revenue) that is at least 25% below their industry average based on publicly disclosed emissions.	89.06%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

Effective January 1, 2023, Sustainable Investments were assessed against each of the mandatory corporate and/or sovereign Principal Adverse Impacts, as appropriate for the asset type, and as listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs"). PAIs were assessed quantitatively and/or qualitatively according to third party data or by Wellington's research analysts and investment teams using company disclosures, internal research and analysis regarding issuer activities. Where PAI data was determined to be unreliable or unavailable, and as applicable to the asset type, the Investment Manager conducted further due diligence and assessed the issuer's activities, processes or policies related to climate, environmental, social and/or anti-bribery/anti-corruption matters to determine that the issuer was not doing significant harm. Instances of controversy or negative findings were evaluated against the issuer's response in alignment with the expectations set forth by the UN Guiding Principles on Business and Human Rights.

Please refer to the Fund's Pre-Contractual Disclosure, attached to the Fund's prospectus, for additional detail on this assessment.

How were the indicators for adverse impacts on sustainability factors taken into account?

Effective January 1, 2023, and pursuant to Level II of SFDR, adverse impact compliance screens were implemented to assess Do No Significant Harm (DNSH) for Sustainable Investments. Where the PAIs reflect a quantitative data point and such quantitative data is available, each Sustainable Investment is compared against quantitative thresholds set by the Investment Manager as applicable to the asset type. The thresholds may be determined by setting express conditions or fixed numerical thresholds for a given PAI.

Certain PAIs are evaluated relative to industry peers and the worst companies in those industries will set the standard for determining significant harm. Where the Investment Manager has determined that industry differentiation is less meaningful, thresholds will be set in the context of all issuers. Where the Investment Manager has determined that differentiation is less meaningful or for PAIs which are more qualitative in nature (e.g., PAIs relating to the UNGC Principles and the OECD Guidelines for Multinational Enterprises) significant harm is assessed by evaluating, among others, companies' activities, management policies and practices, remediation activities or unresolved controversies using third party data.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was tested as part of the Investment Manager's process to identify Sustainable Investments. Assessment of management policies and practices is used to determine alignment. Misalignment with the OECD Guidelines for Multinational Enterprises or the UN Guiding Principles on Business and Human Rights may be determined where the Investment Manager identifies UN Global Compact non-compliance, inadequate policies and/or unresolved controversies.

Issuers assessed to be in breach of the OECD Guidelines for Multinational Enterprises or the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights are not eligible to be classified as Sustainable Investments. As of September 30, 2024, none of the Fund's Sustainable Investments were identified to have failed the test.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

The Fund's Sustainable Investments are assessed against each of the mandatory corporate and/or sovereign PAIs to determine that the Sustainable Investments do not cause significant harm to any environmental or social sustainable objective. In addition, by virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the PAIs into consideration either directly or indirectly on all or a portion of the Fund as follows:

1.The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.

2. The Fund will invest in companies that have a target validated by SBTi, an alternative public active emissions reduction target or a combined Scope 1+2 carbon intensity (tons CO2/$M revenue) that is at least 25% below their industry average based on publicly disclosed emissions - PAIs: Carbon Footprint; GHG Emissions, GHG Intensity of Investee Companies.

3. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	September 30, 2024
1. GHG emissions	28444.68tCO2e
2. Carbon footprint	202.00tCO2e/ €M invested
3. GHG intensity of investee companies	571.20tCO2e/ €M revenue
4. Exposure to companies active in the fossil fuel sector	9.35%
5. Share of non - renewable energy consumption and production	60.73%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI

Wellington Management Funds (Luxembourg) III SICAV

Appendix 6 – Sustainable Finance Disclosure Regulation ("SFDR") (Unaudited)

for the financial year ended September 30, 2024

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-10-01/2024-09-30

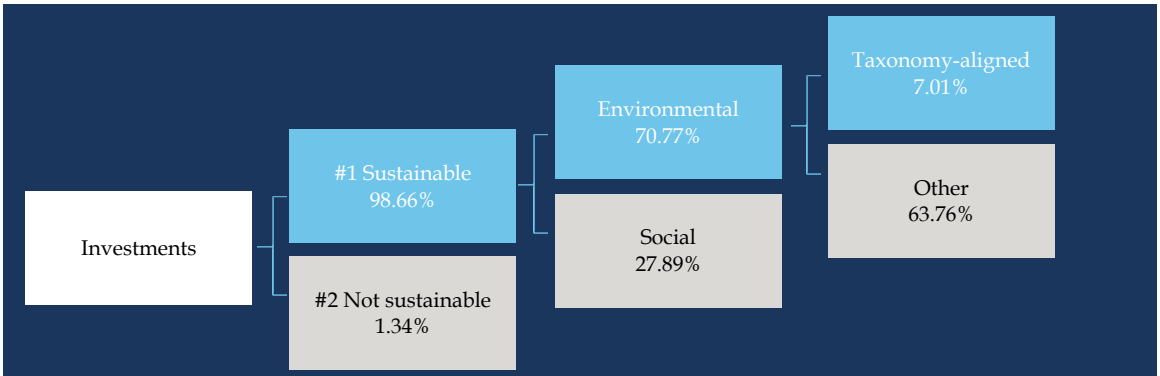
Largest investments	Sector	% of net assets	Country
ASML Holding N V	Information technology	5.74%	NL
Bureau Veritas SA	Industrials	5.63%	FR
DSM-Firmenich AG	Materials	4.75%	CH
Novartis AG	Health care	4.70%	CH
Merck KGaA	Health care	4.60%	DE
KBC Group NV	Financials	4.60%	BE
National Grid PLC	Utilities	4.53%	GB
Diageo PLC	Consumer staples	4.46%	GB
Volvo AB	Industrials	4.40%	SE
ING Groep NV	Financials	4.33%	NL
Cie Generale des Eta	Consumer discretionary	4.14%	FR

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments

Pre-contractual disclosure commitment:

The Fund will have a minimum of 90% of its net assets aligned with the #1 Sustainable category, as defined in the diagram below, with the proportion of Sustainable Investments with environmental versus social objectives varying based on the Fund's composition. Although the proportion of Sustainable Investments with environmental or social objectives may vary over time, the Investment Manager will maintain at least 20% in Sustainable Investments with an environmental objective and at least 10% in Sustainable Investments with a social objective.

Asset allocation overview	% of net assets as at September 30, 2024
#1 Sustainable	98.66%
#2 Not sustainable	1.34%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

In which economic sectors were the investments made?

Sector	Sub Sector	% of net assets
Communication services	Diversified telecommunication svcs	3.26%
Consumer discretionary	Automobile components	4.14%
	Specialty retail	4.10%
	Hotels, restaurants & leisure	2.96%
	Textiles, apparel & luxury goods	1.98%
Consumer staples	Beverages	4.46%
	Personal care products	3.02%
Energy	Oil, gas & consumable fuels	2.18%
Financials	Banks	8.93%
	Capital markets	3.18%
	Financial services	2.52%
	Insurance	1.45%
Health care	Pharmaceuticals	11.73%
Industrials	Professional services	11.08%
	Machinery	4.40%
	Electrical equipment	2.87%
Information technology	Semiconductors & semiconductor eqpt	5.74%
	It services	3.40%
Materials	Chemicals	4.75%
Not classified	Not classified	1.51%
Real estate	Industrial reits	4.01%
Utilities	Multi-utilities	4.53%
	Electric utilities	3.78%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS classification hierarchy. Source: MSCI

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

Although the Fund commits to invest in Sustainable Investments with an environmental objective within the meaning of the SFDR, the minimum share of EU Taxonomy-aligned investments is 0%.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of September 30, 2024:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

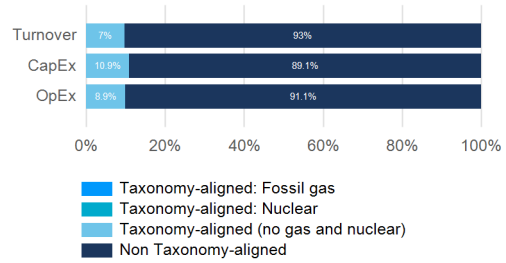
☐ Yes

☐ In fossil gas ☐ In nuclear energy

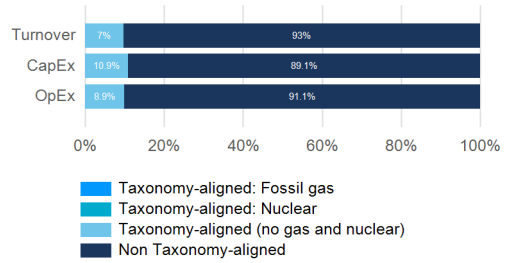
☒ No

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 98.66% of the total investments.

**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: MSCI

What was the share of investments made in transitional and enabling activities?

Pre-contractual disclosure commitment:

Although the Fund commits to invest in Sustainable Investments within the meaning of the SFDR, the minimum share of investments in transitional and enabling activities is 0%.

Taxonomy aligned investments	% of market value as at September 30, 2024
Transitional Turnover	0.00%
Transitional Capex	0.17%
Transitional Opex	0.00%
Enabling Turnover	6.44%
Enabling Capex	10.92%
Enabling Opex	7.52%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: MSCI

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Asset allocation overview	% of net assets as at September 30, 2024	% of net assets as at September 30, 2023
Taxonomy aligned investments	7.01%	7.35%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: MSCI

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

Although the Fund commits to make Sustainable Investments with an environmental objective within the meaning of the SFDR, the minimum share of such investments with an environmental objective not EU Taxonomy-aligned is 20%.
These investments could be aligned with the EU Taxonomy but the Investment Manager is not currently in a position to specify the exact proportion of the Fund's underlying investments which take into account the EU criteria for environmentally sustainable economic activities. However, the position is kept under review as the underlying rules are finalized and the availability of reliable data increases over time.

Asset allocation overview	% of net assets as at September 30, 2024
#1 Sustainable Investments: Environmental	70.77%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What was the share of socially sustainable investments?

Pre-contractual disclosure commitment:

Minimum 10% of the Fund's net assets invested in socially sustainable investments.

Asset allocation overview	% of net assets as at September 30, 2024
#1 Sustainable Investments: Social	27.89%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Not sustainable' may include cash and cash equivalents for liquidity purposes, and derivatives for EPM and hedging purposes.

There are no minimum environmental or social safeguards applied to investments made under '#2 Not sustainable'.

Asset allocation overview	% of net assets as at September 30, 2024
#2 Not sustainable	1.34%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

The Investment Manager invested across all of the impact themes mentioned above during the period. All impact themes are therefore considered contributors to the sustainable objective. Allocation to individual topics within the impact themes may fluctuate throughout the year.

The Fund engaged with companies held in the portfolio to establish or to commit to net zero science-based targets. During the reference period the Fund engaged with 20 companies.

How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Not applicable.

How did the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Wellington Climate Market Neutral Fund

Legal entity identifier:
549300EJFX5HBODN9B12

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 1.13% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending September 30, 2024:

Pre-contractual disclosure commitment:

The Fund seeks to identify a universe of companies that align with specific climate themes that have the potential to create a relative climate advantage or disadvantage, including but not limited to energy transition, sustainable transportation, electrification and climate resilience, clean technology, property risk, and climate re-pricing.

The Fund will invest a portion of its assets in accordance with either one of the following environmental characteristics.

1. Long equity exposure to companies that the Investment Manager believes have a relatively strong or improving position with respect to climate mitigation or climate adaptation and that are positively

contributing to one or more UN Sustainable Development Goal ("UN SDG") including but not limited to:
- climate action,
- sustainable cities and communities,
- responsible consumption and production,
- affordable and clean energy; and
- industry, innovation, and infrastructure.

2. Short equity exposure to companies that the Investment Manager believes have a relatively weak or weakening position with respect to climate mitigation or climate adaptation.

Whilst the Fund will generally establish long equity exposure to relative climate advantaged companies and establish short equity exposure to relative climate disadvantaged companies, long equity exposures may at times be established in relative climate disadvantaged companies, and short equity exposures may at times be established in relative climate advantaged companies for fundamental, valuation, and/or risk management purposes.

A reference benchmark has not been designated for the purpose of attaining the environmental characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	October 31, 2023
The percentage of the Fund's long equity exposure that the Investment Manager considers is climate advantaged relative to their corresponding short equity positions. Since the Fund will maintain at least 50% of its long equity exposure in companies that the Investment Manager considers are climate advantaged relative to their corresponding short equity positions, this percentage is expected to be above 50%.	82.50%
The percentage of the Fund's long equity positions that the Investment Manager considers are identified as positively contributing to one or more UN SDG. As part of the Fund's thematic approach, the Investment Manager has developed a methodology based on fundamental, bottom-up research, to assess how each products and services contribute to UN SDGs. Since the Fund will maintain at least 50% of the Fund's long equity exposure to companies that the Investment Manager considers are positively contributing to one or more UN SDG, this percentage will be above 50%.	89.80%
The percentage of the Fund's short equity exposure that the Investment Manager considers is climate disadvantaged relative to their corresponding long equity positions. Since the Fund will maintain at least 50% of its short equity exposure in companies that the Investment Manager considers are climate disadvantaged relative to their corresponding long equity positions, this percentage is expected to be above 50%.	66.02%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:

1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.
2. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	October 31, 2023
4. Exposure to companies active in the fossil fuel sector	19.95%
5. Share of non - renewable energy consumption and production	83.87%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-10-01/2023-10-31

Largest investments	Sector	% of net assets	Country
US Treasury Bill	Not classified	42.79%	US
AerCap Holdings NV	Industrials	2.45%	IE
CenterPoint Energy	Utilities	2.05%	US
Exelon Corporation	Utilities	1.95%	US
American Water Works	Utilities	1.87%	US

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE. The top investments are provided as of 31 October 2023 due to the Fund closing.

Wellington Management Funds (Luxembourg) III SICAV

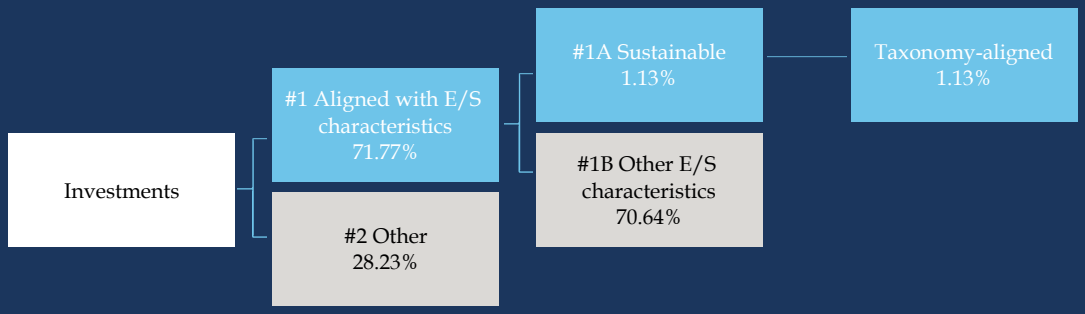
Appendix 6 – Sustainable Finance Disclosure Regulation ("SFDR") (Unaudited)

for the financial year ended September 30, 2024

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Pre-contractual disclosure commitment:

A minimum of 60% of the Fund's gross market exposure (including long and short exposures, and derivatives on equity investments), will be aligned to the E/S characteristics of the Fund.

Asset allocation overview	% of net assets as at October 31, 2023
#1 Aligned with E/S characteristics	71.77%
#2 Other	28.23%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

Source: MSCI

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of October 31, 2023:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☒ Yes

☐ In fossil gas ☒ In nuclear energy

☐ No

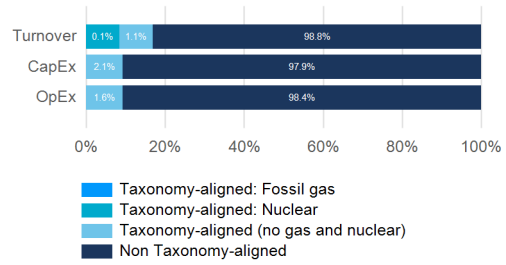
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

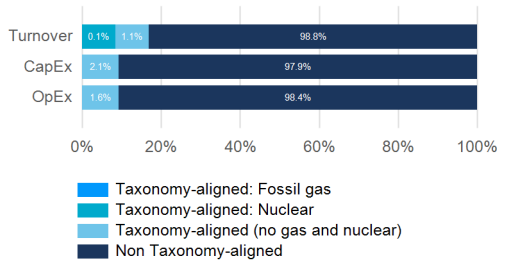
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 49.10% of the total investments.

**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable. This Fund does not commit to invest in sustainable investments.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity and collateral purposes, derivatives for hedging and investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund, including where investments are selected solely for market neutrality purposes. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards. However, some minimum safeguards may still be considered to apply to the extent such holdings are aligned with one or more but not all of the Fund's environmental or social characteristics.

Asset allocation overview	% of net assets as at October 31, 2023
#2 Other	28.23%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Wellington Emerging Markets Health Care Equity Fund

54930051IF9QD2LNG632

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of__% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending September 30, 2024:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet the following social characteristic.

The Fund will invest at least 70% of the Fund's net assets in companies that are either improving the medical standard of care or improving access to health care. Companies will be deemed to be improving the medical standard of care if they are assessed to be developing meaningful innovation to improve patient outcomes. This may include diagnostics and/or therapeutics that improve upon treatment options currently available to patients across various disease indications. Companies will be deemed to be improving access to health care if they are assessed to make it easier for patients to receive medical care and will include service-oriented companies, including hospitals, providers as well as health insurance companies.

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	September 30, 2024
The percentage of the Fund invested in companies that are assessed by the Investment Manager to be either improving the medical standard of care or improving access to health care by developing meaningful innovation to improve patient outcomes. Since the Fund will invest at least 70% of the Fund's net assets in companies that the Investment Manager assesses are either improving the medical standard of care or improving access to health care by developing meaningful innovation to improve patient outcomes, this percentage should be at least 70% of the Fund's net assets.	89.93%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

… and compared to previous periods?

Sustainability Indicator	September 30, 2024	September 30, 2023
The percentage of the Fund invested in companies that are assessed by the Investment Manager to be either improving the medical standard of care or improving access to health care by developing meaningful innovation to improve patient outcomes. Since the Fund will invest at least 70% of the Fund's net assets in companies that the Investment Manager assesses are either improving the medical standard of care or improving access to health care by developing meaningful innovation to improve patient outcomes, this percentage should be at least 70% of the Fund's net assets.	89.93%	98.86%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Source: MSCI and Wellington.

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:

1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.

2. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	September 30, 2024
4. Exposure to companies active in the fossil fuel sector	0.00%
5. Share of non - renewable energy consumption and production	90.75%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-10-01/2024-09-30

Largest investments	Sector	% of net assets	Country
Apollo Hosp Ent Ltd	Health care	6.37%	IN
Cipla Ltd/India	Health care	5.06%	IN
Fortis Healthcare	Health care	4.33%	IN
Innovent Biologics	Health care	3.95%	CN
Hapvida Participacoe	Health care	3.87%	BR
Rede D-Or Sao Luiz	Health care	3.55%	BR
Siloam Intl Hospital	Health care	3.29%	ID

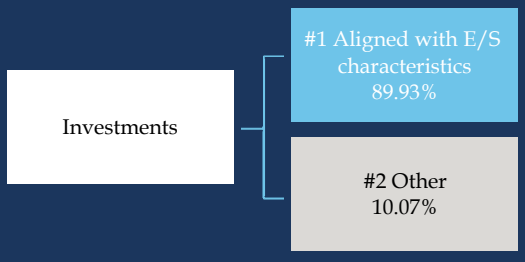
Zai Lab Ltd	Health care	2.95%	CN
Sino Biopharmaceutic	Health care	2.80%	HK
Shandong Weigao Group	Health care	2.68%	CN

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Pre-contractual disclosure commitment:

A minimum of 70% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

Asset allocation overview	% of net assets as at September 30, 2024
#1 Aligned with E/S characteristics	89.93%
#2 Other	10.07%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

In which economic sectors were the investments made?

Sector	Sub Sector	% of net assets
Consumer staples	Consumer staples distrib & retail	5.01%
Financials	Financial services	1.44%
Health care	Health care providers & services	37.55%
	Pharmaceuticals	26.39%
	Biotechnology	19.01%
	Health care equipment & supplies	6.55%
	Life sciences tools & services	3.64%
Not classified	Not classified	0.54%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS classification hierarchy. Source: MSCI

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of September 30, 2024:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

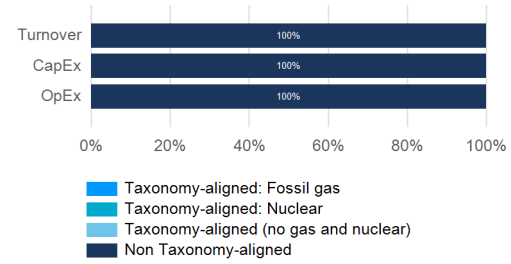
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

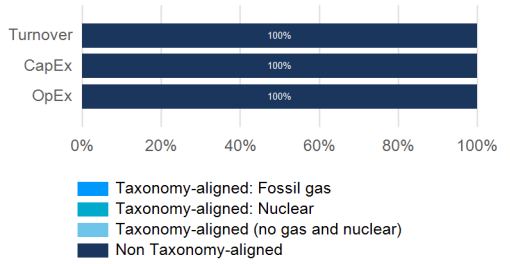
Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 98.57% of the total investments.

**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 95.32% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending September 30, 2024:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet the following social characteristic.

The Fund invests in companies that enable the provision of education and vocational training services that the Investment Manager believes are positioned to benefit from the next generation of structural changes and sustainable economic development in global developed and emerging markets. The Investment Manager seeks to identify long-term investment opportunities which are aligned with the theme of increasing development and accessibility of educational and vocational training services (for example, the increased use of technology in the provision of educational services). This theme also aligns with the UN Sustainable Development Goal ("UN SDG") 'Quality Education' and reflect the following long-term social themes:

• Innovation –Increasing innovation and the efficiency of all available factors of production in areas such advancements in education enabling technology.
• Inclusion –Improving living standards and broadening the range of beneficiaries of economic development in areas such as access to education and opportunities for upskilling, tertiary education and school related education.

Alignment with the theme of 'Quality Education' is determined in the universe construction process. Only companies which meet the Investment Manager's threshold for theme purity —where a minimum of 50% of the revenue is aligned with the theme of 'Education' (or the Investment Manager projects that the total revenue will grow to at least a minimum of 50% in the near future) —are included in the investible universe.

In line with the Fund's thematic approach, the Investment Manager will promote sustainable economic development by investing at least 75% of the Fund's net assets in companies that are considered Sustainable Investments.

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	September 30, 2024
The percentage of the Fund's net assets invested in companies that are considered Sustainable Investments. The Fund will maintain at least 75% of net assets in shares of companies that meet these criteria.	95.32%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

… and compared to previous periods?

Sustainability Indicator	September 30, 2024	September 30, 2023
The percentage of the Fund's net assets invested in companies that are considered Sustainable Investments. The Fund will maintain at least 75% of net assets in shares of companies that meet these criteria.	95.32%	87.59%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Pre-contractual disclosure commitment:

The Investment Manager seeks to identify long-term investment opportunities which are aligned with the theme of increasing development and accessibility of educational and vocational training services (for example, the increased use of technology in the provision of educational services). This theme also aligns with the UN SDG 'Quality Education' and reflect the following long-term themes:
• Innovation –Increasing innovation and the efficiency of all available factors of production in areas such advancements in education enabling technology.
• Inclusion –Improving living standards and broadening the range of beneficiaries of economic development in areas such as access to education and opportunities for upskilling, tertiary education and school related education.
Alignment with the theme of 'Quality Education' is determined in the universe construction process. Only companies which have a minimum of 50% of their revenue aligned with the theme of 'Education' (or the Investment Manager projects that the total revenue will grow to at least a minimum of 50% in the near future) —are included in the investible universe.

The Investment Manager invested across all of the themes mentioned above during the period and are therefore contributors to the sustainable objective. Individual topics within the themes may fluctuate throughout the year. Reviews are done periodically by the investment manager.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Effective January 1, 2023, Sustainable Investments were assessed against each of the mandatory corporate and/or sovereign Principal Adverse Impacts, as appropriate for the asset type, and as listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs"). PAIs were assessed quantitatively and/or qualitatively according to third party data or by Wellington's research analysts and investment teams using company disclosures, internal research and analysis regarding issuer activities. Where PAI data was determined to be unreliable or unavailable, and as applicable to the asset type, the Investment Manager conducted further due diligence and assessed the issuer's activities, processes or policies related to climate, environmental, social and/or anti-bribery/anti-corruption matters to determine that the issuer was not doing significant harm. Instances of controversy or negative findings were evaluated against the issuer's response in alignment with the expectations set forth by the UN Guiding Principles on Business and Human Rights.

Please refer to the Fund's Pre-Contractual Disclosure, attached to the Fund's prospectus, for additional detail on this assessment.

How were the indicators for adverse impacts on sustainability factors taken into account?

Effective January 1, 2023, and pursuant to Level II of SFDR, adverse impact compliance screens were implemented to assess Do No Significant Harm (DNSH) for Sustainable Investments. Where the PAIs reflect a quantitative data point and such quantitative data is available, each Sustainable Investment is compared against quantitative thresholds set by the Investment Manager as applicable to the asset type. The thresholds may be determined by setting express conditions or fixed numerical thresholds for a given PAI.

Certain PAIs are evaluated relative to industry peers and the worst companies in those industries will set the standard for determining significant harm. Where the Investment Manager has determined that industry differentiation is less meaningful, thresholds will be set in the context of all issuers. Where the Investment Manager has determined that differentiation is less meaningful or for PAIs which are more qualitative in nature (e.g., PAIs relating to the UNGC Principles and the OECD Guidelines for Multinational Enterprises) significant harm is assessed by evaluating, among others, companies' activities, management policies and practices, remediation activities or unresolved controversies using third party data.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was tested as part of the Investment Manager's process to identify Sustainable Investments. Assessment of management policies and practices is used to determine alignment. Misalignment with the OECD Guidelines for Multinational Enterprises or the UN Guiding Principles on Business and Human Rights may be determined where the Investment Manager identifies UN Global Compact non-compliance, inadequate policies and/or unresolved controversies.

Issuers assessed to be in breach of the OECD Guidelines for Multinational Enterprises or the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights are not eligible to be classified as Sustainable Investments. As of September 30, 2024, none of the Fund's Sustainable Investments were identified to have failed the test.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

The Fund's Sustainable Investments are assessed against each of the mandatory corporate and/or sovereign PAIs to determine that the Sustainable Investments do not cause significant harm to any environmental or social sustainable objective. In addition, by virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the PAIs into consideration either directly or indirectly on all or a portion of the Fund as follows:

1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.
2. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	September 30, 2024
4. Exposure to companies active in the fossil fuel sector	0.00%
5. Share of non - renewable energy consumption and production	81.24%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-10-01/2024-09-30

Largest investments	Sector	% of net assets	Country
Laureate Education	Consumer discretionary	8.70%	US
Wolters Kluwer	Industrials	8.63%	NL
Stride Inc	Consumer discretionary	5.41%	US
Adtalem Global Educa	Consumer discretionary	4.79%	US
Open Up Group Inc	Industrials	4.38%	JP
Recruit Holdings Co	Industrials	4.34%	JP
TriNet Group Inc	Industrials	4.11%	US
PowerSchool Hldgs	Information technology	4.01%	US
Gartner Inc	Information technology	3.93%	US
Workday Inc	Information technology	3.91%	US

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

Wellington Management Funds (Luxembourg) III SICAV

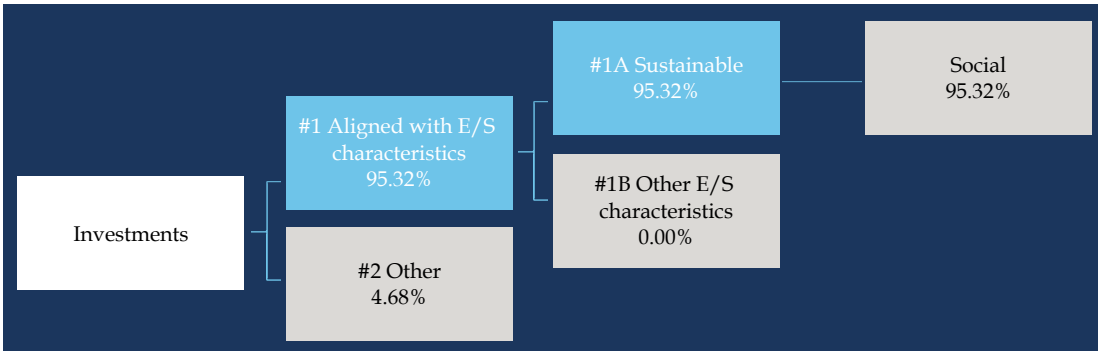
Appendix 6 – Sustainable Finance Disclosure Regulation ("SFDR") (Unaudited)

for the financial year ended September 30, 2024

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Pre-contractual disclosure commitment:

A minimum of 75% of the Fund's net assets will be aligned to the social characteristic of the Fund, which will be made of companies that are considered Sustainable Investments.

Asset allocation overview	% of net assets as at September 30, 2024
#1 Aligned with E/S characteristics	95.32%
#2 Other	4.68%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

In which economic sectors were the investments made?

Sector	Sub Sector	% of net assets
Communication services	Interactive media & services	2.20%
Consumer discretionary	Diversified consumer services	35.83%
	Leisure products	1.86%
Financials	Consumer finance	3.90%
	Financial services	0.50%
Health care	Health care technology	1.80%
	Health care equipment & supplies	1.43%
Industrials	Professional services	28.87%
	Aerospace & defense	1.89%
	Machinery	0.21%
Information technology	Software	9.69%
	It services	3.93%
Not classified	Not classified	0.13%
Pooled vehicle	Pooled vehicle	0.29%
Real estate	Specialized reits	4.16%
	Residential reits	3.36%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS classification hierarchy. Source: MSCI

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not commit to invest in Sustainable Investments with an environmental objective within the meaning of the SFDR.

However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of September 30, 2024:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

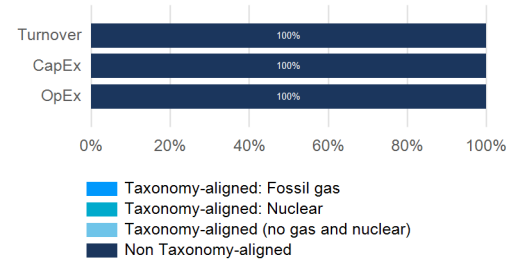
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

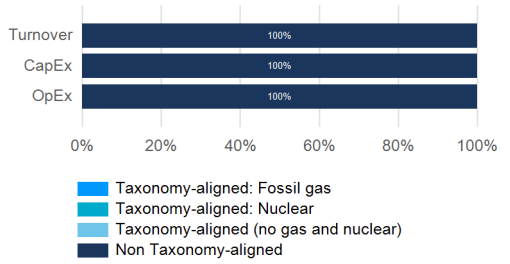
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 99.47% of the total investments.

**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: MSCI

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Pre-contractual disclosure commitment:

Not applicable. The Fund does not commit to invest in Sustainable Investments with an environmental objective within the meaning of the SFDR, therefore the minimum share of investments in transitional and enabling activities is 0%.

Taxonomy aligned investments	% of market value as at September 30, 2024
Transitional Turnover	0.00%
Transitional Capex	0.00%
Transitional Opex	0.00%
Enabling Turnover	0.00%
Enabling Capex	0.00%
Enabling Opex	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: MSCI

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Asset allocation overview	% of net assets as at September 30, 2024	% of net assets as at September 30, 2023
Taxonomy aligned investments	0.00%	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: MSCI

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not commit to invest in Sustainable Investments with an environmental objective within the meaning of the SFDR, therefore the minimum share of EU Taxonomy-aligned investments is 0%.

Asset allocation overview	% of net assets as at September 30, 2024
#1A Sustainable Investments: Other environmental	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What was the share of socially sustainable investments?

Pre-contractual disclosure commitment:

At least 75% of the Fund's net assets will be invested in companies that are Sustainable Investments with a social objective within the meaning of the SFDR.

Asset allocation overview	% of net assets as at September 30, 2024
#1A Sustainable Investments: Social	95.32%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for hedging and/or investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards.

Asset allocation overview	% of net assets as at September 30, 2024
#2 Other	4.68%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Wellington Sustainable Outcomes Fund

Legal entity identifier:

Sustainable investment objective

Does this financial product have a sustainable investment objective ?

☒ Yes	☐ No
☒ It made **sustainable investments with an environmental objective:** 41.30%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of__% of sustainable investments
☒ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☒ It made **sustainable investments with a social objective:** 54.47%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The following sustainable investment objectives were met by the Fund during the financial year ending September 30, 2024:

Pre-contractual disclosure commitment:

The sustainable objective of the Fund is to invest in companies that are driving measurable change that results in positive outcomes for social and environmental challenges.

To achieve the Funds sustainable investment objective, the Investment Manager focuses primarily on the following three themes, which represent many of the largest social and environmental challenges that can be solved through public market companies to define the investment universe:

• Life Essentials addresses social objectives such as increasing access to affordable housing and improving access and outcomes related to health, Life essentials also addresses social and environmental objectives through increasing access to clean water and sanitation and sustainable agriculture and

nutrition;
• Human Empowerment addresses social objectives such as bridging the digital divide, improving access to education and job training, expanding financial inclusion, and increasing safety and security ;
• Environment addresses environmental objectives such as combating climate change through the development and promotion of alternative energy and resource efficiency, while also considering resource stewardship.

As described in the paragraph above, each of the themes includes either predominantly environmental or predominantly social objectives. However, each such objective may have both environmental and social benefits.

The Investment Manager relies on a bottom-up process, utilising internal and external research, for identifying and analysing potential companies for investment. In defining the opportunity set, the Investment Manager takes into account both quantitative and qualitative considerations to understand how a company is enabling a positive outcome or how the company is encouraging positive change within its ecosystem, which includes suppliers, customers and competitors. Companies are eligible for inclusion if they meet one of the following criteria:

• Change the way their ecosystem works as a result of their innovation
• Work to build or evolve their ecosystem to make it greener, fairer, or healthier
• Shift their portfolio of products and services towards outcomes that are greener, fairer, or healthier
• Demonstrate a strong market influence and are using their resources to drive change and foster industry cooperation.

The Investment Manager uses company reports and proprietary models to develop individualized and measurable key performance indicators (KPIs) to understand the nature of the outcomes generated by a portfolio company on an annual basis and uses these KPIs to ensure that outcomes are quantifiable.

The Fund will invest a minimum of 90% of its net assets in companies which meet the above criteria and which are assessed to be Sustainable Investments. Sustainable Investments may contribute to either environmental or social objectives. Although the proportion of Sustainable Investments with environmental or social objectives may vary over time, the Investment Manager will maintain at least 10% in Sustainable Investments with an environmental objective and at least 20% in Sustainable Investments with a social objective.

A reference benchmark has not been designated for the purpose of attaining the Sustainable Investment objective of the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

The Investment Manager invested across all of the themes mentioned above during the period and are therefore contributors to the sustainable objective. Individual topics within the themes may fluctuate throughout the year. Reviews are done periodically by the investment manager.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	September 30, 2024
The percentage of the Fund's net assets that is invested in companies that are evaluated by the Investment Manager as providing products, services, operations and business activities that provide for positive social and environmental outcomes related to the three impact themes which the Investment Manager primarily focuses on, Life Essentials, Human Empowerment and Environment. The Fund will maintain at least 90% of net assets in shares of companies that meet these criteria.	95.77%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

… and compared to previous periods?

Sustainability Indicator	September 30, 2024	September 30, 2023
The percentage of the Fund's net assets that is invested in companies that are evaluated by the Investment Manager as providing products, services, operations and business activities that provide for positive social and environmental outcomes related to the three impact themes which the Investment Manager primarily focuses on, Life Essentials, Human Empowerment and Environment. The Fund will maintain at least 90% of net assets in shares of companies that meet these criteria.	95.77%	96.06%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

Effective January 1, 2023, Sustainable Investments were assessed against each of the mandatory corporate and/or sovereign Principal Adverse Impacts, as appropriate for the asset type, and as listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs"). PAIs were assessed quantitatively and/or qualitatively according to third party data or by Wellington's research analysts and investment teams using company disclosures, internal research and analysis regarding issuer activities. Where PAI data was determined to be unreliable or unavailable, and as applicable to the asset type, the Investment Manager conducted further due diligence and assessed the issuer's activities, processes or policies related to climate, environmental, social and/or anti-bribery/anti-corruption matters to determine that the issuer was not doing significant harm. Instances of controversy or negative findings were evaluated against the issuer's response in alignment with the expectations set forth by the UN Guiding Principles on Business and Human Rights.

Please refer to the Fund's Pre-Contractual Disclosure, attached to the Fund's prospectus, for additional detail on this assessment.

How were the indicators for adverse impacts on sustainability factors taken into account?

Effective January 1, 2023, and pursuant to Level II of SFDR, adverse impact compliance screens were implemented to assess Do No Significant Harm (DNSH) for Sustainable Investments. Where the PAIs reflect a quantitative data point and such quantitative data is available, each Sustainable Investment is compared against quantitative thresholds set by the Investment Manager as applicable to the asset type. The thresholds may be determined by setting express conditions or fixed numerical thresholds for a given PAI.

Certain PAIs are evaluated relative to industry peers and the worst companies in those industries will set the standard for determining significant harm. Where the Investment Manager has determined that industry differentiation is less meaningful, thresholds will be set in the context of all issuers. Where the Investment Manager has determined that differentiation is less meaningful or for PAIs which are more qualitative in nature (e.g., PAIs relating to the UNGC Principles and the OECD Guidelines for Multinational Enterprises) significant harm is assessed by evaluating, among others, companies' activities, management policies and practices, remediation activities or unresolved controversies using third party data.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was tested as part of the Investment Manager's process to identify Sustainable Investments. Assessment of management policies and practices is used to determine alignment. Misalignment with the OECD Guidelines for Multinational Enterprises or the UN Guiding Principles on Business and Human Rights may be determined where the Investment Manager identifies UN Global Compact non-compliance, inadequate policies and/or unresolved controversies.

Issuers assessed to be in breach of the OECD Guidelines for Multinational Enterprises or the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights are not eligible to be classified as Sustainable Investments. As of September 30, 2024, none of the Fund's Sustainable Investments were identified to have failed the test.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

The Fund's Sustainable Investments are assessed against each of the mandatory corporate and/or sovereign PAIs to determine that the Sustainable Investments do not cause significant harm to any environmental or social sustainable objective. In addition, by virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the PAIs into consideration either directly or indirectly on all or a portion of the Fund as follows:

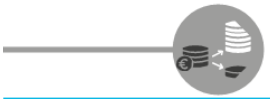
1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.
2. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy. PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	September 30, 2024
4. Exposure to companies active in the fossil fuel sector	6.89%
5. Share of non - renewable energy consumption and production	68.44%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI



What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-10-01/2024-09-30

Largest investments	Sector	% of net assets	Country
Microsoft Corp	Information technology	7.31%	US
Alphabet Inc	Communication services	4.81%	US
Taiwan Semi	Information technology	3.32%	TW
Boston Scientific	Health care	3.28%	US
Westinghouse Air	Industrials	3.23%	US
Eli Lilly & Co	Health care	3.20%	US
NVIDIA Corp	Information technology	3.02%	US

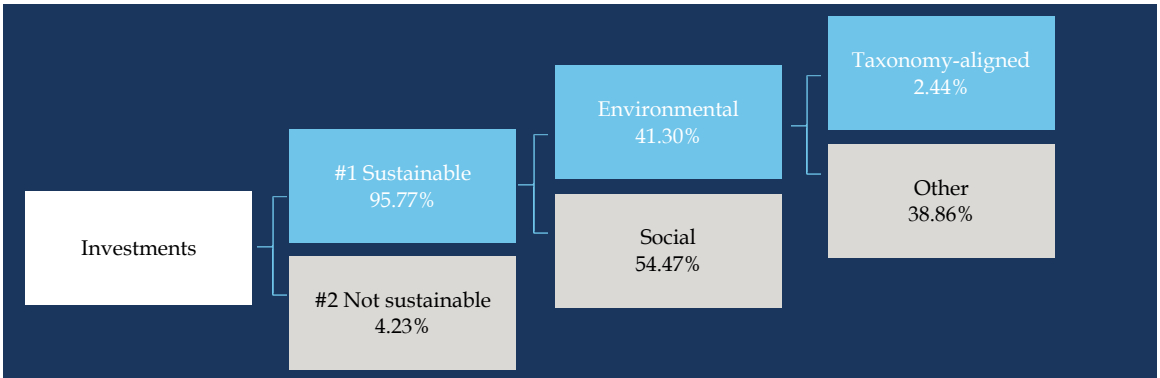
The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments

Pre-contractual disclosure commitment:

The Fund will have a minimum of 90% of its net assets aligned with the #1 Sustainable category, as defined in the diagram below, with the proportion of Sustainable Investments with environmental versus social objectives varying based on the Fund's composition. Although the proportion of Sustainable Investments with environmental or social objectives may vary over time, the Investment Manager will maintain at least 10% in Sustainable Investments with an environmental objective and at least 20% in Sustainable Investments with a social objective.

Asset allocation overview	% of net assets as at September 30, 2024
#1 Sustainable	95.77%
#2 Not sustainable	4.23%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS classification hierarchy. Source: MSCI

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

Although the Fund commits to invest in Sustainable Investments with an environmental objective within the meaning of the SFDR, the minimum share of EU Taxonomy-aligned investments is 0%.

However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of September 30, 2024:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

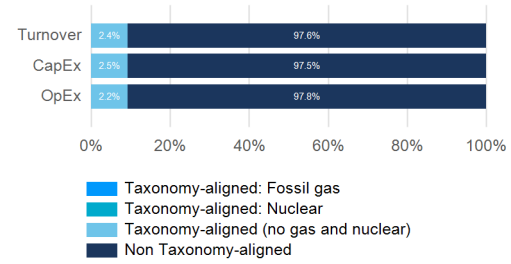
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

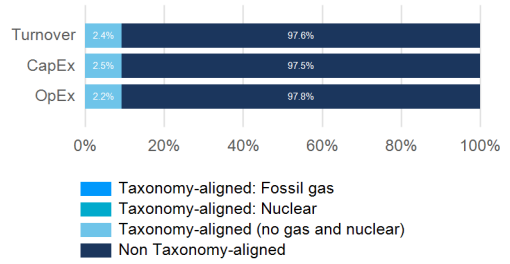
Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 95.78% of the total investments.

**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

Although the Fund commits to make Sustainable Investments with an environmental objective within the meaning of the SFDR, the minimum share of such investments with an environmental objective not EU Taxonomy-aligned is 10%.
These investments could be aligned with the EU Taxonomy but the Investment Manager is not currently in a position to specify the exact proportion of the Fund's underlying investments which take into account the EU criteria for environmentally sustainable economic activities. However, the position is kept under review as the underlying rules are finalized and the availability of reliable data increases over time.

Asset allocation overview	% of net assets as at September 30, 2024
#1 Sustainable Investments: Environmental	41.30%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What was the share of socially sustainable investments?

Pre-contractual disclosure commitment:

Minimum 20% of the Fund's net assets invested in socially sustainable investments.

Asset allocation overview	% of net assets as at September 30, 2024
#1 Sustainable Investments: Social	54.47%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Not sustainable' may include cash and cash equivalents for liquidity purposes, and derivatives for EPM and hedging purposes.

There are no minimum environmental or social safeguards applied to investments made under '#2 Not sustainable'.

Asset allocation overview	% of net assets as at September 30, 2024
#2 Not sustainable	4.23%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Not applicable.

How did the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 2.12% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending September 30, 2024:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet the following environmental characteristic.

Companies with science-based targets and commitments to enable the Fund seeks to achieve long term net zero carbon intensity by 2050, by promoting the establishment of net zero science-based targets amongst investee companies. The Fund will invest in companies which have established, or have committed to establish, a science-based target and ensuring this is a minimum of 30% of the Fund's NAV (excluding cash and cash equivalents), increasing to 55% by 2030, and 100% by 2040.

In relation to the net zero commitment, the SBTi provides a clearly defined pathway for companies to reduce greenhouse gas emissions. Targets are considered 'science-based' if they are in line with what the

latest climate science deems necessary to meet the goals of the Paris Agreement –limiting global warming to well-below 2°C above pre-industrial levels and pursuing efforts to limit warming to 1.5°C.

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	September 30, 2024
The percentage of the Fund's NAV invested in companies with established or which have committed to establish a target validated by the Science Based Targets initiative (SBTi). The Fund will have a minimum of 30% of the Fund's NAV (excluding cash and cash equivalents) will be invested in companies which have established, or have committed to establish, a science-based targets, with this percentage increasing to a minimum of 55% by 2030, and 100% by 2040.	37.13%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

… and compared to previous periods?

Sustainability Indicator	September 30, 2024	September 30, 2023
The percentage of the Fund's NAV invested in companies with established or which have committed to establish a target validated by the Science Based Targets initiative (SBTi). The Fund will have a minimum of 30% of the Fund's NAV (excluding cash and cash equivalents) will be invested in companies which have established, or have committed to establish, a science-based targets, with this percentage increasing to a minimum of 55% by 2030, and 100% by 2040.	37.13%	41.78%

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:

1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.
2. The Fund will invest in a minimum percentage of companies with targets validated by SBTi or a commitment to establish such targets, and actively engage with companies held in the portfolio to commit to set a science-based target- PAIs: Carbon Footprint; GHG Emissions, GHG Intensity of Investee Companies.
3. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	September 30, 2024
1. GHG emissions	28470.31tCO2e
2. Carbon footprint	634.05tCO2e/ €M invested
3. GHG intensity of investee companies	1181.40tCO2e/ €M revenue
4. Exposure to companies active in the fossil fuel sector	19.13%
5. Share of non - renewable energy consumption and production	71.01%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-10-01/2024-09-30

Largest investments	Sector	% of net assets	Country
TotalEnergies SE	Energy	3.17%	FR
Talanx AG	Financials	2.88%	DE
Merck & Co	Health care	2.69%	US
Rio Tinto PLC	Materials	2.58%	GB
Novartis AG	Health care	2.52%	CH
Home Depot Inc	Consumer discretionary	2.51%	US
UBS Group AG	Financials	2.49%	CH

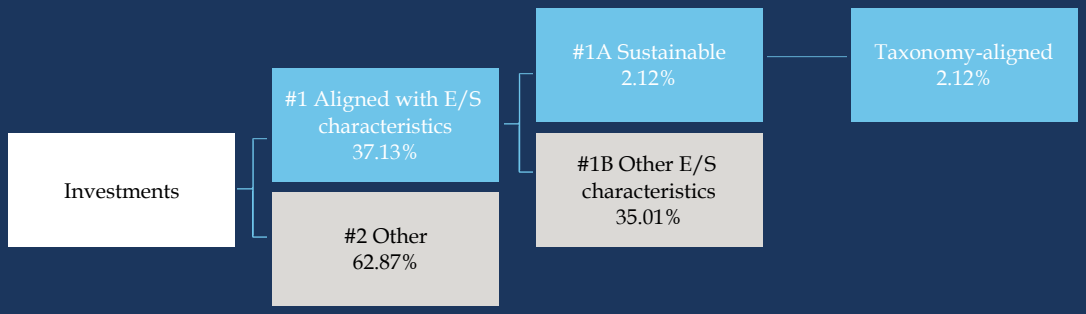
AstraZeneca PLC	Health care	2.32%	GB
Bank of America Corp	Financials	2.30%	US
FinecoBank Banca Fin	Financials	2.29%	IT

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Pre-contractual disclosure commitment:

A minimum of 30% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

Asset allocation overview	% of net assets as at September 30, 2024
#1 Aligned with E/S characteristics	37.13%
#2 Other	62.87%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

In which economic sectors were the investments made?

Source: MSCI

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of September 30, 2024:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

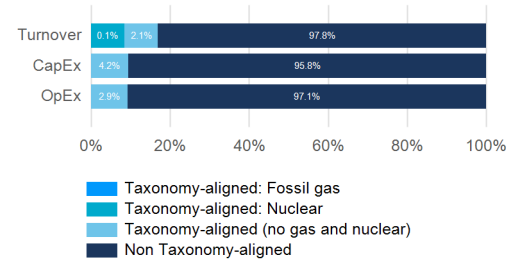
☒ Yes

☐ In fossil gas ☒ In nuclear energy

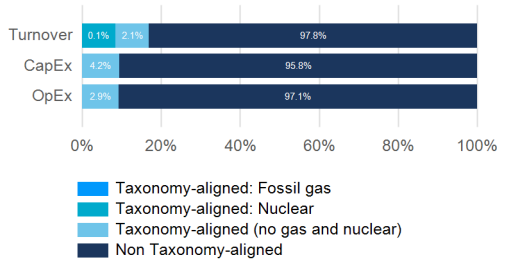
☐ No

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 98.74% of the total investments.

**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable. This Fund does not commit to invest in sustainable investments.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for hedging and investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards.

Asset allocation overview	% of net assets as at September 30, 2024
#2 Other	62.87%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

The Fund engaged with companies held in the portfolio to establish or to commit to net zero science-based targets. During the reference period the Fund engaged with 87 companies.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Does this financial product have a sustainable investment objective ?

☒ Yes	☐ No
☒ It made **sustainable investments with an environmental objective:** 93.35%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of__% of sustainable investments
☒ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The following sustainable investment objectives were met by the Fund during the financial year ending September 30, 2024:

Pre-contractual disclosure commitment:

The sustainable objective of the Fund is to invest in companies that contribute to and /or benefit from the battle against climate change. The fund will invest in companies whose products, services or capital provide for energy and resource efficiency (climate change mitigation and circular economy), and drive decarbonisation (climate change mitigation) and resiliency (climate change adaptation) The Fund will invest at least 90% of its net assets in shares of companies which are assessed to be Sustainable Investments and that have a material and measurable exposure to environmentally related activities (mitigation, adaptation or circular economy as defined above). The Fund's Sustainable Investments fall into two categories:
1) Environmental Tailwinds
2) Environmental Improvers

Investments in the "Environmental Tailwind" category are companies where more than 50% of their current revenue is tied to the environmental categories listed above.

Companies held in the "Environmental Improver" category are those with less established climate-related revenues (<50%), but where the Investment Manager's bottom-up analysis indicates that either:

- the company is shifting their portfolio of products, services or capital to greener solutions resulting in an increase in their revenue streams related to the environmental categories listed above, or
- the company reports KPIs on their products, services or capital which the investment manager assesses have or will have a material and measurable positive impact with respect to the environmental categories listed above.

At least 50% of the Fund will be invested in the "Environmental Tailwind" category.

Given the focus on climate mitigation and adaptation, the Fund will also not invest in major fossil fuel and coal companies, applying a screen to exclude the top 100 natural gas, thermal coal and oil companies respectively based on reserves.

Although the Fund does not have a carbon reduction objective pursuant to Article 9(3) of SFDR, the Investment Manager manages the portfolio to target net zero emissions by 2050 in alignment with the Paris Agreement, by actively engaging with companies held in the portfolio to commit to a science-based target. Specifically, the Fund commits to investing a minimum of 40% of its NAV in companies which have established, or which have committed to set a science-based target, with this percentage increasing to 70% by 2030 and 100% by 2040. In relation to the net zero commitment, the Science Based Targets initiative ("SBTi") provides a clearly defined pathway for companies to reduce greenhouse gas emissions. Targets are considered 'science-based' if they are in line with what the latest climate science deems necessary to meet the goals of the Paris Agreement –limiting global warming to well-below 2°C above pre-industrial levels and pursuing efforts to limit warming to 1.5°C.

A reference benchmark has not been designated for the purpose of attaining the sustainable Investment objective of the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

The Investment Manager invested across both of the impact categories mentioned above during the period. Both categories are therefore considered contributors to the sustainable objective. Allocation to individual topics within the categories may fluctuate throughout the year.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	April 30, 2024
The percentage of the Fund's net assets invested in companies that are evaluated by the Investment Manager as having a measurable exposure to climate-related activities and contributing to protecting the environment, via products, services, capital or strategy that meet at least one of the following climate stewardship criteria: driving decarbonisation, reducing total energy and resource demand by offering efficiencies, providing climate change adaptation, supporting the circular economy or actively reducing their own carbon footprint along with that of their supply chain. The Fund will maintain at least 90% of its net assets in shares of companies that meet these criteria.	93.35%
Although the Fund does not have a reduction carbon objective pursuant to Article 9(3) of SFDR, the percentage of the Fund's NAV invested in companies with established or which have committed to establish a science-based target. The Fund will maintain at least 40% of its NAV in companies which have established or which have committed to establish a science-based target, with this number rising to 70% by 2030 and 100% by 2040.	63.17%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

Effective January 1, 2023, Sustainable Investments were assessed against each of the mandatory corporate and/or sovereign Principal Adverse Impacts, as appropriate for the asset type, and as listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs"). PAIs were assessed quantitatively and/or qualitatively according to third party data or by Wellington's research analysts and investment teams using company disclosures, internal research and analysis regarding issuer activities. Where PAI data was determined to be unreliable or unavailable, and as applicable to the asset type, the Investment Manager conducted further due diligence and assessed the issuer's activities, processes or policies related to climate, environmental, social and/or anti-bribery/anti-corruption matters to determine that the issuer was not doing significant harm. Instances of controversy or negative findings were evaluated against the issuer's response in alignment with the expectations set forth by the UN Guiding Principles on Business and Human Rights.

Please refer to the Fund's Pre-Contractual Disclosure, attached to the Fund's prospectus, for additional detail on this assessment.

How were the indicators for adverse impacts on sustainability factors taken into account?

Effective January 1, 2023, and pursuant to Level II of SFDR, adverse impact compliance screens were implemented to assess Do No Significant Harm (DNSH) for Sustainable Investments. Where the PAIs reflect a quantitative data point and such quantitative data is available, each Sustainable Investment is compared against quantitative thresholds set by the Investment Manager as applicable to the asset type. The thresholds may be determined by setting express conditions or fixed numerical thresholds for a given PAI.

Certain PAIs are evaluated relative to industry peers and the worst companies in those industries will set the standard for determining significant harm. Where the Investment Manager has determined that industry differentiation is less meaningful, thresholds will be set in the context of all issuers. Where the Investment Manager has determined that differentiation is less meaningful or for PAIs which are more qualitative in nature (e.g., PAIs relating to the UNGC Principles and the OECD Guidelines for Multinational Enterprises) significant harm is assessed by evaluating, among others, companies' activities, management policies and practices, remediation activities or unresolved controversies using third party data.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was tested as part of the Investment Manager's process to identify Sustainable Investments. Assessment of management policies and practices is used to determine alignment. Misalignment with the OECD Guidelines for Multinational Enterprises or the UN Guiding Principles on Business and Human Rights may be determined where the Investment Manager identifies UN Global Compact non-compliance, inadequate policies and/or unresolved controversies.

Issuers assessed to be in breach of the OECD Guidelines for Multinational Enterprises or the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights are not eligible to be classified as Sustainable Investments. As of September 30, 2024, none of the Fund's Sustainable Investments were identified to have failed the test.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

The Fund's Sustainable Investments are assessed against each of the mandatory corporate and/or sovereign PAIs to determine that the Sustainable Investments do not cause significant harm to any environmental or social sustainable objective. In addition, by virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the PAIs into consideration either directly or indirectly on all or a portion of the Fund as follows:

1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.
2. The Fund will invest in a minimum percentage of companies with targets validated by SBTi or a commitment to establish such targets, and actively engage with companies held in the portfolio to commit to set a science-based target - PAIs: Carbon Footprint; GHG Emissions, GHG Intensity of Investee Companies.
3. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy. - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	April 30, 2024
1. GHG emissions	28471.13tCO2e
2. Carbon footprint	417.83tCO2e/ €M invested
3. GHG intensity of investee companies	848.05tCO2e/ €M revenue
4. Exposure to companies active in the fossil fuel sector	6.57%
5. Share of non - renewable energy consumption and production	74.67%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-10-01/2024-04-30

Largest investments	Sector	% of net assets	Country
Cisco Systems Inc	Information technology	3.39%	US
Trane Tech PLC	Industrials	3.28%	IE
Westinghouse Air	Industrials	3.15%	US
PTC Inc	Information technology	3.11%	US
Agilent Technologies	Health care	2.98%	US
Weyerhaeuser Co	Real estate	2.92%	US
Autodesk Inc	Information technology	2.82%	US
Hubbell Inc	Industrials	2.82%	US
Prologis Inc	Real estate	2.81%	US
Ingersoll Rand Inc	Industrials	2.68%	US
Wartsila OYJ Abp	Industrials	2.67%	FI
AXA SA	Financials	2.50%	FR
Xylem Inc	Industrials	2.36%	US
First Solar Inc	Information technology	2.30%	US
Deere & Co	Industrials	2.25%	US

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

Pre-contractual disclosure commitment:

The Fund will have a minimum of 90% of its net assets aligned with the #1 Sustainable category, as defined in the diagram below. The Investment Manager will maintain at least 90% in Sustainable Investments with an environmental objective.

Asset allocation overview	% of net assets as at April 30, 2024
#1 Sustainable	93.35%
#2 Not sustainable	6.65%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

In which economic sectors were the investments made?

Sector	Sub Sector	% of net assets
Consumer discretionary	Distributors	1.96%
	Automobile components	1.94%
	Household durables	1.60%
	Automobiles	1.00%

Source: MSCI

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

Although the Fund commits to invest in Sustainable Investments with an environmental objective within the meaning of the SFDR, the minimum share of EU Taxonomy-aligned investments is 0%.

However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of April 30, 2024:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

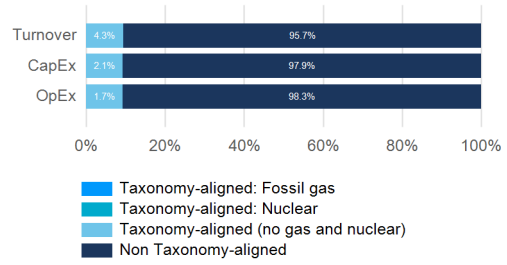
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

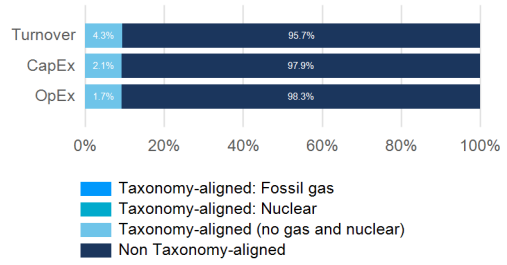
Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 93.41% of the total investments.

**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: MSCI

What was the share of investments made in transitional and enabling activities?

Pre-contractual disclosure commitment:

Although the Fund commits to invest in Sustainable Investments within the meaning of the SFDR, the minimum share of investments in transitional and enabling activities is 0%.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational**

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

expenditure (OpEx) reflecting green operational activities of investee companies.

Taxonomy aligned investments	% of market value as at April 30, 2024
Transitional Turnover	0.01%
Transitional Capex	0.06%
Transitional Opex	0.02%
Enabling Turnover	1.19%
Enabling Capex	1.10%
Enabling Opex	1.68%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

Asset allocation overview	% of net assets as at April 30, 2024	% of net assets as at September 30, 2023
Taxonomy aligned investments	4.29%	8.16%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: MSCI

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

Although the Fund commits to make Sustainable Investments with an environmental objective within the meaning of the SFDR, the minimum share of such investments with an environmental objective not EU Taxonomy-aligned is 90%.
These investments could be aligned with the EU Taxonomy but the Investment Manager is not currently in a position to specify the exact proportion of the Fund's underlying investments which take into account the EU criteria for environmentally sustainable economic activities. However, the position is kept under review as the underlying rules are finalized and the availability of reliable data increases over time.

Asset allocation overview	% of net assets as at April 30, 2024
#1 Sustainable Investments: Environmental	93.35%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What was the share of socially sustainable investments?

Pre-contractual disclosure commitment:

Minimum 0% of the Fund's NAV invested in socially sustainable investments.

Asset allocation overview	% of net assets as at April 30, 2024
#1 Sustainable Investments: Social	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Not sustainable' may include cash and cash equivalents for liquidity purposes, and derivatives for EPM and hedging purposes.

There are no minimum environmental or social safeguards applied to investments made under '#2 Not sustainable'.

Asset allocation overview	% of net assets as at April 30, 2024
#2 Not sustainable	6.65%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

The Investment Manager invested across all of the impact themes mentioned above during the period. All impact themes are therefore considered contributors to the sustainable objective. Allocation to individual topics within the impact themes may fluctuate throughout the year.

The Fund engaged with companies held in the portfolio to establish or to commit to net zero science-based targets. During the reference period the Fund engaged with 40 companies.

How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Not applicable.

How did the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Wellington Asia Quality Income Fund

Legal entity identifier:
549300X30UF5DOUAEW35

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of__% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending September 30, 2024:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet one or more of the following social characteristics.

1. Issuers who receive a survey to enable the Fund to promote the adoption of appropriate policies and practices among certain investee companies with regard to modern slavery risk management, forced labour, child labour and debt bondage ("Modern Slavery"). In order to do this, the Investment Manager applies Wellington Management Group's Emerging Markets Modern Slavery Policy (the "EM Modern Slavery Policy"). Under the EM Modern Slavery Policy investee companies are evaluated by the Investment Manager on the basis of proprietary research and third-party research for inclusion to the Watch List (as defined below) and various levels of engagement are undertaken over a period of time

until adequate remediation measures are adopted.

The EM Modern Slavery Policy does not aim to eliminate Modern Slavery risk exposure in all investee companies and the Fund may from time to time invest in companies which have exposure to such risk and which are not subject to enhanced engagement. Further details about the EM Modern Slavery Policy and Watch List may be found in the section below "What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?".

2. Issuers that are screened for United Nations Global Compact Principles to enable the Fund to further promote appropriate policies and practices with regard to child labour and forced labour by excluding investment in companies that are assessed for and known to be involved in controversies regarding child labour or forced labour. In order to do this, the Fund excludes investments in companies which are assessed to have failed United Nations Global Compact Principles 4 (businesses should uphold the elimination of all forms of forced and compulsory labour) and 5 (businesses should uphold the effective abolition of child labour).

A reference benchmark has not been designated for the purpose of attaining the social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	September 30, 2024
The number of companies identified which have been assessed to be in violation of United Nations Global Compact principles 4 (businesses should uphold the elimination of all forms of forced and compulsory labour) or 5 (businesses should uphold the effective abolition of child labour). Since the Fund excludes investments in companies which are assessed to have failed United Nations Global Compact Principles 4 and 5, this number is expected to be 0.	0
The percentage of companies deemed as having a higher risk of Modern Slavery exposure that are placed on the Watch List and are subject to enhanced engagement. Since this percentage will depend on 1) the time of the investments and 2) the result of the survey, this percentage cannot be disclosed in the Fund's pre-contractual template but will be disclosed in the Fund's periodic reporting.	9.40%
The percentage of companies held for over a year that have responded to an engagement survey regarding their modern slavery risk management policies and procedures. Since this percentage will depend on 1) the time of the investments and 2) the response to the engagement survey, this percentage cannot be disclosed in the Fund's pre-contractual template but will be disclosed in the Fund's periodic reporting.	47.40%
The percentage of companies where remediation measures have been adopted such that they are no longer assessed as having a higher risk of Modern Slavery exposure and may be removed from the internal Watch List. Since this percentage will depend on 1) the time of the investments and 2) the result of the remediation measures adopted following the survey, this percentage cannot be disclosed in the Fund's pre-contractual template but will be disclosed in the Fund's periodic reporting.	35.70%
The percentage of the Fund's equity issuers who received a survey and have been formally evaluated for inclusion to the Watch List regarding Modern Slavery risk management. Since at least 70% of the Fund's equity issuers are generally expected to receive a survey and be formally evaluated for inclusion to the Watch List regarding Modern Slavery risk management, this percentage is expected to be at least 70%.	100.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

**Companies that were held in the portfolio as of fiscal year-end but that were no longer on the active or inactive watch list in part due to the fund's remediation measures, including but not limited to additional information gained from company outreach efforts and/or companies' actions towards mitigating controversies.*

Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment Guideline, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:

1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.

2. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund. The Fund further commits to report on these PAIs periodically with such report to be included in the annual report of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	September 30, 2024
4. Exposure to companies active in the fossil fuel sector	5.46%
5. Share of non - renewable energy consumption and production	89.82%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-10-01/2024-09-30

Largest investments	Sector	% of net assets	Country
Taiwan Semi	Information technology	9.41%	TW
Samsung Electronics	Information technology	7.43%	KR
Tencent Holdings Ltd	Communication services	5.12%	CN

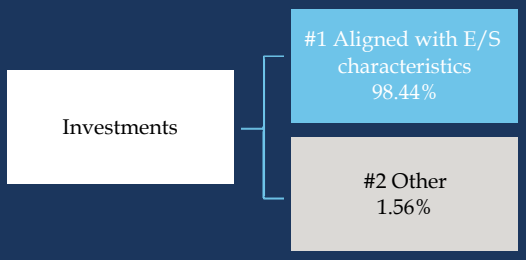
China Petro&Chem-H	Energy	1.66%	CN
Hana Financial Group	Financials	1.57%	KR
Bk Negara Indonesia	Financials	1.51%	ID

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Pre-contractual disclosure commitment:

A minimum of 70% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

Asset allocation overview	% of net assets as at September 30, 2024
#1 Aligned with E/S characteristics	98.44%
#2 Other	1.56%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

In which economic sectors were the investments made?

Source: MSCI

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR Regulation, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of September 30, 2024:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

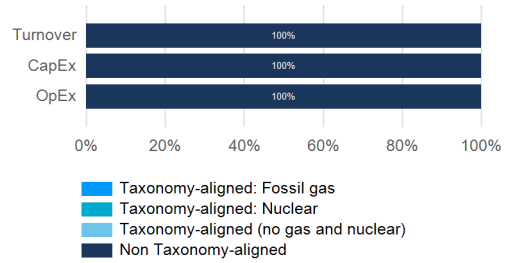
☐ Yes

☐ In fossil gas ☐ In nuclear energy

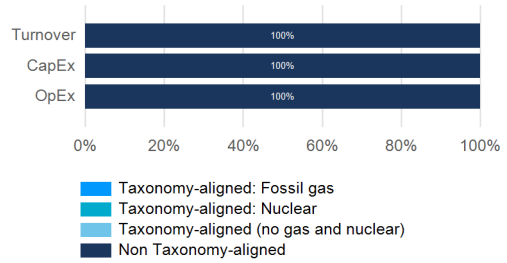
☒ No

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 98.44% of the total investments.

****For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What was the share of investments made in transitional and enabling activities?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR Regulation, accordingly the minimum share of investments in transitional and enabling activities is 0%.

Taxonomy aligned investments	% of market value as at September 30, 2024
Transitional Turnover	0.00%
Transitional Capex	0.00%
Transitional Opex	0.00%
Enabling Turnover	0.00%
Enabling Capex	0.00%
Enabling Opex	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: MSCI

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Asset allocation overview	% of net assets as at September 30, 2024	% of net assets as at September 30, 2023
Taxonomy aligned investments	0.00%	0.19%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable. This Fund does not commit to invest in sustainable investments.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for hedging and investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund.
Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards. However, some minimum safeguards may still be considered to apply to the extent such holdings are aligned with one or more but not all of the Fund's environmental or social characteristics.

Asset allocation overview	% of net assets as at September 30, 2024
#2 Other	1.56%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

The Fund assessed and promoted the adoption of appropriate policies and practices among certain investee companies with regard to modern slavery risk management, with regards to forced labour, child labour and debt bondage ("Modern Slavery") by engaging with 64 companies via survey distribution, which accounted for 100.00% of the companies held longer than a year, and by engaging with 3 companies during meetings over the reference period.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Wellington Global Quality Value Fund

Legal entity identifier:
5493000JTNCNALNO9R46

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.29% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending September 30, 2024:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet one or more of the following environmental or social characteristics.

1. Companies with science-based targets and commitments to enable the Fund to seek to achieve long term net zero carbon intensity by 2050, by promoting the establishment of science-based targets amongst investee companies. The Fund targets net zero emissions by 2050 in alignment with the Paris Agreement by investing at least 35% of the Fund's NAV (excluding cash and cash equivalents) in companies that have established a science-based target, with this percentage increasing to at least 60% by 2030 and 100% by 2040.
In relation to the net zero commitment, the Science Based Targets initiative ("SBTi") provides a clearly

defined pathway for companies to reduce greenhouse gas emissions. Targets are considered 'science-based' if they are in line with what the latest climate science deems necessary to meet the goals of the Paris Agreement –limiting global warming to well-below 2°C above pre-industrial levels and pursuing efforts to limit warming to 1.5°C.

2. The Fund aims to promote gender diversity in board representation by investing at least 60% of the Fund's net assets in companies with more than three women on their board. The Investment Manager believes that diverse company management teams are critical to creating long-term shareholder value and promoting innovation because the absence of diversity can mean an increased risk of "groups' think" and a lack of appropriate debate, which could negatively impact decision making.

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	September 30, 2024
The percentage of the Fund's NAV invested in companies with an established target validated by the Science Based Targets initiative (SBTi). The Fund will have a minimum of 35% of the Fund's NAV (excluding cash and cash equivalents) invested in companies which have established a science-based target with this percentage increasing to a minimum of 60% by 2030, and 100% by 2040.	50.62%
The percentage of the Fund's market value invested in companies with more than three women on their board. Since the Fund seeks to invest at least 60% of its market value in companies that appoint more than three women to their board as a measure of the Fund's promotion of gender diversity, that percentage should be at least 60%.	68.59%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

… and compared to previous periods?

Not applicable. This is the first reporting period for the Fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:

1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy –PAI: Exposure to controversial weapons.
2. The Fund will invest in a minimum percentage of companies with targets validated by SBTi, and actively engage with companies held in the portfolio to commit to set a science-based target –PAIs: Carbon Footprint; GHG Emissions, GHG Intensity of Investee Companies.
3. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy –PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.
4. The Fund will invest at least 60% of the Fund's market value in companies that seek to promote diversity by appointing more than three women to their board - PAI: Board Gender Diversity.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	September 30, 2024
1. GHG emissions	30349.48tCO2e
2. Carbon footprint	604.60tCO2e/ €M invested
3. GHG intensity of investee companies	1122.46tCO2e/ €M revenue
4. Exposure to companies active in the fossil fuel sector	13.80%
5. Share of non - renewable energy consumption and production	73.98%
13. Board gender diversity	36.19%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-10-01/2024-09-30

Largest investments	Sector	% of net assets	Country
Johnson & Johnson	Health care	2.32%	US
AstraZeneca PLC	Health care	2.30%	GB
Novartis AG	Health care	2.29%	CH
TotalEnergies SE	Energy	2.25%	FR
Cisco Systems Inc	Information technology	2.12%	US
Chubb Ltd	Financials	2.05%	CH
Microsoft Corp	Information technology	1.94%	US
Merck & Co	Health care	1.93%	US
Duke Energy Corp	Utilities	1.91%	US
Accenture PLC	Information technology	1.86%	IE

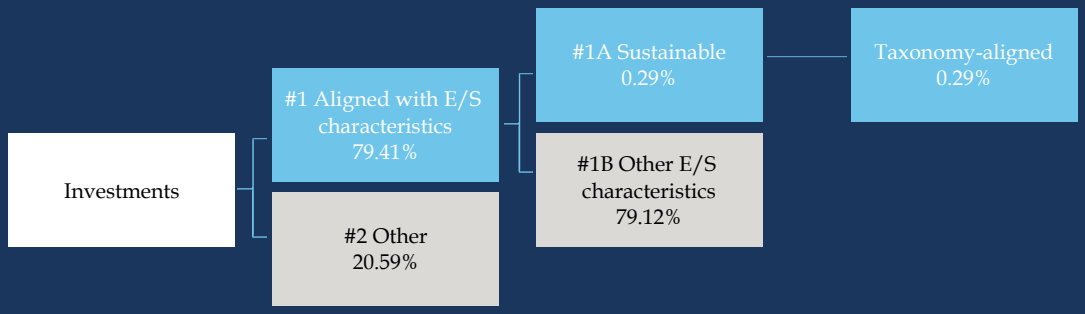
JPMorgan Chase & Co	Financials	1.84%	US
UnitedHealth Group	Health care	1.81%	US
Texas Instruments	Information technology	1.74%	US
American Express Co	Financials	1.72%	US

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Pre-contractual disclosure commitment:

A minimum of 70% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

Asset allocation overview	% of net assets as at September 30, 2024
#1 Aligned with E/S characteristics	79.41%
#2 Other	20.59%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of September 30, 2024:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

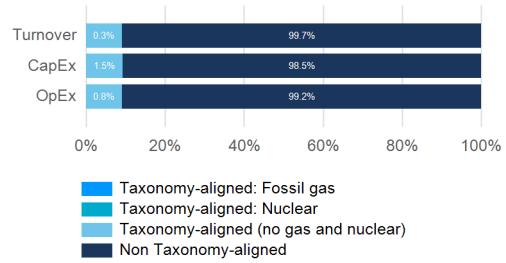
☐ Yes

☐ In fossil gas ☐ In nuclear energy

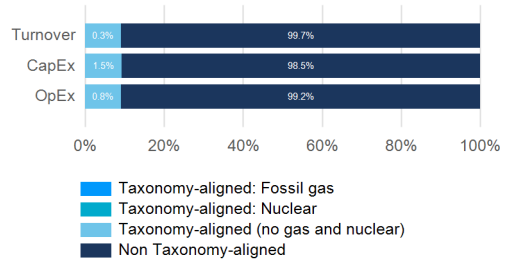
☒ No

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 97.73% of the total investments.

**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable. This is the first reporting period for the Fund.

Sustainable investments are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable. This Fund does not commit to invest in sustainable investments.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for hedging and investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards.

Asset allocation overview	% of net assets as at September 30, 2024
#2 Other	20.59%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

The Fund engaged with companies held in the portfolio to establish or to commit to net zero science-based targets. During the reference period the Fund engaged with 1 companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Wellington Credit Income Fund (LUSIII)

Legal entity identifier:
5493007NKOZI7SZ64168

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

● ● ☐ Yes	● ● ☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 8.42% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending September 30, 2024:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet one or more of the following environmental or social characteristics.

1. Issuers that are screened to enable the Fund to define the investment universe by using standard industry classifications to exclude certain corporate and issuers significantly involved in the following industries: fossil fuels, controversial and conventional weapons; and tobacco and cannabis (in addition to the criteria set out in the Exclusion Policy).

2. Companies that are considered Sustainable Investments. The Fund will also maintain an allocation to

Sustainable Investments, seeking investment in companies and organisations that the Investment Manager believes are addressing the world's social and environmental challenges in a differentiated way through their products, services and projects. Through the Fund's Sustainable Investments, the Investment Manager seeks to invest in three impact themes which improve access to, and quality of, basic life essentials, reduce inequality, and mitigate the effects of climate change.

- Life essentials addresses social objectives such as increasing access to affordable housing and improving access and outcomes related to health, Life essentials also addresses social and environmental objectives through increasing access to clean water and sanitation and health; and sustainable agriculture and nutrition;
- Human empowerment addresses social objectives such as bridging the digital divide and improving access to education and job training; expanding financial inclusion and increasing safety and security;
- Environment addresses environmental objectives such as combating climate change through the development and promotion of alternative energy and resource efficiency, while also considering resource stewardship.

As described in the paragraph above, each of the themes includes either predominantly environmental or predominantly social objectives. However, each such objective may have both environmental and social benefits.

In defining the opportunity set, the Investment Manager takes into account both quantitative and qualitative considerations to fulfil each of the three impact criteria:

- Material: Impact activity must be central to the investee company.
- Additionality: The Investment Manager evaluates each value proposition, the specific needs it addresses, competitor product and services, and the degree to which alternative solutions already exist.
- Measurable key performance indicators (KPIs): The impact case must be quantifiable. The Investment Manager uses company reports and proprietary models, to develop individualized KPIs to understand the nature of the impact generated by a portfolio company on an annual basis.

Sustainable Investments may contribute to either environmental or social objectives in line with the environmental and social themes above. Although the Investment Manager will maintain at least 5% in Sustainable Investments, the proportion of Sustainable Investments with environmental or social objectives may vary over time.

A reference benchmark has not been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	September 30, 2024
The number of issuers held where fossil fuels make up more than 50% of their exports. As the Fund seeks to exclude such companies, this number is expected to be 0.	0
The number of corporate issuers held that generate >5% of their revenue from either the production of conventional weapons systems, components, and support systems and services; or the manufacture or retail of civilian firearms and ammunition. As the Fund seeks to exclude such companies, this number is expected to be 0.	0
The number of corporate issuers held that are involved in the manufacturing and sale of controversial munitions. As the Fund seeks to exclude such companies, this number is expected to be 0.	0
The number of corporate issuers held that generate >25% of their revenue from the sale of fossil fuels. As the Fund seeks to exclude such companies, this number is expected to be 0.	0
The number of corporate issuers held that produce, transports, or refines fossils fuels or that has ownership of fossil fuel reserves. As the Fund seeks to exclude such companies, this number is expected to be 0.	0
The number of issuers held that produce either tobacco or cannabis products, or that generate >25% of their revenue from tobacco related business activities. As the Fund seeks to exclude such companies, this number is expected to be 0.	0
The percentage of the Fund's net assets invested in issuers that the Investment Manager determines are addressing the world's social and environmental challenges in a differentiated way through their products, services and projects and which are categorized as Sustainable Investments under SFDR. The Fund will maintain at least 5% of the Fund's net assets in Sustainable Investments.	8.42%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Pre-contractual disclosure commitment:

The Investment Manager will seek to understand the world's social and environmental challenges and to identify and invest in companies and organizations that it believes addresses these challenges in a differentiated way through their core products and services. Through the Fund's investments, the Investment Manager seeks to improve access to, and quality of, basic life essentials, reduce inequality, and mitigate the effects of climate change.

The Investment Manager invested across all of the themes mentioned above during the period and are therefore contributors to the sustainable objective. Individual topics within the themes may fluctuate throughout the year. Reviews are done periodically by the investment manager.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Effective January 1, 2023, Sustainable Investments were assessed against each of the mandatory corporate and/or sovereign Principal Adverse Impacts, as appropriate for the asset type, and as listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs"). PAIs were assessed quantitatively and/or qualitatively according to third party data or by Wellington's research analysts and investment teams using company disclosures, internal research and analysis regarding issuer activities. Where PAI data was determined to be unreliable or unavailable, and as applicable to the asset type, the Investment Manager conducted further due diligence and assessed the issuer's activities, processes or policies related to climate, environmental, social and/or anti-bribery/anti-corruption matters to determine that the issuer was not doing significant harm. Instances of controversy or negative findings were evaluated against the issuer's response in alignment with the expectations set forth by the UN Guiding Principles on Business and Human Rights.

Please refer to the Fund's Pre-Contractual Disclosure, attached to the Fund's prospectus, for additional detail on this assessment.

How were the indicators for adverse impacts on sustainability factors taken into account?

Effective January 1, 2023, and pursuant to Level II of SFDR, adverse impact compliance screens were implemented to assess Do No Significant Harm (DNSH) for Sustainable Investments. Where the PAIs reflect a quantitative data point and such quantitative data is available, each Sustainable Investment is compared against quantitative thresholds set by the Investment Manager as applicable to the asset type. The thresholds may be determined by setting express conditions or fixed numerical thresholds for a given PAI.

Certain PAIs are evaluated relative to industry peers and the worst companies in those industries will set the standard for determining significant harm. Where the Investment Manager has determined that industry differentiation is less meaningful, thresholds will be set in the context of all issuers. Where the Investment Manager has determined that differentiation is less meaningful or for PAIs which are more qualitative in nature (e.g., PAIs relating to the UNGC Principles and the OECD Guidelines for Multinational Enterprises) significant harm is assessed by evaluating, among others, companies' activities, management policies and practices, remediation activities or unresolved controversies using third party data.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was tested as part of the Investment Manager's process to identify Sustainable Investments. Assessment of management policies and practices is used to determine alignment. Misalignment with the OECD Guidelines for Multinational Enterprises or the UN Guiding Principles on Business and Human Rights may be determined where the Investment Manager identifies UN Global Compact non-compliance, inadequate policies and/or unresolved controversies.

Issuers assessed to be in breach of the OECD Guidelines for Multinational Enterprises or the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights are not eligible to be classified as Sustainable Investments. As of September 30, 2024, none of the Fund's Sustainable Investments were identified to have failed the test.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

The Fund's Sustainable Investments are assessed against each of the mandatory corporate and/or sovereign PAIs to determine that the Sustainable Investments do not cause significant harm to any environmental or social sustainable objective. In addition, by virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the PAIs into consideration either directly or indirectly on all or a portion of the Fund as follows:

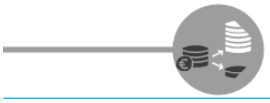
1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.
2. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	September 30, 2024
4. Exposure to companies active in the fossil fuel sector	0.70%
5. Share of non - renewable energy consumption and production	80.50%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI



What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-10-01/2024-09-30

Largest investments	Sector	% of net assets	Country
US Treasury NB	Not classified	20.07%	US

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

Wellington Management Funds (Luxembourg) III SICAV

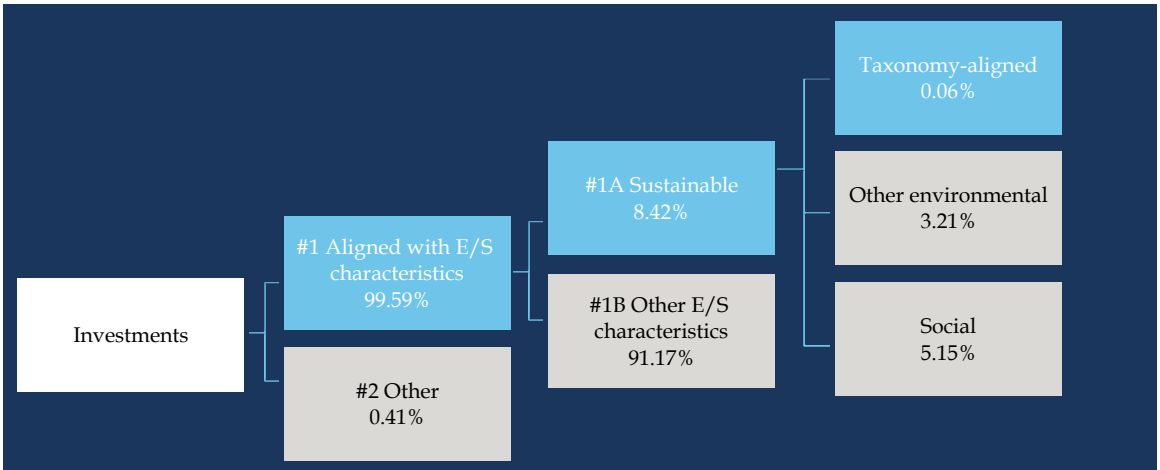
Appendix 6 – Sustainable Finance Disclosure Regulation ("SFDR") (Unaudited)

for the financial year ended September 30, 2024

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Pre-contractual disclosure commitment:

A minimum of 80% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

The Fund will also make Sustainable Investments with a minimum of 5% of the Fund's net assets, in debt issued by companies and organisations that the Investment Manager believes are addressing the world's social and environmental challenges in a differentiated way through their products, services and projects. Although the proportion of Sustainable Investments with environmental or social objectives may vary over time, the Investment Manager will maintain at least 1% in Sustainable Investments with an environmental objective and at least 1% in Sustainable Investments with a social objective.

Asset allocation overview	% of net assets as at September 30, 2024
#1 Aligned with E/S characteristics	99.59%
#2 Other	0.41%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

Source: MSCI

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

Although the Fund commits to invest in Sustainable Investments with an environmental objective within the meaning of the SFDR, the minimum share of EU Taxonomy-aligned investments is 0%.

However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of September 30, 2024:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

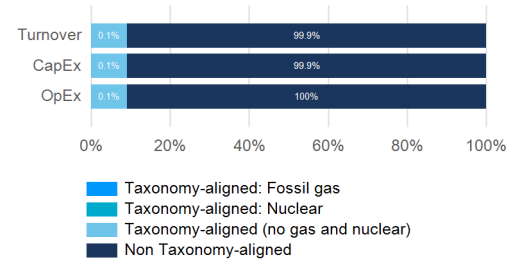
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

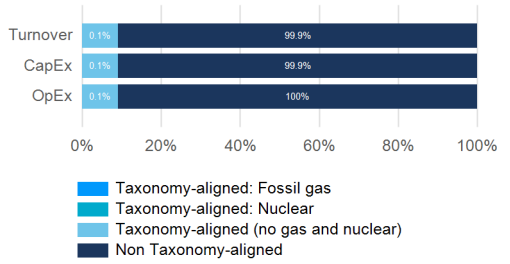
Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 69.29% of the total investments.

**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

Although the Fund commits to make Sustainable Investments with an environmental objective within the meaning of the SFDR, the minimum share of such investments with an environmental objective not EU Taxonomy-aligned is 1%. These investments could be aligned with the EU Taxonomy but the Investment Manager is not currently in a position to specify the exact proportion of the Fund's underlying investments which take into account the EU criteria for environmentally sustainable economic activities. However, the position is kept under review as the underlying rules are finalized and the availability of reliable data increases over time.

Asset allocation overview	% of net assets as at September 30, 2024
#1A Sustainable Investments: Other environmental	3.21%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What was the share of socially sustainable investments?

Pre-contractual disclosure commitment:

Minimum 1% of the Fund's net assets are invested in socially sustainable investments.

Asset allocation overview	% of net assets as at September 30, 2024
#1A Sustainable Investments: Social	5.15%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for EPM, hedging and/or investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards. However, some minimum safeguards may still be considered to apply to the extent such holdings are aligned with one or more but not all of the Fund's environmental or social characteristics.

Asset allocation overview	% of net assets as at September 30, 2024
#2 Other	0.41%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Wellington Euro Credit ESG Fund

Legal entity identifier:
549300ZDC786YEP1CN98

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 5.04% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending September 30, 2024:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet one or more of the following environmental or social characteristics.

1. Issuers that do not have the worst E or S Ratings relative to their peer universe. In order to do this, the Fund assigns issuers an individual E and S Rating, based on Wellington Management's proprietary ratings framework, using a rating scale of 1-5, where 1 is the highest rating, and excludes issuers that have received an E or S Rating of 5. A rating of 1 is the most positive rating, indicating that the company is a leader among its peers in managing material environmental or social risks or incorporating environmental or social factors into its practices. A rating of 5 is the most negative, indicating that the company may be lagging its peers in managing certain material environmental or social risks or

incorporating environmental or social factors into its practices. E Ratings use environmental indicators (such as energy efficiency, carbon emissions and pollutants, sustainable packaging and hazardous waste), and S Ratings use social indicators (such as corruption and bribery, labour relations, product safety and supply chain management) in the assessment of the environmental and social activities and attributes of issuers. Issuers with a below average E or S Rating (E or S Rating of 4) may only be included in the Fund if the Investment Manager determines that the Fund is adequately compensated for the additional risk.

2. Issuers are screened to enable the Fund to apply a number of exclusionary screens in order to exclude or reduce certain harmful impacts on the environment and society. These include avoiding corporate issuers principally involved in the following industries: fossil fuels, thermal coal, controversial and conventional weapons; and will not invest in corporate issuers that do not have responsible practices on human rights, forced labour or do not comply with the United Nations Global Compact; and avoiding corporate issuers that engage in harmful social activities such as adult entertainment, tobacco and cannabis. The Fund will not invest in the sovereign debt of countries generating a majority of revenues from fossil fuel exports as well as those that are identified as "not free" in terms of political rights and civil liberties (in addition to the criteria set out in the Exclusion Policy).

3. Issuers with disclosed carbon data that enable the Fund to seek to achieve long term net zero carbon intensity by 2050 by aiming to reduce its weighted average carbon intensity ("WACI"), as compared to the 2019 WACI of the Bloomberg Euro Aggregate Corporate Index (the "Index").

Whilst the Index is used for WACI comparison purposes, a reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	September 30, 2024
The number of bonds of countries that are identified as "not free" in terms of political rights and civil liberties. Since the Fund seeks to exclude such issuers, this number should be 0.	0
The number of corporate issuer held identified as producing tobacco or generating >25% of their revenue from tobacco or cannabis related business activities. Since the Fund seeks to exclude such issuers, this number should be 0.	0
The number of bonds of any countries identified as generating >50% of export revenues from fossil fuels. Since the Fund seeks to exclude such issuers, this number should be 0.	0
The number of issuers held with an E Rating or S Rating of 5. Since the Fund seeks to exclude such issuers, this number should be 0.	0
The number of corporate issuers held identified as failing to comply with the United Nations Global Compact. Since the Fund seeks to exclude such issuers, this number should be 0.	0
The number of corporate issuers held identified as generating >25% of their revenue from thermal coal energy generation. Since the Fund seeks to exclude such issuers, this number should be 0.	0
The number of corporate issuers held identified as generating >5% of their revenue from adult entertainment. Since the Fund seeks to exclude such issuers, this number should be 0.	0
The number of corporate issuers held identified as generating >5% of their revenue from the production of civilian firearms. Since the Fund seeks to exclude such issuers, this number should be 0.	0
The number of corporate issuers held identified as having any tie to the manufacturing of controversial or nuclear weapons. Since the Fund seeks to exclude such issuers, this number should be 0.	0
The number of securities of any corporate issuers involved in the production or mining and sales of fossil fuels, as defined by standard industry classifications for Energy. Since the Fund seeks to exclude such issuers, this number should be 0.	0
The percentage difference of the Fund's WACI and that of the Index's 2019 WACI. Since the Fund maintains a WACI that is 25% below the Index's 2019 WACI, with this percentage increasing to 50% by 2030, this percentage is expected to be at least 25% and to increase to at least 50% by 2030.	-60.27%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:

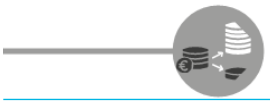
1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.
2. The Fund will maintain a carbon footprint (weighted average carbon intensity) that is lower than the Index. The Fund will aim to reduce its weighted average carbon intensity ("WACI") to net zero by 2050, or sooner, in accordance with the Paris Agreement - PAIs: Carbon Footprint; GHG Emissions, GHG Intensity of Investee Companies.
3. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy. In addition the Fund will exclude companies engaged in the production and sales of fossil fuels - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.
4. The Investment Manager excludes all companies identified as "fail" by reference to the United Nations Global Compact - PAI: Violations of UN Global Compact.
5. The Fund excludes companies that are identified as "not free" according to the MSCI's Freedom House Global Freedom Status - PAI: Investee countries subject to social violations.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	September 30, 2024
1. GHG emissions	29481.39tCO2e
2. Carbon footprint	228.76tCO2e/ €M invested
3. GHG intensity of investee companies	645.10tCO2e/ €M revenue
4. Exposure to companies active in the fossil fuel sector	5.55%
5. Share of non - renewable energy consumption and production	60.59%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%
16. Investee countries subject to social violations	0

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI



What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-10-01/2024-09-30

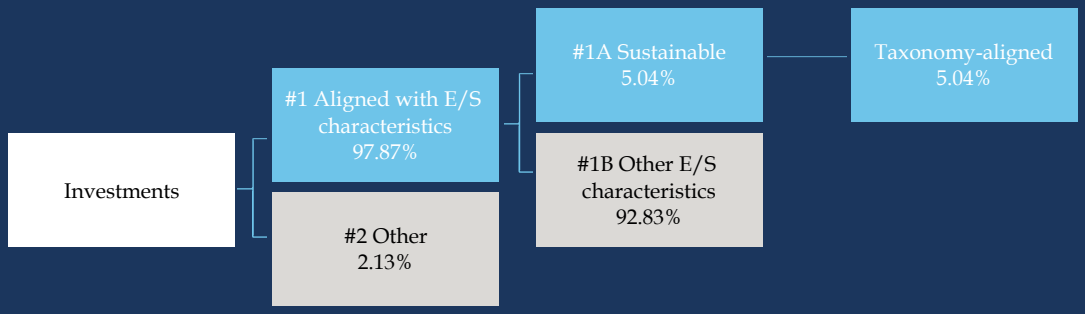
Largest investments	Sector	% of net assets	Country
German Treasury Bill	Not classified	3.01%	DE
Monte dei Paschi	Financials	2.71%	IT
BPCE SA	Financials	2.10%	FR
UBS Group AG	Financials	2.01%	CH
Traton Fin Lux SA	Consumer discretionary	1.73%	LU
Autostrade per I'Italia	Industrials	1.69%	IT
Jyske Bank A/S	Financials	1.66%	DK
Siemens Financiering	Industrials	1.61%	NL
Fortive Corp	Industrials	1.57%	US
Banque Federative du Credit Mutuel	Financials	1.57%	FR
CaixaBank SA	Financials	1.50%	ES
Carrier Global Corp	Industrials	1.46%	US
Morgan Stanley	Financials	1.46%	US
National Grid PLC	Utilities	1.46%	GB
Intesa Sanpaolo SpA	Financials	1.44%	IT

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Pre-contractual disclosure commitment:

A minimum of 80% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

Asset allocation overview	% of net assets as at September 30, 2024
#1 Aligned with E/S characteristics	97.87%
#2 Other	2.13%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of September 30, 2024:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

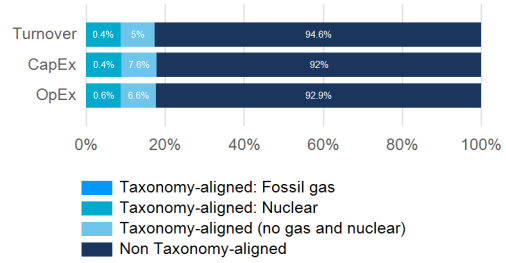
☒ Yes

☐ In fossil gas ☒ In nuclear energy

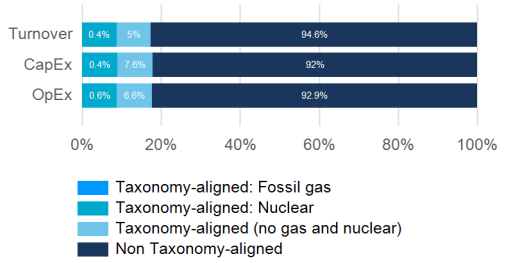
☐ No

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 94.92% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: MSCI

What was the share of investments made in transitional and enabling activities?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of investments in transitional and enabling activities is 0%.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational**

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

expenditure (OpEx) reflecting green operational activities of investee companies.

Taxonomy aligned investments	% of market value as at September 30, 2024
Transitional Turnover	0.51%
Transitional Capex	0.78%
Transitional Opex	0.54%
Enabling Turnover	3.59%
Enabling Capex	5.57%
Enabling Opex	4.71%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable. This Fund does not commit to invest in sustainable investments.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for hedging and/or investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards. However, some minimum safeguards may still be considered to apply to the extent such holdings are aligned with one or more but not all of the Fund's environmental or social characteristics.

Asset allocation overview	% of net assets as at September 30, 2024
#2 Other	2.13%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

The Fund engaged with companies held in the portfolio to establish or to commit to net zero science-based targets. During the reference period the Fund engaged with 55 companies.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Wellington Asia Credit Income Fund

Legal entity identifier:
549300TFSHJT3CMTCJ79

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of__% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending September 30, 2024:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet one or more of the following environmental or social characteristics.

1. Corporate and quasi-sovereign issuers that do not have the worst rated Environmental (E) or Social (S) ratings relative to their peer universe. In order to do this, the Fund assigns corporate and quasi-sovereign issuers an individual E and S Rating, based on Wellington Management's proprietary ratings framework, using a rating scale of 1-5, where 1 is the highest rating, and excludes those issuers that have received an E or S Rating of 5. A rating of 1 is the most positive rating, indicating that the company is a leader among its peers in managing material environmental or social risks or incorporating environmental or social factors into its practices. A rating of 5 is the most negative, indicating that the

company may be lagging its peers in managing certain material environmental or social risks or incorporating environmental or social factors into its practices. E Ratings use environmental indicators (such as energy efficiency, carbon emissions and pollutants, sustainable packaging and hazardous waste), and S Ratings use social indicators (such as corruption and bribery, labour relations, product safety and supply chain management) in the assessment of the environmental and social activities and attributes of issuers.

2. Issuers are screened to enable the Fund to apply a number of exclusionary screens in order to exclude or reduce certain harmful impacts on the environment and society. These include avoiding corporate issuers principally involved in the following industries: thermal coal, conventional weapons; or that do not have responsible practices on human rights, forced labour or do not comply with United Nations Global Compact; or harmful social activities such as adult entertainment and cannabis and sovereign debt of countries that are identified as generating a majority of export revenues from fossil fuels (in addition to the criteria set out in the Exclusion Policy).

3. Issuers with disclosed carbon data that enable the Fund to seek to achieve long term net zero carbon intensity by aiming to reduce its weighted average carbon intensity ("WACI"), as compared to the 2019 WACI of the J.P.Morgan Asia Credit Index Diversified (the "Index") by 2050.

Whilst the Index is used for WACI comparison purposes, a reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	September 30, 2024
The number of bonds of any sovereigns identified as generating >50% of export revenues from fossil fuels. Since the Fund seeks to exclude such issuers, this number should be 0.	0
The number of issuers held with an E Rating or S Rating of 5. Since the Fund seeks to exclude such issuers, this number should be 0.	0
The number of corporate issuers held identified as failing to comply with the United Nations Global Compact. Since the Fund seeks to exclude such issuers, this number should be 0.	0
The number of corporate issuers held identified as generating >25% of their revenue from thermal coal energy generation. Since the Fund seeks to exclude such issuers, this number should be 0.	0
The number of corporate issuers held identified as generating >5% of their revenue from adult entertainment. Since the Fund seeks to exclude such issuers, this number should be 0.	0
The number of corporate issuer identified as generating>10% of their revenue from the production of conventional weapons. Since the Fund seeks to exclude such issuers, this number should be 0.	0
The number of corporate issuer identified as producing cannabis. Since the Fund seeks to exclude such issuers, this number should be 0.	0
The percentage difference of the Fund's WACI and that of the Index's 2019 WACI. Since the Fund maintains a WACI that is no less than 30% below the Index's 2019 WACI, with this percentage increasing to 50% by 2030, this percentage is expected to be at least 30% and to increase to at least 50%by 2030.	-73.07%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

… and compared to previous periods?

Sustainability Indicator	September 30, 2024	September 30, 2023
The number of bonds of any sovereigns identified as generating >50% of export revenues from fossil fuels. Since the Fund seeks to exclude such issuers, this number should be 0.	0	0
The number of issuers held with an E Rating or S Rating of 5. Since the Fund seeks to exclude such issuers, this number should be 0.	0	0
The number of corporate issuers held identified as failing to comply with the United Nations Global Compact. Since the Fund seeks to exclude such issuers, this number should be 0.	0	0
The number of corporate issuers held identified as generating >25% of their revenue from thermal coal energy generation. Since the Fund seeks to exclude such issuers, this number should be 0.	0	0
The number of corporate issuers held identified as generating >5% of their revenue from adult entertainment. Since the Fund seeks to exclude such issuers, this number should be 0.	0	0
The number of corporate issuer identified as generating>10% of their revenue from the production of conventional weapons. Since the Fund seeks to exclude such issuers, this number should be 0.	0	0
The number of corporate issuer identified as producing cannabis. Since the Fund seeks to exclude such issuers, this number should be 0.	0	0
The percentage difference of the Fund's WACI and that of the Index's 2019 WACI. Since the Fund maintains a WACI that is no less than 30% below the Index's 2019 WACI, with this percentage increasing to 50% by 2030, this percentage is expected to be at least 30% and to increase to at least 50%by 2030.	-73.07%	-84.45%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Sustainability indicators may vary year over year. Comparison based on sustainable indicators effective at year end.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

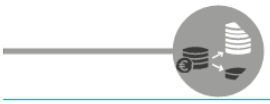
By virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund.
1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.
2. The Fund will maintain a carbon footprint (weighted average carbon intensity) that is lower than the Index. The Fund will aim to reduce its WACI to net zero by 2050, or sooner, in accordance with the Paris Agreement - PAIs: Carbon Footprint; GHG Emissions, GHG Intensity of Investee Companies.
3. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.
4. Investment Manager excludes all companies identified as "fail" by reference to the United Nations Global Compact - PAI: Violations of UN Global Compact.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	September 30, 2024
1. GHG emissions	30390.20tCO2e
2. Carbon footprint	573.94tCO2e/ €M invested
3. GHG intensity of investee companies	693.35tCO2e/ €M revenue
4. Exposure to companies active in the fossil fuel sector	2.64%
5. Share of non - renewable energy consumption and production	87.24%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI



What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-10 -01/2024-09-30

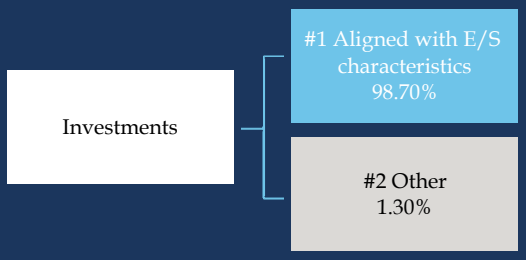
Largest investments	Sector	% of net assets	Country
US Treasury Bill	Not classified	4.39%	US
HK Airport Authority	Industrials	3.80%	HK
Standard Chartered	Financials	3.71%	GB
Panther Ventures Ltd	Real estate	3.54%	HK
Huarong Finance 2017	Financials	3.26%	HK
GS Caltex Corp	Energy	2.91%	KR
Network i2i Ltd	Communication services	2.87%	MU
US Treasury NB	Not classified	2.77%	US
Prud Funding Asia	Financials	2.57%	GB
Wynn Macau Ltd	Consumer discretionary	2.02%	MO
Meituan	Consumer discretionary	2.01%	CN
Kasikornbank PCL/Hon	Financials	1.90%	HK
AIA Group Ltd	Financials	1.88%	HK
OCBC	Financials	1.78%	SG
Power Finance Corp Ltd.	Financials	1.75%	IN

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Pre-contractual disclosure commitment:

A minimum of 67% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

Asset allocation overview	% of net assets as at September 30, 2024
#1 Aligned with E/S characteristics	98.70%
#2 Other	1.30%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

In which economic sectors were the investments made?

Sector	Sub Sector	% of net assets

Real estate	Real estate management & develop	6.36%
Sovereign	Sovereign	18.09%
Utilities	Ind pwr and renewable elec producer	2.90%
	Electric utilities	0.40%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS classification hierarchy. Source: MSCI

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of September 30, 2024:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

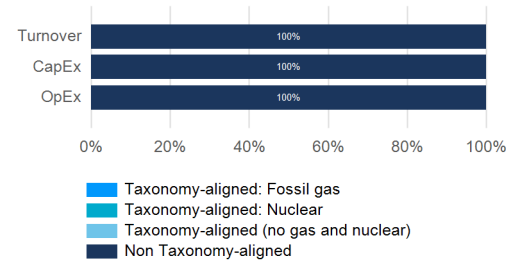
☐ Yes

☐ In fossil gas ☐ In nuclear energy

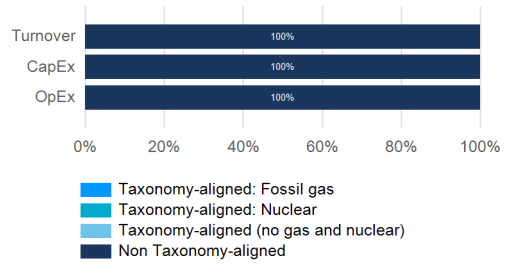
☒ No

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 82.41% of the total investments.

**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: MSCI

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of investments in transitional and enabling activities is 0%.

Taxonomy aligned investments	% of market value as at September 30, 2024
Transitional Turnover	0.00%
Transitional Capex	0.00%
Transitional Opex	0.00%
Enabling Turnover	0.00%
Enabling Capex	0.00%
Enabling Opex	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: MSCI

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Asset allocation overview	% of net assets as at September 30, 2024	% of net assets as at September 30, 2023
Taxonomy aligned investments	0.00%	0.02%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable. This Fund does not commit to invest in sustainable investments.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for hedging and/or investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, or do not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards. However, some minimum safeguards may still be considered to apply to the extent such holdings are aligned with one or more but not all of the Fund's environmental or social characteristics.

Asset allocation overview	% of net assets as at September 30, 2024
#2 Other	1.30%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

The Fund engaged with companies held in the portfolio to establish or to commit to net zero science-based targets. During the reference period the Fund engaged on these topics 19 times.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Wellington Credit Total Return Fund

Legal entity identifier:
984500A0503799E78B34

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of__% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending September 30, 2024:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet the following environmental or social characteristics.

Issuers that do not have the worst Environmental (E) or Social (S) ratings relative to their peer universe.

In order to do this, the Fund assigns issuers an ESG Rating, using a rating scale of 1-5, where 1 is the highest rating. A rating of 1 is the most positive rating, indicating that the company or issuer is a leader among its peers in managing material E, S or G risks or incorporating ESG factors into its practices. A rating of 5 is the most negative, indicating that the company or issuer may be lagging its peers in managing certain material E, S or G risks or incorporating ESG factors into its practices.

This is based on Wellington Management's proprietary ESG Rating framework as defined in the Prospectus for companies and corporates. Sovereign bonds, and where appropriate cash equivalents such as treasury bills, will be assigned an ESG rating according to the appropriate Wellington Management's proprietary ESG framework that best represents the region of the issuer. ESG ratings aim to combine Environmental indicators (such as physical climate risk, climate transition risk or natural resource risk), Social indicators (such as inequality measures, education and labour, freedom and democracy, or social factors that relate to the downward pressures supply-side dynamics can exert on a country's ability to generate economic growth over the long term) and Governance indicators (such as a country's rule of law, degree of political stability, strength of institutions, or quality of policies) into a single data point which can be used in the assessment of the environmental, social and governance activities and attributes of the sovereign issuer.

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Management Company is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability Indicator	September 30, 2024
The number of corporate and sovereign bonds held with an E Rating or S Rating of 5. Since the Fund seeks to exclude such issuers, this number should be 0.	0

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments. Source: MSCI and Wellington.

… and compared to previous periods?

Not applicable. This is the first reporting period for the Fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not commit to invest in sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:

1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy - PAI: Exposure to controversial weapons.

2. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy - PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

PAIs considered	September 30, 2024
4. Exposure to companies active in the fossil fuel sector	8.63%
5. Share of non - renewable energy consumption and production	79.95%
14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons)	0.25%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI

Wellington Management Funds (Luxembourg) III SICAV

Appendix 6 – Sustainable Finance Disclosure Regulation ("SFDR") (Unaudited)

for the financial year ended September 30, 2024

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2023-10-01/2024-09-30

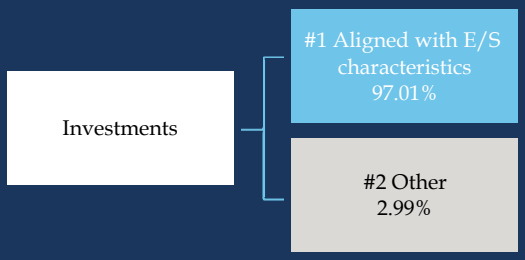
Largest investments	Sector	% of net assets	Country
US Treasury NB	Not classified	39.19%	US
US Treasury Bill	Not classified	8.65%	US
Charter Comm Operations LLC	Communication services	2.40%	US

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, sub-sovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Pre-contractual disclosure commitment:

A minimum of 80% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

Asset allocation overview	% of net assets as at September 30, 2024
#1 Aligned with E/S characteristics	97.01%
#2 Other	2.99%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of September 30, 2024:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

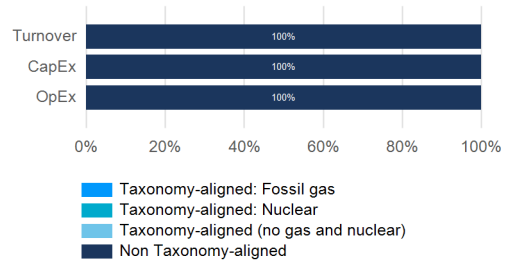
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

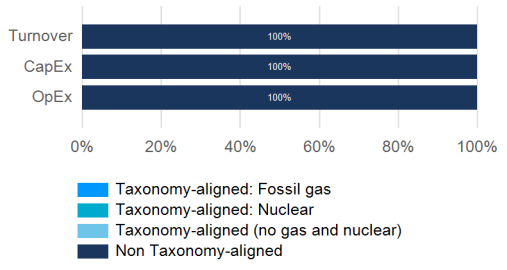
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



2. Taxonomy-alignment of investments **excluding sovereign bonds***



This graph represents 47.27% of the total investments.

**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: MSCI

Taxonomy-aligned

What was the share of investments made in transitional and enabling activities?

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Pre-contractual disclosure commitment:

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of investments in transitional and enabling activities is 0%.

Taxonomy aligned investments	% of market value as at September 30, 2024
Transitional Turnover	0.00%
Transitional Capex	0.00%
Transitional Opex	0.00%
Enabling Turnover	0.00%
Enabling Capex	0.00%
Enabling Opex	0.00%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.
Source: MSCI

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable. This is the first reporting period for the Fund.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable. This Fund does not commit to invest in sustainable investments.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for hedging and/or investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards. However, some minimum safeguards may still be considered to apply to the extent such holdings are aligned with one or more but not all of the Fund's environmental or social characteristics.

Asset allocation overview	% of net assets as at September 30, 2024
#2 Other	2.99%

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental and social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Additional information for investors in Switzerland

BNP PARIBAS, Paris, Zurich branch, Selnaustrasse 16, CH-8002, Zürich, Switzerland, is the Swiss Representative and Paying Agent. The Prospectus, the Key Information Documents, Articles of Association as well as the Company's annual and semi-annual reports may be obtained free of charge from BNP Paribas. Publications concerning the Company are made in Switzerland on the recognised electronic platform www.swissfunddata.ch.

The Company and its agent may pay retrocessions as remuneration for distribution activity in respect of Fund shares in or from Switzerland. Retrocessions are not deemed to be rebates even if they are ultimately passed on, in full or in part, to the investors. On request, the recipients of retrocessions must disclose the amounts they actually receive for distributing the collective investment schemes of the investors concerned. In the case of distribution activity in and from Switzerland, the Investment Managers and their agents may, upon request, pay rebates directly to investors. The purpose of rebates is to reduce the fees or costs incurred by the investor in question. At the request of the investor, the Investment Manager must disclose the amounts of such rebates free of charge.

In respect of the shares distributed in or from Switzerland, the place of performance and jurisdiction is the registered office of the Representative in Switzerland.

Background to the Company

Wellington Management Funds (Ireland) plc, (the "Company"), is an umbrella type open ended investment company with variable capital and segregated liability between Funds incorporated under the laws of Ireland on June 25, 1997 as a public company pursuant to the Companies Act 2014. As of December 22, 1998, the Company has been authorised by the Central Bank of Ireland (the "Central Bank") as an Undertaking for Collective Investment in Transferable Securities ("UCITS") pursuant to the provisions of the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "UCITS Regulations").

Calculation of net asset value of shares

The net asset value of the classes of shares of each Fund is expressed in the currency of denomination as laid out in the Investment Manager's report for each Fund. The net asset value of the classes of shares of each Fund is calculated at the valuation point for that Fund for the relevant Dealing Day.

The Dealing Day for each Fund is normally every Business Day. Notwithstanding this, some Business Days will be Non-Dealing Days for certain Funds where, for example, a substantial amount of a Fund's portfolio is traded in markets which are closed. A list outlining the expected Dealing Days for the Fund throughout the year is available in the Literature section https://www.wellington.com/en-gb/institutional/other-literature.

Some Funds are weekly dealing and the typical weekly Dealing Days for these Funds are as follows: The Dealing Day for Wellington Emerging Markets Local Equity Fund and Wellington Durable Companies Fund is Wednesday. The Dealing Day for Wellington Emerging Markets Opportunities Fund is Tuesday. However, please refer to the Holiday and Dealing Day Calendar, (as above), which contains a list of the actual dates of the weekly Dealing Days for these Funds. Dealing Days may be amended from time-to-time as determined by the Directors.

Business Day means every day that US Federal banks, the New York Stock Exchange and Hong Kong banks and exchanges are open for business except for:
a) Easter Monday;
b) May 1st;
c) the weekday prior to and following Christmas Day as observed by the New York Stock Exchange; and
d) such other days as the Directors may from time to time determine.

Frequency of dividend payments

Dividends will generally be declared on or about the last Business Day of the relevant dividend frequency period for the relevant distributing share class as noted in the table below. Dividends will generally be paid within seven days of the declaration date for distributing share classes only.

Shareholders can elect to reinvest dividend proceeds into additional shares of the same class or will receive dividend payments in cash by way of wire transfer or otherwise in accordance with the terms of the Account Opening Agreement and the investor guide.

The below table outlines the frequency within which the dividends will be paid.

Fund Name	*Dividend Frequency*
Wellington Blended Opportunistic Emerging Markets Debt Fund	Monthly or Quarterly*

Wellington Management Funds (Ireland) plc
Depositary's report

to the Shareholders of Wellington Management Funds (Ireland) plc

Depositary's report

We have enquired into the conduct of Wellington Management Funds (Ireland) plc (the "Company") for the financial year ended December 31, 2023, in our capacity as Depositary to the Company.

This report including the opinion has been prepared for and solely for the Shareholders in the Company as a body, in accordance with Regulation 34, (1), (3) and (4) in Part 5 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended, ('the UCITS Regulations'), and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depositary

Our duties and responsibilities are outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations. One of those duties is to enquire into the conduct of the Company in each annual accounting period and report thereon to the Shareholders.

Our report shall state whether, in our opinion, the Company has been managed in that period in accordance with the provisions of the Company's Memorandum and Articles of Association and the UCITS Regulations. It is the overall responsibility of the Company to comply with these provisions. If the Company has not so complied, we as Depositary must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Depositary opinion

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations and to ensure that, in all material respects, the Company has been managed

i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of the Constitution and the UCITS Regulations and

ii) otherwise in accordance with the Company's constitutional documentation and the appropriate regulations.

Opinion

In our opinion, the Company has been managed during the financial year, in all material respects:

i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the Constitution, the UCITS Regulations and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019, as amended ('the Central Bank UCITS Regulations'); and

ii) otherwise in accordance with the provisions of the Constitution, the UCITS Regulations and the Central Bank UCITS Regulations.

State Street Custodial Services (Ireland) Limited
78 Sir John Rogerson's Quay
Dublin 2
Ireland
April 25, 2024

The Directors present herewith the audited financial statements for the financial year ended December 31, 2023.

Corporate governance code

The Company has voluntarily adopted the Corporate Governance Code for Collective Investments Schemes and Management Companies as published by Irish Funds as the Company's corporate governance code. The Company considers that it has been in compliance with this Corporate Governance Code in all material respects during the financial year ended December 31, 2023. This code can be obtained from Irish Funds' website www.irishfunds.ie.

The Company is required to comply with the Irish Companies Act 2014 (the "Companies Act"), the Central Bank UCITS notices and guidance notes, as applicable to the Company.

The Company is subject to corporate governance practices imposed by:

(i) The Companies Act which are available for inspection at the registered office of the Company; and may also be obtained at http://www.irishstatutebook.ie;

(ii) The Articles of Association of the Company which are available for inspection at the registered office of the Company; and at the Companies Registration Office in Ireland;

(iii) The Central Bank in their UCITS Notices and Guidance Notes which can be obtained from the Central Bank's website at: http://www.centralbank.ie/regulation/industry-sectors/funds/ucits/Pages/default.aspx and are available for inspection at the registered office of the Company.

Statement of Directors' responsibilities

The Directors are responsible for preparing the annual report and the financial statements in accordance with applicable Irish law and International Financial Reporting Standards ("IFRS") as adopted by the European Union. Irish company law requires the Directors to prepare financial statements for each financial year which give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that year. In preparing these financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

Under Irish law, the Directors shall not approve the financial statements unless they are satisfied that they give a true and fair view of the Company's assets, liabilities and financial position as at the end of the financial year and the profit or loss of the Company for the financial year.

The Directors confirm that they have complied with the above requirements in preparing the financial statements.

The financial statements have been prepared on a going concern basis as the Directors are of the view that the Company can continue in operational existence for twelve months from the date of approval of these financial statements ("the period of assessment"). The Directors anticipate the financial assets will continue to generate enough cash flows on an ongoing basis to meet the Company's liabilities as they fall due.

The Directors are responsible for establishing and maintaining adequate internal control and risk management systems of the Company in relation to the financial reporting process and safeguarding the assets of the Company. Such systems are designed to manage rather than eliminate the risk of error or fraud in achieving the Company's financial reporting objectives and can only provide reasonable and not absolute assurance against material misstatement or loss.

The Directors are responsible for keeping adequate accounting records which disclose with reasonable accuracy at any time the financial position of the Company and which enable them to ensure that the financial statements are prepared in accordance with IFRS as adopted by the European Union and comply with the Companies Act and the UCITS Regulations.

Statement of Directors' responsibilities (continued)

The Directors are responsible for keeping adequate accounting records that are sufficient to:

- correctly record and explain the transactions of the Company;
- enable, at any time, the assets, liabilities, financial position and profit or loss of the Company to be determined with reasonable accuracy; and
- enable the Directors to ensure that the financial statements comply with the Companies Act 2014 and enable those financial statements to be audited.

Under the UCITS Regulations, the Directors are responsible for safeguarding the assets of the Company. In this regard they have entrusted the assets of the Company to the Depositary (State Street Custodial Services (Ireland) Limited) who has been appointed as Depositary to the Company pursuant to the terms of a Depositary Agreement. The Directors have a general responsibility for taking such steps as are reasonably open to them to prevent and detect fraud and other irregularities.

The measures taken by the Directors to secure compliance with the Company's obligation to keep adequate accounting records are the use of appropriate systems and procedures and employment of competent persons.

The accounting records are kept at State Street Fund Services (Ireland) Limited, 78 Sir John Rogerson's Quay, Dublin 2, Ireland. The Company has procedures in place to ensure all relevant accounting records are properly maintained and are readily available, including production of annual and semi-annual financial statements. The annual and semi-annual financial statements of the Company are required to be approved by the Board of Directors of the Company and the annual and semi-annual financial statements are filed with the Central Bank.

The annual statutory financial statements are required to be audited by Independent Auditors, who issue the Independent Auditors' Report to the members of the Company.

The Directors evaluate and discuss significant accounting and reporting issues as the need arises and receive a report on the internal controls of the Administrator and Depositary on an annual basis.

The Company may enter into arrangements to be able to publish corporate and financial information on a connected party or third-party website. Under such arrangements the Directors are responsible for ensuring that the owners of such a website(s) have implemented adequate governance and control processes to ensure the maintenance and integrity of corporate and financial information relating to the Company. Legislation in the Republic of Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

Compliance statement

The Directors acknowledge that they are responsible for securing the Company's compliance with its relevant obligations. These include all requirements of the Company under Section 225 of Companies Act, and all tax law within the Republic of Ireland (the "relevant obligations").

The Directors confirm that they have drawn up and adopted a policy manual setting out the Company's policies that, in the Directors' opinion, are appropriate to the Company respecting compliance by the Company with its relevant obligations.

The Directors further confirm that the Company has put in place appropriate arrangements or structures that are, in the Directors' opinion, designed to secure material compliance with its relevant obligations, including reliance on the advice of the appointed Management Company and external legal and tax advisers as considered appropriate from time to time, and that they have reviewed the effectiveness of these arrangements.

Relevant audit information

So far as the Directors are aware, there is no relevant audit information of which the Company's auditors are unaware and the Directors have taken all the steps that should have been taken as Directors in order to make themselves aware of any relevant audit information and to establish that the Company's auditors are aware of that information.

Audit committee

The Company has decided not to establish an audit committee for the following reasons:

- the Board is comprised of non-executive Directors and two independent Directors;
- the Company has appointed a Management Company, Wellington Luxembourg S.à r.l., and the Company and Management Company have adequate procedures in place that cover, in all material respects, the areas of responsibility of an audit committee, as provided for in Section 167(7) of the Companies Act and in light of the nature, scale and complexity of the Company's Funds, the Board does not believe that a separate audit committee is required in the circumstances.

Shareholder's meetings

The convening and conduct of Shareholders' meetings are governed by the Articles of Association of the Company and the Companies Act. Not more than fifteen months may elapse between the date of one annual general meeting of the Company and that of the next. The Directors may call an extraordinary general meeting whenever they think fit and extraordinary general meetings may be convened in such manner as provided by the Companies Act.

Subject to the provisions of the Companies Act allowing a general meeting to be called by short notice, an annual general meeting and an extraordinary general meeting called for the passing of a Special Resolution will be called by at least twenty-one days' notice and all other extraordinary general meetings will be called by at least fourteen days' notice.

If within half an hour from the time appointed for the meeting a quorum is not present, the meeting, if convened on the requisition of or by Shareholders, will be dissolved. In any other case it will stand adjourned to the same day in the next week, at the same time and place or to such other day and at such other time and place as the Directors may determine and if at such adjourned meeting a quorum is not present within fifteen minutes from the time appointed for holding the meeting, the Shareholders present will be a quorum.

Three Shareholders present in person or by proxy and entitled to vote will be a quorum for all purposes except that the necessary quorum for a meeting (other than an adjourned meeting) to consider the variation or abrogation of the rights attached to any class of share will be two persons holding or representing by proxy at least one third of the issued shares of the class in question and, at an adjourned meeting, one person holding shares of the class in question or his proxy.

At any general meeting, a resolution put to the vote is decided on a show of hands unless a poll is demanded by the Chairman or by such Shareholders as is provided for in the Articles of Association.

Subject to any special rights or restrictions for the time being attached to any class of shares, on a show of hands every Shareholder who is present in person or by proxy will have one vote and on a poll every Shareholder present in person or by proxy will be entitled to one vote in respect of each share they hold.

Shareholders may resolve to sanction an ordinary resolution or special resolution at a Shareholders' meeting. An ordinary resolution is a resolution of a general meeting passed by an absolute majority of the votes recorded. A special resolution must be passed in accordance with the Companies Act.

Composition and operation of the Board of Directors and the committees of the Board of Directors with administrative, management and supervisory functions

The quorum necessary for the transaction of the business of the Directors may be fixed by the Directors and unless so fixed at any other number will be two. Currently the Board of Directors of the Company is composed of five Directors, being those listed in the details of the Organisation section in these financial statements.

The business of the Company is managed by the Directors, who exercise all such powers in the Company in accordance with the Companies Act and Articles of Association of the Company.

The Directors may meet together for the dispatch of business, adjourn and otherwise regulate their meetings as they think fit.

Questions arising at any meeting are determined by a majority of votes and in the case of an equality of votes the Chairman will have a second or casting vote. A Director may, and the Secretary on the requisition of a Director will, at any time summon a meeting of the Directors.

Composition and operation of the Board of Directors and the committees of the Board of Directors with administrative, management and supervisory functions (continued)

There are no committees of the Board in existence.

Principal activities

The Company has been approved by the Central Bank as a UCITS.

The investment objectives, market review and performance review of each Fund are included under the Investment Manager's reports.

Dividends

The Directors can confirm that dividends have been declared in accordance with the Distribution Policy as laid out in the Prospectus.

Dividends were declared out of the income of the distributing share classes of those Funds and are displayed in the distribution tables in note 7.

Review of business and future developments

There was no change in the nature of the Company's business during the financial year. A summary of the performance of the Funds' share classes and their respective benchmarks, where applicable, is included in the Investment Manager's report for each Fund as appropriate. The directors don't anticipate any changes in the structure or investment objectives of the Funds.

Risk management objectives and policies

Details of the Management Company's risk management objectives and policies are included in note 12.

The Funds investment objectives and policies are disclosed in the Investment Manager's reports.

Results

The results for the financial year are set out in the Combined statement of comprehensive income on page 21.

The invasion of Ukraine by Russia

The invasion of Ukraine by Russia which began on February 24, 2022 has increased valuation, liquidity and market risk for securities issued by Ukraine, Belarus and Russia, and to a lesser extent, most global markets. As of the date of this report the resolution of this event, and the potential impact on the Funds, continues to be uncertain. Management continues to monitor developments that may impact financial markets including sanctions, actions by governments and developments of the crisis. Management will further assess the impact on the Company's portfolio operations and valuation and will take any actions needed, as facts and circumstances are subject to change and may be specific to investment strategies and jurisdictions. The fair value of the securities issued by companies in Belarus, Russia or Ukraine has since been significantly reduced through a combination of divestiture and valuation changes.

Significant events during the financial year

Changes to the Prospectus

(a) The following notable changes to the Prospectus became effective from January 1, 2023:

- Inclusion of new pre-contractual templates detailing sustainability-related aspects of the Funds and any taxonomy-related information for the Funds under Article 8 or Article 9, in order to comply with SFDR Level II information. In addition, the do no significant harm test which is applied to Sustainable Investments made by the Funds will now take into account each of the mandatory corporate and/or sovereign Principal Adverse Impacts under SFDR. This may result in divestment from certain holdings which no longer meet the new do no significant harm assessment.
- The payment of the investment management fees paid to the relevant Investment Manager for all Funds will change from quarterly to monthly in arrears.

(b) The following notable changes to the Prospectus became effective from June 9, 2023:

- The disclosures of the Wellington Global Impact Bond Fund in the Investment Policies section and the pre-contractual disclosure section relating to the ESG objectives have been amended to reflect the addition of a net zero commitment.

(c) The following notable changes to the Prospectus became effective from November 27, 2023:

- Updates to the ESG Ratings Framework section in the Investment Objectives and Policies in order to clarify the rating methodology of the ESG Ratings Framework so that it is aligned with the Investment Manager's ESG research process and capabilities.
- Update to the "Exchange of Shares" and the "Compulsory redemption of Shares" - to allow the Directors to effect a compulsory exchange of Shares or a compulsory redemption of Shares under determined circumstances.
- Swing Pricing disclosures - The "Dealing in Shares" section was updated to clarify the description of how swing pricing is applied for each Fund.
- Update to the Equity Risk Factor Disclosure - to include additional wording on the risk arising from investment in initial public offerings and, initial public offerings in India.
- Update to the Wellington Multi-Asset Total Return Income Fund Supplement – The target yield range of the Fund was increased from 3%-7% to 4%-8%.
- Update to the Wellington Opportunistic Fixed Income Fund Supplement – changes to some limits and ranges of financial derivative instruments usage.
- Updates to the pre-contractual disclosures for all Funds subject to the disclosure requirements of Articles 8 and 9 of the SFDR regulation.

Changes to the Umbrella structure

The Wellington Pan European Small Cap Equity Fund terminated on May 31, 2023.

- Wellington Global Credit Short Duration Fund's (formerly Wellington Global Credit Buy and Maintain Fund's) fixed administrative fee increased to 0.08% for all share classes.

Directors
Gerald Brady
Liam Manahan (resigned on December 31, 2023)
Marion Mulvey (appointed on January 1, 2024)
Lucinda Marrs
Sergio Betancourt
Susanne Ballauff

Gerald Brady, Liam Manahan, Lucinda Marrs, Sergio Betancourt and Susanne Ballauff served as Directors for the entire financial year. The Company has delegated the day-to-day management and running of the Company to the Management Company as its primary delegate. The Management Company has subsequently delegated certain managerial functions, under its oversight, to the Administrator, the Distributor and the Investment Managers. Consequently, all Directors of the Company are non-executive.

Directors' and Secretary's interests

The Board of Directors is not aware of any shareholding in the participating share capital of the Company by any Director or the Company Secretary and their families during the financial years ended December 31, 2023 and December 31, 2022.

DocuSign Envelope ID: 370D7DD3-A8BB-40B5-AAD7-C0633BEDAC88

Transactions involving Directors and Secretary

The Board of Directors is not aware of any contracts or arrangements of any significance in relation to the business of the Company in which the Directors or Company Secretary had any interest as defined in the Companies Act, at any time during the financial year ended December 31, 2023.

Employees

There were no employees of the Company throughout the financial years ended December 31, 2023 and December 31, 2022.

Dealings with connected persons

Regulation 43 of the UCITS Regulations "Restrictions on transactions with connected persons" states that "A responsible person shall ensure that any transaction between a UCITS and a connected person is conducted a) at arm's length; and b) in the best interest of the Shareholders of the UCITS".

The Directors of the Management Company, as responsible persons are satisfied that there are in place arrangements, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 43(1) are applied to all transactions with a connected person; and all transactions with connected persons that were entered into during the period to which the report relates complied with the obligations that are prescribed by Regulation 43(1).

Segregated liability

The Company has availed of the segregated liability provisions of the Companies Act.

Independent Auditors

The independent auditors, PricewaterhouseCoopers, have indicated their willingness to remain in office in accordance with Section 383 of the Companies Act and a resolution that they will be reappointed will be proposed at the Annual General Meeting.

On behalf of the Board:

Independent auditors' report to the members of Wellington Management Funds (Ireland) plc

Report on the audit of the financial statements

Opinion

In our opinion, Wellington Management Funds (Ireland) plc's financial statements:

- give a true and fair view of the Company's and Funds' assets, liabilities and financial position as at 31 December 2023 and of their results and cash flows for the year then ended;
- have been properly prepared in accordance with International Financial Reporting Standards ("IFRSs") as adopted by the European Union; and
- have been properly prepared in accordance with the requirements of the Companies Act 2014 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended).

We have audited the financial statements, included within the Annual Report and Audited Financial Statements, which comprise:

- the Statements of Financial Position for the Company and each of its Funds as at 31 December 2023;
- the Statements of Comprehensive Income for the Company and each of its Funds for the year then ended;
- the Statements of Cash Flows for the Company and each of its Funds for the year then ended;
- the Statements of Changes in Net Assets Attributable to Holders of Redeemable Shares for the Company and each of its Funds for the year then ended;
- the Schedules of Investments for each of the Funds as at 31 December 2023; and
- the notes to the financial statements for the Company and for each of its Funds, which include a description of the significant accounting policies.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) ("ISAs (Ireland)") and applicable law.

Our responsibilities under ISAs (Ireland) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, which includes IAASA's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Emphasis of matter - financial statements prepared on a basis other than going concern

In forming our opinion on the financial statements, which is not modified, we draw attention to note 1 to the financial statements which describes the reasons why the financial statements of Wellington Pan European Small Cap Equity Fund, Wellington Emerging Markets Local Equity Fund and Wellington Universal Vision Fund have been prepared on a basis other than going concern.

Conclusions relating to going concern

With the exception of Wellington Pan European Small Cap Equity Fund, Wellington Emerging Markets Local Equity Fund and Wellington Universal Vision Fund where a basis of accounting other than going concern has been adopted as set out in the Emphasis of matter - financial statements prepared on a basis other than going concern above, based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's and Funds' ability to continue as a going concern for a period of at least twelve months from the date on which the financial statements are authorised for issue.

With the exception of Wellington Pan European Small Cap Equity Fund, Wellington Emerging Markets Local Equity Fund and Wellington Universal Vision Fund where a basis of accounting other than going concern has been adopted as set out in the Emphasis of matter - financial statements prepared on a basis other than going concern above, in auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the Company's and Funds' ability to continue as going concerns.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Reporting on other information

The other information comprises all of the information in the Annual Report and Audited Financial Statements other than the financial statements and our auditors' report thereon. The directors are responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon. In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

With respect to the Directors' Report, we also considered whether the disclosures required by the Companies Act 2014 have been included.

Based on the responsibilities described above and our work undertaken in the course of the audit, ISAs (Ireland) and the Companies Act 2014 require us to also report certain opinions and matters as described below:

- In our opinion, based on the work undertaken in the course of the audit, the information given in the Directors' Report for the year ended 31 December 2023 is consistent with the financial statements and has been prepared in accordance with applicable legal requirements.
- Based on our knowledge and understanding of the Company and its environment obtained in the course of the audit, we have not identified any material misstatements in the Directors' Report.

Responsibilities for the financial statements and the audit

Responsibilities of the directors for the financial statements

As explained more fully in the Statement of Directors' responsibilities set out on pages 8 and 9, the directors are responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view.

The directors are also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Company's and Funds' ability to continue as going concerns, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Our audit testing might include testing complete populations of certain transactions and balances, possibly using data auditing techniques. However, it typically involves selecting a limited number of items for testing, rather than testing complete populations. We will often seek to target particular items for testing based on their size or risk characteristics. In

other cases, we will use audit sampling to enable us to draw a conclusion about the population from which the sample is selected.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA website at:

https://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8f-a98202dc9c3a/Description_of_auditors_responsibilities_for_audit.pdf.

This description forms part of our auditors' report.

Use of this report

This report, including the opinions, has been prepared for and only for the Company's members as a body in accordance with section 391 of the Companies Act 2014 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Other required reporting

Companies Act 2014 opinions on other matters

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the Company were sufficient to permit the financial statements to be readily and properly audited.
- The financial statements are in agreement with the accounting records.

Companies Act 2014 exception reporting

Directors' remuneration and transactions

Under the Companies Act 2014 we are required to report to you if, in our opinion, the disclosures of directors' remuneration and transactions specified by sections 305 to 312 of that Act have not been made. We have no exceptions to report arising from this responsibility.

[*] Excludes sale during the financial year ended December 31, 2023 of the cross investment Wellington Opportunistic Fixed Income Fund held in the Wellington Blended Opportunistic Emerging Markets Debt Fund of $Nil (2022: $89,032,562).

[**] Share class transactions between the Funds of $331,272,898 (2022: $50,457,347) that did not require the use of cash have been excluded from the combined statement of cash flows.

The accompanying notes form an integral part of these financial statements.

Investment objective and policies

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform a blended index of 50% JPMorgan Emerging Market Bond Index - Global Diversified and 50% JPMorgan Government Bond Index - Emerging Markets Global Diversified (the "Index"), primarily through investment in a diversified portfolio of US Dollar and local currency denominated emerging markets debt securities and currency instruments.

The Investment Manager uses an investment approach that seeks to take advantage of opportunities across the emerging markets debt securities spectrum, including hard currency (commonly referenced as bonds denominated in US dollars or other developed market currencies) and local currency denominated sovereign, quasi-sovereign, and corporate debt, currencies, and derivatives.

The evaluation of Sustainability Risks through the analysis of the ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's or a country's financial/economic performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company and country engagement and collaborate on new research inputs. The factors, and the extent to which they will be considered, will vary depending on the security in question. For companies they will typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks. For individual countries, key factors may include factors such as political stability, strength of institutions, climate physical and transition risk, inequality, and human capital, among others.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry and credit analysts) and external research (such as company and policymakers meetings) to assess any potential impact on the value of a security over the time horizon of the Fund. Whilst Sustainability Risks vary from issuer to issuer those that are particularly relevant to the Fund include:

a) The willingness of sovereigns to make their bond payments. The Investment Manager uses a number of factors to assess the ability and willingness of governments to pay their debts. This assessment will include an evaluation of a country's debt profile, which can be materially impacted by a country's vulnerability to shocks, and the quality of governance. When assessing the quality of governance, consideration is given to factors such as political stability, the quality of macro policies, and the strength of government institutions.
b) Changes in climate are posing an increasing risk to some sovereign issuers. Where considered to be material, climate change factors are incorporated into the assessment of sovereign risk and security selection, using a framework which considers two key types of climate risk: physical risk and transition risk.
c) Social factors such as inequality, education, labour market participation, and freedom and democracy metrics may play a role in a given country's degree of political stability and fiscal obligations.

It is not anticipated that any single Sustainability Risk will materially drive a negative financial impact on the value of the Fund. Further details on Sustainability Risks and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided at the Appendix - Sustainable Finance Disclosure Regulation (SFDR) of these financial statements.

The Index may be considered during portfolio construction and is used for performance comparison purposes.

The Fund will invest, either directly or indirectly through the use of FDIs and in a broad range of debt securities. The Fund may also buy and sell exchange-traded and OTC FDIs. The Fund may hold equity securities where they are a result of a corporate action, conversion or exercising a warrant. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

Investment objective and policies (continued)

The Fund may invest in any country which is considered by the Investment Manager to be an emerging market. These are primarily located in Latin/Central America and the Caribbean, Central and Eastern Europe, Middle East, Africa and Asia. Developed market exposures are also permitted. The Fund may invest in securities traded in China via Bond Connect (see also in the Prospectus) and may make substantial investment in securities traded on Russian markets.

As a result of the invasion of Ukraine, the Investment Manager will not make any new purchases of Russian securities for the Fund without giving notice to the shareholders in the Fund at that time. In future, subject to international sanctions being lifted, and such notice being given, the Investment Manager may in its discretion consider making new investments in Russia securities for the Fund.

The Fund is suitable for retail investors seeking long-term total return. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Blended Opportunistic Emerging Markets Debt Fund launched on April 1, 2019. The table below details the performance of all funded share classes within the Fund.

	Total returns (%) Periods ended December 31, 2023

Investment objective and policies

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the JP Morgan Government Bond Index – Emerging Markets Global Diversified Index (the "Index"), seeking to achieve the objective primarily through investment in a diversified portfolio of emerging markets local currency-denominated debt securities and currency instruments.

The Investment Manager uses an investment approach that seeks to take advantage of opportunities in local currency denominated debt and currency markets. The Investment Manager combines comprehensive top-down analysis with detailed bottom-up country research to identify the best investment opportunities. Interest rates and currencies are evaluated on two separate but parallel tracks, as the performance of those two components of the local debt market can be driven by different factors. The Investment Manager's review of individual markets includes both quantitative research (looking purely at financial and economic data) and fundamental research (incorporating a more holistic analysis of economic and political information).

The evaluation of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's or a country's financial/economic performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered will vary depending on the security in question. For companies they will typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks. For individual countries, key factors may include factors such as political stability, strength of institutions, climate physical and transition risk, inequality, and human capital, among others.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry and credit analysts) and external research (such as company and policymakers meetings) research to assess any potential impact on the value of a security over the time horizon of the Fund. Whilst Sustainability Risks vary from issuer to issuer those that are particularly relevant to the Fund include:

a) The willingness of sovereigns to make their bond payments. The Investment Manager uses a number of factors to assess the ability and willingness of governments to pay their debts. This assessment will include an evaluation of a country's debt profile, which can be materially impacted by a country's vulnerability to shocks, and the quality of governance. When assessing the quality of governance, consideration is given to factors such as political stability, the quality of macro policies, and the strength of government institutions.
b) Changes in climate are posing an increasing risk to some sovereign issuers. Where considered to be material, climate change factors are incorporated into the assessment of sovereign risk and security selection, using a framework which considers two key types of climate risk: physical risk and transition risk.
c) Social factors such as inequality, education, labour market participation, and freedom and democracy metrics may play a role in a given country's degree of political stability and fiscal obligations.

It is not anticipated that any single Sustainability Risk will materially drive a negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided at the Appendix - Sustainable Finance Disclosure Regulation (SFDR) of these financial statements.

The Index may be considered during portfolio construction and is used for performance comparison purposes.

The Fund will invest, either directly or indirectly through the use of FDIs and in a broad range of debt securities. The Fund may also buy and sell exchange-traded and OTC FDIs. The Fund may hold equity securities where they are a result of a corporate action, conversion or exercising a warrant. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

Investment objective and policies (continued)

The Fund may invest in any country which is considered by the Investment Manager to be an emerging market. These are primarily located in Latin/Central America and the Caribbean, Central and Eastern Europe, Middle East, Africa and Asia. Developed market exposures are also permitted. The Fund may invest in securities traded in China via Bond Connect (see also in the Prospectus) and may make substantial investment in securities traded on Russian markets.

As a result of the invasion of Ukraine, the Investment Manager will not make any new purchases of Russian securities for the Fund without giving notice to the shareholders in the Fund at that time. In future, subject to international sanctions being lifted, and such notice being given, the Investment Manager may in its discretion consider making new investments in Russia securities for the Fund.

The Fund is suitable for retail investors seeking long-term total return. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Emerging Local Debt Fund launched on March 29, 2010. The table below details the performance of all funded share classes within the Fund.

	Total returns (%) Periods ended December 31, 2023

Statement of comprehensive income
for the financial year ended December 31, 2023

	Notes	Financial year ended December 31, 2023 US Dollars	Financial year ended December 31, 2022 US Dollars
Income			
Income from assets held at fair value through profit or loss		68,158,649	70,778,216
Other income		7,282	330,979
Bank interest income		2,001,770	855,670
Net realised gain/(loss) on financial assets and liabilities at fair value through profit or loss		(9,589,603)	(238,607,551)
Net change in unrealised gain/(loss) on financial assets and liabilities at fair value through profit or loss		89,151,178	(16,005,530)
Total net income/(loss)		**149,729,276**	**(182,648,216)**
Expenses			
Investment management fees	5(a)	(4,187,579)	(5,164,857)
Distribution fees	5(b)	(30,938)	(29,338)
Administrative fees	5(c)	(1,499,574)	(2,071,114)
Total operating expenses		**(5,718,091)**	**(7,265,309)**
Operating profit/(loss)		**144,011,185**	**(189,913,525)**
Finance costs			
Distributions to holders of redeemable shares	7	(1,501,447)	(2,048,493)
Net income equalisation		39,121	(654,437)
Total finance costs		**(1,462,326)**	**(2,702,930)**
Profit/(loss) for the year before tax		**142,548,859**	**(192,616,455)**
Withholding tax		(709,590)	(711,226)
Capital gains tax		(552,638)	154,829
Profit/(loss) for the year after tax		**141,286,631**	**(193,172,852)**
Increase/(decrease) in net assets attributable to holders of redeemable shares from operations		**141,286,631**	**(193,172,852)**

There are no recognised gains or losses arising in the year other than the increase/decrease in net assets attributable to holders of redeemable shares of each Fund. In arriving at the results for the year all amounts above relate to continuing operations.

The accompanying notes form an integral part of these financial statements.

Statement of changes in net assets attributable to holders of redeemable shares for the financial year ended December 31, 2023

	Notes	*Financial year ended December 31, 2023 US Dollars*	*Financial year ended December 31, 2022 US Dollars*
Net assets attributable to holders of redeemable shares at the beginning of the year		1,060,343,656	1,654,095,286
Increase/(decrease) in net assets attributable to holders of redeemable shares from operations		141,286,631	(193,172,852)
Share transactions			
Proceeds from redeemable shares issued		211,011,225	39,506,455
Cost of redeemable shares redeemed		(466,215,149)	(440,187,124)
Reinvestment of distributions	7	-	101,891
Net increase/(decrease) from share transactions		**(255,203,924)**	**(400,578,778)**
Increase/(decrease) in net assets attributable to holders of redeemable shares		**(113,917,293)**	**(593,751,630)**
Net assets attributable to holders of redeemable shares at the end of the year		**946,426,363**	**1,060,343,656**

The accompanying notes form an integral part of these financial statements.

Statement of cash flows
for the financial year ended December 31, 2023

	Notes	Financial year ended December 31, 2023 US Dollars	Financial year ended December 31, 2022 US Dollars
Operating activities			
Increase/(decrease) in net assets attributable to holders of redeemable shares from operations		141,286,631	(193,172,852)
Net income equalisation		(39,121)	654,437
Distributions to holders of redeemable shares	7	1,501,447	2,048,493
Total comprehensive income/(expense) attributable to holders of redeemable shares before finance costs		**142,748,957**	**(190,469,922)**
Adjustments for:			
Movement in broker cash		11,822,052	(7,303,743)
Movement in financial assets at fair value through profit or loss		151,260,518	491,871,221
Unrealised movement on derivative assets and liabilities		977,323	(5,684,564)
Unrealised movement on foreign exchange		15,268,864	(15,415,712)
Operating cash flows before movements in working capital		**322,077,714**	**272,997,280**
Movement in receivables		(445,727)	4,769,270
Movement in payables		(463,347)	(1,184,670)
Cash inflow/(outflow) from movements in working capital		**(909,074)**	**3,584,600**
Net cash generated from/(used in) operating activities		**321,168,640**	**276,581,880**
Financing activities			
Proceeds from subscriptions		208,622,887	39,506,126
Payment of redemptions		(467,126,810)	(439,264,010)

Investment objective and policies

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to achieve the objective primarily through investment in a diversified portfolio of emerging markets local currency-denominated sovereign debt securities and currency instruments.

The Investment Manager seeks to build a portfolio that targets a return that is broadly equivalent to overall market returns but with less risk. Overall market returns are considered to be the return of a market capitalisation weighted index. The exposure of such an index to a market is broadly referred to as "Beta". Such an index can provide a certain level of diversification and return, however, traditional index methodology uses the market capitalisation of a country's outstanding debt to determine that country's weighting, which results in more-indebted countries often dominating the index. The Investment Manager considers that the Fund can be constructed to provide exposure to a market in an alternate manner to that of the indices (beta) described above but with lower risk. The Investment Manager calls this "Advanced Beta". In this regard, by utilizing the "Advanced Beta" approach the Investment Manager seeks to reduce the risk of emphasizing larger issues of debt due to strict focus on market capitalisation, by applying an additional screening process in the selection of debt securities for the Fund to provide a similar level of exposure but with lower risk.

The assessment of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect an issuer's financial performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors, and the extent to which they will be considered, will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks. Further information on the ESG factors that the Investment Manager will consider can be found in the section of the Prospectus entitled Sustainability Risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of a security over the time horizon of the Fund. Whilst Sustainability Risks vary from issuer to issuer those that are particularly relevant to the Fund include the following:

a) Changes in climate are posing an increasing risk to some sovereign issuers. Where considered to be material, climate change factors are incorporated into the assessment of sovereign risk and security selection, using a framework which considers two key types of climate risk: physical risk and transition risk.

It is not anticipated that any single Sustainability Risk will materially drive a negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided at the Appendix - Sustainable Finance Disclosure Regulation (SFDR) of these financial statements.

The JP Morgan Government Bond Index – Emerging Markets Global Diversified Index (the "Index") serves as a reference benchmark for performance and regulated average ESG score comparison and as a proxy for the overall market returns for volatility measurement.

The Fund will invest, either directly or indirectly through the use of FDIs and in a broad range of debt securities. The Fund may also buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to debt securities. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund may invest in any country which is considered by the Investment Manager to be an emerging market. These are primarily located in Latin/Central America and the Caribbean, Central and Eastern Europe, Middle East, Africa and Asia. Developed market exposures are also permitted. The Fund may invest in securities traded in China via Bond Connect (see also in the Prospectus) and may make substantial investment in securities traded on Russian markets from time to time.

Investment objective and policies (continued)

As a result of the invasion of Ukraine, the Investment Manager will not make any new purchases of Russian securities for the Fund without giving notice to the shareholders in the Fund at that time. In future, subject to international sanctions being lifted, and such notice being given, the Investment Manager may in its discretion consider making new investments in Russia securities for the Fund.

The Fund is intended for professional investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Emerging Local Debt Advanced Beta Fund launched on September 9, 2015. The table below details the performance of all funded share classes within the Fund.

	Total returns (%) Periods ended December 31, 2023					
Share class[1]	*6 mths*	*1 year*	*3 years*	*5 years*	*Since inception*	*Inception date*
USD SB	2.67%	16.50%	4.76%	5.54%	5.56%	September 9, 2015
JP Morgan Government Bond Index - Emerging Markets Global Diversified Index	4.55%	12.70%	(3.16%)	1.14%	2.71%	
EUR SC (hedged)	1.76%	14.07%	2.97%	3.57%	3.53%	September 9, 2015
JP Morgan Government Bond Index - Emerging Markets Global Diversified Index	3.26%	8.89%	0.20%	1.84%	2.85%	
GBP SC (hedged)	2.51%	15.69%	4.33%	N/A	4.19%	December 29, 2020
JP Morgan Government Bond Index - Emerging Markets Global Diversified Index	4.27%	6.34%	(0.88%)	N/A	(1.24%)	

[1]All classes are accumulating and unhedged unless otherwise noted.
Fund returns are net of fees and expenses.
Returns for periods greater than one year are annualised.
Benchmark returns are expressed in the currency of the share class unless it is a hedged benchmark.
Past performance is no indication of current or future performance.

Investment objective and policies

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the ICE Bank of America Euro High Yield Constrained Index (the "Index") and achieve the objective, primarily through investment in debt securities denominated in European currencies issued worldwide. The Fund's investment approach is based on a combination of the analysis of the credit profile of individual high yield issuers and country-level macro-economic research. Total returns will be sought through income and capital appreciation.

The Fund is denominated in Euro and the majority of debt securities held will be denominated in Euro with any non-Euro exposures in the Fund generally hedged back to Euro. The Fund will also primarily invest in debt securities which are considered by the Investment Manager to be below investment grade.

The evaluation of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of a security over the time horizon of the Fund. Whilst Sustainability Risks vary from issuer to issuer those that are particularly relevant to the Fund include:

a) Generally lower public information and disclosure for high yield corporate bonds (in comparison to investment grade corporate bonds) such that a greater level of engagement is required to identify risks.
b) In the high yield corporate bond market, higher levels of founder ownership are prevalent, which enhances governance related risks such as concentration of control and reduced diversity.
c) Climate change. Where climate change is considered to be material, climate change factors are incorporated into the assessment of credit risk and security selection, using a framework which considers two key types of climate risk: physical risk and transition risk.

Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided at the Appendix - Sustainable Finance Disclosure Regulation (SFDR) of these financial statements.

The Index may be considered during portfolio construction and is used for performance comparison purposes.

The Fund will invest, either directly or indirectly through the use of FDIs and in a broad range of debt securities. The Fund may also buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to debt securities. The Fund may hold equity securities, up to 5% of the market value of the Fund, if such securities are received as a result of a corporate restructuring or as a result of owning equity-linked securities. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in EUR.

Investment objective and policies (continued)

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Euro High Yield Bond Fund launched on May 15, 2019. The table below details the performance of all funded share classes within the Fund.

Investment objective and policies

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the Bloomberg Global Aggregate Index (the "Index") and achieve the objective, primarily through investment in a globally diversified portfolio of fixed income securities. The Fund's investment approach seeks to identify a diversified set of independent investment ideas, to efficiently allocate capital to those investment ideas and aims to manage Fund risk across a team of multiple internal portfolio managers.

The assessment of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process as, in the Investment Manager's view, Sustainability Risks can materially affect an issuer's financial performance and competitiveness.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of the assets over the time horizon of the Fund. Whilst Sustainability Risks vary from issuer to issuer those that are particularly relevant to the Fund include:

a) The willingness of sovereigns to make their bond payments. The Investment Manager uses a number of factors to assess the ability and willingness of governments to pay their debts, including contingent liabilities of the state, total debt to exports or revenue to debt, amongst others. The issue of willingness to pay also necessitates the inclusion of politics into risk assessments, as it can be a major factor in determining how bond markets will behave.
b) Changes in climate are posing an increasing risk to some sovereign issuers. Where considered to be material, climate change factors are incorporated into the assessment of sovereign risk and security selection, using a framework which considers two key types of climate risk: physical risk and transition risk.

Through interactions with management teams, the Investment Manager seeks a better understanding of these and other Sustainability Risks, incorporating them into their assessments, and looking to avoid investments in securities where the likelihood of a Sustainability Risk event is under-represented in the price of the security. The Investment Manager believes that active engagement with management can support changes in issuer behaviour and actions that benefit the Fund and help mitigate Sustainability Risks. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between issuers within regional and sector peer groups.

It is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided at the Appendix - Sustainable Finance Disclosure Regulation (SFDR) of these financial statements.

The Index may be considered during portfolio construction and is used for performance comparison purposes.

The Fund will invest, either directly or indirectly through the use of FDIs and in a broad range of debt securities. The Fund may also buy and sell exchange-traded and OTC FDIs. The Fund may hold equity securities where they are a result of a corporate action, conversion or exercising a warrant. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Global Bond Fund launched on August 31, 1999. The table below details the performance of all funded share classes within the Fund.

Investment objective and policies

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to achieve the objective primarily through investment in debt securities on a hedged interest rate duration basis. The Fund will be managed with the aim of providing exposure to credit whilst keeping portfolio turnover low and seeking to maximise total returns and mitigating against capital erosion over the long-term. The Investment Manager will use a combination of top down analysis of global investment and economic themes and bottom up credit analysis on individual industries and issuers to structure a Fund that seeks to hold securities to maturity unless their credit outlook deteriorates or securities with a better forecast return are identified.

To determine the "buy and maintain" suitability of individual securities, the Investment Manager establishes and scores the suitability of each security using a proprietary assessment tool. This tool maintains scores for securities in the Investment Manager's investment universe, which are based on three factors: secular risks to the industry, cyclicality of the industry and the underlying fundamental credit quality of the issue. These factors are important drivers of the Investment Manager's evaluation of the issuer's willingness and ability to service its debt for the duration of the investment horizon. In addition, when appropriate, this review may lead to the Investment Manager adding maturity restrictions if it foresees longer term uncertainties.

The assessment of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect an issuer's financial performance and competitiveness.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of a security over the time horizon of the Fund.

Whilst Sustainability Risks vary from issuer to issuer, particularly relevant to the Fund are changes in climate, which are posing an increasing risk to some corporate issuers. Where considered to be material, climate change factors are incorporated into the assessment of risk and security selection, using a framework which considers two key types of climate risk: physical risk and transition risk.

It is not anticipated that any single Sustainability Risk will materially drive a negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included under Sustainability Risks within the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided at the Appendix - Sustainable Finance Disclosure Regulation (SFDR) of these financial statements.

The Fund does not consider a benchmark during portfolio construction or for performance comparison purpose.

The Fund will invest, either directly or indirectly through the use of FDIs and in a broad range of debt securities. The Fund may also buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to debt securities. The Fund may hold equity securities where they are a result of a corporate action, conversion or exercising a warrant. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Investment objective and policies (continued)

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Global Credit Buy and Maintain Fund launched on June 18, 2014. The table below details the performance of all funded share classes within the Fund.

	Total returns (%) Periods ended December 31, 2023					
Share class[1]	*6 mths*	*1 year*	*3 years*	*5 years*	*Since inception*	*Inception date*
GBP S (hedged)	6.13%	9.20%	3.47%	3.13%	2.18%	June 18, 2014
GBP S Q1 (hedged) (distributing)	6.10%	9.12%	3.45%	3.14%	2.51%	April 5, 2018
GBP T (hedged)	N/A	N/A	N/A	N/A	0.40%	December 18, 2023

[1] All classes are accumulating and unhedged unless otherwise noted.
Fund returns are net of fees and expenses.
Returns for periods greater than one year are annualised.
Past performance is no indication of current or future performance.

Investment objective and policies

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns in excess of the Custom Bloomberg Global Aggregate Corporate (Fin 40% cap) USD/Euro/GBP 1% Cap $500M Min Index (ex Tier 1, Upper Tier 2, and Capital Credit securities) Index (the "Index"). The Index is composed of investment grade corporate bonds with minimum amounts outstanding denominated in US Dollars, Euros, and Sterling within the industrial, utility and financial services sectors with individual issuers capped at 1%, financials capped at 40% and excluding certain subordinated debt instruments.

The Investment Manager will actively manage the Fund, seeking to achieve the objective, primarily investing in a diversified portfolio of investment grade corporate debt instruments. The Fund's strategy is based on the philosophy that credit is a cyclical asset class, and so a thorough understanding of macro and market environments is critical to interpreting and anticipating changes in credit cycles. The Investment Manager also believes inefficiencies exist in the pricing of credit risk and so the Fund seeks to generate consistent active returns through a disciplined investment process that integrates top-down analysis of global investment themes (e.g. long-term trends, economic cycles), and specialist research (e.g. industry and issuer analysis) on individual credit sectors with bottom-up corporate security selection.

The assessment of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and their sustainability risk profiles. The Investment Manager considers ESG factors as part of its broader analysis of individual issuers, using inputs from the Investment Manager's team of ESG analysts to help identify potential risks. The factors which will be considered by the Investment Manager will vary depending on the security in question, but typically include risks related to climate change, environmental disclosure and transparency, labour relations, product safety and quality, ownership structure and management incentives.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing Sustainability Risks the Investment Manager draws upon a wide variety of internal (such as research by its team of ESG analysts) and external (such as company meetings) research to assess any potential impact on the value of the assets over the time horizon of the Fund. Whilst Sustainability Risks vary from company to company, the following is particularly relevant to the Fund:

a) Climate change transition risk reflects the risk created by the low-carbon energy transition. Companies with high emissions (generally due to the use of fossil fuels) potentially face higher expenses and lower margins due to carbon taxes, higher litigation costs, higher costs of capital, and higher potential for stranded assets. These headwinds can materially impact company fundamentals as sectors, regions, businesses, and technologies attempt to mitigate and adapt to the effects of climate change.

Through interactions with company management teams, the Investment Manager seeks a better understanding of any underlying Sustainability Risks, incorporating them into their assessments of a company's outlook, and looking to avoid investments in securities where the likelihood of a Sustainability Risk event is under-represented in the price of the security. The Investment Manager believes that active engagement with companies can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between companies within regional and sector peer groups.

As the Fund is broadly diversified, it is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided at the Appendix - Sustainable Finance Disclosure Regulation (SFDR) of these financial statements.

The Fund will invest, either directly or indirectly through the use of FDIs and in a broad range of debt securities. The Fund may also buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes. The Fund may hold equity securities where they are a result of a corporate action, conversion or exercising a warrant. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Index may be considered during portfolio construction and is used for performance comparison and baseline WACI purposes.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

Investment objective and policies (continued)

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Global Credit ESG Fund launched on February 15, 2012. The table below details the performance of all funded share classes within the Fund.

	Total returns (%) Periods ended December 31, 2023

Investment objective and policies

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the ICE Bank of America Global High Yield Constrained Index (the "Index") and achieve the objective by investing primarily in debt securities worldwide which are considered by the Investment Manager to be below investment grade.

The Fund's investment approach is based on analysis of the credit profile of individual high yield issuers combined with an analysis of the behaviour and performance of the broader economic environment. Total returns will be sought through income and capital appreciation.

The assessment of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process as, in the Investment Manager's view, Sustainability Risks can materially affect an issuer's financial performance and competitiveness. The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered by the Investment Manager will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of the assets over the time horizon of the Fund. Whilst Sustainability Risks vary from issuer to issuer those that are particularly relevant to the Fund include:

a) Generally lower public information and disclosure for high yield corporate bonds (in comparison to investment grade corporate bonds) such that a greater level of engagement is required to identify risks.
b) In the high yield corporate bond market, higher levels of founder ownership are prevalent, which enhances governance related risks such as concentration of control and reduced diversity.
c) Changes in climate are posing an increasing risk to some high yield corporate issuers. Where considered to be material, climate change factors are incorporated into the assessment of credit risk and security selection, using a framework which considers two key types of climate risk: physical risk and transition risk.

Through interactions with issuer management teams, the Investment Manager seeks a better understanding of these and other Sustainability Risks, incorporating them into its assessments, and looking to avoid investments in securities where the likelihood of a Sustainability Risk event is under-represented in the price of the security. The Investment Manager believes that active engagement with companies can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between issuers within regional and sector peer groups.

It is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided at the Appendix - Sustainable Finance Disclosure Regulation (SFDR) of these financial statements.

The Index may be considered during portfolio construction and is used for performance comparison and weighted carbon intensity purposes.

The Fund will invest, either directly or indirectly through the use of FDIs and in a broad range of debt securities. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to debt securities. The Fund may hold equity securities, up to 5% of the market value of the Fund, if such securities are received as a result of a corporate restructuring or as a result of owning equity-linked securities. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

Investment objective and policies (continued)

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Global High Yield Bond Fund launched on July 17, 2012. The table below details the performance of all funded share classes within the Fund.

Investment objective, policies and sustainable objective

The Fund is subject to the disclosure requirements of Article 9 of the SFDR.

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will seek to understand the world's social and environmental challenges and to identify and invest in debt issued by companies and organizations that it believes addresses these challenges in a differentiated way through their products, services and projects. Through the Fund's investments, the Investment Manager seeks to improve access to, and quality of, basic life essentials, reduce inequality, and mitigate the effects of climate change.

The Investment Manager will actively manage the Fund, seeking to outperform the Bloomberg Global Aggregate Hedged to US dollar Index (the "Index") and achieve the objectives primarily through investment in investment grade rated global fixed income securities issued by organisations whose core business or projects, in the opinion of the Investment Manager, address some of the world's major social and environmental challenges.

Given the Investment Manager's emphasis on investing in securities where the proceeds are addressing social or environmental challenges, the assessment of Sustainability Risks through the analysis of ESG factors is an integral part of the Fund's investment process as, in the Investment Manager's view, Sustainability Risks can materially affect an issuer's financial performance and competitiveness. The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered by the Investment Manager will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history and climate risks. The Investment Manager believes that issuers that have strengths in these areas typically have more stable credit fundamentals and can create competitive advantages by reducing material Sustainability Risks which may negatively impact their competitors.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of the assets over the time horizon of the Fund. Whilst Sustainability Risks vary from security to security, the following are particularly relevant to the Fund:

a) Measurable positive impact not being achieved or having impact activities discontinued: From time to time an issuer may decide to discontinue the activities which the Investment Manager deemed meet the impact criteria, and/or may repurpose the proceeds of a bond issue, or return capital to investors if such activities will no longer be continued. It is also possible that the issuer may fail to provide sufficient progress towards measurable impact or does not adequately measure and report on the impact activities. Any of these situations arising could lead to a bond issue falling outside of the Investment Manager's impact framework at which point the security would become a candidate for sale.
b) Exposure to negative externalities: The Investment Manager's impact analysis focuses on the use of proceeds of specific bond issues and other activities of the issuer. The Investment Manager seeks to understand how other activities of the issuing organization, or parent organization, may cause negative environmental or social harm that could offset the positive aspects of the impact activity ("negative externalities"). The Investment Manager seeks to understand and mitigate the risk of exposure to negative externalities. Exposures to negative externalities can arise and if deemed significant by the Investment Manager could lead to an investment becoming a candidate for sale from the portfolio.

Through interactions with issuer's management teams, the Investment Manager seeks a better understanding of these and any additional underlying Sustainability Risks, incorporating them into its assessments of an issuer's outlook, and looking to avoid investments in assets where the likelihood of a Sustainability Risk event is under-represented in the price of the asset. The Investment Manager believes that active engagement with issuers can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between issuers within regional and sector peer groups.

As the Fund is broadly diversified, it is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on Sustainability Risks considered and their potential impacts are included under Sustainability Risks within the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided at the Appendix - Sustainable Finance Disclosure Regulation (SFDR) of these financial statements.

The Index will be considered during portfolio construction and is used for performance comparison purposes.

Investment objective, policies and sustainable objective (continued)

The Fund will invest, either directly or indirectly through the use of FDIs and in a broad range of debt securities. The Fund may also buy and sell exchange-traded and OTC FDIs. The Fund may hold equity securities where they are a result of a corporate action, conversion or exercising a warrant. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Global Impact Bond Fund launched on April 30, 2019. The table below details the performance of all funded share classes within the Fund.

	Total returns (%) Periods ended December 31, 2023					
Share class[1]	*6 mths*	*1 year*	*3 years*	*5 years*	*Since inception*	*Inception date*

Investment objective and policies

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the ICE Bank of America Global High Yield Constrained BB-B Index (the "Index") and to achieve the objective by investing primarily in debt securities worldwide which are considered by the Investment Manager to be rated BB1 through B3 inclusive.

The assessment of Sustainability Risks through the analysis of ESG factors (including Sustainability Risks) is part of the Fund's investment process as, in the Investment Manager's view, Sustainability Risks can materially affect an issuer's financial performance and competitiveness. The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of the assets over the time horizon of the Fund. Whilst Sustainability Risks vary from issuer to issuer those that are particularly relevant to the Fund include:

a) Generally lower public information and disclosure for high yield corporate bonds (in comparison to investment grade corporate bonds) such that a greater level of engagement is required to identify risks.
b) In the high yield corporate bond market, higher levels of founder ownership are prevalent, which enhances governance related risks such as concentration of control and reduced diversity.
c) Changes in climate are posing an increasing risk to some high yield corporate issuers. Where considered to be material, climate change factors are incorporated into the assessment of credit risk and security selection, using a framework which considers two key types of climate risk: physical risk and transition risk.

Through interactions with issuer management teams, the Investment Manager seeks a better understanding of these and other Sustainability Risks, incorporating them into its assessments, and looking to avoid investments in securities where the likelihood of a Sustainability Risk event is under-represented in the price of the security. The Investment Manager believes that active engagement with companies can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between issuers within regional and sector peer groups.

It is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided at the Appendix - Sustainable Finance Disclosure Regulation (SFDR) of these financial statements.

The Index may be considered during portfolio construction and is used for performance comparison and WACI purposes.

The Fund will invest, either directly or indirectly through the use of FDIs and in a broad range of debt securities. The Fund may also buy and sell exchange-traded and OTC FDIs. The Fund may hold equity securities where they are a result of a corporate action, conversion or exercising a warrant. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in USD.

Investment objective and policies (continued)

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Higher Quality Global High Yield Bond Fund launched on January 31, 2018. The table below details the performance of all funded share classes within the Fund.

	Total returns (%) Periods ended December 31, 2023					
Share class[1]	*6 mths*	*1 year*	*3 years*	*5 years*	*Since inception*	*Inception date*
USD S	8.08%	13.76%	0.42%	4.81%	3.10%	January 31, 2018
ICE Bank of America Global High Yield Constrained BB-B Index	7.65%	13.06%	(0.31%)	4.03%	2.61%	
EUR S (hedged)	6.93%	10.70%	(0.29%)	3.28%	1.79%	January 31, 2018
ICE Bank of America Global High Yield Constrained BB-B Index hedged to EUR	6.46%	9.99%	(1.07%)	2.46%	1.24%	
USD S (hedged)	8.01%	13.29%	N/A	N/A	1.50%	April 1, 2021
ICE Bank of America Global High Yield Constrained BB-B Index hedged to USD	7.59%	12.60%	N/A	N/A	0.76%	

[1]All classes are accumulating and unhedged unless otherwise noted.
Fund returns are net of fees and expenses.
Returns for periods greater than one year are annualised.
Benchmark returns are expressed in the currency of the share class unless it is a hedged benchmark.
Past performance is no indication of current or future performance.

Statistical information

	As at December 31, 2023		*As at December 31, 2022*		*As at December 31, 2021*	
Share class[1]	*Net asset value*[*]	*NAV per share*[*]	*Net asset value*[*]	*NAV per share*[*]	*Net asset value*[*]	*NAV per share*[*]
USD S	648,524	11.9806	455,582	10.5317	371,203	11.9519

Investment objective and policies

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the JP Morgan Emerging Markets Bond Global Index (the "Index") and achieve the objective, primarily through investment in a diversified portfolio of emerging markets debt securities and currency instruments. The Investment Manager uses an investment approach that seeks to take advantage of opportunities across the emerging markets debt securities spectrum, including hard currency (commonly referenced as bonds denominated in USD or other developed market currencies) and local currency denominated sovereign, quasi-sovereign, and corporate debt, currencies and derivatives.

The evaluation of Sustainability Risks through the analysis of environmental, ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's or a country's financial/economic performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company and country engagement and collaborate on new research inputs. The factors, and the extent to which they will be considered, will vary depending on the security in question. For companies they will typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks. For individual countries, key factors may include factors such as political stability, strength of institutions, climate physical and transition risk, inequality, and human capital, among others.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry and credit analysts) and external research (such as company and policymakers meetings) research to assess any potential impact on the value of a security over the time horizon of the Fund. Whilst Sustainability Risks vary from issuer to issuer those that are particularly relevant to the Fund include:

a) The willingness of sovereigns to make their bond payments. The Investment Manager uses a number of factors to assess the ability and willingness of governments to pay their debts. This assessment will include an evaluation of a country's debt profile, which can be materially impacted by a country's vulnerability to shocks, and the quality of governance. When assessing the quality of governance, consideration is given to factors such as political stability, the quality of macro policies, and the strength of government institutions.
b) Changes in climate are posing an increasing risk to some sovereign issuers. Where considered to be material, climate change factors are incorporated into the assessment of sovereign risk and security selection, using a framework which considers two key types of climate risk: physical risk and transition risk.
c) Social factors such as inequality, education, labour market participation, and freedom and democracy metrics may play a role in a given country's degree of political stability and fiscal obligations.

It is not anticipated that any single Sustainability Risk will materially drive a negative financial impact on the value of the Fund. Further details on Sustainability Risks and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided at the Appendix - Sustainable Finance Disclosure Regulation (SFDR) of these financial statements.

The Index may be considered during portfolio construction and is used for performance and duration comparison purposes.

The Fund will invest, either directly or indirectly through the use of FDIs and in a broad range of debt securities. The Fund may also buy and sell exchange-traded and OTC FDIs. The Fund may hold equity securities where they are a result of a corporate action, conversion or exercising a warrant. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund may invest in any country which is considered by the Investment Manager to be an emerging market. These are primarily located in Latin/Central America and the Caribbean, Central and Eastern Europe, Middle East, Africa and Asia. Developed market exposures are also permitted. The Fund may invest in securities traded in China via Bond Connect (see also in the Prospectus) and may make substantial investment in securities traded on Russian markets.

Investment objective and policies (continued)

As a result of the invasion of Ukraine, the Investment Manager will not make any new purchases of Russian securities for the Fund without giving notice to the shareholders in the Fund at that time. In future, subject to international sanctions being lifted, and such notice being given, the Investment Manager may in its discretion consider making new investments in Russia securities for the Fund.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Opportunistic Emerging Markets Debt Fund launched on September 1, 2009. The table below details the performance of all funded share classes within the Fund.

Investment objective and policies

The Fund is subject to the disclosure requirements of Article 6 of the SFDR.

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to achieve the objective primarily via long and short (synthetic) exposure in an unconstrained manner to a broad range of fixed income debt securities across multiple geographies, including securities with both investment grade and non-investment grade credit ratings.

The Fund seeks to generate returns of 5%-7% of the Fund's net asset value in USD (gross of any management, administration and distribution fees) on an annual basis, with a volatility profile in line with fixed income markets. These return and volatility targets are dependent on market conditions and are not guaranteed. The Fund's investment strategy is based on the belief that fixed income market inefficiencies exist and are most prevalent outside the core developed market sovereign and investment grade corporate sectors focused on by most investors. The Investment Manager believes that these inefficiencies can be captured through researching the investment universe without constraint and by being willing to invest where the Investment Manager's research and analysis indicates the best total return opportunities arise.

The Fund does not consider a benchmark during portfolio construction or for performance comparison purposes. However, the Bloomberg Global Aggregate Index hedged to USD (the "Index") is used as a proxy for the global market for volatility measurement. The Index is comprised of fixed income securities from a broad array of geographies and sectors with a maturity of over one year.

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities.

The Fund does not consider the adverse impacts of its investment decisions on Sustainability Factors.

The Fund will invest, either directly or indirectly through the use of FDIs and in a broad range of debt securities. The Fund may also buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to debt securities. The Fund may hold equity securities where they are a result of a corporate action, conversion or exercising a warrant. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

Whilst the Fund does not promote any specific ESG characteristics or have a sustainable investment objective, the assessment of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect an issuer's financial performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which they will be considered will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of a security over the time horizon of the Fund.

Whilst Sustainability Risks vary from issuer to issuer of particular relevance to the Fund is the willingness of sovereigns to make their bond payments. The Investment Manager uses a number of factors to assess the ability and willingness of governments to pay their debts, including contingent liabilities of the state, total debt to exports or revenue to debt, amongst others. The issue of willingness to pay also necessitates the inclusion of politics into risk assessments, as it can be a major factor in determining how bond markets will behave.

It is not anticipated that any single Sustainability Risk will materially drive a negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Investment objective and policies (continued)

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Opportunistic Fixed Income Fund launched on December 14, 2017. The table below details the performance of all funded share classes within the Fund.

	Total returns (%) Periods ended December 31, 2023
